Mission Statement

The mission of the School of Graduate Studies is to promote excellence in graduate education and research University-wide and ensure consistency and high standards across the divisions. Sharing responsibility for graduate studies with graduate units and divisions, and operating through a system of collegial governance, consultation and decanal leadership, SGS defines and administers university-wide regulations for graduate education.

SGS also provides expertise, advice and information; oversees the design and delivery of programs; organizes reviews and develops performance standards; supports diversity, equity, fairness, and ethical conduct in graduate education; assists graduate units in their efforts to provide career opportunities for graduates; organizes services and financial assistance to graduate students; encourages a close and positive relationship between research and graduate instruction; and represents the cause of graduate education at the University of Toronto in the wider academic and general community.

Finally, SGS is involved directly in the oversight of teaching and research as well as having operational responsibility for interdisciplinary and interdivisional centres and institutes.

Dean's Welcome

I am delighted to welcome you to the many graduate communities of the University of Toronto. We are proud of our accomplishments as a centre for graduate education that integrates advanced scholarship and research into every degree program. Please use this calendar to learn more about the excellent programs we offer.

Here at the largest graduate school in Canada, over 12,000 graduate students are studying in an extraordinary range of scholarly fields. The diversity of our departments, centres, and institutes means that the focus and expertise that you seek is likely to be found within the graduate offerings at U of T. We also offer a number of interdisciplinary collaborative programs.

We welcome graduate applicants from around the world, inviting those who are successful to participate in advanced study that links research and scholarship with graduate training. We offer you a scholarly community of superb quality, one of the best academic library systems in the world, and a lively intellectual environment that sits within a remarkably cosmopolitan city.

You can investigate graduate studies at the University of Toronto more closely through our Web site: www.sgs.utoronto.ca. This site is also a gateway to the fields of study that you may choose. Then contact the graduate unit in which you are interested for more information.

Welcome to the University of Toronto's graduate school where your intellect and aspirations can thrive.

With my best wishes for your academic success,

Susan Pfeiffer
Dean of Graduate Studies and Vice-Provost, Graduate Education

About this Calendar

The *School of Graduate Studies Calendar* is published annually in July. A subset of its material is contained in a slimmer volume known as the *School of Graduate Studies Handbook*, which is distributed to registered students.

The complete calendar is posted on the SGS Web site at www.sgs.utoronto.ca. Printed copies of the calendar may be purchased using the online order form on the SGS Web site or in person from the SGS office at 63 St. George Street.

CALENDAR

The *School of Graduate Studies Calendar* describes the broad range of graduate study opportunities available at the University of Toronto. It also contains policies and procedures related to graduate studies.

The calendar is divided into eight sections. The term “graduate unit” refers to a department, centre, or institute.

Section 1

General Regulations outlines admission, registration, enrolment, grading, and graduation policies and procedures. Selected policies and codes established by the University are also featured in this section.

Section 2

Degree Regulations discusses general admission and degree requirements for programs offered by more than one graduate unit at the University. Specialized programs not mentioned in this section are described in the entry for the specific graduate unit offering the program.

Section 3

Fees schedules, types of fees, and fees for graduate student categories are explained.

Section 4

Financial Support and Exchange Programs describes awards, fellowships, and bursaries available to graduate students. They are organized by granting category. The section concludes with a Web page pointer to student exchange programs.

Section 5

General Information outlines University services available to enhance graduate life at U of T. Look for student housing information in this section.

Section 6

Course Codes, established by the graduate units to identify their courses, are listed in this section. Joint course designators beginning with the letter “J” identify courses shared by two or more units.

Section 7

Graduate Faculty with appointments as full members and members emeriti are listed alphabetically, together with their home unit affiliation. Associate members are listed in the individual departmental entries in section 8.

Section 8

Graduate Programs. The largest component of the calendar features a comprehensive list of programs offered by the University’s graduate units. Each entry contains valuable information about admission and program requirements as well as courses of instruction. Faculty appointed to the graduate unit are listed by category. For additional details about a graduate program, visit the unit’s Web site and/or consult the department’s handbook.

HANDBOOK

The *School of Graduate Studies Handbook* is published annually for distribution to registered graduate students. The Handbook is a subset of the *School of Graduate Studies Calendar* and contains the complete contents of the calendar *except* for Section 8, Graduate Programs.

Students can access Section 8 on the SGS Web site at www.sgs.utoronto.ca where the complete calendar is posted. Each program entry contains a direct link to the graduate unit’s Web site where more details are available. Some departments publish graduate handbooks which are another source of valuable information.

Important Notices

Changes in Programs of Study and/or Courses

The *2007/2008 School of Graduate Studies Calendar* is effective for the academic period September 1, 2007 to August 31, 2008. References in the calendar to current academic year refer to this period.

The programs of study described in this calendar are available for the years to which the calendar applies. They may not necessarily be available in later years. If the University or the School must change the content of programs of study or withdraw them, all reasonable possible advance notice and alternative instruction will be given. However, the University will not be liable for any loss, damages, or other expenses that such changes might cause.

For each program of study offered by the University through the School, the courses necessary to complete the minimum requirements of the program will be made available annually. However, we reserve the right otherwise to change the content of courses, instructors and instructional assignments, enrolment limitations, prerequisites and co-requisites, grading policies, requirements for promotion and timetables without prior notice.

Regulations and Policies

The University has several policies that are approved by the Governing Council and which apply to all students. Visit www.utoronto.ca/govcncl/pap/alphapol.htm for an alphabetical list of policies. Each student must become familiar with the policies. The University will assume that he or she has done so. The rules and regulations of the School are displayed here. Applicable University policies are either fully displayed here or listed here.

In applying to the School, the student assumes certain responsibilities to the University and the School and, if admitted and registered, shall be subject to all rules, regulations and policies cited in the calendar, as amended from time to time.

Enrolment Limitations

The University makes every reasonable effort to plan and control enrolment to ensure that all of our students are qualified to complete the programs to which they are admitted and to strike a practicable balance between enrolment and available instructional resources. Sometimes such a balance cannot be struck and the number of qualified students exceeds the instructional resources that we can reasonably make available while at the same time maintaining the quality of instruction. In such cases, the University reserves the right to limit

enrolment in the programs, courses, or sections listed in the calendar, and to withdraw courses or sections for which enrolment or resources are insufficient. Notice and alternative instruction will be given. The University will not be liable for any loss, damages, or other expenses that such limitations or withdrawals might cause.

Copyright in Instructional Settings

A student wishing to tape-record, photograph, video-record or otherwise reproduce lecture presentations, course notes or other similar materials provided by instructors must obtain the instructor's written consent beforehand. Otherwise, all such reproduction is an infringement of copyright and is absolutely prohibited. In the case of private use by students with disabilities, the instructor's consent will not be unreasonably withheld.

Person I.D. (Student Number)

Each student at the University is assigned a unique identification number. The number is confidential. The University, through the Policy on Access to Student Academic Records, strictly controls access to Person I.D. numbers. The University assumes and expects that students will protect the confidentiality of their Person I.D. number.

Notice of Collection Concerning Freedom of Information and Protection of Privacy

The University of Toronto respects students' privacy. Personal information that you provide to the University is collected pursuant to section 2(14) of the University of Toronto Act, 1971. It is collected for the purpose of administering admissions, registration, academic programs, university-related student activities, activities of student societies, financial assistance and awards, graduation and university advancement, and for the purpose of statistical reporting to government agencies. At all times it will be protected in accordance with the Freedom of Information and Protection of Privacy Act. If you have questions, please refer to www.utoronto.ca/privacy or contact the University Freedom of Information and Protection of Privacy Coordinator.

Fees and Other Charges

The University reserves the right to alter the fees and other charges described in the calendar.

Academic Calendar 2007/2008

2007

M	August	6	Civic Holiday
M	August	13	Registration for September session begins
F	August	31	Last date for payment of tuition fees to meet registration deadline
M	September	3	Labour Day
M	September	10	Most formal graduate courses and seminars begin in the week of September 10 ⁽¹⁾
F	September	14	Registration for September session ends; after this date, a late registration fee will be assessed
M	September	17	Final date to submit Ph.D. theses to SGS to avoid fee charges for 2007/2008
F	September	21	Course work must be completed and grades submitted for summer session courses and extended courses ⁽²⁾
W	September	26	Summer Session grades available for viewing by students on the Student Web Service
F	October	5	Final date for receipt of degree recommendations and submission of any required theses for master's degrees for Fall Convocation ⁽³⁾
F	October	5	Final date to submit final Ph.D. thesis for Fall Convocation
F	October	5	Final date to add full-year and September session courses ⁽⁴⁾
M	October	8	Thanksgiving Day
F	November	2	Final date to drop September session full-courses or half-courses without academic penalty
	November		Fall Convocation information and dates posted at www.utoronto.ca/convocation ; choose Fall
	December		For last day of classes before Winter break, consult graduate units concerned

2008

M	January	7	Most formal graduate courses and seminars begin in the week of January 7 ⁽¹⁾
F	January	11	Final date for registration of students beginning program in January session; after this date, a late registration fee will be assessed
T	January	15	Final date to submit Ph.D. theses without fee payment for January session
F	January	18	Course work must be completed and grades submitted for September session courses ⁽²⁾
F	January	18	Final date to add January session courses ⁽⁴⁾
W	January	23	September Session grades available for viewing by students on the Student Web Service
Th	January	31	Final date for receipt of degree recommendations and submission of any required theses for March or June graduation for master's students without fees being charged for the January session ⁽³⁾
Th	January	31	Final date for all students to request that their degrees be conferred <i>in absentia</i> in March
Th	January	31	September dual registrants must be recommended for the master's degree by this date to maintain their Ph.D. registration ⁽³⁾
F	February	29	Final date to drop full-year or January session courses without academic penalty ⁽⁴⁾

	March		March Graduation <i>in absentia</i> information posted at www.utoronto.ca/convocation , choose March <i>in absentia</i>
F	March	21	Good Friday
F	April	25	For students obtaining degrees at June Convocation, course work must be completed and grades submitted for full-year and January session courses
F	April	25	Final date for receipt of degree recommendations and submission of any required theses for master's degrees for June Convocation ⁽³⁾
F	April	25	Final date for submission of final Ph.D. thesis for students whose degrees are to be conferred at the June Convocation
F	April	25	Final date for degree recommendations of January dual registrants for the master's degree to maintain their Ph.D. registration ⁽³⁾
	May		For first day of summer classes, consult graduate unit concerned
F	May	9	Final date for registration for May session
F	May	16	Final date to enrol in May-June or May-August session courses
F	May	16	Course work must be completed and grades submitted for full-year and January session courses (except for extended courses) ⁽²⁾
M	May	19	Victoria Day
W	May	21	January Session grades available for viewing by students on the Student Web Service
	June		Spring Convocation information and dates posted at www.utoronto.ca/convocation , choose Spring
F	June	6	Final date to drop May/June F section courses without academic penalty
F	June	27	Final date for registration for July-August courses
F	June	27	Final date to drop May-August session Y section courses without academic penalty
T	July	1	Canada Day
F	July	25	Final date to drop July-August S section courses without academic penalty
F	July	25	Course work must be completed and grades submitted for May/June F section courses ⁽²⁾
W	July	30	Grades for May/June F section courses available for viewing by students on the Student Web Service

⁽¹⁾ The precise dates of commencement of courses are determined by the graduate units; students are urged to contact the relevant graduate units for information. The University policy states that the first day of classes in the September session in all teaching divisions should not be scheduled on the first and second days of Rosh Hashanah (from 1.5 hours before sunset on Wednesday, September 12 to about 1.5 hours after sunset on Friday, September 14) or on Yom Kippur (from about 1.5 hours before sunset on Friday, September 21 to about 1.5 hours after sunset on Saturday, September 22).

⁽²⁾ Graduate units may establish earlier deadlines for completion of course work and may prescribe penalties for late completion of work and for failure to complete work, provided that these penalties are announced at the time the instructor makes known to the class the methods by which student performance shall be evaluated.

⁽³⁾ For final dates for completing degree requirements, students should consult their own departments.

⁽⁴⁾ Graduate units may establish earlier deadlines to add/drop courses. Course changes for part-time special students require an earlier deadline.

Policy on Official Correspondence with Students
Safety in Field Research
Statement on Human Rights

Exemptions

The Council of the School of Graduate Studies has the power to waive the application of a regulation in individual cases. Such exemptions are granted only in exceptional circumstances and require the favourable recommendation of the graduate unit and of the School of Graduate Studies Admissions and Programs Committee.

INTRODUCTION

The University of Toronto began in 1827 as King's College at York, then the name of Toronto. Although master's degrees were being awarded by the middle of the nineteenth century, and the doctorate was established in the 1890s, the School of Graduate Studies did not become a distinct academic division within the University of Toronto until 1922. In 1965 the School was reorganized and expanded. Today it comprises about 80 departments, centres, and institutes, offering approximately 150 different graduate programs.

Most graduate units, although large enough to have a diversity of graduate courses, are small enough to allow students to have a sense of belonging to a recognized community of scholars, colleagues, and friends. The goal of graduate studies at the University of Toronto is to provide students with the best material and human resources to learn the methods and standards of research necessary to work professionally at the frontiers of knowledge. Research is central to graduate studies, particularly at the doctoral level. Research-oriented training conveys the importance of keeping pace with a subject, the knowledge of which is always changing. It fosters intellectual curiosity and a creative response to problems. It encourages the student to communicate original discoveries effectively.

In the educational process, the graduate student comes to grips with the phenomenon of emerging knowledge. The process enriches the individual as well as the community participating in the exercise. The training and experience is valuable for all areas of work, whether one is teaching in a university, working in government, industry, private enterprise, or pursuing a professional career.

Research-oriented graduate training provides the means to embark on a lifelong voyage of intellectual discovery, an opportunity and challenge that gives graduate studies pre-eminence in formal education.

ORGANIZATION OF THE SCHOOL OF GRADUATE STUDIES

The School of Graduate Studies is responsible for the oversight of all graduate programs in the University of Toronto and for developing and implementing appropriate regulations and operating procedures for admissions, programs of study, and completion of degree requirements. Individual graduate units are responsible for maintenance of the official academic records of graduate students.

According to its Constitution, the School of Graduate Studies is governed by a Council and is organized into four divisions. Each of the departments, centres, and institutes (referred to generally as graduate units) belongs to one of the divisions.

The Divisions

Division I – Humanities
Division II – Social Sciences
Division III – Physical Sciences
Division IV – Life Sciences

Graduate Education Council

The Graduate Education Council is an academic advisory body reporting to the Governing Council of the University of Toronto. The Council consists of 35 elected members and numerous ex-officio members. Each division elects five faculty members and three students to the Council; the President of the Graduate Students' Union is an ex-officio member. There are three administrative staff seats. The Council is chaired by the Dean.

The Council is primarily responsible for determining policies and regulations affecting the administration and operation of graduate studies, and for advising Governing Council on initiatives in graduate studies. The Council is concerned with the quality of graduate education across the university as a whole.

Graduate Units

Graduate units (including departments, centres, and institutes) offer degree programs and courses and conduct research.

Each graduate student is enrolled in one of the graduate departments/centres/institutes which offer graduate study. Interdisciplinary studies may be undertaken within collaborative programs, but a student must first register in a home graduate unit. The graduate unit is responsible for ensuring that each student is admitted and enrolled in an appropriate program of studies and is responsible for thesis/research supervision in conformity with the policies and procedures of the School of Graduate Studies.

The Coordinator of Graduate Studies is responsible for the administration of graduate affairs within the unit, under the direction of the chair or director.

School of Graduate Studies Centres and Institutes

The centres and institutes within the School of Graduate Studies have two major roles: the creation and development of graduate interdisciplinary programs of teaching and of research,

and the fostering of new disciplines where these cannot proceed easily within the existing University structure.

Some centres and institutes do not offer degree programs in their own areas, but offer teaching through seminars and through the sponsorship of collaborative programs.

The list of SGS Centres and Institutes is available at www.sgs.utoronto.ca/gradadmin/admin/centres.asp.

Graduate Programs

Graduate programs are listed alphabetically in Section 8 of the SGS Calendar. They are also described on the University of Toronto Web site at www.gradschool.utoronto.ca.

Degree Programs

A diverse range of both research-oriented and professional programs are offered at both the master's and doctoral levels. The University also participates in a limited number of joint degree programs involving collaboration between two or more graduate units or universities.

Collaborative Programs

The School of Graduate Studies currently offers more than 30 graduate collaborative programs. Collaborative programs emerge from cooperation between two or more graduate units. The collective experience of the participating graduate units provides the student with a broader base from which to explore a novel interdisciplinary area or some special development in a particular discipline.

The student must be admitted to, and enrol in, one of the collaborating graduate units and must fulfil all the requirements for the degree in the home unit and any additional requirements of the collaborative program. Each collaborative program is designed to allow a focus in the area of specialty. On successful completion of the program, the student receives a transcript notation.

Combined Programs

The University of Toronto offers a number of combined programs involving two existing degree programs in different disciplines. The combination may comprise two graduate programs or a graduate and an undergraduate program. In most cases, the combination involves at least one *professionally* oriented program.

Diploma Programs

A limited number of graduate diploma programs are offered.

Conjoint Programs

The University of Toronto and the Toronto School of Theology offer a limited number of graduate conjoint programs.

Graduate Faculty

Responsibility for directing all elements of graduate teaching and supervision rests with members of the graduate faculty.

Appointments to the graduate faculty are made by the chairs and directors of the graduate units in the School. Appointments are made in one of three categories:

- 1 associate member
- 2 full member
- 3 member emeritus.

Graduate faculty membership permits an instructor to perform specified functions. An associate member may generally be permitted to teach graduate courses, supervise master's theses, assist in the supervision of doctoral theses and serve as a voting member of a final oral examination but not as chair. A full member may perform all duties of an associate member as well as act as major supervisor of a doctoral thesis and chair of a final oral examination. A member emeritus may be permitted to chair a final oral examination and carry out one or more of the duties of a full member. Members emeriti may continue to serve as major supervisor of a doctoral or master's thesis but only take on new supervision with the approval of the graduate chair or director.

STUDENT CATEGORIES

The University offers admissions to two categories of graduate students: Degree or diploma Student and Special (non-degree) Student.

1 Degree or Diploma Student

A degree or diploma student is registered in a graduate program in the School of Graduate Studies.

A degree student who has completed all requirements for the Ph.D. degree exclusive of thesis research will be designated as a doctoral candidate in the School of Graduate Studies.

Degree or Diploma Student on Probation

When credentials are from a university where the program of study cannot readily be appraised by the graduate unit, the applicant may be required to register on probation for a period of at least 4 months and not more than 12 months. Applicants must hold

a recognized degree with appropriate standing.

After 4 months, but before the end of 12 months, the graduate unit may wish to recommend to the School that the student's probationary status be removed. Work completed during the period on probation will be credited towards the degree program. Students whose probationary status is not removed may remain registered on probation for the remainder of the academic year but will not be permitted to continue after that.

2 Special (non-degree) Student

Two categories of Special Students are described below. Special Students are not enrolled in a program of study which may lead to a degree. All Special Students must be enrolled in at least one graduate course; some may be enrolled in both undergraduate and graduate courses.

Special Student—Full Time

Students who are changing disciplines or require preparatory work may be admitted as full-time Special Students and enrol in a full-time program of study not leading to a degree.

Special Student—Part Time

Students wishing to take one or two graduate courses not for degree credit are admitted as part-time Special Students. Those accepted with less than mid-B standing may not apply for admission to a degree program at a later date.

ADMISSIONS STANDARDS AND PROCEDURES

The School's admission standards and procedures are designed so that students entering a graduate program may normally have the capacity and preparation necessary to meet the challenge of the program effectively. The regulations for admission specify minimal requirements only. Many graduate units have additional requirements. Meeting the minimal requirements of the graduate unit and the School does not guarantee admission.

The University reserves the right to determine whether or not credentials of other degree-granting institutions meet the standards for admission to University of Toronto programs. Admissions decisions are final and are not appealable.

The University may confer upon a person more than one graduate degree having the

same title provided the degrees are completed in different fields of study.

1 Academic Requirements for Admission

Master's Programs

- a. An appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, is required. Under exceptional circumstances, for applicants with a three-year degree, equivalency may be demonstrated, for example, through relevant work experience or additional qualifications.
- b. High academic standing equivalent to a University of Toronto mid-B or better, normally demonstrated by an average grade in the final year or over senior courses, is required.
- c. At least two letters of reference are required.
- d. Other qualifications as may be specified by a graduate unit.

Doctor of Philosophy Programs

- a. An appropriate University of Toronto master's degree, or its equivalent from a recognized university, is required. Direct entry from a four-year bachelor's degree to a Ph.D. program is also available when permitted by the graduate unit. See also Admission Requirements under Degree Regulations.
- b. An average grade equivalent to a University of Toronto B+ or better in a previous master's degree program. Where relevant, demonstrated research competence equivalent to at least a B+ grade will be considered. For direct entry applicants, an average grade equivalent to a University of Toronto A- or better in courses in the relevant discipline.
- c. At least two letters of reference are required.
- d. Other qualifications as may be specified by a graduate unit.

Other Doctoral Programs

- a. Normally, an appropriate University of Toronto master's degree, or its equivalent from a recognized university, is required. See appropriate graduate unit entry for specific details.
- b. An average grade equivalent to a University of Toronto B+ or better in master's courses. Where relevant, demonstrated research competence

equivalent to at least a B+ grade will be considered.

- c. At least two letters of reference are required.
- d. Other qualifications as may be specified by a graduate unit.

Applicants who graduated five or more years ago but without achieving sufficiently high standing for admission to the School may be considered for admission if, since graduation, they have done significant, intellectual work and/or made a significant professional contribution which can be considered equivalent to a higher academic standing. This contribution and its impact on the profession must be detailed and documented (e.g., publications, research, professional advancement, development of new skills, responsibility, etc.) and presented as part of the application. Such applicants may be considered for admission if they have achieved qualifications at least equivalent to those stated in the preceding sections and if a graduate unit so recommends.

Special Student Programs

Special Students must submit an application for admission for each academic year of study.

Applicants accepted as Special Student–Full Time must have completed an appropriate University of Toronto four-year bachelor's degree or its equivalent from a recognized university. They must have attained an average grade in the final year (or over senior courses) equivalent to mid-B or better.

Applicants accepted as Special Student–Part Time must hold an appropriate University of Toronto four-year bachelor's degree, or its equivalent, from a recognized university. Before applying, applicants should specify the courses they wish to take and obtain approval from the teaching graduate unit or graduate units.

Those accepted with less than mid-B standing may not apply for admission to a degree program at a later date.

Courses Taken as a Special Student

On the recommendation of the graduate unit, and with the School's approval, graduate courses taken as a Special Student may count for up to one full-course equivalent or 25% of the course requirements for the degree, whichever is greater, in a subsequent degree program at this University, provided that they have not already been credited towards another degree, diploma, certificate, or any other qualification. With the approval of the graduate unit, they

may serve to satisfy prerequisite requirements. Special Students programs must include at least one graduate course. Any tuition fees paid as a Special Student cannot be transferred to a subsequent degree program.

2 English Language Facility

It is essential that all incoming graduate students have a good command of English. Facility in the English language must be demonstrated by all applicants educated outside Canada whose primary language is not English. This is a requirement of admis-

sion and should be met before application, but must be met before an offer of admission is made. This requirement may be satisfied using one of the following tests. Test results that are older than two years at the time of application cannot be accepted. The applicant must retake the English language facility test. Minimum scores are shown; however, many graduate units require a higher score, and applicants should consult the graduate unit to determine whether a higher minimum score applies.

ACADEMIC DIVISION	MINIMUM SCORE REQUIREMENT Consult the department to which you are applying to determine if a higher minimum score is required		
	Paper-Based Test and TWE	Computer-Based Test and Essay Rating	Internet-Based Test and Writing and Speaking Sections
Humanities	Overall score 580 TWE 5	Overall score 237 Essay Rating 5	Overall score 93 Writing 22 Speaking 22
Social Sciences	Overall score 580 TWE 5	Overall score 237 Essay Rating 5	Overall score 93 Writing 22 Speaking 22
Physical & Engineering Sciences	Overall score 580 TWE 4	Overall score 237 Essay Rating 4	Overall score 93 Writing 22 Speaking 22
Life Sciences	Overall score 580 TWE 5	Overall score 237 Essay Rating 5	Overall score 93 Writing 22 Speaking 22

a. *Test of English as a Foreign Language (TOEFL)*

Educational Testing Service
P. O. Box 6151
Princeton, New Jersey
U.S.A., 08541-6151
Web: www.toefl.org

The TOEFL examination is offered in three formats: the traditional paper-based format (only offered on specific dates in a limited number of countries), the computer-based format (offered year-round), and the internet-based format (offered year-round). Applicants registering for the paper-based TOEFL must include the Test of Written English (TWE) component. The internet and

computer-based tests include a component similar to the TWE; the internet-based test also includes a speaking section. All applicants must satisfy the minimum TOEFL score requirements set by each of the four SGS academic divisions listed in the accompanying chart.

b. *Michigan English Language Assessment Battery (MELAB)*

English Language Institute (ELI)
University of Michigan
Ann Arbor, Michigan
U.S.A., 48109-1057
Web: www.lsa.umich.edu/eli/melab.htm

Required score: 85

- c. **International English Language Testing System (IELTS)**
University of Cambridge Local Examinations
Syndicate
1 Hills Road
Cambridge, U.K.
CB1 2EU
Web: www.ielts.org
Applicants may also contact their nearest British Council Office. Please note that applicants must take the academic module of this test.
Required score: 7.0

- d. **The Certificate of Proficiency in English (COPE)**
COPE Testing Limited
429 Danforth Avenue
P.O. Box 462
Toronto, Ontario
M4K 1P1
E-mail: info@copetest.com
Web: www.copetest.com
Required score: 4 (with at least 1 in each component and 2 in the writing component)

- e. **International ESL-Academic Preparation Level 60 (Advanced)**
School of Continuing Studies
University of Toronto
158 St. George Street
Toronto, Ontario
M5S 2V8
E-mail: scs.registrar@utoronto.ca
Web: www.learn.utoronto.ca/esl
Required score: B

Eligibility of Senior Faculty Members

Members of the faculty of the University or its federated or affiliated colleges, senior in rank to Lecturer, are normally not eligible to be graduate students proceeding to a degree at the University of Toronto. Exceptions may be granted by the SGS Admissions and Programs Committee when it is confident that the graduate program is sufficiently remote from the faculty member that academic impartiality is not compromised.

APPLICATION FOR ADMISSION TO A DEGREE PROGRAM

Procedures

- 1 Formal application for admission should be submitted using the Online Application accessible through the graduate units. Applicants must pay an application fee of \$100. Payment options: (a) online using a credit

card; (b) by mail using one of two methods (i) certified cheque or money order in Canadian funds made payable to the University of Toronto; (ii) Master Card or Visa credit card. No decision on the application will be sent to the applicant until this fee has been paid.

- 2 Applicants must arrange to have one official copy of their complete academic records from all universities attended included with their application. Letters of reference are also required. Individual graduate units may require further documentation.
- 3 Certified English translations of all international documentation written in a language other than English or French must also be submitted.

Application Deadlines

The graduate unit determines the date by which applicants should submit their applications, supporting documentation, and at least two letters of reference to be assured that they will be considered for a place in the program of their choice and for financial support. Applications received after the posted date will be considered if places and awards are still available, but early application is recommended.

For specific information on application and financial support deadlines, contact the graduate unit offering the program to which you are applying.

Earlier submission is recommended for applications from outside Canada to ensure timely arrival, particularly where special documentation (and/or translation) and proof of English language facility are required.

Not all graduate units offer January admission. Consult the graduate unit concerned for more information.

Financial Assistance

For detailed information about fellowships, see section 4 of this calendar titled Financial Support and Exchange Programs.

Acceptance

- 1 Applications for admission are decided by the graduate unit. The official acceptance letter is issued by the School of Graduate Studies. Admissions decisions are final and are not appealable.
- 2 Applicants who are offered acceptance pending receipt of final transcripts must submit one official copy of their **final transcripts to the graduate unit** before final acceptance can be approved. If final transcripts do not indicate that the expected degree has been conferred, official documentation indicating the anticipated date of

degree conferral must be submitted **before** registration.

- 3 Normally students accepted to the School of Graduate Studies must commence their program of study on the date specified in their letter of acceptance. If circumstances prevent a student from starting study on the specified date, the graduate unit may decide that the offer of admission be valid for a period not to exceed 12 months from the original commencement date. In such a case, an official transcript will be required to document any new study completed in the interim. If the period exceeds 12 months from the original date of expected commencement, a new application must be submitted.
- 4 If the graduate unit approves, students accepted to begin their programs in September will be permitted to start the preceding summer. Students taking courses during the summer will pay the Summer Session fee (academic and incidental), which is additional to the Fall and Winter Session fee. Students engaged only in research do not pay Summer Session fees.

STRUCTURE OF ACADEMIC PROGRAMS

Academic Year

In the School of Graduate Studies, the academic year begins in September and ends in August. The academic year is divided into three sessions: the Fall Session from September to December, the Winter Session from January to April, and the Summer Session from May to August.

Academic Programs

Academic programs leading to graduate degrees are defined by the units which offer them and by the degree regulations found in Section 2 for the Ed.D., Ph.D., M.A./M.Sc., M.A.Sc., M.Ed., M.Eng., and M.H.Sc. For other degrees, consult the relevant graduate unit listing in Section 8 Graduate Programs of the SGS Calendar or on the Web at www.sgs.utoronto.ca.

Minimum Period of Registration (formerly Program Length)

All academic programs specify a minimum period of registration defined as the shortest length of time a student must be registered in that program on a full-time basis in order to qualify for the degree. This period also establishes the minimum degree fee students must pay.

Residence

Many programs specify a period of residence during which the student is required to be on campus and consequently in such geographical proximity as to be able to participate fully in the university activities associated with the program. Residence provides the student with an opportunity to become immersed in the intellectual environment of the university.

Full-time Studies

Full-time graduate students are defined according to government regulations as follows:

- 1 They must be pursuing their studies as a full-time occupation and identify themselves as full-time graduate students.
- 2 They must be designated by the University as full-time students.
- 3 They must be geographically available and visit the campus regularly.
- 4 They must be considered to be full-time students by their supervisors.

If an academic program requires an absence from the University, students must apply through their graduate unit for permission to be off campus.

Part-time Studies

From first registration, part-time studies are permitted in those master's degree programs offering a part-time program. See the list of Degree Programs in the front section of this publication.

Students wishing to take one or two courses not for degree credit are admitted as part-time Special Students, in any session.

Time Limits

All degree requirements must be completed within a specific period of time. See Degree Regulations and Lapsed Status section below.

REGISTRATION POLICIES AND PROCEDURES

Registration Procedures

Graduate students are required to register at the beginning of each session they wish to attend. New graduate students will receive registration instructions prior to the registration dates listed in the Academic Calendar. Students may access Registration Instructions on the Web at www.sgs.utoronto.ca.

Students registering in programs offered by the Ontario Institute for Studies in Education of the University of Toronto (OISE/UT) should consult OISE/UT for information.

For the Fall and Winter Sessions, registration material and a Fees Invoice are sent to the student's mailing address. Every effort is made to ensure that only students who are eligible to register receive registration material. However, receiving it does not override any other notification students receive about academic status and eligibility. New students who have received a conditional offer of admission should make arrangements with their graduate unit to clear conditions as soon as possible. The first step to registration is the payment of fees or arrangements to pay such fees. The second step is the presentation of the fees receipt to the graduate unit and collection of a *School of Graduate Studies Handbook*.

A student is considered to be registered as soon as academic and incidental fees are paid or arrangements for deferral of fees payment have been made.

Summer Session Courses

All students, whether attending formal courses or engaging in research or project work, must register for the Summer Session. Summer Session registration instructions are usually sent to the student's current address or to the graduate unit in April. Doctoral, M.Sc., and M.A.Sc. students register for the September-August or January-August period when they first register in September or January, and therefore are already registered for the Summer Session.

In addition to a large program of research supervision and independent study, the School of Graduate Studies offers a limited number of graduate courses for credit towards higher degrees during the summer. Many undergraduate courses will also be available for persons requiring prerequisite work in order to enter graduate programs. Students should consult the undergraduate calendars of the faculties of interest.

Summer courses are equivalent to those offered during the Fall and Winter Sessions but vary in duration and thus in frequency of meeting. Some courses will last 12 to 14 weeks while others will meet for only 7 weeks. In some cases, prerequisite courses will be six weeks long.

For persons attending the May-August session, the maximum possible load is two full courses. The maximum load in the May-June or July-August period is one full course or equivalent.

First Registration

Students beginning their degree programs normally register for the first time in September.

In some cases graduate units may give permission for new students to start their programs either in January, May, or July.

Continuity of Registration

Failure to register as required will cause a student's registration to lapse. See Lapsed Status below.

Doctoral Students

Doctoral students must register annually until all degree requirements have been fulfilled.

Full-Time Master's Students

Once they have first registered, full-time master's students, in other than course-work only programs, must register annually in September until all degree requirements have been completed.

Full-time master's students in course-work only programs must register initially for the minimum registration period and thereafter for each session in which they are completing requirements for the degree. All full-time master's students who have completed the minimum period of registration may not register as part-time students.

Prior to completing all courses in a course-work only program, and with the permission of their graduate unit, master's students admitted to a full-time program may 'stop out' between sessions. However, no change is made to the time limit for completing the degree.

Part-Time Master's Students

Master's students proceeding to their degree on a part-time basis register in those sessions in which they are completing course requirements for the degree. When all course requirements have been completed, they must register annually until all other requirements have been completed.

Master's students are advised to consult their graduate units for further information on continuity of registration requirements, particularly with regard to the Summer Session; many graduate units expect their students to be registered for all three sessions.

Students are reminded that there are time limits for all degree programs.

Late Registration Fee

Since it is the student's responsibility to ensure that proper registration is completed on time, late registration will be subject to an additional fee as specified in the Fees section.

Failure to Register

Students will not receive credit for work completed during a session in which they have not registered.

Extension of Time for Completion of Degree Requirements

In exceptional circumstances, a degree student who has failed to complete all the requirements for the degree within the period specified in the degree regulations may be considered for a maximum of two one-year extensions provided that the graduate unit concerned so approves. To apply for an extension, the student must present to the graduate unit concerned the causes for the delay and evidence that the remaining degree requirements may be completed within the period of the extension request. See also section under Degree Regulations, Doctor of Philosophy, Program Requirements, titled Time for Completion of Program Requirements.

Lapsed Status

If a student or candidate fails to register, or is not permitted to register because the time limit for the degree sought has elapsed, registration in the School lapses. Normally, students or candidates whose registration has lapsed may not make demands upon the resources of the University, attend courses, or expect advice from their supervisor. There are two states of lapsed status, as noted below:

1 *Before the Time Limit for the Degree has Expired*

Failure to register as required within the time limit specified for the degree sought will result in lapsed status. An application for reinstatement is required and must be approved both by the graduate unit and the School, and payment is made of the prescribed fees for the year(s) in which the student or candidate failed to register.

2 *After the Time Limit for the Degree has Expired*

After the time limit for the degree has elapsed and further extensions cannot be recommended, a candidate may not register further and registration in the program is considered to have lapsed. In special circumstances, a candidate may be reinstated once only, for a maximum of 12 months. See Time for Completion of Program Requirements section in the Ph.D. regulations. These regulations apply by analogy to master's students including those who have outstanding requirements other than a thesis.

Simultaneous Registration

Simultaneous registration in two full-time programs is not permitted. With the consent of both graduate units concerned, or of the graduate unit and another faculty or school, and written notification to the School of Graduate Studies, simultaneous registration in a full-time program and a part-time program may be permitted. Two part-time registrations in different programs may also be permitted. Students are responsible for the fees charged for both programs.

Dual Registration

A student in a master's program at this University who has been offered admission to a Ph.D. program conditional on completion of the master's program, may be a dual registrant for only one session in both programs under the following conditions.

- 1 A minimal amount of work remains to complete the requirements for the master's degree. A student may enrol in a maximum of one half-course for the master's program in the one session of dual registration with the approval of the graduate unit.
- 2 Permission has been granted by the graduate unit.
- 3 The student will be engaged in full-time Ph.D. studies and will be registered full-time in the Ph.D. and part-time in the master's program. Only the appropriate Ph.D. fees will be charged.
- 4 The period of dual registration will be either September 1 to January 31 or January 1 to April 30.

In order to receive credit for the Ph.D. for the period as a dual registrant, the student must be recommended for the award of the master's degree by January 31 for September dual registrants, or by April 25 for January dual registrants. Otherwise, the Ph.D. registration will be cancelled, no credit for the Ph.D. will be allowed, and the student will continue to be registered as a master's student only. An appropriate fees adjustment will be made so that the student will be charged fees only as a master's student. Ph.D. course credit will be retained for courses completed in the period of dual registration provided the graduate unit has informed the School.

Students who are not recommended for the master's degree by the deadline and whose enrolment in the Ph.D. is thereby cancelled may not apply for dual registration a second time. They must successfully complete the requirements for the master's degree before registering in the Ph.D. program.

Leave Policy

Graduate students whose programs require continuous registration may apply to their Graduate Coordinator for a one-session to three-session leave during their program of study for

- 1** serious health or personal problems which temporarily make it impossible to continue in the program, or
- 2** parental leave by either parent at the time of pregnancy, birth or adoption, and/or to provide full-time care during the child's first year. Parental leave must be completed within twelve months of the date of birth or custody. Where both parents are graduate students taking leave, the combined total number of sessions may not exceed four.

Once on leave, students will neither be registered nor will they be required to pay fees for this period. In general, students on leave may not make demands upon the resources of the University, attend courses, or expect advice from their supervisor. As an exception, students on leave for parental or serious health reasons who wish to consult with their supervisor or other faculty are advised to make special arrangements through their department. Students on leave will not be eligible to receive University of Toronto fellowships support. In the case of other graduate student awards, the regulations of the particular granting agency apply.

Students may make application for a leave by completing the Leave Request Form and submitting it to their Graduate Coordinator for approval. The form is then sent to the School of Graduate Studies for processing. The termination date of the degree program will be extended by the duration of the leave taken, i.e., one, two, or three sessions as appropriate. Except for parental leave or in exceptional circumstances, it is not expected that a student will be granted more than one leave under the terms of this policy. Normally the start and finish of the leave would coincide with the start and end of a session. When students require a leave to begin in mid-session, they are advised to contact the Director of Student Services at the School of Graduate Studies to make special arrangements.

Leave requests that do not fall under the terms of this policy will require final approval from the School of Graduate Studies.

Withdrawal from a Graduate Program

In order to withdraw from a program, students must submit a Program Change Form to the School of Graduate Studies and return student cards to the School. Withdrawal from a gradu-

ate program should be reported immediately to the School. A rebate of fees, if any, will be determined by the date on which written notification of withdrawal is received by the School. Any application for re-admission by a student who has withdrawn must be made in competition with all other applicants.

Students enrolled in course-work only degree programs who withdraw from all courses in which they are currently enrolled must withdraw from their programs. The School will approve recommendations from the graduate units that such students be eligible to re-register at any time within 12 months following withdrawal.

ENROLMENT POLICIES AND PROCEDURES

Graduate Courses

A graduate course is understood to require at least two hours per week of lectures or seminars plus such laboratory hours as may be required.

Enrolment

After registration, students enrol with their graduate units and arrange programs of study (courses, research topics, supervisors, and so on). Students should contact the graduate unit for enrolment procedures. Enrolment should be completed by the deadline noted in the Academic Calendar.

Most of the formal classes and seminars in the Fall Session begin in the week of September following the week in which Labour Day falls. However, starting dates are determined by the graduate units, and students are urged to contact the relevant graduate units for information.

Not every course will be given in any one year. Consult the graduate unit concerning course availability.

Deadlines for Enrolment Changes

Graduate units may establish earlier deadlines for course changes. Courses must be dropped by completing a Program Change Form or by using the Web service (if the department permits access). In order to avoid academic penalties, courses must be dropped by the following deadlines.

Oct. 5, 2007	Deadline to add full courses (Y) and half-courses (H).
Nov. 2, 2007	Deadline to drop a Fall Session full course or half-course without academic penalty.

Jan. 18, 2008 Deadline to add Winter Session full courses (Y) and half-courses (H).

Feb. 29, 2008 Deadline to drop a full course (Y) or Winter Session half-course (H), or withdraw from a program without academic penalty.

Students enrolled in course-work only programs who drop all courses by the deadlines, must withdraw from the program. See Withdrawal from a Graduate Program, above.

Completion of Course Work and Grade Submission

Course work must be completed and grades submitted by the following dates:

Jan. 18, 2008 Fall Session (Y, H) courses

May 16, 2008* Fall/Winter Session (Y) and Winter Session (Y, H) courses
*For students receiving degrees at Spring Convocation, grades must be submitted by April 25.

Sep. 19, 2008 Summer Session courses and extended courses

Graduate units may establish earlier deadlines for completion of course work and may prescribe penalties for late completion of work and for failure to complete work, provided that these penalties are announced at the time the instructor makes available to the class the methods by which student performance shall be evaluated.

Course Work Extensions

Students are expected to meet the course deadlines both of the School and of the graduate units in which they are registered and are advised to plan their research projects accordingly. Students who find themselves unable to meet SGS deadlines for completing course work can, under certain conditions, receive extensions for completing the work after the date set by SGS.

1 Petitions for course work extensions

The authority to grant an extension for the completion of work in a course beyond the original SGS deadline for that course rests with the graduate unit in which the course was offered, not the instructor of the course. Students will petition the graduate unit for extensions, using a standard form provided by SGS.

The deadline for requesting an initial extension is the deadline for completion of course work and grade submission for courses offered in the relevant session, as specified in this calendar.

A student on extension who is unable to complete the required course work in the extension period specified by the graduate unit may apply to the graduate unit for a continuation of the extension (subject to the time-limits and deadlines for extensions, set out below); however, the student must make such a request before the expiry date of the extension period in place.

2 Grounds for course work extensions

Legitimate reasons for an extension can be academic in nature - e.g., unexpected problems of research in a course - or non-academic - e.g., illness. In order to ensure as much uniformity and fairness as possible in the granting of extensions (or continuations of extensions), the relevant graduate unit must be reasonably certain that:

- a. the reasons for the delay are both serious and substantiated: the student is to provide a statement detailing the reasons, together with a physician's letter in the case of illness;
- b. the student would not be granted an unfair academic advantage over fellow students in the course;
- c. the student would not be placing in jeopardy the normal and satisfactory completion of new course work; and
- d. the student does have a reasonable chance of completing outstanding requirements within the time to be allotted.

3 Time-limits for course work extensions

If a graduate unit grants a petition for an extension, it must specify an extension period, which is not to run beyond the SGS deadline for completion of course work and grade submission following the original SGS deadline for the course. Thus, the deadlines for course extensions are as follows:

May 16, 2008 Fall Session (Y, H) courses

Sep. 19, 2008 Fall/Winter Session (Y) and Winter Session (Y, H) courses

Jan. 16, 2009 Summer Session courses and extended courses

A graduate unit may grant a continuation of an extension that is already in place provided that it does not extend the total period

of the extension beyond the foregoing deadlines.

Extensions beyond these deadlines will require the approval of both the graduate unit and the SGS Admissions and Programs Committee.

4 Grade-reporting procedures

The graduate unit will assign the temporary course report of 'SDF' ('Standing Deferred') to a student on extension, pending receipt from the instructor of a final course report. The final course report will take the form either of a regular grade or of the non-grade report 'INC' ('Incomplete'), as appropriate. It is due no later than the SGS deadline for completion of course work and grade submission following the original one for the course. If, by that date, a final grade is not available *and* the student has not submitted the outstanding course work, then the report of 'SDF' will be replaced by one of 'INC'. This will be a permanent transcript entry. (Amendments will require the approval of the SGS Admissions and Programs Committee.)

5 SGS and home graduate unit notification

Graduate units are to notify SGS of extensions no later than the original deadlines for submitting grades for the relevant courses or, in case of continuations, no later than the expiry dates of the original periods of extension, providing in each case the new deadline for completion of course work.

A graduate unit should, in addition, notify the graduate unit in which the student is registered when it is not the same as the one granting the extension.

Extra Courses Not Required for the Degree

Graduate units may permit students to enrol in additional courses not required for the degree. Such courses must be so designated on the student's enrolment form. These courses are subject to the same regulations regarding withdrawal, failure, and failure to complete work as are courses required for the degree, except that repetition or replacement of failed or incomplete courses may be waived by the graduate unit.

Prerequisite Courses

At least B- is required in all prerequisite courses but some graduate units may require a higher average; students should consult the graduate unit in advance.

Reading and/or Research Courses

Reading and/or research courses should involve as much reading and work as a normal seminar or other type of graduate course; written work should be a requirement of the course. Reading and/or research courses are subject to the grading practices policy in the same way as any other course.

Only faculty holding a graduate appointment may direct a reading and/or research course, and they must hold a faculty appointment in the graduate unit where the course is being offered, normally in the student's home graduate unit. In general, both the student and instructor should be on campus and the frequency of their meeting should be consistent with other courses.

Approval to take a reading and/or research course is given by the graduate unit.

Seminar/Workshop Courses

Some graduate units offer seminar/workshop courses. These courses vary in format and delivery from unit to unit, and they may or may not count towards the number of courses required for the completion of a degree program. Consult the home graduate unit for details and program requirements.

Auditing of Graduate Courses

Graduate units determine if they wish to allow auditing of their courses and which groups of students and non-students specified in the University's Policy on Auditing of Courses they wish to allow. When auditing is allowed, the final decision to permit an individual to audit rests with the instructor of the course. In all cases, students registered in the University who wish to audit courses have priority over others. An auditor may attend lectures and other class meetings, take part in class discussions, and, when the appropriate fee is paid, receive written confirmation of attendance. An auditor will not receive evaluations of participation and will not be allowed to submit assignments or write examinations and tests except by special and express permission. Audited courses are not recorded on the student's official transcript. The University's Code of Student Conduct applies to auditors. Further information about access, Certificates of Attendance, and fees for auditing may be obtained from the graduate school's Office of the Director of Student Services.

GOOD ACADEMIC STANDING AND SATISFACTORY ACADEMIC PROGRESS

To be in good academic standing, a student registered in a degree program in the School of Graduate Studies must:

- 1 comply with the General Regulations of the School as well as with the Degree Regulations and program requirements governing that degree program; and
- 2 make satisfactory progress toward the completion of the degree.

All degree students are admitted under the General Regulations of the School, described in Section 1 of this *Calendar*. The Degree Regulations for the various doctoral and master's degrees offered by the School are specified in Section 2 of this *Calendar* and in Section 8 of this *Calendar*, under the entry of the graduate unit offering the graduate program leading to the relevant degree. The specific requirements for the various graduate programs offered in the School are described in Section 8, under the entry of the graduate unit offering the program.

Failure to maintain good academic standing may result in various sanctions, including ineligibility for fellowships, lowest priority for bursaries and assistantships, and even termination. The School may terminate the registration and eligibility of a student

- 1 who fails to comply with the General Regulations of the School, the relevant Degree Regulations, or the specific degree requirements of the graduate unit in which the student is registered or
- 2 who fails to maintain satisfactory progress in the degree program in which the student is registered, as measured either by the general standards of the School or by the specific ones of the graduate unit.

Full-Time Studies

Students registered as full-time students in the School of Graduate Studies must be engaged in their studies on a full-time basis, as required by government regulations for full-time graduate studies. (See "Full-time Studies", above.) A full-time student may be absent from the University for an extended period or may participate in a program offered by another university if and only if the student has received written permission from the graduate unit in which he or she is registered. A graduate student who, in a given session, is absent from the University without receiving prior approval may lose good academic standing. In exceptional cases, a graduate unit may recommend to the School the termination of the student's registration and eligibility.

Timely Completion of Graduate Program Requirements

Each graduate unit establishes specific requirements for degree programs, in addition

to those of the School, as well as standards of satisfactory performance and progress. These requirements and standards are described in the appropriate entry of Section 8 of this *Calendar* and in material published separately by graduate units. Continuation in a degree program requires satisfactory progress toward the completion of that program. A student's progress in a degree program will be considered satisfactory only if the student satisfies and completes the various requirements for that degree in a manner consistent with the graduate unit's time line for completion of the degree. A graduate unit may recommend to the School that a student's registration and degree eligibility be terminated when a student fails to maintain satisfactory progress toward the completion of the degree.

Satisfactory Completion of Graduate Courses

Satisfactory performance in a degree program requires the completion of every course taken for graduate credit with a grade of at least a B-; some graduate units may require a minimum grade above a B- for some or all courses. If a student fails to complete a graduate course in a satisfactory manner (i.e., receives a grade report of 'FZ' or 'NCR' in a course, receives a grade report below the minimum acceptable by the graduate unit, or receives a non-grade report of 'INC'), then the graduate unit in which the student is registered may recommend to the School the termination of registration and eligibility of that student. If the student is permitted to continue, he or she must repeat the relevant course, or an alternative course recommended by the graduate unit and approved by the School, and obtain a satisfactory grade. (The report for the course that was not completed in a satisfactory manner as well as the report for the repeated or alternative course will appear on the student's academic record.)

Supervision and Satisfactory Progress in a Ph.D. Program

A Ph.D. student is expected, with the assistance of the graduate unit, to select a supervisor and, with the assistance of the supervisor and graduate unit, to constitute a supervisory committee, consisting of the supervisor and at least two other members of the graduate faculty, as early as practicable in the student's program but, in any case, no later than the time specified by the time frame established by the graduate unit. The student's choice of supervisor and supervisory committee is subject to the approval of the graduate unit in which the student is registered. A student who encounters

difficulties setting up a supervisory committee should consult the chair/director or the graduate coordinator of the graduate unit in advance of the relevant deadline. A student who fails to constitute a supervisory committee by the required time may lose good academic standing.

A student is expected to meet with this committee at least once a year, and more often if the committee so requires. At each meeting, the supervisory committee will assess the student's progress in the program and provide advice on future work. If in each of two consecutive meetings, a student's supervisory committee reports that the student's progress is unsatisfactory, the graduate unit may recommend to the School the termination of registration and eligibility of that student. A student who encounters difficulties arranging a meeting of this committee should consult the chair/director or the graduate coordinator of the graduate unit in advance of the relevant deadline for doing so. A student who, through the student's own neglect, fails to meet with the supervisory committee in a given year will be considered to have received an unsatisfactory progress report from the committee.

Time Limit for Completion of Program Requirements in a Ph.D. Program

A student enrolled in a full-time (as opposed to a flexible-time) Ph.D. degree program will be denied further registration in that program and will have his or her eligibility terminated at the end of the third year of registration, in the case of a four-year program, or at the end of the fourth year of registration, in the case of a five-year program, if by that time either

- 1 the student has not completed all requirements for the degree exclusive of thesis research—including course requirements, language requirements, qualifying departmental examinations—or
- 2 the student does not have an approved thesis topic, supervisor, or supervisory committee.

Note: The foregoing time limit does not apply to courses that run continuously throughout the program, e.g., ongoing research seminar courses.

In exceptional circumstances, a student who has not met these requirements may be permitted to register in the program for two further sessions at the discretion of the graduate unit concerned. Continuation beyond two sessions will require the approval of both the graduate unit and the SGS Admissions and Programs Committee.

Completion of the program requirements identified above will signal the achievement of candidacy.

ACADEMIC APPEALS

General

Graduate students may dispute substantive or procedural academic matters, including grades, evaluation of comprehensive examinations and other program requirements; decisions about the student's continuation in any program; or concerning any other decision with respect to the application of academic regulations and requirements to a student. Decisions related to admission to an academic program, including admission to the doctoral program for current master's students, are not subject to appeal. Appeals must be initiated within the student's home graduate unit unless the appeal relates to a course outside the home unit, in which case, it must be initiated in the graduate unit in which the course was taken, upon notification to the student's home graduate unit chair.

Exception

The process of academic appeal described in this policy must be followed for all disputes *except appeals related to failure of a final Ph.D. oral examination or related to termination of registration in a program*. Such appeals must be made directly to the SGS Graduate Academic Appeals Board (GAAB). *These appeals begin at Graduate Appeal Step 3.* In some such cases, the Chair of GAAB may refer the appeal to the Graduate Department Academic Appeals Committee (GDAAC) for prior consideration and a recommendation to GAAB. The GDAAC does not have the right to overturn a failed final Ph.D. oral examination result or a termination of registration, but may recommend that such a decision be considered further by GAAB.

Informal Mediation

At any stage prior to filing an appeal with the SGS Graduate Academic Appeals Board, a student may consult the relevant SGS Vice-Dean for advice and/or informal mediation. The Vice-Dean will serve as informal mediator, attempting to resolve the dispute or clarify issues. Timelines are not affected by mediation. Consultation with the Vice-Dean at an early stage is encouraged.

Steps

The overall graduate appeals process is set out in the table below. Students should note the timelines for each stage carefully.

Step 1 – Informal

In the case of dispute, students must first attempt to resolve the matter with the instructor or other person whose ruling is in question. Should the matter not be resolved with the

instructor, and should the student wish to pursue the matter, the student must discuss the matter with the graduate coordinator or associate chair of the department.

Step 2 – Department-level Appeal

Should such discussions fail to resolve the matter, the student may make a formal appeal in writing to the Graduate

STEPS AND TIMELINES		
TIMELINE FOR STUDENT ACTION AT EACH STAGE <i>See Note A below.</i>	STEP <i>See Note B below.</i>	TIMELINE FOR DECISION/ACTION BY UNIVERSITY BODY AT EACH STAGE <i>See Note C below.</i>
	1 Informal a Student to instructor b Student to graduate coordinator	
8 weeks from date of decision being appealed	2 Department-level Appeal Notice of Appeal to GDAAC ¹ Note: Appeals related to failure of the final Ph.D. oral examination or to termination of registration in a graduate program must be made directly to GAAB ² – see Step 3b below.	8 weeks from filing of Notice of Appeal to GDAAC ¹
a 8 weeks from decision of chair b 8 weeks from written notification of failure of the final Ph.D. oral examination or termination of registration in a graduate program	3 SGS Appeal a Notice of Appeal to GAAB ² b Appeal begins here for students who wish to appeal failure of the final Ph.D. oral examination or termination of registration in a graduate program.	8 weeks from filing of Notice of Appeal to GAAB ²
90 days from decision of GAAB ²	4 Governing Council Appeal Notice of Appeal to GCAAC ³	N/A

Note A: A student may apply, in writing and with reasons, for an extension of time. Such applications may be made to the Chair of GDAAC for department-level appeals or to the GAAB for SGS-level appeals. Any extension is within the discretion of the GDAAC Chair, or the GAAB, as appropriate, where the view is that compelling reasons exist. (Consult with the GCAAC Secretary regarding those guidelines and procedures).

Note B: Informal mediation is available via the SGS Vice-Dean at any stage before filing an appeal with the GAAB. Consultation with the Vice-Dean at an early stage is encouraged.

Note C: The chair of the appeal body retains discretion to extend time limits applicable to its response at any stage where, in its view, compelling reasons exist.

¹ Graduate Department Academic Appeals Committee

² Graduate Academic Appeals Board

³ Governing Council Academic Appeals Committee

Department Academic Appeals Committee (GDAAC). The student must complete a Notice of Appeal to the GDAAC; a copy of this Notice is available from the graduate coordinator or associate chair in every graduate department. This form must be completed and delivered to the chair of the department or the chair of GDAAC within the specified timeline of 8 weeks from the date of the decision under appeal. The Chair of the Committee will determine, at his or her sole discretion, whether the appeal will proceed by way of an oral hearing and/or written submissions. In either case, at the conclusion of the hearing and/or review of the written submissions, the GDAAC will make a recommendation to the chair of the graduate department regarding the merits of the appeal. The chair will then render the department-level appeal decision. Guidelines for chairs are made available to all parties in an appeal.

Step 3 – Appeal to GAAB

- a The student may appeal from the decision of the chair of the department by filing a Notice of Appeal to the SGS Graduate Academic Appeals Board (GAAB) within 8 weeks of the decision of the Chair.
- b Appeal to GAAB is the first step for a student who is making an appeal regarding the failure of the final Ph.D. oral examination or termination of registration in a graduate program.

Step 4 – Governing Council Appeal

A decision of the Graduate Academic Appeals Board (GAAB) may subsequently be appealed by a student to the Governing Council's Academic Appeals Committee, in accordance with its guidelines and procedures. An appeal to this Committee shall be commenced by filing a notice of appeal with its Secretary no later than ninety days after the date of the GAAB decision under appeal.

POLICIES

A number of important policies affecting graduate students are included in the SGS Calendar. However, there are numerous additional policies and guidelines affecting graduate studies. These may be viewed at www.sgs.utoronto.ca/current/policies/index.asp. Further University of Toronto policies are at www.utoronto.ca/govcncl/pap/alphapol.htm.

GRADUATE GRADING AND EVALUATION PRACTICES POLICY

There are currently two grading policies affecting graduate students: the Graduate Grading and Evaluation Practices Policy (GGEPP) and the University Grading Practices Policy (UGPP). Both are under review. The text of the GGEPP is provided here. The university-wide policy is accessible at www.utoronto.ca/govcncl/pap/policies/grading.pdf.

Purpose

The purpose of the Graduate Grading and Evaluation Practices Policy is to ensure:

- (a) that grading practices in the School of Graduate Studies are consistent with those throughout the University and reflect appropriate academic standards;
- (b) that the evaluation of student performance is made in a fair and objective manner against these academic standards;
- (c) that grade scales in the School of Graduate Studies are compatible with those in other divisions of the University.

Application of Policy

The Policy applies to all individuals and committees taking part in the evaluation of student performance in courses in the School of Graduate Studies.

Amendment to Policy

Amendments to the Policy shall be recommended by the School of Graduate Studies Council through the Committee on Academic Policy and Programs to the Academic Board.

Distribution of Policy

A copy of the Graduate Grading and Evaluation Practices Policy shall be published in the SGS Calendar. A copy of the Calendar or other document containing the policy shall be given to all students upon initial registration and to all instructors and others involved in the evaluation of student performance.

The Policy is in three parts: Part I deals with grades, Part II outlines grading procedures, and Part III is the administrative appendix from the University Grading Practices Policy for undergraduate divisions, available upon request from the Graduate Student Services Office.

PART I: GRADES

Meaning of Grades

Grades are a measure of the performance of a student in individual courses. Each student

shall be judged on the basis of how well he or she has command of the course materials.

- I.1 A grade assigned in a course is not an assessment of standing within a program of studies. To determine the requirements for credit and standing in a program of studies, the academic regulations of the School of Graduate Studies and the appropriate graduate department, centre or institute should be consulted.
- I.2 Grades for each course shall be assigned with reference to the following meanings:

Excellent
Good
Adequate
Inadequate

Grade Scales

- I.3 Courses taken for graduate credit are assigned a letter grade according to the School of Graduate Studies usage as follows:

Letter Grade	Grade Meaning
A+	Excellent
A	
A-	
B+	Good
B	
B-	
FZ	Inadequate

Wherever an undergraduate course taken by a graduate student is assigned a numerical grade, the mark will be translated into a letter grade according to the following equivalencies:

Letter Grade	Grade Meaning
A+	90-100%
A	85-89%
A-	80-84%
B+	77-79%
B	73-76%
B-	70-72%
FZ	0-69%

Credit/No Credit Courses

A special category of graduate courses designated in graduate unit listings will be graded Credit (CR) or No Credit (NCR). Such courses are to be offered at the option of the graduate unit and must have the approval of the executive committee of the appropriate Division. CR and NCR evaluations are assigned for courses in which only very broad distinctions in assessing the quality of student performance are judged appropriate.

Non-Grade Course Reports

The following non-grade course reports may appear on transcripts:

- INC Incomplete: Assigned as a final report by a graduate unit review committee or SGS Vice-Dean on the basis of incomplete course work in special circumstances (e.g., medical reasons or when there are no grounds for assigning a failing grade). INC carries no credit for the course and is not considered for averaging purposes.
- IPR In Progress: Assigned by the instructor as the report for a course which is continued in a subsequent session or program. The final grade for the course will appear only once and only for the last enrolment period. IPR carries no credit for the course and is not considered for averaging purposes.
- NGA No Grade Available: Assigned by the division in the extraordinary case that a grade is not available for one of its students enrolled in a course. It must be replaced by a regular grade assigned by the instructor or by another symbol assigned during the divisional review. It carries no credit for the course and is not considered for averaging purposes.
- SDF Standing Deferred: Assigned by a graduate unit review committee to a student who has been granted an extension for the completion of course work beyond the SGS deadline for completion of course work, pending receipt from the instructor of a final course report. A final course report is due no later than the SGS deadline for completion of course work and grade submission following the original one for the course. If, by that date, a final grade is not available and the student has not submitted the outstanding course work, then the report of 'SDF' will be replaced by a final report of 'INC'. SDF carries no credit for the

- course and is not considered for averaging purposes.
- TRF Program Transfer: Assigned by the School of Graduate Studies to a continuing research/seminar course begun but not completed in the first program and not required in the new program to which the student has been officially transferred.
- WDR Withdrawal without academic penalty: Assigned by the graduate unit review committee, when there are extenuating circumstances, upon approval of the student's request for late withdrawal from a course. It carries no credit for the course and is not considered for averaging purposes.

All grade revisions must be submitted to the School according to the SGS revised grade procedures.

- I.4 A table of correspondence and a translation table are defined in the appendix for each letter grade scale included in the University Grading Practices Policy in order to allow the conversion, when necessary, of a grade assigned from one scale to the corresponding grade in the other.

Grade Reporting

- I.5 All letter grades assigned to graduate students enrolled in School of Graduate Studies courses shall be from the same scale, but, where approved, the CR/NCR scale may also be used. The grades assigned in a course must all be from the same scale except that non-SGS students in graduate courses will be assigned grades from the refined letter grade scale or the numerical scale of marks as found in Part III.
- I.6 Grades in each course shall be reported according to the practice of the division administering the program in which the student is registered (the reporting division).
- (a) Grades shall be reported as assigned when the division offering the course is also the reporting division, when the offering and reporting divisions use the same grade scale, and when the grades are assigned from the H/P/FL or CR/NCR scales.
 - (b) In all other cases, grades shall be reported as converted to the scale used by the reporting division, and the conversion shall be made according to the tables of

correspondence and translation tables defined in the appendix.

- I.7 A list of the currently approved non-grade symbols and their meanings from the University Grading Practices Policy is given in the appendix. Those used by the School of Graduate Studies appear above and have in some cases been modified for graduate courses.
- I.8 The information in grade reports and transcripts must be communicated to the user, whether within or outside the University, in a clear and meaningful way. To that end, transcripts issued by the School of Graduate Studies must indicate the relationships between the graduate grade scale, the grade meanings, the basic letter grade scale and the scale of numerical marks as well as the translation table. A list of non-grade symbols and meanings shall also be included in the transcript.

PART II: GRADING PROCEDURES

Course Procedures

- II.1 To ensure that the method of evaluation in every course reflects appropriate academic standards and fairness to students, the School has adopted these regulations governing course procedures.
- (a) As early as possible in each course (and no later than the School's last date for course enrolment), the instructor shall make available to the class, and shall file with the department, centre or institute, the method(s) by which student performance shall be evaluated. This information should describe the method(s) (essays, tests, examinations, seminar presentations, etc.), the relative weight of these method(s) in relation to the overall grade, and the timing of each major evaluation.
Any penalties for late completion of, and for failure to complete work, should be announced at the time the instructor makes available to the class the method(s) by which student performance shall be evaluated.
 - (b) After the method(s) of evaluation have been made known, the instructor may not change them or their relative weight without the consent of at least a simple majority of the students enrolled in the course. Any changes shall be reported to the department, centre, or institute.

- (c) The relative value of each part of an examination shall be indicated to the student at the time of the examination. In the case of a written examination, the value of each part shall be indicated on the examination paper.
- (d) Commentary, appropriate in the instructor's judgement, on assessed work, other than final examinations, and time for discussion of it shall be made available to students. Commentary, appropriate in the instructor's judgement, on final examinations and time for discussion of it shall be made available to students at their request.
- (e) Grades shall be recommended by the instructor in reference to the approved grade scales on the basis of each student's performance.

Examinations

- II.2
- (a) Students should be provided with clear information about the expectations of the examiners, including the types of anticipated questions.
 - (b) Students should have the opportunity to review their answers in written examinations within four months of the reporting of the grades. A recovery fee may be set to cover administrative costs, including photocopying.
 - (c) The School has developed a procedural guide for the re-reading, by an external reviewer, of examinations written for courses by graduate students. It is to be used only when departmental appeal mechanisms have been exhausted. Costs of preparing materials for the external reader are shared between the graduate unit and the student.

Other Departmental Assessments

- II.3
- Departments, centres, or institutes may expect graduate students to complete requirements for a degree other than course work, such as departmental examinations, language examinations, field work or internships. Graduate students should be given a written statement describing the evaluation processes. It is appropriate that departmental evaluations of performance in these settings should accord with the principles enunciated in the other sections of this Graduate Grading and Evaluation Practices Policy, and that the effect upon deadlines of disruptions to academic programs, as described below, be taken

into account. Students should also be informed of procedures for appeal.

Grade Review and Approval Process

- II.4(a) Grades shall be recommended by the instructor to the chair or director, or designate, of the graduate department, centre or institute. The grades shall then be reviewed and approved following the graduate unit's procedure. Grades shall not be reported or released to students as official until this review procedure has been carried out. Normally, the graduate unit's review and approval by the chair or director constitutes final approval of grades, under the authority of the Dean of the School. Grades may be changed on appeal by the student, following the procedures of the School. Decisions regarding these matters will be made by the chair of the department.
- (b) The distribution of grades in any course shall not be predetermined by any system of quotas that specifies the number or percentage of grades allowable at any grade level.
 - (c) The graduate unit's review of grades may result in the request for clarification of the evaluation methods used, or of apparent anomalies in the list of grades in a course. In the case of anomalies, the chair or director, or designate, must discuss the grade(s) with the instructor; no grade should be changed without such discussion. In the event the matter is not settled to the mutual satisfaction of the chair or director, or designate, and the instructor, the matter shall be referred to the Vice-Dean of SGS. If it is not settled at that level it should be referred to the Dean of the School whose authority for the assigning and reporting of grades is final (subject only to the formal appeals procedures of the School).
 - (d) At any time, the School may request an explanation of any grades for a course that appear not to be based on the approved grade scales or otherwise appear anomalous in reference to this Policy.

Exceptional Circumstances and Academic Appeals

- II.5(a) Students with health problems or other personal circumstances which may adversely affect their performance in, or their ability to complete course work, examinations or other departmental assessments may request special consideration. Requests, supported by a

medical certificate, or other appropriate evidence, should be submitted to the instructor or the coordinator of graduate studies as soon as possible or within 48 hours of the deadline or date of assessment. The medical certificate must confirm the student was adversely affected by the health problems and must show the dates of illness and that the physician was consulted at the time of the illness.

- (b) Students may on occasion dispute substantive or procedural academic matters, including grades. The recommended route for the resolution of such disputes is to discuss the matter first with the instructor or the person whose ruling is in question. If the dispute persists, the student may wish to pursue a formal academic appeal – see Academic Appeals in the General Regulations section of the Calendar.

Conflict of Interest

- II.6 When the instructor or a student has a conflict of interest, or is in a situation where a fair and objective assessment may not be possible, this should be disclosed to the chair or director, or designate, who shall take steps to ensure fairness and objectivity.

Procedures in the Event of Disruption

- II.7(a) In the event of disruption of the graduate academic program, the following principles shall apply: (i) the academic integrity of academic programs must be honoured; and (ii) students must be treated in a fair manner, recognizing their freedom of choice to attend class, and to use academic facilities, or not, without penalty. Decisions regarding these matters will be made by the chair of the department.
- (b) The Vice-President and Provost, or the Academic Board, shall declare when a disruption of the graduate academic program has occurred. The Provost shall take steps to inform the University community at large of the changes to be implemented, and will report to the Committee on Academic Policy and Programs regarding the implementation of the procedures and changes to the status of the academic programs.
- (c) Instructors responsible for courses that are disrupted shall determine, as the disruption proceeds, whether any changes

to classroom procedures are needed to complete the course.

- (d) Changes in classroom procedures should, where possible, first be discussed with students prior to the class meeting in which a vote is to be taken by the students present on the proposed changes. Changes agreed upon unanimously should be forwarded to the chair or director, or designate, with a report on the attendance at the class.
If unanimity on changes has not been arrived at, or where a vote is not feasible, the instructor, after the class discussion, will provide the chair or director, or designate, with his or her recommendation, along with the results of any classroom votes. The chair or director, or designate, shall then make a decision.
- (e) If classes are not able to convene, the instructor, with the prior approval of the chair or director, or designate, shall make changes deemed necessary to the classroom procedures.
- (f) In the absence of the instructor such changes will be made by the Dean in consultation with the chair or director, or designate, and with the approval of the Provost.
- (g) If courses are to be cancelled, approval of the SGS Council is required. If Council cannot meet, the approval of the Dean, or in the absence of the Dean, the approval of the Provost, is required.
- (h) Students must be informed of changes to classroom procedures. This may be done by circulating the changes in writing to the class, posting in the office of the graduate unit, reporting to SGS Council, as well as listing in the campus press. When classes resume, students must be informed, at class, of any changes made during the disruption.
- (i) If changes to the classroom procedures are made, students who do not wish to complete the course under the revised procedures may withdraw without academic penalty. This must be done prior to the last day of classes.
- (j) If students have not attended classes that are meeting, they nonetheless remain responsible for the course work and for fulfilling course requirements. However, where possible, reasonable extension of deadlines for course requirements, or provision for make-up tests, shall be made. Reasonable alternative access to material covered should be provided.

- (k) A student who feels, owing to his or her special circumstances, that changes to classroom procedures have unreasonably affected his or her grade may appeal the grade following procedures for appeal set out above.

PART III: ADMINISTRATIVE APPENDIX

Available at www.utoronto.ca/govcncl/pap/policies/grgrade.html.

GRADUATION AND SUBMISSION OF THESIS

It is the intention of the University of Toronto that there be no restriction on the distribution and publication of theses. However, in exceptional circumstances postponement of distribution and publication may be granted. For procedures see end of section under Doctor of Philosophy, Final Oral Examination.

Doctoral Thesis

Prior to the final oral examination, required copies of the doctoral thesis must be submitted by the candidate to the graduate unit. The candidate should consult the graduate coordinator regarding requirements and deadlines for submission of material.

The graduate unit is responsible for ensuring that one copy of the thesis is brought to the final oral examination.

Following successful completion of the final oral examination, at least one bound copy of the doctoral thesis in final form must be submitted by the candidate to the graduate unit. Candidates should consult their unit to determine the format, number, and distribution of copies. One unbound copy must be submitted to the School. These copies must be submitted before candidates can be recommended for the award of the degree. Otherwise, the awarding of the degree will be delayed. The "Authority to Distribute" form must be bound inside the front cover of the bound copy. A second "Authority to Distribute" form, the "Library and Archives Canada Theses Non-exclusive License" form, and the ProQuest Information and Learning "Subject Category" form must be submitted with the unbound copy. The unbound copy will be returned to the University Library after a microfiche copy has been made by ProQuest. The Library will arrange for the binding of these copies which will be deposited in the University Library. Candidates will be charged \$20.00 for the binding of the thesis. All theses copies must have an abstract included. Theses that do not conform to the guidelines for preparation of the unbound copy for microfilming, for preparation

of the abstract and thesis for reproduction in *Dissertation Abstracts International*, and for binding will not be accepted by the School or by ProQuest. For more information about binding, visit the Current Students' section of the SGS Web site www.sgs.utoronto.ca for "Guidelines for the Preparation of Theses for Microfilming and Binding".

Further details about doctoral theses may be found in Section 2 Degree Regulations under Doctor of Philosophy, Final Oral Examination.

Master's Thesis

After completing the thesis defence, the original unbound thesis, along with an abstract of no more than 150 words, the signed University of Toronto "Authority to Distribute" form; the "Library and Archives Canada Theses Non-exclusive License" form, and "Subject Category" form must be submitted to the School of Graduate Studies. Deadline dates, "Guidelines for the Preparation of Theses", binding and copyright information, and the required three forms are available on the SGS Web site at www.sgs.utoronto.ca, under Current Students. The student must submit bound copies of master's theses to the relevant graduate unit. Consult the graduate unit for submission deadlines dates and copy quantity.

Degree recommendations submitted to SGS by the graduate units are approved when the unbound thesis is received. The unbound thesis, along with the three forms, are forwarded to the Library and Archives Canada microfilming agent - ProQuest Information and Learning - for microfilming. These forms authorize Library and Archives Canada to make the microfiche available on demand. ProQuest Information and Learning procures a copy and submits all abstracts to Master's Abstracts International. At the time the thesis is submitted to SGS, a fee of \$42.89 is charged to the student to offset the cost incurred by Library and Archives Canada.

It is the intention of the University of Toronto that there be **no restriction** on the distribution and publication of theses. However, in exceptional cases, the author, in consultation with the thesis supervisor and with the approval of the chair of the graduate unit, shall have the right to postpone distribution and publication by microfilm for a period up to two years from the date of acceptance of the thesis. In exceptional circumstances and on written petition to the Dean of the School of Graduate Studies, the period might be extended, but in no case for more than five years from the date of acceptance of the thesis unless approved by the Graduate Education Council.

Degree Recommendations

When all requirements for a graduate degree program have been fulfilled, the graduate unit is required to submit a degree recommendation to the School of Graduate Studies indicating that the program has been satisfactorily completed by the student.

Convocation Ceremonies

Convocation ceremonies are held twice a year, in the spring and fall. Students may attend the ceremony which directly follows the completion of their degree requirements. The Director of Student Services of the School of Graduate Studies submits the names of the graduands to the Office of Convocation which is responsible for the procedures for the convocation ceremony and the issuance of diplomas.

Upon the request of the student, graduate degrees may also be conferred *in absentia* in March, where there is no ceremony but rather diplomas are mailed to graduands.

Graduation information is available on the University of Toronto Web site at www.utoronto.ca/convocation.

INTELLECTUAL PROPERTY

Telephone: (416) 978-7833

Fax: (416) 978-5821

E-mail: ip.officer@utoronto.ca

Web: www.research.utoronto.ca/ipc/index.html
www.innovations.utoronto.ca
www.sgs.utoronto.ca/current/policies/intellproperty.asp

Intellectual property created at the University of Toronto is governed by its Inventions Policy and its Copyright Policy:

<http://www.utoronto.ca/govcncl/pap/policies/invent.html>

<http://www.utoronto.ca/govcncl/pap/policies/copyright.html>

Works subject to the Canada Copyright Act are owned by their authors unless undertaken in the course of University employment or by specific commission.

Inventions are initially owned jointly by the inventors and the University. Except where otherwise determined by a separate third-party agreement, the University's Inventions Policy allows inventors to assume full ownership of their intellectual property. Faculty members have an obligation to inform students if they are involved in research funded under agreements that grant intellectual property rights to a spon-

sor. Faculty members also have an obligation to inform students in advance if the student's course work is related to the business of a company in which the faculty member has a financial interest.

Prior to commercialization, all intellectual property, including software, must be disclosed to the University of Toronto Research Services (UTRS). If the inventor(s) choose to assume full ownership, the University will assign its ownership interest to them in return for certain undertakings, including remitting to the University 25% of any proceeds from commercialization.

Among the commercialization options available to inventors is the expertise of Innovations at U of T (IUT). IUT combines the University's internal technology transfer operation with its former commercialization agency, the Innovations Foundation. IUT connects researchers with businesses and also facilitates licenses and patents.

Researchers are advised that public disclosure of any kind (written, verbal, or electronic) of intellectual property prior to the filing of a patent application may severely damage its commercial value. However, confidential disclosure to the University does not constitute a public disclosure.

Copies of the Inventions Policy, the Copyright Policy, the Confidential Disclosure Forms, and the SGS Guidelines on Intellectual Property for Graduate Students and Supervisors are available from IUT, UTRS, and SGS or can be printed conveniently from the Web sites listed above.

RESEARCH ETHICS

The University Policy on Ethical Conduct in Research requires each academic division to formulate its own guidelines. The divisional guidelines apply to graduate students enrolled in graduate units within those faculties. See also SGS Student Guide on Ethical Conduct of Research Involving Human Subjects on the SGS Web site.

POLICY ON ACADEMIC SANCTIONS FOR STUDENTS WHO HAVE OUTSTANDING OBLIGATIONS TO THE UNIVERSITY

Academic sanctions are applicable to any student who has an outstanding obligation to the University. Recognized obligations are as follows:

- 1 tuition fees

- 2 academic and other incidental fees
- 3 residence fees and other residence charges
- 4 library fines
- 5 bookstore accounts
- 6 loans made by colleges, faculties or the University
- 7 health service accounts
- 8 unreturned or damaged instruments, materials and equipment
- 9 orders for the restitution, rectification, or the payment of damages, fines, bonds for good behaviour, and requirement of public service work imposed under the authority of the *Code of Student Conduct*.

The following academic sanctions will be imposed on students who have outstanding recognized financial obligations to the University.

- 1 Statements of results or official transcripts of record, or both will not be issued.
- 2 The University will not release the official document (called the diploma) which declares the degree earned, nor provide oral confirmation or written certification of degree status to external enquirers. Indebted graduates will be allowed to walk on stage and have their names appear on the convocation program.
- 3 Registration will be refused to a continuing or returning student. Payments made by continuing or returning students shall be applied first to outstanding University debts, and second, to current fees.

CODE OF BEHAVIOUR ON ACADEMIC MATTERS (Extract)

The Governing Council of the University of Toronto has approved a Code of Behaviour on Academic Matters applying to members of the University. Below are **extracts from the Code** covering offences, procedures, and sanctions. The full text of the Code is available on the University of Toronto Web site at www.utoronto.ca/govcncl/pap/policies/behaveac.html. The Code is enforced by the Dean, the Provost, and the University Disciplinary Tribunal. In cases involving graduate students, the divisional dean is the Dean of the School of Graduate Studies.

A. Preamble

The concern of the Code of Behaviour on Academic Matters is with the responsibilities of all parties to the integrity of the teaching and learning relationship. Honesty and fairness

must inform this relationship, whose basis remains one of mutual respect for the aims of education and for those ethical principles which must characterize the pursuit and transmission of knowledge in the University.

What distinguishes the University from other centres of research is the central place which the relationship between teaching and learning holds. It is by virtue of this relationship that the University fulfils an essential part of its traditional mandate from society, and, indeed, from history: to be an expression of, and by so doing to encourage, a habit of mind which is discriminating at the same time as it remains curious, which is at once equitable and audacious, valuing openness, honesty and courtesy before any private interest.

This mandate is more than a mere pious hope. It represents a condition necessary for free enquiry, which is the University's life blood. Its fulfilment depends upon the well being of that relationship whose parties define one another's roles as teacher and student, based upon differences in expertise, knowledge and experience, though bonded by respect, by a common passion for truth and by mutual responsibility to those principles and ideals that continue to characterize the University.

This Code is concerned, then, with the responsibilities of faculty members and students, not as they belong to administrative or professional or social groups, but as they cooperate in all phases of the teaching and learning relationship.

Such cooperation is threatened when teacher or student forsakes respect for the other—and for others involved in learning—in favour of self-interest, when truth becomes a hostage of expediency. On behalf of teacher and student and in fulfilment of its own principles and ideals, the University has a responsibility to ensure that academic achievement is not obscured or undermined by cheating or misrepresentation, that the evaluative process meets the highest standards of fairness and honesty, and that malevolent or even mischievous disruption is not allowed to threaten the educational process.

These are areas in which teacher and student necessarily share a common interest as well as common responsibilities.

B. Offences

The University and its members have a responsibility to ensure that a climate that might encourage, or conditions that might enable, cheating, misrepresentation or unfairness not be tolerated. To this end, all must acknowledge

that seeking credit or other advantages by fraud or misrepresentation, or seeking to disadvantage others by disruptive behaviour is unacceptable, as is any dishonesty or unfairness in dealing with the work or record of a student.

Wherever in this Code an offence is described as depending on "knowing", the offence shall likewise be deemed to have been committed if the person ought reasonably to have known.

B.I.

1. It shall be an offence for a student knowingly:

- (a) to forge or in any other way alter or falsify any document or evidence required by the University, or to utter, circulate or make use of any such forged, altered or falsified document, whether the record be in print or electronic form;
- (b) to use or possess an unauthorized aid or aids or obtain unauthorized assistance in any academic examination or term test or in connection with any other form of academic work;
- (c) to personate another person, or to have another person personate, at any academic examination or term test or in connection with any other form of academic work;
- (d) to represent as one's own any idea or expression of an idea or work of another in any academic examination or term test or in connection with any other form of academic work, i.e., to commit plagiarism;
- (e) to submit, without the knowledge and approval of the instructor to whom it is submitted, any academic work for which credit has previously been obtained or is being sought in another course or program of study in the University or elsewhere;
- (f) to submit any academic work containing a purported statement of fact or reference to a source which has been concocted.

2. It shall be an offence for a faculty member knowingly:

- (a) to approve any of the previously described offences;
- (b) to evaluate an application for admission or transfer to a course or program of study by reference to any criterion that is not academically justified;
- (c) to evaluate academic work by a student by reference to any criterion that does not relate to its merit, to the time within

which it is to be submitted or to the manner in which it is to be performed.

3. It shall be an offence for a faculty member and student alike knowingly:

- (a) to forge or in any other way alter or falsify any academic record, or to utter, circulate or make use of any such forged, altered or falsified record, whether the record be in print or electronic form;
- (b) to engage in any form of cheating, academic dishonesty or misconduct, fraud or misrepresentation not herein otherwise described, in order to obtain academic credit or other academic advantage of any kind.

4. A graduate of the University may be charged with any of the above offences committed knowingly while he or she was an active student, when, in the opinion of the Provost, the offence, if detected, would have resulted in a sanction sufficiently severe that the degree would not have been granted at the time that it was.

B.II Parties to Offences

1. (a) Every member is a party to an offence under this Code who knowingly:

- (i) actually commits it;
- (ii) does or omits to do anything for the purpose of aiding or assisting another member to commit the offence;
- (iii) does or omits to do anything for the purpose of aiding or assisting any other person who, if that person were a member, would have committed the offence;
- (iv) abets, counsels, procures or conspires with another member to commit or be a party to an offence; or
- (v) abets, counsels, procures or conspires with any other person who, if that person were a member, would have committed or have been a party to the offence.

(b) Every party to an offence under this Code is liable upon admission of the commission thereof, or upon conviction, as the case may be, to the sanctions applicable to that offence.

2. Every member who, having an intent to commit an offence under this Code, does or omits to do anything for the purpose of carrying out that intention (other than mere preparation to commit the offence) is guilty of an attempt to commit the offence and liable upon conviction

to the same sanctions as if he or she had committed the offence.

3. When a group is found guilty of an offence under this Code, every officer, director or agent of the group, being a member of the University, who directed, authorized or participated in the commission of the offence is a party to and guilty of the offence and is liable upon conviction to the sanctions provided for the offence.

C. Procedures in Cases Involving Students

At both the divisional level and the level of the University Tribunal, the procedures for handling charges of academic offences involving students reflect the gravity with which the University views such offences. At the same time, these procedures and those which ensure students the right of appeal represent the University's commitment to fairness and the cause of justice.

C.I.(a) Divisional Procedures

Note: Where a student commits an offence, the faculty in which the student is registered has responsibility over the student in the matter. In the case of Scarborough and Erindale Colleges, the college is deemed to be the faculty.

1. No hearing within the meaning of section 2 of the *Statutory Powers Procedure Act* is required for the purposes of or in connection with any of the discussions, meetings and determinations referred to in C.I.(a), and such discussions, meetings and determinations are not proceedings of the Tribunal.

2. Where an instructor has reasonable grounds to believe that an academic offence has been committed by a student, the instructor shall so inform the student immediately after learning of the act or conduct complained of, giving reasons, and invite the student to discuss the matter. Nothing the student says in such a discussion may be used or receivable in evidence against the student.

3. If after such discussion, the instructor is satisfied that no academic offence has been committed, he or she shall so inform the student and no further action shall be taken in the matter by the instructor, unless fresh evidence comes to the attention of the instructor, in which case he or she may again proceed in accordance with subsection 2.

4. If after such discussion, the instructor believes that an academic offence has been committed by the student, or if the student fails or neglects to respond to the invitation for discussion, the instructor shall make a report of the matter to the department chair or through the department chair to the dean. (See also section C.I.(b) 1.)

5. When the dean or the department chair, as the case may be, has been so informed, he or she shall notify the student in writing accordingly, provide him or her with a copy of the Code and subsequently afford the student an opportunity for discussion of the matter. In the case of the dean being informed, the chair of the department and the instructor shall be invited by the dean to be present at the meeting with the student. The dean shall conduct the interview.

6. Before proceeding with the meeting, the dean shall inform the student that he or she is entitled to seek advice, or to be accompanied by counsel at the meeting, before making, and is not obliged to make, any statement or admission, but shall warn that if he or she makes any statement or admission in the meeting, it may be used or receivable in evidence against the student in the hearing of any charge with respect to the alleged offence in question. The dean shall also advise the student, without further comment or discussion, of the sanctions that may be imposed under section C.I.(b), and that the dean is not obliged to impose a sanction but may instead request that the Provost lay a charge against the student. Where such advice and warning have been given, the statements and admissions, if any, made in such a meeting may be used or received in evidence against the student in any such hearing.

7. If the dean, on the advice of the department chair and the instructor, or if the department chair, on the advice of the instructor, subsequently decides that no academic offence has been committed and that no further action in the matter is required, the student shall be so informed in writing and the student's work shall be accepted for normal evaluation or, if the student was prevented from withdrawing from the course by the withdrawal date, he or she shall be allowed to do so. Thereafter, the matter shall not be introduced into evidence at a Tribunal hearing for another offence.

8. If the student admits the alleged offence, the dean or the department chair may either impose the sanction(s) that he or she considers

appropriate under section C.I.(b) or refer the matter to the dean or Provost, as the case may be, and in either event shall inform the student in writing accordingly. No further action in the matter shall be taken by the instructor, the department chair or the dean if the dean imposes a sanction.

9. If the student is dissatisfied with a sanction imposed by the department chair or the dean, as the case may be, the student may refer the matter to the dean or Provost as the case may be, for consideration.

10. If the student does not admit the alleged offence, the dean may, after consultation with the instructor and the department chair, request that the Provost lay a charge against the student. If the Provost agrees to lay a charge, the case shall then proceed to the Trial Division of the Tribunal.

11. Normally, decanal procedures will not be examined in a hearing before the Tribunal. A failure to carry out the procedures referred to in this section, or any defect or irregularity in such procedures, shall not invalidate any subsequent proceedings of or before the Tribunal, unless the chair of the hearing considers that such failure, defect or irregularity resulted in a substantial wrong, detriment or prejudice to the accused. The chair will determine at the opening of the hearing whether there is to be any objection to an alleged defect, failure or irregularity.

12. No degree, diploma or certificate of the University shall be conferred or awarded, nor shall a student be allowed to withdraw from a course from the time of the alleged offence until the final disposition of the accusation. However, a student shall be permitted to use University facilities while a decision is pending, unless there are valid reasons for the dean to bar him or her from a facility. When or at any time after an accusation has been reported to the dean, he or she may cause a notation to be recorded on the student's academic record and transcript, until the final disposition of the accusation, to indicate that the standing in a course and/or the student's academic status is under review. A student upon whom a sanction has been imposed by the dean or the department chair under section C.I.(b) or who has been convicted by the Tribunal shall not be allowed to withdraw from a course so as to avoid the sanction imposed.

13. A record of cases disposed of under section C.I.(a) and of the sanctions imposed shall be kept in the academic unit concerned and may be referred to by the dean in connection with a decision to prosecute, or by the prosecution in making representations as to the sanction or sanctions to be imposed by the Tribunal, for any subsequent offence committed by the student. Information on such cases shall be available to other academic units upon request and such cases shall be reported by the dean to the Secretary of the Tribunal for use in the Provost's annual report to the Academic Board. The dean may contact the Secretary of the Tribunal for advice or for information on cases disposed of under section C.II. hereof.

14. Where a proctor or invigilator, who is not a faculty member, has reason to believe that an academic offence has been committed by a student at an examination or test, the proctor or invigilator shall so inform the student's dean or department chair, as the case may be, who shall proceed as if he or she were an instructor, by analogy to the other provisions of this section.

15. In the case of alleged offences not covered by the procedures above and not involving the submission of academic work, such as those concerning forgery or uttering, and in cases involving cancellation, recall or suspension of a degree, diploma or certificate, the procedure shall be regulated by analogy to the other procedures of this section.

C.I.(b) Divisional Sanctions

1. In an assignment worth ten percent or less of the final grade, the department chair may handle the matter if:

- (i) the student admits guilt; and
- (ii) the assignment of a penalty is limited to at most a mark of zero for the piece of work.

If the student does not admit guilt, or if the department chair chooses, the matter shall be brought before the dean.

2. One or more of the following sanctions may be imposed by the dean where a student admits to the commission of an alleged offence:

- (a) an oral and/or written reprimand;
- (b) an oral and/or written reprimand and, with the permission of the instructor, the resubmission of the piece of academic work in respect of which the offence was committed, for evaluation. Such a sanction shall be imposed only for minor

-
- offences and where the student has committed no previous offence;
- (c) assignment of a grade of zero or a failure for the piece of academic work in respect of which the offence was committed;
 - (d) assignment of a penalty in the form of a reduction of the final grade in the course in respect of which the offence was committed;
 - (e) denial of privileges to use any facility of the University, including library and computer facilities;
 - (f) a monetary fine to cover the costs of replacing damaged property or misused supplies in respect of which the offence was committed;
 - (g) assignment of a grade of zero or a failure for the course in respect of which the offence was committed;
 - (h) suspension from attendance in a course or courses, a program, an academic division or unit, or the University for a period of not more than twelve months. Where a student has not completed a course or courses in respect of which an offence has not been committed, withdrawal from the course or courses without academic penalty shall be allowed.
3. The dean shall have the power to record any sanction imposed on the student's academic record and transcript for such length of time as he or she considers appropriate. However, the sanctions of suspension or a notation specifying academic misconduct as the reason for a grade of zero for a course shall normally be recorded for a period of five years.
4. The Provost shall, from time to time, indicate appropriate sanctions for certain offences. These guidelines shall be sent for information to the Academic Board and attached to the Code.
- C.II.(a) Tribunal Procedures**
1. A prosecution for an alleged academic offence shall be instituted by the laying of a charge by the Provost against the accused. This is done when the student does not admit guilt; when the sanction desired is beyond the power of the dean to impose; when the student has been found guilty of a previous offence; or when the student is being accused simultaneously of two or more different offences involving more than one incident.
2. No charge shall be laid except with the agreement of the dean concerned and of the Provost, after consultation between the Provost and the Discipline Counsel.
3. A charge shall be in writing, addressed to the accused, signed by or under the authority of the Provost and filed with the Secretary. It shall contain a statement that the student is charged with having committed an offence specified therein, with sufficient particulars of the circumstances to enable the student to identify the alleged act or conduct giving rise to the charge.
4. Upon receipt by the Secretary of a charge which appears to be in proper form, the member of the Tribunal designated to be the chair of the hearing and the Secretary shall immediately determine and give appropriate notice of a date, time and place for the hearing.
5. Withdrawal of a student from a course or program of study shall not preclude or affect any prosecution before the Tribunal in respect of an alleged academic offence.
6. The proceedings at a hearing, including the evidence and the verdict of the panel shall be recorded by the Secretary by means of a tape recording, stenographic reporter or other reliable means.
7. The procedures of the Tribunal shall conform to the requirements of the *Statutory Powers Procedure Act*, Revised Statutes of Ontario, 1990, Chapter S. 22, as amended from time to time.
8. The Tribunal may, from time to time, by a majority of its members, make, adopt and modify rules governing its procedures which are not inconsistent with the provision hereof, and all such rules and modifications shall be reported to the Academic Board for information.
9. The onus of proof shall be on the prosecutor, who must show on clear and convincing evidence that the accused has committed the alleged offence.
10. The accused shall not be compelled to testify at his or her hearing.
11. The divisions of the Tribunal are:
(a) Trial; and
(b) Appeal.

12. The members of the Trial Division of the Tribunal shall consist of a Senior Chair, two Associate Chairs and up to fifteen co-chairs, appointed by the Academic Board.

13. No presiding member of the Trial Division of the Tribunal shall be a full-time student or a full-time member of the teaching staff or a member of the administrative staff.

14. The Senior Chair, Associate Chairs and co-chairs, shall be legally qualified.

15. The Senior Chair shall be the chair of the Tribunal and either the Senior Chair, an Associate Chair or a co-chair, as selected by the Secretary, shall preside at trial hearings of the Tribunal.

16. Trial hearings of the Tribunal involving students registered at Scarborough College shall normally be held on the Scarborough campus of the University and those involving students registered at Erindale College shall normally be held on the Erindale campus of the University.

17. (a) The Tribunal shall,
- (i) hear and dispose of charges brought under the Code;
 - (ii) report its decisions for information to the Academic Board;
 - (iii) make recommendations to the Governing Council as contemplated by the Code;
 - (iv) advise the Academic Board, from time to time, on policy and procedures with respect to the Code; and
 - (v) determine its practice and procedures, subject to the provisions hereof.
- (b) Where it is considered to be warranted by the circumstances, the chair of a hearing may in his or her discretion award costs of any proceedings at trial, and may make orders as to the party or parties to and by whom and the amounts and manner in which such costs are to be paid.

18. Hearings in the Trial Division of the Tribunal shall be by a hearing panel composed of three persons, of whom one shall be a student, one shall be a faculty member and the third shall be the Senior Chair, an Associate Chair or a co-chair of the Tribunal.

19. The members of each panel (other than the chair) shall be drawn from a pool consisting of

at least 15 students who are not also faculty members and at least 15 faculty members who are not students. The members of such pool shall be appointed by the Secretary, drawn from the various academic divisions and units of the University, and shall serve for a period of two years. The appointments shall be renewable upon invitation by the Senior Chair of the Tribunal.

20. Panel members for each case shall be selected by the Secretary who shall exercise due discretion in excluding members who may know either the accused or the circumstances of the alleged offence. Generally, student members will not be drawn from the same program of study as the accused. Faculty members from the department in which an offence is alleged to have occurred will be excluded from the panel.

21. Either the accused or the prosecution may challenge prior to the hearing, and the chair of the hearing may disqualify any prospective panel member for cause which in his or her opinion justifies such disqualification.

22. At trial hearings of the Tribunal,
- (a) the chair of the hearing shall determine all questions of law and has a vote on the verdict and sanction; and
 - (b) the panel shall determine all questions of fact and render a verdict according to the evidence.

23. Where, after a charge has been laid by the Provost but before a Tribunal hearing takes place, the accused admits the alleged offence, the Provost may refer the matter either (i) to the dean, who shall impose the sanction(s) that he or she considers appropriate under section C.1.(b); or (ii) to a panel, in which event the panel may convict the accused without the prosecution having to lead evidence of guilt, and the panel shall impose a sanction or sanctions in accordance with section 25 or 26; provided that before any sanction is imposed, the dean or the panel, as the case may be, shall have afforded the accused an opportunity to offer an explanation and to present arguments and submissions as to sanction.

24. The verdict of a panel need not be unanimous but at least two affirmative votes shall be required for a conviction. Unless there are at least two affirmative votes for conviction, the accused shall be acquitted.

25. The sanction or sanctions to be imposed upon conviction at a hearing shall be determined by a majority of the panel members, and the panel shall give reasons for the sanction or sanctions imposed.

26. If the panel is unable to reach agreement, by a majority of its members, as to the sanction to be imposed, the chair of the hearing shall impose the sanction or set of sanctions which is the least severe of those that the individual members of the panel would impose.

27. There shall be a University Discipline Counsel and there may be one or more assistants to the Discipline Counsel, appointed by the Academic Board on the recommendation of the Provost.

28. The Discipline Counsel and any assistant shall be a barrister and solicitor qualified to practise law in Ontario and shall not be a full-time student or a full-time member of the teaching staff or a member of the administrative staff.

29. The Discipline Counsel or an assistant shall conduct all proceedings on behalf of the Provost before the Tribunal and on any appeal from a Tribunal decision.

30. The other duties of the Discipline Counsel and assistants shall be as determined by the Provost.

31. The Secretary of the Tribunal and his or her assistants shall be appointed by the Academic Board on the recommendation of the Provost.

32. The duties of the Secretary and assistants shall be determined by the Senior Chair and members of the Tribunal and reported to the Academic Board for information.

33. Where anything is required by the Code to be done by or with the Secretary, it may be done by or with the Secretary or any of his or her assistants.

C.II.(b) Tribunal Sanctions

1. One or more of the following sanctions may be imposed by the Tribunal upon the conviction of any student:

- (a) an oral and/or written reprimand;
- (b) and oral and/or written reprimand and, with the permission of the instructor, the resubmission of the piece of academic work in respect of which the offence

was committed, for evaluation. Such a sanction shall be imposed only for minor offences and where the student has committed no previous offence;

- (c) assignment of a grade of zero or a failure for the piece of academic work in respect of which the offence was committed;
- (d) assignment of a penalty in the form of a reduction of the final grade in the course in respect of which the offence was committed;
- (e) denial of privileges to use any facility of the University, including library and computer facilities;
- (f) a monetary fine to cover the costs of replacing damaged property or misused supplies in respect of which the offence was committed;
- (g) assignment of a grade of zero or a failure for any completed or uncompleted course or courses in respect of which any offence was committed;
- (h) suspension from attendance in a course or courses, a program, an academic unit or division, or the University for such a period of time up to five years as may be determined by the Tribunal. Where a student has not completed a course or courses in respect of which an offence has not been committed, withdrawal from the course or courses without academic penalty shall be allowed;
- (i) recommendation of expulsion from the University. The Tribunal has power only to recommend that such a penalty be imposed. In any such case, the recommendations shall be made by the Tribunal to the President for a recommendation by him or her to the Governing Council. Expulsion shall mean that the student shall be denied any further registration at the University in any program, and his or her academic record and transcript shall record this sanction permanently. Where a student has not completed a course or courses in respect of which an offence has not been committed, withdrawal from the course or courses without academic penalty shall be allowed. If a recommendation for expulsion is not adopted, the Governing Council shall have the power to impose such lesser penalty as it sees fit.
- (j) (i) recommendation to the Governing Council for cancellation, recall or suspension of one or more degrees,

- diplomas or certificates obtained by any graduate; or
- (ii) cancellation of academic standing or academic credits obtained by any former student who, while enrolled, committed any offence which if detected before the granting of the degree, diploma, certificate, standing or credits would, in the judgment of the Tribunal, have resulted in a conviction and the application of a sanction sufficiently severe that the degree, diploma, certificate, standing, credits or marks would not have been granted.

2. The hearing panel shall have the power to order that any sanction imposed by the Tribunal be recorded on the student's academic record and transcript for such length of time as the panel considers appropriate.

3. The Tribunal may, if it considers appropriate, report any case to the Provost who may publish a notice of the decision of the Tribunal and the sanction or sanctions imposed in the University newspapers, with the name of the student withheld.

The full text of the Code of Behaviour on Academic Matters is available at www.utoronto.ca/govcncl/pap/policies/behaveac.html.

CODE OF STUDENT CONDUCT

Non-academic offences are defined in the University's Code of Student Conduct, the full text of which is available on the University of Toronto Web site at www.utoronto.ca/govcncl/pap/alphapol.htm. Extracts from the Code, provided below, are printed in ordinary type. References in square brackets are to original section numbering in the Code.

[B.] Offences

The following offences constitute conduct that shall be deemed to be offences under this *Code*, when committed by a student of the University of Toronto, provided that such conduct

- (i) has not been dealt with as failure to meet standards of professional conduct as required by a college, faculty or school; and
- (ii) is not specifically assigned to the jurisdiction of the University Tribunal, as in the case of offences described in the *Code of Behaviour on Academic Matters*, or to another disciplinary body

within the University of Toronto, as in the case of sexual harassment as described in the Policy and Procedures: Sexual Harassment; or to a divisional disciplinary body, such as a residence council or a recreational athletics disciplinary body; or is covered under these policies but which is deemed by the head of the division to be more appropriately handled by the *Code of Student Conduct*; and

- (iii) except as otherwise provided herein, occurs on premises of the University of Toronto or elsewhere in the course of activities sponsored by the University of Toronto or by any of its divisions; and
- (iv) has not been dealt with under provisions for the discipline of students with respect to University offices and services whose procedures apply to students in several academic divisions, such as University residences, libraries or athletic and recreational facilities.

1. Offences Against Persons

- (a) No person shall assault another person sexually or threaten any other person with sexual assault.
- (b) No person shall otherwise assault another person, threaten any other person with bodily harm, or knowingly cause any other person to fear bodily harm.
- (c) No person shall knowingly create a condition that unnecessarily endangers the health or safety of other persons.
- (d) No person shall threaten any other person with damage to such person's property, or knowingly cause any other person to fear damage to her or his property.
- (e) No person shall engage in a course of vexatious conduct that is directed at one or more specific individuals, and that is based on the race, ancestry, place of origin, colour, ethnic origin, citizenship, sex, sexual orientation, creed, age, marital status, family status, handicap, receipt of public assistance or record of offences of that individual or those individuals, and

that is known to be unwelcome, and that exceeds the bounds of freedom of expression or academic freedom as these are understood in University policies and accepted practices, including but not restricted to, those explicitly adopted.

Note: Terms in this section are to be understood as they are defined or used in the *Ontario Human Rights Code*. Vexatious conduct that is based on sex or sexual orientation is considered an offence under the University's *Policy and Procedures: Sexual Harassment*. If the Sexual Harassment Officer believes, after consultation with relevant parties, that a complaint based on sex or sexual orientation would be better handled under the *Code of Student Conduct*, the Officer may refer the matter to the appropriate head of division.

- (f) (i) No person shall, by engaging in the conduct described in subsection (ii) below, whether on the premises of the University or away from the premises of the University, cause another person or persons to fear for their safety or the safety of another person known to them while on the premises of the University of Toronto or in the course of activities sponsored by the University of Toronto or by any of its divisions, or cause another person or persons to be impeded in exercising the freedom to participate reasonably in the programs of the University and in activities in or on the University's premises, knowing that their conduct will cause such fear, or recklessly as to whether their conduct causes such fear.
- (ii) The conduct mentioned in subsection (i) consists of
 - (a) repeatedly following from place to place the other person or anyone known to them;
 - (b) repeatedly and persistently communicating with, either directly or indirectly, the other person or anyone known to them;
 - (c) besetting or repeatedly watching the dwelling-house, or place where the other person, or anyone known to them, resides, works, carries on business or happens to be; or
 - (d) engaging in threatening conduct directed at the other person or any member of the family, friends or colleagues of the other person.

2. Disruption

No person shall cause by action, threat or otherwise, a disturbance that the member knows obstructs any activity organized by the University of Toronto or by any of its

divisions, or the right of another member or members to carry on their legitimate activities, to speak or to associate with others.

For example, peaceful picketing or other activity outside a class or meeting that does not substantially interfere with the communication inside, or impede access to the meeting, is an acceptable expression of dissent. And silent or symbolic protest is not to be considered disruption under this Code. But noise that obstructs the conduct of a meeting or forcible blocking of access to an activity constitutes disruption.

3. Offences Involving Property

- (a) No person shall knowingly take, destroy or damage premises of the University of Toronto.
- (b) No person shall knowingly take, destroy or damage any physical property that is not her or his own.
- (c) No person shall knowingly destroy or damage information or intellectual property belonging to the University of Toronto or to any of its members.
- (d) No person, in any manner whatsoever, shall knowingly deface the inside or outside of any building of the University of Toronto.
- (e) No person, knowing the effects or property to have been appropriated without authorization, shall possess effects or property of the University of Toronto.
- (f) No person, knowing the effects or property to have been appropriated without authorization, shall possess any property that is not her or his own.
- (g) No person shall knowingly create a condition that unnecessarily endangers or threatens destruction of the property of the University of Toronto or of any of its members.

4. Unauthorized Entry or Presence

No person shall, contrary to the expressed instruction of a person or persons authorized to give such instruction, or with intent to damage or destroy the premises of the University of Toronto or damage, destroy or steal any property on the premises of the University of Toronto that is not her or his own, or without just cause knowingly enter or remain in or on any such premises.

5. Unauthorized Use of University Facilities, Equipment or Services

- (a) No person shall knowingly use any facility, equipment or service of the

University of Toronto contrary to the expressed instruction of a person or persons authorized to give such instruction, or without just cause.

- (b) No person shall knowingly gain access to or use any University computing or internal or external communications facility to which legitimate authorization has not been granted. No person shall use any such facility for any commercial, disruptive or unauthorized purpose.
- (c) No person shall knowingly mutilate, misplace, misfile, or render inoperable any stored information such as books, film, data files or programs from a library, computer or other information storage, processing or retrieval system.

6. False charges

No person shall knowingly or maliciously bring a false charge against any member of the University of Toronto under this *Code*.

7. Aiding in the Commission of an Offence

No person shall counsel, procure, conspire with or aid a person in the commission of an offence defined in this *Code*.

8. Refusal to Comply with Sanctions

No person found to have committed an offence under this *Code* shall refuse to comply with a sanction or sanctions imposed under the procedures of this *Code*.

9. Unauthorized Possession or Use of Firearms or Ammunition

No person other than a peace officer or a member of the Canadian Forces acting in the course of duty shall possess or use any firearm or ammunition on the premises of the University of Toronto without the permission of the officer of the University having authority to grant such permission.

Note: The President of the University or another senior officer designated by the President has been given the authority to grant such permission for the premises of the University of Toronto under the authority of the Governing Council of the University. The President has designated the Vice-President, Business Affairs, who is the Chief Administrative Officer of the University to exercise this authority. Various officers of institutions federated with the University of Toronto have authority to grant such permission with respect to the premises of the federated institutions.

[C.] Procedures

1. General

- (a) The University shall establish a centrally appointed pool of trained Investigating and Hearing Officers, who shall be available to the divisions, at the discretion of the head of the division, if that is considered appropriate or preferable for any reason.
- (b) Each division shall appoint an Investigating Officer and a Hearing Officer, who may be student, staff or faculty members from that division.
- (c) Whether the incident is investigated locally or centrally, every effort shall be made to conclude the case through to delivery of a final decision within the University within one year from the alleged incident of misconduct.
- (d) Pursuant to the provisions of Section D., interim conditions may be imposed by the head of the division.
- (e) For the purposes of confidential and central record keeping, a one-page summary of the outcome of all investigations, whether or not they have proceeded to a Hearing, shall be copied to the Judicial Affairs Officer in the Office of the Governing Council.
- (f) Whenever possible and appropriate, informal resolution and mediation shall be used to resolve issues of individual behaviour before resort is made to formal disciplinary procedures.

2. Specific

- (a) An Investigating Officer shall be appointed for a term of up to three years by the principal, dean or director (hereinafter called "head") of each faculty, college or school in which students are registered (hereinafter called "division"), after consultation with the elected student leader or leaders of the division, to investigate complaints made against student members of that division. Investigating Officers shall hold office until their successors are appointed.
- (b) A Hearing Officer shall be appointed for a term of up to three years by the council of each division to decide on complaints under this *Code* made against student members of that division. Hearing Officers shall hold office until their successors are appointed.
- (c) If the Investigating Officer is unable to conduct an investigation, or the Hearing Officer is unable to conduct a hearing,

or where the head of the division believes on reasonable grounds that the appointed officer is inappropriate to conduct the particular investigation or chair a particular hearing, then the head of the division shall seek an appointment from the central pool for that particular case. If the head of the division intends to request either suspension from registration or expulsion from the University as a sanction in a particular case, or if the case appears to the head of the division to require a Hearing Officer with legal qualifications, then the Senior Chair of the University Tribunal may, on the application of the head of the division, appoint a legally qualified person as Hearing Officer for the particular case.

- (d) Where the head of the division has reason to believe that a non-academic offence as defined in this *Code* may have been committed by a student member or members of the division, the Investigating Officer will conduct an investigation into the case. After having completed the investigation, the Investigating Officer shall report on the investigation to the head of the division. If the head of the division concludes, on the basis of this report, that the student or students may have committed an offence under the *Code of Student Conduct*, the head of the division shall have the discretion to request that a hearing take place to determine whether the student or students have committed the offence alleged.
- (e) The hearing will be chaired by the Hearing Officer. The case will be presented by the Investigating Officer, who may be assisted and represented by legal counsel. If the right to a hearing is waived, or after a hearing, the Hearing Officer will rule on whether the student or students have committed the offence alleged and may impose one or more sanctions as listed below. The accused student or students may be assisted and represented by another person, who may be legal counsel.
- (f) Appeals against decisions of bodies acting under authority from the council of a division to hear cases arising out of residence codes of behaviour may be made to the Hearing Officer of the division, where provision therefor has been made by the council of the division.
- (g) Appeals against the decision of the Hearing Officer may be made to the

Discipline Appeals Board of the Governing Council.

- (h) Where the head of a division has reason to believe that a non-academic offence may have been committed by a group of students including students from that division and from another division or divisions, the head may consult with the head of the other division or divisions involved and may then agree that some or all of the cases will be investigated jointly by the Investigating Officers of the divisions of the students involved and that some or all of the cases will be heard together by the Hearing Officer of one of the divisions agreed upon by the heads and presented by one of the Investigating Officers agreed upon by the heads.

[D.] Interim Conditions and Measures

1. Interim Conditions: Ongoing Personal Safety

In those cases where the allegations of behaviour are serious and, if proven, could constitute a significant personal safety threat to other students or members of the University community, the head of the division is authorized to impose interim conditions that balance the need of complainants for safety with the requirement of fairness to the respondent student. The interim conditions are in no way to be construed as indicative of guilt, and shall remain in place until the charges are disposed of under the *Code's* procedures.

2. Interim Measures: Urgent Situations

In some circumstances, such as those involving serious threats or violent behaviour, it may be necessary to remove a student from the University. Where the head of the division has requested an investigation by the Investigating Officer and the investigation is pending, the Vice-President & Provost (or delegate) may, on the advice of the head of the division, suspend a student or students temporarily for up to three working days if, in the opinion of the Vice-President & Provost (or delegate), there is reasonable apprehension that the safety of others is endangered, damage to University property is likely to occur, or the continued presence of the student(s) would be disruptive to the legitimate operations of the University. The student(s) shall be informed immediately

in writing of the reasons for the suspension and shall be afforded the opportunity to respond. Any such temporary suspension must be reviewed by the Vice-President & Provost (or delegate) within the three-day temporary suspension period, following a preliminary investigation, and either revoked or continued. If the suspension is continued, the student(s) may appeal to the Senior Chair (or delegate), or the Associate Chair (or delegate) of the University Tribunal, who shall hear and decide on the appeal within five days.

[E.] Sanctions

The following sanctions or combinations of them may be imposed upon students found to have committed an offence under this *Code*.

In addition, students found to have committed an offence may be placed on conduct probation for a period not to exceed one year, with the provision that one or more of the following sanctions will be applied if the conduct probation is violated.

1. Formal written reprimand.
2. Order for restitution, rectification or the payment of damages.
3. A fine or bond for good behaviour not to exceed \$500.
4. Requirement of public service work not to exceed 25 hours.
5. Denial of access to specified services, activities or facilities of the University for a period of up to one year.

The following two sanctions, which would directly affect a student's registration in a program, may be imposed only where it has been determined that the offence committed is of such a serious nature that the student's continued registration threatens the academic function of the University of Toronto or of any of its divisions or the ability of other students to continue their programs of study. Where the sanction of suspension and/or expulsion has been imposed on a student, the Vice-President & Provost (or delegate) shall have the power to record that sanction on the student's academic record and transcript for such length of time as he or she considers appropriate.

A sanction of suspension shall be recorded on the student's academic record and transcript for a period of five years. The

following wording shall be used: "Suspended from the University of Toronto for reasons of non-academic misconduct for a period of [length of suspension], [date]."

A sanction of expulsion shall be permanently recorded on a student's academic record and transcript. The following wording shall be used: "Expelled from the University of Toronto for reasons of non-academic misconduct, [date]."

6. Suspension from registration in any course or program of a division or any divisions for a period of up to one year.
7. Recommendation for expulsion from the University.

POLICY ON ACCESS TO STUDENT ACADEMIC RECORDS

The complete Policy on Access to Student Academic Records is available on the University of Toronto Web site www.utoronto.ca/govcncl/pap/policies/sturec.html. Extracts from the Policy are provided below in ordinary type. References in square brackets are to original section numbering in the Policy.

[3.] Definition of the official student academic record

The official student academic record refers to information relating to a student's admission to and academic performance at this University.

The "official student academic record" shall contain:

- (a) (i) personal information which is required in the administration of official student academic records such as name, student number, citizenship, and social insurance number;
- (ii) registration and enrolment information;
- (iii) results for each course and academic period; and
- (b) (i) narrative evaluations of a student's academic performance subsequent to his or her admission, used to judge his or her progress through an academic program;
- (ii) basis for a student's admission such as the application for admission and supporting documents;
- (iii) results of petitions and appeals filed by a student;

- (iv) medical information relevant to a student's academic performance which has been furnished at the request or with the consent of the student concerned;
- (v) letters of reference which may or may not have been provided on the understanding that they shall be maintained in confidence;
- (vi) personal and biographical information such as address and telephone number.

The "official student academic record" shall be maintained by the University. For each type of information, academic divisions shall designate which document, form or medium contains the official version and how official copies of such information will be identified

[4.] Access to official student academic records

(a) Access by a student

- (i) A student may examine and have copies made of his or her official student academic record defined in Section 3 above, with the exception of those portions of the record which comprise letters of reference (Section 3(b)(v)) which have been provided or obtained on the expressed or implied understanding that they shall be maintained in confidence. A student may, however, be advised of the identity of the authors of any confidential letters contained in his or her official academic record.
- (ii) A student's request to examine a part of his or her official student academic record shall be made in writing and shall be complied with by the responsible authorities within a division. Such compliance shall occur within 30 days of receipt of the request, or within such lesser period as a division may determine.
- (iii) A student has the right to challenge the accuracy of his or her official student academic record with the exception of the material specifically excluded in Section 4(a)(i) and to have his or her official student academic record supplemented with comments so long as the sources of such comments are identified and the official student academic record remains securely within the custody of the academic division. Reference to such comments does not appear

on reports such as transcripts or statements of results.

- (iv) It is assumed that all documents relating to petitions and appeals (Section 3(b)(iii)) and not provided on the understanding that they shall be maintained in confidence will be retained within a division, and when needed by a student, will be made freely available. In addition, *The Statutory Powers Procedure Act, 1971* of Ontario requires that where the good character, propriety of conduct or competence of a party is in issue in any proceedings in a tribunal to which the Act applies (such as the Academic Appeals Committee of the Governing Council), the party is entitled to be furnished prior to the hearing with "reasonable information" of any allegations with respect thereto.

(b) Access by alumni and former students

- (i) An alumnus or alumna or a former student may examine and have copies made of the portion of his or her official student academic record as defined in Section 3(a) above.
- (ii) A request from an alumnus or alumna or a former student to examine the portion of the official student academic record as defined in Section 3(a) shall be made in writing and shall be complied with by the responsible authorities within a division. Such compliance shall occur within 30 days of receipt of the request, or within such lesser period as a division may determine.
- (iii) An alumnus or alumna or a former student shall have the right to challenge the accuracy of his or her official student academic record only under such terms and conditions as the academic division may determine and publish in the divisional calendar.

- (c) Access by University staff and members of official University and divisional councils and standing committees
Members of the teaching and administrative staff of the University and members of official University and divisional councils and committees shall have access to relevant portions of an official student academic record for purposes related to the performance of their duties. A staff member requesting information must have a legitimate need to have

the requested information for the effective functioning of the position or office. Access to medical information as defined in Section 3(b)(iv) shall be granted to members of the teaching and administrative staff only with the prior expressed or implied consent of the student and, if applicable, in the case of a medical assessment, the originator (physician, etc.) of such.

The Department of Alumni and Community Relations shall have access to appropriate personal information on students and alumni for the purpose of maintaining contact with alumni.

- (d) Access by University campus organizations
Recognized campus organizations in the University of Toronto shall have access to the information referred to in Section 3(a)(ii) as well as to the sessional address and telephone number of students named by that organization for the legitimate internal use of that organization. The Students' Administrative Council, Graduate Students' Union, Association for Part-time Undergraduate Students, and The Newspaper shall be entitled to publish and distribute within the University community a University-wide directory of students (including undergraduate, graduate, full-time and part-time) giving the sessional address and telephone number of students as long as there is a realistic provision for students to decline to consent to the disclosure of that information.

Names and addresses of students will also be provided to recognized campus organizations for the purpose of distributing information when all of the following conditions are met:

- the name and address information is not released to a third party.
- the name and address information is not used for commercial purposes.
- the organization proposes to distribute information which, in the opinion of the Assistant Vice-President (Planning) and University Registrar, the University would be willing to distribute if reimbursed by the organization.
- the information to be distributed is intended to provide information about the University and is not primarily advertisements for non-University organizations.
- the campus organization agrees to use the name and address information only for the specific purpose for which it was provided.

- (e) Access by others

- (i) By the act of registration, a student gives implicit consent for a minimal amount of information to be made freely available to all enquirers: the academic division(s), degree program(s) and the session(s) in which a student is or has been registered, degree(s) received and date(s) of convocation.

- (ii) Any other information contained in the official student academic record (including any comments generated under Section 4(a)(iii)) but with the exception of the material specifically excluded in Section 4(a)(i)), shall be released to other persons and agencies only with the student's prior expressed written consent, or on the presentation of a court order, or in accordance with the requirements of professional licensing or certification bodies, of the Ministry of Colleges and Universities for an annual enrolment audit, or otherwise under compulsion of law. Requests granted to any persons or agencies outside the University for access to a student's academic record shall be kept on file within a division. The release of the information concerning alumni and former students contained in the portions of the academic record as defined in Section 3(a)(i) shall also be governed by the above provisions.

- (iii) General statistical material drawn from academic records not disclosing the identities of students, alumni and former students may be released for research and informational purposes authorized by the University by the academic division maintaining these records.

- (iv) In the event that a student, alumnus or alumna or a former student is deceased, the executors of his or her estate shall have access to the official student academic record under the same terms as would the individual if he or she were still living.

- (f) Refusal of access

The University reserves the right to withhold access to the statements of results and transcripts of students, alumni and former students who have outstanding debts or obligations to the University in accordance with the Policy on Academic Sanctions for Students Who Have Outstanding University Obligations.

The University may also choose not to release the official diploma to such persons nor to provide written or oral certifications of degree on their behalf.

[5.] Custody and retention of official student academic records

- (a) Academic records of students are normally under the custodial responsibility of the academic division. Every academic division maintaining official student academic records shall draw up plans for the eventual disposition of their records in consultation with the University Archivist and in accordance with an approved records schedule which is in compliance with this policy.
- (b) Those portions of the official student academic record as defined in Section 3(a) shall be maintained permanently. Each academic division's records schedule shall specify the document, form or medium in which these records will be maintained.
- (c) Official student academic records preserved in the University Archives because of their archival value shall become open to researchers authorized by the University seventy-five years after a student has ceased to be registered.

[6.] The University's responsibilities with reference to the official academic records of students, alumni and former students

- (a) Students shall be informed of University policy and divisional procedures with respect to their official student academic records.
- (b) Academic divisions, administrative divisions which handle student academic records and campus organizations shall develop administrative procedures in support of this policy.
- (c) Academic records shall be kept at all times under appropriate security.

- [7.]** Notwithstanding other provisions of the Policy on Access to Student Academic Records, for the sole purpose of administering drug and health insurance plans organized by the Students' Administrative Council, the association of Part-time Undergraduate Students, and the Graduate Students' Union, a list of the names, addresses, and student numbers of students in the relevant plan may be provided to the insurance company designated by the student organization. The terms and conditions under which the lists will be provided

shall be satisfactory to the Vice-Provost, Students and shall be reflected in formal agreements which ensure that the information is adequately safeguarded and used only for the purpose for which it is provided. A similar list may be provided directly to the student organization under terms and conditions satisfactory to the Vice-Provost, Students, provided the Vice-Provost is satisfied that this is required for the administration of the plan.

POLICY ON OFFICIAL CORRESPONDENCE WITH STUDENTS

The University and its divisions may use the postal mail system and/or electronic message services (e.g., electronic mail and other computer-based online correspondence systems) as mechanisms for delivering official correspondence to students.

Official correspondence may include, but is not limited to, matters related to students' participation in their academic programs, important information concerning University and program scheduling, fees information, and other matters concerning the administration and governance of the University.

Postal Addresses and Electronic Mail Accounts

Students are responsible for maintaining and advising the University, on the University's student information system (currently ROSI), of a current and valid postal address as well as the address for a University-issued electronic mail account that meets a standard of service set by the Vice-President and Provost.

Failure to do so may result in a student missing important information and will not be considered an acceptable rationale for failing to receive official correspondence from the University.

University Rights and Responsibilities Regarding Official Correspondence

The University provides centrally-supported technical services and the infrastructure to make electronic mail and/or online communications systems available to students. University correspondence delivered by electronic mail is subject to the same public information, privacy and records retention requirements and policies as are other university correspondence and student records. The University's expectations concerning use of information and communication technology are articulated in the guidelines on Appropriate Use of

Information and Communication Technology at www.provost.utoronto.ca/English/Appropriate-Use-of-Information-and-Communication-Technology.html.

**Students' Rights and Responsibilities
Regarding Retrieval of Official
Correspondence**

Students are expected to monitor and retrieve their mail, including electronic messaging account(s) issued to them by the University, on a frequent and consistent basis. Students have the responsibility to recognize that certain communications may be time-critical. Students have the right to forward their University-issued electronic mail account to another electronic mail service provider address but remain responsible for ensuring that all University electronic message communication sent to the official University-issued account is received and read.

SAFETY IN FIELD RESEARCH

The University of Toronto Policy for Safety in Field Research states that working responsibility for safety in field research rests primarily upon the persons who directly supervise and carry out the research on location. Such persons are expected at all times to use good common sense. The University's concern in this policy is to require that due diligence be exercised by all concerned parties in giving attention to the nature of, and the means for dealing with, the categories of risk that may be associated with each location and kind of field research. It is the intention of the University that participants enter into field research on the basis of their informed understanding of the associated risks and their consent to the means for dealing with such risks.

Students engaged in field research beyond the University's geographical boundaries should be familiar with the section of the policy which sets out the Requirements for Personal Care, and Responsibilities and Procedures. The full policy is available on the University of Toronto Web site at www.utoronto.ca/govcncl/pap/policies/safefr.html.

Students are also encouraged to review the Guidelines for Safety in Field Research produced by the Office of Environmental Health and Safety at www.utoronto.ca/safety/Policies/fieldres.htm.

STATEMENT ON HUMAN RIGHTS

Acknowledging its fundamental and distinctive commitment to freedom of thought, inquiry, and expression, the University of Toronto affirms its commitment to the values of equal opportunity, equity and social justice. In this affirmation, the university

- acknowledges that it conducts its teaching, research and other activities in the context of a richly diverse society;
- recognizes that the attainment of excellence in pursuit of its mission is furthered by the contribution made by persons reflecting this rich diversity;
- acts within its purview to prevent or remedy discrimination or harassment on the basis of race, gender, sexual orientation, age, disability, ancestry, place of origin, colour, ethnic origin, citizenship, creed, marital status, family status, receipt of public assistance or record of offence;
- acts conscientiously in keeping with its own policies and existing legislation related to human rights, such as its *Code of Behaviour on Academic Matters*, its *Policies and Procedures: Sexual Harassment*, its *Employment Equity Policy* and the *Human Rights Code of the Province of Ontario*.

2

Degree Regulations

All degree students are accepted under the General Regulations of the School of Graduate Studies, as described in section 1, General Regulations.

In this section:

Introduction

Doctor of Philosophy (Ph.D.)

Doctor of Education (Ed.D.)

Master of Arts (M.A.)

Master of Science (M.Sc.)

Master of Applied Science (M.A.Sc.)

Master of Engineering (M.Eng.)

Master of Health Science (M.H.Sc.)

Master of Education (M.Ed.)

Degree regulations not found in this section appear in the SGS Calendar under Section 8, Graduate Programs and on the SGS Web site at www.sgs.utoronto.ca. Graduate unit entries are listed alphabetically with degree regulations appearing under the appropriate entry.

INTRODUCTION

Graduate Student Supervision

While the special, collaborative relationship between student and supervisor serves as a foundation for graduate education, particularly at the Ph.D. level, the primary responsibility for graduate programs and their supervision rests with the graduate unit. The Chair of the graduate unit has the principal obligation and authority for exercising these responsibilities, in accordance with the Statute of the School of Graduate Studies, and therefore, for implementing the academic and procedural standards established in the School in 1985/86 in the form of the "Report of the Committee on Ph.D. Supervision" (Endrenyi Report).

Although the report indicates procedures to be followed in the supervision of Ph.D. students, it is clear that these have general applicability for all graduate students to some degree. It is essential that students have access to information relevant to their graduate program of studies, in all domains. Thus each graduate unit will provide students with a document which provides details of all procedures involved with graduate training, a list of members of the graduate faculty with relevant information concerning their participation, fields of expertise and supervision, and a copy of *Graduate Supervision: Guidelines for Students, Faculty, and Administrators* (also available online at www.sgs.utoronto.ca/current/supervision/guidelines.pdf). In addition, updated statements must be made available to students on a regular basis. These will include a list of graduate students (with their general thesis topic, supervisor(s) and advisor(s)), the availability of financial assistance, and relevant information to affected students about the expected absences of their supervisor(s) and/or advisor(s). Any doctoral student who believes that his or her graduate unit is not following the supervision guidelines may inform his or her Coordinator of Graduate Studies or the Vice-Dean of the School of Graduate Studies.

The academic experience is greatly enhanced if members of the academic faculty, in addition to the direct supervisor, are readily and formally available for consultation and discussion with the graduate student. Therefore, an individual thesis supervisory committee or, as an alternative, an area supervisory committee, should be struck as early as possible for each graduate student, and certainly from the commencement of thesis supervision.

The graduate unit is responsible for adopting a procedure for monitoring the progress of Ph.D. students registered in its programs. The procedure shall contain the following minimum

elements, consistent with *Graduate Supervision: Guidelines for Students, Faculty, and Administrators*, available at graduate units and online at www.sgs.utoronto.ca/current/supervision/guidelines.pdf:

- 1 A supervisory committee consisting of the supervisor and at least two graduate faculty members.
- 2 The supervisory committee meets with the student at least once per year to assess the student's progress in the program and to provide advice on future work.
- 3 The committee submits a report detailing its observations of the student's progress and its recommendations.
- 4 The student must be given the opportunity to respond to the committee's report/recommendations and to append a response to the committee's report.
- 5 Copies of the report shall be given to the student and filed with the department.

Thesis Topic and Supervision

In those degree programs for which a thesis is part of the requirements, the work upon which the thesis is based must be conducted under the direction of one or more members of the faculty of the School of Graduate Studies.

A student must choose a thesis topic for which the graduate unit in which he or she is registered is able to provide adequate supervision.

A student's choice of thesis topic, as well as his or her choice of supervisor and supervisory committee, is subject to the approval of the graduate unit in which the student is registered.

Transfer Credit and Exemptions

Transfer credit for graduate work completed in another program is limited to one full course or equivalent, or 25 percent of the course requirements for any degree, whichever is greater, provided that the courses have not been credited towards another degree, diploma, certificate, or any other qualifications. Such credit may be given on the recommendation of the student's graduate unit and with the School's approval, normally upon admission. Exceptions to the limit are allowed when approved for specific degrees.

Students participating in an approved exchange program on the recommendation of their graduate unit may receive transfer credit for up to 50 percent of the course requirements for their degree. They may also complete language requirements while on the exchange. When recommended by the unit and approved by the SGS Dean, that percentage may be exceeded by doctoral students. In all cases transfer credit arrangements for exchange program partici-

pants must be approved in advance by the SGS Dean or designate.

Transfer of credit and course exemptions include the following categories:

1 Transfer Credit - Course Equivalent: Credit received for course completed in a prior program is considered to be equivalent to course offered by the graduate unit thus reducing the overall course credit requirements for degree.

2 Transfer Credit - General Equivalent: Unassigned credit for course not identifiable with course offerings but which is evaluated as being appropriate for academic credit on transfer thus reducing overall course credit requirements for degree.

3 Course Exemption: The graduate unit may exempt a student from a specific course requirement permitting the substitution of another course to meet degree requirements. Overall course credit requirements for degree are not reduced.

Advanced Standing

Advanced standing refers to academic credit awarded upon admission to a program of study which enables direct entry to an identified higher academic achievement level of the program. Students are eligible for advanced standing if they meet a clearly articulated set of objectives and/or course requirements for an advanced standing option as defined in the graduate program calendar entry. Not every program will offer an advanced standing option. Consult the graduate unit regarding advanced standing options.

DOCTOR OF PHILOSOPHY

For specific admission and program requirements, please consult graduate unit entries. The Council of the School of Graduate Studies has recommended that all graduate units offering the Ph.D. design a four-year program that can be completed on a full-time basis by a student who has a master's degree in a discipline appropriate to the intended field of study. Where graduate units are aware that it may be difficult for students to complete their Ph.D. programs within four years, they have been asked to include a statement to that effect in their calendar entries.

Admission Requirements

1 Four-Year Ph.D. Program

Students admitted to this program require a University of Toronto master's degree or equivalent with at least B+ standing from a recognized university in a discipline deemed appropriate to the intended field of study.

2 **Five-Year Ph.D. Program**

Students admitted to this program require a four-year University of Toronto bachelor's degree or its equivalent with at least A- standing from a recognized university in courses in the relevant discipline. Students who hold a master's degree in another discipline or require further preparation would also normally be admitted to this program.

Registration

1 A Doctor of Philosophy student must be regularly registered in the School of Graduate Studies in accordance with the procedures of the General Regulations. Ph.D. students must register for every successive session, including summers, on a full-time basis following their first session of registration unless granted a leave of absence. The minimum period of registration is one academic year, that is, three consecutive sessions.

2 A student who is admitted on condition that the requirements for an acceptable master's degree at another university be completed may be permitted conditional registration, unless this is excluded by the terms of the letter of admission. A student who is conditionally registered must submit to the graduate unit, not later than January 31 of the first year of enrolment, official verification of completion of the requirements for the master's degree. If verification is not submitted by that date, additional requirements may be added to the Ph.D. program.

Transfers

1 **Master's to Ph.D.**

A student may be recommended for transfer from a master's program to a Ph.D. program. In such cases, the student will transfer to a five-year Ph.D. with the years in the master's program being counted as part of the Ph.D. program. The total number of courses required for the Ph.D. is the sum of the normal master's and Ph.D. course requirements unless otherwise specified by the graduate unit.

2 **Ph.D. to Master's**

Students transferring from the Ph.D. to the master's program must complete all of the normal master's degree requirements, or their equivalent, in order to be awarded the master's degree. These transfers are made on the recommendation of the graduate unit and must be approved by the Vice-Dean. A second University of Toronto master's degree of the same name will not be conferred unless it is undertaken in a different field of study from the first. Students who transfer from the Ph.D. to the master's program will not be permitted to register subsequently in the Ph.D. program within the same graduate unit

unless approved by the SGS Admissions and Programs Committee.

Program Requirements

1 **Approval**

A student shall pursue a program of advanced study and research which must be approved by the graduate unit.

2 **Program**

Specific program requirements are set by the graduate units and are found in their respective entries. The thesis topic and the name of the supervisor must be submitted by the middle of the first session of the second year. Graduate units may, at their discretion, require an earlier date.

3 **Language Requirement**

The student must have an adequate knowledge of such language or languages, other than English, as are required by the major graduate unit (see individual graduate unit entries for specific requirements).

Testing and certification of languages (including French and German) may be administered by the appropriate language department or by the student's own graduate unit.

The major graduate unit is responsible for ensuring that an acceptable certificate of language competence is deposited in the official student file.

4 **Time Limit for Completion of Program Requirements**

A student enrolled in a full-time (as opposed to a flexible-time) Ph.D. degree program will be denied further registration in that program and will have his or her eligibility terminated at the end of the third year of registration, in the case of a four-year program, or at the end of the fourth year of registration, in the case of a five-year program, if by that time either

- a** the student has not completed all requirements for the degree exclusive of thesis research—including course requirements, language requirements, qualifying departmental examinations—or
- b** the student does not have an approved thesis topic, supervisor, or supervisory committee.

Note: The foregoing time limit does not apply to courses that run continuously throughout the program, e.g., ongoing research seminar courses.

In exceptional circumstances, a student who has not met these requirements may be permitted to register in the program for two further sessions at the discretion of the graduate unit concerned. Continuation beyond two sessions will require the approval of both the graduate unit and the SGS Admissions and Programs Committee.

Completion of the program requirements identified above will signal the achievement of candidacy.

5 Thesis

The candidate, through the graduate unit, shall present a thesis embodying the results of original investigation, conducted by the candidate, on the approved topic from the major field. The thesis shall constitute a significant contribution to the knowledge of the field and must be based on research conducted while registered for the Ph.D. program.

A thesis should have a coherent topic with an introduction presenting the general theme of the research and a conclusion summarizing and integrating the major findings. Nonetheless, it may contain a collection of several papers. The collection of papers may be expanded or supplemented by unpublished material, scholarly notes, and necessary appendices. In all theses, pagination should be continuous; there should be a common table of contents and an integrated bibliography for the whole thesis. The hard copy of every thesis must be a printed or typed document in a standard form that can be easily microfilmed (see National Library guidelines referred to below).

The thesis should normally be written in English, but with the permission of the School, a graduate unit may permit, or require, students in that unit to write the thesis in French.

In Division I, the humanities, permission may be given for a thesis to be written in a language other than English or French when the language has been approved for use in theses by the graduate unit concerned. Before such permission can be granted, the graduate unit chair must certify in writing to the School that the candidate has passed a supervised essay-type examination, written in English, that demonstrates his or her proficiency in writing correct and idiomatic English prose. A supplementary abstract of about 5,000 words in English or French must form part of a thesis that is written in a language other than English or French, and no language other than English or French may be used for the conduct of final doctoral examinations.

6 Time for Completion of Degree

All requirements must be completed within six years from first enrolment for the four-year Ph.D. program and within seven years for the five-year Ph.D. program.

In exceptional circumstances, a candidate who has failed to complete all the requirements for the degree within this period may be considered for a maximum of two one-year extensions provided that the graduate unit concerned approves. To qualify for an extension, the

candidate must present to the graduate unit concerned the causes for the delay and evidence of substantial progress on the thesis. A candidate who is granted an extension must register as a full-time student. Any extension granted must be calculated as beginning immediately upon the termination of the permitted periods.

Ph.D. students who have not completed the degree before the time limit for the degree or by the end of the extension period may not enrol further but, after an interval, may apply to be re-instated once only as a candidate for the purpose of presenting a thesis and defending it at a final oral examination. The reinstatement must have the approval of both the graduate unit and SGS. It will be for a maximum of 12 months starting September, January, or May. Reinstatement is normally not approved until the defence has been scheduled. The final oral examination must be held within the 12-month reinstatement period. A student reinstated after the degree time limit will pay a reinstatement fee equivalent to a one session full-time fee (Fall or Winter). No fees will be charged for the sessions after the normal time limit for the degree during which the student was not registered. In the case of a reconvened examination for a student reinstated after the normal time limit for the degree, no fees would be charged, but the student must remain registered.

Flexible-time Ph.D. Degree

Departments may develop, for approval, Ph.D. programs which may be completed on a "flexible-time" basis. Such programs will be offered where there is sufficient demand by practicing professionals for design and delivery of Ph.D. programs that, except for short specified periods of time, permit continued employment in areas related to the fields of research. In these programs, theory and praxis would uniquely engage and inform each other.

The flexible-time Ph.D. differs from the full-time Ph.D. only in design and delivery. Students in a flexible-time program will normally register full-time during the first four years and part-time during subsequent years of the program. Students are required to be registered for every successive session, including summers, following their first session of registration unless granted a leave of absence.

The time limit, between six to eight years, will be specified by the departmental regulations. Extensions are permitted under existing policy; students granted an extension may register full-time or part-time.

Transfers between the full-time Ph.D. program and the flexible-time Ph.D. program will not be permitted.

Final Oral Examination

1 The candidate shall defend the thesis at a final oral examination organized by the graduate unit with the cooperation of SGS. The process of scheduling the examination, allowing time for professional appraisal, can be expected to take at least eight weeks at the best of times, and candidates should discuss the timing with the graduate administration of their unit. Candidates should also ascertain whether or not their unit imposes regulations over and above the minimal conditions required by SGS.

2 The graduate unit will notify SGS eight weeks prior to the examination when the thesis is ready to go forward for examination. In the absence of any particular local procedure, the candidate's supervising committee will advise SGS that the thesis is ready to proceed. In rare cases, a thesis may proceed to examination without the approval of the supervising committee: candidates should contact the SGS Vice-Dean, Programs.

3 The thesis will be sent to an appraiser external to the University of Toronto, appointed by SGS on the recommendation of the graduate unit. (The Supervisor of the thesis will propose a list of three or more names of possible external appraisers to the graduate coordinator or Chair, who will choose one and send the recommendation to SGS for approval. The graduate unit will certify that the external appraiser has an arm's-length relationship to the candidate and Supervisor.) The external appraiser should be a recognized expert on the subject of the thesis and should be external to the University as well as to its affiliated teaching hospitals and research institutes. Such an individual must be an associate or full professor at the home institution or, if the individual comes from outside the academic sector, must possess the qualifications to be appointed to an academic position at this level. Arrangements with external appraisers are the responsibility of the graduate unit. In particular, the graduate unit must allow the external appraiser sufficient time to act. The graduate unit must have a copy of the thesis delivered to the appraiser at least six weeks, and preferably longer, in advance of the examination date. Appraisals must be submitted to SGS *at least* two weeks in advance of the examination date; if they are not, the examination may have to be rescheduled. The graduate unit must also ensure that copies of the thesis are made available to all other voting members of the Examination Committee at least four weeks in advance of the examination date.

4 An Examination Committee, appointed by SGS on the recommendation of the graduate unit, will conduct the Final Oral Examination. The Examination Committee must include at

least four, but no more than six, voting members: one to three of the voting members will have served on the candidate's Supervisory Committee, and at least one voting member will not have been closely involved in the supervision of the thesis. Eligible for inclusion in the latter group are the external appraiser (in person or by audio connection), members of the graduate faculty of the candidate's graduate unit, and members of the graduate faculty of other departments, centres, or institutes of the University. The Examination Committee may include, in addition, up to two non-voting members, who will be members of the graduate faculty of the candidate's graduate unit or members of the graduate faculty of another graduate unit of the University. A quorum is four voting members. Graduate units must ascertain in advance the willingness of the persons named to act.

The SGS Vice-Dean, Programs, may modify the composition of the Examination Committee to fit exceptional circumstances.

5 SGS will appoint a non-voting Chair to the Examination Committee. The Chair will be a full member or member emeritus of the graduate faculty, holding no appointment to the graduate faculty of the candidate's graduate unit.

6 The graduate unit is responsible for scheduling the examination, booking a room, and making appropriate technical arrangements.

7 The graduate unit must submit to SGS a Certificate of Completion together with the nomination form confirming completion of all other academic requirements, such as language and field requirements; an abstract of the thesis not longer than 350 words; and a copy of the Examination Program.

8 The graduate unit will send a copy of the external appraisal of the thesis to SGS as soon as it is received. The graduate unit is responsible for the distribution of copies of the external appraisal to the candidate (two weeks before the examination) and members of the Examination Committee. To avoid prejudicing the result of the examination, the external appraisal is not to be discussed with the candidate by members of the Examination Committee until the examination takes place, nor should it be distributed beyond that group and the relevant administrative officers.

9 Members of the graduate faculty are entitled to attend the examination, and with the permission of the Chair, they may ask questions of the candidate, but they must withdraw before the Committee's discussion and vote. A qualified observer may attend, subject to the same restrictions, if the graduate unit has received approval for such attendance in writing beforehand from the SGS Vice-Dean, Programs. Otherwise

the examination is closed to the public. The vote at the examination takes into account both the thesis and the oral defence itself.

10 The Examination Committee represents the SGS Graduate Education Council and through it the University. It is therefore responsible for the standard of the Ph.D. degree in this University. Graduate unit examinations held immediately in advance of the final oral must not therefore interfere with attendance at, or thoroughness of, the final examination.

The Committee must evaluate the external appraisal of the thesis, which is to be considered only as an individual opinion to be employed as the committee sees fit. It must examine the candidate on the content and implications of the thesis. Where someone other than the candidate is a co-author of any portion of the thesis, the Examination Committee must be satisfied that the candidate's personal contribution to the thesis is sufficient to fulfil the requirements of the Ph.D. degree. In addition to determining the adequacy of the thesis, the committee must satisfy itself that the thesis document meets the proper standards of scholarship.

The committee possesses the full authority of the School with respect to the examination.

11 A quorum for the final examination is four voting members, plus the Examination Committee Chair who has no vote. Voting shall be by signed ballot, and the names of the examiners and their respective votes shall be read to the Examination Committee by the Chair. If a quorum is not present the Chair may delay the examination to obtain a quorum or may postpone the examination to another date.

12 The candidate passes on the first examination:

- a** if the decision is unanimous, OR
- b** if there is not more than one negative vote or abstention.

If there is more than one negative vote or abstention, adjournment is mandatory.

In the event of adjournment, the Examination Committee must provide the candidate, as soon as possible, with a written statement that indicates the reasons for adjournment and the committee's requirements for the reconvened oral examination. In addition, the Examination Committee must decide the approximate date of the reconvened examination. The time between the adjourned examination and the reconvened examination should be as short as circumstances will permit and in no case shall exceed one year.

At the reconvened examination, no new committee members shall be added, except for necessary replacements. It is the obligation of

the examiners to attend the reconvened examination.

The candidate passes on the reconvened examination:

- a** if the decision is unanimous, OR
- b** if there is not more than one negative vote or abstention.

No further adjournment will be allowed.

If a candidate is not recommended for the degree by the committee in charge of the second examination, the candidate is ineligible for further Ph.D. candidacy at the University. The Examination Committee must provide the candidate, as soon as possible, with a written statement that explains clearly and directly why the examiners found the candidate's performance unsatisfactory on the written and/or oral components of the examination, as may be relevant.

13 If minor corrections in style are a condition of acceptance of the thesis, the candidate must complete the corrections within one month of the date of the examination, and the supervisor will inform the candidate of the necessary corrections. The supervisor must notify the School of Graduate Studies directly in writing that the required corrections have been made by the candidate, with a copy of the correspondence sent to the graduate coordinator of the graduate unit, before the candidate is recommended for the degree.

14 If minor modifications are a condition of acceptance of the thesis, the Chair of the Examination Committee will appoint a Subcommittee of the Examination Committee (to be approved by the Examination Committee) to supervise the proposed modifications. One member of the Subcommittee is designated by the Chair, with the approval of the Examination Committee, as the Convenor. The Convenor will be responsible for the preparation of a statement detailing the modifications required. Modifications must be completed within three months of the date of the oral examination. The members of the Subcommittee will report on the acceptability of the completed modifications to the Convenor. If all members of the Subcommittee approve the completed modification, the candidate will be passed without the necessity of reconvening the Examination Committee. The Convenor of the Subcommittee must certify in writing to the School of Graduate Studies, within three months of the original examination, that the modifications have or have not been satisfactorily completed. If one or more members of the Subcommittee do not approve the completed modifications, the final oral examination must be reconvened within a year of the date of the original examination.

The Examination Committee must decide the nature of minor modifications, but it is intended that minor modifications should be more than corrections in style and less than major changes in the thesis. A typical example of minor modifications might be clarification of textual material or qualification of research findings and conclusions. The option of acceptance with minor modifications does not apply to the reconvened examination.

If major changes are required, the examination must be adjourned and the Committee reconvened after the changes have been made. **15** The University Library authorization form and publication agreement must be signed by the candidate when the final thesis is submitted. The format of the submitted thesis must comply with the School of Graduate Studies guidelines. **16** The School requires that every Ph.D. thesis be published substantially as it is accepted.

It is the intention of the University of Toronto that there be **no restriction** on the distribution and publication of theses. However, in exceptional cases, the author, in consultation with the thesis supervisor and with the approval of the chair of the graduate unit, shall have the right to postpone distribution and publication for a period up to two years from the date of acceptance of the thesis. In exceptional circumstances and on written petition to the Dean of the School of Graduate Studies, the period might be extended, but in no case for more than five years from the date of acceptance of the thesis unless approved by the SGS Graduate Education Council.

For further details, students should consult the pamphlet, *Guidelines for the Preparation of Theses* at www.sgs.utoronto.ca/current/theses.

DOCTOR OF EDUCATION

The Ed.D. program is designed to provide opportunities for more advanced study for those already engaged in a career related to education. Specific admission and program requirements are available through the graduate units.

Admission Requirements

- 1** A University of Toronto M.Ed. or M.A. in Education, or its equivalent from a recognized university, in the same area of specialization proposed at the doctoral level, completed with standing equivalent to a University of Toronto B+ or better;
- 2** Ordinarily, one year of professional preparation for education;
- 3** Successful professional experience in education, or in a relevant field.

A student may be enrolled in one of the following graduate units:

- Adult Education and Counselling Psychology
- Curriculum, Teaching and Learning
- Human Development and Applied Psychology
- Sociology and Equity Studies in Education
- Theory and Policy Studies in Education

Program of Study

For specific program and registration requirements, consult the home graduate unit.

- 1** Normally, a minimum of one Fall Session and one Winter Session of full-time study must be taken consecutively (i.e., Fall Session - September to December, followed by Winter Session - January to April, or Winter Session - January to April, followed by Fall Session - September to December).
- 2** In most programs, students may begin their studies on a part-time basis.
- 3** Eight half-courses are required for students who have an M.Ed. or M.A. degree or the equivalent in the same area of specialization proposed at the doctoral level. Upon the recommendation of the home department, students beginning the degree program on a full-time basis can add prerequisite courses to their program. Otherwise, students must take prerequisite courses as "Special Students" at OISE/UT. An eight half-course Ed.D. program should include at least four half-courses in the home department except as otherwise stated in departmental program descriptions.
- 4** Students in some departments or specializations will be required to take a comprehensive examination. Consult specific departments for details.
- 5** A thesis embodying the results of original investigation conducted by the student under the direction of an OISE/UT thesis committee. The student must file the names of thesis committee members by April 1 of the year following the period of required full-time study.

The thesis will report the results of a study, which might address theoretical issues applicable to professional concerns and practice, or which might focus directly on the exploitation of knowledge in order to study or influence aspects of educational practice.

The thesis must conform to the tenets of scholarly writing in a rigorous style of presentation. All students using human subjects in their thesis research must have their thesis proposals reviewed by the OISE/UT-wide Student Education Ethics Review Committee (SEERC) administered by University of Toronto Research Services (UTRS). Please consult the OISE/UT Guidelines for Theses and Orals regarding thesis and ethical review procedures.

- 6** Students undergo a final oral examination on the content and implications of the thesis, to

determine the adequacy of both the thesis and its defence by the student.

7 All requirements for the Ed.D. must be completed within six years of first enrolment as an Ed.D. student.

MASTER OF PHILOSOPHY

The University of Toronto no longer offers programs of study leading to the degree of Master of Philosophy.

MASTER OF ARTS AND MASTER OF SCIENCE

Admission Requirements

1 Students are admitted under the general regulations.

2 If the master's program is not a continuation of a course of study previously pursued as an undergraduate, or if there are deficiencies in meeting graduate unit admission requirements, prerequisite work may be required and the minimum length of program may be extended.

Program of Study

1 Under the direction of one graduate unit, a student in this University shall pursue a program of advanced study approved by the graduate unit.

2 All requirements for the degree of M.A. or M.Sc. must be satisfactorily completed within 5 years from first enrolment if the minimum period of full-time registration is up to 12 months and within 6 years from first enrolment if the minimum period of full-time registration is 16 to 24 months.

For specific admission and program requirements, please see the appropriate graduate unit entry. In advance, prospective students should consult the Coordinator of Graduate Studies of the appropriate graduate unit to ensure that the proper undergraduate courses are being taken in preparation for the master's program.

MASTER OF APPLIED SCIENCE

The M.A.Sc. degree is intended primarily for those who wish to prepare for a career in research and/or plan to continue their graduate studies through the Ph.D. degree.

Admission Requirements

1 Students are admitted under the general regulations.

2 Applicants shall hold the degree of Bachelor of Applied Science of this University or an equivalent degree in engineering. An applicant having a bachelor's degree in science or applied

mathematics may be admitted as a student by the graduate unit concerned.

A student may be enrolled in one of the following graduate units

- Aerospace Science and Engineering
- Biomaterials and Biomedical Engineering
- Chemical Engineering and Applied Chemistry
- Civil Engineering
- Electrical and Computer Engineering
- Geology
- Materials Science and Engineering
- Mechanical and Industrial Engineering

Program of Study

1 Under the direction of one graduate unit, a student in this University shall pursue a program of advanced study approved by the graduate unit. Normally the program shall include not more than three full-year courses or equivalent and the preparation of a research thesis, the latter being the major requirement.

2 The minimum residence requirement for the degree is two sessions (eight months), and the requirements for the degree must be completed within three calendar years.

MASTER OF ENGINEERING

The M.Eng. degree is intended primarily for those who wish to pursue advanced study at the master's level which is especially suited for professional practice.

Admission Requirements

1 Students are admitted under the general regulations.

2 Applicants shall hold the degree of Bachelor of Applied Science of this University or an equivalent degree in engineering. An applicant having a bachelor's degree in science or applied mathematics may be admitted as a student by the graduate unit concerned.

A student may be enrolled in one of the following graduate units:

- Aerospace Science and Engineering
- Chemical Engineering and Applied Chemistry
- Civil Engineering
- Electrical and Computer Engineering
- Materials Science and Engineering
- Mechanical and Industrial Engineering

Program of Study

1 Under the direction of one graduate unit, a student in this University shall pursue a program of study approved by the graduate unit. The program shall be equivalent in weight to full-time study for at least two sessions (eight months), and may include a project in addition to lecture and laboratory courses.

- 2** There is no general residence requirement for the degree. However, a period of residence may be required, depending on the individual student's program and experience. This required period shall be as recommended by the graduate unit and approved by the School of Graduate Studies, but shall not exceed two sessions.
- 3** The degree program must be completed within six calendar years of registration.

MASTER OF HEALTH SCIENCE

The degree of Master of Health Science is offered in the following graduate units:

- Biomedical Engineering
- Health Policy, Management and Evaluation
- Medical Science
- Public Health Sciences
- Speech-Language Pathology

Since requirements for these programs differ, students should consult the individual graduate unit entry for details.

MASTER OF EDUCATION

Admission Requirements

- 1** Students are admitted under the general regulations.
- 2** An appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, completed with standing equivalent to a University of Toronto mid-B or better in the final year. Under exceptional circumstances, for applicants with a three-year degree, equivalency may be demonstrated, for example, through relevant work experience or additional qualifications.
- 3** A year of professional education for teaching, or the equivalent in pedagogical content, is helpful.
- 4** At least one year of relevant, successful, professional experience.

A student may be enrolled in one of the following graduate units:

- Adult Education and Counselling Psychology
- Curriculum, Teaching and Learning
- Human Development and Applied Psychology
- Sociology and Equity Studies in Education
- Theory and Policy Studies in Education

Program of Study

The minimum program requirements for the M.Ed. degree are as follows:

- 1** Under the direction of one graduate unit, a student undertakes one of four options to complete the program.

Option I—Course Work Plus Comprehensive

Ten half-courses plus a comprehensive examination/requirement.

Option II—Research Project

Eight half-courses plus a research project or a Major Research Paper.

Option III—Thesis

Six half-courses plus a thesis.

Option IV—Course Work Only

Ten half-courses.

The M.Ed. degree program requires that a minimum of half of the courses must be taken in the home department unless otherwise specified by the department.

- 2** All requirements for the degree must be satisfactorily completed within six years of first enrolment.

3

Fees

Schedule of Fees

The annual Schedule of Fees, updated each year in June, is available at www.fees.utoronto.ca.

Fees and Registration

New and returning students eligible to register will be mailed their fees invoices prior to the registration period. Payment of fees must be made through a Canadian bank, in Canadian funds, payable to the University of Toronto. Holders of certain scholarships, awards, research assistantships, teaching assistantships, or loans may make arrangements through their graduate unit to defer payment of fees. Students are considered to be registered as soon as they have paid academic and incidental fees or have made appropriate arrangements for deferral of payment. By virtue of being registered, a student thereby agrees to abide by all of the academic and non-academic policies, rules, and regulations of the University of Toronto, the School of Graduate Studies, and the graduate unit in which the student is registered.

Academic Fees Structure

Because the course of study in many graduate units is unstructured and often cannot be described in terms of a specific number of courses, and because graduate education more often than not results from the sum of experience encountered during the program, Graduate School fees are assessed on a program basis rather than on the number of courses taken. Degree Students and Special Students who pay the full-time fee for the previous Fall or Winter Session do not pay fees for the Summer Session. However, Part-time Special Students pay summer fees. In addition, part-time degree students who register for the Summer Session but who have not registered in both sessions of the previous academic year, pay summer fees.

A degree program is defined on a sessional basis and the full fee is charged regardless of the number of courses taken. All students (except Special Students not proceeding to a degree) are accepted into a program with a minimum period of registration, specified on the offer of admission. This period establishes the minimum degree fee that must be paid before graduation.

In the graduate units of Industrial Relations and Human Resources, Management, and Information Studies, where there is no residence or full-time attendance required and the master's degree is achieved by course work only, the length of program will be determined by the number of half-courses (or equivalent full courses) required to complete the degree re-

quirements. For example, for the M.B.A. degree: Up to 12 half-courses is equivalent to a 1-year program.

13-17 half-courses is equivalent to a 1½-year program.

18-24 half-courses is equivalent to a 2-year program.

Full-Time Student Fee

The full-time student fee is charged to a full-time student for the minimum period of registration and all subsequent registrations.

Dual Registrations

Dual registrants will be required to maintain their registration for the master's degree, register also for the Ph.D. degree, and pay only the appropriate Ph.D. fees.

Full-Time Students Commencing a Degree Program in January

Students commencing a degree program in January will pay half the appropriate fee for the year.

Summer Students

Students commencing a degree program in the summer and taking courses will pay the Summer Session fee. These fees are in addition to the annual fees which will be assessed in September.

Students commencing a degree program in September but who start research in the preceding summer do not pay fees for the Summer Session. Continuing Degree Students and Special Students who pay the full-time fee for the previous Fall or Winter Session do not pay fees for the Summer Session. However, part-time Special Students pay summer fees. In addition, part-time degree students who register for the Summer Session, but who have not registered in both sessions of the previous academic year, pay summer fees.

Students returning in the Summer Session from an approved leave (see Leave Policy) do not pay Summer Session fees.

Part-Time Degree Students

Students undertaking their studies on a part-time basis are required to pay the part-time academic and incidental fees each year they register to the completion of their program.

Part-time students engaging in studies for only one session in the Fall or Winter may pay half the part-time fee.

Special Students

Full-time Special Students pay the full academic fee per annum. Special Students enrolling on a part-time basis will pay for each course or half-

course. Fees paid as a special student cannot be applied to any subsequent degree program.

Refund dates are different for part-time Special Students. For details check www.fees.utoronto.ca.

Fees for International Students

In accordance with the recommendations of the Ontario government, certain categories of international students are charged academic fees equal to those for Canadian citizens and Permanent Residents (landed immigrants).

If an international student's status in Canada changes during a session, exemption from the higher fees may be granted. The fees will be adjusted in the current session, provided the status change occurs before November 1 in the Fall Session or before February 1 in the Winter Session. Status changes with supporting documents must be reported to the SGS Student Services Office prior to the above deadlines. However, if a status change effective before these dates is reported with a minor delay, fees adjustment may still be possible.

Incidental Fees

Compulsory incidental fees are charged for the Graduate Students' Union, the Health Service, Hart House, the Athletic Centre, and other student services.

Minimum Payment (for other than those registering for only one session)

The first fee payment is due by the end of the September registration period and consists of 60% of the academic fee and 100% of incidental fees. The balance of the required fees may be paid at any time but is due by April 30 without further notice and is subject to monthly service charges.

Service Charges

All outstanding fees, regardless of the source of payment, are subject to a service charge of 1.5% per month compounded (19.56% per annum), first assessed on November 15 and on the 15th of every month thereafter until paid in full.

Late Registration

Any student registering after the deadline date specified in the Academic Calendar is required to pay a late registration fee of \$44.00 plus \$5.00 for each day of delay to a maximum of \$94.00.

Balance of Degree Fee

The length of the program, as defined by the graduate unit, into which a student is admitted

predetermines the minimum total academic fee that a student must pay prior to graduation. Many part-time master's students must pay a balance of degree fee prior to graduation.

Full-time students who accelerate their programs and finish the degree requirements in less time than the normal program length must pay a balance of degree fee.

If a student has paid more than the full-time program fee due to the time taken to complete the degree requirements, there will be no refund of fees.

Fees for Graduating Master's Students

Master's students who are recommended for graduation by the deadline date for Fall Convocation will not be assessed fees for the Fall Session. Master's students who miss this deadline but complete their degree requirements by January 31, 2008 are required to register for the Fall Session and pay the appropriate fees.

Fees for Final Year Doctoral Students

Academic fees for the final year will be prorated, based on a 12-month academic year, for the number of months that elapse between September and (including) the month in which the final thesis (including corrections required by the final oral examination committee) is submitted to the School of Graduate Studies. Fees for the final month will not be charged if the requirements are met before the 16th day of the month.

Reinstatement Fees

A reinstatement fee equivalent to the one session full-time fee is applied when a full-time student has been reinstated after the time limit for a period of 12 months.

Part-time students who have been reinstated after the time limit pay part-time fees for the session(s) (one to three sessions) in which they register.

Outstanding Fees and Charges

See General Regulations for policy on academic sanctions for students who have outstanding University obligations.

Receipts for Income Tax

Tuition Fee Certificates are available online at www.rosi.utoronto.ca. There is a charge of \$5.00 for the preparation of duplicate receipts.

Transcripts

A \$10.00 fee is charged for each copy of a transcript of record. These fees are subject to change. Transcripts will not be issued for students whose fees are in arrears. Transcripts may be ordered from the University

of Toronto Transcript Centre, 100 St. George Street, Toronto, Ontario M5S 3G3 or online at www.rosi.utoronto.ca.

Calendars

The entire calendar is accessible on the Web at www.sgs.utoronto.ca. Printed copies of the School of Graduate Studies Calendar may be purchased from the School at a cost of \$8.00 each, plus any necessary postage charges. Details and an order form are available at www.sgs.utoronto.ca.

Financial Support and Exchange Programs

In this section:

Awards Offered by the University
Humanities and Social Sciences
Mathematical, Physical, Biological and Applied Sciences

Fellowships Awarded by Government and Non-Government Agencies
Government
Non-Government

Loans, Grants, and Other Bursaries

Teaching and Research Assistantships

Student Exchange Programs

Guaranteed Funding for Doctoral Students

Financial support for graduate students is important to the University of Toronto. For this reason, the university took a major step in the year 2000 towards committing funding of at least \$12,000 (\$13,000 for the 2006-2007 academic year) plus tuition and fees to eligible doctoral-stream students.

U of T is the first Canadian University to offer a guaranteed level of financial support for graduate students pursuing doctoral degrees. The funding will be available for up to five years of study and will help put eligible graduate students at U of T on a more equal footing with their counterparts in the United States.

The funding package can be made up from a variety of sources including:

- external awards
- internal awards
- research assistantships
- teaching assistantships

Loans are not included in the guarantee, and departments with more resources, such as lab-intensive science programs, are able to offer packages well above the guaranteed minimum.

Contact your graduate unit for more details.

1. AWARDS OFFERED BY THE UNIVERSITY

General University of Toronto Graduate Awards Policy

Each graduate unit will establish an Awards Committee, consisting of at least three members of the graduate faculty of that unit, to adopt an Awards Policy that is fair and transparent for the students in that unit. The Awards Committee will oversee the implementation of the policy and approve any subsequent changes to it.

Although SGS encourages graduate units to tailor their Awards Policy to their own circumstances and needs, the policy must meet certain minimum conditions and requirements, as specified by SGS.

The Awards Policy of a graduate unit will specify the conditions of eligibility for holding an award in that graduate unit; these conditions may exceed the minimum conditions provided by SGS. The policy should also provide information regarding the various sources of financial support available for students in that unit (e.g., teaching assistantships and research assistantships as well as fellowships); the manner in which support is distributed; the level and duration of support students can expect; and the conditions for renewal of support from year to year.

Graduate units will make their current Awards Policy available to all students in the unit and will ensure that the Fellowships and Loans Office of SGS has a copy of their current Awards Policy.

Eligibility and Application

Application dates and information correct at time of printing.

Currently registered graduate students do not need to complete a separate award application (unless stated in the award description).

Persons not currently University of Toronto graduate students, as well as registered graduate students intending to proceed to a different graduate degree in the following session, are encouraged to submit an application for admission by a deadline set by your graduate unit.

Applicants submitting admission applications by the deadline are automatically considered for fellowships awarded by the University. No separate award application is required (unless stated in the award description).

However, graduate students are advised to check with their graduate units for more information on the availability of awards, deadlines, and eligibility.

Value

See individual award descriptions. Since the value of an endowed award is dependent on the actual income of the fund, it is possible that the amount of the award at the time of payment may be different than that stated in this calendar or other appropriate committees.

Where the amount of the award is not payable from income earned on an endowed fund, payment will be dependent on the receipt of the amount of the annual award from the donor. An award does not include academic fees unless stated.

Terms

Nominations for these awards are made by the graduate units; decisions are made by the Fellowships Committee of the School of Graduate Studies or other appropriate committees.

Formal notification of awards is sent to successful applicants starting on or about April 1.

Fellowships are normally paid in one, two, or three instalments (depending on the tenure); the normal times are early September, mid to late January, and mid to late May. Award holders must be registered as full-time graduate degree students before cheques are issued.

A fellowship may be held with a University of Toronto teaching or research assistantship.

In accordance with Section 56 of the Canadian Income Tax Act, award income is taxable. Accordingly, a Canadian Income Tax Return must be filed on or before April 30 of the year following the receipt of the award.

The School of Graduate Studies reserves the right not to award any of the fellowships listed below in any year. Additional terms and conditions may apply for these fellowships.

University of Toronto Fellowships (UTF)

Eligibility Requirements

There is no eligibility restriction based on citizenship or status in Canada for the University of Toronto Fellowship (UTF).

Students registered in a master's program beyond the second year are not eligible to hold a UTF. Students admitted to the Ph.D. program on the basis of a bachelor's degree are not eligible to hold the fellowship beyond year six. Students admitted to the Ph.D. program on the basis of a master's degree are not eligible to hold a UTF beyond year five. Students may hold a UTF for a maximum of six years.

New students must have at least a B+ average grade in the final year of study in the degree program that is the basis of their admission to their graduate program at the University of Toronto.

Current graduate students must maintain good standing in their program (i.e., must complete the various requirements for their degree program in a satisfactory and timely manner) as determined by the graduate unit's time line for completion of the degree.

Students in the third year or higher of their doctoral program must have met with their Ph.D. Supervisory Committee within the last 12 months or sooner if required to do so by the graduate unit. The report of the Supervisory Committee must indicate that the student is making satisfactory progress towards the degree.

Terms of University of Toronto Fellowship Awards

Students must be registered as full-time degree students in order to hold a U of T Graduate Fellowship. They must be in full-time attendance for a minimum of 14 weeks in any session during which they hold awards. Except for absences necessary for research purposes, as approved by their graduate unit, they must reside in such geographical proximity as to be able to participate fully in their graduate unit's activities during that session. Students who are not in full-time attendance (except for approved absences for research purposes) for at least

14 weeks in a session will be required to repay the award.

Where programs exist that can be pursued on a part-time or full-time basis, graduate students with a disability that prevents them from enrolling on a full-time basis may, under certain circumstances, be considered for a University of Toronto Graduate Fellowship on the basis of academic merit. For this purpose, disability is defined under the Human Rights Code, Chapter 53, Section 9 (1)(b). To be eligible, a student must provide his or her graduate unit with a letter from the University's Director of Special Services to Persons with a Disability confirming that part-time study is, in effect, full-time study for that student.

Students dually registered in the third year of a master's program and first year of a Ph.D. must complete the requirements of the master's program before the end of the session of dual registration in order to retain their doctoral fellowships; if they fail to complete the master's program by this deadline, they will be required to repay the award.

Ontario Student Opportunity Trust Fund (OSOTF)

The University has established a number of endowed awards through the Ontario Student Opportunity Trust Fund program. Under the program every donated dollar is matched on a dollar-for-dollar basis by both the Government of Ontario and the University of Toronto. In accordance with the guidelines provided by the provincial government, the OSOTF awards must be given to Ontario residents on the basis of financial need as a primary selection criterion. Many of these OSOTF awards also have additional selection criteria, such as academic merit.

The OSOTF awards are identified below in boldface following the description. Whether explicitly stated in the description below or not, applicants must demonstrate financial need by completing a U of T financial needs assessment form available from the graduate units and the SGS Fellowships and Loans Office (or equivalent).

Ontario Graduate Scholarships

The Government of the Province of Ontario provides 2,000 graduate scholarships tenable at Ontario universities. Each scholarship is valued at \$15,000 for a three-session academic year or \$10,000 for two sessions. The Province of Ontario contributes two-thirds and the student's university provides one-third. U of T has established a number of endowment funds to contribute its one-third portion

of the OGS awards won by U of T students. A detailed description of the OGS program and application procedures can be found under Fellowships Awarded by Government Agencies. For the humanities and social sciences, the University has matched endowment donations on a dollar-for-dollar basis. The following are the endowed OGS awards established to date:

Faculty of Applied Science and Engineering

H. Brian White/OGS in Civil Engineering
iTrans/OGS in Civil Engineering
Leslie and Lois Shaw/OGS in Chemical Engineering (2)
Leslie and Lois Shaw/OGS in Mechanical and Industrial Engineering (2)
PCL/OGS in Civil Engineering
Seong Lim Gooi/OGS in Biomedical Engineering
Ted Rogers/OGS in Electrical and Computer Engineering (20)

Faculty of Architecture, Landscape and Design

C. H. Lee/OGS
Charles and Doreen Lloyd-Duerdoth/OGS
Cho Family/OGS
Diamond & Schmitt Architects Incorporated/OGS
George B. P. Farrow/OGS
Howard Cohen and Ron Soskolne/OGS
Kuwabara Payne McKenna Blumberg Architects/OGS
Larry Wayne Richards/OGS
Matthews Family/OGS
Minto Foundation/OGS
Pierre Paul Childs, AIA, ACIP/OGS

Faculty of Arts and Science

A. G. Rigg/OGS in Medieval Studies
Arthur Child/OGS in Economics (2)
Arthur Child/OGS in History (2)
Associates of the University of Toronto/OGS in History or Political Science
Brent Buckner and Peter Dungan/OGS in the Department of Economics
Chikai and Sawa Hiraki Japanese Canadian Buddhist/OGS in East Asian Studies
Christopher (Chris) Wallis/OGS in the Department of English
Chuk Ping Ho and Chiu Wing Ng/OGS in East Asian Studies
Desmond and Marjorie Gourley/OGS in Cell and Systems Biology
Donald F. Putnam and George Tatham/OGS in Geography
Dorothy Louise Ellison, 4T8/OGS in Classics
Dorothy Louise Ellison, 4T8/OGS in English
Dr. F. M. Hill/OGS in Public Policy
Dr. Jay Alan Smith/OGS in Philosophy

Dr. Ranbir Singh Khanna/OGS in Canadian Studies
Dr. Ranbir Singh Khanna/OGS in the Environment
Edie Yolles/OGS in the Department of Sociology
Edward N. Burstynsky/OGS in Linguistics
Edward Sorbara/Urban Development Institute of Toronto/OGS in Geography/Program in Planning
Eva Klein and Leonard Waverman/OGS
Francesco Camisso/OGS in Italian Studies
Frank Peers/OGS in Political Science
Gordon Russell and Beatrice Bott Dow/OGS in English
Hain/OGS in Philosophy (2)

Connaught Scholarships

Approximately 25 entrance scholarships are awarded to full-time graduate students with outstanding records who are entering a research-oriented graduate degree program. Open equally to all disciplines. No special application

required. Students are automatically considered when they apply for admission to a graduate unit. Value: \$15,000 plus full tuition fees.

SGS Post Doctoral Fellowships

The program is designed to encourage students' timely progress through Ph.D. programs in the Humanities and Social Sciences, develop their teaching skills and get their dissertations into published form, enhancing their position in the job market.

Up to 6 fellowships are awarded each year. Each Fellowship is worth \$16,000.

To be eligible to hold the award, students must have completed their Ph.D. dissertations within four years of first registration for the Ph.D. degree (five years for those who entered the doctoral program straight from the bachelor's). Applicants must have submitted their dissertation and scheduled a final oral examination by August 31. The whole examination process should be completed before October 30. The applicants for this fellowship must also apply for a SSHRC postdoctoral fellowship.

Successful applicants will be expected to teach an undergraduate half-course under supervision in the general area of their dissertation. Such courses should be additional to the unit's normal offerings.

Recipients are selected by the School from nominations submitted by the graduate department. Awards are announced to the department in late fall. Consult your department for details.

Eleanor Cate Allen Fellowship

Awarded on the basis of academic merit to a full-time degree student registered in the School of Graduate Studies. No application required. Value: to be determined.

Joseph Bazylewicz Fellowships

Awarded on the basis of financial need to students with Polish citizenship in any program at the University of Toronto. Interested students should submit an SGS Bursary Application, a letter of recommendation from a faculty member familiar with their work, and a copy of Polish citizenship. Value: annual income.

Mary H. Beatty Fellowships

Awarded to outstanding new students as a top-up award to NSERC, SSHRC or CIHR doctoral award. Value in 2006-2007: \$5,000.

Bell University Lab Scholarship at the University of Toronto

Awarded to graduate students in any master's or doctoral degree program conducting re-

search under the direction of currently funded Bell University Labs Principal Investigators. Apply to the Fellowships and Loans Office in spring.
OSOTF

George Sidney Brett Memorial Fellowship
Awarded on the basis of academic merit. No application required. Value: to be determined.

Andrea and Charles Bronfman Student Awards in Israeli Studies
Awarded by Admissions and Awards to undergraduate and/or graduate students to fund a period of research or study in Israel. Financial need and academic merit may also be considered. Value: annual income of fund.
OSOTF

Evelyn Catherall Scholarship
Awarded to Junior Fellows of Massey College to provide assistance in presenting a colloquium or conference paper. Financial need and academic merit will also be considered. Apply to Massey College. Value: annual income.
OSOTF

The Chinese Canadian History and/or Culture Fellowship
The fellowship is offered to a graduate or postgraduate student who intends to enrol at the University of Toronto and to engage in research in the history, cultural or social composition of a Chinese-Canadian community. The fellowship has a value of \$6,000 for graduate students or \$7,000 for postgraduate students, and is funded by the Toronto Chinese Businessmen's Association and the Federation of Chinese Canadian Professionals (Ontario).

Selection of the fellowship recipient is based on academic achievement and on the nature and merit of the research proposal. In order to qualify for consideration, students must be fluent in a Chinese dialect. Apply to Admissions and Awards, University of Toronto, 315 Bloor Street West, Toronto, Ontario, M5S 1A3. Deadline: April 30.

Sir Joseph Flavelle Fellowship
Awarded on the basis of academic merit. No application required. Value: to be determined.

Margaret and Nicholas Fodor Fellowship
Awarded to a full-time graduate student who is a Canadian citizen or permanent resident, on the basis of academic merit. Preference given to students who choose to pursue graduate studies at the University of Toronto rather than

at an American institution, if financial assistance were available.

Frederick Hudd Scholarships
Awarded on the basis financial need to graduate students at Massey College. Academic merit is also considered. Application required. Value: annual income.
OSOTF

Hydrogen Systems Graduate Scholarships in Engineering and the Humanities and Social Sciences
Awarded annually to doctoral stream students as follows: two awards to graduate students registered in the Department of Mechanical and Industrial Engineering, one award to a student registered in the Faculty of Applied Science and Engineering, and one award to a student registered in the Humanities or Social Sciences within the broader Hydrogen economy anticipated in the future. Open to both domestic and international students and previous recipients of this award. Value: four awards of approximately \$16,200 each.

The Agnes M. Ireland Award
Awarded to female student(s) after completing the final year in an honour's program in the Faculty of Arts and Science or the final year in the Faculty of Medicine at the University of Toronto. Must begin a graduate degree program in the School of Graduate Studies within one year of completing undergraduate studies. Awarded to the student(s) who displays an all-round competence (academic and extracurricular activities). Applicants must submit an OSOTF needs assessment form, a statement outlining her plan of study, a letter of recommendation from a faculty member, transcripts, and a C.V.
OSOTF

Iter Fellowship in the Faculty of Arts and Science
Awarded to graduate students in the Faculty of Arts and Science. No application required.

Oriana Josseau Kalant Memorial Award
Awarded on the recommendation of the Collaborative Program in Addiction Studies (COPAS) to a student enrolled in the Collaborative Program. Applicants must meet the following eligibility conditions:
1. apply in the spring session immediately following the fall session in which the COPAS core course PAS 3700 *Multidisciplinary Aspects of Addictions* was taken for credit,

2. submit one of the assignments completed for course credit in PAS 3700 to the award selection committee,
3. this assignment must be accompanied by a letter of application outlining the reasons for enrolling in the COPAS program and future career plans,
4. at the time of application, students must be in good standing in their home department.

Apply to the COPAS program by January 31. Value: annual income.

Kwok Sau Po Scholarship

Awarded on the basis of academic merit to an international student from Hong Kong/China enrolled in any full-time program.

Ranjit Kumar Graduate Fellowship

Awarded to a doctoral-stream student, with primary preference for students working in a subject area in which the donor, Foundation for International Training (www.ffit.org), has ongoing projects, and secondary preference for students working in a geographical area in which the donor has ongoing projects. Application required.

Mary Elizabeth Mahony Fellowship

This award is open to a male student who, at graduation, was registered in University College in the University of Toronto. Value: approximately \$2,000.

Massey College Graduate Fellowships

Awarded to students studying at Massey College on the basis of financial need and academic merit.

OSOTF

Donald Matheson Springer Fellowship

Awarded to a University of Toronto graduate pursuing graduate studies at the University of Michigan. Apply by letter, including up-to-date transcripts and a letter of recommendation from a faculty member familiar with the student. Deadline: late April. Approximate value: \$6,500 CDN.

The McCuaig-Throop Bursary

Through a bequest by the late Edith M. McCuaig, a fund provides bursaries for students registered full-time in a graduate degree program. The annual income from the estate is used to assist students on the basis of academic performance who require financial assistance, with preference given to students from the districts of Temiskaming, Cochrane, and Nipissing in Northeastern Ontario.

Scace Graduate Fellowship

Awarded on the basis of financial need and academic merit to deserving students from South Africa or the United Kingdom who want to pursue graduate studies at the University of Toronto. Recipients must be enrolled in a full-time graduate degree program. The award may be held for a maximum of four years, but is limited to a maximum of two years at the master's level. Application required or students must be identified as having financial need, based on the University's criteria. Value: annual income.

OSOTF

Adel S. Sedra Distinguished Graduate Award

Awarded to a graduate student who demonstrates outstanding academic and extra-curricular leadership. At the time of nomination, students must be registered and be in good standing in the second or third year of a doctoral program at the University of Toronto. Deadline: November 29. Value: \$25,000.

3M Canada Incorporated Scholarship

One award of \$1,000 is available to a student entering a graduate program in the Joseph L. Rotman School of Management or the Faculty of Arts and Science who has maintained grades in the top quartile of the program and needs financial assistance. Application is by way of nomination by the graduate unit.

Travel Grant for Graduate Research or Study in Israel

Through generous donations from Canadian Friends of the Hebrew University, a travel grant has been established to assist doctoral or master's students to conduct research or study in Israel.

OSOTF

The UTFA Al Miller Memorial Award

Awarded to graduate students based on financial need and academic merit. Applications available in spring at the Fellowships and Loans Office. Deadline: August 15.

OSOTF

Vivekananda Graduate Prize

Awarded on the basis of financial need to the graduate student who best exemplifies Vivekananda's ideal of education. Applicant's record of academic performance will also be considered. Application is by way of nomination by the graduate unit and must include a statement from the applicant, a letter of recommendation, transcripts, and an OSOTF needs

assessment form completed by the nominee.
Value: approximately \$800.

OSOTF

Frank M. Waddell Scholarships

Scholarships are open to students from Brant County, Ontario, and are awarded on the basis of academic merit to new or continuing graduate students. Apply by April 30 to Admissions and Awards, 315 Bloor Street West, Toronto, Ontario, M5S 1A1.

AWARDS IN THE HUMANITIES AND SOCIAL SCIENCES

The 1971 School of Library Science Scholarship

Awarded annually to a student in the first year of the M.I.St. program with high academic standing. Value: income from the fund.

ARMA Toronto Chapter Award

Awarded to a full-time student with the highest academic standing in a Records Management course.

Albert S. Abel Memorial Award

Awarded on the basis of scholarship and financial need to a graduate student or students in the Faculty of Law.

Scholarships in Aboriginal Health

Awarded to Aboriginal students, including Status, Non-Status, Metis, and Inuit students, enrolled in graduate programs at the master's or doctoral level and second-entry programs. All Aboriginal students in these programs (full-time and part-time) are eligible to apply, with preference given to students demonstrating financial need. Eligible students should submit a letter of application listing their estimated costs and source/s of funding to First Nations House, Office of Aboriginal Services and Programs, 563 Spadina Avenue, Toronto, Ontario, M5S 1A1 by April 30. Telephone (416) 978-8227 or 978-7960.

Mildred Adams Memorial Scholarship

Awarded to a first year student with financial need to supplement tuition in the Faculty of Information Studies. Apply to the Faculty of Information Studies. Value: annual income.

OSOTF

Elisabeth Alfoldi-Rosenbaum Memorial Award

Awarded to any graduate student at the University of Toronto with a demonstrated interest

in the areas of Professor Alfoldi-Rosenbaum's specialization, the Hellenistic through Early Byzantine periods (approximately 300 B.C.-700 A.D.). Financial need and academic merit are also considered. Application required. Value: annual income.

OSOTF

The Graduate Alpar Grant

Alumni and friends of the Department of Geography have established a grant available to a graduate student registered in the Department of Geography and the Program in Planning who is making good progress toward the completion of degree requirements. Apply to the Department of Geography. Value: one or more awards to the value of annual income.

OSOTF

Alpar (Graduate) Scholarship

Friends and alumni of the Department of Geography have endowed funds to provide an annual scholarship to a graduate student in the department who is making good progress towards completing degree requirements and has exhausted all other funding sources. The award was established in honour of Mrs. Zehra Alpar, an administrative staff member in the Department of Geography for over 25 years.

Alumni Entrance Fellowship

Awarded on the basis of financial need to the most outstanding and desirable applicants of the Rotman School of Management's M.B.A. program. Academic background and work experience will also be considered. Value: annual income.

Jack Amos Award

Awarded on the basis of financial need and Ontario residency to a registered graduate student enrolled at the Faculty of Social Work. Apply to the Faculty of Social Work.

OSOTF

John G. Anderson Memorial Bursary

Family and colleagues of the late John G. Anderson have donated funds for award to a student in the Faculty of Social Work. Value: annual income.

OSOTF

The Mary and Louis Anisman Fellowship in Law and Fairness

For a graduate student who intends to write a master's or doctoral thesis on an aspect of the relationship of notions of fairness to law and its

development, with emphasis on the intersection of law and morality. Value: annual income.
OSOTF

Jeanne Anson-Cartwright Memorial Graduate Fellowship in Music Theory or History

Awarded to an outstanding graduate student in the Music History or Music Theory program. Apply to the Faculty of Music. Value: annual income.

Beverley Antle OASW Scholarship

Awarded to a student enrolled in the M.S.W. or Ph.D. program, with consideration given to students specializing in children, disabilities, or health. Apply to the Faculty of Social Work.

David and Ruth Archibald Bursary Fund

Awarded annually to a registered M.S.W. or Ph.D. student on the basis of financial need and high academic standing. The bursary is made possible through the generous support of Dr. David Archibald, the founder and CEO of the Addiction Research Foundation and recipient of the Order of Canada. Apply to the Faculty of Social Work. Value: \$1,000.

Faculty of Architecture, Landscape, and Design Admission Scholarships

Awarded to students applying to the Master of Architecture program on the basis of ranked submission to the Admissions Committee. Minimum \$500 each. Total awards will not exceed \$2,500. Application not required.

Faculty of Architecture, Landscape, and Design Award (GTAA)

Awarded to students completing the first year of the Master of Architecture program who achieve overall excellence and exhibit potential for leadership in the field. Three awards in the amount of \$1,000 each.

Faculty of Architecture, Landscape, and Design Fellowship in Landscape Architecture

Awarded, on the basis of academic excellence and financial need, to a student completing the first year of the Master of Landscape Architecture program.

Faculty of Architecture, Landscape, and Design Scholarship in Landscape Architecture

Awarded to a student concluding the first year of the Master of Landscape Architecture program, based on academic excellence and financial need.

Barry Lorne Ardiel Scholarship

Awarded to a student completing the second year of the Master of Landscape Architecture program who exhibits the highest scholastic achievement during that academic session. Application not required. Value: annual income.

Jeanne Armour Award in Canadian History

Awarded to a graduate student undertaking a course of study related to Canadian History. Financial need must be considered, academic merit may also be considered.

OSOTF

Jeanne Armour Graduate Scholarships in Canadian History

The estate of Jeanne F. E. Armour provides an award to graduate students studying Canadian history. Academic merit and financial need considered. Application not required. Value: annual income.

Faculty of Arts and Science Alumni and Friends Graduate Scholarships

Awarded annually to two graduate students in the Faculty of Arts and Science on the basis of academic merit and/or financial need. Application not required.

The Art History Graduate Scholarship Fund

Various donors have established a fund to be awarded to graduate students in the Department of Art on the basis of financial need. Academic merit will also be considered. On the recommendation of the Department Chair, in any given year the award may be restricted for travel support. Apply to the Chair of the Department of Art.

OSOTF

Eric Ross Arthur Scholarship

Awarded to a student who has the highest academic standing in third year of the Master of Architecture program.

Associate Dean's Award (E.M.B.A.)

Awarded to an exceptional student entering the Executive M.B.A. program who has achieved academic excellence at the graduate level. Direct inquiries to the E.M.B.A. program. Value: \$10,000.

Associates of the University of Toronto Travel Award

Awarded on the basis of financial need to doctoral students in the humanities for research or study outside Canada. Academic merit will also be considered.

OSOTF

Marija Aukstaite Graduate Student Award

Awarded to graduate students whose projects relate to Lithuania in whole or in part. Application available from the Centre for European, Russian, and Eurasian Studies. Value: annual income.

Ethel W. Auster Scholarship for Doctoral Research

Established by friends and family of the late Professor Auster, a scholarship is awarded to doctoral students engaged in dissertation research. Preference is given to students who have secured a thesis committee and a title for their thesis. Two-thirds of the total award is granted as a scholarship to one student per year, with the remaining one-third portion made available as a bursary for registered doctoral students demonstrating special financial need. Value: annual income.

Avenor Graduate Award

Avenor Inc., an international forest products company, has endowed funds to provide a scholarship to one or more full-time graduate students at the Centre for Industrial Relations. Value: approximately \$4,000.
OSOTF

The Donald K. Aynsley Scholarship

This scholarship was established by the Ontario Labour Relations Board. It is a tribute to Donald Aynsley's years of service to the labour community as the former Registrar of the Board. The scholarship will be awarded on the basis of academic performance and financial need to a full-time graduate student enrolled at the Centre for Industrial Relations. Value: income.

BDO Dunwoody Pinnacle Award in Strategic Management

Awarded to one M.M.P.A. student upon completion of the summer session of the second year of the M.M.P.A. program. The scholarship is awarded to the top student in all three modules of Strategic Management dealing with the concept of strategy and the role of general manager, business system analysis, and the crafting and execution of strategy. Preference is given to a student with high academic standing in the M.M.P.A. program. Application not required.

Shane Baghai Fellowship in English Literature

Awarded on the basis of financial need and academic merit to a graduate student in one of the following areas: Centre for Comparative

Literature, Centre for Study of Drama, Department of English, or the Centre for Medieval Studies. Applicant must provide a one- to two-page plan of study, a letter of recommendation, transcripts, and an OSOTF financial needs assessment form. Approximate value: \$13,000.
OSOTF

The Women's Canadian Historical Society has generously endowed funds to provide four annual awards of \$2,500 to outstanding Canadians or permanent residents of Canada who enter the master's or doctoral program with a specialization in Canadian History in the Department of History at the University of Toronto.

Women's Musical Club of Toronto and Women's Musical Club of Toronto Centennial Foundation Fellowship

Awarded to an outstanding master's or doctoral student in Performance (Music) who is a Canadian citizen or landed immigrant. Excellence in performance and academics considered. No application required.

Graduate Fellowships in Women's Rights

Awarded to graduate students in the Faculty of Law from Central or South America, Africa, the Middle East, East or South East Asia with an interest in women's rights. Apply to the Associate Dean, Graduate Studies at the Faculty of Law. Value: annual income.

Simon Woo Scholarship

Awarded to a graduate student in the Faculty of Social Work. Apply to the Faculty of Social Work, Office of Student Services and Records.

OSOTF

A. S. P. Woodhouse Prize

The A.S.P. Woodhouse Prize is awarded annually to the writer of an outstanding thesis in the Department of English.

Jean Eleanor Ross Woodsworth Bursary

Family, friends, and admirers of the late Jean Woodsworth have endowed a fund to establish an award for a graduate student enrolled at the Faculty of Social Work with a demonstrated interest in the area of seniors, women, or Canadian social policy. Value: annual income.

OSOTF

Institute for Work and Health Scholarship

This annual award has been established to assist graduate students studying at the Centre for Industrial Relations. Awarded on the basis of academic performance and financial need, preference given to students who have demonstrated past interest or expect to pursue work in the area of work and health.

OSOTF

John Yamada Memorial Admission Scholarship and Study Abroad Bursary

An admission scholarship of \$500 is awarded to a student entering the first year of the Master of Architecture program on the basis of ranking by the Admissions Committee on behalf of the Faculty of Architecture, Landscape, and Design. A study abroad bursary is also awarded to student(s) seeking to participate in the Study Abroad program of the four-year Architecture program, based on financial need. Bursary Application Form required.

The Yip Scholarship

Awarded to an international Ph.D. student, preferably from China, who is studying at the Faculty of Social Work.

Edie Yolles Prize in Urban Planning

Awarded annually to a student graduating from the Planning program, on the basis of financial need. Preference given to students of merit who demonstrate a comprehensive approach to planning and who have acquired the necessary skills. Application required. Value: annual income.

OSOTF

George Paxton Young Memorial Prize in Philosophy

Income from funds for this award, first established in 1894, will be distributed among those students in graduate programs in Philosophy who have read papers at philosophy conferences during the previous year.

The Eberhard Zeidler Scholarship

Awarded to a student concluding the first year of the Master of Architecture program on the basis of academic achievement in design in the first and second sessions of the first year.

AWARDS IN THE MATHEMATICAL, PHYSICAL, BIOLOGICAL AND APPLIED SCIENCES

Ontario Graduate Scholarships in Science and Technology (OGSST)

The Ontario Graduate Scholarships in Science and Technology (OGSST) program is designed to encourage excellence in science and technology graduate studies. The program is supported through funds provided by the Province of Ontario and raised by the University of Toronto in the form of private sector endowment. Each OGSST is named after the donor in recognition of the donor's generous support.

Each award has a value of \$15,000 per year or \$5,000 per session.

Applicants are required to submit the completed OGS application to the graduate units sponsoring the program (most departments in Physical and Life Sciences have OGSST). Check the deadline with the department sponsoring the award program.

Listed below are the OGSST at the University of Toronto. For brevity, the names are shortened from the "The Government of Ontario/John Doe Graduate Scholarship in Science and Technology" to the "John Doe Scholarship". The following format is used:

Department or Field of Study Name of Award

Aerospace Engineering
MD Robotics Graduate Scholarships

Addiction Studies Collaborative Program
H. David Archibald Graduate Scholarship

Arthritis Centre
Edward Dunlop Foundation Scholarship

Astronomy
Walter John Helm Graduate Scholarship
Ontario Graduate Scholarships (CIAR)

Biology/Plant Molecular Biology
Joan M. Coleman Scholarship

Cell and Systems Biology
Sherwin S. Desser Graduate Scholarship

Centre for the Study of Pain
Purdue Pharma Graduate Scholarships

Chemical Engineering
DuPont Canada Scholarship
Richard Quittenton Graduate Scholarship

Chemical Engineering/Mechanical & Industrial Engineering
Dorothy and Bill Palm Scholarship in Science and Technology

Chemistry

Pharmacia Graduate Scholarship in Science and Technology

Acres Productive Technologies Inc. - Joseph Yonan Memorial Fellowship
Awarded to graduate students showing academic excellence and financial need. Eligible students will be drawn from the Department of Computer Science. Value: annual income.

Alcan Fellowship
This award is offered to any graduate student who has been admitted to the School of Graduate Studies at the University of Toronto in a master's/doctoral program in mathematics or pure or applied science. Preference given to those in the field of metallurgy or materials science. The award is valued at \$10,000. The student's academic record and other qualities which may lead to a successful career in industrial research will be considered.
Management of this program is provided by appropriate Alcan staff at either the Kingston Laboratories, or the Laboratoires de recherche appliquée et Centre de génie expérimental, of Alcan International Limitée, in Arvida. Alcan will contact the fellowship holder shortly after the appointment to arrange a mutually convenient visit to the laboratories to discuss the research.

Alumni Graduate Studies Award
Through a donation of the Pharmacy Alumni Association, an annual award of \$5,000 is available to a Pharmacy graduate, preferably from a Canadian university, enrolled in the M.Sc. or Ph.D. in Pharmaceutical Sciences.

**American Women's Club of Toronto
Scholarship in Speech Pathology**

Awarded, on the basis of academic excellence, to graduate students in the Faculty of Medicine, Department of Speech-Language Pathology, Master of Health Science program.

Valerie Anderson Graduate Fellowship

Awarded on the basis of academic merit (research and course work) to an outstanding graduate student in any sub-discipline of Plant Biology. Any member of the Department of Cell and Systems Biology may make nominations. The Department's Graduate Studies Committee selects the recipient. Value: annual income.

Kathleen Arpin Doctoral Fellowship

An admission award is offered, on the basis of academic merit, to a full-time, incoming doctoral student in the Department of Nursing Science. Application not required. Nomination is made by the Faculty of Nursing Awards Committee. Value: \$2,500 or annual income.

Mary Jane Ashley Award

Friends and colleagues of Dr. Mary Jane Ashley have endowed funds, the income of which provides an award to a student undertaking a program of study in the Graduate Department of Public Health Sciences who is also enrolled in the Collaborative Program in Addiction Studies. Value: annual income.

Department of Astronomy Bursary

Awarded to graduate students in the Department of Astronomy on the basis of financial need. No application required.

Carl E. Atwood Graduate Award in Zoology

Family, friends, and colleagues of Professor Carl E. Atwood have established a scholarship for award to a master's or doctoral student studying in animal biology, based on financial need and academic merit. Application required. Value: annual income.

OSOTF

Manly Badner Graduate Orthodontic Award

Awarded to a student completing his or her final graduate year in orthodontics, based on the understanding and proper use of the principles of biomechanics as applied to the treatment of the student's patients. Application not required.

D. L. Bailey Award

The family of Dr. D. L. Bailey has provided funds for a \$100 annual award for the best Ph.D. proposal presentation by a graduate

student in the Department of Cell and Systems Biology.

**Gerald I. Baker Scholarship in Oral and
Maxillofacial Surgery**

Dr. Cameron Clokie and Dr. George Sandor have endowed funds to provide an annual scholarship to a student pursuing research and scholarly endeavours in the field of Oral and Maxillofacial Surgery in the Faculty of Dentistry. Application not required.

**David Balsillie Scholarship in Forest
Conservation**

Awarded to one or more Master of Forest Conservation students with high academic standing and financial need. Apply to Faculty of Forestry. Value: annual income.

OSOTF

**Bank of Montreal Fellowship in Medical
Research**

Through a generous gift from the Mount Sinai Hospital Foundation of Toronto, a scholarship has been established for award, on the basis of financial need, to a student in the Faculty of Medicine. Value: annual income.

OSOTF

**Banting and Best Diabetes Centre—Novo
Nordisk Award**

Awarded, on the basis of financial need, to students in the Faculty of Medicine who are affiliated with the Banting and Best Diabetes Centre. Value: variable

OSOTF

**Dr. Robert Duff Barron Graduate
Scholarship in Public Health Policy**

Awarded to a graduate student enrolled in the M.H.Sc. program in the Department of Health Policy, Management and Evaluation on the basis of academic excellence and leadership in public health policy. Value: annual income.

**Dr. P. K. Basu Fellowship in Corneal
Research/Eye Bank**

Awarded to graduate students in the Department of Ophthalmology on the basis of financial need. First preference given to students pursuing studies in corneal research or eye banking. Second preference given to students pursuing studies in vision science research. Apply to the Department of Ophthalmology. Value: annual income.

OSOTF

The F. E. Beamish Prizes

Three prizes are awarded annually to students for outstanding graduate work, evidenced by a seminar or performance on examinations, in analytical chemistry, inorganic chemistry seminar, and physical chemistry seminar.

Bell Canada Entrance Scholarship

Awarded, on the basis of academic merit, to new full-time graduate students in the Master of Engineering in Telecommunications program.

Gwen Bell Endowment Fund

Awarded to an occupational therapist entering the Department of Rehabilitation Science based on academic merit and area of research, preferably one that has an application for everyday practice.

The Norman Bethune Awards

Mr. Frederick H. Kahan has donated funds to establish two annual awards. One award is for a graduate student in the first two years of a Ph.D. program in microbiology, and the second award to microbiology residents in the first or second year microbiology program in the division of infectious diseases. Apply to Chair, Department of Molecular and Medical Genetics (microbiology program).

Paul Biringer Graduate Scholarship

Awarded to a master's or doctoral graduate student in Electrical and Computer Engineering. Preference given to an international student. Apply to the Department of Electrical and Computer Engineering. Value: annual income.

Bloorview Children's Hospital Foundation Graduate Award

An annual award of \$1,500 is offered to a student who is entering the second year of a master's program in the Graduate Department of Nursing Science and has a clinical interest in physically disabled children and young people. Applications must be submitted by March 31 to the Graduate Department of Nursing Science.

Blyth Fellowship

Awarded to a student in the Department of Mathematics according to the terms and conditions of the University of Toronto Fellowship.

Physics Blyth Fellowship

Awarded to a student according to the terms and conditions of the University of Toronto Fellowship.

Boehringer Ingelheim Prize

Boehringer Ingelheim (Canada) Ltd. sponsors an award for a third, fourth, or fifth year graduate student in the field of organic synthesis or bio-organic chemistry. Students must have research published; financial need is considered. Apply to the Graduate Office of the Department of Chemistry by November 30. Value: annual income.

OSOTF**Dr. Claire Bombardier Award for Excellence in Clinical Epidemiology**

Awarded to one graduate student enrolled in Clinical Epidemiology and Health Research, Department of Health Policy, Management and Evaluation, Faculty of Medicine, whose field research or written report has been judged as the best by the Clinical Epidemiology Executive Committee. The awardee will be encouraged to make an oral presentation at appropriate academic forums.

Frances Bradfield Graduate Fellowship in Environmental Engineering

Dr. Christopher Robinson has endowed a fund, the annual income of which is awarded on the basis of academic merit, to doctoral stream graduate students specializing in Environmental Engineering. Award is renewable for two years. Application not required.

The Ruth Bradshaw Award

Colleagues and friends of Ruth Bradshaw, former Director of the Division of Physical Therapy, have established an award, given on the basis of financial need, for a full-time student enrolled in the first year of the M.Sc. program in Rehabilitation Science. The recipient must have graduated from an undergraduate program in physical science and be eligible to practise in Canada. Academic achievement and the relevance of the student's program to physical therapy are considered. Apply to the Department of Rehabilitation Science by September 1.

OSOTF**Rorke Bryan Scholarship in Forest Conservation**

Awarded to one or more students in the Master of Forest Conservation program with high academic standing and in financial need. Application not required. Value: annual income.

Edward H. Buckley and Grace B. Buckley Graduate Scholarships at the Faculty of Forestry

The estate of Grace B. Buckley provides multiple awards for graduate students registered in the Faculty of Forestry whose research talents are well founded on a background of excellence. First preference given to students whose work is related to Forest Environmental Science or, secondly, to Forest Resource Management, recognizing that postgraduate Forest research could involve international as well as national projects. Application not required.

William Knapp Buckley Award

The Ontario College of Pharmacists has endowed funds, the annual income of which is awarded to a graduate student in the Department of Pharmaceutical Sciences. Financial need and academic merit are considered.

OSOTF

A. F. Buell Prize

The prize is given to a full-time graduate student in the Faculty of Forestry on the basis of academic merit. Value: annual income.

John Bunting Graduate Prize in Chemistry

Awarded on the basis of financial need and academic achievement to a third or fourth year student in the field of physical organic or bio-organic chemistry. The student must have a research publication from his or her graduate studies. Value: annual income

OSOTF

E. F. Burton Fellowship in Physics

Awarded on the basis of financial need and academic merit to a graduate student in the Department of Physics. The Department may renew the award for one additional year.

OSOTF

L. Butler Graduate Prize in Zoology

Through the generous donation of Dr. Leonard Butler, an award based on academic merit is available to a master's or doctoral student in the Department of Ecology and Evolutionary Biology.

OSOTF

CRND Graduate Student Aid Endowment

An anonymous donor has endowed funds for an annual award to be given to graduate students in CRND (Centre for Research in Neurodegenerative Disease).

OSOTF

Margaret C. Cahoon Memorial Fellowship

Awarded, on the basis of financial need and academic merit, to a graduate student in the master's (full-time or part-time) or Ph.D. program in the Graduate Department of Nursing Science. Nominations are made by the Faculty of Nursing Awards Committee. Deadline: March 31. Value: annual income.

OSOTF

Kristi Piia Callum Memorial Fellowship in Ovarian Cancer Research

Awarded by the Faculty of Medicine on the basis of financial need and academic excellence. First preference is to graduate students conducting research in familial ovarian cancer. Second preference is to graduate students doing research in ovarian cancer. Value: annual income.

OSOTF

Canada Life Assurance Company Graduate Fellowship in Medical Research

Awarded on the basis of financial need to students supervised by University of Toronto faculty members at the Samuel Lunenfeld Research Institute at Mount Sinai Hospital. Value: variable.

OSOTF

The Canadian Association of Chain Drug Stores Social/Administrative Pharmacy Thesis Award

Awarded to a student pursuing thesis research in one of the following areas of inquiry: human resources planning, pharmacoeconomics, health outcomes related to primary care, or pharmacy practice. Apply to the Faculty of Pharmacy. Value: \$10,000.

Cardiovascular Sciences Collaborative Program Graduate Student Fund

Through a donation of Pfizer Canada Inc., an annual award is available to a graduate student in the Cardiovascular Sciences Collaborative Program in need of financial assistance.

OSOTF

Thelma Cardwell Prize in Research

Awarded on the recommendation of the Department of Occupational Therapy to the graduating student with the highest standing in the research experience course. Value: \$200 annually.

Helen Carpenter Doctoral Fellowship

An admission award offered to a full-time incoming doctoral student in the Graduate Department of Nursing Science on the basis of

academic merit.

OSOTF

Glenn H. Carter Fellowships in Exercise Intervention and Disease Prevention

Awarded to three graduate students studying in the biophysical, sociocultural, or behavioural areas of exercise intervention as related to disease prevention or, on a secondary basis only, to injury prevention. Application not required. Value: annual income.

Glenn H. Carter Graduate Fellowships in Nursing

Glenn H. Carter has donated funds for a fellowship to graduate students in nursing. Consult with the Faculty of Nursing for award criteria and application process.

Mary Chalmers Memorial Bursary

Established by the family and friends of the late Mrs. Mary Chalmers, this bursary is awarded to a graduating M.Sc. student in the Department of Physical Therapy on the basis of financial need. The recipient will demonstrate effective interpersonal skills and participate fully in educational and extra-curricular activities.

C.A. Chant Fellowship

Open to graduate students in the Department of Astronomy and Astrophysics. Value: \$3,500 per term.

Sperrin Chant Mesonic Award in Toxicology

Awarded to graduate students in the Centre for Environment based on financial need. Academic excellence and the character of applicants is also considered. Applications required or recipients must have been identified as having financial need based on the University's criteria. Value: annual income.

OSOTF

Chapnik, Freeman and Friedberg Clinical Scientist Program

Awarded to a third or fourth year resident wishing to pursue advanced research training leading to an M.Sc., M.Ed., or Ph.D. degree at the University of Toronto. The applicant must be a postgraduate M.D. trainee in the Department of Otolaryngology at the University of Toronto. Application required. Value: annual income.

Chemclub Graduate Scholarship

Awarded, on the basis of research potential and leadership ability, to two graduate students in the Department of Chemistry in their third or higher year of study in a doctoral program. Consult the Department of Chemistry for award

criteria and application process. A student who currently holds an NSERC/OGS/OGSST award is ineligible for this scholarship. This scholarship is open to international students who meet the criteria.

W. Jack Christie Graduate Award in Ecology

Family, friends, and colleagues of Jack Christie have endowed funds for award and financial need, on the basis of academic merit, to a master's or doctoral student studying in animal biology. Application required. Value: annual income.

OSOTF

C.S. 'Rufus' Churcher Graduate Award in Zoology

Dr. C.S. Churcher has provided funds for award annually to a graduate student studying comparative anatomy, functional morphology, adaptive and taxonomic evolution, paleontology, and stratigraphic distribution or evolution of vertebrates in Ecology and Evolutionary Biology based on academic merit and financial need. Application required.

OSOTF

Ciba Specialty Chemical, Inc. Graduate Student Award

Ciba Specialty Chemicals, Inc. has endowed funds, the annual income of which is awarded to a graduate student in the Department of Chemistry. Preference is given to a student studying polymers and materials. The award is given on the basis of financial need and academic merit.

OSOTF

Dr. Bernhard Cinader Graduate Scholarship in Immunology

Awarded annually to a student in the Department of Immunology on the basis of academic merit and financial need. Apply to the Faculty of Medicine.

The Hardi Cinader Prize

Friends and colleagues of Dr. H. Cinader have endowed a fund, the income of which provides an annual award to the graduate student completing the doctoral program in Immunology who best reflects the goals and life of Dr. Cinader—a broad scientific culture and an interest in both the sciences and the arts.

City of Toronto Graduate Scholarship for Women in the Mathematics

Awarded to a female student enrolled in a master's or doctoral program in mathematics on the basis of financial need, academic merit, and

interest in issues related to women in mathematics.

OSOTF

Dr. E. Aileen Clarke Prize

Through an annual donation by the Ontario Cancer Treatment and Research Foundation, a prize of \$1,500 is awarded on the basis of academic merit to a second year student in the Master of Science program in Epidemiology whose thesis topic is in the area of cancer epidemiology.

Class of 5T2 Prize

Awarded on the basis of academic merit in the Department of Forestry to a M. Sc. F. or a Ph.D. student specializing in the area of silviculture. Value: annual income.

The Cleghorn Fellowship in Schizophrenia Research

The Clarke Institute of Psychiatry Foundation has provided funds to award, on the basis of financial need, graduate students in the Faculty of Medicine's Institute of Medical Science. Preference given to students pursuing research in schizophrenia. Application required. Value: annual income.

OSOTF

Clinical Epidemiology Award

Mahyar Etminan has established an award for a first year graduate student enrolled in the Department of Health Policy, Management and Evaluation's Clinical Epidemiology program who is in good standing but has financial need. First preference given to a student from Iran; second preference given to a student who is a pharmacist; third preference given to a graduate student, on the department's annual Research Day, on the basis of research unit. Apply to the department. Value: \$500.

Clinician–Scientist Graduate Program in the Department of Anaesthesia

An award is offered annually, on the basis of financial need, to an M.Sc. or Ph.D. student in the clinician–scientist stream in the Department of Anaesthesia. Value: annual income.

OSOTF

The Randall Coates Epidemiology Prize

Colleagues and friends of the late Dr. Randall Coates have endowed a fund, the income of which provides an annual award to a graduate student in the Graduate Department of Public Health Sciences (Epidemiology), studying in the area of communicable diseases. Only stu-

dents who have completed one academic session will be considered. Value: annual income.

Dr. Alan W. Conn Graduate Award in Anaesthesia

Dr. Alan and Marian Conn have established an award for a post-graduate anaesthesia trainee registered in a master's or Ph.D. degree program such as epidemiology, pharmacology, or physiology. Preference is given to the individual who demonstrates dedication to a career in academic medicine. The award offsets postgraduate student fees and is renewable over three years. Apply to the Department of Anaesthesia, Faculty of Medicine. Value: annual income.

OSOTF

Connaught R. J. Wilson Fellowship

Connaught Laboratories Limited has established an award of approximately \$10,000 by annual donation to a first-year student in the Department of Public Health Sciences whose career interests lie in the intersection of public health, epidemiology, and health promotion.

Dr. Joe A. Connolly Memorial Award

Family, friends, and colleagues of the late Dr. Joe A. Connolly have endowed a fund, the income of which provides an award to a registered, senior, doctoral student (third year or beyond) who has demonstrated excellence in cell biology research and is involved in extra-curricular activities.

Dr. Joe A. Connolly Memorial OSOTF Award

Awarded on the basis of financial need to a registered Ph.D. student demonstrating excellence in cell biology research.

OSOTF

Leslie Gladstone Cook Memorial Fellowships

One or more awards will be made available from the annual income of an endowment established through the generous support of Alfreda Cook. The awardee(s) will be drawn from the annual pool of applicants to the Department of Chemistry. To be eligible, the incoming graduate student must be travelling from other parts of Canada to Toronto or be attending special conferences in their field or require stipend support based on financial need.

OSOTF

Edith Cosens Endowment Fund

Awarded to graduate students in the Department of Nutritional Sciences on the basis of academic excellence to support and promote

the study of and the dissemination of information on community nutrition.

Dean Gordon Cosens Graduate Award

In memory of Professor Gordon Cosens, former Dean of the Faculty of Forestry, Miss Edith Cosens has generously endowed funds to provide an annual award to one or more full-time graduate students registered in the Graduate Department of Forestry. Value: annual income.

Helene and George Coward Award in Gerontology

In memory of his parents, Helene and George Coward, Kenneth Coward has endowed an award of approximately \$500 to a graduate student who is engaged in research in the field of gerontology. Apply by July 15 to the Institute for Life Course and Aging.

Coxeter Graduate Scholarship

Gifts from admirers, colleagues, and students of Professor H.S.M. Coxeter have established an endowment for a scholarship to a graduate student enrolled in the Department of Mathematics. No application required.

Helen L. Cross (nee Colquhuon) Memorial Graduate Scholarship

Awarded on the recommendation of the Department of Chemical Engineering and Applied Chemistry to a graduate student in the program. Preference is given to a female student and, if possible, a female student from Northern Ontario. Application required. Value: annual income.

OSOTF

James F. Crothers Family Fellowships in Peripheral Nerve Damage

Awarded to students in the Faculty of Medicine on the basis of academic excellence and financial need. Preference given to students researching the causes and treatment of peripheral nerve damage, repair, and regeneration. Application required.

James F. Crothers Family Fellowships in Peripheral Nerve Damage—OSOTF

Henry Vehovec has endowed funds to provide awards to graduate students in the Faculty of Medicine on the basis of financial need and academic excellence. Preference given to students involved in basic research into the causes and treatment of peripheral nerve damage, repair, and regeneration. Apply to the Associate Dean, Inter-Faculty and Graduate

Affairs, Faculty of Medicine.

OSOTF

Dr. J. R. Cunningham Graduate Fellowship in Cancer Research

This Scholarship was established by The Princess Margaret Hospital Foundation for award to graduate students in the health sciences faculties who are studying with faculty members located at the Ontario Cancer Institute (or its successor) and are engaged in cancer research. Value: variable.

OSOTF

Rosella Cunningham Memorial Fellowship

Awarded to a graduate student in the Department of Nursing Science to prepare student for work in public health nursing.

Peter Curtis Memorial Bursary

Family and friends of Peter Curtis, former doctoral student in the Department of Industrial Engineering, have endowed funds to provide one or more awards, on the basis of financial need, to graduate students in the Department of Mechanical and Industrial Engineering.

Dairy Farmers of Canada Graduate Student Fellowships

For award to Faculty of Medicine graduate students, on the basis of financial need, who are studying in the field of nutrition and osteoporosis. Value: annual income.

OSOTF

The Dalton Chemical Laboratories Organic Chemistry Scholarship in Memory of Peter Yates

Fellowship for a first year graduate student in organic chemistry whose academic performance improved the most between the third and fourth years in the undergraduate program. Value: annual income.

OSOTF

The Dalton Pharma Services Advanced Inorganic and Materials Laboratory Fellowship

Fellowship established by Dalton Pharma Services for annual award, on the basis of financial need, to a teaching fellow enrolled in a Department of Chemistry graduate program. Preference is given to students of merit. Application required. Value: annual income.

OSOTF

Grant D. Darker Memorial Award

The annual income from donations received from friends and colleagues in memory of

Dr. Grant D. Darker is awarded to the outstanding graduate student in the Department of Ecology and Evolutionary Biology studying in the area of mycology.

Lillian Elfleda Darker Award

The estate of the late Grant Dooks Darker provides an award for a student (or students) enrolled in the Department of Ecology and Evolutionary Biology in a master's or Ph.D. program researching some aspect of mycology. The award(s) will be given, on the basis of financial need, to students requiring travel assistance related to their studies.

OSOTF

Wallace A. Delahey Fellowship

Income from a bequest of the late Wallace A. Delahey provides for a fellowship for award to a full-time graduate student in the Faculty of Forestry on the basis of academic merit.

The Dent-Paech Nursing Fellowship

Awarded on the basis of academic merit to a graduate student in the Department of Nursing Science who specializes in mental health nursing.

Dentistry Graduate Student Bursary Fund

Through the generous donations of various faculty members and others, an endowment fund has been established to provide bursaries, of varying amounts and on the basis of financial need, for graduate students in any of the Faculty of Dentistry's graduate programs. Application required.

OSOTF

Michael J. Dignam Graduate Travel Award

Family, friends, and colleagues of the late Professor Michael J. Dignam have established a travel award for graduate students in the Department of Chemistry. Apply to the Department of Chemistry by November 1. Value: approximately \$1,000.

OSOTF

Dr. Rajalakshmi S. Dittakavi and Dr. Prema M. Rao Graduate Awards in Laboratory Medicine and Pathobiology

Two awards are given annually to graduate students in the Department of Laboratory Medicine and Pathobiology. These awards are donated by past and present students of Drs. Rajalakshmi and Rao. One award is given to a graduate student pursuing study and research on the cause, prevention, pathogenesis, and cure of cancer. The second award enables a student to present his or her results on the

cause, prevention, pathogenesis, and cure of cancer at the Annual Meeting of the American Association for Cancer Research. Apply by February 1 to the Department of Laboratory Medicine and Pathobiology.

The Maureen Dixon Memorial Award

Friends and colleagues of Maureen Dixon have endowed funds, the annual income of which is awarded to a student in the Department of Health Policy, Management and Evaluation. Awarded on the basis of a proven outstanding contribution to a community health agency such as a district health council or a community service delivery agency (home care, nursing agency, mental health agency, etc.)

OSOTF

The R. M. Dixon Prize

On the recommendation of the Coordinator, Graduate Department of Forestry, given to a full-time graduate student in Forestry pursuing studies in an area related to international forestry. Value: annual income.

Donnelly Centre for Cellular and Biomolecular Research Thesis Prize

Awarded to Ph.D. students who complete their thesis requirements while studying in the Donnelly Centre for Cellular and Biomolecular Research. To be eligible, students must be in their final year of graduate studies at the time of application. A letter of nomination should be submitted by the department/program chair and include the student's CV, a one page description of the thesis work conducted, and a recommendation letter from the student's supervisor. Value: \$3,000

Gail Donner Doctoral Nursing Fellowship

Awarded on the basis of academic merit to a full-time or part-time doctoral student in the Department of Nursing Science whose nursing career goals and program reflect a nursing administration/health policy focus.

OSOTF

William J. Dowkes Graduate Bursary

Awarded on the basis of financial need to a student in the Department of Chemical Engineering and Applied Chemistry

OSOTF

Draxis Health Inc. Surgeon Scientist Fellowship

Awarded on the basis of financial need to a graduate student enrolled in the Surgeon Scientist program in the Department of Surgery to allow the recipient to undertake formal training

leading to a degree in surgical research or a related field at the University of Toronto. Application not required. Value: annual income.
OSOTF

George F. D. Duff Graduate Fellowship in Mathematics

Awarded on the basis of academic merit to a graduate student in the Department of Mathematics. Financial need may also be considered. Value: annual income.

T. W. Dwight Prize

Awarded on the basis of academic merit to a student in the Master of Forest Conservation degree program in the Faculty of Forestry. Value: annual income.

Earthroots Ontario Forest Conservation Award

Awarded to a student in the Master of Forest Conservation degree program on the basis of the best proposal for a research paper on Ontario forest or wildlife conservation issues in connection with course FOR 3008H *Research Paper in Forest Conservation*. The proposal must be relevant to current Ontario forest and wildlife issues and should include implications for conservation and an outline of areas for future research on this issue.

Eco-Tec Founder's Fellowship

Eco-Tec Limited has donated funds to provide one award for a graduate student pursuing environmental graduate studies in the Department of Chemical Engineering and Applied Chemistry. Value: annual income.
OSOTF

Harold S. Edmonds Scholarship

Awarded to a full-time graduate student in the Faculty of Forestry on the basis of academic achievement.

Education Safety Association of Ontario Graduate Scholarship in Health and Safety

Awarded to M.Sc. or Ph.D. students enrolled in the Research Degree Program of the Department of Public Health Sciences, Faculty of Medicine. First preference given to students conducting research in health and safety under the supervision of a faculty member affiliated with the Institute for Work and Health. Secondary preference given to students conducting research in health and safety. Value: annual income.

Margaret Isobel Elliott Graduate Scholarship, Department of Mathematics

George A. Elliott has established an award to be given to one or more graduate students on the basis academic merit; preference is given to students specializing in the theory of algebras of operators in Hilbert space or its applications. Application not required. Value: annual income.

H. V. Ellsworth Graduate Fellowship in Mineralogy

The estate of the late Mabel J. Ellsworth provides for an annual fellowship to a deserving graduate student in the Department of Geology pursuing research in the general field of mineralogy.

Florence Emory Fellowship

This fellowship, provided by the School of Nursing Alumni Association, is open to students who enrol full-time in a master's program in the Graduate Department of Nursing Science who intend to work in the nursing field following graduation, and who are in financial need. The fellowship has a minimum value of \$3,500 for the academic session. Apply in writing by March 31 to the Faculty of Nursing Awards Committee.

OSOTF

Dr. Goran Enhorning Award in Pulmonary Research

Mr. Dag Enhorning has established an annual award, based on financial need and academic merit, to a student in the Faculty of Medicine conducting innovative basic science or clinical research related to pulmonary physiology. Apply to Faculty of Medicine. Value: annual income.

OSOTF

Ministry of the Environment Graduate Scholarship in the Department of Chemistry

Awarded to graduate students in the Department of Chemistry studying environmental chemistry of chemical pollutants. Apply to Graduate Chair of Chemistry.

Epidemiology and Biostatistics Award Endowment

The award will be given annually on a rotational basis to one or more students studying in one of the following programs in the Graduate Department of Public Health Sciences, starting with:

1. Epidemiology (M.Sc./Ph.D.)
2. Public Health Sciences and Epidemiology (M.H.Sc.)

3. Biostatistics (M.Sc./Ph.D.)
The selection will be based on financial need and academic merit.

OSOTF

Etkin Medal for Excellence

Awarded to a graduate student in Aerospace Studies for outstanding performance in the field of flight mechanics, on the recommendation of the Director, Institute for Aerospace Studies. Students in all years of graduate study are eligible. The medal is presented on the occasion of the annual G.N. Patterson lecture or on some other suitable occasion.

A. Murray Fallis Graduate Award in Zoology

For award on the basis of academic merit and financial need to a master's or doctoral student studying in animal biology. Application required.

OSOTF

Bernhard Fernow Graduate Fellowships

Awarded to graduate students in the Faculty of Forestry on the basis of academic merit and financial need. Value: annual income.

OSOTF

Michael S. Fieldus Memorial Award

Family, friends, and colleagues of the late Michael S. Fieldus have endowed a fund, the income of which provides an annual award to one or more graduate students in the Department of Astronomy and Astrophysics. The award is made on the basis of outstanding and sustained contribution to academic achievement, teaching, or service to the Department of Astronomy and Astrophysics.

P. C. Finlay Q. C. President's Fellowships in Geology

Awarded to two or more graduate students studying geology who intend, upon graduation, to take their expertise to developing nations. Value: annual income.

OSOTF

Kenneth C. Fisher Fellowship

Awarded to a highly qualified graduate student in the Department of Cell and Systems Biology engaging in comparative physiology research. Value: annual income.

Frank Fletcher Memorial Fund

The estate of Lorna Yates Fletcher has established a scholarship for award to a graduate student, on the basis of financial need, who is pursuing study and research into the cause

and cure of cancer. Value: annual income
OSOTF

Teresina Florio Graduate Scholarship in Cancer Research

Awarded to graduate students enrolled in the Faculty of Medicine working on translational aspects of cancer biology with an interest in developing alternative strategies of cancer treatment beyond conventional chemotherapy or radiotherapy. Submit applications with a research proposal consistent with the conditions of this scholarship. Value: annual income.

OSOTF

Forestry Memorial Admission Fellowship

Awarded on the basis of academic merit to the student entering the professional Master of Forest Conservation degree program with the highest cumulative GPA in an undergraduate program. Value: annual income.

Fortran Traffic Systems Graduate Scholarship in Transportation Research

Awarded to a doctoral-stream student in the Department of Civil Engineering. Preference given to a student in Transportation Engineering.

Neil Foster Memorial Graduate Student Endowment Fund

Family and friends have donated funds for a graduate student in the Faculty of Forestry, with preference given to studies in Forest Soils or Forest Ecology. Application not required.

Reino S. Freeman Fellowship

Mrs. Ellen B. Freeman has endowed funds to provide an annual fellowship to a highly qualified incoming graduate student in the Department of Ecology and Evolutionary Biology engaging in parasitology research.

OSOTF

Sheila Freeman Graduate Award in Zoology

Colleagues and friends of Sheila Freeman have endowed a fund, the income of which provides an award to a graduate student focusing his or her studies in animal biology. Value: annual income.

OSOTF

Dr. Thomas L. Friedlich Memorial Award in Surgical Science

The friends and family of Dr. Thomas L. Friedlich have endowed funds, the income of which is awarded, on the basis of financial need, to a neurosurgery resident in the Department of Surgery pursuing a graduate degree in

neuro-oncology. In the event that two or more qualified students exist, preference is given to the one demonstrating clinical excellence and compassionate patient care. Apply through the Institute of Medical Science.

OSOTF

Frist–Jus Annual Memorial Award

This scholarship is in honour of the memory of Dr. Juliusz, Dorota and Zofia (Zosia) Frist. Awarded, on the basis of financial need and academic performance, to graduate students specializing in the area of psychopharmacology, including neuro-transmitter and neuro-receptor research. Value: annual income.

OSOTF

Dr. Clara Winifred Fritz Memorial Fellowship in Plant Pathology

The estate of Madeleine Alberta Fritz makes possible an annual award, based on academic excellence, to a graduate student studying in the area of plant pathology. Value: annual income.

Margaret and Howard Gamble Research Grant

Awarded on the basis of financial need to students involved in basic science research related to mental retardation.

OSOTF

Duncan L. Gellatly Memorial Award

Family and friends of Duncan Gellatly have established an award to be given every other year to a graduate student demonstrating excellence in virology research. Submit nominations to the Graduate Studies Committee, Department of Cell and Systems Biology. Value: annual income.

General Motors Women in Science and Mathematics Awards

Awarded to graduate female students enrolled in a science or mathematics program of study in the academic year in which they receive the award. Financial need and academic merit may also be considered. Apply to the Faculty of Arts and Science Student Awards Committee by March 15 for the upcoming Fall/Winter session. Value: annual income.

OSOTF

Gina Gesser Memorial Award

Relatives, friends, and co-students of Gina Gesser have endowed a fund in her memory, the income of which provides an annual award to a graduate student enrolled in the M.Sc. program in Behavioural Sciences. Preference

given to outstanding students in the area of gerontology, public policy, equity in health care, and the health concerns of immigrant populations. Financial need will be considered.

OSOTF

The Bernard Ghert Fellowship in Psychiatry

Awarded on the basis of financial need to students in the Psychiatry programs at the Mount Sinai Samuel Lunenfeld Research Institute or the Baycrest Centre for Geriatric Care. Value: variable.

OSOTF

Lawrence, Ila and William Gifford Scholarship in Radiation Oncology and Surgery

Awarded on the basis of financial need to graduate students supervised by graduate faculty also appointed to the Departments of Radiation Oncology or Surgery in the Faculty of Medicine. First preference given to students engaged in the study of cancer in the gastrointestinal tract with special reference to the bowel. Second preference given to students pursuing studies in cancer or in gastro-intestine-related illnesses. Academic merit will also be considered. Application required.

OSOTF

Lachlan Gilchrist Fellowships

These awards are made annually to students in fundamental physics in their second year of graduate work in the Departments of Aerospace Science and Engineering, Mathematics, or Physics. Value: income.

John A. and Rosamond M. Gillies Fellowship

The annual income from funds generously donated by Mrs. Rosamond M. Gillies is available to full-time graduate students in the Department of Forestry on the basis of academic merit and financial need.

Alice Girard Memorial Fellowship

Awarded on the basis of academic merit to a doctoral student who has completed at least one year of the Ph.D. program in the Graduate Department of Nursing Science. Application not required. Nomination is made by the Faculty of Nursing Awards Committee. Value: annual income.

M.R. Glavicic Prize

Awarded at the end of the first winter session of the professional Master of Forest Conservation degree program in the Faculty of Forestry, on the basis of academic merit and professional-

ism, to the student who achieves the highest combined grade in two courses, Biodiversity of Forest Organism and Applied Forest Ecology. Value: annual income.

Glaxo Wellcome–Sunnybrook Drug Safety Clinic Graduate Student Fellowships

Awarded to graduate students in financial need pursuing studies in the area of drug safety at the Sunnybrook Drug Safety Clinic. Value: annual income.

OSOTF

Stephen Godfrey Graduate Student Scholarship in Suicide Studies

This award has been set up for a graduate student in financial need in the Department of Psychiatry. Value: annual income.

OSOTF

The Dr. Theodore Goldberg Scholarship Fund

Established by the family, friends, and colleagues of the late Ted Goldberg, former Chair of the Department of Health Policy, Management and Evaluation, the award is available to a Ph.D. student currently enrolled in that department and studying health policy or organizational behaviour. The award is based on excellence, promise, and financial need. The Chair of Health Policy, Management and Evaluation will establish a selection committee each year. Annual value: approximately \$1,500.

The Sarah Cusick Gollop and William George Gollop Memorial Graduate Scholarships

Three scholarships are available to graduates enrolled in a program of study in Chemistry leading to an advanced degree, with first preference given to eligible graduates of North Bend High School, Nebraska.

Jane Goodall Graduate Scholarship

Awarded to graduate students studying environmental issues and/or international development. Academic merit and financial need will be considered. Application not required.

Jenne Lewis Goodman Award

Awarded to students enrolled in the Faculty of Medicine on the basis of their academic excellence in Occupational Therapy. Preference given to students in their last year of study who have demonstrated special ability and interest in the area of occupational therapy in mental health as evidenced by excellence in both course work and field work.

Andrew Robertson Gordon Fellowship

The estate of Andrew Robertson Gordon provides for an annual award, based on academic merit, to one or more full-time graduate students in the Department of Chemistry.

C.C. Gotlieb (Kelly) Graduate Fellowship in the Department of Computer Science

Awarded on the basis of academic merit to a student in any sub-discipline of Computer Science.

The Jeanne F. Goulding Fellowship

The estate of the late Mrs. Jeanne F. Goulding provides an annual fellowship for a full-time graduate student in the life sciences (Division IV) pursuing research in the fields of conservation, pollution control, and ecology in general. Value: approximately \$5,000.

Graduate Admission Award

For award on the basis of financial need to a student admitted to the master's program in the Faculty of Nursing. Academic merit will also be considered. Value: annual income.

OSOTF

Graduate Award in Laboratory Medicine and Pathobiology

Established by friends and colleagues of Drs. A.D. Baines and M.D. Silver to honour their past contributions as Chairs to the Department of Laboratory Medicine and Pathobiology, an award is given to a graduate student in the Department of Laboratory Medicine and Pathobiology based on academic performance and financial need. Value: annual income.

OSOTF

Graduate Fellowship for Research in Health and Physical Activity

Awarded on the basis of acceptance into the Physical Education and Health program and on academic merit determined by grades, publications, presentations, and research. Renewable for one year upon review. Students may apply or nominations may be submitted by a faculty, student, or staff member of the Faculty of Physical Education and Health. Value: annual income.

OSOTF

Graduate Fellowship(s) in Forestry

Awarded on the basis of financial need and academic merit to students pursuing master's and or Ph.D. degrees in the Faculty of Forestry. Value: variable.

Graduate Nurse Student Union Fellowship

Awarded to a master's student in the Graduate Department of Nursing Science who has demonstrated outstanding extra-curricular involvement and/or leadership abilities. Student must have a minimum B average.

Graduate Student Award in Relocation Assistance

Awarded to new graduate students in the Department of Chemistry to offset expenses incurred in relocating to Toronto from elsewhere in Ontario. Academic merit and financial need considered.

OSOTF

Graduate Student Fellowship in Medical Oncology

The award is given to a graduate student in Medical Oncology based on financial need. Value: variable.

OSOTF

Graduate Studies in Silviculture Award

Mr. W. D. Start has endowed funds to provide an award, on the basis of financial need and academic merit, to a full-time graduate student in the area of silviculture or tree improvement in the Faculty of Forestry.

OSOTF

Greater Toronto Airport Authority Graduate Scholarship

Awarded to a student entering the Civil Engineering master's program with additional preference for a student specializing in Transportation Engineering.

Malka and Al Green Graduate Fellowship in Psychiatry

Awarded to graduate students in the department of Psychiatry at Mount Sinai Hospital who are in need of financial assistance. Value: variable.

OSOTF

A. T. Griffis Memorial Graduate Scholarship

Watts, Griffis and McQuat Ltd. have endowed funds to provide a scholarship to a full-time graduate student in the Department of Geology, on the basis of academic excellence, professional dedication, and imagination. Preference may be given to students requiring geology field trips, especially for research involving a significant economic geology component.

Grosso Group Graduate Fellowship

The Grosso Group has endowed funds to establish a fellowship, awarded on academic

merit, to a graduate student enrolled in the Department of Civil Engineering who is specializing in Engineering Geoscience at the Lassonde Institute. Application not required.

Allan Gross Graduate Award

Awarded on the basis of financial need to a student in the Institute of Medical Science who is researching orthopedic surgery.

OSOTF

The George A. Guess Memorial Fellowship

The estate of Edna Florette Guess provides funds for one or more annual awards to graduate students in the Department of Materials Science and Engineering.

Frank Howard Guest Graduate Bursary

Funds from the estate of Frank Howard Guest provide for bursaries based on academic standing and financial need. Students enrolled in any graduate program in any department in the Faculty of Applied Science and Engineering may be considered. Apply by November 1 to the graduate coordinator.

Jim Guillet Chemistry Graduate Scholarship

Awarded to graduate students in the Department of Chemistry based on academic merit and the potential for significant innovation in any area of Chemistry. Financial need will also be considered. Application not required.

Danielle Haasz Graduate Scholarship

Dr. Anthony A. Haasz established this scholarship in memory of his wife Danielle for award to a student with an excellent academic record entering the University of Toronto, with emphasis on dietetics, and leading to a professional registration in the association of the Dietitians of Canada. Value: annual income.

OSOTF

Robert and Jean Hadgraft Graduate Fellowship in Chemistry

Awarded on the basis of academic merit to one or more graduate students in the Department of Chemistry. Financial need will also be considered.

OSOTF

Colin Hahnemann Bayley Fellowship in Chemical Engineering

Awarded on the basis of academic excellence to an incoming graduate student. A student entering a master's program will hold the Fellowship for a period of two years. A student entering a Ph.D. program will hold the Fellowship during the final two years of the

Ph.D. program. The student will be known as the Colin Hahnemann Bayley Fellow. Value: annual income.

Colin Hahnemann Bayley Fellowship in Chemistry

Awarded on the basis of academic excellence to an incoming graduate student.

Halbert Family Fund for Breast Cancer Research

Awarded to students on the basis of financial need who are resident at the Marvelle Kofler Breast Centre and who are supervised by members of Mount Sinai Hospital or its Samuel Lunenfeld Research Institute Committee. Value: annual income.

OSOTF

Eric Hani Fellowship

Rita and Kurt Hani and Cora Donely have endowed funds for incoming graduate students in the Faculty of Medicine on the basis of financial need. Preference given to students undertaking research in microbiology. All incoming graduate students will be assessed by the Eric Hani Fellowship Selection Committee.

OSOTF

Dr. Walter J. Hannah Clinician-Scientist Award in Obstetrics and Gynaecology

Awarded to master's or Ph.D. trainees in obstetrics and gynaecology who wish to pursue a research career as a clinician-scientist in obstetrics and gynaecology. Value: annual income.

OSOTF

Hayden Hantho Award

Awarded on the basis of financial need to graduate students registered in degree programs studying with U of T faculty members located at the Hospital for Sick Children who are engaged in Pediatric Neurosurgery research. Apply to the Department of Pediatrics, Faculty of Medicine. Value: annual income.

OSOTF

Harmonize for Speech Fund

This annual scholarship is given to a graduate student in the Department of Speech-Language Pathology based on financial need.

OSOTF

Alex Harrison Award in Environmental Analytical Mass Spectrometry

The Halocom Society of Canada provides an annual award to graduate students in the Department of Chemistry studying the envi-

ronmental chemistry of chemical pollutants. Academic merit and financial need considered. Apply to the Graduate Chair of Chemistry. Value: annual income.

Harron Scholarships

The Faculty of Dentistry offers annual scholarships to support students with a demonstrated interest in pursuing research training in preparation for an academic career. Harron Scholars compete for funding from other sources (such as OGS, CIHR) for which they are eligible in the second and continuing years of their program. Consult with the Faculty of Dentistry for award criteria and application process.

Harold Harvey Scholarship in Zoology

Friends, students and colleagues of Professor Harold Harvey have established an endowment to provide an annual award to a graduate student in the Department of Ecology and Evolutionary Biology studying freshwater fishes, freshwater fisheries, and/or freshwater ecology. Academic merit and financial need are considered. Application required.

Hastings Memorial Fellowship

Friends of the late Dr. Hastings have endowed funds for an award to a full-time graduate student engaged in original investigations in the field of community health under the direction of the Public Health Sciences faculty. Value: not less than \$2,500.

Haultain Fellowship

The estate of Mary Alice Wells provides an annual fellowship for award, on the basis of academic merit, to a full-time graduate student enrolled in the Department of Materials Science and Engineering undertaking research in mineral or metallurgical engineering. Preference given to students in the research field of mineral engineering.

Baden Havard Endowment Fund

Awarded to graduate students in the Faculty of Medicine conducting research related to the cause and cure of multiple sclerosis. Application not required. Value: annual income.

Heavy Construction Association of Toronto Graduate Scholarship in Intelligent Transportation Systems

Awarded on the basis of academic merit to a doctoral-stream student in the Department of Civil Engineering. Apply to the Department of Civil Engineering. Value: annual income.

Heavy Construction Association of Toronto Graduate Scholarship in IT in Construction and Infrastructure

Awarded on the basis of academic merit to a doctoral-stream student in the Department of Civil Engineering. Apply to the Department of Civil Engineering. Value: annual income.

Richard Jaan Helmeeste Memorial Award

Awarded, on the basis of academic merit, to a student enrolled in the M.Sc. program in Occupational and Environmental Health, Department of Public Health Sciences, Faculty of Medicine. Preference is given to students specializing in occupational hygiene. Application not required.

Professor V. L. Henderson and M. Bassett Research Fellowship in Electrical and Computer Engineering

Mrs. Ellen Henderson and Professor Marion Bassett have endowed funds, the income of which is awarded, on the basis of financial need, to a graduate in Electrical Engineering. Academic merit also considered.

OSOTF

Charles Hershfield Memorial Scholarship

The Hershfield family has provided a scholarship in memory of the late Professor Charles Hershfield, a faculty member in the Department of Civil Engineering from 1945 to 1976. Based on academic excellence, the income from the fund is awarded to one or two graduate students enrolled in the field of structural engineering upon completion of their first year.

David Hewitt Award

Through the generous donations of alumni, friends, and colleagues of David Hewitt, an award is given to a graduate student in Public Health Sciences on the basis of the student's contribution to the intellectual and social life of the Public Health Sciences student body.

Jokers Hill Graduate Award

Awarded, on the basis of financial need, to a graduate student in the Department of Ecology and Evolutionary Biology involved in research at Jokers Hill; academic merit may also be considered. Application required. Value: annual income.

OSOTF

Hannah Farkas Himsley and Alexander Himsley Memorial Prize

Through a generous donation from Ms. Leorah Kroyanker and Ms. Ruth Geva this scholarship has been established for award alternately to

graduate students in the Faculty of Medicine's Department of Medical Genetics and the Faculty of Applied Science and Engineering's Biomedical Engineering Group. Value: annual income.

OSOTF

Dr. Warren Ho Memorial Scholarship in Neurosurgery

Awarded on the basis of academic merit to a graduate student studying and/or doing research in the field of neurosurgery in the Faculty of Medicine. Financial need and demonstrated community volunteer work will also be considered. Apply to the Department of Neurosurgery. Value: annual income.

Douglas Patton Hogg Memorial Award

This award was established in 1987 by the Ontario Section, American Society of Mechanical Engineers in memory of Douglas Hogg, eldest son of Allan D. Hogg, M.A.Sc. (1938), Ph.D. (1940), University of Toronto; and Ruth S. Hogg, B.A. (1963), M.A. (1966), University of Toronto. Additional funding has been generously provided by Dr. Allan Hogg. The award is for a graduate student undertaking research related to aircraft/rotorcraft in any of the following areas: stability and control, flight mechanics, crashworthiness and fire hazards, flight safety, or human-machine interactions. In addition to academic standing, the recipient must also be of good character and have good leadership ability. Value: \$500.

OSOTF

Frank S. Hogg Memorial Fellowship

This award is offered annually to a graduate student in Astronomy and Astrophysics. One or more awards are available up to the value of the annual income.

The Thomas H. Hogg Overseas Fellowship

The Faculty of Applied Science and Engineering annually awards one fellowship valued at \$10,000. The applicant must be a Canadian citizen or permanent resident, and hold a B.A.Sc. or M.A.Sc. degree from the University of Toronto. The applicant must enrol in a graduate degree program in a recognized university outside the North American continent. Preference is given to applicants in the field of hydraulics, fluid mechanics, or power systems engineering. Apply through the Faculty of Applied Science and Engineering.

Robert C. Hosie Prize

Mr. A.F. Buell, Mr. T. A. Buell, and others have endowed funds to provide an annual prize

for award, on the basis of academic merit, to a full-time graduate student in the Faculty of Forestry.

Household Science and Nutritional Sciences Alumni Graduate Scholarship

For award to Faculty of Medicine graduate students on the basis of financial need who are studying in the field of nutritional sciences. Value: annual income.

OSOTF

Gordon Ferrie Hull Fellowship

This fellowship is awarded in alternate years to a Ph.D. student in the Department of Physics who already holds an M.Sc. degree or equivalent. Value: annual income.

Kathleen and Donald Strong Hull Fellowship

The estate of Donald Strong Hull has generously provided funding for a fellowship to assist in attracting an excellent student to the Department of Ecology and Evolutionary Biology. The award is given to a graduate student on the basis of financial need and academic merit.

OSOTF

The Tom Hull Scholarship in Computer Science

Friends, colleagues, and former students have established an award in memory of Professor Tom Hull. Awarded to undergraduate or graduate students in computer science, the award is based on financial need and takes academic merit into consideration.

OSOTF

Hunt Estate M.D./Ph.D. Student Aid

Awarded to graduate students in the Faculty of Medicine on the basis of financial need. Value: variable.

OSOTF

Archibald G. Huntsman Graduate Award in Zoology

Awarded on the basis of academic merit and financial need to a master's or doctoral student in the Department of Ecology and Evolutionary Biology. Apply to Associate Chair, Graduate Affairs, Department of Ecology and Evolutionary Biology. Value: annual income.

OSOTF

Mary Gertrude l'Anson Scholarship

Awarded to a doctoral student in the health sciences, broadly defined, on the basis of financial need and academic merit. Eligible graduate units: Life Sciences (Division IV) and

Biomedical Engineering, Chemical Engineering, Environmental Studies, Human Development and Applied Psychology, Management, Mechanical Engineering, Social Work, and Sociology. Value: approximately \$10,000. In some cases, awards of lesser value may be granted as top-up awards.

OSOTF

Frederick P. Ide Graduate Awards in Cell and Systems Biology

Award established through a bequest from the estate of Dr. Frederick Palmer Ide and various other donors. Preference given to graduate students in the Department of Cell and Systems Biology, based on academic and financial need.

OSOTF

Frederick P. Ide Graduate Awards in Ecology and Evolutionary Biology

Established through a bequest from the estate of Dr. Frederick Palmer Ide and various other donors, awarded to masters or doctoral students studying in the Department of Ecology and Evolutionary Biology, based on financial need. Academic merit will also be considered. Application required.

OSOTF

Elizabeth Inglis Bursary

Awarded to a student in the Department of Physical Therapy on the basis of financial need. Eligibility for this bursary shall not be affected by academic standing, course load, or year of study. Value: annual income, to a maximum of \$500 per recipient.

OSOTF

Fred G. Jackson Prize

Awarded annually to the student enrolled in the professional Master of Forestry Conservation degree program in the Faculty of Forestry who submits the best report in the Research Paper in Forestry Conservation course, based on work undertaken in the Internship in Forest Conservation course. Value: annual income.

R. E. Jervis Award

The Canadian Nuclear Society and others have provided funds to offer a \$500 annual award to a Canadian graduate student pursuing full-time research involving the development of radiochemistry or its application in areas such as human health, chemical engineering, nuclear safety, or environmental pollution. Apply to the Department of Chemical Engineering and Applied Chemistry.

Edward Elsworth Johnson Postgraduate Forestry Fellowships and Postgraduate Forestry Awards

The estate of Marguerite Johnson has established a fund, the annual income of which is awarded to students pursuing master's and/or Ph.D. degrees in the Faculty of Forestry. Academic merit and financial need are also considered.

Shirley Jones Fellowship

The estate of Florence Shirley Jones has created an award for a graduate student in Astronomy and Astrophysics. Value: annual income.

Wendy M. Kates Memorial Bursary

In memory of Wendy M. Kates, family members, friends, and colleagues have endowed funds to provide a bursary for award to a graduate student in Biomedical Communications on the basis of financial need and academic achievement in the M.Sc.BMC Master's Research Paper. Commitment to the profession may also be considered.

OSOTF

Wendy M. Kates Memorial Scholarship

In memory of Wendy M. Kates, family members, friends, and colleagues have endowed funds to provide an annual scholarship for award to a graduate student in Biomedical Communications on the basis of academic achievement in the M.Sc.BMC Master's Research Paper. Commitment to the profession may also be considered.

Dr. Terry Kavanagh Fellowship

Awarded up to two new students entering a graduate program of study in primary or secondary prevention of heart disease, cardiac rehabilitation, or in a related field in which physical fitness is the primary component for the improvement of health and quality of life. Awarded on the basis of academic merit determined by grades, publications, presentations, and research. Apply to the Faculty of Physical Education and Health. Value: annual income.

Dr. Norman Keevil President's Fellowship in Geology

The award is offered to two or more graduate students studying geology at the master's or doctoral level. Students who intend to bring their expertise to developing nations upon graduation are eligible.

OSOTF

John L. Kellerman Fellowship in Civil Engineering

This fellowship is given to a student holding a degree in engineering who has an interest in and an aptitude for steel construction. For application and further information regarding the value of the fellowship consult the Department of Civil Engineering.

Merrijoy Kelner Scholarship

Various donors have endowed a fund to honour Professor Kelner upon her retirement from the University of Toronto. The annual income is awarded to an outstanding M.Sc./Ph.D./M.H.Sc. (Health Promotion) student in the Graduate Department of Public Health Sciences (Behavioural Sciences) who shows excellence and great promise for a career in applying social sciences to the health field.

Ralph Kennedy Memorial Award

An annual award is offered to a Forestry graduate student with high academic merit and financial need. Application not required.

OSOTF

Dr. Jesse Keshin Graduate Student Award

Ms. Barbara Wingrove and Mr. Victor H. Romley have kindly endowed funds to establish a fellowship for award to a Faculty of Medicine graduate student on the basis of financial need. Value: annual income.

OSOTF

Dr. Edward Ketchum Graduate Student Scholarships

For graduate students in financial need who are participating in research programs investigating novel-immunotherapeutics for B-cell lymphoma at the Faculty of Medicine. Value: variable.

OSOTF

J. Davidson Ketchum Graduate Scholarship in Psychology

Margaret and John Catto have established a fund, the annual income of which is awarded to a graduate student in the Department of Psychology on the basis of academic merit. Preference given to students studying in the broad field of human psychology. Financial need may also be considered. Application not required.

The J. Davidson Ketchum Graduate Award in Psychology

Awarded to a student studying the broad field of human psychology. Financial need and academic merit are considered.

OSOTF

Kathleen King Doctoral Fellowship

An admission award is offered, on the basis of academic merit, to a full-time incoming doctoral student in the Graduate Department of Nursing Science. Application not required. Nomination is made by the Faculty of Nursing Awards Committee. Value: \$5,000 or annual income.

Ina Kniep Scholarship

Awarded to graduate students in the Department of Nutritional Sciences on the basis of academic excellence. Preference given to students who are members of the Canadian Dietetic Association and who are pursuing graduate studies in Community Nutrition.

Partners in Research Marvella Koffler Prize

Awarded to students from the Department of Immunology and/or the Department of Laboratory Medicine and Pathobiology doing biomedical research. Offered on the basis of academic excellence and on demonstrated public education in the lay community related to the mission of Partners in Research. Secondary preference given to graduate students in other graduate units of the Faculty of Medicine.

Dr. Peter Kong-Ming New Memorial Award

Awarded to a M.Sc. or Ph.D student for the best paper submitted for a course in Behavioural Science during the previous calendar year. Theses and dissertations are ineligible for consideration. All M.Sc. and Ph.D. graduate students enrolled in the Department of Behavioural Science's graduate program are eligible to apply directly for this award and/or to be nominated by faculty. Value: book award to the total value of annual income.

Eric David Baker Krause Graduate Fellowship

Family, friends, and colleagues of Eric Krause have endowed funds, the income of which provides an award, on the basis of financial need and academic excellence, to master's or doctoral students in the Centre for Environment, who meet OSOTF guidelines. Preference given to students who have obtained their undergraduate degree from the University of Toronto, Division of the Environment. Apply to the Centre for Environment.

OSOTF

Marion Kuhns Memorial Fellowship

Awarded to a graduate student in the Department of Nursing Science on the basis of financial need and academic standing in the last year of the Pediatric Nursing specialization. Application not required. Nomination is made

by the Faculty of Nursing Awards Committee. Value: approximately \$2,500.

Arthur and Sonia Labatt Fellowships

Awarded, on the basis of financial need and academic excellence, to master's or doctoral students in the Centre for Environment. Preference given to students who are exploring practical based solutions to environmental issues or examining the market place for solutions to environmental issues. Value: annual income.

OSOTF

The Annie L. Laird Fellowship in Food Sciences

The Annie L. Laird Fellowship, the gift of her sister, Miss Elizabeth R. Laird, D.Sc., is awarded in alternate years to a University of Toronto graduate undertaking a graduate program in nutrition in the Department of Nutritional Sciences. Value: approximately \$3,200.

The Lorne F. Lambier, Q.C. Scholarship

Awarded to a student investigating or researching cancer within the discipline of biochemistry. Nomination form required. Value: annual income.

Robert E. Lansdale/Okino Computer Graphics Graduate Fellowship in dgp for the Department of Computer Science

Awarded on the basis of academic merit to a graduate student in the Department of Computer Science's Dynamic Graphics Project. Financial need may also be considered. Value: annual income.

Dr. Bernard Lau Memorial Scholarship (B): Graduate Bursary

The family and friends of Dr. Bernard Lau have established a fund, the annual income of which is awarded to an incoming graduate student in the Faculty of Medicine. Recipient should participate in extracurricular activities and demonstrate a concern for disadvantaged members of the community.

OSOTF

Dr. Alan K. Laws Clinical-Scientist Fellowship Fund

The Laws Fellowship promotes excellence in training anaesthetists for careers as clinician-scientists. Preference is given to anaesthesia residents or junior fellows enrolled in a graduate program. Apply to the Faculty of Medicine. Value: annual income.

Friends of the Lassonde Institute Graduate Fellowship

Awarded on the basis of academic merit to a graduate student enrolled in the Department of Civil Engineering who is specializing in Engineering Geoscience at the Lassonde Institute. Application not required.

Alfred B. Lehman Graduate Scholarship in Computer Science

June Elise Mines has generously contributed to an endowed fund, the annual income of which is awarded to a graduate student in the Department of Computer Science on the basis of merit. Preference is given to students studying discrete mathematics, with a special emphasis on combinatorics, graph theory, matroid theory and the theoretical foundations of mathematical programming. Financial need will also be considered. Application not required.

Alfred B. Lehman Graduate Scholarship in Mathematics

June Elise Mines has generously contributed to an endowed fund, the annual income of which is awarded to a graduate student in the Department of Mathematics on the basis of merit. Preference given to students studying in the area of discrete or applied mathematics. Financial need will also be considered. Application not required.

Dr. James Lepock Memorial Award

Awarded to a student on the basis of academic excellence in the Department of Medical Biophysics. Application required. Value: annual income.

Donald J. Leroy Graduate Prize in Physical Chemistry

Annual income from the generous donations of family, friends, and colleagues of the late Professor D. J. Leroy is available to a graduate student in the Department of Chemistry. Particular attention is paid to the student's contribution to the writing of a research paper(s), either submitted or published.

Carol Anne Letheren Fellowship

Awarded to a new student in the Faculty of Physical Education and Health on the basis of admission, the study of girl's and women's health, physical education and sport administration through research and advocacy, and on academic merit. Renewable for one year upon review.

OSOTF

Hans Leutheusser Memorial Award

Awarded to a graduate student in the Department of Mechanical and Industrial Engineering who demonstrates financial need and good academic standing.

OSOTF

Dr. Norman Levine Bursary in Graduate Paediatric Dentistry

Dr. and Mrs. Norman Levine and family have contributed funds for a fellowship for award to a student currently in the graduate program in Paediatric Dentistry who demonstrates financial need and has satisfactory academic standing.

OSOTF

Lylla Doreen Lewis Scholarship

Awarded to a graduate student in the Department of Nutritional Sciences on the basis of academic excellence. Application not required. Value: annual income.

Herta Leyss Scholarship in Physical Therapy

Awarded on the basis of academic excellence to graduate students in the Department of Physical Therapy, Faculty of Medicine.

Dr. Samuel and Evelyn Librach Award in Obstetrics and Gynaecology

Dr. Samuel and Evelyn Librach have established an annual award, given on the basis of financial need, to graduate students supervised by graduate faculty members who are appointed in the Department of Obstetrics and Gynaecology, Faculty of Medicine. Academic merit is also considered. Application not required. Value: annual income.

OSOTF

Lifebeat '96 Graduate Studentship Award in Women's Health

This scholarship is awarded annually to a graduate student studying women's health in the Faculty of Medicine's Department of Family and Community Medicine. Value: annual income.

OSOTF

Mart Liinve Graduate Scholarship

Awarded on the basis of academic merit to a graduate student in the Department of Mechanical and Industrial Engineering. Value: annual income.

Olive Lindsay Scholarship

The estate of Samuel David Climans provides an award to a graduate student doing medical

research in the Faculty of Medicine. Value: annual income.

William Line Memorial Graduate Scholarship in Psychology

Professor Emeritus Daphne Schiff, friends, and family of Professor Emeritus William Line have established an annual scholarship for award to a master's or doctoral student in the Department of Psychology. Awarded on the basis of financial need; academic merit is also considered. Application required. Value: annual income.

OSOTF

The Harold L. Livergant Scholarship

Awarded to a student entering the M.H.Sc. program in Health Policy, Management and Evaluation on the basis of excellence and promise in long term care management.

Robert W. Lyons Admission Fellowship

Awarded on the basis of academic merit to one or more full-time graduate students in the first year of a degree program in the Faculty of Forestry.

The Bernard Ludwig Fellowship in Obstetrics and Gynaecology

For award to graduate students supervised by staff in the Department of Obstetrics and Gynecology on the basis of financial need. Value: annual income.

OSOTF

The Samuel Lunenfeld Research Institute Fellowships

This annual scholarship has been established through a generous endowment from the Mount Sinai Hospital Foundation of Toronto for award to graduate students in the Faculty of Medicine on the basis of financial need.

OSOTF

Patricia Lyon Nursing Fellowship

Awarded to full-time or part-time master's students in the Department of Nursing Science whose studies are consistent with the goals or will further the strategic directions of the Toronto Rehabilitation Institute. Academic merit is considered. Preference is given to employees of the Toronto Rehabilitation Institute. Apply to the Corporate Professional Leader for Nursing, Toronto Rehabilitation Institute, by February 1. Value: annual income.

MDS Nordion Graduate Scholarship in Radiopharmaceutical Sciences

Awarded to students enrolled in the Depart-

ment of Pharmaceutical Sciences; preference given to students in the radiopharmaceutical sciences.

OSOTF

MRC Group Graduate Student Bursary

The bursary is given to a graduate student working in the MRC Group in Periodontal Physiology.

OSOTF

MTS/Allstream Entrance Scholarship

MTS Allstream Inc. has established an award for new full-time students registered in the Master of Engineering in Telecommunications program to be given on the basis of academic merit. No application required. Value: \$10,000.

Dr. W. Bruce and Susan Malloch Fellowships

Susan Beal-Malloch established this fellowship in memory of her spouse Dr. W. Bruce Malloch for award to graduate students on the basis of financial need. One award is designated specifically to a graduate student in orthodontics and one award is made available to a graduate student enrolled in any Dentistry graduate program, including orthodontics.

Frank A. MacDougall Fellowship

A fellowship awarded on the basis of academic merit to a full-time student enrolled in the M.Sc. F. or Ph.D. programs in the Faculty of Forestry. Value: annual income.

MacPherson Prize in Microbiology

Dr. L.W. MacPherson has established an award for the top graduate student in microbiology. Value: \$1,000 and a medal supplied by the donor.

Mary and Ron Martin Graduate Fellowship in Astrophysics

Awarded to a student in the field of astrophysics on the basis of academic merit. Financial need may also be considered. Value: annual income.

Yoshio Masui Prize in Developmental, Molecular, or Cellular Biology

Awarded on the basis of academic excellence to a master's or doctoral student in the Department of Cell and Systems Biology. International students are encouraged to apply. Apply to the Associate Chair, Graduate Affairs, Department of Cell and Systems Biology. Value: annual income.

The J. Edgar McAllister Foundation Graduate Bursaries

Four bursaries are awarded annually to students registered in one of the graduate departments of Mechanical and Industrial Engineering, Electrical and Computer Engineering, Chemical Engineering and Applied Chemistry, Materials Science and Engineering, and Geology. Value: \$5,000.

Donalda Jean McGeachy OSOTF Memorial Award

The estate of Donalda Jean McGeachy has generously provided funds for scholarship(s) for graduate students in the Department of Speech-Language Pathology.

OSOTF

Dr. Barbara A. McLaren Scholarship

Awarded on the basis of academic performance, staff recommendation, and the student's area of study. Preference given to students interested in aspects of human nutrition related to the community or to the understanding and control of problems such as obesity that are prevalent in the community.

McLean Foundation Graduate Scholarships in Science and Technology

Four scholarships awarded on the basis of financial need to graduate students in the Department of Chemical Engineering and Applied Chemistry. Academic excellence will also be considered. Value: \$15,000 each.

OSOTF

J. Playfair McMurrich Fellowship in Anatomy

Funds from the estate of Kathleen Isabel McMurrich, in memory of her late father, Dr. J. Playfair McMurrich, provide a fellowship for a doctoral student in the Department of Anatomy and Cell Biology. The number of awards available is based on the annual income.

Kathleen McMurrich Memorial Bursary

Awarded to a student in the second or graduating year of the M.Sc. program in Physical Therapy, based on financial need, good academic standing, and active participation in University activities.

Medical Graduate Student Bursary Fund

A limited number of high-need bursaries are available to professional master's students in the Graduate Departments of Occupational Therapy; Physical Therapy; Health Policy, Management and Evaluation; Public Health

Sciences; Speech-Language Pathology; and in the Biomedical Communications and Genetic Counselling programs. Questions regarding eligibility and applications should be directed to the individual departments/programs listed.

Mentor Medical Systems Canada Graduate Scholarship in Plastic Surgery

Awarded to graduate students in the Faculty of Medicine on the excellence of their research proposals. Preference given to graduate students who are resident Postgraduate Surgical Trainees in the Division of Plastic Surgery in the Department of Surgery and are pursuing studies in breast surgery, cosmetic surgery, or tissue engineering.

Carlos Melendez Memorial Award

Awarded to an M.Sc. student in the Department of Physical Therapy who best exemplifies the strengths of humanity and compassion demonstrated by the late Carlos Melendez.

OSOTF

The Merck Frosst Canada Inc. Chemistry Conference Award/The Merck Frosst Canada Inc. Graduate Award in Chemistry

The Conference portion of this award will be given to a senior graduate student in synthetic organic chemistry to attend an international conference and present findings. The student must have a research publication from his or her graduate studies. The Graduate Award portion will be awarded to an incoming graduate student intending to carry out research in organic synthesis.

OSOTF

Merck Frosst Graduate Scholarship in Biosciences and Biotechnology

Awarded on the basis of academic merit to a new student entering the Master of Biotechnology program.

Mervis-Simon Family Award in Bioethics

Kimbar Corp. has endowed funds to support a clinical ethics project award for a graduate student enrolled in the Joint Centre for Bioethics. Applicants must demonstrate financial need. Preference given to students with a career interest in bioethics. Value: annual income.

Metropolitan Toronto Pharmacists Association—James E. P. Rogers Memorial Fellowships

Awarded to a student studying Social and Administrative Pharmacy and preferably conducting research in the area of community pharmacy.

David F. Mettrick Fellowship

Awarded to a qualified graduate student in the Department of Cell and Systems Biology engaged in any aspect of zoological research. Value: annual income.

OSOTF

Al Miller Fellowship

Awarded to an outstanding student pursuing a graduate degree in the Department of Materials Science and Engineering. Value: annual income.

Anthony B. Miller Prize in Cancer Epidemiology

For award to a student who has completed a doctoral program in Epidemiology within the previous academic year, with the thesis clearly related to cancer. Value: annual income.

OSOTF

Margaret Amelia Miller Scholarship

The estate of Willett Green Miller provides an annual award for a student studying geology or geophysics. Preference given to a student whose main research is conducted at the University of Toronto in Mississauga and/or whose primary supervisor is a faculty member fully appointed at UTM. Application not required. Value: annual income.

Barbara and Frank Milligan Graduate Fellowships

Barbara and Frank Milligan have funded an annual award, given on the basis of academic merit, to graduate students enrolled in the Institute of Biomaterials and Biomedical Engineering. The awards are evenly distributed between students directly enrolled in IBBME programs and collaborative program students whose home department is Mechanical and Industrial Engineering. Application not required.

Minns Family Bursary in Ecology & Evolution

Dr. Charles K. Minns has donated funds for a bursary, given on the basis of academic merit and financial need, to a graduate student in the Department of Ecology and Evolutionary Biology. Application required.

Carol Mitchell and Richard Venn Graduate Student Fellowship in Women's Health

On the basis of financial need, two awards are given annually as follows: 50% of the annual income supports a graduate student undertaking women's health research with a Faculty of Medicine member located at the Centre for Addiction and Mental Health (CAMH), or its

successor. 50% supports a graduate student undertaking women's health research with a Faculty of Medicine member located at Women's College Hospital, or its successor. Value: variable.

OSOTF

Kenneth M. Molson Fellowship

Kenneth M. Molson Foundation has generously endowed an entrance fellowship for a student entering the Institute for Aerospace Science and Engineering. Value: annual income.

OSOTF

The Norman F. Moody Award

This award was created on the occasion of the retirement of Professor Norman F. Moody as director of the Institute of Biomedical Engineering. Annual value: approximately \$75.

Ara Mooradian Scholarship

Awarded to a graduate student in any discipline of the Physical Sciences, Engineering, or Life Sciences related to radioactivity. Selection is based on academic merit. Graduate students can hold the award for a maximum of three and two years, respectively, subject to satisfactory progress as viewed by the selection committee. Application is by way of nomination by the student's graduate unit, transcripts, one letter of recommendation, and a statement from the applicant which includes the following: awards received, contribution to research, and study plan.

The W. W. Moorhouse Fellowship

The W. W. Moorhouse Fellowship is awarded annually to a graduate student in the Department of Geology. Value: approximately \$1,000.

Grace (Weymark) Morgan Scholarship

Grace Morgan has provided funds to offer scholarships, on the basis of financial need, to one or more full-time graduate students. Preference is given to undergraduate students from Memorial University who qualify for entrance to the Master of Health Science (M.H.Sc.) program in community nutrition. Application required.

OSOTF

F. K. Morrow Forestry Admission Fellowship

The award is given to a student entering the professional Master of Forest Conservation program in the Faculty of Forestry. Value: \$2,000.

Mount Sinai Hospital Graduate Scholarships in Science and Technology

Awarded on the basis of financial need and academic excellence to one or more graduate students in the Faculty of Applied Science and Engineering who are:

1. in the Institute of Biomaterials and Biomedical Engineering, the Department of Chemical Engineering and Applied Chemistry, or the Department of Materials Science and Engineering;
2. supervised or co-supervised by a graduate faculty member on staff at Mount Sinai Hospital; and
3. supervised or co-supervised by a graduate faculty member of the Department of Laboratory Medicine and Pathobiology.

Value: \$15,000 each.

OSOTF

Dr. Gwen Mulock Award

Applicants must be registered in the second year of the M.S.W. program at the Faculty of Social Work. Preference is given to students in Medical Social Work. Apply to the Faculty of Social Work. Value: annual income.

Thomas and Edna Naylor Memorial Award in Health Services Research

Awarded to a graduate student in the Department of Health Policy, Management and Evaluation who completes the best thesis in the field of health services research. Apply to the Department of Health Policy, Management and Evaluation.

Emily Newman Scholarship

The Emily Newman Scholarship is awarded to a graduate student studying pulmonary hypertension with Dr. Marlene Rabinovitch in the Division of Cardiovascular Research at The Hospital for Sick Children. The student will be chosen on the basis of excellence in science, motivation, and commitment to medical research.

Heather Milne Nielsen Graduate Scholarship

Awarded to one or more full-time or part-time M.H.Sc. students in the Community/Public Health Nutrition program. Preference given to students whose interests match those of Heather Milne Nielsen and who are committed to interdisciplinary study to broaden understanding of the multifactorial causes of nutritional issues.

The V. J. Nordin Prize

Awarded to a full-time Forestry graduate student pursuing studies in an area related to tropical forestry. Value: annual income.

Nortel Institute Graduate Scholarship for Telecommunications

Bell Northern Research Limited has established an award for a student in the master's program in Telecommunications based on financial need; academic merit may also be considered. Value: annual income.

OSOTF

Northwater Management Award in Gerontology

The award supports travel and related conference expenses allowing a graduate student to present a paper in the field of aging or gerontology at a conference. The award is made on the basis of financial need, the quality of the paper to be presented, and the academic promise of the applicant as judged by the Awards Committee of the Institute for Human Development, Life Course and Aging. Application form, conference paper, and supporting letter from the student's professor and co-author (if applicable) are required. Apply to the Institute for Human Development, Life Course and Aging. Value: annual income.

Louie J. Nozzolillo Fellowship in Forestry Research

Louie J. Nozzolillo has generously endowed funds to provide a fellowship for award on the basis of academic merit to a graduate student in the Graduate Department of Forestry. The award normally takes the form of a top-up to an Ontario Graduate Scholarship or a U of T Fellowship.

Faculty of Nursing Admission Fellowship for Part-Time Master's Student

Awarded to a student in financial need who has a sound academic record and who is applying to enrol part-time in a master's program in the Department of Nursing Science. Apply by letter explaining financial circumstances and submit a completed financial needs assessment form. Value: annual income.

OSOTF

Nursing Alumni Graduate Fellowship

On the recommendation of the Faculty of Nursing, \$5,000 is awarded to a student registered full-time in the M.Sc. or M.N. program in the Faculty of Nursing demonstrating high academic achievement.

Faculty of Nursing Class of 5T5 Award

The Class of 5T5, Faculty of Nursing has established a fund, the annual income of which is awarded to a student completing one year of full-time or part-time studies in the master's program in the Faculty of Nursing. Awarded on the basis of demonstrated financial need. Students must show evidence of community involvement and/or leadership. Apply by March 31 to the Awards Committee, Faculty of Nursing. The application must include proof of financial need and two letters of reference, showing evidence of community involvement and/or leadership either within or external to the University of Toronto.

OSOTF

Faculty of Nursing Class of 6T0 Award

Awarded to a full-time graduate student in the Department of Nursing Science on the basis of academic merit. Application not required. Awarded on the nomination of the Faculty of Nursing Awards Committee. Value: annual income.

OSOTF

Faculty of Nursing Doctoral Admission Award

Awarded on the basis of financial need to a student admitted to the Ph.D. program in the Faculty of Nursing. Academic merit will also be considered. Value: variable

OSOTF

Faculty of Nursing Doctoral Award in the Care of Children

Nortel has generously donated funds, the annual income of which is awarded to a doctoral student in the Department of Nursing Science. Eligibility is based on academic merit and priority is given to those engaged in research on the care of children. Apply to the Awards Committee, Faculty of Nursing by March 31.

Nursing Faculty/Staff Fellowship

Awarded to students in the Graduate Department of Nursing Science on the basis of financial need and academic merit

Department of Nutritional Sciences Graduate Student Fellowship

Awarded to Faculty of Medicine graduate students on the basis of financial need who are studying nutritional sciences and food safety.

OSOTF

Occupational Hygiene Scholarship Fund (Community Helath)

Alumni and faculty members of Public Health Sciences have generously established a fund, the annual income of which is awarded to a student enrolled in the Occupational Hygiene Specialty of the M.H.Sc. program. Eligibility is based on financial need and academic merit.

OSOTF

Occupational Therapy Fund

Awarded to one or more graduate students enrolled in the Occupational Therapy program at the University of Toronto with demonstrated financial need. Value: variable.

OSOTF

Atsumi Ohno Scholarship

Professor Atsumi Ohno of the Chiba Institute of Technology has established an award, given on the basis of academic merit, to a graduate student engaged in research in the field of solidification of metals in the Department of Materials Science and Engineering

OSOTF

Ontario Nursing Home Association Fellowship

An award of \$750 is offered annually to a full-time student in a master's degree program in the Graduate Department of Nursing Science. Students must seriously intend to practise gerontological nursing in Ontario following graduation. Preference is given to applicants specializing in the care of the institutionalized elderly. Apply by March 31 to the Graduate Department of Nursing Science.

Rein Otson Memorial Graduate Scholarship

Awarded to a graduate student on the basis of academic merit in the Department of Chemical Engineering and Applied Chemistry; preference given to students from Estonia. Application required. Value: annual income.

Rein Otson Memorial Travel Endowment

Awarded to a graduate student in the Department of Chemical Engineering and Applied Chemistry, with preference given to students from Estonia. The purpose of this award is to assist the recipient of the Rein Otson Memorial Graduate Scholarship with travel and related expenses in order to conduct research and attend conferences/workshops. Application required. Value: annual income.

Anne-Liis Ots-Goodman Prize

Friends, colleagues, and family of the late Anne-Liis Ots-Goodman have endowed a

fund, the income of which provides an award to a graduating student (not a physician) who achieves the highest grades in the professional masters program in Occupational Hygiene.

PMC–Sierra, Inc. Scholarship in Engineering

An annual donation of \$1,500 is awarded to recognize the academic achievement and related thesis work in the networking/semiconductor field of graduate students completing their final year in the department of Electrical and Computer Engineering. Awarded on the basis of academic achievement in the previous academic year.

Dr. Roman Pakula Memorial Award

Through donations from family, friends, and colleagues of the late Dr. Roman Pakula, a \$400 award is available annually to a graduate student in the M.Sc. program in the Department of Molecular and Medical Genetics (microbiology program).

Wilfred H. McKinnon Palmer Academic Award

Awarded to students registered in the M.H.Sc. Community Health (Family Medicine) program in the Faculty of Medicine on the basis of academic excellence. Application not required.

Nora I. Parker Ph.D. Admission Award

For award on the basis of financial need to a student admitted to the Ph.D. program in the Faculty of Nursing. Value: annual income
OSOTF

Marie Parkes Fellowship for Research in Women's Health and Physical Activity

Awarded on the basis of acceptance into the program and academic merit determined by grades, publications, presentations, and research. Renewable for one year upon review. Students may apply or nominations may be submitted by a faculty, student, or staff member of the Faculty of Physical Education and Health. Value: annual income.

Mary Elizabeth McGainty Parkin Graduate Fellowship in Community Health

Dr. William J. McGainty and others have donated funds to establish a fellowship for award, on the basis of financial need, to students in the Department of Family Medicine in the M.H.Sc. program. Value: variable
OSOTF

Patino Mining Corporation Research Fellowship

Nipissing Mining Company Ltd., now merged with the Patino Mining Corporation, has endowed funds to provide an annual fellowship for award to a graduate of a recognized university proceeding to a master's or doctoral degree in the field of mineral processing in a department of the Faculty of Applied Science and Engineering at the University of Toronto.

The G. N. Patterson Award

This award was created on the occasion of the retirement of Dr. G. N. Patterson as Founding Director of the University of Toronto Institute for Aerospace Studies (UTIAS). Funds were donated by Dr. Patterson, the UTIAS alumni, and industry. The award is given annually to a UTIAS student who has made an outstanding research contribution. Value: \$1,200.

Judy and Samuel Pencer Graduate Fellowship in Psychiatry

The Mount Sinai Hospital Foundation of Toronto has established an award for graduate students in the Department of Psychiatry at Mount Sinai Hospital who are in need of financial assistance. Value: variable
OSOTF

Perinatal Nurses of Southern Ontario Graduate Award in Women's Health

Awarded on the basis of financial need to a graduate student enrolled in the master's or Ph.D. program in the Faculty of Nursing. Demonstration of strong interest in women's health issues is also necessary. Value: annual income
OSOTF

Al and Hannah Perly Graduate Student Scholarship

Bob Rae and Arlene Perly Rae have donated funds for this scholarship for award, on the basis of financial need, to graduate students studying leukemia/lymphoma and women's health in the Faculty of Medicine. Value: annual income
OSOTF

The Peterborough K. M. Hunter Graduate Scholarships and the Peterborough K. M. Hunter Postdoctoral Fellowships

The K.M. Hunter Graduate Studentships are awarded to Ph.D. students in the Faculty of Medicine with research interest in Alzheimer's disease, arthritis, cancer, heart and stroke, schizophrenia, glaucoma, cerebral palsy, or lung disease. A CGPA of A- is required. The Postdoctoral Fellowships are awarded to

fellows holding a M.D. or Ph.D. with research interest in urban, global, or aboriginal health. Preference given to fellows whose supervisor holds a primary appointment at St. Michael's Hospital.

Dr. L. Bradley Pett Graduate Award in Biochemistry—OSOTF

Dr. L. Bradley Pett has endowed a fund, the annual income of which is awarded to graduate students in the Department of Biochemistry on the basis of financial need. Academic excellence will also be considered. Apply to the Department of Biochemistry. Value: annual income.

OSOTF

Dr. L. Bradley Pett Graduate Award in Biological Chemistry

Awarded to a graduate student in the Department of Chemistry who has completed at least one year of graduate work in the area of biological chemistry. While the award is made on the basis of financial need, academic merit will also be considered. Apply to the Chemistry Graduate Office by March 1. Value: annual income.

OSOTF

Pharmaceutical Sciences Graduate Student Association Award

Awarded to graduate students in the Department of Pharmaceutical Sciences who demonstrate financial need; academic merit is also considered. Application required.

Department of Pharmaceutical Sciences Research Award - OSOTF II

Awarded to graduate students in the Department of Pharmaceutical Sciences who demonstrate financial need; academic merit is also considered. Application required.

OSOTF

Wyeth Pharmaceuticals Fellowship in Health Outcomes Research

Wyeth Pharmaceuticals has generously endowed a fellowship, given on the basis of financial need, to graduate students working in health outcomes research in the Department of Pharmaceutical Sciences. Academic merit is also considered. Application not required.

Lorne Phenix Graduate Award

Awarded on the basis of academic excellence to a student working under the direct supervision of a faculty member of the Heart and Stroke/Richard Lewar Centre of Excellence in Cardiovascular Research.

Dr. Eliot A. Phillipson—Department of Medicine Fellowships

The Mount Sinai Hospital Foundation of Toronto has endowed funds to establish a fellowship for graduate students in the Department of Medicine at Mount Sinai Hospital on the basis of financial need. Value: annual income.

OSOTF

Faculty of Physical Education and Health General Graduate Award

Alumni and friends of the Faculty of Physical Education and Health have generously endowed an award, given on the basis of academic excellence and financial need, to a student in the Exercise Sciences program. Apply to the Faculty of Physical Education and Health.

Physical Therapy Annual Fund—OSOTF

Awarded to one or more graduate students enrolled in the Physical Therapy program at the University of Toronto who demonstrate financial need.

OSOTF

OSOTF Physical Therapy Fund

Friends and graduates of the Department of Physical Therapy have donated funds for award to one or more Physical Therapy graduate students with demonstrated financial need. Apply to the Graduate Department of Physical Therapy.

OSOTF

Lloyd and Frankie Pidgeon Fellowship

Mr. Lloyd Pidgeon has generously endowed a fellowship for a third-year or fourth-year doctoral student in the Department of Materials Science and Engineering. The student should be strongly focused on studies in extractive metallurgy, although not necessarily tied to non-ferrous metals. Value: annual income.

OSOTF

Ross Pierce Memorial Scholarship

The annual income from the Trust Fund is normally awarded, on the basis of academic merit and financial need, to a student enrolled in the first year of the M.H.Sc. program in Speech-Language Pathology.

Charles Bertram Pitt Graduate Bursary

The estate of Mary Elizabeth Pitt provides bursaries to graduate students in the Department of Mechanical and Industrial Engineering. The bursaries are granted on the basis of financial need and satisfactory academic

standing. Value of bursaries may vary. Application required.

OSOTF

Poyton Graduate Award for Research in Oral Radiology

This bursary was established through a generous donation from Dr. H. G. and Mrs. E. M. Poyton. Award is given to graduate students in the M.Sc. (Oral Radiology) degree program based on academic achievement and financial need. Application not required.

Poyton Graduate Student Bursary in Oral Radiology

This bursary was established through a generous donation from Dr. H. G. and Mrs. E. M. Poyton. The bursary will be awarded to students in the M.Sc. (Oral Radiology) degree program who are Canadian citizens or permanent residents of Ontario on the basis of academic achievement and financial need. OSOTF

Platform Computing Graduate Fellowship in Computer Science

Awarded on the basis of academic merit and financial need to a student in the Department of Computer Science.

Mildred Claire Pratt Graduate Nursing Fellowship

The estate of Mildred Claire Pratt has generously provided funds, the income of which is awarded to graduate students having completed one year of full-time or part-time study in palliative care at the Department of Nursing Science. Eligibility is based on financial need, and priority is given to those who exemplify the qualities of compassion and efficiency. Apply to the Awards Committee, Faculty of Nursing by March 31.

OSOTF

H. W. Price Research Fellowship in Electrical and Computer Engineering

The H. W. Price Research Fellowship in Electrical Engineering consisting of the income from the fund accumulated over one or more years, derived from the sum of \$10,000 donated by the Hydro-Electric Power Commission of Ontario, is awarded from time to time to a graduate in Electrical Engineering or Computer Engineering from any recognized university, registered in the School of Graduate Studies, wishing to pursue studies in the field of electrical engineering or computer engineering. Value: approximately \$2,000.

Princess Margaret Hospital Foundation Graduate Fellowships in Cancer Research

For award to registered graduate students in degree programs who are studying with University of Toronto faculty members located at the Ontario Cancer Institute and who are engaged in cancer research. Value: variable.

OSOTF

John L. Provan Fellowship in Surgical Education

Various donors have provided funds to offer an annual award to a surgical graduate student needing financial assistance to take formal training leading to a graduate degree in education at the University of Toronto. Value: variable.

OSOTF

The Manuel and Anne Belle Pusitz Graduate Fellowship

The Manuel E. Pusitz Estate provides an annual fellowship to a full-time student in financial need who has demonstrated success in the first year of a master's program in the Graduate Department of Nursing Science and is enrolling in a second year of full-time study. Preference may be given to an international student. Apply to the Graduate Department of Nursing Science by March 31.

Shahid U. H. Qureshi Memorial Scholarship

Various donors have endowed funds to provide a scholarship for award to an outstanding graduate student in the area of communications, on the recommendation of faculty in the Communications group in the Department of Electrical and Computer Engineering.

David Rae Graduate Student Scholarship

Awarded on the basis of financial need to graduate students studying in the areas of leukemia and lymphoma at the Faculty of Medicine. Value: annual income.

OSOTF

Ewing Rae Graduate Scholarship

Awarded to a doctoral-stream student studying electrical engineering in the Department of Electrical and Computer Engineering. Academic achievement and financial need considered, as well as the student's intention to work or conduct further study in Canada.

W. H. Rapson Memorial Award

Various donors have contributed to a fund, the annual income of which is given to a graduate student in the Pulp and Pulp Research Centre, on the basis of academic merit. Awarded

on the recommendation of the Department of Chemical Engineering and Applied Chemistry.
OSOTF

Ray Reiter Graduate Award in Computer Science

Awarded on the recommendation of the Department of Computer Science to a graduate student in the area of artificial intelligence. The award is based on financial need. Value: annual income.
OSOTF

Lawrence V. Redman Fellowships in Chemistry

Eligible students must be completing their undergraduate training and entering a program of study and research in Chemistry leading to an advanced degree. Two fellowships of \$2,500 each are awarded for an academic session and preference is given to graduates from universities other than Toronto.

Charles Reeve Memorial Bursary

Established by the family of the late Charles Reeve, this bursary is awarded to an M.Sc. student in the Department of Physical Therapy. Apply through the Department.

Carl Reinhardt Fellowship in Astronomy

This award is offered to students proceeding to a graduate degree in Astronomy and Astrophysics. One or more awards is available up to the value of the annual income.

Russell A. Reynolds Graduate Fellowship in Thermodynamics

Mr. Russell A. Reynolds has generously endowed a fellowship for doctoral stream students registered in the Department of Mechanical and Industrial Engineering who are engaged in thermodynamics research. Application not required.

Right Track CAD Graduate Scholarships

Three scholarships are awarded annually to graduate students registered in the Department of Electrical and Computer Engineering. Preference is given to students concentrating their studies in Programmable Logic. Academic achievement is the main criterion. Application not required. Value: annual income.

Edna Margaret Robertson Scholarship

Endowed funds from the estate of Edna Margaret Robertson provide for two annual awards of approximately \$500 each to new students in the Department of Ecology and Evolutionary Biology whose research topic is related to conservation of fish or wildlife in Ontario.

Malcolm Slingsby Robertson Fellowship in Mathematics

The Venerable John M. Robertson and others have endowed funds to provide an annual fellowship for award, on the basis of academic merit, to one or more graduate students in the Department of Mathematics.

OSOTF

Norman Stuart Robertson Fellowships

These awards are made annually to graduate students in the sciences to the value of the annual income.

Peter Rodney Book Prize in Combinatorics or a Related Field

Family, friends, and colleagues of Peter Rodney have endowed a fund, the income of which provides an annual award to be given to the best presentation by a Department of Mathematics graduate student at the Ontario Combinatorics Workshop.

Edward S. Rogers Sr. Graduate Scholarships

Edward S. Rogers Jr. has endowed funds for award, based on academic merit, to a graduate student in the Department of Electrical and Computer Engineering. Other factors for consideration include leadership qualities, interest in community service, and financial need. No application required.

Edward S. "Ted" Rogers Fellowship

Edward S. Rogers has donated funds to the Department of Electrical and Computer Engineering to provide a \$2,000 award offered annually to an outstanding graduate student in the first year of graduate work in the communications area.

J. Douglas Roseborough Prize in Zoology

Friends of the late J.D. Roseborough have established a fund, the annual income of which is awarded to a master's or doctoral student in the Department of Ecology and Evolutionary Biology. Financial need and academic merit will also be considered. The award may be held once. Apply to the Associate Chair, Graduate Affairs, Department of Ecology and Evolutionary Biology.

OSOTF

G. B. Rosenfeld Annual Book Award

Mr. G. B. Rosenfeld has endowed a fund, the income of which is awarded to a meritorious student in Health Administration who best demonstrates academic excellence and dedication to public service.

Eila I. Ross Memorial Scholarship

Awarded to one graduate student in the Division of Biomedical Communications at the Faculty of Medicine. Preference given to first or second year students who demonstrate excellence and professionalism in quality of medical illustration and communication output, team participation and leadership skills, and commitment to the profession.

Dr. Klaus Rothfels Memorial Scholarship

Friends and former students of Dr. Klaus Rothfels have endowed funds to provide a scholarship to a graduate student in the Department of Botany or Cell and Systems Biology, on the basis of academic merit and financial need.

Rob Roy Forestry Graduate Travel Awards

Awarded on the basis of academic performance and financial need to Forestry graduate students in support of essential program-related travel and practical work.

John J. Ruffo Graduate Fellowship

Awarded on the basis of academic excellence to Faculty of Medicine graduate students enrolled in the M.D./Ph.D. program.

Robert and Francine Ruggles Family Graduate Fellowship

Awarded to Faculty of Medicine graduate students enrolled in the M.D./Ph.D. program on the basis of academic excellence.

OSOTF

Monica Ryckman Bursary

Through a donation by Mrs. Monica Ryckman, bursaries are available to graduate students in the Department of Computer Science who are otherwise without support. Apply through the Graduate Secretary, Department of Computer Science.

Scace Graduate Fellowship in Alzheimer's Research

Awarded on the basis of financial need and academic merit to graduate students conducting research in the field of Alzheimer's disease. Apply to the Faculty of Medicine. Value: annual income.

OSOTF

Scace Graduate Fellowship in Prostate Cancer Research

Awarded on the basis of financial need and academic merit to graduate students. First preference is to graduate students conducting research in the field of prostate cancer with the Fleck/Tanenbaum Chair in Prostatic Diseases.

Second preference is to graduate students doing research in the field of prostate cancer. Apply to the Faculty of Medicine. Value: annual income.

OSOTF

Robin Schaffer Graduate Scholarship

Various donors have provided funds to offer an annual award of \$500 to honour the former Director of the Division of Occupational Therapy, Dr. Robin Schaffer. The scholarship is awarded, on the basis of academic merit, to a graduate student with an occupational therapy background entering the first year of the master's program in Rehabilitation Science at the University of Toronto. Financial need may also be considered.

Wilfred George Scott Fellowship in Gerontology

The estate of the late Wilfred George Scott provides for a fellowship of approximately \$6,000 for award to a graduate student for gerontological (differentiated from geriatric) research, with particular emphasis on those areas which are psychological or socio-economic in scope rather than medical and clinical. Apply to the Institute for Life Course and Aging by July 15.

Searle Scholarship

Through an annual donation from Searle Canada Inc., a scholarship is available, on the basis of academic merit, to a full-time incoming graduate student enrolled in the Department of Molecular and Medical Genetics (microbiology program). To be considered for a Searle Scholarship, students must apply for an MRC or NSERC award. Value: approximately \$15,000 plus \$1,000 travel allowance.

Senior Alumni Association Prize in Cell and Systems Biology

Awarded on the basis of financial need to a master's or doctoral student in the Department of Cell and Systems Biology. Academic merit will also be considered. Application required. Value: annual income.

OSOTF

Senior Alumni Association Prize in Ecology and Evolutionary Biology

Senior Alumni Association of the University of Toronto has endowed funds to provide a prize for graduate students in the Department of Ecology and Evolutionary Biology (master's or Ph.D. level) on the basis of financial need. Academic merit is also considered. Application required.

OSOTF

Dick and Peggy Sharpe Student Fellowship in Immunology

The Wellesley Hospital Foundation has provided funds for award, on the basis of financial need, to graduate students in the Immunology Department in the Faculty of Medicine conducting research at the Wellesley Hospital. Value: variable.

OSOTF

Harry C. Sharpe Fellowship

This award, given by the late Harry Sharpe in honour of Alcoholics Anonymous, is awarded to graduate students in the Faculty of Medicine whose studies and research are in the fields of addiction, substance abuse, and/or gerontology. Value: annual income.

Robert Shelley Graduate Scholarship

Robert Shelley has endowed funds for an award, on the basis of academic merit, to an outstanding graduate student in the Department of Astronomy and Astrophysics. Preference given to graduate students conducting research in extra-solar planets. Financial need may also be considered. No application required. Value: annual income.

Theodore I. Sherman Graduate Award in Neuroscience

Revenue Properties Company Limited have generously provided funding for award to graduate students in the Centre for Research in Neurodegenerative Diseases. If a suitable student is not found in any given year, the award will be broadened to include other Faculty of Medicine graduate students in the field of neuroscience. Apply to the Faculty of Medicine. Value: variable.

OSOTF

Meredith and Malcolm Silver Scholarship in Cardiovascular Studies

Awarded, on the basis of financial need, to the graduate student with a demonstrated interest in cardiovascular research who maintains or achieves honours standing during his or her residency with the Department of Laboratory Medicine and Pathobiology. Value: annual income.

OSOTF

Siminovitch-Salter Award

The Institute of Medical Science, Mount Sinai Hospital, and U of T's Department of Surgery have endowed funds to provide an annual award to a doctoral student enrolled in the Institute of Medical Science who has displayed outstanding scholarly contribution.

Marguerite Harland Smith Graduate Award in Rehabilitation Science

Dr. Carlton Smith has provided funds, the annual income of which is awarded to a full-time physical therapy graduate student, on admission to the Graduate Department of Rehabilitation Science. The student must be conducting rehabilitation research in neuroscience field. Based on financial need and academic achievement. Apply to the Graduate Department of Rehabilitation Science.

Marguerite Harland Smith Student Scholarships

The estate of Carlton Smith has established an annual award, given on the basis of financial need, to the student obtaining the highest standing in the Gross Anatomy and Neuroanatomy courses. Value: up to the value of one year's tuition. Apply to Graduate Department of Physical Therapy.

OSOTF

Carlton and Marguerite Smith Medical Research Fellowship

The estate of Dr. Carlton Smith has established an annual fellowship for one or more graduate students who demonstrate interest in an academic career in anatomy or neuroanatomy. Preference is given to graduate students who are enrolled in or have completed two or more graduate level courses in anatomy or neuroanatomy and who are committed to gaining experience in teaching anatomy during their graduate studies program. The fellowship is awarded on the basis of financial need. Apply to the Division of Anatomy. Value: annual income.

OSOTF

Viola Carless Smith Research Fellowship in Electrical and Computer Engineering

Professor K. C. Smith has endowed funds, the income of which is to be awarded to a graduate in electrical engineering who enrolls in the School of Graduate Studies for further work in this field, specifically in electronics or computer related work. Award is based on financial need; academic merit is also considered.

OSOTF

John Robert Gilkison Smyth Mathematics Scholarship

Funds from the estate of the late John Robert Gilkison Smyth provide an annual scholarship for award, on the basis of academic merit, to a graduate student enrolled in the Department of Mathematics.

Lois Snelling Physical Therapy Bursary

Lois Snelling has donated funds to provide awards, on the basis of financial need, to physical therapy doctoral stream students enrolled in the Graduate Department of Rehabilitation Science in the Faculty of Medicine. Apply to the Department of Rehabilitation Science.

Social and Administrative Pharmacy Professors' Award for Thesis Research

Awarded to students in the Graduate Department of Pharmaceutical Sciences pursuing a degree in the area of Social and Administrative Pharmacy. Application required.

Social Science and Humanities Graduate Award

Faculty, staff, alumni, and friends of the Faculty of Physical Education and Health have established an award for one or more students enrolled in the Exercise Sciences graduate program. Awarded on the basis of academic merit determined by marks, publications, presentations, and research. Apply to Faculty of Physical Education and Health. Value: annual income.

OSOTF

Speech Foundation of Ontario Award

Awarded to a student in financial need in the Department of Speech-Language Pathology.

OSOTF

Morey Speigel Memorial Prize—OSOTF

Awarded on the basis of academic merit and financial need to a graduate student in the Faculty of Applied Science and Engineering. Value: annual income.

OSOTF

Paula Square Award of Excellence

Catriona Steele has endowed a fund, the income of which provides an award to a student in the professional Master of Health Science program in Speech-Language Pathology who receives the highest mark in Unit 8. The award is presented at the Annual Awards Breakfast. No application required.

St. George's Society of Toronto, Florence Nightingale Fellowships

Awarded to full-time or part-time student(s) in the second year of a master's-level nurse practitioner program. Award is given on the basis of financial need; academic merit is also considered. Preference is given to students who demonstrate work experience in northern or aboriginal communities and who plan to work in those communities following graduation.

Students must have resided in Ontario for 12 months prior to enrolment in the master's-level nurse practitioner program. Apply to Faculty of Nursing by June 30. Value: annual income.

OSOTF

Paul Starita Graduate Student Fellowships

An annual award is offered to Faculty of Medicine graduate students on the basis of financial need who are studying within the field of molecular medicine as it applies to prostate cancer. Value: annual income.

OSOTF

Department of Statistics Doctoral Award

Awarded along with a certificate of acknowledgment to a Ph.D. student in the Department of Statistics. The recipient must have demonstrated excellence in research in the area of statistics or probability. The award is usually given to a senior doctoral student, although all students in the doctoral program are eligible. Value: annual income.

Department of Statistics Graduate Fellowship

The estate of Reginald A. Blyth has established an endowment, the income of which provides a fellowship to a graduate student or students in the Department of Statistics. Recipients must be in good standing and making satisfactory progress towards their degree. Financial need may be taken into consideration. No application required. Value: one or more awards to the value of annual income.

Stelco Fellowship

A donation provided by Stelco Inc. supports students in the Department of Materials Science and Engineering conducting steel related research. Value: annual income.

OSOTF

Edward Christie Stevens Award in Nuclear Physics

Funds from the estate of the late Edward Christie Stevens provide a fellowship for a graduate student engaged in the field of nuclear physics. Value: variable.

Dr. Margaret L. Stoicheff Graduate Award in Speech-Language Pathology

Awarded to a graduate student in the Master of Health Science Professional Speech-Language Pathology program. The award is given on the basis of academic excellence and financial need. Apply to the Department of Speech-Language Pathology by the end of February. Value: annual income.

Hilbert and Reta Straus Award

In memory of Hilbert and Reta Straus, an endowment has been established in the Department of Cell and Systems Biology. The annual income of the endowment is awarded annually to a full-time graduate student who has demonstrated high research achievement in the fields of molecular or cellular biology.

Surgical Alumni Fellowship in Surgical Science

Awarded to a graduate student in financial need in the Department of Surgery to allow him or her to undertake formal training leading to a graduate degree in biomedical research or related field. Value: annual income.

OSOTF

Dr. R. B. Sutherland Memorial Award

Friends, relatives, and colleagues of Dr. 'Sandy' Sutherland have endowed funds, the income of which provides an annual award to a graduate student in the Graduate Department of Public Health Sciences who achieves the best performance in the occupational epidemiology course CHL 5410H and who is registered in a program of study directly relevant to occupational health or engaged in occupational health research.

Marlene Ruth Swirsky Memorial Award

Awarded to an M.S.W. student on the basis of financial need and academic merit. Preference is given to students with demonstrated interest and commitment to the field of mental health. Apply to the Faculty of Social Work, Office of Student Services and Records. First award fall of 2002. Value: annual income.

Tamarack Graduate Award in Diabetes Research

Arthur Spoerri has generously provided funds, the annual income of which is awarded to a graduate student in the Faculty of Medicine connected with the Banting and Best Diabetes Centre. The award recognizes academic excellence and provides needed financial support for graduate students studying diabetes. Preference is given to students whose primary area of study is diabetic retinopathy. Apply to the Banting and Best Diabetes Centre.

OSOTF

Dr. Allan S. Tauber Graduate Student Award

Awarded on the basis of academic excellence to graduate students in the Faculty of Medicine doing research training in the Department of Urology.

Telus Entrance Scholarship

Awarded on the basis of academic merit to a full-time student entering the Master of Engineering in Telecommunications program in the Edward S. Rogers Sr. Department of Electrical and Computer Engineering. Canadian citizens, permanent residents, and international students are eligible.

Neil Duncan Thompson Memorial Scholarship

This award was established in 1996 through an endowment from the estate of Neil Thompson and from family and friends for a graduate student in the Department of Mechanical and Industrial Engineering whose thesis research is in the field of engines or motor vehicles. Value: annual income.

OSOTF

Hillian Titley Graduate Scholarship

Awarded on the basis of financial need to a graduate student in good standing who is interested in gerontological nursing, especially the care of people with dementia. Academic merit will also be considered.

OSOTF

Alan Tonks Scholarship in Transportation Engineering

Friends and colleagues of Alan Tonks, former Chair of Metropolitan Toronto, have generously endowed a scholarship for master's and Ph.D. students in the Transportation Engineering program of Civil Engineering. Scholarships will be awarded to incoming first year students and may be renewed – one year for master's, two years for Ph.D. Awarded on the basis of financial need; academic merit is also considered. Value: variable.

OSOTF

The Toronto Hospital Foundation Graduate Student Scholarship in Urological Research

The Toronto Hospital Foundation provides a fellowship, awarded annually, to a registered student engaged in urological research under the guidance of University of Toronto faculty members located at the Toronto Hospital (or its successor). Value: annual income.

OSOTF

Toronto Rehabilitation Institute Student Scholarships

Available to students in financial need enrolled in any faculty at the University of Toronto who are either in training at the TRI or at another suitable institution, and whose studies will further the strategic directions of the TRI. Contact

the Office of the Associate Dean, Graduate and Inter-Faculty Affairs, Faculty of Medicine for further guidelines and application information.

The Edward Jarvis Tyrrell Fellowship

Funds from the estate of Violet Louise Tyrrell, in memory of her husband, provide a fellowship, awarded annually on the basis of academic merit, to a full-time research graduate student in Chemical Engineering and Applied Chemistry.

Unilever/Lipton Graduate Fellowships in Neurosciences

Available to graduate students in the Faculty of Medicine who are studying in the area of neurosciences at the Toronto Hospital. Value: annual income.

OSOTF

Marjorie Van Veen Graduate Scholarship in Human Nutrition

Awarded to graduate students in the Department of Nutritional Sciences, Faculty of Medicine. Preference given to students doing graduate research or training in human nutrition.

The Eugene Vayda Scholarship Award

Awarded to an M.H.Sc. or M.Sc./Ph.D. student in the Department of Health Policy, Management and Evaluation demonstrating excellence and promise in program planning and evaluation within the broadly defined area of service integration. Value: annual income.

The Richard Venn and Carol Mitchell Graduate Student Fellowships in Women's Health Research

Awarded on the basis of financial need to students in Women's Health Research, supervised by faculty members at Mount Sinai Hospital and/or its Samuel Lunenfeld Research Institute.

OSOTF

Douglas Verrier Memorial Bursary

Awarded to graduate students in the Department of Physical Therapy on the basis of financial need. Preference given to students who have expressed special needs, whether of health hardship or a family issue. The bursary is awarded at the discretion of the Chair of the Department of Physical Therapy in consultation with one other faculty member. Application required. Value: annual income.

OSOTF

Molly Verrier Award

Awarded to a graduating M.Sc. student in the Department of Physical Therapy who has achieved high academic standing, who actively participates to advance the practice of Physical Therapy, and to empower classmates.

Vietnamese-Canadian Community Graduate Award in Zoology

Awarded on the basis of academic merit to a student studying in animal biology. Students must have maintained an overall A- average over the last two years of study at the post-secondary level. Application required; submit to the Associate Chair, Graduate Affairs, Department of Cell and Systems Biology.

OSOTF

Vision Science Research Graduate Student Awards

Two types of awards are available:

1. Awarded to graduate students involved in vision research whose supervisors are members of the joint University of Toronto/Toronto Hospital vision science research program. Recipients are selected on the basis of financial need by a committee and the Chair of the Department of Ophthalmology
2. Awarded to graduate students enrolled in the clinician scientist program or the M.D./Ph.D. program of the Faculty of Medicine. Academically qualified recipients are selected on the basis of financial need by a committee chaired by the Dean of the Faculty of Medicine. Apply to the Vice-Dean, Research, Faculty of Medicine. Amount: variable.

OSOTF

Seymour H. Vosko Memorial Prize

Family and friends of Seymour H. Vosko have endowed a fund to establish an award for a female graduate student in the Department of Physics.

OSOTF

E. M. Walker Graduate Award in Biodiversity

Dr. Rosemary Speirs has endowed funds to provide an award to a graduate student in animal biodiversity, on basis of academic merit and financial need. Application required.

OSOTF

Enid Walker Graduate Student Awards in Women's Health Research

Awarded on the basis of financial need to a minimum of two graduate students conducting research in conjunction with the Centre

for Research in Women's Health. Application required.

OSOTF

Walker/Marshall Prize

Awarded on the recommendation of the Department of Medical Biophysics to doctoral students on the basis of financial need. Preference given to students in their final year of study. Selection is based on the uniqueness and significance of work, academic and publication record, and contribution to student life in the Department. Application is by nomination to the Student Affairs Committee. Value: annual income.

OSOTF

The Wallberg Research Fellowships

The Wallberg Research Fellowships, each with a value of \$2,400, are open to graduates of a recognized university who are pursuing advanced study and research in any branch of engineering in the School of Graduate Studies.

Shirley A. Ward Scholarship in Occupational Therapy

The estate of Dr. Stanley H. Ward has established an annual scholarship for one or more incoming master's students enrolled in the Department of Occupational Therapy who are Canadian citizens. Preference is given to students who demonstrate an interest in working with persons who are physically and/or mentally incapacitated. Application not required. Value: annual income.

Edwin Walter Warren Graduate Student Awards

Awarded to one or more graduate students in the Department of Chemistry on the basis of academic merit and financial need. Value: annual income.

OSOTF

Bert Wasmund Graduate Fellowship in Sustainable Energy Research in the Department of Chemical Engineering

Bert Wasmund established a fellowship for doctoral stream graduate students (on the basis of academic merit) in the Department of Chemical Engineering and Applied Chemistry specializing in the recovery and utilization of sustainable energy derived from the sun. Preference given to students conducting research power generation from solar cells and wind turbines systems for the efficient use of sustainable derived thermal and electric energy, and energy storage by batteries and other means. Application not required.

Bert Wasmund Graduate Fellowship in Sustainable Energy Research in the Department of Mechanical and Industrial Engineering

Bert Wasmund established a fellowship for doctoral stream graduate students (on the basis of academic merit) in the Department of Mechanical and Industrial Engineering specializing in the recovery and utilization of sustainable energy derived from the sun. Preference given to students conducting research in the areas of power generation from solar cells and wind turbines systems for the efficient use of sustainable derived thermal and electric energy, and energy storage by batteries and other means. Application not required.

Jeannette Elizabeth Watson Memorial Fellowship

Awarded on the basis of academic merit to a graduate student in the Department of Nursing Science specializing in medical or surgical nursing. Apply to the Faculty of Nursing Awards Committee by March 31. Value: annual income.

Beverly Wedemire Scholarship

Family, friends, and colleagues of Beverly Wedemire have donated funds for an annual \$500 scholarship for award, on the basis of academic merit, to a graduate student engaged in the area of cancer research. The award was established in honour of Beverly Wedemire, an administrative staff member in the School of Graduate Studies for over 20 years.

Walter and Anne White Graduate Scholarship in the Department of Physics

Estate of Louise Ann White provides funds for an award to a graduate student in the Department of Physics. No application required. Value: annual income.

Dalton Whitebread Scholarship Fund

Provides graduate student support in the Faculty of Medicine on the basis of financial need. Prioritized by the Dean of Medicine. Apply to the Faculty of Medicine. Value: annual income.

Leon and Blossom Wigdor Award for Studies in Aging

Dr. Wigdor has established a fund that provides an annual award of \$2,000 to a graduate student studying the psychological, social, or behavioural sciences of aging. The award is made on the basis of financial need and academic merit. Preference is given to students enrolled in the Collaborative Program in Aging

and the Life Course.

OSOTF

Judy Willcocks Memorial Bursary

This bursary honours Judy Willcocks, a graduate of the 1961 class of Physical and Occupational therapy, who adapted to lifelong chronic illnesses with courage and grace. Awarded to a full-time Rehabilitation Science student.

OSOTF

Glynn Thomas Williams Fellowship

Through a generous gift provided by Mr. Glynn Thomas Williams, this award is given to a first-year doctoral student in the Department of Mechanical and Industrial Engineering whose research has potential for commercial application that could benefit Canadians. Value: annual income.

OSOTF

Elizabeth Ann Wintercorbyn Awards in Botany

An endowment from the estate of the late Elizabeth Ann Wintercorbyn provides two awards to graduate students in the Department of Cell and Systems Biology. One award is made annually to a student engaged in research which is likely to prove beneficial to agriculture, and one award is made for research beneficial to medicine. Each award is valued at half of the annual income.

Carin Wittnich Award of Excellence for Teaching Assistants

Awarded to the top-ranked teaching assistant in the Department of Physiology's graduate Ph.D. or master's program for the past academic year. The award is based on evaluations by undergraduate students and the Teaching Coordinator.

Wolfond Scholarship Program in Wireless Information Technology

Awarded on the basis of academic merit to graduate students in the Department of Computer Science pursuing research in areas related to wireless information technology. Scholarship recipients will be known as Wolfond Fellows. Value: annual income.

Institute for Work and Health Graduate Fellowship

Awarded on the basis of financial need to graduate students who are studying within the broad area of work and health.

OSOTF

Ramsay Wright Scholarship

Awarded to graduate student in the Department of Ecology and Evolutionary Biology who is engaged research in zoology. Value: annual income.

Ramsay Wright Scholarship in Cell and Systems Biology

Awarded to a graduate student in the Department of Cell and Systems Biology who is engaged in research in zoology. Award value is determined by annual endowment income. Application not required.

The Alan Wu Research Award

Friends and associates of the late Dr. Alan Wu have endowed funds to provide an award in his honour. A minimum cash award of \$200 is granted to the graduate student presenting the best poster at the Scientific Day of the Institute of Medical Science.

Xerox Research Centre of Canada Graduate Award in Chemistry

The Xerox Research Centre of Canada provides two awards to graduate students in the Department of Chemistry. One of the awards must be made to a student in the field of materials chemistry related to information and computer technology in line with the business interest of the Xerox Research Centre of Canada. Financial need and academic merit are also considered.

OSOTF

Allen Yen Scholarship

Awarded to a doctoral-stream student registered in the Edward S. Rogers Sr. Department of Electrical and Computer Engineering studying electrical engineering. This student must display high academic achievement and demonstrate financial need. Apply to the Department of Electrical and Computer Engineering. Value: annual income.

May Yoshida Memorial Fellowship

Through the generosity of friends and colleagues of Professor May Yoshida, an award, based on academic merit, is available to a full-time incoming doctoral student in the Graduate Department of Nursing Science.

Yow Kam-Yeun Graduate Scholarship in Diabetes Research

For award, on the basis of financial need, to a graduate student in the Faculty of Medicine connected with the Banting and Best Diabetes Centre. Value: annual income.

OSOTF

James R. Zimmerman Memorial Graduate Award

Susan Zimmerman, family, and friends have endowed a fund which awards a student in the first year of a Ph.D. program affiliated with the Lassonde Institute. Successful student must be a member of the Lassonde Institute. The award is made on the basis of outstanding academic record and demonstrated ability for advanced research. No application required. Value: annual income.

Zindart Graduate Award for Nursing Care of Persons with Cancer

Awarded to a full-time student entering the final year or a part-time student completing at least 50% of the program requirements. The recipient must demonstrate academic excellence in courses related to Oncology Nursing. Apply by letter addressing the criteria and include one letter of reference from a faculty member.

Zoology International Scholarship

Professor Yoshio Masui has endowed funds to provide for two annual scholarships of approximately \$750 each to foreign students registered as full-time graduate students in the Department of Cells and Systems Biology. Awarded on the basis of academic performance and financial need.

Zoology Sesquicentennial Graduate Award

Awarded on the basis of academic merit to a full-time graduate student in the Department of Cell and Systems Biology. Financial need may also be considered. Value: annual income.

Zophia Nurse Practitioner Fellowship

Awarded, on the basis of academic merit and financial need, to master's students and/or post-master's students in the Graduate Department of Nursing Science who are entering or continuing their study as Acute Care Nurse Practitioners. Apply to the Faculty of Nursing Awards Committee by March 31. Value: annual income.

OSOTF

2. FELLOWSHIPS AWARDED BY GOVERNMENT AND NON-GOVERNMENT AGENCIES

(Note: Deadlines subject to change)

Listed below is a sampling of scholarships offered by external sources. Please visit What's New @ SGS, www.sgs.utoronto.ca/whatsnew.asp, for a listing of other external awards.

You might also visit Community of Science, www.cos.com, a database containing nearly

400,000 research funding programs. Access the database from any computer through my.access; no password required.

For more information about the following awards, visit the Web sites of program sponsors. Although every effort is made to update this section each year, the School of Graduate Studies cannot be held responsible for the accuracy of information contained here.

GOVERNMENT AGENCIES

Canada Graduate Scholarships

Canada Graduate Scholarships (CGS) provide financial support to outstanding graduate students pursuing master's or doctoral studies in a Canadian university. Across Canada, there are 2,000 doctoral awards (each valued at \$35,000 annually) and 2,000 master's awards (each valued at \$17,500 annually).

CGS are awarded through national competitions held by three granting agencies: CIHR, NSERC, and SSHRC. Refer to sections below on other awards offered by these agencies. With the exception of master's CGS in SSHRC and CIHR, the award competitions are held at the same time as the NSERC/SSHRC/CIHR awards.

CIHR Doctoral Research Awards

Doctoral Research Awards are intended to provide special recognition and support to students pursuing a doctoral degree in the health sciences in Canada. Students are expected to have an exceptionally high potential for future research achievement and productivity. The program is open to Canadian citizens and permanent residents of Canada. Only those students engaged in full-time research training in a Canadian graduate school are eligible for support. At the time of application, students must have completed at least 12 months of graduate study at the master's or Ph.D. level and have been registered for no more than 26 months as a full-time student in a doctoral program. Deadline: October 15. Late or incomplete applications will not be considered. Awardees receive an annual stipend of \$20,000 for awards held inside Canada and \$25,000 for awards held outside Canada. Program guidelines and applications available at www.cih.ca.

International Scholarship Programs

Under this plan, various governments provide scholarships, mainly for postgraduate study, tenable in their countries by students from Canada, or vice versa. The emoluments are intended to cover expenses of travel, living, and tuition during tenure of the scholarship.

Details are available from the relevant government office in the applicant's own country or by visiting www.scholarships.gc.ca.

Sir John A. Macdonald Graduate Fellowship in Canadian History

The Government of the Province of Ontario makes available each year one fellowship of \$8,500. The award is tenable for three years, making its maximum value \$25,500. The fellowship is awarded to a student preparing to enter a Ph.D. program, but in exceptional circumstances may be awarded to a student preparing to enter a master's program. This fellowship is tenable only at an Ontario university and is awarded to a student who is a Canadian citizen resident in Ontario, undertaking graduate studies with a major emphasis on Canadian history.

Deadline: mid-March for students not currently registered in an Ontario university. Students who are currently registered should consult their graduate unit. Information and application at Web: osap.gov.on.ca/eng/not_secure/MAC.htm.

Department of National Defence Security and Defence Forum Scholarship Programs

The Department of National Defence has established a number of scholarships within the framework of strategic studies of relevance to current and future Canadian security. Studies may relate to any of the economic, political, military, technological, or sociological dimensions of national security. Applicants must be Canadian citizens.

Ph.D. scholarships are valued at up to \$20,000 and M.A. scholarships up to \$10,000.

Closing date for receipt of applications is February 1. For further information and submission of application forms, contact the Canadian Awards Program, International and Canadian Programs Division, Association of Universities and Colleges of Canada (AUCC), Suite 600, 350 Albert Street, Ottawa, Ontario, K1R 1B1. Telephone: (613) 563-1236, e-mail: awards@aucc.ca, Web: www.aucc.ca/scholarships/open_e.html.

Natural Sciences and Engineering Research Council of Canada

NSERC offers postgraduate awards to assist students pursuing graduate study and research leading to advanced degrees. Post-doctoral fellowships for those wishing to add to their experience by specialized training are also available. These scholarships and fellowships

are awarded on the basis of high scholastic achievement and evidence of research skill.

All correspondence should be addressed to Natural Sciences and Engineering Research Council of Canada, 350 Albert Street, Ottawa, Ontario, K1A 1H5. Awards are restricted to Canadian citizens and permanent residents. Value: \$17,300–21,000. Application deadline: early October. Web: www.NSERC.ca.

Ontario Graduate Scholarships

The Government of the Province of Ontario provides 2,000 graduate scholarships tenable at Ontario universities. Sixty awards are available to international students. These scholarships are available to students in all disciplines and are tenable only at Ontario universities. Value: \$15,000 for a three-session academic year or \$10,000 for two sessions. The Province of Ontario contributes two-thirds and the University provides one-third (for the latter, see OGS listing under Awards Offered by the University). Application forms may be obtained from your graduate unit or from Student Support, Ministry of Education and Training, P.O. Box 4500, Fourth Floor, 189 Red River Road, Thunder Bay, Ontario, P7B 6G9, or call 1-800-465-3957. Submit applications to your graduate unit by the October deadline. Web: osap.gov.on.ca/eng/not_secure/OGS.htm.

Ontario–Quebec Exchange Fellowships

The two provincial governments will respectively award up to ten fellowships, with a value of \$10,000 each for master's-level students and \$12,000 for doctoral students. Ontario residents may obtain application forms from the Graduate Studies Office of any Ontario university or by contacting the Ontario–Quebec Exchange Fellowship Program, Student Support, Ministry of Education and Training, P. O. Box 4500, Fourth Floor, 189 Red River Road, Thunder Bay, Ontario, P7B 6G9. Toll free telephone: 1-800-465-3957. Deadline: end of January. Web: osap.gov.on.ca/eng/not_secure/OQ.htm.

Public Safety and Emergency Preparedness Canada Research Fellowships Program in Honour of Stuart Nesbitt White

A fellowship to support research and training in disasters and emergency planning in Canada is offered for graduate study in any appropriate department. This fellowship is valued at \$13,500 (Canadian funds) per annum. Apply by March 31 to International and Canadian Programs Division, Association of Universities and Colleges of Canada (AUCC), Suite 600, 350 Albert Street, Ottawa, Ontario, K1R 1B1. Telephone: (613) 563-1236, e-mail:

awards@aucc.ca, Web: www.aucc.ca/scholarships/open/emergency_e.html.

Social Sciences and Humanities Research Council of Canada

SSHRC offers fellowships at the doctoral and post-doctoral level to students in the Humanities and Social Sciences disciplines. Detailed information is available at www.sshrc.ca. Awards are restricted to Canadian citizens and permanent residents. Value: \$21,000 per academic year. Application deadline is set by graduate units in late September/early October.

NON-GOVERNMENT AGENCIES

Note: Deadlines subject to change

Viscount Bennett Fellowship

Under the terms of a deed of gift to The Canadian Bar Association from The Right Honourable Viscount Bennett, the Viscount Bennett Trust Fund was established. Up to \$40,000 may be paid annually as a fellowship for graduate study in law in an institution of higher learning to be approved by the committee. The fellowship is open to a Canadian citizen who has graduated from an approved law school in Canada or who at time of application is pursuing final year studies as an undergraduate student at an approved law school.

Applications must be submitted to the Senior Director of Communications, the Canadian Bar Association, Suite 902, 50 O'Connor Street, Ottawa, Ontario, K1P 6L2 by November 15. Telephone: (613) 237-2925 or 1-800-267-8860 ext. 154, e-mail: stephenh@cba.org, Web: cba.org/CBA/Awards/Viscount_bennett/.

The Canadian Federation of University Women Fellowships

Margaret McWilliams Pre-doctoral Fellowship	\$12,000
Dr. Marion Elder Grant Fellowship	\$ 10,000
Beverley Jackson Fellowship	\$ 2,000
Ecole Polytechnique Commemorative Award	\$ 7,000
Alice E. Wilson Award	\$ 5,000
CFUW Memorial Fellowship	\$ 10,000
Bourse Georgette Lemoyne	\$ 7,000
Canadian Home Economics Association Fellowship	\$6,000
Ruth Binnie Fellowship	\$6,000
Elizabeth Massey Award	\$2,000
Dr. Marion Elder Grant Fellowship	\$10,000
Margaret Dale Philip Award	\$3,000

Students must be Canadian citizens or must have held permanent resident status for one year prior to submitting application.

Further information may be obtained from the Canadian Federation of University Women, 251 Bank Street, Suite 600, K2P 1X3, Telephone: (613) 234-8252; Web: www.cfuw.org.

Applications are available on Web site in May and must be submitted before November 1.

Canadian Respiratory Health Professionals Fellowships and Research Grants (CRHP)

This award is available to CRHP members for master's or post-master's study. Application should be made to The Canadian Lung Association, 3 Raymond Street, Suite 300, Ottawa, Ontario, K1R 1A3, before November 1. Telephone: (613) 569-6411. Web: www.lung.ca/

Delta Kappa Gamma World Fellowship

The Delta Kappa Gamma Society International is an organization of professional women in the field of education. A fellowship for graduate study is offered to a female graduate student in the amount of US\$4,000. To be eligible an applicant must be a female student from a country other than Canada or the United States studying under a student authorization. Applications are available from the Fellowships and Loans Office, 63 St. George Street, Toronto, Ontario, M5S 2Z9. Deadline: early December.

Graduate Scholarship for Canadian Women Kappa Kappa Gamma Foundation of Canada

Awarded to a full-time female Ph.D. student in any discipline who is a Canadian citizen. Application available at www.kappakappagamma.org. Deadline: January 31. Value \$3,000.

Naomi Grigg Fellowship

The fellowship is for full-time students in a master's or Ph.D. program in an area of gerontology. Maximum value: \$7,500. For further information, contact Soroptimist International of Toronto, 135 Donlea Drive, Toronto, Ontario, M4G 2M7. Telephone: (416) 423-5796. Deadline: March 31.

Heart and Stroke Foundation Masters Fellowship

The Heart and Stroke Foundation of Ontario offers a number of master's studentship awards to highly qualified candidates who have completed or are in the last year of a baccalaureate degree. Master's studentships are tenable at Ontario universities to Canadian citizens and permanent residents of Canada studying in Ontario who have achieved a minimum of 80% on course work completed in the last two years

of study. Each award is granted for up to two years and is valued at \$18,000 per year. Applications and further information are available at www.hsf.ca/research/guidelines/prov/on_hsf.html

IODE Scholarships

A maximum of nine scholarships are awarded to students who are Canadian citizens, hold a first degree from a recognized Canadian university, and are enrolled in a doctoral program. Value: \$12,000 for study in Canada; \$15,000 for study overseas within the Commonwealth. Deadline: December 1. Information and applications available from the Head Office, IODE, Suite 254, 40 Orchard View Boulevard, Toronto, Ontario, M4R 1B9, (416) 487-4416, e-mail: iodecanada@sympatico.ca, and the Fellowships and Loans Office, 63 St. George Street, Toronto, Ontario, M5S 2Z9.

MacKenzie King Travelling Scholarships and MacKenzie King Open Scholarship

In the will of the late Right Honourable William Lyon MacKenzie King, provision was made to award annually a number of MacKenzie King Travelling Scholarships and one MacKenzie King Open Scholarship.

The MacKenzie King Travelling Scholarships are open to graduates of any Canadian university for study either in the United States or the United Kingdom in the field of international or industrial relations (including the international or industrial aspects of law, history, politics, economics).

The MacKenzie King Open Scholarship is open to graduates of any Canadian university for study in Canada or elsewhere in any field.

Students are required to apply by February 1 to the Canadian university from which they have received, or will receive, their most recent degree. Applications are available from www.mkingscholarships.ca, and the School of Graduate Studies, Fellowships and Loans Office, 63 St. George Street, Toronto, Ontario, M5S 2Z9.

Registered Nurses Foundation of Ontario (RNFO)

The RNFO Foundation offers scholarships for graduate studies in nursing education. For scholarship details contact the RNFO Foundation at 1185 Eglinton Avenue East, Suite 104, Toronto, Ontario, M3C 3G3, by March 15. Telephone: (416) 426-7127. Web site: www.rnfoo.org.

Toronto Rehab Scholarships and Awards

A number of scholarships are available. Visit www.torontorehab.on.ca.

3. LOANS, GRANTS, AND OTHER BURSARIES

Graduate Students' Emergency Loan Fund

This fund has been established in the School of Graduate Studies to assist full-time students to meet financial problems which could not have been anticipated. Full information is available from the Fellowships and Loans Office, 63 St. George Street.

Ontario Student Assistance Program

OSAP applications are available on the Web: osap.gov.on.ca. Also from Admissions and Awards, University of Toronto, 315 Bloor Street West, Toronto, Ontario, M5S 1A3, telephone: (416) 978-2190 and the School of Graduate Studies.

School of Graduate Studies Travel Grants

The grants are available to a limited number of doctoral students in the humanities (including the humanistic side of the Social Sciences) for research or study.

Application forms are distributed to graduate coordinators in March, and additional forms and information may be obtained from the Fellowships and Loans Office, 63 St. George Street, Toronto, Ontario, M5S 2Z9. Applications available in March, deadline: mid-April.

University of Toronto Bursary Assistance

Bursaries are available to full-time graduate students on the basis of need. Special or part-time students are not eligible. Funding is limited and is specifically for emergencies arising from unforeseen circumstances. First year students are normally not eligible for consideration. Students with scholarship support or who are eligible for OSAP are normally not eligible for bursary funding. Application is through the departmental graduate coordinator.

Scholarships and Bursaries for Students with Disabilities

A number of scholarships and bursaries are available for students with disabilities. For more information, visit www.sgs.utoronto.ca/current/financial/resources/disabilityresources.asp.

4. TEACHING AND RESEARCH ASSISTANTSHIPS

For information concerning teaching and research assistantships, write directly to the chair of the department concerned giving full particulars of academic training and experience.

5. STUDENT EXCHANGE PROGRAMS

A number of student exchange programs are available to graduate students. For the full listing, visit the International Student Exchange Office Web site: www.utoronto.ca/student.exchange/office.html.

Intercollegiate Office	416-978-3443
Sports Medicine Clinic	416-978-4678
Varsity Centre	416-978-7388

Web: www.athletics.utoronto.ca/

The Faculty of Physical Education and Health (FPEH) offers programs for people at all levels of physical skill and interest. Most full-time and part-time students are eligible to participate through the payment of their incidental fees.

The Athletic Centre (AC) is a great place to relax, meet people, exercise, learn, and play. Located on the southeast corner of Harbord Street and Spadina Avenue, the AC houses an impressive array of programs and facilities, including 12 squash courts; 3 swimming pools (Olympic, 25-yard and learn-to-swim); an indoor track and field house with 200-metre track; 8 gymnasiums; strength-training facilities; 4 multi-purpose courts for badminton, basketball, tennis and volleyball; a dance studio; a cardio training area; and the David L. MacIntosh Sport Medicine Clinic.

Expanded and innovative programs will be available at the new state-of-the-art Varsity Centre for Physical Activity and Health, scheduled to open this year at the former Varsity Stadium site at Bloor Street and Devonshire Place (adjacent to Varsity Arena). Among the features will be an artificial surface playing field and all-weather bubble, enabling a variety of recreational and competitive programming to be operated during the winter months.

Programs, activities, and services include more than 30 free fitness classes a week; hundreds of hours of recreational activities and instruction programs in fitness, dance and movement; aquatics and sport; personal trainers and fitness testing; and an extensive children's program. The programs also include

the largest intercollegiate and intramural programs available in Canada. U of T intramurals is one of the best ways to be active and to meet students from across the University.

The FPEH is committed to the promotion of health and well being for all students. The ACTIVE U program offers the opportunity for students to get active anywhere on campus by just counting their daily walking steps. For more information, log on for free at www.activeu.ac-fpeh.com.

Detailed information about all programs is found in the *AC Guide*, published three times per year, and is available online at www.athletics.utoronto.ca. Information on the Varsity Blues is available at www.varsityblues.ca.

FPEH is the largest employer of students for part-time positions. For information, consult the Faculty Web site or contact the Centre for Leadership Training and Education (416) 946-5127.

CAREER CENTRE

University of Toronto Career Centre
Koffler Student Services Centre
214 College Street
Toronto, Ontario M5T 2Z9

Telephone: (416) 978-8000

Web: www.careers.utoronto.ca

The Career Centre has developed the following services to meet the career planning and development needs of graduate students. To use the Career Centre, graduate students register at www.careers.utoronto.ca. Through your Career Centre homepage, you will be informed of all upcoming events and have access to current employment listings: full-time, part-time, contract, summer, or volunteer.

Graduate Dossier Service

The Graduate Dossier Service is a depository of confidential letters of reference, transcripts, and c.v.'s for University of Toronto Ph.D. graduates seeking academic employment within an academic institution. The candidate's dossier is copied and mailed to prospective employer institutions according to the registrant's request. Further information and registration kits may be obtained from the Career Centre. This service is only offered on the St. George campus.

Career Talks and Counselling Appointments

Meet with a career counsellor to receive guidance and advice on careers and work, e.g., c.v. critiques, practice job talks, and interviews. Plan your career and discover the resources that can help you find work.

Career Development and Employment Search Workshops

A variety of workshops are available to assist graduate students with career planning, conducting an effective employment search, writing proper résumés and c.v.'s, and preparing for employment interviews.

C.V. and Cover Letter

Graduate students applying to academic positions within academic institutions learn how to develop an effective c.v. and cover letter.

Graduating Students Employment Service

A number of Fortune 500 companies, government agencies, and organizations who anticipate their hiring needs in advance, arrive on campus to recruit students completing their final year of studies. The majority of these organizations are from the business and technical sectors, many of which express interest in recruiting master's and Ph.D. students.

Recent Graduate Employment Service

This service is designed to assist recent University of Toronto graduates seeking immediate full-time employment. Work opportunities listed with this service represent a good cross-section of the current employment market.

Résumé Clinic

Students preparing résumés and cover letters can have them reviewed by a résumé professional before sending them to potential employers. Set up a career talk appointment to review your academic c.v.

Practice Interview Session

Get valuable feedback on your interview style. Fine-tune your skills in a 30-minute practice session with a career counsellor.

Tailored Career Management Courses for Individual Departments

Have a career- or employment-related workshop tailored for your graduate unit or student group. For details, call Mary Giamos at (416) 978-8012 or contact her by e-mail at m.giamos@utoronto.ca.

Employer Panels, Industry Talks, and Career Fairs

Throughout the year, the Career Centre organizes special events to meet your needs. Topics include the academic job search, looking for work outside academia, careers in research and policy. Participating employers and recent alumni arrive on campus to offer graduate students insights, advice, and networking opportunities.

Career Resource Library

Visit the Career Resource Library, one of the largest career libraries in North America. Review our specialized collection of occupation, educational, and employment related resources. Trained library staff can direct you to the best print or electronic resources to suit your needs.

COMMUNITY SAFETY OFFICE

Telephone: (416) 978-1485

Web: www.communitysafety.utoronto.ca

The Community Safety Office responds to students, staff, and faculty members of the University of Toronto community who have personal safety concerns.

The Community Safety Office responds to all personal safety concerns by addressing the complaint, assessing the personal and community safety risks, providing a continuum of intervention options that the complainant can explore in order to address their personal safety concern(s), presenting information about the particular issue experienced, co-creating a safety plan, and referring and working in partnership with various offices in order to address the individual's personal safety concerns. Additionally, the office provides consultation and training to those managing difficult behaviour, workshops on a variety of topics, and self defence courses.

The Community Safety Office offers support and assistance to the members of the university community on a short term basis.

COUNSELLING AND LEARNING SKILLS SERVICES (CALSS)

Koffler Student Services Centre
Room 111, 214 College Street
Toronto, Ontario M5T 2Z9

Telephone: (416) 978-7970
Web: www.calss.utoronto.ca

The Counselling and Learning Skills Services (CALSS) is the University's professional counselling service for students. Services include short-term crisis counselling; brief psychotherapy for individuals, couples, and groups; and learning skills lectures, workshops, and individual consultation on academic skills matters. The CALSS staff includes psychologists, social workers, and psychotherapists.

The Personal Counselling Program provides graduate students with counselling/psychotherapy for individuals, couples, and groups with respect to their emotional and interpersonal problems, including anxiety, depression, relationship problems, addictions, sex and gender concerns, disturbances resulting from abuse and assault, prolonged stress, and other difficulties. The CALSS offers graduate students opportunities to discuss their concerns with a professional counsellor/psychotherapist who respects the student's confidentiality.

The Assault Counselling Program provides services to students who are in crisis as a result of verbal, physical and/or sexual assault, childhood abuse and other forms of abuse or violence. Services include crisis counselling, psychotherapy, education, consultation, referral, and court accompaniment.

The Learning Skills Program includes lectures, workshops, and individual consultation on time management, preparing for exams, concentration, memory and other aspects of study; schedules are available at the CALSS. Individual appointments for assistance with study problems can be arranged by contacting the receptionist.

ENGLISH LANGUAGE AND WRITING SUPPORT (ELWS)

Dr. Jane Freeman, Director
Room 109, 63 St. George Street
School of Graduate Studies
University of Toronto
Toronto, Ontario M5S 2Z9

Telephone: (416) 946-7314
Fax: (416) 978-4367
E-mail: jane.freeman@utoronto.ca
Web: www.sgs.utoronto.ca/english

The Office of English Language and Writing Support (ELWS) at the School of Graduate Studies provides professional development to graduate students wishing to improve their oral and written communication skills. ELWS offers a range of workshops and non-credit courses for both native and non-native speakers of English as well as individual consultations. Programs are free to registered graduate students. For course/workshop descriptions, registration links and procedures, and information on how to book an individual consultation, visit the ELWS Web site at www.sgs.utoronto.ca/english.

FAMILY CARE OFFICE

Koffler Student Services Centre
Street Level, 214 College Street
Toronto, Ontario M5T 2Z9

Telephone: (416) 978-0951
Fax: (416) 978-3247
E-mail: family.care@utoronto.ca
Web: www.familycare.utoronto.ca/

Many students balance family obligations with their studies. The University of Toronto is committed to fostering a family-friendly learning and working environment. The Family Care Office is a service that provides information, guidance, referrals, educational programming, and advocacy for the University of Toronto community. Our office can assist students who require information on child care (facilities, programs, or subsidies), elder care, and other family matters. Additional services include family events; discussion and support groups, such as our Student Parents Group and our Fathers Group; and a peer support program connecting student parents, new to the University, with their peers who have already been studying here. We also offer many workshops including "Choosing Child Care that Works for Your Family" and "Financial Survival for Student Families". The Family Care Office maintains a resource centre containing practical material on family issues ranging from pregnancy and infant care to lesbian and gay parenting and caring for elderly family members. The resource centre also contains information for university families on activities and facilities on campus and in the community. Please contact us by phone, e-mail, or simply drop-in.

The Family Care Office is located in the Koffler Student Services Centre on the northwest corner of College Street and St. George Street.

GRADUATE STUDENT INITIATIVE (GSI)

Koffler Student Services Centre
214 College Street
Toronto, Ontario M5T 2Z9

Telephone: (416) 946-0148
Web: www.studentservices.utoronto.ca/gsi

The GSI Program focuses on the issues of graduate students which intersect with the services offered by U of T's Student Life Programs. Designed to enhance the graduate student experience, the program offers workshops, discussion group lunches and online resources. Workshops address learning skills, career development, personal and psychological issues, housing questions, the concerns of student parents, information on international and Aboriginal issues, and health and wellness. Experts from the School of Graduate Studies are invited to speak on relevant topics.

GRADUATE STUDENTS' UNION (GSU)

16 Bancroft Avenue
Toronto, Ontario M5S 1C1

Telephone: (416) 978-2391, 978-6233, 978-8464
Fax: (416) 971-2362
E-mail: info.gsu@utoronto.ca
Web: www.gsu.utoronto.ca

The GSU is located between Spadina and Huron, two blocks north of College Street.

The GSU is the student union representing the 12,000 full-time and part-time graduate students at U of T and OISE/UT. Payment of the incidental fee automatically entitles graduate students to membership in the Union and to full use of all facilities and services.

The GSU provides a wide range of services for graduate students, including political representation at all levels of government through its membership in Canada's largest student organization—the Canadian Federation of Students. We also monitor all levels of U of T governance and represent graduate students to the U of T administration.

GSU Supplementary Health and Dental Insurance: All students paying GSU fees are covered by our Dental Plan, and full-time students are covered by our Health Plan. Benefits include 80% of prescription drugs, dental

exams, etc. In September (or January for students starting then), students may purchase family coverage or opt out if they have equivalent coverage elsewhere. See the GSU Web site for complete details and forms.

The GSU Pub, fully licensed and non-profit, is open from noon until midnight, Monday to Friday. (416) 978-8466. The Pub is a great place to hold special events and to relax with colleagues.

Sylvester's Café (upstairs in the GSU) is open from 9:00 a.m. to 3:30 p.m. and serves delicious breakfasts and lunches. Check out the menu on the Web site. Catering is available. (416) 978-5247.

The GSU Gym may be booked for basketball, badminton, and volleyball. Space may be booked on the last Thursday of the month (for the following month) from 10:00 a.m.

International Student Identity Cards, available free to all full-time GSU members, provide great discounts for air and rail travel. Call for information and an appointment.

Graduate Course Unions are organized by students within every department (over 75 in total) and are funded by the GSU. Students elect a representative to attend GSU Council which meets eight times a year. This representative is your primary contact regarding GSU events and news. To find out about your Course Union, visit our Web site or contact Charlotte Reeve at (416) 978-8464.

The GSU Executive is elected every March and consists of five officers: President, Vice-President (Internal), Vice-President (External), Secretary, and Treasurer. Four Executive Members-at-Large are elected by the GSU Council.

The GSU Office Staff keep the GSU running smoothly. They help with course union organizing, student appeals, dissemination of information, political lobbying, and much more.

Publications: Annual GSU Handbook/Calendar. The GSU sends out a weekly e-mail digest announcing workshops, deadlines, political events, and the like. All graduate students should receive it from their GSU Council Rep. If you are not receiving it, or would like to make a submission, see the GSU Web site for details or contact announce.gsu@utoronto.ca.

CUPE 3902 (Canadian Union of Public Employees) represents graduate students who hold a teaching assistantship. The office is at 180 Bloor Street West, Room 902. (416) 593-7057, www.cupe3902.org.

HART HOUSE

Telephone: (416) 978-2452

Fax: (416) 978-8387

Web: www.harthouse.ca

Hart House, Your Student Centre

Graduate students escape, explore and experience the social side of university life! Hart House boasts a wide range of programs and activities but you don't need to be a club member or a gym rat to have a good reason to visit.

Feeling hungry? Grab a bite to eat. Need to study? Find a quiet corner of the Library. Want to hear some new music? Tune in to Hart House's Record Room. Feeling a little sleepy? Have a catnap on one of the cozy sofas. Looking for a place to shoot some pool? Rack them up on our free pool table. No matter who you are or where your interests lie, Hart House has something for you!

Hart House boasts a full-service athletics facility, a historic theatre, and thousands of events every year – workshops, concerts, films, and more. Check out the Web site for what's on daily.

If you are interested in art, music, debates, photography, fitness, film, drama, chess, bridge, or scuba diving, you can find it at Hart House.

Want to be more involved? Hart House operates 10 standing committees and 22 clubs. You can join most clubs and committees at any time of the year – just choose the type of activity you're interested in and attend the next meeting or event.

For more information visit the Web site or call (416) 978-2452.

HEALTH

Health Service

Koffler Student Services Centre
214 College Street, Second Floor
Toronto, Ontario M5T 2Z9

Telephone : (416) 978-8030

E-mail: health.services@utoronto.ca

Web: www.utoronto.ca/health/

Think of Health Service as your family doctor's office while you're away from home.

Health Service offers a wide range of services for U of T students and their partners. The health team includes family physicians, registered nurses, a community health coordinator, a health promotion nurse, support staff, and lab technicians.

Physician services include comprehensive medical care, counselling, and referrals. Nurses provide information and a range of services including dressing care, immunizations and travel health education. Diagnostic tests and procedures, ordered by a Health Service physician, are performed by a lab technician in the on-site laboratory.

Comprehensive sexual health assessment, care, and counselling are available for men and women, including contraception counselling, education, and prescriptions. Contraceptive products are available at a reduced cost when prescribed by a Health Service physician. Male condoms are available free in the clinic waiting room, and female condoms are available free with counselling. The emergency contraceptive pill (ECP), also known as the "morning after pill"; pregnancy testing; pregnancy support; as well as sexually transmitted infection testing, treatment, and education are also available.

Health Service is a designated Health Canada Travel Medicine Clinic and offers a complete travel immunization and education program for students.

In order to provide quality health care, Health Service staff recommends that you schedule appointments with the same physician, who will become familiar with your health history and needs.

When you visit Health Service, bring your OHIP or UHIP card (or health card from another province) and your student card. To book an appointment, call 416-978-8030. If you need to be seen more urgently, there is a "drop-in" option for a one-problem-only visit. Check the Web site for hours.

Psychiatric Service

Koffler Student Services Centre
Main floor, 214 College Street
Toronto, Ontario M5T 2Z9

Telephone: (416) 978-8070

Web: www.utoronto.ca/psychservices/

The Psychiatric Service offers assessment and/or treatment for students with emotional and psychological concerns such as anxiety, depression, obsessions and compulsions, phobias, relationship difficulties, eating and body image issues, attention and/or concentration problems, and problems with sleep and substance abuse.

Clinical staff possess expertise in a wide variety of therapeutic methods including individual, couple, and group psychotherapy.

This is a confidential service available to all full-time and part-time students who have paid

the appropriate incidental fees. Services are fully covered by OHIP, the University Health Insurance Plan (UHIP), or other provincial health insurance plans.

For women with bulimia or students whose difficulties are best addressed in a group therapy setting, there are two therapeutic groups. For students who are experiencing difficulties in their relationships, couple therapy is available. An on-call clinician is available between 9 a.m. and 5 p.m. on weekdays for urgent situations.

Psychiatric Service is located in the Koffler Student Services Centre at the address above. No referral is necessary. To make an appointment, drop in or telephone. For further information visit the Web site.

E-mail: residences-office@utsc.utoronto.ca

Web: www.utsc.utoronto.ca/~residences/

The University of Toronto Student Housing Service, located in the Koffler Student Services Centre on the downtown Toronto campus, serves as a year-round source of up-to-date off-campus housing and residence information as well as other information to assist students in locating and arranging suitable housing.

On-Campus Housing

Single Student Residences

There are a number of residences for single graduate students at U of T. In addition, there are a number of independently-owned residences located near the St. George campus that house U of T students. Every residence has its own admission office and application procedure. If you are interested in living in a residence, contact directly the office of each residence of interest to inquire about its specific application process. Because demand for residence space is high, it is important to apply early – if possible, before you are admitted to U of T. To increase your chances of receiving an offer, it is wise to apply to as many residences as you are eligible. For more details, visit the Student Housing Web site, www.housing.utoronto.ca.

Student Family Housing

Family housing is available in 713 apartments on the St. George campus. Priority for these unfurnished apartments is given to students with a family. The term “family” refers to students residing with their dependent children and to childless couples in a permanent relationship.

While many students can be housed within 9-18 months of their application, this is only an average and depends on many variables, the most important of which is the availability of vacant apartments in any given month. If you can move with less than two months' notice, the waiting period can be significantly shorter. It is advisable to apply as soon as you are seriously considering attending the University – if possible before being given an offer of admission to the University. For more information or

to apply, contact the Student Family Housing offices or visit their Web site.

Off-Campus Housing

St. George and Scarborough Campuses

The Student Housing Service maintains a registry of available off-campus housing advertised by private landlords and by students seeking others to share accommodation. The registry of housing ads is available to students on the Web as well as in the housing offices on the St. George and Scarborough campuses. Students search the ads in the registry as they would the classified section of a newspaper, and make appointments to view potential units. Students coming to Toronto from afar should arrange to stay in temporary housing while conducting their housing search. The Student Housing Service will provide a list of temporary accommodation on request.

Housing is usually advertised four to six weeks in advance of the date the unit becomes available for occupancy. It generally takes one to three weeks for a student to locate suitable accommodation, depending on the type of housing desired and the student's budget. For the fall and winter sessions, some students rent their long-term housing from August 1, avoiding the September 1 occupancy date (which is popular with students at most post-secondary educational institutions in the city). At the Student Housing Service, the free use of phones is available to students contacting landlords as well as information on temporary accommodation, housing legislation, movers, maps, etc.

Since the accommodations that are listed are not inspected, the quality cannot be estimated or guaranteed. Therefore it is very important for students to meet with the landlord and inspect the premises before entering into any agreement.

University of Toronto at Mississauga Campus

For information regarding all housing at or in the vicinity of the University of Toronto at Mississauga, please use the contact information listed above.

Cost of Student Housing— Single, Family and Off Campus

As a guideline, for the 2006/2007 school session, the cost of residence with a compulsory full meal plan was approximately \$7,470 to \$12,201 for the eight-month academic session. Modified meal plans are available in some residences. The cost of a shared apartment-style residence, providing cooking facilities

but no meal plan, was approximately \$5,450. However, please note that residence fees for the upcoming school year are expected to rise. After paying an initial deposit, the balance of fees is usually paid in two instalments at the beginning of each of the four-month fall and winter sessions. Residence fees are paid monthly at Graduate House.

As of September 1, 2006, rent for the bachelor, one-bedroom, and two-bedroom units located in the Student Family Housing complex located at 30/35 Charles Street West range from approximately \$583 to \$956 depending on the size of the unit, and is payable monthly. These rents are expected to increase by 2.6% in September 2007.

Students looking for rooms in shared houses or apartments off-campus should expect to budget \$350 to \$600 per month. A student requiring a private apartment off campus usually pays \$500 to \$750, \$550 to \$900, or \$800 to \$1,300 for a bachelor, one-bedroom, or two-bedroom unit respectively. A three-bedroom house or apartment will usually rent for \$1,200 to \$1,700. Food is not included. Some rooms will be furnished, but most apartments and houses will be unfurnished, except for fridge and stove.

Graduate House

60 Harbord Street
Toronto, Ontario M5S 3L1

Telephone: (416) 946-8888

Fax: (416) 946-8887

E-mail: information.gradhouse@utoronto.ca
admissions.gradhouse@utoronto.ca

Web: www.sgs.utoronto.ca/gradhouse

Standing as the western gateway to the University of Toronto, Graduate House is located on the north-east corner of Harbord Street and Spadina Avenue. Graduate House is home to full-time students from both the School of Graduate Studies and from the University's professional faculties (Dentistry, Law, Medicine, Nursing, OISE/UT, and Pharmacy). In administering Graduate House, the School of Graduate Studies is committed to providing its residents with a supportive environment conducive to both the pursuit of academic excellence and a fulfilling life experience.

Graduate House houses 424 students in 120 fully furnished, three- or four-bedroom suites. Most of the bedrooms are designed for single occupants, though there are a handful of shared bedrooms. Graduate House also has

a small number of premium single bedrooms. Each suite contains two or three bathroom arrangements, a kitchen, and a living area. Residents are expected to do their own cooking and are responsible for cleaning their own suites. Graduate House is a completely non-smoking environment.

Numerous common areas are located throughout the building, each equipped with wireless networking. Graduate House also offers its residents two TV areas, a music room, a computer area, and a reading room stocked with international newspapers and periodicals. The rich and vibrant residence life program offers a wide range of groups, social activities and involvement in team sports, as well as a support network for residents, with special attention given to the needs of international students.

Occupancy fees for 2007/2008 are \$662 per month per person for a single bedroom, \$505 per month per person for a shared double bedroom, and \$738 per month for a premium single bedroom. Occupancy fees include heat, light, water, air-conditioning, and high-speed internet access.

For more information and application forms, e-mail admissions.gradhouse@utoronto.ca or visit our web site at www.sgs.utoronto.ca/gradhouse.

Massey College

4 Devonshire Place
Toronto, Ontario M5S 2E1

Telephone: (416) 978-2891

Fax: (416) 971-3032

E-mail: g.sharpe@utoronto.ca

Web: www.utoronto.ca/massey/

Massey College is the only independent graduate residence associated with the University of Toronto. It is interdisciplinary and provides a focus for graduate work and a congenial intellectual environment for the exchange of opinions and ideas. Its members are enrolled in programs in various branches of the humanities, sciences, and professions, and come from all parts of Canada and around the world. The College's superb facilities are conveniently located and are open twelve months a year. All rooms are single, fully furnished, and consist of a bedroom and adjacent private study. A meal plan is provided.

All applications must be addressed to the College Registrar and must be completed and received by May 1. Admission is based on aca-

ademic achievement, extracurricular activities, and general experience. Consideration is given to student representation from all academic disciplines and from professional programs such as law and medicine. The College elects both resident and non-resident fellows.

Contact the College Registrar at (416) 978-2891 for further details or visit our Web site at www.utoronto.ca/massey.

INTERNATIONAL STUDENT CENTRE (ISC)

Cumberland House
33 St. George Street
Toronto, Ontario M5S 2E3

Telephone: (416) 978-2564

Fax: (416) 978-4090

E-mail: isc.information@utoronto.ca

Web: www.isc.utoronto.ca

The International Student Centre (ISC) promotes and supports international education and offers services, programs, and facilities for international students, students with international and/or intercultural interests, and students looking for education and work opportunities abroad. Located on the St. George campus, the ISC welcomes *all* students to use its facilities and meeting rooms to relax, study, have lunch, or meet with friends. Specific programs and services offered at ISC include advice and assistance on immigration and health insurance concerns, a newsletter, electronic listserv, English conversation classes, personal counselling, trips and activities, and work and study information for Canadians travelling abroad.

LESBIAN, GAY, BISEXUAL, TRANSGENDER, QUEER (LGBTQ) RESOURCES AND PROGRAMS OFFICE

Telephone: (416) 946-5624

Web: www.lgbtq.utoronto.ca

The LGBTQ Office is dedicated to making the University of Toronto a community that celebrates the sexual and gender diversity of its students, staff, and faculty. Resources for graduate students are available.

LIBRARY SYSTEM

Telephone: (416) 978-8450
Fax: (416) 978-7653
E-mail: utweb@library.utoronto.ca
Web: www.library.utoronto.ca

Researchers have access to over 15 million items in the library collections of the University of Toronto, making this resource the largest in Canada and ranking among the top five academic libraries in North America. The major portion of this collection is divided between the Gerstein Science Information Centre and the John P. Robarts Library for humanities and social science materials. As well, there is the Thomas Fisher Rare Book Library containing extensive special collections, the Engineering and Computer Science Library, the OISE/UT Library (Education), the Pharmacy Library, and the Earth Sciences Library. A smaller portion of the collection is housed in over 30 libraries across the campus. Generally, these are in affiliated college libraries or in specialized collections representing such fields as law, physics, architecture, and dentistry.

Study space is provided in many of the libraries; individual carrels, desks, and book lockers are available. The Robarts Library provides study space 24 hours a day, 5 days a week during the fall and winter sessions.

The library offers a wide variety of sophisticated information retrieval services. The online catalogue system provides access to the library's print and electronic collections and to the catalogues of other major libraries throughout the world. The library provides access to over 33,000 electronic journals and over 360,000 electronic books. Online searching of close to 900 index and abstract databases is available through a variety of local and commercial systems.

Information Commons

The Scotiabank Information Commons, located on the first floor of the Robarts Library, is a focal point at the University for electronic information access. Among many services, it offers a design studio and new media suites. A help desk supports Internet and electronic mail access for all faculty, staff, and students. Webcasting and video conferencing services are also available.

Resource Centre for Academic Technology (RCAT)

Telephone: (416) 946-3139
E-mail: info.rcat@utoronto.ca
Web: www.rcat.utoronto.ca

Located on the fourth floor of the Robarts Library, RCAT provides support to faculty, staff, and graduate students in the use of technology for teaching and learning. This support includes the provision of workshops and seminars, one-on-one consultation, telephone help, and various online resources.

OMBUDSPERSON

Office of the University Ombudsperson
 Suite 161, 222 College Street
 Toronto, Ontario M5T 3J1

Telephone: (416) 978-4874
Fax: (416) 978-3439
E-mail: ombuds.person@utoronto.ca
Web: www.utoronto.ca/ombudsperson

As part of the University's commitment to ensuring that the rights of its individual members are protected, the University Ombudsperson investigates complaints from any member of the University not handled through regular University channels. The Ombudsperson offers advice and assistance and can recommend changes in academic or administrative procedures where this seems justified. In handling a complaint, the Ombudsperson has access to all relevant files and information and to all appropriate University officials. The Ombudsperson handles all matters in strict confidence, unless the individual involved approves otherwise. The Ombudsperson is independent of all administrative structures of the University and is accountable only to the Governing Council.

The Ombudsperson is available by appointment at all three U of T campuses. Please telephone or e-mail to schedule an appointment.

SEXUAL HARASSMENT EDUCATION, COUNSELLING, AND COMPLAINT OFFICE

Third Floor, 40 Sussex Avenue
 Toronto, Ontario M5S 1J7

Telephone: (416) 978-3908
Fax: (416) 971-2289
Web: www.utoronto.ca/sho
www.enough.utoronto.ca/ (regarding online harassment)

The Sexual Harassment Policy deals with harassment based on sex and sexual orientation. The Sexual Harassment Officer provides advice, education, and information to the

University community; counsels all parties to complaints; and mediates complaints under the formal complaint procedure which is confidential.

The Sexual Harassment Officer visits the U of T at Mississauga and U of T at Scarborough campuses on a regular basis. Call to schedule an appointment; arrangements may be made to meet in private office space on your campus.

STATUS OF WOMEN OFFICE

Telephone: (416) 978-2196

Fax: (416) 971-2295

E-mail: status.women@utoronto.ca

Web: www.status-women.utoronto.ca

The Status of Women Office works towards full gender equity for all women, students, staff, and faculty at the University of Toronto. The Office co-hosts an annual event for women graduate students "Positioning for a Career in Academia" and has a mentoring program for women from underrepresented groups.

6

Course Codes

A graduate course is understood to require at least two hours per week of lecture or seminars, plus such laboratory hours as may be required.

Not every course listed in the calendar will be given in this academic year. Consult the graduate unit for course availability.

Glossary of Course Codes

Primary codes denote courses where one academic unit has responsibility for offering the course.

Joint codes denote courses where two or more graduate units participate to offer the course.

Academic Year

In the School of Graduate Studies, the academic year begins in September and ends in August. The academic year is divided into three sessions:

1 Fall Session (September to December and designated YEAR9)

2 Winter Session (January to May and designated YEAR1)

3 Summer Session (May to August and designated YEAR5).

Alphabetical Character Following Course Number

Y Full Course

H Half-Course

Y and H courses may be offered in either the Fall or Winter Sessions or spread over both. Please consult departmental timetables for details.

-
- ° Continuous course. Indicator used to identify specific courses which may continue over a program. The course is graded when completed.
 - + Extended course. For academic reasons, course work is extended into session following academic session in which course is offered.

7

Graduate Faculty

Full Members and Members Emeriti

There are three categories of graduate faculty. Section 7 contains a single alphabetical listing of full members and members emeriti; the home department is listed. Associate members, which form the third category, are listed in the graduate unit entries in which they hold an appointment – see Section 8.

For more details about each faculty member's appointment category, degrees, honours, and chairs held, consult the graduate unit entry in Section 8 of the SGS Calendar. Information is also available on the SGS Web site (www.sgs.utoronto.ca).

Graduate Programs

This section contains an alphabetical listing of all the graduate programs offered by the School of Graduate Studies at the University of Toronto. SGS comprises over 80 graduate units (departments, centres, and institutes) offering approximately 150 programs.

Each graduate unit's offerings are described in a separate entry containing information about that unit's graduate faculty, admission requirements, program requirements, courses of instruction, contact information, and a Web site where you may visit for more details.

Aboriginal Health (Collaborative Program)

Program Committee

K. D. Rice, BA, MA, PhD/Aboriginal Studies Program
 E. M. Antone, BA, BED, MEd, EdD/Adult Education & Counselling Psychology

Fax: (416) 946-8055

E-mail: kue.young@utoronto.ca

Nature of Collaborative Program

The Collaborative Program in Aboriginal Health involves the graduate units of Adult Education and Counselling Psychology, Anthropology, Geography, Medical Science, Nursing Science, Nutritional Sciences, Public Health Sciences, and Sociology and Equity Studies in Education; it is in collaboration with the Faculty of Arts and Sciences' Aboriginal Studies Program. The main objective of the program is to provide graduate training in Aboriginal health research and practice while enhancing mutually beneficial relationships with Aboriginal communities and organizations.

Application Procedures

Students who wish to enrol in a collaborative program must apply to and be admitted to both the collaborative program and a graduate degree program in one of the collaborating departments. Applicants must also submit to the Program Committee of the Collaborative Program in Aboriginal Health:

- 1 A personal statement, in the form of a letter no longer than three pages to describe relevant personal and/or professional experiences, a career plan, and motivation in seeking advanced training in Aboriginal health. The nature of any relationship with an Aboriginal community/organization that already exists or to be developed should also be described.
- 2 Photocopies of application materials submitted to their home unit including curriculum vitae, transcripts, and letters of reference.

Master's Degrees

All master's students in the program will take one of the core courses listed below. In home graduate units where a thesis or major research paper is required, it must deal with an Aboriginal health topic. At least one member of the student's thesis committee should be a core faculty member of the Collaborative Program. In home graduate units that do not have a thesis requirement, students must undertake a practicum or equivalent in an Aboriginal health topic, supervised by a core faculty member of the Collaborative Program. Students must participate in the Research Seminar Series, held monthly, as well as participate in at least one National/Regional Workshop. Students must complete the requirements of the Collaborative Program in addition to those requirements for the degree program in their home graduate unit.

Doctoral Degrees

The requirements are the same as for the master's program listed above. Students who have previously taken one of the core courses during their master's program are required to take a different course during their doctoral program and participate in a new Research Seminar Series and at least one National/Regional Workshop.

Core Courses

- | | |
|-----------|---|
| AEC 1275H | Special Topics in Counselling Psychology (Master's): Integrating Traditional Healing into Counselling Psychology and Therapy/ <i>R. Moodley</i> |
| CHL 5421H | Aboriginal Health/ <i>C. Wieman</i> |
| NUR 1014H | Politics of Aboriginal Health/ <i>R. Hagey</i> |

Addiction Studies (Collaborative Program)

Program Committee

 R. Frecker, BSc, MD, PhD, LMCC/Biomedical Engineering
 N. S. Wortley, BA, MA, PhD/Criminology
 W. M. Duff, BA, MLS, PhD/Information Studies
 P. L. Carlen, MD, FRCP(C)/Medical Science
 B. A. Sproule, BScPhm, PharmD/Pharmaceutical Sciences
 J. A. Cunningham, BSc, MA, PhD/Psychology
 R. E. Mann, BA, MAsc, PhD/Public Health Sciences
(Director)
 J. Rehm, PhD/Public Health Sciences
 M. Herie, BA, MSW, PhD/Social Work
 L. J. Tepperman, BA, MA, PhD/Sociology
 B. Brands, Ph.D/Centre for Addiction & Mental Health
 P. G. Erickson, BA, MA, PhD/Centre for Addiction & Mental Health
 R. G. Ferrence, PhD/Ontario Tobacco Research Unit

Address:

J. T. Rehm, Director
 Collaborative Program in Addiction Studies
 Centre for Addiction and Mental Health
 33 Russell Street, Room 2035
 Toronto, Ontario M5S 2S1
 Canada

Telephone: (416) 535-8501 ext. 6907

E-mail: jtrehm@aol.com

Web: www.phs.utoronto.ca/c_copas.htm

The graduate units of Adult Education and Counselling Psychology; Anthropology; Biomedical Engineering; Criminology; Information Studies; Medical Science; Pharmaceutical Sciences; Pharmacology; Psychology; Public Health Sciences; Social Work; and Sociology, in collaboration with the Centre for Addiction and Mental Health, the Canadian Centre on Substance Abuse, and the Ontario Tobacco Research Unit, participate in the Collaborative Program in Addiction Studies at the University of Toronto. The purpose of the program is to develop and integrate graduate training in the multidisciplinary field of addictions, an area that includes the use and abuse of alcohol, tobacco, and psychoactive substances, as well as gambling and other addictive behaviours. Master's programs requiring a thesis, practicum, or research paper, and Ph.D. programs are included. Applicants who wish to enrol in the Collaborative Program must apply to and be admitted to both the Collaborative Program and a graduate degree program in one of the collaborating departments.

Program Requirements

All master's students in the collaborative program are required to take PAS 3700H *Multidisciplinary Aspects of Addictions*, plus a half-year course selected from the list of approved courses presented below or an approved directed reading course.

Ph.D. students in the collaborative program are required to take PAS 3700H *Multidisciplinary Aspects of Addictions*, if they have not already done so, plus one additional half-year course (not taken previously) from the approved listing of courses presented below or an approved directed reading course.

In addition, students in the collaborative program must meet all requirements of their home department in terms of course work and thesis work, or equivalent. For both the thesis master's and doctoral degrees, the student's thesis must deal with a subject in the field of addictions. The thesis is supervised and evaluated in the same manner as others in the home department, but normally involves, as appropriate, supervisory and examining professors from other disciplines represented in the collaborative program. In collaborating departments that do not require a thesis, a practicum or major research paper will be accepted instead of a thesis, as long as the topic or focus is directly related to addictions. In collaborating departments that do not have a thesis or equivalent requirement, students must take a third half-course from the list of approved electives. Upon fulfilment of the program requirements, transcripts issued by the School of Graduate Studies will denote completion of the Collaborative Program in Addiction Studies.

Courses of Instruction

The following courses in the Collaborative Program in Addiction Studies are offered by the participating departments for the current academic year.

PAS 3700H	Multidisciplinary Aspects of Addiction/ <i>J. Rehm, R. Mann</i>
PAS 3701H	Advanced Research Issues in Addictions/ <i>R. Mann, P. Erickson</i>
CHL 5119H	Social and Political Perspectives on Drugs and Addictions/ <i>B. Fischer</i>
CHL 5417H	Tobacco and Health: From Cells to Society/ <i>R. G. Ferrence, J. Cohen</i>
JPM 1005Y	Behavioural Pharmacology/ <i>D. M. Tomkins, Staff</i>
MSC 1085H	Molecular Approaches to Mental Health and Addictions/ <i>J. Kennedy</i>

PSY 2703H The Psychology of Addictions/
 J. Cunningham
SOC 6123H Sociology of Addiction/
 P. G. Erickson
SWK 4616H Drug Dependence: Treatment
 Approaches/*W. Skinner, Staff*

Address:

Department of Adult Education and Counselling Psychology
 The Ontario Institute for Studies in Education of the University of Toronto (OISE/UT)
 Seventh Floor, 252 Bloor Street West
 Toronto, Ontario M5S 1V6
 Canada

Fax: (416) 926-4749

Web: www.oise.utoronto.ca/depts/aecdc/p/

Application Packages

Initial enquiries and requests for application packages regarding admission to graduate studies in the Adult Education and Counselling Psychology Department should be made directly to:

The Ontario Institute for Studies in Education
of the University of Toronto (OISE/UT)
Registrar's Office
Graduate Studies, Admissions Unit
Fourth Floor, 252 Bloor Street West
Toronto, Ontario M5S 1V6
Canada

Telephone: (416) 923-6641 ext. 2663
or 1-800-785-3345

E-mail: gradstudy@oise.utoronto.ca

Such enquiries should be made well in advance of the regular deadline for receipt of applications. Given the limited number of students the Department may accept into the majority of its programs, not all eligible applicants will be admitted.

General Information

For application information and forms, visit the Registrar's Office Web site: www.ro.oise.utoronto.ca

For further application information, contact:
Graduate Studies Admissions Unit
Room 4-485

Telephone: 416-923-6641 ext. 2663
or 1-800-785-3345

E-mail: gradstudy@oise.utoronto.ca

Adult Education and Counselling Psychology is the second largest of the five departments within OISE/UT and offers a full range of graduate degrees (M.A., M.Ed., Ph.D., and Ed.D.) in each of two major programs:

- 1 Adult Education and Community Development
- 2 Counselling Psychology

Collaborative Programs

The Department of Adult Education and Counselling Psychology participates in the following collaborative Programs:

- 1 Aboriginal Health
- 2 Addiction Studies
- 3 Aging, Palliative and Supportive Care Across the Life Course
- 4 Community Development
- 5 Comparative, International and Development Education
- 6 Environmental Studies
- 7 Women's Studies

For details, consult the separate entries in this calendar.

Adult Education and Community Development Program

The Adult Education and Community Development program provides a place to study and contribute to theory, practice, and policy concerning adult learning in organizations, communities, workplaces, and social movements in local, national, and international contexts. We are an interdisciplinary program which highlights critical social analysis, transformative learning, creative inquiry, and international/global awareness. Perspectives represented in the program include: aboriginal/indigenous; anti-racist/anti-colonial; feminist; environmental/ecological.

AECD faculty emphasize collaborative and relational approaches to learning. They have a range of research interests in Aboriginal education; community education and development; workplace learning and change; creative inquiry and adult learning. Knowledge and learning/teaching outside the academy are honoured; importance is placed on building mutually beneficial connections with diverse individuals, groups, organizations, and communities in Canada and abroad.

Degree of Master of Education

The M.Ed. is a non-thesis degree program which can be taken on either a full-time or part-time basis. The program of study normally consists of ten half-courses, usually at the 1000 level. At least half of the courses must be from the Adult Education and Community Development program. Students are required to take course AEC 1100H *Outline of Adult Education* as well as one research methods course.

Degree of Master of Arts

The M.A. is a research-based degree program which can be taken on a full-time or part-time basis. In addition to eight half-courses, students must complete a thesis based on original research. This normally requires more than one year. Mainly, courses at the 1000 level will be taken. Four courses must be from the Adult Education and Community Development program. Additional courses may be required of some students. Students must take AEC 1100H *Outline of Adult Education* and AEC 1183H *Master's Thesis Seminar*. During their program, students are expected to have exposure to both qualitative and quantitative approaches to research. One half-course in research methods is required. A list of appropriate courses will be maintained in the department. M.A. students complete a thesis which may lay the groundwork for doctoral research.

Degree of Doctor of Education

Admission to the Ed.D. program in Adult Education and Community Development is suspended effective September 2006.

Degree of Doctor of Philosophy

The Ph.D. degree program is designed to provide opportunities for advanced study in the theoretical foundations of adult education and community development and in the application of such knowledge to practice. The Adult Education and Community Development program offers both a full-time and flexible-time Ph.D. Full-time Ph.D. students must complete their degree within six years. They begin as a cohort and it is recommended that they take course AEC 3102H *Doctoral Thesis Course in Adult Education* in the first session of their program. Flexible-time Ph.D. students must complete their degree within eight years. It is also recommended that they take AEC 3102H *Doctoral Thesis Course in Adult Education* in the first session of their program. Otherwise, degree requirements for both programs are the same: six half-courses, at least four of which must be from the Adult Education and Community Development program. Students with little background in the field of Adult Education and Community Development will be required to do a seventh half-course providing such background. A minimum of four courses must be at the doctoral/3000 level, normally including course AEC 3102H. Students also normally take at least one specialized research methods course. In addition, all students are expected to complete a comprehensive requirement and a thesis.

Faculty

The Adult Education and Community Development program faculty are grouped into four areas of study:

- 1 Aboriginal/Indigenous Education
- 2 Workplace Learning and Change
- 3 Creative Inquiry, Personal and Professional Learning
- 4 Community, International, and Transformative Learning

Courses of Instruction

Not all courses are given each year. Please consult the course schedules available from the Registrar's Office.

- AEC 1100H Outline of Adult Education/
D. Schugurensky, S. Mojab, Staff

SES 2970H	Countering Myths about Aboriginal Peoples through Multiple Medias/ <i>J. Iseke-Barnes</i>
SES 3951H	Canadian Political Economy and Education/ <i>D. W. Livingstone</i>

Counselling Psychology Program

The Counselling Psychology program is designed to provide critical and scholarly skills in counselling and counsellor education and to train counsellors and psychologists in the general domain of human services.

The Counselling Psychology program offers three fields of specialization:

- 1 Counselling Psychology for Psychology Specialists (M.A., Ph.D.)
- 2 Counselling Psychology for Community Settings (M.Ed., Ed.D.)
- 3 Guidance and Counselling for Schools (M.Ed.)

Counselling Psychology for Psychology Specialists

Degree of Master of Arts

This M.A. program is designed for applicants interested in working as researchers or practitioners in a variety of psychological and educational settings. The program meets the basic academic and clinical requirements for registration with the College of Psychologists of Ontario as a Psychological Associate. It also meets the needs of students who plan to apply to the Ph.D. program in Counselling Psychology for Psychology Specialists.

The M.A. in Counselling Psychology for Psychology Specialists consists of eight half-courses, 500 hours of practicum, and a master's thesis. Every program of study includes courses in counselling theory, practice,

assessment, ethics, personality and cognitive assessment skills, and research methodology, as well as a practicum placement.

Full-time on-campus study is required from September to April, which represents the Fall and Winter Sessions; however, students may begin their program of study in the preceding Summer Session. Normally, three half-courses are taken in each of the Fall and Winter Sessions and a maximum of two in the Summer Session. It is expected that all degree requirements will be completed within two years.

Degree of Doctor of Philosophy

The principal emphasis of this degree program is the development of research and theoretical knowledge in counselling psychology, assessment skills, and knowledge and training in professional issues. Students are expected to conduct advanced research and to develop professional knowledge and skills in counselling psychology. Graduates will be prepared to assume a variety of positions in psychological practice and research in schools and universities, in community settings, in agencies offering psychological services, and in university or college counselling centres.

Progress in the program will be reviewed annually. The Ph.D. program requires a minimum of eight half-courses (including practicum and internship), a comprehensive examination, and a doctoral dissertation. The program of study must be taken on a full-time basis. Please note that the Counselling Program is currently adjusting course requirements to conform to the guidelines and principles for the Canadian Psychological Association accreditation of programs in professional psychology.

Practicum and Internship

Students are required to complete a 500-hour practicum in conjunction with the doctoral practicum course AEC 3217Y. In addition, students are required to complete 2,000 hours of internship for course credit. All internship arrangements must be made in consultation with the Coordinator of Internship and Counselling Services.

Thesis

All students must develop, complete, and defend in an oral examination, a doctoral dissertation supervised by a full-time member of the Counselling Psychology faculty. The content of such dissertation research may address theoretical issues applicable to counselling concerns and practice, relate to the development of programs in a variety of educational or applied settings, or in some other way contribute

to the development and practice of counselling psychology.

Comprehensive Examination

In addition to normal course requirements, students will be examined systematically in general psychology and in professional psychology. The examination will normally be taken at the end of the second year of full-time study.

Counselling Psychology for Community Settings

Degree of Master of Education

This degree program provides individuals with the opportunity to learn and develop counselling skills appropriate for a variety of work settings. Students are encouraged to develop their courses and practicum learning experiences to suit their own goals. Examples of the types of goals for which suitable programs of study could be developed are adult counselling, college and university counselling centres, career counselling, geriatrics counselling, multicultural counselling, and community mental health and family life centres. The program of study provides students with the basic preparation for certification as a Certified Canadian Counsellor (CCC) with the Canadian Counselling Association (CCA).

The M.Ed. in Counselling Psychology for Community and Educational Settings requires ten half-courses plus a comprehensive examination. The six half-courses required in Counselling Psychology include one in counselling, group theory, ethics, and a practicum. Arrangements regarding a practicum placement must be made in consultation with the Coordinator of Internship and Counselling Services. M.Ed. students can also pursue research in the area of Work and Career which is offered jointly by the Counselling Psychology program and the Adult Education and Community Development program.

Degree of Doctor of Education

Counsellor training in this degree program emphasizes the role of the counsellor in the educational system, the acquisition of effective supervisory and consultative skills, and the development and assessment of student counselling services in addition to the advanced study of counselling theory and practice. Graduates will be prepared to take leadership positions in the field of educational counselling; as educators in colleges and institutes of education; as directors and coordinators of school guidance programs; as specialists in the provision of counselling-related, in-service

training for school personnel; and as providers of advanced levels of personal counselling to school, college, and related populations.

This option will be especially attractive to individuals who have demonstrated a career commitment to the provision of counselling services in an educational and community setting.

All students are required to take courses related to the development of competence in counselling theory and practice and to the development of research skills. The Ed.D. program requires a minimum of eight half-courses (including practicum and internship) and a doctoral dissertation. Six of the eight half-courses must be in Counselling Psychology. Each student must complete a minimum of one year of full-time, on-campus study and, in addition, serve a period of internship in an appropriate setting.

Practicum and Internship

Students are required to complete a 500-hour practicum in conjunction with the doctoral practicum course AEC 3217Y. In addition, students are required to complete 500 hours of internship. All internship arrangements must be made in consultation with the Coordinator of Internship and Counselling Services.

Thesis

All students must develop, complete, and defend in an oral examination, a doctoral dissertation. The content of such dissertation research may address theoretical issues applicable to counselling concerns and practice, relate to the development of programs in a variety of educational or applied settings, or in some other way contribute to the development and practice of counselling psychology.

Guidance and Counselling for Schools

Degree of Master of Education

This degree program helps meet the need for well-prepared practitioners in the field of guidance and counselling in the schools. Therefore, strong preference for admission to this degree program is given to experienced teachers who are interested in specializing in guidance and counselling in the schools. The program of study provides students with the basic preparation for certification as a Certified Canadian Counsellor (CCC) with the Canadian Counselling Association (CCA). Students completing this M.Ed. program may have their degree credited toward Parts I and II of the Ontario College of Teachers' (OCT) Specialist Certificate in Guidance.

Students may pursue the M.Ed. degree on a full-time or part-time basis. The requirements are ten half-courses plus a comprehensive examination. The program of study, planned by the student in consultation with the faculty advisor, cannot be reduced because of guidance certificates held. Within the six half-courses required in Counselling Psychology, every program of study must include counselling and group theory and a practicum experience.

Courses of Instruction

Not all courses are given each year. Please consult the course schedules available from the Registrar's Office.

AEC 1202H	Theories and Techniques of Counselling/ <i>Staff</i>
AEC 1203Y+	Practicum in Counselling/ <i>M. A. Guttman, L. Stermac, J. E. Watson, J. Silver, Staff</i>
AEC 1207H	Counselling Topics in Sexual Orientation and Gender Identity Diversity/ <i>J. R. Gillis</i>
AEC 1214H	Critical Multicultural Practice: Diversity Issues in Counselling/ <i>R. Moodley</i>
AEC 1219H	Ethical Issues in Professional Practice in Psychology/ <i>M. Schneider, Staff</i>
AEC 1228H	Individual and Group Psychotherapy: Family and Marital Counselling/ <i>Staff</i>
AEC 1229H	Individual and Group Psychotherapy for Counselling/ <i>Staff</i>
AEC 1245H	Brief Counselling Strategies/ <i>Staff</i>
AEC 1252H	Individual Reading and Research in Counselling Psychology: Master's Level/ <i>Staff</i>
AEC 1253H	Feminist Issues in Counselling Psychology and Psychotherapy/ <i>K. Jasper, Staff</i>
AEC 1261H	Group Work in Counselling/ <i>Staff</i>
AEC 1262H	Educational and Psychological Testing for Counselling/ <i>Staff</i>
AEC 1263H	Seminar in Research Methods for M.A. Students/ <i>Staff</i>
AEC 1266H	Career Counselling and Development: Transition from School to Work/ <i>C. Chen</i>
AEC 1267Y	Advanced Practicum in Counselling/ <i>Staff</i>

+ Extended course. For academic reasons, course work is extended into session following academic session in which course is offered.

AEC 1268H	Career Counselling and Development: Transitions in Adulthood/ <i>C. Chen</i>
AEC 1269H	Use of Guided Imagery in Counselling and Psychotherapy/ <i>N. Josefowitz</i>
AEC 1275H	Special Topics in Counselling Psychology (Master's)/ <i>Staff</i>
AEC 1278H	Cognitive Therapy/ <i>N. Josefowitz</i>
AEC 1289H	Community Mental Health/ <i>M. Schneider</i>
AEC 3211H	Counselling and Researching in Context: Critical Perspectives on Counselling and Health Promotion Research/ <i>N. Piran</i>
AEC 3215H	Seminar in Counselling Psychology: Part I/ <i>J. Watson</i>
AEC 3216H	Seminar in Counselling Psychology: Part II/ <i>Staff</i>
AEC 3217Y+	Practicum in Counselling Psychology/ <i>N. Piran</i>
AEC 3218H	Research Seminar in Counselling/ <i>L. Stermac</i>
AEC 3224H	Individual Cognitive and Personality Assessment/ <i>C. Mackenzie</i>
AEC 3225H	Assessment and Diagnosis of Personality and Psychopathology/ <i>J. R. Gillis or Staff</i>
AEC 3234Y	Research Seminar in Multicultural Studies/ <i>R. Moodley</i>
AEC 3253H	Individual Reading and Research in Counselling Psychology: Doctoral Level/ <i>Staff</i>
AEC 3258H	Special Topics in Counselling Psychology (Doctoral)/ <i>Staff</i>
AEC 3260H	Psychopathology and Diagnosis/ <i>L. Stermac</i>
AEC 3267H	Training for Counselling Supervision/ <i>J. A. Silver</i>
AEC 3268H	Internship/ <i>J. A. Silver</i>

Interprogram Courses

The following courses are accepted for credit in the Counselling Psychology program and will satisfy that program's specialization requirements. For descriptions, see the relevant programs.

AEC 1173H	Creativity and Wellness: Learning to Thrive/ <i>S. Miezitis</i>
AEC 3173H	Effecting Change: Creating Wellness/ <i>S. Miezitis</i>
AEC 1400H	Special Topics in Adult Education and Counselling Psychology/ <i>Staff</i>

-
- AEC 1405H Introduction to Qualitative
Research: Part I/*B. Burstow,
Staff*

Web: www.utias.utoronto.ca

The University of Toronto Institute for Aerospace Studies (UTIAS) offers a complete undergraduate and graduate program in aerospace science and engineering. Since the establishment of UTIAS during the 1940s, the aerospace field has evolved into a multidisciplinary

activity that finds itself at the cutting edge of high technology research and development.

Graduate programs leading to the M.Eng., M.A.Sc., and Ph.D. degrees are offered. Only the M.Eng. may be taken on a part-time basis. The M.A.Sc. program is research oriented and includes a major thesis, while the M.Eng. program is oriented towards professional engineering practice and consists primarily of course work. Advanced graduate research may be undertaken at the Ph.D. level.

The information provided here supplements the SGS general and degree regulations. Further details concerning departmental regulations are available in the Graduate Office at UTIAS.

Areas of Research

Many of the research areas listed below apply directly to major scientific and engineering areas of emphasis within the aeronautical and space industry in Canada.

1 Aircraft Flight Systems

Aircraft Design: Stability and control of aircraft; aeroelasticity; lighter-than-air technology; remotely piloted vehicles.
 Vehicle Simulation: Aircraft, ground vehicle and human-machine systems; aircraft control; system integration; flight test.

2 Aerodynamics, Fluid Dynamics and Propulsion

Gasdynamics: Hypersonics; unsteady and high temperature gasdynamics; explosions; blast wave phenomena; turbulent combustion.
 Aerodynamics: Subsonic, transonic, supersonic and unsteady aerodynamics; turbulence; aeroacoustics.
 Propulsion: Propellers; ram jets; flapping wings; gas turbines.
 Computational Fluid Dynamics: Flow solvers for high Reynolds number turbulent and reactive flows; aerodynamic optimization; aerodynamic applications; and aerospace propulsion.

3 Structures and Multidisciplinary Optimization

Composite Structures and Structural Analysis: Structural optimization, design with uncertainty; design for cost; shape optimization; enhanced beam and plate theory; sandwich structures; process modelling of thick thermoset laminates; topological optimization of multi-material and active structures; topological optimization for many load cases.

4 Space Systems Engineering

Space Vehicles: Dynamics and control of flexible spacecraft; damping; gyroelasticity; system identification.

Microsatellites.

Space Robotics: Dynamics and control of flexible manipulator systems; variable-geometry truss manipulators; intelligent control systems; neural networks; laboratory simulation of robotic systems; mobile robots; intelligent coordination; evolutionary approaches to control.

5 Engineering Physics

Fusion Energy: Plasma-surface interactions; advanced materials for fusion reactors; ultra-high vacuum systems; fusion fuels; experimental and computer modelling studies on tokamaks in the U.S. and Europe.

Degree of Master of Engineering

1 Applicants to the M.Eng. degree program shall hold the degree of Bachelor of Applied Science of this University or an equivalent four-year degree in engineering.

2 Under the guidance of the graduate coordinator or a staff supervisor, a student selects a program of study which consists of 10 courses. Individual programs will be arranged to make up for background deficiencies.

3 The program may be pursued on a full-time or part-time basis.

Degree of Master of Applied Science

1 Applicants to the M.A.Sc. degree program are admitted under the SGS general regulations. Qualified graduates in engineering, mathematics, physics, or chemistry are encouraged to apply. Individual programs will be arranged to make up for any background deficiency.

2 A program of study will consist of a minimum of five courses, one of which must be AER 1800H *Research Seminar in Aerospace Science and Engineering*, and a thesis based on research or development, selected in consultation with the student's supervisor. All of the required courses must be completed during the first year of the program.

3 Research performance of M.A.Sc. students is assessed by a Research Assessment Committee (RAC), which includes the student's supervisor.

4 It is anticipated that M.A.Sc. students will complete their degree requirements in 18 months.

5 Students interested in pursuing a Ph.D. degree, who have achieved excellent performance in an M.A.Sc. program at UTIAS, are encouraged to transfer directly into a Ph.D. program, under the same supervisor, at the end

of their first year of M.A.Sc. studies. Approval for transfer will be based on the student's research ability, research progress during the first year, and academic standing. In what follows, students transferring from an M.A.Sc. to a Ph.D. program shall be referred to as 'transfer students'.

Degree of Doctor of Philosophy

1 Ph.D. applicants must have an M.A.Sc. degree in engineering, mathematics, physics, or chemistry and demonstrated ability to perform advanced research. Applicants with a bachelor's degree who wish to pursue Ph.D. studies at UTIAS will initially be admitted into the M.A.Sc. program and will be considered for direct transfer into the Ph.D. program; see above.

2 Ph.D. students must be registered continuously for every session, including the summer session, on a full-time basis until all degree requirements have been completed. Ph.D. students starting with an M.A.Sc. or M.Eng. degree must spend a minimum of two years in the program. The minimum for transfer students is three years from the date of registration in the M.A.Sc. program.

3 Following acceptance into a Ph.D. program, the student shall undertake a program of study under the guidance of a Doctoral Examination Committee (DEC) which includes the student's supervisor.

4 A Ph.D. student's study program includes course work and a thesis which must be based on research conducted while registered for the Ph.D. program. Ph.D. students starting with an M.A.Sc. or M.Eng. degree require four courses. Transfer students need two courses in addition to the five completed prior to the M.A.Sc. to Ph.D. transfer for a total of seven courses. All courses must be completed during the first two years in the Ph.D. program.

5 It is anticipated that a student with a master's degree in a discipline appropriate to the field of Ph.D. study will complete the Ph.D. program on a full-time basis in less than four years. The anticipated period for transfer students is less than five years from the date of registration in the M.A.Sc. program. The DEC plays an important role in assisting students to meet this goal. The functions of the DEC are to:

- a ascertain the suitability of the student for advanced research,
- b assess the thesis topic,
- c conduct formal reviews of the student's progress at least once a year (unsatisfactory progress may result in the termination of the student's candidacy), and

d provide first assessment of the completed thesis.

6 Program Milestones:

a The first DEC meeting is held within six months of Ph.D. program start (or date of transfer for transfer students); the aim is to identify the topic and scope of the thesis.

b The second DEC meeting (approximately 1.5 years after Ph.D. start) is the Qualifying Examination, which determines whether the student should continue in the program or whether his or her candidacy should be terminated.

c Subsequent DEC meetings are held at least once a year.

d Upon completion of the thesis, the student presents the thesis at a Departmental Doctoral Seminar before defending it at the Final Oral Examination as prescribed under the SGS degree regulations in this calendar.

7 Prior to convocation, Ph.D. students must prepare at least one formal manuscript, based on the thesis, for publication in refereed journals or refereed conference proceedings.

Financial Support

Guaranteed Minimum Financial Support

In accordance with the UTIAS *guaranteed financial support policy*, students with satisfactory academic performance will be guaranteed a minimum level of financial support for the first sixteen months of M.A.Sc. studies and for years one to four in the Ph.D. program. This minimum level of support will include all external scholarships and fellowships. The minimum for the current academic year is set at \$20,000/year for non-visa students and \$26,700/year for visa students. Students who have major external scholarships (e.g., NSERC, OGS, OGSST, etc.) will receive \$7,500/year supplements, bringing their total support well above the minimum level. Students are requested to apply for external scholarships. All external awards, major or otherwise, must be disclosed to the UTIAS Graduate Office at the time of receipt of notification of the award.

Students in years of study not covered by the *guaranteed financial support policy* may receive financial assistance from their supervisors' research grants/contracts.

External Scholarships/Fellowships

Students are requested to apply for all available external scholarships/fellowships for which they are eligible. Major Canadian scholarships include *NSERC*, *OGS*, and *OGSST*; NSERC and OGSST are restricted to Canadian citizens and permanent residents, but the OGS is available to visa students. Visa students are strongly

encouraged to apply for scholarships in their own countries for studies abroad.

The Kenneth M. Molson Fellowship for Studies in Aerospace Engineering at UTIAS

This fellowship was established with a generous donation from the Kenneth M. Molson Foundation and matching funds from the University of Toronto and the Ontario Government. The income from the fund is used to contribute to the financial support of first-year M.A.Sc. students and Ph.D. students in years 1 to 4. The award is made for one year at a time, and Ph.D. students need to reapply for subsequent years. The selection is in accordance with the University's Policy on Student Awards and the conditions specified by the Ontario Student Opportunity Trust Fund program. Students qualified for this award are required to complete an application on the request of the UTIAS Graduate Office.

Teaching Assistantships

Teaching Assistantships are available to students with appropriate qualifications. Students must apply for teaching assistantships during the summer before the academic year commencing in September. Applications are available on the UTIAS Web site.

Courses of Instruction

This list represents course offerings at the time of publication. Course descriptions are available on the UTIAS Web site.

Aircraft Flight Systems

AER 0503H	Aeroelasticity/ <i>P. R. Grant</i>
AER 1202H	Advanced Flight Dynamics/ <i>H. T. Liu</i>
AER 1211H	Human Control of Flight Systems/ <i>P. R. Grant</i>
AER 1214H	Airplane Dynamics (Flight Laboratory)/ <i>P. R. Grant</i> , <i>J. H. de Leeuw</i>
AER 1215H	Aerodynamics and Flight Mechanics of Rotorcraft/ <i>L. D. Reid</i> , <i>J. H. de Leeuw</i>
AER 1220H	Remotely Piloted Flight Vehicles/ <i>J. D. DeLaurier</i>

Aerodynamics, Fluid Dynamics and Propulsion

AER 0510H	Aerospace Propulsion/ <i>J. P. Sisljan</i>
AER 1301H	Kinetic Theory of Gases/ <i>C. P. T. Groth</i>
AER 1302H	Viscous Flows and Boundary Layers/ <i>C. Walsh</i>

AER 1304H	Fundamentals of Combustion/ <i>Ö. L. Gülder</i>
AER 1306H	Special Topics in Reacting Flows/ <i>Ö. L. Gülder</i>
AER 1310H	Turbulence Modelling/ <i>C. P. T. Groth</i>
AER 1311H	Unsteady Gasdynamics/ <i>J. J. Gottlieb</i>
AER 1312H	High Temperature Compressible Flows/ <i>J. J. Gottlieb</i>
AER 1314H	Dynamics of Dusty Gases (reading course)/ <i>J. J. Gottlieb</i>
AER 1316H	Fundamentals of Computational Fluid Dynamics/ <i>D. W. Zingg</i>
AER 1318H	Topics in Computational Fluid Dynamics/ <i>D. W. Zingg</i>
AER 1320H	Air-breathing Propulsion/ <i>J. P. Sislian</i>

Structures and Multidisciplinary Optimization

AER 0501H	Advanced Mechanics of Structures/ <i>J. R. Martins</i>
AER 1401H	Introduction to Composite Materials/ <i>J. S. Hansen</i>

Collaborative Program in Aging, Palliative and Supportive Care Across the Life Course
 Suite 106, 222 College Street
 University of Toronto
 Toronto, Ontario M5T 3J1
 Canada

Telephone: (416) 978-0377

Fax: (416) 978-4771

Web: www.aging.utoronto.ca

The Collaborative Program prepares students for specialization in the field of aging and/or the field of palliative and supportive care, with an emphasis on viewing aging issues within the perspective of the life course. As of September 2006, the Collaborative Program offers students two options of study:

1 aging and the life course

2 palliative and supportive care

Students must apply to and register in a home participating unit (i.e., one of the graduate departments, faculties, or institutes listed below), and follow a course of study acceptable to both that unit and the Collaborative Program in Aging, Palliative and Supportive Care Across the Life Course. Applications will be considered for the following degree programs:

Adult Education and
 Counselling Psychology ... M.A., M.Ed., Ph.D.,
 Ed.D.
 Anthropology M.A., M.Sc., Ph.D.
 Dentistry M.Sc., Ph.D.
 Exercise Sciences M.Sc., Ph.D.
 Health Policy, Management and Evaluation M.H.Sc., M.Sc.,
 Ph.D.
 Information Studies M.I.St., Ph.D.
 Medical Science M.Sc., Ph.D.
 Nursing Science M.N., M.N./M.H.Sc.,
 Ph.D.
 Pharmaceutical
 Sciences M.Sc., Ph.D.
 Psychology M.A., Ph.D.
 Public Health Sciences M.H.Sc., M.Sc.,
 Ph.D.

Rehabilitation Science M.Sc., Ph.D.
 Social Work J.D./M.S.W.,
 M.H.Sc./M.S.W.,
 M.S.W., Ph.D.
 Sociology M.A., Ph.D.
 Speech-Language
 Pathology M.H.Sc., M.Sc.,
 Ph.D.
 Women and Gender
 Studies M.A.

Application Procedures

Collaborative programs are administered under the auspices of the School of Graduate Studies. Applicants may apply concurrently to their participating graduate unit and to the Collaborative Program in Aging, Palliative and Supportive Care Across the Life Course.

1 Applicants must apply to a participating graduate unit and comply with the admission procedures of that unit.

2 Applicants must forward the following to the Program Committee of the Collaborative Program in Aging, Palliative and Supportive Care Across the Life Course:

- a** a copy of the School of Graduate Studies Application form submitted to the participating graduate unit
- b** copies of official undergraduate and graduate transcripts from all institutions previously or currently attended
- c** a résumé or curriculum vitae
- d** a letter explaining how their program of study and specific research interests relate to either (i) option 1 in aging and the life course, or
 (ii) option 2 in palliative and supportive care at the graduate level
- e for Ph.D. applicants only:** two letters of reference (with specific mention of background in either aging/life course or palliative and supportive care)

Note: Students may use copies of official documents (**a** and **b** above) for their application to the Collaborative Program in Aging, Palliative and Supportive Care Across the Life Course. These may be obtained from their home participating graduate unit.

Program Requirements

In addition to meeting the program requirements of their home department, students will be required to complete two courses (one core and one elective) at both the master's and doctoral levels for either of the two options. It is expected that the student's thesis or practicum (whichever is included in their program of study) would be in one of the two study option areas.

Upon successful completion of the requirements, students receive, in addition to the master's or doctoral degree from the home graduate unit, the notation on their transcript: "Completed the Collaborative Program in Aging, Palliative and Supportive Care Across the Life Course".

**Core Courses for Option One:
Aging and the Life Course**

Master's Level

AGE 2000H Principles of Aging/*C. Justice*

Doctoral Level

AGE 3000H Advanced Research Seminar in Aging and the Life Course/*Staff*
(AGE 2000H is a prerequisite for entry into the doctoral level of the Collaborative Program)

**Core Courses for Option Two:
Palliative and Supportive Care**

Master's Level

AGE 1000H Multidisciplinary Research Concepts in Palliative and Supportive Care/*G. Rodin, C. Zimmerman, Staff*

Doctoral Level

AGE 1500H Advanced Research Methodologies in Palliative and Supportive Care/*G. Devins, Staff* (AGE 1000H is a prerequisite for entry into the doctoral level of the Collaborative Program)

Elective Courses

AEC 1131H Special Topics in Adult Education: Alternative Methods of Researching Aging, Illness and Health/*Staff*
AGE 2500H Current Research Topics in Aging and the Life Course/*Staff*
DEN 1003Y Preventive Dentistry/*H. Limeback*
EXS 5501H Physical Activity and Aging
NUR 1037H Aging and Place: Social and Policy Transitions/*G. Andrews*
NUR 1056H Places, Programs, and People Who Provide Care/*Staff*
NUR 1058H Aging, Gender, and Equity/*A. Bierman*
REH 1520H Physiological Factors Constraining Rehabilitation of the Elderly/*K. Lundon, S. G. Thomas*
REH 1620H Methodological Issues in Research on Aging and Health/*A. Colantonio, C. Cott*

REH 1640H Sociology of Disability/*K. K. Yoshida*
SLP 1533Y Aphasias/*E. Rochon*
SLP 1534Y Motor Speech Disorders/*Staff*
SLP 2501H Special Topics in Communication Disorders/*Staff*
SLP 2502Y Specialized Study in Communication Disorders/*Staff*
SOC 6124H The Life Course in Modern Society/*Staff*
SOC 6707H Intermediate Data Analysis/*B. Wheaton*
SWK 4612H Social Work and Aging: Integrated Policy and Practice/*L. McDonald, E. Marziali*
SWK 4613H Social Work Practice with the Aged: Policy and Practice/*Staff*
SWK 4618H Special Issues in Gerontological Social Work

Requests to approve other courses as equivalent to fulfil program requirements may be made to the Program Committee.

Students taking either option may choose the masters core course in the other option as an elective.

Additional Electives for Option Two Only

RLG 2018H Religion and Bioethics
RLG 2037H Religion and Healing
PHL 2145H How Bioethics Fits into Other Disciplines
PHL 2146Y Topics in Bioethics
HAD 5301H Intro to Clinical Epidemiology and Health
HAD 5730H Research Economics I: Economic Evaluation
HAD 5771H Resource Allocation Ethics
LAW 582H Privacy, Property, and the Human Body
LAW 338H Public Health Law
MSC 1051H Research Bioethics
MSC 1060H Biostatistics for Health Sciences
MSC 1090H Intro to Clinical Biostatistics
MSC 3003Y Empirical Approaches in Bioethics
NUR 1021H Nursing Ethics
NUR 1023H Critical Issues in the Design of Controlled Trials of Behavioural Health Care Interventions
NUR 1024H Foundations of Qualitative Inquiry
NUR 1025H Doing Qualitative Research
NUR 1026H Evaluating Interventions in Clinical Settings

NUR 1046H Persistent Illness: Theoretical, Research, and Practice Implications

NUR 1050H Coping With Illness
NUR 1051H Assessment and Management of
Common Responses to Illness

Ancient and Medieval Philosophy (Collaborative Program)

Program Committee

B. C. Inwood, BA, MA, PhD, FRSC, Canada Research Chair/Classics

L. P. Gerson, BA, MA, PhD/Philosophy

P. King, PhD/Philosophy (**Director**)

E-mail: cpamp@chass.utoronto.ca

Web: www.chass.utoronto.ca/~cpamp/

The graduate departments of Philosophy and Classics, and the Centre for Medieval Studies participate in the Collaborative Program in Ancient and Medieval Philosophy. The program operates only at the doctoral level. Students who wish to enrol in the collaborative program must apply to and be admitted to both the collaborative program and a graduate degree program in one of the collaborating departments. The program is administered by the Program Committee which is drawn from all three units and is chaired by the Director who is a member of the committee. The three units contribute courses and provide facilities and supervision of doctoral research.

All applicants must meet the admission criteria of the unit through which they wish to enrol and must fulfil the normal requirements of the Ph.D. in their home unit. Their program of study must also be approved by the Program Committee and must include the following elements:

- 1** A language competence examination at the appropriate level (in at least one of Greek, Classical or Medieval Latin, or Arabic, as relevant) consisting of unseen translation must be successfully completed before the major field or area examinations are first attempted.
- 2** Area or major field examinations must contain a paper involving translation from at least one of Greek, Classical or Medieval Latin, or Arabic (as appropriate to the area or field). This examination will be based on a substantial list of texts relevant to the field or area.
- 3** Ph.D. students in Ancient and Medieval Philosophy are required to have a reading knowledge of two modern languages other than English.
- 4** Each student must take and successfully complete two graduate half-courses, or the equivalent, in some area of philosophy other than the history of philosophy.

In most cases, some of these elements will be fulfilled by program requirements in the doctoral program of the home unit.

Students will normally concentrate in either ancient or medieval philosophy, though it is not necessary to indicate such specialization formally. Successful completion of the program permits the designation "Completed Collaborative Program in Ancient and Medieval Philosophy" to appear on the student's transcript.

Interested students should contact the director and the graduate coordinator of the unit in which they intend to register.

Ancient Greek and Roman History (Joint Collaborative Program)

Program Committee

B. Akrigg, BA, MA, PhD/University of Toronto
 C. F. M. Bruun, BA, MA, PhD/University of Toronto
 (*Director*)
 S. N. Mason, BA, MA, PhD/York University
 J. C. Trevett, BA, MA, DPhil/York University

Address:

Joint Collaborative Program in Ancient Greek
 and Roman History
 Department of Classics
 125 Queen's Park Crescent
 University of Toronto
 Toronto, Ontario M5S 2C7
 Canada

Telephone: (416) 978-5513

Fax: (416) 978-7174

E-mail: grad.classics@utoronto.ca

Web: www.chass.utoronto.ca/classics/

Nature of the Joint Collaborative Program

The Department of Classics at the University of Toronto and the Graduate Program in History at York University participate in the Joint Collaborative Program in Ancient Greek and Roman History. The program in History provides a broad historical context and methodological framework; Classics provides integration with other fields of study within the ancient world and access to linguistic, cultural, and ancillary disciplines.

The program operates only at the doctoral level, and students are enrolled in one of the two units. The program is administered by a Program Committee of four faculty members, two from each unit, one of whom is the Director. The two units contribute courses and provide facilities and supervision for research.

Admission

All applicants must meet the admissions criteria of the unit through which they wish to enrol. Interested students register in the joint collaborative program with the approval of the Program Committee upon admission to the Ph.D. program in either unit. A strong background in ancient history will be expected of all interested applicants, as will a level of preparation in the ancient languages and languages of research that is appropriate for the institution in which they register.

Interested students should contact the director of the joint collaborative program as well as the graduate coordinator of the unit in which they intend to register.

Program Requirements

All students will take the required seminars CLA 3020H, CLA 3200Y, as well as three graduate half-courses in Greek and Roman history offered by the collaborating units. They will take all other courses to fulfil the requirements of either the Graduate Program in Classics at the University of Toronto or the Graduate Program in History at York University. Students take all examinations and meet all language requirements of their home unit. The Program Committee approves the major and minor fields of all students in the joint collaborative program; the major field must always be in Greek and Roman history, whereas the minor field will normally be in a complementary area of ancient history but can, where appropriate, be selected from other areas of study covered by the participating units. All students in the joint collaborative program must complete the requirements of the collaborative program in addition to those of their home unit. Successful completion of the program permits the designation "Completed Joint Collaborative Doctoral Program in Ancient Greek and Roman History" to appear on the student's transcript.

Web: www.chass.utoronto.ca/anthropology

The Department of Anthropology offers research training and courses of instruction in the fields of archaeology, linguistic anthropology, medical anthropology, physical/biological anthropology, and social-cultural anthropology.

Admission Requirements

Applicants are admitted to the M.A., M.Sc., and Ph.D. programs under the general regulations of the School of Graduate Studies.

All applicants to the M.A. and M.Sc. programs are required to have at least a B+ average, or equivalent, before being considered by the Departmental Admissions Committee.

Admission to the Ph.D. program is offered only to excellent students who, by the time of enrolment, have completed an M.A. degree in anthropology (or a cognate subject) or have earned the equivalent of a four-year B.A. with a concentration in anthropology. Applicants from both levels are expected to have achieved grades averaging the equivalent of a University of Toronto A- or better in their last full year of study. Most successful applicants will have finished or be in the process of completing an M.A. or M.Sc. However, students with exceptionally strong undergraduate backgrounds (i.e., with a cumulative GPA of 3.85 or above) are invited to apply for direct entry to the Ph.D. program by indicating this preference on their application form. Applicants are encouraged to identify departmental members with whom they want to conduct Ph.D. research. The Depart-

ment regrets that it cannot admit students to the Ph.D. program, regardless of their qualifications, unless a supervisor is available.

Applicants for M.A., M.Sc., and Ph.D. programs must also satisfy the Department that they have the appropriate background to enter a particular program of graduate study. In addition to two letters of reference, a brief statement of interest (not exceeding 1,000 words) is required for the admissions application.

Program Requirements

Degree of Master of Arts and Master of Science

The Department offers a Master of Arts degree program in the five sub-fields of Anthropology and a Master of Science degree program, normally in archaeology, medical anthropology, and physical anthropology.

Degree of Master of Arts

- 1 The M.A. program normally extends over a 12-month period lasting from September to September, formal instruction being offered from September to April.
- 2 The M.A. program may also be taken on a part-time basis.
- 3 Students are required to complete the equivalent of four full courses which must include ANT 1000H and ANT 2000Y.

Degree of Master of Science

- 1 The M.Sc. program is a two-year program that is normally completed by the summer of the second year.
- 2 The M.Sc. program may also be taken on a part-time basis.
- 3 Students are required to complete the equivalent of five full courses which must include ANT 1000H and ANT 2500Y. Of the other 3.5 full courses, 1.5 courses will normally be science courses in archaeology, medical anthropology, physical anthropology, or related disciplines depending on the student's program.

Degree of Doctor of Philosophy

The Ph.D. is primarily a research degree. A program of study is designed for each student to ensure competence in a field of research, culminating in the writing of a thesis. At the beginning of the year, each student will submit, with the SGS Enrolment Form, a Program Statement describing his or her plan to meet program requirements. Each student will normally be involved in fieldwork, in the broad meaning of the term, and in theoretical analysis. Depending on subfield or area of research,

completion of the Ph.D. may take longer than the indicated program length below. See Departmental Handbook for details.

Direct Entry Students

Students who enter the Ph.D. program from a B.A. or B.Sc. degree program are entering a five-year Ph.D. program. They will take a minimum of five full graduate courses, of which three will normally be taken in the first year. The remaining two courses can be taken in the second year, when work on the research proposal is also expected to begin. Students will need to attain an annual average of at least A- to continue in the Ph.D. program in good standing. Those entering the Ph.D. program from a B.A. or B.Sc. are expected to have submitted their research proposals by the end of the third session of their third year (e.g., August 31 for students who start in September).

Entry with a Master's Degree

Students who enter the Ph.D. program from a M.A. or M.Sc. degree program are entering a four-year Ph.D. program. They will take a minimum of three full courses. Students entering from a master's degree program will need to attain at least an A- average in their course work to continue in the Ph.D. program in good standing; they are expected to have submitted their research proposals by the end of the third session of their second year (e.g., August 31 for students who start in September).

All Ph.D. Students

Before proceeding to full-time research, students must complete these program requirements:

- 1 be resident on campus for one year.
- 2 complete a minimum of three full courses, at least 1.5 of which are normally in anthropology.
- 3 gain experience in research methods and design. This requirement can be filled by completing course work in methodology or, with the department's assent, undertaking faculty-supervised fieldwork or laboratory research.
- 4 present and defend a thesis proposal.

Also students must demonstrate an adequate knowledge of at least one language other than English, unless their program of study requires the intensive and time-consuming mastery of another research tool. Demonstration of adequate language or equivalent knowledge can be accomplished in a variety of ways, a list of which is available in the Department of Anthropology's Graduate Student Handbook.

Collaborative Programs

The Department of Anthropology participates in the following collaborative programs:

- 1 Aboriginal Health
- 2 Addiction Studies
- 3 Aging, Palliative and Supportive Care Across the Life Course
- 4 Asia-Pacific Studies
- 5 Environmental Studies
- 6 Ethnic and Pluralism Studies
- 7 International Relations
- 8 Jewish Studies
- 9 South Asian Studies
- 10 Women's Studies

For details on these programs, see separate entries in this calendar.

Courses of Instruction

Not all courses are offered every year. Check with the Department for current year's offerings.

General

- ANT 1000H Anthropology: Theoretical Paradigms and Case Studies (Credit/No Credit)
- ANT 1001H Social Theory and Method in Anthropology
- ANT 1002H Evolutionary and Ecological Theory and Method in Anthropology
- ANT 1096H Quantitative Methods I/Staff
- ANT 1099H Quantitative Methods II/Staff
- ANT 1155H,Y+ Research (or reading seminar)/Staff
- ANT 1156H,Y+ Research (or reading seminar)/Staff
- ANT 1157H,Y+ Research (or reading seminar)/Staff
- ANT 1158H,Y+ Research (or reading seminar)/Staff
- ANT 2000Y° M.A. Research Paper
- ANT 2500Y° M.Sc. Research Paper
- JAC 1001H Media, Mind, and Society/Staff
- JTH 3000H Coordinating Seminar in Ethnic and Pluralism Studies (for students in the Ethnic and Pluralism Studies Collaborative Program)

° Courses which may continue over a program. The course is graded when completed.

+ Extended course. For academic reasons, course work is extended into session following academic session in which course is offered.

Archaeology

- JPA 1040Y Advanced Physics and Archaeology/E. B. Banning, R. M. Farquhar
- ANT 4020H Archaeology Theory and Technique/Staff
- ANT 4022H Culture Resource Management/M. A. Latta
- ANT 4025H Archaeology of Eastern North America/Staff
- ANT 4026H Arctic Archaeology/T. M. Friesen
- ANT 4027H,Y Archaeology of Western North America/Staff
- ANT 4029H Lithic Technology/M. Chazan
- ANT 4035H Far Eastern Culture History/G. W. Crawford
- ANT 4037H,Y+ Faunal Archaeo-Osteology/T. M. Friesen
- ANT 4038H Archaeology of Urban Development/Staff
- ANT 4039H Origin and Nature of Food Producing Societies/D. G. Smith
- ANT 4040H Archaeology of Hunter-Gatherers/T. M. Friesen
- ANT 4041H Landscape Archaeology/E. B. Banning
- ANT 4050H Zooarchaeology/T. M. Friesen
- ANT 4060H Specific Problems: Old World/Staff
- ANT 4065H Specific Problems: New World/G. G. Coupland
- ANT 4066H Household Archaeology/G. G. Coupland
- ANT 4067H Historical, Industrial, and Ethnohistoric Archaeology: the Science of Documented Societies/M. Latta
- ANT 4068H Archaeology of Technology/H. M.-L. Miller

Linguistic Anthropology

- JAL 1155H Language and Gender/B. McElhinny

The Faculty of Architecture, Landscape, and Design offers three graduate programs leading to the degrees of Master of Architecture, Master of Landscape Architecture, and Master of Urban Design.

Degree of Master of Architecture

The Master of Architecture (M.Arch.) is a professional degree program and provides a thorough base of knowledge in history, theory, technology, ecology, society, and professional practice, while developing skills in design through an intensive sequence of design studio courses. These are supported by courses in visual communication and architectural representation, including computer modelling and other new media. The program aims to develop critical, creative, and independent thinking and research that responds to current design issues and societal change. The greater Toronto region is used as an urban laboratory for the development of new knowledge and forms of practice.

Admission Requirements

The M.Arch. is a 3.5-year program intended for individuals with a four-year bachelor's degree (B.A., B.Sc., B.A.Sc.) demonstrating a final year grade point average of at least mid-B, and showing leadership potential in the field. The following courses are required for admission: secondary calculus, secondary physics, and university architectural history (half-credit). Preparation in the visual arts, such as drawing, sculpture, graphics, photography, film, or new media, as well as computing and advanced writing skills is recommended. The course of study is rigorous and comprehensive, preparing graduates for the full range of professional activities in architecture. The core program is extensive, and students are required to use their electives to develop an area of special skill and knowledge through an independent study program that culminates in a design thesis.

Program Requirements

Students study full-time, taking all required courses in each given session. Students must take a total of 17.5 full-course equivalents (FCE): 15.0 FCE are in core courses and 2.5 FCE are in electives. Within the elective requirements, 1.0 FCE must be in the History and Theory stream. A B- grade in two design studio courses or a B- grade in any three courses will normally result in a recommendation to the School of Graduate Studies to terminate the student's candidacy for the degree program. The M.Arch. program is normally expected to be completed in 7 sessions (3.5 years); however, it should be noted that the time limit to complete the degree requirements is 6 years.

There is no language requirement for this program of study other than proficiency in English. Writing support is integrated into the program in order to develop specialized skills in writing which are essential to effective learning and communication in the design fields.

Second Year Advanced Standing Option in the Master of Architecture

The M.Arch. offers an advanced standing option for individuals who possess a four-year non-professional bachelor degree in architectural studies, environmental design, or comparable degree focusing on the built environment. Students must have previously completed, at minimum, three design studio courses, two courses in visual communications or representation, two courses in architecture history and theory (one in twentieth-century), and two courses in architectural technology and ecology. The course of study includes 12.5 FCE over five sessions (2.5 academic years), including two core design studios, two option design studios (4.0 FCE), thesis preparation and research (0.5 FCE), a design thesis (1.5 FCE), and five elective courses (2.5 FCE). Admission to the advanced standing option is based on the merits of the student's overall academic background and strength of design portfolio as evaluated by the M.Arch. admissions committee. Each applicant to the M.Arch. program with a suitable undergraduate degree will be evaluated for this option during the admissions process.

Post-Professional Advanced Standing Option in the Master of Architecture

The M.Arch. offers a post-professional advanced standing option for those individuals who are interested in pursuing advanced studies in architecture beyond their professional degree. The prerequisite for entry into the third-year of the M.Arch. program is the pos-

session of an accredited professional degree from a recognized university. Applicants must have completed all requirements for an accredited professional degree. The course of study includes 7.5 FCE over three sessions (1.5 academic years) of study including a proseminar (0.5 FCE), thesis preparation and research (0.5 FCE), two design studio options (1.0 FCE each), a design or research thesis (1.5 FCE), and six elective courses (0.5 FCE each). The Post-Professional Advanced Standing Option in the M.Arch. does not grant a professionally accredited degree.

Degree of Master of Landscape Architecture

The Master of Landscape Architecture (M.L.A.) is a professional program which focuses on urban landscape architecture, design, and theory within a challenging studio-based curriculum. Integrated courses in history, technology, and the environment, as well as options for free electives, provide a comprehensive professional landscape architecture education.

Admission Requirements

The M.L.A. is a three-year professional program for individuals who have completed a four-year bachelor's degree (B.A., B.Sc., B.A.Sc., B.E.S., B.F.A., B.Com.), with a minimum average of mid-B, and have demonstrated leadership potential in the field. Preference is given to individuals who have completed a balanced undergraduate education that includes study in the arts, sciences, and humanities. The following specific courses at the undergraduate level are highly recommended: biology/ecology, geography, English, and history. Preparation in the visual arts, such as drawing, sculpture, graphics, photography, film, or new media, as well as in computing and advanced writing is recommended.

Program Requirements

Students study full-time, taking all required courses in each given session. Students must take a total of 15.5 full-course equivalents (FCE): 14.0 FCE are in core courses and 1.5 FCE are in electives. Within the elective requirements, it is recommended that 1.0 FCE be taken in other academic divisions of the University. A B- grade in two design studio courses or a B- grade in any three courses will normally result in a recommendation to the School of Graduate Studies to terminate the student's registration in the degree program. The M.L.A. program is completed in three years; however, it should be noted that the time limit to complete the degree requirements is six years.

There is no language requirement for this program of study other than proficiency in English. Writing support is integrated into the program in order to develop specialized skills

in writing which are essential to effective learning and communication in the design fields.

Second Year Advanced Standing Option in the Master of Landscape Architecture

The M.L.A. offers an advanced standing option for individuals who possess a four year or five year bachelor's degree in architecture, architectural studies, environmental design, or comparable degree focusing on the design of the built environment. Students must have previously completed, at minimum, three design studio courses, two courses in visual communications or representation, two courses in architectural history and theory (one in twentieth-century), and two courses in architectural technology and/or ecology. The course of study typically includes 10 FCE over four sessions (two academic years) of study, including two core studios (2.0 FCE), one option studio (1.0 FCE), thesis preparation and research (0.5 FCE), a design studio thesis (1.5 FCE), core course work in technology, ecology, representation, history, and theory (3.5 FCE), and three elective courses (0.5 FCE each). Admission to the advanced standing option is based on the merits of the student's overall academic background and strength of design portfolio as evaluated by the M.L.A. admissions committee. Each applicant to the M.L.A. program with a suitable undergraduate degree will be evaluated for this option during the admissions process.

Post-Professional Advanced Standing Option in the Master of Landscape Architecture

The M.L.A. offers a post-professional advanced standing option for those individuals who are interested in pursuing advanced study beyond their professional degree. The prerequisite for entry into the third-year of the M.L.A. is the possession of an accredited professional degree from a recognized university. Applicants must have completed all requirements for an accredited professional degree. The course of study includes 5.0 FCE over two sessions (one academic year) of study including a proseminar (0.5 FCE), thesis preparation and research (0.5 FCE), a design studio option (1.0 FCE), a design or research thesis (1.5 FCE), and three elective courses (0.5 FCE each). The Post-Professional Advanced Standing Option in the M.L.A. does not grant a professionally accredited degree.

Degree of Master of Urban Design

The Master of Urban Design (M.U.D.) program prepares architects and landscape architects for design-based research and professional practice at the urban and regional scales.

The M.U.D. program is committed to design as a primary medium of operation and research in a broad intellectual framework that includes geography, environmental studies, social sciences, media studies, economics, and engineering. It aims for responsible and creative design in the context of the post-metropolis, with attention to new paradigms of urbanization, global economic restructuring, and information technology. The program emphasizes a coherent intellectual approach that is committed to analysis and critique and seeks to become the central Canadian forum for advanced research, design innovation, scholarship, criticism, and debate in urban design.

Admission Requirements

The M.U.D. is a two-year, post-professional program open to applicants with a professional degree in architecture (B.Arch. or M.Arch.) or landscape architecture (B.L.A., M.L.A.). Individuals with a degree in urban planning (M.C.P., M.U.P., or M.Sc.Pl.) may be considered for admission if their studies included a

design specialization or if they have professional design experience. All applicants must submit a portfolio of design work for review. Applicants with a planning background may also satisfy the design requirement by taking a preliminary make-up year in design in the Faculty of Architecture, Landscape, and Design.

Program Requirements

Students study full-time, taking all required courses in each given session. Students must take a total of 10.0 full-course equivalents (FCE): 7.0 FCE are in core courses including option studios and 3.0 are in electives. Two of the elective courses are to be selected from offerings in the History, Theory, and Criticism category. A B- grade in two design studio courses or a B- grade in any three courses will normally result in a recommendation to the School of Graduate Studies to terminate the student's candidacy for the degree program. The M.U.D. program is normally expected to be completed in two years; however, it should be noted that the time limit to complete the degree requirements is five years.

Knowledge Media Design (Collaborative Program)

Students with strong interests and skills in the emerging cross-disciplinary field of knowledge media design may apply to the Collaborative Program in Knowledge Media Design (KMD). As part of the Knowledge Media Institute (KMDI), the program provides a specialization for graduate students from a variety of academic backgrounds. Students must complete KMD 1001H, KMD 1002H, and two half-courses selected from a list of electives; at least one of these half-courses must be from the KMD 2001-2004 series.

INTRODUCTION

Degree Programs

The Department of Art offers graduate programs in the fields of:
1 history of art leading to the degrees of Master of Arts and Doctor of Philosophy,
2 visual studies leading to the degree of Master of Visual Studies.

Collaborative Programs

The Department participates in the following collaborative programs:

1 Book History and Print Culture

2 Knowledge Media Design

For details, see the separate entries in this calendar.

HISTORY OF ART

Admission Requirements

Students are admitted to the M.A. and Ph.D. programs under the general regulations.

Applicants to the M.A. program should have a strong overall grade average in the history of art and closely related subjects, with at least a B+ average in recent senior art history courses. The Department also welcomes applications from outstanding students with a background other than art history.

Admission into the Ph.D. program will be based on the level of academic performance in the M.A. program including an average of at least A-. Students can also be admitted directly into the Ph.D. program with a B.A. if they have an exceptionally strong academic record with a grade average of at least an A- in their art history and humanities courses during the last two years. Students in the M.A. program deemed to have achieved high academic performance can apply for transfer into the Ph.D. program at the end of the first year.

A reading knowledge of French, German, or Italian is required and will be tested at entrance. One or more additional language(s) may be required, as outlined below. Those unable to meet the language requirements for particular courses may be refused admission to them. Enrolment in all courses is limited and subject to the approval of the instructor.

All entering students will be required to take an Orientation to Art Historical Research Methods in their first year.

Students who do not hold a M.A. in Art from the University of Toronto may be required to complete at least one full-course equivalent in addition to the program requirements specified for the Doctor of Philosophy degree.

Acceptances to the Ph.D. program will be limited to students who propose theses which correspond to the research expertise of the faculty. Please see departmental Web site for faculty research profiles (www.fineart.utoronto.ca/faculty/gradfac.htm).

Degree of Master of Arts

1 Students are normally admitted to a one-session M.A.

2 Students are required to pursue the equivalent of three full graduate courses. Course work must be chosen from at least three of the four areas, designated as Ancient, Medieval, Renaissance/Baroque, and Modern/Contemporary. No more than two full courses may be taken in any one of these areas. The equivalent of one full course may be taken in another graduate department (e.g., Medieval Studies, Near and Middle Eastern Civilizations), subject to the approval of the Department of Art and of the other department concerned.

Degree of Doctor of Philosophy

In addition to the general regulations, the following special regulations for the Ph.D. should be observed.

1 Course Requirements

All Ph.D. students who are admitted after completing the M.A. are required to take, in addition to the course work in the M.A. program, at least two full graduate courses. M.A. and Ph.D. courses in combination should be in three of the following four areas: Ancient, Medieval, Renaissance/Baroque, Modern/Contemporary. If a course cuts across boundaries between two areas, it shall count as one area only. Ph.D. students admitted on the basis of a four-year B.A. must take a minimum of 4.5 full-course equivalents in art history and maintain an average grade of at least an A-.

In addition to their required half-courses, all Ph.D. students must take the methodology course offered by the department. With the approval of the Director of Graduate Studies, a student may receive credit for a course taken previously at the University of Toronto or elsewhere.

2 Progress through the Program

An interim supervisor will be assigned upon entry into the program. Before the completion of all course work and language requirements, Ph.D. students, in consultation with the Director of Graduate Studies, will confirm the participation of a supervisor with whom they will discuss plans for the comprehensive examinations.

At the end of the first and second years, the students' progress will be reviewed to ensure

that they have made satisfactory progress through the program; this includes maintaining full-time status with a GPA of A- and completion of all language requirements. Students who fail to make satisfactory progress may be required to transfer to the M.A. program with no loss of accumulated course credits.

Within the first two years for students entering with a M.A., or three years for students entering with a B.A., Ph.D. students are required to take two comprehensive examinations, one chosen from the four areas designated above and one chosen from the dissertation area. Upon the completion of all course work and language requirements, Ph.D. students must seek out and secure the participation of a prospective supervisor with whom they will discuss plans for the comprehensive examinations. The student will meet with the Examination Committee (made up of at least three members of the Department—one of whom will be the prospective dissertation supervisor—and chaired by the Graduate Coordinator or designate) in order to define the areas of the examination, the length of study, and such readings and special topics as deemed to be appropriate.

Immediately following the successful completion of the comprehensive examinations, students are expected to formally establish their Ph.D. Advisory Committee. A faculty member will have already been requested to act as the dissertation supervisor, and two other members of the graduate faculty to serve on their supervisory committee; these arrangements must be approved by the Department's Graduate Program Committee.

Working with the Advisory Committee, students will then develop a detailed proposal for their research. The length and specific nature of the proposal will be determined by the Advisory Committee and the Ph.D. student. The drafted proposal must be approved by, first, the Advisory Committee, and second, the Department's Graduate Program Committee. At some point during the dissertation stage, students will present their work to the faculty and students in an appropriate format and at a time to be determined by the supervisor in consultation with the Director of Graduate Studies.

3 Language Requirements

Ph.D. students are required to pass examinations in two languages (German, French, or Italian) if they have not already done so in the M.A. program. This requirement must be completed before taking the comprehensive exams. The appropriate languages will be set by the interim supervisor in consultation with the Director of Graduate Studies. Students focusing on

Ancient, Medieval, and Renaissance/Baroque will normally be expected to pass the examination in German as one of their two languages. This requirement must be completed before taking the comprehensive exams. Additional languages may be required depending on the research needs of the student's dissertation topic.

4 Areas of Study

Subject to availability of staff supervision, acceptances will be limited to Ph.D. students who propose theses in the following areas:

- a Ancient
- b Medieval
- c Renaissance and Baroque
- d Modern and Contemporary

VISUAL STUDIES**Degree of Master of Visual Studies**

The objective of the Master of Visual Studies (M.V.S.) program is to develop and refine the student's professional abilities and skills in
a producing contemporary visual art and
b producing exhibitions and writing incisively about contemporary art.

The M.V.S. is a professional program designed to train artists. In support of these goals, the M.V.S. program has been developed around a range of academic instruments including a practicum, course work, internships, research and writing, and art fabrication.

Students enrolled in the M.V.S. (Studio) develop a visual art practice through studio work augmented by critical and scholarly development. This objective is achieved through studio practicum and critiques; an internship within a cultural institution; course work at a graduate level; planning and implementing enhanced tutorials for undergraduate studio students; and a combination of exhibition, critical writing, and developing a professional practice.

Admission Requirements

Applicants to the M.V.S. program must have successfully completed a four-year University of Toronto bachelor's degree (B.A., B.Sc.) with significant course work in the humanities and cultural theory, or an equivalent degree from another recognized university, or a four-year B.F.A. degree from a recognized university. Applicants with an overall average of at least a B+ will be considered. Applicants normally have an exceptional portfolio from an undergraduate program or a substantial exhibition record that accompanies their portfolio.

Applicants must have a good command of English. Facility in the English language must be demonstrated by all applicants educated outside Canada whose primary language is not English and who graduated from a university where the language of instruction and examination was not English.

Applications must include:

- 1 completed SGS application form,
- 2 artist's statement that includes a description of the proposed body of work to be undertaken during the two-year program,
- 3 full curriculum vitae with details of exhibition, professional activity, and education,
- 4 documentation of recent studio or curatorial work - see details below,
- 5 three letters of recommendation.

Applicants to the M.V.S. (Studio) present a portfolio with documentation of their artworks

(video on VHS or DVD) and/or up to 20 slides or images on CD, and/or video documentation of performance, or installation. Applicants will also include a fully annotated listing for all portfolio materials that provides detailed information about media, year of production, dimensions, part of a series, full running length (in the case of media artworks), circumstances of display (in the case of installation works and of performance works).

Details are available on the program's Web site.

Program Requirements

The M.V.S. program begins in September and normally extends over two years during which the student is registered full time. All students must complete a total of 4.5 FCEs in M.V.S. and 1.5 FCEs in outside electives.

A student is supervised by a Studio/Practicum Panel made up of the Director of the M.V.S. program, a studio faculty member of the M.V.S. program who is considered the student's Principal Advisor, a second M.V.S. studio faculty, and possibly another member of the graduate faculty (not necessarily a member of the M.V.S. program).

All students are expected to participate in the M.V.S. Proseminar, a non-credit course that normally meets biweekly. The M.V.S. Proseminar enhances the student experience through a series of presentations given by visiting artists, curators, writers, and arts professionals, including the M.V.S. faculty. In this setting, presenters are encouraged to discuss works of art or exhibitions in progress, new research in the visual arts, and related areas of investigation. Through seminar style discussions, M.V.S. students participate actively in a wide range of ideas, processes and practices at work within contemporary visual art and exhibitions. On occasion, students present their work in progress within this setting, either in a group critique with an outside visitor or in a one-on-one critique with faculty or visitors.

Nature of the Collaborative Program

Graduate units in Anthropology, East Asian Studies, Economics, Geography, History, Management, Political Science, Social Work, Sociology, and Women and Gender Studies participate in the collaborative master's degree program in Asia-Pacific Studies at the University of Toronto. The collaborating units contribute courses and provide facilities and supervision for master's level research. This program is administered by a Program Committee chaired by a Program Director.

The collaborative master's degree program in Asia-Pacific Studies is designed to provide graduates with advanced training in a particular discipline and in the historical and social science studies of modern East and Southeast Asia. The major topics of emphasis in the collaborative master's degree program are political economy, modern and contemporary social history, international relations, gender, political and social change, economic development, and cultural studies. The collaborative master's degree program in Asia-Pacific Studies contributes to the development of an integrated and interdisciplinary research community in Asia-Pacific Studies at the University of Toronto.

Applicants to the collaborative master's degree program in Asia-Pacific Studies are expected to meet the admission and degree requirements of both a home unit and the pro-

gram in Asia-Pacific Studies. The collaborative master's degree program requirements can be met concurrently with, or in addition to, home unit requirements.

Students who successfully complete the requirements of the collaborative program will receive the notation "Completed Collaborative Program in Asia-Pacific Studies" on their transcript in addition to the master's degree from the home unit.

Application Procedures

Applicants who wish to enrol in the Collaborative Program must apply to and be admitted to both the Collaborative Program and a graduate degree program in one of the collaborating departments. Applicants must forward to the Director of the collaborative master's degree program the following:

- 1 a copy of the School of Graduate Studies Application Form or, for M.B.A. applicants, the Rotman School of Management Application Form submitted to a participating home graduate unit;
- 2 an application form for collaborative master's program in Asia-Pacific Studies (www.utoronto.ca/asiapacific-ma);
- 3 official undergraduate and graduate transcripts from all institutions attended previously and currently;
- 4 at least two letters of reference with specific mention of Asia-Pacific Studies background or Asia-Pacific experiences;
- 5 a statement of purpose;
- 6 a curriculum vitae.

Admission Requirements

To be considered for admission to the collaborative master's degree program in Asia-Pacific Studies, applicants should have taken the equivalent of four full-year courses with substantial Asia coverage by the time of application, or should have had substantial working or living experience in East or Southeast Asia.

Program Requirements

- 1 ASI 1000Y;
- 2 A full-course equivalent that may be
 - a a master's thesis,
 - b a major research paper in one of the full-year courses related to Asia-Pacific, or
 - c a thesis-equivalent research paper in an independent research half-course. This option must be combined with an additional half-course on Asia-Pacific listed on the Web site (www.utoronto.ca/asiapacific-ma).

By the time of graduation from the master's degree program, every student is strongly expected to have a working knowledge of an East

or Southeast Asian language as needed for his or her program of study.

The Department of Astronomy and Astrophysics is actively engaged in a wide range of observational and theoretical research on solar system dynamics, stars, stellar systems, the interstellar medium, the Galaxy, galaxies, quasars, clusters of galaxies, cosmology, and problems in general relativity. The Department has close ties with the Canadian Institute for Theoretical Astrophysics (CITA), located in the same building. This association enables our students to work and consult with leading theorists who are appointed to or are visiting CITA. In total, there are approximately 100 faculty, post-doctoral fellows, graduate students, and staff in the Department of Astronomy and Astrophysics and in CITA. Students also benefit from direct interactions with the broad range of external speakers invited to the weekly Department and CITA seminar programs and colloquia.

The David Dunlap Observatory (DDO) houses a 1.88-m telescope, the largest in Canada, which is equipped with efficient CCD spectroscopic instruments. DDO also provides shops for electronic and mechanical work. Faculty and students enjoy access to the Dupont 2.5-m telescope at Las Campanas under an instrumentation development collaboration with the Carnegie Observatories. We have an active experimental program using telescopes on long-duration stratospheric balloons, telescopes for cosmological and Galactic research.

We also use the major optical, radio, and satellite observing facilities of the world. Of particular importance are the national facilities: the Canada-France-Hawaii optical telescope, the James Clerk Maxwell radio telescope, and the Gemini telescopes located at the world's finest observing sites. Applicants from Canadian institutions have preferred access. An endowment fund supports student travel for observations and conferences.

Additional research facilities of the Department include the largest astronomy and astrophysics library in Canada and abundant computing power provided by departmental computers. With CITA, there is a high-performance parallel-computing centre for theoretical astrophysics. Major software packages from NASA, the National Radio Astronomy Observatory, the National Optical Astronomy Observatory, and elsewhere are maintained on the departmental computers.

The Department offers Master of Science and Doctor of Philosophy degree programs, outlined below, and cooperates with CITA and the Department of Physics to offer a Collaborative Master of Science program in Astrophysics.

Admission Requirements

1 Students are accepted under the general regulations of the School of Graduate Studies. Applicants who were educated outside Canada should pay particular attention to the English language competency requirements.

2 Because many universities do not offer extensive undergraduate training in astronomy and astrophysics, preparation in physics and mathematics is an acceptable background for students.

3 Students are strongly advised to take the verbal, quantitative, and advanced physics tests of the Graduate Record Examination administered by the Educational Testing Service, Princeton.

Degree of Master of Science

Program Requirements

1 Students are immediately engaged in original research through two required research courses, AST 1501Y and AST 1500Y.

Schedule: AST 1501Y is normally completed during the fall/winter of the first year, and AST 1500Y is completed in the following summer.

2 Students follow an approved program of study including:

a the research courses AST 1500Y, AST 1501Y, and

b a minimum of four half-courses, at least two of which are from among the AST Elective or Specialized Courses, subject to the approval of the instructor, the student's M.Sc. program committee, and the Department.

More courses may be taken for credit or audited as appropriate.

Degree of Doctor of Philosophy

Program Requirements

1 It is intended that the degree program be completed in five years (15 sessions). Students are normally expected to be on campus full time for the duration of their program.

2 Students are immediately engaged in original research through two required research courses, AST 1501Y and AST 1500Y, with different supervisors. An oral exam by committee is held for each.

Schedule: AST 1501Y is normally completed during the fall/winter of the first year, and AST 1500Y is completed in the following summer.

3 The core of the program is a thesis embodying the results of original research which must be submitted for appraisal in accordance with the regulations of the School of Graduate Studies.

As a first step, a student is required to prepare a written Ph.D. thesis proposal (possibly, but not necessarily, on a theme emerging from one of the first two research courses) and defend it in an oral examination conducted by a panel of faculty members.

The intention of this "qualifying examination" is to assess the student's ability and readiness to carry forward and successfully complete independent Ph.D.-level research. This assessment is based on the student's graduate record to date, including graduate lecture courses and research performed, together with the presentation and defense of the proposed Ph.D. thesis.

Schedule: The qualifying examination is taken after four and within five sessions of beginning the program. Students register each year, beginning in the second year, in the research course AST 400*Y (in sequence of the last digit: 2, 3, etc.)

4 Students follow an approved program of study including:

a the research courses AST 1500Y, AST 1501Y, and AST 400*Y (in sequence of the last digit: 2, 3, etc.) and

b a minimum of four half-courses, at least two of which are from among the AST Elective or Specialized Courses, subject to the approval of the instructor, the student's Ph.D. program committee, and the Department. More courses may be taken for credit or audited as appropriate.

Schedule: The required half-courses are normally taken on average one per session in the Fall and Winter Sessions during the first two years of the program.

5 Students with a Master of Science degree in astronomy and astrophysics from the University of Toronto, or a Master of Science degree in another appropriate discipline or from elsewhere deemed equivalent by the Department, may apply for admission to the four-year Ph.D. program. The requirements for the four-year Ph.D. program are identical to those for the five-year program, except for the course requirements. There is no minimum course requirement in the four-year program except for courses deemed necessary by the student's Ph.D. committee.

Collaborative Program in Astrophysics

The Departments of Astronomy and Astrophysics, Physics, and CITA cooperate to offer a Master of Science program in astrophysics. For details, consult the Astrophysics (Collaborative Program) entry in this calendar.

Courses of Instruction

Preparatory Courses

- AST 1410H Stars
- AST 1420H Galactic Structure and Dynamics
- AST 1430H Cosmology
- AST 1440H Radiation Processes and Gas Dynamics

Research Courses

- AST 1500Y+ Directed Research
- AST 1501Y Introduction to Research
- AST 400*Y+ Research (*Students register each year, beginning in the second year, in sequence of the last digit: 2, 3, etc.)

Elective Courses

- AST 2010H Physics of Stellar Atmospheres
- AST 2020H Physics of Stellar Interiors
- AST 2030H Interstellar Medium and Star Formation
- AST 2040H Extragalactic Astronomy
- AST 2050H Observational Techniques
- AST 2060H General Relativity I: Theory
- AST 2070H General Relativity II: Applications and Cosmology

Specialized Courses

- AST 3010H Advanced Topics in Stellar and Galactic Astronomy I
- AST 3011H Advanced Topics in Stellar and Galactic Astronomy II
- AST 3020H Advanced Topics in Interstellar Matter and Star Formation I
- AST 3021H Advanced Topics in Interstellar Matter and Star Formation II
- AST 3030H Advanced Topics in Extragalactic Astronomy and Cosmology I
- AST 3031H Advanced Topics in Extragalactic Astronomy and Cosmology II
- AST 3050H Theoretical Cosmology
- AST 3100H Lecture Series in Specialized Topics (mini courses)

Supplementary Research for Ph.D. Students

- AST 3500H Non-Thesis Research Project in Astronomy/Astrophysics

+ Extended course. For academic reasons, course work is extended into session following academic session in which course is offered.

Nature of the Collaborative Program

The graduate units of Astronomy and Astrophysics, Physics, and the Canadian Institute for Theoretical Astrophysics participate in the Collaborative M.Sc. Program in Astrophysics. This program fosters graduate education in Astrophysics, particularly in those areas of study that overlap traditional departmental boundaries.

Admission Requirements

Applicants who wish to enrol in the collaborative program must apply to and be admitted to both the collaborative program and a graduate degree program in one of the collaborating departments; this being either Astronomy and Astrophysics or Physics. In addition, the applicant must submit a supplementary brief application form to the collaborative program Director (available from either home department or the collaborative program office). Normal deadlines for application to the School of Graduate Studies apply. Students who have already been admitted to one of the two home departments may apply to the collaborative program until October 1.

Program Requirements

Students must meet all respective degree requirements of the School of Graduate Studies and the home department. This will normally require the equivalent of ten half-courses as follows:

- three or more half-courses in Astronomy and Astrophysics
- three or more half-courses in Physics
- two half-courses from Astronomy and Astrophysics, Physics or a cognate department
- a supervised research project in the field of astrophysics, equivalent to two half-courses

The supervised research project and associated report will be completed under the regulations of AST 1500Y for students whose home department is Astronomy and Astrophysics and under the regulations of PHY 3400Y for students whose home department is Physics.

In addition, the student must attend the seminar program of the Canadian Institute of Theoretical Astrophysics and prepare a report on a selection of these seminars for submission to the Director.

Program requirements are normally completed within twelve months of entry to the program.

Upon certification by the Director that all requirements of the collaborative program have been fulfilled, the home department will recommend the granting of the M.Sc. degree, and the designation "Completed Collaborative Program in Astrophysics" will appear on the transcript.

Address:

Department of Biochemistry
 Room 5205, Medical Sciences Building
 University of Toronto
 Toronto, Ontario M5S 1A8
 Canada

Telephone: (416) 978-2702

Fax: (416) 978-8548

E-mail: biochemistry@utoronto.ca

Web: biochemistry.utoronto.ca

Biochemistry is the study of the molecular events underlying biological processes; consequently it makes fundamental contributions to all disciplines concerned with living systems. The Department offers modern facilities for research leading to the M.Sc. and Ph.D. degrees in a wide variety of areas including the relationship between structure and biological function in proteins, nucleic acids, and lipids as well as complex multi-component systems such as membranes and subcellular organelles.

Admission Requirements

Normally we consider applications from students who have at least a B+ average in their last two years of study in an Honours/Specialist B.Sc. program in Biochemistry/Molecular Biology as well as from students with strong academic credentials in Honours/Specialist programs in disciplines related to Biochemistry/Molecular Biology.

In addition applicants must arrange for the completion of personal reference forms from three individuals familiar with their academic performance.

Applicants who obtained a degree outside Canada are generally required to have an M.Sc. degree in biochemistry or in a closely related subject area and must arrange for general and biochemistry GRE examination results to be sent to the Department.

Applicants from outside Canada whose primary language is not English and who graduated from a university where the language of instruction was not English must provide TOEFL (Test of English as a Foreign Language) and TWE (Essay Writing) scores. Applicants taking the paper-based TOEFL exam must achieve a minimum score of 580 and 5 on the TWE. Applicants taking the computer-based TOEFL exam must achieve a minimum score of 237 and 5 on the essay rating component. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 93/120 and 22/30 on the writing and speaking sections. In the absence of TOEFL results, a MELAB score of at least 92 is also acceptable.

Degree of Master of Science

Each M.Sc. degree student must complete any courses that were a condition of acceptance and:

- 1 complete one session of BCH 2021H *Selected Topics in Biochemistry*, and
- 2 participate in BCH 2020Y° *Master's Seminar Course in Biochemistry*.

Each student must present a thesis and successfully complete an oral examination on his or her research and related aspects of biochemistry before being recommended for the degree.

Degree of Doctor of Philosophy

Students are accepted into the Ph.D. program through one of three routes:

- 1 via reclassification from the M.Sc. program;
- 2 on completion of an M.Sc. degree in biochemistry or a cognate discipline;
- 3 directly from a B.Sc. if, in the opinion of the Biochemistry Graduate Committee, the student has an outstanding academic record. The latter two categories require the student to successfully complete a qualifying examination within the first 18 months.

Ph.D. students must complete any courses that were a condition of acceptance and:

- 1 complete 1.5 internal or external (from cognate departments) graduate-level courses, including at least one session of BCH 2021H *Selected Topics in Biochemistry*,

- 2 participate in BCH 2022Y° *Doctoral Seminar Course in Biochemistry*, and
- 3 submit a thesis and defend it at a School of Graduate Studies oral examination.

Residence Requirements

Under normal circumstances, M.Sc. and Ph.D. students will be expected to participate as full-time students and to maintain full-time status in their laboratories until thesis completion and final defence.

Collaborative Programs

The Department participates in the following collaborative programs:

- 1 Biomedical Engineering
- 2 Biomolecular Structure
- 3 Developmental Biology
- 4 Neuroscience
- 5 Proteomics and Bioinformatics

For more details, consult the separate entries in this calendar.

Courses of Instruction

For course details and availability, consult the Department's Web site.

BCH 1371H	Laboratory Course in Biochemistry (BCH 371)*
BCH 1422H	Membrane Proteins: Structure and Function—Lectures (BCH 422H)*
BCH 1426H	Regulation of Signalling Pathways—Lectures (BCH 426H)*
BCH 1440H	Protein Biosynthesis—Lectures (BCH 440H)*
BCH 1441H	Bioinformatics (BCH 441H)*
BCH 1471Y	Advanced Biochemistry—Laboratory (BCH 471Y*—prerequisite is BCH 371* or equivalent)
BCH 2020Y°	Master's Seminar Course in Biochemistry (Credit/No Credit)
BCH 2021H	Selected Topics in Biochemistry: Advanced lectures to supplement the above lower-numbered courses in Biochemistry Fall 2007: Molecular Aspects of Stress Responses in Model Systems/ <i>Course Coordinators: W. Houry, J. Glover</i>

* Arts and Science undergraduate course

°Courses which may continue over a program. The course is graded when completed.

Spring 2008: Protein Quality Control and Trafficking within the Secretory Pathway/*Course Coordinators: D. Williams, A. Volchuk*

Fall 2008: Regulation of Cellular Processes by Post-translational Modification/*Course Coordinators: L. Attisano, G. Lukacs*

Spring 2009: Recent Advances in Biomolecular Imaging/*Course Coordinators: S. Grinstein, D. Bazett-Jones*

- BCH 2022Y^o Doctoral Seminar Course in Biochemistry (Credit/No Credit)
- JBB 1425H Structural Biology: Principles and Practice—Lectures (BCH 425H)*
- JBB 2025H Protein Crystallography—Lectures
- JBB 2026H Protein Structure, Folding and Design
- JB1 1428H Molecular Immunology—Lectures (JB1 428H)*
- JBL 1507H Biochemistry of Inherited Disease
- JNP 1017H+ Molecular and Biochemical Basis of Toxicology
- JNP 1018H+ Current Topics in Molecular and Biochemical Toxicology
- JNR 1444Y Fundamentals of Neuroscience: Cellular and Molecular—Lectures (PSL 444Y)*
- JTB 2010H Proteomics and Functional Genomics
- JTB 2020H Applied Bioinformatics

* Arts and Science undergraduate course

^oCourses which may continue over a program. The course is graded when completed.

+ Extended course. For academic reasons, course work is extended into session following academic session in which course is offered.

Bioethics

STREAMS

Graduate study in bioethics at the University of Toronto is offered in two streams:

1 Collaborative Program in Bioethics

2 Master of Health Science in Bioethics

The Collaborative Program in Bioethics is a research-stream program (master's and doctoral). The Master of Health Science in Bioethics is a professional-stream master's program.

Full details on both programs appear below.

Address:

Joint Centre for Bioethics (JCB)
88 College Street
University of Toronto
Toronto, Ontario M5G 1L4
Canada

Telephone: (416) 978-0871

Fax: (416) 978-1911

COLLABORATIVE PROGRAM IN BIOETHICS

Web: www.utoronto.ca/jcb/education/grad_CPB.htm

Program Committee

D. K. Martin, BSc, PhD/Health Policy, Management & Evaluation

T. Lemmens, LicJur, LL(M(Bioethics),DCL/Law

E. H. Peter, MsN, PhD/Nursing Science

J. Hawkins, BA, MA, PhD/Philosophy

R. Upshur, BA(Hons), MA, MD, MSc, CCFP, FRCPC/Medical Science

A. Daar, DPhil, FRCP(Lond), FRCS, FRCS(C)/Public Health Sciences, Medical Science

B. Secker, BA, MA, PhD/Rehabilitation Science
(*Director*)

D. Novak, AB, MHL, rabbinical diploma, PhD/Religion

The graduate units of Health Policy, Management and Evaluation; Law; Medical Science; Nursing Science; Philosophy; Public Health Sciences; and Religion collaborate to offer master's (LL.M., M.A., M.H.Sc., M.N., M.Sc.) and doctoral (Ph.D., S.J.D.) programs in Bioethics.

Students with an interest in bioethics register in one of the graduate units associated with the Collaborative Program in Bioethics (CPB). Successful students who complete the requirements of the home graduate unit and the CPB are awarded a degree from the home unit; the notation "Completed Collaborative Program in Bioethics" will appear on their transcripts.

Admission Requirements

Applicants to the Collaborative Program must apply to and be admitted to both the Collaborative Program and a graduate degree program in one of the collaborating departments. Students interested in the master's and doctoral programs apply simultaneously to both the collaborating graduate unit and the CPB. Applications for admission to the CPB are considered only after admission to the collaborating graduate unit.

Visit the CPB's Web site for the application form and details about supporting documentation. Each participating unit has its own application deadline; please check with the unit. The deadline for CPB applications is March 31. The application must be accompanied by:

- 1 an up-to-date *curriculum vitae*;
- 2 up-to-date copies of all transcripts;
- 3 a one-page letter of intent;
- 4 two letters of reference. Where a thesis is required, a note from the proposed supervisor indicating willingness to supervise the student should be submitted.

If a student applies to more than one unit, a copy of each file must be submitted to the Secretary, Collaborative Program in Bioethics.

The Joint Centre for Bioethics' Web site lists faculty and bioethicists who are available for advice relating to research proposals.

Program Requirements

A student will be expected to meet the requirements of the home graduate unit as well as those of the Collaborative Program. Courses taken to complete degree requirements must include the following, which may be counted towards the degree in the home unit:

- 1 PHL 2145H—a review of the philosophical foundations of bioethics.
- 2 MSC 3001Y—issues and case studies in bioethics.
- 3 One half-course, normally from the home unit; see suggested list below.

All doctoral candidates must complete a thesis. Master's programs require either a thesis or equivalent research project as determined by the home unit. The thesis will be supervised by a thesis committee comprising a supervisor and two other members. Thesis supervisors must have appointments to the graduate faculty and will normally be members of the Bioethics Collaborative Program Committee. Ordinarily members of the thesis committee and examining professors (or other professionals) are drawn from other relevant disciplines. The thesis is evaluated according to the procedures and standards of the home graduate unit and must fall within the broad area of bioethics.

Non-thesis projects require supervision and requirements for such projects will be determined by the home unit.

Courses of Instruction

Please note that these courses are not offered every year. Consult each unit's Web site for details.

Health Policy, Management and Evaluation

- HAD 5010H Canada's Health System and Health Policy: Part I
 HAD 5306H Introduction to Health Care Research Methodology
 HAD 5741H Health Law

MASTER OF HEALTH SCIENCE IN BIOETHICS

Web: www.utoronto.ca/jcb/education/grad_MHSc.htm

Program Directors

J. V. Lavery, BA, BSc, MSc, PhD (International Stream)
 D. Ouellet, RN, MHSc (Domestic Stream)

The M.H.Sc. in Bioethics is among the first of its kind in North America and is offered through the Institute of Medical Science (IMS). Designed for practitioners who wish to augment their knowledge and skills in bioethics, the program assists them in their roles as clinician-teachers and as members of bioethics committees. It is a course-only, professional master's degree program. The M.H.Sc. in Bioethics provides the theoretical, methodological, and applied skills requisite for health care professionals to face the bioethical challenges posed by modern health care. Students interested in a research-stream program should consider the Collaborative Program in Bioethics (CPB).

Admission Requirements

Typically, entry into the M.H.Sc. in Bioethics Program requires four years of undergraduate study and a recognized degree in one of the health care sciences (for example, M.D., B.Sc. N., B.Sc.OT, B.Sc.PT, B.S.W.) or equivalent. Applicants from other disciplines will be considered on an individual basis depending on the availability of space and the ability to meet School of Graduate Studies (SGS) and IMS standards. The Program favours individuals with outstanding academic credentials.

Applicants must have sufficient free professional time to attend and to prepare for 10 sessions of two full days of instruction per month (September to April, estimated as one day per week) and have an employment and/or volunteer background that reflects significant interest in bioethics (broadly construed as a multidisciplinary enterprise).

There must be great likelihood that the applicant will provide significant bioethics leadership in his or her home institution or local community upon completion of the M.H.Sc. in Bioethics.

Applicants must demonstrate evidence of scholarly ability and personal maturity. Students are expected to maintain good academic standing in all components of the program.

Applicants are accepted under the general regulations of both IMS and SGS. Meeting the minimal requirements is mandatory but does not guarantee acceptance. Visit the Joint Centre for Bioethics' Web site for access to the

online application and details about supporting documentation.

The application must be accompanied by:

- 1 current *curriculum vitae*;
- 2 two sets of original university academic transcripts;
- 3 a letter of intent or statement of professional goals;
- 4 three letters of recommendation;
- 5 a writing sample, in English.

Deadline for receipt of applications is February 1. Enrolment is limited and not all applicants meeting the prerequisites will be admitted. Applicants are screened for eligibility; short-listed applicants are interviewed.

Program of Study

The M.H.Sc. in Bioethics is offered in modular format in 20 two-day Thursday/Friday blocks from September to April to accommodate the needs of those who wish to continue clinical practice yet engage in full-time graduate study, and to attract practitioners not only locally but also throughout Ontario and across Canada. Certain international students complete all course work in one academic year. The program provides practical experience strongly informed by theory that includes education, research, and clinical components. The curriculum directly reflects the functional needs of clinician-teachers or bioethics case consultants.

First-year courses concentrate on theoretical foundations of health care sciences, philosophical medical ethics, and resource allocation and law and their application in the clinical setting.

Second-year courses focus on applied skills and knowledge concentrating on teaching in a variety of settings to a variety of audiences; managing differences in culture, gender, and religion; the mediation skills with which to work; further instruction in the two primary areas of clinical bioethics and research ethics; the preparation of a major paper of publishable quality in an area or on an issue of the student's choice; and a practicum that will ensure the application of the knowledge and skills gained elsewhere in the two-year program of study.

Required Courses

Courses are restricted to students officially enrolled in the M.H.Sc. in Bioethics and the Collaborative Program in Bioethics, except where noted. All courses are understood as "or equivalent" in order to accommodate the diverse background education and training of applicants.

First year

HAD 5771H	Resource Allocation Ethics
LAW 257H	Legal Approaches to Bioethics
MSC 3001Y	Foundations Seminar I
MSC 3003Y	Empirical Approaches in Bioethics
PHL 2146Y	Topics in Bioethics

Second year

MSC 1051H	Research Ethics
MSC 1052H	Clinical Bioethics
MSC 3002Y	Foundations Seminar II
MSC 3004Y	Ethics Committees and Consultations
For international students, MSC 3004Y is not required. Instead, MSC 3010Y <i>International Research Ethics</i> is required and is taken in May.	
MSC 3006Y	Bioethics Independent Study
MSC 3008Y	Practicum

JOINT CENTRE FOR BIOETHICS

Web: www.utoronto.ca/jcb

Both the Collaborative Program in Bioethics and the M.H.Sc. in Bioethics are associated with the University of Toronto Joint Centre for Bioethics (JCB). Students are encouraged to take advantage of the various activities at the JCB. These include a weekly Bioethics Seminar, lectures by visiting professors, the opportunity to participate in hospital ethics committees and clinical ethics consultations, interest groups, rounds, and colloquia on new developments. Students in the CPB meet regularly to present and discuss their individual research topics and to maintain the collaborative nature of the program.

E-mail: bmc.info@utoronto.ca

Web: www.bmc.med.utoronto.ca/BMC/

The two-year Master of Science in Biomedical Communications (M.Sc.BMC) professional graduate degree program is offered through the Institute of Medical Science. Applicants with interdisciplinary art and science backgrounds develop the necessary skills to become outstanding visual communicators in the health sciences. BMC graduates work in a variety of areas such as health science centres, industry, academia and/or research, or as private consultants in these areas.

While in the program, students produce visual material that synthesizes scientific data and medical processes. Popular specializations are the creation and evaluation of interactive, computer-based multimedia programs and 3-D visualizations for teaching and learning. Presently there are two fields offered in the graduate program:

1 Biomedical Media Design is concerned with the creation and evaluation of media-based tools (video, interactive media, CD-ROM, DVD, Web) for teaching and learning. A human centred design approach, guided by

principles of information hierarchy and target audience analysis, is a foundation for the development and evaluation of these materials.

2 Biomedical 3-D Visualization Design involves the creation of full-motion visualizations of biological structures, events, and processes at scales ranging from the molecular to gross anatomic. These visualizations can be interpretative, fulfilling an explanatory role, or they can be driven by computational models or empirical datasets. Close attention is paid to the effective communication of complex information through narrative and cinematic design.

Admission Requirements

Applicants are admitted under the general regulations of SGS and must have graduated from a recognized university with a minimum of a four-year undergraduate degree. This degree should include a variety of courses in the arts, sciences, and humanities. Applicants must have obtained at least a mid-B standing (73-76% or 3.0 based on a 4-point scale) in their final two years of undergraduate study. A high-quality portfolio of visual material is required. Consult the M.Sc.BMC Web site for the list of prerequisite courses required for admission.

Program Requirements

The M.Sc.BMC program consists of 17 half-course equivalents. Students have the option to select either two elective half-course equivalents and a master's research project and paper or four elective half-course equivalents and a master's project.

In Year II of the graduate program, students enter their chosen field.

Courses of Instruction

Faculty should be consulted each session as to course offerings.

Required Courses

LMP 1012H	Seminars on Pathology/ <i>J. Wong</i>
MSC 1001Y	Human Anatomy (Including Embryology)/ <i>I. M. Taylor</i>
MSC 2001Y	Visual Representation of Medical Knowledge/ <i>L. Wilson-Pauwels, Staff</i>
MSC 2002Y	Sequential Medical Communication/ <i>L. Lax, Staff</i>
MSC 2003Y	Biomedical Communications Technologies/ <i>N. Woolridge, D. Mazierski, J. Jenkinson</i>
MSC 2004H	Research Methods/ <i>S. Nancekivell</i>
MSC 2005H	Evolution of Medical Illustration/ <i>Staff</i>

-

The Institute of Biomaterials and Biomedical Engineering offers facilities for research in biomedical engineering and for three educational programs leading to master's and doctoral degrees. Students may be registered in the Biomedical Engineering Program or in the Clinical Biomedical Engineering Program through the Institute. Students interested in the Collaborative Program in Biomedical Engineering may register through one of the collaborating graduate units.

Biomedical engineering is a multidisciplinary field that integrates engineering and biology/medicine. It uses methods, principles, and tools of engineering, physical sciences, and mathematics to solve problems in the medical and life sciences for the study of living systems; the enhancement and replacement of those systems; the design and construction of systems to measure basic physiological parameters; the development of instruments, materials, and techniques for biological and medical practice; and the development of artificial organs and other medical devices. By

its nature, the majority of the Institute's work is interdisciplinary. Research themes include diagnostic and therapeutic engineering, technology for health, and cellular and molecular bioengineering. Specific interests include neural and sensory systems engineering, molecular imaging, nanotechnology and microtechnology, biomaterials, rehabilitation engineering, cellular and tissue engineering, proteomics and bioinformatics.

Admission Requirements

An applicant must be a graduate in dentistry, engineering, medicine, or one of the physical or biological sciences and may be accepted as a graduate student in the Institute of Biomaterials and Biomedical Engineering. Alternatively, students may choose to register in the Collaborative Program in Biomedical Engineering through a collaborating graduate department. See Biomedical Engineering (Collaborative Program) entry in this calendar.

Program Requirements

Students who wish to register in the Biomedical Engineering Program or the Clinical Biomedical Engineering Program will register in the School of Graduate Studies through the Institute of Biomaterials and Biomedical Engineering and will meet all respective degree requirements as described by the School of Graduate Studies.

As part of these requirements, engineering and physical science students will be required to take a life sciences course, such as JPB 1022H (or an equivalent); while life science students will be expected to take a physical sciences course, such as JPB 1055H (or an equivalent). Students will pursue a thesis topic relevant to Biomedical Engineering and will be expected to take BME 1450H *Bioengineering Science*.

Students are also required to participate in two seminar courses: one of BME 1010H or BME 1011H *Graduate Seminar* series, and JDE 1000H *Ethics in Research*.

Degree of Master of Applied Science

The work leading to the degree of Master of Applied Science (M.A.Sc.) provides an opportunity for the student to pursue advanced studies in biomedical engineering and the opportunity to engage in research. The program of study will normally comprise at least four half-courses, including BME 1450H and an appropriate life science or engineering course, and the successful completion of a thesis in the biomedical engineering field. It is anticipated that students will complete all degree requirements within 18-24 months.

Degree of Master of Health Science, Clinical Biomedical Engineering

A program in Clinical Biomedical Engineering, leading to the degree of Master of Health Science (M.H.Sc.), is offered to selected students who hold the degree of Bachelor of Applied Science of this University or an equivalent degree in engineering. The program normally includes eight half-courses, including one full course, which involves periods of internships in health care facilities, and a research project. All requirements for the degree must be completed within three years.

Degree of Doctor of Philosophy

Students are normally admitted to the Ph.D. program after completing an appropriate master's program; however, direct admission to the Ph.D. program may be considered in exceptional cases. The program of study for each student in Biomedical Engineering normally comprises at least two half-courses and successful completion of a thesis, representing an original investigation in biomedical engineering.

Within 12 months of registration in the Ph.D. program, students must pass a qualifying examination covering the broad field of biomedical engineering appropriate to their background. Students will continue to meet with their supervisory committee at least once every 12 months until recommendation for the Departmental Oral Examination is made. On the recommendation of the supervisory committee and special approval from their department Graduate Chair or Coordinator, candidates have the opportunity to waive the Departmental Oral Examination and proceed directly to the University of Toronto Final Oral Examination.

Collaborative Programs

The Institute participates in the following collaborative programs:

- 1 Addiction Studies
- 2 Biomedical Engineering
- 3 Cardiovascular Sciences
- 4 Health Care, Technology and Place
- 5 Neuroscience

For more details, consult the separate entries in this calendar.

Courses of Instruction

Not all courses are offered every year. Students should contact the Institute office for information about course availability. Outlines of these

and other closely related courses may be obtained from the Institute office.

The graduate units of Biochemistry; Biomedical Engineering; Chemical Engineering and Applied Chemistry; Dentistry; Electrical and Computer Engineering; Laboratory Medicine and Pathobiology; Materials Science and Engineering; Mechanical and Industrial Engineering; Medical Science; Pharmaceutical Sciences; Physics; Physiology; and Rehabilitation Science participate in the Collaborative Program in Biomedical Engineering at the University of Toronto. This program offers the opportunity for research in biomedical engineering leading to master's and doctoral degrees. Biomedical engineering is a multidisciplinary field that integrates engineering and

biology/medicine. It uses methods, principles, and tools of engineering, physical sciences, and mathematics to solve problems in the medical and life sciences. Biomedical engineering consists of the application of the concepts and methods of engineering and physics to the study of living systems, to the enhancement and replacement of those systems, to the design and construction of systems to measure basic physiological parameters, to the development of instruments, materials, and techniques for biological and medical practice, and to the development of artificial organs. By its nature the field is interdisciplinary and involves close collaboration between many departments of the University and associated hospitals.

Admission Requirements

Applicants who wish to enrol in the Collaborative Program must apply to and be admitted to both the Collaborative Program and a graduate degree program in one of the collaborating departments. Applicants must be graduates in dentistry, engineering, engineering science, medicine, or one of the physical or biological sciences and may be accepted in the Collaborative Program in Biomedical Engineering at the Institute of Biomaterials and Biomedical Engineering (IBBME) through one of the collaborating graduate departments (home department).

Program Requirements

Students register in the School of Graduate Studies through their home departments; they will meet all respective degree requirements as described by the School of Graduate Studies and the Program Committee.

As part of these requirements, engineering and physical science students will be required to take a biological sciences course such as JPB 1022H (or an equivalent); while biological science students will be expected to take a physical sciences course such as JPB 1055H (or an equivalent). Students will be expected to take BME 1450H *Bioengineering Science* and pursue a thesis topic relevant to Biomedical Engineering.

Students registered in a graduate degree program involving research are required to participate in two seminar courses: one of BME 1010H or BME 1011H *Graduate Seminar* series and JDE 1000H *Ethics in Research*.

Each master's student in the Collaborative Program is required to have a supervisory committee approved by the Program Committee and consisting of a supervisor from IBBME, with a cross appointment in the home department, and other members from other collaborating departments as required.

The program of study for each Master of Applied Science or Master of Science degree student registered in the Collaborative Program must meet the requirements of the collaborating department and will normally comprise at least four half-courses and a thesis in the biomedical field.

Before Ph.D. students are accepted, the Program Committee must be satisfied with the student's ability to undertake advanced graduate studies. A qualifying examination may be required by the collaborating department. Direct transfer to a Ph.D. program is possible subject to the requirements of the collaborating department. The program of study for each Ph.D. student registered in the Collaborative Program in Biomedical Engineering must be approved by the collaborating department and the Program Committee; the program will normally comprise at least four half-courses and a thesis.

Each Ph.D. student is normally required to have a supervisory committee consisting of at least three persons, including a supervisor who has an appropriate graduate appointment and who is also a member of the graduate faculty in the home department. When appropriate, an additional member of the supervisory committee may be from outside the University of Toronto, with approval from the School of Graduate Studies.

For both master's and doctoral degrees, the examination committee will be constituted according to procedures in the home graduate department and will include a member from that collaborating department.

Biomedical Engineering Program

Consult the separate entry in this calendar or contact IBBME for details.

Courses of Instruction

Not all courses are offered every year. Students should contact the Institute office.

E-mail: james.rini@utoronto.ca

The graduate program in Biomolecular Structure is a collaborative program involving the Departments of Biochemistry, Chemistry, Medical Biophysics, and Molecular and Medical Genetics. The program is open to Ph.D. students wishing to train under the supervision of one of the participating investigators. The program will appeal to students with a wide variety of backgrounds.

Admission Requirements

Applicants who wish to enrol in the collaborative program must apply to and be admitted to both the collaborative program and a graduate degree program in one of the collaborating departments. Applicants must first be admitted to one of the collaborating graduate units before applying to the collaborative program.

Program Requirements

Students in the program will be required to take JBB 2026H *Protein Structure, Folding and Design* and an additional half-course in a specialized topic. Moreover, students are expected to participate in the Biomolecular Structure Program seminar series.

Generally, students enrolled in the program will be expected to fulfil the course requirements of both the program and the home department. However, it is anticipated that in most cases course work required by the program will serve, in part, to fulfil departmental requirements.

Courses of Instruction

Not all courses will be offered every year. Departments should be consulted each year to confirm course offerings.

JBB 2026H	Protein Structure, Folding and Design
JBB 2025H	Protein Crystallography

E-mail: mbiotech@utm.utoronto.ca

Web: www.utm.utoronto.ca/mbiotech

Introduction

The Master of Biotechnology (M.Biotech.) program is an interdisciplinary course-based professional degree involving collaboration between the Departments of Cell and Systems Biology, Chemistry, and the Rotman School of Management.

Students in the M.Biotech. program come from wide and varied backgrounds with the common goal of pursuing a career in the biotechnology, financial, and pharmaceutical industries. The program is designed to meet the evolving needs of students and this global industry. Faculty is drawn from the Departments of Cell and Systems Biology, Chemistry, and Management. Guest lecturers from other faculties within the University of Toronto provide students with a truly interdisciplinary educational experience. Additional instruction from leaders of the biotechnology and pharmaceutical industries and from governmental agencies round out the broadly-based learning environment.

Admission Requirements

1 A four-year bachelor's degree or its equivalent in any area of biological sciences, chemistry, engineering, or related field.

2 Acceptable GMAT or GRE scores and/or marks of A- or better in the last two years of study.

3 The top applicants will be interviewed in person by the Admissions Committee.

The Committee, comprising representatives from the participating departments, makes admission decisions.

Program Requirements

The program is a full-time, course-based masters degree which is **launched during the month of May each year.**

Students are required to complete 8 full graduate courses over a 24-month period:

- 5 to 6 science credits (includes credits for Seminar and Placement)
- 2 business credits
- up to 1 elective credit

An ongoing seminar series led by university, industry, and government specialists link all the participants with the academic, practical, and applied aspects of the program.

Courses of Instruction

Required

A general description of each required course is posted on the Web site, www.utm.utoronto.ca/mbiotech.

BTC 1600H	Seminar in Bioscience/ Biotechnology I
BTC 1610H	Seminar in Bioscience/ Biotechnology II
BTC 1700H	Molecular Biology Laboratory
BTC 1710H	Protein Chemistry Laboratory
BTC 1800H	Biotechnology in Medicine
BTC 1810H	Biotechnology and Corporations
BTC 1820H	Biotechnology in Agriculture and Natural Products
BTC 1900Y	Work Term I
BTC 1910Y	Work Term II
BTC 1920Y	Work Term III
BTC 2000H	Organizational Skills
BTC 2010H	Fundamentals of Managerial Concepts
BTC 2020H	Science, Technology, Organizations and Society
BTC 2030Y	Management of Technological Innovation

Elective Courses

BTC 2100Y Topics in Biotechnology

BTC 2110H Topics in Biotechnology

BTC 2120H Topics in Biotechnology

Other graduate courses approved by the
Program Directors.

Fax: (416) 978-1759

E-mail: book.history@utoronto.ca

Web: bookhistory.fis.utoronto.ca

Nature of the Collaborative Program

Histoire du livre, History of the Book, Textual Studies, Print Culture, Sociology of the Text—all these names have been used to describe a growing international academic movement. The graduate departments of Art, English, French Language and Literature, History, Italian Studies, the Faculty of Information Studies, the Faculty of Music, the Institute for the History and Philosophy of Science and Technology, the Centre for Medieval Studies, and the Centre for Comparative Literature, in conjunction with Massey College, sponsor an interdisciplinary program in Book History and Print Culture (BHPC) in which the rich physical and human resources of the University of Toronto are brought to bear on multiple aspects of the creation, transmission, and reception of the written word. Students register first for a master's or doctoral degree in their home units and then apply to the collaborative program. If they satisfy the requirements of both programs they receive their degree with a notation on the transcript "Collaborative Program in Book History and Print Culture."

Application Procedures

Applicants who wish to enrol in the collaborative program must apply to and be admitted to both the collaborative program and a graduate degree program in one of the collaborating departments (home unit). Applicants to the collaborative program write to the Director giving information about their backgrounds and relevant interests, identifying the degree and home unit for which they are applying, and outlining a proposed program of study—preferably

by April 1 for September admission, though late applications will also be considered. Applicants need not wait for a final decision from the home unit before applying to the collaborative program. (An academic transcript should be included in the application; a photocopy or print-out from a student Web service will do.) Advice is available from the Director and the Program Committee. An interview will normally form part of the admissions procedure for doctoral applicants.

Applications from the participating units have priority in admissions. If there is space in the program, students from other units may apply; they should consult the graduate coordinator in their home unit and the Director of the BHPC program. Since course requirements vary from unit to unit, it is essential that there be close consultation between the collaborative program and the home unit at the time of the application.

Program Requirements

Master's Program

All students must fulfil the degree requirements of the unit in which they are enrolled. Their program of study must also be approved by the BHPC Program Committee. Normally, the BHPC requirements will be met within the program of the home unit. At the master's level, the program should include at least two full-course equivalents in courses related to book history and print culture, including the seminar BKS 1000Y. Depending on the regulations of the home unit, a master's thesis in the area of book history and print culture may be counted as satisfying the requirement for a second course beyond BKS 1000Y.

Doctoral Program

All students must fulfil the degree requirements of the unit in which they are enrolled. Their program of study must also be approved by the BHPC Program Committee. If they have not already taken BKS 1000Y at the master's level, they will be required to take it as a prerequisite or corequisite to the two doctoral courses BKS 2000H and BKS 2001H. The dissertation topic will be in the area of book history and print culture, and the advisory committee will include representation from outside the home unit. The program may be completed on a flexible-time basis only by FIS students registered for the FIS flexible-time Ph.D.

Core Courses

- BKS 1000Y Book History and Print Culture
BKS 2000H Advanced Seminar in Book
History and Print Culture
BKS 2001H Practicum in Book History and
Print Culture

E-mail: cv.program@utoronto.ca
Web: www.cscp.utoronto.ca

Nature of the Collaborative Program

The graduate units of Biomedical Engineering; Dentistry; Exercise Sciences; Health Policy, Management and Evaluation; Laboratory Medicine and Pathobiology; Medical Biophysics; Medical Science; Nursing Science; Pharmaceutical Sciences; Pharmacology; Physiology; Public Health Sciences; Rehabilitation Science; and Social Work, together with the clinical departments of Anesthesia, Medicine, and Surgery, participate in the graduate Cardiovascular Sciences Collaborative Program at the University of Toronto. Units participating in the program contribute graduate courses and provide facilities and supervision for graduate research. Applicants must first be accepted by one of the participating graduate units and then register in the collaborative program. Students follow a program of study acceptable to both the participating unit and the Cardiovascular Sciences Program. Upon successful completion of the requirements, students receive, in

addition to the master's or doctoral degree in their home graduate unit, a separate certificate from the program, and the notation "Completed Collaborative Program in Cardiovascular Sciences" on their transcript.

Admission Requirements

- 1 Normally an A- average in previous course work (publications and research work may be considered for mature students).
- 2 Student has already been accepted into a home graduate unit that participates in the Cardiovascular Sciences Collaborative Program.
- 3 Acceptance by a supervisor who is a faculty member of the Cardiovascular Sciences Collaborative Program.
- 4 Research area falls within mandate of the Cardiovascular Sciences Collaborative Program.

Program Requirements

Master's and doctoral students must meet the requirements of their home graduate unit in terms of course work and thesis work. All students are required to write a thesis under the supervision of a core faculty member of the Collaborative Program. The thesis topic will be in the area of cardiovascular sciences. An unbound copy of the accepted thesis in final form must be submitted to the Cardiovascular Sciences Collaborative Program.

To qualify for the Cardiovascular Sciences specialization, students obtaining their master's degree must complete a half-credit in an approved cardiovascular course listed under approved "Courses of Instruction". For the doctoral degree, students must have course credits in any two of the following four courses: JCV 3060H, JCV 3061H, JCV 3062H, JCV 3063H. All students must attend the annual Student Research Day and demonstrate excellence in cardiovascular related research.

Courses of Instruction

Cardiovascular sciences courses offered by the participating units are listed below. Not all courses are offered each year. For course details, consult the program's Web site, www.cscp.utoronto.ca.

EXS 5508H	Cardiovascular Disease and Exercise/ <i>J. M. Goodman</i>

Introduction

Cell and Systems Biology (CSB) is the new, progressive, and dynamic face of biology at the University of Toronto. Students undertaking graduate programs in CSB pursue research related to fundamental mechanisms in the growth, development, and behaviour of organisms ranging from unicellular microbes to more complex organisms in the plant and animal kingdoms. Research projects extend from the molecular level to that of whole organisms interacting with each other and their environment. Students enjoy state-of-the-art facilities and make use of cutting-edge approaches

including functional genomics, genetics, metabolomics, proteomics, bioinformatics, computational biology, cell biology, developmental biology, molecular biology, and physiology.

The Department of Cell and Systems Biology offers two graduate programs: one in Plant and Microbial Biology (PMB) and the other in Zoology (ZOO). The choice between these programs depends on whether a student's interest is primarily botanical (PMB) or zoological (ZOO) and the area in which his or her supervisor carries out research. Refer to the departmental Web site.

CSB PLANT AND MICROBIAL BIOLOGY PROGRAM

Degree of Master of Science

Admission Requirements

A high academic standard is required for admission. Satisfactory performance will normally be demonstrated by an average grade in the final year, equivalent to a University of Toronto B+ and an average grade in the previous year of B. In exceptional circumstances, where there is strong supporting supplementary evidence, students with a mid-B average in the final year may be admitted to the program.

Program Requirements

M.Sc. students must complete one half-course during the program, preferably in the first year. The half-course may be either a BOT 1700H seminar series or a regular graduate course. Attendance at 80% of the departmental seminar series is a requirement. Original research and defence of a thesis are also required.

Degree of Doctor of Philosophy

Admission Requirements

Ph.D. degree students are generally accepted by two routes, either by transferring from the M.Sc. program or following completion of a master's degree. A student completing a B.Sc. with outstanding academic achievement (A-average in the final year) and proven research accomplishments may be admitted directly to the Ph.D. program.

Program Requirements

For Ph.D. students there is a minimum formal course requirement of three half-courses for students who have completed a M.Sc., with the first half-course taken in the first year. It is strongly suggested that at least one of these be selected from the BOT 1700 series seminar

courses. The supervisory committee will evaluate the course work of Ph.D. applicants to determine if additional courses are required.

Students who transfer from a M.Sc. to a Ph.D. program may count any course work completed prior to the transfer toward their Ph.D. requirements. However, transfer students are still expected to take one BOT 1700 series course during their Ph.D. program. It is expected that many Ph.D. students will continue to participate in seminar courses after their minimum requirement is completed. Attendance at 80% of the departmental seminar series is a requirement.

Within 16-20 months of first registration in the program, students present a research proposal to the Department. If the research proposal is deemed unsatisfactory by the examining committee, there is a single opportunity to present a revised proposal three months later. Ph.D. candidates make an oral presentation of their thesis for evaluation to the Department as a whole and to a departmental evaluation committee before proceeding to the School of Graduate Studies Final Oral Examination.

CSB ZOOLOGY PROGRAM

Admission Requirements

Applicants to the Master of Science and Doctor of Philosophy degree programs are accepted under the general regulations. Applicants to the M.Sc. program must have an average grade equivalent to a University of Toronto B in the final undergraduate year and an average grade of B in the previous year (five full courses each year). Minor variations from these standards can be considered in exceptional circumstances. An elementary but competent knowledge of physics and chemistry will be required, and knowledge of the general field of biology must be demonstrated. It is the student's responsibility to arrange for supervision by contacting potential supervisors. Exceptional students are encouraged to enter the Ph.D. program directly from the B.Sc. Students may also transfer to the Ph.D. program from the M.Sc. program.

Program Requirements

When arranging their course and research programs with their supervisors, M.Sc. and Ph.D. students may consult the Department's Associate Chair for Graduate Affairs. The student's advisory committee and the Department must approve the entire course of study. Students wishing to take a minor in this Department should discuss the requirements with the fac-

ulty concerned and should obtain the approval of the Associate Chair.

Degree of Master of Science

M.Sc. students are required to take at least one graduate full-course equivalent in Zoology or a cognate graduate unit. Included must be one designated core half-course. Completion and defence of a thesis is required. The Department encourages graduate students to complete M.Sc. degree requirements within two years of admission.

Degree of Doctor of Philosophy

Ph.D. students are required to take at least two graduate full-course equivalents. Included must be one designated core half-course. Students entering the Ph.D. program directly from the B.Sc. or transferring from the M.Sc. program are normally required to take the equivalent of at least two graduate full courses. Ph.D. students undergo an appraisal (qualifying examination) within 18 months of embarking on the program. Students transferring from a M.Sc. to a Ph.D. program must pass the appraisal before the transfer is approved. Completion and defence of a thesis is required. The Department encourages graduate students to complete Ph.D. degree requirements within four years of admission.

COLLABORATIVE PROGRAMS

The Department of Cell and Systems Biology participates in the following collaborative programs:

- 1 Developmental Biology
- 2 Environmental Studies
- 3 Proteomics and Bioinformatics
- 4 Neuroscience

For details, consult the separate entries in this calendar.

COURSES OF INSTRUCTION

Not all courses are offered every year. Please consult course instructors or the Department regarding course offerings each session.

With the approval of the Associate Chair, an individual research/reading course (ZOO 1002H,Y) may be arranged with a faculty member (two if one is the research supervisor) in one of the research areas where a formal graduate course is not already available. Only one credit in this course is typically permitted.

ZOO 1006H	Recent Advances in Integrative Physiology/ <i>D. Lovejoy, L. Buck</i>
JZB 1018H	Advanced Microscopy/ <i>R. Harrison, C. Hasenkampf</i>
BOT 1355Y	Introductory Virology/ <i>M. G. AbouHaidar</i>
BOT 1450H	Plant Proteomics and Bioinformatics/ <i>D. Christendat</i>
JZB 1459H	Population Genetics/ <i>Staff</i>
BOT 1460H	Plant Molecular Genetics/ <i>T. Berleth, P. McCourt</i>
JBZ 1472H	Computational Genomics and Bioinformatics/ <i>D. Guttman, N. Provart</i>
JBZ 1473H	Chemical Genomics
ZOO 1501H	The Biology of Signal Transduction/ <i>D. H. O'Day, A. B. Lange</i>
ZOO 1502H	Molecular Entomology/ <i>P. A. Romans</i>
ZOO 1506H	Concepts in Developmental Biology/ <i>D. Godt, U. Tepass</i>
BOT 1628H	Molecular and Classical Cytogenetics/ <i>C. Hasenkampf</i>
BOT 1629H	Cellular and Molecular Aspects of Plant Development/ <i>P. McCourt, T. Berleth</i>

Seminar Courses

BOT 1700H	Seminar on Recent Advances in Plant Sciences/ <i>Staff</i>
BOT 1701H	Seminar on Recent Advances in Plant Sciences/ <i>Staff</i>
BOT 1702H	Seminar on Recent Advances in Plant Sciences/ <i>Staff</i>
BOT 1703H	Seminar on Recent Advances in Plant Sciences/ <i>Staff</i>
BOT 1704H	Seminar on Recent Advances in Plant Sciences/ <i>Staff</i>

Developmental Biology (Collaborative Program)

JDB 1025Y	Developmental Biology/ <i>T. Berleth, Staff</i>
JDB 1026Y ^o	Student Seminars in Developmental Biology/ <i>Staff</i>

^o Courses which may continue over a program. The course is graded when completed.

Students are accepted under the general regulations. Qualified students may engage in research in the following areas:

Advanced Inorganic Molecular Systems
Applied Organic Chemistry
Biomaterials
Biomedical Engineering
Biomolecular Engineering
Bioprocess Engineering
Biotechnology
Ceramics Engineering
Chemical Analysis
Chemical Reactor Design
Combustion Engineering
Composite Materials
Electrochemical Engineering
Energy Engineering
Environmental Engineering
Fluid Mechanics
Food Engineering
Heat, Mass, and Momentum Transport
Hydrometallurgy
Informatics
Nuclear Engineering
Polymer Science and Engineering
Process Control
Process Modelling and Optimal Control
Pulp and Paper
Radiochemistry
Separation Processes
Surface and Interface Engineering
Sustainable Energy
Thermodynamics, Kinetics, and Catalysis
Tissue Engineering

Degree Programs

The Department of Chemical Engineering and Applied Chemistry offers graduate programs leading to the degrees of M.Eng., M.A.Sc., and Ph.D. A more complete description of graduate research programs and the enrolment procedure may be found on the Department's Web site: www.chem-eng.utoronto.ca.

Collaborative Programs

The Department of Chemical Engineering and Applied Chemistry participates in the following collaborative programs:

- 1 Biomedical Engineering
- 2 Environmental Engineering
- 3 Integrated Manufacturing

For details, consult the separate entries in this calendar.

Degree of Master of Engineering

The M.Eng. program differs from other graduate programs (M.A.Sc. and Ph.D.) available in the Department in that it is oriented to learning through prescribed courses rather than through research. The program normally requires completion of a total of 10 half-courses or 7 half-courses plus a 3 half-course equivalent project supervised by a faculty member. The M.Eng. program can be completed either through full-time or part-time studies. The full-time M.Eng. is designed to be completed within 12 months, including the summer session. The part-time M.Eng. is primarily intended for engineers in full-time professional practice. Students may choose courses of interest to them and may also register in the Environmental Engineering collaborative program. Obtain further information on registration from the Coordinator of Graduate Studies.

Degree of Master of Applied Science

The M.A.Sc. program requires a minimum full-time residence of one fall and one winter session. In addition to the thesis, each student is required to complete at least three graduate courses, one of which must normally be selected from Category A (see below), and at least one of which must be selected in an area outside the student's field of research specialization. Furthermore, normally only one 500-level course may be taken for credit towards the degree program. Students are also required to complete CHE 2222H, CHE 3000Y, and JDE 1000H (see Courses of Instruction). Each candidate should discuss possible research projects with several members of the Department before selecting a thesis topic.

Degree of Doctor of Philosophy

Individuals who have already completed M.A.Sc. requirements and who have demonstrated an exceptional degree of all-round scientific and intellectual ability as evident from theoretical or experimental research, academic standing, initiative, and publication record may apply for continued graduate research leading to the Ph.D. degree. The program is designed to enable such students to complete all degree requirements within four years. Direct admission to the Ph.D. program after the bachelor's degree may be considered in exceptional cases.

In addition to the thesis, each Ph.D. student is required to complete at least four additional courses if the M.A.Sc. requirements have been completed or at least six courses if admitted directly after the bachelor's degree. Courses must be selected from the calendar and ap-

proved by the student's supervisor. At least one of these courses must be taken in a minor area of study, and it is recommended that one of these courses should be selected from Category A courses. Normally, Ph.D. students are not allowed to take a 500-level course for credit towards the degree program. Students are also required to complete CHE 3000Y and, if not already completed, CHE 2222H and JDE 1000H (see Courses of Instruction).

Within 12 months of starting the Ph.D. program, students must pass a qualifying examination. Students normally remain in continuous residence (full time, on campus) until the Departmental recommendation for the Final Oral Examination is made, unless special permission to do otherwise has been granted by the Departmental Graduate Studies Committee.

Program Transfer

Very strong M.A.Sc. students may apply to transfer to the Ph.D. program after completing one year of the M.A.Sc. program. Such students must first successfully complete a "bypass" examination. Regulations governing such transfers are available in the Chemical Engineering Graduate Studies Office. A student who is permitted such a transfer and who does not hold a master's degree must complete a total of six half-courses in the graduate program. Transfer students who already hold a master's degree must complete a total of four half-courses. Transfer students do not have to take a separate Ph.D. qualifying examination.

Courses of Instruction

A schedule is available from the Coordinator of Graduate Studies at the beginning of each session listing the time and room location for each course.

Students in the M.A.Sc. and Ph.D. programs are required to take course CHE 3000Y *Seminars in Chemical Engineering and Applied Chemistry* in each year of full-time registration. All students wishing to undertake research and teaching in the Department of Chemical Engineering and Applied Chemistry must successfully complete a two-day intensive occupational health and safety training workshop, CHE 2222H *Safety Workshop*, which normally takes place during the week immediately preceding the commencement of graduate courses in the fall. In each subsequent year of registration, students must take the WHMIS refresher workshop. Students registered in a graduate degree program, which involves research, are required to participate in the non-credit seminar course JDE 1000H *Ethics in*

Research during their first or second session of registration.

More details concerning these courses are provided by the Coordinator of Graduate Studies once admission to a graduate program has been confirmed.

Not all courses are given every year. Consult the Department each session as to course offerings.

Category A

CHE 1107H	Applied Mathematics
CHE 1140H	Topics in Process Identification and Control
CHE 1141H	Advanced Chemical Reaction Engineering
CHE 1142H	Applied Chemical Thermodynamics
CHE 1143H	Transport Phenomena
CHE 1144H	Separation Processes
CHE 1147H	Data Mining in Engineering
CHE 1149H	Electrolyte Thermodynamics
JTC 1135H	Applied Surface Chemistry
CHE 1180H	Advanced Topics in Chemical Engineering
CHE 1310H	Chemical Properties of Polymers
JCI 1503H	Advanced Topics in Computing and Information Systems
CHE 2504H	Industrial Pollution Prevention
MIE 1807H	Principles of Measurement

Category B

CHE 1118H	Industrial Catalysis
CHE 1134H	Advances in Bioengineering
CHE 1213H	Corrosion
CHE 1314H	The Structure and Properties of Fibrous Materials
JTC 1020H	Ceramics
JTC 1331H	Biomaterials Science
JCB 1349H	Molecular Assemblies: Structure/Function/Properties
CHE 1400H	Environmental Nuclear Science
CHE 1533H	Nuclear Chemical Engineering
CHE 1541H	Two-Phase Flow and Heat Transfer
JCC 1313H	Environmental Microbiology
JCI 1321H	Wood Engineering
JNC 2503H	Environmental Pathways

Engineering Management Courses

APS 1001H	Project Management
APS 1002H	Financial Engineering
APS 1003H	Professional Education and Instruction
APS 1004H	Human Resource Management
APS 1088H	Entrepreneurship and Business for Engineers

500-level Courses

- CHE 507H Process Modelling and
Simulation
CHE 564H Pulp and Paper Processes
CHE 565H Aqueous Process Engineering
CHE 568H Nuclear Engineering
CHE 575H Mechanical Properties
of Bio-Composites and
Biomaterials

Seminar Courses

- CHE 1211H Pulp and Paper Seminars
(Credit/No Credit)
CHE 2011H Graduate Student Seminars
(Credit/No Credit)
CHE 3000Y Seminars in Chemical
Engineering and Applied
Chemistry
(Credit/No Credit)

In addition to the above courses, students may elect to take courses in other engineering or science departments where such courses are deemed relevant to the area of study.

Modern facilities are available for research leading to the M.Sc. and Ph.D. degrees. The areas of interest cover a wide variety of topics in analytical, biological, environmental, inorganic, organic, materials, polymers, physical, and theoretical chemistry and their related interdisciplinary areas.

An average of at least B+ is required for admission to the graduate programs. An exceptional student with an appropriate B.Sc. degree may be admitted directly to the Ph.D. program. Alternatively, transfer to the Ph.D. program may be considered after a one-year M.Sc. residency period.

Degree of Master of Science

A student's program will normally include the submission of a thesis, the successful completion of one graduate full-course equivalent, and participation in a seminar program.

Degree of Doctor of Philosophy

The main requirement for this degree is the execution of an original investigation that is presented in a thesis. Students select one of the following as a major field: Analytical Chemistry, Environmental Chemistry, Inorganic Chemistry, Organic Chemistry, Experimental Physical Chemistry, Theoretical Physical Chemistry, or Polymer and Materials Chemistry. Combinations within these subdisciplines, or with other disciplines, are permitted under the category of an interdisciplinary program. With the exception of Theoretical Physical Chemistry, each program requires a minimum of two full-course equivalents from approved graduate courses offered in the School of Graduate Studies. Up to one full-course equivalent taken for credit in the master's program may be used to partially fulfil the Ph.D. requirements. Each program requires successful completion of an oral examination in the area of the major field, as well as participation in a seminar program.

Specific requirements for some of the major fields are as follows:

1 Analytical Chemistry

One half-course in analytical chemistry in each of the areas of spectroscopy and separation science/electrochemistry, plus one other half-course to support the research program. Candidates must also pass seven cumulative exams and participate in the Analytical Chemistry seminar program.

2 Environmental Chemistry

At least four half-courses to include CHM 1401H, at least one other course in environmental chemistry (ENV 1410H, CHM 1415H, CHM 1425H, CHM 1550H), and at least one CHM course to be chosen in consultation with the supervisor/supervisory committee and confirmed by the field representative. The fourth course may be an approved course offered in a cognate department. Presentation of two seminars (normally in second and fourth years of study) and participation in the Environmental Chemistry seminar and colloquia program. A written research proposal, defended orally, on a topic other than the primary research topic delivered prior to the end of the second year of graduate study. Successful completion of an oral examination in the area of Environmental Chemistry, normally completed following course work and before the end of the second year of graduate study.

3 Inorganic Chemistry

Four half-courses including one core half-course (either CHM 1261H or CHM 1270H that are offered in alternating years) plus the presentation of one seminar each year (to a total of four) in the Inorganic Chemistry seminar program including one on an original research proposal.

4 Experimental Physical Chemistry

Four half-courses consisting of a combination of core and other courses. The number of core courses is determined by the research director and the student, while observing the principle that breadth of background preparation should be the major objective in course selection. Attendance and participation in the Physical Chemistry seminar program are mandatory.

5 Theoretical Physical Chemistry

Six half-course equivalents, including two core half-courses. Specifics are to be determined by the research director and the student. Attendance and participation in the Physical Chemistry seminar program are mandatory.

6 Organic Chemistry

At least four half-courses to include at least two Organic Chemistry graduate courses selected from CHM 1040H to CHM 1068H (inclusive). Students may take graduate courses from other chemistry fields or cognate departments. All students are expected to be at the level of the fourth year undergraduate courses offered in physical organic, synthetic organic, and biological chemistry, and if necessary the cross-listed Arts and Science courses may be taken. Courses will be selected in consultation with the supervisor and confirmed by the Graduate Studies Committee field representative. Students must also pass seven cumulative exams and present two seminars as a component of their participation in the Organic Chemistry seminar program (normally in the second and fourth years of study). Upon completion of course work and cumulative exams, students will take an oral exam in the area of Organic and Biological Chemistry.

7 Polymer and Materials Chemistry

Four half-courses, to include at least two of the three core courses. A list of other courses considered appropriate to the Polymer and Materials Chemistry research area is available from the department. Presentation of at least two seminars (the first will be an independent research proposal, the second a presentation on research) and participation in the Polymer and Materials Chemistry seminar program. Successful performance in an oral examination in the area of Polymer and Materials Chemistry following the completion of course work.

8 Interdisciplinary Ph.D. Program

Four half-courses, including one core half-course from the above subdisciplines, and participation in one of the subdiscipline seminar programs. Acceptance into this program requires a research topic of a truly interdisciplinary nature; a written request must be submitted to the graduate coordinator.

Depending upon the area of research, students may also be required to show an adequate ability to translate scientific text in one or two of the following languages: French, German, and Russian.

A student whose major subject is in another department may consult the Department of Chemistry regarding the selection of a minor in Chemistry.

Collaborative Programs

The Department of Chemistry participates in the following Collaborative Programs:

1 Biomolecular Structure

2 Environmental Studies (*see Environment*)

For details, consult the separate entries in this calendar.

Course Schedules

A schedule listing the times, room locations, and course descriptions is available from the Coordinator of Graduate Studies at the beginning of each session.

Research Courses

All M.Sc. and Ph.D. degree students engaged in research must register in the appropriate 2000 sequential series of research courses in one of the major fields. Students register in these courses each year, in sequence of the last digit.

Courses of Instruction

Not all courses are offered every year. Please consult the Department each session as to course availability.

All graduate courses for degree credit must be approved by the Department. Subject to departmental permission, degree students in Chemistry may take a limited number of graduate courses based on fourth-year Faculty of Arts and Science courses in Chemistry or a cognate discipline. Approvals of such fourth-year courses will be considered on an individual basis. Third-year Arts and Science courses, or their essential equivalents, will not receive degree credit.

Nature of the Program

The Cinema Studies Institute offers a program leading to the M.A. degree in Cinema Studies. Our faculty have expertise in several areas, including film history, film theory, and film and culture.

M.A. applicants are accepted under the general regulations provided that they also satisfy the institute's requirements stated below.

Master's Degrees

Admission Requirements

Applicants must meet the following standard: successful completion of an appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university; at least a B+ standing, demonstrated by an average grade in the final year, or over senior courses; the successful completion of a minimum of six full-course equivalents (FCEs) in cinema studies, or comparable program preparation.

All applicants must submit a letter of intent addressing the academic goals they wish to pursue in the program, three letters of recommendation, transcripts from all post-secondary institutions, and an academic writing sample of no more than 3,000 words.

Program Requirements

The M.A. is a course-work only program and, therefore, does not require a thesis. Students are required to complete 4.0 FCEs over the course of an academic year, normally extending from September until August. Of the 4 FCEs, 1.5 will be mandatory, core courses under the CIN rubric. An additional 1.0 FCE will be devoted to either the writing of a major research paper or pursuing an internship; the internship option also entails writing a paper based on the learning or research experience gained from the internship. Students will be required to fill out the remaining 1.5 FCEs in the following way: 0.5-1.0 may be chosen from rotating special topics courses, also under the CIN rubric (but possibly cross-listed with another department, depending on the instructor's departmental home); the remaining 0.5-1.0 may be chosen from film-based courses offered by other units (non-CIN designator) but approved as relevant to the Cinema Studies master's program curriculum.

All students are required to complete CIN 1000H, CIN 1001H, and CIN 1002H.

Additional requirements for students choosing the major research paper option:

- 1 CIN 1006Y
- 2 0.5 – 1.0 FCE derived from CIN 1515H, CIN 1772H, CIN 6153H, CIN 6817H
- 3 0.5 – 1.0 FCE derived from approved graduate-level courses offered outside CIN.

Additional requirements for students choosing the internship option:

- 1 CIN 1007Y
- 2 0.5 – 1.0 FCE derived from CIN 1515H, CIN 1772H, CIN 6153H, CIN 6817H
- 3 0.5 – 1.0 FCE derived from approved graduate-level courses offered outside CIN.

Courses of Instruction

Core Courses

CIN 1000H	Historiography of the Cinema
CIN 1001H	Theories of the Cinema
CIN 1002H	Cinema and Culture

Plus one of:

CIN 1006Y	Major Research Paper in Cinema Studies
CIN 1007Y	Internship in Cinema Studies

Optional Courses

CIN courses

CIN 1515H	The Emergence of Mass Culture: Movies, Vaudeville and Public Amusements in Turn-of-the-Century America
-----------	--

CIN 1772H The Politics of Non-Fiction Film
CIN 6153H Race and Cinema
CIN 6817H Text, Context, Intertext: The
 Touch of Evil Project

Cross-listed courses

Selected from the appropriate and available
non-CIN graduate half-course equivalents
available. Units offering such courses will
typically be:

Comparative Literature

English

French Language and Literature

German Languages and Literatures

History

Italian Studies

Slavic Languages and Literatures

Students will choose their courses in con-
sultation with the Cinema Studies Graduate
Coordinator.

Qualified students are accepted for advanced studies in one of the following fields of study: building engineering, environmental engineering, structural engineering, transportation engineering, and engineering geoscience.

Note: Students registered in a graduate degree program involving research are required to participate in the non-credit seminar course JDE1000H Ethics in Research during their first or second session of registration.

Environmental Engineering (Collaborative Program)

The graduate departments of Chemical Engineering and Applied Chemistry, Civil Engineering, Mechanical and Industrial Engineering, and Materials Science and Engineering participate in the collaborative graduate program in Environmental Engineering at the University of Toronto. Details of this program are available in the Environmental Engineering entry in this calendar.

Degrees of Master of Engineering and Master of Applied Science

Students are accepted under the general regulations. It should be noted that for those students who do not possess an undergraduate degree in civil engineering, more than the usual

time and number of courses may be required. Each student, in consultation with a staff member at the beginning of the program, will establish the distribution of time between course work and thesis or design project. An M.Eng. program will normally consist of ten courses for the course work only program. Up to two courses may be replaced by a research/design project. An M.A.Sc. program will normally consist of a minimum of five courses and a thesis. Some sections may require 6 half-courses and a thesis. Please consult the supervisor and/or refer to the departmental graduate student handbook for further details.

There is no formal residence requirement for the M.Eng. degree for students in the Department of Civil Engineering, and, therefore, the program may be completed through part-time studies.

Degree of Doctor of Philosophy

Students are accepted under the general regulations and under the regulations for the degree of Doctor of Philosophy, except for the following Departmental regulations which supercede the general regulations.

1 Admission directly from a bachelor's degree is not normally permitted.

2 If a student transfers from a master's degree program to a Ph.D. program, courses taken during the master's program may be applied to the Ph.D. program.

3 The Ph.D. academic program is defined in terms of a major and 2 minor fields of study, normally consisting of 6 to 11 half-courses in total, depending upon the student's background preparation. Students transferring from a master's program or with a master's degree from another discipline typically take 8 to 11 half-courses. Students with a master's degree in Civil Engineering typically take 6 to 8 half-courses. It is normally expected that at least one of the minor fields will be taken outside of the Department. This academic program must be approved by the Department's Examination and Degree Committee during the student's first session.

4 Supervisors are required to establish a supervisory committee for their Ph.D. students by the end of the second year of the student's program. This committee must include the supervisor and at least two graduate faculty members. Membership approval is not required.

The committee must meet with the student at least once a year to assess the student's progress in the program; an annual progress report must be submitted for the department file. Committee membership and meeting dates are entered on ROSI by this department.

Failure to comply with this procedure would adversely affect a student's future registration.

5 The academic program must be defended by the student in a comprehensive examination after completing most of the course work and preferably within one year after first enrolment in the Ph.D. program. This examination consists of a four to five-day, take-home written examination, followed approximately a week later by an oral examination. The examination is administered by a Comprehensive Examination Committee created and supervised by the Department's Examination and Degree Committee.

6 Students normally must spend at least two academic years of their program on campus on a full-time basis.

Applicants seeking admission to the Ph.D. program must be able to satisfy the Department that they have the ability to undertake advanced research.

Courses of Instruction

Not all courses are given every year. Some courses may require a prerequisite. Please consult the Department.

The Department of Classics provides advanced training in a wide range of fields: Ancient Greek Language and Literature, Latin Language and Literature, Ancient History, Ancient and Medieval Philosophy (in collabora-

tion with the Department of Philosophy), and Ancient Science.

The Ancient Greek and Roman History Joint Collaborative Program (see separate entry in this calendar) provides for interdisciplinary study with faculty from the Graduate Program in History at York University.

Information about admission, application procedures and funding is available from the Department.

Degree Programs

Master of Arts in Classics

Entry to the M.A. requires the successful completion of an undergraduate program in Classics (B+ average in final year), with the equivalent of at least three and preferably four full years of training in each of Latin and Greek. Students who are otherwise qualified but who have less training in the languages should consult with the Department about further preparation.

Students may be admitted to a one- or two-year program leading to the M.A., depending on their level of preparation. The M.A. degree program requires satisfactory completion of the required courses (at least GRK 1000H, GRK 2000H, GRK 2100H and LAT 1000H, LAT 2000H, LAT 2100H), satisfactory completion of the M.A. examination cycle, and the submission of an acceptable special essay (see Program Descriptions below). Satisfactory completion of the M.A. examination cycle requires at least a B- grade on each component; an acceptable special essay requires a grade of at least B.

Master of Arts in Greek or Latin

M.A. students in Greek or Latin must satisfy all the normal requirements for the M.A. in Classics, but are only required to pass one of the M.A. sight translation examinations in the minor language. Students should be aware that the M.A. in Greek or Latin alone is not normally adequate preparation for doctoral study in Classics.

Doctor of Philosophy in Classics

1 Standard admission to the Ph.D. program requires the successful completion of either a strong undergraduate program in Classics (with at least an A- average in the final year) or a strong M.A. program in Classics (at least a B+ average with at least one A-), with the equivalent of at least four years of training in each of Latin and Greek and a broad preparation in the reading of ancient texts in the original languages.

2 Applicants may also be admitted to the Ph.D. with advanced standing if they have completed the revised M.A. program at the University of Toronto (having graduated in the year 2000 or later) with grades of at least B+ in all components and a grade of at least A- on the special essay. Applicants must have reading knowledge of one of the modern languages required for the Ph.D.

Students admitted under standard conditions as described in **1** above must satisfactorily complete required courses (GRK 1000H, GRK 2000H, GRK 2100H and LAT 1000H, LAT 2000H, LAT 2100H), pass all components of the M.A. examination cycle with grades of at least B+, and earn a grade of at least A- on the special essay (see Program Descriptions below). For doctoral students this examination cycle and the special essay are referred to as the qualifying examinations and qualifying essay. Doctoral students who complete the qualifying examinations and essay at a lower standard which nevertheless satisfies the M.A. requirement will be granted the M.A. but may be required to withdraw from the doctoral program or to retake examinations.

Students admitted with advanced standing as described in **2** above are exempt from the qualifying examinations and qualifying essay.

Program Descriptions

Two-year Master of Arts

In the first year of study, students take GRK 1000H and LAT 1000H (intensive advanced language skills) and a selection of other courses approved by the Department. Students may be exempted from either 1000H course if they have satisfactorily completed comparable work in their undergraduate program. A standing of at least B+ must be earned in each undergraduate course. GRK 1000H and LAT 1000H are graded credit/no credit. Students who do not complete these courses with appropriate standing may be required to withdraw from the M.A. program or to retake the courses.

In the second year of study, students are required to take the following four half-courses: Classics of Greek Literature (GRK 2000H, GRK 2100H) and Classics of Latin Literature (LAT 2000H, LAT 2100H). These survey courses (graded credit/no credit) cover the most important authors of Greek and Roman antiquity.

Each student is assigned to a faculty advisor for CLA 2000H, the M.A. special essay, and works independently on the preparation of a research paper (about 8000 words in length).

The special essay is assessed by a committee of two faculty members, including the advisor.

One-year Master of Arts

Students are required to take the following four half-courses: Classics of Greek Literature (GRK 2000H, GRK 2100H) and Classics of Latin Literature (LAT 2000H, LAT 2100H). These survey courses (graded credit/no credit) cover the most important authors of Greek and Roman antiquity. Students may also be required to take GRK 1000H and/or LAT 1000H to help them prepare for the M.A. examinations.

Each student is assigned to a faculty advisor for CLA 2000H, the M.A. special essay, and works independently on the preparation of a research paper (about 8000 words in length). The special essay is assessed by a committee of two faculty members, including the advisor.

The M.A. in Classics is granted on completion of the M.A. examinations with at least B- in each component. These are:

- Sight translation examination in Greek (not required for the M.A. in Latin).
- Sight translation examination in Latin (not required for the M.A. in Greek).
- Reading list examination in Greek Prose.
- Reading list examination in Greek Verse.
- Reading list examination in Latin Prose.
- Reading list examination in Latin Verse.

Doctor of Philosophy

In the first year, students take the required courses to prepare for the qualifying examinations and write their qualifying essay under the guidance of a faculty advisor. The program of study is normally identical to that of the one-year M.A. outlined above. To continue in the program, students must earn at least a B+ on each component of the qualifying examinations and at least an A- on their qualifying essay. Students admitted with advanced standing as described in **2** above are exempt from these requirements.

In exceptional circumstances and at the Department's discretion, students who require additional preparation for the reading lists may be required to take a selection of courses approved by the Department during their first year before beginning to prepare for the qualifying examinations. Students will be notified of such additional requirements at the time of their offers of admission or early in the first session.

Doctoral students must demonstrate adequate reading knowledge of two languages of research, other than English, one of which will normally be German. By the end of year one, students are expected to have passed one

modern language examination. By the end of year two, students should have completed the other modern language examination.

In the second year (first year for students admitted with advanced standing) students take CLA 3000H *Research Techniques in Classics* and at least three of the required total of five research seminars. The supervisory committee is normally established in year two. By the end of the third year (second year for students admitted with advanced standing) students should have completed their minor field examination and the rest of their required research seminars. The major field examination should be completed by the middle of fourth year (third year for students admitted with advanced standing). The dissertation should be completed by the end of the fifth year (fourth year for students admitted with advanced standing).

Minor field (CLA 3500H°)

The minor field is established at the end of second year (first year for students admitted with advanced standing) and must be clearly distinct from the major field. The field is prepared under the supervision of two faculty advisors. The examination on the field is conducted by a committee composed of the two faculty advisors and the graduate coordinator.

Major field (CLA 4000Y°)

The major field defines a broad area within which the dissertation topic falls. It is normally established by the third year of the program (second year for students admitted with advanced standing) and is directed by the supervisory committee. Preparation for the examination includes the completion of a satisfactory research essay. The field is examined by means of two written examinations, one of which must involve translation from the list of primary sources, and an oral examination covering the research essay and the examination papers.

Collaborative Programs

The Department participates in the following collaborative programs:

- 1 Ancient and Medieval Philosophy
- 2 Ancient Greek and Roman History
- 3 Editing Medieval Texts
- 4 Women's Studies

For more details, consult the separate entries in this calendar.

Courses of Instruction

GRK 1000H	Advanced Studies in Greek Language (Credit/No Credit)
GRK 2000H	Classics of Greek Verse (Credit/No Credit)
GRK 2100H	Classics of Greek Prose (Credit/No Credit)
GRK 2500Y°	Greek Verse Exam
GRK 2501Y°	Greek Prose Exam
GRK 2505Y°	Greek Sight Exam
LAT 1000H	Advanced Studies in Latin Language (Credit/No Credit)
LAT 2000H	Classics of Latin Verse (Credit/No Credit)
LAT 2100H	Classics of Latin Prose (Credit/No Credit)
LAT 2500Y°	Latin Verse Exam
LAT 2501Y°	Latin Prose Exam
LAT 2505Y°	Latin Sight Exam
CLA 2000H°	M.A. Special Essay
CLA 3000H	Research Techniques in Classics
CLA 3020H	Research Methods in Ancient History
CLA 3500H°	Minor Field
CLA 4000Y°	Major Field

Research Seminars

The following courses are open to students in other departments with the permission of the instructor and the Department. See the departmental brochure or Web site for language requirements. Not all courses are offered every year. See the departmental brochure or Web site for offerings in the current year.

CLA 5000H	Early Greek Epic
CLA 5001H	Early Greek Poetry
CLA 5002H	Studies in Greek Drama I
CLA 5003H	Studies in Greek Drama II
CLA 5004H	Studies in Greek Poetry
CLA 5005H	Herodotus
CLA 5006H	Thucydides
CLA 5007H	Criticism of Latin Poetry
CLA 5008H	Roman Comedy
CLA 5009H	Literature of the Roman Republic
CLA 5010H	Virgil
CLA 5011H	Satire and Satirical Writing
CLA 5012H	Studies in Ancient Philosophy I
CLA 5013H	Studies in Ancient Science
CLA 5014H	The Ancient Novel
CLA 5015H	Latin Poetry of the Empire
CLA 5016H	Topics in Greek History
CLA 5017H	Latin Legal Texts and the History of Late Roman Institutions
CLA 5018H	Topics in Roman History
CLA 5019H	Topics in Later Roman History
CLA 5020H	Studies in Ancient Philosophy II
CLA 5021H	Topics in the Study of Greek and Hellenistic Literature and Culture

°Courses which may continue over a program. The course is graded when completed.

-
- CLA 5022H Topics in the Study of Greek and
Hellenistic Society
 - CLA 5023H Topics in the Study of Roman
Literature and Culture
 - CLA 5024H Topics in the Study of Roman
Society

 University of Toronto
 Suite 400, 455 Spadina Avenue
 Toronto, Ontario M5S 2G8
 Canada

Telephone: (416) 416 978-2072

Fax: (416) 416 978-7162

E-mail: urban.centre@utoronto.ca

Web: www.urbancentre.utoronto.ca/communitydevelopment.html

Nature of Collaborative Program

The Collaborative Program provides students with a multidisciplinary graduate education in community development. Community development is positive change in the social, economic, organizational, or physical structures of a community that improve both the welfare of community members and the community's ability to control its future.

Students must apply to and register in a home participating unit (i.e., one of the graduate departments or faculties listed below), and follow a course of study acceptable to both that unit and the Collaborative Program in Community Development. Applications will be considered for the following degree programs:

- 1 Adult Education and Community Development (M.A. and M.Ed.) in the Department of Adult Education and Counselling Psychology at OISE/UT
- 2 Program in Planning (M.Sc.(Pl.)) in the Department of Geography
- 3 Public Health Sciences (M.H.Sc.) in the Faculty of Medicine
- 4 Faculty of Social Work (M.S.W.)

Application Procedures

Collaborative programs are administered under the auspices of the School of Graduate Studies.

1 Applicants must be accepted for admission to a participating graduate unit and comply with the admission procedures of that unit before applying to the Collaborative Program in Community Development.

2 Applicants must submit the following to the Program Committee of the Collaborative Program in Community Development:

- a a copy of the letter accepting you into one of the participating graduate units;
 - b a résumé or curriculum vitae;
 - c a letter explaining how your program of study, your specific interests, and your career goals relate to community development (i.e. why you want to enrol in the Collaborative Program in Community Development).
- Maximum length: 500 words. Include reference to any relevant experience (volunteer, work, education, etc.).

Program Requirements

Students must register in the master's degree program through one of the participating home graduate units. They must meet all respective degree requirements of the School of Graduate Studies and their participating home graduate unit.

To fulfil the requirements of the Collaborative Program in Community Development, they must complete the following (note that normally, the required courses listed below are taken as options within regular departmental or faculty degree requirements, not as additional courses):

- 1 the core course UCS 1000H *Community Development: Theory and Practice*;
- 2 two additional half-courses in the subject area of the Collaborative Program, to be approved by the Collaborative Program director; at least one of the two additional half-courses must be external to the home graduate unit;
- 3 participation in a non-credit coordinating seminar on community development; and
- 4 where required by the home degree program, either a thesis or the major research paper, as designated by the home degree program, must be on a topic related to community development. A member of the thesis committee or the reader of a major research paper must be a member of the faculty associated with the Collaborative Program.

Courses of Instruction
Core Course

UCS 1000H Community Development:
Theory and Practice

Students must take two half-courses in the subject area of the Collaborative Program, to be approved by the Collaborative Program director. The following is a list of the currently approved courses; list is reviewed annually and posted on the program Web site.

Address:

Comparative, International and Development Education Centre (CIDE)
 Ontario Institute for Studies in Education
 University of Toronto
 7th floor, 252 Bloor Street West
 Toronto, Ontario M5S 1V6
 Canada

Telephone: (416) 923-6641

Fax: (416) 926-4749

E-mail: cide@oise.utoronto.ca

Web: cide.oise.utoronto.ca

Nature of Program

Comparative, International and Development Education (CIDE) is one of the world's largest, most diverse and dynamic graduate programs in the field of comparative education. CIDE students and faculty bring extensive international experience. Faculty interests span an exciting range of theoretical and practical issues—from the study of ethnicity and identity to the issues of globalization and global governance, from non-formal learning and citizenship education to concrete problems of educational reform, social equality, language education, conflict resolution and community development. We approach these issues from a range of theoretical and disciplinary frames that is unparalleled in other comparative education programs. More traditional sociological, historical and

philosophical approaches are taught alongside vibrant interpretations of feminist, critical, post-structuralist and cultural theories.

Additionally, CIDE students have access to courses and professors with related geographic and thematic interests at one of the world's pre-eminent research universities. Students can take courses in such fields as political science, development studies, international relations, feminist studies, sociology, and geography. The CIDE program is linked with events and programs at the Munk Centre for International Studies at the University of Toronto, where a vibrant community of scholars and students interested in international issues congregates.

The CIDE program will interest Canadian students who wish to work and live in other cultures or want to better understand the educational and social systems of the many learners in Canada's multicultural society. It will also interest international students who wish to relate their studies at OISE/UT directly to their own societies and learning systems.

The CIDE program is available to applicants enrolling in the M.Ed., M.A., Ed.D., and Ph.D. degree programs in the following four OISE/UT participating departments:

- 1 Adult Education and Counselling Psychology**
 - Adult Education Program
- 2 Curriculum, Teaching and Learning**
 - Curriculum Program
 - Second Language Education Program
- 3 Sociology and Equity Studies in Education**
 - Sociology in Education Program
- 4 Theory and Policy Studies in Education**
 - Educational Administration Program
 - Higher Education Program
 - History and Philosophy of Education Program

Successful students receive a notation on their transcript identifying their specialization in Comparative, International and Development Education.

Admission Requirements

Applicants who wish to enrol in the Collaborative Program must apply to and be admitted to both the Collaborative Program and a graduate degree program in one of the collaborating departments. Applicants should apply to the appropriate degree program in one (or more) of the collaborating departments that corresponds most closely to their general background and interests, clearly noting the CIDE Collabora-

tive Program code ("2") on the Application for Admission form.

In addition to meeting the minimum OISE/UT admission requirements and department requirements, applicants to the CIDE Collaborative Program are normally expected to have had at least one year of international or cross-cultural experience.

Prospective applicants should review the detailed information about the CIDE program available on the CIDE Web page at <http://cide.oise.utoronto.ca>. They are strongly advised to contact one of the core CIDE faculty members in their home department to discuss their research interests and goals.

Program Requirements

Individual student programs of study must meet the requirements of both the home department and the Collaborative Program. Normally, a careful selection of courses will satisfy this requirement without any additional course load.

Collaborative Program requirements include course selections from the Comparative, International and Development Education core and specialization courses; regular participation in, and contribution to the CIDE Seminar Series; and, depending upon the degree program and department, preparation of a thesis, research paper, or comprehensive paper related to Comparative, International and Development Education as certified by a participating faculty member from the home department. Information on core and specialized CIDE courses (including course syllabi) is available on the CIDE Web site <http://cide.oise.utoronto.ca>.

Master's Program

- 1 Required introduction: CIE 1001H *Introduction to Comparative, International and Development Education*.
- 2 One core CIDE master's level course.
- 3 Two other core CIDE or specialization master's-level courses.
- 4 Regular participation in and attendance at the CIDE Seminar Series.
- 5 Preparation of a thesis, master's research paper, or comprehensive paper (depending upon the requirements of the home department) which relates to and demonstrates master's level understanding of the research/theory base of CIDE as certified by a participating faculty member in the home department.

Doctoral Program

- 1 Required introduction: CIE 1001H *Introduction to Comparative, International and Development Education*, if not already taken, or equivalent if transferring from another university.
- 2 One core CIDE doctoral level course.
- 3 Two other core CIDE or specialization doctoral-level courses.
- 4 Regular participation in and contribution to the CIDE Seminar Series (at least one major presentation to the seminar group related to the student's thesis research/development work in addition to regular participation).
- 5 Development of a doctoral thesis that contributes to the research/theory base of CIDE as certified by a participating faculty member, who is also a member of the thesis committee, from the home department.

Faculty Advisors

Students are advised by participating CIDE faculty from their home department. They may also consult the CIDE office and the CIDE Program Directors.

Courses of Instruction

Not all courses are offered each year. Refer to cide.oise.utoronto.ca for current course offerings.

Address:

Centre for Comparative Literature
 Isabel Bader Theatre
 Third Floor
 93 Charles Street West
 Toronto, Ontario M5S 1K9
 Canada

Telephone: (416) 813-4041

Fax: (416) 813-4040

E-mail: complit@chass.utoronto.ca

Web: www.chass.utoronto.ca/complit

Applicants interested in graduate study at the Centre for Comparative Literature at the University of Toronto should consult the Centre's Web site www.chass.utoronto.ca/complit. It provides updated information about requirements, graduate programs, course offerings, and academic profiles of graduate faculty.

The Centre offers M.A. and Ph.D. degree programs to students qualified to pursue literary studies involving several languages. If the language and other requirements of the Centre are satisfied, students may pursue theoretical issues that cross traditional disciplines.

Admissions are selective; therefore, applicants with the minimum qualifications cannot be guaranteed admission.

Applicants, including those from the University of Toronto, must arrange for recommendations from two referees; must submit a

statement of purpose not exceeding 500 words; and must submit a sample of written work, preferably a short essay on a literary topic. Admission to all programs for higher degrees will be based upon the applicant's undergraduate and graduate records and upon the evidence of the references and statement. The deadline for receiving applications to both the M.A. and Ph.D. programs is February 1.

All incoming students will meet with the Graduate Coordinator to discuss their program and to decide on their course of study before beginning classes.

Degree of Master of Arts

Admission Requirements

Applicants for this degree are accepted under the general regulations of the School of Graduate Studies provided that they also satisfy the Centre for Comparative Literature's requirements stated below. In all cases, their programs must be approved by the Centre.

Admission to the M.A. program requires a four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, that includes courses in literature and languages with an average grade of at least B+ in the applicant's overall program. Applicants to the M.A. program must demonstrate experience in the study of two literatures at the undergraduate level and an ability to work at the graduate level in at least one language other than English. Students may be admitted to either a one-year or a two-year degree depending upon their academic background. Those who have sufficient training in at least two literatures in the original languages may be admitted to a one-year program. All applicants must register as full-time students.

Program Requirements

1 Students admitted to the one-year program must complete at least 4 full-course equivalents including at least 2.5 full-course equivalents in COL courses, one of which must be COL 1000H.

2 Students admitted to the two-year program must complete at least 6 full-course equivalents including at least 3.5 full-course equivalents in COL courses, one of which must be COL 1000H.

3 Students may pursue independent research for credit equivalent to one half-course at the M.A. level, under the direction of an advisor approved by the Centre.

4 A plan of study is defined by each M.A. student through consultation with the graduate coordinator in light of the student's particular

areas of interest and background. This plan of study is subject to the approval of the Centre for Comparative Literature. In addition to the numerous courses in literary theory, methodology, and interdisciplinary topics offered by the Centre, courses may also be selected from departments of language and literature, as well as from other units in the humanities.

5 Students must obtain an average of at least B+ in their course work to be recommended for the master's degree.

6 M.A. students who intend to pursue doctoral studies are strongly advised to make appropriate plans for the acquisition of graduate level competence in a second language and literature other than English. An adequate reading knowledge of this second language must be demonstrated before the M.A. is received.

Degree of Doctor of Philosophy

Admission Requirements

Applicants for this degree are accepted under the general regulations of the School of Graduate Studies provided that they also satisfy the Centre for Comparative Literature's requirements stated below. In all cases, their programs must be approved by the Centre.

Admission to the Ph.D. program requires a University of Toronto master's degree, or its equivalent from a recognized university, with an average grade of at least A-. Normally, the master's degree will be in Comparative Literature; however, students with a master's degree in a humanities discipline involving literary studies, especially specific language and literature programs, will also be considered. Applicants must demonstrate an ability to do advanced research in two languages and literatures other than English.

Program Requirements

Ideally, the Ph.D. program in Comparative Literature should be completed in four years. Students are required to take from five to eight full-course equivalents, depending on their individual academic backgrounds.

1 A student with an M.A. in Comparative Literature, or its equivalent, will be required to take at least five full-course equivalents, three of which must be COL courses. A student who has an M.A. in a humanities discipline involving literary studies, especially specific language and literature programs, may be required to take up to eight full-course equivalents, at least four of which must be COL courses. The actual number of courses required for the Ph.D. will be established at the time of admission through

consultation with the Director/Coordinator of Graduate Studies.

2 Time-Line: Ph.D. students, in close consultation with the Graduate Coordinator and faculty members, are responsible for defining the scope and approach of their plan of study. Students submit a preliminary statement of purpose at the time of application to the Centre. During the first two years of the program, students complete course work, language requirements, and prepare for the field examination. Course work must be completed within the first two years of the Ph.D. program. Students constitute a field examination/supervisory committee and submit a dissertation proposal no later than the end of the second year of Ph.D. study. The field examination is taken no later than the end of the first session of the third year.

3 Language and Literature Requirements: In addition to their work for the M.A., Ph.D. students must demonstrate an ability to work at the graduate level in two languages and literatures other than English. An adequate reading knowledge of a third language other than English must be demonstrated before taking the field examination. Certification of graduate level competence and reading knowledge is given to all students who qualify.

All students are expected to achieve a thorough command of at least two literatures and must do work at the graduate level in another literature. This means that students must include courses in three literatures in their program or show evidence of extensive independent research under the supervision of members of the graduate faculty. Students who intend to specialize in comparative French-Canadian and English-Canadian literature may fulfil their other literature requirements through graduate-level work in continental French and British literature.

4 Students may pursue independent research for credit equivalent to one half-course at the Ph.D. level, under the direction of an advisor approved by the Centre.

5 All Ph.D. students are required to enrol in COL 4000Y, a credit/non-credit course, in addition to the agreed upon number of full-course equivalents in their individual program. Normally students enrol in COL 4000Y after completing their course work. The course has no specific content, but it recognizes the work done in preparation for the field examination.

6 When the field examination has been completed successfully, the candidate will prepare and defend a dissertation which must be an original and significant contribution to the existing body of knowledge. The Centre for Comparative Literature is not obligated to provide

supervision in areas which fall outside the competency, interests, or availability of its graduate faculty.

7 The student must be geographically available, visit the campus regularly, and must register as a full-time student. In addition, a full-time student is not permitted to be absent from the University for an extended period or to participate in a program offered by another university without the explicit written permission of the Centre for Comparative Literature.

8 Students' progress will be assessed at least once a year by the Centre's Graduate Academic Committee and/or their respective supervisory committees.

Teaching Assistantships

Although the Centre for Comparative Literature currently has no teaching assistantships (TAs) of its own, it will support qualified students' applications for TAs in the appropriate departments and colleges. Since TAs form part of the funding package, students must apply directly to departments in which they feel qualified to teach, and inform the Centre for Comparative Literature of all teaching assistantships for which they have applied.

Collaborative Programs

The Centre for Comparative Literature participates in the following collaborative programs:

1 Book History and Print Culture

2 Women's Studies

For details about each collaborative program, consult the separate entries in this calendar.

Courses of Instruction

Courses listed below include the core program COL seminars as well as cross-listed courses from other departments, centres, and collaborative programs. Students should consult the Comparative Literature handbook as well as the handbooks of other departments for courses that may be taken for credit, as well as for course availability.

Core Program

COL 1000H Faculty Seminar: Theories of Literature and Criticism/*Staff*

COL 1255H Aspects of Structuralism/*R. Le Huenen*

COL 1900H Reading and Research for the M.A./*Staff*

COL 1910H Reading and Research for the Ph.D./*Staff*

COL 3375H Interdisciplinary Approaches to an Interdisciplinary Art Form: Opera/*L. A. M Hutcheon, C. Clark*

COL 4000Y°	Practicum on Research and Bibliography in Comparative Literature (Credit/No Credit)/ <i>Staff</i>	<i>Drama</i> DRA 1010Y Theory of Drama/ <i>S. B. Johnson</i> DRA 4030Y Studies in Canadian Theatre and Drama/ <i>R. Plant</i>
COL 5018H	Gender, Agency and Life Writing/ <i>B. Havercroft</i>	<i>East Asian Studies</i> Please consult the Department's handbook for course listings.
COL 5032H	Feminist Approaches to Medieval Literature/ <i>J. Ross</i>	<i>English</i> Please consult the Department's handbook for course listings.
COL 5033H	Visual Portraits in Contemporary Autobiographical Narratives/ <i>J. LeBlanc</i>	ENG 6054H Construals of the Self: Autobiography in Africa and the Diaspora/ <i>U. Esonwanne</i>
COL 5037H	Magic Prague. Questions of Literary Cityscapes/ <i>V. Ambros</i>	ENG 6163H The Fate of Culture in the Age of Globalization/ <i>V. Li</i>

Programs of Study and Research Areas

The Department of Computer Science offers a graduate program leading to two degrees: Master of Science (M.Sc.) and Doctor of Philosophy (Ph.D.). The graduate program consists of courses and research. Research is conducted under the supervision of a faculty member. Graduate faculty in the Department of Computer Science are interested in a wide range of subjects related to computing, including programming languages and methodology, software engineering, operating systems, compilers, distributed computation, networks, numerical analysis and scientific computing, financial computation, data structures, algorithm design and analysis, computational complexity, cryptography, combinatorics, graph theory, artificial intelligence, neural networks, knowledge representation, computational linguistics, computer vision, robotics, database systems, graphics, animation, interactive computing, and human-computer interaction.

Admission Requirements

Applicants to both the M.Sc. and Ph.D. degree programs must complete an undergraduate degree equivalent to a four-year program at the University of Toronto with a standing equivalent to at least B+. Preference will be given to applicants who have studied computer science or a closely related discipline. Applicants whose primary language is not English and who graduated from a university where the language of instruction is not English must achieve a TOEFL score of at least 580 on the paper-based test and 5 on the TWE; 237 on the computer-based test and 5 on the essay rating component; 93/120 on the internet-based test and 22/30 on the writing and speaking sections.

Degree Requirements

Degree of Master of Science

The Master of Science degree program will consist of three to five computer science graduate half-courses and a major research paper. The courses must satisfy a breadth requirement to ensure a broad and well-balanced knowledge of computer science. The number of courses required will be determined in consultation with the supervisor and the graduate coordinator. The major research paper should demonstrate the student's ability to do independent work in organizing existing concepts

and in suggesting and developing new approaches to solving problems in a research area. The standard for this paper is that it could reasonably be submitted for peer-reviewed publication. This degree is offered on either a full-time or part-time basis.

Degree of Doctor of Philosophy

Students entering the Ph.D. program with a computer science master's degree will require three to six half-courses and a thesis. Other students will require six to nine half-courses and a thesis. The number of courses required will be determined in consultation with the supervisor and the graduate coordinator. The courses must satisfy a breadth requirement to ensure a broad and well-balanced knowledge of computer science. The most important part of doctoral work is original research conducted under the direction of a faculty member. This research must constitute a significant and original contribution to computer science. The results must be presented in a thesis and defended at department and graduate school oral examinations.

For further details, consult the *Graduate Student Handbook* prepared by the department, also available at www.cs.utoronto.ca/DCS/Grad/index.html.

Collaborative Programs

Collaborative programs provide an opportunity for computer science students to pursue a specialized subject of interest as part of their M.Sc. or Ph.D. programs. The SGS Calendar includes a separate entry for each collaborative program. Please see the relevant entry for collaborative program requirements. Computer Science participates in the following collaborative programs:

- 1 Knowledge Media Design
- 2 Proteomics and Bioinformatics

Courses of Instruction

Programming Languages and Methodology

CSC 2104H	Formal Methods of Program Design
CSC 2106H	Requirements Engineering
CSC 2107H	Compilers and Interpreters

 Toronto, Ontario M5S 1A1
 Canada

Telephone: (416) 978-8679

Fax: (416) 978-4195

E-mail: crim.grad@utoronto.ca

Web: www.criminology.utoronto.ca

The primary aim of the graduate program in Criminology is to provide graduate students with opportunities for advanced multidisciplinary study and supervised research experience concerning crime and the administration of criminal justice. It allows students to become familiar with the existing body of criminological knowledge and to develop critical and analytical skills in relation to the study of crime and the various approaches and techniques of research appropriate to the field. It is specifically designed to educate students for careers (1) in teaching or research in criminology fields, and (2) in which a basic training in criminology and the ability to embark upon and critically evalu-

ate criminological research are necessary or desirable.

TOEFL

It is essential that all incoming graduate students have a command of English. Facility in the English language must be demonstrated by all applicants educated outside Canada whose primary language is not English and who graduated from a university where the language of instruction and examination was not English. This requirement must be satisfied using a Test of English as a Foreign Language (TOEFL) with a verbal and a written component. Applicants taking the paper-based TOEFL exam must achieve a minimum score of 580 and 5 on the TWE. Applicants taking the computer-based TOEFL exam must achieve a minimum score of 237 and 5 on the essay rating component. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 93/120 and 22/30 on the writing and speaking sections. Official copies of these scores must be submitted to the University before a formal offer of admission can be made.

Degree of Master of Arts

Admission Requirements

Applicants must have a four-year University of Toronto bachelor's degree or its equivalent from another university. A four-year bachelor's degree normally consists of 20 full courses. Applicants with arts and science degrees will normally be required to have at least a B+ standing. Applicants from law schools who have already completed a J.D. degree or its equivalent will normally be required to have at least a B standing.

The program is designed for students familiar with the approaches and methodologies associated with the social sciences. It would be advantageous for students to have some background in the theories of crime and deviance and a basic knowledge of social science research methods. A student who is admitted without such background may be required to do special work before being enrolled.

The M.A. can be completed on a full-time or part-time basis. All students will be required to complete the program within the time limits set for the M.A. degree under the general regulations. Students with professional experience who meet the academic admission requirements are encouraged to join the program.

Program Requirements

Master's degree students can complete the program in 1 of 2 ways: by completing 8 half-courses within 9 months or by completing 6 half-courses and a research paper within 12 months. The degree program divides into two sections: compulsory and optional courses.

The compulsory section consists of the courses on criminological theory and the research methods (CRI 1050H and CRI 2010H).

The optional courses allow students to engage in specialized study of different approaches to, and topics within, criminology. The optional courses offered may vary from year to year. In certain cases a student may, with the approval of the Graduate Coordinator, substitute a maximum of two half-courses from another graduate unit in lieu of optional courses in Criminology.

All students are required to participate in the Centre's non-credit Research Seminar.

Degree of Doctor of Philosophy**Admission Requirements**

Applicants normally have an M.A. degree in Criminology, or an equivalent master's degree from a recognized university. Students from M.A. programs other than the University of Toronto's M.A. in Criminology may be required to take additional courses as part of their doctoral program. Applicants will not normally be considered unless they achieved a minimum A- standing in their M.A. degree program.

Program Requirements

Ph.D. students are required to be on campus full-time for the period of their program. Students are expected to participate in the Centre's activities associated with the program.

Ph.D. students with the University of Toronto M.A. in Criminology or its equivalent must fulfil the following requirements:

Comprehensive Examination

Comprehensive examinations evaluate student competence in criminological studies. All Ph.D. students must complete one comprehensive exam. This exam must take the form of a major review paper. Students are required to read widely on a particular topic and identify and evaluate major theoretical debates and methodological issues. Students should provide an original, critical analysis of the literature and discuss possibilities for future work in their topic area.

Course Requirements

Ph.D. students must complete a minimum of four half-courses beyond those taken at the M.A. level. Students must complete, at either the M.A. or the Ph.D. level, the required criminological theory course (CRI 1050H) and the research methods course (CRI 2010H). Ph.D. students are also required to participate in the non-credit research seminar.

Course Schedule

Students will normally complete all course requirements for the Ph.D. in the first year of their Ph.D. program. Comprehensives will normally be completed by the end of the first session of the second year. It is expected that the dissertation should be completed and successfully defended by the end of the fourth year.

Language Requirements

Students must have an adequate knowledge of a language other than English if an additional language is deemed essential for satisfactory completion of research for the thesis.

Thesis

Ph.D. students must prepare an original thesis that is a significant contribution to knowledge in criminology. The thesis is a sustained piece of research written in an integrated series of chapters. The thesis is normally supervised by a member of the graduate faculty in Criminology, with two other members of the graduate faculty serving on the thesis committee.

Junior Fellowships at the Centre

Students who are enrolled in doctoral programs in other departments of the University of Toronto, and who plan to undertake graduate research on a criminological topic, may apply to be appointed as Junior Fellows at the Centre of Criminology.

The overall objective of the Junior Fellowship program is to involve doctoral students who are studying in areas related to criminology and to enhance the intellectual life of the Centre. The program reflects the Centre's commitment to the multidisciplinary character of criminological research. Therefore, Junior Fellowships are awarded to students whose academic performance, demonstrated interest in criminology, and desire to participate actively in the life of the Centre make it likely that they will contribute to the achievement of the objective of the program.

Junior Fellows may be given office space at the Centre of Criminology if it is available, as well as access to other Centre facilities. The

status of Junior Fellow does not include any financial award.

Under special circumstances, students who are enrolled in graduate programs at other universities and who are undertaking research on a criminological topic may apply to be appointed as Visiting Junior Fellows.

Since the Junior Fellowships began in 1976, more than 50 students have been associated with the Centre in this way. Students have come from a variety of disciplines including Anthropology, Education, History, Law, Philosophy, Political Science, Psychology, Social Work, and Sociology.

Enquiries concerning Junior Fellowships or the Ph.D. program should be directed to the Coordinator of Graduate Studies at the Centre of Criminology.

Combined J.D./M.A. in Criminology

Law students who also want to pursue graduate work in criminology may undertake the combined J.D./M.A. in Criminology degree program.

Admission Requirements

In a combined program, applicants must gain independent admission to both programs. Applicants may be admitted before they enter the J.D. program or while they are in the first year. Applicants wishing to apply to the Combined J.D./M.A. program in Criminology should contact the Admissions Office, Faculty of Law, University of Toronto at (416) 978-3716.

Program Requirements

Students first take the full first-year law program. This is followed by two combined years. Over the course of the two combined years students must:

- 1 take 45 credits in the Faculty of Law;
- 2 satisfy the compulsory requirements of the upper years of the J.D. These are a moot, an extended paper, and a perspective course;
- 3 take six half-courses at the Centre of Criminology; one of these half-courses must be either a theory or a research methods course. Two of these half-courses may be taken in the form of the Centre of Criminology's Research Paper.

Students must take a minimum of two half-courses in Criminology in each of the second and third years of the program and may take a maximum of four half-courses a year. The number of law school credits completed each year will be adjusted accordingly, the only requirement being that 45 are completed over the two years. Students must submit their programs for

the approval of the Director of the Combined Program.

Collaborative Programs

Criminology participates in two collaborative programs:

- 1 Addiction Studies
- 2 Women's Studies

For detailed information, consult the separate entries in this calendar.

Courses of Instruction

All courses are half-courses, with the exception of the Research Paper. Not all courses are offered every year. Consult the Centre regarding course availability.

Due to space limitations, Criminology graduate students will be given priority in graduate course enrolment; all other students must receive written permission from the instructor before enrolling in any of the Centre's graduate courses.

I Required Courses

- CRI 1050H Theories of Crime and Social Order/*M. Valerde*
 CRI 2010H Methodological Issues in Criminology/*R. Gartner*

II Optional Courses

- CRI 1020H Law and Society: Theoretical Perspectives/*R. Levi*
 CRI 2020H Applied Statistics in Criminology/*Staff* Students may take this course or IRE 1002H *Applied Statistics in Industrial Relations*, but not both.
 CRI 3120H Politics and Crime/*P. H. Solomon*
 CRI 3130H Policing/*R. V. Ericson*
 CRI 3140H Special Topics in Criminology/*R. I. Gartner*
 CRI 3150H Crime, Law, and the State in Early Modern England, 1650-1850/*J. M. Beattie*
 CRI 3160H Historical Approaches to Crime and Justice in Canada/*J. M. Beattie, J. R. Phillips*
 CRI 3240H Penology/*N. S. Wortley*
 CRI 3270H The Psychology of Criminal Behaviour: Theory and Practice/*M. C. Seto*
 CRI 3310H Special Topics in Criminology/*M. Valverde*
 CRI 3320H The Criminal Process/*K. Roach*
 CRI 3330H Contemporary Issues in Safety and Security/*Staff*
 CRI 3340H Special Topics in Criminology/*M. Condon*
 CRI 3350H Directed Research in Criminology/*Staff*

302 Criminology

CRI 3355H	Sentencing/ <i>D. Cole</i>
CRI 3351H	Directed Research in Criminology/ <i>Staff</i>
CRI 3356H	Youth Crime and Youth Justice/ <i>A. N. Doob</i>
CRI 3357H	Risk, Uncertainty, and Criminal Justice/ <i>R. V. Ericson</i>

Address:

Department of Curriculum, Teaching and Learning
 The Ontario Institute for Studies in Education
 of the University of Toronto (OISE/UT)
 Eleventh Floor, 252 Bloor Street West
 Toronto, Ontario M5S 1V6
 Canada

Telephone: (416) 923-6641 ext. 2601

Fax: (416) 926-4744

E-mail: ctlinquiries@oise.utoronto.ca

Web: www.oise.utoronto.ca/depts/ctl/

Enquiries

Initial enquiries regarding admission to graduate studies in the Department of Curriculum, Teaching and Learning (CTL) should be made directly to:

The Ontario Institute for Studies in Education
 of the University of Toronto (OISE/UT)
 Registrar's Office
 Graduate Studies, Admissions Unit
 Fourth Floor, 252 Bloor Street West
 Toronto, Ontario
 Canada
 M5S 1V6

Such enquiries should be made well in advance of the December 1 regular deadline for receipt of applications. Given the limited number of students the Department may accept into the majority of its programs, not all eligible applicants can be admitted. Program

and admission details are printed in the *OISE/UT Bulletin*, available from the OISE/UT Registrar's Office. Not all courses are offered every year; consult the Department each session for course offerings.

Degree Programs

The following graduate programs are offered by the CTL Department:

1 Curriculum Studies and Teacher Development (M.Ed., M.A., Ph.D.)

2 Elementary and Intermediate Education (M.T.)

3 Second Language Education (M.Ed., M.A., Ph.D.)

Collaborative Programs

CTL participates in the following collaborative graduate degree programs:

1 Comparative, International and Development Education (M.Ed., M.A., Ph.D.)

2 Knowledge Media Design (M.Ed., M.A., Ph.D.)

3 Women's Studies (M.Ed., M.A., Ph.D.)

For further information, consult the separate collaborative program entries in this calendar.

Notes

1 The Doctor of Education (Ed.D.) degree in the Curriculum Studies and Teacher Development Program is discontinued. The Department will maintain the program and its courses until all current students have graduated.

2 The Master of Arts in Teaching program or M.A.(T.) is discontinued. The Department will maintain the program and its courses until all current students have graduated.

3 The Measurement and Evaluation program is discontinued and is no longer accepting new applicants.

4 The Teacher Development (TD) program is discontinued and is no longer accepting new applicants. The CTL Department will continue its strong commitment to teacher development research through studies conducted, coordinated through, or supported by faculty and students associated with the Centre for Teacher Development. Furthermore the Curriculum Studies and Teacher Development Program will offer a wide range of courses in teacher development, some of which will be transferred from the TD program and some of which are already available in the Curriculum Studies and Teacher Development Program. Both current and future students will be able to pursue in-depth studies in this area, though no longer in a separate program devoted exclusively to teacher development.

1 CURRICULUM STUDIES AND TEACHER DEVELOPMENT PROGRAM

The Curriculum Studies and Teacher Development (CSTD) Program is a forum for systematic reflection on the substance (subject matter, courses, programs of study), purposes, and practices used for bringing about learning in educational settings. Of concern are such fundamental issues as: What should be studied? Why? By whom? In what ways? And in what settings? Reflection upon such issues involves an interplay among the major components of education: learners, subject matter, learning, teaching, and the larger social, political, and economic contexts as well as the immediate instructional situation. Curriculum Studies and Teacher Development Program course offerings and guided research opportunities reflect the diverse interests of faculty in a range of areas.

Curriculum Studies and Teacher Development Program faculty guide student work in a wide range of inquiry and data analysis methodologies, including qualitative and quantitative research, action research, naturalistic inquiry, teacher inquiry, performed and critical ethnography, and life history.

The interest areas below reflect overlapping and intersecting areas of strength in the whole Curriculum Studies and Teacher Development Program, not separate sub-programs. Faculty and students each pursue diverse overlapping combinations of these interests. To show the general dimensions of the Curriculum Studies and Teacher Development Program, the interest descriptors are arranged in categories: broad perspectives on education in various contexts (where and why we teach), curriculum content and pedagogy (what and how we teach), and intersections of curriculum with particular diverse learners (who we teach).

Curriculum Theories, Perspectives and Teacher Development

include broad orientations and diverse settings for research in curriculum, schooling, teaching/learning, educational change.

- Curriculum and Program Development and Implementation
- School and District Policy, Environments, Change and Reform
- Assessment and Evaluation
- Teacher Professional Learning, Teachers as Change Agents
- Teachers' Work, Lives, Narratives, Beliefs, and Knowledge
- Teacher Knowledge/Teacher Identity
- Teacher Leadership
- Pre-service and In-service Education

- Holistic Education, Imagination, and Spirituality
- Feminist and/or Queer Theories in Education
- Cultural Studies and Critical Theory in Education
- Dialogic and Social Constructivist Approaches to Curriculum
- Education in Non-school Settings
- Distance Education and On-line Learning Environments
- Knowledge Media/Technology, Knowledge Building and Innovation
- Comparative Education and Education in International Settings

Curriculum Subject Matter and Teaching/Learning Processes

include subject area content and/or pedagogical approaches:

- Pedagogy, Instructional Design and Student Assessment
- Student and/or Teacher Problem Solving and Critical Thinking
- Arts and Aesthetic Education
- Drama/Theatre Pedagogy
- Health and Physical Education
- Science and/or Technology Education
- Mathematics Education
- English Language, Children's Literature, and Literacy Education
- Democratic Citizenship, Global Perspectives, and Social Sciences Education
- Conflict/Peace Education
- Critical and Social Justice Pedagogies

Diverse Student Populations and Curriculum Issues

include challenges and issues in constructing and delivering curriculum for particular diverse students and/or for social change:

- Adaptive and Inclusive Classrooms
- Franco-Ontario and French-Language Minority Education
- Educating Immigrant and English as a Second Language Students
- Gender and Education
- Sexuality and Anti-homophobia Education
- Anti-Racist, Multicultural and Anti-discriminatory Education
- Students' Identity Construction
- Urban Youth
- Early Childhood Education
- Gifted Learners

Degree of Master of Education

The M.Ed. degree program is designed chiefly for the professional development of those who are already engaged in a career related to education. Applicants are accepted under the

general regulations which specify an appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university. This degree must be completed with an academic standing equivalent to a University of Toronto mid-B or better in the final year. Ordinarily, applicants will have at least one year of relevant, successful, professional experience prior to applying.

In the Statement of Intent, applicants should state the reasons they wish to study curriculum at the graduate level. The chief academic interests, professional concerns, and career plans related to curriculum studies and teacher development should be discussed. In order to identify their research interests in their Statement of Intent, applicants should visit the Curriculum Studies and Teacher Development Program Web page (www.oise.utoronto.ca/depts/ctl/programs_admissions.html). The Admissions Committee reviews this Statement to determine the kind of focus or area of study in which an applicant is most interested and to link the applicant to appropriate faculty advisors.

The M.Ed. program of study consists of ten half-courses, at least five of which are normally CTL 1000-level courses undertaken in the Curriculum Studies and Teacher Development Program, and may be taken on a full-time or part-time basis. Additional study may be required either within the degree program or prior to admission, depending on previous experience and academic qualifications. Students are required to successfully complete CTL 1000H. All requirements for the degree must be completed within six calendar years from first enrolment.

Degree of Master of Arts

The M.A. degree program is designed to provide academic study and research training related to curriculum studies. Applicants are accepted under the general regulations. Admission normally requires a four-year University of Toronto bachelor's degree, or its equivalent, in a relevant discipline or professional program completed with standing equivalent to a University of Toronto mid-B or better in the final year.

Ordinarily, applicants will have at least one year of relevant, successful, professional experience prior to applying. Students who anticipate going on to further study at the Ph.D. level are advised to apply for enrolment in an M.A. rather than an M.Ed. degree program.

In the Statement of Intent, applicants should state the reasons they wish to undertake a research-oriented program of study in curriculum

or teacher development. The chief academic interests and experience, professional concerns, and career plans related to an aspect of curriculum studies should be discussed. In order to identify their research interests in their Statement of Intent, applicants should visit the Curriculum Studies and Teacher Development Program Web page (www.oise.utoronto.ca/depts/ctl/programs_admissions.html). The Admissions Committee reviews this Statement to determine the kind of curriculum problem or area of study in which an applicant is most interested and to link the applicant to appropriate faculty advisors.

The M.A. may be taken on a full-time or part-time basis and consists of eight half-courses, at least four of which are normally CTL 1000-level courses undertaken in the Curriculum Studies and Teacher Development Program, and a thesis. Additional courses may be required of some applicants, depending on previous experience and academic qualifications. Students are required to successfully complete CTL 1000H, and a course in research methods from an approved course listing. A listing of approved research methods courses is available on the Curriculum Studies and Teacher Development Program Web page (www.oise.utoronto.ca/depts/ctl/programs_admissions.html).

Note: Students are responsible for meeting deadlines to complete their course requirements, thesis committee formation, and ethical review. All requirements for the degree must be completed within five years from first enrolment.

Degree of Doctor of Education

Admission to the Ed.D. degree program in Curriculum Studies and Teacher Development has been suspended. Students currently enrolled in the program will complete their course of studies after which time the Ed.D. program will close.

Degree of Doctor of Philosophy

The Ph.D. is intended primarily as preparation for academic positions in universities; the program demands a strong commitment to curriculum research. The Curriculum Studies and Teacher Development Program offers both full-time and flexible-time Ph.D. program options. Applicants must declare the option for which they wish to apply.

Admission Requirements

Full time Ph.D. Option

Applicants are accepted under the SGS general regulations. A University of Toronto master's degree in education or its equivalent from a recognized university, in the same area of specialization as proposed at the doctoral level is required. This degree must be completed with an average grade equivalent to a University of Toronto B+ or better. Further documentation may be required to establish equivalence. Applicants will ordinarily have a minimum of two years professional experience prior to applying. Applicants are required to submit, along with the application:

- a** Their masters thesis or a sample of single-authored scholarly writing. Details of what constitutes an appropriate writing sample can be found on the Curriculum Studies and Teacher Development Program Web page (www.oise.utoronto.ca/depts/ctl/programs_admissions.html).
- b** A Statement of Intent describing their intellectual interests and concerns relevant to curriculum studies and teacher development, reasons for wishing to take the Program, previous qualifications and professional experiences, particular research or professional interests, and future career goals.
- c** Two letters of reference, one academic and one professional.

Flexible-time Ph.D. Option

Applicants to the flexible-time Ph.D. option are accepted under the SGS general regulations and are subject to the same admission requirements as applicants to the full-time Ph.D. option. However, in addition, applicants to the flexible-time Ph.D. must include in their Statement of Intent the outline of a plan that demonstrates:

- a** that the applicant is in a career related to the field of study;
- b** that the applicant has three or more years with the same employer;
- c** a desire to continue with current career path;
- d** the capacity to secure blocks of time to enable concentrated study (e.g., reference to the employer's leave policy, study incentive system, etc.)

Degree Requirements

Full-time Ph.D. students must complete their degree within six years. Flexible-time Ph.D. students must complete their degree within eight years. Degree requirements for both programs are the same. The Ph.D. program of study normally consists of six half-courses,

at least four of which are ordinarily CTL 1000-level courses undertaken in the program.

Additional courses may be required of some students. Students are expected to take CTL 1000H if they did not complete it at the master's level, and one course in research methods from an approved course listing. This listing is available on the Curriculum Studies and Teacher Development Program Web page (www.oise.utoronto.ca/depts/ctl/programs_admissions.html). Students must successfully complete a comprehensive examination. In addition, a thesis, embodying the results of an original investigation, and a final oral examination, on the content and implications of the thesis, are also required.

Note: Students are responsible for meeting deadlines to complete their course requirements, thesis committee formation, comprehensive examination, and ethical review.

Courses of Instruction

Not all courses are offered every year. Please consult the Department for course offerings.

2 MASTER OF TEACHING IN ELEMENTARY AND INTERMEDIATE EDUCATION PROGRAM

The Master of Teaching (M.T.) degree program in Elementary and Intermediate Education is a two-year full-time program of study leading to a Master of Teaching degree. Upon successful completion of this program, students will be recommended to the Ontario College of Teachers for an Ontario Teacher certificate of Qualification which qualifies them to teach in either the primary and junior divisions or the junior and intermediate divisions of Ontario schools.

The Master of Teaching program offers students a unique opportunity for teacher qualification with advanced theoretical knowledge and research skills. The program provides students with a strong conceptual grounding in human development, ethics, law, diversity, educational technology, curriculum, teaching, and learning. The high level of academic rigour in conjunction with increased practicum and internship opportunities serve to enhance the theoretical and practical experiences of students preparing to teach.

Program objectives are achieved through a combination of course work, teaching and research seminars, internships and practica, along with independent and collaborative research and major research papers.

Admission Requirements

Applicants are admitted under the general regulations of the School of Graduate Studies. Applicants must have the equivalent of a University of Toronto four-year bachelor's degree with standing equivalent to a University of Toronto mid-B or better in the final year. In their Statement of Intent, applicants should describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. Final selection will be based on an interview by a panel of faculty, teachers, and students. Given the limited number of students in this program, not all eligible applicants can be admitted.

Because applicants are applying to a teacher education program, the following items must be submitted with the application:

a a photocopy of a Canadian birth certificate, or in the case of a person who was not born in Canada, documents showing the basis upon which the applicant is present in Canada, including date and place of birth

b a photocopy of a certificate of change of name where applicable

Note: A police record check is required for certification by the Ontario College of Teachers and is required in both the first and second year of the program.

Program Requirements

The two-year M.T. degree comprises the equivalent of 16 half-courses (14 core and 2 electives), including practica, and is undertaken on a full-time basis. Normally, advanced standing is not granted in this program. In addition to the course work (including practica), all students must successfully complete a comprehensive examination at the end of the program in order to graduate and receive the M.T. degree and a recommendation to the Ontario College of Teachers for an Ontario Teachers' Certificate of Qualification. Registration in the second year is contingent upon successful completion of all first-year work.

Courses of Instruction

Core Courses - Year 1

CTL 7000H	Curriculum and Teaching in Literacy
CTL 7002H	Curriculum and Teaching in Mathematics
CTL 7003H	Curriculum and Teaching in Social Studies and Science
CTL 7004Y	Practicum in the Schools
CTL 7006H	Reflective Teaching and Inquiry into Research in Education
CTL 7007H	Authentic Assessment

Core Courses - Year 2

CTL 7001H	Educational Professionalism, Ethics and the Law
CTL 7005Y	Practicum Internship
CTL 7008H	Introduction to Special Education and Adaptive Instruction
CTL 7009H	Anti-Discriminatory Education
CTL 7010H	Issues in Numeracy and Literacy
CTL 7011H	Child and Adolescent Development

Elective Courses

Two elective courses are selected from course offerings in the Department of Curriculum Teaching and Learning. Choice of electives is contingent upon the approval of the student's faculty advisor.

3 SECOND LANGUAGE EDUCATION PROGRAM

Studies in Second Language Education (SLE) focus on curriculum, instruction, learning, and policies for education in second, foreign, and minority languages, particularly in reference to English and French in Canada but also other languages and settings, including studies of language learning, methodology and organization of classroom instruction, language education policies and planning, and student and program evaluation as well as issues related to bilingualism, multilingualism, cultural diversity, and literacy.

Degree of Master of Education

Applicants are accepted under the general regulations which specify an appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university completed with an academic standing equivalent to a University of Toronto mid-B or better in the final year. Ordinarily, applicants should have teacher certification and at least one year of relevant successful professional experience prior to applying. All applicants are required to submit a resume and a Statement of Intent describing their reasons for wishing to take the program, previous qualifications and professional experiences, particular research or professional interests, and future goals.

The M.Ed. program consists of 10 half-courses. A minimum of five CTL 3000-level courses must be taken within the Second Language Education program. One of the courses must be either CTL 3000H *Foundations of Bilingual and Multicultural Education* or CTL 3002Y *Methodology and Organization of Second-Language Teaching*. The M.Ed. program of study may be taken on a full or part-time basis. All requirements for the degree must be completed within six calendar years from first enrolment.

Degree of Master of Arts

Applicants are accepted under the general regulations. Admission requires a four-year University of Toronto bachelor's degree, or its equivalent, in a relevant discipline or professional program, completed with standing equivalent to a University of Toronto mid-B or better in the final year. Ordinarily, applicants should have teacher certification and at least one year of relevant successful professional experience prior to applying. Enrolment in the M.A. (rather than M.Ed.) program is advisable for applicants expecting to pursue a doctorate in the future. All applicants are required to submit a resumé and a Statement of Intent describing their rea-

sons for wishing to take the program, previous qualifications and professional experiences, particular research or professional interests, and future career goals.

The M.A. program may be undertaken on a full-time or part-time basis and consists of eight half-courses and a thesis. Part-time students are expected to be available to take CTL 3001H during day-time hours (usually Friday afternoons). Students must take a minimum of four CTL 3000-level half-courses within the SLE program. Courses must include CTL 3001H plus a course in research methods relevant to the topic of the thesis. Any of the following courses can fulfil this requirement: CTL 1018H, CTL 1030H, CTL 1041H, CTL 1306H, CTL 1810H, CTL 1842H, CTL 3019H, CTL 3800H, CTL 3803H, CTL 3807H, AEC 1400H, HDP 1287H, HDP1288H or SES 1905H. Students wishing to propose an alternative course to fulfil one of the SLE course requirements will be required to obtain the approval of *both* the SLE graduate program coordinator and either their faculty advisor or their thesis supervisor. Students are responsible for meeting deadlines to complete their course requirements, thesis committee formation, and ethical review. Additional courses may be required of some applicants. All requirements for the degree must be completed within five calendar years from first enrolment.

Degree of Doctor of Education

Admission to the Ed.D. degree program in Second Language Education is discontinued. Students currently enrolled in the program will complete their course of studies after which time the Ed.D. program will close.

Degree of Doctor of Philosophy

Individuals pursuing the Ph.D. typically wish to be university professors in this field. The Second Language Education program offers both full-time and flexible-time Ph.D. options. Applicants must declare their preferred option when applying.

Admission Requirements

Full-time Ph.D. Option

Applicants are accepted under the SGS general regulations. A University of Toronto master's degree, or its equivalent from a recognized university, completed with an average grade equivalent to a University of Toronto B+ or better is required. Admission is contingent upon satisfactory completion of a master's thesis, or the equivalent in the form of a scholarly

piece of writing. Ordinarily, applicants will have a minimum of two years relevant professional experience prior to applying. All applicants are required to submit a résumé and a Statement of Intent describing their reasons for wishing to take the Program, previous qualifications and professional experiences, particular research or professional interests, and future career goals.

Flexible-time Ph.D. Option

Applicants to the flexible-time Ph.D. option are accepted under the SGS general regulations and are subject to the same admission requirements as applicants to the full-time Ph.D. option. However, in addition, applicants to the flexible Ph.D. must include in their Statement of Intent the outline of a plan that demonstrates the following:

- a** the applicant is in a career related to the field of study;
- b** the applicant has three or more years with the same employer;
- c** a need and desire to continue with current career path;
- d** the capacity to secure blocks of time to enable concentrated study (e.g., reference to the employer's leave policy, study incentive system, etc.)

Degree Requirements

Full-time Ph.D. students must complete their degree within six years. Flexible-time Ph.D. students must complete their degree within eight years. Degree requirements for both programs are the same. The Ph.D. involves six to eight half-courses (depending on previous experience and academic qualifications), comprehensive examinations and a thesis embodying the results of an original investigation, and a final oral examination on the content and implications of the thesis. Students must take a minimum of four CTL 3000-level half-courses within the SLE Program. Students are required to take CTL 3801H *Research Colloquium in Second Language Education, Doctoral Level* (unless they have previously taken CTL 3001H *Research Colloquium in Second Language Education, Master's Level*), as well as a research methods course relevant to the topic of the thesis. Any of the following courses can fulfil this requirement: CTL 1018H, CTL 1030H, CTL 1041H, CTL 1306H, CTL 1810H, CTL 1842H, CTL 3019H, CTL 3800H, CTL 3803H, CTL 3807H, AEC 1400H, HDP 1287H, HDP 1288H, SES 1905H.

A student wishing to propose an alternative course to fulfil one of the SLE course requirements will be required to obtain the approval

of the SLE Program coordinator and either her or his faculty advisor or thesis supervisor. For the full-time Ph.D., a minimum of two consecutive years of full-time study are required at the beginning of the Program, during which time students usually complete course requirements, pass the comprehensive examination, prepare a thesis proposal, and form a thesis committee.

Flexible-time Ph.D. students may apply for part-time status after four years of full-time registration.

Courses of Instruction

Not all courses are offered every year. Please consult the Department for course offerings.

The Faculty of Dentistry offers a graduate program leading to either a Master of Science or Doctor of Philosophy degree. This graduate program is intended for:

- 1 students who have a degree in dentistry and who are pursuing research training and advanced clinical education leading to qualification in one of ten dental specialty disciplines; and
- 2 students, both dentists and non-dentists, who are pursuing graduate research training without advanced clinical education. Consequently, both the Master of Science and the Doctor of Philosophy degrees have a common core of course work and consist of three options, with each having varying additional research and training requirements.

Degree of Master of Science

1 Thesis Option

Admission Requirements

Applicants shall hold a four-year Bachelor of Science degree, Doctor of Dental Surgery, or an equivalent degree, with at least mid-B standing in the final year from a recognized university in a discipline appropriate to the field of dentistry.

Program Requirements

The program will ordinarily require one year of full-time registration; however, it is the Department's expectation that students will normally remain in full-time attendance on campus to enable full participation in departmental activities for two years. The first year of the program will include development of a research project and proposal, and course work, while the second year will be devoted largely to research and thesis completion and defence. Course work will normally include, as a minimum, fulfillment of the requirements for the course DEN 1001Y^o *Master's Seminars in Oral Health Sciences* and successful completion of an additional half-course. Exemptions may be granted for previously completed course work at the bachelor's level.

2 Specialist Dental Training – Thesis Option

The Department offers a Master of Science degree for dental graduates seeking advanced training in a clinical specialty as well as training in research.

Admission Requirements

Applicants shall hold the degree of Doctor of Dental Surgery or an equivalent degree, with at least a mid-B standing in the final year from a recognized university.

Program Requirements

The program requires two to four years of full-time registration, depending upon the clinical specialty, and involves completion of an original research project culminating in an oral defence of a written thesis, and completion of clinical and didactic course work requirements as necessary to meet Canadian Dental Association accreditation requirements for the chosen clinical specialty. In addition, students must fulfil the requirements of the obligatory course DEN 1001Y^o *Master's Seminars in Oral Health Sciences* for a minimum of one year. Upon completion of all program requirements, students are eligible for the M.Sc. degree and for Specialty, Fellowship, or Board Certification in one of the dental specialties. For further information, please consult the Faculty of Dentistry Calendar or Web site.

3 Specialist Dental Training – Course Work Only Option

The Department also offers a Master of Science degree for dental graduates seeking advanced training in a clinical specialty in which additional course work is undertaken as an alternative to a thesis. The availability of this option will vary by specialty.

Admission Requirements

Applicants shall hold the degree of Doctor of Dental Surgery, or an equivalent degree, with at least a mid-B standing in the final year from a recognized university.

Program Requirements

The program requires two to four years of full-time registration, depending upon the clinical specialty, entails completion of all clinical and didactic course work necessary for accreditation in the chosen specialty along with three half-courses in clinical, epidemiological, or basic science research methodology appropriate for clinical or public health practice, and a research practicum. Upon completion of all program requirements, students are eligible for the graduate degree and for Specialty, Fellowship, or Board Certification in the chosen dental specialty.

^oCourses which may continue over a program. The course is graded when completed.

Program Transfer – M.Sc. to Ph.D.

M.Sc. students pursuing either of options 1 or 2, who are demonstrating excellent progress in all facets of their program, may apply to transfer from the M.Sc. to the Ph.D. program. Transfer time varies for students in the specialty training – thesis option. The transfer examination will take place up to 18, and in exceptional circumstances, 24 months after entry into the M.Sc. program for registrants in the M.Sc. – Thesis Option. Regulations governing such transfers are available from the Graduate Department of Dentistry. Students registered in the specialty training course-work-only option will not be permitted to transfer to the Ph.D. degree, but may apply to the Ph.D. program following completion of the M.Sc. degree.

Degree of Doctor of Philosophy**1 Full-Time Research Option***Admission Requirements*

Students are normally admitted to a four-year Ph.D. program with an appropriate master's degree, or equivalent, with at least an A standing from a recognized university in a discipline appropriate to the intended field of doctoral study. However, under exceptional circumstances, the Department may admit a highly qualified student with an appropriate four-year Bachelor of Science degree in a discipline appropriate to the field of dentistry or a Doctor of Dental Surgery degree with at least an A standing from a recognized university.

Program Requirements

Students undertake customized programs, approved by an advisory committee and the Graduate Chair of Dentistry, comprising advanced study and original research culminating in the defence of a thesis. Minimum course requirements include completion of the course DEN 1100Y° *Doctoral Seminars in Oral Health Sciences*, plus one additional full course. Exemptions may be granted for M.Sc. course work from closely related disciplines. This includes students transferring from M.Sc. to Ph.D. programs. Programs of study for B.Sc. students will normally include additional course work requirements. Although the minimum residency requirement is one year, it is the Department's expectation that students will normally remain on campus for four years.

After 12 months and within 24 months of starting a Ph.D. program, students must pass

a qualifying oral examination to demonstrate an adequate capacity for oral health sciences research through previous work and will be examined on their thesis proposal and their breadth of knowledge relative to the research project. Students are also expected to:

- a** participate in all graduate research activities of the advisor's research group;
- b** present at meetings and publish original research findings in timely fashion; and
- c** participate as members of departmental and student committees as applicable.

In all cases, students will consult with the Graduate Chair of Dentistry who will appoint a committee to plan and arrange their course work and research programs. The committee and the Graduate Chair must approve the entire course of study. The student's supervisor will chair the committee. The committee will closely monitor the student's ability to sustain satisfactory performance and will report semi-annually to the Graduate Chair for approval and continuance of candidacy.

2 Full-Time Program Combined with Dental Specialty Training Option

The Department offers a Doctor of Philosophy degree for exceptional dental graduates seeking to combine a Ph.D. degree with advanced training in a clinical specialty. Applicants intending to train as clinician/scientists, aspiring to teaching and research careers in the dental field, are considered on an individual basis.

Admission Requirements

The minimum entry requirement is a Doctor of Dental Surgery degree with at least an A standing from a recognized university. Evidence of research experience or research potential is normally required.

Program Requirements

Programs require completion of an original research project culminating in an oral defence of a thesis. Minimum course requirements include completion of the course DEN 1100Y° *Doctoral Seminars in Oral Health Sciences*, plus one additional full course, together with, for the chosen clinical specialty, completion of clinical and didactic course work requirements.

All students will consult with the Graduate Chair of Dentistry who will appoint a committee to plan and arrange their course and research programs. The committee and the Graduate Chair must approve the entire course of study. The student's supervisor will chair the committee. The committee will closely monitor the student's ability to sustain satisfactory performance and will report semi-annually to the

°Courses which may continue over a program. The course is graded when completed.

Graduate Chair of Dentistry for approval and continuance of candidacy.

After 12 months and within 24 months of starting the Ph.D. program, students must pass a qualifying oral examination to demonstrate an adequate capacity for oral health sciences research through previous work and will be examined on their thesis proposal and their breadth of knowledge relative to the research project. Students are also expected to:

- a** participate in all graduate research activities of the advisor's research group;
- b** present at meetings and publish original research findings in timely fashion; and
- c** participate as members of departmental and student committees as applicable.

The addition of the clinical and didactic courses for a clinical specialty will normally increase the amount of time for the Ph.D. degree by two years, depending upon the particular clinical specialty undertaken, and program completion will be contingent upon completion of all requirements for the research and specialty training components of the program. Upon completion, students are eligible for the graduate degree and for Specialty, Fellowship, or Board Certification in one of the dental specialties. For further information, please consult the Faculty of Dentistry Calendar or Web site.

3 Flexible-Time Option

The Department offers a flexible-time Ph.D. program for selected students whose career goal is a full-time academic position in a clinical discipline. Students concurrently establish their teaching and academic credentials. The major goal upon program completion is to enable students to compete for university tenure-stream professorial positions in their clinical science discipline.

Admission Requirements

Applicants must meet all School of Graduate Studies and Graduate Department of Dentistry admission requirements for entry to the Ph.D. program. In addition, applicants must have attained a professional degree equivalent to the University of Toronto D.D.S. and a graduate degree equivalent to the University of Toronto M.Sc. Preference is given to:

- a** applicants who have completed specialty education equivalent to the standard required for licensure as a specialist by the Royal College of Dental Surgeons of Ontario and

- b** applicants who hold a university appointment in Canada at an academic standard equivalent to the University of Toronto Lecturer.

Program Requirements

The program, which is dedicated to research experience, does not involve clinical training other than clinical research methodology, and entails completion of the research and course work requirements for the Ph.D. degree half time, while teaching in a clinical discipline half time.

Appropriate research supervision and advisory committee membership, customized plan of study, and timetable for the completion of the degree requirements, as approved by the Graduate Chair of Dentistry, will be in place at program commencement. The Graduate Chair monitors progress by review of completed advisory committee reports based on annual meetings of the student with the supervisory committee. Although the minimum residency requirement for the Ph.D. is one year, the anticipated completion date for the flexible-time Ph.D. program will be within five to six years from the registration date. The maximum time for completion will normally be eight years.

Students are required to conduct research leading to completion and defence of a thesis and complete minimum course work requirements, which include DEN 1100Y^o *Doctoral Seminars in Oral Health Sciences*, plus one additional full course. As with other options in the Ph.D. program, students must pass a qualifying oral examination 12 to 24 months after commencement to demonstrate an adequate capacity for oral health sciences research at the doctoral level. They are also expected to:

- a** participate in all graduate research activities of the advisor's research group;
- b** present at meetings and publish original research findings in timely fashion; and
- c** participate as members of departmental and student committees as applicable.

Collaborative Programs

The Department participates in the following collaborative programs:

- 1** Aging, Palliative and Supportive Care Across the Life Course
- 2** Biomedical Engineering
- 3** Neuroscience
- 4** Women's Health

For more details, consult the separate entries in this calendar.

^oCourses which may continue over a program. The course is graded when completed.

Courses of Instruction

Not all courses are offered every year. The Department should be consulted each session as to course offerings.

DEN 1001Y^o and DEN 1100Y^o, designed to enhance critical analysis and presentation skills, involve seminars on faculty and student research, research ethics, critiques on student presentations, and participation in Research Day. These seminars are required as part of the program for all M.Sc. and Ph.D. students.

- DEN 1001Y^o Master's Seminars in Oral Health Sciences (Credit/No Credit)/
Staff
- DEN 1002H Oral Pathology/*G. Bradley, Staff*
- DEN 1003H Preventive Dentistry/
H. Limeback, Staff
- DEN 1006Y Seminars in Dental Public Health/
J. Leake, Staff
- DEN 1007H Oral Radiology/*E. W. N. Lam, Staff*
- DEN 1011Y^o Advanced Seminars in Oral Pathology/*R. J. McComb, Staff*
- DEN 1012Y^o Oral Medicine/*I. Leong, Staff*
- DEN 1013Y^o Oral Surgical Pathology/
R. J. McComb, Staff
- DEN 1016H Occlusion: Function and Dysfunction/*A. Jokstad, Staff*
- DEN 1017H Temporomandibular Disorders/
A. Jokstad, Staff
- DEN 1022H Investigating Pathogenic Biofilms/*R. P. Ellen, Staff*
- DEN 1024H Experimental Methods in Caries Research/*Staff*
- DEN 1030H Critical Appraisal and Evidence-Based Care/*H. Lawrence, Staff*
- DEN 1040Y Dental Clinical Epidemiology and Biostatistics/*H. Lawrence, J. Leake*
- DEN 1051Y Oral Epidemiology/*H. Lawrence*
- DEN 1060H Oral Physiology: Sensory and Neuromuscular Function/
B. J. Sessle
- DEN 1070H Advances in Dental Materials Science/*P. Santerre, Staff*
- DEN 1080Y Biology of Connective Tissues/*C. A. G. McCulloch, H. C. Tenenbaum*
- DEN 1081H Bone Interfacing Implants/
J. E. Davies, Staff
- DEN 1082H Biomaterials for Implant Treatment in Dentistry/*Y. Finer, Staff*

- DEN 1097Y Advanced Oral Radiology/
M. J. Pharoah, E. W. N. Lam, Staff
- DEN 1098H Reading Course in Oral Biology/
Staff
- DEN 1100Y^o Doctoral Seminars in Oral Health Sciences (Credit/No Credit)/
Staff

^oCourses which may continue over a program. The course is graded when completed.

Design and Manufacturing, Advanced

Program Committee

The committee of the Advanced Design and Manufacturing Institute (ADMI) comprises eight members: six from the participating member universities plus two members from industry. The Executive Director of ADMI, D. Heaslip, chairs the Program Committee.

Introduction

The Advanced Design and Manufacturing Institute (ADMI) is a joint program in design and manufacturing at the master's level. It is offered through the joint efforts of five Ontario universities: University of Toronto, McMaster University, Queen's University, the University

of Waterloo, and the University of Western Ontario.

Within the University of Toronto the degree designation is M.Eng.D.M. This joint program is fully described on the Web site, www.admi-canada.com, and has been structured to address the engineering design, manufacturing, and management expertise and knowledge base required by young graduate professionals actively engaged within industry, government, and business. The program is conveniently accessed in compressed time frames of two four-day weekend modules for each course offering. This allows practising engineers to continue with their professional employment while working toward the M.Eng.D.M. degree. Courses are offered throughout the year and the schedule is updated on the Web site. The joint nature of the program ensures that the very best expertise available at each of the participating schools is integrated into the various course offerings.

The ADMI vision is to create a new generation of Canadian design and manufacturing engineers with the ability and mindset to propel Ontario industry into a world leadership position. The collective resources of partner universities and industry are leveraged to provide participants with access to an integrated program of world class technology, expertise, and experience.

ADMI is the creative result of innovative thinking and leadership from the engineering schools at McMaster University, Queen's University, the University of Toronto, the University of Waterloo, and the University of Western Ontario; the Schools of Business at McMaster University and the University of Toronto; and the Department of Management Sciences at the University of Waterloo. The program has the enthusiastic endorsement of Materials and Manufacturing Ontario and Ontario Industry.

Due to the part-time modular nature of the ADMI program, it is available only to Canadian citizens and permanent residents of Canada.

Admission Requirements

Students entering the program at the University of Toronto are required to register in the Department of Mechanical and Industrial Engineering. Students must have successfully completed a four-year bachelor's degree in engineering. Individuals with undergraduate and/or graduate degrees in the related fields of computer science, physics, etc. are also invited to apply. Additionally, all individuals seeking admission into this program will normally have three years of post-baccalaureate experience in industry or the equivalent. Preliminary

application forms are available electronically on the Web site, www.admicanada.com.

Program Requirements

The program requires the successful completion of 10 ADMI course offerings. A list of course offerings, along with course descriptions and a current schedule, is available on the ADMI Web site, www.admicanada.com. Two of the required 10 courses may be replaced by an approved industry project, with University supervision. Whether or not a project is undertaken, program participants are required to complete a minimum of five courses from the Technology and Process Stream and a minimum of two from the Business and Management Stream. Participants must complete a minimum of two ADMI courses per calendar year to maintain program registration status.

Part-time Nature of Program

The program is designed as a part-time program for individuals who wish to participate in graduate studies over four-day weekend periods that can be effectively incorporated into a regular working schedule. The ADMI courses are offered at various locations within southern Ontario, typically Toronto, Waterloo, Mississauga, Hamilton, and London. Courses are also offered throughout the year and do not conform to the regular university semester structures.

Fee Structure

The program is offered as a full cost recovery program. The fee per course is \$2,500, which must be paid in advance of each course taken by the participant.

Courses of Instruction

A list of course offerings, along with course descriptions and a current schedule, is available on the ADMI Web site, www.admicanada.com.

Nature of the Collaborative Program

The graduate departments of Biochemistry, Botany, Cell and Systems Biology, Immunology, Laboratory Medicine and Pathobiology, Medical Biophysics, Molecular and Medical Genetics, and Physiology participate in the Collaborative Program in Developmental Biology. This is a Ph.D. program only. Students who wish to enrol in the Collaborative Program must apply to and be admitted to both the Collaborative Program and a graduate degree program in one of the collaborating departments. Students must be registered in the doctoral program of one of the host departments and must be undertaking research in developmental biology under the supervision of a member of the program. Upon successful completion of the Ph.D. requirements of the host department and the program, students receive the notation "Completed Program in Developmental Biology" on their transcript.

Program Requirements

Students must complete a Ph.D. thesis and any core courses as required by their host department. In addition, they must complete the interdepartmental course JDB 1025Y and the seminar course JDB 1026Y. These courses may be taken in place of some host department courses. Prospective students should contact the coordinator for more details on admission procedures and course requirements.

Courses of Instruction

The following courses are offered by the program every year.

JDB 1025Y	Developmental Biology
JDB 1026Y ^o	Student Seminars in Developmental Biology

^oCourses which may continue over a program. The course is graded when completed.

Nature of Collaborative Program

The University of Toronto has a very strong group of developmental researchers located in two separate departments: the Department of Psychology and the Department of Human Development and Applied Psychology at the Ontario Institute for Studies in Education. The Collaborative Program in Developmental Science brings these researchers and their students together to provide a comprehensive training program that covers the breadth of developmental science, moving the study of human development beyond its conventional disciplinary boundaries. Developmental and educational psychology, cognitive science, neuroscience, and treatment and prevention sciences are presented as a multidisciplinary foundation for understanding human development and disseminating the benefits of that understanding.

The Collaborative Program is intended to prepare students for research careers in basic and applied developmental science. Research into basic processes examines the psychological, computational, and biological mechanisms of cognitive and emotional development, social development, personality development, and developmental psychopathology. More applied research investigates the psychological and biological effects of prevention and intervention techniques in educational, community, and clinical practices. The program also serves to familiarize faculty and students in the program with each other's research across a broad span of topics and approaches, broadening the perspective and relevance of their work and leading to new collaborative research proposals.

Application Procedures

Applicants who wish to enrol in the Collaborative Program must apply to and be admitted to both the Collaborative Program and a graduate degree program in one of the collaborating departments. M.A. and Ph.D. students must be accepted under the SGS general regulations by one of the participating departments and according to the specific criteria of the department. In addition, students must apply and be admitted to the Developmental Science Collaborative Program. Normally, a psychology background and a demonstrated interest in developmental psychology will be sufficient grounds for admission. As well, students who wish to be admitted to the program must apply to work with faculty members in the program who will act as their research supervisors and advisors.

Students must register in the home department and select a course of study that satisfies the requirements of their departmental program as well as the requirements of the Collaborative Program. The student's advisor will provide counselling and supervision appropriate to both sets of requirements.

Program Requirements

Master's Program

Master's students follow the requirements of the department in which they are registered, but must include:

- 1 Two core courses: JDS 1233H *Cognitive Development and Applications* and JDS 1249H *Social-Emotional Development and Applications*,
- 2 attendance at a monthly colloquium series.

Doctoral Program

Doctoral students follow the requirements of the department in which they are registered, but must include:

- 1 Core course JDS 3000H *Advanced Methods in Developmental Science*—two term papers required for this course should focus on research directions relevant to their dissertation topics,
- 2 JDS 1233H *Cognitive Development and Applications* and JDS 1249H *Social-Emotional Development and Applications* (unless already completed at the master's level), and
- 3 attendance at a monthly colloquium series.

graduate.drama@utoronto.ca

Coordinator of Graduate Studies:

gradcoord.graddrama@utoronto.ca

Web: gradrama.sa.utoronto.ca

The programs leading to the M.A. and Ph.D. comprise courses given within the Centre and drama courses offered by other graduate departments of the University. We assume that students will be building on the kind of foundation that would normally be laid in four years of undergraduate study with a concentration in dramatic literature. The intent of the programs is to further the academic study of theatre and drama at an advanced level in the program fields of theatre history, theory of drama, and dramaturgy. Within the parameters of these fields, the Centre supports research in such areas as the theory and analysis of performance, feminist theatre theory and practice, Canadian drama, theories of acting, and performance and popular culture. Theatre is an integral part of graduate work in the Centre and it takes place, for the most part, in the context of workshops, student productions, and co-productions at the Robert Gill and Studio theatres.

Application forms and all information necessary for application is available on the Centre's Web site and at <http://apply.sgs.utoronto.ca>. Applications received after February 1 may be too late for consideration. Contact the Graduate Coordinator concerning deadlines and delays at gradcoord.graddrama@utoronto.ca

Admission Requirements

Applicants for admission to the Centre are considered under the general regulations if they meet the Centre's own requirements as stated below. Admissions are selective; possession of minimum qualifications does not guarantee acceptance.

Degree of Master of Arts

1 For admission to the M.A. program, applicants must meet the following standard, or its equivalent from a recognized university: a B.A. from this University, with at least a B+ standing, comprising four years of undergraduate study, with a significant concentration in drama.

2 Normally the M.A. program requires one year of full-time study or the part-time equivalent. In some cases, students may be admitted to a two-year M.A. program, with additional course requirements. The Centre may prescribe certain courses in the individual programs of M.A. students.

Degree of Doctor of Philosophy

1 Applicants for admission to the Ph.D. program must fulfil the requirements for the M.A. in the Centre, or the equivalent from a recognized university, with at least an A- average standing. Applicants who have taken the M.A. through the Centre must be recommended for further study by the instructors whose courses they have taken. Applicants holding the M.A. of this University in a subject other than drama, or the equivalent from another university, will be considered for admission to the Ph.D. program in the light of their previous work and its relation to the Centre's requirements; additional course work may be required.

2 Exceptional students may be admitted directly to the Ph.D. program from the B.A. with a minimum A- overall average. The Centre will be especially interested in final grades for upper-level courses. Such applicants will apply to the M.A. program, but indicate in a separate letter to the Drama Centre that they wish to be considered for direct admission to the Ph.D. program. If accepted, students from the B.A. level will be expected to complete four courses in addition to the Ph.D. requirements listed below, including the theatre history requirement (for a total of seven), and satisfy the Centre's practical requirements for the theatre as determined on admission. Students accepted from the B.A. will be expected to maintain an A- average in their first four full courses in order to continue in the program. With approval, students may elect to transfer to the M.A. after the first year of study. Work completed in the Ph.D. program will be credited towards the M.A.

3 Applicants must arrange to send two supporting letters of recommendation to the Graduate Coordinator of the Centre. Admission will be conditional upon satisfactory recommendation.

4 Applications must be accompanied by a statement of research intent and *curriculum vitae*.

Degree Requirements

In addition to fulfilling the general requirements of the School of Graduate Studies, degree students at the Drama Centre must qualify in the manner stated below.

Degree of Master of Arts

Students are required to:

- 1** complete at least four full-course equivalents, as approved by the Centre, including at least one full-course equivalent in the history of theatre and performance, and at least one half-course in the dramatic literature of a non-English-speaking culture;
- 2** spend at least one academic year or twelve months in full-time study, or the equivalent in part-time work;
- 3** satisfy the Centre's requirements of practical work in the theatre.

Degree of Doctor of Philosophy

Students admitted on the basis of an M.A. in Drama or the equivalent are required to:

- 1** complete four approved courses by the end of the second year, in addition to the courses required for the M.A., with an average standing of at least A-. The combined M.A. and Ph.D. courses must include the theatre history requirement, the dramaturgical requirement, DRA 1010Y *Theory of Drama*, DRA 6000Y *Research Seminar*, and must be chosen from more than one dramatic literature;
- 2** demonstrate reading knowledge of a language other than English by passing an approved language examination not later than the end of the first year of study. Students may also be asked to qualify in other program-related languages;
- 3** satisfy the Centre's requirement of further practical work in the theatre by the end of the second year;
- 4** pass comprehensive examinations;
- 5** present a thesis on an approved topic embodying the results of original investigation which shall be judged to constitute a significant contribution to the knowledge of the field;
- 6** pass an oral examination on the subject of the thesis.

Although the program has been designed for completion in four years, some students may require a longer period to complete all of the requirements.

Students admitted on the basis of a B.A. are required to complete an *additional* four full-course equivalents, including the theatre history requirement, and to satisfy the Centre's practical requirements in the theatre, as determined on admission.

Regulations

It is expected that all parts of the comprehensive examinations will be taken no later than fall of the third year. Students who do not achieve required standing in any part of the comprehensive examinations will be allowed one further opportunity to take the relevant examination on the occasion immediately following.

An outline of the proposed research for the thesis, signed by a member of the faculty of the Centre, must be submitted to the Graduate Coordinator no later than April of the second year.

Six unbound copies of the thesis must be submitted to the Graduate Coordinator of the Centre no later than August 1 (for Fall Convocation), October 15 (for Mid-Winter Convocation), or February 1 (for Spring Convocation).

Women's Studies Collaborative Program

The Centre also participates in the Collaborative Graduate Program in Women's Studies that offers both M.A. and Ph.D. programs. Students electing to pursue this option will be expected to enrol in required Women's Studies courses, in addition to satisfying the stated degree requirements in drama. Upon completion, they will receive a notation on their academic transcript regarding their participation in the program. Please consult the program's entry in this calendar for more details.

Courses of Instruction

Registrants are advised to confirm course offerings by consulting the Centre's Academic Handbook for Students, normally available by mid-summer, at which time additional courses may be listed.

Core Program

- DRA 1002H History of the Theatre II:
Performing Modern Women/
N. Copeland
- DRA 1010Y Theory of Drama/*S. Johnson*
- DRA 1021H Dramaturgy
- DRA 1105H Performing History: Auto/
Biography as Performed
History/*N. Copeland*
- DRA 2001Y Theatrical Performance and
Reception/*M. J. Sidnell*
- DRA 3120H "Something More than a
Woman": The Way of the
Actress/*P. Spurdakos*
- DRA 4090Y Directed Reading/Theatre
Research/*Staff*
- DRA 4091H Directed Reading/Theatre
Research/*Staff*
- DRA 5000Y Theatre Practice I (Credit/No
Credit)/*Staff*

DRA 5001Y Theatre Practice II (Credit/No
Credit)/*Staff*

DRA 6000Y Research Seminar (Credit/No
Credit)/*Staff*

Cross-Listed Courses

The Graduate Centre for Study of Drama also cross-lists courses in drama, theatre, and performance offered by other graduate units of the University. These typically are:

- Classics
- Comparative Literature
- Curriculum, Teaching and Learning
- English
- French
- German
- Italian
- Slavic
- Spanish

Often given in translation, courses selected from non-English language and literature departments may be taken to satisfy the requirement (in the M.A., or the Ph.D. if not taken in the M.A.) that students enrol in a half-course in a dramatic literature other than in English. A listing of such courses, available in the coming academic year, will appear in the Centre's *Academic Handbook for Students* when it is published in mid-summer.

Admission and Special Requirements

Applicants for the M.A. and Ph.D. degrees are accepted under the general regulations of the School of Graduate Studies and the regulations of the department. It should be noted that our programs are based on the study of original texts and that they presuppose a knowledge of the relevant languages. Applicants must write a statement of approximately 500 words (two pages) setting out their main fields of interest and proposed course of study. Ph.D. applicants should also submit three letters of recommendation from scholars who have knowledge of their previous academic work; for M.A. applicants two letters will be sufficient. A sample of the applicant's writing (in English) should also be included. The deadline for applications is December 1 for admission in September.

Applicants to the M.A. program are expected to have completed a four-year University of Toronto B.A. degree, or its equivalent from a recognized university, in a Specialist or Major East Asian Studies program, with at least B+ standing in their final year.

The normal requirement for admission to the Ph.D. program is completion of the M.A. program in the Department of East Asian Studies, or its equivalent from a recognized university, with an average grade of at least A-. Departmental assessment may also permit registration directly from a B.A. degree in the most exceptional cases where, for instance, there is a very high grade-point average or a well-documented demonstration of capacity for original research.

Non-native speakers of English are required to take the TOEFL (Test of English as a Foreign Language). Applicants taking the paper-based TOEFL exam must achieve a minimum score of 600 and 5 on the TWE. Applicants taking the computer-based TOEFL exam must achieve a minimum score of 250 and 5 on the essay rating component. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 100/120 and 22/30 on the writing and speaking sections. Comparable scores on similar tests are also acceptable.

Degree of Master of Arts

The M.A. program requires one year of full-time graduate study. It may be completed either through non-language course work or through a combination of non-language courses and a thesis; normally four full-course equivalents are

required for students not writing a thesis, and two full-course equivalents for students writing a thesis. M.A. students will be required to select courses in consultation with the Coordinator of Graduate Studies.

Degree of Doctor of Philosophy

The department requires Ph.D. students to complete a total of four non-language full-course equivalents to be selected in consultation with the Coordinator of Graduate Studies. Two full-course equivalents must be completed in the first year of the program, with an average grade of at least A-. The remaining courses must be completed by the end of the second year of the program, maintaining an average of at least A-. Students are permitted to take some of their courses in other departments.

A comprehensive qualifying examination is normally undertaken within three months of completion of course work and must be taken by June 15 of the third year of study. Students are required to demonstrate an appropriate level of proficiency in two languages, other than English, relevant to their areas of study before taking their qualifying examinations, the level of proficiency as well as the two languages to be determined by the department. After completing the comprehensive examination, students are required to produce a doctoral dissertation with the guidance of a supervisory committee. The dissertation must be defended at an oral examination. Please consult the departmental Web site for details of this and other requirements.

Collaborative Programs

The department participates in the Asia-Pacific Studies Collaborative Program. For further details, consult the separate entry in this calendar.

Courses of Instruction

Below is a list of courses that may be offered by the department. Not all courses are offered every year. Please consult the department's Web site for a current course listing.

Cultural Studies

- EAS 1207H Welfare Society and Democratization in Korea/
J. Song
- EAS 1424H Multitude, Labour Power, Population/*K. Kawashima*
- EAS 1507H Ethnography of Multiculturalism: liberalism, civil society, identity politics/*J. Song*

- EAS 1510Y Critical Studies of "Civil Society": Centred on the Twentieth-Century History of Japan and Korea/*K. Kawashima, J. Song*
- EAS 1603H Anthropology of South Korea/
J. Song
- EAS 1703H Ethnography of Neoliberalism with a Focus on East Asia/
J. Song
- COL 3380H Globalization and Culture/
E. Cazdyn
- COL 5040H Marx, Deleuze and Empire/
E. Cazdyn

History

- EAS 1140Y From Republic to People's Republic: The Chinese Revolution from 1895 to the Present/*V. C. Falkenheim*
- EAS 1411H Art and Archaeology of Early China/*C. Shen*
- EAS 1412H Special Topics in Archaeology of Ancient China/*C. Shen*
- EAS 1143Y Civilization in Medieval China/
R. Guisso
- EAS 1173H,Y Modern Korean History Seminar/
A. Schmid
- EAS 1174H,Y Rethinking Empire in East Asia/
A. Schmid
- EAS 1314H Capitalism and Colonialism/
K. Kawashima
- EAS 1425H Critique of Everyday Life and Capitalism
- EAS 1427H On Contingency and Capitalism/
K. Kawashima
- EAS 1675Y Topics in Chinese Social and Intellectual History 1500-1950/
Staff
- EAS 2008H Japan's Imperial System

Language

- EAS 1040Y Elementary Vietnamese/*Staff*
- EAS 1101Y Introduction to Classical Chinese/*Staff*
- EAS 1115Y Reading Japanese for Graduate Purposes (Credit/No Credit)/
Staff
- EAS 1301Y Modern Standard Japanese I (Credit/No Credit)/*Staff*
- EAS 1302Y Modern Standard Japanese II (Credit/No Credit)/*Staff*
- EAS 1303Y Modern Standard Japanese III (Credit/No Credit)/*Staff*
- EAS 1304Y Modern Standard Japanese IVa (Credit/No Credit)/*Staff*
- EAS 1305H Modern Standard Japanese IVb (Credit/No Credit)/*Staff*

- EAS 1312Y Introduction to Manchu/
R. I. Binnick
- EAS 1321H Japanese I for Students with
Prior Background (Credit/No
Credit)/*Staff*
- EAS 1379H The History, Structure and
Politics of the Hindi Language/
S. Sandahl
- EAS 1500Y The Structure of the Classical
Sanskrit Language (formerly
EAS 2004Y Introduction to
Sanskrit)/*S. Sandahl*
- EAS 1501H,Y Intermediate Sanskrit Texts
(formerly EAS 1105Y)/
S. Sandahl
- EAS 1621Y Modern Standard Korean I
(Credit/No Credit)/*Staff*
- EAS 1622Y Modern Standard Korean II
(Credit/No Credit)/*Staff*
- EAS 1623Y Modern Standard Korean III
(Credit/No Credit)/*Staff*
- EAS 1624Y Modern Standard Korean IV
(Credit/No Credit)/*Staff*
- EAS 1801Y Modern Standard Chinese I
(Credit/No Credit)/*Staff*
- EAS 1802Y Modern Standard Chinese II
(Credit/No Credit)/*Staff*
- EAS 1803Y Modern Standard Chinese III
(Credit/No Credit)/*Staff*
- EAS 1804Y Modern Standard Chinese IV
(Credit/No Credit)/*Staff*
- EAS 2001Y Introduction to Classical
Japanese/*Staff*
- EAS 2002Y Intermediate Classical Chinese/
Staff
- EAS 2003Y Advanced Sanskrit Texts
I (formerly EAS 1106Y)/
S. Sandahl
- EAS 2006Y Advanced Sanskrit Texts
II (formerly EAS 2005Y)/
S. Sandahl
- EAS 2007H Advanced Sanskrit Texts I
S. Sandahl

Linguistics and Pedagogy

- EAS 1349Y Pedagogical Grammar of
Japanese/*Staff*
- EAS 1352H Introduction to Japanese
Linguistics: Syntax and
Semantics/*Y. Johnson*
- EAS 1353H Theory and Practice of Japanese
Language Instruction/
Y. Johnson
- EAS 1452H Japanese Linguistics I/
Y. Johnson

Literature

- EAS 1137H,Y Chinese Poetics/*Staff*
- EAS 1151H Chinese Poetry I/*G. Sanders*
- EAS 1152H Chinese Poetry II/*G. Sanders*
- EAS 1322Y The Kambun Tradition/*Staff*
- EAS 1344Y Classical Japanese Poetry/*Staff*
- EAS 1345H Readings in Japanese Literary
Criticism/*A. Sakaki*
- EAS 1408H Identity and Diaspora in Modern
Taiwanese Literature/*J. Liu*
- EAS 1444H The City, Body, and Text in
Modern Japanese Literature/
A. Sakaki
- JLA 1456H Japan As Seen By ?: Reference,
Apparatus, Operation/*A. Sakaki*

Philosophy and Religion

- EAS 1228H Topics in Chinese Ethical
Theories/*V. Shen*
- EAS 1226H Topics in Modern Chinese
Philosophy/*V. Shen*
- EAS 1227H Topics in Chinese Religions/
V. Shen
- EAS 1469H Chinese Mahayana Buddhism/
V. Shen
- EAS 1601Y Seminar in East Asian Buddhism/
Staff
- EAS 1602Y Topics in Korean Thought/*Staff*
- PHL 2015H Confucianism/*Staff*
- PHL 2016H Taoism: Philosophy and Religion/
Staff
- PHL 2017H Buddhism in China/*Staff*
- RLG 3423H Religion in the Japanese
Tradition/*J. S. Brownlee*
- RLG 3713Y Hinduism and Politics/*S. Sandahl*

Politics

- POL 2416Y Politics and Society in
Contemporary China/
V. C. Falkenheim

Research Seminars

- EAS 1100H,Y Special Topics in Chinese
Studies/*Staff*
- EAS 1116H,Y Special Topics in Chinese Culture
- EAS 1150H,Y Reading and Major Research
Paper/*Staff*
- EAS 1160H,Y Basic Topics in Chinese Culture/
Staff
- EAS 1163H,Y Special Topics in Korean Studies/
Staff
- EAS 1300H,Y Special Topics in Japanese
Studies/*Staff*
- EAS 1313Y Japanese Source Materials and
Reference Works/*Staff*
- EAS 1320Y Special Topics in Japanese
Culture/*Staff*

-
- EAS 1323Y Readings in Japanese
Documentary Source Materials/
Staff
- EAS 1999Y East Asian Studies Bibliography,
Reference, and Research
Methodology/*Staff*

Visual and Performing Arts

- EAS 1229H Topics in Chinese Aesthetics/
J. Liu
- EAS 1328H,Y Chinese Sculpture/*K. Ruitenbeek*
- EAS 1339H Topics in Chinese Art Theories/
J. Liu
- EAS 2003H Chinese Drama: Its History and
Art/*Staff*

INTRODUCTION

The Department of Ecology and Evolutionary Biology (EEB) offers two graduate programs: one in Plant and Microbial Biology (PMB) and the other in Zoology (ZOO). The choice between these programs depends on whether a student's interest is primarily botanical (PMB) or zoological (ZOO) and the area in which his or her supervisor carries out research. Refer to the departmental Web site. Depending on the program chosen, areas available for study include population/community/landscape/evolutionary ecology, behaviour, genetics/genomics, systematics, conservation biology, physiology, molecular evolution, developmental biology, and microbiology.

EEB ZOOLOGY PROGRAM

Admission Requirements

Applicants to the Master of Science and Doctor of Philosophy degree programs are accepted under the general regulations. Applicants to the M.Sc. program must have an average grade equivalent to a University of Toronto B in the final undergraduate year and an average grade of B in the previous year (five full courses each year). Minor variations from these standards can be considered in exceptional circumstances. An elementary but competent knowledge of physics and chemistry will be required, and knowledge of the general field of biology must be demonstrated. It is the student's responsibility to arrange for supervision by contacting potential supervisors. Exceptional students are encouraged to enter the Ph.D. program directly from the B.Sc. Students may also transfer to the Ph.D. program from the M.Sc. program.

Program Requirements

When arranging their course and research programs with their supervisors, M.Sc. and Ph.D. students may consult the Department's Associate Chair for Graduate Affairs. The student's advisory committee and the Department must approve the entire course of study. Students wishing to take a minor in this Department should discuss the requirements with the faculty concerned and should obtain the approval of the Associate Chair.

With the approval of the Associate Chair, an individual research/reading course (ZOO 1002H,Y) may be arranged with a faculty member (two if one is the research supervisor) in one of the research areas where a formal graduate course is not already available. Only one credit in this course is typically permitted.

Degree of Master of Science

M.Sc. students are required to take at least one graduate full-course equivalent in Zoology or a cognate graduate unit. Included must be one designated core half-course. Completion and defence of a thesis is required. The Department encourages graduate students to complete M.Sc. degree requirements within two years of admission.

Degree of Doctor of Philosophy

Ph.D. students are required to take at least two graduate full-course equivalents. Included must be one designated core half-course. Students entering the Ph.D. program directly from the B.Sc. or transferring from the M.Sc. program are normally required to take the equivalent of at least two graduate full courses. Ph.D. students undergo an appraisal (qualifying examination) within 18 months of embarking on the program. Students transferring from an M.Sc. to a Ph.D. program must pass the appraisal before the transfer is approved. Completion and defence of a thesis is required. The Department encourages graduate students to complete Ph.D. degree requirements within four years of admission.

EEB PLANT AND MICROBIAL BIOLOGY PROGRAM

Degree of Master of Science

Admission Requirements

A high academic standard is required for admission. Satisfactory performance will normally be demonstrated by an average grade in the final year, equivalent to a University of Toronto B+ and an average grade in the previous year of B. In exceptional circumstances, where there is strong supporting supplementary evidence, students with a mid-B average in the final year may be admitted to the program.

Program Requirements

M.Sc. students must complete one half-course during the program, preferably in the first year. The half-course may be either a BOT 1700H seminar series or a regular graduate course. Attendance at 80% of the departmental seminar series is a requirement. Original research and defence of a thesis are also required.

Degree of Doctor of Philosophy

Admission Requirements

Ph.D. degree students are generally accepted by two routes, either by transferring from the

M.Sc. program or following completion of an M.Sc. degree. A student completing a B.Sc. with outstanding academic achievement (A-average in the final year) and proven research accomplishments may be admitted directly to the Ph.D. program.

Program Requirements

For Ph.D. students there is a minimum formal course requirement of three half-courses for students who have completed a M.Sc., with the first half-course taken in the first year. It is strongly suggested that at least one of these be selected from the BOT 1700 series seminar courses. The supervisory committee will evaluate the course work of Ph.D. applicants to determine if additional courses are required. Students that transfer from a M.Sc. to a Ph.D. program may count any course work completed prior to the transfer toward their Ph.D. requirements. However, transfer students are still expected to take one BOT 1700 series course during their Ph.D. program. It is expected that many Ph.D. students will continue to participate in seminar courses after their minimum requirement is completed. Attendance at 80% of the departmental seminar series is a requirement. Within 16-20 months of first registration in the program, students present a research proposal to the Department. If the research proposal is deemed unsatisfactory by the examining committee, there is a single opportunity to present a revised proposal three months later. Ph.D. candidates make an oral presentation of their thesis for evaluation to the Department as a whole and to a departmental evaluation committee before proceeding to the School of Graduate Studies Final Oral Examination.

COLLABORATIVE PROGRAMS

The Department of Ecology and Evolutionary Biology participates in the following collaborative programs:

1 Environmental Studies

2 Proteomics and Bioinformatics

3 Toxicology, Biomedical

For more details, consult the separate entries in this calendar.

COURSES OF INSTRUCTION

Not all courses are offered every year. Please consult course instructors or visit the departmental Web site.

Courses Offered at the Graduate Level Only

JBF 1436H	Forest Landscape Ecology and Methods/ <i>T. J. Carleton</i>
JDB 1025Y	Developmental Biology/ <i>Staff</i>
JZB 1520H	Evolutionary Ecology/ <i>L. Rowe</i>
ZOO 1000H	Advanced Biostatistics for Biologists/ <i>M.-J. Fortin</i>
ZOO 1002H,Y	Advanced Research and Reading Course (may be taken only once for credit)/ <i>Staff</i>
ZOO 1005H	Spatial Analysis of Ecological Landscapes/ <i>M.-J. Fortin</i>
ZOO 1006H	Recent Advances in Integrative Physiology/ <i>D. Lovejoy</i>
ZOO 1014H	Advanced Ecology/ <i>P. Abrams, H. Cyr, H. Rodd</i>
ZOO 1022H	Advanced Molecular Evolution/ <i>B. Chang</i>
ZOO 1040H	Multivariate Analysis in Biology/ <i>D. A. Jackson</i>
ZOO 1500H	Conceptual Problems in Ecological/Evolutionary Research/ <i>N. C. Collins</i>
ZOO 1501H	Biology of Signal Transduction/ <i>D. H. O'Day, A. B. Lange</i>
ZOO 1502H	Molecular Entomology/ <i>P. A. Romans</i>
ZOO 1503H	Foundations of Phylogenetics/ <i>D. Brooks, R. Murphy</i>
ZOO 1504H	Species and Speciation/ <i>D. Brooks, D. McLennan, R. Winterbottom</i>
ZOO 1505H	Development of Evolutionary Thought/ <i>Staff</i>
ZOO 1511Y	Systematic Entomology/ <i>D. C. Darling</i> (Students wishing to take this course should consult the instructor in the spring session preceding registration; a collection of insects is required.)
ZOO 1516H	Seminar in Ecology/ <i>W. G. Sprules, N. C. Collins, R. L. Baker</i>
ZOO 1530H	Advanced Conservation Biology/ <i>M. Gross</i>
ZOO 1535H	Practical Ecosystem Modelling Seminar/ <i>K. Minns, N. Collins, B. Shuter, G. Sprules, Staff</i>
ZOO 2215H	Insect Behaviour/ <i>G. K. Morris, T. M. Alloway</i>
ZOO 2217H	Animal Sound and Vibration/ <i>G. K. Morris, A. C. Mason</i>

E-mail: ecograd@chass.utoronto.ca

Web: www.economics.utoronto.ca

The details of the programs are printed in the booklet *Economics Graduate Brochure* which is available from the Department of Economics. Details are also available on the department's Web site.

Degree of Master of Arts

Admission Requirements

The minimum admission requirement to the M.A. programs is a four-year or honours degree (or equivalent) with at least a mid-B (75%) standing in the final year of the program. Applicants must have completed full-year courses in calculus, and in intermediate microeconomics, macroeconomics, and statistics. Meeting these minimum requirements does not imply automatic acceptance into the program.

Program in Economics

The minimum requirement is the completion of the math stat review and eight half-courses including the core courses micro, macro and econometrics. The program is normally completed in two sessions.

Program in Financial Economics

Consult the separate entry in this calendar.

Combined J.D./M.A. in Economics

The J.D./M.A. in Economics permits the completion of both degrees in three years rather than the four years it would take to acquire them independently. Applicants will be awarded places in the Combined J.D./M.A. program only after they have secured independent admission into the J.D. and the M.A. programs.

In addition to the math stat review, students must complete 6 half-courses in economics including the core courses, and 45 credits in law to satisfy the requirements as established for each degree program.

Asia-Pacific Studies Collaborative Program

This program normally takes 12 months to complete. In addition to the math stat review, students must complete six half-courses in economics, including the core courses and the course ECO 2738Y *Economic Development of China and Japan* for which a major research paper is required. They must also complete the year-long interdisciplinary seminar, ASI 1000Y *Issues in Asia-Pacific Studies*, and satisfy the program's language requirement. The language requirement consists of two to four half-courses, depending on the language of choice and the student's background. For further information, consult the Asia-Pacific Studies (Collaborative Program) entry in this calendar.

Environmental Studies Collaborative Program

The Department of Economics, in conjunction with the Institute for Environmental Studies, offers this 12-month program. Courses taken must include the math stat review, six half-courses from economics including the core courses and the course in environmental economics, and two half-courses approved by the Institute. An internship culminating in a research paper is also required. For further information, consult the Environmental Studies (Collaborative Program) entry in this calendar.

International Relations Collaborative Program

Applicants to this 16-month program are required to complete the math stat review and 7 half-courses in economics including the core courses and the course in international trade. They must also complete the two courses (a) History and Philosophy of International Relations Thought and (b) International Law I: Public International Law, in addition to two other courses designed specifically for the Collaborative Program. Students must also demonstrate competence in another language. For further information, consult the International Relations (Collaborative Program) entry in this calendar.

Degree of Doctor of Philosophy

Admission Requirements

Admission to the Ph.D. program is offered to excellent students who have completed an M.A. degree in economics by the time of enrolment. Applicants to the program must have attained at least a B+ standing at the M.A. level. Admission to the program is competitive. Those accepted into the doctoral program will normally have achieved a standing considerably higher than the minimum B+.

Program Requirements

The Ph.D. is a full-time program. Applicants must be registered as full-time students for a minimum period of three years. First-year students normally take two half-courses in microeconomics (ECO 2020H and ECO 2030H), macroeconomics (ECO 2021H and ECO 2031H), and econometrics (ECO 2400H and ECO 2401H). During the second year, each student chooses two field areas, taking the equivalent of three half-year courses in each. Each second-year and third-year student must also participate in the full-year graduate research seminar (ECO 4060Y^o).

Suitable graduate level courses taken by a student in the M.A. program in the Department

^oCourses which may continue over a program. The course is graded when completed.

of Economics may fulfil some of the course requirements of the Ph.D. program.

The Ph.D. is a research degree which requires:

- 1 demonstration of competence in the core of the discipline and in two of its special fields;
- 2 a thesis based on original research.

Students are required to write and pass comprehensive examinations in micro, macro, and the major field by the end of the second year of study. Ph.D. students must maintain a minimum average of B+ throughout their course work. An original paper must be written in the second year of the Ph.D. program and presented in the relevant workshop in the fall of the third year. By the spring of the third year, Ph.D. students must submit a proposal to a formal dissertation committee.

Combined J.D./Ph.D. in Economics

The J.D./Ph.D. program is designed to attract highly qualified students who can benefit from the interaction between law and economics. This program allows students to complete the requirements of the J.D. degree and to reach all but the dissertation stage of the Ph.D. at the end of four years.

Students will be admitted to the Faculty of Law the first year and receive a deferred acceptance to the Ph.D. program. In the second and third years students will be considered registered in the Department of Economics and will complete the requirements of the first two years of the Ph.D. program. Students will complete their J.D. requirements in the fourth year and thereafter will be registered full-time with the Department of Economics.

Applicants must gain independent admission to both the J.D. program and the Ph.D. program in Economics. They must satisfy the normal admission requirements for each program.

Management and Economics Collaborative Ph.D. Program

Consult the separate entry in this calendar.

Courses of Instruction

Not all courses are offered every year. Please refer to the department's Web site for a current list.

Preliminary Courses

- ECO 1010H Mathematics and Statistics
Review for M.A. Students
(Credit/No Credit)
- ECO 1011H Mathematics for Ph.D. Students
(Credit/No Credit)

A Core Courses in Economic Theory

- ECO 2020H Microeconomic Theory I
- ECO 2021H Macroeconomic Theory I
- ECO 2030H Microeconomic Theory II
- ECO 2031H Macroeconomic Theory II
- ECO 2050H Applied Microeconomics
- ECO 2051H Applied Macroeconomics
- ECO 2060H Economic Theory—Micro
(for M.A. students only)
- ECO 2061H Economic Theory—Macro
(for M.A. students only)

B Advanced Microeconomic Theory and Mathematical Economics

- ECO 2070H Workshop in Economic Theory
(jointly with Institute for Policy
Analysis) (Credit/No Credit)
- ECO 2100H Mathematical Economics I
- ECO 2101H Mathematical Economics II
- ECO 2102H Topics in Microeconomic Theory

C History of Economic Thought

- ECO 2004H The History of Economic Thought
- ECO 2005H Workshop in the History of
Economic Thought (Credit/No
Credit)
- ECO 2006H Topics in the History of Economic
Thought

D Economic History

- ECO 2234H Topics in North American
Economic History
- ECO 2250H Workshop in Economic History
(Credit/No Credit)

E International Economics

- ECO 2300H International Trade Theory
- ECO 2301H International Monetary Theory
- ECO 2302H International Economics: Theory
and Institutions
- ECO 2303H International Macroeconomics
- ECO 2304H Workshop in International
Economics (jointly with Institute
for Policy Analysis) (Credit/No
Credit)
- ECO 2305H Topics in International Finance
- ECO 2310H Topics in International Trade

F Econometrics

- ECO 2400H Econometrics I
- ECO 2401H Econometrics II
- ECO 2402H Advanced Econometrics
- ECO 2403H Topics in Econometrics
- ECO 2404H Empirical Applications of
Economic Theory
- ECO 2406H Workshop in Econometrics
(Credit/No Credit)
- ECO 2408H Econometrics (for M.A. students
only)

ECO 2410H Applied Econometrics
ECO 2411H Financial Econometrics

G Macroeconomics and Monetary Economics

ECO 2103H Topics in Macroeconomic Theory
ECO 2500H Monetary Theory I
ECO 2501H Monetary Theory II
ECO 2502H Advanced Monetary Theory
ECO 2503H Financial Economics I
ECO 2504H Financial Economics II
ECO 2505H Macroeconometric Models and Forecasting
ECO 2506H Economics of Financial Risk Management
ECO 2550H Workshop in Monetary and Macro Economics (jointly with Institute for Policy Analysis) (Credit/No Credit)

H Public Economics

ECO 2600H Public Economics I
ECO 2601H Public Economics II
ECO 2606H Topics in Public Economics
ECO 2607H Workshop in Public Economics (jointly with Institute for Policy Analysis) (Credit/No Credit)
ECO 2610H Health Economics
ECO 2611H Empirical Welfare Analysis

I Economic Development

ECO 2700H Economic Development
ECO 2701H Development Economics I
ECO 2703H Development Economics II
ECO 2704H Topics in Economic Growth
ECO 2738H Economic Development of China
ECO 2770H Workshop in Economic Development (Credit/No Credit)
JPE 2408Y The Political Economy of Development

J Labour Economics

ECO 2800H Labour Economics I
ECO 2801H Labour Economics II
ECO 2802H Economics Inside Organizations
ECO 2806H Workshop in Labour Economics (jointly with Institute for Policy Analysis and Centre for Industrial Relations) (Credit/No Credit)
ECO 2807H Economics and Demographics

K Industrial Organization

ECO 2900H Industrial Organization and Public Policy I
ECO 2901H Industrial Organization and Public Policy II
ECO 2909H Workshop in Industrial Organization (jointly with Institute for Policy Analysis) (Credit/No Credit)

L Law and Economics

ECO 3501H Economic Analysis of Law
ECO 3504H International Trade Regulation (also LAW 285)

Other Courses

ECO 2908H Environmental and Resource Economics
ECO 3500H Economics of Organizations and Contracts
ECO 4050H Reading Course in an approved special field[#]
ECO 4051H Reading Course in an approved special field[#]
ECO 4060Y[°] Graduate Research Seminar (Credit/No Credit)

[°]Courses which may continue over a program. The course is graded when completed.

[#]The department is normally prepared to supervise reading courses in economic theory, international trade theory and policy, monetary economics, economic history, public economics, environmental economics, African and Latin American economic development, and labour economics. Other fields can often be arranged. Reading courses are available only to students who have the requisite preparation and only at the discretion of faculty members.

Editing Medieval Texts (Collaborative Program)

Program Committee

J. C. Magee, BA, MA, PhD/Classics
 W. R. Robins, BA, MPhil, PhD/English
 (*Director*)
 M. D. Meyerson, BA, MA, PhD/History
 M. Lettieri, BA, MA, PhD/Italian Studies
 D. R. Townsend, BA, MA, PhD/Medieval Studies
 A. P. M. Orchard, BA, MA, PhD/Medieval Studies
 W. R. Bowen, BA, BMus, MA, PhD/Music
 P. King, AB, PhD/Philosophy
 J. W. Goering, BA, MAR, MA, MSL, PhD/Religion
 J. Blackmore, BA, MA, PhD/Spanish

Address:

Collaborative Program in Editing Medieval
 Texts
 Centre for Medieval Studies
 39 Queen's Park Crescent East
 Toronto, Ontario M5S 2C3
 Canada

Telephone: (416) 978-4884

Fax: (416) 971-1398

E-mail: medieval.studies@utoronto.ca

Web: www.chass.utoronto.ca/medieval/

Nature of Collaborative Program

The Collaborative Program in Editing Medieval Texts offers intensive training in the editing of Latin and vernacular manuscripts, including music. Training in all areas is based on a sound knowledge of Latin and on the principles of editing Latin manuscripts. Students in the Program complete a series of courses which deal with the techniques of reading, transcribing, and editing manuscripts, and then complete an editorial project, which can be a paper for a course in any of the collaborating departments, an independent publishable project, or the student's dissertation.

Application Procedures

Applicants who wish to enrol in the Collaborative Program must apply to and be admitted to both the Collaborative Program and a graduate degree program in one of the collaborating departments. The Collaborative Program is only available to students in the doctoral stream. Students should take the Centre for Medieval Studies' M.A.-level Latin examination no later than the September sitting of their first year (the examination may also be taken the previous April) in order to determine whether they will need to take MST 1000Y during the first year. Students may apply for admission to the Collaborative Program as soon as they have passed the M.A.-level Latin examination. Applications should be addressed to the

Program Committee, Collaborative Program in Editing Medieval Texts, Centre for Medieval Studies.

Admission Requirements

Students must already be admitted to the doctoral stream of one of the collaborating graduate units: Classics, English, French Language and Literature, History, Italian Studies, Medieval Studies, Music, Philosophy, Religion, or Spanish.

Program Requirements

- 1 Prerequisite: MST 1000Y or a pass in the Centre's M.A.-level Latin examination (given in April and September).
- 2 MST 1104H and MST 1105H.
- 3 Two of the following half-courses: MST 1107H, MST 1110H, MST 1101H.
- 4 Any other approved half-course in editing (including departmental courses) as listed below.
- 5 Participation in the required seminar in editorial practices and resources: MST 1111H *Sources and Materials for Editing Medieval Texts*.
- 6 An approved text edition undertaken as the dissertation, as a project for a course, or independently for a publishable article.

Courses of Instruction

English

ENG 1093H The Medieval Vernacular Book

Italian Studies

ITA 1165H Introduction to Italian Philology
 ITA 1170H Textual Criticism and the Editing of Early Italian Texts

Medieval Studies

MST 1000Y^o Introductory Medieval Latin
 MST 1101H Codicology
 MST 1104H Latin Palaeography I
 MST 1105H Latin Palaeography II
 MST 1107H Latin Textual Criticism
 MST 1110H Diplomatics and Diplomatic Editing
 MST 1111H Sources and Materials for Editing Medieval Texts (prerequisite required)
 MST 1113H Vernacular Text-Editing: A Collaborative Project
 MST 1115H English Palaeography

^oCourses which may continue over a program. The course is graded when completed.

-
- MST 1384H The Exeter Book of Old English
Verse
- MST 1385H Theory and Practice in Editing of
Old English Texts I
- MST 1392H Editing and Appreciating
Wulfstan's Prose
- MST 3230H The Common Law of Medieval
Europe

Music

- MUS 1063H Musical Notation of the Middle
Ages

Education

For admission and application inquiries contact:

The Ontario Institute for Studies in Education,
University of Toronto (OISE)
Registrar's Office
Graduate Studies Admissions Unit
252 Bloor Street West
Fourth Floor, Room 4-485
Toronto, Ontario M5S 1V6
Canada

Telephone: (416) 923-6641 ext. 2663
Fax: (416) 323-9964
E-mail: gradstudy@oise.utoronto.ca
Web: www.ro.oise.utoronto.ca

The Ontario Institute for Studies in Education of the University of Toronto (OISE) is one of the largest faculties at the University, and one of the largest faculties of education in North America. OISE, which comprises five academic departments, strives to be an effective, interactive learning community which, through research, scholarship, and excellent instruction, provides the theoretical knowledge base for education as a domain of advanced study and professional practice.

Brief introductions to each of OISE's five departments are provided below. For further details on their programs, courses, and graduate faculty, please consult the individual departmental entry listed alphabetically in this calendar.

Adult Education and Counselling Psychology (AECp)

Web: www.oise.utoronto.ca/depts/aecp/

The Department of Adult Education and Counselling Psychology is the second largest of the five departments within OISE and offers a full range of graduate degrees in each of two major programs:

1 Adult Education and Community Development

2 Counselling Psychology

AECp participates in the following collaborative programs:

- Aboriginal Health
- Addiction Studies
- Aging, Palliative and Supportive Care Across the Life Course
- Community Development
- Comparative, International and Development Education
- Environmental Studies
- Women's Studies

Consult the separate entries in this calendar.

Curriculum, Teaching and Learning (CTL)

Web: www.oise.utoronto.ca/depts/ctl/

The Department of Curriculum, Teaching and Learning, the largest of the five departments within OISE, offers graduate programs in:

1 Curriculum Studies and Teacher Development

2 Master of Teaching in Elementary and Intermediate Education

3 Second Language Education

The Master of Teaching degree leads to Ontario College of Teachers Certification.

CTL participates in the following collaborative programs:

- Comparative, International and Development Education
- Knowledge Media Design
- Women's Studies

Consult the separate entries in this calendar.

CTL offers numerous learning opportunities in research and field development, and through off-campus and distance learning courses.

Human Development and Applied Psychology (HDAP)

Web: www.oise.utoronto.ca/depts/hdap/

The Department of Human Development and Applied Psychology offers graduate degrees in several programs which prepare individuals for research and professional practice in the fields of:

1 Child Study and Education

2 Developmental Psychology and Education

3 School and Clinical Child Psychology

The Child Study and Education program offers a Master of Arts degree in a two-year initial teacher education program leading to Ontario College of Teachers Certification.

HDAP participates in the following collaborative programs:

- 1** Developmental Science
- 2** Neuroscience

Consult the separate entries in this calendar.

Sociology and Equity Studies in Education (SESE)

Web: www.oise.utoronto.ca/depts/sese

The Department of Sociology and Equity Studies in Education is the smallest OISE department and offers a close working relationship between students and faculty. SESE offers graduate programs in sociology in education with an emphasis on equity issues.

SESE participates in the following collaborative programs:

- Aboriginal Health

-
- Comparative, International and Development Education
 - Environmental Studies
 - Women's Studies

Consult the separate entries in this calendar.

The Department is organized as a constitutional democracy in which students, staff, and faculty participate in all major decisions affecting the Department.

Theory and Policy Studies in Education (TPS)

Web: www.oise.utoronto.ca/depts/tps/

The Department of Theory and Policy Studies in Education houses three graduate programs:

- 1 Educational Administration
- 2 Higher Education
- 3 History and Philosophy of Education

TPS participates in the following collaborative programs:

- Comparative, International and Development Education
- Women's Studies

Consult the separate entries in this calendar.

TPS also offers numerous research opportunities; off-campus, distance learning courses; and cohort-based programs.

Areas of Study

The Edward S. Rogers Sr. Department of Electrical and Computer Engineering offers graduate courses and research opportunities in:

Communications: multimedia systems; digital signal processing; digital filters; neural networks; image processing and coding; video compression; data compression; digital communications; information theory; error control coding; communications algorithms; radar-sonar systems; satellite communications; mobile and fixed wireless systems; spread spectrum systems; CDMA, PCS; radio networks; communication networks; broadband networks; light wave networks; network management and control; internetworking; integrated services ATM and IP networks; multimedia networks.

Computer Engineering: computer architecture; operating systems; systems programming; optimizing and parallelizing compilers; language processors; computer networks; computer security; distributed systems; parallel systems; reliability and diagnosability; non-binary logic; digital circuits; computer-aided design for VLSI; computer applications; field-programmable gate arrays and systems; reconfigurable computing; CAD for VLSI synthesis, testing; human-computer interaction; image processing architectures; computer vision.

Electromagnetics: field theory and measurements; radiation and guided-wave phenomena; high-speed design; electromagnetic compatibility; antenna theory and design; computational electromagnetics; microwave and millimetre-wave integrated circuits and antennas; RF and wave electronics; microwave integrated circuits; novel micromachined components; terrestrial and satellite wireless applications; quasi-optics; ionospheric plasma waves; spacecraft electrostatic discharge; meta-materials; bioelectromagnetics.

Electronics: semiconductor device physics; transport and optical properties of semiconductors; solid-state transducers; linear and digital circuits; active, passive, and digital filters; integrated circuit design; VLSI design and technology; digital communication circuits; RF circuits; computer-aided circuit design and testing.

Energy Systems: power electronics; electric power systems; sustainable energy sources; distributed generation and storage systems; autonomous power systems; integrated switch mode power supplies; mixed signal integrated circuits and VLSI for power electronic applications; low-power portable power supplies; induction heating; ballasts for discharge lamps; electro-magnetic field-fluid interaction; magnetic materials and magnetic device modelling; linear motors; electric propulsion systems; electromechanical devices.

Photonics: optical fundamentals, design, modelling, and advanced fabrication technology are directed at a broad range of optical applications in light generation, amplification, transmission and processing, including all-optical communication networks, biophotonics on a chip, optical sensors, nonlinear optics, lasers and amplifiers, photonic bandgap and metamaterial devices, nanophotonics, optical quantum computing, ultrafast optical science, efficient solar cells, novel photovoltaics, and laser nanofabrication.

Systems Control: control of multivariable, discrete-event, nonlinear, hybrid, and stochastic systems; applications to optical communications networks; large-scale system theory; decentralized control; process modelling and identification; fault diagnosis; adaptive signal processing and control; control of queueing systems; interactive computer-aided design; microprocessor control systems; optimization and simulation; robotics; urban traffic control; power system control; biological modelling; control of formations of autonomous vehicles; control of communication and computer networks.

Biomedical Engineering: Facilities for interdisciplinary study and research are available through the *Institute of Biomaterials and Biomedical Engineering*: acoustics and hearing; clinical engineering; Doppler ultrasound and biofluid mechanics; drug delivery systems; eye positioning measurement and vision; modelling of biological clocks; medical imaging; rehabilitation engineering; sensory theory and computational neuroscience; proteomics and bioinformatics; DNA sequencing.

ECE Colloquium

During the first year of registration, M.A.Sc. and Ph.D. students are required to attend the ECE Colloquium which includes a seminar on ethics in research.

Degree of Master of Engineering in Telecommunications

The M.Eng.Tel. is a unique graduate degree program designed to prepare telecommunications and networking professionals to practice in the environment of competing technologies, standards, business models and network and service visions. The program leverages on the strengths of the university and its industry partners through lectures that are delivered by leading academics, industry experts, and top executives. The opportunity to network with professionals as well as with other students provides a broad view of the industry.

Degree of Master of Engineering

The general regulations for the Master of Engineering degree are set out in this calendar. For students with adequate undergraduate preparation, the program will normally comprise nine half-courses. At least five of the half-courses must be drawn from graduate courses offered by the Department of Electrical and Computer Engineering. The student may choose to complete an engineering project with a value equivalent to three half-courses. Students choosing the project option will be required to complete

a total of six half-courses in addition to the project. In order to pursue the project option, the student must enrol in a field of study and secure a professor who will act as the supervisor throughout the project.

The M.Eng. degree program may be taken on a full-time or part-time basis.

Degree of Master of Applied Science

Students for this degree are accepted under the general regulations. The work leading towards the degree of Master of Applied Science provides an opportunity for the student to pursue advanced studies in the particular field of major interest and an opportunity to engage in research and engineering design.

Each student's program of study must receive the approval of the Department of Electrical and Computer Engineering, and, in general, shall consist of a research or design project on which a thesis must be submitted, together with courses selected from the list below and elsewhere in this calendar.

For students with adequate undergraduate preparation, the M.A.Sc. program will normally comprise five half-year graduate courses and a thesis. This thesis shall demonstrate the student's ability to do independent work in relating, organizing, and extending existing techniques where required, and in suggesting and developing new approaches to problems in an area of applied science and engineering. The Department reserves the right to require additional course work of students whose undergraduate preparation does not include the study of subjects deemed to be necessary for research in the field chosen.

Degree of Doctor of Philosophy

Students for this degree are accepted under the general regulations. Before acceptance as a student for the Ph.D. degree, the Department must be satisfied of the student's ability to do advanced work. Each student will be required to pass courses of study to satisfy the requirements of the general regulations and the specific requirements of the Department. The Ph.D. program will normally consist of five half-year graduate courses not previously used for other degree credit, and a thesis.

Some outstanding students may be permitted to transfer directly from the M.A.Sc. program to the Ph.D. program without completing the M.A.Sc. degree. Such students will be required to complete ten half-year graduate courses, unless they already hold a master's degree.

During the first year of registration as a student for the Ph.D. degree, each student must

pass a qualifying oral examination in the area of research.

The program has been designed to enable students who have already completed a master's degree to complete all requirements within four years. More details are available in the *Electrical and Computer Engineering Graduate Studies Handbook*.

Collaborative Programs

The Department participates in the Biomedical Engineering Collaborative Program. For details, consult the separate entry in this calendar.

Courses of Instruction

The following groups of courses in the more distinct fields of graduate study in Electrical and Computer Engineering are presented for student guidance in selecting courses. Suitable courses offered by other departments may be selected subject to the approval of the Department of Electrical and Computer Engineering.

Students registered in a graduate degree program which involves research are required to participate in the non-credit seminar course JDE 1000H *Ethics in Research* during their first or second session of registration.

The Department should be consulted each session as to course offerings.

 Canada

Telephone: (416) 978-2526

Fax: (416) 978-2836

E-mail: english.graduate@utoronto.ca

Web: www.utoronto.ca/english

Application and Admission

Applicants, including those from the University of Toronto, must arrange for recommendations from two referees and must submit a statement of purpose. Admission to all programs for higher degrees will be based upon the applicant's undergraduate and graduate record and upon the evidence of the references and statement. Since it may take several weeks to complete an application file, all applicants wishing to be considered for University of Toronto Fellowships are urged to submit applications well ahead of the December 15 deadline.

Admissions are selective; possession of minimum qualifications does not guarantee admission.

English Language Proficiency

Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English are required to write the Test of English as a Foreign Language (TOEFL). Applicants taking the paper-based TOEFL exam must achieve a minimum score of 600 and 5 on the TWE. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 100/120 with at least 22/30 on the writing and speaking sections.

Degree of Master of Arts

The M.A. program usually requires twelve months to complete for students who are graduates of a four-year program in English or English and another subject at this University, or a similar program elsewhere. Applicants must have a B+ average or better and show evidence of first-class work in English for admission to the M.A. program. In considering applications, the department favours a broad training in the major genres and all periods of English literary history. Applicants are encouraged to take the Graduate Record Examination and to have a report sent to the department.

Students may elect to take the degree by course work only or, with permission of the Director, by course work and thesis. In either case, students must attain a B standing in each graduate course.

Degree of Master of Arts in the Field of Creative Writing

The M.A. program in English in the Field of Creative Writing usually requires 20 months to complete for students who are graduates of a four-year major program in English. Applicants must have an overall average of B+ or better and evidence of first-class work in English. The program requires the completion of two full-course equivalents in English, ENG 8000H *Introduction to Bibliography*, ENG 6950Y *Creative Writing*, and a supervised *Writing Project* (the equivalent of a thesis).

All students must complete *Creative Writing* in the first year of their program. Upon completion of course work, students undertake a book-length *Writing Project* in a genre of choice—poetry, drama, fiction, or creative non-fiction. Each student is assigned a faculty member or adjunct faculty member with whom to consult on a regular basis about the Project. All advisors are published writers.

M.A. by Course Work

For most students, and especially those going on to the Ph.D., this is the preferred option. Students are required to complete ENG 6954H *Bibliography* and 3.5 approved, full graduate courses or the equivalent in English.

M.A. by Thesis

The thesis option requires ENG 6954H *Bibliography*, two full graduate courses in English, or the equivalent, and a thesis of approximately 30,000 words on a topic approved by the department.

Degree of Doctor of Philosophy

Students are admitted to the Ph.D. degree program under the General Regulations of the School.

Admission to the Ph.D. program requires either

- 1 a four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, that includes at least eight full-course equivalents in English with an average grade of at least an A- in the applicant's overall program or
- 2 a University of Toronto master's degree in English, or its equivalent from a recognized university, with an average grade of at least an A- in the applicant's overall program.

Applicants must satisfy the department that they are capable of independent research in English at an advanced level. Applicants who have taken the Graduate Record Examination are encouraged to have a report sent to the department.

A student admitted to the Ph.D. program will pursue a program of study and research approved by the department. Although it is possible for a student admitted on the basis of a master's degree, or a bachelor's degree, to complete the Ph.D. program in English within four years, or five years, respectively, most students will require at least one additional year to complete all the requirements, including the thesis. The minimum requirements for the degree are as follows.

Course Requirements

A student admitted directly to the Ph.D. program on the basis of a four-year bachelor's degree must take: ENG 8000H *Introduction to Bibliography*, ENG 9500Y *Professional Development*, ENG 9900H *Professing Literature*, and six additional full-course equivalents in English, as approved by the department. In order to maintain good academic standing, and to continue in the Ph.D. program, the student must

a complete each course with a grade of at least B

b complete ENG 8000H *Introduction to Bibliography* and an additional three full-course equivalents in the first year of the program, with an average grade of at least an A-; and

c complete all remaining courses, except for ENG 9500Y *Professional Development*, by the end of the third year of the program, maintaining an average of at least an A-.

A student admitted on the basis of a master's degree must take ENG 8000H *Introduction to Bibliography*, unless this or an equivalent course has already been taken; ENG 9500Y *Professional Development*; ENG 9900H *Professing Literature*; and three additional full-course equivalents in English, as approved by the department. In order to maintain good academic standing, and to continue in the Ph.D. program, the student must complete each course with a grade of at least a B; and all course work by the end of the second year of the program, maintaining an average of at least an A-.

Every Ph.D. student must take at least two full-course equivalents outside the field of specialization. The student is encouraged to combine these courses in a minor field. (Graduate courses taken as part of the master's program and in fulfillment of the English language requirement may be counted in this connection, but not ENG 6954H (formerly ENG 8000H) *Bibliography* nor courses in the 9000 series.)

A student's selection of courses must meet the approval of the department.

English Language Requirement

Every Ph.D. student is required to demonstrate knowledge of the history and development of the English language, especially of its early period. Any student who has not completed ENG 240Y, or an equivalent full-year undergraduate course in Old English, with at least a B standing, is required either to take one of the following courses in the English language: ENG 1001H *Old English I*, ENG 6361H *History and Structure of the English Language I*, ENG 6362H *History and Structure of the English Language II*, or ENG 6365H *Diasporic Englishes*. The requirement can also be satisfied by taking a special examination in Old English.

Language Requirement

A student is required to demonstrate a reading knowledge of French by May 31 of the third year of registration, in the case of a student admitted on the basis of a master's degree; otherwise, by May 31 of the fourth year of registration. With the permission of the depart-

ment, another language (other than English) may be substituted for French provided that this other language is required by the student's research area. The supervisory committee may require the student to qualify in other program-related languages as well.

General and Special Examinations

Students are required to pass two separate examinations: the General Examination and the Special Field Examination.

The General Examination is designed to give students a broad knowledge of historical periods, works of literature, and critical concepts. It consists of two three-hour written papers covering the whole range of English literature, divided at 1700. A reading list is provided for this examination on the department Web site, and sample examinations are available in the department. Students entering the Ph.D. program with a master's degree take both parts of the General Examination in September of their second year. Students entering the program directly from a bachelor's degree take the examination in September of their third year. A January sitting of the examination is designed to accommodate students with special circumstances. Under normal circumstances, students are given two chances to pass the General Examination before termination from the program is recommended. Under certain circumstances, subject to the determination of a particular student's academic standing and progress, the department may allow a third attempt.

The Special Field Examination consists of a three-hour written examination, followed (approximately two weeks later) by a two-hour oral examination, both based on a reading list related to the student's thesis area. This special field reading list is drawn up by the student in consultation with the supervisory committee. Once it receives final approval by the supervisory committee, the approved list is filed by the supervisor with the Associate Director, Ph.D. The Special Field Examination is to be taken approximately three months after the list is approved. Students are advised to consult the departmental guides on Special Field reading lists. Students should submit a reading list by the end of January of the second year for students admitted from the master's degree, by the end of January of the third year for students admitted from a bachelor's degree, and pass the exam by the end of the subsequent April. On the recommendation of the examining committee, a second attempt is allowed.

The student must have completed all requirements for the degree, exclusive of thesis

research, by the end of the third year (fourth year for students admitted directly from a bachelor's degree) in order to remain in good standing in the program.

Thesis

A candidate is required to submit a thesis on an approved subject embodying the results of original investigation which constitute a significant contribution to the knowledge of the field, and to pass an oral examination on the subject of the thesis. (The normal length of a Ph.D. thesis is approximately 75,000 words. The maximum length accepted by the department is 100,000 words).

No later than November 1 of the second year of registration, in the case of a student admitted on the basis of a master's degree; otherwise, by November 1 of the third year of registration, the student must submit to the Associate Director, Ph.D. an outline of the proposed research for the thesis, approved by the prospective supervisor. The proposals are circulated to all graduate faculty in the department for information and comment. Once the graduate committee approves the proposal, the Associate Director, Ph.D. appoints a supervisory committee that includes a supervisor and two other faculty members with expertise in the proposed research area. The student and the supervisor should meet regularly. The student is also required to meet at least once a year with the two other members of the supervisory committee. The supervisory committee should normally approve the completed thesis before it is submitted for examination. The final oral examination is arranged by the department in collaboration with the School of Graduate Studies. The candidate should allow at least eight weeks from submission of the thesis in order for the department to complete the arrangements for the oral examination.

Collaborative Programs

The Department of English participates in the following collaborative programs:

- 1 Book History and Print Culture (M.A., Ph.D.)
- 2 Editing Medieval Texts (Ph.D.)
- 3 Health Care, Technology and Place (Ph.D.)
- 4 Jewish Studies (Ph.D.)
- 5 South Asian Studies (M.A., Ph.D.)
- 6 Women's Health
- 7 Women's Studies (M.A., Ph.D.)

For details about each collaborative program, consult the separate entries in this calendar.

Cross-Listed Courses

Students in English are eligible to take courses in other graduate units (e.g., Comparative

Literature, Medieval Studies, Drama, Information Studies, South Asian Studies, Women's Studies).

Courses of Instruction

The following list of courses is subject to revision; further information, including course descriptions, may be obtained from the department before enrolment. Courses offered by the department vary considerably from year to year.

From time to time, the department also offers programs of directed reading in special fields. These "reading courses" are normally available only to students in the Ph.D. program. With the special approval of the Director of Graduate Studies, Ph.D. students may substitute one such course for one (and not more than one) of the required courses.

INTRODUCTION

The Centre for Environment (CFE) provides opportunities for an interdisciplinary approach to environmental studies at the University of Toronto. It has both teaching and research functions. Its faculty members are cross-appointed from several departments including engineering, physical sciences, health sciences, biological sciences, forestry, social sciences, and the humanities.

Collaborative Programs

The Centre for Environment offers the following collaborative programs:

- 1 Environmental Studies
- 2 Environment and Health

The Division of Environmental Engineering offers a collaborative graduate program in Environmental Engineering. For more information, see the separate entry in this calendar.

Prospective students should apply concurrently to a home department and to CFE. Students planning to begin the program in September should register with the centre by August 1; students planning to start the program in January should register with the centre by December 1.

A detailed calendar, *Graduate Studies in the Environment*, is available at www.environment.utoronto.ca.

Admission Requirements

Admission is subject to the approval of the graduate home department in consultation with the Centre for Environment. Applicants should apply concurrently, but applicants must be first admitted to a home department before being admitted to CFE.

ENVIRONMENTAL STUDIES (COLLABORATIVE PROGRAM)

The graduate units of Adult Education and Counselling Psychology; Anthropology; Chemistry; Ecology and Evolutionary Biology; Economics; Forestry; Geography; Geology; Information Studies; Management; Philosophy; Planning; Political Science; Religion; Sociology; Sociology and Equity Studies; and Women and Gender Studies, in conjunction with the Centre for Environment, offer collaborative graduate programs in Environmental Studies. Discussions regarding collaboration with other departments are in progress.

Departments participating in the program contribute graduate courses and provide supervision for graduate research.

Applicants who wish to enrol in the collaborative program must apply to and be admitted to both the collaborative program and a graduate degree program in one of the collaborating departments. Students in graduate departments not listed above who are interested in the Environmental Studies Collaborative Program should speak to the CFE Graduate Student Advisor and to their home department's Graduate Coordinator/Graduate Studies Administrator/Chair to discuss this possibility.

Students may pursue an M.A., M.Sc., M.I.St., M.B.A., M.Ed., M.F.C., M.Sc.F., M.Sc.Pl., or Ph.D. degree.

Typically, environmental students undertaking a master's degree are required to complete two half-courses from the list below (one of which is the core course ENV 1001H) if writing a thesis, or three half-courses from the list below (one of which is the core course ENV 1001H) if writing a research paper or taking a course-work program only. For non-thesis master's students, an internship is also required. These requirements may be completed in addition to, or as part of, the master's program in their department.

Environmental students undertaking a doctoral degree are required to complete the ENV 1001H core course (unless already taken at the master's level), a half-course from the list of electives below, plus a thesis in the home department. Ph.D. students must also attend two sessions of the Environmental Studies seminar series and present a seminar, either in that series or at the Centre for Environment research day.

The doctoral or master's thesis - or major research paper for non-thesis master's students - must include an environmental theme. Degree requirements vary from department to department; therefore, at the time of the applicant's admission, close consultation between the centre and the proposed home department is required to determine a suitable collaborative arrangement.

Program Requirements

1 Details of course requirements are available in the *Graduate Studies in the Environment* calendar (www.environment.utoronto.ca). Please note that these courses may be used to satisfy the elective requirements of the home department.

2 Further degree requirements may be determined by the department and/or by the student's supervisor or supervisory committee. These requirements will depend on the background and academic and/or career goals of the student, as well as departmental regulations.

3 An environmentally-related research thesis or major research paper and an internship are normally required. A copy of the final thesis or research paper must be submitted to CFE.

4 A supervisor or supervisory committee may be appointed for each student by the home department and CFE.

Graduation Requirements

The Centre for Environment recommends to the home department and the School of Graduate Studies that a student should graduate following completion of the above program requirements. Students receive, in addition to the master's or Ph.D. degree in their departmental area, the notation "Completed Collaborative Program in Environmental Studies" on their transcript.

Courses of Instruction

The Centre for Environment offers individual credit courses that are open to graduate students from all parts of the University, subject to enrolment limits.

In addition to the centre's courses listed below, other courses dealing with environmental topics are offered as part of the regular teaching programs in departments. See the centre's calendar at www.environment.utoronto.ca for further details.

Core Course

ENV 1001H Environmental Decision Making

Contaminants in the Environment

ENV 1410H Analytical Environmental Chemistry
 ENV 2501H Pollution Prevention and Control
 JGN 2607H Advanced Techniques in Hydrogeology
 JNC 2503H Environmental Pathways

Environment and Health

ENV 4001H Graduate Seminar in Environment and Health
 CHL 5416H Environmental Epidemiology
 CHL 5903H Environmental Health
 CHL 5916H Environmental Health Policy
 JPG 1421H Health in Urban Environments

Environmental Education

AEC 1104H Community Education and Organizing
 AEC 1131H Special Topics in Adult Education (Master's): Environmental Adult Education
 AEC 1160H Introduction to Transformative Learning Studies
 AEC 1178H Practitioner/Ecological Identity and Reflexive Inquiry
 AEC 3176H Sense of Place in Professional and Natural Contexts
 TPS 1837H Environmental Health, Transformative Higher Education and Policy Changes

Environmental Management

ENV 1002H	Environmental Management Case Studies
ENV 1444H	Capitalist Nature
ENV 1701H	Environmental Law
ENV 1703H	Water Resources Management
ENV 1704H	Environmental Risk Analysis and Management
ENV 1705H	Corporate Perspectives on the Environment
ENV 1706H	Natural Hazards and Natural Disasters
ENV 1707H	Environmental Finance and Sustainable Investing
GGR 1214H	Global Ecology and Biogeochemical Cycles
JEI 1901H	Technology, Society, and the Environment I
JEI 1902H	Technology, Society, and the Environment II
JFS 1460H	Community Based Natural Resource Management
JGE 1413H	Environmental Impact Assessment
JGE 1420H	Urban Waste Management
JGE 1609H	Cities, Industry and Environment
JPG 1404H	Issues in Global Warming
JPG 1414H	Cities as Ecosystems
JPG 1419H	Aboriginal/Canadian Relations in Environment and Resource Management
JPV 1201H	Politics, Bureaucracy, and the Environment

Environmental Philosophy

JVP 2147H	Environmental Philosophy
RLG 2019H	Religion and the Environment

History

HIS 1111H	Topics in North American Environmental History
-----------	--

Individual Study

ENV 2000H,Y	Topics in Environmental Studies
ENV 2002H	Special Topics—Environmental Studies
ENV 3000H	Topics in Environment and Health
ENV 4444Y+	Internship
ENV 5555Y+	Research Paper

+ Extended course. For academic reasons, course work is extended into session following academic session in which course is offered.

ENVIRONMENT AND HEALTH (COLLABORATIVE PROGRAM)**Program Committee**

D. Cole, BSc, MD, MSc/Environment
I. L. Stefanovic, BA, MA, PhD/Environment
(Director)
F. S. Silverman, BSc, MSc, PhD/Environment
V. W. Maclaren, BA, MRP, MSc, PhD, MCIP/Environment, Geography
M. L. Diamond, MSc, PhD/Geography
R. R. White, BA, MSc, PhD/Geography
L. F. Smith, MD/Public Health Sciences

The graduate units of Geography, Medical Science, and Public Health Sciences, in conjunction with the Centre for Environment, offer a collaborative program in Environment and Health. Students who wish to enrol in the collaborative program must apply to and be admitted to both the collaborative program and a graduate degree program in one of the collaborating departments. Students may pursue a master's or Ph.D. degree according to home unit regulations.

Graduate students who are interested in taking a collaborative program in environment and health, but who are not from units listed above, should speak to the Centre for Environment Graduate Student Advisor and to their home unit's graduate advisor(s).

Program Requirements

Individual student programs of study must meet the requirements of both the home graduate unit and the collaborative program.

Master's Program

- 1 Complete the core course ENV 4001H *Graduate Seminar in Environment and Health*.
- 2 Complete one elective course. The elective will normally be taken from the list of approved electives below.
- 3 For degrees which require a thesis or research project, the topic should be within the field of environment and health, as approved by the home department and the Collaborative Program Committee. A copy of the final thesis or project must be submitted to the Centre for Environment.

Doctoral Program

- 1 Complete the core course ENV 4001H *Graduate Seminar in Environment and Health*, unless already taken at the master's level.
- 2 Complete one elective course. The elective will normally be taken from the list of approved electives below.

3 Attend two sessions of the Environment and Health seminar series and present a seminar either in this series or at the Centre for Environment's research day.

4 The doctoral thesis will focus on a theme in environment and health. The thesis committee membership will include a supervisor from the student's home department (who is a participating member of the core faculty of the collaborative program and is also a member of the graduate faculty in the Centre for Environment) and at least one other member from a collaborating unit. A copy of the final thesis must be submitted to the Centre for Environment.

Graduation Requirements

The Centre for Environment recommends to the home department and the School of Graduate Studies that a student should graduate following completion of the above requirements. In addition to the master's or Ph.D. degree in their unit area, students receive the notation "Completed Collaborative Program in Environment and Health" on their transcript.

Courses of Instruction

The core course and eligible elective courses in the program are listed below. With the exception of the core course, not all courses are offered every year.

Core Course

ENV 4001H Graduate Seminar in
Environment and Health

Elective Courses

ENV 1704H Risk Analysis and Management
ENV 3000H Special Topics—Environmental
and Health
JGE 1212H Fate of Contaminants in the
Environment
JNP 1014Y Interdisciplinary Toxicology
JNP 1016H Graduate Seminar in Toxicology
JPG 1421H Health in Urban Environments
GGR 1504H Health, Place and Difference
CHL 5416H Environmental Epidemiology
CHL 5903H Environmental Health
CHL 5916H Environmental Health Policy

Degree of Master of Environmental Science

A 12-month professional course-work Master of Environmental Science (M.Env.Sc.) degree program is offered at the University of Toronto Scarborough as a program of the Centre for Environment. All courses within the program fall within the designated major field of study: Biophysical Interactions in Terrestrial and Aquatic Systems. Although the program base is broad, a major focus for training professionals is understanding the flux of contaminants through surface and sub-surface environments and the methods/solutions needed to remediate contaminated or damaged environmental systems. The program is committed to the development of well-trained practitioners in

environmental science to meet the needs primarily of industry and government. The program is designed for both newly graduated students and existing professionals in industry and government agencies. The training received is also designed to allow students to pursue Ph.D. studies in the environment.

Admission Requirements

Students will be expected to satisfy all requirements for entry into the graduate school at this University within a competitive selection process. This process will be administered by the Program Committee. Students entering the M.Env.Sc program will be expected to have a four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, either in science or engineering with a minimum mid-B grade average in the last two years of the undergraduate program. Applicants will submit a written statement explaining their objectives in wishing to enter the program and the suitability of their background. Appropriate postgraduate work experience, such as in industry, will be considered as part of the admission application. Those students lacking one or more essential background courses may be required to take additional courses prior to admission. This will be determined on a case-by-case basis.

Program Requirements

The M.Env.Sc. program offers three streams:

- 1 Research
- 2 Internship
- 3 Part-time studies

In all streams, course work consists of 5.5 full-course equivalents (FCEs). It is anticipated that students will complete all instructional courses in two sessions and will complete field and research-focused courses as well as the internship during the summer.

Courses of Instruction

ENV 1100H	Advanced Seminar in Environmental Science
ENV 1101Y	Research Paper in Environmental Science
ENV 1102H	Analytical Chemistry for Geoscientists
ENV 1103H	Air and Water Quality Sampling and Monitoring
ENV 1104H	Methods for the Detection of Pathogens
ENV 1105H	Soil Contamination Chemistry
ENV 1106H	Geology and Geophysics of the Shallow Subsurface
ENV 1107H	Remediation Methods

ENV 1108H	Environmental Science Field Camp
ENV 1109H	Advanced Techniques in Geographic Information Systems
ENV 1110H	Sediment and Contaminant Transport in Aquatic Systems
ENV 1111H	Freshwater Ecology and Biomonitoring
ENV 1112H	Boundary Layer Climates and Contaminant Fate
ENV 1113H	Groundwater Hydrochemistry and Contaminant Transport
ENV 1114H	Directed Readings in Environmental Science I
ENV 1115H	Directed Readings in Environmental Science II
ENV 1116Y	Internship
ENV 1117H	Climate Change Impact Assessment
ENV 1118H	Fundamentals of Ecological Modelling
ENV 1119H	Quantitative Environmental Analysis
ENV 1120H	The Dynamics of Contaminant Dispersal in Fluids
ENV 1121H	Modelling the Fate of Organic Chemicals in the Environment
ENV 1122H	Global Environmental Security and Sustainable Development

Supplementary courses offered within the Centre for Environment and other departments in the sciences and engineering can be used as electives with the permission of the departments and the Program Director.

Fax: (416) 946-7632

E-mail: eep@ecf.utoronto.ca

Web: www.ecf.utoronto.ca/apsc/enveng

The Environmental Engineering Collaborative Program (EECP) is an interdisciplinary collaborative program designed for students interested in taking a concentration of courses and doing research in environmental engineering. It is open to M.A.Sc., M.Eng., and Ph.D. students in the following collaborating graduate departments in the Faculty of Applied Science and Engineering:

- 1 Chemical Engineering and Applied Chemistry
- 2 Civil Engineering
- 3 Materials Science and Engineering
- 4 Mechanical and Industrial Engineering

About 30 full-time faculty members in these departments carry out advanced research and teach postgraduate courses in a wide range of environmental engineering specialties.

The Collaborative Program is administered and coordinated by the Division of Environmental Engineering in conjunction with the participating departments and the Centre for Environment.

Students who wish to enrol in the Collaborative Program must first apply to and be accepted into a master's or doctoral program in one of the collaborating departments. (See the departmental entries in this calendar for details on admission requirements and degree programs.) Students should generally apply to the department that most closely matches their undergraduate degree. Once a student has

registered in one of the collaborating departments, he or she may apply to and enrol in the EECP; this should be done no later than the end of the first session of study. Application forms are available from the Division or any of the collaborating departments.

Degree requirements include course work and generally a research thesis or project, with details varying among the collaborating departments (see the departmental entries in this calendar). Graduate courses and research are available in a wide range of environmental engineering specialties offered by the collaborating departments. Many additional courses relevant to environmental engineering are offered by the Centre for Environment. See the calendar entries for the collaborating departments and the Centre for Environment for lists of courses. More detailed information on faculty, areas of research, and courses is available on the Division's Web site www.ecf.utoronto.ca/apsc/enveng and from the Division.

Program Requirements

The EECP requirements are:

- 1 Completion of a concentration of study in environmental engineering as demonstrated in course work and, where it is part of the degree requirement, a thesis or project. This is generally met through the student's home department degree requirements.
- 2 Completion of one non-engineering course with substantial interdisciplinary content and student interaction that is related to the environment but is outside the student's technical field. A list of approved courses is available on the Division's Web site.
- 3 Participation in EDE 3000H, the Environmental Engineering Research Seminar Series, for at least two sessions. This is mandatory for M.A.Sc. and Ph.D. students and recommended for M.Eng. students.

Students who complete these EECP requirements will obtain the following statement on their transcript: "Completed Collaborative Program in Environmental Engineering".

Ethnic and Pluralism Studies (Collaborative Program)

The graduate units of Anthropology; European, Russian, and Eurasian Studies; Geography; History; Industrial Relations and Human Resources; Nursing Science; Political Science, Religion; Social Work; and Sociology participate in the Ethnic and Pluralism Studies Collaborative Program at the University of Toronto. Participating graduate units in the program contribute courses and provide facilities and supervision for graduate research.

Applicants who wish to enrol in the Collaborative Program must apply to and be admitted to both the Collaborative Program and a graduate degree program in one of the collaborating graduate units. Students must follow a program of studies acceptable to both the participating graduate unit and the Ethnic and Pluralism Studies Program. Upon successful completion of the requirements, students receive the notation "Completed Collaborative Program in Ethnic and Pluralism Studies" on their transcripts, in addition to the master's or doctoral degree in their departmental area.

General Requirements

Applicants to the Master of Arts, Master of Industrial Relations and Human Resources, Master of Nursing, Master of Science, Master of Social Work, and Doctor of Philosophy degree programs are accepted by the participating graduate unit under the general regulations. Collaborative program requirements may be met concurrent with, or in addition to, departmental requirements. Students should consult specific departmental listings for information.

Degree of Master of Arts, Master of Industrial Relations and Human Resources, Master of Nursing, Master of Science, or Master of Social Work

Program Requirements

- 1 Two half-courses in ethnicity, at least one of which will be in a discipline other than the one in which the student is enrolled. Normally, these courses are taken as options within regular departmental or faculty degree requirements, not as additional courses.
- 2 A coordinating seminar in ethnicity. The seminar, which is a half-course, will be the place to discuss, compare, and bring together the various approaches to the study of ethnicity. As well, students will be expected to present and discuss their projects.
- 3 When a practicum is required, it will focus on ethnicity.
- 4 It is understood that the major paper or thesis as required by the graduate unit will be in an ethnic studies area.

Degree of Doctor of Philosophy

Program Requirements

- 1 Four half-courses, or equivalent, in ethnicity, including master's-level courses, at least two of which will be in disciplines other than the one in which the student is enrolled. Normally, these courses are taken as options within regular departmental or faculty degree requirements, not as additional courses.
- 2 A coordinating seminar in ethnicity. The seminar, which is a half-course, will be the place to discuss, compare, and bring together the various approaches to the study of ethnicity. As well, students will be expected to present and discuss their projects. Students who have taken this course for the master's degree need not repeat it.
- 3 When the student's graduate unit requires more than one comprehensive examination, one of the examinations will be in ethnicity.
- 4 When there are no comprehensive examinations, but an examination on the thesis proposal is required, the examination will focus

on ethnicity, and in all cases the thesis will be on subject matter dealing with ethnicity.

5 A Ph.D. thesis will focus on ethnicity. The supervisor of the thesis committee will be a specialist in the area of ethnicity.

Courses of Instruction

1 Courses eligible for credit toward meeting program requirements in Ethnic and Pluralism Studies are listed below.

2 Students should check with the professor responsible for each course since a prerequisite may be required.

3 Not all courses are offered each year. Please consult the Program office or the appropriate graduate unit for course availability.

4 Students wishing to use courses other than those listed below for credit toward meeting program requirements must submit a formal request in writing.

Coordinating Seminar

JTH 3000H Ethnic Relations Theory, Research, and Policy/*J. G. Reitz*

Anthropology

ANT 6003H Critical Issues in Ethnography I/*Staff*

ANT 6004H Critical Issues in Ethnography II/*Staff*

ANT 6034H Advanced Research Seminar IV (Ethnicity)/*M. D. Levin*

ANT 6040H Approaches to Field Work I/*R. Lee*

ANT 6041H Approaches to Field Work II/*Staff*

ANT 6050H Reading Course in Specific Area and Theory I/*Staff*

Economics

ECO 2800H Labour Economics I/*M. Baker*
(Prerequisite: an undergraduate course in statistics and a graduate course in applied statistics.)

Geography

PLA 1503H Planning and Social Policy/*S. Ruddick*

JPG 1505H The Multicultural City: Diversity, Policy, and Planning/*M. Mahtani*

JPG 1506H State/Space/Difference: Understanding the New Social Geography/*S. Ruddick*

GGR 1712H Historical Geography of Ethnic Groups in Canada/*D. A. McQuillan*

History

HIS 1102H Spiritual Invasion: Natives of the Americas Confront Christianity/*A. Greer*

HIS 1120H Topics in Aboriginal/Non-Aboriginal Relations in Canada/*Staff*

HIS 1164H Irish Migration to Canada: Sources and Methods/*M. McGowan*

HIS 1166H Immigrants, Minorities, and the Racialized Other: Canada in a Comparative Context/*F. Iacovetta* (Prerequisite: any previous course in the history of Canada.)

HIS 1274H The Nazis, Occupied Europe, and the Jews/*M. R. Marrus*

HIS 1287H Polish Jews Since the Partitions of Poland (joint graduate/undergraduate)/*P. Wróbel*

HIS 1297H Problems of National Survival in Eastern Europe Since 1848/*A. Rossos*

HIS 1528H Crossing Boundaries: Race, Ethnicity, Class, and Gender in America, 1880-1930/*Staff*

HIS 1545H Race, Segregation and Protest: South Africa and the United States/*R. Halpern*

Industrial Relations and Human Resources

IRE 3630H Diversity and Inclusiveness in the Workplace/*N. Weiner*

Law

LAW 259H Comparative Indigenous Rights/*J. Borrows*

LAW 262H Citizenship Theory and Immigration Law/*A. Shachar*

LAW 294H International Human Rights Law/*M. P. Macklem*

LAW 368H Race and the Law/*K. Rittich*

LAW 370H Aboriginal Peoples and the Law/*K. Wilkins*

LAW 410H Discrimination Law: Equality in the Private Sector/*D. Reaume*

Nursing Science

NUR 1013H Transcultural Health Care Issues/*Staff*

NUR 1014H Politics of Aboriginal Health/*R. S. Hagey*

NUR 1068H Youth and Mental Health Promotion/*N. Khanlou*

Political Science

POL 2001Y Problems of Political Community/*J. H. Carens*

-
- POL 2026H Topics in Political Thought
I: Nationalism and Political
Philosophy/*R. Beiner*
- POL 2038Y Problems of Pluralism and
Equality/*M. S. Williams*
- POL 2127H Canadian Theories of
Multiculturalism/*H. D. Forbes*
- POL 2321H Topics in Comparative Politics
I: Citizenship and Immigration
in Europe and North America/
R. Hansen
- POL 2324H Ethnonationalism and State-
Building: The Communist and
Post-Communist Experience/
D. Schwartz
- POL 2413Y Politics, Culture, and Identity in
Southeast Asia/*J. Bertrand*

Religion

- RLG 2037H Religion and Healing/*P. Klassen*
- RLG 3931H Topics in North American
Religions/*P. Klassen*

Social Work

- SWK 4210H Promoting Empowerment:
Working at the Margins/
I. Sakamoto
- SWK 4617H Cross-Cultural Social Work
Practice/*A. K. T. Tsang,*
K. Richard
- SWK 4658H Social Work with Immigrants and
Refugees/*U. George*
- SWK 4802H Special Studies II: Introduction to
Jewish Perspective on Caring/
P. David

Sociology

- SOC 6002H Immigration I: Contemporary
International Migration/*M. Boyd*
- SOC 6003H Immigration II: Sociology of
Immigration, Ethnicity and
Employment/*J. G. Reitz*
- SOC 6009H Ethnicity I/*Staff*
- SOC 6016H Social Demography I/*Staff*
- SOC 6109H Ethnicity II/*J. G. Reitz*
- SOC 6116H Social Demography II/*E. Fong*

Theory and Policy Studies in Education

- TPS 1428H Immigration and the History
of Canadian Education/
H. M. Troper
- TPS 1429H Ethnicity and the History
of Canadian Education/
H. M. Troper
- TPS 3428H Minority Concerns and Education
in Canadian History: Selected
Topics/*H. M. Troper*

Address:

Centre for European, Russian, and Eurasian
 Studies
 Room 125N
 Munk Centre for International Studies
 1 Devonshire Place
 University of Toronto
 Toronto, Ontario M5S 3K7
 Canada

Telephone: (416) 946-8938

Fax: (416) 946-8939

Web: www.utoronto.ca/ceres/

The Centre for European, Russian, and Eurasian Studies (CERES) was founded as the Centre for Russian and East European Studies (CREES) in 1963 to further the development of undergraduate and graduate studies and scholarly research related to Russia and Eastern Europe. This area includes both the USSR and pre-1917 Russia, and the region of Eastern Europe, with special emphasis on the Slavic nations. The centre acts as a liaison between the departments and advises students in matters relating to the study of Russia and Eastern Europe. Graduate work relating to Russia, the Soviet Union, and Eastern Europe may be undertaken for the M.A. and Ph.D. degrees in a discipline such as economics, geography, history, political science, Slavic languages and literatures, or sociology under the appropriate department. In addition, the centre offers its own M.A. program in European, Russian, and Eurasian Studies.

Degree of Master of Arts

Admission Requirements

Applicants for the M.A. are accepted under the general regulations of the School of Graduate Studies. At least some of the work in the program is based on the study of original texts and presupposes a reading knowledge of a language relevant to the program. Applicants should have a minimum of one academic year of study in a relevant language and are urged

to undertake additional language training in the summer preceding entry to the program.

Program Requirements

The M.A. program requires a minimum of two sessions of full-time graduate study. Students will be required to take six full-course equivalents (FCE). Of the six, at least two FCE must be taken in a discipline chosen by students as their major discipline and one must be ERE 2000Y, the interdisciplinary core course. It must be taken in the second year of the program. The remaining courses must be drawn from at least two disciplines other than the major discipline.

Combined Juris Doctor/Master of Arts (European, Russian, and Eurasian Studies)

The J.D./M.A. program is intended for highly qualified students who wish to combine the study of law with the opportunities that a detailed knowledge of eastern Europe and the countries of the former Soviet Union now offer. The program allows students to receive the combined degree in four years of study instead of the five years needed to take the degrees separately.

Students will be admitted to the Faculty of Law in the first year and receive deferred admission to the M.A. program in European, Russian, and Eurasian Studies. The first year of study will consist of the first year of the J.D. In the second, third, and fourth years of the combined program, students will pursue credits in both Law and European, Russian, and Eurasian Studies. Applicants who have completed a year in the European, Russian, and Eurasian Studies master's program or the first year of the J.D. can apply for admission to the combined program.

Applicants must separately apply to and be accepted by both the J.D. program and the M.A. (European, Russian, and Eurasian Studies) programs. They must satisfy the normal admission requirements for each program.

Combined Master of Arts (European, Russian, and Eurasian Studies)/Master of Business Administration

The M.A./M.B.A. program is intended for highly qualified students who can benefit from the combined study of Russia and Eastern Europe and Business Administration. The program allows students to receive the combined degrees in three years instead of the four needed to complete the degrees separately.

Students will be admitted to the Faculty of Management in the first year and receive a deferred acceptance to the M.A. (European,

Russian, and Eurasian Studies) program. The first year of study will consist of the M.B.A. core program. In the second and third years of the program, students will pursue courses in both Management and in European, Russian, and Eurasian Studies. Applicants who have completed a year in the European, Russian, and Eurasian Studies master's program or the first year of the M.B.A. can apply for admission to the combined program.

Applicants must apply separately to and be accepted by both the M.B.A. and the M.A. (European, Russian, and Eurasian Studies) programs. They must satisfy the normal admission requirements for each program.

Ethnic and Pluralism Studies Collaborative Program

CERES is a member of the Collaborative Graduate Program in Ethnic and Pluralism Studies. Students must apply to and register with CERES and must follow a program of studies acceptable to both CERES and the Ethnic and Pluralism Studies Program. Upon successful completion of the requirements, students receive on their transcripts the notation "Completed Collaborative Graduate Program in Ethnic and Pluralism Studies" in addition to the M.A. in European, Russian, and Eurasian Studies.

Courses of Instruction

Not all courses are offered every year. Consult the centre for course availability.

Required

ERE 2000Y Research Seminar/Staff

Optional

Comparative Literature

COL 5027H Memory, Trauma, and History/

 Web: www.ac-fpeh.com/

The Graduate Department of Exercise Sciences offers Master of Science and Doctor of Philosophy programs for students interested in research, academic, and professional careers relating to:

- Applied/exercise/environmental physiology
- Metabolic and endocrinological aspects of physical activity
- Motor control and motor learning
- Muscle physiology
- Physical fitness
- Psychological aspects of sport and physical activity
- Psychophysiological aspects of exercise and stress
- Sociocultural aspects of sport and physical activity
- Women's health and physical activity

Students are admitted to the interdisciplinary field of exercise sciences under the general regulations of the School of Graduate Studies. More specific program details, requirements, course descriptions, and application instructions are available from the Graduate Department of Exercise Sciences Web site. Applications must be received by February 1.

Degree of Master of Science

Admission Requirements

Applicants should have a four-year degree, or its equivalent, in physical education and health or a related discipline from a recognized university.

Program Requirements

1 The completion of all degree requirements within five years of first registration in the program.

2 The successful completion of five half-courses as follows:

- a** one exercise sciences half-course from the student's area of study
- b** one other half-course from the Exercise Sciences offerings
- c** one half-course from another department
- d** one half-course from either Exercise Sciences or another department
- e** one half-course in an appropriate methodology.

All courses must be approved in advance by the student's supervisor and the Graduate Department of Exercise Sciences.

3 The writing of a thesis under the supervision of a thesis committee (supervisor and at least two additional faculty members) and its oral defence before an examination committee appointed by the Graduate Department of Exercise Sciences.

4 The student's annual program plan must be approved by the supervisor and the Graduate Department of Exercise Sciences.

Part-time study is available in the Master of Science program.

Degree of Doctor of Philosophy

Admission Requirements

Applicants to the Ph.D. program normally will be expected to have completed a M.A. or M.Sc. with a thesis in a related field and provide satisfactory references pertaining to their academic and research abilities.

Program Requirements for Full-time Ph.D.

1 Full-time registration (fall, spring, summer sessions) throughout the entire doctoral program.

2 Completion of all degree requirements within six years from first registration in the program. Thereafter, students may apply for a maximum of two extensions.

3 The successful completion of six half-courses as follows:

- a one exercise sciences half-course from the student's area of study
- b two other half-courses from the Exercise Sciences offerings
- c one half-course from another department
- d one half-course from either Exercise Sciences or another department
- e one half-course in an appropriate methodology.

All courses must be approved in advance by the student's supervisor and the Graduate Department of Exercise Sciences.

4 The successful completion of a comprehensive examination.

5 The writing of a thesis under the supervision of a thesis committee (supervisor plus at least three additional faculty members) and its defence before an examination committee appointed by the Graduate Department of Exercise Sciences.

6 The oral defence of the thesis before an examination committee appointed by the School of Graduate Studies.

7 The student's annual program plan must be approved by the supervisor and the Graduate Department of Exercise Sciences.

Program Requirements for Flexible-time Ph.D.

With the approval of the Associate Dean, Graduate Education and Research, some applicants may be admitted to a flexible-time Ph.D. program. This program will benefit mature students with career and/or familial obligations.

The degree requirements for the flexible-time program are identical to those listed above for the full-time Ph.D. program; however, students have up to eight years to complete the program. A flexible-time student is required to register full-time for the first four years of the program. Thereafter, they may register part-time. A plan of study and research activities will be negotiated at initial registration, to be reviewed and updated annually.

Collaborative Programs

Exercise Sciences participates in the following collaborative programs:

- 1 Aging, Palliative and Supportive Care Across the Life Course
 - 2 Cardiovascular Sciences
 - 3 Women's Health
 - 3 Women's Studies

Introduction

The Master of Financial Economics Program is a small enrolment joint program of the Department of Economics and the Rotman School of Management. Graduates of the program will receive a professional degree called the Master of Financial Economics (M.F.E.). The program is designed to equip talented students with the tools and skills required for successful careers in the financial sector. Its objectives are to provide students with a broad understanding of financial theory and the economic framework upon which that theory is based, both in the classroom and through actual experience working for firms in the financial sector.

Admission Requirements

Applicants must have completed or must be in the final year of a four-year or honours degree program, or equivalent, with a B+ standing in the final year of that program. Applicants must have a strong preparation in economics, including full-year courses in both intermediate-level micro and macro theory, and full-year university-level courses in each of calculus and statistics. Previous training in finance is useful but not required. Achievement of these minimum requirements does not guarantee acceptance into the program. Preference is given to students who have completed, with high standing, advanced-level courses in any or all of economics, mathematics, and econometrics.

Program Requirements

The 16-month program consists of 12 half-courses, a 4-month summer internship, and an intensive mathematics, statistics, and accounting review. The core program consists of four courses from the Department of Economics and three courses from the Rotman School. The core courses drawn from the Department of Economics are the same as the core courses required for the M.A. degree in Economics plus ECO 2503H *Financial Economics I*. The core courses from the Rotman School (MGT 2306H *Options and Futures Markets*, MGT 2300H *Corporate Financing*, MGT 2302H *Security Analysis and Portfolio Management*) are drawn from the second-year M.B.A. level courses and provide students with training in key areas of finance. In addition to the core courses, students are free to choose five electives from either the Department of Economics or the Rotman School, subject to the condition that at least 7 of their 12 half-courses must be taken from the Department of Economics. Students may choose from a long list of elective courses offered at the graduate level in Economics or the second-year M.B.A. level (or higher) from the Rotman School.

The Faculty of Forestry offers degree programs leading to the Master of Forest Conservation (M.F.C.), Master of Science in Forestry (M.Sc. F.), and the Doctor of Philosophy (Ph.D.).

Forestry also participates in the Environmental Studies Collaborative Program.

The M.F.C., the Faculty's professionally-oriented master's degree, is an intensive 16-month course-based program with a strong focus on field and laboratory practical training, Canadian and foreign residential field courses, practical internships and individual and group research. It provides a strong, coherent professional education in forest conservation to students from diverse backgrounds.

The M.Sc.F. and Ph.D. programs are research/thesis-based degrees in areas of specialization relevant to faculty expertise and funding including, but not limited to, biodiversity conservation, sustainable forest management, forest fragmentation, wildlife habitat conservation, community forestry, international forest trade and policy, forest ecological processes, fire management systems, forest soils and tree nutrition, tree physiology and biotechnology, biological pest control, wood composites, and forest value-added wood products.

For admission to its degree programs, the Faculty considers applicants from a variety of

undergraduate backgrounds including forestry; applied science and engineering; and social, physical, and biological sciences.

Degree of Master of Forest Conservation

Admission Requirements

- 1 Applicants are admitted under the general regulations of the School of Graduate Studies.
- 2 Applicants must have an honours or specialist bachelor's degree with a minimum of mid-B standing in each of the final two years of the bachelor's program. The M.F.C. program is intended for students with a strong undergraduate background in ecology, environmental sciences, forestry, natural sciences, biology, physical geography, geology, agricultural science, or relevant social sciences. Students from other disciplines will be considered by the Faculty but may be advised to take some appropriate background courses prior to admission.
- 3 Applicants must submit additional documentation to the department with completed application forms and transcripts, including three references, a letter of interest in the M.F.C. program, and a résumé. Full instructions and forms are available via the Faculty's Web site.

Program Requirements

The 16-month program starts in September and requires full-time intensive involvement throughout. The program comprises a core of 11 integrated half-courses, 1 residential field camp course (FOR 3011H), 2 elective half-courses, and an internship (FOR 3007H) during the summer session in which students will work on practical forest conservation projects, either in Canada or abroad.

Information on specific course requirements and program schedules is included on the Faculty's Web site.

Degree of Master of Science in Forestry

Admission Requirements

- 1 Applicants are admitted under the general regulations of the School of Graduate Studies.
- 2 An applicant must have an appropriate four-year bachelor's degree from an approved university, with a standing of at least a mid-B in the final year of the bachelor's degree. A minimum of B+ is required for the collaborative program.
- 3 Applicants must submit additional documentation to the department with completed application forms and transcripts, including three references, a letter of intent, a résumé, and a "writing sample". Full instructions and forms are available via the Faculty's Web site.

Program Requirements

The program is prepared by the student in consultation with a supervisory committee and must be approved in sequence by the supervisory committee, the Graduate Committee of the Faculty of Forestry, and the School of Graduate Studies. Under exceptional circumstances, a part-time program may be arranged on application to and approval by the Faculty and the School of Graduate Studies.

The minimal requirements for this degree are:

- 1 Twelve months of residence including two academic sessions.
- 2 Three half-courses, at least one of which is taken within the Faculty, plus, in the case of students with non-forestry backgrounds, one of

FOR 3000H Current Issues in Forest Conservation,

FOR 3002H Applied Forest Ecology and Silviculture,

FOR 3003H Economics of Forest Ecosystems,

FOR 3004H Forest Management Decision Support Systems,

FOR 3009H Forest Conservation Biology, or

FOR 3010H Sustainable Forest Management and Certification,

on the recommendation of the student's supervisory committee and approval of the Graduate Coordinator.

Depending on the student's background, additional or alternative course work may be required.

3 Credit in FOR 1000H *Research Methods in Forestry* and FOR 1001H *Graduate Seminar*.

4 The preparation of a research thesis of acceptable quality and its oral defence.

5 All requirements for the M.Sc.F. degree must be completed within five years from the date of first enrolment in the program.

Degree of Doctor of Philosophy

Admission Requirements

1 Admission to a four-year Ph.D. program in the Faculty of Forestry normally requires an appropriate University of Toronto master's degree with at least an A- standing, or equivalent from a recognized university, in a discipline appropriate to the intended field of doctoral study and research.

2 In exceptional circumstances, admission to a Ph.D. program may be approved for an extraordinarily strong applicant with an appropriate four-year University of Toronto bachelor's

degree, or equivalent from a recognized university.

3 Applicants must submit additional documentation to the department with completed application forms and transcripts, including three references, a letter of intent, a résumé, and a "writing sample". Full instructions and forms are available via the Faculty's Web site.

Transfer from M.Sc.F. to Ph.D.

Under certain specific conditions, outstanding registered M.Sc.F. students may be considered by the end of their first year in the M.Sc.F. program for transfer to the Ph.D. program. Further information is available from the Faculty.

Program Requirements

The minimal requirements for the Ph.D. are:

- 1** Study in one major and at least one minor field. A minimum of four half-courses must be taken in total, including at least one full course in each of the major and the minor areas; a minor outside forestry is strongly recommended. Depending on the student's background, additional or alternative course work may be required.
- 2** Credit in FOR 1000H *Research Methods in Forestry* and FOR 1001H *Graduate Seminar*.
- 3** A student who is approved for transfer from the M.Sc.F. to the Ph.D. is required to complete, as a minimum, the M.Sc.F. course requirements (including FOR1000H *Research Methods* and FOR 1001H *Graduate Seminar*, plus three half-courses) plus one additional half-course. These courses should represent a major and a minor field.
- 4** For students with a non-forestry background, credit in one of
 - FOR 3000H Current Issues in Forest Conservation,
 - FOR 3002H Applied Forest Ecology and Silviculture,
 - FOR 3003H Economics of Forest Ecosystems,
 - FOR 3004H Forest Management Decision Support Systems,
 - FOR 3009H Forest Conservation Biology,
 - or
 - FOR 3010H Sustainable Forest Management and Certification,
 on the recommendation of the student's supervisory committee and approval of the Graduate Coordinator.
- 5** Successful completion of a comprehensive examination. This will ordinarily be taken early in the second year of the program.
- 6** The preparation and defence of a thesis that is an original and independent research

work adding significantly to the existing body of knowledge.

7 A full-time commitment is expected for a minimum of the first two years in the forestry program.

Environmental Studies Collaborative Program—M.F.C. and M.Sc.F.

Forestry and a number of other graduate divisions, in conjunction with the Centre for Environment, offer collaborative master's programs in environmental studies.

Upon successful completion of the requirements, the student receives, in addition to the degree, the notation "Completed Collaborative Program in Environmental Studies" on the transcript.

Requirements for this certification include the normal degree requirements outlined above with an extended residence requirement. Course selections must include ENV 1001H *Environmental Decision Making* and ENV 1002H *Environmental Management Case Studies*.

Thesis research programs will be guided by a supervisor and supervisory committee including at least one member cross-appointed between the Faculty of Forestry and the Centre for Environment.

For a full description of the Environmental Studies Collaborative Program, see the Environment entry in this calendar.

Courses of Instruction

The Faculty of Forestry offers the following courses. Courses in the 3000 number series are expected to be offered each year; 1000-level courses may be withdrawn in any particular year, depending on student interest/need and departmental resources. Students should consult the departmental brochure each session to confirm availability.

A maximum of one directed studies course taken with a student's supervisor can be credited toward meeting departmental degree program requirements.

- FOR 1000H Research Methods in Forestry (Credit/No Credit)/S. M. Smith, T. J. Blake
- FOR 1001H^o Graduate Seminar (Credit/No Credit)/S. M. Smith, T. J. Blake

 Fax: (416) 926-2328
 E-mail: french.graduate@utoronto.ca
 Web: www.chass.utoronto.ca/french

All applicants must arrange for two supporting letters to be sent to the Department; admission to all programs for post-graduate degrees will be based upon the evidence of these supporting letters as well as upon the applicant's academic record.

All incoming students will meet with the Associate Chair or the Graduate Secretary to discuss the program and to decide on their course of study before beginning classes.

Degree of Master of Arts

Admission Requirements

Students are accepted under the general regulations. They must also meet the following requirements.

- 1 B+ average standing or better, with at least B+ in French.
- 2 Competence in French.
- 3 Concentration in French literature and/or linguistics—a minimum of seven full courses, or equivalent, in French. A minimum of five of the seven full courses, or equivalent, should be in the proposed area of study (i.e., literature or linguistics).

A B+ average does not automatically lead to admission. Each dossier is studied by the Admissions Committee which takes into account all relevant factors.

Program Requirements

The M.A. program is both a self-contained program and the first stage towards doctoral studies. It has two objectives: to allow the student to develop a thorough knowledge of the discipline through a program of course work in literary studies or linguistics; to develop an aptitude for research. It is a twelve-month program. At the beginning of his or her course of study, the student will meet with either the Associate Chair or Graduate Secretary in order to determine course selection with a view to ensuring that the student has a well-rounded program and, taken in conjunction with the undergraduate degree, has a broad knowledge of the discipline.

- 1 Courses. Students in both literature and linguistics are required to complete four full-course equivalents as follows:
 - a the graduate seminar in literature (FRE 1200Y) or the graduate seminars in linguistics (FRE 1103H, FRE 1104H, and FRE 1125H).
 Part-time students will normally take these

courses in the first year of their programs.

- b Students in literature will take three full-course equivalents from the regular graduate course offerings or two and a half full-course equivalents and a half-course Research Essay FRE 5001H, a mémoire of approximately 35 pages, or two full-course equivalents and a full-course Research Essay FRE 5000Y, a 65-75 page mémoire.

Students in linguistics will take two and a half full-course equivalents from the regular graduate offerings or two full-course equivalents and a half-course Research Essay FRE 5001H, a mémoire of approximately 35 pages or one and a half full-course equivalents and a full-course Research Essay FRE 5000Y, a 65-75 page mémoire.

- 2 Prerequisite work, if necessary.

3 Students must maintain a B average in order to be recommended for the degree and must obtain a minimum of mid-B in the Research essay if taken. Students must also obtain a minimum of mid-B for the graduate seminar in literature (FRE 1200Y) or the graduate seminars in linguistics (FRE 1103H, FRE 1104H, and FRE 1125H).

- 4 Up to one full-course equivalent may be taken outside the Department.

Degree of Doctor of Philosophy

Admission Requirements

1 Applicants approved by the Department are admitted as students for this degree under the general regulations of the School of Graduate Studies.

- 2 Admission to the Ph.D. program requires either:

- a a four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, that includes at least seven full-course equivalents in French language and literature/linguistics, with an average grade of at least an A- in the overall program, or
- b a University of Toronto master's degree in French literature or linguistics, or its equivalent from a recognized university, with an average grade of at least an A- in the applicant's overall program.

3 All applicants must submit to the Department a formal application and a sample of written work completed as part of their bachelor's or master's program in French literature or linguistics as appropriate. This written work should be a copy of the M.A. thesis if available. Applicants holding a master's degree must submit to the Department a typewritten statement of purpose (maximum 500 words) which clearly outlines the area in which the applicant

intends to pursue research in French literature or linguistics. Applicants must satisfy the Department that they are capable of independent research in French literature or linguistics at an advanced level.

4 An A- average does not automatically lead to admission. Each dossier is studied by the Admissions Committee which takes into account all relevant factors. Admission to the Ph.D. on the basis of a four-year bachelor's degree is limited to exceptionally qualified applicants.

Program Requirements

A Ph.D. student shall pursue a program of study and research in French Literature/Linguistics approved by the Department. The minimum requirements for the degree are as follows:

1 Course work. A student admitted on the basis of a four-year bachelor's degree is required to complete four full-course equivalents during the first year of the program and three and a half additional full-course equivalents during the second year of the program. With the permission of the Department, the student may take up to one full-course equivalent in the first year of the program, and one full-course equivalent in the second year, outside the Department. Students in literature will take FRE 1200Y and FRE 1201H as part of their program; students in linguistics will take FRE 1103H, FRE 1104H, FRE 1125H, and FRE 1201H as part of their program. To remain in good academic standing and to continue in the Ph.D. program, a student must complete four full-course equivalents, with an average grade of at least an A-, by the end of the first year of the program and complete the remaining three and a half full-course equivalents, maintaining an average of at least an A-, by the end of the second year.

A student admitted on the basis of a master's degree is required to complete three and a half full-course equivalents during the first year of the program. With the permission of the Department, the student may take one full-course equivalent outside the Department. Students in literature will take FRE 1200Y, unless this course or its equivalent has already been completed, and FRE 1201H as part of their program; students in linguistics will take FRE 1103H, FRE 1104H, and FRE 1125H unless already completed, and FRE 1201H as part of their program. To remain in good academic standing and to continue in the Ph.D. program, a student must complete three and a half full-course equivalents, with an average grade of at least an A-, by the end of the first year of the program.

2 Thesis topics. By September 15 of the second year of registration, in the case of a student admitted to the Ph.D. program on the basis of a master's degree, otherwise by September 15 of the third year of registration, a student must register a thesis topic with the Department. The proposal must be signed by the faculty member who has agreed to direct the thesis and by the two faculty members who will serve on the student's supervisory committee.

3 Language requirements. By the end of the first year of the Ph.D. program, in the case of a student admitted on the basis of a master's degree, otherwise by the end of the second year of the Ph.D. program, the student must demonstrate a reading knowledge of Old French or of another language (excluding French or English), as approved by the Department.

4 Field examination. No later than the second session of the second year of registration in the Ph.D. program, in the case of a student admitted on the basis of a master's degree, otherwise no later than the second session of the third year of registration, a student must pass the two parts of the field examination:

a a written examination (to be taken by March 15) designed to test the student's knowledge of the general area in which his or her research is located—the questions for the examination are given to the student a week in advance of the examination; and

b an oral examination (to be taken by April 30) based on a written thesis proposal of 15 to 20 pages, plus bibliography, designed to test the student's readiness to proceed with research for the thesis.

5 Between the completion of the field examination components and the oral examination on the thesis, the student will meet with the supervisory committee at least once a year, and more frequently if required.

6 Thesis and oral examination on the thesis.

Collaborative Programs

The Department of French participates in the following collaborative programs:

1 Book History and Print Culture

2 Women's Studies

Each of these programs has its own entry in this calendar; interested students should refer to these entries.

Courses of Instruction

All courses are held once a week for two hours.
Courses begin in the same week as do undergraduate classes.

Linguistics Courses

- FRE 1101H Psycholinguistique/*P. Bhatt*
 FRE 1103H Séminaire de linguistique I: Phonétique et phonologie/*Ph. Martin*
 FRE 1104H Séminaire de linguistique II: Syntaxe/*Y. Roberge*
 FRE 1115H L'accent étranger: phonétique et phonologie/*J. Steele*
 FRE 1124H Syntaxe de l'Ergativité: Le Français dans tous les Cas/*J. Ndayiragije*
 FRE 1125H Séminaire de linguistique III: Morphologie et sémantique/*M. Pirvulescu*
 FRE 1128H Le français en contact/*A.-M. Brousseau*

Linguistic and Literature Courses

- FRE 1164H Initiation à l'ancien français/*D. Kullmann*
 FRE 1201H Méthodes de recherche (Credit/No Credit)/*Staff*

Literature Courses

- FRE 1200Y Séminaire de littérature/*A. Cozea*
 FRE 1500H François Villon/*D. Kullmann*
 FRE 1601H Histoires de l'homme: du début et à «la fin»/*A. Motsch*
 FRE 1902H Théorie et pratique du roman de Constant à Flaubert/*P. Perron*
 FRE 1904H L'édition critique: principes et pratiques/*D. Speirs*
 FRE 1912H Sociabilités et socialités littéraires/*A. Glinoer*
 FRE 1924H Balzac et le discours préfaciel/*R. Le Huenen*
 FRE 1928H Zola et le naturalisme: du "roman expérimental" au "roman nouveau"/*C. Elkabas*
 FRE 2000H L'éclatement de la poétique: poésie et roman du XXe siècle/*P. Michelucci*
 FRE 2007H Littérature et éthique: nouveaux textes, nouvelles problématiques/*P. Riendeau*
 FRE 2036H Configurations du genre sexuel dans la prose contemporaine des femmes/*B. Havercroft*
 FRE 2037H Littérature et folie en Afrique/*A. Tcheuyap*

- FRE 2080H Le sujet en mouvement: postmoderne, migrant et transnational/*J. Paterson*
 FRE 2103H La nouvelle québécoise contemporaine: l'émergence des voix féminines/*M. Lord*
 FRE 2105H Ecritures du moi: de la représentation textuelle à la représentation visuelle du sujet écrivain/*J. LeBlanc*

Other Courses

- FRE 4000Y Reading Course/*Staff*
 FRE 4001H Reading Course/*Staff*
 FRE 4002H Reading Course/*Staff*
 FRE 5000Y° Research Essay/*Staff*
 FRE 5001H° Research Essay/*Staff*

Cross-listed*Book History and Print Culture*

- BKS 1000Y Book History and Print Culture
 BKS 2000H Advanced Seminar in Book History and Print Culture

Comparative Literature

- COL 1255H Aspects of Structuralism/*R. Le Huenen*

Medieval Studies

- MST 3154H British History in French: Wace, Brut/*D. Kullman*
 MST 3155H Chrétien de Troyes, Perceval/*D. Kullman*

° Courses which may continue over a program. The course is graded when completed.

 University of Toronto
 Toronto, Ontario M5S 3G3
 Canada

Telephone: (416) 978-3377

Fax: (416) 946-3886

E-mail: geograd@geog.utoronto.ca

Web: www.geog.utoronto.ca

The Department of Geography offers facilities for research in geomorphology, climatology, hydrology, biogeography, pedology, environmental assessment and sustainable natural resource management, international development, industrial innovation, urban and economic geography, cultural and historical geography, gender studies, social geography, regional analysis, the history and philosophy

of geography, remote sensing, computer cartography, spatial statistics, topics in land/geographic information systems, and quantitative analysis. The territories of special concern are Canada, the United States, Latin America, the Caribbean, Northwestern and Central Europe, East Asia, South Asia, and the former Soviet Union.

Applicants are accepted under the provisions of the general regulations for study at the M.A., M.S.A., M.Sc., and Ph.D. levels. International students whose primary language is not English must take the Test of English as a Foreign Language (TOEFL). Applicants taking the paper-based TOEFL exam must achieve a minimum score of 580 and 5 on the TWE. Applicants taking the computer-based TOEFL exam must achieve a minimum score of 237 and 5 on the essay rating component. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 93/120 and 22/30 on each of the writing and speaking sections.

Degree of Master of Arts/Master of Science

Admission and Program Requirements

Normally the department requires a minimum B+ standing in the final two years of an appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, for admission to the M.A. and M.Sc. programs. Applicants are expected to have completed at least eight half-courses in geography or a related field. Applicants lacking the minimum requirements should consider doing qualifying work at the undergraduate level prior to application. Such work should be undertaken in consultation with the graduate coordinator. Applicants who hold an appropriate bachelor's degree but are changing disciplines or require further preparatory work, may be required to complete an additional year of graduate-level course work.

Two geography programs and various collaborative programs are available; selection is made with the approval of the department. Within most of these programs, students can be awarded a Master of Science degree if their research contains a substantial physical science component and if two-thirds of their course work comprise Geography courses accepted by the department as physical science courses. Programs are usually completed in a 12-month period, excepting the Collaborative Environmental Studies research paper program and Collaborative International Relations program.

Progress into the second term is dependent on achieving an overall B average in the first term and satisfactory progress as outlined in the *Graduate Geography Handbook*.

Program I—Thesis

Students will undertake research leading to the preparation of a thesis, in conjunction with at least the equivalent of 1.5 full graduate courses including any required core courses.

Program II—Research Paper

Students will take the equivalent of three full graduate courses and pursue a research project, normally during the summer, leading to the preparation of a research paper (GGR 1100Y).

Collaborative Programs

The Department of Geography participates in the following collaborative programs. Please consult the separate entries in this calendar for details.

- 1 Aboriginal Health
- 2 Asia-Pacific Studies
- 3 Community Development
- 4 Environment and Health (consult the Environment entry in this calendar)
- 5 Environmental Studies (see below)
- 6 Ethnic and Pluralism Studies
- 7 International Relations
- 8 South Asian Studies
- 9 Women's Studies

Environmental Studies Research Paper (Collaborative M.A./M.Sc. Program)

Students will take the equivalent of seven graduate half-courses. Three of these courses must be taken in the Department of Geography (including the core course), one in a related discipline, and three at the Centre for Environment (two must be Institute core courses). This program is normally completed in 17 months, but can be completed under certain circumstances in 12 months.

Students are also required to undergo a three-month internship and to prepare and defend a research paper (GGR 1100Y). See the Environmental Studies (Collaborative Program) entry in this calendar.

Environmental Studies Thesis (Collaborative M.A./M.Sc. Program)

Students will take the equivalent of four graduate half-courses. Two of these courses must be taken in the Department of Geography and two at the Centre for Environment. Students are also required to prepare and defend a thesis.

Degree of Master of Science in Planning

Students interested in the M.Sc.Pl. program should consult the Planning entry in this calendar.

Degree of Doctor of Philosophy**Admission Requirements**

Normally the department requires a minimum A- standing at the master's level for admission to the Ph.D. program. In exceptional cases and at the discretion of the department, admission to the Ph.D. program may be approved for applicants with an overall A average and appropriate University of Toronto bachelor's degree, or its equivalent from a recognized university. Such students must complete three half-courses in addition to the doctoral course work requirements. Applicants who hold an appropriate master's degree but are changing disciplines or require further preparatory work, may be required to complete an additional year of graduate-level course work.

Program Requirements

The Ph.D. is primarily a research degree. A program of study is designed for each student to ensure competence in a field of research and to facilitate the preparation of a dissertation. Unless otherwise specified, two years of residence are required during which the student is required to be on campus full-time and consequently in such geographical proximity as to be able to participate fully in the University activities associated with the program. Residence provides the student with an opportunity to become immersed in the intellectual environment of the University.

Students must:

- 1 complete at least the equivalent of four half-courses and, depending on the field of specialization, up to two additional half-courses. At least one half-course must be, and up to three half-courses may be, taken in other departments;
- 2 submit a research statement concerning the proposed Ph.D. topic and the scope of the Ph.D. examination by the end of April in Year I;
- 3 pass a Ph.D. examination in the general field in which research is being undertaken by the end of Year I;
- 4 upon the recommendation of their committee, be required to acquire a knowledge of a foreign language necessary for their research;
- 5 submit a research proposal that is acceptable to their research committee by the end of the first session in Year II;

Ph.D. degree program requirements are fully described in the *Graduate Geography Hand-*

book, which all students receive on registration, and the department's Web site www.geog.utoronto.ca.

Credit for M.A./M.Sc. Courses

In exceptional cases, at the discretion of the department, graduate courses completed at the master's level at the University of Toronto may be counted towards meeting some course requirements. However, all doctoral students must take a minimum of two full courses with the department after entering the Ph.D. program.

Courses of Instruction

The following graduate courses will be available on demand and subject to faculty resources. Not all courses are given every year, and some members of the graduate faculty are on research leave. Please consult the departmental graduate office. The 2000-level courses are normally open to Ph.D. students only.

Address:

Department of Geology
 Earth Sciences Centre
 Room 1066, 22 Russell Street
 University of Toronto
 Toronto, Ontario M5S 3B1
 Canada

Telephone: (416) 978-1240

Fax: (416) 978-3938

E-mail: grad@quartz.geology.utoronto.ca

Web: www.geology.utoronto.ca

The Department of Geology accepts students for advanced degrees in a broad range of topics in the Earth Sciences. Students may also undertake studies in interdisciplinary areas by arrangement with other departments such as Physics, Chemistry, Materials Science and Engineering, Civil Engineering, Zoology, Botany, and the Centre for Environment.

In recent years, research by staff and graduate students has been carried out in all parts of North America and other parts of the world, both on land and at sea. In addition to field-based studies, the Department has a wide range of modern laboratories, and advanced studies are encouraged in a broad spectrum of geological problems. Further details of research emphases, facilities, detailed degree requirements, and graduate courses are available on the departmental Web site www.geology.utoronto.ca.

Students are accepted under the general regulations. The Department has no formal foreign language requirements. Students proceeding by thesis to any degree are expected to become familiar with the literature of their subjects, in whatever language it is written.

Degree of Master of Science

Students in the all coursework option are normally required to complete the graduate seminar (GLG 1101H), the all-course research project (GLG 3608H), one of the six breadth courses and 3.5 other courses for a total of 5.0 graduate full-course equivalents (FCE). Students in the doctoral-stream option are normally required to complete the graduate seminar (GLG 1101H), the research project (GLG 3603Y), research presentation (GLG 3601Y), one of the six breadth courses, and 1.0 FCE of elective courses, for a total of 4.0 FCE. To encourage breadth, the Department will permit students to substitute electives with equivalent non-geology courses. Students may proceed on a part-time basis.

Degree of Master of Applied Science

Students are normally required to prepare a research thesis, and complete the graduate seminar (GLG 1101H), one of the six breadth courses, and 1.0 FCE of elective courses, for a total of 2.0 FCE. Minimum full-time residence is one academic session.

Degree of Doctor of Philosophy

The principal work for the Ph.D. degree is the preparation of a research thesis constituting a significant contribution to the knowledge of the earth. A Ph.D. student is normally required to complete the graduate seminar course, one of the six breadth courses and an additional half-course, for a total of 1.5 FCE. The additional half-course may be taken in departments other than Geology with the approval of the student's advisory committee. A reduction in the number of required courses may be granted for students who have previously undertaken graduate studies in the appropriate fields. Recommendations must be made by a student's advisory committee for consideration and approval by the Department's Graduate Affairs Committee. Students who begin the Ph.D. program directly from the Department's research-based M.Sc. are required to take one of the six breadth courses and an additional half-course. In all cases, the student's supervisory committee reserves the right to assign additional courses if they feel that the student is deficient in a subject area essential to the research.

Students are normally expected to complete the M.Sc. degree before proceeding to the Ph.D., but exceptions may be made when the student has the appropriate research experience. Normal departmental rules for the completion of the Ph.D. apply (see departmental Web site).

Collaborative Programs

The Department of Geology participates in the following collaborative programs:

1 Environmental Studies (see Environment)

2 Geology and Physics

For details, see the separate entries in this calendar.

Canada

Telephone: (416) 978-3231

Fax: (416) 978-7606

E-mail: collab.geophysics@utoronto.ca

The graduate units of Geology and Physics participate in the Collaborative M.Sc. and Ph.D. Programs in Geology and Physics. These programs foster graduate education in those areas of study that overlap traditional departmental boundaries.

Admission Requirements

Applicants who wish to enrol in the collaborative program must apply to and be admitted to both the collaborative program and a graduate degree program in one of the collaborating departments, this being either Geology or Physics. Note that M.Sc. students enrolled in Option I in Physics or in the course-only option in Geology are not eligible to enrol in the collaborative program. In addition, the applicant must submit a supplementary brief application form, available from either home department or the collaborative program office, to the collaborative program Director. Normal deadlines for application to the School of Graduate Studies apply. Students who have already been admitted to one of the two home departments may apply to the collaborative program until October 1.

Program Requirements

Students must meet all respective degree requirements of the School of Graduate Studies, the home department, and the collaborative program. Students who successfully complete the requirements of the collaborative program will receive the notation "Completed Collaborative Program in Geology and Physics" on their transcript.

Master of Science Program

The M.Sc. research, thesis, and thesis defence requirements are the same as those of the home department. The M.Sc. will normally require work equivalent to 11 half-courses as

follows:

- the core half-course GLG 1101H
- two lecture half-courses in Geology
- two lecture half-courses in Physics
- a supervised research project in the field of geophysics or the overlap area of physics and geology, equivalent to six half-courses.

The supervised research project and associated report or thesis will be completed under the regulations of the home department. Additionally, the student is expected to attend the regular seminar series of both the Geology Department and the Geophysics Lab in the Physics Department and to participate in the graduate student seminar programs of both the Geology Department and the Geophysics Lab. Program requirements are normally completed within 12 months of entry to the program.

Doctor of Philosophy Program

The Ph.D. research, thesis, and thesis defence requirements are the same as those of the home department. The lecture course requirements are the Geology graduate seminar course in addition to the course requirements of the home department, with the added stipulation that at least 1 FCE of these be taken in the non-home department. The student's research supervisor will normally be a faculty member in the student's home department, unless an explicit exception is approved by both departments.

Fax: (416) 926-2329

E-mail: german@chass.utoronto.ca

Web: www.chass.utoronto.ca/german

Applicants are accepted to the graduate program in German Literature, Culture and Theory under the general regulations provided that they also satisfy the Department's requirements stated below.

An applicant from another university should arrange for three supporting letters to be sent to the Coordinator of Graduate Studies of the Department, preferably on forms available from the Department. Admission to all programs for higher degrees will be based upon the applicant's academic record and upon the evidence of the supporting letters.

The selection of courses for the degrees of Master of Arts and Doctor of Philosophy should be made in consultation with the Coordinator of Graduate Studies of the Department of

Germanic Languages and Literatures and must in every case be approved by the Department. All students in their first year of graduate study at the University of Toronto are required to take COL 1000H *Faculty Seminar: Theories of Literature and Criticism*.

Degree of Master of Arts

Applicants for a one-year M.A. program must have completed the four-year B.A. of this University with major or specialist standing in German (a minimum of seven courses past O.A.C., at least four of which are at the senior level) with no less than a B+ average, or give evidence of similar qualifications.

Students are required to:

- 1 complete the equivalent of 3.5 full courses, including COL 1000H *Faculty Seminar: Theories of Literature and Criticism*;
 - 2 pass a German language competence test.
- Details of these requirements are found in the departmental handbook.

Degree of Doctor of Philosophy

Admission to the Ph.D. program requires either (a) a four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, that includes at least six full courses (twelve half-courses) in German language, literature, and culture, with an average grade of at least a B+ in the applicant's overall program and of at least an A- in the applicant's German courses, or (b) a University of Toronto master's degree in German, or its equivalent from a recognized university, with an average grade of at least an A- in the applicant's overall program. Applicants must satisfy the Department that they are capable of independent research in German at an advanced level.

An applicant admitted on the basis of a four-year bachelor's degree must take a minimum of seven full courses including COL 1000H with an average grade of at least an A-. The Department may recommend to the School the termination of the registration and eligibility of a student who fails to complete at least 3.5 full-course equivalents, with an average of at least an A-, during the first year of the program. The student is required to complete the remaining courses required for the degree, with an A-average by the end of the second year.

An applicant admitted on the basis of a master's degree must take a minimum of four full courses including COL 1000H with an average grade of at least an A-. The student is required to complete at least 3.5 full-course equivalents by the end of the first year of registration and any remaining courses required for the degree by the end of the second year.

- In addition students are required to:
- 1 give evidence of reading knowledge of French, or, in exceptional circumstances, of another language approved by the Department;
 - 2 pass a general examination in German literature;
 - 3 pass a thesis field review;
 - 4 make an oral presentation of their thesis;
 - 5 submit a thesis on an approved subject and pass an oral examination on this subject.

The selection of courses may include 1.5 full courses in a department other than Germanic Languages and Literatures.

The Department may permit a candidate to write the doctoral thesis in German when the candidate's advisory committee so recommends and when the candidate has satisfied the School's conditions (see Degree Regulations, Doctor of Philosophy, Thesis).

Courses of Instruction

Not all courses are offered every year. The Department should be consulted each session as to actual course offerings.

Collaborative Program in Health Care,
 Technology and Place
 155 College Street
 University of Toronto
 Toronto, Ontario M5T 1P8
 Canada

Telephone (416) 978-2067

Fax: (416) 946-5960

Web: www.hctp.utoronto.ca

The objectives of the Health Care, Technology and Place (HCTP) Collaborative Program are to:

- 1 prepare doctoral students to understand, explain, and improve health outcomes associated with geographically-dispersed and technologically-mediated health care;
- 2 bridge knowledge gaps among doctoral students working in the life sciences, physical sciences, social sciences, and humanities who are concerned with the interconnectedness of bodies, technologies, places, and modes of work in contemporary health care; and
- 3 provide mentorship in transdisciplinary scholarship, including leadership skills, collaboration, grant writing, and knowledge exchange. Ultimately the goal is to facilitate research conducted by scientifically-informed humanists and philosophically-informed physical and social scientists.

The following graduate units participate in the HCTP Collaborative Program: Biomedical Engineering; English; Health Policy, Management and Evaluation; Medical Science; Nursing Science; Pharmaceutical Sciences; Public Health Sciences; Rehabilitation Science; and Social Work. Students must apply to and register in the Ph.D. program of one of the participating graduate units and follow a course of study acceptable to both that unit and the HCTP Collaborative Program.

Application Procedure

Collaborative programs are administered under the auspices of the School of Graduate Studies. Students who wish to enrol in the collaborative program must apply to and be admitted to both the collaborative program and a graduate degree program in one of the collaborating departments. Applicants may apply concurrently to the participating home graduate unit and to the Health Care, Technology and Place Collaborative Program.

1 Applicants must apply to a participating graduate unit and comply with the admission procedures of that unit.

2 Applicants must forward the following to the Program Committee of the HCTP Collaborative Program:

- a a copy of the School of Graduate Studies application form submitted to the participating graduate unit;
- b copies of official undergraduate and graduate transcripts from all institutions previously or currently attended, which should reflect a minimum 3.5 GPA (A-);
- c a résumé or curriculum vitae;
- d a research plan (maximum 800 words) summarizing research goals and past research experience, the relevance of the HCTP Program to this plan, and justification for the identified HCTP project mentor;
- e two confidential letters of recommendation from scholars familiar with the applicant's research background and aptitude for the interdisciplinary study;
- f a confidential letter from an HCTP mentor providing:
 - i formal agreement to participate on the applicant's dissertation committee; and
 - ii commentary written for reviewers outside the discipline, evaluating the applicant's level of achievement relative to peers in the same discipline, the objectives and methods of the proposed program of research, and the relative merit of such research within the applicant's home discipline.

Note: Students should use copies of official documents (a and b above) for their application to the HCTP Collaborative Program.

Program Requirements

To complete the Health Care, Technology and Place Collaborative Program, students must receive credit for at least one HCTP half-course, participate actively in the monthly seminar series during their involvement with HCTP, and participate in at least one Annual Research Workshop. In addition, students must complete a dissertation under the supervision of a core faculty member in the student's home

department. The dissertation must address the theme of “health care, technology, and place”. It is the objective of this collaborative program to enrich the Ph.D. experience without unduly extending the duration of students’ graduate education. Every student enrolled in the collaborative doctoral program must complete the requirements of the collaborative program and the requirements of the doctoral program in their home graduate unit. It will be up to each participating home department to determine whether HCTP courses are completed in addition to the department’s customary course requirements or as a part of those requirements.

Core Courses

- JNH 5001H Health Care Settings, Site and Human Well Being/*P. McKeever*
- JNH 5002H The Body, Health Care, Technology and Place/*P. McKeever, E. D. Harvey, A. Chambon*
- BME 1456H Changing Health Care Technologies, People and Places/*P. C. Coyte*
- NUR 1031H Technology and Place in Contemporary Health Care Work/*G. J. Andrews, P. C. Coyte*

Note: Students in the collaborative program will be encouraged to fulfil departmental course requirements and elective course requirements by enrolling in courses salient to the priorities of HCTP.

 Combined Degree Program

March 1

M.M.I.

Degree of Master of Health Science

The M.H.Sc. degree program is for health managers and professionals who wish to acquire a professional graduate education in health administration. The program is offered in a modular format that concentrates class time into Wednesday evening and all day Thursday, Friday, and Saturday, five times per session. The program consists of five consecutive sessions starting in September each year.

Admission Requirements

- 1 Applicants normally require a B+ average or higher in each of the last two years of an appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university.
- 2 Applicants are strongly advised to have some prior preparation in quantitative courses such as statistics, accounting, and economics.
- 3 Relevant work and/or field experience is required.

Program Requirements

- 1 Completion of 10 full-course equivalents of which 8.5 are required subjects and which includes a minimum of 1 full-course equivalent in a field placement.
- 2 Degree requirements are normally completed within two years.

Courses of Instruction

All courses are offered in modular format unless marked otherwise.

Required

- HAD 5010H Canada's Health System and Health Policy: Part I/
K. Spalding, R. Deber
- HAD 5020H Canada's Health System and Health Policy: Part II/*R. Deber, A. P. M. Williams*
- HAD 5030H Methods and Cases in Health Policy/*Staff*
- HAD 5711H Theory and Practice of Strategic Planning and Management in Health Services Organization/
W. Berta

- HAD 5713H Introduction to Health Information Systems/*J. M. Barnsley*
- HAD 5721H Strategic Management of Quality and Organizational Behaviour in Health Services Organizations/
G. R. Baker
- HAD 5723H Health Services Accounting/
E. Schraa
- HAD 5724H Quantitative Methods for Health Services Management and Policy/*R. Cockerill*
- HAD 5725H Health Economics/*C. Dewa, J. Hoch*
- HAD 5731H Advanced Cases in Health Management/*G. R. Baker*
- HAD 5733H Health Services Finance/
W. Wodchis

- HAD 5774H Comparative Health Care Systems/*D. Zakus*
- HAD 5775H Competition, Cooperation and Strategy in Health Care/*Staff*

Combined Master of Health Science/ Master of Social Work Program in Health Administration and Social Work

The Combined M.H.Sc./M.S.W. program in Health Administration and Social Work allows students with a strong interest in both social work and health/social sciences management the opportunity to engage in an integrated program of study leading to the concurrent receipt of the M.H.Sc. and M.S.W. degrees.

There are two full-time streams of study: a three-year program for students admitted with a four-year undergraduate degree and a two-year program for students with a Bachelor in Social Work.

Applicants to the Combined M.H.Sc./M.S.W. program in Health Administration and Social Work must apply to, and be admitted to both faculties; therefore, applicants must meet the requirements for admission to both. Note however, that the deadline for receipt of applications to the M.H.Sc. program is February 1 and the deadline for the M.S.W. program is December 1. Further details can be obtained from our Web site at www.hpme.utoronto.ca/English/MHSc-Health-Administration-Social-Work.html.

Combined Master of Health Science/ Master of Nursing Program in Health Administration and Nursing Science

The Combined M.H.Sc./M.N. program in Health Administration and Nursing Science provides an opportunity for students with a strong interest in both nursing and health administration to engage in an integrated and coherent program of study leading to the concurrent receipt of the M.H.Sc. in Health Administration and M.N. degrees within 2.5 years of full-time study.

During the first year of the program, students enrol in the Faculty of Nursing and complete eight half-courses for the M.N. degree. During the second year, students enrol in the Department of Health Policy, Management and Evaluation (HPME) and complete 11 half-courses towards the M.H.Sc. in Health Administration degree plus two electives that can be taken from either degree program. In the third year, two-half courses are taken in HPME.

Admission Requirements

Admission to the combined program is conditional upon independent admission to each of the participating graduate units. Applicants will normally be required to complete separate application forms on a concurrent basis and pay the application fees for admission to the M.N. program and the M.H.Sc. in Health Administration program.

Students must satisfy the full requirements for each of the participating graduate units. The aggregate criteria listed below must be satisfied to ensure that an application is considered complete for the purpose of entry into the Combined M.H.Sc./M.N. program in Health Administration and Nursing Science. Applicants must:

- 1 be accepted under the general regulations of the School of Graduate Studies. Meeting the minimum requirements does not ensure admission.
- 2 hold a University of Toronto B.Sc. degree in Nursing or a degree from an equivalent program in a recognized university.

3 have obtained a B+ standing over the last two years of undergraduate study. The applicant is expected to have good academic standing in non-nursing as well as nursing subjects.

4 have successfully completed an introductory course in statistics prior to admission.

5 have at least three years of work experience in the health care field.

Program Requirements

The M.N. component of the Combined M.H.Sc./M.N. program in Health Administration and Nursing Science comprises eight required half-courses. The M.H.Sc. Health Administration component comprises 13 required half-courses. In addition, the combined program requires two elective half-courses that can be taken from either the M.H.Sc. or M.N. course offerings.

Degree of Master of Management of Innovation

The Master of Management of Innovation (M.M.I.) program is designed to prepare students for management careers in industry as research and design (R&D) managers; investment funds oriented towards technology intensive sectors, health care and medical-research oriented companies; and in the public sector or non-governmental agencies involved in supporting R&D and technology transfer. The 12-month program has an 8-month core academic program requirement for all students consisting of management and economics courses. Additionally, there are elective courses offered in the fall and winter sessions, as well as a group project and an elective internship project offered in the summer session.

Admission Requirements

Applicants considered for admission in the M.M.I. degree program must first meet the minimum academic criteria outlined below under *Academic Eligibility*. Applicants are required to submit an official transcript, two letters of reference, and a résumé. Applicants who submit all required documentation and meet the academic criteria are ranked on the basis of their grades. The top ranked applicants are invited to write a personal statement. Applicants are then ranked using a cumulative score based on their personal statement and their grades.

1 Academic Eligibility

a Applicants must meet the minimum entry requirements for the School of Graduate Studies. These include a four-year University of Toronto bachelor's degree in the health professions, sciences, or engineering, or equivalent from a

recognized university. Students applying in the final year of their undergraduate program must provide proof of completion of degree requirements prior to the date of enrolment. Additionally, applicants must complete the specific prerequisites or their equivalents set by the M.M.I. program.

b Applicants must have achieved a minimum overall grade point average of B+ or 77-79%, 3.3 on a 4.0 scale over the last two years of full-time academic study.

c Applicants whose primary language is not English and who graduated from a non-Canadian university where the language of instruction was not English must provide scores of an acceptable English language facility test. Minimum TOEFL score requirements are 580 on the paper-based test with 5 on the TWE; 237 on the computer-based test with 5 on the essay rating; 93 on the internet-based test with 22 on each of the writing and speaking sections. Applicants who obtained a degree outside Canada must arrange for GMAT or GRE (General) examination results to be sent to the department.

2 References and Résumé

At least two letters of reference and a résumé must be submitted by the applicant. One reference must be provided directly from a faculty member familiar with the applicant's work and who holds an appointment in the program where the applicant most recently graduated.

3 Personal Statement

An on-site written personal statement.

4 Interview

An interview is conducted with at least two faculty who will evaluate problem solving capabilities and communication skills. A short sample of the applicant's writing, prepared on site, is required.

Program Requirements

1 Except for students granted advanced standing on admission, the program of study consists of courses MMI 1010H, MMI 1020H, MMI 1030H, MMI 1050H, MMI 1060H, MMI 1070H, MMI 1080H, MMI 1090H, and MMI 1100H.

2 Additionally, students choose the equivalent of four elective half-courses from the following: HAD 5010H, HAD 5020H, HAD 5725H, HAD 5741H, POL 2307H, and MMI 1200H.

3 All requirements must be completed within a minimum of one year of study and a maximum of five years from the date of first enrolment.

Courses of Instruction

HAD 5010H	Canada's Health System and Health Policy—Part 1
HAD 5020H	Canada's Health System and Health Policy—Part 2
HAD 5725H	Health Economics
HAD 5741H	Health Law
MMI 1010H	Prices and Markets
MMI 1020H	Applied Econometrics
MMI 1030H	Marketing Science
MMI 1050H	Accounting and Negotiations
MMI 1060H	Finance
MMI 1070H	Economics of Business Strategy
MMI 1080H	Management of Technology
MMI 1090H	Technology Strategy and Policy
MMI 1100H	Group Project
POL 2307H	The Political Economy of Technology: from the Auto-Industrial to the Information Age

Degree of Master of Science

The Department of Health Policy, Management and Evaluation offers two programs leading to the Master of Science:

- 1 Clinical Epidemiology and Health Care Research
- 2 Health Administration

Clinical Epidemiology and Health Care Research

The M.Sc. degree program in Clinical Epidemiology and Health Care Research is undertaken by health professionals interested in research and academic careers in health care.

Two streams of training are available within the M.Sc. degree program in Clinical Epidemiology and Health Care Research—a non-thesis, course-only stream (ten half-courses including completion of at least one research practicum) and a thesis-based stream (six half-courses and a thesis).

Admission Requirements

Applicants normally require a B+ average or higher in the last two years of a four-year undergraduate degree in a health profession (e.g., M.D., B.Sc.N., B.Sc.O.T., B.Sc.P.T., D.D.M., M.Sc.N.) from a recognized university.

Program Requirements

Thesis M.Sc.

- 1 Completion of all degree requirements within five years.
- 2 Writing of a thesis under the supervision of a thesis committee (supervisor and at least one additional faculty member) and its defence before an examination committee appointed by

the Department of Health Policy, Management and Evaluation.

3 Completion of six half-courses; three required (HAD 5307H, HAD 5301H or equivalent, and one of HAD 5303H, HAD 5304H, HAD 5306H or HAD 5309H) and three optional.

Non-Thesis M.Sc.

1 Completion of all degree requirements within five years.

2 Completion of ten half-courses; four required (HAD 5307H, HAD 5301H or equivalent, HAD 6360H, and one of HAD 5303H, HAD 5304H or HAD 5309H), and six optional.

Courses of Instruction

- HAD 5301H Introduction to Clinical Epidemiology and Health Care Research/*D. Urbach, L. Sung*
- HAD 5302H Measurement in Clinical Research/*D. Beaton, Staff*
- HAD 5303H Controlled Clinical Trials/*M. Kapral, M. Zwarenstein*
- HAD 5304H Clinical Decision Making and Cost Effectiveness/*A. Bayoumi*
- HAD 5305H Evidence-Based Guidelines/*D. Feig, V. Palda*
- HAD 5306H Introduction to Health Care Research Methodology/*E. Lin, S. Alibhai*
- HAD 5307H Introduction to Applied Biostatistics/*A. Kiss, R. Saskin*
- HAD 5308H Systematic Review of Randomized Controlled Trials/*P. Shah, J. Beyene*
- HAD 5309H Non-Experimental Design for the Clinical Researcher/*D. Urbach*
- HAD 5310H Pragmatic Issues in Conduct of Controlled Trials/*D. Loblack*
- HAD 5312H Decision Modelling of Clinical Policy and Economic Evaluation/*M. Krahn*
- HAD 5313H Advanced Design and Analysis Issues in Clinical Trials/*B. Feldman*
- HAD 5730H Economic Evaluation Methods for Health Service Research/*A. Laporte*
- HAD 5760H Advanced Health Economics and Policy Analysis/*P. C. Coyte, A. Laporte*
- HAD 5763H Methodological Issues in the Description and Analysis of Health Care Performance/*G. Anderson*
- HAD 6360H Required Research Practicum in Clinical Epidemiology (Credit/No Credit)

HAD 6361H Optional Research Practicum in Clinical Epidemiology (Credit/No Credit)

HAD 7002H Reading Course: Applied Bayesian Methods/*G. Tomlinson*

JNH 5000H Measurement of Patients' Preferences in Health Care Decision Making/*H. Llewellyn-Thomas*

MSC1060H Biostatistics for Health Sciences/*P. Corey*

Health Administration

This M.Sc. degree program is undertaken by students interested in research and academic careers in health care research.

Admission Requirements

Applicants normally require an overall B+ average in the last two years of an appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university.

Program Requirements

1 Completion of all degree requirements within five years.

2 The writing of a thesis under the supervision of a thesis committee (supervisor and at least one additional faculty member) and its defence before an examination committee appointed by the Department of Health Policy, Management and Evaluation.

3 The completion of six half-courses; two of which must be research methodology courses and two of which must be in an area of specialization.

Degree of Doctor of Philosophy

The Ph.D. degree program is undertaken by students interested in research and academic careers in health care research. Current research areas include outcomes and evaluation, health policy, health services organization and management, eHealth and information management, and clinical epidemiology and health care research.

Admission Requirements

Applicants to the Ph.D. program are normally expected to have completed a M.A. or M.Sc. (with a thesis) and to provide satisfactory references pertaining to their academic and research abilities. Upon the recommendation of the appropriate Health Policy, Management and Evaluation committee, outstanding students with a non-thesis master's degree may be admitted to the Ph.D. program if they have appropriate background preparation and

research experience or publications which can be considered equivalent to a master's thesis.

Students with a non-thesis master's degree and little or no research experience may be admitted to the M.Sc. program and may petition to transfer into the Ph.D. program within 24 months of their first registration. Transfer is contingent upon successful completion of master's course work and preparation and defence of a Ph.D. thesis proposal.

Program Requirements

Full Time

- 1** Full time registration (fall, spring, summer sessions) for the first four years of the doctoral program.
- 2** Completion of all degree requirements within six years from first registration in the program. Thereafter, students may apply for a maximum of two one-year extensions.
- 3** Completion of a comprehensive course in the area of specialization.
- 4** Completion of 10 half-courses.
- 5** Writing of a Ph.D. thesis under the supervision of an approved thesis committee (supervisor plus two additional faculty members).
- 6** Oral defence of the thesis before an examination committee appointed by the School of Graduate Studies.

Flexible Time

With the approval of the graduate chair, some applicants may be admitted to a flexible-time Ph.D. program. This program will benefit mature students with career and/or familial obligations. The degree requirements for the flexible-time Ph.D. program are identical to those listed above for the full time Ph.D. program; however, students have up to eight years to complete the program. Students are required to register full time for the first four years of their program; thereafter, they may register part time.

Courses of Instruction

In addition to the courses listed under degree of Master of Science (Clinical Epidemiology and Health Care Research):

- HAD 5011H Canada's Health Care System (Doctoral Stream)/
A. P. M. Williams
- HAD 5311H° Comprehensive/Synthesis—
Clinical Epidemiology and
Health Care Research (Credit/
No Credit)/*G. Hawker*
- HAD 5726H Design and Evaluation in eHealth
Innovation and Information/
K. Leonard

- HAD 5727H Knowledge Transfer and
Exchange/*P. Goering*
- HAD 5728H Performance Measurement
in Health Care: Theory and
Application/*Staff*
- HAD 5729H Theoretical, Conceptual and
Methodological Issues in
Knowledge Translation/
A. MacIntosh-Murray
- HAD 5768H International Perspectives on
Health Services Management/
D. Zakus
- HAD 5771H Resource Allocation Ethics/
D. Martin
- HAD 5772H Intermediate Statistics for Health
Services Researchers/*Staff*
- HAD 5773H Introduction to Theories of
Organizational Behaviour and
Applications to the Health Care
Sector/*L. Lemieux-Charles*
- HAD 6760Y Introduction to Health Services
Research Theory and Methods/
J. Barnsley
- HAD 6761H Health Services Outcomes and
Evaluation Comprehensive
Course/*Staff*
- HAD 6762H Health Services Organization and
Management Comprehensive
Course/*L. Lemieux-Charles*
- HAD 6763H Health Policy Comprehensive
Course/*A. P. M. Williams,*
R. Deber
- HAD 6764H eHealth Innovation and Health
Information Management
Comprehensive Course/
K. Leonard
- MSC 1060H Biostatistics for Health Scientists/
P. Corey
- JNH 5001H Health Care Settings, Site and
Human Well Being/*P. C. Coyte,*
P. McKeever
- JNH 5003H Home and Community Care
Knowledge Translation/
P. Corey, P. Baranek

Cross-listed Courses

These courses are limited to certain program students in Health Policy, Management and Evaluation. Please check the Web site www.hpme.utoronto.ca.

- BME 1456H Changing Health Care
Technologies, People, and
Places/*G. Fernie*
- HSR 1000H Health Services Research
Practicum/*R. Cockerill*

HSR 1001H	Introduction to Qualitative Methods for Health Services and Policy Research/ <i>N. Jacobson</i>
HSR 1002H	Health Services and Policy Research Summer Institute/ <i>R. Cockerill</i>
JCV 3060H	Advanced Topics in Cardiovascular Sciences— Molecular Biology and Heart Signal Transduction/ <i>R. Tsushima</i>
JCV 3061H	Advanced Topics in Cardiovascular Sciences— Hormones/ <i>C. Wittnich</i>
JCV 3062H	Advanced Topics in Cardiovascular Sciences— Heart Function/ <i>C. Wittnich</i>
JCV 3063H	Advanced Topics in Cardiovascular Sciences— Vascular/ <i>S. Heximer,</i> <i>C. Wittnich</i>
JHM 1000H	Issue Analysis in Interdisciplinary, International Health Research/ <i>Y. Talbot,</i> <i>N. Byrne</i>
LAW465H	Conflicts of Interest in Medicine: Evidence, Public Policy, and the Law/ <i>S. Choudhry</i>
LAW404H	Health System Law and Policy/ <i>C. Flood</i>

Collaborative Programs

Students in the M.H.Sc., M.Sc., and Ph.D. programs in the Department of Health Policy, Management and Evaluation may also participate in a range of collaborative programs:

- 1** Aging, Palliative and Supportive Care Across the Life Course
- 2** Bioethics
- 3** Cardiovascular Sciences
- 4** Health Care, Technology and Place
- 5** Health Services and Policy Research
- 6** International Relations
- 7** Women's Health
- 8** Women's Studies

For more details see separate listings in the calendar.

Nature of Collaborative Program

The Collaborative Program in Health Services and Policy Research is part of the Ontario Training Centre in Health Services and Policy Research (OTC). The OTC is a consortium of six Ontario Universities seeking to improve graduate education for students who are interested in becoming health services and policy researchers. The consortium includes Lakehead, Laurentian, McMaster, and York Universities as well as the Universities of Ottawa and Toronto. Participating graduate units at the University of Toronto include Health Policy, Management and Evaluation; Nursing Science; Pharmaceutical Sciences; Public Health Sciences; Rehabilitation Science; and Social Work.

Graduates of the Collaborative Program must demonstrate knowledge of Canada's health care system, health services and policy research tools, and theories of population health, knowledge production and knowledge transfer by completing relevant courses required by the Collaborative Program as well

as by the home unit. Students must complete a dissertation under the supervision of a core faculty member of the Collaborative Program in the student's home department that addresses the theme of health services and policy research. In addition to the requirements for the degree program specified by the home graduate unit, students must:

- 1 complete a practicum; and
- 2 participate in one Summer Institute hosted by the OTC.

Application Procedures

Students who wish to enrol in the Collaborative Program must apply to and be admitted to both the Collaborative Program and a graduate degree program in one of the collaborating departments. Students follow a program of study acceptable to both the participating unit and the Collaborative Program. Masters and doctoral students are accepted under the School of Graduate Studies general regulations and the specific criteria of the participating unit. Admission to the Collaborative Program will be made by the Program's Admissions Committee comprising the Collaborative Program Director and a representative from each of the participating units. Please note that students who complete the Collaborative Program at the masters level are not eligible to participate at the Ph.D. level.

Masters Degree

Admission Requirements

Applicants to the Collaborative Program are required to demonstrate:

- 1 an overall B+ average in the last two years of an appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, and
- 2 an interest in health services and policy research outlined in an autobiographical letter including their reasons for becoming a health services or policy researcher.

Program Requirements

Students must complete the requirements of the Collaborative Program (completion of a practicum and participation in one Summer Institute) in addition to those requirements for the masters degree program specified by their home graduate unit. All students are required to write a thesis under the supervision of a core faculty member of the Collaborative Program. The thesis must address the theme of health services and policy research.

Doctoral Degree

Admission Requirements

Applicants to the Collaborative Program are required to:

- 1** demonstrate academic excellence in completed courses (B+ average in graduate courses), scholarships and academic awards received;
- 2** demonstrate aptitude for health services and policy research (letter of recommendation from a previous professor or thesis supervisor commenting on the student's academic abilities and likelihood for success as a health services researcher);
- 3** outline career plans (in an autobiographical letter including their reasons for becoming a health services researcher and their career plans); and
- 4** propose a plan of study in the Collaborative Program.

Program Requirements

Students must complete the requirements of the Collaborative Program (completion of a practicum and participation in one Summer Institute) in addition to those requirements for the doctoral degree program specified by their home graduate unit. All students are required to complete a dissertation under the supervision of a core faculty member of the Collaborative Program. The dissertation must address the theme of health services and policy research.

Courses of Instruction

1 Courses offered by the University of Toronto departments involved in the OTC are listed in the separate calendar entries of Health Policy, Management and Evaluation; Nursing Science; Pharmaceutical Sciences; Public Health Sciences; Rehabilitation Science; and Social Work.

2 Research and Policy Practicum - by working with a health services and policy research team, the student develops practical skills in completing a research and policy project and effectively communicating the results of that research to stakeholders.

HSR 1000H Research and Policy Practicum

HSR 1001H Introduction to Qualitative
Methods for Health Services
and Policy Research

3 Summer Institute - a five-day workshop held at one of the participating universities. All students must participate and are graded on a Credit/No Credit (CR/NCR) basis.

HSR 1002H HSR Summer Institute

Admission

In addition to the School of Graduate Studies online application form, applicants must submit an information form, three letters of recommendation, and a 500-word specific research proposal outlining a precise field and area of historical investigation. In addition, Ph.D. applicants must submit a writing sample of no more than 6,000 words; M.A. applicants must submit a writing sample of no more than 3,000 words. Complete application packages may be downloaded from the History Department's Web site. The closing date for applications to the M.A. and Ph.D. programs is January 15. Later applications will be considered only in exceptional circumstances.

Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction was not English must demonstrate facility in the English language through the successful completion of the Test of English as a Foreign Language (TOEFL). Applicants taking the paper-based TOEFL exam must achieve a minimum score of 600 and 5 on the TWE. Applicants taking the computer-based TOEFL exam must achieve a minimum score of 250 and 5 on the essay rating component. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 100/120 and 22/30 on the writing and speaking sections.

Degree Programs

The Department offers both the M.A. and Ph.D. degrees in history.

Applicants from other universities will have their academic records equated as far as is practicable with the required standards set out below.

Degree of Master of Arts

For admission to the M.A., students must hold a four-year B.A. degree from this university or a similar program elsewhere, must have attained at least a B+ standing, and must have successfully completed at least six full courses in history. Applicants without adequate history training may be required to complete an appropriate number of undergraduate history courses before being considered for admission. In rare cases, an applicant may be admitted to the M.A. program but will be required to do one or two additional courses.

Students usually complete the M.A. by course work and the HIS 2000Y paper. Some students may elect to complete the M.A. by course work and thesis. After consulting with the graduate coordinator, all M.A. students are required to take either HIS 1997H *The Practice of History*, or HIS 1201H *The Materials of Medieval History*. Those electing the thesis option will take the equivalent of three additional half-courses and present an M.A. thesis. Those selecting the course option will take the equivalent of four additional half-courses and the M.A. essay. Normally, up to one full-course equivalent may be taken outside the History Department with the approval of the Coordinator of Graduate Studies.

M.A. students must achieve at least an overall B average in their courses to maintain standing. They must also pass the required reading examination in a language other than English.

Full-time M.A. students in the course option are expected to complete all degree requirements within 12 months of entering the program. The thesis M.A. might take longer than the course M.A.; the thesis must be presented within five years of entering the program. It is possible to do the M.A. on a part-time basis within a maximum of five years.

Degree of Doctor of Philosophy

To be considered for admission to the Ph.D. program, applicants normally hold the M.A. degree in history, or its equivalent, and must satisfy the Department of their ability to do independent research at an advanced level. Applicants are expected to have achieved

grades averaging A- or better in their most recent degree. Exceptional students may be admitted directly to the Ph.D. program from the B.A.

Students entering the Ph.D. program with an M.A. will complete four half-courses and will be expected to maintain a B+ average throughout their course work. Students from the B.A. level will normally be expected to complete four additional half-courses for a total of eight in their program. One of these courses should be HIS 1997H *The Practice of History*. These students will be expected to maintain an A-average in their first four half-courses in order to continue in the program.

Beyond course work, there are four main requirements in the Ph.D. program: fulfillment of the residence requirement, successful completion of comprehensive examinations in three approved fields of history, fulfillment of language requirements that vary with the student's major area of study, and the writing, submission, and successful defence of a thesis. Although it is possible to complete these requirements within four years, in most cases it will take longer.

The History Department requires its Ph.D. students to be in residence until they have passed their field examinations but no longer than a period of two years. To fulfill this requirement a student must be in such geographical proximity as to be able to visit the campus regularly and participate fully in the University's activities associated with the program.

At the beginning of their programs, students, in consultation with the Coordinator of Graduate Studies, will decide upon their fields and be assigned advisors. Three fields are required: a major and two minors. The major should coincide with the subject area that the student has chosen for the thesis, and the two minors should be in different areas. The comprehensive field examinations consist of a written examination in each field and a common oral examination covering all three fields. Students are required to take their field examinations by the spring of their second year in the program, but they are strongly advised to take them as soon as possible after the completion of their course work. Examinations are held in January and April. Examinations cannot be postponed beyond the spring of the second year without permission of the Coordinator of Graduate Studies. The Department's graduate handbook, *Graduate Studies in History*, contains a list of the fields offered.

If not already so qualified, a student must qualify in one language other than English by the beginning of the second year and may

be asked to qualify in other program-related languages.

When all of the above requirements are completed, the candidate will proceed to write the Ph.D. thesis. The thesis must be a piece of original scholarship, approximately 350 pages or 90,000 words in length, exclusive of notes and bibliography. Thesis preparation is guided by a committee consisting of the major supervisor and two other faculty members. The thesis must be presented within six years of enrolment in the Ph.D. program.

Collaborative Programs

The Department of History participates in the following collaborative programs:

- 1 Asia-Pacific Studies
- 2 Book History and Print Culture
- 3 Editing Medieval Texts
- 4 Ethnic and Pluralism Studies
- 5 International Relations
- 6 Jewish Studies
- 7 South Asian Studies
- 8 Women's Studies

Each of these programs has its own entry in this calendar; interested students should refer to these entries.

Courses of Instruction

Not all courses are offered every year. Please consult the Department's list of current course offerings.

HIS 1004H	History and Biopolitics/ <i>M. Murphy</i>
HIS 1006H	Historiography "From Below": Comparative and Critical Perspectives/ <i>M. Kasturi,</i> <i>D. Williams</i>
HIS 1009H	Colonial Governmentality: Governing Economy and Culture/ <i>R. Birla</i>
HIS 1010H	History by Numbers: The Uses and Misuses of Quantitative Evidence in History/ <i>R. Johnson</i>
HIS 1015H	Colonial Encounters and Postcolonial Theory/ <i>S. Hawkins</i>
HIS 1016H	Readings in the History of Gender and Sexuality/ <i>M. Murphy</i>
HIS 1020H	Cultural Theory/Cultural History/ <i>P. Rutherford</i>
HIS 1026H	Modernity and Its Others: History and Postcolonial (joint graduate/ undergraduate)/ <i>R. Birla</i>
HIS 1030H	Oral History: Theory, Methods, Practice/ <i>R. Halpern</i>
HIS 1035H	Historiography and Film Studies (joint graduate/undergraduate)/ <i>C. Keil</i>

HIS 1036H	Early Cinema/ <i>C. Keil</i>	HIS 1230H	The Sexes in the Western World, 1450-1650/ <i>J. Abray</i>
HIS 1101H	Race and Gender in the Northern Colonies of North America/ <i>J. Noel</i>	HIS 1231H	Topics in French History/ <i>Staff</i>
HIS 1104H	Natives and Empires: Colonial History of the Americas, 1492-1800/ <i>A. Greer, K. Mills</i>	HIS 1232H	European Colonialism, 1870-1970: A Comparative History/ <i>E. Jennings</i>
HIS 1105H	Colonial North America, 1600-1783/ <i>A. Greer</i>	HIS 1233H	Colonial Urbanism in the Mediterranean World, 1800-1950/ <i>J. Hanssen</i>
HIS 1106H	Topics in Canadian Social History/ <i>I. Radforth</i>	HIS 1234H	Readings in Early Modern French History/ <i>P. Cohen</i>
HIS 1107H	Religion, Culture and Society in Canada (joint graduate/undergraduate)/ <i>M. McGowan</i>	HIS 1235H	History in/of the Mediterranean: From Braudel to Post-Colonialism/ <i>E. N. Rothman</i>
HIS 1109H	Readings in Canadian History/ <i>S. G. Penfold, A. Silver</i>	HIS 1245H	Women in Early Modern Europe/ <i>B. Todd</i>
HIS 1111H	Topics in North American Environmental History (joint graduate/undergraduate)/ <i>L. MacDowell</i>	HIS 1267H	Nationalism/ <i>D. Penslar</i>
HIS 1112H	Canada in Comparative Contexts, Gender, Labour, Migration/ <i>F. Iacovetta</i>	HIS 1268H	The Holocaust and World War II/ <i>D. L. Bergen, R. Wittmann</i>
HIS 1113H	Politics and Society in North American History/ <i>D. Bender, S. Penfold</i>	HIS 1269H	The Social History of Medicine in the Nineteenth and Twentieth Centuries (joint graduate/undergraduate)/ <i>E. Shorter</i>
HIS 1142Y	Canadian Foreign Relations, 1940-2003 (joint graduate/undergraduate)/ <i>R. Bothwell</i>	HIS 1270H	History of Psychiatry and Psychiatric Illness (joint graduate/undergraduate)/ <i>E. Shorter</i>
HIS 1164H	Irish Migration to Canada: Sources and Methods/ <i>M. McGowan</i>	HIS 1271H	Modern Political Trials/ <i>M. Marrus</i>
HIS 1201H	The Materials of Medieval History (Credit/No Credit)/ <i>J. Goering</i>	HIS 1272H	Topics in Twentieth-Century European History/ <i>J. Jenkins</i>
HIS 1207H	Pastoralia: The Medieval History of Pastoral Care/ <i>J. Goering</i>	HIS 1275H	Imperial Germany, 1871-1918/ <i>J. Retallack</i>
HIS 1208H	Writings of Robert Grosseteste/ <i>J. Goering</i>	HIS 1276H	The Third Reich and the Holocaust/ <i>R. Wittmann</i>
HIS 1209H	The Anglo-Saxons/ <i>A. Murray</i>	HIS 1277H	Topics in Jewish History/ <i>D. Penslar</i>
HIS 1210H	Gregory of Tours and the Sixth Century/ <i>A. C. Murray</i>	HIS 1278H	Topics in Twentieth-Century German History/ <i>J. Jenkins</i>
HIS 1213H	Medieval Institutes of Perfection (joint graduate/undergraduate)/ <i>I. Cochelin</i>	HIS 1279H	World War II in East Central Europe (joint graduate/undergraduate)/ <i>P. Wróbel</i>
HIS 1214H	The Merovingians/ <i>M. Murray</i>	HIS 1280Y	History and Soviet Cinema (joint graduate/undergraduate)/ <i>T. Lahusen</i>
HIS 1215H	Social Change in Medieval England, 1154-1279/ <i>M. Gervers</i>	HIS 1281H	History of Real Socialism/ <i>T. Lahusen</i>
HIS 1218H	The Mediaeval Church (joint graduate/undergraduate)/ <i>G. Silano</i>	HIS 1282H	Totalitarian Culture/ <i>T. Lahusen</i>
HIS 1220H	Mediaeval Canon Law (joint graduate/undergraduate)/ <i>G. Silano</i>	HIS 1283H	Crusades, Conversion and Colonialization in the Medieval Baltic (joint graduate/undergraduate)/ <i>J. Kivimae</i>
HIS 1221H	Topics in Early Modern European Social History/ <i>N. Terpstra</i>	HIS 1284H	The Baltic World/ <i>J. Kivimae</i>
HIS 1222H	Ritual in Renaissance and Early Modern Europe/ <i>N. Terpstra</i>	HIS 1285Y	The Ukrainian National Revival (joint graduate/undergraduate)/ <i>P. Magocsi</i>
HIS 1223H	Humanism and the Renaissance/ <i>K. Bartlett</i>	HIS 1287H	Polish Jews Since the Partitions of Poland (joint graduate/undergraduate)/ <i>P. Wróbel</i>

HIS 1288H	The Age of Experiments (joint graduate/undergraduate)/ <i>P. Wróbel</i>	HIS 1538H	Research in U.S. History/ <i>Staff</i>
HIS 1289H	The Cold War Through Its Archives/ <i>R. E. Johnson</i>	HIS 1540H	Cultures of American Capitalism/ <i>D. Bender</i>
HIS 1290H	Topics in Imperial Russian History/ <i>A. Smith</i>	HIS 1543H	Topics in Material Culture/ <i>A. Hood</i>
HIS 1291H	Topics in Russian and Soviet Social History (joint graduate/undergraduate)/ <i>R. Johnson</i>	HIS 1545H	Race, Segregation and Protest: South Africa and the United States/ <i>R. Halpern</i>
HIS 1292H	The Russian Revolution (joint graduate/undergraduate)/ <i>R. Johnson</i>	HIS 1550H	Atlantic Labour Migrations/ <i>R. Halpern</i>
HIS 1293Y	Kievan Rus' (joint graduate/undergraduate)/ <i>P. Magocsi</i>	HIS 1555H	Gender and Slavery in the Atlantic World, Seventeenth to Nineteenth Century/ <i>M. Newton</i>
HIS 1294H	In the Soviet Archives: Text and History (joint graduate/undergraduate)/ <i>L. Viola</i>	HIS 1630H	Appeasement/ <i>S. Aster</i>
HIS 1295H	Soviet History Seminar/ <i>L. Viola</i>	HIS 1632H	International Relations Field Seminar/ <i>Staff</i>
HIS 1296H	Stalinism and After: Beyond Cold War History/ <i>L. Viola</i>	HIS 1637H	Culture and the Cold War (joint graduate/undergraduate)/ <i>W. Wark</i>
HIS 1297H	Problems of National Survival in Eastern Europe Since 1848 (joint graduate/undergraduate)/ <i>A. Rossos</i>	HIS 1663H	Gender in East and Southeast Asia/ <i>N. T. Tran</i>
HIS 1299H	Topics in Russian Intellectual History/ <i>W. Dowler</i>	HIS 1665H	Gender and History in Colonial South Asia/ <i>M. Kasturi</i>
HIS 1411H	Theory and Practice in Early Modern British History/ <i>J. Mori</i>	HIS 1677H	Empire and Nation in Modern East Asia/ <i>T. Lam</i>
HIS 1435H	Studies in Victorian Society/ <i>L. Loeb</i>	HIS 1678H	War and Memory in Twentieth-Century East Asia/ <i>T. Lam</i>
HIS 1440H	Irish Nationalism in Canada and the United States (joint graduate/undergraduate)/ <i>D. Wilson</i>	HIS 1701H	Religion, Society and Empire in the Colonial Spanish Americas, 1492-1800/ <i>K. Mills</i>
HIS 1519H	Thinking of Diversity: Historical Perspectives on American and Canadian Pluralisms/ <i>R. A. Kazal</i>	HIS 1704H	Latin America in the Age of Independence/ <i>P. Blanchard</i>
HIS 1522H	Topics in Twentieth-Century U.S. History: Transnational Commodity Culture/ <i>E. Brown</i>	HIS 1705H	Africa: Writing, Colonialism and Memory/ <i>S. Hawkins</i>
HIS 1524H	Topics in the History of Black America/ <i>M. Wayne</i>	HIS 1706H	Decolonizing Research Methodologies/ <i>S. Hawkins, N. Musisi</i>
HIS 1530H	Readings in Twentieth Century American Foreign Policy/ <i>C. Chin</i>	HIS 1707H	Topics in African History/ <i>S. Rockel</i>
HIS 1531H	American Political History Since 1877/ <i>R. Kazal</i>	HIS 1708H	Labour in the Age of Imperialism/ <i>S. Rockel</i>
HIS 1532H	American Foreign Policy in the Cold War/ <i>R. Pruessen</i>	HIS 1709H	Conversion and Christianities in the Early Modern Spanish World (joint graduate/undergraduate)/ <i>K. Mills</i>
HIS 1533H	Gender and International Relations (joint graduate/undergraduate)/ <i>C. Chin</i>	HIS 1710H	Comparative Slavery in the Caribbean and Latin America/ <i>P. Blanchard, M. Newton</i>
HIS 1535H	Readings in International Relations History/ <i>W. Walker</i>	HIS 1997H	The Practice of History (Credit/No Credit)/ <i>Staff</i>
		HIS 1998H,Y	Reading Course
		HIS 1999H,Y	Reading Course
		HIS 2000Y°	Directed Research
		JBP 2230H	Topics in International Politics/ <i>B. Fischer, F. McKenzie</i>
		JHP 1289Y	Twentieth Century Ukraine (joint graduate/undergraduate)/ <i>P. Magocsi</i>

°Courses which may continue over a program. The course is graded when completed.

-
- JHP 1631H Intelligence and International Relations/*W. Wark*
 JHP 2231H The History and Philosophy of International Relations Thought/*Staff*
 JHP 2301Y Linguistic and Cultural Minorities in Europe (joint graduate/undergraduate)/*P. Magocsi*

Courses in Other Departments Taught by History Faculty

- COL 5027H Memory, Trauma, and History/*T. Lahusen*
 COL 5044H A Journey from Petersburg to Los Angeles/*T. Lahusen*

Telephone: (416) 978-5397

Fax: (416) 978-3003

E-mail: ihpst.info@utoronto.ca

Web: www.hps.utoronto.ca/

The Institute for the History and Philosophy of Science and Technology (IHPST) conducts research, offers programs for advanced studies, and serves as a focus for University-wide interest in its field. Courses are open to all graduate students and are suitable complements for specialists in science or the humanities. Students participate in the IHPST colloquia which are open to the University community.

Courses are conducted in seminar style and involve the writing of essays and the presentation of reports.

Application for Admission

The Institute admits students to two degree programs: Master of Arts and Doctor of Philosophy. The minimum admission requirements are given below, under their appropriate headings. Admission to these programs is highly selective and competitive. Applicants who barely meet the minimum conditions should not expect admission without exceptionally favourable supporting considerations. Acceptance is based on a combination of grades, references, academic and professional accomplishments, and areas of interest.

All the forms required for application, including the standard application form, can be downloaded from the Institute's Web site. The Web site also contains detailed instructions for completing applications.

Unless otherwise indicated, the following supporting documents must accompany all applications:

- 1** One official transcript of the applicant's academic record from each university attended, complete to the time of application.
- 2** A statement of approximately 300-500 words, indicating the applicant's areas of interest in history and/or philosophy of science and technology at the graduate level.
- 3** Two letters of reference, preferably from university-level course instructors who have taught the applicant within the last four years.

4 Applicants whose primary language is not English and who are not graduates of a university whose language of instruction is English must submit results of the Test of English as a Foreign Language (TOEFL) and (Test of Written English (TWE). Applicants taking the paper-based TOEFL exam must achieve a minimum score of 580 and 5 on the TWE. Applicants taking the computer-based TOEFL exam must achieve a minimum score of 237 and 5 on the essay rating component. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 93/120 and 22/30 on the writing and speaking sections.

5 Applicants are encouraged to submit one sample of their written work in English or French in a university-level course (philosophy or history if possible). For example, a term paper not exceeding 20 pages from a third or fourth year course would be an excellent choice. This is not a requirement, but merely a recommendation.

Application forms and all supporting documentation must be in the Institute's hands by February 1. After this deadline, applications will be considered only if space is available.

Applicants who wish to take one or more of the courses offered by the Institute as non-degree students should apply for admission as Special Students. The application procedures are the same as for those of the M.A. program, but the deadline for applications is May 1.

Degree of Master of Arts

Admission Requirements

Students approved by the Institute are admitted to the M.A. degree program under the general regulations of the School of Graduate Studies.

Admission to the M.A. program requires a four-year University of Toronto bachelor's degree, or its equivalent from a recognized university with an average grade of at least B+ in the final two years of undergraduate work. While the majority of accepted students exceed this standard, the very broad scope of the field and the variety of fruitful approaches to it also imply that many different backgrounds are appropriate. Accordingly, grades are only one criterion by which applicants are judged.

Program Requirements

Course Requirements

M.A. degree program requirements consist of a minimum of seven half-course equivalents. Among these, each student must take either:

1 Three History of Science Fundamentals half-courses (HPS 5000 series) *and* two Philosophy

of Science half-courses (History of Science Stream)

or

2 Three Philosophy of Science half-courses *and* two History of Science Fundamentals half-courses (HPS 5000 series) (Philosophy of Science Stream)

The balance of the M.A. curriculum is arranged in consultation with the student's faculty instructors and is subject to the overall guidance of the Graduate Coordinator, who is also responsible for approving all student curricula. Students are expected to make choices consistent with a commitment to either a History of Science Stream or a Philosophy of Science Stream.

Language Requirement

Students in the M.A. program must demonstrate satisfactory reading knowledge of at least one foreign language relevant to their area of interest (normally French or German). Language instruction courses are not counted among the seven half-courses required for the M.A. degree. The language requirement must be satisfied before the M.A. degree will be granted. Visit the Institute's Web site for further details.

Progress in the Program

It is possible for a full-time student to complete all requirements for the M.A. degree in the Fall and Winter sessions. Part-time enrolment in the M.A. program is permitted. For part-time students, the requirements for the degree must be completed within five academic years.

Degree of Doctor of Philosophy

Admission Requirements

Students approved by the Institute are admitted to the Ph.D. degree program under the general regulations of the School of Graduate Studies. Admission to the Ph.D. program requires either (a) a four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, with an average grade of at least a B+ in the applicant's overall program and of at least an A- in the applicant's final two years of study, or (b) a University of Toronto master's degree in history and philosophy of science, or its equivalent from a recognized university, with an average grade of at least an A- in the applicant's program and with no individual grade less than B+. While the majority of accepted students exceed this standard, the very broad scope of the field and the variety of fruitful approaches to it also imply that many different backgrounds are appropriate. Accordingly,

grades are only one criterion by which applicants are judged.

Program Requirements

Course Requirements

A student admitted to the Ph.D. program shall pursue a program of full-time study and research approved by the Institute. Part-time study is not available at the Ph.D. level. The minimum requirements for the degree are as follows:

During the first two years of study, students admitted on the basis of a four-year bachelor's degree are required to complete 13 half-course equivalents which must include:

1 HPS 2000Y: An extended research paper, equivalent to a one-year course

and one of

2a Three History of Science Fundamentals half-courses (HPS 5000 series) *and* two Philosophy of Science half-courses; at least three of these five half-courses must be completed in year one (History of Science Stream)

or

2b Three Philosophy of Science half-courses *and* two History of Science Fundamentals (HPS 5000 series) half-courses; at least three of these five half-courses must be completed in year one (Philosophy of Science Stream)

A student admitted on the basis of a master's degree in History and Philosophy of Science must take a *minimum* of six half-courses in history and philosophy of science during the first year in the Ph.D. program. A student whose M.A. degree does not exhibit sufficient breadth – in particular, does not approximate the Institute's M.A. curriculum in breadth and in its mix of History of Science and Philosophy of Science – will be required to take additional courses. Students should note that the six half-course standard is a minimum standard. Many students should expect to take at least one additional half-course. The Graduate Coordinator will consult with any student admitted with a non-Institute M.A. to assess the student's curriculum and to make clear the specific course requirements to be applied.

Breadth Requirement

All Ph.D.-stream students must include at least *one* half-course equivalent from *each* of the following historical periods:

1 Pre-renaissance (Classical Antiquity to 1400 A.D.)

2 Renaissance (1400 AD) to end of the eighteenth century

3 Beginning of the nineteenth century to the present

This breadth requirement may be met with courses in either the History of Science Stream or the Philosophy of Science Stream.

The balance of the student's curriculum is to be arranged in consultation with the student's faculty instructors and is subject to the overall guidance of the Graduate Coordinator who is also responsible for approving all student curricula. Students are expected to make choices consistent with a commitment to either a History of Science Stream or a Philosophy of Science Stream.

Language Requirement

Students in the Ph.D. stream must demonstrate satisfactory reading knowledge of at least two foreign languages relevant to their area of interest (normally French and German). Language instruction courses are not counted among the 13 half-courses required for the Ph.D. Normally, demonstration of competence in at least one of the required languages should be completed during the student's first year of graduate work, whether at the Institute or elsewhere, while the second language requirement must be met before the student begins individual research, usually in the third year post-bachelor.

Students who have difficulty meeting this standard—in particular students who may not have completed a language requirement in an M.A. program—must consult with the Graduate Coordinator and make arrangements for appropriate and timely language instruction.

Students are cautioned that the Institute takes seriously the necessity for both French and German in order to pursue research in history of philosophy of science and will make exceptions only in the rarest of cases. In particular, a student's native language cannot be offered in satisfaction of the Institute's language requirements. Moreover, additional languages, e.g., Latin or Greek, may be required if, in the opinion of the Institute, such languages are necessary for independent research. Visit the Institute's Web site for further details.

Supervision Requirement

Early in the second post-bachelor academic year, and no later than October 31, the proposal for an extended research paper (required for HPS 2000Y) must be submitted to the Graduate Coordinator. The research paper itself is to be submitted by the end of April in the same academic year. The proposal must be signed by at least one Institute faculty member (this includes Affiliates—see Web site) as supervisor. In order to meet this requirement, it is necessary that the student have a faculty advisor who is willing to supervise the student during

the conduct of the research for this paper. Students are responsible for insuring that they have an appropriate supervisor. All supervision arrangements are to be reviewed and approved by the Graduate Coordinator who will assist in the search for a supervisor, if necessary. Proper supervision is a prerequisite for continuation in the program.

Progress in the Program

All required courses, including HPS 2000Y, should be completed by the end of the student's second post-bachelor year. In general, all students should maintain a cumulative average of at least A- with no individual grade less than B+. In addition, all students should receive at least an A- on the HPS 2000Y research paper. Students falling below these standards may, at the option of the faculty, be recommended for termination from the program.

Specialist Examination

All students must pass a qualifying examination in areas related to the field of expected research. This exam will be held by the middle of the third year post-bachelor. This examination is conducted by the student's Supervisory Committee, normally three faculty members. To meet this requirement, it is necessary that the student have a committee whose members are approved by the Graduate Coordinator. The two-language requirement must be met before the qualifying examination is held.

Thesis Proposal

Before work on the thesis can begin, a thesis proposal must be approved by the student's thesis Supervisory Committee and the Graduate Coordinator. The proposal should be submitted shortly after the student takes the qualifying examination, and in any case not later than the beginning of the fourth post-bachelor year.

Collaborative Programs

The Institute participates in the Book History and Print Culture Collaborative Program. For details, consult the separate entry in this calendar.

Courses of Instruction

Not all courses are offered every year. Consult the Institute regarding course offerings.

History and Philosophy of Science and Technology

Address:

Department of Human Development and
 Applied Psychology
 The Ontario Institute for Studies in Education
 of the University of Toronto (OISE/UT)
 252 Bloor Street West
 Toronto, Ontario M5S 1V6
 Canada

Telephone: (416) 923-6641 ext. 2324

Fax: (416) 926-4713

Web: hdap.oise.utoronto.ca

The Department of Human Development and Applied Psychology currently offers three graduate programs:

- 1 Child Study and Education (M.A.)
- 2 Developmental Psychology and Education (M.A., M.Ed., Ph.D., Ed.D.)
- 3 School and Clinical Child Psychology (M.A., Ph.D.)

Consult the *OISE/UT Bulletin* for further details of all graduate programs, including admission requirements, program requirements, and descriptions of programs as well as for information about financial support for students.

Students may begin the M.Ed. program in Developmental Psychology and Education in September, January, or July, but all other programs in the Department commence in September.

Note: The department strongly discourages student requests to transfer between programs.

Child Study and Education

The M.A. in Child Study and Education program is offered at the Institute of Child Study (ICS), a centre of professional teacher training and research in childhood and education, which includes a Nursery through Grade 6 Laboratory School. Eligible graduates are recommended to the Ontario College of Teachers for an Ontario Teachers Certificate of Qualification, which qualifies the holder to teach in the primary and junior divisions of Ontario schools.

The philosophy of the program is based on the belief that successful teaching requires an understanding of how children's capacities, concerns, and behaviour change with age; how individual differences reflect developmental changes; and how social and physical environments influence children's development.

The program introduces students to educational and developmental theory and research relevant to educational settings, showing how this research can inform classroom practice. Students also learn how to objectively study children, using both practical assessment and formal methods of inquiry. These areas of knowledge combined with knowledge of effective teaching methods and learning environments result in educational practices that build on children's current levels of development.

Admission Requirements

Admission to the two-year M.A. program requires undergraduate studies equivalent to a University of Toronto four-year bachelor's degree with a mid-B or better in the final year. Applicants are also expected to have experience working with groups of children, preferably in responsible positions. Normally an interview is required prior to admission.

Program Requirements

The program consists of the equivalent of 16 half-courses, including practicum placements and an internship, and requires two years of full-time study. In the first year, students are required to take HDP 2200Y *Child Study: Observation, Evaluation and Reporting*, HDP 2201Y *Childhood Education Seminar and Practicum*, and HDP 2210Y *Introduction to Curriculum*, as well as two elective half-courses. Registration in the second year of the program is contingent on successful completion of all year one work. During the academic session of the second year, students are required to take HDP 2211H *Theory and Curriculum I: Language and Literacy*, HDP 2212H *Theory and Curriculum II: Mathematics*, and HDP 2230H *Designing Educational Programs*, plus one elective half-course. During the internship ses-

sion of the second year, students are required to take HDP 2221Y *Advanced Teaching Practicum*, HDP 2202H *Childhood Education Seminar II: Advanced Teaching*, and one elective half-course.

In both years of the program, electives may be chosen from among master's level courses in the Department of Human Development and Applied Psychology and, in some cases, other departments. Elective courses that are especially recommended to students are listed in the Human Development and Applied Psychology Program Guidelines.

During their first year, students will complete four six-week half-day placements in kindergarten/early childhood, Grade 1-3, and Grade 4-6. A fifth placement is optional for those who would like more experience. In their second year of study, students will complete a 3.5 month full-time internship in an elementary classroom.

Students wishing to qualify for Part 1 of the three-part qualification in Special Education complete at least one six-week placement in a special education setting and take course HDP 2280H *Introduction to Special Education and Adaptive Instruction*, HDP 2292H *Assessment for Instruction*, or another special education course approved by their advisor.

Students planning further graduate study in the foreseeable future are advised to undertake a Qualifying Research Paper (QRP) normally under the supervision of a qualified ICS faculty member.

Developmental Psychology and Education

The Developmental Psychology and Education program offers studies leading to the M.A., M.Ed., Ph.D., and Ed.D. degrees. Students have an opportunity to construct an overall perspective on developmental psychology and human development and their implications for practice with children in educational and other applied settings.

Students take foundation courses in human development and research methodology. Elective courses cover a range of areas including cognitive, social and emotional development; cognition and instruction (language, literacy, and mathematics); special education and adaptive instruction; developmental neuroscience; advanced research methodology and evaluation; and early childhood policy and programs, including child care. The M.A. and Ph.D. programs are designed for students wishing to pursue an academic or research-based career. The M.Ed. and Ed.D. programs are designed for the reflective teacher or other practitioner in education or related fields.

Admission Requirements

Admission to the M.A. program normally requires preparation equivalent to a University of Toronto four-year bachelor's degree. Although most applicants will have a degree in Psychology, applicants with a four-year bachelor's degree in Cognitive Science, Computer Science, Linguistics, or a helping profession such as Occupational Therapy, Speech-Language Pathology, Physiotherapy, Nursing, Social Work or other area relevant to their specific program of study are also eligible to apply for admission. The usual admission standard is equivalency to a University of Toronto A- or better.

The Developmental Psychology and Education program offers both a full-time and a flexible-time Ph.D. program option. Applicants must declare the option for which they are interested in applying.

Admission to the Ph.D. program normally requires preparation equivalent to a relevant University of Toronto four-year bachelor's degree and a master's degree in Developmental Psychology and Education, Developmental Psychology, Cognitive Psychology, Applied Developmental Psychology or Child Study with standing equivalent to a University of Toronto A- or better in the master's degree. Applicants with master's degrees in other areas such as Adult Education, Anthropology, Computer Science, Curriculum, Philosophy, or a profession such as Speech-Language Pathology, Nursing, Social Work, Physiotherapy, or Occupational Therapy may be eligible to apply for admission, but may have to complete additional courses to fulfil master's level requirements equivalent to the Master of Arts in Developmental Psychology and Education. Students who have not completed a master's thesis will be required to submit a Qualifying Research Paper prior to final admission to the program.

Applicants to the flexible-time Ph.D. option are accepted under the same admission requirements as applicants to the full-time Ph.D. option. However, in addition, applicants to the flexible-time Ph.D. must indicate in their statement of intent that they are currently in a career related to the proposed field of study, have a desire to continue with their current career, and have the capacity to secure blocks of time to enable concentrated study (e.g., through the employer's leave policy or study incentive system).

Admission to the M.Ed. program normally requires preparation equivalent to a University of Toronto four-year bachelor's degree with standing equivalent to a University of Toronto mid-B or better. Applicants normally possess a

teaching certificate and have one year of relevant professional experience.

Admission to the Ed.D. program normally requires a University of Toronto master's degree in Developmental Psychology and Education, Educational Psychology, Special Education or the equivalent. The usual admission standard is equivalency to a University of Toronto A- or better in the master's degree. Applicants with a master's degree in other specializations in Adult Education, Applied Psychology, or Curriculum are also eligible to apply for admission, but may have to complete additional courses to fulfil master's level requirements. Students who have not done a master's thesis will be required to submit a Qualifying Research Paper prior to final admission to the program.

Program Requirements

M.A./Ph.D. Programs

The M.A. program, comprising six half-courses and a thesis, is normally undertaken on a full-time basis and completed in one year. Since an apprenticeship approach is favoured, students are expected to become closely involved in the research of their faculty advisor/supervisor. Courses should be chosen in consultation with the advisor. Students are required to take HDP 1209H *Research Methods and Thesis Preparation in Human Development and Applied Psychology*, HDP 1288H *Intermediate Statistics and Research Design*, and HDP 2252H *Individual Reading and Research in Human Development and Applied Psychology: Master's Level*. Students must take two half-courses from the Required Menu appearing on the department Web site at http://hdap.oise.utoronto.ca/pages/dpe_ma.html, and in the Human Development and Applied Psychology Program Guidelines. The sixth half-course is an elective.

Full-time Ph.D. students must complete their degree within six years. Flexible-time Ph.D. students must complete their degree within eight years. Degree requirements for both programs are the same. The Ph.D. program comprises six half-courses, a comprehensive examination, and a thesis. Students are required to take HDP 3200H *Research Proseminar in Human Development and Applied Psychology*, one half-course in statistics and research methods from an approved menu, two half-courses from the DPE doctoral program electives list, and two additional half-courses chosen in consultation with the student's faculty advisor. A listing of approved statistics and research methods courses as well as

DPE doctoral elective courses is available on the department Web site at http://hdap.oise.utoronto.ca/pages/dpe_phd.html, and in the Human Development and Applied Psychology Program Guidelines.

M.Ed./Ed.D. Programs

The M.Ed. program, comprising ten half-courses and a comprehensive examination, may be undertaken on a full-time or part-time basis. The length of time required to complete the program will vary depending on full-time or part-time status. In the first year of the program, students are required to take HDP 1200H *Foundations of Human Development and Education* as well as HDP 2293 *Interpretation of Educational Research*. Four additional half-courses must be selected from the Department Electives list, available on the departmental Web site or in the Human Development and Applied Psychology Program Guidelines. The remaining four elective half-courses may be taken from within or outside the department. Elective courses must be chosen in consultation with the student's faculty advisor. Students are asked to meet with their faculty advisor in the first session of their program.

The Ed.D. program comprises eight half-courses, an internship, and a thesis. While students may begin the program on a part-time basis, a minimum of one year of full-time study is required. Often students build a leave of absence or sabbatical from their outside employment into their Ed.D. schedule; it is recommended that students use such time to complete the thesis requirement, not course work. Students are required to take HDP 3200H *Research Proseminar in Human Development and Applied Psychology* as well as a half-course in Statistics and Research Methods from an approved menu. Students must take at least three additional half-courses from the DPE doctoral program electives list. A listing of approved statistics and research methods courses as well as DPE doctoral program electives is available on the department's Web site at http://hdap.oise.utoronto.ca/pages/dpe_phd.html and in the Human Development and Applied Psychology Program Guidelines. The remaining courses should be chosen in consultation with the student's faculty advisor.

School and Clinical Child Psychology

The School and Clinical Child Psychology program is an American Psychological Association (APA) accredited program. It provides theoretical, research, and professional training in preparation for psychological work with children in schools, clinics, private practice, and

research settings. The program is designed to provide training in assessment, therapy, and other psychosocial and instructional interventions, professional consultation and prevention. The degrees are also intended to meet the academic requirements for registration as a psychological associate (M.A.) or psychologist (Ph.D.). Opportunities are available for research and clinical work with infants, young children, adolescents, and families. The program follows the scientist-practitioner model for psychological training recommended by the APA. Emphasis on designing, conducting, and interpreting scientific research parallels emphasis on exemplary clinical practice.

Admission Requirements

Admission to the M.A. program normally requires a University of Toronto four-year bachelor's degree in Psychology, or its equivalent, defined as six full courses in psychology, including one half-course in child development and one full course or equivalent in research methods/statistics (at least one half-course of which must be at the third or fourth year level) and at least three full courses at the third or fourth year levels. The usual admission standard is equivalency to a University of Toronto A- or better. Most applicants will have evidence of relevant professional experience and research experience. Applicants are requested to submit, in addition to two academic references, a letter of recommendation from an applied setting.

Admission to the Ph.D. program normally requires a University of Toronto four-year bachelor's degree in Psychology or its equivalent and an OISE/UT M.A. in SCCP or its equivalent. The usual admission standard is equivalency to a University of Toronto A- or better in the master's degree. A limited number of outstanding applicants holding equivalent bachelor's and master's degrees in Psychology from elsewhere may be considered. However, if the master's program was not equivalent to the OISE/UT M.A. in School and Clinical Child Psychology, the student will be required to take additional courses to receive equivalent training.

Program Requirements

The M.A. program, comprising 10 half-courses (including a practicum course) and a thesis, is undertaken on a full-time basis and normally takes two years to complete. Students are required to successfully complete HDP 1215H *Psychological Assessment of School-Aged Children*, HDP 1216H *Psychoeducational Assessment*, HDP 1218H *Seminar and Practi-*

cum in Assessment, HDP 1219H *Ethical Issues in Applied Psychology*, HDP 1220H *Introduction to School and Clinical Child Psychology*, HDP 1236H *Developmental Psychopathology*, HDP 1285H *Psychology and Education of Children with Learning Disabilities*, and HDP 1288H *Intermediate Statistics and Research Design*, one half-course in cognitive/affective bases of behaviour from an approved course listing, and one elective half-course. A listing of approved cognitive/affective bases of behaviour courses is available on the department Web site at http://hdap.oise.utoronto.ca/pages/sccp_ma.html, and in the Human Development and Applied Psychology Program Guidelines. The practicum portion of HDP 1218H consists of 250 hours (one day a week from September to June) and is normally taken in a school setting. In addition, students will be required to take HDP 1201H *Childhood and Adolescent Development* and HDP 1287H *Introduction to Applied Statistics*, if equivalent courses have not been taken previously.

The Ph.D. program, comprising nine half-courses (including a doctoral practicum course and an internship course), a comprehensive examination, and a doctoral dissertation, is undertaken on a full-time basis and normally takes four to five years to complete. Students are required to successfully complete HDP 1222H *Approaches to Psychotherapy Across the Lifespan*, HDP 3200H *Research Proseminar in Human Development and Applied Psychology* (normally taken in the first year of the program), HDP 3241H *Seminar and Practicum in Assessment and Intervention with Children* (normally taken in the second year of the program), HDP 3242Y *Internship in School and Clinical Child Psychology* as well as one course from each of the following menus: Psychosocial Interventions, Instructional Interventions, Advanced Assessment, Social Bases of Behaviour, and Biological Bases of Behaviour. A listing of courses in these menus is available on the department Web site at http://hdap.oise.utoronto.ca/pages/sccp_phd.html and in the Human Development and Applied Psychology Program Guidelines. The practicum portion of HDP 3241H consists of 500 hours (two days a week from September to June) and is normally taken in a clinical setting. The internship (HDP 3242Y) consists of a 1600 hour placement, normally taken on a full-time basis over the course of a year near the end of the student's program. Students must have successfully completed all course work, passed the comprehensive examination, and have their dissertation completed or well underway, prior to commencing their internship. In addition,

students will be required to take HDP 1201H *Childhood and Adolescent Development*, HDP 1287 *Introduction to Applied Statistics*, and HDP 3204H *Contemporary History and Systems in Human Development and Applied Psychology*, if equivalent courses have not been taken previously.

Students must achieve a minimum of A- in at least one of HDP 1215H *Psychological Assessment of School-Aged Children* and HDP 1216H *Psychoeducational Assessment* and must pass HDP 1218H *Seminar and Practicum in Assessment* and HDP 3241H *Seminar and Practicum in Assessment and Intervention with Children* in order to remain in good standing and be permitted to continue in the program. Failure to meet these criteria will normally result in a recommendation to the School of Graduate Studies to terminate the student's registration in the program.

Collaborative Programs

The department participates in the following collaborative programs:

- 1 Developmental Science
- 2 Neuroscience

Address:

Department of Immunology
 Room 5271, Medical Sciences Building
 University of Toronto
 Toronto, Ontario M5S 1A8
 Canada

Telephone: (416) 978-6382

Fax: (416) 978-1938

E-mail: graduate.immunology@utoronto.ca

Web: www.immunology.utoronto.ca

The Department of Immunology provides a common forum for investigators in many areas of the University and an interdisciplinary research experience in immunology. Members and students in the department are located at the Medical Sciences Building, at the Ontario Cancer Institute, and at the Research Institutes of Mt. Sinai Hospital, Toronto General Hospital, Toronto Western Hospital, The Hospital for Sick Children, and Sunnybrook Hospital. The department offers an opportunity for study towards an M.Sc. or a Ph.D. degree in a wide range of immunological disciplines. These disciplines include molecular mechanisms of lymphocyte development and selection, T-cell and B-cell receptors, cell interactions, growth factor receptors, cytokine networks, antigen processing and presentation, signal transduction in lymphocytes, V(D)J recombination, anergy, apoptosis, transgenic and knock-out models, immuno-targeting and vaccine design, autoimmunity, AIDS, diabetes, and transplantation.

For more detailed information, see the graduate handbook available from the department or consult the Immunology home page on the Web site listed above.

Degree of Master of Science

Applicants with a four-year B.Sc., or its equivalent, will be considered. Applicants are normally expected to have at least a B+ average with a strong background in molecular and cellular biology. Applicants from outside North America are required to provide GRE (general) scores with their application. Applicants lacking

adequate training in biological or natural sciences may be advised to do extra course work necessary for their research.

To qualify for an M.Sc. degree, students must complete IMM 1016H, IMM 1019H^o and IMM 2021H^o, submit a satisfactory thesis embodying their research, and pass an oral examination based on their research.

Degree of Doctor of Philosophy

There are three routes to the Ph.D. degree:

- 1 Applicants may be accepted for direct entry into the Ph.D. with a B.Sc. degree, or equivalent, with at least an A- average in their final year.
- 2 Applicants may be accepted first into the M.Sc. program from a bachelor's program with at least a B+ average and, conditional on excellent performance in the first year, may reclassify into the Ph.D. program.
- 3 Applicants already holding an M.Sc. with at least a B+ average may be accepted directly into the Ph.D. program.

Students are required to be on campus and participating full-time until the program requirements of research and course work have been completed. The program emphasizes research. In addition, the program requirements include completion of IMM 1016H, IMM 1017H+, IMM 1100H^o, IMM 2100H^o, and one additional half-course equivalent from either Immunology or outside the department in a subject relevant to the thesis topic. All students are examined in the second year of their program on a submitted research proposal and on relevant course material. To qualify for a Ph.D. degree, the candidate must submit a thesis and defend it at an oral examination conducted by the School of Graduate Studies.

Collaborative Programs

The Department of Immunology participates in the following collaborative programs:

1 Developmental Biology

2 Women's Health

For details about each collaborative program, consult the separate entries in this calendar.

Courses of Instruction

Not all courses are offered every year. Please consult the department for details.

IMM 1016H	Recent Advances in Basic Immunology: Part I (Fall)
IMM 1017H+	Recent Advances in Basic Immunology: Part II (Spring)
IMM 1019H ^o	Master's Seminar Course (Credit/No Credit)
IMM 1020H	Recent Advances in Clinical Immunology (Spring)
IMM 1100H ^o	Doctoral Seminar Course (Credit/No Credit)
IMM 1429H	Developmental Immunology (Fall)
IMM 1430H	Advanced Immunobiology (Spring)
IMM 2021H ^o	Special Topics in Immunology I (Credit/No Credit)
IMM 2100H ^o	Special Topics in Immunology II (Credit/No Credit)
JB1 1428H	Molecular Immunology (Fall)

^o Courses which may continue over a program. The course is graded when completed.

+ Extended course. For academic reasons, course work is extended into session following academic session in which course is offered.

DEGREE OF MASTER OF INDUSTRIAL RELATIONS AND HUMAN RESOURCES

The purpose of the graduate program leading to the degree of Master of Industrial Relations and Human Resources (M.I.R.H.R.) is to enable students to undertake specialized study which focuses on the employment relationship and examines it from the point of view of a number of disciplines such as economics, law, psychology, and sociology. This focus also includes the nature and relationships of the institutions involved in the employment relationship. The intention is to provide students with the background framework and current knowledge of the field that will serve as a basis for professional careers in labour-management relations, human resources, or policy analysis.

The M.I.R.H.R. degree may be taken on a full-time or part-time basis. Two program options are available for those who meet the requirements for admission. Students with a four-year bachelor's degree from a recognized university will normally complete the program in two years (16 non-consecutive months) of full-time study. There is also an advanced standing option that will enable students to complete the degree in one year (12 consecutive months) of full time study. This option is available to those students with a four-year bachelor's degree, or its equivalent, in employment relations; industrial relations; labour studies; or administration or commerce with a major in industrial relations or human resources. For part-time students, the amount of time to complete the degree requirements will vary depending upon the program option in which the student is registered and the number of courses taken each year.

Admission Requirements

- 1 Applicants to the *two-year M.I.R.H.R. program* will require an appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university. A minimum grade average of B+ (77%) in each of the final two years of the degree is required.
- 2 Applicants to the *12-month M.I.R.H.R. advanced standing option* will require an appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university. The degree major or specialization

must be in one of the following areas: employment relations; industrial relations; labour studies; or administration or commerce with a major in industrial relations or human resources. A minimum grade average of B+ (77%) in each of the final two years of the degree is required.

3 Students are strongly advised to take introductory economics and statistics courses prior to application. Performance in these courses, as well as performance in other industrial relations and human resources related courses, will be taken into consideration by the admissions committee.

4 Applicants whose degrees are not from Canadian universities are required to submit results from the Graduate Record Examination (GRE). The Graduate Management Admission Test (GMAT) scores will be accepted as a substitute. Although there is no minimum score requirement, performance on either the GRE or GMAT will be taken into consideration by the admissions committee. Scores must be received no later than April 15. Test results more than five years old are normally not considered.

5 Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must write the Test of English as a Foreign Language (TOEFL). Applicants taking the paper-based TOEFL exam must achieve a minimum score of 600 and 5 on the TWE. Applicants taking the computer-based TOEFL exam must achieve a minimum score of 250 and 5 on the essay rating component. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 100/120 and 22/30 on the writing and speaking sections.

6 People now working in the fields of industrial relations or human resources who are considering a return to university will have their experience taken into consideration by the admissions committee.

Note: Due to space limitations, applicants meeting the minimum admission requirements are not guaranteed admission. All applicants will be evaluated on their individual merits and the Centre for Industrial Relations and Human Resources reserves the right to select qualified applicants to the program. All admission decisions are final.

Program Requirements

Each student's program of courses must be approved by the Coordinator of Graduate Studies. If chosen courses appear to overlap to a large degree, approval may be denied.

Courses marked (PR) require prerequisites; further information may be obtained from the Centre.

Two-Year M.I.R.H.R. Program

The first year of the two-year program is spent acquiring a foundation in industrial relations and human resources and includes courses in economics, law, quantitative methods, organizational behaviour, and sociology.

First Year: Foundation Courses

Students must take 10 half-courses, or the equivalent, of which 8 are required courses, as follows:

IRE	1002H	Applied Statistics in Industrial Relations (Exclusion: CRI 2020H <i>Applied Statistics in Criminology</i>)
IRE	1010H	Economic Environment of Industrial Relations and Human Resources
IRE	1126H	Labour Market Policy (PR) (This course may be postponed until second year if the student wishes.)
IRE	1362H	Organizational Behaviour (Exclusion: MGT 1362H Managing People in Organizations)
IRE	1609H	Strategic Human Resources Management (Exclusion: MGT 2609H Strategic Human Resources Management)
IRE	1610H	Industrial Relations (Exclusion: MGT 2610H Industrial Relations)
IRE	1611H	Sociology of Industrial Relations

Plus one of the following law courses:

IRE	1263Y	Labour Law (also Law 263H)
IRE	1270H	Law of Labour Relations
IRE	1338H	Law in the Workplace

Courses are chosen from the list of elective courses below to fill the requisite 10 half-courses, or their equivalent, in the first year of the program.

Students admitted into the two-year M.I.R.H.R. program may elect to take IRE 4000H, a non-credit course designed to assist students to gain summer employment in a position that will provide them work experience relevant to their field of study.

Students in the M.I.R.H.R. program are required to achieve a mid-B average in the first year of the program (or in the first ten half-courses) in order to continue or to pass into the second year. Failure in any course (that is,

(PR) Courses with prerequisites

a grade of less than B-) will require a review of the student's program by the department. All requirements for the degree must be completed within six years from the date of first enrolment in the M.I.R.H.R. program. Students must have a mid-B average overall to be recommended for the degree.

Second Year: Core Courses

Students must take eight half-courses, or the equivalent, to complete the second year. This includes core courses in Industrial Relations and Human Resources:

- IRE 2001H Foundations and Current Issues in Industrial Relations and Human Resources (PR)
- IRE 2002Y Research Methods in Industrial Relations and Human Resources (PR)

Five additional half-courses must be chosen from the list of elective courses.

12-Month M.I.R.H.R. Program with Advanced Standing Option

Students admitted into the 12-month M.I.R.H.R. advanced standing option will have completed many of the foundation courses in industrial relations and human resources. Students will take both foundation and core courses simultaneously in the three sessions of study (September – August). During this time, students will also take elective courses to increase their breadth of knowledge or to focus on their areas of interest. Degree requirements will be met by completing the following courses:

- IRE 1010H Economic Environment of Industrial Relations and Human Resources
- IRE 1126H Labour Market Policy (PR)
- IRE 1611H Sociology of Industrial Relations
- IRE 2001H Foundations and Current Issues in Industrial Relations and Human Resources (PR)
- IRE 2002Y Research Methods in Industrial Relations and Human Resources (PR)

Plus one of the following law courses:

- IRE 1263Y Labour Law (also Law 263H)
- IRE 1270H Law of Labour Relations
- IRE 1338H Law in the Workplace

Seven additional half-courses must be chosen from the list of elective courses below.

Students in the M.I.R.H.R. program are required to achieve a mid-B average in the first two sessions of the program (or in the first 10 half-courses) in order to continue into the third

session. Failure in any course (that is, a grade of less than B-) will require a review of the student's program by the department.

All degree requirements for students in the advanced standing option must be completed within five years from the date of first enrolment in the M.I.R.H.R. program. Students must have a mid-B average overall to be recommended for the degree.

DEGREE OF DOCTOR OF PHILOSOPHY

The Ph.D. in Industrial Relations and Human Resources is a research-oriented program of study designed to provide students with both a thorough background in industrial relations and human resources and the research skills to enable them to proceed to careers in academic institutions or in research positions with governments, large organizations, or consulting firms. It is available only on a full-time basis and normally has a two-year residency requirement during which time the student is required to participate fully in the department's activities associated with the program.

Admission Requirements

1 Students will be admitted under the general regulations of the School of Graduate Studies and will require a Master of Industrial Relations and Human Resources (M.I.R.H.R.) degree from the University of Toronto, or its equivalent. Other students who meet the admission requirements may be required to enrol in a preparatory year consisting of courses from the M.I.R.H.R. program. Students with a bachelor's degree in industrial relations, or in a related field of study, may be considered for admission to the Ph.D. if they have exceptional academic standing and have demonstrated quantitative skills and research ability.

2 At least a B+ standing, or equivalent, will be required in the previous master's program. Academic performance in courses relevant to the applicant's area of interest, as well as performance in statistics and research methods courses, will be taken into consideration by the admissions committee.

3 Applicants are required to submit a copy of their results from the Graduate Record Examination (GRE) before February 1. The Graduate Management Admission Test (GMAT) will be accepted as a substitute. Although there is no minimum score requirement, performance on either the GRE or GMAT will be taken into consideration by the admissions committee. Test results more than five years old are normally not considered.

4 Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must write the Test of English as a Foreign Language (TOEFL). Applicants taking the paper-based TOEFL exam must achieve a minimum score of 600 and 5 on the TWE. Applicants taking the computer-based TOEFL exam must achieve a minimum score of 250 and 5 on the essay rating component. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 100/120 and 22/30 on both the writing and speaking sections.

5 Applicants may be required to appear for a personal interview and/or submit copies of recent academic work.

Program Requirements

Requirements that are normally met in the first two years consist of a core course in Industrial Relations and Human Resources, elective courses, and courses in research methods and statistics.

The core requirement in Industrial Relations and Human Resources is met by completing one half-course:

IRE 3004H Special Topics in Employment and Industrial Relations

The research and statistics requirements are met by completing:

IRE 3002Y Research Seminar I

IRE 3003H Research Seminar II (PR)

MGT 3062H Methods and Research in Organizational Behaviour and Industrial Relations

and two half-year courses in statistics, chosen, with the approval of the Ph.D. Coordinator, from selected offerings in other departments and faculties.

In cases where a student's prior academic background may have covered any of the courses listed above, substitutions may be permitted with the approval of the Ph.D. Coordinator.

Two half-year elective courses are chosen from the courses set out below or from selected offerings in other departments and faculties.

Not all courses are offered every year. Please consult the Centre for Industrial Relations and Human Resources timetable which lists available courses in each session.

Under regulations of the Centre, a comprehensive examination is normally written by January 31 of the student's second year in the program.

(PR) Courses with prerequisites

Intensive work on the dissertation will also begin in the second year of the Ph.D. program. The thesis topic and name of supervisor must be submitted no later than March 31.

Students who are in their third and fourth years of study must enrol in the following courses:

IRE 3005H Workshop in Industrial Relations I (Credit/No Credit)

IRE 3006H Workshop in Industrial Relations II (Credit/No Credit)

Students will have achieved candidacy upon successful completion of the program requirements above at the end of the third year of study (or fourth year for direct entry Ph.D. students). Proficiency in French and/or other languages will be required when the student's supervisor deems it necessary for dissertation research or when the Centre deems it necessary for the student's field.

All requirements for the degree must be completed within six years from the date of first enrolment in the Ph.D. program.

COLLABORATIVE PROGRAMS

The Centre for Industrial Relations and Human Resources participates in the Ethnic and Pluralism Studies Collaborative Program. Consult the separate entry in this calendar for details.

ELECTIVE COURSES

The Centre offers key required and elective courses in Industrial Relations and Human Resources. Students take the balance of their courses from those available in other departments and faculties. This range of options enables students to examine the industrial relations field from the perspective of a variety of disciplines.

Due to the multidisciplinary nature of industrial relations, M.I.R.H.R. students are not permitted to take more than a total of three elective courses in any one unit outside the Centre for Industrial Relations and Human Resources without the permission of the Graduate Coordinator. Since outside units normally give preference to their own students, M.I.R.H.R. students can enrol in these elective courses only when space is available.

Students must meet the standards and requirements of the other departments and faculties in those courses taken outside the Centre. Since these courses are changed from time to time, students must consult the Centre for current information.

Some courses are offered only in alternate years, and the availability of elective courses may be subject to change due to such factors as faculty research leaves and departmental resources. Some courses may be available in the day or in the evening.

Courses marked (PR) require prerequisites; additional information may be obtained from the Centre.

Further details concerning specific courses and brief course descriptions are available on the Centre's Web site.

 University of Toronto
 Toronto, Ontario M5S 3G6
 Canada

Telephone: (416) 978-3234

Fax: (416) 978-5762

E-mail: inquire@fis.utoronto.ca

Web: www.fis.utoronto.ca

The Faculty of Information Studies (FIS) combines:

- 1 strengths in the stewardship and curation of cultural heritage (libraries, archives, and museums) with
- 2 leadership in the future of information practice, as society is transformed by the rise of digital technologies.

It pursues these goals from a progressive, inclusive, multicultural vantage points as benefits Canada's role in the global economy. This blend of commitments will position the Faculty as the premier information school with respect to issues of digital heritage, cultural curation, information policy, and associate information intensive practice.

The Faculty of Information Studies offers the following degree programs:

- 1 Master of Information Studies (M.I.St.)
- 2 Combined Juris Doctor and Master of Information Studies (J.D./M.I.St.)
- 3 Graduate Diploma of Advanced Study in Information Studies
- 4 Master of Museum Studies (M.M.St.)
- 5 Doctor of Philosophy (Ph.D.)

FIS also offers the McLuhan Program in Cultural and Technology.

The Faculty's application deadlines may differ from the general deadlines given in this calendar. Program details are available on the Faculty of Information Studies Web site at www.fis.utoronto.ca.

COLLABORATIVE PROGRAMS

FIS participates in the following collaborative programs:

- 1 Addiction Studies
- 2 Aging, Palliative and Supportive Care Across the Life Course
- 3 Book History and Print Culture
- 4 Environmental Studies
- 5 Knowledge Media Design
- 6 Women's Health
- 7 Women's Studies

Collaborative programs provide an opportunity for FIS students to pursue a specialized subject interest as part of their degree program. The SGS calendar includes a separate entry for each collaborative program. Please see the relevant entry for collaborative program requirements.

DEGREE OF MASTER OF INFORMATION STUDIES

The Faculty offers a program of two academic years leading to the Master of Information Studies degree. It is available on either a full-time or a part-time basis. M.I.St. courses are grouped into three areas of focus: library and information science, archival studies, and information systems.

Admission Requirements

Students are admitted under the general regulations. Application deadlines are available on the Faculty of Information Studies Web site. Applicants to the M.I.St. program must have a four-year bachelor's degree with at least a B average (3.0 GPA) from a university recognized by the University of Toronto. An academic level of B+ (3.3 GPA) or higher in the final year is generally held by successful applicants.

Applicants wishing to focus on information systems must also have completed the equivalent of two approved full-year courses in computer science and one approved full-year course in mathematics.

The bachelor's degree must normally contain at least 75% academic credits, that is, courses that are not professional, practical, technical, or vocational. Courses such as stu-

dio art, drama or music performance, theology, education or undergraduate courses in library science are not normally considered to be academic in content for admission purposes.

Applicants who meet current admission requirements and who hold a B.L.S. degree from the University of Toronto, or its equivalent from an approved university, may be admitted to the M.I.St. program with advanced standing. Such students may be required to take additional courses if they lack certain requisite instruction.

Applicants who have satisfactory standing in an undergraduate program and who have successfully completed information studies graduate courses in programs equivalent to the University of Toronto M.I.St. program may also apply for admission with advanced standing. Each application will be evaluated individually. At least eight half-courses towards the M.I.St. degree must be taken at the University of Toronto.

Note: Due to space limitations, applicants holding the minimum admission requirements are not guaranteed admission. The Faculty reserves the right to select the qualified applicants it will admit to the program. All decisions are final.

Facility in the English Language

All incoming graduate students must have a good command of English. All applicants educated outside Canada whose primary language is not English must demonstrate facility in the English language. This requirement is a condition of admission and must be met before an offer of admission is made. Admission decisions will not be made by FIS until test results are received.

The requirement may be satisfied using one of the following tests:

- 1 Test of English as a Foreign Language (TOEFL)

Applicants taking the paper-based TOEFL exam must achieve a minimum score of 600 with 5.5 on the Test of Written English (TWE). Applicants taking the computer-based TOEFL exam must achieve a minimum score of 250 with 5.5 on the essay rating component. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 100/120 with 24/30 on the speaking section and 27/30 on the writing section.

- 2 Michigan English Language Assessment Battery (MELAB)

Minimum required score is 95.

- 3 International English Language Testing System (IELTS)

Minimum required score is 8.0.

4 English Language Diagnosis and Assessment (ELDA)/Certificate of Proficiency in English (COPE)
Minimum required score is 6 with at least 3 in the writing portion.

Program Requirements

Computer Literacy

The Faculty expects students to be competent in their use of information technologies.

Course Option

The M.I.St. program consists of 16 half-courses or the equivalent. All students must take three core courses, four required courses in an area of focus, and four electives at the 2000-level. The remaining five courses may be chosen at the student's discretion.

Thesis Option

The thesis option allows students to gain experience in developing and executing a research project from beginning to end. Students gain familiarity with the research process and hone their research skills. The thesis is equivalent to four elective half-courses. Faculty approval is required. Students must obtain at least an A- in FIS 1240H *Research Methods*. This option is designed for students who have a clearly defined topic, can find a supervisor, and can meet tight deadlines in order to graduate within the usual time frame envisioned for the M.I.St.

Time Limit for Completion

All requirements for the M.I.St. degree must be completed satisfactorily within six years from first enrolment in the program. Total time from original registration, including lapsed time, is counted as the time allowed to complete the requirements for the degree.

In exceptional circumstances, a student who has failed to complete all the requirements for the degree within the appropriate period may be considered for a deadline extension, following the procedures established by the School of Graduate Studies.

COMBINED JURIS DOCTOR/MASTER OF INFORMATION STUDIES DEGREE

The J.D./M.I.St. combined program allows a student to complete two degree programs within a reduced time frame of four years. It is offered jointly by the Faculty of Law and the Faculty of Information Studies at the University of Toronto. The program is for students who

wish to combine graduate training in information studies with a degree in law.

At the completion of the four-year integrated program, the successful student is awarded both the Juris Doctor and the Master of Information Studies degrees, which, if taken separately, would require five years of study.

Admission Requirements

Applicants to the J.D./M.I.St. program must be admitted to both the Faculty of Law and the Faculty of Information Studies. As such, applicants must satisfy the admission requirements of both faculties independently, and all applicants must complete the Law School Admission Test (LSAT) and all admission requirements of the Faculty of Information Studies. A separate application to each Faculty must also be submitted. Please obtain application information from each Faculty.

Students who have completed the first year of either the Juris Doctor or the Master of Information Studies program may apply for admission to the combined J.D./M.I.St. program by meeting the normal application and admission requirements of the other Faculty and notifying their Faculty Registrar.

NON-DEGREE PROGRAMS (SPECIAL STUDENT STATUS)

Special Student status is normally intended for fully qualified graduates who wish to update their knowledge. Programs for Special Students are administered under the general regulations. Details are available on the Faculty of Information Studies Web site. Courses in the Ph.D. program are not open to Special Students.

DIPLOMA PROGRAM

The Graduate Diploma of Advanced Study in Information Studies is a post-master's diploma. Applicants must have a University of Toronto M.I.St., M.L.S., or M.I.S. degree or equivalent. The Graduate Diploma requires 24 credit hours (i.e., eight half-courses). The graduate Diploma program, which may be taken on a full-time or part-time basis, will be tailored to the individual's needs and interests with courses selected in consultation with their advisor.

Complete details are available on the FIS Web site at www.fis.utoronto.ca.

COURSES OF INSTRUCTION – M.I.ST.

Not all courses are offered every year. Consult the Faculty of Information Studies Web site for the annual course offerings. Course descriptions and details of prerequisites, co-requisites, and permissions are posted on the Information Studies Web site. Inquiries concerning the selection of courses to be offered in any given session should be directed to the Faculty of Information Studies.

M.I.St. Core Courses

Core courses must be taken by all M.I.St. students.

FIS 1210H	Information and Its Social Contexts
FIS 1230H	Management of Information Organizations
FIS 1240H	Research Methods

M.I.St. Required Courses

Required courses are grouped to provide demonstrated expertise in one of three areas of focus.

Library and Information Science

FIS 1310H	Information Resources and Services
FIS 1311H	Information Technology Applications
FIS 1320H	Introduction to Bibliographic Control
FIS 1325H	Online Information Retrieval

Archival Studies

FIS 1311H	Information Technology Applications
FIS 1330H	Archives Concepts and Issues
FIS 1331H	Archival Arrangement and Description
FIS 1332H	Archives Programs and Services

Information Systems

FIS 1340H	Introduction to Information Systems
FIS 1341H	Analyzing Information Systems
FIS 1342H	Designing Information Systems
FIS 1343H	Introduction to Database Management and Design

M.I.St. Elective Courses

FIS 2010H	Reading Course
FIS 2011H	Reading Course
FIS 2101H	Information Innovations Design Studio I
FIS 2120H	Conservation and Preservation of Recorded Information
FIS 2121H	Specialized Archives

FIS 2122H	The Public Library in a Diverse Community
FIS 2125H	Information and Culture in a Global Context
FIS 2127H	Collection Development, Evaluation, and Management
FIS 2131H	The Literature of the Humanities and Social Sciences
FIS 2132H	The Literature of Science and Technology
FIS 2133H	Legal Literature and Librarianship
FIS 2134H	Business Information Resources
FIS 2135H	Health Sciences Information Resources
FIS 2136H	Government Information and Publications
FIS 2137H	International Organizations: Their Documents and Publications
FIS 2139H	Young People: Collection Development
FIS 2140H	Young People: Current and Emerging Information Practices
FIS 2142H	Theories of Classification and Knowledge Organization
FIS 2144H	Subject Approach to Information
FIS 2145H	Creation and Organization of Bibliographic Records
FIS 2149H	Administrative Decision Making in Information Organizations
FIS 2150H	Advanced Management of Information Organizations
FIS 2151H	Human Resources Management in Libraries
FIS 2153H	Technical Services: Organization and Administration
FIS 2154H	Reference Services: Organization and Administration
FIS 2158H	Management of Corporate and Other Special Information Centres
FIS 2159H	Analytical and Historical Bibliography I
FIS 2160H	Analytical and Historical Bibliography II
FIS 2161H	History of Books and Printing
FIS 2162H	Rare Books and Manuscripts
FIS 2163H	Research Collections in Canadiana
FIS 2165H	Social Issues in Information and Communication Technologies
FIS 2166H	Telecommunications for Information Systems
FIS 2168H	Information Retrieval Systems
FIS 2169H	User-Centred Information Systems Development
FIS 2171H	Major Subject Heading and Classification Systems
FIS 2172H	Reader's Advisory: Reference Work and Resources

FIS 2173H	Information Professional Practicum
FIS 2174H	History of Records and Records-Keepering
FIS 2175H	Managing Organizational Records
FIS 2176H	Information Management in Organizations—Models and Platforms
FIS 2177H	Architecting Information, Systems, and Organizations
FIS 2178H	Designing Electronic Descriptive Tools
FIS 2179H	Interacting with Information Systems
FIS 2180H	Archives: Access, Advocacy, and Outreach
FIS 2181H	Information Policy
FIS 2182H	Information Visualization
FIS 2183H	Knowledge Management and Systems
FIS 2184H	Appraisal for Records Retention and Archives Acquisition
FIS 2185H	Database Techniques for Managing Structured Documents
FIS 2186H	Metadata Schemas and Applications
FIS 2300	Special Topics in Information Studies

DEGREE OF MASTER OF MUSEUM STUDIES

The Museum Studies program provides students with a combination of academic and practical education in preparation for future involvement in a museum or related cultural agency. The program examines the theoretical body of knowledge of museology as a necessary context for professional practice and includes an internship at an appropriate museum or related cultural organization. The academic area of concentration is museum studies; however, students may also take courses in museum-related disciplines such as art, anthropology, education, history, information studies, history and philosophy of science and technology, or management through their selection of elective courses.

Faculty in the program are from a range of disciplines within the University; some are professional members of the museum community.

Admission Requirements

The Museum Studies program offers the professional degree of Master of Museum Studies (M.M.St.). Admission to the M.M.St.

program requires a four-year B.A. or B.Sc. with an overall average grade of at least B+, or equivalent from a recognized university. Applicants must satisfy the Museum Studies program that they are capable of independent research in museum studies at an advanced level. Demonstrated previous experience in museums or related cultural organizations will also be considered. Admission to this program is competitive.

Applicants can download the forms required for application from the School of Graduate Studies Web site www.sgs.utoronto.ca. The Museum Studies Web site www.utoronto.ca/museum provides the program codes required to complete Form D of the application. The Museum Studies Web site and the School of Graduate Studies Web site both contain important information and instructions for completing applications. Applicants must submit the following supporting documents with their applications:

- 1 *One official transcript* of the applicant's academic record from each university attended, complete to the time of application.
- 2 *A letter of intent* (maximum 500 words), indicating areas of interest and experience in museum studies, heritage agencies, or comparable institutions.
- 3 *A résumé.*
- 4 *Three letters of reference*, written on institutional or work-related letterhead. (Museum Studies does not provide a standard template for letters of reference). Appropriate referees include university professors (preferred), museum professionals, or others relevant to the field of museology.

5 *Other relevant information* considered by the applicant to strengthen his or her application.

The closing date for applications to the M.M.St. program, by which time applicants must have submitted all their supporting documentation as well as their completed application, is *January 30*.

Applicants accepted by the Museum Studies program are admitted as students for this degree under the General Regulations of the School of Graduate Studies.

Program Requirements

The minimum requirement for the M.M.St. degree is seven full-course equivalents (FCE) also known as credits, including 1.5 credits total for internal and external electives of which at least 0.5 credit must be internal (Museum Studies) elective courses. In order to maintain good academic standing and to continue in the M.M.St. program, a student must:

1 maintain a B+ average overall;
 2 complete at least three full-course equivalents, including
 MSL 1000H,
 MSL 1100H or MSL 1300H,
 MSL 1150H,
 MSL 1200H, and
 MSL1350H,
 by the end of the program, with an average grade of at least B+;
 3 complete MSL 5000Y during the first year;
 4 complete MSL 3000Y during the summer session between the first and second year;
 5 complete MSL 4000Y during the second year of the program.

The program of study for a full-time student begins in September and normally extends over 20 consecutive months.

Language Requirement

Before the end of their program, students whose primary language is English will be required to demonstrate a reading knowledge of a second language (preferably French) by means of a written exam and achieve a minimum grade of 70%.

Courses of Instruction – M.M.St.

Not all courses are offered every year. Please consult the Museum Studies Web site for course availability. The minimum requirement for the M.M.St. degree is seven full-course equivalents (credits).

M.M.St. Required Courses (5.5 credits)

MSL 1000H	Museums and Public History
MSL 1100H	Museology and Theory
or	
MSL 1300H	Contemporary Theories of Art and Culture
MSL 1150H	Collection Management
MSL 1200H	Fundamentals in Museum Planning and Management
MSL 1350H	Museums and their Publics
MSL 3000Y	Internship
MSL 4000Y	Exhibition Project
MSL 5000Y	Research Methods Seminar

M.M.St. Elective Courses (1.5 credits total for internal and external electives)

Internal (Museum Studies) Elective Courses (at least 0.5 credit)

MSL 2000H	Curatorial Practice (With the approval of the Director, students with prior museum experience may substitute MSL 2000H <i>Curatorial Practice</i> for MSL 1000H <i>Museums and Public History</i> .)
MSL 2100H	Museum Environment
MSL 2200H	The History of Museums in Canada
MSL 2225H	Architecture and Museums
MSL 2250H	Topics on Museums and Society in Canada
MSL 2325H	Museums and New Media Practice
MSL 2350H	Museum Planning and Management: Projects, Fundraising and Human Resources
MSL 5050H	Special Studies

External Elective Courses

Courses relevant to the Museum Studies program and student interests are available within the listings of other graduate units as found in this calendar. Please consult the Director for advice.

DEGREE OF DOCTOR OF PHILOSOPHY

Doctoral study in the field of information studies is concerned with both theoretical and applied scholarship. The discipline has its own area of human experience to analyze, its own body of descriptive and factual data to gather, and its own conceptual schemes to formulate and test. The objective of the Ph.D. program is to prepare graduates to assume leadership roles in information and knowledge-based environments. The program is designed to provide opportunities for advanced scholarly research in the theoretical bases of information studies and in the application of such knowledge to professional practice in various functions (e.g., research, systems analysis and design, administration) in private and public institutions (e.g., higher education, government, libraries, archives, corporations).

The goals are:

- 1 to produce in Canada highly qualified graduates for careers in research and teaching;
- 2 to contribute to the development of theory in the field of information studies and to the body of knowledge on which theory and practice are

based, both through original and scholarly dissertations and faculty research;

3 to stimulate a scholarly interest in research within the information community in Ontario and throughout Canada.

Admission Requirements

Admission to the Ph.D. program requires an average of at least B+ in a four-year University of Toronto bachelor's degree program, or its equivalent, and an average of at least B+ in a University of Toronto master's degree program, or its equivalent. Equivalency is normally determined by the number of courses and/or credits taken. Applicants holding an M.L.S. or other master's degree earned in 2 or 3 semesters, or by completing 10 to 15 half-courses, will normally be required to take additional courses in the M.I.St. program.

The major subject for doctoral study proposed by the applicant must be supported by relevant courses taken at the master's level, including appropriate courses in research methods and statistics; an applicant may be required to take make-up courses to obtain this support.

Admission to the Ph.D. program is limited to graduates of high intellectual ability who have an interest in research. Evaluation of applicants will be based on academic records and three academic letters of reference. A personal interview may be requested. Applicants whose first language is not English should consult the English Language Facility section of the Faculty's calendar.

Admission procedures are described in the General Regulations section of this calendar. Doctoral students are admitted in September.

Meeting the minimum requirements of FIS and of SGS does not guarantee admission.

Program Requirements

Since Ph.D. students have different backgrounds and areas of interest, programs are developed on an individual basis. The focus of each program enables the student to achieve satisfactory standards of competence in major and minor areas of study in order to carry out the research and writing of the thesis. The program of study developed by the student in conjunction with the faculty advisor must be approved by the FIS Committee on Standing and by SGS.

In the first phase, students are required to complete:

1 a major subject, FIS 3004Y *Advanced Topics in Information Studies*,

2 a minor subject,

3 FIS 3005Y *Advanced Seminar in Research Methodologies*,

4 a Determination of Research Readiness (written and oral),

5 a thesis,

6 a final oral examination.

Students are expected to participate in the Colloquium Series of the Faculty and in other research events. Other courses appropriate for the student's research may also be required.

The second phase of a student's program is concerned with the choice and development of the thesis topic and research for the thesis.

Time Limit for Completion

Full-time Program

The Ph.D. program is designed to be completed within four years of first enrolment in the program. All requirements must be completed within six years from first enrolment. Ph.D. students must be regularly registered in SGS during each year of the program.

Flexible-time Program

The flexible-time Ph.D. program is intended for practising professionals whose employment is related to their intended field of research interest. The flexible-time Ph.D. differs from the full-time Ph.D. only in design and delivery, not in requirements. Students must ensure that they have adequate time on campus to attend classes and to fulfil the academic requirements for an advanced research degree. Students must spend at least two full-time sessions on campus. Degree requirements are designed to be completed within eight years of first enrolment in the program. Fees arrangements for flexible-time Ph.D. programs apply.

Colloquium Series

The departmental Colloquium Series serves as a forum for special speakers, for the reporting of faculty research, and for the presentation of thesis research by doctoral students. All doctoral students in residence are strongly urged to attend and participate.

Major Subject

The major subject consists of one full course. It sets the context for the thesis and provides the means by which the student's knowledge of the subject, its major works, and its research literature is intensified.

Minor Subject

The minor subject consists of one full course or two half-courses, normally selected from appropriate graduate courses.

Determination of Research Readiness

After completing the requirements of the Major and Minor, and before developing a proposal for dissertation research, a student must appear before a committee which will determine the student's readiness to undertake research. This takes the form of an oral and written presentation and should display a student's critical ability and mastery of the research focus.

Prerequisite and Co-requisite Courses

Students may be required to take additional prerequisite and/or co-requisite courses as part of their program.

Thesis

The student is required to demonstrate the ability to design and conduct independent research by submitting and defending a thesis which constitutes a significant contribution to knowledge in the field of information studies. The thesis must embody the results of original investigation conducted by the student on an approved topic from the major subject area. The thesis is normally written in English but, on petition, French may be permitted.

Each student has a supervisor and two or more advisors for the thesis. The advisors may include members of the graduate faculty of other SGS departments.

Ph.D. Oral Examination

The candidate must defend the thesis at a Ph.D. oral examination normally scheduled by SGS in consultation with FIS.

Ph.D. Courses

FIS 3004Y+ Advanced Topics in Information Studies

FIS 3005Y Advanced Seminar in Research Methodologies

+ Extended course. For academic reasons, course work is extended into session following academic session in which course is offered.

McLUHAN PROGRAM IN CULTURE AND TECHNOLOGY

The McLuhan Program in Culture and Technology was created to continue the legacy of the Centre for Culture and Technology, established in 1963, as a focus for the ground-breaking work of Marshall McLuhan. The program's mandate is to encourage understanding of the impacts of technology on culture and society from theoretical and practical perspectives. The program draws together members of the University community whose interests lie in the interdisciplinary study of communications, culture, and technology. Through its research, course offerings, publications, speaking engagements, and experimentation in new and old media, the program also provides a bridge between the University and government, industry, educators, artists, and the general public.

In the summer of 1994, the McLuhan Program joined the Faculty of Information Studies as a distinct research and teaching unit. From its base at the historic Coach House on the east St. George campus, the McLuhan Program engages in four converging lines of activity:

- 1 To encourage and extend the investigations of the Toronto School of Communications initiated by Harold Innis, Eric Havelock, Marshall McLuhan and others into the impact of technology on culture, with a special emphasis on communications and information media and technologies;
- 2 To provide a forum for the exchange of ideas between the University and other groups within society, particularly those who have a central concern with the development, design, and consequences of technologically-mediated communications;
- 3 To offer a range of graduate credit courses and continual learning non-credit seminars and courses;
- 4 To engage in activities outside the University consistent with the program mandate.

The McLuhan Program does not offer a degree program. Students registered in a graduate program may take McLuhan Program courses for credit with the permission of their home department.

Courses of Instruction

JAC 1001H Media, Mind, and Society I/
D. de Kerckhove

JAC 1002H Media, Mind, and Society II/*Staff*
C&T 1003H Comparative Orality and Literacy/
Staff

C&T 1004H Communications: History/
Theory/Technology/*Staff*

C&T 1005H Understanding McLuhan/*Staff*
C&T 1009H New Media and Policy/*Staff*

Students interested in pursuing studies in the impact of communication media on humans and their environment should consult the Director of the program for a list of courses available in cognate departments.

Integrated Manufacturing (Collaborative Program)

Program Director

P. E. Sullivan, BSME, MSME, PhD, PEng/Mechanical
& Industrial Engineering

Address:

Collaborative Program in Integrated
Manufacturing
Room RS214, 164 College Street
University of Toronto
Toronto, Ontario M5S 3G8
Canada

Telephone: (416) 978-3045

Fax: (416) 978-7753

E-mail: im@mie.utoronto.ca

Web: www.mie.utoronto.ca/grad/GradProg/integmanu.html

The Integrated Manufacturing Collaborative Program provides students with a broad understanding of manufacturing issues, concepts and techniques, and their integration and application. Topics of interest include engineering design, materials in manufacturing, production processes, production planning and control, quality-control systems, computer-integrated manufacturing, and manufacturing management and strategy.

Primary participants in this multidisciplinary collaborative program are departments in the Faculty of Applied Science and Engineering: Chemical Engineering and Applied Chemistry, Materials Science and Engineering, Mechanical and Industrial Engineering as well as the Faculty of Management's Operations Management Group.

The Integrated Manufacturing Collaborative Program is only open to full-time students registered in the M.Eng. degree program in any one of the collaborating Engineering Departments. Participating students are expected to complete the degree requirements within a one-year period: September to August—no students are admitted in January.

Admission Requirements

The Integrated Manufacturing Collaborative Program is only open to full-time students who have a four-year bachelor's degree in any one of the following engineering disciplines: Chemical, Electrical, Industrial, Materials Science, or Mechanical Engineering.

Applicants who wish to enrol in the collaborative program must apply to and be admitted to both the collaborative program and a graduate degree program in one of the collaborating departments. Applicants are required first to gain admission to one of the participating Engineering Departments (listed above) and

then request admission to the collaborative program.

Students must complete the M.Eng. degree requirements of both the collaborating department and the Integrated Manufacturing Collaborative Program. Students are strongly advised to consult their respective graduate departments about the exact degree requirements prior to admission into the collaborative program. Students who complete the program receive the M.Eng. degree in their respective home department and the following notation on their transcripts: "Completed the Integrated Manufacturing Collaborative Program".

Program Requirements

Students are required to complete seven half-courses and a four-month industrial project worth three half-courses, for a total of ten half-courses. Students must successfully complete their course requirements within the first eight months (September to April) and a full-time summer project (May to August) at a sponsoring industrial corporation in teams of two students.

The collaborative program director arranges opportunities for students to find summer projects with sponsoring corporations. A personal interview is required. In order to avoid any potential conflict of interest, students must not be working, in any way, for an industrial company other than the specific corporation sponsoring their own project during the summer period.

In the event that an industrial project cannot be secured, and with the written approval of the Director, the student must personally seek a summer project to be conducted at the University of Toronto in any one of the collaborating departments.

Courses of Instruction

In addition to the industrial summer project worth three half-courses, students must receive credit for seven half-courses, when possible, within the first eight months of registration in the collaborative program (i.e., September to April):

Four collaborative program core courses:

MGT 2406H	Operations Management Strategy
MGT 2800H	Management Science
MIE 1718H	Computer Integrated Manufacturing
MIE 1727H	Quality Assurance

Two home department elective courses:

Students must choose two courses from their own home department specific lists developed for the Integrated Manufacturing Collaborative Program (to be updated yearly). The lists are available in their respective graduate departments at the beginning of the academic year.

One technical elective course:

Students must choose one elective course from any one of the participating engineering graduate departments, not necessarily from their own home department.

During the academic year, students will be encouraged to attend company site visits, technical workshops, seminars, verbal and written communication development courses, and computer programming courses. These are arranged by the program director at no cost to the student (except for possible transportation costs). Students in the collaborative program will also be encouraged to become student members of the Society of the Manufacturing Engineers, also at no cost.

International Relations (Collaborative Program)

Program Committee

G. Duranton, BSc, MA, MSc, PhD/Economics

Collaborative Master of Arts/Master of Science Program in International Relations

The graduate departments of Anthropology; Economics; Geography; Health Policy, Management and Evaluation; History; Political Science; Sociology; and Study of Religion; in conjunction with the Faculty of Law and the Centre for International Studies (CIS), offer a collaborative Master of Arts/Master of Science degree program in International Relations.

Students who wish to enrol in the collaborative program must apply to and be admitted to both the collaborative program and a graduate degree program in one of the collaborating departments.

Combined Juris Doctor/Master of Arts, Law and Political Science

(Specialization in International Relations)

A Combined J.D./M.A., Law and Political Science (Specialization in International Relations) is also available. Please consult the Web site for details.

Admission Requirements

- 1 Admission will be subject to the approval of the graduate department concerned and the collaborative program.
- 2 A cumulative average of A- is normally required for admission.
- 3 Applicants will normally be expected to have completed and passed an introductory course in microeconomics and macroeconomics at the undergraduate level.

Program Requirements

Collaborative international relations students are required to complete a total of five half-courses as follows: three required core half-courses (in international economics, history and philosophy of international relations, and public international law) and two elective half-courses (in international relations).

Additional degree requirements vary from department to department. Details of additional requirements are available from the Centre for International Studies, from the departmental graduate or M.A. supervisors, or from the collaborative program's Web site listed above.

Students must demonstrate competence in a second language.

Graduation Requirements

The home department, in consultation with the Director of the Collaborative Program in International Relations, recommends to the School of Graduate Studies that a student should graduate following successful completion of the above program requirements. Graduates receive a master's degree in the field of their home department, with a transcript notation indicating completion of the Collaborative Program in International Relations.

The Centre for International Studies (CIS) was established in December 1976. Its purpose is to encourage and facilitate interdisciplinary research and teaching in international studies, broadly defined. The major departments and faculties that cooperate closely with the Centre include Anthropology, East Asian Studies, Economics, Geography, History, Law, Management, Political Science, and Sociology. The Centre also works cooperatively with other University centres, institutes, and programs in cognate fields of study. CIS sponsors lectures and seminars by U of T faculty members and graduate students as well as by visiting scholars and practitioners. It administers a small endowment to assist Ph.D. students needing to travel abroad in order to complete dissertations in international and comparative fields of study.

The Centre sponsors many continuing research programs and special projects.

Graduate students with an interest in international studies are encouraged to visit the Centre's Web site for further information.

International Relations (Collaborative Program)

The Centre administers the Collaborative M.A./M.Sc. Program in International Relations. Consult the separate entry in this calendar.

E-mail: italian.studies@utoronto.ca

Web: www.utoronto.ca/italian

Applicants are accepted under the general regulations provided that they also satisfy the department's requirements stated below. In all cases their programs must be approved by the department.

Degree of Master of Arts

Admission Requirements

Applicants for admission to the M.A. program should submit two letters of recommendation and a personal statement of intent with their application.

For entry into a one-year M.A. program, applicants must have completed seven full undergraduate courses (or equivalent) in Italian to include an appropriate upper-year full course (or equivalent) in language and three full courses (or equivalent) in three different periods of literature. They must also have achieved at least B+ standing in their University of Toronto 300- and 400-series courses (or in equivalent courses).

The department will determine whether students need to complete prerequisite work in order to qualify for admission to a Master of Arts program and will advise students accordingly.

Program Requirements

The requirement for the M.A. degree is the completion of the course ITA 1000H *Methodologies for the Teaching and Study of Italian* and of four other full graduate courses or equivalent.

Degree of Doctor of Philosophy

Admission Requirements

Applicants for admission to the Ph.D. program must have completed the University of Toronto M.A. or its equivalent and should submit two letters of recommendation and a personal statement of intent with their application.

Students, approved by the department, must have obtained an overall average of at least A- in the courses taken for the M.A. degree. Students must maintain the A- average in order to remain in the program.

Exceptional students may be admitted directly to the Ph.D. program from the B.A. with a minimum A- average. Such applicants will apply to the M.A. program, but indicate in a separate letter to the Graduate Coordinator that they wish to be considered for direct admission to the Ph.D. program. If accepted, students from the B.A. level will normally be expected to complete four courses in addition to the Ph.D. requirements listed below for a total of eight full-course equivalents plus the required half-course ITA 1000H. Students accepted from the B.A. will be expected to maintain an A- average in their first four courses in order to continue in the program.

Program Requirements

The program consists of four full graduate courses, or equivalent, for a total of eight courses, including those taken for the M.A. degree. With the department's approval, students may choose one graduate course outside the department in an area cognate with the student's area of specialization. Also required are a qualifying examination, a thesis, and a final oral examination on the thesis.

The degree is offered in the following fields: Middle Ages and Renaissance, Seventeenth and Eighteenth Centuries, Nineteenth and Twentieth Centuries.

Students must have completed the course ITA 1000H *Methodologies for the Teaching and Study of Italian*; must show evidence of written and oral command of Italian; and, not later than the beginning of the third year of Ph.D. registration, must have demonstrated a reading knowledge of Latin and of one other language approved by the department. Upon completion of all course requirements, and not later than the second year of the Ph.D. program, they will

complete the series of written and oral qualifying examinations and, if successful, proceed to prepare their theses.

Permission to write the thesis in Italian (subject to final approval by the School of Graduate Studies) may be granted to students who first pass a supervised essay-type English examination to demonstrate proficiency in writing correct and idiomatic English prose.

Collaborative Programs

The department participates in the following collaborative programs:

1 Book History and Print Culture

2 Editing Medieval Texts

For details on these programs, please consult the separate entries in this calendar.

Courses of Instruction

Not all courses are offered every year. Please consult the department regarding course availability.

Web: www.utoronto.ca/jewish

Nature of Collaborative Program

The purpose of the Collaborative Program in Jewish Studies is to offer both broad and intensive exposure to the constituent fields within Jewish Studies. Because of Jewish civilization's vast chronological and geographical range, as well as its constant interaction and cross-fertilization with other cultures, graduate work within Jewish Studies demands intensive exposure to a wide variety of languages, textual traditions, and scholarly disciplines.

The collaborative program involves ten graduate units: Anthropology; English; Germanic Languages and Literatures; History; Near and Middle Eastern Civilizations; Philosophy; Political Science; Religion; Slavic Languages and Literature; and Sociology.

Application Procedures

Applicants who wish to enrol in the collaborative program must apply to and be admitted to both the collaborative program and a graduate degree program in one of the collaborating departments. The collaborative program is available to students in the doctoral stream. Students may apply to the collaborative program as soon as they have been admitted to the doctoral program in one of its constituent departments.

Admission Requirements

In addition to the admission requirements of the home department, sufficient linguistic knowledge, textual training, and familiarity with relevant scholarship in order to carry out graduate work in Jewish Studies within the chosen field are required.

Program Requirements

1 Two half-courses, one within and one outside of the student's home department. Valid courses include regular offerings and occasional offerings by visiting professors of Jewish Studies.

2 JSP 1000H *Jewish Studies Seminar*: core course in research topics and methods in Jewish Studies.

3 A doctoral dissertation that deals substantively with topics in Jewish Studies.

Courses of Instruction

Courses marked with # are taught by Program faculty and incorporate themes within and outside of Jewish Studies. Not all courses are offered every year.

Anthropology

ANT 5146H# Colonial and Post-Colonial Discourses

Comparative Literature/Germanic Languages and Literatures

JGC 1750H# Modernity and its Discontents

English

ENG 1027H# Construction of the Other in Medieval Literature (Jews and Muslims)
 ENG 5023H Elegy, the Elegiac and the Judaic in Twentieth-Century Anglo-American Poetry
 ENG 5573H# Performance and Identity in America
 ENG 5578H Parvenus and Passing in Modern American Literature

Germanic Languages and Literatures

GER 1530H Heine and Critical Theory

History

HIS 1267H Nationalism
 HIS 1274H The Nazis, Occupied Europe, and the Jews

Courses marked with # are taught by Program faculty and incorporate themes within and outside of Jewish Studies. Major research and writing assignments for such courses must focus on topics in Jewish Studies.

- HIS 1276H The Third Reich and the Holocaust
 HIS 1277H Topics in Jewish History
 HIS 1279H World War II in East Central Europe
 HIS 1287H Polish Jews Since the Partitions of Poland

Medieval Studies

- MST 3210H Medieval Spain
 MST 3225H# Jews and Christians in Medieval and Renaissance Europe

Near and Middle Eastern Civilizations

- NMC 1100Y# Introduction to Aramaic
 NMC 1101Y# Early Syriac Texts
 NMC 1102Y Palestinian Aramaic Texts
 NMC 1104Y# Aramaic Epigraphy

Founded in 1995, the Knowledge Media Design Institute (KMDI) - the first institute of its kind in Canada - is a leader in forging highly interdisciplinary collaborations for research and teaching across the University. The work of the Institute spans the scientific study of the ways in which media and media technologies shape and are shaped by human activity. With over 65 faculty members from 25 faculties and departments participating, KMDI is an authoritative voice for constructive, critical commentary and reflection on technology and society. We define knowledge media as a specific class of media and media technologies designed to support and enhance the ability of people, groups and communities to work, learn, play, and to create knowledge. KMDI has differentiated itself from mainstream practices of technology design by adopting a human-centred approach in which the goal is to enhance human skill rather than diminish it, and to encourage creativity and innovation. People and their practices are at the heart of knowledge media design. KMDI's goal is to be in the vanguard of ideas in the knowledge society, and as the University's first virtual institute, we engage directly with the media and technologies of a networked world to collaborate and to support our collective

interest in new forms of knowledge production and dissemination.

The Institute is home to the ePresence Project which has created an innovative knowledge media webcasting technology and to Project Open Source/Open Access, a site of network building, critical enquiry, and student engagement around the emerging phenomenon of openness.

The Institute holds an annual lecture series, maintains a multimedia archives of these events on the Web, publishes a working paper series, a monthly newsletter (KMDiary), and a weekly events calendar (KMDigest).

Nature of the Collaborative Program

The Collaborative Program in Knowledge Media Design (KMD) was launched in 2002 as the teaching arm of KMDI. The Collaborative Program provides a specialization for graduate students from a variety of academic backgrounds to engage in the design, prototyping, evaluation, and use of knowledge media. In

keeping with KMDI's human-centred approach, students explore the design and use of new media in the context of real world practices of individuals and communities. Access to an intensely collaborative and cross-disciplinary faculty encourages students to take a broader view of technological and social change and to be constructively critical of technological utopian and dystopian visions alike. The goal is for students to take into account heritage and history, to understand the realities of today, and to design for tomorrow.

Students have access to a community of scholars and the network of relationships that the Institute coordinates. They gain first-hand experience of a living network of innovation, an environment in which the resources are people and knowledge and the social capital and value that are generated through collaboration.

The Collaborative Program is available to master's and Ph.D. students in the collaborating graduate units. The units currently involved are:

Architecture, Landscape, and Design
Art (Visual Studies)
Computer Science
Curriculum Teaching and Learning
Information Studies
Mechanical and Industrial Engineering
Medical Science
Sociology

Admission Requirements

Students wishing to apply to the Collaborative Program must be enrolled, or anticipate being enrolled, in a degree program in one of the collaborating graduate units. Applying to the Collaborative Program is a separate procedure. Consult the KMDI Web site for application guidelines. Admission will be subject to the approval of the graduate department concerned and the Program Committee of the Collaborative Program.

Program Requirements

1 Students must meet all the requirements of their home department.

2 Master's students must successfully complete KMD 1001H, KMD 1002H, and two half-courses. At least one of these half-courses must be from the KMD 2001-2004 series or, in exceptional circumstances, a designated cognate course. The other may be from a list of recognized department courses. Master's students are encouraged, but not obligated, to complete a thesis/research project component in their home department, the topic of which

should be relevant to the field of knowledge media design.

3 Collaborative program courses may count towards the home department degree requirements or may be in addition to the degree requirements, depending on the participating department's individual program regulations.

4 Doctoral students are required to take KMD 1001H and KMD 1002H if not already taken in the master's program, one half-course from the KMD 2001-2004 series, or, in exceptional circumstances, a designated cognate course, and to have a dissertation topic in the field of knowledge media design. The thesis advisor and at least one other committee member must be from participating units.

5 The home graduate unit and the student's supervising committee will determine further requirements. The collaborating units cooperate in jointly developing a program that is individually tailored to meet the needs of each student.

Courses of Instruction

For courses offered in a particular year, check the Collaborative Program Web site: kmdi.utoronto.ca/graduate

Knowledge Media Design

Required

- | | |
|-----------|--|
| KMD 1001H | Core Seminar in Knowledge Media Design I—Fundamental Concepts |
| KMD 1002H | Core Seminar in Knowledge Media Design II—Contexts and Practices |

Electives

- | | |
|-----------|--------------------------------------|
| KMD 2001H | Human-centred Design |
| KMD 2002H | Technologies for Knowledge Media |
| KMD 2003H | Knowledge Media and Learning |
| KMD 2004H | Knowledge Media, Culture and Society |

Participating Department Electives

Existing courses from the participating departments that satisfy KMD requirements are listed below. These courses may not be offered every year. Courses that are mandatory for a student's degree from the home department cannot normally be counted. Some of the elective courses may require a significant amount of background knowledge and experience. Enrolment in such courses may require the permission of the instructor.

Inquiries about admission, registration, advisory committees, transfer exams, registration, and theses defences:

Marika Michael
 Room: 107
 Telephone: (416) 978-2550
 Fax: (416) 978-7361
 Email: marika.michael@utoronto.ca

Inquiries about awards, stipends/bursaries, curriculum, program extensions, and Web site:

Yen Du
 Room: 116
 Telephone: (416) 978-2663
 Fax: (416) 978-7361
 Email: yen.du@utoronto.ca

The program in Laboratory Medicine and Pathobiology provides a curriculum of courses and a broad-based multidisciplinary approach to research in mechanisms of human disease leading to M.Sc. and Ph.D. degrees. The program emphasizes:

- 1 Bone and Matrix Pathobiology
- 2 Cancer
- 3 Vascular and Cardiovascular Pathobiology
- 4 Immunopathology, Lymphatics and Transplantation
- 5 Neuropathobiology and Endocrine Disorders
- 6 Microbiology and Infectious Disease

Research Foci

Antimicrobial Resistance: Surveillance and Mechanisms
 Bone and Connective Tissue Diseases including Disorders of Mineral Metabolism
 Cancer Pathogenesis and Prevention
 Cardiovascular Disease
 Cell-Matrix Interactions
 Development: Cell Cycle, Differentiation, Signalling
 Diabetes
 Endocrine and Neuroendocrine Disorders
 Hematopathology and Transfusion Medicine
 Immunopathology and Transplantation
 Inflammatory Disorders
 Lipid Disorders
 Lymphatic Pathobiology
 Microbial Pathogenesis
 Molecular Biomarkers
 Neurodegenerative Disorders
 Proteomics and Bioinformatics
 Protein Structure and Function
 Toxicology
 Translational Research
 Vascular Cell Biology
 Viral Diseases

For details consult the departmental Web site www.lmp.facmed.utoronto.ca.

Degree of Master of Science

Admission Requirements

- 1 Applicants must have completed, or be about to complete, one of the following:
 - a Pathobiology Specialist Program;
 - b Four-year honours B.Sc. in Life Sciences;
 - c Professional degree (e.g., M.D., D.D.S., D.V.M., or equivalent).
- 2 A minimum A- average over the final two years of undergraduate study.
- 3 Research experience evidenced by publications, abstracts, or presentations is an asset.
- 4 Two strong letters of recommendation from faculty members familiar with the applicant's academic work. Departmental appraisal forms must be used.
- 5 A detailed curriculum vitae.
- 6 Statement of intent (approximately 250 words).
- 7 Applicants for this degree program are selected by the Departmental Admissions Committee on the basis of academic excellence and successful performance at an interview with a member of the departmental graduate faculty. Admission to the program is finalized when a graduate faculty member agrees to supervise the student's research and guarantees a full stipend for the student.

Program Requirements

- 1 Students must be on campus and participating for the duration of their registration in the program.
- 2 Students who have not previously completed LMP 1404H *Molecular and Cellular Mechanisms of Disease*, or an approved equivalent, will be required to take this course in the first year of their program. Students exempted from LMP 1404H will take a departmental half-course as a substitute. The student's advisory committee may recommend additional courses.
- 3 Students must enrol and participate in a credit/no credit course, LMP 1001Y *Graduate Seminars in Laboratory Medicine and Pathobiology*, which must be taken throughout the program.
- 4 Students are required to attend the departmental guest lecture series, *Seminars in Molecular Pathobiology*, that immediately follows the student seminar course LMP1001Y.
- 5 A thesis is completed under the direction of the student's supervisor, assisted by the advisory committee.
- 6 The duration of the M.Sc. program is usually 18 months. Within 12 to 18 months of entry, students will be advised by their committee to do one of the following:

- a write and orally defend a thesis on research completed,
 - b transfer to the Ph.D. program, or
 - c withdraw from the M.Sc. program.
- 7 The research content of the M.Sc. thesis is expected to generate the equivalent of one paper published in a peer-reviewed scientific journal.

Transfer from M.Sc. to Ph.D. Program

Excellent students with high academic standing (normally minimum A- average on M.Sc. courses) who have clearly demonstrated the ability to do research at the doctoral level may be considered for transfer to the Ph.D. program. Recommendation of the advisory committee is required. Transfer to the Ph.D. program is based on the student's performance at an assessment examination, which is held 12 to 18 months after the start of the M.Sc. program.

The student's supervisor will schedule the assessment examination. The examining committee consists of at least six members of the graduate faculty:

- a the Graduate Coordinator (or a representative from the graduate faculty of the Department) who chairs the examination committee
- b the student's advisory committee, and
- c two other graduate faculty members, one of whom is a member from another graduate department.

Degree of Doctor of Philosophy

Admission Requirements

- 1 Two routes of entry are available:
 - a **Track A**
Direct entry into the Ph.D. program is available for highly qualified B.Sc. graduates having completed the Pathobiology Specialist Program or a four-year undergraduate program in the life sciences with a minimum A average in the third and fourth years and relevant research experience. These students are encouraged to apply directly to the Ph.D. program.
 - b **Track B**
M.Sc. graduates and applicants with a M.D., D.D.S., D.V.M. (or equivalent) degree are eligible for the Ph.D. program. An A- average or higher is required in graduate courses or in a four-year B.Sc. program if there were no course requirements in the M.Sc. program.
- 2 Research experience evidenced by peer-reviewed publications, abstracts, or presentations is normally required.
- 3 Three strong letters of recommendation from faculty members familiar with the applicant's academic work. Departmental appraisal forms

must be used. Normally, one of the referees should be the applicant's research supervisor.

4 A detailed curriculum vitae.

5 Statement of intent (approximately 250 words).

6 Applicants are selected by the Departmental Admissions Committee on the basis of academic excellence and successful performance at an interview with a member of the departmental graduate faculty. Admission to the program is finalized when a graduate faculty member agrees to supervise the student's research, and guarantees a full stipend for the student.

Program Requirements

1 Students must be on campus and participating for the duration of their registration in the program.

2 It is expected that M.Sc. graduates will complete their Ph.D. programs within four years of registration in the program. Direct entry students and Ph.D. transfer students should complete their Ph.D. programs within five years. Short extensions for good cause may be permitted at the discretion of the Graduate Coordinator.

3 Students who have not previously completed LMP 1404H *Molecular and Cellular Mechanisms of Disease*, or an approved equivalent, will be required to take this course in the first year of their Ph.D. program. The student's advisory committee may recommend additional courses. Students exempted from LMP 1404H will take a departmental half-course as a substitute.

4 In addition, all students will be required to take three half-course equivalents plus an ongoing credit/no credit seminar course, LMP 1001Y. These courses must include at least one half-course in Laboratory Medicine and Pathobiology. Students having completed the undergraduate Pathobiology Specialist Program (or equivalent) are required to take two half-courses in addition to the departmental core course (LMP 1404H) and seminar course (LMP 1001Y). Course work should be completed in the first two years of the program, the continuing seminar course excepted. The latter half of the program is focused on research.

5 Students who take additional graduate courses during the M.Sc. program at the University of Toronto and who continue their graduate studies in the Ph.D. program may receive a transfer credit for M.Sc. courses toward doctoral course requirements. Credit for courses from universities other than the University of Toronto must be approved by the

Graduate Coordinator; certain restrictions may apply.

6 Students are required to attend the departmental guest lecture series, *Seminars in Molecular Pathobiology*, that immediately follows the student seminar course LMP 1001Y.

7 Ph.D. students are normally expected to present at least one graduate research seminar in LMP 1001Y prior to defending their thesis.

8 The Ph.D. thesis is completed under the direction of the candidate's supervisor, assisted by the advisory committee. The candidate normally defends the thesis before a departmental committee, and subsequently before a committee approved by the School of Graduate Studies. Candidates may, with the recommendation of their advisory committee, request a waiver of the Departmental defence, subject to approval by the Graduate Coordinator.

9 The Ph.D. thesis must demonstrate a substantial contribution to laboratory medicine and pathobiology, involving a systematic investigation of disease-related hypotheses. The emphasis is on quality of the science and its presentation. The Ph.D. thesis is normally expected to yield the equivalent of three publications in refereed scientific journals.

Transfer from Ph.D. to M.Sc. Program

Prior to the start of the third year of the Ph.D. program, the advisory committee may recommend that the student transfer to the M.Sc. program; the student may also request the transfer.

M.D./Ph.D. Program

A limited number of selected students may enter the M.D./Ph.D. program subject to admission into both the departmental Ph.D. program and the M.D. program.

Collaborative Programs

An M.Sc. or Ph.D. degree may be taken through this Department in any one of the following Collaborative Programs:

- 1** Biomedical Engineering
- 2** Cardiovascular Sciences
- 3** Developmental Biology
- 4** Neuroscience
- 5** Proteomics and Bioinformatics
- 6** Toxicology, Biomedical

For more details, consult the separate entries in this calendar.

Courses of Instruction

Not all courses are offered every year. Please check the departmental Web site, www.lmp.facmed.utoronto.ca, for course availability.

Enquiries

Enquiries should be directed to the Graduate
 Programme Coordinator, Graduate Program,
 Faculty of Law at the address above.

TOEFL Requirements

Applicants whose primary language is not Eng-
 lish and who graduated from a university where
 the language of instruction and examination
 was not English must write the Test of English
 as a Foreign Language (TOEFL). Applicants
 taking the paper-based TOEFL exam must
 achieve a minimum score of 600 and 5 on the
 TWE. Applicants taking the computer-based
 TOEFL exam must achieve a minimum score of
 250 and 5 on the essay rating component. Ap-
 plicants taking the internet-based TOEFL exam
 must achieve a minimum score of 100/120 and
 22/30 on the writing and speaking sections.
 Offers of admission conditional upon success-
 ful completion of an English language test will
 not be offered.

Degree of Master of Laws

Applicants are accepted under the general
 regulations and the special regulations govern-
 ing administration of degrees of LL.M.

Admission Requirements

An applicant for admission to the degree of Master of Laws (LL.M.) will generally have a Bachelor of Laws or Juris Doctor degree from this or another recognized university, or possess equivalent qualifications, and must have demonstrated proficiency in the study of law. A minimum B+ average is required.

Program Requirements

- 1 The student must be in attendance for at least two academic sessions (eight months, September to April).
- 2 The student must complete a course of studies and a thesis which, combined, are valued at 24 credit hours.
- 3 The course of studies shall involve a minimum of 8 credit hours of course work and a maximum of 20 credit hours of course work. The thesis shall involve a minimum of 4 credit hours (in which case the thesis will generally be expected to be between 50 to 60 pages, double spaced, or approximately 15,000 to 18,000 words) and a maximum of 16 credit hours (in which case the thesis will generally be expected to be between 100 and 150 pages, double spaced, or approximately 30,000 to 45,000 words).
- 4 The course of studies shall include the mandatory graduate seminar, *Alternative Approaches to Legal Scholarship*.
- 5 All course work and the thesis shall be graded using the SGS grading scale.
- 6 In determining the composition of the course of studies and the weight to be given to the thesis, the Faculty will endeavour to structure a program designed to accommodate an individual student and the subject matter of the thesis. However, such course of studies and the weight of the thesis shall at all times be such as the Faculty shall determine.
- 7 In the full-time LL.M. program, the course work requirements must be completed by May 31 of the academic year of attendance and the thesis must be completed by August 31 of the academic year of attendance.
- 8 The LL.M. program may, with approval of the Associate Dean, Graduate Studies, Law, be taken on a part-time basis over two years, in which case the course work requirements must be completed by May 31 of the second academic year of attendance and the thesis must be completed by August 31 of the second academic year of attendance. Continuation in the second year of the part-time LL.M. program is subject to the Faculty's determination that the student has made satisfactory progress in the first year of part-time LL.M. studies.

Degree of Master of Studies in Law

This program is designed for scholars, in disciplines related to law, who wish to acquire a knowledge of law in order to add a legal dimension to scholarship in their own discipline.

Admission Requirements

Applicants must hold at least a bachelor's degree and preferably a doctorate, from this or another recognized university, and must have demonstrated a high level of scholarship in a discipline related to law.

Program Requirements

- 1 The student must be in full-time attendance for two academic sessions (eight months).
- 2 The student must pursue a course of studies approved by the Faculty and by the SGS Admissions and Programs Committee.
- 3 The course of studies will comprise at least 28, and not more than 32, course hours and will include at least 3 of the following subjects: contracts, torts, property, criminal law, constitutional law, and civil procedure.
- 4 The program will also include a research project of an interdisciplinary nature.

Note: In no circumstance will courses taken in an M.S.L. program be accredited for the J.D. program.

Degree of Doctor of Juridical Science

Applicants are accepted under the general regulations and the special regulations governing administration of degrees of Doctor of Juridical Science (S.J.D.).

Admission Requirements

An applicant for the degree of S.J.D. will generally hold a Bachelor of Laws or Juris Doctor degree (with a minimum B+ average) from this or another recognized university and a Master of Laws (with a minimum B+ average) of this or another recognized university or possess equivalent qualifications. The Associate Dean, Graduate Studies, Law has the discretion to permit direct entry into the S.J.D. following completion of the Bachelor of Laws or Juris Doctor degree where the Graduate Committee is satisfied that the applicant's law record demonstrates excellent potential for independent legal research and writing at an advanced level.

Program Requirements —S.J.D.

- 1 A student must remain in attendance for at least two academic sessions (eight months, September to April).

2 A student must complete the graduate seminar, *Alternative Approaches to Legal Scholarship*.

3 Other course work requirements are optional and shall be determined upon consultation with the supervisor. All course work shall be subject to the approval of the Associate Dean, Graduate Studies, Law.

4 Area Requirement: Before being allowed to proceed with formal research on a thesis topic, a student must demonstrate competence in a broader area within which the topic falls. An Individual Area Committee (established by the student and approved by the Associate Dean, Graduate Studies, Law) assists in framing that area and compiling an appropriate plan for carrying out the research. The research undertaken by the student either culminates in a written exam, based on the reading list, or else consists of a research project which is either a draft of a chapter of the thesis, or an overview of the general argument. Both paths lead to an oral exam based on the written work and the reading list. Normally, a student will have satisfied the area requirement by the end of the first year of registration.

5 A student will not be allowed to continue in the doctoral program, where, in the opinion of the Area Committee, the student is not capable of demonstrating the capacity for independent legal research and writing at an advanced level.

6 Following completion of the area requirement, a thesis must be prepared which, in the opinion of the Faculty, will constitute a distinct contribution to legal research or scholarship, and the student must pass an oral examination on the same.

7 The thesis must be completed within five years from the date of enrolment in the program.

8 No candidate will be recommended for the degree until the thesis has been approved by the Faculty of Law and is presented in such form as to be worthy of possible publication either in whole or in an abstract. Thesis publication is normally accomplished as described in the Ph.D. regulations in this calendar.

Program Requirements—Direct Entry S.J.D.

1 A student must be in attendance for at least four academic sessions (two periods of eight months each, September to April).

2 A student must complete at least eight credit hours, including the graduate seminar, *Alternative Approaches to Legal Scholarship*.

3 All course work shall be subject to the approval of the Associate Dean, Graduate Studies, Law.

4 Area Requirement: Before being allowed to proceed with formal research on a thesis topic, a student must demonstrate competence in a broader area within which the topic falls. An Individual Area Committee (established by the student and approved by the Associate Dean, Graduate Studies, Law) assists in framing that area and compiling an appropriate plan for carrying out the research. The research undertaken by the student either culminates in a written exam, based on the reading list, or else consists of a research project which is either a draft of a chapter of the thesis, or an overview of the general argument. Both paths lead to an oral exam based on the written work and the reading list. Normally, a student will have satisfied the area requirement by the end of the first year of registration.

5 A student will not be allowed to continue in the doctoral program, where, in the opinion of the Area Committee, the student is not capable of demonstrating the capacity for independent legal research and writing at an advanced level.

6 Following completion of the area requirements, a thesis must be prepared which, in the opinion of the Faculty, will constitute a distinct contribution to legal research or scholarship, and the candidate must pass an oral examination on the same.

7 The thesis must be completed within five years from the date of enrolment in the program.

8 No candidate will be recommended for the degree until the thesis has been approved by the Faculty of Law and is presented in such form as to be worthy of possible publication either in whole or in an abstract. Thesis publication is normally accomplished as described in the Ph.D. regulations in this calendar.

Collaborative Programs

Applicants to the LL.M. and S.J.D. programs may also apply to participate in one of the following collaborative programs:

1 Bioethics

2 Women's Studies

Each program provides an opportunity to do interdisciplinary work in another field at an advanced level. For details, consult the separate entries in this calendar.

Courses of Instruction

Students may select courses from those listed in the syllabus of the Faculty of Law. These are accepted for credit at the graduate level. M.S.L. students may take courses from the first year of the J.D. program. Normally LL.M. and S.J.D. students will select courses only from the upper

year course list. In addition, there is one course exclusively for graduate students:

Address:

Institute for Life Course and Aging
 Suite 106, 222 College Street
 University of Toronto
 Toronto, Ontario M5T 3J1
 Canada

Telephone: (416) 978-0377

Fax: (416) 978-4771

Web: www.aging.utoronto.ca

The Institute has two principal mandates:
 multidisciplinary research and post-graduate
 education.

Research

The primary mandate of the Institute is to
 conduct basic and applied, multidisciplinary

research from a social science perspective on the life course and aging. The Institute offers graduate students and faculty the opportunity to work in a collaborative environment that fosters research and education. It acts as a catalyst to bring together researchers from various sectors of the University and collaborates with teaching hospitals, government, and social agencies. It offers resources, services, and leadership on research, planning, and policy issues. The research program of the Institute covers several theme areas:

- life course transitions
- marginalized older populations
- health and social services for older adults
- policy and aging
- end of life issues

Education

The Institute offers a collaborative graduate program in Aging, Palliative and Supportive Care Across the Life Course. Graduate students register in participating home departments and acquire a subspecialty in either aging or palliative and supportive care, which is denoted on their transcript. For more details consult the Aging, Palliative and Supportive Care Across the Life Course (Collaborative Program) entry in this calendar.

Four research fellowships are awarded annually to further support students in the area of aging and the life course:

- 1 The Wilfred George Scott Fellowship in Gerontology;
- 2 The Helen and George Coward Award in Gerontology;
- 3 The Leon and Blossom Wigdor Scholarship Fund;
- 4 The Northwater Capital Management Award in Aging.

The Institute offers a noon-hour seminar series and an annual lecture that address life course and aging issues. The schedule of talks is listed on the Institute's Web site.

The Institute offers space and computer resources to graduate students and in-house research faculty members. It also houses two community groups, the International Network for the Prevention of Elder Abuse (INPEA) and Connecting Seniors of Canada (CSC). Anyone interested in research studies on either the life course and aging or palliative and supportive care should contact the Institute for information.

Web: www.chass.utoronto.ca/linguistics/

Program Fields

The Department of Linguistics offers graduate degree programs in three fields:

- 1 Theoretical Linguistics
- 2 Language Variation
- 3 Psycholinguistics

Degree of Master of Art

Applicants must have at least a B+ average to be considered for admission. Applicants whose academic background does not include courses in introductory phonetics, phonology, morphology, and syntax are normally not admissible. If the applicant's academic background is limited to these courses, or the equivalent, consideration may be given for admission to a two-year program.

The M.A. program includes the courses LIN 1121H, 1131H, 1181H, 1290Y, and JAL 1145H, or their equivalents, if not already taken, plus other requirements as determined by the Department. LIN 1290Y is taken in the final year of the program. In the case of a two-year M.A., LIN 1121H, 1131H, and 1181H are normally taken in the first year. Students will be admitted to a one-year (normally four course) or two-year (normally eight course) program depending on their background.

All students must demonstrate an ability to read professionally in two languages other than English. The choice of languages must be approved by the graduate coordinator, having regard to the student's field of research. In some circumstances, demonstrated competence in computer programming may satisfy the requirement.

Degree of Doctor of Philosophy

Applicants will be considered for admission if they have completed the University of Toronto M.A. in linguistics, or its equivalent, with at least an A- average.

Students are normally required to complete three full-course equivalents during the first year. Generals papers (LIN 2201H and LIN 2202H) in two areas of concentration (at least one of which must be in an area of linguistic theory) must be completed by the end of the second year. During these two years, students are normally required to be on campus full-time for a residence period which entails being in such geographical proximity as to be able to visit the campus regularly and to participate fully in the Department's activities associated with the program.

Language requirements as outlined for the M.A. degree must be satisfied, and other requirements are determined in consultation with the graduate coordinator.

Candidates are required to present a thesis which must be an original contribution to linguistic knowledge. Both the preparation for and the writing of the thesis will be carried out under the supervision of members of the Department.

Courses of Instruction

Course descriptions and other information are available each spring from the Coordinator of Graduate Studies. Not all courses are offered in a given year. Students should consult the departmental Web site.

DEGREE OF MASTER OF BUSINESS ADMINISTRATION

Please note that the Rotman School of Management is improving the M.B.A. program and may be making minor changes to the curriculum, designed to strengthen and integrate the program, over the next academic year. The information in the calendar entry is accurate as of the printing deadline, but may change as a result of these improvements. Consult the Rotman School of Management for details.

The Joseph L. Rotman School of Management offers two Master of Business Administration (M.B.A.) degree programs:

- 1 M.B.A. (two-year and three-year options)
- 2 Executive M.B.A.

In addition, the School works collaboratively with the Faculties of Law, Applied Science and Engineering, Arts and Science, and the School of Graduate Studies to offer the following combined programs:

- 1 J.D./M.B.A. (Law)
- 2 B.A.Sc./M.B.A. (Engineering)
- 3 M.A./M.B.A. (European, Russian, and Eurasian Studies)

Admission Requirements for the M.B.A. Program

M.B.A. applicants are advised to consult the Rotman M.B.A. brochures for complete information on the graduate programs in Business Administration. Such information is available through the Office of Recruitment and Admissions at the Rotman School of Management or on the Web site at www.rotman.utoronto.ca.

- 1 Applicants for the degree of Master of Business Administration are considered under the general regulations which specify a four-year University of Toronto bachelor's degree or equivalent.
- 2 Applicants must also obtain a satisfactory score on the Graduate Management Admissions Test (GMAT) www.gmac.com. Test results are valid for five years.
- 3 Students may undertake the degree program through either a two-year or a three-year option. Admission decisions are made on a rolling basis.
 - a The Two-Year M.B.A. program admits annually in September. Applicants for the Two-Year M.B.A. program are therefore encouraged to apply before January 15 and no later than April 30 (final deadline). Admission information available at www.rotman.utoronto.ca/mba/admission.htm.
 - b The Three-Year M.B.A. program admits annually in May. Applicants for the Three-Year M.B.A. program should apply by February 1. Admission information available at www.rotman.utoronto.ca/mba3/admission/criteria.htm.
- 4 Preferential consideration will be given to applicants who demonstrate a minimum of two years of full-time work experience.

Program Requirements for Two-Year M.B.A.

- 1 The program, beginning in September, extends for two academic years (16 months).
- 2 The first year of the program consists of a set of required courses at the 1000 level. All students must complete the entire set of

required courses. No advanced standing will be granted for previous academic work completed or professional designations earned.

3 The second year of the program consists of nine elective courses at the 2000 level and one mandatory 2000-level course, MGT 2911H *Integrative Management Challenge*.

4 Required courses (1000-level courses) are weighted as one, two, or three modules. Three module courses are equivalent to three credit hours.

5 Elective courses (2000-level courses) each have a weight of 3 credit hours. With the permission of the M.B.A. program Director, students may take up to five 2000-level courses from another graduate unit or participate in a School- or University-approved international exchange program. In all cases, the courses selected are subject to the approval of the M.B.A. Program Director.

6 All degree requirements must be completed within six years from the date of first enrolment in the program.

Program Requirements for Three-Year M.B.A.

1 This program, designed for working professionals, covers the equivalent of two academic years but is delivered over a three-year period.

2 The study program consists of a set of required courses at the 1000 level, and a second set of required and elective courses at the 2000 level.

3 In required courses taken at the 1000 level, a course will be composed of either one, two, or three modules. Three-module courses are equivalent to three credit hours.

4 After completing the required courses at the 1000 level, students must take a total of 10 2000-level courses.

5 Elective courses (2000-level courses) each have a weight of 3 credit hours. With the permission of the M.B.A. Program Director, students may take up to five 2000-level courses from another graduate unit or participate in a School- or University-approved international exchange program. In all cases, the program of courses selected is subject to the approval of the Rotman School.

6 All requirements for the degree must be completed within six years from the date of first enrolment in the M.B.A. program.

Courses of Instruction

Weighting for MGT 1000-level courses is determined by the second digit of the four-digit course number as follows:

<u>Second Digit</u>	<u>Course Weight</u>
0	CR/NCR (Credit/No Credit)
1	one credit hour
2	two credit hours
3	three credit hours

The Department should be consulted each session as to course offerings.

JURIS DOCTOR/MASTER OF BUSINESS ADMINISTRATION PROGRAM

www.rotman.utoronto.ca/degree/jdmba.htm

The J.D./M.B.A. program is a four-year combined degree offered by the Faculty of Law and the Rotman School of Management at the University of Toronto. The program is for students who wish to combine graduate training in management with a degree in law.

At the completion of the four-year integrated program, the successful student is awarded both the Juris Doctor and the Master of Business Administration degrees, which, if taken separately, would require five years of study.

Admission Requirements

Applicants to the J.D./M.B.A. program must be admitted to both the Faculty of Law and the Rotman School of Management. As such, applicants must satisfy the admission requirements of both faculties independently, and all applicants must complete the Law School Admission Test (LSAT) and the Graduate Management Admission Test (GMAT). A separate application to each Faculty must also be submitted.

Rotman admission criteria are the same as those for the full-time M.B.A. program, with the following exception: although work experience is not a requirement, it is important to note that the average M.B.A. student has five years' experience. It is expected that J.D./M.B.A. applicants' academic and personal background reflects diversity and life experience.

Students who have completed the first year of the J.D. program may apply for admission to the combined J.D./M.B.A. program by meeting the normal application and admission requirements for the M.B.A. program and notifying their faculty registrar.

Since enrolment in the J.D./M.B.A. program is limited, applicants are urged to file both ap-

plications by the Faculty of Law deadline and to arrange to complete their applications as soon as possible thereafter.

Program Requirements

1 Students in the combined program spend the first year enrolled in the first year of the J.D. program and must obtain at least a B standing to continue in the program.

2 Students spend the second year of the combined program enrolled in the first year of the M.B.A. program and must obtain at least a B+ standing upon the completion of courses to be eligible to continue in the program.

3 During the final two years of the program, students take courses drawn from both Law and Management. Students must complete 6 courses at the Rotman School of Management and 45 credits at the Faculty of Law (in addition to the J.D. requirements to complete a Moot, a Perspective course, and the Extended Writing Requirement).

BACHELOR OF APPLIED SCIENCE/ MASTER OF BUSINESS ADMINISTRATION PROGRAM

www.rotman.utoronto.ca/skoll/index.htm

The Jeffrey Skoll B.A.Sc./M.B.A. program, established by the Faculty of Applied Science and Engineering and the Rotman School of Management, provides a fast track for students to earn their bachelor's degree in engineering, including a Professional Experience Year placement (PEY), a management internship, and an M.B.A. in six years and eight months.

Admission Requirements

Students in second or third year in the Faculty of Applied Science and Engineering (all programs) are eligible to apply for the combined Engineering/M.B.A. degree program. All admission documents required by the Rotman School of Management (including the GMAT results) should be submitted to the Office of Admissions, Faculty of Applied Science and Engineering, by October 15 of the fall session, or while on PEY immediately following third year.

Students undertaking the combined program must demonstrate a minimum of a B+ (77%) average in each of the following four sessions: 1W, 2F, 2W, 3F. (Students with one session slightly below 77% who meet all other entrance parameters should still apply.)

Program Requirements

- 1 Students in the combined program spend the first four years in the Faculty of Applied Science and Engineering (and apply to the program during the second or third year of undergraduate study).
- 2 Students spend the fifth year of the combined program enrolled in the first year of the M.B.A. program and must meet the promotion standards applicable to full-time M.B.A. students.
- 3 During the sixth year of the program, students must complete nine 2000-level courses and a required MGT2050H *Technology/Management Interface* course at the Rotman School of Management. Up to two of the 2000-level management courses may be replaced by 400-level or higher engineering courses from the Faculty of Applied Science and Engineering. Students must also ensure that they complete any additional required electives from the Faculty of Applied Science and Engineering to ensure they have met their B.A.Sc. degree requirements. Elective requirements vary for each engineering program area; consultation with a Faculty of Applied Science and Engineering counsellor is strongly encouraged.
- 4 All students are required to complete a Management Experience Year (MEY). Consult the Faculty of Applied Science and Engineering for detailed MEY requirements.

EXECUTIVE MASTER OF BUSINESS ADMINISTRATION PROGRAM

www.rotmanemba.ca

Admission to the Executive M.B.A. program is restricted to applicants with significant professional work or managerial experience. Applicants are considered under the general regulations of the School of Graduate Studies. Applicants must also obtain either a satisfactory score for the Executive M.B.A. Diagnostic Tool (EDT) or the Graduate Management Admission Test (GMAT). For further details, please refer to the Web site or contact the program office.

The M.B.A. for Executives is offered on Fridays and Saturdays every other week plus four week-long residential modules and study periods. The program consists of 23 courses with an accumulated credit weighting of 11.25. The total duration of the M.B.A. for Executives program is 13 months. Note that special program fees apply for this program. One or more of the course(s) may be substituted by course(s) offered in the regular M.B.A. program at the discretion of the Academic Director.

To learn more about the Rotman M.B.A. for Executives, visit the Web site www.rotmanemba.ca or call (416) 978-4441.

GLOBAL EXECUTIVE MASTER OF BUSINESS ADMINISTRATION PROGRAM

www.omniumgemba.com

The Global Executive M.B.A. "Omnium" program is an alternative option to the Executive M.B.A. program offered by the Joseph L. Rotman School of Management. This program is for executives who want to participate in an internationally focused business program. The intensive cross-cultural curriculum provides participants with a deep understanding of global business, and it provides the knowledge and tools needed to successfully develop and implement global strategies.

Admission to the Global Executive M.B.A. program is restricted to applicants with significant professional work or managerial experience. Applicants are considered under the general regulations of the School of Graduate

Studies. Applicants must also obtain either a satisfactory score for the Executive M.B.A. Diagnostic Tool (EDT) or the Graduate Management Admission Test (GMAT). For further details, please refer to the Web site or contact the program office.

The program is offered in 4 international modules over a 16-month period. Modules consist of three intensive weeks in each of the four locations: Europe (Switzerland, Germany, Hungary), South America (Brazil, Argentina), China (Hong Kong, Shanghai), and Canada (Toronto). The curriculum is closely aligned with the courses offered in the Executive M.B.A. program. Between modules, participants continue their academic work by utilizing our electronic learning tools. After successfully completing all modules, participants receive the M.B.A. degree from the University of Toronto.

To learn more about the Global Executive M.B.A. program, visit www.omniumgemba.com or call (416) 946-3022.

DEGREE OF MASTER OF FINANCE

Admission Requirements

Applicants considered for the Master of Finance program must meet the minimum academic eligibility criteria and the minimum professional experience criteria listed below. Applicants are required to submit a standardized application form, an official transcript, two letters of reference, a personal statement, and a résumé. Students who meet all the criteria will be ranked on the basis of grades, standardized graduate test scores, and professional experience by the admissions committee. The top ranked students will then be invited for interviews with Rotman faculty. The admission decision will be based on both submitted materials and interview performance.

Academic Eligibility

1 School of Graduate Studies Requirements: applicants must meet the requirements for entry into the School of Graduate Studies of the University of Toronto. These include a four-year University of Toronto bachelor's degree or its equivalent from a recognized Canadian or international university.

2 Grade Point Average: applicants must have achieved a minimum mid-B average (75% or 3.0 GPA) in the final year of their undergraduate or prior graduate education. If an applicant believes that his or her grades are not reflective of academic performance and potential (e.g., due to international differences in university assessment), or if other proof of ability like very strong standardized graduate test scores exist, the applicant can request special consideration from the admissions committee.

3 Standardized Graduate Tests: applicants are expected to have taken the GMAT or GRE (general) examination. While there is no minimum score, test performance will play a role in determining student ranking. Students who have passed all three levels of the Chartered Financial Analyst (CFA) exam are exempt from the GMAT/GRE requirement.

4 English Language Requirements. Satisfactory performance on the following tests: Test of English as a Foreign Language (TOEFL) and Test of Written English (TWE). A score of at

least 600 on the paper-based TOEFL or 250 on the computer-based TOEFL test is required. A minimum score of 5.0 on the TWE is required. For the internet-based TOEFL (iBT), a minimum overall score of 100 and a writing section score of 22 is required.

Equivalent performance on other tests will be considered: International English Language Testing System (IELTS) with a minimum score of 7.0 or Michigan English Language Assessment Battery (MELAB) with a minimum score of 85. For the Certificate of Proficiency in English (COPE) offered through the University of Toronto, the minimum acceptable score is 4 (with at least 1 in both reading and listening sections and 2 in the writing section).

Professional Experience

Applicants are expected to have at least two years of full-time work experience in finance. In special circumstances, other substantial experiences will be considered in lieu of the work experience in finance, but only when accompanied by demonstrated exceptional academic and professional potential. Students will generally not be accepted immediately after they complete their undergraduate education, unless they have significant prior full-time work experience.

Program Requirements

- 1** The program begins in September and lasts for two academic years (20 months).
- 2** The program requires completion of a structured sequence of 14 courses taken over five semesters (including summer). No advanced standing will be granted for courses taken at other institutions. All courses are scheduled in the evening and on weekends. There may be one to two periods where students are required to attend classes for a continuous period of three or four days. Scheduling details will be confirmed at the time of offer of admission.
- 3** Students may be required to do some pre-program studies during the summer prior to the start of the program, depending on background preparation.
- 4** All degree requirements must be completed within six years of first enrolment in the Master of Finance program.

Courses of Instruction

MGT 4310H	Foundations of Finance
MGT 4311H	Corporate Finance and Valuation
MGT 4312H	Derivatives
MGT 4313H	Firms, Deals and the Economy

DEGREE OF MASTER OF MANAGEMENT AND PROFESSIONAL ACCOUNTING

Address:

Room K108, Kaneff Centre
University of Toronto at Mississauga
3359 Mississauga Road North
Mississauga, Ontario L5L 1C6
Canada

Telephone: (905) 828-3985

Fax: (905) 569-4306

E-mail: mmpa@rotman.utoronto.ca

Web: www.rotman.utoronto.ca/mmpa

The M.M.P.A. is designed to educate future leaders of the accounting profession at the master's level in management and at the professional level in accounting and related subjects. The program covers the core courses of the Rotman M.B.A. program and offers specialization in accounting.

The 27-month program covers 7 sessions of full-time study, including 5 academic study sessions and 2 co-op work placement sessions in accounting- or finance-related environments. The curriculum is organized to provide an excellent understanding of:

- 1** the functions and needs of management,
- 2** accounting, finance, auditing, and tax,
- 3** essential professional subjects,
- 4** management skills, and
- 5** professional capabilities.

Students from any undergraduate background may apply. Advanced standing may be granted.

Admission Requirements

The admission requirements for the M.M.P.A. are essentially the same as those for the School's M.B.A. program except as noted in the program brochure.

Program Requirements

- 1** Except for applicants granted advanced standing on admission, the program covers the equivalent of seven sessions.
- 2** The program of study consists of all the courses set out below, except that students may choose to take either MGT 2070H or MGT 2208H in their final academic session.
- 3** All requirements for the degree must be completed within six years from the date of first enrolment.
- 4** All courses are composed of one, two, or three modules. A module is five weeks in duration and the course weight is equal to the number of modules. For example a course with three modules will have a weight of three credit hours.

Courses of Instruction

Notations for all courses are indicated in parenthesis following the course code and are determined as follows:

<u>Credit hours</u>	<u>Notation</u>
0	CR/NCR (Credit/No Credit)
1	one module
2	two modules (half-course)
3	three modules

The department should be consulted each session as to course offerings.

MGT 1090H(0)+	Accounting Work-Term Course I
MGT 1102H(1)	Business and Professional Ethics
MGT 1210H(2)	Managerial Economics
MGT 1211H(2)	Economic Environment of Business
MGT 1221H(2)	Accounting I
MGT 1222H(2)	Managerial Accounting
MGT 1241H(2)	Operations Management
MGT 1260H(2)	Leadership in the Management of Teams
MGT 1272H(2)	Management Information Systems
MGT 1301H(3)	Fundamentals of Strategic Management
MGT 1323H(3)	Auditing and Reporting
MGT 1330H(3)	Business Finance
MGT 1350H(3)	Marketing
MGT 1362H(3)	Managing People in Organizations
MGT 1382H(3)	Statistics for Management

+ Extended course. For academic reasons, course work is extended into session following academic session in which course is offered.

MGT 2004H(3)	Advanced Concepts in Strategic Management
MGT 2014H(2)	The Legal Environment of Professions and Corporations
MGT 2070H(1)	Management Consulting
MGT 2090H(0)+	Accounting Work-Term Course II
MGT 2205H(3)	Advanced Financial Accounting
MGT 2206H(3)	Taxation I
MGT 2207H(2)	Taxation II
MGT 2208H(1)	Taxation III
MGT 2224H(2)	Computer Auditing
MGT 2225H(2)	Advanced Auditing Topics
MGT 2250H(3)	Financial Reporting I
MGT 2251H(3)	Financial Reporting II
MGT 2260H(3)	Management Control
MGT 2261H(2)	Advanced Management Accounting
MGT 2273H(3)	Accounting Information Systems
MGT 2280H(2)	Accounting Theory and Research
MGT 2281H(1)	Seminar in Professional Accounting
MGT 2282H(1)	Integrative Cases in Professional Decision Making
MGT 2301H(2)	Financial Management

The final session of the program will include a professional integrating experience consisting of a four-week period in which students will complete one or more of the following:

- 1** attend the professional school of a professional accounting body, or
- 2** write professional accounting examinations, or
- 3** complete a consulting or work-term project.

DIPLOMA IN INVESTIGATIVE AND FORENSIC ACCOUNTING

Address:
Room K108, Kaneff Centre
University of Toronto at Mississauga
3359 Mississauga Road
Mississauga, Ontario L5L 1C6
Canada

Telephone: (905) 569-4331
Fax: (905) 569-4662
Web: www.rotman.utoronto.ca/difa

The Diploma in Investigative and Forensic Accounting (DIFA) program provides a rigorous and comprehensive education in investigative and forensic accounting (IFA) matters useful in

becoming an expert IFA consultant, practitioner, and expert witness in legal proceedings.

Students undertake a 10 half-course program over a 2.2 year period to become experts in financial matters related to investigation for fraud, calculation of damages, advisors in disputes, and preparers and deliverers of information to the courts. Courses are taken sequentially. The first and last DIFA courses involve one-week, intensive, residence sessions (following two months of pre-reading and assignment preparation) at the University of Toronto at Mississauga campus; the middle eight courses are offered via e-learning using weekly, problem-based learning in web-based and email-based sessions, as well as in study group discussions and assignments. Students can participate from anywhere in the world.

For students who are graduate Chartered Accountants, the diploma program is the educational gateway to the CA-IFA post-graduate specialist designation offered by the Canadian Institute of Chartered Accountants.

Admission Requirements

Applicants must meet the following minimum requirements:

- 1 a four-year University of Toronto undergraduate degree, or equivalent, in Commerce, Business Administration, or Accounting;
 - 2 a minimum of a mid-B standing (3.0 GPA) in the final undergraduate year;
 - 3 two years of relevant experience in accounting.
- Professional accounting experience and/or credentials (CA, CMA or CGA) is highly desirable.

Program Requirements

- 1 Except for candidates granted advanced standing on admission, the program of study covers all the courses set out below.
- 2 All requirements for the Diploma must be completed within six years from the date of first enrolment.

Courses of Instruction

- MGT 1900H Introduction to IFA
 MGT 1901H IFA Practice Issues
 MGT 1902H Legal Process—Introductory
 MGT 1903H Investigative-related Matters—Introductory
 MGT 1904H Loss Quantification—Introductory
 MGT 2900H Loss Quantification—Advanced
 MGT 2901H Investigative-Related Matters—Advanced
 MGT 2902H Legal Process—Advanced

MGT 2903H Advanced Topics/Emerging Issues

MGT 2904H Integrative Capstone

Courses MGT 1900H and MGT 2904H each involve a mandatory in-residence session at the University of Toronto at Mississauga. MGT 2904H requires participation in moot court and other experiential learning sessions. The remaining eight courses are offered online.

DEGREE OF DOCTOR OF PHILOSOPHY

The Rotman School offers the Ph.D. degree in Management. At present, students may specialize in one of six fields:

- 1 accounting
- 2 finance
- 3 human resource management and organizational behaviour
- 4 marketing
- 5 operations management
- 6 strategic management

Other areas are available for selection as the minor field in Management, including international business.

Admission Requirements

- 1 Applicants for the degree of Doctor of Philosophy are admitted under the general regulations.
- 2 Since Management is a multidisciplinary field, students are expected to acquire a breadth of knowledge across each of these disciplines, as well as some depth in the cognate disciplines relevant to their field of specialization. Sometimes these requirements can be satisfied prior to entry to the Ph.D. program (for example, through an M.B.A. degree coupled with a relevant undergraduate degree, or through an undergraduate degree in business, management, or commerce coupled with a discipline-based master's degree). If the breadth and depth requirements are completed prior to entry to the Ph.D. program, then the student is expected to complete the program in four years. If additional course work is required, then the student may need to spend an additional year in the program.
- 3 The applicant should have three individuals submit letters of reference to the faculty.
- 4 The applicant should have official scores on the GMAT or GRE submitted to the faculty.
- 5 The applicant should submit a letter to the faculty describing her or his interests and reasons for seeking doctoral education.

Program Requirements

1 Students should spend the first two years of the program on campus, registered as full-time students. During this time, they are normally expected to complete their course work. At the end of this period, they are expected to take the comprehensive examination.

2 The program consists of a major field and two minor fields of study.

3 A minimum of two full courses (four half-courses) will comprise the major field. These will normally be taken from the Management courses at the 3000 level, but additional courses from other departments may be required.

4 The two minor fields are usually taken in cognate departments. Each minor field comprises at least one full course (two half-courses).

5 In order to gain exposure to the breadth of the M.B.A. program, three courses from the following list or their equivalents are required:

MGT 1221H Accounting I **or**
 MGT 1222H Managerial Accounting
 MGT 1241H Operations Management
 MGT 1301H Fundamentals of Strategic Management
 MGT 1330H Business Finance
 MGT 1350H Marketing
 MGT 1362H Managing People in Organizations

The three courses are to be chosen in consultation with the Area Ph.D. Supervisor. The choice excludes any course from the student's major field of study. No student will be allowed to defend a dissertation proposal until the distribution requirements are completed.

Effective March 2004, the M.B.A. distribution requirements in the Ph.D. program were suspended for two years. All students registered at that time and newly admitted students for 2004-2005 and 2005-2006 will not be subjected to the M.B.A. distribution requirements. In the meantime, an alternate suitable replacement that meets the objective of the M.B.A. distributions will be explored.

6 A student is expected to be qualified in the three basic disciplines essential to the study of Management: economics, behavioural science, and quantitative analysis/statistics.

7 Upon completion of the courses in the major and minor fields, the student is expected to pass comprehensive examinations in the major field.

8 A thesis embodying the results of original investigation must be submitted and defended at a final oral examination in accordance with the regulations of the School of Graduate Studies.

Courses of Instruction

The Department should be consulted each session as to course offerings.

Courses normally restricted to Ph.D. students

MGT 3001H	Research Methods in Strategic Management
MGT 3002H	Advanced Topics in Strategy and Organization
MGT 3003H	Advanced Topics in Strategy and Economics
MGT 3004H	Advanced Topics in International Strategy
MGT 3005H	Strategic Management Workshop
MGT 3020H	Financial Accounting: Theory and Empirical Research
MGT 3021H	Managerial Accounting Research Methods
MGT 3022H	Auditing Seminar
MGT 3023H	Topics in Accounting Research
MGT 3025H	Workshop in Accounting
MGT 3030H	Financial Theory I
MGT 3031H	Financial Theory II
MGT 3032H	Empirical Methods in Finance
MGT 3033H	Current Topics in Finance
MGT 3034H	Capital Markets Workshop
MGT 3041H	Seminar in Operations Management
MGT 3045H	Advanced Topics in Operations Management I
MGT 3046H	Advanced Topics in Operations Management II
MGT 3051H	Marketing Theory I: Consumer Behaviour
MGT 3052H	Marketing Theory II: Strategy
MGT 3053H	Behavioural Research Methods in Marketing
MGT 3054H	Current Topics in Consumer Behaviour
MGT 3055H	Econometric Methods in Marketing
MGT 3056H	Current Topics in Marketing Strategy
MGT 3057H	Workshop in Marketing (Credit/No Credit)
MGT 3058H	The Psychology of Judgement and Decision Making
MGT 3060H	Advances in Human Resource Management
MGT 3062H	Methods and Research in Organizational Behaviour and Industrial Relations
MGT 3063H	Advanced Topics in Organization Theory
MGT 3064H	Advanced Topics in Organizational Behaviour
MGT 3065H	New Directions in Organizational Research

MGT 3090H Reading Course in Approved
Field
MGT 3091H Reading Course in Approved
Field

COLLABORATIVE PROGRAMS

The Department participates in the following collaborative programs:

- 1** Asia-Pacific Studies
- 2** Environmental Studies
- 3** Management and Economics

For details, consult the separate entries in this Calendar.

Management and Economics (Collaborative Program)

Program Committee

A. J. Yatchew, BA, MA, PhD/Economics
P. H. Pauly, MA, PhD/Management

Address:

Department of Economics
Room 4072, Sidney Smith Hall
University of Toronto
Toronto, Ontario M5S 3G3
Canada

Telephone: (416) 978-7169

Fax: (416) 978-6713

E-mail: ecograd@chass.utoronto.ca

Web: www.economics.utoronto.ca

Nature of Collaborative Program

The Rotman School of Management and the Department of Economics offer a limited enrolment collaborative program in Management and Economics. The student will undertake a program of study that includes:

- 1 developing a basic understanding in one of the core areas of management (accounting, economics, finance, marketing, operations management, organizational behaviour);
- 2 developing an in-depth understanding of economics and econometrics (Ph.D.-level work); and
- 3 carrying out Ph.D.-level work in one of the areas of management.

At present, only finance is available in the collaborative program.

Application Procedure

Admission to the program is by permission of the graduate coordinators in *both* Economics and Management. Prospective applicants should apply to the Department of Economics, and must meet the admission requirements of the Department of Economics.

Doctoral Degrees

Admission Requirements

The admission requirements (at a minimum) are the same as for the Ph.D. program in Economics. Students should have a strong undergraduate and M.A.-level background in economic theory, as well as mathematics. In addition, preference is given to students with undergraduate or other previous course work in commerce or business, especially finance and accounting.

Program Requirements

The Ph.D. is a full-time program. Applicants must be registered as full-time students for a minimum period of three years. The Ph.D. is a

research degree which requires:

- 1 demonstration of competence in core economics, in finance, and a second special field in economics;
- 2 fulfilment of a breadth/distribution requirement in management and finance;
- 3 a thesis based on original research.

To fulfil the program requirements as stated below, students will complete all of their comprehensive exams in two years, and their required course work in 2.5 years.

In first year, students must take the Math-Stat Review (ECO 1011H), the Ph.D. microeconomic theory sequence (ECO 2020H and ECO 2030H), the Ph.D. econometrics sequence (ECO 2400H and ECO 2401H), and the first two courses of the Rotman Finance sequence (MGT 3030H and MGT 3031H). They must also complete (or be exempt from) Financial Accounting (MGT 1221H or MGT 1222H), and Business Finance by the end of the first year. Students can satisfy the Business Finance requirement by taking ECO 2503H. Students must pass the microeconomic theory comprehensive exam by the end of their first year.

In second year, students complete the Ph.D. sequence in macroeconomics (ECO 2021H and ECO 2031H), and satisfy their main field requirement by completing the Ph.D. Finance sequence (MGT 3032H, MGT 3033H, and MGT 3034H). Students must pass the comprehensive exam in macro, as well as the Rotman Finance comprehensive exam. Students satisfy the distributional requirement in economics by taking two courses from a list approved by the Department of Economics. This comprises the minor field; note that the Financial Economics field is excluded from this list. Students should also attend the Finance seminar on a regular basis, beginning in their second year.

In third year, students complete their management distributional requirement by taking two courses in a stream approved by the Rotman School of Management, drawn from the second-year M.B.A. courses (i.e., MGT 2300 series). Students must participate in the Graduate Research Seminar (ECO 4060Y), and present a "second year" paper proposal by February of their third year. The completed "second year" paper must be presented in the Finance Seminar by the Fall of their fourth year.

In the fourth and fifth years, students complete their dissertation.

Courses of Instruction

See the separate entries in this calendar for the Economics and Management Ph.D. programs.

Web: www.mse.utoronto.ca

Degree candidates are accepted under the general regulations. For students whose primary language is not English, the department requires a TOEFL (Test of English as a Foreign Language). Applicants taking the paper-based TOEFL exam must achieve a minimum score of 580 and 4 on the TWE. Applicants taking the computer-based TOEFL exam must achieve a minimum score of 237 and 4 on the essay rating component. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 93/120 and 22/30 on the writing and speaking sections.

Graduate courses and research opportunities are offered to qualified students in a wide range of subjects.

Typical subjects in chemical metallurgy involve a study of the equilibria existing during the reduction of oxides with carbon and metals, properties of iron and steelmaking slags, the fundamental properties of fused salt solutions, fused salt electrolysis of reactive metals, kinetics of high-temperature reactions, mathematical modelling of metallurgical processes, process metallurgy, and hydrometallurgy.

Typical physical metallurgy and materials science subjects deal with the structure and properties of metallic, ceramic, and polymeric materials in such fields as plastic deformation, surface properties, electron microscopy, biomaterials, nuclear materials, metal-matrix composites (MMCs), metallic glasses, corrosion, fatigue, welding and bonding, phase transformations and solidification. These studies are all related to the general problem of understanding structure-property-processing relationships in materials.

Degree of Master of Engineering

Students are accepted under the general regulations. A student will enrol in a field of study in consultation with a professor who will act as advisor throughout the student's program. For students with adequate undergraduate preparation, the normal program will include 10 half-courses; a project may be substituted for 3 half-courses. The project must be presented at an oral examination.

Degree of Master of Applied Science

Students are accepted under the general regulations. The program of study will normally include four half-courses, including the M.A.Sc. Graduate Research Seminar, and a thesis. The course work normally selected will include the departmental seminar, which is a half-year course, and three half-courses, one of which would normally be taken inside the department. The required thesis is based upon research

work carried out in the department in the fields of chemical or physical metallurgy or materials science. The thesis must be presented at an oral examination.

Degree of Doctor of Philosophy

Students will normally be expected to have completed the master's program before entering the Ph.D. program. The program of study normally will include four half-courses, including the Ph.D. Graduate Research Seminar, and a thesis. The major subject in a program will be chemical metallurgy, physical metallurgy, or materials science. One of the three half-courses would normally be taken inside the department. The required thesis is based upon research work carried out in the department in the fields of chemical or physical metallurgy or materials science.

Within 12 months of initial enrolment in the Ph.D. program, all students must pass a general qualifying examination based on the course material taken within the department and on background knowledge in the student's field of specialization.

Program Transfer

Very strong M.A.Sc. students may apply to transfer to the Ph.D. program after completing one year of the M.A.Sc. program. Regulations governing such transfers are available in the Materials Science and Engineering Graduate Studies office. A student who is permitted such a transfer must complete only the Ph.D. Graduate Research Seminar in addition to the four courses completed in the M.A.Sc. program.

Collaborative Programs

The Department of Materials Science and Engineering participates in the following collaborative programs:

- 1 Biomedical Engineering
- 2 Environmental Engineering
- 3 Integrated Manufacturing

For details on these programs, please consult the separate entries in this Calendar.

Courses of Instruction

A schedule is available from the Coordinator of Graduate Studies at the beginning of the fall session listing the time and room location for each course offered.

All students wishing to undertake graduate research in the Department of Materials Science and Engineering must successfully complete a two-day intensive occupational health

and safety training program which will normally take place during the week immediately preceding the commencement of graduate courses. More details concerning this course will be provided by the Coordinator of Graduate Studies once admission to a graduate program has been confirmed.

Note: Not all courses are offered every year. Please consult the department for a listing of courses being offered this year.

The master's degree program in Mathematical Finance was developed to respond to the rapidly changing demands in the financial services industry. The program is multidisciplinary, drawing upon the expertise of the Faculties of Applied Science and Engineering, Arts and Science, and Management. As a fully integrated course of study, it is a computationally intensive program designed to provide a strong academic education within the practical framework of applied finance. Note that special tuition conditions apply for this program.

More information about the program and courses is available on the Web site or from the Program Director.

Degree of Master of Mathematical Finance

Admission Requirements

1 Candidates will be admitted under the general regulations of the School of Graduate Studies. To be considered for admission, applicants must have a four-year University of Toronto bachelor's degree, or its equivalent, in a quantitative, technical discipline, with a minimum of a mid-B standing in the final two years. Applicants whose primary language is

not English and who graduated from a university where the language of instruction was not English must demonstrate facility in the English language through the successful completion of the Test of English as a Foreign Language (TOEFL). Applicants taking the paper-based TOEFL exam must achieve a minimum score of 580 and 5 on the Test of Written English (TWE). Applicants taking the computer-based TOEFL exam must achieve a minimum score of 237 and 5 on the essay rating component. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 93/120 and 22/30 on the writing and speaking sections.

2 Applicants must also show evidence of strong mathematical ability. Appropriate workplace experience will be considered in lieu of formal education.

3 Admission to the program is competitive. Those accepted into the program will normally have achieved a standing considerably higher than the minimum mid-B standing or have demonstrated exceptional ability through appropriate workplace experience. In all cases, candidates must satisfy the admissions committee of their ability to do rigorous quantitative analysis at an advanced level.

4 The broad background required for this program makes it likely that many strong applicants will not possess all the background requirements. It is expected that applicants will have extra depth in certain areas and need to do additional work in others. Admission may be conditional upon the applicant's satisfactory completion of the required background material.

Applicants should submit a written statement of approximately 300 words outlining their objectives for entering the program. Applicants should also explain how their background is appropriate. An interview may be required.

Inquiries about part-time options for the program should be addressed to the Program Director.

Program Requirements

1 The program of study begins in mid-August and will normally extend over twelve consecutive months during which the student is full-time.

2 The program includes a four-month internship during the second session. Students will be responsible for obtaining their own internship. In cases where the student is taking a leave of absence from an appropriate job, it is expected that the student will return to this job for the internship. In all cases, the Director must approve the placement.

3 Students will proceed through the program as a group, following a common course of study. The course of study will be fully integrated and computer-laboratory intensive. Course projects and assignments will be designed to integrate the material learned from a variety of the courses and to utilize it in a practical context. Excellent communication and presentation skills will be emphasized in both the oral and written components of the projects.

4 Students must complete all courses listed below.

Courses of Instruction

Courses are offered in modules. A module will consist of a four-week unit with a minimum of three contact hours per week, or its equivalent. A large portion of the learning for the module will take place outside of class through carefully designed computer projects and group study. The courses have been packaged in units of one, two, three, four, or five modules, and the course weight will be equal to the number of modules; for example, a course with three modules will have a weight of three credit hours. Six modules will be considered the equivalent of one full course equivalent in a standard format.

The third digit of the four-digit course number determines the course weight.

Third Digit Notation:

1 = one-third of a half-course

2 = two-thirds of a half-course

3 = one half-course

4 = two-thirds of a full course

5 = one full course

MMF 1900Y Internship (Credit/No Credit)

The Department of Mathematics offers opportunities for research in the fields of pure mathematics and applied mathematics, including, but not restricted to, the fields of real and complex analysis, ordinary and partial differ-

ential equations, harmonic analysis, nonlinear analysis, several complex variables, functional analysis, operator theory, C^* -algebras, ergodic theory, group theory, analytic and algebraic number theory, Lie groups and Lie algebras, automorphic forms, commutative algebra, algebraic geometry, singularity theory, differential geometry, symplectic geometry, classical synthetic geometry, algebraic topology, set theory, set-theoretic topology, mathematical physics, fluid mechanics, probability (in cooperation with the Department of Statistics), combinatorics, optimization, control theory, dynamical systems, computer algebra, cryptography, and mathematical finance.

More information about this program and courses may be found in the brochure *Graduate Studies in Mathematics at the University of Toronto*.

Degree of Master of Science

Students are accepted under the general regulations and must also show evidence of an excellent academic background and mathematical ability.

Students are accepted into a 12-month, 16-month, or 24-month program for the degree of Master of Science. It is also possible to earn the M.Sc. degree through part-time studies.

Students in the 12-month program are required either (a) to take and pass three approved full-year courses and to take a supervised research project for M.Sc. students (MAT 4000Y), or its equivalent, or (b) to take and pass two approved full-year courses and submit an acceptable thesis. Two approved half-year courses are considered the equivalent of a full-year course. Two prerequisite courses may, with approval, be substituted for one course of the program. Students may, with approval, take courses outside the department as part of a coherent program.

Students who do not have a complete undergraduate background in mathematics may be accepted into a 16-month or 24-month program which includes an approved selection of prerequisite and other courses in addition to the requirements of the 12-month program. This possibility may interest students who have some background in a subject in which mathematics is applied and/or who are interested in industrial applications of mathematics.

Students who undertake the M.Sc. part-time must, at a minimum, satisfy the requirements of the 12-month program.

Degree of Doctor of Philosophy

Students must normally have a master's degree from a recognized university. However, exceptionally strong B.Sc. students may apply for direct admission to the Ph.D. program. In all cases students must satisfy the department of their ability to do independent research at an advanced level. They must show evidence of an excellent academic background and mathematical ability.

The Ph.D. program normally takes four years of full-time study to complete. Students must complete at least six half-courses (or the equivalent combination of half-year and full-year courses). Students are required to pass a comprehensive examination in basic mathematics before beginning an area of specialization. This examination should be taken as soon as possible, and not later than the beginning of the third session of Ph.D. study. The usual examination covers the three general areas of analysis, algebra, and topology, at the level of the first-year graduate courses offered by the department in these subjects. Students planning to specialize in applied mathematics must take the analysis and/or algebra portion of the comprehensive examination, but may substitute from several areas of applied mathematics for the remaining portions. Students are also required to pass a specialist oral examination or to give a seminar presentation in their particular field of study before embarking on serious thesis research. The main requirement of the degree is an acceptable thesis. This will embody original research of a standard that warrants publication in the research literature.

Courses of Instruction

Each year the department offers a selection of courses chosen from the following list, with the possibility of further additions. The core courses, MAT 1000Y, 1001H, 1100Y, 1300Y, will be offered each year; the complete list of courses will be available from the department in May. In addition, it may be possible for a student to arrange to take one of the listed courses as an individual reading course. Students should consult the office of the Coordinator at the start of the academic year.

Ph.D. students are expected to attend and contribute to seminars in the research areas.

Mathematics

MAT 1000Y	Real Analysis
MAT 1001H	Complex Analysis
MAT 1002H	Topics in Complex Variables
MAT 1003H	Theory of Several Complex Variables
MAT 1004H	Theory of Approximation

[illegible]

MAT 1711H	Topics in Quantum Mechanics
MAT 1722H	C* Algebras and Quantum Mechanics
MAT 1723H	Foundations of Quantum Mechanics
MAT 1724H	Functional Analysis in Quantum Mechanics
MAT 1725Y	Scattering Theory
MAT 1739H	Topics in Mathematical Physics
MAT 1750H	Computational Mathematics
MAT 1751H	Topics in Computational Mathematics
MAT 1760H	Computer Algebra
MAT 1761H	Algorithms in Algebraic Geometry
MAT 1839H	Optimization and Control
MAT 1840H	Control Theory
MAT 1843H	Mathematics of Pattern Recognition
MAT 1844H	Nonlinear Dynamical Systems
MAT 1845H	Dynamical Systems
MAT 1846H	Topics in Dynamical Systems
MAT 1847H	Holomorphic Dynamics
MAT 1855H	Mathematical Economics
MAT 1856H	Mathematical Finance
MAT 1880H	Case Studies in Applied Mathematics

Individual Reading Courses

MAT 1900Y	Readings in Pure Mathematics
MAT 1901H	Readings in Pure Mathematics
MAT 1902H	Readings in Pure Mathematics
MAT 1950Y	Readings in Applied Mathematics

Mailing Address:

Department of Mechanical and Industrial
Engineering
Mechanical Engineering Building
5 King's College Road
University of Toronto
Toronto, Ontario M5S 3G8
Canada

Office Location:

Rosebrugh Building
Room 214, 164 College Street

Fax: (416) 978-3453

E-mail: gradoffice@mie.utoronto.ca

Web: www.mie.utoronto.ca

Qualified students are accepted for study in a wide range of topics, spanning the breadth of Mechanical and Industrial Engineering, including dynamic systems, vibrations, controls, robotics, solid mechanics, thermodynamics, combustion, heat transfer, fluid mechanics, environmental engineering, design, computer-aided engineering, flexible manufacturing, enterprise integration, information systems, fuzzy logic, operations research, production planning and scheduling, human factors/ergonomics, technology-society studies, and other related topics.

Collaborative Programs

In addition, the Department of Mechanical and Industrial Engineering participates with other graduate units to offer the following collaborative programs within the University:

- 1 Biomedical Engineering
- 2 Environmental Engineering
- 3 Integrated Manufacturing
- 4 Knowledge Media Design

Details of each of these programs are described in separate entries in this calendar.

Degree Programs

A brief outline of the available degree programs and admission requirements is given below. Further details are available on the Mechanical and Industrial Engineering Web site.

Students registered in a graduate degree program, which involves research, are required to participate in the non-credit seminar course JDE 1000H *Ethics in Research* during their first or second session of registration.

Degree of Master of Applied Science

This degree program provides students with an opportunity to pursue research-intensive advanced studies in a particular field of

interest. At the beginning of each student's program, a professor in the Department will be identified as the supervisor. In consultation with the supervisor, each student will prepare a program of study which must be approved by the Department. For students with an adequate undergraduate background, the program will normally consist of five graduate half-courses and a thesis.

Applicants for the Master of Applied Science program or the Master of Engineering program must normally have a minimum average of B+, or equivalent, in each of the final two years of an accredited four-year undergraduate program in engineering or a closely related field. Additional factors considered in assessing applicants are publications, work experience, the school and program to which each previous degree pertains, evidence of exceptional communication skills, references, and the availability of financial resources, space, and suitable supervision.

Degree of Master of Engineering

This program is designed for students preparing for advanced professional activity; it is not a research-oriented degree. The program normally requires a total of 10 half-courses, or 7 half-courses plus a supervised project. A plurality of the courses should be taught by the Department of Mechanical and Industrial Engineering. The program may be taken on a full-time or part-time basis; some courses are scheduled during evening hours to accommodate part-time students. Admission requirements are the same as those listed above for the Master of Applied Science students.

Degree of Doctor of Philosophy

This program is for students who are planning a career in which they will be performing or directing research at the most advanced level.

Students must normally have a master's degree from a recognized university. Admission to a Ph.D. program is reserved for those who are able to present evidence of superior academic and research ability. Exceptionally strong bachelor's students may apply directly to the Ph.D. program.

At the beginning of each student's program, a professor in the Department will be identified as the supervisor and will guide the student in the research program and selection of courses. Ph.D. students must meet the minimum departmental standard in course work. For students with an appropriate background, the program will normally consist of five half-courses and a thesis. Students admitted directly to a Ph.D. program with a bachelor's degree are required

to complete eight half-courses plus a thesis. Ph.D. students are required to be on campus full-time unless special permission is obtained for off-campus study. Normally no more than four years are required to complete the program of study.

Each Ph.D. student must pass a qualifying examination, a seminar presentation, additional annual progress meeting, the departmental Ph.D. examination, and the SGS Ph.D. final oral examination.

Program Transfer

Very strong M.A.Sc. students may apply to transfer to the Ph.D. program after completing only one year of the M.A.Sc. program. Regulations governing such transfers are available in the Mechanical and Industrial Engineering Graduate Studies Office. A student who is permitted such a transfer must complete a total of eight half-courses in the graduate program.

English Language Facility

When proof of English language facility is required for admission, applicants may take one of a number of tests and attain a minimum score.

1 TOEFL (Test of English as a Foreign Language): 580 on the paper-based test and 4 on the TWE; 237 on the computer-based test and 4 on the essay rating component; 93/120 on the internet-based test and 22/30 on the writing and speaking sections.

2 MELAB (Michigan English Language Assessment Battery): score of 85 or better.

3 IELTS (International English Language Testing System): score of 7.0 or better.

4 COPE (Certificate of Proficiency in English): total score of 4 or better (a least 1 in each component and 2 in the writing component).

Please visit www.mie.utoronto.ca/grad for current English language facility requirements.

Courses of Instruction

See the departmental graduate office for a schedule of available courses.

Robotics, Dynamic Systems and Controls

MIE 1001H Dynamics II/*J. K. Mills*

MIE 1002H Dynamics III/*Staff*

MIE 1005H Theory of Vibrations I/

Address:
Department of Medical Biophysics
c/o Ontario Cancer Institute
Room 7-413
610 University Avenue
Toronto, Ontario M5G 2M9
Canada

Telephone: (416) 946-2972, 946-2973
Fax: (416) 946-2050
E-mail: medbio@uhnres.utoronto.ca
Web: medbio.utoronto.ca

The Department of Medical Biophysics, an interdisciplinary department with three subsections, Cell and Molecular Biology, Molecular and Structural Biology, and Medical Physics, is located primarily at the Ontario Cancer Institute and the Sunnybrook Health Sciences Centre. The department offers opportunities for research in a variety of biological problems; projects which cut across the conventional boundaries of physics, engineering, chemistry, biology, and medicine are encouraged. The department emphasizes basic and applied research related to cancer. Projects include the following areas: tumour biology, radiobiology, membrane function, molecular interactions, gene expression, cell differentiation and growth control, viral and chemical carcinogenesis, cellular and molecular immunology, hemopoiesis, macromolecular structure via x-ray crystallography and NMR spectroscopy, the physics of radiation therapy and diagnostic imaging, development of imaging systems involving ultrasound, nuclear magnetic resonance, and electron optics.

For detailed information, please visit the departmental Web site.

Degree of Master of Science

Applicants are accepted under the general regulations. Students with diverse backgrounds are encouraged to apply. Applicants holding bachelors degrees from non-Canadian universities are required to provide GRE scores (general and subject) with their application. Successful applicants with B.Sc. degrees are enrolled in the M.Sc. program; qualified students can reclassify into the Ph.D. degree program during their second year. The course requirements will depend on the subject chosen for study and on the background of the student. The M.Sc. program usually requires two years to complete and includes both course work and research. To qualify for a degree, the student must successfully complete all degree course requirements and pass an oral examination on the topic of the thesis. It should be noted that admission to the Ph.D. program is highly selective and attainment of minimal standing as an M.Sc. student does not guarantee admission to the Ph.D. program.

Degree of Doctor of Philosophy

Ph.D. degree students can be accepted by two routes. They may reclassify from the M.Sc. program or apply under the general regulations after completion of an M.Sc. degree program in biological, physical, chemical, or medical sciences.

Except by special arrangements, students are required to be on campus and participating full time until all program requirements are completed. Because of the broad range of topics available for thesis research and because of the different backgrounds of students accepted in the department, each student will, in consultation with his or her supervisor, plan a program of study that provides the appropriate background for the area of investigation.

All students must complete the required four full-course credits as outlined in the Graduate Student Handbook.

Students who transfer/reclassify into the doctoral program or who have completed a M.Sc. degree in Medical Biophysics will receive credit for all courses taken during their M.Sc. program in Medical Biophysics. Students who completed their M.Sc. degree in a department other than Medical Biophysics may request one full-course credit for that degree. These students must still complete or be formally exempt from the required courses for the Medical Biophysics M.Sc. degree. Exemption from a required course does not reduce the number of courses required; students are required to substitute another course equivalent in place of the exempted course.

All Ph.D. students are expected to participate in MBP 1015Y *Biophysics Seminar Course* regardless of whether they previously received credit for it or not.

Collaborative Programs

The Department of Medical Biophysics participates in the following collaborative programs:

1 Biomolecular Structure

2 Cardiovascular Sciences

3 Developmental Biology

4 Proteomics and Bioinformatics

For details, consult the separate entries in this calendar.

Courses of Instruction

MBP 1001Y	Advanced Cell Biology/ <i>J. Medin, Staff</i> Topics change; consult Course Coordinator about current topics
MBP 1007H	Fundamentals in Molecular and Cell Biology I/ <i>R. Khokha, Staff</i>
MBP 1008H	Fundamentals in Molecular and Cell Biology II/ <i>R. Khokha, Staff</i>
MBP 1010H	Quantitative Biology—Statistical Methods/ <i>L. Martin</i>
MBP 1011H	Foundations of Bioinformatics Not currently offered; suggested alternative is JTB 2010H <i>Proteomics and Functional Genomics</i>
MBP 1015Y ^o	Biophysics Seminar/ <i>P. Burns, L. Lilge</i>
MBP 1018Y	Oncology/ <i>A. Schimmer</i>
MBP 1022H	Advanced Cell Biology for Physical Scientists/ <i>M. Puri, J. Rast</i>
MBP 1023H	Clinical Radiation Physics/ <i>Staff</i>
MBP 1024Y	Advanced Medical Imaging/ <i>S. Graham</i>
MBP 1026H	Clinical Imaging for Physical Scientists/ <i>P. N. Burns</i>
MBP 1028H	Optical, Thermal and Radiation Biophysics/ <i>L. Lilge</i>

^oCourses which may continue over a program. The course is graded when completed.

Introduction

The Institute of Medical Science (IMS) is dedicated to the training of medical researchers and the dissemination of new knowledge relevant to human biology and pathobiology. It was established in 1968 as a graduate unit within the School of Graduate Studies to foster education and scholarship in the clinical departments of the Faculty of Medicine.

The IMS provides a wide range of opportunities for multidisciplinary research in clinical and basic medical science and related fields. Graduate supervisors are world-class researchers located throughout the health sciences network, including hospital research institutes, teaching hospitals, and university basic science departments.

Qualified university graduates with a professional health science degree (e.g., M.D., B.Sc.N.) or an undergraduate arts and science degree of appropriate background who wish to pursue graduate studies in basic or clinical biomedical sciences are encouraged to apply.

Degree students will have the opportunity to conduct research in one of three training streams:

1 Biomedical

2 Clinical

3 Health services and population health
Each stream offers a variety of multidisciplinary studies in fields such as cardiovascular sciences, bioethics, neuroscience, membrane biology, respiratory medicine, and psychosomatic medicine.

The IMS participates in the Royal College of Physicians and Surgeons Clinician Investigator Program (CIP).

English Language Proficiency

Applicants whose primary language is not English, and who graduated from a university where the language of instruction was not English, must demonstrate facility in the English language through the successful completion of one of the following English language proficiency tests:

Test of English as a Foreign Language

(TOEFL): a minimum score of 600 on the paper-based test and 5 on the Test of Written English (TWE); a minimum score of 250 on the computer-based test and 5 on the essay rating component; or a minimum score of 93/120 on the internet-based test and 22/30 on the writing and speaking sections.

Michigan English Language Assessment Battery (MELAB): minimum score of 87.**International English Language Testing System (IELTS):** minimum score of 7.5.**Degree of Master of Science**

Applicants are admitted under the general regulations of the School of Graduate Studies and must have graduated with a four-year B.Sc. or an M.D. degree from a recognized university and academic credentials and background preparation appropriate to the field of study. Competitive applicants should have an A- average in their final year of undergraduate study and an A- cumulative average over three of the four total years of study. Applicants lacking adequate background in biological, natural, or social sciences may be required to take undergraduate or graduate courses considered necessary to provide a proper basis for their research.

The M.Sc. program usually requires two years and includes both course work and research. To qualify for this degree, one full graduate course credit in addition to MSC 1010Y° *M.Sc. Student Seminars* is required. Students must submit a thesis on their research and pass an oral thesis examination.

Degree of Master of Health Science in Bioethics

The M.H.Sc. program is offered in collaboration with the University of Toronto Joint Centre for Bioethics and is directed to practitioners who wish to increase their knowledge and skills in bioethics by assisting them in their roles as clinician/teachers, as members of bioethics committees, etc. It is a professional master's degree program that does not require a thesis.

Please refer to the Bioethics entry in this calendar for more information about this program.

°Courses which may continue over a program. The course is graded when completed.

Degree of Master of Science in Biomedical Communications

The M.Sc.BMC program is a two-year professional Master of Science program that involves the artist in medical and health education and research.

Please refer to the Biomedical Communications entry in this calendar for more information about this program.

Degree of Doctor of Philosophy

Ph.D. degree students are accepted via one of three routes:

1 *After completion of a M.Sc. degree* (with a M.Sc. thesis) with at least A- standing from a recognized university. Such students will be expected to complete a minimum of one full graduate course equivalent, plus MSC 1011Y^o *Ph.D. Student Seminars*.

2 *Transfer from the IMS M.Sc. program.* Outstanding students in the M.Sc. program may be considered for reclassification into the Ph.D. program without writing a M.Sc. thesis. Such students must have completed one full graduate course equivalent with a minimum A- average, plus MSC 1010Y^o *M.Sc. Student Seminars*. If recommended, the student will be evaluated in an oral transfer examination within 18-24 months of initial graduate registration. The successful applicant will enter the Ph.D. program and will be expected to complete a minimum of two full graduate course equivalents (including those already completed in the M.Sc.), plus MSC 1011Y^o *Ph.D. Student Seminars*. Alternatively, the Exam Committee may decide that the student must complete the M.Sc. degree before being considered for admission to the Ph.D. program.

3 *Direct Entry into the Ph.D. Program* without having completed a M.Sc. degree. Direct-entry Ph.D. students will be required to pass a qualifying examination within 18-24 months of entry and will be expected to complete a minimum of two full graduate course equivalents, plus MSC 1011Y^o *Ph.D. Student Seminars*.

The Ph.D. graduate program emphasizes research work. Students may be required to take extra courses in addition to the degree requirements listed above. Students are expected to be on campus and participating full time until all program requirements are completed. It is expected that courses will be completed in the first year, and that the research, written thesis, and defence will be completed by the end of year 3 or 4. To qualify for the Ph.D. degree, a thesis must be submitted and the student must pass an internal examination before proceeding to the final Ph.D. oral

examination conducted by the School of Graduate Studies.

Collaborative Programs

The Institute of Medical Science participates in the following collaborative programs:

- 1** Addiction Studies
- 2** Aging, Palliative and Supportive Care Across the Life Course
- 3** Bioethics
- 4** Biomedical Engineering
- 5** Cardiovascular Sciences
- 6** Environment and Health (see Environment entry)
- 7** Health Care, Technology and Place
- 8** Knowledge Media Design
- 9** Neuroscience
- 10** Proteomics and Bioinformatics
- 11** Toxicology, Biomedical
- 12** Women's Health

For more details, consult the separate entries in this calendar.

Combined Doctor of Medicine/Doctor of Philosophy Program

Nature of the Program

The M.D./Ph.D. program is offered jointly by the Faculty of Medicine and the School of Graduate Studies. Its purpose is to provide selected and highly qualified students with the opportunity to combine their medical school experience with intensive scientific training in a chosen field. Students in this program are eligible for financial support.

Students will carry out research under the supervision of a member of a graduate department or institute at the University and should consult the appropriate department or institute regarding specific research programs.

For detailed information and application material, please contact:

M.D./Ph.D. Program
Medical Sciences Building
Room 7205
University of Toronto
Toronto, Ontario M5S 1A8
Canada

Telephone: (416) 978-8885

Fax: (416) 971-2132

E-mail: mdphd.program@utoronto.ca

Web: www.utoronto.ca/mdphd

Admission Requirements

Applicants to the M.D./Ph.D. program must be accepted by the Faculty of Medicine and meet the requirements of the School of Graduate Studies and the department in which they intend to carry out their graduate studies. Students who are undertaking graduate study at the master's level or are already in first year medical school are also eligible for this program.

Program Requirements

Applicants to the M.D./Ph.D. program may pursue the dual degrees via an integrated or a sequential route.

In the fully integrated approach, students with a four-year bachelor's degree will enter the M.D./Ph.D. program and, within a period not exceeding six years, complete the requirements of the first two years of the M.D. program and all requirements of the Ph.D. program. During this time a predetermined program of integration will be pursued which provides time allocation for both medical school and graduate study. On completion of the Ph.D. degree, students will return full time to the medical program.

In the sequential model, students with a four-year bachelor's degree enter the medical program on a full-time basis. After 18 months of medical school, they then proceed to full-time graduate work until completion of the Ph.D. degree. Students then return to medical school to complete the last 2½ years.

Organization and Program

The Centre for Medieval Studies provides inter-departmental programs in the medieval period. Students are expected to cross the limits of traditional subjects, and research is especially

encouraged in often-neglected boundary areas between traditional departments. The Centre offers its students training in basic skills and tools in order to read the materials remaining from the medieval past and to explore them with learning and imagination.

Application

Applicants for the M.A. must have an average of at least a B+ standing in their previous course work and must satisfy the Centre's additional admission requirements stated here. Applicants must arrange for two supporting letters to be sent to the Director. They will also be asked to complete forms, available on the Centre's Web site, in which they state the reasons for undertaking graduate studies in the medieval area and their qualifications for applying to do so.

Medieval Latin

All students entering the Centre are asked to improve their proficiency in Latin before registration, since there are Medieval Latin requirements for all degrees. Examinations in Medieval Latin are set at the beginning of the fall session and at the end of the spring session. All incoming students must take the Medieval Latin examination at the beginning of the fall session for placement purposes.

Applicants for the M.A. degree, full-time and part-time, must pass the M.A. Latin examination no later than September at the end of the second year after enrolment in the M. A. program.

Course training in Latin is given at four levels. A non-credit course in Classical Latin grammar and readings is given for those with little prior knowledge. MST 1000Y° *Introductory Medieval Latin* is the M.A.-level course, and MST 1001Y° *Intermediate Medieval Latin* is the Ph.D.-level course. These two courses lead specifically to the M.A. and Ph.D. Latin examinations given in the spring.

M.A. students who pass the M.A. Latin examination on arrival will receive advanced standing in Latin equivalent to a credit in MST 1000Y°, and will be required to take only three more courses for the M.A.; however, those interested in eventually proceeding to the Ph.D. are urged to take an additional Latin course in order to satisfy the Ph.D. requirement as early as possible.

Advanced seminars are also available for those wishing to study Medieval Latin literature, Vulgar Latin philology, or the like in more detail.

°Courses which may continue over a program. The course is graded when completed.

Degree of Master of Arts

An applicant for the M.A. must have completed a four-year B.A., or its equivalent, in which course work in the medieval period formed part of the program. M.A. students may be full-time or part-time; full-time students may be admitted to either a one-year or a two-year degree depending on their previous training in Latin and medieval studies.

Students may obtain an M.A. in medieval studies by course work or by a combination of course work and thesis. In the course work option, the student must successfully complete four full-course equivalents in medieval subjects; in the thesis option, three full-course equivalents are required in addition to the thesis. In either case, one of the M.A. courses must be MST 1000Y° *Introductory Medieval Latin* (or advanced credit therein). An M.A. thesis must be on a subject approved by the Centre, and the topic must be submitted to the Centre by November 30 of the M.A. year. Students who wish to present themselves for the degree at the Fall Convocation must submit two unbound copies of their thesis not later than September 1. For the Spring Convocation, the latest date of submission is March 1.

Degree of Doctor of Philosophy

Applicants must satisfy the Centre of their ability to do independent research of high quality; admission to the Ph.D. program also requires either

a a four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, with an average grade of at least A- in the applicant's overall program,

or
b a University of Toronto master's degree in medieval studies or a related field, or its equivalent from a recognized university, with an average grade of at least A- in the applicant's overall program.

In either case, applicants must also pass the M.A. Latin examination before they may be admitted to the Ph.D. program. Students in the Centre's M.A. program must apply formally for admission to the Ph.D. program on the same basis as all other applicants.

The Ph.D. is offered only on a full-time basis. During the first two years, students must take a minimum of three full courses or their equivalent, including one full course or two half-courses in one minor subject. In view of the Centre's interdepartmental nature, courses in medieval philosophy, history, music, English, and so on, that are related to the general area of the major field may be counted as minors, as long as they do not directly constitute part

of the major field proposal. MST 1001Y^o may not be counted as a minor subject or course requirement for the Ph.D.

In addition to their Ph.D. courses, students must pass the Ph.D. Latin examination, and the Centre's examinations in the French and German languages. When students have qualified in these three languages, they may proceed to the major field examination whose purpose is to demonstrate both the student's scholarly expertise in the particular area of the doctoral dissertation and a broader academic competence. Students should seek out a provisional supervisor with whom to discuss their plans for possible major and minor fields by the beginning of their second year. They will also need to contact two other academic advisors as early as possible, and no later than by the end of their second year. As soon as possible thereafter they should prepare a major field proposal according to the Centre's guidelines. The proposal must be signed by all three of the student's advisors and submitted to the Ph.D. Secretary for approval at least two months prior to the major field examination. After the proposal has been approved, the student's three-member committee will help the candidate to prepare for that examination. The major field examination ordinarily must be passed before the student registers for the fourth year of the program.

The outline of the student's proposed doctoral dissertation should be worked out by the student in close consultation with the supervisor and the advisory committee. The complete Ph.D. dissertation prospectus should be prepared according to the Centre's guidelines. The candidate will be required to defend the dissertation at the final oral examination. Five unbound copies of the dissertation must be submitted to the Centre at least ten weeks before the date of the oral examination; at the time of the summer and mid-year breaks, a longer period may be required.

Students can and do complete a Ph.D. in Medieval Studies in four years, but some students, depending upon their financial circumstances and background preparation, find that it takes longer than four years. Students intending to work in an area of medieval studies that requires the acquisition of one or more extra languages may find that it is not possible to complete a doctorate within four years.

^o Courses which may continue over a program. The course is graded when completed.

Collaborative Programs

The Centre for Medieval Studies participates in the following collaborative programs:

- 1 Ancient and Medieval Philosophy
- 2 Book History and Print Culture
- 3 Editing Medieval Texts
- 4 Women's Studies

For more details, consult the separate entries in this calendar.

Courses Available

Not all courses are offered every year. Please consult the Centre's Web site which lists the courses the Centre for Medieval Studies will offer this year as well as those offered by associated departments. A graduate course is understood to require at least two hours per week of class meeting and such research hours as may be required.

MST courses marked (PR) have prerequisites; further information may be obtained from the Centre.

Graduate Department of Molecular and
 Medical Genetics
 University of Toronto
 Medical Sciences Building
 Room 4398, 1 King's College Circle
 Toronto, Ontario M5S 1A8
 Canada

Telephone: (416) 978-8359

Fax: (416) 978-6885

E-mail: molecular.medgen@utoronto.ca

Web: www.utoronto.ca/medicalgenetics/

The Department of Molecular and Medical Genetics is located in the Medical Sciences Building, the FitzGerald Building, the Best Institute, the Hospital for Sick Children, and the Mount Sinai Hospital. The Department offers research training in a broad range of genetic systems from bacteria and viruses to humans. Research projects include DNA repair, recombination and segregation, transcription, RNA splicing and catalysis, regulation of gene expression, signal transduction, interactions of host cells with bacteria and viruses, developmental genetics of simple organisms (worms and fruit flies) as well as complex organisms (mice), molecular neurobiology, molecular immunology, cancer biology and virology, structural biology, and human genetics and gene therapy.

For detailed information concerning these areas, visit the Department's Web site.

Degree Programs in Molecular and Medical Genetics

The Department offers both the Master of Science and the Doctor of Philosophy degrees and prefers to accept students with excellent academic credentials in molecular biology, genetics, microbiology, and/or biochemistry who wish to proceed to the Ph.D. and beyond. It should be noted that admission to the Ph.D. program is highly selective and attainment of minimal standing as an M.Sc. student does not guarantee admission to the Ph.D. program.

Degree of Master of Science

Admission Requirements

Applicants with a B.Sc. or M.D. degree or equivalent are usually accepted into the M.Sc. program. See "Degree of Doctor of Philosophy" below for transfer or admission to the Ph.D. program.

Residence Requirements

Students entering the M.Sc. program are required to spend 12 months in full-time attendance.

Program Requirements

Students in the master's program must complete MMG 1012H^o (or equivalent) and MMG 1015Y^o (seminar course), and a thesis on a research project. To qualify for the degree, the student must defend the thesis at an oral examination.

Degree of Doctor of Philosophy

Admission Requirements

There are three possible routes to the Ph.D. degree:

- 1** Students may reclassify to the Ph.D. program during the first or second year in the M.Sc. program.
- 2** Students may be accepted into the Ph.D. program with a completed M.Sc. degree or equivalent from the University of Toronto or another recognized university.
- 3** Under exceptional circumstances, outstanding students with a B.Sc. degree, an M.D. degree, or equivalent, may be accepted directly into the Ph.D. program.

Residence Requirements

Students entering the doctoral program from a master's program, either through transfer or admission, are required to spend a minimum of two sessions in full-time attendance. Students entering the doctoral program from a bachelor's

program are required to spend a minimum of three sessions in full-time attendance.

Program Requirements

Students in the doctoral program must complete courses equivalent to those required for the M.Sc. degree plus MMG 1016H^o (or equivalent), MMG 1017H^o, and a thesis on a research project.

Courses of Instruction

JBB 1425H	Biophysical Methods/ <i>Staff</i>
JBB 2025H	Protein Crystallography/ <i>J. M. Rini, Staff</i>
JDB 1025Y	Developmental Biology/ <i>U. Tepass</i>
MMG 1012H ^o	Topics in Molecular and Medical Genetics I (formerly MMG 1012Y ^o)/ <i>A. Davidson, Staff</i>
MMG 1015Y ^o	Seminar/ <i>B. Derry, F. Sicheri</i>
MMG 1016H ^o	Topics in Molecular and Medical Genetics II (formerly MMG 1014Y ^o)/ <i>A. Davidson, Staff</i>
MMG 1017H ^o	Topics in Molecular and Medical Genetics III/ <i>B. Derry, F. Sicheri, Staff</i>
MMG 1420H*	Regulation of Gene Expression/ <i>J. M. Segall</i>
MMG 1425H	Signal Transduction and Cell Cycle Regulation/ <i>Staff</i>
MMG 1451H*	Genetic Analysis of Development: Yeast and Worms/ <i>H. Krause</i>

Note: Effective September 1, 2001, MMG 1012Y and MMG 1014Y will be replaced by MMG 1012H and MMG 1016H. Students enrolled previously in MMG 1012Y and MMG 1014Y will continue to take them.

Degree of Master of Science in Genetic Counselling

The Master of Science degree in genetic counselling is a full-time professional program that prepares students with the academic and clinical skills to provide genetic counselling. Genetic counselling is the provision of information to individuals and families regarding the occurrence, or risk of occurrence, of a genetic disorder or birth defect. Graduates may work as part of a health-care team to gather relevant medical and family histories, to guide further investigations, and to communicate probable

or established diagnoses, mode of inheritance, natural history, risk of recurrence, and associated options. The ability to define and address the psychosocial issues associated with a genetic disorder in a family is central to the practice of genetic counselling. This field also incorporates teaching, administrative, and research skills, which are integrated in the curriculum.

This program has been accredited by the American Board of Genetic Counseling under the Recognized New Program Status as a graduate level training program.

Admission Requirements

Applicants must have completed a four-year University of Toronto bachelor's degree with a B+ standing both cumulatively and in the final year, or its equivalent from another university. Additional requirements include prerequisite courses in biology, molecular biology/genetics, biochemistry, embryology/developmental biology, statistics, and psychology. The development of strong interpersonal skills as evidenced by extracurricular activity will be sought in both the application and interview processes. Conditional acceptance may be granted to outstanding applicants lacking the above prerequisite courses; in such instances, the courses deemed necessary must be completed with a B+ standing prior to admission.

Residence Requirements

Students entering the M.Sc. program in genetic counselling will be required to spend 18 months over a 2-year period in full-time attendance. Students will be encouraged to organize an intervening summer rotation in a geographic location of their choice.

Program Requirements

Students must complete all required course work, laboratory and clinical practica with a minimum B standing. Lectures, meetings, and rounds must be attended at a minimum of 85% of scheduled occurrences. There is no thesis requirement, but an independent research project consisting of a limited clinical research study, an extensive literature review from a novel viewpoint, or a new case presentation involving clinical, cytogenetic, and molecular work-up will be completed and presented both orally and in written format suitable for publication.

*Listing (course description) in the *Faculty of Arts and Science Calendar*, Molecular Genetics and Molecular Biology Program

^oCourse which may continue over a program. The course is graded when completed.

DEGREE OF MASTER OF ARTS

The M.A. degree is offered in three fields:

- 1 Musicology
- 2 Ethnomusicology
- 3 Music Education

Musicology

Admission Requirements

Applicants to the M.A. in musicology/theory are accepted under the general regulations. Applicants from this University with an average standing of mid-B or better over the final two years of the Bachelor of Arts specialist program or the Bachelor of Music program, or with the equivalent standing from another university, are eligible to apply. Applicants whose undergraduate degrees do not meet this standard may be required to take up to a full year of prerequisite courses. Applicants must submit an essay representative of their work in music history.

Program Requirements

The M.A. in the field of musicology is a two-year program in which students are required to take six FCEs (full-course equivalents). All students must take *Introduction to Music*

Research I and II (MUS 1000H and MUS 1001H) in year one. One language other than English is required. This will ordinarily be German except by petition to the department. We encourage the completion of the language requirement at the earliest possible opportunity. We advocate interdisciplinarity with ethnomusicology, and while the majority of electives chosen will reflect traditional scholarship in Western art music, others may be chosen to provide a broader base that includes non-Western and popular musics. To reinforce the notion of interdisciplinarity, up to one FCE may be taken from another graduate unit in the School of Graduate Studies. The primary means of evaluating quality are research essays and seminar presentations. The *M.A. Major Paper* (MUS 1990H) is optional. Students must maintain a minimum average of A- in year one of the program in order to progress to year two.

Ethnomusicology

Admission Requirements

Applicants to the M.A. in ethnomusicology are accepted under the general regulations. Applicant from this University with an average standing of mid-B or better over the final two years of the Bachelor of Arts specialist program or the Bachelor of Music program, or with the equivalent standing from another university, are eligible to apply. Applicants whose undergraduate degrees do not meet this standard may be required to take up to a full year of prerequisite courses. Applicants must submit an essay representative of their work in music history or ethnomusicology.

Program Requirements

The M.A. in the field of ethnomusicology is a two-year program in which students are required to take six FCEs (full-course equivalents). All students must take *Introduction to Music Research I and II* (MUS 1000H and MUS 1001H) in year one. *Fieldwork Methods and Practicum* (MUS 1002H), offered in alternate years, is also required. One language other than English is required: this should be relevant to a student's musical and scholarly interests. The proposed language must receive departmental approval. Students are strongly encouraged to complete the language requirement in the first year. We advocate interdisciplinarity with musicology, and while the majority of electives reflect sociomusical scholarship of non-Western and popular musics, others provide a broader base that includes traditional scholarship in Western art music. To reinforce

the notion of interdisciplinarity, up to one FCE may be taken from another unit in the School of Graduate Studies. The primary means of evaluating quality are research essays and seminar presentations. The *M.A. Major Paper* (MUS 1990H) is optional. Students must maintain a minimum average of A- in year one of the program in order to progress to year two.

Music Education

Admission Requirements

Applicants must hold the Bachelor of Music degree in music education from the University of Toronto with an average standing of mid-B or better over the final two years, or an equivalent program and standing from another university. Applicants whose undergraduate degree does not meet this standard may be required to take appropriate prerequisite courses.

Applicants will normally be required to have two years of teaching experience, although this requirement may be waived at the discretion of the department. An interview with the music education faculty must be scheduled whenever possible; with faculty approval, an assigned essay may be substituted for the interview. Appropriate letters of reference commenting on professional performance and promise are also required.

Program Requirements

All requirements for the degree must be completed within five years of first enrolment.

Students may proceed to the degree through a program of either full-time or part-time study. Eight half-course equivalents are required for the degree. Students must select a minimum of five half-course equivalents in music education, including *Research Methods in Music Education* (MUS 2111H) and *Philosophy and Music Education* (MUS 2151H). Elective courses may be chosen from the M.A./Ph.D./Mus.M./D.M.A. courses of instruction and/or other graduate courses available in the University, subject to the approval of the department. A major essay (MUS 2990Y) may be substituted for one full course with the approval of the department. All students must pass a comprehensive examination in music education (written and oral). A description of the degree requirements and courses is available on request.

DEGREE OF MASTER OF MUSIC

The Mus.M. degree is offered in nine fields:

- 1 Composition
- 2 Instrumental
- 3 Vocal

- 4 Opera
- 5 Conducting
- 6 Jazz
- 7 Collaborative Piano
- 8 Vocal Pedagogy
- 9 Piano Pedagogy

Admission Requirements

Applicants must hold the Bachelor of Music degree in the area of specialization from the University of Toronto with an average standing of mid-B or better over the final two years, or an equivalent program and standing from another university. Applicants whose undergraduate degree does not meet this standard may be required to take appropriate prerequisite courses.

Applicants in composition must submit several original compositions, at least one of which shall be with moderately large instrumentation.

Applicants in instrumental, vocal, opera, conducting, jazz, collaborative piano, vocal pedagogy, and piano pedagogy must pass an audition.

Program Requirements

1 Composition

A minimum of six full courses taken over two years is required for the degree, including MUS 3100Y and its continuation MUS 3105Y. Students may be required to take additional courses based on the results of diagnostic tests in musical analysis, counterpoint, and harmony given upon entrance. Under the guidance of an advisor, each student will prepare an original composition in large form or an electroacoustic composition of comparable dimensions which will be defended at a final oral examination.

2 Instrumental

Two recitals and seven full-course equivalents are required. The courses must include:

- MUS 4444Y and MUS 4445Y (applied lessons)

- one full course in music literature (MUS 4200Y) normally taken in the first year of the program

- two half courses selected from MUS 4600H or MUS 4606H; MUS 4610H; MUS 4615H
- one full-course equivalent chosen from a specified list approved by the department

Recitals may include a chamber music component with the approval of the department.

3 Vocal

Two recitals and seven full-course equivalents are required. The courses must include:

- MUS 4444Y and MUS 4445Y (applied lessons)

- one full course in music literature (MUS 4200Y) normally taken in the first year of the program

- two half courses selected from MUS 4600H or MUS 4606H; MUS 4610H; MUS 4615H

- one full-course equivalent chosen from a specified list approved by the department

Recitals may include a chamber music component with the approval of the department.

4 Opera

Seven full-course equivalents are required.

The courses must include:

- MUS 4444Y and MUS 4445Y (applied lessons)

- one full course in music literature

(MUS 4200Y, taken in the first year)

- Advanced Performance Studies (MUS 4620Y, taken in the second year)

- one full-course equivalent chosen from a specified list approved by the department

- two full courses in Operatic Studies (MUS 4900Y and MUS 4901Y)

Performance in operatic productions will be evaluated by a committee and assigned grades under Operatic Role I (MUS 4966Y) and Operatic Role II (MUS 4988Y).

5 Conducting

In addition to two public performances, six full-course equivalents are required. These must include:

- one full course in music literature (MUS 4200Y, normally taken in the first year)

- two half courses selected from: MUS 4600H or MUS 4606H; MUS 4610H; MUS 4615H.

Orchestral conducting majors must also complete MUS 4220H, MUS 4221H, MUS 4222Y, MUS 4223H, and MUS 4700H (choral).

Wind ensemble conducting majors must also complete MUS 4226H, MUS 4227H, and MUS 4228Y.

Choral conducting majors must also complete MUS 4223H, MUS 4224H, MUS 4225Y, MUS 4220H, and MUS 4700H (choral).

6 Jazz

Two recitals and seven full-course equivalents are required. Students must include the following courses in their programs:

- MUS 4444Y; MUS 4445Y; MUS 4300Y, normally taken in the first year of study

- MUS 4606H; MUS 4615H;

- either MUS 4310Y, MUS 4311Y, or one full-course equivalent chosen from a specified list approved by the department

Students must also include in their programs one full-course equivalent selected from one or more of the following areas:

a Small Group Jazz Ensemble Performance (MUS 4740H, MUS 4741H, MUS 4742H, MUS 4743H)

b Jazz Orchestra (MUS 4750H, MUS 4751H, MUS 4752H, MUS 4753H), or

c Vocal Jazz Ensemble (MUS 4760H, MUS 4761H, MUS 4762H, MUS 4763H)

Normally, students will be required to perform two recitals, but they may elect to replace one of them with a significant recording project. Requirements pertaining to this project will be provided upon request.

7 Collaborative Piano

Two recitals and seven full-course equivalents are required. The courses must include:

- MUS 4444Y and MUS 4445Y (applied lessons)
- one full course in music literature (MUS 4200Y) normally taken in the first year of the program
- two half courses selected from MUS 4600H; MUS 4610H; MUS 4615H
- Advanced Song Studies for Pianists (MUS 4504H)
- Sonata Coaching I (MUS 4506H)
- Advanced Repertoire for Singers and Pianists II (MUS 4214H)
- Performance Studies I: Piano-Instrumental Master Class (MUS 4730H)
- Collaborative Piano Studio Class (MUS 4502H)

Based on the outcome of preliminary consultations with the department, students may be required to take Advanced Diction Studies (MUS 4500H).

8 Vocal Pedagogy

Two recitals and seven full-course equivalents are required. The courses must include:

- MUS 4444Y and MUS 4445Y (applied lessons)
- one full course in music literature (MUS 4200Y) normally taken during the first year of the program
- two half courses selected from MUS 4600H, MUS 4610H and MUS 4615H; or MUS 4620Y
- MUS 2122H, MUS 4240H, MUS 4241H, MUS 4248H
- one half course selected from MUS 4231H, MUS 4213H, and MUS 4730H
- one half course or equivalent chosen from a list of courses approved by the department.

9 Piano Pedagogy

Two recitals and seven full courses or equivalent are required. The courses must include:

- MUS 4444Y and MUS 4445Y (applied lessons)

- one full course in music literature (MUS 4200Y) normally taken in the first year of the program

- two half courses selected from MUS 4600H; MUS 4610H; MUS 4615H

- MUS 4770H; MUS 4771H; MUS 4772H; and MUS 4773H are also required.

- one full-course equivalent must be chosen from MUS 2122H; MUS 4730H-4733H; MUS 4620Y; or from a list of courses approved by the department.

DEGREE OF DOCTOR OF PHILOSOPHY

The Ph.D. degree is offered in three fields:

- 1 Musicology
- 2 Ethnomusicology
- 3 Music Education

Musicology

Admission Requirements

This is a research degree. Applicants must hold a master's degree with specialization in musicology, ethnomusicology, or theory and must have an average standing of B+ or better. Applicants must submit, as a part of their application, an essay of approximately 3,000 words which demonstrates their ability to handle a research problem. Applicants, whether from the University of Toronto or from elsewhere, may be interviewed by the department. Exceptional students may be admitted directly to the doctoral stream with an appropriate bachelor's degree.

Program Requirements

Applicants admitted with a master's degree in musicology, ethnomusicology, or theory must complete a minimum of three full-course equivalents. The *Ph.D. Seminar* (MUS 1250H) is taken in the first session; work on *Research in Musicology* (MUS 1999H) is begun in the second session. Course work should be completed during the first year of study with an average grade of at least A-; the exception is MUS 1999H, which lays the groundwork for the dissertation research and leads to a major field examination in the middle of year two. Students may be required to take additional courses or acquire other skills to meet the needs of their proposed subjects of study.

Students must demonstrate advanced reading knowledge of German; however, with departmental permission, another non-English language may be substituted, provided it is required for the approved research. Advisory committees may require competence in ad-

ditional languages. All remaining course and language requirements, including the field exam, must be completed successfully by the end of year two.

Candidates will prepare a thesis under the direction of an advisor and a committee, and will defend the thesis at a final examination. The thesis, including bibliography and appendices, should ideally be between 75,000 and 80,000 words in length. The department will not consider a thesis that exceeds 100,000 words.

Applicants who demonstrate exceptional potential may be admitted directly into the doctoral stream with an appropriate bachelor's degree. Three full-course equivalents at the graduate level must be completed in year one with a minimum average of A-; this is a prerequisite to undertaking the requirements listed above for students with master's degree in hand.

Ethnomusicology

Admission Requirements

This is a research degree. Applicants must hold a master's degree with specialization in ethnomusicology, musicology, or music theory, but may also be in a cognate field such as anthropology or cultural studies. Applicants must have an average standing of B+ or better. Applicants must submit, as a part of their application, an essay of approximately 3,000 words which demonstrates their ability to handle a research problem. Applicants, whether from the University of Toronto or elsewhere, may be interviewed by the department. Exceptional students may be admitted directly to the doctoral stream with an appropriate bachelor's degree.

Program Requirements

Students are required to take three full-course equivalents. The department may prescribe additional courses if it is felt they are necessary to develop the knowledge and skills required for a student's proposed subject of study. By the end of the first year of registration, 2.5 full-course equivalents must be completed with at least a grade of A. The *Ph.D. Seminar* (MUS 1250H) is compulsory and must be taken in the first session. Other courses will be chosen from the departmental list; however, with departmental approval, one half course at the graduate level may be taken outside the department. In addition, *Research in Ethnomusicology* (MUS 1997H), which lays the groundwork for the dissertation, must be started at the beginning of the second session of the first year and must

be completed by the end of the first session of year two.

Advanced oral and reading knowledge of a language other than English is required: this should be relevant to a student's musical and scholarly interest. The department may also require competence in additional languages deemed necessary for a proposed area of research. Language requirements must be completed successfully by the end of year two. In the case of direct entry students, an intermediate-level language examination must be taken in the first year. All language requirements must be completed by year three.

During the first year, students are expected to discuss their interests, expectations, and research objectives with faculty members. An appropriate supervisor of MUS 1997H must then be agreed upon. The supervisor will be primarily responsible for determining the structure and content of MUS 1997H, which will include a research paper.

In the case of direct entry to the Ph.D., students must take three full-course equivalents in the first year, exclusive of MUS 1250H and MUS 1997H. An average grade of at least A- must be maintained to continue with the doctorate; otherwise, the student will be required to transfer into the master's program. Successful students go on to take three more full-course equivalents in the second year, inclusive of MUS 1250H in the first session and MUS 1997H from the beginning of the second session.

All course requirements must be completed by the end of year two (year three for direct entry students).

Music Education

Admission Requirements

Applicants must hold a master's degree in music education from this university with an average standing of B+ or better, or an equivalent degree and standing from another university. An interview with the music education faculty must be scheduled whenever possible. An assigned essay may be substituted for the interview with faculty approval. Applicants must provide their results on the Miller Analogies Test. At the discretion of the faculty, applicants may be required to provide a videotape of their teaching expertise. Appropriate letters of reference commenting on the applicant's teaching experience, music performance ability, and academic ability are also required.

Program Requirements

1 A total of six full-course equivalents is required. At the discretion of the department, the student may receive credit for up to three full-course equivalents from an acceptable master's degree program. At least two full-course equivalents (including MUS 2995Y *Music Education Doctoral Research Project*) must be taken from the departmental offerings in music education. The balance of the student's required program must be approved by the department and may include courses from the M.A./Mus.M./Ph.D./D.M.A. list and/or from another graduate unit in the School of Graduate Studies.

2 Students must be registered full time, on campus for a minimum of two sessions, in order to be in such geographical proximity as to be able to participate fully in the department's activities associated with the program.

3 As early as possible in the second year, the student will submit a thesis proposal which must be approved by the end of that year. On approval of the proposal by the music education division of the department, a principal advisor and an advisory committee of at least three members (including the advisor as chair) will be appointed. The committee will meet with the student at least two times each academic year.

4 Language requirements, if any, will be established by the student's advisory committee, based on specific research needs.

5 Upon successful completion of the comprehensive examination, the candidate proceeds to complete:

- a** an oral defence of the thesis proposal,
- b** a thesis under the direction of an advisor, and
- c** an oral defence of the thesis at a final examination.

DEGREE OF DOCTOR OF MUSICAL ARTS

The D.M.A. degree is offered in two fields:

- 1** Composition
- 2** Performance

Composition

Admission Requirements

Applicants for the Doctor of Musical Arts (D.M.A.) in composition must hold the degree of Master of Music in composition from the University of Toronto, or its equivalent from another university, with an average standing of B+ or better. Two or more extended compositions in various media and a recording of at least one of these works must be submitted together

with the application and complete academic credentials.

Program Requirements

1 Students must take a minimum of five full-course equivalents, including MUS 3300Y, MUS 3305Y, and MUS 3999Y (research project, selected in consultation with the advisory committee). Students entering from outside the University of Toronto will be given diagnostic tests in musical analysis, counterpoint, and harmony, the result of which may be additional course requirements.

Upon completion of the course work, students are required to present a recital of original works (MUS 3888Y) to the satisfaction of the department. In some cases professional quality tapes of performances totalling the equivalent of a full recital may be substituted.

2 The thesis for the Doctor of Musical Arts shall be an extended composition approved by the department, prepared under the supervision of an advisory committee and defended at the final oral examination.

3 Students must complete all requirements for the D.M.A. within six years.

Performance

Admission Requirements

Applicants for the Doctor of Musical Arts (D.M.A.) in performance must hold the degree of Master of Music in performance from the University of Toronto, or its equivalent from another university, with an average standing of B+ or better. Applicants are required to pass an audition. They are also required to submit, as part of their application, an essay of approximately 3,000 words which demonstrates their ability to handle a research problem. Applicants, whether from the University of Toronto or elsewhere, may be interviewed by the department.

Program Requirements

Applicants admitted with a master's degree in performance must complete a minimum of five full-course equivalents. The *D.M.A. Seminar* (MUS 4800H) is taken in the first session and work on *Research in Performance* (MUS 4899H) is begun in the second. *Advanced Applied Music I and II* (MUS 4844Y and MUS 4845Y) are also required. The two remaining full course requirements must be graduate seminar courses. Course work should be completed by the end of the second year of study with an average grade of at least A-. Exceptions to the time of completion are *Research in Performance* (MUS 4899H), which lays the groundwork for the dissertation research and

leads to a major field examination in the middle of year two, and *Advanced Applied Music II* (MUS 4845Y). Students may be required to take additional courses or acquire other skills to meet the needs of their proposed areas of study.

Students will also be required to perform three D.M.A. recitals - MUS 4866Y, MUS 4877Y, MUS 4888Y. These recitals are in addition to the five full course equivalents. The format of these recitals will be determined in consultation with the major teacher and the supervisory committee.

In addition, reading knowledge in one language other than English is required. The required language will be determined by the department. The department may require competence in additional languages. All remaining course and language requirements, including the field exam, must be completed successfully by the end of year two.

COLLABORATIVE PROGRAMS

The Department of Music participates in the following collaborative programs:

1 Book History and Print Culture

2 Editing Medieval Texts

For details, consult the separate entries in this calendar.

COURSES OF INSTRUCTION

Final course offerings may vary. Students should consult the departmental handbook.

 Canada

Telephone: (416) 978-3181

Fax: (416) 978-3305

Web: www.utoronto.ca/nmc

Applicants are accepted under the general regulations provided that they also satisfy the departmental requirements for each of the degree programs listed below. Two letters of reference are required and should be sent directly to the Coordinator of Graduate Studies for the Department. All applicants must also submit a statement of academic intent to the Coordinator of Graduate Studies.

Prospective students to either the M.A. or Ph.D. program must submit their applications for admission by January 15. No separate fellowship application is required. Later applications will be considered only in exceptional circumstances.

Students applying for admission to the doctoral stream (presently defined as Ph.D. years one to five) will automatically be considered for funding as will continuing doctoral stream students. The funding package includes a minimum basic stipend and fees. Funding is guaranteed for at least five years on the condition that eligibility requirements as outlined in the departmental and SGS awards policies are met. The package may comprise a variety of components such as major external awards, major internal awards, Teaching Assistantships, Research Assistantships, and University of Toronto Fellowships. Presently M.A. students are not included in the funded cohort; therefore, M.A. students should seek funding from other sources.

Graduate students in the Department of History who are interested in Islamic and Middle Eastern history from medieval to modern times may take courses in Near and Middle Eastern Civilizations and work under the supervision of Near and Middle Eastern Civilizations historians.

Degree of Master of Arts

The requirement for admission to this degree is a four-year B.A. in a relevant program from a recognized university with an average of at least B+, or equivalent, in the final year. Depending upon the amount of undergraduate preparation, students may be enrolled in

either a two-year or a one-year program, with a normal course load of three courses per year. The Department may recommend enrolment as Special Students to those applicants without sufficient background preparation.

Students desiring a concentration in Islamic Art and Material Culture shall have at least six courses in Art and Near and Middle Eastern Civilizations (a minimum of two in each), and a reading knowledge of French or German at the time of admission. This is normally a two-year program.

Degree of Doctor of Philosophy

Before being accepted as students for this degree, applicants must normally have obtained an M.A. degree in a relevant program from a recognized university with at least an A- average or equivalent in the courses taken for the M.A. program and must also satisfy the Department as to their ability to do independent research. At its discretion, the Department may offer direct entry to exceptionally qualified applicants with a bachelor's degree. The program of study for all students will be determined in consultation with the Department and will include written and oral general examinations. These examinations will be taken no later than January in the year following the completion of course work for the Ph.D. program.

Evidence of competence in primary source language(s) relevant to the student's research must be demonstrated at the time of admission. Students will be required to demonstrate reading comprehension in two languages of modern scholarship (typically French and German), the first by the end of their first year in residence, and the second by the end of their second year of residence. Other languages, such as Latin, Arabic, and Modern Hebrew, may be substituted for one of these, as the case may demand. In some cases, the Department may require competence in another language relevant to the student's program. The choice of language(s) must be approved by the Department.

Degree students are required to be registered on campus for the period during which course work requirements are being fulfilled and in no case for less than two academic years. The minimum requirements for the degree will normally be six full graduate courses or equivalent. In approved circumstances, credit for up to three of these courses may be provided by the M.A. program or its equivalent.

The following two fields are offered in both the M.A. and Ph.D. programs and are listed together with their areas of specialization:

Ancient Near Eastern Studies

Near Eastern Archaeology (Egyptian, Syro-Palestinian, Islamic)
Assyriology
Near Eastern History
Egyptology
Hebrew and Judaic Studies
Aramaic-Syriac Studies

Middle Eastern and Islamic Studies

Syriac
Arabic Studies
Persian Studies
Turkish Studies
History of the Islamic World and the Modern Middle East
Islamic Religion and Philosophy
Islamic Art and Material Culture

Collaborative Programs

Besides offering degree programs in Near and Middle Eastern Civilizations, the Department participates in two collaborative programs:

1 Jewish Studies

2 Women's Studies

For more information on these programs, see the separate entries in this calendar.

Courses of Instruction

1 Languages. A number of graduate courses in Near and Middle Eastern Civilizations demand ability to handle primary sources in the original language or languages. Some of the courses listed below may require reading knowledge of European languages.

2 Course Availability. Not all courses are offered every year. Please consult the Department's *Graduate Handbook* and Web site for courses offered in the current academic year.

Akkadian Language and Literature

- NMC 1001Y Introduction to Old Babylonian/
P. A. Beaulieu
- NMC 1002Y Selected Standard Babylonian
Texts/ P. A. Beaulieu

The graduate units of Biochemistry, Biomaterials and Biomedical Engineering, Dentistry, Human Development and Applied Psychology, Laboratory Medicine and Pathobiology, Medical Biophysics, Medical Science, Molecular and Medical Genetics, Pharmaceutical Sciences, Pharmacology, Physiology, Psychology, Rehabilitation Science, Speech-Language Pathology, and Zoology participate in the graduate program in Neuroscience at the University of Toronto. Participating units in the program contribute courses and provide facilities and supervision for graduate research. Applicants who wish to enrol in the Collaborative Program must apply to and be admitted to both the Collaborative Program and a graduate degree program in one of the collaborating units. Students must follow a program of studies acceptable to both the participating unit and the Neuroscience Program. Upon successful completion of the

requirements, students receive in addition to the master's degree or Ph.D. in their discipline, the notation "Completed Collaborative Program in Neuroscience" on their transcripts and a certificate. Students interested in joining the program should contact the Program in Neuroscience office to obtain an application form. Students should register within one month of initial registration in the participating unit. The Program in Neuroscience Web site provides summaries of research fields of all the faculty in the program and their graduate unit affiliations and addresses, as well as additional information on neuroscience courses.

Students in the program receive the *Program in Neuroscience* newsletter and a monthly calendar listing neuroscience lectures held on campus. The program runs a Distinguished Lecturer series of talks by eminent neuroscientists and an annual poster day which students are required to attend. The students in the program also organize various social events during the year.

Program Requirements

- 1 The thesis topic must be in the neuroscience area.
- 2 The student's supervisor must be a member of the Program in Neuroscience (PIN).
- 3 The student must have an adequate background in general neuroscience.
- 4 The student must complete at least one half-course for the master's degree and at least one full course (or equivalent) for the Ph.D. degree from the list of courses approved by the Program in Neuroscience which is listed below.
- 5 The student must attend the Annual PIN Poster Day and present his/her work at least once.
- 6 The student must attend at least 75% of the lectures in the PIN Distinguished Lecturers Series.
- 7 If master's students continue on to a Ph.D. degree program after completing a M.Sc. or M.A. and wish to remain in the Neuroscience program, then these students will need to
 - a register again and
 - b fulfil all the requirements for each degree (e.g., students must present a poster in each degree program).

Courses of Instruction

Neuroscience courses offered by the participating units are listed below. Not all courses are offered each year.

DEN 1060H Oral Physiology: Sensory and
Neuromuscular Function
HDP 3286H Developmental Neurobiology

JNR 1444Y	Fundamentals of Neuroscience: Cellular and Molecular
JNS 1000Y	Fundamentals of Neuroscience: Systems and Behaviour
JPM 1005Y	Behavioural Pharmacology
JPY 1007Y	Neuropharmacology of Neurotransmitter Receptors
JYG 1555H	Topics in Cellular and Molecular Neurobiology
LMP 1003Y	Seminar on Diseases of the Central Nervous System
MSC 1006H	Advanced Neuroanatomy
MSC 1085H	Molecular Approaches to Mental Health and Addictions
MSC 6000H	Special Topics in Anatomy Requires prior permission of the Neuroscience Program Director
PCL 1012H	Cognitive Neuropsychology
PSL 1024H	Advanced Topics: Endocrinology and Neuroendocrinology
PSL 1026H	Advanced Topics: Experimental Cell Physiology
PSL 1047H	Advanced Topics: Somatosensory and Pain Neuroscience
PSL 1053H	Advanced Topics: Critical Assessment of Ion Channel Function
PSL 1068H	Advanced Topics: Molecular Basis of Behaviour
PSY 5101H	Mechanisms of Behaviour
PSY 5103H	Learning and Plasticity
PSY 5104H	Neuropsychology
PSY 5110H	Advanced Topics in Behavioural Neuroscience I
PSY 5111H	Advanced Topics in Behavioural Neuroscience II
PSY 5112H	Advanced Topics in Behavioural Neuroscience III
PSY 5130H	Advanced Topics in Neuropsychology I
PSY 5131H	Advanced Topics in Neuropsychology II
PSY 5132H	Advanced Topics in Neuropsychology III
PSY 5201H	Audition
PSY 5202H	Vision
PSY 5203H	Higher Cognition
PSY 5204H	Attention
PSY 5205H	Memory
PSY 5210H	Advanced Topics in Perception I
PSY 5211H	Advanced Topics in Perception II

PSY 5212H	Advanced Topics in Perception III
PSY 5220H	Advanced Topics in Cognition I
PSY 5221H	Advanced Topics in Cognition II
PSY 5222H	Advanced Topics in Cognition III
REH 1510H	Disordered Restorative Motor Control

Other Courses

Courses not specifically in neuroscience which do not fulfil the program requirements as neuroscience courses but might be useful for neuroscience students.

JBL 1507H	Biochemistry of Inherited Disease
JDB 1025Y	Developmental Biology
JNP 1017H+	The Molecular and Biochemical Basis of Toxicology
JNP 1018H+	Current Topics in Molecular and Biochemical Toxicology
PHM 1122H	Fundamentals of Drug Discovery
PSL 1054H	Physiological Instrumentation and Electronics
PSL 1472H	Sleep Physiology and Chronobiology
PSY 5102H	Motivational Processes
SLP 1522Y	Speech Physiology and Acoustics
SLP 1533Y	Aphasia
SLP 1534Y	Motor Speech Disorders
SLP 3001H	Theoretical Foundations of Communication Sciences

+ Extended course. For academic reasons, course work is extended into session following academic session in which course is offered.

Nuclear Engineering

Education and research in Nuclear Engineering includes the study of nuclear processes for purposes such as power generation, medicine, irradiation technology, and industrial use of radioisotopes. The main subjects of study include nuclear reactor research (in reactor materials, corrosion, and heat transfer), nuclear safety, radiochemistry, radiation chemistry, environmental monitoring, and non-destructive testing.

Opportunities for research in areas relevant to Nuclear Engineering exist primarily in the Departments of Chemical Engineering and Applied Chemistry, Materials Science and Engineering, and the Institute for Aerospace Science and Engineering. Some relevant courses are listed in the respective calendar entries of various departments within the Faculty of Applied Science and Engineering.

Applicants may obtain further information on enrolment procedures, academic requirements, and scholarship applications from the Coordinator of Graduate Studies in each of these departments.

Degree of Master of Nursing

The purpose of the Master of Nursing (M.N.) program is to prepare advanced nursing practitioners with specialized knowledge, skills, and expertise in a defined area of nursing to design programs and influence practice in that area.

The program offers three fields of study:

- 1 Nursing administration
- 2 Clinical nursing
- 3 Acute care nurse practitioner
 - a Adult acute care
 - b Child acute care

For Nursing Administration and Clinical Nursing fields, the program requirement is nine courses, including one clinical course.

For the Acute Care Nurse Practitioner field, the program requirement is seven half-courses (including two clinical courses) and one full course. This field of study is offered in both e-learning and campus-based formats.

Admission Requirements

Applicants must hold the B.Sc.N. degree of the University of Toronto or an equivalent degree. Applicants must have obtained at least a mid-B standing in the final year of undergraduate study and, in addition, must have obtained at least B standing in the next-to-final year. Applicants seeking admission to the Acute Care Nurse Practitioner field must also have two years of clinical experience. For further information about admission requirements and for application forms, please contact the Graduate Department of Nursing Science. Deadline for applications is February 1.

Course and Degree Requirements

- 1 To qualify for the degree, a student shall complete a program of study outlined by the Graduate Department of Nursing Science.
- 2 Students are strongly encouraged to enrol on a full-time basis; however, a part-time option is available. Part-time students must be enrolled at minimum in two out of three sessions in each academic year.
- 3 The program will normally be completed within two years of full-time study. All requirements for the degree must be completed satisfactorily within six calendar years from the date of the student's first enrolment in the program.

Combined Master of Health Science/ Master of Nursing Program in Health Administration and Nursing Science

The Combined M.H.Sc./M.N. Program in Health Administration and Nursing Science provides an opportunity for students with a strong interest in both nursing and health administration to engage in an integrated and coherent program of study leading to the concurrent receipt of the M.N. and M.H.Sc. (Health Administration) degrees within 2.5 years of full-time study.

During the first year of the program, students enrol in the Faculty of Nursing and complete eight half-courses for the M.N. degree. During the second year, students enrol in the Department of Health Policy, Management and Evaluation (HPME) and complete 11 half-courses towards the M.H.Sc. (Health Administration) degree plus two electives that can be taken from either degree program. In the third year, two-half courses are taken in HPME.

Admission Requirements

Admission to the combined program is conditional upon independent admission to each of the participating graduate units. Applicants will normally be required to complete separate application forms on a concurrent basis and pay the application fees for admission to the M.N. Program and the M.H.Sc. (Health Administration) Program.

Students must satisfy the full requirements for each of the participating graduate units. The aggregate criteria listed below must be satisfied to ensure that an application is considered complete for the purpose of entry into the Combined M.H.Sc./M.N. Program in Health Administration and Nursing Science. Applicants must:

- 1 be accepted under the general regulations of the School of Graduate Studies. Meeting the minimum requirements does not ensure admission.
- 2 hold a University of Toronto B.Sc. degree in nursing or a degree from an equivalent program in a recognized university.
- 3 have obtained a B+ standing over the last two years of undergraduate study. The student is expected to have good academic standing in non-nursing as well as nursing subjects.
- 4 have successfully completed an introductory course in statistics prior to admission.
- 5 have at least three years of work experience in the health care field.

Program Requirements

The M.N. component of Combined M.H.Sc./M.N. Program in Health Administration and Nursing Science comprises eight required half-courses. The M.H.Sc. (Health Administration) component comprises 13 required half-courses. In addition, the Combined Program requires two elective half-courses that can be taken from either the M.N. or M.H.Sc. course offerings.

Degree of Doctor of Philosophy

The purpose of the program leading to the degree of Doctor of Philosophy is to prepare scientists with the required analytical and research skills for the study of clinical or administrative nursing problems.

Each student will choose to study in one of three research fields:

- 1 Nursing science of healthy individuals, families, and communities;
- 2 Nursing science of individuals and families experiencing acute and chronic illness;
- 3 Science of nursing administration.

The program of study will include a minimum of five courses, including NUR 1081Y *Ph.D. Student/Faculty Seminars*, and a thesis.

Admission Requirements

Applicants must have a University of Toronto master's degree in nursing or a degree from an equivalent nursing program in a recognized university. Applicants must have achieved at least a B+ standing in their master's program. For further information about admission requirements and for application forms, please contact the Graduate Department of Nursing Science. Deadline for applications is February 1.

Course and Degree Requirements

1 In order to qualify for the degree, a student shall complete a program of study approved by the Graduate Department of Nursing Science. The student's program will be planned in consultation with a supervisory committee. It will be designed to support the student's research and to provide depth and breadth in the area of study. An examination of the dissertation proposal is required, usually in the second year and no later than August 31 of the third year, at the completion of the minimum course work requirements. The student's dissertation will be defended in the departmental oral examination and the final oral examination of the School of Graduate Studies.

2 All requirements for the degree must be completed satisfactorily within six calendar

years from the date of the student's first enrolment in the Ph.D. program.

Flexible-time Option

Applicants must indicate on the application form their preference for the flexible-time option. The admission, course, and degree requirements for the flexible-time option are identical to those listed above for the full-time Ph.D. program. However, students will have up to eight years to complete the program. An examination of the dissertation proposal is required, usually in the third year and no later than the fourth year. Students are required to pay full-time fees for the first four years of their program; thereafter, they will pay part-time fees.

Post-Master's Nurse Practitioner Diploma**Admission Requirements**

Applicants to the Post-Master's Nurse Practitioner (PMNP) Diploma program must have completed a master's degree in nursing or an equivalent graduate degree that includes clinical nursing experience and a minimum of two years of clinical nursing experience. A signed preceptor agreement is required. Preference is given to applicants who have one or more years in an advanced nursing practice role (in addition to clinical experience) and support within their employment setting.

Program Requirements

The PMNP Diploma program requires three full courses (including two clinical courses) and one half-course (including clinical component). Course options focus on either:

- a acute care adult or
- b acute care child

During the final six months of the program, learners are immersed in clinical practice.

The program can be completed in one year on a full-time basis or 20 months on a part-time basis. Part-time students must be enrolled in a minimum of two out of three sessions in each academic year.

Courses of Instruction

Course descriptions, details of prerequisites, sequencing, and answers to commonly asked questions are posted on the Web site at www.nursing.utoronto.ca.

Collaborative Programs

Students in the Graduate Department of Nursing Science may choose to participate in the following collaborative programs:

- 1 Aboriginal Health
 - 2 Aging, Palliative and Supportive Care Across the Life Course
 - 3 Bioethics
 - 4 Ethnic and Pluralism Studies
 - 5 Health Care, Technology and Place
 - 6 Health Services and Policy Research
 - 7 Women's Health
 - 8 Women's Studies
- For more information, consult the separate entries in this calendar.

Courses of Instruction

- | | | | |
|-----------|---|-----------|--|
| NUR 1012H | Culture and Relations | NUR 1042H | Responses of Children and Families to Illness in Childhood |
| NUR 1014H | The Politics of Aboriginal Health | NUR 1043H | Theories of Interpersonal Process |
| NUR 1016H | Health Systems, Policy, and the Profession | NUR 1044H | "Thinking" About Children: Implications for Health Care Research, Practice and Policy |
| NUR 1017H | History of Ideas in Nursing Practice | NUR 1045H | Theories of Pain: Impact on the Individual, Family and Society |
| NUR 1021H | Nursing Ethics | NUR 1046H | Persistent Illness: Theoretical, Research and Practice Implications |
| NUR 1022H | Research Design, Appraisal, and Utilization | NUR 1047H | Community Participation and Health |
| NUR 1023H | Critical Issues in the Design and Conduct of Controlled Trials of Behavioural Health Care Interventions (For Ph.D. students only. Prerequisite: Introductory graduate course in research design and biostatistics. For students planning an RCT for their thesis research.) | NUR 1048H | Politics of Health in the Community |
| NUR 1024H | Foundations of Qualitative Inquiry | NUR 1049H | Nursing Approaches to Common Physiological and Behavioural Manifestations of Critically Ill Patients |
| NUR 1025H | Doing Qualitative Research: Design and Data Collection | NUR 1050H | Coping With Illness |
| NUR 1026H | Evaluating Interventions in Clinical Settings (Prerequisites: Intermediate level statistics course (graduate level), basic knowledge of research design and methods, and advanced knowledge of statistical analyses.) | NUR 1051H | Assessment and Management of Common Responses to Illness |
| NUR 1028H | Introduction to Qualitative Research: Methodologies, Appraisal and Knowledge Translation | NUR 1052H | Perinatal Nursing Sciences |
| NUR 1031H | Technology and Place in Contemporary Health Care Work | NUR 1056H | Places, Programs, and People Who Provide Care |
| NUR 1032H | Group Process and Professional Practice | NUR 1058H | Aging, Gender and Equity |
| NUR 1034H | Program Planning and Evaluation in Nursing | NUR 1059H | Informatics: Theory and Application in Nursing |
| NUR 1037H | Aging and Place: Social and Policy Transitions | NUR 1060H | Leadership and Management of Nursing and Health Services |
| NUR 1039H | Women's Health Across the Lifespan | NUR 1061H | Patient Information Systems/ Workload Measurement |
| NUR 1040H | Issues in Women's Health Care | NUR 1062H | Measuring Nursing Care Effectiveness: Economic and Financial Perspectives |
| NUR 1041H | Caring for Children: Places, Programs and Caregivers | NUR 1064H | Behaviour in Health Care Organizations |
| | | NUR 1066H | Theoretical Basis for Methodology for Quality Improvement in Nursing Services |
| | | NUR 1067H | Recovery-Oriented Mental Health Systems of Care |
| | | NUR 1068H | Youth and Mental Health Promotion |
| | | NUR 1072Y | Advanced Nursing Practice Scholarship |
| | | NUR 1080H | Theoretical Perspectives in Nursing Science (Required course for Ph.D. students only) |
| | | NUR 1081Y | Ph.D. Student/Faculty Seminars |
| | | NUR 1082H | Knowledge Production in Nursing and Health |
| | | NUR 1090H | Measuring Nursing Phenomena (Prerequisite: completion of an advanced graduate level statistics course) |
| | | NUR 1100Y | Pathophysiologic Concepts and Therapeutics |

-
- NUR 1101H Advanced Health Assessment
and Clinical Reasoning (Adult)
(Pre- or corequisite: NUR 1022H)
- NUR 1102H Advanced Health Assessment
and Clinical Reasoning (Child)
(Pre- or corequisite: NUR 1022H)
- NUR 1109Y Advanced Nursing Practice in
Caring for Clients and Families I
(Prerequisites: Successful completion
of NUR 1017H, NUR 1022H, NUR
1101H or 1102H, NUR 1103H, and NUR
1104H)
- NUR 1110Y Advanced Nursing Practice
in Caring for Clients and
Families II (Credit/No Credit)
(Prerequisite: NUR 1109Y. Pre- or
corequisite: NUR 1034H)

Joint Courses

E-mail: grad.nutrisci@utoronto.ca

Web: www.utoronto.ca/nutrisci

The Department of Nutritional Sciences offers graduate programs in the basic science, clinical, and community aspects of human nutrition. Research projects range from the molecular to the community level of inquiry. Applicants with appropriate preparation in health sciences will be admitted under the general regulations of the School of Graduate Studies.

A Ph.D. or M.Sc. degree in Nutritional Sciences with specialization in Biomedical Toxicology can be taken through this Department. For details of the collaborative program, please consult the appropriate entry in this calendar listed under Toxicology, Biomedical.

Degree of Master of Science

Applicants are admitted under the general regulations of the School of Graduate Studies. Students with diverse backgrounds are encouraged to apply.

The minimum admission requirement is an A- standing in the final two years or evidence of strong potential as a researcher.

The minimum program length for full-time students is 12 months. Students will attend and participate in NFS1204Y *Master's Seminars in Nutritional Sciences* throughout their period of full-time registration and will complete a minimum of two half-courses. For students with undergraduate training in nutritional sciences, at least one of these courses must be taken in the Department. Students with undergraduate training in disciplines other than nutritional sciences must take at least two half-courses from the Department. In addition, a course in statistical methods or research design and analysis is required if not completed previously. Submission of a thesis on an approved research area and its defence at an oral examination are required.

A limited number of students will be admitted to the M.Sc. program on a part-time basis.

Degree of Master of Health Science

(Community Nutrition)

See Department of Public Health Sciences for information.

Degree of Doctor of Philosophy

Applicants may enter the Ph.D. program directly from a bachelor's degree if their background is deemed appropriate and they have an A- or better average in their final two years. They may also enter the Ph.D. program with an appropriate M.Sc. degree with at least an A- standing or evidence of strong potential as a researcher.

Exceptional students may be allowed to reclassify into the Ph.D. program after one year without completing the M.Sc. on the recommendation of an advisory committee and successful completion of a reclassification examination.

The residence requirement for students admitted with a bachelor's degree is three years. Students admitted with a master's degree have a residency requirement of two years.

Although it is expected that students from either background can complete their Ph.D. in a period of four years of full-time study, research, and thesis preparation, some students may require longer.

During this time students will attend and participate in NFS 1304Y *Doctoral Seminars in Nutritional Sciences*. Those entering with a bachelor's degree will also complete a minimum of six half-courses; those entering with an M.Sc. degree, a minimum of four half-courses. The courses will be chosen by each student to provide an appropriate background for his or her area of investigation. It is expected that all students will have an adequate knowledge of research design and statistics through course work in their past or the current graduate program. The choice of courses will be made in consultation with the supervisor and the student's advisory committee and is subject to the approval of the Department. The student will also complete a comprehensive examination in nutritional sciences. To qualify for the Ph.D. degree, a thesis must be submitted and the student must pass the departmental examination before proceeding to the final oral examination conducted by the School of Graduate Studies.

Courses of Instruction

Not all courses are offered every year. Please consult the Department regarding course offerings.

NFS 1201H	Public Health Nutrition/V. Tarasuk
NFS 1204Y ^o	Master's Seminars in Nutritional Sciences (Credit/No Credit)/ Staff
NFS 1208H	Field Observation and Nutrition Program Laboratory I/A. Fox

Degree of Master of Science in Occupational Therapy

The objective of the professional Master of Science program in Occupational Therapy (M.Sc. OT) is to prepare graduates to:

- a** practice independently in a variety of roles, such as consultants and case managers, and in a range of settings, such as acute care, interdisciplinary programs, private practice, and primary health care,
- b** supervise rehabilitation assistants, OT aides, or other support workers,
- c** use principles of research-based practice to guide and evaluate service delivery,
- d** contribute to research that will advance the knowledge base of the discipline,
- e** assume management roles,
- f** take leadership roles in the profession,
- g** take leadership roles in health care and other sectors including social services, education, and labour,
- h** fill academic-practitioner positions, and
- i** pursue doctoral studies and careers in academia or clinical research.

The M.Sc.OT program prepares students in advanced academic and professional knowledge and applied research skills for leadership in occupational therapy practice. The program emphasizes the application of theory and research evidence to clinical practice through rigorous studies in occupational therapy and research production and utilization. Graduates are eligible to write the certification examination of the Canadian Association of Occupational Therapists, a requirement for registration with the College of Occupational Therapists of Ontario and most other professional regulatory colleges in Canada. Practice in another country generally requires the graduate to pass the licensing requirement specific to that country.

Admission Requirements

Apply to the department using the Ontario Rehabilitation Sciences Programs Application Service (ORPAS) at www.ouac.on.ca/orpas/, a centralized service of the Ontario Universities' Application Centre. The application (COMPASS.ORPAS) and complete instructions are available online. All admission requirements are outlined in the application. Applications are available approximately mid-October each year, and the submission deadline is approximately mid-January.

Facility in the English language must be demonstrated by all applicants educated outside Canada whose primary language is not English and who graduated from a university where the language of instruction and examination was not English. This requirement is a

condition of admission and must be met by the end of April. This requirement may be satisfied through the successful completion of one of the English language proficiency tests listed in the School of Graduate Studies Calendar with at least the minimum acceptable scores listed. The department strongly prefers the Test of English as a Foreign Language (TOEFL) and requires a minimum score of 600 on the paper-based test, or 250 on the computer-based test, accompanied by a minimum score of 5 on the Test of Written English; or 100/120 on the Internet-based test with 22/30 on the speaking section and 22/30 on the writing section.

Admission is determined through an evaluation of academic and non-academic materials, with heavier weighting placed on the academic materials. Eligible applicants must have a four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, with a minimum mid-B average in the final year. To determine initial ranking only, the department will review the last 10 full-course equivalents completed at the undergraduate level by the application deadline. It is recommended that students consider taking prior study in statistics, physiology/biology (vertebrate), and psychology as this may enhance their learning in the program.

Program Requirements

This is a two-year program of continuous study. The curriculum is presented in six consecutive sessions, with a range of four to six concurrent courses in each session. First year courses include research; foundations of occupational science; occupational therapy practice; assessment in occupational therapy; structure and function; psychological, neuro-motor and neuro-cognitive perspectives. Second year students engage in intensive research projects and three parallel courses in enabling occupation across childhood, adulthood, and older adulthood, respectively. There are four full-time block fieldwork components within the program of study. Methods of study include interactive classes, divergent case method, skill labs, self-study, computer-assisted instruction, and fieldwork placements. Students enter the program in September, complete the required 23-course program in 24 consecutive months through full-time study, and graduate at Fall Convocation.

Required Courses of Instruction

OCT 1111Y	Occupational Science: Foundations for Occupational Therapy/ <i>R. Renwick</i>
OCT 1121H	Research Issues and Approaches in Occupational Therapy/ <i>B. Kirsh, J. Davis</i>
OCT 1122H	Methods in Practice-Based Research/ <i>S. Friefeld</i>
OCT 1123H	Framing Practice-Based Research/ <i>J. Cameron</i>
OCT 1131H	Occupational Therapy Practice I/ <i>S. Rappolt</i>
OCT 1132H	Occupational Therapy Practice II/ <i>D. Cameron, B. Secker</i>
OCT 1133H	Occupational Therapy Practice III/ <i>A. Duncan</i>
OCT 1141H	Assessment in Occupational Therapy/ <i>M. Keightley, R. Stack</i>
OCT 1152Y	Musculoskeletal Structure and Function/ <i>P. McKee</i>
OCT 1162Y	Psychosocial Perspectives in Occupational Therapy/ <i>B. Kirsh</i>
OCT 1172Y+	Neuro-motor/Neuro-cognitive Perspectives in Occupational Therapy/ <i>D. Hebert, D. Cameron</i>
OCT 1183Y	Occupational Therapy Fieldwork I/ <i>D. Barker</i>
OCT 1190Y°	Building Practice Through Mentorship/ <i>A. Fourn, S. Farrow</i>
OCT 1220Y°	Graduate Research Project/ <i>A. Mihailidis</i>
OCT 1251H	Enabling Occupation with Children: Part I/ <i>P. Rigby</i>
OCT 1252H	Enabling Occupation with Children: Part II/ <i>D. Reid</i>
OCT 1261H	Enabling Occupation with Adults: Part I/ <i>M. Iwama</i>
OCT 1262Y	Enabling Occupation with Adults: Part II/ <i>L. Cockburn, D. Dawson, P. McKee</i>
OCT 1271H	Enabling Occupation with Older Adults: Part I/ <i>A. Colantonio</i>
OCT 1272H	Enabling Occupation with Older Adults: Part II/ <i>B. Trentham</i>
OCT 1281Y	Occupational Therapy Fieldwork II/ <i>D. Barker</i>
OCT 1282Y	Occupational Therapy Fieldwork III/ <i>R. Stack</i>
OCT 1283Y	Occupational Therapy Fieldwork IV/ <i>R. Stack</i>

°Courses which may continue over a program. The course is graded when completed.

+ Extended course. For academic reasons, course work is extended into session following academic session in which course is offered.

The Department of Pharmaceutical Sciences offers research opportunities and courses in four principal areas:

1 Molecular Pharmacology and Toxicology

drug receptor interactions, molecular biology, electrophysiology, biochemistry, clinical, adverse drug reactions, and drug metabolism

2 Pharmaceutics

pharmaceutical and medicinal chemistry, pharmaceutical formulations, radiopharmaceutical synthesis, drug discovery, and biophysical chemistry

3 Pharmacokinetics

basic pharmacokinetics and clinical research

4 Social and Administrative Pharmacy

sociology of health, social psychology, health policy, and health economics

DEGREE OF MASTER OF SCIENCE

Admission Requirements

1 Applicants to the M.Sc. program must hold a four-year University of Toronto B.Sc. degree or its equivalent from a recognized university.

2 Applicants are admitted under the general regulations of the School of Graduate Studies. Applicants must also satisfy the Pharmaceutical Sciences Graduate Admissions Committee, which will take into account the background and accomplishments of the applicant, academic standing (applicants must usually

achieve at least a mid-B average in each of the last two years of their undergraduate program), and financial support from the potential supervisor.

3 Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination is not English are required to write the Test of English as a Foreign Language (TOEFL). Applicants taking the paper-based TOEFL exam must achieve a minimum score of 600 and 5 on the TWE. Applicants taking the computer-based TOEFL exam must achieve a minimum score of 250 and 5 on the essay rating component. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 100/120 and 22/30 on the writing and speaking sections. Unless an undergraduate degree has been obtained from a recognized Canadian or U.S. university, the applicant must write and achieve scores at the 50th percentile ranking or better on the Graduate Record Examination (GRE—General Test).

4 A limited number of students will be admitted to the M.Sc. program on a part-time basis.

Program Requirements—Full-Time M.Sc.

To qualify for the M.Sc. degree, students must complete the following program requirements:

- 1** A program of study that provides the appropriate foundation for the thesis research to be undertaken by the student. The program will depend on the background of the student and will be planned in consultation with the supervisor and advisory committee, with the approval of the graduate chair. The student will normally complete two full courses, or equivalent, but a minimum of one full course, or equivalent, is required.
- 2** Yearly advisory committee meetings.
- 3** One poster presentation given to all faculty and graduate students at Graduate Research in Progress (GRIP), and attendance at GRIP and Post-GRIP. Students are also expected to attend research seminars.
- 4** All M.Sc. students are required to give a 20–30 minute oral research presentation on their own research work within 12–24 months of beginning the program.
- 5** Final seminar (20–30 minutes) to be given during the thesis defence.
- 6** A thesis based on an approved research problem in a field of pharmaceutical sciences.

Program Requirements—Part-Time M.Sc.

All requirements are the same as for the M.Sc. Full-Time program, except for the short research presentation and attendance at Graduate Research in Progress (GRIP). A poster

presentation at GRIP is required every other year during enrolment.

DEGREE OF DOCTOR OF PHILOSOPHY

Full-time Ph.D.

Admission Requirements

1 Applicants to the Ph.D. program should hold a University of Toronto M.Sc. degree or its equivalent from a recognized university. Under exceptional circumstances, students may be admitted directly to the Ph.D. program with a four-year B.Sc. degree or its equivalent. Factors to be considered will include academic standing, ability to do research, and financial support from the potential supervisor.

2 Applicants are admitted under the general regulations of the School of Graduate Studies. Applicants must also satisfy the Pharmaceutical Sciences Graduate Admissions Committee, which will take into account the background and accomplishments of the applicant, academic standing (applicants must usually achieve an overall B+ average in their M.Sc. program), and financial support.

3 Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination is not English are required to write the Test of English as a Foreign Language (TOEFL). Applicants taking the paper-based TOEFL exam must achieve a minimum score of 600 and 5 on the TWE. Applicants taking the computer-based TOEFL exam must achieve a minimum score of 250 and 5 on the essay rating component. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 100/120 and 22/30 on the writing and speaking sections. Unless an undergraduate degree has been obtained from a recognized Canadian or U.S. university, the applicant must write the Graduate Record Examination (GRE—General Test) and achieve scores at the 50th percentile ranking or better on the Verbal and Quantitative components and a minimum score of 5.0 on the Analytical Writing component.

Transfer from M.Sc. to Ph.D.

Students who have a high academic standing and a clearly demonstrated ability to do research at the doctoral level may be eligible to transfer to the Ph.D. program after one year in the M.Sc. program. The student must have completed at least one full course, or equivalent, with an average grade of A minus and have financial support. A transfer from the M.Sc. program to the Ph.D. program occurs

normally within 15 months of the student's first registration in the M.Sc. program. The transferred student must complete all remaining course requirements of the M.Sc. program, except the thesis, in addition to the requirements of the Ph.D. program. Credit is given in the doctoral program for research and graduate courses completed prior to the transfer.

Program Requirements

Students must complete the following program requirements:

- 1 A program of study that provides the appropriate foundation for the thesis research to be undertaken by the student. The program will depend on the background of the student and will be planned in consultation with the supervisor and advisory committee, with the approval of the graduate chair. Students will normally complete two full courses, or equivalent. Students admitted directly to the Ph.D. program with a B.Sc. must complete three full courses, or equivalent.
- 2 Yearly advisory committee meetings.
- 3 A qualifying examination.
- 4 Two short research presentations to all faculty and graduate students at Graduate Research in Progress (GRIP), an exit full-length research seminar to be given before the thesis defence, and attendance at GRIP and Post-GRIP. Students are also expected to attend research seminars.
- 5 In addition to the departmental exit seminar held within three months of the final thesis defence, all Ph.D. students are required to give an oral research presentation of approximately 20–30 minutes every year after the first 12 months of registration in the program.
- 6 A thesis in conformity with the University regulations, based on research conducted while registered in a Ph.D. program at the University of Toronto.
- 7 Students are required to be on campus and participating full-time (including summer) until all program requirements are completed. Simultaneous registration in another full-time degree program is not allowed. Course work should normally be completed within the first two years of registration.

Flexible-Time Ph.D.

The Department offers a flexible-time Ph.D. program option for selected students. This program will benefit professionals with career obligations and whose employment is closely related to their intended area of research.

Admission Requirements

Applicants must meet all the School of Graduate Studies and Graduate Department of Pharmaceutical Sciences admission requirements for entry to the Ph.D. program. In addition, a letter of support from the employer is required. The departmental admissions committee will review the applications; admission will be highly selective with preference given to:

- a applicants who are members in good standing of a regulated profession or scientific society, and
- b applicants who hold a university appointment in Canada at an academic standard equivalent to the University of Toronto Lecturer.

Program Requirements

The program requirements for the flexible-time Ph.D. option are identical to those listed above for the full-time Ph.D. program. The time limit for completion of the flexible-time Ph.D. program option from first registration in the program will be eight years for those with a master's degree and nine years for those with a bachelor's degree. Students must ensure that they have adequate time on campus to attend classes and to fulfil the academic requirements. Full-time registration is required for the first four years for those entering the program with a master's degree; five years for those with a bachelor's degree. Thereafter, students may register part-time.

COLLABORATIVE PROGRAMS

The Graduate Department of Pharmaceutical Sciences participates in the following collaborative programs:

- 1 Addiction Studies
 - 2 Aging, Palliative and Supportive Care Across the Life Course
 - 3 Biomedical Engineering
 - 4 Cardiovascular Sciences
 - 5 Health Care, Technology and Place
 - 6 Health Services and Policy Research
 - 7 Neuroscience
 - 8 Toxicology, Biomedical
- Consult the separate program entries in this calendar for more details.

COURSES OF INSTRUCTION

Please consult the Department's timetable for courses offered in a given year.

- PHM 1107H Advanced Pharmacokinetics
Course I/K. S. Pang, L. Endrenyi
- PHM 1108H Advanced Pharmacokinetics
Course II/K. S. Pang,
L. Endrenyi

PHM 1109H	Recent Developments in Dosage Form Design (prerequisite PHM 224Y or equivalent)/ <i>X. Y. Wu, P. Lee</i>	JPY 1007Y	Neuropharmacology of Neurotransmitter Receptors/ <i>P. Seeman, J. W. Wells</i>
PHM 1110H	Chemical Basis of Drug Metabolism/ <i>J. P. Uetrecht, Staff</i>	JRX 1124H	Structure-Based Drug Design/ <i>L. Kotra</i>
PHM 1111H	Research and Statistical Analytical Methods/ <i>T. R. Einarson, H. J. Segal</i>		
PHM 1114H	Special Topics in Radiopharmaceuticals I/ <i>B. M. Bowen, R. Reilly</i>		
PHM 1115H	Special Topics in Radiopharmaceuticals II/ <i>R. M. Reilly, B. Bowen</i>		
PHM 1116H	Pharmacoeconomic Evaluation/ <i>L. D. MacKeigan</i>		
PHM 1117H	DNA-Drug Interactions/ <i>R. B. Macgregor</i>		
PHM 1118H	Drug Utilization: Patterns, Outcomes, and Issues in Drug Use Evaluation/ <i>T. R. Einarson</i>		
PHM 1120H+	Selected Research Topics in the Pharmaceutical Sciences/ <i>P. J. O'Brien</i>		
PHM 1122H	Fundamentals of Drug Discovery/ <i>P. Pennefather</i>		
PHM 1123H	Thermodynamics of Macromolecular Interactions/ <i>T. V. Chalikian</i>		
PHM 1124H	The Power and Politics of Global Pharmaceutical Policy/ <i>J. Cohen</i>		
PHM 1125H	Complementary/Alternative Medicine: Health Systems and Policy Issues/ <i>H. S. Boon</i>		
PHM 1126H	The Economics of Health and Health Care/ <i>P. Grootendorst</i>		
JFK 1120H	Selected Topics in Drug Development I/ <i>M. Piquette-Miller, E. M. Sellers</i>		
JFK 1121H	Selected Topics in Drug Development II/ <i>X. Y. Wu, P. Lee</i>		
JFK 1122H	Drug Transport Across Biological Membranes/ <i>R. Bendayan, P. S. Pennefather</i>		
JNP 1014Y	Interdisciplinary Toxicology/ <i>Staff</i>		
JNP 1016H	Graduate Seminar in Toxicology/ <i>P. G. Wells</i>		
JNP 1017H+	Molecular and Biochemical Basis of Toxicology/ <i>P. J. O'Brien, J. T. H. Henderson</i>		
JNP 1018H+	Current Topics in Molecular and Biochemical Toxicology/ <i>J. T. H. Henderson, P. J. O'Brien</i>		

+ Extended course. For academic reasons, course work is extended into session following academic session in which course is offered.

Address:

Department of Pharmacology
 Room 4207, Medical Sciences Building
 University of Toronto
 Toronto, Ontario M5S 1A8
 Canada

Telephone: (416) 978-5244

Fax: (416) 978-6395

E-mail: pharmtox.dept@utoronto.ca

Web: www.pharmtox.utoronto.ca

Students are accepted under the general regulations. Research activity in the Department, from which graduate students may choose problems for their theses, include:

- biochemical and molecular pharmacology
- cardiovascular pharmacology
- clinical pharmacology
- drug addiction
- drug metabolism, distribution, and pharmacokinetics
- endocrine pharmacology
- immunopharmacology
- neuropharmacology
- pharmacogenetics
- psychopharmacology
- receptor pharmacology
- second messengers and signal transduction
- toxicology

Degree of Master of Science

Students are admitted under the general regulations of the School of Graduate Studies. However, the Department's Graduate Education Committee must be satisfied about the applicant's background, accomplishments, and financial support, and ensure that academic achievement is normally at the B+ average level in the final year of the undergraduate program.

Before obtaining a degree, a student must have a course credit in PCL 1002Y *Graduate Pharmacology*. The academic program may require additional courses.

Each student will participate in a research program and present the results of the investigation as a written thesis. The thesis will be read and approved by the supervisor and two appraisers, one of whom should normally be from outside the Department. It will then be orally defended to the satisfaction of a thesis examination committee.

M.Sc. students in the Department of Pharmacology who intend to continue their studies in the Ph.D. program will be evaluated during their M.Sc. oral defence.

Degree of Doctor of Philosophy

Doctor of Philosophy students in Pharmacology are normally required to have taken courses in physiology, biochemistry, or allied sciences sufficient to form a foundation for their work in pharmacology. The Department's doctoral program requires a minimum period of two full years of residence. During this time the student is required to be on campus full-time and consequently in such geographical proximity as to be able to participate fully in the Department's activities associated with the program.

The Department's Graduate Education Committee determines the eligibility of prospective students. The Committee assesses students' ability and potential for advanced study and independent research in pharmacology.

Applicants with M.Sc. degrees are expected to have achieved an average grade of at least B+ in their master's degree courses.

Well qualified students with excellent research potential holding a Bachelor of Science degree may be considered for direct admission to the Ph.D. program by the Department's Graduate Education Committee. These applicants must have achieved a minimum final year average of A-.

Applicants with M.Sc. degrees from other departments or universities, and students admitted with a Bachelor of Science degree will have their research ability and potential for the program reviewed after completion of one year. Upon successful completion of a departmental seminar and recommendation from the student's advisory committee to the Graduate Education Committee, the student will be permitted to proceed with the Ph.D. program.

Students transferring from the master's program in pharmacology to the Ph.D. program may receive full credit for master's courses towards doctoral course requirements, with the Department's permission.

All successful applicants to the M.Sc. and Ph.D. programs are responsible for obtaining research supervision and financial support before they are allowed to officially register in their program.

Before obtaining their degree, all Ph.D. students must acquire graduate course credits in PCL 1002Y *Graduate Pharmacology* (major subject), PCL 1003Y° *Seminars in Pharmacology* (Credit/No Credit course), one additional full graduate course (minor subject), and any other courses advised by the Graduate Education Committee. The student's advisory committee should help the student determine the minor course.

Pharmacology graduate faculty members also offer a variety of laboratory-based and tutorial-based learning modules to provide breadth to the students' training experience beyond their particular areas of research focus. During their program, Ph.D. students are required to choose five breadth modules from among available options, at least one of which must be a laboratory module and one a tutorial module. One graduate half-course from outside the student's research area may substitute for one of the five breadth modules. The student's Advisory Committee will assist the student in choosing suitable modules.

As part of the course requirement for PCL 1003Y° *Seminars in Pharmacology*, the student must present thesis material in seminars to the Department on two occasions, one of which will take place between two and six months prior to the departmental final oral examination.

Each student will participate in a research program and present the results of the investigation as a written thesis. The thesis must be orally defended to the satisfaction of a thesis examination committee, including an external examiner from outside U of T.

Doctor of Philosophy students in other departments who desire to take a minor in pharmacology will be permitted to take one of the listed courses depending on their previous training and space availability in the course.

All M.Sc. and Ph.D. students are expected to undertake self-directed study and to demonstrate proficiency in pharmacological principles throughout the course of their graduate program.

° Courses which may continue over a program. The course is graded when completed.

Collaborative Programs

The Department of Pharmacology participates in the following collaborative programs:

- 1** Addiction Studies
- 2** Cardiovascular Sciences
- 3** Neuroscience
- 4** Toxicology, Biomedical
- 5** Women's Health

For more details, consult the separate program entries in this calendar.

Courses of Instruction

The Department should be consulted each session as to course offerings. Students may also find up-to-date course information on the departmental Web site www.utoronto.ca/grdpharm/schedule.htm.

Fax: (416) 978-8703

E-mail: phildept@chass.utoronto.ca

Web: philosophy.utoronto.ca

Applicants interested in graduate study in philosophy at the University of Toronto should consult the department's *Graduate Bulletin*. This provides complete details of graduate programs, describes course offerings, and supplies short academic profiles of the graduate faculty, including their phone numbers and electronic addresses. One may obtain a printed copy of the *Graduate Bulletin* from the Graduate Office, Department of Philosophy, at a cost of \$5.00. An electronic version is available on the Web at <http://philosophy.utoronto.ca/graduate/courses.html>.

Application for Admission

The department admits students to two degree programs: Master of Arts and Doctor of Philosophy. The minimum requirements for admission to these programs are given below, under the headings "Degree of Master of Arts" and "Degree of Doctor of Philosophy." Admission to these programs is highly selective and competitive; those who barely meet the minimum

conditions should not expect admission without exceptionally favourable supporting considerations.

Apply online by visiting the departmental Web site. The department does not mail application packages. The Web site also contains detailed instructions for completing applications.

Unless otherwise indicated, applicants must submit the following supporting documents with their applications:

- 1 One official transcript of the applicant's academic record from each university attended, complete to the time of application.
- 2 A statement of about 300 words, indicating the applicant's areas of interest in philosophy at the graduate level.
- 3 Two letters of reference from philosophy instructors, written on the appropriate forms.
- 4 One sample of the applicant's written work in philosophy (written in English or French); e.g., a term paper not exceeding 20 pages. It should be as recent as possible and should provide evidence of the student's capability to study philosophy at an advanced level.
- 5 Ph.D. applicants are strongly encouraged (but are not required) to submit the results of the Graduate Record Exam (GRE) taken within the preceding 18 months.
- 6 Applicants whose primary language is not English and who are not graduates of a university whose language of instruction is English must complete the Test of English as a Foreign Language (TOEFL). Applicants taking the paper-based TOEFL exam must achieve a minimum score of 600 and 5 on the TWE. Applicants taking the computer-based TOEFL exam must achieve a minimum score of 250 and 5 on the essay rating component. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 100/120 and 22/30 on the writing and speaking sections. Equivalent results in some other recognized test of English-language facility are acceptable.

The closing date for applications to the department's degree programs, by which time applicants must have submitted their supporting documentation as well as their completed application, is January 7.

Students who wish to take one or more of the courses offered by the department as non-degree students should apply for admission as Special Students. The application procedures and deadlines are the same for both the M.A. and Ph.D. programs.

Students enrolled in graduate programs in philosophy in other universities are welcome to apply to spend a year studying at the University

of Toronto. Please direct any inquiries to the Graduate Coordinator.

Degree of Master of Arts

Students approved by the department are admitted under the general regulations of the School of Graduate Studies.

Admission to the M.A. program requires a four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, that includes at least six full courses (twelve half-courses) in philosophy, with an average grade of at least a mid-B in the applicant's overall program and of at least an A- in the applicant's philosophy courses. Students lacking an adequate background in philosophy may be required to complete additional undergraduate courses before being considered for admission. In certain cases, an applicant whose background in philosophy is deficient may be admitted to the M.A. program but may be required to take one or two additional courses, possibly at the undergraduate level.

The program for the M.A. degree consists of a minimum of four full-course equivalents in philosophy. At least one of these full-course equivalents must be in the history of philosophy and at least one must be in the problems of philosophy.

Each M.A. student is assigned to an Advisory Committee, which will recommend a suitable program of philosophy courses. The student's choice of courses must be approved by the department. One member of this committee will serve as the student's Academic Advisor throughout the M.A. program and will be responsible for overseeing the student's progress.

It is possible for a full-time student to complete all requirements for the M.A. degree in the fall and winter sessions; however, the department encourages students to take no more than three full-course equivalents during the fall and winter sessions and to complete the last course during the summer session.

Part-time enrolment in the M.A. program is permitted; the requirements for the degree must be completed within five academic years.

Degree of Doctor of Philosophy

Students approved by the department are admitted under the general regulations of the School of Graduate Studies.

Admission to the Ph.D. program requires either (a) a four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, that includes at least six full courses (twelve half-courses) in philosophy, with an average grade of at least a B+ in the

applicant's overall program and of at least an A- in the applicant's philosophy courses, or (b) a University of Toronto master's degree in philosophy, or its equivalent from a recognized university, with an average grade of at least an A- in the applicant's overall program. Applicants must satisfy the department that they are capable of independent research in philosophy at an advanced level.

A student admitted to the Ph.D. program shall pursue a program of study and research approved by the department. The minimum requirements for the degree are as follows:

1 Course Requirements

A student admitted on the basis of a four-year bachelor's degree must take a minimum of six full-course equivalents in philosophy, with an average grade of at least an A-. At least two of these full-course equivalents must be in the history of philosophy and at least two must be in the problems of philosophy. Students who fail to maintain an average of at least an A- after completing three full-course equivalents may have their registration terminated.

A student admitted on the basis of a master's degree in philosophy must take a minimum of three full-course equivalents in philosophy, with an average grade of at least an A-. At least one of these full-course equivalents must be in the history of philosophy and at least one must be in the problems of philosophy. A student whose M.A. degree does not exhibit sufficient breadth—in particular, does not include the equivalent of at least one full course in the history of philosophy and at least one full course in the problems of philosophy—may be required to take additional courses.

All students must complete the proseminar in philosophy (PHL 1111H) during the fall session of their first year. This will count as one half-course equivalent of the requisite number in the program.

With the department's permission, a student may replace up to one full-course equivalent in philosophy with a graduate course offered by another department, provided that the course is required for the student's planned research.

A doctoral student is required to complete at least three full-course equivalents by the end of the first year of registration and to complete any of the remaining course requirements for the degree by the end of the second year.

2 Breadth Requirement

A student must demonstrate competence in at least six areas of philosophy: three of the five specified areas in the history of philosophy and no more than two consecutively (ancient,

medieval, 17th-18th century, 19th century, and 20th century), and in each of three areas in problems of philosophy:

- a** metaphysics, epistemology and philosophy of science,
- b** values (ethics, politics, aesthetics, and philosophy of religion), and
- c** mind, language and logic.

Competence in any area is normally established by successful completion of a graduate half-course in that area.

A student must also demonstrate competence in logic (defined as proficiency in first-order symbolic logic with identity). This competence is expected of all students prior to beginning doctoral studies. Where this is not the case, competence must be acquired as a supplement to the required number of courses and be demonstrated to the satisfaction of the department by the time the Area Requirement is met.

3 Area Requirement

Before being allowed to proceed with formal research on a thesis topic, the student must demonstrate competence in a broader area within which that topic falls. An individual Area Committee (established by the student and approved by the department) assists in framing that area and compiling an appropriate reading list, and it also approves an appropriate plan for carrying out the research. The research undertaken by the student either culminates in a written exam or else consists of a research project. Both paths lead to an oral exam based on the written work and the reading list. For further information see *Information for Doctoral Students*, available from the Graduate Office.

4 Language Requirement

A student must demonstrate a reading knowledge of French; however, with the permission of the department, another language (other than English) may be substituted for French, provided that this other language is required in carrying out the approved research area. The student's area committee may require competence in additional languages deemed necessary for the student's proposed area of research.

5 Thesis

A candidate must submit a thesis on an approved subject and defend the thesis at a final oral examination.

Each candidate carries out thesis research on an approved topic under the guidance of a three-person Thesis Committee, consisting of a Supervisor and two consultants or readers. The

Supervisor must normally approve the thesis before it can be submitted by the candidate for defence at a required oral examination. The final oral examination is arranged by the department in collaboration with the School of Graduate Studies. At least eight weeks must be allowed for all arrangements to be made following submission of the thesis to the Graduate Office.

The department is not obligated to provide supervision in areas falling outside the competency, interest, or availability of its graduate faculty.

Students are strongly encouraged to plan their studies in such a way as to complete their program within four years of admission from an M.A., or five years of admission from a B.A. Financial support packages are based on this norm, although allowances are made for the higher demands of some collaborative programs.

6 Normal Time Line Through the Program

By the end of the first year of registration in the case of someone admitted on the basis of a master's degree, otherwise by the end of the second year, a student should have completed all the course requirements for the degree. By the end of the following year of registration, the student should have satisfied any remaining breadth requirements, passed the area examination, and submitted to the Graduate Office the thesis topic and the names of faculty members who have agreed to serve as supervisor and readers. (These are general deadlines; consult the department's *Graduate Bulletin* for specific dates and further details.) After this, the candidate begins work on the thesis, which the candidate is expected to complete within two years.

7 Residence

Students must be registered as full-time on-campus students and must reside in sufficient geographical proximity to enable them to fulfil the course, breadth, area, and language requirements set by the department in a smooth and timely fashion. They are also expected to participate fully in departmental activities. While writing the thesis, candidates are expected to be in residence, with the exception of absence for research.

Combined Juris Doctor/Doctor of Philosophy Program

This combined program enables students to pursue work at the intersection of philosophy and law and to complete both the Ph.D. and the Juris Doctor in a shorter time than would other-

wise be the case. Entry to the program requires admission to both the Ph.D. program in philosophy and the J.D. program in law. Separate applications are required.

In the first year of registration, a student admitted to the combined program will complete the first year of the law curriculum; in the second and third years, the student will complete the remaining requirements for the J.D. degree and will begin the course work required for the Ph.D. (Note that some of the courses done in fulfillment of the Ph.D. requirements will be counted for credit towards the J.D. and vice versa). By the end of the fourth year of registration in the case of someone admitted on the basis of a master's degree, otherwise by the end of the fifth year, a student should have completed any remaining course requirements for the Ph.D. degree, satisfied the breadth requirement, and met the area requirement. The candidate then begins work on the thesis. During the first two years of the program, students are registered as full-time law students; subsequently, they are registered as full-time doctoral students and are eligible for graduate funding.

Those interested in pursuing this program should consult David Dyzenhaus, Director of the Ph.D. (Philosophy)—J.D. Program, at the Faculty of Law.

Collaborative Programs

The department participates in the following collaborative programs:

- 1 Ancient and Medieval Philosophy
- 2 Bioethics
- 3 Editing Medieval Texts
- 4 Environmental Studies (see Environment)
- 5 Jewish Studies
- 6 Women's Studies

For more details, consult the separate entries in this calendar.

Courses of Instruction

Not all courses are offered every year. Please consult the department's *Graduate Bulletin*, which lists the courses the department will offer this year as well as those offered by other departments that may be taken for philosophy credit.

At press time, the M.Sc.PT program length (24 months) was pending final approval. Please consult the graduate unit for details.

Degree of Master of Science in Physical Therapy

The purpose of the Master of Science in Physical Therapy (M.Sc.PT) is to graduate practitioners who will:

- be academic physical therapy practitioners who, using advanced technologies, will share their knowledge with students, clients, policy makers, and other professionals in academic health science environments
- have enhanced competency in clinical skills
- participate in clinical and health care research, contributing to the overall body of scientific knowledge
- serve as role models for students and other health professionals as expert consultants in the fields of movement and movement disorders
- be innovative leaders in physical therapy, rehabilitation, and the health care system
- have ability to act as self-regulating professionals who exhibit strong personal, moral, and ethical values and are cognizant of the changing laws, codes, and guidelines that impact on themselves and their clients
- be creative entrepreneurs with sound business acumen capable of excelling in professional practice in a wide variety of venues
- serve as strong players with exemplary interpersonal skills, secure in their evolving role within a changing health care delivery system
- be strong negotiators and advocates who proactively influence interprofessional politics and health policy with an eye to maintaining and improving not only the health of clients but of the health system as a whole

The Master of Science in Physical Therapy is a 24-month professional program leading to entry to practice accredited by the Accreditation Council for Canadian Physiotherapy Academic Program (ACCPAP). Graduates will be eligible to write the Physiotherapy Competency Examination (PCE) of the Canadian Alliance of Physiotherapy Regulatory Boards, which qualifies them to practice physical therapy in Canada. Graduates will be eligible to register in the Canadian Physiotherapy Association and the Colleges of Physiotherapy in all Canadian provinces. Since the M.Sc.PT program is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE) of the American Physical Therapy Association, graduates are also eligible to apply for licensure in the United States.

E-Learning Advanced Standing Option

The Master of Science in Physical Therapy e-Learning Advanced Standing Option is a professional graduate degree program that allows eligible physical therapists with a B.Sc.PT from a Canadian university to acquire the entry-to-practice degree on a part-time basis in an online, e-learning environment with two on-campus residencies. There is a strong focus on research and best practices integrated throughout the one-year program.

Admission Requirements

Applicants to the M.Sc.PT program must have a four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, with a minimum mid-B average in the final year (i.e., 5 full-course equivalents at the senior level). Additional requirements include prerequisite courses in the life and/or physical sciences (one of the two life sciences courses must be a human/vertebrate physiology course); social sciences, humanities or languages (one full-course equivalent); and statistics (half-course). Refer to the departmental Web site (www.utoronto.ca/pt) for a full listing of admission requirements.

English Language Facility

Facility in the English language must be demonstrated by all applicants educated outside Canada whose primary language is not English and who graduated from a university where the language of instruction and examination was not English. Applicants must demonstrate facility in the English language through the successful completion of one of the English language proficiency tests listed in the School of Graduate Studies Calendar.

The Department of Physical Therapy strongly prefers that the Test of English as a Foreign Language (TOEFL), accompanied by the Test of Written English (TWE) and the Test of Spoken English (TSE) be used to satisfy the requirement. Applicants taking the paper-based TOEFL exam must achieve a minimum score of 600 with 5 on the TWE and 50 on the TSE. Applicants taking the computer-based TOEFL exam must achieve a minimum score of 250 with 5 on the essay rating component and 50 on the TSE. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 100/120 and 22/30 on the writing and speaking sections.

Application

To obtain an application, visit the Ontario Universities' Application Centre (OUAC) Web site.

If there are questions regarding the Ontario Rehabilitation Sciences Programs Application Services (ORPAS) application form, please contact orpas@ouac.on.ca or (519) 823-1940 ext. 559. Application forms are available mid-September. The application deadline is mid-January; deadline for transcripts is end of January.

Program Requirements

Students enrolled in the full-time program must complete all requirements within 24 months. The curriculum is organized into 12 units and includes lectures, seminars, tutorials, laboratories, case-based learning, structured clinical sessions, structured independent study units, and clinical internships. Research principles and practices are integrated into the curriculum. Students are required to complete all units. The M.Sc.PT program requires the completion of a group research project. Students must demonstrate proficiency in key areas of professional practice, including research practice, prior to graduation.

Note: The M.Sc. degree program in Rehabilitation Science is a research-oriented program for students with a professional physical therapy degree; it does not prepare students for physical therapy in clinical practice or licensure. The primary objective of the M.Sc. program is to prepare students for doctoral studies in Rehabilitation Science. Successful completion of the program does not guarantee entrance into the Ph.D. program. Consult the Rehabilitation Science entry in this calendar for details.

The department carries out research in experimental and theoretical physics in the following fields: atmospheric physics, geophysics, quantum optics and condensed matter physics, and subatomic physics. The following brochures are available from the

department upon request: *Physics at Toronto and Graduate Course Listings*.

The department has close ties with the Canadian Institute for Theoretical Astrophysics. This association enables our students to work and consult with leading theorists who are appointed to, or who are visiting, CITA.

Students are accepted under the general regulations.

Degree of Master of Science

The program of study for the M.Sc. degree will consist of

- 1 three graduate lecture courses and a report which is equivalent to two courses (PHY 3400Y and the appropriate 6000-series course), or
 - 2 two graduate lecture courses, the appropriate 6000-series research course, and a report which is equivalent to two courses (PHY 3400Y and the appropriate 7000-series course), or
 - 3 two graduate lecture courses and a thesis.
- Selection of the program is made by the student and a faculty advisor in consultation with the Associate Chair. The residence requirement for the M.Sc. degree is normally one academic session. All students for the M.Sc. degree are expected to attend the weekly general colloquium conducted by the department.

Degree of Doctor of Philosophy

Students are normally admitted to the Ph.D. program after completion of the M.Sc. program or its equivalent elsewhere, but outstanding students may be considered for direct entry into the Ph.D. program. The core of the Ph.D. program is an original investigation, the results of which are embodied in a thesis. Lecture courses constitute a subsidiary but important part of the program. For details consult the department. Normally the equivalent of four graduate courses is required. Course credit will normally be given toward the Ph.D. for all graduate lecture courses taken during a master's program in this department. Students who have completed a M.Sc. elsewhere and are entering directly into the Ph.D. program will generally be given a course credit of up to two full courses towards their Ph.D. course requirement. Within 8 months of starting the Ph.D. program (20 months in the case of direct-entry Ph.D.), students must complete a qualifying oral examination. (Students who fail at the first attempt have the opportunity to take it again within a time period specified by the examination committee.) As an essential part of their research programs, students are expected to attend the

weekly general colloquium conducted by the department.

Both the M.Sc. and Ph.D programs are full-time.

Collaborative Programs

The department participates in the following collaborative programs:

- 1 Astrophysics
- 2 Biomedical Engineering
- 3 Geology and Physics

For more details, consult the separate entries in this calendar.

Courses of Instruction

All courses are not given every year. Please check the departmental brochure or Web site for course availability.

Introductory Courses

Address:
Department of Physiology
Room 3217, Medical Sciences Building
University of Toronto
Toronto, Ontario M5S 1A8
Canada

Telephone: (416) 978-2601
Fax: (416) 978-4940
E-mail: graduate.physiology@utoronto.ca
Web: www.uoftphysiology.com

Research in the Department of Physiology proceeds at levels from the gene to the organism in areas including:

- endocrinology and diabetes
- reproduction endocrinology
- fetal physiology, pregnancy, and parturition
- neuroendocrinology
- cardiorespiratory regulation
- gastrointestinal motility
- sensory physiology
- motor control
- brain development and aging
- ionic channels and synaptic transmission
- excitability, ultrastructure and plasticity of the brain

Admission is determined by the Department of Physiology Graduate Studies Committee and is based on academic record, an essay summarizing background strengths and scientific aims, and at least two confidential letters of reference. Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction was not English, must demonstrate facility in the English language through the successful completion of the Test of English as a Foreign Language (TOEFL). Applicants taking the paper-based TOEFL exam must achieve a minimum score of 600 and 5 on the TWE. Applicants taking the computer-based TOEFL exam must achieve a minimum score of 250 and 5 on the essay rating component. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 100/120 and 22/30 on the writing and speaking sections. Other English proficiency tests are acceptable. Please consult the Web site for departmental standards.

Degree of Master of Science

Admission Requirements

Acceptance normally requires a standing of at least B+ in the final year of a University of Toronto 20-credit bachelor's degree or its equivalent from a recognized university. Applicants should have taken courses in biochemistry, calculus, organic and physical chemistry, general physics, and physiology.

Program Requirements

The course requirement is one full-credit or two half-credits in Physiology graduate-only courses. Students entering the graduate program will usually have taken a major advanced review course in physiology and will have obtained at least B+ for such a course. For such students a half-credit graduate course in physiology plus a suitable extradepartmental graduate half-credit course may be approved. Courses should be selected in consultation with the supervisor and/or advisory committee. Students are expected to attend the departmental seminar series and must present and defend a research thesis acceptable to the graduate department in order to qualify for the degree.

After 12 to 18 months in the M.Sc. program, students will either write and defend an M.Sc. thesis and graduate, write and defend a thesis and go on to the Ph.D. program, or transfer directly into the Ph.D. program. Direct transfer is encouraged for students who have made substantial progress in their research and have demonstrated the desire and potential to meet the requirements of a rigorous research training program. Such students will have fulfilled all course requirements for the M.Sc. with at least an A- average and have demonstrated potential for publication of their work. There must be a clearly identified program for future research that continues, or is consistent with, work already underway. Too large a project for the M.Sc. is not a reason for transfer to the Ph.D. See the Physiology Web site for a detailed outline of course requirements.

Physical Sciences Stream

Special incentives are in place to encourage students from undergraduate programs in physics, mathematics, engineering, and other sciences to apply to the M.Sc. program. Students enrolled in the Institute of Biomaterials and Biomedical Engineering who are registered through the Department of Physiology will take the introductory physiology review course JPB 1022H as part of their master's course requirement.

Degree of Doctor of Philosophy

Admission Requirements

Applicants should have taken courses in biochemistry, calculus, organic and physical chemistry, general physics, and physiology. Students may be admitted through transfer from the M.Sc. program or after completion of the M.Sc. degree program or its equivalent from a recognized university. For exceptional students with an A standing in appropriate courses taken during the two preceding undergraduate years, direct entry into the doctoral program is possible. However, this will require specific approval by the Graduate Studies Committee.

Program Requirements

The course requirement is a total of two full credits or four half-credits in which an average standing of at least A- is maintained. Course requirements for students transferring from a Physiology master's degree program is one full-course credit; these students will have fulfilled the requirements for the M.Sc. of one full credit. Up to one full credit can be claimed from the student's M.Sc. program completed in another department or university, subject to approval by the Graduate Studies Committee. Courses should be appropriate for the proposed research program and should be selected in consultation with the student's advisory committee. Consult the Physiology Web site for details of course requirements. PSL1066H *Ph.D. Research Grant Proposal* is a mandatory course and counts as 0.5 credit. The remaining credits must be graduate-only courses. This course requires a written proposal and oral defense of the student's research program over the ensuing three years, prepared according to the CIHR grant format. It must be presented to members of the graduate department within 13 months of entering the Ph.D. program. The proposal should include a full background for the expected results, pitfalls, alternate strategies, and a budget. A student who fails to submit or to pass the proposal must withdraw from the program.

Attendance at and contribution to the departmental seminar program is an important part of graduate education and is a requirement of the program.

The recommended completion time for the doctoral program is about four years, by which time the candidate will write and defend a research thesis acceptable to the graduate department and the School of Graduate Studies in order to qualify for the degree.

Collaborative Programs

The department participates in the following collaborative programs:

- 1 Biomedical Engineering (M.Sc., Ph.D.)
 - 2 Cardiovascular Sciences (M.Sc., Ph.D.)
 - 3 Developmental Biology (Ph.D.)
 - 4 Neuroscience (M.Sc., Ph.D.)
- For more details, consult the separate entries in this calendar.

Courses of Instruction

Students should consult the departmental Web site for course descriptions and availability at www.uoftphysiology.com. Some courses are offered in alternate years only and some courses may not be given if too few students apply.

Graduate students from other departments who wish to take a course in physiology should consult the Department of Physiology.

Please refer to the Department of Physiology Web site for important details regarding course requirements.

Degree of Master of Science in Planning

This program, leading to a Master of Science in Planning (M.Sc.Pl.), is directed toward professional education in the fields of urban, environmental, economic, and social planning, as well as urban design. Almost half of the program deals with a core of material considered essential to general practice, while the remainder allows the student to specialize in one of five sub-fields. Workshops and seminars in the program provide contact with many senior professionals engaged in public and private practice. The program also provides access to courses and research facilities available in many other graduate departments, centres, and institutes across the University.

Admission Requirements

Students are admitted under the general regulations of the School of Graduate Studies. In addition, applicants must have an average of at least B+ standing in the social or life sciences, or the humanities, or the professions. A knowledge of introductory economics and statistics, as well as word processing and spreadsheet skills, is preferred prior to entry.

Program Requirements

Students normally enrol for two years of full-time study, although part or all of the requirements of the program may be met by part-time study, with the approval of the Program Director. Progress into the second year of the program is normally dependent upon the achievement of an overall B average in the first year. Equivalent provisions apply to the part-time program.

Students are required to pursue a planning internship (PLA 4444H) between the first and second year of the program. Part-time students who are currently employed in a planning environment may be exempted from this requirement; however, the Planning Director retains final discretion in the decision.

Note: All courses are not given every year; some faculty members may be on research leave. Please consult the departmental graduate office for details.

1 The program consists of 16 half-courses, taken over 2 years. This includes the following six required core courses:

PLA 1101H	Issues in Planning History, Thought, and Practice/ <i>Staff</i>
PLA 1102H	Urban and Regional Dynamics/ <i>R. J. DiFrancesco</i>
PLA 1103H	Legal Basis of Planning/ <i>S. M. Makuch</i>
PLA 1105H	Planning Decision Methods/ <i>Staff</i>
PLA 1106H	Workshop in Planning Practice/ <i>Staff</i>
PLA 1107Y	Current Issues Paper/ <i>Staff</i>

2 A further nine half-course equivalents (exclusive of PLA 4444H) are chosen from the following list of electives and from the offerings of other departments, centres, and institutes. At least five of these half-course equivalents must fit into an approved specialization in one of the following fields:

Urban Planning and Development
Environmental Planning
Social Planning and Policy
Economic Planning and Policy
Urban Design

3 The requirements for the degree must be completed within six years of first registration in the program.

4 Normal Timing

First Year		Second Year	
Fall Session	Winter Session	Fall Session	Winter Session
1101H	1102H	1106H	1107Y

JPG 1810H	Globalization and Postmodern- ism/ <i>K. Goonewardena</i>
PLA 1904H	Law and Planning/ <i>S. M. Makuch,</i> <i>Staff</i>
JPG 1906H	Geographic Information Systems/ <i>D. Boyes</i>
JPG 1909H	Social Survey Methods/ <i>Staff</i>
JPG 1914H	Spatial Information Systems/ <i>D. Boyes</i>
PLA 4444H	Internship (Credit/No Credit)/ <i>Staff</i> (Designates the internship to be undertaken by master's students in the Planning Program. It cannot be used to fulfil other course requirements for the degree.)

Degree of Master of Urban Design Studies

The Master of Urban Design Studies (MUDS) is a one-year professional degree program intended to provide intensive, advanced education in the principles and practices of Urban Design for students who plan to pursue a career in an urban discipline. Reflecting its interdisciplinary foundations, the MUDS program emphasizes a strong social science orientation. It aims to encourage an understanding of the interdependence of the economic, social, and political forces that shape the character, physical structure, and dynamic properties of cities.

This program coincided with the launch of the Master of Urban Design (MUD) degree program in the Faculty of Architecture, Landscape and Design. Consult the separate calendar entry under Architecture, Landscape, and Design for more details. Together, these two degree programs, in addition to the specialization in Urban Design within the Master of Science in Planning program, constitute a closely integrated suite of graduate programs in the discipline of Urban Design.

The MUDS program may be taken on a full-time or part-time basis.

Admission Requirements

Applicants with prior degrees in a range of disciplines including planning, geography, other social sciences, the design disciplines, business administration, and law are encouraged to apply. There are three possible entry streams.

1 For students with a bachelor's degree (four or five year) in planning, architecture, or landscape architecture, with a strong design orientation; an average of at least B+ (or upper second class) in the final year is required.

2 For applicants with a master's degree in a professional field such as planning, architecture, landscape architecture, business administration and law, an average of at least B+ in graduate studies is required.

3 Students with a bachelor's degree (four or five year) in any discipline plus evidence of significant professional experience (normally at least five years) in an area related to Urban Design and Planning are required to have attained at least a B+ average in their final year.

Program Requirements

Students are required to take a total of eight half-course equivalents. Students entering the program with significant prior design workshop/studio experience (as determined by the admissions committee) must complete a core program of five half-course equivalents (three half-courses and one full course), plus a further three half-courses to be chosen from electives given within the Program in Planning; the Faculty of Architecture, Landscape and Design; and from the offerings of other graduate units. Students without significant prior design workshop/studio experience must complete the above core program and PLA 1652H, plus a further two half-course electives. The requirements for the degree will normally be completed within one academic year and must be completed within four years of first registration in the program.

The MUDS program may be taken on a part-time basis. The maximum term for completion of the degree requirements is four years from the time of first registration in the program. Part-time students will be expected to participate in the same class meetings as full-time students.

Core Courses

The core program is composed of five half-course equivalents (six half-course equivalents for those entering the program without significant prior design workshop/studio experience) that encompass the practical, theoretical, and methodological aspects of urban design.

Course sequence for the core program:

First Session

PLA 1650H/URD 1031H Urban Design:
History Theory Criticism

or

JPG 1713H Place, Design and Landscape

PLA 1654H Urban Design Research Methods

PLA 1652H Introductory Studio in Urban
Design and Planning (students
without significant design workshop/
studio experience must take PLA
1652H)

Plus one half-course elective, or two half-
course electives if the student is exempted
from PLA 1652H

Second Session

PLA 1653Y Advanced Workshop in Urban
Design

PLA 1655H Urban Design and Development

Plus one half-course elective

Electives

Elective courses may be chosen from the
following:

PLA 1554H Transportation and Urban Form

PLA 1651H Planning and Real Estate
Development

JPG 1501H The Political Economy of Cities

JPG 1510H Recent Debates on Urban Form

JPG 1512H Place, Politics and the Urban

JPG 1702H Historical Urban Geography and
Planning

JPG 1710H Historic Preservation Planning

JPG 1713H Place, Design and Landscape

JPG 1804H Space, Power and Geography:
Understanding Spatiality

JPG 1914H Spatial Information Systems

URD 1012H Urban Design Studio Options

URD 1021H Urban Design Computation

URD 1032H Urban Design in the History of
the Post-Industrial World

URD 1033H The City and the Text

MUDS students may also select other elec-
tives, subject to the approval of the Director,
Program in Planning, and the Coordinator of
the MUDS program.

Courses with a URD designation are offered
through the Faculty of Architecture, Landscape
and Design.

Degree of Doctor of Philosophy in Planning

This Ph.D. program is designed to prepare
graduates for an academic or consulting posi-
tion in the discipline of planning. Visit the Plan-
ning Web site www.geog.utoronto.ca for more
details.

Collaborative Programs

The Planning program participates in the fol-
lowing collaborative programs:

1 Community Development

2 Environment and Health (*see* Environment)

For details, consult the separate entries in this
calendar.

Web: www.chass.utoronto.ca/ipa/

The objective of the Institute for Policy Analysis is to develop and maintain a research program in economic and social policy that complements graduate studies in the social sciences, business and law. To promote research, the institute offers office space and support to relevant faculty. The institute may also arrange for the publication of research results of associates.

Research projects in process in the previous academic year cover a diverse set of issues and topics. Among the issues currently under investigation at the institute are:

- 1 the impact of early versus later education on intergenerational earnings persistence and income inequality and the ways that education policy can equalize economic opportunities;
- 2 the impact of capital market imperfections on economic development;
- 3 parental leave policies and their impact on male-female wage inequality;
- 4 the impacts that tariffs, particularly on goods produced by high skill industries, have on growth;
- 5 the role played by business clusters in promoting technology transfers and growth;
- 6 the impact of growing income inequality on economic segregation and government reliance on the not-for-profit sector;
- 7 healthcare policy and healthcare reform;
- 8 what activities should the firm outsource and how should the firm do it;
- 9 restrictive business practices and contracting;
- 10 issues in competition policy;
- 11 financial sector regulation;
- 12 the role of "most favoured nations" clauses in commercial contracts;
- 13 art as an investment;
- 14 theoretical foundations of the demand for money;
- 15 interaction between consumption and portfolio decisions;
- 16 the importance of cities and clusters for productivity;

17 the aging workforce and transitions to retirement;

18 impact of minimum wages;

19 income adequacy of seniors.

The institute offers office accommodation to a select number of senior graduate students working with institute associates. As well, the institute occasionally employs graduate students as research assistants on a part-time basis during the academic year and on a full-time basis in the summer months.

The institute underwrites a set of workshops and seminars on the analysis of economic strategy as applied to selected fields of economics. The institute also sponsors short-term visits by distinguished academics from other universities. The objective of these workshops, seminars, and visits is to promote greater interaction between faculty and graduate students, between those within the University and distinguished scholars from other universities and between academics and external decision makers in both the private and public sectors. The institute sponsored workshops include:

- Workshop in Empirical Economics
- Workshop in Industrial Organization and Business Economics
- Workshop in International Trade
- Workshop in Monetary and Macro Economics

Address:

Department of Political Science
Room 3025
100 St. George Street
University of Toronto
Toronto, Ontario M5S 3G3
Canada

Telephone: (416) 978-2017

E-mail: poligrad@artsci.utoronto.ca

Web: www.chass.utoronto.ca/polsci/
information/graduate/graduate_
information.htm

Application packages are available from the department office and the department's Web site. All applicants are required to submit a sample of their written work and a statement of intent to the department as part of the application process. M.A. applicants must arrange for three letters of academic recommendation to be sent to the department, and Ph.D. applicants must arrange for four letters.

Degree of Master of Arts**Admission Requirements**

The minimum admission requirement for the M.A. programs is a cumulative grade average of B+ or better in a bachelor's program equivalent to a University of Toronto four-year bachelor's degree program. Students are expected to have completed at least five to eight suitably distributed courses in political science with at least a B+ average. Enrolment in the program is limited, and meeting minimum requirements does not guarantee admission. All applicants are considered on their individual merit by a departmental admissions committee.

Students seeking entry into the M.A. programs but lacking a four-year specialist degree or the minimum required number of political science courses should consider doing qualifying work at the undergraduate level prior to application. Such work should be undertaken in consultation with the M.A. supervisor.

Program Requirements

The minimum requirement is the equivalent of four full graduate courses. Programs are normally completed in two sessions, except in environmental studies, which includes an internship, or in other programs where additional requirements or prerequisites must be met. A thesis may replace one full political science course with the approval of the department. The equivalent of one full course may be taken in a cognate discipline with the approval of the department. For students intending to proceed

to a Ph.D. at the University of Toronto, there are advantages to planning the M.A. program with a view to eventually meeting Ph.D. requirements.

The departmental M.A. comprises two streams:

- 1 Political Theory
- 2 Politics and Policy

Students are admitted to one stream and may switch streams once in the program only with permission of the M.A. Supervisor.

Departmental M.A.—Political Theory Stream

This stream is intended primarily for those students who wish to concentrate their studies in the theory area. Students in this stream will normally take three full courses in the political theory subfield. They are also required to take at least one full course in an area other than political theory. All courses in this program should be chosen in consultation with the M.A. Supervisor.

Departmental M.A.—Politics and Policy Stream

This stream is aimed at students with more empirical interests in political science. It is particularly designed to serve those who wish to apply their political science skills in the public service or in the private sector, as well as those contemplating further academic study or research. Courses taken must include at least one half-course in political theory, which can be either the half-course offered by the department specifically for this purpose (POL 2040H) or any other theory course. Also required is at least one half-course in statistics or research design. POL 2502Y, POL 2503H, and POL 2504H are among the courses currently offered by the department which meet this requirement. The final requirement is a full-year seminar which emphasizes an independent research project. POL 2810Y and POL 2811Y are the two seminars currently offered which meet this requirement. Courses in this program should be chosen in consultation with the M.A. supervisor.

Specialist Program in Political Economy of Development

Students who enter this program must have a satisfactory background in political science and undergraduate prerequisites in microeconomics, macroeconomics, and statistics. Note that a "satisfactory background in political science" means a minimum of five well distributed courses, including at least one relating to development. Those who lack any of these prerequisites must obtain them in addition to the required graduate courses. Therefore,

this specialist program may take some entrants longer than one academic year to complete.

In this program all students are required to take JPE 2408Y *Political Economy of International Development*. In addition, students must complete the equivalent of one graduate half-course in economics, normally ECO 2700H *Economic Development I*, selected from the economics course list (see listing in the *Graduate Information Guide*). One additional course must be chosen from the approved political science course list. The remaining course may be chosen from either the political science or political economy course lists.

Degree of Doctor of Philosophy

Admission Requirements

Admission to the Ph.D. program is offered only to excellent students who have either completed an M.A. degree in political science (or its equivalent) by the time of enrolment or have completed the equivalent of a four-year B.A. with a concentration in political science by the time of enrolment. Only exceptional students will be admitted directly to the Ph.D. program from the B.A. Applicants from both levels are expected to have achieved grades averaging A- or better in their most recent degree. Applicants from the B.A. level will apply to the M.A. program but indicate on the M.A. application form that they wish to be considered for direct entry to the Ph.D. program.

Program Requirements

1 Course requirements

The department offers graduate courses in the following five core fields:

Political Theory
Canadian Government and Politics
International Relations
Comparative Government—Developing Societies
Comparative Government—Industrial Societies

Many of the principal teaching and research interests of the department's faculty focus on areas that cut across the conventional core fields. These are designated as areas of specialization which provide an alternative way of structuring the graduate program. Currently the following areas of specialization are offered:

Public Policy (PP)
Political Economy (PEC)
Public Law and Federalism (PLF)
Political Behaviour and Democratic Politics (PBD)
Women, Gender, and Politics (WGP)

Students who enter the Ph.D. program from a B.A. should aim to complete their work within

six years. They will take a total of six full graduate courses. Students will need to attain at least an A- average in their first four courses in order to continue in the Ph.D. program. In selecting their courses, students should ensure that they satisfy the field and/or area requirements as described below for those entering the Ph.D. program with an M.A.

Students who enter the Ph.D. program from an M.A. should aim to complete their work within five years. They will take between two and five full courses, depending on their relevant background in the major and minor field or area they choose to pursue. All Ph.D. students are required to have at least one graduate half-course in political theory. All Ph.D. students in majors other than political theory are also required to complete one half-course in research design. Graduate courses taken at the M.A. level at the University of Toronto or elsewhere may be counted, with the department's permission, towards meeting some course requirements. Most students who enter from the M.A. will take the equivalent of three full courses to satisfy program requirements; all Ph.D. students must take a minimum of two full courses with the department after entering the Ph.D. program.

Ph.D. students have the option of organizing their course work in one of two ways:

a A major core field and a minor core field

Students who choose this option must fulfil the core course requirement (1.0 FCE) plus the equivalent of one other full-year course in the major field, and the core course plus the equivalent of one other full-year course in their minor field.

b A major core field and an area of specialization

Students who choose this option must fulfil the core course requirement (1.0 FCE) plus the equivalent of one other full-year course in their major field and the equivalent of two full-year courses in their area of specialization, at least one of which must be outside the major field.

2 Major field examination

By the end of the second year of the program, all Ph.D. students will be expected to have taken an examination in the major field. In the fields of Canadian Government and Politics, International Relations, Comparative Government—Developing Societies, and Comparative Government—Industrial Societies, the examination is based largely on the subject matter of the core course. In Political Theory, it is based on a list of texts made available by the department.

The major field examination should be taken in May or August of the year in which the core course is taken as long as all assignments in the core course have been completed. The examination must be taken no later than the second year of the Ph.D. program. A student who fails to achieve a grade of at least A- is permitted one opportunity to retake the examination. If, after failing the examination once, the major field is changed, the student is permitted two attempts to pass the examination in the new field.

3 Thesis proposal, thesis committee, and thesis schedule

Students should assign a high priority to defining a thesis topic and choosing a thesis committee. Those entering the Ph.D. program from an M.A. must identify a working thesis topic and the name of a supervisor by October 15 of their second year. Those entering the program from a B.A. must do so by October 15 of their third year. By the beginning of the third year (fourth for direct entry applicants) students must (a) have established a thesis committee of three faculty members including a thesis supervisor, and (b) have completed a thesis proposal of approximately 25 pages for submission to the thesis committee.

The research and writing of the thesis will follow the acceptance of the thesis proposal. The work schedule should permit the student to complete the thesis by the end of the fifth year (in the case of those admitted from an M.A.) or the sixth year (in the case of those admitted from a B.A.).

4 Language requirement

To satisfy the language requirement, students must demonstrate competence in French or in an approved language appropriate to the nature of the graduate work in which they are engaged. This requirement is to be met by the end of the third year of study.

5 Residency requirements

Those entering the program from an M.A. must spend a minimum of three sessions in residence. Those entering from a B.A. must spend a minimum of six sessions in residence.

6 Transfer between the M.A. and Ph.D. programs

Students admitted to the Ph.D. from a B.A. (or equivalent degree) who receive less than an A- average in their first four courses will be recommended to SGS for transfer to the M.A. program. If the transfer is approved, these students will graduate with a terminal M.A.,

provided their grades meet the requirements for the M.A. degree.

In exceptional cases, on the initiative of the Director of Graduate Studies, students may be transferred from the M.A. to the Ph.D. program. Such transfers will occur only where a full assessment of an applicant's B.A. record (or equivalent) was impossible and where that student's instructors concur that the student in question has excelled in the first half of the M.A. program.

Collaborative Programs

The Department of Political Science participates in the following collaborative programs:

- 1 Asia-Pacific Studies
- 2 Environmental Studies (See Environment)
- 3 Ethnic and Pluralism Studies
- 4 International Relations
- 5 Jewish Studies
- 6 South Asian Studies
- 7 Women's Studies

For more information, consult the respective entries in this calendar.

Combined Programs

Combined Juris Doctor/Master of Arts, Law and Political Science (specialization in International Relations)

The department participates in two programs with the Faculty of Law, allowing students to obtain an Master of Arts in International Relations or a Ph.D. in addition to a J.D. The combined J.D./M.A. in International Relations is available to students whose M.A. home base is Political Science and allows for the completion of both degrees in three years (rather than the four that the separate degrees would take). Students must be admitted to both the Faculty of Law and the Collaborative Master of Arts Program in International Relations.

Combined Juris Doctor/Doctor of Philosophy

The J.D./Ph.D. (Political Science) program enables students to complete both degrees in at least one year less time than it would take for the separate degrees. Students must be admitted to the Ph.D. program in Political Science and the Faculty of Law, through separate application processes. Students would complete the first year of law in the combined program and then would complete a year in Political Science before returning for two more years in Law. They would then complete the requirements of the Ph.D. program, including a thesis.

Courses of Instruction

Some courses listed have an undergraduate component and begin the first week of the session. POL 2501Y is a general research design course, the research component of which depends on the student's declared area of specialization. Thus, half of the credit for this course may be counted for credit in the major field, though not in political theory.

Not all courses are given every year. Consult the departmental timetable.

Political Theory

POL 2000Y	Comparative Studies in the History of Political Thought (core course)/Staff
POL 2001Y	Problems of Political Community/ J. H. Carens
POL 2004Y	Marxism/R. B. Day
POL 2006H	Studies in Modern Political Theory/Staff
POL 2007Y	Twentieth-Century Political Thought/A. A. Kontos
POL 2008Y	The Political Theory of G. W. F. Hegel/A. Brudner
POL 2010H	Democratic Theory/Staff
POL 2011H	Problems in Political Thought of the Socratic School/Staff
POL 2014H	The Problem of Natural Right/ Staff
POL 2019Y	The Political Philosophy of Political Economy/R. B. Day

At press time, approval had just been given to revise the name of the collaborative program to Genome Biology and Bioinformatics Collaborative Program. As well, the graduate departments of Biomaterials and Biomedical Engineering, Cell and Systems Biology, Chemical Engineering and Applied Chemistry, Computer Science, and Ecology and Evolutionary Biology were added as participating units.

Nature of the Collaborative Program

The graduate departments of Biochemistry, Laboratory Medicine and Pathobiology, Medical Biophysics, Medical Science, and Molecular and Medical Genetics participate in the Collaborative Program in Proteomics and Bioinformatics. Applicants who wish to enrol in the collaborative program must apply to and be admitted to both the collaborative program and a graduate degree program in one of the collaborating departments. Since this is a Ph.D. program, students must be registered in the doctoral program of one of the host departments and must be undertaking research with a significant genome biology and/or bioinformatics component under the supervision of a member

of the program. Upon successful completion of the Ph.D. requirements of the host department and the program, students receive the notation "Completed Program in Proteomics and Bioinformatics" on their transcript.

Program Requirements

Students must:

1 complete a Ph.D. thesis and any core courses as required by their host department.
2 complete the interdepartmental courses or alternates (one of JBB 2026H/JBZ 1472H/JTB 2010H/JZB 1521H; and one of BME 1458H/CSC 2417H/CSC 2418H/CSC 2515H/JTB 2020H). These courses may be taken in place of some host department courses after a student obtains written permission from the host department. Prospective students should contact the Director for more details on admission procedures and course requirements.
3 participate in the seminar series and participate in collaborative traineeships in which an aggregate time of at least four months is spent in a collaborating laboratory, thematically working on an aspect of the thesis project but with a complementary method. The goal of the collaborative traineeship is ideally a joint publication between the two member labs.

Courses of Instruction

Students should take one genome biology/"omics" course (Group I) and one computational biology/bioinformatics course (Group II) from the following:

Group I

JBB 2026H	Protein Structure, Folding and Design
JBZ 1472H	Computational Genomics and Bioinformatics
JTB 2010H	Proteomics and Functional Genomics
JZB 1521H	Molecular Evolution

Group II

BME 1458H	Pattern Discovery Methods for Biomedical Engineering
CSC 2417H	Algorithms for Genome Sequence Analysis
CSC 2418H	Computational Structural Biology
CSC 2515H	Machine Learning
JTB 2020H	Applied Bioinformatics

Psychology PSY

Department of Psychology
 Graduate Studies
 Room 4031, Sidney Smith Hall
 University of Toronto
 Toronto, Ontario M5S 3G3
 Canada

Telephone: (416) 978-3404

Fax: (416) 978-4811

E-mail: grad@psych.utoronto.ca

Web: www.psych.utoronto.ca

Graduate training in psychology stresses training in general experimental psychology. Areas of specialization include the following: brain and behaviour, perception and cognition, developmental psychology, social psychology, and personality/abnormal psychology. The Department does not offer instruction or specialization in clinical psychology. In all areas, the emphasis is on training for experimental research.

Students are admitted under the general regulations of the School of Graduate Studies. Successful applicants normally have at least an A- average (or first-class standing) in their last two undergraduate years, and the equivalent of six full courses in psychology including statistics and some laboratory experience. Other conditions for admission are outlined in a separate booklet, *Graduate Studies in Psychology*, available from the Coordinator of Graduate Studies. It is assumed that all students entering the master's program intend to continue into the Ph.D. program.

Degree of Master of Arts

The M.A. program in Psychology requires one academic year of graduate study. The program of study includes courses and individual research training leading to a thesis.

In the M.A. year, students must complete the following five half-course equivalents:

- 1 PSY 1000H *Directed Studies* to prepare for the M.A. thesis research
- 2 PSY 2001H *Design of Experiments I*, experimental design and statistics
- 3 three half-courses
- 4 M.A. thesis

It is expected that after the M.A. year, students will proceed to the Ph.D. program. To be eligible for admission, adequate research performance and at least an A- average are normally required.

Degree of Doctor of Philosophy

The Ph.D. program in Psychology requires a minimum of two years of residence beyond the master's degree, but usually takes at least three years. Applicants with a master's degree from another university may be required to enrol in a three-year residence program. Individual programs of study are planned and include continuing research training with staff members. There is no language requirement.

It is expected that after the M.A. year, students will proceed to the Ph.D. program. To be eligible for admission, adequate research performance and at least an A- average are normally required.

All students must complete the following:

- 1 PSY 3000H *Research Project in Psychology* — usually taken in Ph.D. 1. This is a research project course supervised by a faculty member other than the student's Ph.D. supervisor. It is a one-session course spread over Ph.D. 1.
- 2 PSY 3001H *Professional Psychology* — usually taken in Ph.D. 1.
- 3 An advanced statistics course chosen from a list provided by the Department.
- 4 Four half-courses.
- 5 Breadth requirement — during the M.A. and Ph.D. combined, two half-courses in two different areas not in the student's major area, each course requiring a major paper. Courses taken to fulfil the breadth requirement may be included in the four half-course requirement.
- 6 Thesis proposal and oral exam PSY 4000H. This is a one-session course spread over the full year leading to a formal proposal for doctoral research and requiring an examination in the student's area of specialization.
- 7 Ph.D. thesis.

Students may take other courses as they wish, but it is expected that the requirements will be completed in the first two years of the Ph.D. program. Students admitted with an M.A. from another university will normally be required to take PSY 2001H *Design of Experiments I*, in addition to the other Ph.D.

requirements; however, exemptions may be granted by the graduate director of the Department of Psychology.

Collaborative Programs

The Department participates in the following collaborative programs:

- 1 Addiction Studies
 - 2 Aging, Palliative and Supportive Care Across the Life Course
 - 3 Developmental Science
 - 4 Neuroscience
 - 5 Women's Health
- For more details, consult the separate entries in this calendar.

Courses of Instruction

Not all courses are offered each year. For current offerings, consult the Coordinator of Graduate Studies.

- PSY 1000H Directed Studies
 PSY 1200H,Y Selected Topics in Psychology
 PSY 1500H Conceptual Bases of Psychology
 PSY 2001H Design of Experiments I

Biology and Behaviour

Core Courses

- PSY 5101H Mechanisms of Behaviour
 PSY 5102H Motivational Processes
 PSY 5103H Learning and Plasticity
 PSY 5104H Neuropsychology

Advanced Courses

- PSY 5110H Advanced Topics in Behavioural Neuroscience I
 PSY 5111H Advanced Topics in Behavioural Neuroscience II
 PSY 5112H Advanced Topics in Behavioural Neuroscience III
 PSY 5120H Advanced Topics in Animal Behaviour and Motivation I
 PSY 5121H Advanced Topics in Animal Behaviour and Motivation II
 PSY 5122H Advanced Topics in Animal Behaviour and Motivation III
 PSY 5130H Advanced Topics in Neuropsychology I
 PSY 5131H Advanced Topics in Neuropsychology II
 PSY 5132H Advanced Topics in Neuropsychology II

Perception/Cognition/Cognitive Neuroscience

Core Courses

- PSY 5201H Audition
 PSY 5202H Vision
 PSY 5203H Higher Cognition
 PSY 5204H Attention
 PSY 5205H Memory

Advanced Courses

- PSY 5210H Advanced Topics in Perception I
 PSY 5211H Advanced Topics in Perception II
 PSY 5212H Advanced Topics in Perception III
 PSY 5220H Advanced Topics in Cognition I
 PSY 5221H Advanced Topics in Cognition II
 PSY 5222H Advanced Topics in Cognition III

Developmental Psychology

Core Courses

- PSY 5300H History, Theory and Methods of Developmental Psychology
 PSY 5301H Biological Development
 PSY 5302H Perceptual Development
 PSY 5303H Cognitive Development
 PSY 5304H Language Development
 PSY 5305H Social Development

Advanced Courses

- PSY 5310H Advanced Topics in Development I
 PSY 5311H Advanced Topics in Development II
 PSY 5312H Advanced Topics in Development III
 PSY 5313H Advanced Topics in Development IV

Social/Personality/Abnormal Psychology

Core Courses

- PSY 5401H Abnormal
 PSY 5402H Personality
 PSY 5403H Social Cognition
 PSY 5404H Interpersonal and Group Behaviour

Advanced Courses

- PSY 5410H Advanced Topics in Abnormal I
 PSY 5411H Advanced Topics in Abnormal II
 PSY 5412H Advanced Topics in Abnormal III
 PSY 5420H Advanced Topics in Personality I
 PSY 5421H Advanced Topics in Personality II
 PSY 5422H Advanced Topics in Personality III
 PSY 5430H Advanced Topics in Social Psychology I

PSY 5431H	Advanced Topics in Social Psychology II
PSY 5432H	Advanced Topics in Social Psychology III
PSY 5433H	Advanced Topics in Social Psychology IV
PSY 3000H ^o	Research Project in Psychology
PSY 3001H	Professional Psychology (Credit/No Credit)
PYS 3002H	Teaching Practicum (Credit/No Credit)
PSY 4000H ^o	Specialization Study (Credit/No Credit)
PSY 4700H	Psychology Testing and Assessment I
PSY 4701H	Psychology Testing and Assessment II
PSY 4705H	Psychological Assessment of Children
PSY 4710H	Practicum in Testing and Assessment (Credit/No Credit)
PSY 4711H	Practicum in Applied Psychology (Credit/No Credit)
PSY 4720H,Y ⁺	Internship in Applied Psychology (Credit/No Credit)

Cross-Listed Courses

CSC 2535H	Computation in Neural Networks
JLP 2450H	Psycholinguistics/ <i>P. A. Reich</i>
JNS 1000Y	Fundamentals of Neuroscience: Systems and Behaviour/ <i>Staff</i>
JNS 1001H	Neuroanatomy of Mind/ <i>J. A. Saint-Cyr</i>
JPX 1001Y	Parenting: Multidisciplinary Perspectives/ <i>C. Corter (coordinator)</i>
JPM 1005Y	Behavioural Pharmacology/ <i>E. M. Sellers</i>
ZOO 2215Y	Insect Behaviour/ <i>G. K. Morris, T. M. Alloway</i>

^oCourses which may continue over a program. The course is graded when completed
⁺ Extended course. For academic reasons, course work is extended into session following academic session in which course is offered.

 University of Toronto
 Toronto, Ontario M5T 3M7
 Canada

Telephone: (416) 978-2058
Fax: (416) 978-8299
E-mail: chl.grad@utoronto.ca
Web: www.phs.utoronto.ca

Applicants are admitted to the multidisciplinary field of public health under the general regulations of the School of Graduate Studies. Applicants are strongly advised to have some background in statistics and quantitative methods, as well as in a social science discipline. In addition, field and employment experience are taken into consideration, especially for the M.H.Sc. program. More specific program details, requirements, course descriptions, and a supplementary application are available from the Graduate Department of Public Health Sciences. A complete description of all programs, degree requirements, courses, faculty research interests, and policies is available on the departmental Web site www.phs.utoronto.ca. Applications must be submitted by February 1.

Degree of Master of Health Science

The M.H.Sc. degree program in Public Health is undertaken by students interested in professional and/or research careers in the community, academic, public or private sectors. Students may specialize in one of five areas:

- 1 Community Health and Epidemiology
- 2 Community Nutrition
- 3 Family Medicine

4 Health Promotion**5 Occupational and Environmental Health**

All students in the M.H.Sc. program will learn the basic theoretical and methodological approaches used in community health, will share a common understanding of the field, will be able to pursue areas of specific personal interest, and will acquire some field and research experience (practicum) in their chosen area. Course sequences have been planned to include a set of common core courses, to introduce basic theory and methods early, to allow as much elective time as possible, and to permit the application of theory to practice in a field or research setting. A thesis is not required, but students may be required to undertake major papers and independent projects.

The M.H.Sc. training in Public Health Sciences aims to:

- 1 provide students with access to appropriate knowledge and skills from which to form the basis of ethical competence in public health generally and in their discipline;
- 2 promote students' use of the conceptual and practical tools/methods needed to understand developments in public health and in their discipline;
- 3 provide a framework of evaluative skills which can be used to apply independent scientific judgement;
- 4 provide a foundation for a career in Public Health research or practice; and
- 5 provide entry preparation for doctoral studies in public health sciences.

Program Requirements

- 1 An approved program of study includes the equivalent of 10 full courses, of which 0.5 course equivalent is a core subject and at least 1.0 course equivalent is a field practicum.
- 2 If registered on a full-time basis in the program and, with the exception of the session in which a practicum is undertaken, a student should take two to three full-course equivalents in any one session.
- 3 Depending on the area of specialization, full-time students require between 16 and 22 months to complete an M.H.Sc. program, including time spent in appropriate field settings.
- 4 Specific program requirements and course sequences and options vary by area of specialization and are fully explained on the Web site.
- 5 A part-time study option is available which allows six years for completion of the program. Contact the Graduate Department of Public Health Sciences for further information.

Degree of Master of Science

The M.Sc. degree program is undertaken by students interested in research and academic careers in public health sciences. Students may specialize in one of the following areas or fields:

- 1 Biostatistics
- 2 Epidemiology*
- 3 Health and Behavioral Science*
- 4 Occupational and Environmental Health*
- 5 Social Science and Health* (formerly Behavioural Science)

*** Curriculum under revision, no new admission since 2004-2005. Students interested in these areas should apply to the comparable M.H.Sc. program which has been modified to increase the research emphasis.**

Program Requirements

- 1 Completion of all degree requirements within five years.
- 2 The writing of a thesis under the supervision of a thesis committee (supervisor and at least one additional faculty member) and its defence before an examination committee appointed by the Graduate Department of Public Health Sciences.

A course-only option is available in Biostatistics.

- 3 The course load varies by specialization and the student's knowledge of the area of specialization and is fully explained on the Web site.

- 4 A part-time M.Sc. program is available. Submission of an approved program plan, with annual updates, is required.

Degree of Master of Science in Community Health

Pending final approval, this degree program will begin September 2007.

The academic objective of the M.Sc.C.H. degree program is to prepare health practitioners who combine enhanced health/professional leadership and teaching skills with a comprehensive understanding of public health and of their specific fields or specialty areas. Equally important, participants in the program will refine their critical, analytic, interpretive, and scholarly skills. Furthermore, this program will help develop professional models for improved interprofessional team practice and education spanning clinical, community, and public health.

The program's academic objectives will be achieved through course work which includes lectures, seminars, case studies, literature review, as well as individual and group assignments. In some areas, specified current con-

tinuing education offerings at the Faculty of Medicine will form the basis for partial credit towards the companion graduate course. Practica experiences will provide students with opportunities to apply, critically evaluate, and reflect upon their new skills.

Students will specialize in one of four fields:

- 1 Health Practitioner Teacher Education (HPTE)
- 2 Family and Community Medicine (FCM)
- 3 Public Health Nutrition (PHN)
- 4 Wound Prevention and Care (WPC)

The first field, Health Practitioner Teacher Education, is seen to be broadly generic and applicable to all health professions. The other three represent specific professional practice disciplines.

Admission Requirements

Relevant professional experience as either a public health, community, or clinical practitioner is highly desirable. Admission to specific fields (i.e., FCM, PHN, and WPC) will require appropriate certification/licensure in a regulated health profession and may require a valid license to practice in Canada or the student's home jurisdiction.

Applicants are admitted under the general regulations of the School of Graduate Studies. This includes an appropriate four-year undergraduate degree, or its equivalent from a recognized university, and demonstrated English language proficiency. For the M.Sc. C.H. degree program, eligible undergraduate degrees include those in a public health specialty and those from one of the regulated health professions in Ontario with the equivalent of a minimum mid-B average in the last academic year.

Applicants are expected to have the appropriate background preparation specific to the area or field of interest. Consult the Web site for details.

Program Requirements

- 1 The M.Sc.C.H. is a course-work only program which requires the completion of 5.0 full course equivalents (FCE), including 0.5 FCE of a core Public Health Sciences subject; 0.5 to 1.0 FCE in supervised field placements or practica; normally 2.5 FCE in field-specific required courses; and 1.0 to 1.5 FCE in elective courses.
- 2 The specific program requirements, course sequences, and options vary by field of specialization; they are fully outlined on the Web site.

- 3 Students can complete the program in 12 months of intensive full-time study or over a maximum period of 5 years of part-time study.

Diploma in Community Health

A Graduate Diploma in Community Health (Dip.C.H.) (OCGS Type 1) may be awarded in exceptional circumstances to students in the M.Sc.C.H. program upon request. A student would only be eligible after successfully completing at least 3.5 full-course equivalents of the master's degree program requirements, including the required courses for the field, and with the approval of the Department.

Degree of Doctor of Philosophy

The Ph.D. degree program is undertaken by students interested in research and academic careers in community health. The specializations offered include:

- 1 Biostatistics
- 2 Epidemiology
- 3 Social and Behavioural Health Sciences

Admission Requirements

Applicants are admitted under the general regulations of the School of Graduate Studies, and must provide evidence of facility in the English language. Applicants to the Ph.D. program normally are expected to have a master's degree in Public Health Sciences, or a related field from a recognized university, with a minimum A- standing. Applicants must demonstrate educational and/or professional experience that indicates a capacity to undertake research-oriented doctoral studies. They must provide satisfactory references pertaining to their academic and research abilities. In addition, applicants are expected to have the appropriate background preparation specific to the area or field of interest. (Consult the Web site for details.)

Program Requirements for Full-Time Ph.D.

Each specialization has specific requirements in addition to the common features listed below:

- 1 Full-time registration (winter and summer sessions) for the first four years of the doctoral program.
- 2 Completion of all degree requirements within six years from first registration in the program. Thereafter, students may apply for a maximum of two extensions.
- 3 The course requirements vary by specialization and are related to the student's knowledge of the field. Consult the Web site.
- 4 The writing of a comprehensive examination in the major area of specialization.

- 5 The designation of a minor area of specialization, depending on sub-specialization.
- 6 The successful completion of formal examinations and other assessments at specified points within the program to ensure continuation in the program.
- 7 Satisfactory evidence of proficiency in statistics or research methods or the inclusion of at least one such course in the program.
- 8 The writing of a Ph.D. thesis under the supervision of an approved thesis committee (supervisor plus two additional faculty members).
- 9 The oral defence of the thesis before an examination committee appointed by the School of Graduate Studies.

Program Requirements for Flexible-Time Ph.D.

With the approval of the graduate chair, some applicants may be admitted to a flexible-time Ph.D. program. This program will benefit mature students with career and/or familial obligations. The degree requirements for the flexible-time program are identical to those listed above for the full-time Ph.D. program; however, students have up to eight years to complete the program. They are required to register full-time for the first four years of their program. Thereafter, they may register part-time. A plan of study and research activities will be negotiated at initial registration, to be reviewed and updated annually.

Collaborative Programs

Students in the M.H.Sc., M.Sc., and Ph.D. programs in the Graduate Department of Public Health Sciences may also participate in a range of collaborative programs. For more details see the separate listings in this calendar:

- 1 Aboriginal Health
- 2 Addiction Studies
- 3 Aging, Palliative and Supportive Care Across the Life Course
- 4 Bioethics
- 5 Cardiovascular Sciences
- 6 Community Development
- 7 Environment and Health (see Environment)
- 8 Health Care, Technology and Place
- 9 Health Services and Policy Research
- 10 Women's Health
- 11 Women's Studies

*Courses which may continue over a program. The course is graded when completed.

Courses of Instruction

Not all courses are offered each year. Please check the timetable on the Web site www.phs.utoronto.ca for current course offerings.

Core Courses

- CHL 5004H Introduction to Public Health Sciences

Biostatistics and Demography

- CHL 5201H Introductory Biostatistics for Students in Biological Sciences I
- CHL 5202H Introductory Biostatistics for Students in Biological Sciences II
- CHL 5203H Public Health Research Methods
- CHL 5204H Survey Methods in Health Sciences II
- CHL 5205H Demography and Vital Statistics I
- CHL 5206H Demography and Vital Statistics II
- CHL 5207Y Laboratory in Statistical Design and Analysis
- CHL 5208Y Advanced Laboratory in Statistical Design and Analysis
- CHL 5209H Survival Analysis I
- CHL 5210H Categorical Data Analysis
- CHL 5211H Demographic Analysis
- CHL 5220H Community Health Appraisal Methods I
- CHL 5221H Community Health Appraisal Methods II
- CHL 5222H Longitudinal Data Analysis
- CHL 5223H Applied Bayesian Methods
- CHL 5224H Statistical Genetics
- CHL 5225H Advanced Statistical Methods for Clinical Trials
- CHL 5250H Special Topics in Biostatistics
- CHL 5251H Survival Analysis II

Community Nutrition

Courses offered by the Department of Nutritional Sciences

- NFS 1201H Public Health Nutrition
- NFS 1204Y^{*} Master's Seminars in Nutritional Sciences (Credit/No Credit)
- NFS 1208H Field Observation and Nutrition Program Laboratory I
- NFS 1209H Field Observation and Nutrition Program Laboratory II
- NFS 1211H Community Nutrition
- NFS 1216H Selected Topics in Nutrition
- NFS 1218H Recent Advances in Nutritional Sciences I
- NFS 1219H Recent Advances in Nutritional Sciences II
- NFS 1220H Clinical Nutrition

NFS 1221H Nutrition Programs and Strategies
 NFS 1484H Advanced Nutrition

Epidemiology

CHL 5401H Epidemiologic Methods I
 CHL 5402H Epidemiologic Methods II
 CHL 5403H Epidemiology of Non-Communicable Diseases
 CHL 5404H Research Methods I
 CHL 5405H Assessment of Community Health Needs
 CHL 5406H Quantitative Methods for Biomedical Research
 CHL 5407H Categorical Data Analysis for Epidemiologic Studies
 CHL 5408H Research Methods II
 CHL 5409H Cancer Epidemiology
 CHL 5410H Occupational Epidemiology
 CHL 5411H International Health
 CHL 5412H Communicable Disease Epidemiology I: Principles
 CHL 5413H Public Health Sanitation
 CHL 5414H Additional Topics in Epidemiology of Non-Communicable Diseases
 CHL 5415H Communicable Disease Epidemiology II: Practice
 CHL 5416H Environmental Epidemiology
 CHL 5417H Tobacco and Health: From Cells to Society
 CHL 5418H Scientific Overview in Epidemiology
 CHL 5419H Empirical Perspectives on Social Organization and Health
 CHL 5420H Global Health Research
 CHL 5421H Aboriginal Health
 CHL 5422H Applied Epidemiology and Public Health Policy
 CHL 5423H Doctoral Series in Epidemiology
 CHL 5450H Special Topics in Epidemiology

Family Medicine

CHL 5601H Teaching Evidence-Based Family Medicine in the Clinical Setting
 CHL 5602H Working with Families in Family Medicine
 CHL 5603Y Social, Political, and Scientific Issues in Family Medicine
 CHL 5604H Human Development Issues for Family Medicine
 CHL 5605H Research Issues in Family Medicine/Primary Care

CHL 5606H Research in Family Medicine/Primary Care Methodological Applications
 CHL 5607H Teaching and Learning by the Health Professions: Principles and Theories
 CHL 5608H Teaching and Learning by the Health Professions: Practical Issues and Approaches
 CHL 5609H Continuing Education in the Health Professions
 CHL 5610H Theory and Practice of Behaviour Change in Health Professional Settings

Global Health

CHL 5700H Global Public Health
 CHL 5702H History of International Health
 CHL 5703H Urban Epidemics

Health Promotion

CHL 5801H Health Promotion
 CHL 5802H Planning in Health Promotion and Population Health
 CHL 5803H Health Promotion Strategies
 CHL 5804H Health Behaviour Change
 CHL 5805H Critical Issues in Health Promotion Practice
 CHL 5806H Health Promotion Practice Field Inquiry
 JXP 5807H Health Communications

Occupational and Environmental Health

CHL 5902H Advanced Occupational Hygiene
 CHL 5903H Environmental Health
 CHL 5904H Perspectives in Occupational Health and Safety—Legal and Social Context
 CHL 5905H Advanced Clinical Studies in Occupational Medicine
 CHL 5906H Organization and Management of Occupational Health Services
 CHL 5907H Radiological Health
 CHL 5910H Occupational and Environmental Hygiene I
 CHL 5911H Occupational and Environmental Hygiene II
 CHL 5912H Industrial Toxicology
 CHL 5914H Physical Agents I—Noise
 CHL 5915H Control of Occupational Hazards
 CHL 5916H Environmental Health Policy
 CHL 5917H Concepts in Safety Management
 CHL 5950H Special Topics in Occupational and Environmental Health

Public Health Policy

CHL 5300H Public Health Policy

Social and Behavioural Health Sciences

AGE 2000H Social Determinants of Aging and Health

AGE 2500H Research Topics in Aging and the Life Course

AGE 3000H Advanced Research Seminar in Aging and the Life Course

CHL 5101H Social Theory and Health

CHL 5102H Social and Political Forces in Health

CHL 5103H Sociology of Health in Canada

CHL 5104H Health Psychology

CHL 5105H Social Determinants of Health

CHL 5106H Health and Illness Behaviour in Children and Adolescents

CHL 5108H Work and Well-Being

CHL 5109H Gender and Health

CHL 5110H Theory and Practice of Program Evaluation

CHL 5111H Qualitative Research Methods

CHL 5112H Community Development in Health

CHL 5113H Health and Culture: Meeting the Needs of a Multicultural Society

CHL 5114H Social Science Perspectives on Mental Health

CHL 5115H Qualitative Analysis and Interpretation

CHL 5116H Public Policies to Improve Health

CHL 5117H A Global Perspective on the Health of Women and Children

CHL 5118H International Health, Human Rights, and Peace-Building

CHL 5119H Social and Political Perspectives on Drugs and Addiction

CHL 5120H Population Health Perspectives on Mental Health and Addictions

CHL 5121H Genomics, Bioethics and Public Policy

CHL 5122H Qualitative Research Practice (Credit/No Credit)

CHL 5123H Issues in the Transdisciplinary Research and the Health of Marginalized Population

CHL 5150H Social Science Research

Practica and Related CoursesCHL 5620Y^o Medical Educator Practicum in Family Community Medicine (Credit/No Credit)

CHL 5621H+ Extension to Medical Educator Practicum in Family and Community Medicine (Credit/No Credit)

CHL 6010Y+ Required M.H.Sc. Practicum (Credit/No Credit)

CHL 6011H+ Required Practicum Extension (Credit/No Credit)

CHL 6020Y+ Optional M.H.Sc. Practicum (Credit/No Credit)

CHL 6021H+ Optional Practicum Extension (Credit/No Credit)

CHL 6022Y+ Long Extension to Optional Practicum (Credit/No Credit)

Reading Courses and Research Projects

CHL 7001H Directed Reading in an Approved Field of Community Health

CHL 7002H Approved Research Project in an Approved Field of Community Health

Collaborative Program Courses**Addiction Studies**

PAS 3700H Multidisciplinary Aspects of Addiction Studies

PAS 3701H Advanced Research Issues in Addictions

Aging and the Life Course

AGE 2000H Social Determinants of Aging and Health

AGE 2500H Research Topics in Aging and the Life Course

AGE 3000H Advanced Research Seminar in Aging and the Life Course

^oCourses which may continue over a program. The course is graded when completed.

+ Extended course. For academic reasons, course work is extended into session following academic session in which course is offered.

Introduction

An interdisciplinary program is offered by the School of Public Policy and Governance leading to a Master of Public Policy degree. The program provides professional education in two fields of specialization: Social and Economic Policy (domestic) and Global Public Policy. The M.P.P. is offered as a 20-month program featuring core instruction on a small-group, cohort-based model. In addition to the core of material considered essential for policy

practice, students take elective courses within either of the two fields of specialization, each of which cuts across critical policy sectors such as health, education, cities, and the environment. Integrating seminars are led by faculty members. Invited visiting public sector leaders and external researchers bridge theory and practice, providing contact with senior professionals in government and the broader public, private, and community sectors. The program also provides access to courses and research facilities available in many other graduate departments, centres, and institutes across the University.

Degree of Master of Public Policy

Admission Requirements

Students are admitted to the Master of Public Policy (M.P.P.) degree program under the general regulations of the School of Graduate Studies. A four-year University of Toronto bachelor's degree with at least an overall B+ standing in the final year, or its equivalent from a recognized university, is required for admission to the 20-month program. The program is open to applicants of all disciplinary backgrounds. A basic competency in mathematics and a basic understanding of the Canadian political system are assumed. Applicants without such preparation should consult with the program director. University-level courses in these areas are not required for admission.

Program Requirements

1 16 half-course equivalents, as follows:

a 12 required half-course equivalents (see required core courses listed below)

b 4 elective half-course equivalents within one of two areas of specialization chosen from the list of electives offered by participating graduate units.

2 A mandatory internship (PPG 2006Y) which can be completed either in the intervening summer or over the course of the second year. The internship is equivalent to one full course (or two half-course equivalents). The internship research report is graded on a credit/no-credit basis.

3 The program is offered on a full-time basis only.

Courses of Instruction

Required Core Courses

FIS 1210H	Information and its Social Context
PPG 1000H	Governance and Institutions
PPG 1001H	The Policy Process

PPG 1002H	Microeconomics for Policy Analysis
PPG 1003H	Macroeconomics for Policy Analysis
PPG 1004H	Quantitative Methods for Policy Analysis
PPG 1005H	The Social Context of Policy-making
PPG 1007H	Putting Policy into Action: Strategic Implementation of Public Objectives
PPG 2001H	Integrating Seminars - Current Issues/Problems in Public Policy and Practice
PPG 2002H	Integrating Seminars - Current Issues/Problems in Public Policy and Practice
PPG 2003H	Integrating Seminars - Current Issues/Problems in Public Policy and Practice
POL 2234H	Globalization, Internationalization and Public Policy

Elective Courses

Offered in 2008/2009

The Graduate Department of Rehabilitation Science provides opportunities for the systematic study at both the M.Sc. and Ph.D. level.

The M.Sc. program focuses on the study of the physical and psychosocial dimensions of human function throughout the life span of individuals with impairments, disabilities, and/or handicaps. The M.Sc. in Rehabilitation Science is a thesis master's program preparing graduates for research careers and Ph.D. studies and should not be confused with a graduate entry-level program leading to professional practice.

The Ph.D. program is designed to prepare academic faculty and rehabilitation scientists for the global market. The program includes core and advanced courses in rehabilitation science theory and research, courses in the field of physical rehabilitation and psychosocial rehabilitation as well as courses in occupational science and physical therapy science. The program is designed to optimize the exceptional resources and build on the significant research activity that exists in the Rehabilitation Sciences at the Centre for Function and Well-Being and University of Toronto Health Science Complex.

Enquiries

Enquiries should be made to the Administrative Assistant at the above address.

Degree of Master of Science

Applicants must have graduated with a four-year University of Toronto B.Sc. degree, or equivalent, with special training in occupational therapy, physical therapy, or a related field, or the equivalent from a recognized university with a B+ average in the final two years of undergraduate study. Related fields might include nursing, psychology, sociology, social work, physical and health education, basic sciences, biomedical engineering, kinesiology, and others. Evidence of written and verbal proficiency in English is required for applicants whose first language is not English (see SGS Admissions Standards and Procedures).

The M.Sc. program in Rehabilitation Science includes both course work and a thesis. Minimum requirements include REH 1100H *Theory and Research in Rehabilitation Science*, REH 2001Y *Rehabilitation Presentations and Proceedings*, one half-course in research methodology appropriate to thesis design, and at least one additional half-course related to the field of study. Students must submit a thesis on their research and be examined by the Thesis Committee.

The program requires a minimum of 12 months of full-time study. Candidates should be aware that the completion of the thesis may take longer. Exceptional students may be considered for enrolment in a part-time program. There will be no residency requirement for part-time students. They must complete the program within five years; however, all course work must be completed within the first two years of the program. Part-time students must agree to an annual Learning Contract and must submit to the department a Program Map (planned with his or her supervisor). Part-time students should be aware that it is the student's responsibility to modify his or her schedule to accommodate required course work since course times are not flexible.

Degree of Doctor of Philosophy

Admission Requirements

Ph.D. degree students are accepted via one of three routes:

- 1 After completion of a thesis master's degree** or an equivalent M.Sc.OT or M.Sc.PT degree with a research component, with a minimum A- standing from a recognized University.
- 2 M.Sc./Ph.D. transfer program.** Outstanding students in an M.Sc. program may be considered for entry into the Ph.D. program without completing their M.Sc. thesis. Those students may petition to transfer into the Ph.D. program

within 18 months of registration in a M.Sc. program. The student must:

- maintain satisfactory performance (minimum A- average) in master's course work;
- prepare and defend a thesis proposal to an examining committee; and
- complete the prerequisite course work.

All transfers require the approval of the Graduate Coordinator.

3 Direct entry into the Ph.D. program. For outstanding students, direct entry into a Ph.D. without a previous master's degree will be considered. The following requirements are in addition to the normal requirement for admission to the Ph.D. program. Applicants must:

- have a minimum A+/A average (GPA 4.0) in an undergraduate program from a recognized university;
- have previous relevant research experience, outstanding references and a personal recommendation from a potential supervisor; complete the prerequisite course work;
- complete courses REH 1100H *Theory and Research in Rehabilitation Science*, REH 1130H *Theory and Research in Occupational Science* or REH 1140H *Theory and Research in Physical Therapy* and REH 1120H *Research Methods for Rehabilitation Science* **plus**
- successfully complete a qualifying examination within the first 18 months of the program.

The Ph.D. graduate program emphasizes research work. Students may be required to take extra courses in addition to the degree requirements listed above. Students are expected to be on campus and participating full time until all program requirements are completed.

Program Requirements

Students will be required to take a minimum of two half-courses, the research presentations course, and complete and defend a thesis.

English Language Proficiency

Applicants, whose first language is not English, must provide evidence of written and verbal proficiency in English by completing one of the following tests:

- 1 Test of English as a Foreign Language (TOEFL)** and the Test of Written English (TWE). Applicants taking the paper-based TOEFL exam must achieve a minimum score of 600 and 5 on the TWE. Applicants taking the computer-based TOEFL exam must achieve a minimum score of 250 and 5 on the essay rating component. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 100/120 and 22/30 on the writing and speaking sections.

2 Michigan English Language Assessment Battery (MELAB): 87

3 International English Language Testing System (IELTS): 7.5

Collaborative Programs

The Graduate Department of Rehabilitation Science participates in the following collaborative programs:

- 1 Aging, Palliative and Supportive Care Across the Life Course
- 2 Biomedical Engineering
- 3 Cardiovascular Sciences
- 4 Health Care, Technology and Place (Ph.D.)
- 5 Health Services and Policy Research
- 6 Neuroscience

For more details, consult the separate entries in this calendar.

Courses of Instruction

Since not all courses are offered each academic year, the department should be consulted each session as to course offerings.

- REH 1100H Theory and Research in Rehabilitation Science/*K. Berg, H. Polatajko*
- REH 1110H Rehabilitation Services Research and Policy/*S. Rappolt*
- REH 1120H Research Methods for Rehabilitation Science/*S. B. Jaglal*
- REH 1130H Theory and Research in Occupational Science/*H. J. Polatajko*
- REH 1510H Disordered and Restorative Motor Control/*W. McIlroy*
- REH 1620H Methodological Issues in Research on Aging and Health/*A. Colantonio, C. Cott*
- REH 2000H Individual Reading and Research Course/*D. Brooks (Coordinator)*
- REH 2001Y° Rehabilitation Presentations and Proceedings (Credit/No Credit)/*K. A. Boschen*
- REH 3001Y° Advanced Rehabilitation Presentation and Proceedings (CR/NCR)/*D. Brooks, M. Verrier*
- REH 3100H° Advanced Rehabilitation Research Issues (Credit/No Credit)/*K. Berg, H. Polatajko*

°Courses which may continue over a program. The course is credited when completed.

Address:

Centre for the Study of Religion
 123 St. George Street
 University of Toronto
 Toronto, Ontario M5S 2E8
 Canada

Telephone: (416) 978-3057

Fax: (416) 978-1610

E-mail: religion.grad@utoronto.ca

Web: www.religion.utoronto.ca/

The Centre for the Study of Religion, the graduate unit of the Department for the Study of Religion, offers programs for the study of religion at both the master's and doctoral levels and facilitates research and publication on religion. The Centre consolidates the vast curricular and faculty resources that are distributed throughout the many departments and colleges of the University and enables its students to use any resource in the University which serves the study of religion.

The Centre conceives the academic study of religion in interdisciplinary terms and embraces humanistic, historical, and social scientific approaches and methods. Programs of study are constructed individually to fit the specific needs and interests of each student. At the doctoral level, from the point of admission onward, student programs must be matched with the expertise of at least three professors who help

supervise the student's work. The Centre's *Graduate Studies Handbook*, available on the Web and from the Centre, gives full information on admissions and programs as well as the research and teaching interests of the faculty.

Admission

The following materials should be sent directly to the Centre:

- 1 the admissions application form;
- 2 all transcripts;
- 3 a statement of aims for graduate study (200 words). Doctoral applicants should indicate a possible area of thesis work;
- 4 three confidential letters of recommendation;
- 5 a brief academic résumé;
- 6 a sample of academic writing.

Degree of Master of Arts

Admission Requirements

The normal prerequisite is a four-year bachelor's degree with specialization at the undergraduate level in a program of religious or cognate studies broadly equivalent to the University of Toronto's B.A. Specialist degree in religion, with at least B+ standing in the final year. Students without appropriate preparation may be required to take additional work either before admission or during an extended master's program.

Program Requirements

The M.A. program has two components.

- 1 *Courses*. The regular M.A. program requires four full-course equivalents. Included in this total are RLG 2000Y *Major Research Paper* and RLG 1200H,Y *M.A. Method and Theory Workshop*. An extended program requires additional courses, some of which may be at the undergraduate level. Satisfactory performance at the Centre requires the completion of all course work taken for graduate credit with an average grade of at least A-.
- 2 *Language(s)*. Reading knowledge of at least one language, in addition to English, selected from languages of modern scholarship and/or necessary source languages. Decisions about language requirements and how they shall be satisfied in each case are made by the Director of Graduate Studies.

Degree of Doctor of Philosophy

Admission Requirements

For admission to the doctoral program, students normally must have completed all requirements of the Centre's M.A. program, or of a comparable program at another university,

with an average of at least A- in course work and with no individual course falling below B.

Program Requirements

Entry into a new program is ordinarily permitted only in September. Upon entry into the Centre, students will be assigned an advisory committee to assist them in structuring their program. Students are required to spend at least two winter sessions on campus in full-time study, normally those of the first two academic years of a program. The Ph.D. program has five components.

- 1 *Courses*. Students must complete a minimum of three full courses or the equivalent. These shall include RLG 1000Y *Method and Theory in the Study of Religion* and at least one half-course in an area other than that designated as the area of specialization. Students may be required to take more than three courses if their preparation is considered deficient in a subject required for their program. Satisfactory performance at the Centre requires the completion of all course work taken for graduate credit with an average grade of at least A-.
- 2 *Languages*. Reading knowledge is required of at least two languages in addition to English, selected from languages of modern scholarship and necessary source languages provided that at least one shall be a language of modern scholarship. Preparation for at least one of these languages usually would have been completed prior to entry into the program. Decisions about language requirements and how they shall be satisfied in each case are made by the student's advisory committee in consultation with the Director of Graduate Studies. The language requirements must be fulfilled before writing the general examinations.
- 3 *General Examinations*. Upon completion of course work, the language requirements, and the thesis pre-proposal, the student's supervisory committee will set general examinations to assess the student's readiness for thesis research. Written examinations will cover (a) the student's area of specialization, and (b) at least one important cognate area. An oral examination on all materials assigned for the general examinations will follow. The general examinations must be completed during the third year of doctoral study.
- 4 *Thesis Proposal*. Within three months of the successful completion of the General Examinations, the student must submit a thesis proposal for approval by the student's supervisory committee.
- 5 *Thesis*. Upon approval of the thesis proposal by the student's supervisory committee, candidates will proceed to research and write a doc-

toral thesis which must be defended successfully at an oral examination. The writing of the thesis should not require more than two years.

6 Colloquium Presentation. Once general examinations are completed, Ph.D. candidates are required to participate at least once in the Centre for the Study of Religion's colloquium before undertaking their final oral examination. The colloquium participation is recorded as a credit/non credit on the transcript.

7 Final Oral Examination. The supervisory committee should approve the completed thesis before it is submitted for examination. The final oral examination is arranged by the Centre in collaboration with the School of Graduate Studies. The candidate should allow at least 12 weeks from submission of the thesis in order for the Centre to complete the arrangements for the final oral examination.

Collaborative Programs

The Centre participates in the following collaborative programs:

- 1 Bioethics
- 2 Editing Medieval Texts
- 3 Ethnic and Pluralism Studies
- 4 Environmental Studies
- 5 International Relations
- 6 Jewish Studies
- 7 South Asian Studies
- 8 Women's Health
- 9 Women's Studies

For more details, consult the separate entries in this calendar.

Courses of Instruction

Not all courses are offered every year. Please consult the Centre's *Graduate Studies Handbook* which lists the courses the Centre will offer this year as well as those cross-listed from other departments.

The Graduate Department of Slavic Languages
 and Literatures offers instruction leading to two
 degrees: M.A. and Ph.D.

Degree of Master of Arts

Admission Requirements

Normally, students are admitted to the Department having completed a B.A. in a cognate discipline. Four-year B.A. graduates of this

University and students with equivalent qualifications from other universities may be accepted as applicants for the degree of Master of Arts. As a rule, an A- average or better in Slavic subjects taken in the third and fourth years of the B.A. program is required. All entering students are expected to demonstrate their level of proficiency in the language of their major during the first week of the session. If necessary, they may have to enrol in undergraduate language courses; these language courses do not count as part of the required graduate courses.

Program Requirements

Ordinarily, a student spends a full year in residence devoted to four graduate courses or, alternatively, three graduate courses and a research paper which must be written in English. All students majoring in one of the Slavic languages and literatures must have acquired a working knowledge of (equivalent to a second-year language course), or have completed by the end of residence an approved undergraduate course in, a Slavic language other than their major one. Most often it will be Russian. Students must satisfy departmental requirements in their major language.

All M.A. students are required to take SLA 1104H *Introduction to Old Church Slavonic* and SLA 1040H *Methods of Teaching Slavic Languages* or present evidence to the Department that equivalent courses have been completed elsewhere. M.A. students who intend to have a major or minor in Slavic Linguistics must also take SLA 1109H *Studies in Old Church Slavonic*. A final grade of B or better is required in all language courses.

Degree of Doctor of Philosophy

The Department of Slavic Languages and Literatures offers the following subjects as both major and minor fields:

- 1 Croatian and Serbian Languages and Literatures
- 2 Czech and Slovak Languages and Literatures
- 3 Polish Language and Literature
- 4 Russian Language and Literature
- 5 Slavic Linguistics
- 6 Ukrainian Language and Literature

Admission Requirements

Applicants for the degree of Doctor of Philosophy must have completed the M.A. in this Department with at least an A- average in their graduate courses or provide evidence of having equivalent qualifications from a

recognized university. All students must satisfy the Department of their capacity for independent scholarly work.

Program Requirements

1 During the first two years of the Ph.D. program, students are required to take courses and to be on campus full time and consequently to participate fully in the activities of the program. Completion of all requirements, including the thesis, should take five years at the most.

2 Students are required to take the equivalent of nine full courses including at least one half-course in Slavic linguistics. Credit for not more than three full courses may be given for work done in an M.A. program. All Ph.D. students are required to maintain a minimum annual average of at least A- in their graduate course work. Poor performance – below a B average – in one session may result in the termination of the student's Ph.D. candidacy in the program.

3 All Ph.D. students majoring in one of the Slavic languages and literatures must acquire a working knowledge of (equivalent to a second-year language course), or complete by the end of their second year, at least two undergraduate courses in a Slavic language other than their major one and must satisfy departmental requirements in their major language. Students who do not major in Russian most often choose it as their second Slavic language.

4 Students must demonstrate reading knowledge of French or German.

5 Students majoring in Slavic linguistics must take at least three full course equivalents (FCEs) in linguistics in the Slavic department. In addition, they should take two FCEs in theoretical linguistics from cognate disciplines, e.g., linguistics, anthropology. Linguistics students are also strongly advised to complete one FCE in the literature of their major language. Students majoring in Slavic linguistics must acquire reading knowledge of French or German and complete, by the end of their second year, at least one Slavic language course from each of the three groups: West Slavic, East Slavic, and South Slavic.

6 All Ph.D. course programs in a Slavic literature must include a major and a minor. The minor should include the equivalent of at least two courses from any one of the six subjects listed above, or, with departmental approval, from a cognate discipline (e.g., Cinema Studies, Comparative Literature, Drama, History, Philosophy).

7 After successful completion of course work and the French or German language require-

ment, students must pass written comprehensive examinations in the major field and written and oral comprehensive examinations in the special field. The major field exam cannot be taken if students have any outstanding course work.

8 By the time of their major field exam, students should have chosen their supervisor and the rest of their committee (in consultation with the supervisor).

9 Dissertation

Courses of Instruction

Not all courses are offered every year. Students should consult the departmental handbook for current course offerings.

INTRODUCTION

The Faculty of Social Work offers a professional/academic program of study leading to a Master of Social Work (M.S.W.) degree and a post-master's program leading to a Doctor of Philosophy (Ph.D.) degree.

The M.S.W. program is fully accredited as a professional program by the Canadian Association of Schools of Social Work (CASSW).

The Faculty of Social Work at the University of Toronto, through interdisciplinary knowledge building and education for practice in social work and social welfare, promotes social justice and equity. The Faculty of Social Work provides leadership for excellence in:

- the development and testing of new knowledge that will have an impact on social policy and social work practice at all levels;
- social work education that will prepare graduates for ethical, competent, innovative and effective social work practice;
- the development of social policy and social work practice at all levels;
- maintaining an academic environment and promoting social work practice grounded in social justice and equal opportunity for all groups in society irrespective of gender, ethnic origin, race, native heritage, language, religious beliefs, class, sexual orientation, disability, age, culture, or any other forms of diversity.

The Faculty of Social Work is distinguished by its special emphasis on the integration of research and practice; by its partnerships with community agencies; by its identification of special themes, which are responsive to societal needs to guide it in setting priorities; and by its governing structure that brings together teaching faculty, field instructors, students, alumni, the profession, the administration, and the University as partners in the realization of the Faculty's mission.

Social Work practice encompasses all levels of practice (with individuals, families, groups, communities, organizations, and policy); the Faculty of Social Work is committed to the interdependence and effectiveness of these levels of practice as contributing to social justice and social change. For further details, visit the Faculty Web site.

Interdisciplinary Programs

The Faculty of Social Work offers two types of interdisciplinary programs: combined degree programs and collaborative programs.

Application and Admission

All students are admitted to the Faculty of Social Work under the general regulations and in accordance with the requirements listed below. Enrolment in the Faculty of Social Work entails adherence to the standards of professional behaviour for the Social Work profession set forth in the Social Work Code of Ethics of the Canadian Association of Social Workers.

Initial admission enquiries should be made directly to the Faculty of Social Work. The application deadline for the M.S.W. program is **December 15**. The application deadline for the Ph.D. program is **February 1**. The Faculty of Social Work does not guarantee the admission of all applicants who meet its minimum requirements.

DEGREE OF MASTER OF SOCIAL WORK

Streams

The Faculty of Social Work offers two streams in the Master of Social Work Program.

1 Students with a four-year bachelor's degree from a recognized university will normally complete the program in two years of full-time study.

2 Students entering with a B.S.W. degree from a recognized university will be given advanced standing and will normally complete the program in one year of full-time study or two years of part-time study. All students are expected to graduate with an advanced level of knowledge and professional competence in a chosen area of social work practice.

Goals

To prepare graduates:

- 1** for ethical, innovative, and effective social work practice in a diverse society;
- 2** to work actively to promote social justice, make professional decisions, and perform professional functions that are informed by an understanding of the political context of practice;
- 3** for competent practice which integrates theory and research;
- 4** capable of integrating practice and policy;
- 5** who have a generic foundation of core social work knowledge, values and skills, applicable to all fields and methods of practice; and
- 6** for practice in specialized areas, defined by student interest, faculty expertise, and demand from the field.

Objectives

- 1** To prepare students for professional practice according to the accreditation standards of CASSW.
- 2** To prepare students for social work practice interventions based on research evidence.
- 3** To prepare students for specialized practice in four identified areas:
 - a** children and their families,
 - b** diversity and social justice,
 - c** mental health and health,
 - d** social work in gerontology.
- 4** To strengthen our partnerships with social work agencies in areas of particular interest to

the Faculty for the purposes of enriching our curriculum and of producing graduates with the requisite skills to function in those agencies.
5 To encourage interdisciplinary linkages.

Admission Requirements

1 Applicants to the **two-year M.S.W. Full-time Program** normally shall hold an appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, and normally shall have achieved a mid-B average in the final year of full-time study (or equivalent).

2 Applicants to the **M.S.W. Program with Advanced Standing** shall have graduated with a Bachelor of Social Work (B.S.W.) degree from a recognized university, and normally shall have achieved a mid-B average in the final year of full-time study (or equivalent).

3 All applicants must have completed satisfactorily at least three full courses, or their equivalent, in the social sciences to include a half-credit course in research methodology, preferably in the social sciences. A grade less than mid-B in the required half-credit course in research methodology will lessen the applicant's probability of admission.

4 Experience (voluntary or paid) in the social services and knowledge of critical social issues are recommended. Suitability for professional practice will also be considered.

5 Applicants must show evidence of facility in the English language (see SGS General Regulations).

6 Applicants to the **M.S.W. Program with Advanced Standing** (students entering with a B.S.W. degree) must indicate on the M.S.W. Program Application Form:

- a** an area of specialization,
- b** a preference for full-time or part-time studies.

Note: Due to space limitations, applicants holding the minimum admission requirements are not guaranteed admission. The Faculty reserves the right to select qualified applicants to the program. All admission decisions are final.

Program Requirements

Two-Year M.S.W. Full-time Program

(for students entering with a B.A. or B.Sc. or equivalent)

1 Degree requirements are normally completed within two calendar years. The maximum time limit for completing M.S.W. degree requirements is four years from the date of first registration in the program.

2 The program of study consists of the equivalent of 17 half-credit courses, except in the

Gerontology specialization where the requirement is 18 half-credit courses.

Note: Students who elect to do a thesis carry an additional half-credit course. All students enrolled in the Social Work and Gerontology specialization will automatically be enrolled in the Collaborative Program in Aging, Palliative and Supportive Care Across the Life Course.

a Students take 12 required half-credit courses and a minimum of 2 half-credit course electives over the two-year program. In the Gerontology specialization, students take 13 required half-credit courses and two half-credit course electives.

b The practica requirement is equivalent to three half-credit courses. The first year practicum offered in the winter session (January-May) of the first year is equivalent to a half-credit course; the second year practicum (September-April) is equivalent to two half-credit courses and must be in the student's area of specialization.

c Students who have been approved to complete a thesis in place of the two half-credit course electives take an additional half-credit research methods course (SWK 6307H *Designing and Implementing Qualitative Social Work Research* or SWK 6308H *Designing and Implementing Quantitative Social Work Research*). The thesis requirement is equivalent to two half-credit courses. This option is open to a limited number of students, and is subject to faculty availability.

3 Students are required to be on campus regularly, that is, reside close enough to participate fully in the university activities associated with the program. Residence and full-time are defined in the SGS General Regulations.

Program of Study

Two-Year M.S.W. Full-time Program

(for students entering with a B.A. or B.Sc. or equivalent)

The total course load for the Two-Year M.S.W. Full-time Program is equivalent to 17 half-credit courses; for the Gerontology specialization it is 18 half-credit courses.

Year One

Total Course Load: Equivalent to 9 Half-Credit Courses

- SWK 4102H Social Policy and Social Welfare in the Canadian Context
- SWK 4103H Elements of Social Work Practice
- SWK 4105H Social Work Practice Laboratory
- SWK 4107H Foundations of Social Work: Knowledge, Theory and Values that Inform Practice

SWK 4510H Research for Evidence-Based Social Work Practice (SWK 4510H is a prerequisite for all second year required courses.)

SWK 4602H Social Work Practice with Groups

SWK 4605H Social Work Practice with Individuals and Families

SWK 4654H Social Work Practice in Organizations and Communities

SWK 4701H Social Work Practicum I

Year Two

Students choose one of four specializations. Two-year stream students must declare their specializations by mid-February of the first year.

- 1 Children and Their Families
- 2 Diversity and Social Justice
- 3 Mental Health and Health
- 4 Social Work in Gerontology

The first three specializations have four required half-credit courses, two elective half-credit courses, and a full-year practicum. The Gerontology specialization has five required half-credit courses, two elective half-credit courses, and a full-year practicum.

Specialization: Children and their Families
Total Course Load: Equivalent to 8 Half-Credit Courses

SWK 4514H Research for Practice with Children and their Families

SWK 4608H Social Work Practice with Families

SWK 4620H Social Work Practice with Children and Adolescents

SWK 4625H Contemporary Issues in Working with Children and their Families

SWK 4702Y Social Work Practicum II (full-credit)

Two elective half-credit courses

Specialization: Diversity and Social Justice
Total Course Load: Equivalent to 8 Half-Credit Courses

SWK 4304H Globalization and Trans-nationalization: Social Work Responses Locally and Globally

SWK 4306H Process of Social Exclusion, Marginalization, and Resistance

SWK 4512H Creating Knowledge to Inform Critical Practice

SWK 4606H Diversity, Access, and Equity in Social Work Practice

SWK 4702Y Social Work Practicum II (full-credit)

Two elective half-credit courses

Specialization: Mental Health and Health
Total Course Load: Equivalent to 8 Half-Credit Courses

SWK 4412H The Context of Mental Health and Health Practice

SWK 4511H Practice-Based Research in Mental Health and Health

Students can then elect to take one of three choices:

- 1 SWK 4622H Social Work Practice in Health and
SWK 4604H Social Work Practice in Mental Health
- 2 SWK 4622H Social Work Practice in Health followed by
SWK 4632H Advanced Social Work Practice in Health
- 3 SWK 4604H Social Work Practice in Mental Health followed by
SWK 4631H Advanced Social Work Practice in Mental Health

SWK 4702Y Social Work Practicum II (full-credit)

Two elective half-credit courses

Specialization: Social Work in Gerontology
Total Course Load: Equivalent to 9 Half-Credit Courses

AGE 2000H Principles of Aging

SWK 4513H Knowledge Building in Social Work

SWK 4612Y Social Work and Aging: Integrated Policy and Practice (full-credit)

SWK 4618H Special Issues in Gerontological Social Work

SWK 4702Y Social Work Practicum II (full-credit)

Two elective half-credit courses

M.S.W. Thesis (Optional)

M.S.W. Thesis Option: all Specializations except Gerontology
Total Course Load: Equivalent to 9 Half-Credit Courses

The M.S.W. thesis (equivalent to two half-credit courses) provides actual hands-on research experience. The thesis must be an independent piece of research. The major purpose of the thesis is to enable students to develop and apply research skills within the context of social work practice and to write a gradu-

ate thesis of publishable quality. The number of students permitted to exercise this option is subject to faculty availability. Students who have been approved to undertake a thesis must complete SWK6307H *Designing and Implementing Qualitative Social Work Research* or SWK6308H *Designing and Implementing Quantitative Social Work Research* in addition to the required courses in the selected specialization, but are exempted from taking the two elective half-credit courses.

Students in the thesis option who have at least two years of prior full-time social work experience (or equivalent) are eligible to substitute two elective half-credit courses for the full-credit SWK 4702Y *Social Work Practicum II*.

M.S.W. Thesis Option: Gerontology Specialization

Total Course Load: Equivalent to 9 Half-Credit Courses

AGE 2000H	Principles of Aging
SWK 4513H	Knowledge Building in Social Work
SWK 4612Y	Social Work and Aging: Integrated Policy and Practice (full-credit)
SWK 4618H	Special Issues in Gerontological Social Work
Two elective half-credit courses, one of which must be from the Collaborative Program in Aging, Palliative and Supportive Care Across the Life Course listing	
Thesis (equivalent to two half-credit courses)	

Program Requirements

M.S.W. Program with Advanced Standing
(for students entering with a B.S.W. degree)

- 1 Students may complete the degree program either full-time or part-time. Students enrolling in the program part-time must meet the same degree requirements and complete the same number of credits as the full-time students, although the structure and sequencing of their individual programs of study may vary.
- 2 Full-time students normally complete the program over three academic sessions (September to June). Part-time students normally complete requirements within six academic sessions. The maximum time limit for completing degree requirements is four years from the date of first registration in the program.
- 3 The program of study consists of an equivalent of nine half-credit courses; ten half-credit courses in the Gerontology specialization. All students enrolled in the Social Work and

Gerontology specialization will automatically be enrolled in the Collaborative Program in Aging, Palliative and Supportive Care Across the Life Course.

- a Students must take five required half-credit courses and a minimum of two elective half-credit courses.
- b A practicum is required, equivalent to two half-credit courses. The practicum (which is unpaid) must be in the student's area of specialization. For students enrolled in the full-time program, the practicum is completed from September to April. For students enrolled in the part-time program the practicum is designed to commence as a 16-week block starting in April in the Greater Toronto Area. Exceptions to a block summer practicum must be negotiated in advance with the Practicum Office.
- c Students who have been approved to complete a thesis in place of the two elective half-credit courses take one additional half-credit research methods course (SWK 6307H *Designing and Implementing Qualitative Social Work Research* or SWK 6308H *Designing and Implementing Quantitative Social Work Research*). Students choosing this option may require additional time to complete their programs. This option is open to a limited number of students and is subject to faculty availability.

Program of Study

M.S.W. Program with Advanced Standing
(for students entering with a B.S.W. degree)

- 1 The M.S.W. Program with Advanced Standing is designed for students with a B.S.W. degree. It aims to prepare students with an advanced level of knowledge and professional competence in a chosen area of social work practice. The program combines the dual purposes of graduate education and professional training. It is believed that a rigorous academic education supports competent and ethical professional practice at an advanced level.
- 2 Students choose one of four specializations. Advanced standing students will declare their specializations on the M.S.W. Application form by December 15.
 - a Children and Their Families
 - b Diversity and Social Justice
 - c Mental Health and Health
 - d Social Work in Gerontology

The first three specializations have five required half-credit courses, two elective half-credit courses, and a full-year practicum. The Gerontology specialization has six required half-credit course equivalents, two elective half-credit courses, and a full-year practicum.
- 3 A variety of educational approaches are used to deliver curriculum content and to

provide stimulating and integrative learning experiences. Students participate in regularly scheduled classes in a variety of formats (lectures, group discussions, seminars, etc.), a field-based practicum, and research projects.

Courses of Instruction

Students complete one of the following four specializations:

Specialization: Children and their Families
Total Course Load: Equivalent to 9 Half–Credit Courses

- SWK 4510H Research for Evidence-Based Social Work Practice (SWK 4510H is a prerequisite for all second year required courses)
- SWK 4514H Research for Practice with Children and their Families
- SWK 4608H Social Work Practice with Families
- SWK 4620H Social Work Practice with Children and Adolescents
- SWK 4625H Contemporary Issues in Working with Children and their Families
- SWK 4702Y Social Work Practicum II (full-credit)

Two elective half-credit courses

Specialization: Diversity and Social Justice
Total Course Load: Equivalent to 9 Half–Credit Courses

- SWK 4304H Globalization and Transnationalization: Social Work Responses Locally and Globally
- SWK 4306H Process of Social Exclusion, Marginalization, and Resistance
- SWK 4510H Research for Evidence-Based Social Work Practice (SWK 4510H is a prerequisite for all second year required courses)
- SWK 4512H Creating Knowledge to inform Critical Practice
- SWK 4606H Diversity, Access, and Equity in Social Work Practice
- SWK 4702Y Social Work Practicum II (full-credit)

Two elective half-credit courses

Specialization: Mental Health and Health
Total Course Load: Equivalent to 9 Half–Credit Courses

- SWK 4412H The Context of Mental Health and Health Practice
- SWK 4510H Research for Evidence-Based Social Work Practice (SWK 4510H is a prerequisite for all second year required courses)
- SWK 4511H Practice-Based Research in Mental Health and Health

Students can then elect to take one of three choices:

- 1 SWK 4622H Social Work Practice in Health and
SWK 4604H Social Work Practice in Mental Health
- 2 SWK 4622H Social Work Practice in Health followed by
SWK 4632H Advanced Social Work Practice in Health
- 3 SWK 4604H Social Work Practice in Mental Health followed by
SWK 4631H Advanced Social Work Practice in Mental Health

SWK 4702Y Social Work Practicum II (full-credit)

Two elective half-credit courses

Specialization: Social Work in Gerontology
Total Course Load: Equivalent to 10 Half–Credit Courses

- AGE 2000H Principles of Aging
- SWK 4510H Research for Evidence-Based Social Work Practice (SWK 4510H is a prerequisite for all second year required courses)
- SWK 4513H Knowledge Building in Social Work
- SWK 4612Y Social Work and Aging: Integrated Policy and Practice (full-credit)
- SWK 4618H Special Issues in Gerontological Social Work
- SWK 4702Y Social Work Practicum II (full-credit)

Two elective half-credit courses, one of which must be from the Collaborative Program in Aging, Palliative and Supportive Care Across the Life Course listing

M.S.W. Thesis (Optional)

M.S.W. Thesis Option: all Specializations except Gerontology

Total Course Load: Equivalent to 10 Half-Credit Courses

The M.S.W. thesis (equivalent to two half-credit courses) provides actual hands-on research experience. The thesis must be an independent piece of research. The major purpose of the thesis is to enable students to develop and apply research skills within the context of social work practice and to write a graduate thesis. See thesis manual (www.socialwork.utoronto.ca) for detailed information. The number of students permitted to exercise this option is subject to faculty availability. Students who have been approved to undertake a thesis must complete SWK 6307H *Designing and Implementing Qualitative Social Work Research* or SWK6308H *Designing and Implementing Quantitative Social Work Research* in addition to the required courses in the selected specialization, but are exempted from taking the two elective half-credit courses.

Students in the thesis option who have at least two years of prior full-time social work experience (or equivalent) are eligible to substitute two elective half-credit courses for the full-credit SWK 4702Y *Social Work Practicum II*. Workplace supervision must have been undertaken with a M.S.W. or equivalent supervisor. Requests for substitution must be reviewed and approved by the Faculty Assessment Committee.

M.S.W. Thesis Option: Gerontology Specialization

Total Course Load: Equivalent to 10 Half-Credit Courses

AGE 2000H Principles of Aging
 SWK 4510H Research for Evidence-Based Social Work Practice (SWK 4510H is a prerequisite for all second year required courses)
 SWK 4513H Knowledge Building in Social Work
 SWK 4612Y Social Work and Aging: Integrated Policy and Practice (full-credit)
 SWK 4618H Special Issues in Gerontological Social Work
 Two elective half-credit courses, one of which must be from the Collaborative Program in Aging, Palliative and Supportive Care Across the Life Course listing
 Thesis (equivalent to two half-credit courses)

Elective Courses

Courses are offered in various areas of social work practice. The choice of electives in any given year is contingent on available faculty resources. Not every course is given in any one year. Please consult the Faculty, admissions application materials, or the Faculty Web site www.socialwork.utoronto.ca.

AGE 2000H Principles of Aging
 JPX 1001H Parenting: Multidisciplinary Perspectives/*Staff*
 JFS 1460H Community-Based Natural Resource Management
 JPW 2118H Philosophical Foundations of Women's Studies
 JTH 3000H Coordinating Seminar in Ethnic and Pluralism Studies
 PAS 3700H Multidisciplinary Aspects of Addiction Studies/*M. J. Ashley, Staff*
 SWK 4210H Promoting Empowerment: Working at the Margins/*Staff*
 SWK 4403H Women and Social Policy in Canada/*S. Neysmith*
 SWK 4417H Adolescence: Social Work Challenges and the Role of Social Work/*Staff*
 SWK 4418H Introduction to Jewish Perspectives on Caring/*E.S. Lightman*
 SWK 4420H Human Rights and Social Justice/*Staff*
 SWK 4422H Social Housing and Homelessness/*J. D. Hulchanski*
 SWK 4506H Applied Quantitative Data Analysis/*Staff*
 SWK 4603H Advanced Social Work Practice with Groups/*Staff* (Prerequisite: SWK 4602H or equivalent)
 SWK 4609H Sexuality, Sexual Diversity and Social Work Practice/*Staff*
 SWK 4610H Advanced Social Work Practice with Couples/*M. C. Bogo, R. J. MacFadden*
 SWK 4613H Social Work Practice with the Aged/*Staff*
 SWK 4616H Drug Dependencies: Interventive Approaches/*Staff*
 SWK 4617H Cross-Cultural Social Work Practice/*A. K. T. Tsang, K. Richard, I. Sakamoto*
 SWK 4619H Family Mediation: Theory and Practice/*H. H. Irving, A. Litvack*
 SWK 4621H Integrative Child and Adolescent Therapy: Theory and Practice/*A. Caspary*

- SWK 4623H Violence in Families: Multilevel Intervention in Interdisciplinary Practice/*Staff*
- SWK 4624H Feminist Social Work Practice/*Staff*
- SWK 4630H Intersecting Narratives: Self, Culture, Institutions/*A. Chambon*
- SWK 4658H Social Work with Immigrants and Refugees/*Staff*
- SWK 4662H Social Policy Analysis/*E. Lightman*
- SWK 4664H Administrative/Managerial Practice in Social Work/*P. L. McDonald, C. Regehr*
- SWK 4667H Information Technology in Professional Social Work Practice/*R. MacFadden*
- SWK 4668H Welfare of Children: Policy and Practice/*Staff*

Special Studies

Special Studies courses are designed to provide seminars or tutorials under the direction of a faculty member. The focus is on a topic of particular interest to the student which is not included in available courses.

- SWK 4801H Special Studies I
- SWK 4802H Special Studies II
- SWK 4803H Special Studies III
- SWK 4804H Special Studies IV

DEGREE OF DOCTOR OF PHILOSOPHY

Admission Requirements

Applicants must have:

- 1** a degree of Master of Social Work or an equivalent master's degree with at least B+ standing from an accredited program in a recognized university;
- 2** competency in basic statistical methods at an introductory level (an introductory statistics course is offered in the first session of the program to ensure that students meet this prerequisite);
- 3** educational and professional experience that will indicate a capacity to undertake research-oriented postgraduate work.
- 4** Applicants must show evidence of facility in the English language (See SGS General Regulations).

Students are accepted for admission based on an assessment of their ability to complete the academic requirements of the program. Experience and professional achievements are considered, although greatest weight is placed on demonstrated academic performance.

Program Requirements

The Faculty of Social Work Doctor of Philosophy program is structured to support completion of all degree requirements within a period of four years of full-time study.

Full-time Option

1 Doctor of Philosophy students shall normally complete at least ten half-credit courses, or their equivalent, within the first two years, including:

a Required research courses:

- SWK 6301H Intermediate Statistics and Data Analysis (all incoming doctoral students are required to take SWK 4506H as a prerequisite or pass an equivalent competency exam with a grade of at least B+)
- SWK 6302H Epistemology and Social Work Research
- SWK 6307H Designing and Implementing Qualitative Social Work Research
- SWK 6308H Designing and Implementing Quantitative Social Work Research

Note: Students who demonstrate competency may be exempted from the above required research courses. The course instructor will determine competency. Students will substitute an alternate elective course for each exempted course. Transcripts will note exemptions from the required courses.

b Five graduate elective half-credit courses are chosen by the student, at least one of which is taken at the Faculty of Social Work, and at least one of which is taken in another graduate unit at the University of Toronto.

c The half-credit course SWK 7000H *Doctoral Thesis Seminar (Credit/No Credit)* is required during the fall session of the second year of the program.

2 Following completion of course work, students are required to satisfactorily complete a comprehensive paper.

3 Following completion of the comprehensive paper, students propose and complete a thesis which shall constitute a distinct contribution to knowledge in the field of social work. The thesis must be based on research conducted while registered for the Ph.D. program. Copies of the completed thesis must be submitted to the external appraiser at least six weeks, and preferably earlier, in advance of the candidate's final oral examination. The candidate must successfully defend the thesis at a final oral examination. Detailed information regarding the final oral examination and publication of the

thesis may be found in the Degree Regulations section of this calendar.

Time Frame: Students are expected to complete their course work, Comprehensive Paper, and have their thesis proposal approved by the end of August of the third year of the program. The research, writing, and oral examination of the thesis are typically completed by the end of the fifth year of the program.

4 Students must have an adequate knowledge of a language other than English if an additional language is deemed essential for satisfactory completion of research for the thesis. The Faculty is responsible for ensuring that an acceptable certificate of language competence is deposited with the School of Graduate Studies.

5 Since the University of Toronto introduced guaranteed funding, students are expected to be available on a full-time basis. Students are required to register for each successive fall session on a full-time basis following their first session of registration unless granted a leave of absence. The minimum period of registration in each academic year is three consecutive sessions.

6 Students must complete the requirements for the degree within six years following admission to the program.

Flexible-time Option:

Starting in 2007/2008, a flexible-time program is offered as an option intended for practicing professionals who can demonstrate their employment or other professional work is related to their intended field of study and research interests. The flexible-time Ph.D. differs only in design and delivery. All requirements are the same as those for the full-time Ph.D. students. Students who are considering the flexible-time Ph.D. should ensure that they will have adequate time on campus to attend classes and to fulfil the academic requirements of a Ph.D. program. Arrangements for fees will be the same as in all other flexible time Ph.D. programs in the University of Toronto.

Courses of Instruction

The following courses are offered in the doctoral program. Some courses are given in conjunction with the M.S.W. curriculum. Course offerings in any year depend on student interest and Faculty resources.

SWK 6005H	Theoretical Foundations of Social Work/ <i>A. Chambon</i>
SWK 6006H	Theory and Practice of Teaching Social Work/ <i>M. Bogo</i>

SWK 6101H	Critical Evaluation of Social Work Practice Theories/ <i>F. Mishna</i>
SWK 6106H	Family Mediation: Research and Practice/ <i>Staff</i>
SWK 6203H	Comparative Social Welfare Systems/ <i>Staff</i>
SWK 6205H	Social Planning in Social Welfare/ <i>Staff</i>
SWK 6208H	Advanced Principles of Social Policy Analysis/ <i>Staff</i>
SWK 6301H	Intermediate Statistics and Data Analysis/ <i>T. Gadalla</i>
SWK 6302H	Epistemology and Social Work Research/ <i>S. Neysmith</i>
SWK 6307H	Designing and Implementing Qualitative Social Work Research/ <i>R. Alaggia</i>
SWK 6308H	Designing and Implementing Quantitative Social Work Research/ <i>A. Shlonsky</i>
SWK 6401H	Sociocultural Issues in Social Work/ <i>Staff</i>
SWK 6406H	Housing Theory and Research Methods/ <i>Staff</i>
SWK 7000H	Doctoral Thesis Seminar (Credit/No Credit)/ <i>D. Hulchanski</i>

These courses are designed to provide seminars or tutorials according to the particular interests of students enrolled:

SWK 6501H,Y	Special Studies 1
SWK 6502H,Y	Special Studies 2
SWK 6503H,Y	Special Studies 3
SWK 6504H,Y	Special Studies 4

INTERDISCIPLINARY PROGRAMS

Combined J.D./M.S.W. Program

For students who wish to practice in the areas where law and social work interact (for example, child welfare, juvenile and criminal justice, dispute resolution, mental health, and family law) this combined interdisciplinary program leads to both the Juris Doctor and Master of Social Work degrees.

The program allows students to complete the two degrees in four years, rather than the five it would take to pursue the two independently. Students who enter with a B.S.W. will be given advanced standing. Admission to the combined program is conditional upon the applicant meeting the admission requirements of each of the Faculties.

Combined M.H.Sc./M.S.W. Program

With the community focus in health care, there is a greater need for linkages between health and social services. The interdisciplinary Program of Social Work and Health Policy, Management and Evaluation provides background for students wishing to move into administrative leadership in social work and health organizations. The program allows students to complete both degrees in three years, rather than the four it would take to pursue the two independently.

Students entering with a B.S.W. degree will be given advanced standing. Admission to the combined program is conditional upon the applicant meeting the admission requirements of each of the graduate units.

Collaborative Programs

The Faculty of Social Work participates in the following Collaborative Programs:

- 1 Addiction Studies (M.S.W., Ph.D.)
- 2 Asia Pacific Studies (M.S.W.)
- 3 Aging, Palliative and Supportive Care Across the Life Course (M.S.W., Ph.D.)
- 4 Cardiovascular Science
- 5 Community Development (M.S.W.)
- 6 Ethnic and Pluralism Studies (M.S.W., Ph.D.)
- 7 Health Care, Technology and Place (Ph.D.)
- 8 Health Services and Policy Research (M.S.W., Ph.D.)
- 9 South Asian Studies (M.S.W.)
- 10 Women's Studies (M.S.W., Ph.D.)

For detailed descriptions of each program, consult the separate entries in this calendar.

Web: www.chass.utoronto.ca/sociology

General Information on Applications

Students are admitted under the general regulations of the School of Graduate Studies. Application information and links for downloading application forms are found on the department's Web site. Admission decisions are based on grades and indications of superior qualifications such as letters of recommendation and a sample of the applicant's work. Applicants must submit the following directly to the Department:

- 1 Two letters of reference from instructors or research supervisors;
- 2 A paper, including summary, which the student feels represents his or her best work;
- 3 A one-page typed statement of interest indicating research interests and reasons for applying to study Sociology at the University of Toronto.

Degree of Master of Arts

Admission Requirements

An overall B+ average in each of the last two years of post-secondary education qualifies an applicant for consideration. Applicants must have taken at least the equivalent of five full-year courses in Sociology and have a four-year B.A. or its equivalent. Applicants are also expected to have acquired basic research and statistical skills. Those with excellent grades but whose preparation is insufficient will be required to take additional courses.

Program Requirements

The M.A. degree may be pursued on a full-time or part-time basis. Part-time students must complete the course requirements within five years from date of entry.

Students have the option of completing the master's degree in one of two ways:

- 1 by completing 8 half-courses within 9 months (the preferred option for those proceeding to the Ph.D.) or
- 2 by completing 6 half-courses and a research paper within 12 months.

All master's students must take:
 SOC 6001H Classical Sociological Theory
 SOC 6302H Statistics for Sociologists
 SOC 6712H Qualitative Methods I.

The choice of courses in all programs must be approved by the Department. Students must maintain a B average to be recommended for the M.A. degree.

Degree of Doctor of Philosophy

Admission Requirements

Students are usually admitted to the Ph.D. program after completing the M.A. or its equivalent, with at least an A- standing. All students must demonstrate that their M.A., or equivalent, includes course work equivalent to Classical Social Theory, Social Statistics, and Qualitative Methods I. Some students may be required to take prescribed additional courses.

The Department may recommend admission directly after completion of a four year B.A. degree. Direct entry of this kind will only be recommended for outstanding students who have provided a clear and detailed plan for thesis research. Students who enter the doctoral program directly from a four-year B.A. will be required to take the three half-courses that are required at the M.A. level in addition to the standard Ph.D. requirements.

Program Requirements

Minimal requirements for this degree:

- 1 Two years of residence.
- 2 Eight half-year courses. These must include:
 SOC 6101H Contemporary Sociological Theory
 SOC 6707H Intermediate Data Analysis
 SOC 6711Y Research Practicum (A full-course counts as two half-courses.)

If a student has already taken these courses at the graduate level, other courses will be substituted to maintain the eight half-course total.

- 3 Two comprehensive examinations. For details see the Department's *Graduate Handbook and Manual*. These comprehensives must be completed by the end of the second year of residence.

- 4 Preparation of an original thesis, under the supervision of a committee of the faculty staff, and its oral defense.

- 5 Candidates must have an adequate knowledge of a language other than English if an additional language is deemed essential for satisfactory completion of research for the thesis.

An average of at least B+ is required in order to be eligible to continue in the following year of any program. Failure in any course (that is, less than a B-) will require a review of the student's total program by the Department.

Checkpoints for Doctoral Students

Checkpoint	Desirable Completion	Acceptable Completion
Field of thesis research and name of supervisor submitted	6 months	9 months
Eight graduate half-courses completed	9 months	15 months
Working thesis topic submitted	9 months	12 months
Both comprehensives completed	18 months	2 years
Research Proposal, Ethical Review, and Language Examination	18 months	2.5 years

Thesis Prospectus accepted by the supervisor

Final Oral Examination

This model timetable is necessarily a rough one and may be altered to take account of leave granted for special personal circumstances. It would be extended by up to nine months for students who were required to make up required M.A. courses in Classical Social Theory, Qualitative Methods I, or Statistics. The checkpoints outlined are feasible, and while there are no automatic penalties levied on a student who fails to meet them, inability to keep pace raises questions about the student's suitability for the program.

Collaborative Programs

The Department of Sociology is involved in the following collaborative programs. Consult the separate entries in this calendar for details.

- 1 Addiction Studies
- 2 Aging, Palliative and Supportive Care Across the Life Course
- 3 Asia-Pacific Studies
- 4 Environmental Studies
- 5 Ethnic and Pluralism Studies
- 6 International Relations
- 7 Jewish Studies
- 8 Knowledge Media Design
- 9 Women's Studies

Courses of Instruction

For details on course offerings check with departmental Graduate Office.

Theory and Methods of Sociology—Core Courses

SOC 6001H Sociological Theory I
 SOC 6101H Sociological Theory II
 SOC 6201H Sociological Theory III
 SOC 6301H Survey Methods
 SOC 6302H Statistics for Sociologists
 SOC 6303H Field Methods
 SOC 6501H Research Design and Hypothesis Testing in Sociology
 SOC 6502H The Sociology Curriculum
 SOC 6707H Intermediate Data Analysis
 SOC 6708H Advanced Data Analysis
 SOC 6710H The Logic of Social Inquiry
 SOC 6711Y Research Practicum
 SOC 6712H Qualitative Methods I
 SOC 6713H Qualitative Methods II
 SOC 6714H Historical Methods Using Census Data
 SOC 6715H Historical Sociology

SOC 6716H Survey Methods II—Longitudinal Surveys

General Information

For general information, consult the Sociology and Equity Studies section of the *OISE/UT Bulletin* or the Web sites listed above.

Departmental Research Areas

The Department of Sociology and Equity Studies in Education offers a full range of programs leading to M.Ed., M.A., Ed.D., and Ph.D. degrees. These programs offer students preparation in sociology in education with an emphasis on equity issues.

Sociology in education is the study of the social context of education. The department understands education as a broad, multi-faceted concept—that is, a social organization of knowledge, teaching, and learning which takes place both within and beyond schooling. 'Equity' is the lens through which we approach these phenomena. We blend with this vision the principles of interdisciplinarity and community engagement. Throughout our history, we have worked across, and attempted to bridge, divisions between theory and practice, insisting that the complexity of formal educational settings and educational practices more broadly warrant equally complex and critical theoretical analysis.

Faculty and student research and interests represent a variety of approaches to sociology and equity studies in education. The current composition of the department provides particular opportunities for students who may wish to focus their activities in the areas listed below, as well as in the interdisciplinary and interdepartmental research areas and collaborative programs. Students are not restricted by these thematic areas.

There is also additional expertise available in the areas of disability studies and queer studies.

1 *Indigenous Studies in Education*

This research area addresses current issues, trends, perspectives, and models of Aboriginal and Indigenous education through historical, cultural, spiritual, social and political philosophies and themes. Specific research areas include examination of Aboriginal, Indigenous, and marginalized knowledge in global contexts and pedagogical implications for educational change; and roles of schools, media, in art, theatre, poetry, film and literature, institutions, governments and historical and contemporary policy in producing conditions of constraint, images of Indigenous peoples, social and class differences, dominance, control politics, and social inequalities with regard to Aboriginal and Indigenous peoples; and a special interest in developing, promoting, and sustaining of healing and wellness, and Indigenous and anticolonial thought in the academy and in the community. The goal of this research area is to create spaces for Aboriginal and Indigenous knowledge.

2 *Critical Race and Anti-Racism Studies*

Courses listed in this research area provide students with an integrative view of social difference (race, class, gender, disability, and sexuality) and a critical reading of multiple social oppressions revealed in different sites and sources (schools, universities, local communities, media, law, and cultural production). The Centre for Integrative Anti-Racism Studies (CIARS) brings together faculty and students whose research interests and political commitments are in anti-racism. It provides a supportive research environment, linking communities of colour, marginalised communities, and the University in the pursuit of social justice.

3 *Culture, Communication, and Critical Education*

Critical inquiry into the roles played by educational institutions in producing and maintaining cultures, symbolic dominance, and social inequalities; analyses of alternative teaching materials and pedagogies intended to address and transform domination and inequality.

4 *Feminist Studies and Gender Relations in Education*

Gender studies in the family, school, and workforce; feminist practice; gender, class, race, language, and cultural and biological reproduction; social history of women and women's education; feminism and feminist historiography. Note that other courses offered by feminist faculty, but not listed in this research area, may be taught from a feminist perspective.

5 *Learning and Work*

This research area is devoted to a critical approach within teaching and research on the interrelations of organized/informal learning and paid/unpaid work in the context of societal change processes, and to identifying the roles of educators in improving these relations. Courses offer theories and methods for understanding political, economic, and ideological forces associated with educational and workplace change as well as technological change. Some representative themes include: influences of social class, gender, ethnicity, generation, and disability on learning practices and work opportunities; impacts of technological changes on labour markets, work democratization; micro/meso/macro approaches to changing labour processes and training; the labour movement; school and community relations; teachers' work and educational innovation; and problems of underemployment and the future of work.

There is also additional expertise available in the areas of disability studies and queer studies.

Interdepartmental and Interdisciplinary Research Areas

The department is also involved in the following interdepartmental and interdisciplinary research areas:

1 *Critical Pedagogy and Cultural Studies*

2 *Learning and Work*

For details, see the *OISE/UT Bulletin*.

3 *Études franco-ontariennes en français*

Le Département de sociologie et d'études de l'équité en éducation participe à un programme de cours à distance par ordinateur intitulé "Études franco-ontariennes en éducation" offert par le Département de curriculum, d'enseignement et d'apprentissage, qui porte sur les réalités sociales et scolaires des communautés francophones et dont la langue d'enseignement est le français. Il est également possible de poursuivre des études de maîtrise en éducation à distance, en français, à travers le *Département de sociologie et d'études de l'équité en éducation*. Ce programme multidisciplinaire mène au diplôme de M.Ed. Des cours sur place sont également offerts. Vous trouverez la description en français des cours de sociologie qui font partie de ce programme dans la liste qui suit.

4 Gender Equity in Education

This interdepartmental research area focuses on the practical and professional relevance of gender equity issues for teachers and educational administrators. It is taken as part of the student's main program within the Department of Sociology and Equity Studies in Education. The Centre of Women's Studies in Education (CWSE) coordinates the specialization. Contact Paula Bourne (pbourne@oise.utoronto.ca) for more information.

Collaborative Programs

The department participates in the following collaborative programs:

- 1 Aboriginal Health
- 2 Environmental Studies
- 3 Ethnic and Pluralism Studies
- 4 Comparative, International, and Development Education
- 5 Women's Studies

For details, consult the separate entries in this calendar.

Admission Requirements

The department welcomes applicants with diverse but relevant backgrounds. M.Ed. and Ed.D. applicants must have the equivalent of 12 months' professional experience. M.A. and Ph.D. students who are admitted without sufficient previous study in sociology or a cognate discipline may be required to take a longer program.

In addition to the general requirements for admission as outlined in the Minimum Admission, Program, and Degree Requirements section, applicants are required to submit the following:

- 1 a careful statement of intellectual interests and concerns relevant to sociology and equity studies in education as well as reasons for undertaking a program in the department, including a statement of preference for one or more of the departmental research areas;
- 2 two letters of reference, preferably from university instructors with whom the applicant has studied or worked;
- 3 at least one sample of written work in the social sciences.

Incomplete applications may be subject to processing delays or rejection.

Program Requirements

The M.Ed. degree may be pursued on a full-time or part-time basis under three options:

- Option II (eight half-courses and a Major Research Paper (MRP),
- Option III (six half-courses and a thesis), or
- Option IV (ten half-courses).

The M.A. degree may be pursued full-time or part-time and requires a thesis.

The Ed.D. degree may be pursued on a full-time or part-time basis with specific course requirements (stated in the offer of admission) reflecting the unique professional character of the degree. Students in this degree program may begin their studies on a part-time basis, but they must register full-time for a minimum of two consecutive sessions, not including summer, of on-campus study and then maintain continuous registration full-time subsequently until all degree requirements are completed.

Ph.D. students have the option of undertaking the program on a full-time or flexible-time basis. Full-time Ph.D. students must maintain full-time status throughout their program of study. Flexible-time Ph.D. students register full-time during the first four years and part-time during subsequent years of the program. The flexible-time Ph.D. degree is designed to accommodate demand by practicing professionals for a Ph.D. degree that permits continued employment in areas related to their fields of research. Full-time Ph.D. students must complete the requirements of their degree within six years. Flexible-time Ph.D. students must complete the requirements of their degree within eight years. All Ph.D. students must also successfully complete the non-credit course SES 1913H *SESE Thesis Students' Seminar* prior to the comprehensive examination.

The department offers some courses in distance mode to serve students in localities outside Toronto. Information about courses offered in the Summer and Winter Sessions are noted in the "Graduate Studies Course Schedule", available from the Registrar's Office, OISE/UT, in the Winter Session.

Course outlines are available for consultation in the department. To help students articulate and focus their intellectual concerns, the department offers:

- a designated faculty advisor for each student (assigned to the student upon admission)
- a supervisor (to be selected by the student with consent of the supervisor) for theses, dissertations and MRPs
- independent study and research courses
- access to related courses in other graduate departments
- course outlines and evaluations
- a speakers series
- the Sociology and Equity Studies Handbook
- notices and information sent by e-mail through a departmental conference and listserv.

The department is organized as a constitutional democracy with a General Assembly and standing committees which provide for policy and decision-making in departmental programs, selection of incoming students, etc. Our constitution is based on one person/one vote, and staff, faculty, and registered students in the department have voting rights and are welcome to participate in the governance of the department.

Courses of Instruction

Not all courses are offered every year. Please consult OISE/UT's Graduate Studies Course Schedule.

Fax: 416-946-8838

E-mail: southasian.grad@utoronto.ca

Web: www.sgs.utoronto.ca/sas/

The interdisciplinary Collaborative Master's and Doctoral Program in South Asian Studies is designed for students who wish to acquire a nuanced understanding of South Asia as a secondary area of specialization while pursuing graduate studies in another discipline. The focus of this program is necessarily broad in that it provides students with an understanding of ancient and modern history, social change, economic development, contemporary politics, religious traditions, literary culture, and a spectrum of related topics.

The Centre for South Asian Studies, which administers the Collaborative Program, provides a nucleus for the participation of South Asian Studies scholars from across the University. Students will benefit from the physical presence of the Centre for South Asian Studies and its regular activities of research fora, conferences, and visiting lecturer and scholar programs. In addition, the University of Toronto's library collection in South Asian studies is the largest in Canada.

Master's and doctoral students wishing to be admitted to the Collaborative Program must apply to one of the following graduate units: Anthropology, English, Geography, History, Music, Political Science (Ph.D. only), Religion, Social Work, Sociology and Equity Studies/

OISE, and Women and Gender Studies. A supplementary application must be submitted to the Centre for South Asian Studies. The form can be obtained by writing to the Centre for South Asian Studies or by downloading from the Web site.

Students who successfully complete the requirements of the Collaborative Program will receive the notation "Completed Collaborative Program in South Asian Studies" on their transcript, in addition to the master's or doctoral degree from their graduate unit.

Admission Requirements

Applicants who wish to enrol in the Collaborative Program must apply to and be admitted to both the Collaborative Program and a graduate degree program in one of the collaborating departments. Applicants must meet the admission requirements of the graduate unit in which they intend to enrol. Admission will be subject to the approval of the graduate unit concerned and the Program Committee of the Collaborative Program.

Program Requirements

Students enrolled in the Collaborative Program in South Asian Studies are required to complete the requirements of the Centre and the home unit in which they are enrolled.

Master's Program

Requirements of the Centre for the master's program:

1 A mandatory half-year core course entitled *Issues in South Asian Studies* taught by the core faculty. The core course will be the same for both master's and doctoral students. Master's students who proceed to the doctoral program will not be required to take the core course again. With the permission of the home graduate unit, the core course can be taken in lieu of one of the courses required by the home unit.

2 Attendance at the visiting lecture series organized by the Centre for South Asian Studies during the academic year in which the student takes the core course.

3 For master's students writing a thesis, it is expected that their dissertation will include a significant South Asian component.

4 For master's students writing a research paper, the home unit will determine whether a South Asian component is required in the research paper.

5 For master's students writing a thesis and master's students writing a research paper, language requirements will be assessed on a case-by-case basis.

Doctoral Program

Requirements of the Centre for the doctoral program:

- 1** A mandatory half-year core course entitled *Issues in South Asian Studies* taught by the core faculty (unless already taken in the master's program). With the permission of the home graduate unit, the core course can be taken in lieu of one of the courses required by the home unit.
- 2** Attendance at the visiting lecture series organized by the Centre for South Asian Studies for a total of two years, including the academic year in which the student takes the core course.
- 3** The dissertation to include a significant South Asian component.
- 4** A research presentation to the Program Committee on a South Asian topic in the third or fourth year of the program.
- 5** Language requirement, depending on the student's area of specialization.

Applicants are accepted under the general regulations, provided that they also satisfy the Department's requirements stated below. Their programs must in all cases be approved by the Department.

Degree of Master of Arts

Admission Requirements

Applicants to the M.A. program should have a four-year undergraduate degree or the equivalent from a recognized university in Spanish or a cognate discipline. In addition to fluency in spoken and written Spanish, they should have a general background in Hispanic literature and/or linguistics, normally demonstrated through undergraduate course work. In addition to the standard SGS online application, applicants should submit the following material directly to the Department:

- a one-page statement of purpose, outlining the applicant's areas of interest
- a sample of written work in Spanish (10-12 pages)
- a TA application form (available from the departmental Web site)
- two letters of recommendation (one of the letters must comment on the applicant's fluency in Spanish)

The application process is competitive and meeting the minimum standards for admission to SGS does not guarantee acceptance.

Program Requirements

The M.A degree requires completion of eight half-courses or the equivalent at the graduate level. Students must specialize in one of three fields:

- Spanish Peninsular Literature
- Latin American Literature
- Hispanic Linguistics

Specialization requires that each student complete course work in accordance with distribution requirements for each field, defined in terms of the various areas of the graduate curriculum. Courses may also be taken in a cognate discipline (for example, Comparative Literature, French, History, Linguistics, Medieval Studies, Women's Studies). Specific requirements by field are available on the Department's Web site.

It is the Department's expectation that full-time students will complete all program requirements in one academic year. The M.A. program is also available on a part-time basis. Applicants should be aware that part-time students are not eligible for funding.

Students in the field Hispanic Linguistics must have completed an introductory course in Linguistics (LIN 100Y or an equivalent course). Students who have not completed LIN 100Y as part of their undergraduate studies must take this course in the summer directly preceding their admission to the M.A. program.

Degree of Doctor of Philosophy

Admission Requirements

Admission to the Ph.D. program requires a Master's degree from a recognized university in an appropriate discipline with an average of A- or higher. The Department does not allow direct entry to the Ph.D. program with a B.A., nor does it allow M.A. students to transfer to the Ph.D. program before the course work for the M.A. is completed. In addition to the standard SGS online application, applicants should submit the following material directly to the Department:

- a one-page statement of purpose, outlining the applicant's areas of interest
- a sample of written work in Spanish (10-12 pages)
- a TA application form (available from the departmental Web site)
- two letters of recommendation (one of the letters must comment on the applicant's fluency in Spanish)

The admissions process is competitive and is based on a number of factors in addition to grades. The principal factors include the ability of the Department to offer graduate work in the applicant's preferred areas of interest, the availability of appropriate supervisory resources, and the suitability of the applicant in relation to the academic profile and programs of the Department.

Program Requirements

The Ph.D. program requires specialization in one of three fields:

- Spanish Peninsular Literature
- Latin American Literature
- Hispanic Linguistics

Each student must complete the following requirements: Course Work, Field Examination, Dissertation Proposal, Language Requirements, Dissertation, and Final Oral Examination.

1 Course Work

Each student must complete eight half-courses, or the equivalent. It is the Department's expectation that students will complete the required course work during the first year of enrolment. However, with the approval of the Graduate Coordinator, up to two half-courses may be taken in the second year. Each field has distribution requirements, defined in relation to the various areas of the graduate curriculum. Courses may also be taken in

cognate disciplines (for example, Comparative Literature, French, History, Linguistics, Medieval Studies, Women's Studies). Specific requirements by field are available on the Department's Web site.

2 Field Examination

By March 15 of the first year of enrolment in the program, each student must seek approval from the Graduate Advisory Committee for the proposed area of his/her dissertation and the membership of the Field Examination Committee (normally the proposed dissertation supervisor and two other members of the graduate faculty). The Graduate Advisory Committee will respond in writing by May 1 of the same year. The final decision in this matter rests with the Graduate Advisory Committee.

The Field Examination centres on two subfields of Hispanic literature or linguistics: the subfield of the student's proposed dissertation research and a subfield relevant to the student's research and general preparation. By October 1 of the second year of enrolment, each student must submit to the Graduate Coordinator a brief statement (3-4 pages double-spaced) concerning the primary and secondary subfields for the Field Examination and two reading lists (one for each subfield). Each of the two reading lists should consist of 25-30 items and should include primary and secondary sources. The student's committee will review this material and meet with the student to indicate revisions or additions to the reading lists. The student must file final copies of the two reading lists, as approved by the committee, with the Graduate Coordinator by November 1.

The Field Examination will take place between January 15 and February 15 of the second year. It has two parts: a written examination of six hours and an oral examination of two hours. Each part will cover the primary and secondary subfields that the student has prepared. The written examination will consist of three questions, at least one of which must be answered in Spanish, and will be written in the last two weeks of January. The oral examination will follow in the first two weeks of February; it will normally be conducted in Spanish, although English may be used to accommodate committee members from cognate units. The Field Committee will grade the two parts of the examination together, on a credit/non-credit basis. A student who does not receive credit on the first attempt must retake both parts of the examination by May 10.

3 Dissertation Proposal

Each student must submit a Dissertation Proposal (20-25 pages double-spaced, plus bibliography) to the Graduate Coordinator by April 25 of his/her second year of enrolment in the program. The proposal should be written in the language that the student intends to use in writing the dissertation (Spanish or English). Each student must present his/her Dissertation Proposal in a two hour oral examination, to be held by May 15, normally conducted in the language of the student's proposal. The student's Field Committee will grade the written proposal and the oral examination on a credit/non-credit basis. A student who does not receive credit on the first attempt must revise and resubmit the Dissertation Proposal by September 15 of his/her third year of enrolment and retake the oral examination on the proposal by October 15 of that year.

4 Language Requirements

Before registering for the fourth year in the program, each student must demonstrate a reading knowledge of French and of a third non-English language relevant to his/her area of research. These language requirements may be satisfied by passing the appropriate reading knowledge examinations offered by the various departments of language and literature at the University of Toronto. Significant prior training in a language (such as an undergraduate Major or Minor) will also be accepted as demonstration of reading knowledge.

5 Dissertation and Final Oral Examination

The third and fourth years in the program are devoted to researching and writing the doctoral dissertation. During this period each student is expected to maintain regular contact with his/her supervisor and to submit chapters in draft for comment and subsequent revision. The student's Field Committee will normally become the Supervisory Committee for the dissertation. Under SGS regulations, the Supervisory Committee must meet on an annual basis to review the student's progress toward completion and file a written report with the Graduate Coordinator.

The Supervisory Committee must normally approve the dissertation before the candidate can proceed to the Final Oral Examination. This examination is arranged by the Department in collaboration with the School of Graduate Studies. At least eight weeks must be allowed for all arrangements to be made following the submission of the dissertation to the Graduate Coordinator.

6 Residence

Students must be registered as full-time on-campus and must reside in sufficient geographical proximity to enable them to fulfil the requirements of the program in a timely fashion. They are also expected to participate fully in departmental activities. While writing the dissertation, candidates are expected to be in residence, with the exception of absences for research purposes and approved leaves.

Collaborative Programs

The Department participates in two collaborative programs:

1 Editing Medieval Texts

2 Women's Studies

For detailed information, consult the separate entries in this calendar.

Courses of Instruction

Most graduate courses are offered in a regular rotation. As a result, approximately half of the courses that appear in this calendar entry will be available in a given academic session. A list of offered courses is posted on the Department's Web site.

Speech-language pathology is concerned with human communication and its disorders. The Department offers professional and research degree programs for careers in the discipline.

Collaborative Programs

The Department participates in two collaborative programs:

1 Aging, Palliative and Supportive Care Across the Life Course

2 Neuroscience

Students in the M.Sc. and Ph.D. programs in speech-language pathology may choose to

enrol. For details, consult the separate entries in this calendar.

Degree of Master of Health Science

The Master of Health Science (M.H.Sc.) program in speech-language pathology is a professional graduate program that may be taken on a full-time or part-time basis. The primary aim of the program is the development of an analytical and evaluative approach to the practice of speech-language pathology. Graduates are prepared to assume varied professional responsibilities including the assessment, treatment, and management of speech, voice, language, and swallowing disorders. Course work and clinical internships are integrated and sequenced. There is a strong research to practice focus, and students complete a comprehensive portfolio requirement in their final year.

Admission Requirements

Applicants *must* have completed a four-year University of Toronto bachelor's degree, with at least a mid-B standing in the final year, or its equivalent from another recognized university. Additional requirements include prerequisite courses in child development, linguistics, phonetics, elementary statistics, and human physiology. See the departmental Web site for a full listing of admission requirements.

Facility in oral and written English is required for both the academic and applied aspects of the program. Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction was not English, must demonstrate facility in the English language through the successful completion of one of the English proficiency tests listed in this calendar. To satisfy the requirement, the Department strongly prefers the Test of English as a Foreign Language (TOEFL). Applicants taking the paper-based TOEFL exam must achieve a minimum score of 600 with 5 on the Test of Written English (TWE) and 50 on the Test of Spoken English (TSE). Applicants taking the computer-based TOEFL exam must achieve a minimum score of 250 with 5 on the essay rating component and 50 on the TSE. Applicants taking the internet-based TOEFL exam must achieve a minimum score of 100/120 with 22/30 on the speaking section and 22/30 on the writing section.

If an applicant finds it impossible to take the TOEFL, TWE, and TSE, the Department will accept one of the following:

1 the Michigan English Language Assessment Battery (MELAB) with a minimum score of 85;

2 the International English Language Testing System (IELTS) with a minimum score of 8.0.

In addition to the proficiency test, applicants may be requested to attend a personal meeting with members of the Department of Speech-Language Pathology where their mastery of oral English for meeting clinical requirements will be assessed.

Applicants to the full-time and the part-time programs must submit applications by mid-January. Check the departmental Web site for the exact application deadline. All applications for the M.H.Sc. program must be completed online via the Ontario Universities Application Centre Web site (www.ouac.on.ca/orpas).

Program Requirements

The professional M.H.Sc. program is divided into 5 academic and 4 clinical units. Each academic unit is made up of topic-related courses. Teaching within and across units emphasizes integrated learning experiences.

Academic units are followed by full-time clinical placements. Each placement lasts between 4 and 10 weeks for a total of 31 weeks of clinical experience throughout the 2 year M.H.Sc. program. Students must accept placements offered to them and are responsible for all travel and accommodation costs. Students enrolled in the full-time program must complete all requirements within two consecutive years.

Part-time students must choose one of three options for program completion: four-year, five-year, or six-year. Each option includes a prescribed sequence of academic and clinical units that must be followed. Part-time students must complete clinical units on a full-time basis (five days per week).

The M.H.Sc. program does not have a thesis requirement; however, all M.H.Sc. students will be required to complete a portfolio that demonstrates proficiency in key areas of professional practice, including application of research principles, prior to graduation.

Degree of Master of Science

The Master of Science (M.Sc.) degree is a full-time program that prepares students to engage in the scientific study of normal and disordered speech, language and swallowing processes in children and adults.

The M.Sc. degree in speech-language pathology is a research-oriented program and does not prepare students for clinical practice. Although the primary objective of the M.Sc. program is to prepare students for doctoral studies in speech and language sciences, successful completion of the program does not guarantee entrance into the Ph.D. program.

Admission Requirements

Students with a four-year degree, or its equivalent, in speech-language pathology or a related discipline, are considered for admission according to the general admission criteria of the School of Graduate Studies. Prior to admission, an applicant must identify a faculty member who has agreed to serve as research supervisor. The research supervisor may want to examine a completed thesis and/or manuscripts and university transcripts. Application deadlines are February 1 for September registration and September 15 for January registration. Students applying to the M.Sc. program should use the SGS online application form that is accessible from the departmental Web site.

Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction was not English, must demonstrate facility in the English language through the successful completion of one of the English proficiency tests listed in this calendar. See General Regulations, English Language Facility.

Program Requirements

The program requires a one-year residency period which typically is sufficient for completion of the course work. Course requirements are determined by the student's supervisory committee. Normally, the student is required to complete satisfactorily a minimum of two full courses, consisting of at least one full course in research design and methodology, and at least one full course in the area of research interest. In addition, students are required to participate in student and faculty research seminars. Students also are required to engage in a research project, present the results in a written thesis, and complete a successful oral defence of the thesis.

Reclassification Examination

Master of Science students who demonstrate outstanding potential for advanced research in the discipline may be recommended by their supervisory committee for a reclassification examination which, when passed, allows them direct advancement to the Doctor of Philosophy program. This examination normally is undertaken following the completion of at least one session and within 18 months of registration in the M.Sc. program.

Degree of Doctor of Philosophy

The purpose of the Ph.D. program is to prepare students to contribute independently to the advancement of scientific knowledge in their area of specialization within the discipline of speech-language pathology.

Admission Requirements

Admission to the Ph.D. degree program is based on the applicant's demonstrated qualifications for advanced research in speech and language sciences. Prior to admission, an applicant must identify a faculty member who has agreed to serve as research supervisor. The research supervisor may want to examine a completed thesis and/or manuscripts and university transcripts. Normally, applicants are expected to have completed a M.Sc. or M.A. degree in speech-language pathology, or a related discipline, with a minimum of a B+ average over the course of the program. Students applying to the Ph.D. program should use the SGS online application form that is accessible from the departmental Web site.

Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction was not English, must demonstrate facility in the English language through the successful completion of one of the English proficiency tests listed in this calendar. Students who graduated from a university outside North America are strongly encouraged to contact the Coordinator of Graduate Studies before applying. See General Regulations, English Language Facility.

Program Requirements

The Ph.D. program normally extends over three to four years. Students complete a residency requirement during the first two years of the program. Course requirements are determined by the student's supervisory committee and consist of a minimum of three full courses or the equivalent. Students must demonstrate evidence of adequate knowledge in research design and statistics or must include suitable course work as determined by the supervisory committee. Ph.D. degree students are expected to participate in student and faculty research seminars in addition to their regular course requirements. The doctoral program consists of 2 phases, each taking approximately 18 to 24 months to complete. During the first phase of the program, the student completes all course requirements and initiates the development of a research thesis proposal, including the collection of preliminary experimental data, if appropriate. At the conclusion of this first

phase, the student completes a departmental comprehensive examination that includes a full research proposal and a conceptual paper on a topic chosen by the student and the supervisory committee. The second phase of the program is devoted almost exclusively to the completion of the thesis research project. At the conclusion of this second phase, the student defends the research thesis at a final oral examination in accordance with the regulations of the School of Graduate Studies.

Courses of Instruction for the M.H.Sc. Program

Consult the departmental Web site for a listing of courses offered during each academic year.

The first year of the program for full-time students will consist of:

SLP 1500Y+	Internship (Credit/No Credit)/ Staff
SLP 1502Y	Anatomy and Embryology/ P. Stewart
SLP 1503Y	Articulation and Related Disorders/A. Eriks-Brophy
SLP 1505Y	Child Language I/L. Girolametto
SLP 1506H	Child Language II/L. Girolametto
SLP 1507H ^o	Clinical Laboratory in Speech- Language Pathology/L. Ellwood
SLP 1514Y	Applied Audiology/Staff
SLP 1516H	Aural Rehabilitation/A. Eriks- Brophy
SLP 1520H	Principles of Clinical Practice/ Staff
SLP 1521H	Augmentative Communication/ Y. Yunusova
SLP 1522Y	Speech Physiology and Acoustics/P. van Lieshout
SLP 1529H	Fluency Disorders/L. De Nil
SLP 1530H	Voice Disorders/T. Bressmann
SLP 1532H ^o	Clinical Laboratory in Hearing Disorders: Aural Rehabilitation or Audiology Component/ L. Ellwood

The second year of the program for full-time students will consist of:

SLP 1508Y	Advanced Clinical Laboratory in Speech-Language Pathology/ L. Ellwood
SLP 1525H	Structurally Related Disorders/ T. Bressmann

^o Courses which may continue over a program. The course is graded when completed.

+ Extended course. For academic reasons, course work is extended into session following academic session in which course is offered.

-
- SLP 1527H+ Physical Analysis of Speech Disorders /*Staff*
 SLP 1528H+ Research in Speech-Language Pathology/*C. Johnson*
 SLP 1533Y Aphasia/*E. Rochon*
 SLP 1534Y Motor Speech Disorders/
Y. Yunusova
 SLP 1535H+ Advanced Principles of Clinical Practice/*L. Ellwood*
 SLP 1536H Swallowing Disorders/*R. Martino*
 SLP 1538H Neurocognitive Communication Disorders/*E. Rochon*
 SLP 2500Y Advanced Internship/*S. Wagner*

Courses of Instruction for the M.Sc. and Ph.D. Programs

- SLP 3001H Theoretical Foundations of Communication Sciences/
L. De Nil
 SLP 3002H Research Methodologies in Communication Sciences/
C. Johnson
 SLP 3003H° Research Seminar/*Staff*
 SLP 3004H,Y Reading Seminar/*Staff*
 SLP 4000H° Research Seminar/*Staff*
 SLP 4001H Philosophical and Theoretical Foundations of Communication Sciences/*L. De Nil*
 SLP 4007H,Y Reading Seminar/*Staff*

Special Courses Offered to Students from Other Departments

- SLP 2501H Special Topics in Communication Disorders/*Staff*
 SLP 2502Y Specialized Study in Communication Disorders/*Staff*

° Courses which may continue over a program. The course is graded when completed.
 + Extended course. For academic reasons, course work is extended into session following academic session in which course is offered.

 Canada

Telephone: (416) 978-5136

Fax: (416) 978-5133

E-mail: grad-info@utstat.utoronto.ca

Web: www.utstat.utoronto.ca

Statistics is the study of random phenomena and as such encompasses a broad range of scientific, industrial, and social processes. The past several decades have witnessed a vast impact of statistical methods on virtually every branch of knowledge and empirical investigation. The Department of Statistics offers oppor-

tunities for study and research in the fields of probability, applied probability, theoretical statistics, and applied statistics. The Department has substantial computing facilities available and operates a statistical consulting service for the University's research community. Programs of study may involve association with other departments such as Mathematics, Mechanical and Industrial Engineering, Computer Science, or Public Health Sciences. The Department maintains an active seminar series and strongly encourages participation by graduate students.

Students are accepted under the general regulations. The Department requires a TOEFL (Test of English as a Foreign Language) score of 580 or better and successful completion of the TWE (Test of Written English) for applicants whose primary language is not English.

Degree of Master of Science

Qualified students may be accepted into a one-year or two-year program for the degree of Master of Science. It is also possible to obtain the M.Sc. degree by part-time studies since there is no formal residency requirement for this degree.

Students for the one-year program are required to take and pass four approved full-year courses, one of which may be an approved supervised reading project. Alternatively, students may take STA 3000Y plus five half-year courses. Two approved half-year courses are considered the equivalent of a full-year course. Further details may be found in the Graduate Information brochure available from the Department. All programs must be approved by the Coordinator of Graduate Studies.

The first year of a two-year program consists of prerequisite and other courses to prepare the student for the one-year M.Sc. program. Students who plan to undertake the part-time M.Sc. degree must qualify for admission to the one-year program.

Students will not be permitted to begin the full-time master's program in a January session; therefore, only applications for the part-time M.Sc. program will be considered for January admission.

Degree of Doctor of Philosophy

Admission Requirements

Students are admitted under the general regulations for the Ph.D. However, under exceptional circumstances, students may be admitted to the Ph.D. program from a bachelor's degree. In this case, they will be required to complete STA 2111H, STA 2211H, STA 3000Y, and four other half-courses. (This represents two half-courses

more than the normal Ph.D. course work requirement.)

Program Requirements

- 1** There is a one-year residence period for all students admitted to the Ph.D. program who have completed a master's degree. Students admitted from a bachelor's degree will have a two-year residence period.
- 2** There is no major/minor field requirement for graduation.
- 3** Students are required to take six half-courses including STA 2111H, STA 2211H, and STA 3000Y. Students transferring from the M.Sc. program who have taken any or all of STA 2111H, STA 2211H, and STA 3000Y during their M.Sc. program will have the number of required courses reduced accordingly.
- 4** Students are required to pass a comprehensive examination and satisfy the Department of their knowledge of probability and statistics, and advanced knowledge at the master's level in their degree area (applied statistics, theoretical statistics, or probability) prior to embarking on a thesis. The submission of a suitable thesis is required. Further details may be found in the Graduate Information brochure available from the Department.

Courses of Instruction

The Department offers a selection of courses each year from the following list with the possibility of additions. The core courses will be offered each year. Consult the Graduate Information brochure for courses offered in the current academic year.

STA 1001H Applied Regression Analysis
 STA 1003H Sample Survey Theory and its Application
 STA 1004H Introduction to Experimental Design
 STA 1005H Applied Multivariate Analysis
 STA 1007H Statistics for Life and Social Scientists
 STA 1008H Applications of Statistics
 STA 2004H Design of Experiments
 STA 2006H Applied Stochastic Processes
 STA 2050H Mathematical Methods for Statistics
 STA 2100H Mathematical Methods for Statistics
 STA 2101H Methods of Applied Statistics I
 STA 2102H Computational Techniques in Statistics
 STA 2103H An Introduction to Bayesian Inference
 STA 2104H Statistical Methods for Machine Learning and Data Mining

STA 2111H Probability Theory I
 STA 2112H Mathematical Statistics I
 STA 2162H Statistical Inference I

Introduction

CITA is a national institute specializing in theoretical astrophysics. It was established in 1984 and has the support of over fifty faculty members from about twenty Canadian universities. CITA is hosted by the University of Toronto which contributes to its ongoing support. Further major support is received from the Natural Sciences and Engineering Research Council and from the Canadian Institute for Advanced Research. CITA is governed by a national council elected through the Canadian Astronomical Society.

In addition to its faculty, CITA maintains a rotating complement of more than 20 post-doctoral fellows and research associates, and hosts an active program of visitors from other universities.

The Facility

CITA is housed in the Burton Tower of the McLennan Physical Laboratories, adjacent to the departments of Astronomy and Physics. CITA owns an extensive and powerful network of massively parallel computers and workstations.

Research Activities

The research activities at CITA span most of the areas of modern theoretical astrophysics, including accretion disks, active galactic nuclei, general relativity, cosmology and cosmological aspects of particle physics, the cosmic microwave background, gravitational lenses, dark matter, galaxy formation, galaxy structure and evolution, dynamics of stellar systems, physics and chemistry of the interstellar medium, star formation, stellar evolution, novae, supernovae, compact objects and gamma-ray bursts, nucleosynthesis, solar system formation and dynamics, and comets.

The theoretical interests of many CITA staff are complemented by observational research. CITA researchers have active observing programs at a wide variety of ground-based and satellite telescopes in many different wavelength bands.

Graduate Research Training

CITA does not offer an independent graduate degree program. Students interested in theoretical astrophysics are encouraged to enrol in the graduate programs offered by cognate departments (e.g., Astronomy and Astrophysics, Chemistry, Physics). All CITA faculty hold cross-appointments in one or more of these departments, and inquiries by students seeking research supervision by CITA faculty are welcome. CITA research fellows and visitors are also encouraged to work with graduate students.

The Department of Theory and Policy Studies in Education (TPS) consists of three graduate programs, one representing two discipline-based fields (History and Philosophy of Education) and two representing the application of cognate scholarship to domains of practice (Educational Administration and Higher Education). Each program offers courses of study leading to M.Ed., M.A., Ed.D., and Ph.D. degrees. Members of the Department also participate in delivering the preservice teacher education program (B.Ed.), particularly the social foundations courses and courses rooted in educational history, philosophy, administration, and policy.

Application, General Admission, and Program Requirements

Applications must be made to one of three specializations:

Educational Administration
 Higher Education
 History and Philosophy of Education

For information about application procedures and forms, contact the OISE/UT Registrar's Office at (416) 923-6641 ext. 2430.

For general admission and program requirements, consult the *OISE/UT Graduate Studies in Education Bulletin* section titled "Minimum

Admission, Program and Degree Requirements". For complete information on TPS degree programs, consult the section of the *Bulletin* dealing with the Department of Theory and Policy Studies in Education.

Degree of Master of Education

At OISE/UT there are four options for completing the M.Ed. degree.

Option I

Course work and comprehensive option: ten half-courses plus a comprehensive examination/requirement.

Option II

Research project option: eight half-courses plus a research project or major research paper. Higher Education also requires a comprehensive examination.

Option III

Thesis option: six half-courses plus a thesis.

Option IV

Course work only option: ten half-courses.

Information about available options in each graduate program follow.

Educational Administration

The M.Ed. program in Educational Administration is designed primarily for students who are interested in learning the nature and practice of leadership and policy, especially with respect to social diversity and change.

Admission Requirements

In addition to the general requirements in the *OISE/UT Graduate Studies in Education Bulletin*, the criteria for admission to an M.Ed. degree program in Educational Administration are:

- 1 an appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university completed with standing equivalent to a University of Toronto mid-B or better in the final year, preferably with a concentration and focus in an area relevant to the type of educational administration the applicant wishes to enter;
- 2 an interest in the study and practice of administration;
- 3 academic qualifications beyond the first degree;
- 4 two letters of reference. Whenever possible, one should be written by an educational admin-

istrator for whom the applicant has worked; the second by a professional colleague.

Program Requirements

The M.Ed. degree may be pursued either part-time or full-time.

There are three options available to all students within the M.Ed. program in Educational Administration.

Option II comprises:

1 three required half-courses:

TPS 1003H Conducting Research in Educational Administration

TPS 1040H Educational Administration I: Introduction to Educational Administration: Policy, Leadership, and Change

TPS 1041H Educational Administration II: Social and Policy Contexts of Schooling

TPS 1040H and TPS 1041H should be taken first; course TPS 1003H should be taken towards the end of the program;

2 five other half-courses, of which at least two must be in Educational Administration; TPS 1004H *Research Literacy in Educational Administration* is strongly recommended and should be taken at the beginning of the program. Students may choose to focus on one of the four program strands: Policy, Leadership, Change, or Social Diversity;

3 a Major Research Paper (MRP) to be carried out under the guidance of a faculty member.

Option III comprises:

1 three required half-courses:

TPS 1003H Conducting Research in Educational Administration

TPS 1040H Educational Administration I: Introduction to Educational Administration: Policy, Leadership, and Change

TPS 1041H Educational Administration II: Social and Policy Contexts of Schooling

TPS 1040H and TPS 1041H should be taken first; course TPS 1003H should be taken towards the end of the program;

2 three other half-courses, of which at least one must be in Educational Administration; TPS 1004H *Research Literacy in Educational Administration* is strongly recommended and should be taken at the beginning of the program;

3 a comprehensive thesis to be developed under the guidance of a faculty member.

Option IV comprises:

1 four required courses:

TPS 1004H Research Literacy in Educational Administration

TPS 1040H Educational Administration I: Introduction to Educational Administration: Policy, Leadership, and Change

TPS 1041H Educational Administration II: Social and Policy Contexts of Schooling

TPS 1050H Themes and Issues in Policy, Leadership, Change, and Diversity

TPS 1004H, TPS 1040H, and TPS 1041H should preferably be the first courses taken in the student's program of study. TPS 1050H should normally be taken as the final course in the student's program.

2 Six other half courses, of which at least two must be in Educational Administration. Students may choose to focus on one of the four research areas: policy, leadership, change, and social diversity

Higher Education

Students in Higher Education pursue the M.Ed. Option I degree program (ten half-courses plus a comprehensive examination). All students are required to complete TPS 1803Y *Recurring Issues in Postsecondary Education*.

Health Professional Education

Students in the health professional education specialization will normally register in the M.Ed. Option II program (eight half-courses plus a major research project/paper). This option, if pursued on a full-time basis, cannot be completed in less than 12 months. A comprehensive examination is required.

Additional information on the health professional education specialization may be obtained from Professor Daniel Lang.

History and Philosophy of Education

There are two separate fields in the History and Philosophy of Education:

1 History of Education

2 Philosophy of Education

History of Education

The M.Ed. degree in the History and Philosophy of Education Program - History of Education field may be pursued under either Option II (eight half-courses plus a major research project/paper) or Option IV (ten half-courses). Students enrolled in Option II are expected to complete at least four half-courses

from the History of Education course menu. Students enrolled in Option IV are expected to complete at least five half-courses from the History of Education course menu. (See the *OISE/UT Graduate Studies in Education Bulletin* for a list of History of Education courses.) Completion of TPS 1460H *History and Educational Research* and TPS 1440H *An Introduction to Philosophy of Education* is mandatory in both options. In cases where a student has already taken a course deemed equivalent to TPS 1440H, another philosophy course may be substituted. In consultation with the faculty advisor, this course should be chosen to complement the student's primary focus in history.

Philosophy of Education

The M.Ed. degree in the History and Philosophy of Education Program - Philosophy of Education field may be pursued under either Option II (eight half-courses plus a major research project/paper) or Option IV (ten half-courses). Students enrolled in Option II are expected to complete at least four half-courses from the Philosophy of Education course menu. Students enrolled in Option IV are expected to complete at least five half-courses from the Philosophy of Education course menu. (See the *OISE/UT Graduate Studies in Education Bulletin* for a list of Philosophy of Education courses.) Completion of TPS 1440H *An Introduction to Philosophy of Education* is mandatory in both options (unless a course deemed equivalent has already been taken). In addition, for both options one course in history is also mandatory, normally TPS 1419H *Historiography and the History of Education*. In cases where a student has already taken a course deemed equivalent to TPS 1419H, another history course may be substituted. In consultation with the faculty advisor, the substituted course should be chosen to complement the student's primary focus in philosophy.

Degree of Master of Arts

Educational Administration

The M.A. program in Educational Administration fosters the study of problems in the administration and leadership of educational programs. It will best serve students who have a commitment to scholarship and research as a means of deepening their understanding of administrative action in schools or in other educational and service institutions. While experience in teaching and administration is not an essential prerequisite for admission, such

experience provides a desirable background.

Admission to the M.A. program requires a four-year University of Toronto bachelor's degree or its equivalent, in a relevant discipline or professional program, completed with the equivalent of a University of Toronto B+ standing in the final year.

The M.A. program consists of eight half-courses and a thesis. Additional courses may be required of some applicants. The M.A. is available through both full-time and part-time studies.

Higher Education

Admission to the M.A. program in Higher Education requires a four-year University of Toronto bachelor's degree with a minimum mid-B standing in the final year, or its equivalent.

The M.A. program consists of eight half-courses, a general written comprehensive examination, and a thesis. The number of half-courses may be reduced to six for students with prior undergraduate or graduate degrees that are relevant to the study of Higher Education. Additional courses may be required of some applicants. All students are required to complete TPS 1803Y *Recurring Issues in Post-secondary Education*, and a comprehensive examination.

History and Philosophy of Education

There are two separate fields in the History and Philosophy of Education:

- 1 History of Education
- 2 Philosophy of Education

History of Education

Qualified applicants who hold a four-year University of Toronto bachelor's degree, or its equivalent, with a major in history may be admitted to the M.A. degree in the History and Philosophy of Education Program - History of Education field comprising six half-courses and a thesis. Completion of TPS 1419H *Historiography and the History of Education* and TPS 1440H *An Introduction to Philosophy of Education* is mandatory for students in this program. Normally, three of the remaining four half-courses must be selected from the History of Education course menu. (See the *OISE/UT Graduate Studies in Education Bulletin* for details.) In cases where a student has already taken a course deemed equivalent to TPS 1440H, another philosophy course may be substituted. In consultation with the faculty advisor, this course should be chosen to complement the student's primary focus in history.

Philosophy of Education

Qualified applicants who hold a four-year University of Toronto bachelor's degree, or its equivalent, with a major in philosophy may be admitted to the M.A. degree in the History and Philosophy of Education Program - Philosophy of Education field comprising six half-courses and a thesis. Completion of TPS 1440H *An Introduction to Philosophy of Education* is mandatory (unless a course deemed equivalent has already been taken). In addition, one course in history is also mandatory, normally TPS 1419H *Historiography and the History of Education*. In cases where a student has already taken a course deemed equivalent to TPS 1419H, another history course may be substituted. In consultation with the faculty advisor, this course should be chosen to complement the student's primary focus in philosophy. Normally, three of the remaining four half-courses must be selected from the Philosophy of Education course menu. (See the *OISE/UT Graduate Studies in Education Bulletin* for details.) Upon approval, courses from other departments, including the Graduate Department of Philosophy, may be substituted for Philosophy of Education courses.

Applicants with undergraduate majors in related social science and humanities disciplines are normally required to take some additional courses.

Degree of Doctor of Education

Educational Administration

The Ed.D. program in Educational Administration is a cohort-based program intended to develop highly competent leaders for administrative positions in school systems, colleges, universities, and other educational institutions (such as the Ministry of Education). The program is specifically designed to help working professional educators develop the intellectual and research skills to refine their practice as leaders in school systems and in higher education. Students in the program have the opportunity to undertake a significant academic accomplishment while continuing to work at their current roles.

The focus of the program is on advanced, theory-informed, professional practice and accordingly, this program values the world of practice as a rich field for research and reflective practice. Reflective practice is used as the lens through which advanced theory and research on policy, leadership, change, and social diversity are applied to practical administrative problems. The program is designed

to satisfy the needs of leaders for further professional inquiry and analysis to deal with the increasing complexity of problems related to the operation of educational organizations. Through this program, students will seek to understand theory, make research-informed decisions, examine their own practice, critically evaluate policy, and engage others in collaborative endeavours to improve student learning.

Applicants to this program may be from higher education, elementary and secondary schools, and other educational institutions. Diversity is valued and encouraged in order to build wider understandings of the work in educational leadership across organizations. This program takes a minimum of three years to complete and in most cases will take longer. It also includes a thesis requirement.

Key aspects of the Ed. D. program include:

- *Cohort*: The program is cohort-based in order to encourage the development of networking and communication skills, to build a collegial community of practice and quality connections between students and faculty.
- *Sequence*: In order to support the cohort model, there is a specified sequence to the recommended courses.
- *Practice*: Courses are based in the practice of educational administration and focus on reflective practice. Knowledge and theory are applied to issues and problems the administrators face in their work.
- *Research*: This program encourages students to lead future research and evaluation work in educational settings. In addition, there is a strong reflective practice basis to the course offerings, including one reflective practice course.

Admission Requirements

1 In addition to the general requirements given in the Minimum Admission and Degree Requirements, the Theory and Policy Studies program specifies the following for admission to the Doctor of Education program:

- a** The applicant should hold a master's degree with specialization in Educational Administration or an equivalent degree. Additional course work may be required from those who do not have a background in administrative studies. A qualifying research paper (QRP) will be required.
- b** The applicant must be in a successful leadership position in education, or must have held a leadership position successfully, or must demonstrate potential for leadership. Evidence of this will be provided by at least one letter of reference that the applicant secures from a senior administrator to whom the applicant

has reported, commenting on the applicant's achievement in identifying and solving educational problems; ability to lead others; accomplishments; and awareness of current social and educational issues. A curriculum vitae must be submitted.

c The applicant must also furnish at least one letter of reference from a professor under whom the applicant has studied, commenting on the applicant's scholarly achievement.

Intake to the program occurs every three years, allowing the third year to be an intake year.

Degree Requirements:

The Ed.D. degree program is organized into five complementary components:

1 Six core half-courses:

- TPS 3040H and TPS 3041H apply theory and research to problems of people, power, and policy in organizations
- TPS 3025H examines the personal and professional values and ethics of educational decision-making and policy
- TPS 3042H, a field research course where students examine methods of field research, action research, and case studies in educational administration.
- TPS 3047H *Research Seminar on Leadership and Educational Change*. The focus is as a participant in the research (reflective practice and/or action research)
- TPS 3044H Internship/Practicum in Educational Administration offers three options. All three practical experiences have the same structure: a reflective practice core, an authentic growth problem, and work with a mentor/mentee.

2 Two other half-courses, one of which must be at the 3000 level;

3 Successful completion of a portfolio that emphasizes reflective practice;

4 A thesis proposal hearing;

5 A doctoral thesis, one component of which may be a document of the kind used in the field, such as a policy document or policy handbook, white paper, or restructuring plan or another approved undertaking.

Higher Education

The requirements for the Ed.D. degree program in Higher Education include a minimum of eight half-courses beyond a relevant and acceptable M.Ed. or M.A. In individual cases, students with a highly relevant master's degree or other equivalent graduate degree may be admitted, but additional courses in Higher Education will be required. Normally the minimum requirements will include:

1 TPS 1803Y *Recurring Issues in Post-secondary Education* (full course);

2 at least two other half-courses in Higher Education;

3 a half-course in research methodology approved by the faculty advisor;

4 one half-course selected either in Higher Education or in another graduate program at OISE/UT, or, with the approval of the faculty advisor, in another graduate department at the University of Toronto;

5 a supervised applied research practicum (equivalent to one half course);

6 a collaborative pro-seminar (equivalent to one half-course);

7 a written General Comprehensive Examination (if not completed previously);

8 a Doctoral Specialization Examination;

9 a thesis reporting the results of original research on an applied topic in postsecondary education.

History and Philosophy of Education

There are two separate fields in the History and Philosophy of Education:

1 History of Education

2 Philosophy of Education

History of Education

The Ed.D. degree in the History and Philosophy of Education Program - History of Education field is designed for career educators who wish to engage in the in-depth study of a problem or topic related to professional practice.

The degree requirements for students who have completed a master's degree (M.Ed. or M.A.) in the History and Philosophy of Education Program - History of Education field consist of eight half-courses, a year of full-time study on campus, and a thesis. Preferably, the year of full-time study should occur late in the degree program and should be devoted primarily to thesis research and writing.

Students who have not completed a master's (M.Ed. or M.A.) degree in the History and Philosophy of Education Program - History of Education field must complete TPS 1440H *An Introduction to the Philosophy of Education* as part of their eight half-courses. In cases where a student has already taken a course deemed equivalent to TPS 1440H, another philosophy course may be substituted. In consultation with the faculty advisor, this course should be chosen to complement the student's primary focus in history.

The core program includes two mandatory Ed.D. seminars (TPS 3490H *Ed.D. Seminar in the History of Education I* and TPS 3491H *Ed.D. Seminar in the History of Education II*),

normally taken during the year of full-time study. Course TPS 1419H *Historiography and the History of Education* is a requirement for students in this program. The remaining courses are selected by the student in consultation with the faculty advisor and may be taken before or after the year of required full-time study. Students are strongly encouraged, though not required, to take at least two half-courses before the year of full-time study.

All Ed.D. students are required to take a comprehensive examination.

Philosophy of Education

The Ed.D. degree program in the History and Philosophy of Education Program – Philosophy of Education field is designed for career educators who wish to engage in the indepth study of a problem or topic related to professional practice. Applicants with specializations in their master's degree programs other than Philosophy of Education are required to take additional courses either as prerequisites to admission or as part of their program. Applicants without a master's thesis or equivalent must submit a Qualifying Research Paper, which must be approved by two faculty members prior to registration in the program.

The degree requirements for students who have completed a master's degree (M.Ed. or M.A.) in the History and Philosophy of Education Program – Philosophy of Education field consist of eight half-courses (some or all of which may be taken part-time), a year of required full-time study on campus, and a thesis. Preferably, the year of full-time study should occur late in the degree program and should be devoted primarily to thesis research and writing. All Ed.D. students are required to take a comprehensive examination.

The core program includes two mandatory Ed.D. seminars (TPS 3480H *Ed.D. Seminar in the Philosophy of Education I* and TPS 3481H *Ed.D. Seminar in the Philosophy of Education II*), normally taken during the year of required full-time study, and course TPS 1440H *An Introduction to Philosophy of Education*, unless it, or an equivalent, has been taken previously.

Students who have not completed a master's (M.Ed. or M.A.) degree in the History and Philosophy of Education Program – Philosophy of Education field must complete TPS1419H *Historiography and the History of Education* as part of their required eight half-courses. In cases where a student has already taken a course deemed equivalent to TPS 1419H, another history course may be substituted. In consultation with the faculty advisor, this course should be

chosen to complement the student's primary focus in philosophy.

A minimum of five courses should normally be taken from the Philosophy of Education course menu, selected in consultation with the faculty advisor. (See the *OISE/UT Graduate Studies in Education Bulletin* for a list of Philosophy of Education courses.) Courses from other departments, including the Graduate Department of Philosophy, may, upon approval, be substituted for Philosophy of Education courses. Students are strongly encouraged, though not required, to take at least two half-courses before the year of required full-time study.

Degree of Doctor of Philosophy

Educational Administration

The Ph.D. program in Educational Administration fosters the study of problems in the administration and leadership of educational programs. It will best serve students who have a commitment to scholarship and research as a means for deepening their understanding of administrative action in schools or in other educational and service institutions. While experience in teaching and administration is not an essential prerequisite for admission, such experience provides a desirable background.

The Ph.D. program may be taken on either a full-time or flexible-time basis. To be admitted on a flexible-time basis, applicants should be active professionals who demonstrate connections between their professional work and their proposed course program, and/or between their professional work and their proposed research.

Admission to the Ph.D. program requires prior completion of the University of Toronto M.A. degree or its equivalent, with standing equivalent to a University of Toronto A minus. Students who have completed an appropriate master's degree that did not include a thesis or research project are required to complete a Qualifying Research Paper to a standard satisfactory to the Ph.D. Admissions Committee. Before undertaking a qualifying research project, students should first consult the Program Coordinator.

The program comprises at least six new half-courses, four of which normally must be TPS 3040H, TPS 3042H, TPS 3043H, and one elective advanced level (3000) course in Educational Administration. Students who have already attained an acceptable level of competence in research methodology may be author-

ized to choose a course in a different area of specialization.

Ph.D. students are required to pass a comprehensive examination and a thesis proposal hearing. A thesis is required.

Higher Education

The requirements for the Ph.D. degree program in Higher Education include a minimum of six half-courses beyond a relevant and acceptable M.Ed. or M.A. In individual cases, students with a highly relevant master's degree or other equivalent graduate degree may be admitted, but additional courses in Higher Education will be required. Normally the minimum requirements will include:

- 1 TPS 1803Y *Recurring Issues in Post-secondary Education* (full course);
- 2 at least two other half-courses in Higher Education;
- 3 a half-course in research methodology approved by the faculty advisor;
- 4 one half-course selected either in Higher Education or in another graduate program at OISE/UT, or, with the approval of the faculty advisor, in another graduate department at the University of Toronto;
- 5 a written General Comprehensive Examination (if not completed previously);
- 6 a Doctoral Specialization Examination;
- 7 a thesis reporting the results of original research in postsecondary education.

Collaborative Programs

Interested Higher Education program students may also enrol in the following Collaborative Programs:

- 1 Comparative, International, and Development Education
- 2 Women's Studies

For more details, consult the separate entries in this calendar.

History and Philosophy of Education

There are two separate fields in the History and Philosophy of Education:

- 1 History of Education
- 2 Philosophy of Education

History of Education

Qualified applicants with a University of Toronto M.A. degree in the History and Philosophy of Education Program – History of Education field, or its equivalent, including a thesis or equivalent major research paper, may be admitted to a Ph.D. program comprising six half-courses plus a thesis. If the master's degree did not include a thesis (or equivalent), a Qualifying Research Paper must be submitted

and approved by two faculty members before registration in the degree program.

Applicants who do not hold a University of Toronto M.A. degree in the History and Philosophy of Education Program – History of Education field or its equivalent will be required to establish equivalency with the OISE/UT master's program. Usually this entails completion of TPS 1419H *Historiography and the History of Education* and TPS 1440H *An Introduction to the Philosophy of Education* within the minimum six half-courses required for the Ph.D. In cases where a student has already taken a course deemed equivalent to TPS 1440H, another philosophy course may be substituted. In consultation with the faculty advisor, this course should be chosen to complement the student's primary focus in history.

All Ph.D. students are required to write a comprehensive examination.

Philosophy of Education

Qualified applicants with a University of Toronto master's degree in the History and Philosophy of Education Program – Philosophy of Education field or its equivalent (including a thesis or equivalent major research paper) may be admitted to a Ph.D. program comprising six half-courses plus a thesis. If the master's degree did not include a thesis (or equivalent), a Qualifying Research Paper must be submitted and approved by two faculty members before registration in the degree program.

Applicants who do not hold a University of Toronto master's degree in the History and Philosophy of Education Program – Philosophy of Education field or its equivalent will be required to establish equivalency with the OISE/UT master's program. Usually this entails completion of TPS 1440H *An Introduction to Philosophy of Education* (unless a course deemed equivalent has already been taken previously) and TPS 1419H *Historiography and the History of Education* within the minimum six half-courses required for the Ph.D. In cases where a student has already taken a course deemed equivalent to TPS 1419H, another history course may be substituted. In consultation with the faculty advisor, this course should be chosen to complement the students' primary focus in philosophy.

All students must complete at least four half-courses from the Philosophy of Education course menu, including TPS 1440H. (See the *OISE/UT Graduate Studies in Education Bulletin* for a list of Philosophy of Education courses.) Courses should be selected in consultation with the faculty advisor. Courses from other departments, including the Graduate

Department of Philosophy, may, upon approval, be substituted for Philosophy of Education courses.

All Ph.D. students are required to write a comprehensive examination.

Courses of Instruction

Not all courses are offered every year. Please consult OISE/UT's Graduate Studies Course Schedule which lists the courses the Department will offer this year as well as those offered by other departments that may be taken for credit in your program.

Some sections of existing courses are offered off campus and by computer conferencing in order to make them available to students in localities far from Toronto.

Educational Administration

 D. S. Riddick, BSc, PhD/Pharmacology
 C. Woodland, BSc, MSc, PhD/Pharmacology
 (**Director**)

Address:

Collaborative Program in Biomedical Toxicology
 Department of Pharmacology
 Room 4207, Medical Sciences Building
 University of Toronto
 Toronto, Ontario M5S 1A8
 Canada

Telephone: (416) 978-5244

Fax: (416) 978-6395

E-mail: pharmtox.dept@utoronto.ca

Web: www.pharmtox.utoronto.ca/programs/cpbt.htm

Nature of the Collaborative Program

The graduate units of Ecology and Evolutionary Biology, Laboratory Medicine and Pathobiology, Medical Science, Nutritional Sciences, Pharmaceutical Sciences, and Pharmacology participate in the Collaborative Graduate Program in Biomedical Toxicology. Students may pursue an M.Sc. or Ph.D. degree. Departments and institutes participating in the program contribute graduate courses, provide facilities, and provide supervision for graduate research.

Graduate students from departments other than the participating units listed, who are interested in pursuing a program in toxicology should speak to the Director of the Collaborative Program in Biomedical Toxicology and the graduate advisor(s) in their home department to discuss the possibility.

Admission Requirements

Students who wish to enrol in the collaborative program must first apply to and be accepted by one of the participating home departments under its regulations. Once students have been admitted to their home department, they should register in the Collaborative Program in Biomedical Toxicology by contacting the Program Director. Students planning to begin the program in the fall should register with the Program Director by October 15; students

planning to begin in the winter should register by January 31.

Program Requirements

Students must complete a research thesis or project as required by the home department. It is understood that the research topic will be in the area of biomedical toxicology. A copy of the final thesis or project must be submitted to the Program Director.

Master of Science

Students are required to take JNP 1014Y *Interdisciplinary Toxicology* and JNP 1016H *Graduate Seminar in Toxicology*. In addition, students must attend a minimum of six academic seminars related to toxicology during their program.

Doctor of Philosophy

Students are required to take JNP 1014Y *Interdisciplinary Toxicology*; JNP 1016H *Graduate Seminar in Toxicology*, plus a half-course equivalent in the area of toxicology (approved by the Director of the collaborative program). The home department and the Director of the Collaborative Program in Biomedical Toxicology will decide whether these courses are in addition to home departmental requirements or substitutions for home departmental requirements.

In addition, students must attend a minimum of 12 academic seminars related to toxicology during their program.

Detailed program information is available on the Web at www.utoronto.ca/grdpharm/biomed1.htm and from the Department of Pharmacology.

Graduation Requirements

In consultation with the Director of the Collaborative Program in Biomedical Toxicology, the home department recommends to the School of Graduate Studies that a candidate should graduate following successful completion of the above program requirements. Upon successful completion, the student receives, in addition to the master's or Ph.D. degree in their departmental area, a notation on the transcript reading "Completed M.Sc. Collaborative Program in Biomedical Toxicology" or "Completed Ph.D. Collaborative Program in Biomedical Toxicology".

Centre for Urban and Community Studies
 Suite 400, 455 Spadina Avenue
 Toronto, Ontario M5S 2G8
 Canada

Telephone: (416) 978-2072

Fax: (416) 978-7162

E-mail: urban.center@utoronto.ca

Web: www.urbancenter.utoronto.ca

The Centre for Urban and Community Studies promotes and disseminates multidisciplinary research and policy analysis on urban issues.

Its activities are intended to contribute to scholarship on questions relating to the social and economic well-being of people who live and work in urban areas large and small, in Canada and around the world.

The centre was established in 1964 as a research unit of the School of Graduate Studies. Its research associates include professors and graduate students from a dozen different disciplines and professionals from a variety of organizations.

The centre's mandate is to:

- bring together faculty, professionals, and graduate students interested in urban development, policy issues and the quality of life in cities;
- encourage interdisciplinary scholarly research on urban issues;
- support this research by providing academic staff and students with space, access to services and information, opportunities for

collaboration, seminars and conferences, and graduate research internships;

- disseminate ideas related to urban and community studies to other researchers and to agencies and organizations interested in urban matters by publishing books, reports, bibliographies, and research bulletins;
- improve communications among researchers and between researchers and the broader urban community.

Several formal working groups are currently active within, or are associated with, the centre. These include:

- UofT Urban International, which provides multi-year support for research projects on international development;
- NetLab, which studies computer, communication, and social networks;
- Housing New Canadians Research Working Group;
- Community Development Research Network;
- Cities Lab, which studies urban growth, urban structure, and neighbourhood change;
- Urban Systems Research Lab, and
- Urban Entomology Program.

Research activities in the centre comprise both major programs, intended as areas of continuing interest involving an interdisciplinary team approach, and more focused, shorter-term projects, often undertaken by one or two people.

Current research themes include: housing markets and Canadian housing policy; urbanization and urban management in developed and developing countries; urban environment and sustainability; social networks and urban communities; computer and social networks; social and spatial polarization; immigrant settlement; child care, women and labour force participation; municipal administrative development; urban systems, urban growth and changing metropolitan form in Canada; urban public transport; geographic information systems and urban policy; regional policy and regional development.

The centre maintains close working relationships with research programs and academic units both within and outside the University that have similar interests. Associate membership in the centre is held by members of the University or the affiliated community engaged in urban research.

One of the main functions of the centre is to make available academic research on urban affairs. It publishes research papers, bulletins, monographs, and books, and offers shorter

papers and bulletins through its Web site. Publications lists and a brochure describing its activities and programs are available from the centre.

For graduate students the centre offers seminars on a wide range of urban and social science topics, the opportunity to publish papers in the centre's series, access to publications and conferences at a reduced price, research training and assistantships, and information on data sources and research opportunities.

The centre coordinates the Collaborative Program in Community Development. A collaborative program provides an additional multidisciplinary learning experience for students enrolled in one of the units participating in the program. Students successfully completing the collaborative program receive a special notation on their transcripts. For details, consult the Community Development entry in this calendar.

The centre welcomes visiting researchers, including professors and professionals on research leave, as well as students with post-doctoral fellowships. The centre is unable to offer funding to visitors, but can provide office space, Internet connections, and access to the University of Toronto's library system.

The Women and Gender Studies Institute offers a program leading to the M.A. degree in Women and Gender Studies. Our faculty have expertise in several areas including transnational perspectives on gender, postcolonial perspectives on gender, and gender and cultural production.

M.A. students are accepted under the general regulations, provided that they also satisfy the institute's requirements stated below. The student's program of study must be approved by the institute.

Degree of Master of Arts

Admission Requirements

Admission to the master's program is based on the completion of a four-year University of Toronto bachelor's degree, or its equivalent, in women's studies and gender studies or a related area at an approved university. Applicants must have obtained an average equivalent to a University of Toronto B+ or better in their final year of undergraduate study. All applicants must submit a letter of intent that addresses the academic goals that they wish to pursue in the program, two letters of recommendation, and transcripts from all post-secondary institutions.

The program welcomes applications from international students.

Program Requirements

Students must complete a total of 4.0 full-course equivalents (FCE) as follows:

- 1 2.0 core FCE in Women and Gender Studies;
- 2 M.A. Research Paper (1.0 FCE);
- 3 1.0 elective FCE chosen in consultation with the M.A. Program Advisor from available graduate courses.

Collaborative Programs

The Women and Gender Studies Institute participates in the following collaborative programs:

- 1 Addiction Studies
- 2 Aging, Palliative and Supportive Care Across the Life Course
- 3 Asia-Pacific Studies
- 4 South Asian Studies
- 5 Environment and Health
- 6 Environmental Studies
- 7 International Relations

For more details, consult the separate entries in this calendar.

Courses of Instruction

Core Courses

- WGS 1000H Theories, Histories, Feminisms
 WGS 1001H Feminism, Transnationalism and Postcolonialism
 WGS 1002H Feminist Methodologies and Epistemologies
- WGS 1003H Special Topics in Feminist Studies *or*
 WGS 1004H Special Topics in Feminist Theory

Research Paper

- WGS 1005Y M.A. Research Paper

Fax: (416) 351-3746

E-mail: CPWH@womensresearch.ca

Web: www.womensresearch.ca/graduate/

Nature of Collaborative Graduate Program

The Collaborative Graduate Program in Women's Health involves these graduate units: Dentistry; English; Exercise Sciences; Health Policy, Management, and Evaluation; Immunology; Information Studies; Medical Science; Nursing Science; Pharmacology; Psychology; Public Health Sciences; and Religion; together with the support of The Centre for Girls' and Women's Health and Physical Education; Women and Gender Studies Institute; and the International Programme on Reproductive and Sexual Health Law. The program's objectives are two-fold:

- 1 To provide interdisciplinary training in women's health research and practice for graduate students at the University of Toronto
- 2 To facilitate mutually beneficial relationships among researchers and practitioners of women's health across the University and its 10 affiliated teaching hospitals.

Application Procedures

Students must be registered with the School of Graduate Studies through one of the participating graduate units in order to apply to the Collaborative Graduate Program in Women's

Health. Applicants must comply with the admission procedures of that unit. Applicants must submit the following to the Program Committee of the Collaborative Graduate Program in Women's Health:

1 A personal statement, a letter no longer than two pages describing relevant personal and/or professional experiences, a career plan, and motivation in seeking advanced training in women's health.

2 Photocopies of application materials submitted to their home unit including curriculum vitae, transcripts, and letters of reference.

Master's Degrees

Master's students enrolled in the Collaborative Graduate Program in Women's Health must take the core course (CHL 5109H *Gender and Health*), participate in the Research Seminar Series (held monthly) and in the Women's College Research Institute Graduate Student Research Day. With guidance from their primary mentor (graduate supervisor from their home unit) and their co-mentor (a faculty member of the collaborative program), students devise a study plan that will assist them in building interdisciplinary research skills in women's health; both mentors must sign this plan. In instances where home graduate units require a thesis, it is desirable, but not required, that this work be relevant to women's health. Students must complete the program requirements of the collaborative program as well as those of the home graduate unit.

Doctoral Degrees

Doctoral students enrolled in the Collaborative Graduate Program in Women's Health must take the core course (CHL 5109H *Gender and Health*), participate in the Research Seminar Series (held monthly), and the Women's College Research Institute Graduate Student Research Day. With guidance from their primary mentor (graduate supervisor from their home unit) and their co-mentor (a core faculty member of the collaborative program), students will devise a research plan that will assist them in building interdisciplinary research skills in women's health; both mentors must sign this plan. The students' dissertation should be on a topic relevant to women's health; their co-mentor is expected to serve on the dissertation committee. Doctoral students who have previously satisfactorily completed the core course during their master's program are not required to take the course again during their doctoral program.

Nature of the Collaborative Program

Graduate units from the Humanities, Social Sciences, and Life Sciences participate in the Graduate Collaborative Program in Women's Studies at the University of Toronto. The collaborating units contribute courses and provide facilities and supervision for graduate research. The program is administered by the Women and Gender Studies Institute (WGSi).

The Graduate Collaborative Program in Women's Studies (GCWS) provides a formal educational context for the pursuit of interdisciplinary research in women and gender studies and advanced feminist scholarship. The program, offered at the master's and doctoral levels, provides a central coordinating structure to facilitate and disseminate research in women and gender studies through student and faculty research seminars, colloquia, circulation of work in progress, study groups, conferences, and publications. GCWS contributes to the development of an integrated research community in women and gender studies at the University of Toronto.

The Graduate Collaborative Program in Women's Studies brings together 26 graduate units providing more than 100 courses and involving over 100 faculty. Applicants who wish to enrol in the collaborative program must apply to and be admitted to both the collaborative program and a graduate degree program in one of the collaborating departments. Students must fulfil all the degree requirements in the home department. Students who successfully complete the requirements of the collaborative program will receive the notation "Completed Collaborative Program in Women's Studies" on their transcript, in addition to the master's or doctoral degree from their home graduate unit.

Programs of study should be planned in consultation with the GCWS Graduate Coordinator as well as the Coordinator of Graduate Studies in the student's home graduate unit. Courses should be selected from the established cross-listed courses approved by

the Graduate Coordinator of the collaborative program. Theses will be supervised and evaluated in the same manner as those in the home graduate unit. Normally, at least one graduate faculty member cross-listed with GCWS will be a member of the thesis or supervisory committee of students in the program.

Admission Requirements

- familiarity with the approaches and methodologies associated with scholarship in women and gender studies, OR
- extensive familiarity with women and gender studies scholarship in a single discipline or a cognate set of disciplines

Collaborating units send to GCWS a copy of all student files (application, offer of admission, etc.)

The GCWS Committee reviews the file and, if approved, a letter of acceptance outlining the course requirements for the Program, is sent to the student and the collaborating unit.

To be submitted to GCWS:

1 *Non-Thesis Master's*

- ensure that your graduate application file is forwarded from the home graduate unit
- two-page statement of research intent explaining how your program of study and specific research interests relate to women and gender studies at the master's level

2 *Thesis Master's*

- ensure that your graduate application file is forwarded from the home graduate unit
- two-page statement of research intent for thesis in women and gender studies
- two letters of reference outlining your background in women and gender studies

3 *Doctor of Philosophy*

To be considered for admission to the Graduate Collaborative Program in Women's Studies at the doctoral level, applicants must demonstrate extensive familiarity with relevant scholarship in women and gender studies at both the undergraduate and graduate levels. Applicants who lack a strong background in the field of women and gender studies may be required to do special course work to qualify.

To be submitted to GCWS:

- ensure that your graduate application file is forwarded from the home graduate unit
- two-page statement of research intent explaining how your program of study and specific research interests relate to women and gender studies at the doctoral level

- two letters of reference outlining your background in women and gender studies

4 Ad hoc arrangements are possible with non-collaborating departments.

Program Requirements

Master's Degrees

1 *Non-Thesis Master's Degree*

- JPW 2118H *Philosophical Foundations of Women's Studies* or equivalent
- one full course (Y course) or two half-courses (H courses) selected from the cross-listed courses in GCWS

2 *Thesis Master's Degree*

- JPW 2118H *Philosophical Foundations of Women's Studies* or equivalent
- one half-course (H course) selected from the cross-listed courses in GCWS
- the thesis, or major paper, dealing with a subject in the field of women and gender studies

Doctoral Degrees

- JPW 2118H *Philosophical Foundations of Women's Studies* or equivalent (if not already completed)
- JPW 3000H *Advanced Research Seminar*
- one half-course (H course, not taken previously) from the list of cross-listed courses in GCWS
- the doctoral thesis dealing with a subject in the field of women and gender studies

Courses of Instruction

Required Courses

JPW 2118H	Philosophical Foundations of Women's Studies/ <i>K. Morgan</i>
JPW 3000H	Advanced Research Seminar in Women's Studies/ <i>B. McElhinny</i>

Cross-listed Courses

Courses in women and gender studies offered by the participating units are listed below. Not all courses are offered each year. Courses not included in this list may be petitioned for credit. Information and timetables are available from the individual graduate units.

Adult Education and Counseling Psychology

AEC 1104H	Community Education and Organizing/ <i>A. Miles</i>
AEC 1113H	Gender and Hierarchy at Work/ <i>K. Mirchandani</i>

- AEC 1114H Comparative and International Perspectives in Adult Education/
D. Schugurensky, S. Mojab, K. Mundy
- AEC 1143H Introduction to Feminist Perspectives on Society and Education/*A. R. Miles, Staff*
- AEC 1146H Women, Globalization and Citizenship/*S. Mojab*
- AEC 1156H Power and Difference in the Workplace/*S. Mojab*
- AEC 1207H Counselling Topics in Sexual Orientation and Gender Identity Diversity/*J. R. Gillis*
- AEC 1253H Feminist Issues in Counselling Psychology and Psychotherapy/
K. Jasper, Staff
- AEC 1408H Working with Survivors of Trauma/*B. Burstow*
- AEC 3119H Global Perspectives on Feminist Education, Community Development, and Community Transformation/*A. R. Miles, Staff*
- AEC 3132H Special Topics in Women in Development and Community Transformation/*Dame N. Barrow (Distinguished Visitor)*
- AEC 3181H Feminist Standpoints: Critical and Post-Structural Approaches/
A. Miles

Anthropology

Student must complete "Individual Reading and Research Course Form" before enrolling (available from department).

- ANT 5144H Language and Social Action/
B. McElhinny, J. Sidnell
- ANT 5146H Colonial and Postcolonial Discourses/*I. Kalmar, B. McElhinny*
- ANT 6026H Anthropology of Identity and Subject Formation/
V. Napolitano-Quayson
- ANT 6050H Reading Course in Specific Area and Theory I/*Staff*
- ANT 6051H Reading Course in Specific Area and Theory II/*Staff*
- ANT 6052Y Reading Course in Specific Area and Theory III/*Staff*
- ANT 7001H Medical Anthropology I
- ANT 7002H Medical Anthropology II
- JAL 1155H Language and Gender/
B. McElhinny

Classics

- CLA 5000H Early Greek Epic
- CLA 5023H Topics in the Study of Roman Literature and Culture

- CLA 5024H Topics in the Study of Roman Society

Comparative Literature

- COL 5018H Gender, Agency and Life Writing/
B. Havercroft
- COL 5021H The Body in Medieval Literature/
J. Ross
- COL 5025Y Feminism and Postmodernism: Theory and Practice/
