- Students have the option of completing an emphasis in Sustainable Energy as part of their degree program. Please see details in the Materials Science and Engineering MASc, MEng, PhD Emphases section.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

[0] Course that may continue over a program. The course is graded when completed.

MSE: Materials Science and Engineering MEng

Master of Engineering

Program Description

The MEng program has been developed for recent graduates who wish to pursue graduate-level studies but may not be interested in continuing to the PhD program. This program is also intended for working engineers who wish to augment their current knowledge and add to their credentials. The multidisciplinary nature of materials engineering and the coursework-only and coursework-plus-project options enable students to build personalized programs which best suit their individual interests and needs. The MSE MEng is recognized and respected by employers globally and can enhance and enrich the career opportunities of graduates.

The MEng program can be taken on a full-time, extended full-time, or part-time basis.

Full-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Materials Science and Engineering's additional admission requirements stated below.
- For students whose primary language is not English, the department requires a Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - Paper-based TOEFL: minimum score of 580 and 4 on the Test of Written English (TWE)
  - Internet-based TOEFL: minimum score of 93/120 and 22/30 on the writing and speaking sections.

Program Requirements

- For students with adequate undergraduate preparation, the normal program will include **5.0 full-course equivalents (FCEs)** (10 half courses). A project may be substituted for 1.5 FCEs (3 half courses). Students enrolled in this option work in consultation with a professor who acts as advisor for the project undertaken. An oral presentation of the project may be required.
- Students normally complete the requirements in three sessions (one year).
- Full-time MEng students may transfer to the research-stream MASc program if they meet all of the following criteria:
  - The request to transfer must be submitted at the beginning of the second session of enrolment. For example, students enrolled in September must successfully complete 1.5 FCEs (three half courses), technical courses of which at least one must be from MSE, with a B+ or 78% average. The technical courses taken during the MEng program will be credited toward the MASc program.
  - Have a supervisor who is willing to provide funding for an MASc research project starting in the second session of enrolment.
- Students have the option of completing an emphasis in Advanced Manufacturing; Advanced Soft Materials; Advanced Water Technologies; Analytics; Biomanufacturing; Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); Forensic Engineering; or Sustainable Energy as part of their degree program. Please see details in the Materials Science and Engineering MASc, MEng, PhD Emphases section.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);

Time Limit

3 years

Extended Full-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Materials Science and Engineering's additional admission requirements stated below.
- For students whose primary language is not English, the department requires a Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - paper-based TOEFL: minimum score of 580 and 4 on the Test of Written English (TWE)
  - Internet-based TOEFL: minimum score of 93/120 and 22/30 on the writing and speaking sections.

Program Requirements

- For students with adequate undergraduate preparation, the normal program will include **5.0 full-course equivalents** (FCEs) (10 half courses). A project may be substituted for 1.5 FCEs (3 half courses). Students enrolled in this option work in consultation with a professor who acts as advisor for the project undertaken. An oral presentation of the project may be required.
- Students are expected to complete the requirements in six sessions (two years). They are limited to six half courses per year and three half courses per session.
- Full-time MEng students may transfer to the research-stream MASc program if they meet all of the following criteria:
  - The request to transfer must be submitted at the beginning of the second session of enrolment. For example, students enrolled in September must successfully complete 1.5 FCEs (three half courses), technical courses of which at least one must be from MSE, with a B+ or 78% average. The technical courses taken during the MEng program will be credited toward the MASc program.
  - Have a supervisor who is willing to provide funding for an MASc research project starting in the second session of enrolment.
- Students have the option of completing an emphasis in Advanced Manufacturing; Advanced Soft Materials; Advanced Water Technologies; Analytics; Biomanufacturing; Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); Forensic Engineering; or Sustainable Energy as part of their degree program. Please see details in the Materials Science and Engineering MASc, MEng, PhD Emphases section.

Program Length

6 sessions (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years

Part-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Materials Science and Engineering's additional admission requirements stated below.
- For students whose primary language is not English, the department requires a Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - paper-based TOEFL: minimum score of 580 and 4 on the Test of Written English (TWE)
  - Internet-based TOEFL: minimum score of 93/120 and 22/30 on the writing and speaking sections.

Program Requirements

- For students with adequate undergraduate preparation, the normal program will include **5.0 full-course equivalents (FCEs)** (10 half courses). A project may be substituted for 1.5 FCEs (3 half courses). Students enrolled in this option work in consultation with a professor who acts as advisor for the project undertaken. An oral presentation of the project may be required.
- Students are limited to four half courses per year and two half courses per session.
- Students normally complete the requirements in nine sessions (three years).
- Students have the option of completing an emphasis in Advanced Manufacturing; Advanced Soft Materials; Advanced Water Technologies; Analytics; Biomanufacturing; Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); Forensic Engineering; or Sustainable Energy as part of their degree program. Please see details in the Materials Science and Engineering MASc, MEng, PhD Emphases section.

MSE: Materials Science and Engineering PhD

Doctor of Philosophy

Program Description

Pursuing a PhD degree, the most advanced research degree in the Faculty of Applied Science and Engineering, can be a stepping stone to an academic career or to an industrial career which would benefit from in-depth applied research and research skills. Under the guidance of an accomplished supervisor, PhD students engage in original research that contributes to a variety of fields of study. Four years of PhD study allowing students to collaborate with local and international colleagues culminates in a written thesis which is presented orally and evaluated by experts. This is a degree program for outstanding students.

Applicants may enter the PhD program via one of three routes: 1) following successful completion of an MASc degree; 2) transfer from the University of Toronto MASc program to continue work that was begun at that level; or 3) direct entry following completion of an appropriate bachelor's degree.

The program can also be taken on a flexible-time basis.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Materials Science and Engineering (MSE)'s additional admission requirements stated below.
- Students are normally expected to have completed a master's-level program before entering the PhD program.
- For students whose primary language is not English, the department requires a Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - Paper-based TOEFL: minimum score of 580 and 4 on the Test of Written English (TWE)
  - Internet-based TOEFL: minimum score of 93/120 and 22/30 on the writing and speaking sections.

Program Requirements

- The primary subject in a program will be extractive and process metallurgy, physical metallurgy, or materials science.
- **Coursework.** The program of study normally includes **2.0 full-course equivalents (FCEs)** (four half courses), including the weekly Graduate Research Seminar, and a thesis. The coursework selected normally includes:
  - MSE2000H^0 *Graduate Research Seminar PhD* (0.5 FCE).
  - Three half courses (1.5 FCEs), at least one of which must be chosen from the list of MSE graduate course offerings.
  - The departmental seminar, comprising a minimum of two seminars presented to the academic staff and students of MSE.
- Students must complete the seminar JDE1000H *Ethics in Research*, a non-credit course (0.0 FCE).

- A general **Qualifying Examination** must be scheduled and taken within 12 months of initial registration. In case of failure, one further attempt within 3 months is allowed, no later than within 15 months of initial registration. No further attempts are permitted. In order to take this examination, students must complete all required coursework except for the Graduate Research Seminar PhD.
- The Qualifying Examination consists of:
  - A report (25 to 30 pages) of research to date, in the form of a dossier.
  - A presentation (20 to 25 minutes) summarizing research, with particular emphasis on providing a critical assessment of the literature in the field, a central hypothesis of thesis, proposed methodology, and recent experimental progress.
  - An oral examination, immediately following the presentation, by the Qualifying Examination committee who will ask the candidate questions pertaining to either the presented material, or related questions in materials science. The student is expected to have a working-level knowledge of the fundamentals of materials science as it pertains to the proposed area of research, and on a broader basis, at the level of a second-year undergraduate student in Materials Science.
- The required **thesis** is based upon research work carried out in the department in the areas of extractive and process metallurgy, physical metallurgy, or materials science.
- Students have the option of completing an emphasis in Sustainable Energy as part of their degree program. Please see details in the Materials Science and Engineering MASc, MEng, PhD Emphases section.

Program Length

4 years

Time Limit

6 years

[0] *Course that may continue over a program. The course is graded when completed.*

PhD Program (Transfer)

Transfer Requirements

- Very strong MASc students may apply to transfer to the PhD program after completing one year of the MASc program. Regulations governing such transfers are available in the MSE Graduate Studies office.

Program Requirements

- The primary subject in a program will be extractive and process metallurgy, physical metallurgy, or materials science.
- **Coursework.** The program of study normally includes **2.5 full-course equivalents (FCEs)**, including the weekly Graduate Research Seminar PhD, and a thesis. The coursework selected normally includes:
  - Three half courses (1.5 FCEs) from the MASc program.
  - MSE2000H[0] *Graduate Research Seminar PhD* (0.5 FCE).
  - An additional 0.5 graduate FCE.
- A general **Qualifying Examination** must be scheduled and taken within 12 months of initial registration. In case of failure, one further attempt within 3 months is allowed, no later than within 15 months of initial registration. No further attempts are permitted. In order to take this examination, students must complete all required coursework except for the *Graduate Research Seminar PhD*. The Qualifying Examination consists of:
  - A report (25 to 30 pages) of research to date, in the form of a dossier.
  - A presentation (20 to 25 minutes) summarizing research, with a particular emphasis on providing a critical assessment of the literature in the field, a central hypothesis of the thesis, proposed methodology, and recent experimental progress.
  - An oral examination, immediately following the presentation, by the Qualifying Examination committee who will ask the candidate questions pertaining to either the presented material, or related questions in materials science. The student is expected to have a working-level knowledge of the fundamentals of materials science as it pertains to the proposed area of research, and on a broader basis, at the level of a second-year undergraduate student in Materials Science.
  - The required **thesis** is based upon research work carried out in the department in the areas of extractive and process metallurgy, physical metallurgy, or materials science.
  - Students have the option of completing an emphasis in Sustainable Energy as part of their degree program. Please see details in the Materials Science and Engineering MASc, MEng, PhD Emphases section.

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Materials Science and Engineering (MSE)'s additional admission requirements stated below.
- Exceptionally strong BASc students with an average grade of A– over the final four sessions of undergraduate studies (excluding Summer sessions in some cases) may be considered for direct entry to the PhD program.
- For students whose primary language is not English, the department requires a Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - Paper-based TOEFL: minimum score of 580 and 4 on the Test of Written English (TWE)
  - Internet-based TOEFL: minimum score of 93/120 and 22/30 on the writing and speaking sections.

Program Requirements

- The primary subject in a program will be extractive and process metallurgy, physical metallurgy, or materials science.
- **Coursework.** The program of study normally includes **3.0 full-course equivalents (FCEs)** (six half courses), including the weekly *Graduate Research Seminar PhD*, and a thesis. The coursework selected normally includes:
  - MSE2000H[0] *Graduate Research Seminar PhD* (0.5 FCE).
  - Five half courses (2.5 FCEs), at least two of which must be chosen from the list of MSE graduate course offerings.
- Students must complete the seminar JDE1000H *Ethics in Research*, a non-credit course (0.0 FCE).
- A general **Qualifying Examination** must be scheduled and taken within 12 months of initial registration. In case of failure, one further attempt within 3 months is allowed, no later than within 15 months of initial registration. No further attempts are permitted. In order to take this examination, students must complete all required coursework except for the *Graduate Research Seminar PhD*. The Qualifying Examination consists of:
  - A report (25 to 30 pages) of research to date, in the form of a dossier.
  - A presentation (20 to 25 minutes) summarizing research, with particular emphasis on providing a critical assessment of the literature in the field, a central hypothesis of thesis, proposed methodology, and recent experimental progress.
  - An oral examination, immediately following the presentation, by the Qualifying Examination committee who will ask the candidate questions pertaining to either the presented material, or related questions in materials science. The student is expected to have a working-level knowledge of the fundamentals of materials science as it pertains to the proposed area of research, and on a broader basis, at the level of a second-year undergraduate student in Materials Science.
- The required **thesis** is based upon research work carried out in the department in the areas of extractive and process metallurgy, physical metallurgy, or materials science.
- Students have the option of completing an emphasis in Sustainable Energy as part of their degree program. Please see details in the Materials Science and Engineering MASc, MEng, PhD Emphases section.

Time Limit

7 years

[0] *Course that may continue over a program. The course is graded when completed.*

PhD Program (Flexible-Time)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Materials Science and Engineering (MSE)'s additional admission requirements stated below.
- Students must have completed a master's-level program before entering the PhD program.
- For students whose primary language is not English, the department requires a Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - Paper-based TOEFL: minimum score of 580 and 4 on the Test of Written English (TWE)
  - Internet-based TOEFL: minimum score of 93/120 and 22/30 on the writing and speaking sections.
- Applicants to the flexible-time PhD option are accepted under the same admission requirements as applicants to the full-time PhD option.

Program Requirements

- The primary subject in a program will be extractive and process metallurgy, physical metallurgy, or materials science.
- Students must complete **2.0 full-course equivalents (FCEs)** (four half courses) as follows:
  - Year 1: 1.0 FCE plus the non-credit seminar JDE1000H Ethics in Research (0.0 FCE).
  - Year 2: 0.5 FCE. Prepare a research proposal and pass the Qualifying Examination.
  - Year 3: Present the first seminar for MSE2000H0 Graduate Research Seminar PhD (0.5 FCE).
  - Year 4: Research and writing.
  - Year 5: Research and writing. Present the second seminar for MSE2000H[0].
  - Year 6: Defend the thesis at the Doctoral Final Oral Examination by August 30.

- Students in the flexible-time option are registered full-time during the first four years and part-time during subsequent years in the program.
- The general **Qualifying Examination** must be scheduled and taken within 12 months of initial registration. In case of failure, one further attempt within 3 months is allowed, no later than within 15 months of initial registration. No further attempts are permitted. In order to take this examination, students must complete all required coursework except for the Graduate Research Seminar PhD. The Qualifying Examination consists of:
  - A report (25 to 30 pages) of research to date, in the form of a dossier.
  - A presentation (20 to 25 minutes) summarizing research, with particular emphasis on providing a critical assessment of the literature in the field, a central hypothesis of thesis, proposed methodology, and recent experimental progress.
  - An oral examination, immediately following the presentation, by the Qualifying Examination committee who will ask the candidate questions pertaining to either the presented material, or related questions in materials science. The student is expected to have a working-level knowledge of the fundamentals of materials science as it pertains to the proposed area of research, and on a broader basis, at the level of a second-year undergraduate student in Materials Science.
- The required **thesis** is based upon research work carried out in the department in the areas of extractive and process metallurgy, physical metallurgy, or materials science.
- Students have the option of completing an emphasis in Sustainable Energy as part of their degree program. Please see details in the Materials Science and Engineering MASc, MEng, PhD Emphases section.

MSE: Materials Science and Engineering MASc, MEng, PhD Emphases

Emphasis: Advanced Manufacturing (MEng only)

MEng students must successfully complete:

- **Four half courses (2.0 full-course equivalents [FCEs])**, including at least one core course.
- Elective courses may include other core courses, and courses from either of two streams: Manufacturing Engineering and Manufacturing Management.

Core Courses

AER501H *Advanced Mechanics of Structures*
AER1403H *Advanced Aerospace Structures*
APS1028H Operations *and Production Management for Manufacturing and Services*
CHE1123H *Liquid Biofuels*
MIE519H *Advanced Manufacturing Technologies*
MIE1740H *Smart Materials and Structures*.

Elective Courses — Manufacturing Engineering

AER521H, AER 1415H,
CHE575H, CHE1134H, CHE1475H,
MIE506H, MIE540H, MIE1706H, MIE1713H, MIE1718H, MIE1743H,
MSE1013H, MSE1015H, MSE1028H, MSE1031H, MSE1058H, MSE1061H,
ROB501H.

Elective Courses — Manufacturing Management

APS1005H, APS1012H, APS1013H, APS1017H, APS1020H, APS1023H, APS1040H, APS1088H, APS1420H,
CHE561H, CHE1434H,
MIE523H, MIE1505H, MIE1514H, MIE1715H, MIE1721H, MIE1723H, MIE1727H,
TEP1011H, TEP1026H, TEP1501H.

Emphasis: Advanced Soft Materials (MEng only)

MEng students must successfully complete any **four half courses (2.0 full-course equivalents [FCEs])** from the following list:

CHE562H, CHE1310H, CHE1333H, CHE1335H, CHE1475H, JTC1134H, JTC1135H,
MIE1705H, MIE1706H, MIE1707H, MIE1740H, MSE1032H.

Students may double-count one course at most towards any MSE emphasis, or towards any other emphasis in the Faculty.

Emphasis: Advanced Water Technologies (MEng only)

MEng students must successfully complete a total of **2.0 full-course equivalents (FCEs)** (four half courses). This includes at least one course (0.5 FCE) selected from the core course list. The remaining courses must be selected from the elective course list.

- Core courses (complete at least one):
  - CHE1150H *Industrial Water Technology*
  - CIV1308H *Physical and Chemical Treatment Processes*
  - CIV1309H *Biological Treatment Processes*

- CIV1311H *Advanced and Sustainable Drinking Water Treatment*

- Elective courses (complete remaining courses):
  - CHE565H *Aqueous Process Engineering*
  - CHE1213H *Corrosion*
  - CHE1430H *Hydrometallurgy Theory and Practice*
  - CIV541H *Environmental Biotechnology*
  - CIV549H *Groundwater Flow and Contamination*
  - CIV550H *Water Resources Engineering*
  - CIV1303H *Water Resources Systems Modeling*
  - CIV1319H *Chemistry and Analysis of Water and Wastes*
  - CIV1330H *Water, Sanitation, Hygiene, and Global Health*
  - CIV1399H *Special Studies in Civil Engineering* (e.g., Water Sanitation and Hygiene; Treatment Wetlands; the topic is subject to obtaining approval from the student's graduate unit)
  - CIV1499H *Special Studies in Civil Engineering* (e.g., Fundamentals of Acid Mine Drainage; the topic is subject to obtaining approval from the student's graduate unit).
  - JCC1313H *Environmental Microbiology*
  - JNC2503H *Environmental Pathways*
  - MIE1807H *Principles of Measurements*
  - STA1004H *Introduction to Experimental Design.*

Enrolment Contact

Enrolment in the emphasis is permitted at any time during the MEng program. After students are admitted to the normal MEng program, students may contact Prof. Ron Hofmann, (416) 946-7508.

Upon successful completion of the emphasis requirements and the successful completion of the MEng degree requirements, students will receive a transcript notation from the Faculty Graduate Studies office (subject to Prof. Hofmann's recommendation).

Emphasis: Analytics (MEng only)

To be admitted to the emphasis in Analytics, MEng students must first successfully complete a **prerequisite course APS1070H (0.5 full-course equivalent [FCE])**.

Subsequently, to earn the emphasis, students must successfully complete **four additional half courses (2.0 FCEs)** from the list of core courses or elective courses. These must include at least one core course; the remaining courses must be selected from the list of elective courses.

Students must have completed the prerequisite course APS1070H before taking any of the core courses.

Prerequisite Course

APS1070H *Foundations of Data Analytics and Machine Learning.*

Core Courses

CHE1147H *Data Mining in Engineering*
ECE1513H *Introduction to Machine Learning* (exclusions: CSC411H, CSC2515H, ECE421H, ECE521H, ECE1504H)
MIE1624H *Introduction to Data Science and Analytics*
MSE1065H *Application of Artificial Intelligence in Materials Design* (exclusion: MSE1063H).

Elective Courses

APS502H, APS1005H, APS1017H, APS1022H, APS1040H, APS1050H, APS1051H, APS1052H, APS1053H, APS1080H, CHE507H, CHE1108H, CHE1148H, CHE1434H, CIV1504H, CIV1506H, CIV1507H, CIV1532H, CIV1538H, ECE537H, ECE1504H (exclusions: CSC411H, CSC2515H, ECE421H, ECE521H, ECE1513H), ECE1505H, ECE1510H, CE1657H, ECE1778H, ECE1779H, MIE562H, MIE1413H, MIE1501H, MIE1512H, MIE1513H, MIE1517H, MIE1620H, MIE1621H, MIE1622H, MIE1623H, MIE1628H, MIE1653H, MIE1721H, MIE1723H, MIE1727H, MSE1063H (exclusion: MSE1065H).

Emphasis: Biomanufacturing (MEng only)

MEng students must successfully complete any **four half courses (2.0 full-course equivalents [FCEs])** from the following list:

CHE1123H, CHE1125H, CHE1133H, CHE1134H, CHE1135H, CHE1334H, CHE1471H,
JCC1313H,
JTC1331H,
BME1459H, BME1480H.

Students may double-count one course at most towards any MSE emphasis, or towards any other emphasis in the Faculty.

Emphasis: Engineering and Globalization (MEng only)

MEng students must successfully complete **four half courses (2.0 full-course equivalents [FCEs])** from the following lists, with at least two half courses (or one full course) taken from Group A.

Group A

APS510H, APS530H, APS1420H, JCR1000Y (full-year course).

Group B

APS1015H, APS1020H, APS1024H, CHL5700H, CIV1399H, JMG2020H.

Note: Students who choose to pursue an MEng project in their home department that aligns with the Centre for Global Engineering (CGEN)'s disciplinary focus, as deemed by the CGEN Director, may count the project as one required Group B course.

Students who complete the requirements of the emphasis in Engineering and Globalization and wish to obtain a notation on their transcript should contact the Faculty Graduate Studies office.

Emphasis: Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE) (MEng only)

MEng students must successfully complete **any four of the following courses (2.0 full-course equivalents [FCEs])**:

Leadership

TEP1010H, TEP1011H, TEP1026H, TEP1027H, TEP1029H, TEP1030H, TEP1501H, TEP1502H, TEP1601H.

Entrepreneurship and Innovation

APS1012H, APS1013H, APS1015H, APS1023H, APS1033H, APS1035H, APS1036H, APS1041H, APS1061H, APS1088H.

Finance and Management

AER1601H, APS502H, APS1001H, APS1004H, APS1005H, APS1009H, APS1016H, APS1017H, APS1020H, APS1022H, APS1028H, APS1032H, APS1038H, APS1039H, APS1040H, APS1043H, APS1049H, APS1050H, APS1051H, APS1052H.

Engineering and Society

APS510H, APS1018H, APS1024H, APS1025H, APS1031H, APS1034H, APS1101H, APS1420H.

Emphasis: Forensic Engineering (MEng only)

MEng students must successfully complete **four courses (one core course and three elective courses)**.

Core Course

MSE1031H *Forensic* Engineering.

Elective Courses

AER1604H,
APS1034H, APS1039H, APS1040H, APS1101H,
BME1480H, BME1800H, BME1801H, BME1802H,
CHE561H, CHE568H, CHE1213H, CHE1431H, CHE1432H, CHE1434H, CHE1436H,
CIV510H, CIV518H, CIV1163H, CIV1171H, CIV1174H, CIV1190H, CIV1201H, CIV1279H, CIV1282H, CIV1422H, CIV1429H,
JMB1050H,
JNC2503H,
MIE507H, MIE533H, MIE566H, MIE1301H, MIE1303H, MIE1411H, MIE1414H, MIE1616H, MIE1708H, MIE1713H, MIE1714H, MIE1721H, MIE1723H, MIE1727H, MIE1804H,
MSE1015H, MSE1016H, MSE1022H, MSE1032H, MSE1067H.

Emphasis: Sustainable Energy (MASc, MEng, PhD)

MASc and PhD students must successfully complete:

- At least **three half courses (1.5 full-course equivalents [FCEs])** from either of the following lists below.
- A **thesis** towards their degree on a topic related to sustainable energy. Topics must be approved by the steering committee of the Institute of Sustainable Energy. Contact: Mandeep Rayat.

MEng students must successfully complete:

- **Four half courses (2.0 FCEs)** from either of the following lists below, including at least one core course (0.5 FCE).

Core Courses

APS1032H *Introduction to Energy Project Management*
MIE515H *Alternative Energy Systems*
MIE1120H *Current Energy Infrastructure and Resources*.

Elective Courses

AER507H, AER1304H, AER1315H, AER1415H,
CHE568H, CHE1053H, CHE1118H, CHE1123H, CHE1142H, CHE1143H,
CIV575H, CIV576H, CIV577H, CIV1303H, CIV1307H,
ECE533H, ECE1030H, ECE1055H, ECE1057H, ECE1059H, ECE1085H, ECE1086H, ECE1092H, ECE1094H, ECE1476H,
MIE516H, MIE517H, MIE1128H, MIE1129H, MIE1130H, MIE1240H, MIE1241H, MIE1715H,
MSE1023H, MSE1028H, MSE1058H.

Students who complete the requirements of the emphasis in Sustainable Energy will receive a notation on their transcript from the Faculty Graduate Studies Office following a recommendation from the Institute of Sustainable Energy. Contact: Mandeep Rayat.

MSE: Materials Science and Engineering MASc, MEng, PhD Courses

A schedule is available on the MSE website at the beginning of the Fall session, listing the time and room location for each course offered in MSE in both the Fall and Winter sessions.

Not all courses are offered every year. Please consult the department for a listing of courses being offered this year.

All students wishing to undertake graduate research in the Department of Materials Science and Engineering must successfully complete a two-day intensive occupational health and safety training program which will normally take place during the week immediately preceding the commencement of graduate courses. More details concerning this course will be provided by the Coordinator of Graduate Studies once admission to a graduate program has been confirmed.

After the initial safety training, all students are required to pass refresher safety training annually.

Materials Science

MSE1000H[0]	Graduate Research Seminar MASc
MSE1004H	Extractive Metallurgy
MSE1015H	Mechanical Properties of Solids I
MSE1022H	Special Topics in Materials Science I
MSE1023H	Special Topics in Materials Science II
MSE1024H	Interface and Nanophase Engineering
MSE1026H	Analytical Electron Microscopy
MSE1028H	Advanced Materials Science
MSE1031H	Forensic Engineering
MSE1032H	Polymers and Composites Engineering (exclusion: MSE432H)
MSE1034H	Directed Readings in Materials Science and Engineering I
MSE1035H	Optical and Photonic Materials
MSE1036H	Application of Electrochemical Techniques in Materials Science
MSE1037H	Process Metallurgy of Iron and Steel
MSE1038H	Computational Materials Design
MSE1043H	Composite Materials Engineering (exclusion: MSE432H)
MSE1044H	Directed Readings in Materials Science and Engineering II
MSE1051H	Advanced Physical Properties of Structural Nanomaterials
MSE1058H	Nanotechnology in Alternate Energy Systems
MSE1061H	Engineered Ceramics
MSE1062H	Materials Physics
MSE1063H	Application of Artificial Intelligence in Process Metallurgy (prerequisites: basic knowledge of R and Python; exclusion: MSE1065H)
MSE1064H	Extraction, Production, and Processing of Aluminum
MSE1065H	Application of Artificial Intelligence in Materials Design (prerequisites: basic knowledge of R and Python and materials science; exclusion: MSE1063H)
MSE1066H	Practical Aspects of Electron Microscopy
MSE1067H	Damage and Failure of Advanced Engineering Materials (prerequisites: basic knowledge of materials science, mechanics of materials, and fracture mechanics)
MSE1068H	Additive Manufacturing of Metals, Ceramics, and Composites (prerequisites: basic knowledge of materials science, especially phase transformation and mechanical behaviour of materials)
MSE2000H[0]	Graduate Research Seminar PhD
MSE3000Y	MEng Project
APS1012H	Managing Business Innovation and Transformational Change
APS1043H	Writing Your Own Patent Application
JMB1050H	Biological and Bio-inspired Materials
JMZ1704H	Polymer Process Engineering
JTC1020H	Ceramics
JTC1135H	Applied Surface Chemistry

Mathematical Finance: Mathematical Finance MMF

Master of Mathematical Finance

Program Description

In the MMF program, students reshape their existing analytical abilities with the help of senior academics in mathematics, computer science, statistics, and engineering who have experience with the tools of mathematical finance. This cross-disciplinary approach develops graduates with a richer, more innovative approach to applied mathematics in real-world situations. Some of the faculty are seasoned practitioners from the financial industry while others are from leading firms in the financial software industry, developing applications around requirements like risk management, portfolio analysis, and the pricing of advanced derivatives.

The heart of the program is the four-month internship or campus project. Working on real financial projects, students learn to integrate and apply theoretical knowledge gained earlier in the program. In the internship, students team with employees of the sponsoring firm to experience how financial mathematics impacts the decision-making processes of a financial services organization.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the graduate unit's additional admission requirements stated below.
- Applicants must have an appropriate bachelor's degree in a quantitative, technical discipline with a minimum of a mid-B standing in the final two years.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction was not English must demonstrate proficiency in the English language through the successful completion of the Test of English as a Foreign Language (TOEFL) with minimum scores as follows:
  - paper-based TOEFL exam: 580 and 5 on the Test of Written English (TWE)
  - Internet-based TOEFL exam: 93/120 and 22/30 on the writing and speaking sections
- Applicants must also show evidence of strong mathematical ability. Appropriate workplace experience will be considered in lieu of formal education.
- Admission to the program is competitive. Those accepted into the program will normally have achieved a standing considerably higher than the minimum mid-B standing or have demonstrated exceptional ability through appropriate workplace experience.
- Applicants must satisfy the Admissions Committee of their ability to do rigorous quantitative analysis at an advanced level. The broad background required for this program makes it likely that many strong applicants will not possess all the background requirements. It is expected that applicants will have extra depth in certain areas and need to do additional work in others. Admission may be conditional upon the applicant's satisfactory completion of the required background material.

- Applicants should submit a written statement of approximately 300 words outlining their objectives for entering the program. Applicants should also explain how their background is appropriate. An interview may be required.
- Inquiries about part-time options for the program should be addressed to the Program Director.

Program Requirements

- The program of study begins in mid-August and includes a four-month internship during the second session. Students will be responsible for obtaining their own internship. In cases where the student is taking a leave of absence from an appropriate job, it is expected that the student will return to this job for the internship. In all cases, the Director must approve the placement.
- Students will proceed through the program as a group, following a common course of study. The course of study will be fully integrated and computer-laboratory intensive. Course projects and assignments will be designed to integrate the material learned from a variety of the courses and to utilize it in a practical context. Excellent communication and presentation skills will be emphasized in both the oral and written components of the projects.
- Students must complete all courses listed below.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

MMF1900Y	Internship (Credit/No Credit)
MMF1910H	Introduction to Financial Industry (Credit/ No Credit)
MMF1914H	Information Technology (Credit/No Credit)
MMF1915H	Introduction of Financial Products (Credit/ No Credit)
MMF1920H	Investment and Finance
MMF1921H	Operations Research
MMF1922H	Data Science Methods for Investment, Finance, and Risk Management
MMF1923H	Financial Markets and Corporate Policy
MMF1926H	Workshop in Mathematical Finance
MMF1927H	Workshop in Mathematical Finance
MMF1928H	Pricing Theory 1
MMF1929H	Asset Management
MMF1941H	Stochastic Analysis
MMF1943Y[0]	Communication
MMF2000H	Risk Management
MMF2012H	Financial Modelling
MMF2021H	Numerical Methods for Finance
MMF2025H	Risk Management Laboratory
MMF2028H	Blockchain Fundamentals for Finance
MMF2030H	Machine Learning for Finance
MMF2032H	Innovation and Entrepreneurship

[0] Course that may continue over a program. The course is graded when completed.

Mathematical Finance: Mathematical Finance MMF Courses

Courses are offered in modules. A module will consist of a four-week unit with a minimum of three contact hours per week, or its equivalent. A large portion of the learning for the module will take place outside of class through carefully designed computer projects and group study. The courses have been packaged in units of one, two, three, four, or five modules, and the course weight will be equal to the number of modules; for example, a course with three modules will have a weight of three credit hours. Six modules will be considered the equivalent of one full-course equivalent in a standard format. The third digit of the four-digit course number determines the course weight.

Third Digit Notation

1 = one-third of a half course
2 = two-thirds of a half course
3 = one half course
4 = two-thirds of a full course
5 = one full course

Mathematics: Mathematics MSc

Master of Science

Program Description

The MSc is a research-oriented program. Opportunities for graduate study and research are available in most of the main areas of pure and applied mathematics. There is a large selection of graduate courses and seminars, a diverse student body of domestic and international students, and yet classes are small and the ratio of graduate students to faculty is low.

Many recent graduates are engaged in university teaching, and a significant number hold administrative positions in universities or in the professional communities. Others are pursuing careers in industry (technological or financial) or in government.

The MSc program is offered:

- for students with a complete undergraduate background in mathematics:
  - 12 months full-time
  - 24 months part-time
- for students who do not have a complete undergraduate background in mathematics. This option is not available on a part-time basis:
  - 16 months full-time
  - 24 months full-time

Provisional admission to the PhD program may be granted at the time of admission to the master's program.

MSc Program (12-Month Full-Time and 24-Month Part-Time)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Mathematics' additional admission requirements stated below.
- Evidence of an excellent academic background and mathematical ability.

Program Requirements

- Students must complete the program in one of two ways:
  - 3.0 approved full-course equivalents (FCEs) and a supervised research project (MAT4000Y), or its equivalent, **or**
  - 2.0 approved FCEs and an acceptable thesis. Two approved half-year courses are considered the equivalent of a full-year course.
- With approval, two prerequisite undergraduate half courses can be substituted for 0.5 graduate FCE.
- Students may, with approval, take courses outside the department as part of a coherent program.
- Students who undertake the MSc part-time must, at a minimum, satisfy the requirements of the 12-month program.
- Students who plan to continue to the PhD program may select 2.0 FCEs in core courses from the approved list in the PhD program requirements section. Students who obtain a grade of A– or higher in each of the corresponding core courses may count coursework towards the PhD comprehensive examination requirement in the particular subject areas.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

MSc Program (16-Month Full-Time)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Mathematics' additional admission requirements stated below.
- Evidence of an excellent academic background and mathematical ability.
- Students who do not have a complete undergraduate background in mathematics may be accepted into the 16-month program. This possibility may interest students who have some background in a subject in which mathematics is applied and/or who are interested in industrial applications of mathematics.

Program Requirements

- Students must complete the program full-time in one of two ways:
  - 3.0 approved full-course equivalents (FCEs) and a supervised research project (MAT4000Y), or its equivalent, **or**
  - 2.0 approved FCEs and an acceptable thesis. Two approved half-year courses are considered the equivalent of a full-year course.
- Students must also complete an approved selection of prerequisites and other courses: an additional 2.0 FCEs in Year 2, 3, or 4 undergraduate courses in any of the following subjects: algebra, analysis, partial differential equations, probability, and topology.
- With approval, two prerequisite undergraduate half courses can be substituted for 0.5 graduate FCE.
- Students may, with approval, take courses outside the department as part of a coherent program.
- Students who plan to continue to the PhD program may select 2.0 FCEs in core courses from the approved list in the PhD program requirements section. Students who obtain a grade of A– or higher in each of the corresponding core courses may count coursework towards the PhD comprehensive examination requirement in the particular subject areas.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F)

Time Limit

3 years full-time

MSc Program (24-Month Full-Time)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Mathematics' additional admission requirements stated below.
- Evidence of an excellent academic background and mathematical ability.
- Students who do not have a complete undergraduate background in mathematics may be accepted into the 24-month program. This possibility may interest students who have some background in a subject in which mathematics is applied and/or who are interested in industrial applications of mathematics.

Program Requirements

- Students must complete the program full-time in one of two ways:
  - 3.0 approved full-course equivalents (FCEs) and a supervised research project (MAT4000Y), or its equivalent, **or**
  - 2.0 approved FCEs and an acceptable thesis. Two approved half-year courses are considered the equivalent of a full-year course.
- Students must also complete an approved selection of prerequisites and other courses: an additional 3.0 FCEs in Year 2, 3, or 4 undergraduate courses in any of the following subjects: algebra, analysis, partial differential equations, probability, and topology.
- With approval, two prerequisite undergraduate half courses can be substituted for 0.5 graduate FCE.
- Students may, with approval, take courses outside the department as part of a coherent program.
- Students who plan to continue to the PhD program may select 2.0 FCEs in core courses from the approved list in the PhD program requirements section. Students who obtain a grade of A– or higher in each of the corresponding core courses may count coursework towards the PhD comprehensive examination requirement in the particular subject areas.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Mathematics: Mathematics PhD

Doctor of Philosophy

Program Description

The PhD is a research-oriented program consisting of coursework, comprehensive examinations, and a thesis embodying the results of original research. Opportunities for graduate study and research are available in most of the main areas of pure and applied mathematics.

Applicants may enter the PhD program via one of two routes: 1) following completion of an appropriate MA or 2) direct entry following completion of a bachelor’s degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Mathematics' additional admission requirements stated below.

- A master's degree from a recognized university. Students must satisfy the department of their ability to do independent research at an advanced level. They must show evidence of an excellent academic background and mathematical ability.

Program Requirements

- **Coursework.** Students must successfully complete at least **3.0 full-course equivalents (FCEs)**. Out of the following 12 core courses, students must complete 6 courses.

Core Courses

MAT1000H	Real Analysis I
MAT1001H	Real Analysis II
MAT1002H	Complex Analysis
MAT1060H	Partial Differential Equations I
MAT1061H	Partial Differential Equations II
MAT1100H	Algebra I
MAT1101H	Algebra II
MAT1300H	Topology I
MAT1301H	Topology II
MAT1600H	Mathematical Probability I
MAT1601H	Mathematical Probability II
MAT1850H	Linear Algebra and Optimization

- **Comprehensive examinations.**
  - Students must pass comprehensive examinations in basic mathematics before beginning an area of research. These examinations are scheduled at the start of the Fall session (usually September) and should be taken no later than the start of the third session.
  - Students who obtain a grade of A– or higher in each of the corresponding core courses for the general areas of mathematics will be exempted from the comprehensive examination requirement in the specific area of study.
- Students must pass a **qualifying oral examination** or give a seminar presentation in their particular area of study before embarking on serious thesis research.
- The main requirement of the degree is an acceptable **thesis** embodying original research of a standard that warrants publication in the research literature.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Mathematics' additional admission requirements stated below.
- Exceptionally strong BSc students with a grade point average (GPA) of 3.7 or higher may apply for direct admission to the PhD program. Students must satisfy the department of their ability to do independent research at an advanced level. They must show evidence of an excellent academic background and mathematical ability.

Program Requirements

- **Coursework.** Students must complete at least **4.0 full-course equivalents (FCEs)**. Out of the following 12 core courses, students must complete 6 courses (3.0 FCEs). Students must also complete 1.0 elective FCE.

Core Courses

MAT1000H	Real Analysis I
MAT1001H	Real Analysis II
MAT1002H	Complex Analysis
MAT1060H	Partial Differential Equations I
MAT1061H	Partial Differential Equations II
MAT1100H	Algebra I
MAT1101H	Algebra II
MAT1300H	Topology I
MAT1301H	Topology II
MAT1600H	Mathematical Probability I
MAT1601H	Mathematical Probability II
MAT1850H	Linear Algebra and Optimization

- Students must complete MAT4000Y+ *Supervised Research Project* (1.0 FCE) or its equivalent.
- **Comprehensive examinations.**
  - Students must pass comprehensive examinations in basic mathematics before beginning an area of research. These examinations are scheduled at the start of the Fall session (usually September) and should be taken no later than the start of the third session.
  - Students who obtain a grade of A– or higher in each of the corresponding core courses for the general areas of mathematics will be exempted from the comprehensive examination requirement in the specific area of study.
- Students must pass a **qualifying oral examination** or give a seminar presentation in their particular area of study before embarking on serious thesis research.
- The main requirement of the degree is an acceptable **thesis** embodying original research of a standard that warrants publication in the research literature.

Program Length

5 years

Time Limit

7 years

Mathematics: Mathematics MSc, PhD Courses

Each year the department offers a selection of courses chosen from the following list, with the possibility of further additions. The courses MAT1000H, 1001H, 1100H, 1101H, 1300H, 1301H, 1600H, and 1601H will be offered each year; the complete list of courses is available from the department. In addition, it may be possible for a student to arrange to take one of the listed courses as an individual reading course. Students should consult the office of the coordinator at the beginning of the academic year.

PhD students are expected to attend and contribute to seminars in the research areas.

MAT1000H	Real Analysis I
MAT1001H	Real Analysis II
MAT1002H	Complex Analysis
MAT1004H	Theory of Approximation
MAT1005H	Fourier Analysis
MAT1006H	Topics in Real Analysis
MAT1007H	Topics in Complex Variables
MAT1008H	Functions of a Complex Variable
MAT1010H	Functional Analysis
MAT1011H	Introduction to Linear Operators
MAT1012H	Real Analysis II
MAT1013H	Theory of Several Complex Variables II
MAT1015H	Topics in Operator Theory
MAT1016Y	Topics in Operator Algebras
MAT1017H	Introduction to K-theory for Operator Algebras
MAT1034H	Topics in Harmonic Analysis
MAT1037H	Von Neumann Algebras
MAT1045H	Topics in Ergodic Theory
MAT1051H	Introduction to Ordinary Differential Equations
MAT1052H	Topics in Ordinary Differential Equations
MAT1060H	Partial Differential Equations I
MAT1061H	Partial Differential Equations II
MAT1062H	Topics in Partial Differential Equations I
MAT1100H	Algebra I
MAT1101H	Algebra II
MAT1103H	Topics in Algebra I
MAT1104H	Topics in Algebra II
MAT1105H	Topics in Representation Theory
MAT1109H	Classical Groups
MAT1110H	Algebraic Groups
MAT1120H	Lie Groups and Lie Algebras I
MAT1122H	Lie Groups and Representations I
MAT1126H	Lie Groups and Fluid Dynamics
MAT1128H	Topics in Probability
MAT1155H	Commutative Algebra
MAT1190H	Algebraic Geometry
MAT1191H	Topics in Algebraic Geometry
MAT1192H	Advanced Topics in Algebraic Geometry
MAT1196H	Representation Theory
MAT1197H	Automorphic Forms and Representation Theory I
MAT1198H	Automorphic Forms and Representation Theory II
MAT1199H	Automorphic Forms
MAT1200H	Algebraic Number Theory
MAT1202H	Analytic Number Theory
MAT1203H	Computational Aspects of Number Theory
MAT1210H	Topics in Number Theory
MAT1300H	Differential Topology
MAT1301H	Algebraic Topology
MAT1302H	Combinatorial Methods
MAT1303H	Combinatorial Designs
MAT1304H	Topics in Combinatorics
MAT1305H	Topics in Geometric Topology
MAT1306H	The Discrete Mathematics Toolkit
MAT1309H	Geometrical Inequalities
MAT1312H	Topics in Geometry
MAT1313Y	Seminar in Geometry
MAT1314H	Introduction to Noncommutative Geometry
MAT1318H	Seminar in Geometry and Topology

MAT1340H	Differential Topology
MAT1341H	Topics in Differential Geometry
MAT1342H	Introduction to Differential Geometry
MAT1343H	Riemannian Manifolds
MAT1344H	Symplectic Geometry
MAT1346H	Homotopy Theory
MAT1347H	Topics in Symplectic Geometry and Topology
MAT1351H	Topics in Homotopy Theory
MAT1355H	Singularity Theory
MAT1359H	Moduli Spaces of Flat Connections
MAT1360H	Complex Manifolds
MAT1392H	Algebra Seminar
MAT1399H	Advanced Point Set Topology
MAT1403H	Model Theory
MAT1404H	Introduction to Model Theory and Set Theory
MAT1430H	Set Theory
MAT1435H	Topics in Set Theory
MAT1436H	Large Cardinals, Structure Theory of Ideals, and Applications (prerequisites: MAT309H or MAT409H)
MAT1449H	Seminar in Foundations
MAT1498H	Communicating Mathematics to a General Audience (Credit/No Credit)
MAT1499H	Teaching Large Mathematics Courses (Credit/No Credit)

Applied Mathematics

MAT1500Y	Applied Analysis
MAT1502H	Topics in Geometric Analysis
MAT1507H	Asymptotic and Perturbation Methods
MAT1508H	Techniques of Applied Mathematics
MAT1509H	Mathematical and Computational Linguistics
MAT1520H	Wave Propagation
MAT1525H	Topics in Inverse Problems and Image Analysis
MAT1525Y	Inverse Problems of X-Ray and Radar Imaging
MAT1600H	Mathematical Probability I
MAT1601H	Mathematical Probability II
MAT1638H	Fluid Mechanics
MAT1639Y	Topics in Fluid Mechanics
MAT1700H	General Relativity
MAT1710H	Group Theory and Quantum Mechanics
MAT1722H	C* Algebras and Quantum Mechanics
MAT1723H	Foundations of Quantum Mechanics
MAT1724H	Functional Analysis in Quantum Mechanics
MAT1725Y	Scattering Theory
MAT1739H	Topics in Mathematical Physics
MAT1750H	Computational Mathematics
MAT1751H	Quantum Computing, Foundations to Frontier
MAT1760H	Computer Algebra
MAT1761H	Algorithms in Algebraic Geometry
MAT1800H	Methods of Applied Mathematics I
MAT1801H	Methods of Applied Mathematics II
MAT1839H	Integral Equation Methods for the Numerical Solution of PDEs
MAT1840H	Control Theory
MAT1841H	Mathematics of Massive Data Analysis: Fundamentals and Applications
MAT1845H	Dynamical Systems
MAT1847H	Holomorphic Dynamics
MAT1850H	Linear Algebra and Optimization
MAT1855H	Mathematical Problems in Economics
MAT1856H	Mathematical Finance
MAT1880H	Case Studies in Applied Mathematics

Individual Reading Courses

MAT1900Y	Readings in Pure Mathematics
MAT1901H	Readings in Pure Mathematics
MAT1902H	Readings in Pure Mathematics
MAT1950Y	Readings in Applied Mathematics
MAT1951H	Readings in Applied Mathematics
MAT2001H	Readings in Theoretical Mathematics I
MAT2002H	Readings in Theoretical Mathematics II

Seminars

MAT3001H	Seminar in Pure Mathematics (Credit/No Credit)
MAT3002H	Seminar in Applied Mathematics (Credit/No Credit)

Research Project

MAT4000Y+	Supervised Research Project

+ *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Mechanical and Industrial Engineering

MIE: Introduction

Faculty Affiliation

Applied Science and Engineering

Degree Programs

Mechanical and Industrial Engineering

MASc

- Emphases:
  - Robotics;
  - Sustainable Energy

MEng

- Emphases:
  - Advanced Manufacturing;
  - Advanced Soft Materials;
  - Analytics;
  - Biomanufacturing;
  - Engineering and Globalization;
  - Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE);
  - Forensic Engineering;
  - Robotics;
  - Sustainable Energy
- Dual Degree Program:
  - BEng (South China University of Technology) / MEng (University of Toronto)

PhD

- Emphases:
  - Robotics;
  - Sustainable Energy

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Biomedical Engineering
  - Mechanical and Industrial Engineering, MASc, PhD
- Engineering Education
  - Mechanical and Industrial Engineering, MASc, PhD
- Knowledge Media Design
  - Mechanical and Industrial Engineering, MASc, MEng, PhD
- Psychology and Engineering
  - Mechanical and Industrial Engineering, MASc, PhD
- Resuscitation Sciences (admissions have been administratively suspended)
  - Mechanical and Industrial Engineering, MASc, MEng, PhD

Overview

The Department of Mechanical and Industrial Engineering accepts qualified applicants for study in a wide range of topics, spanning the breadth of mechanical and industrial engineering, including advanced manufacturing and materials engineering; applied mechanics and design; biomedical engineering; energy and environmental engineering; robotics, mechatronics and instrumentation; thermal and fluid sciences engineering; human factors/ergonomics; information engineering; and operations research.

MIE: Mechanical and Industrial Engineering MASc

Master of Applied Science

Program Description

The MASc degree program provides students with an opportunity to pursue research-intensive advanced studies in a particular field of interest.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Mechanical and Industrial Engineering's additional admission requirement stated below.
- Evidence of research ability.

Program Requirements

- At the beginning of each student's program, a professor in the department will be identified as the supervisor who will guide the student in the research program and selection of courses.
- For students with an adequate undergraduate background, the program will normally consist of 2.0 full-course equivalents (FCEs) and a thesis.
- MASc students are required to participate in the non-credit seminar course JDE1000H during their first or second session of registration.
- In Year 1, MASc students are required to attend at least 70% of seminars that are part of the MIE Seminar Series. Students who complete the requirement will receive credit for SRM3333Y *MIE Seminar Series for MASc Students*.
- Students in the MASc program have the option of completing an emphasis in Robotics or Sustainable Energy as part of their degree program. Please see details in the Mechanical and Industrial Engineering MASc, MEng, PhD Emphases section.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

MIE: Mechanical and Industrial Engineering MEng

Master of Engineering

Program Description

The MEng degree program is designed for students preparing for advanced professional activity; it is not a research-oriented degree. The program may be taken on a full-time, extended full-time, or part-time basis.

Full-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Mechanical and Industrial Engineering's additional admission requirements stated below.
- A mid-B in the final two years of undergraduate study.

Program Requirements

- **5.0 full-course equivalents (FCEs) or 3.5 FCEs plus a supervised project.** A majority of the courses must be either offered by the Department of MIE or from a list (found on the department website) of approved courses deemed equivalent to an MIE course.
- Program completion is possible in three sessions (one year).
- Students in the MEng program have the option of completing an emphasis in Advanced Manufacturing; Analytics; Biomanufacturing; Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); Forensic Engineering; Robotics; or Sustainable Energy as part of their degree program. Please see details in the Mechanical and Industrial Engineering MASc, MEng, PhD Emphases section.

Program Length

3 sessions (typical registration sequence: F/W/S);

Time Limit

3 years

Extended Full-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Mechanical and Industrial Engineering's additional admission requirement stated below.
- A mid-B in the final two years of undergraduate study.

Program Requirements

- **5.0 full-course equivalents (FCEs) or 3.5 FCEs plus a supervised project.** A majority of the courses must be either offered by the Department of MIE or from a list (found on the department website) of approved courses deemed equivalent to an MIE course.
- Students are expected to complete the requirements in six sessions (two years) and are limited to seven half courses per year and three half courses per session.
- Students in the MEng program have the option of completing an emphasis in Advanced Manufacturing; Analytics; Biomanufacturing; Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); Forensic Engineering; Robotics; or Sustainable Energy as part of their degree program. Please see details in the Mechanical and Industrial Engineering MASc, MEng, PhD Emphases section.

Program Length

6 sessions (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years

Part-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Mechanical and Industrial Engineering's additional admission requirement stated below.
- A mid-B in the final two years of undergraduate study.

Program Requirements

- **5.0 full-course equivalents (FCEs) or 3.5 FCEs plus a supervised project.** A majority of the courses must be either offered by the Department of MIE or from a list (found on the department website) of approved courses deemed equivalent to an MIE course.

- Students are limited to four half courses per year and two half courses per session. Time to completion will be greater than two years.
- Students in the MEng program have the option of completing an emphasis in Advanced Manufacturing; Analytics; Biomanufacturing; Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); Forensic Engineering; Robotics; or Sustainable Energy as part of their degree program. Please see details in the Mechanical and Industrial Engineering MASc, MEng, PhD Emphases section.

Program Length

9 sessions

Time Limit

6 years

MIE: Mechanical and Industrial Engineering MEng (Dual Degree: BEng South China University of Technology) / MEng)

Dual Degree Program: Bachelor of Engineering (South China University of Technology) / Master of Engineering (University of Toronto)

Program Description

The MEng may also be taken as part of a dual degree involving the Bachelor of Engineering (BEng) program offered by the South China University of Technology's School of Mechanical and Automotive Engineering (SMAE) and the Master of Engineering program offered by the University of Toronto's Mechanical and Industrial Engineering (MIE) department. Dual degree program students complete the fourth year of their BEng as Visiting International Non-degree Students and receive a conditional offer to the MEng program. See the MEng requirements above.

Upon successful completion of the degree requirements of both programs, students receive a Bachelor of Engineering degree and a Master of Engineering degree.

Contact

Bachelor of Engineering Program
School of Mechanical and Automotive Engineering
South China University of Technology
Email: j2jw@scut.edu.cn

Master of Engineering Program
Department of Mechanical and Industrial Engineering
Faculty of Applied Science and Engineering, University of Toronto
Email: meng.admission@mie.utoronto.ca

Application Process

- This dual degree program allows outstanding third-year students at SMAE to apply to complete their fourth year of undergraduate studies enrolled in MIE as Visiting International Non-degree Students. These students receive a conditional offer of admission into the MEng program for their fifth year.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Mechanical and Industrial Engineering's additional admission requirements stated on the department's website.
- In Years 2 and 3 of the BEng program, a minimum 80% average (mid-B). In Year 4, students must maintain a minimum mid-B average until conferral of the BEng degree.

MIE: Mechanical and Industrial Engineering PhD

Doctor of Philosophy

The PhD degree program is for students anticipating a career in which they will be performing or directing research at the most advanced level.

Students may be admitted to the PhD program via one of three routes: 1) following completion of an appropriate master's degree; 2) transfer from the University of Toronto MASc program; or 3) direct entry following completion of a bachelor’s degree.

The Department of Mechanical and Industrial Engineering offers both full-time and flexible-time PhD program options. Applicants must declare the option for which they wish to apply; transfers between these programs are not permitted.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Mechanical and Industrial Engineering's additional admission requirements stated below.
- Admission to the PhD program is reserved for those who are able to present evidence of superior academic and research ability. Students may be admitted to the PhD program with an appropriate University of Toronto master's

degree or its equivalent from a recognized university with a minimum B+ average.

Program Requirements

- At the beginning of each student's program, a professor in the department will be identified as the supervisor and will guide the student in the research program and selection of courses.
- Minimum departmental standards in coursework: completion of **2.5 full-course equivalents (FCEs) plus a thesis**.
- Participation in the non-credit seminar course JDE1000H during the first or second session of registration.
- In Years 1 and 2, students must attend at least 70% of seminars that are part of the MIE Seminar Series. Students who complete this requirement will receive credit for SRD4444Y *MIE Seminar Series*.
- Students must pass a qualifying examination, annual progress meetings, and the SGS Doctoral Final Oral Examination.
- Students must present a research seminar during the final year of their studies.
- Students must be on campus full-time unless special permission is obtained for off-campus study.
- Students have the option of completing an emphasis in Robotics or Sustainable Energy as part of their degree program. Please see details in the Mechanical and Industrial Engineering MASc, MEng, PhD Emphases section.

Program Length

4 years

Time Limit

6 years

PhD Program (Transfer)

Transfer Requirements

- Admission to the PhD program is reserved for those who are able to present evidence of superior academic and research ability. Very strong MASc students may apply to transfer to the PhD program after completing only one year of the MASc program.

Program Requirements

- At the beginning of each student's program, a professor in the department will be identified as the supervisor and will guide the student in the research program and selection of courses.
- Minimum departmental standards in coursework: completion of **3.5 full-course equivalents (FCEs) plus a thesis**.
- Participation in the non-credit seminar course JDE1000H during the first or second session of registration.
- In Years 1 and 2, students must attend at least 70% of seminars that are part of the MIE Seminar Series. Students who complete this requirement will receive credit for SRD4444Y *MIE Seminar Series*.
- Students must pass a qualifying examination, annual progress meetings, and the SGS Doctoral Final Oral Examination.
- Students must present a research seminar during the final year of their studies.
- Students must be on campus full-time unless special permission is obtained for off-campus study.
- Students in the PhD program have the option of completing an emphasis in Robotics or Sustainable Energy as part of their degree program. Please see details in the Mechanical and Industrial Engineering MASc, MEng, PhD Emphases section.

Program Length

5 years

Time Limit

7 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Mechanical and Industrial Engineering's additional admission requirements stated below.
- Admission to the PhD program is reserved for those who are able to present evidence of superior academic and research ability. Exceptionally strong applicants with a bachelor's degree and an appropriate background may apply directly to the PhD program and may be admitted via direct entry. Applicants are advised to consult with the Graduate Coordinator before applying to ensure that they have the appropriate admission requirements for direct entry.

Program Requirements

- At the beginning of each student's program, a professor in the department will be identified as the supervisor and will guide the student in the research program and selection of courses.
- Minimum departmental standards in coursework: completion of **3.5 full-course equivalents (FCEs) plus a thesis**.
- Participation in the non-credit seminar course JDE1000H during the first or second session of registration.

- In Years 1 and 2, students must attend at least 70% of seminars that are part of the MIE Seminar Series. Students who complete this requirement will receive credit for SRD4444Y *MIE Seminar Series*.
- Students must pass a qualifying examination, annual progress meetings, and the SGS Doctoral Final Oral Examination.
- Students must present a research seminar during the final year of their studies.
- Students must be on campus full-time unless special permission is obtained for off-campus study.
- Students in the PhD program have the option of completing an emphasis in Robotics or Sustainable Energy as part of their degree program. Please see details in the Mechanical and Industrial Engineering MASc, MEng, PhD Emphases section.

Program Length

5 years

Time Limit

7 years

PhD Program (Flexible-Time)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Mechanical and Industrial Engineering's additional admission requirements stated below.
- Admission to a PhD program is reserved for those who are able to present evidence of superior academic and research ability. Students may be admitted to the PhD program with an appropriate University of Toronto master's degree or its equivalent from a recognized university with a minimum B+ average
- Applicants to the flexible-time PhD option are accepted under the same admission requirements as applicants to the full-time PhD option. However, in addition, applicants to the flexible-time PhD option must demonstrate that they are actively engaged in professional activities related to their proposed program of study.

Program Requirements

- At the beginning of each student's program, a professor in the department will be identified as the supervisor and will guide the student in the research program and selection of courses.
- Minimum departmental standards in coursework: completion of **2.5 full-course equivalents (FCEs) and a thesis**.
- Participation in the non-credit seminar course JDE1000H during their first or second session of registration.
- In Years 1 and 2, students must attend at least 70% of seminars that are part of the MIE Seminar Series. Students who complete this requirement will receive credit for SRD4444Y *MIE Seminar Series*. Students whose professional background is such that they would be deemed to have fulfilled this breadth requirement may be exempted upon consultation with the admissions committee.
- Students must pass a qualifying examination, annual progress meetings, and the SGS Doctoral Final Oral Examination.
- Students must present a research seminar during the final year of their studies.
- Students in the PhD program have the option of completing an emphasis in Robotics or Sustainable Energy as part of their degree program. Please see details in the Mechanical and Industrial Engineering MASc, MEng, PhD Emphases section.

Program Length

6 years

Time Limit

8 years

MIE: Mechanical and Industrial Engineering MASc, MEng, PhD Emphases

Emphasis: Advanced Manufacturing (MEng only)

MEng students must successfully complete:

- **Four half courses (2.0 full-course equivalents [FCEs])**, including at least one core course.
- Elective courses may include other core courses, and courses from either of two streams: Manufacturing Engineering and Manufacturing Management.

Core Courses

AER501H *Advanced Mechanics of Structures*
AER1403H *Advanced Aerospace Structures*
APS1028H *Operations and Production Management for Manufacturing and Services*
CHE1123H *Liquid Biofuels*
MIE519H *Advanced Manufacturing Technologies*
MIE1740H *Smart Materials and Structures*.

Elective Courses — Manufacturing Engineering

AER521H, AER 1415H,
CHE575H, CHE1134H, CHE1475H,
MIE506H, MIE540H, MIE1706H, MIE1713H, MIE1718H, MIE1743H,
MSE1013H, MSE1015H, MSE1028H, MSE1031H, MSE1058H, MSE1061H,
ROB501H.

Elective Courses — Manufacturing Management

APS1005H, APS1012H, APS1013H, APS1017H, APS1020H, APS1023H, APS1040H, APS1088H, APS1420H, CHE561H, CHE1434H, MIE523H, MIE1022H, MIE1505H, MIE1514H, MIE1715H, MIE1721H, MIE1723H, MIE1727H, TEP1011H, TEP1026H, TEP1501H.

Emphasis: Advanced Soft Materials (MEng only)

MEng students must successfully complete any **four half courses (2.0 full-course equivalents [FCEs])** from the following list:

CHE562H, CHE1310H, CHE1333H, CHE1335H, CHE1475H, JTC1134H, JTC1135H, MIE1705H, MIE1706H, MIE1707H, MIE1740H, MSE1032H.

Students may double-count one course at most towards any MIE emphasis, or towards any other emphasis in the Faculty.

Emphasis: Analytics (MEng only)

To be admitted to the emphasis in Analytics, MEng students must first successfully complete a **prerequisite course APS1070H (0.5 full-course equivalent [FCE])**.

Subsequently, to earn the emphasis, students must successfully complete **four additional half courses (2.0 FCEs)** from the list of core courses or elective courses. These must include at least one core course; the remaining courses must be selected from the list of elective courses.

Students must have completed the prerequisite course APS1070H before taking any of the core courses.

Prerequisite Course

APS1070H *Foundations of Data Analytics and Machine Learning*.

Core Courses

ECE1513H *Introduction to Machine Learning* (exclusions: CSC411H, CSC2515H, ECE421H, ECE521H, ECE1504H)
MIE1624H *Introduction to Data Science and Analytics*.

Elective Courses

APS502H, APS1005H, APS1017H, APS1022H, APS1040H, APS1050H, APS1051H, APS1052H, APS1080H, CHE507H, CHE1108H, CHE1147H, CHE1148H, CHE1434H, CIV1504H, CIV1506H, CIV1507H, CIV1532H, CIV1538H, ECE537H, ECE1504H (exclusions: CSC411H, CSC2515H, ECE421H, ECE521H, ECE1513H), ECE1505H, ECE1510H, ECE1657H, ECE1778H, ECE1779H, MIE562H, MIE1413H, MIE1501H, MIE1512H, MIE1513H, MIE1517H, MIE1620H, MIE1621H, MIE1622H, MIE1623H, MIE1628H, MIE1653H, MIE1721H, MIE1723H, MIE1727H.

Emphasis: Biomanufacturing (MEng only)

MEng students must successfully complete any **four half courses (2.0 full-course equivalents [FCEs])** from the following list:

CHE1123H, CHE1125H, CHE1133H, CHE1134H, CHE1135H, CHE1334H, CHE1471H, JCC1313H, JTC1331H, BME1459H, BME1480H.

Students may double-count one course at most towards any MIE emphasis, or towards any other emphasis in the Faculty.

Emphasis: Engineering and Globalization (MEng only)

MEng students must successfully complete **four half courses (2.0 full-course equivalents [FCEs])** from the following lists, with at least two half courses (or one full course) taken from Group A.

Group A

APS510H, APS530H, APS1420H, JCR1000Y (full-year course).

Group B

APS1015H, APS1020H, APS1024H, CHL5700H, CIV1399H, JMG2020H.

Note: Students who choose to pursue an MEng project in their home department that aligns with the Centre for Global Engineering (CGEN)'s disciplinary focus, as deemed by the CGEN Director, may count the project as one required Group B course.

Students who complete the requirements of the emphasis in Engineering and Globalization and wish to obtain a notation on their transcript should contact the Faculty Graduate Studies office.

Emphasis: Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE) (MEng only)

MEng students must successfully complete **any four of the following courses (2.0 full-course equivalents [FCEs])**:

Leadership

TEP1010H, TEP1011H, TEP1026H, TEP1027H, TEP1029H, TEP1030H, TEP1501H, TEP1502H, TEP1601H.

Entrepreneurship and Innovation

APS1012H, APS1013H, APS1015H, APS1023H, APS1033H, APS1035H, APS1036H, APS1041H, APS1061H, APS1088H.

Finance and Management

AER1601H, APS502H, APS1001H, APS1004H, APS1005H, APS1009H, APS1016H, APS1017H, APS1020H, APS1022H, APS1028H, APS1032H, APS1038H, APS1039H, APS1040H, APS1043H, APS1049H, APS1050H, APS1051H, APS1052H.

Engineering and Society

APS510H, APS1018H, APS1024H, APS1025H, APS1031H, APS1034H, APS1101H, APS1420H.

Emphasis: Forensic Engineering (MEng only)

MEng students must successfully complete **four courses (one core course and three elective courses)**.

Core Course

MSE1031H *Forensic Engineering*.

Elective Courses

AER1604H,
APS1034H, APS1039H, APS1040H, APS1101H,
BME1480H, BME1800H, BME1801H, BME1802H,
CHE561H, CHE568H, CHE1213H, CHE1431H, CHE1432H, CHE1434H, CHE1436H,
CIV510H, CIV518H, CIV1163H, CIV1171H, CIV1174H, CIV1190H, CIV1201H, CIV1279H, CIV1282H, CIV1422H, CIV1429H,
JMB1050H,
JNC2503H,
MIE507H, MIE533H, MIE566H, MIE1301H, MIE1303H, MIE1411H, MIE1414H, MIE1616H, MIE1708H, MIE1713H, MIE1714H, MIE1721H, MIE1723H, MIE1727H, MIE1804H,
MSE1015H, MSE1016H, MSE1022H, MSE1032H, MSE1067H.

Emphasis: Robotics (MASc, MEng, PhD)

Students must successfully complete **four courses (2.0 full-course equivalents [FCEs])** chosen from at least two of the following groups, and no more than two in any given group:

Group 1: Planning and Control

AER1516H, AER1517H,
ECE557H (exclusion: ECE410H), ECE1619H, ECE1635H, ECE1636H, ECE1647H, ECE1653H, ECE1657H,
MIE1064H, MIE1068H.

Group 2: Perception and Learning

AER1513H, AER1515H,
CSC2503H, CSC2506H, CSC2515H, CSC2541H, CSC2548H,
ECE516H, ECE521H, ECE1511H, ECE1512H,
JEB1433H,
ROB501H.

Group 3: Modelling and Dynamics

AER1503H, AER1512H, AER506H,
JEB1444H,
MIE1001H.

Group 4: Systems Design and Integration

AER525H (exclusion: ECE470H), AER1216H, AER1217H,
CSC2621H,
ECE470H (exclusion: AER525H),
MIE505H, MIE506H, MIE1070H, MIE1075H, MIE1076H, MIE1080H, MIE1809H,
ROB521H, ROB1514H.

Emphasis: Sustainable Energy (MASc, MEng, PhD)

MASc and PhD students must successfully complete:

- At least **three half courses (1.5 full-course equivalents [FCEs])** from either of the following lists below.
- A **thesis** towards their degree on a topic related to sustainable energy. Topics must be approved by the steering committee of the Institute of Sustainable Energy. Contact: Mandeep Rayat.

MEng students must successfully complete:

- **Four half courses (2.0 FCEs)** from either of the following lists below, including at least one core course (0.5 FCE).

Core Courses

APS1032H *Introduction to Energy Project Management*
MIE515H *Alternative Energy Systems*
MIE1120H *Current Energy Infrastructure and Resources*.

Elective Courses

AER507H, AER1304H, AER1315H, AER1415H,
CHE568H, CHE1053H, CHE1118H, CHE1123H, CHE1142H, CHE1143H,
CIV575H, CIV576H, CIV577H, CIV1303H, CIV1307H,
ECE533H, ECE1030H, ECE1055H, ECE1057H, ECE1059H,

ECE1085H, ECE1086H, ECE1092H, ECE1094H, ECE1476H, MIE516H, MIE517H, MIE1128H, MIE1129H, MIE1130H, MIE1240H, MIE1241H, MIE1715H, MSE1023H, MSE1028H, MSE1058H.

Students who complete the requirements of the emphasis in Sustainable Energy will receive a notation on their transcript from the Faculty Graduate Studies Office following a recommendation from the Institute of Sustainable Energy. Contact: Mandeep Rayat.

MIE: Mechanical and Industrial Engineering MASc, MEng, PhD Courses

See the departmental website for a schedule of available courses.

Fluid Mechanics

MIE520H	Biotransport Phenomena
MIE1201H	Advanced Fluid Mechanics I
MIE1206H	Non Newtonian Fluid Mechanics
MIE1207H	Structure of Turbulent Flows
MIE1208H	Microfluidic Biosensors (prerequisite: undergraduate-level fluidic mechanics)
MIE1210H	Computational Fluid Mechanics and Heat Transfer
MIE1212H	Convective Heat Transfer
MIE1214H	Applied Computational Fluid Dynamics (CFD)
MIE1222H	Multiphase Flows
MIE1224H	Heating, Ventilating, and Air Conditioning (HVAC)
MIE1232H	Microfluidics and Laboratory-on-a-Chip Systems
MIE1240H	Wind Power
MIE1241H	Energy Management
MIE1299H	Special Topics in Fluid Mechanics

Human Factors and Ergonomics

MIE542H	Human Factors Integration
MIE1401H	Human Factors Engineering
MIE1402H	Experimental Methods in Human Factors Research
MIE1403H	Analytical Methods in Human Factors Research
MIE1411H	Design of Work Places
MIE1412H	Human-Automation Interaction
MIE1413H	Statistical Models in Empirical Research
MIE1414H	Human Factors in Transportation
MIE1415H	Analysis and Design of Cognitive Work
MIE1444H	Engineering for Psychologists

Information Engineering

JMG2020H	Big Data
MIE1501H	Knowledge Modelling and Management
MIE1505H	Enterprise Modelling
MIE1510H	Formal Techniques in Ontology Engineering
MIE1512H	Data Analytics
MIE1513H	Decision Support Systems
MIE1514H	Systems Design and Engineering: A Product Perspective
MIE1516H	Structured Learning and Inference
MIE1517H	Introduction to Deep Learning (prerequisite: APS1070H or equivalent)

Mechanics and Materials

MIE517H	Fuel Cell System
MIE540H	Product Design
MIE1128H	Materials for Clean Energy Technologies
MIE1301H	Solid Mechanics
MIE1303H	Fracture Mechanics
MIE1359H	Engineering Cell Biology and Micro-Nanoengineered Platforms
MIE1705H	Thermoplastics Polymer Processing
MIE1706H	Manufacturing of Cellular and Microcellular Polymers
MIE1707H	Structure-Property Relationships of Thermoplastic and Composite Foams
MIE1708H	Collision Reconstruction
MIE1713H	Analysis and Design of Joints in Manufactured Products
MIE1715H	Life Cycle Engineering
MIE1720H	Creativity in Conceptual Design
MIE1724H	Additive Manufacturing in Engineering Applications

MIE1725H	Soft Materials and Machines
MIE1732H	Tribology
MIE1740H	Smart Materials and Structures
MIE1742H	Composite Materials Design
MIE1743H	Axiomatic Design Principles for Conceptual and Embodiment Design
MIE1744H	Nanomechanics of Materials
MIE1804H	The Finite Element Method in Mechanical Engineering
MIE1807H	Principles of Measurements

Mechatronics and Dynamics

MIE506H	MEMS Design and Microfabrication
MIE1001H	Advanced Dynamics
MIE1005H	Theory of Vibrations
MIE1010H	Acoustics and Noise Control
MIE1064H	Control Analysis Methods with Applications to Robotics
MIE1068H	Applied Nonlinear Control
MIE1070H	Intelligent Robots for Society
MIE1075H	AI Applications in Robotics (prerequisites: control systems, robotics, AI fundamentals)
MIE1076H	AI Applications in Robotics II (prerequisites: MIE1075H, control Systems, robotics, AI fundamentals)
MIE1077H	AI Applications in Robotics III (prerequisites: robotics, MIE1075H, MIE1076H, or equivalent)
MIE1080H	Introduction to Healthcare Robotics
MIE1452H	Signal Processing for Bioengineering
MIE1453H	Introduction to Sensors and Sensor Network
MIE1718H	Computer Integrated Manufacturing
MIE1766H	Aluminum Die Casting 2. — Product Design and Optimization
MIE1767H	Mechatronics in Automotive Applications 1
MIE1768H	Mechatronics in Automotive Applications 2 (prerequisite: MIE1767H)
MIE1809H	Advanced Mechatronics

Operations Research

MIE561H	Healthcare Systems
MIE562H	Scheduling
MIE566H	Decision Analysis
MIE1603H	Integer Programming
MIE1605H	Stochastic Processes
MIE1607H	Stochastic Modelling and Optimization
MIE1612H	Stochastic Programming and Robust Optimization (prerequisites: MIE262, APS1005H, or equivalent; and MIE231, APS106, or equivalent)
MIE1613H	Stochastic Simulation
MIE1615H	Markov Decision Processes
MIE1616H	Research Topics in Healthcare Engineering
MIE1619H	Constraint Programming and Hybrid Algorithms
MIE1620H	Linear Programming and Network Flows
MIE1621H	Non-Linear Optimization
MIE1622H	Computational Finance and Risk Management
MIE1623H	Introduction to Healthcare Engineering
MIE1624H	Introduction to Data Science and Analytics
MIE1628H	Big Data Science
MIE1653H	Integer Programming Applications
MIE1699H	Special Topics in Operations Research
MIE1714H	Failure Analysis
MIE1721H	Reliability
MIE1723H	Engineering Asset Management
MIE1727H	Quality Assurance I

Thermal Sciences

MIE515H	Alternative Energy Systems
MIE516H	Combustion and Fuels
MIE1101H	Advanced Classical Thermodynamics
MIE1107H	Statistical Thermodynamics
MIE1115H	Heat Transfer with Phase Change
MIE1118H	Partially Ionized Gases
MIE1120H	Current Energy Infrastructure and Resources
MIE1122H	Combustion Engine Processes
MIE1123H	Fundamentals of Combustion
MIE1127H	Engineering Applications of Waves
MIE1129H	Nuclear Engineering I: Reactor Physics and the Nuclear Fuel Cycle

MIE1130H	Nuclear Engineering II: Thermal and Mechanical Design of Nuclear Power Reactors
MIE1132H	Heat Exchanger Design
MIE1133H	Laser Applications in Engineering
MIE1801H	Advanced Engineering Analysis

APS Engineering Courses

APS1005H	Operations Research for Engineering Management
APS1012H	Managing Business Innovation and Transformational Change
APS1013H	Applying Innovation in Engineering and Business Operations
APS1015H	Social Entrepreneurship
APS1016H	Financial Management for Engineers
APS1017H	Supply Chain Management and Logistics
APS1022H	Financial Engineering 2
APS1023H	New Product Innovation
APS1028H	Operations and Production Management for Manufacturing and Services
APS1032H	Introduction to Energy Project Management
APS1034H	Making Sense of Accidents
APS1043H	Writing Your Own Patent Application
APS1049H	Management Consulting for Engineers
APS1050H	Blockchain Technologies and Cryptocurrencies
APS1051H	Portfolio Management Praxis Under Real Market Constraint
APS1052H	Artificial Intelligence in Finance: From Neural Networks to Deep Learning
APS1061H	Business Strategy and Intrapreneurship
APS1070H	Foundations of Data Analytics and Machine Learning
APS1101H	System Dynamic Risk Assessment (recommended prerequisite: APS1034H)
APS1801H	Multidisciplinary MEng Project
APS1802Y	Multidisciplinary MEng Project
APS1803Y	Multidisciplinary MEng Project
APS2000Y	Summer Engineering Practicum (Credit/No Credit)
TEP1203H	Teaching Engineering in Higher Education
TEP1204H	Instructional Design in Engineering Education

SCFI MEng Courses

MIE1750H	Innovation Management I
MIE1751H	Innovation Management II
MIE1752H	Innovation Finance and Economics
MIE1753H	Legal Framework for Innovation
MIE1754H	Laser Applications in Manufacturing
MIE1755H	CAE Technologies in Automotive Engineering
MIE1757H	Electric Motor Technologies in Automotive Engineering
MIE1758H	Polymers and Composites in Automotive Design and Manufacturing
MIE1759H	Polymers and Composites Processing in Automotive
MIE1760H	Metals in Automotive Design and Manufacturing
MIE1761H	Metal Forming Simulation
MIE1762H	Centrifugal and Positive Displacement Pumps I
MIE1763H	Hot Stamping 1. — Metallurgy, Materials, Thermomechanical Treatment, and Welding
MIE1764H	Hot Stamping 2. — Process and Product Performance Simulation and Optimization
MIE1765H	Aluminum Die Casting 1. — Metallurgy, Process Design, and Optimization

Reading Courses

MIE2002H	Readings in Industrial Engineering I (Credit/ No Credit)
MIE2003H	Readings in Industrial Engineering II (Credit/No Credit)
MIE2004H	Readings in Mechanical Engineering I (Credit/No Credit)
MIE2005H	Readings in Mechanical Engineering II (Credit/No Credit)

Seminar Courses

SRM3333Y	MIE Seminar Series for MASc Students
SRD4444Y	MIE Seminar Series for PhD Students

Project

MIE8888Y	MEng Research Project

Medical Biophysics

Medical Biophysics: Introduction

Faculty Affiliation

Medicine

Degree Programs

Medical Biophysics

MSc and PhD

Combined Degree Programs

- STG, MD / PhD

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Biomedical Engineering
  - Medical Biophysics, MSc, PhD
- Cardiovascular Sciences
  - Medical Biophysics, MSc, PhD
- Genome Biology and Bioinformatics
  - Medical Biophysics, PhD
- Neuroscience
  - Medical Biophysics, MSc, PhD

Overview

The Department of Medical Biophysics is an interdisciplinary graduate department dedicated to fundamental and translational research in biomedicine, with a particular focus on cancer. Research is carried out in the extensive facilities provided in the Princess Margaret Cancer Centre, Sunnybrook Research Institute, and the Hospital for Sick Kids Research Institute, as well as at other hospital locations.

The department accepts students in the biological and life sciences as well as in physics, engineering, and the mathematical sciences. It offers opportunities for research addressing fundamental problems in medical science: projects which cut across the conventional boundaries of biology, physics, engineering, chemistry, and medicine are encouraged. The department focuses on basic and applied research related to cancer, but also addresses neuroscience and cardiovascular medicine. Medical Biophysics research themes include biomedical imaging, cancer diagnosis and therapy, cancer mechanisms and models, cardiovascular sciences, data science and computational biology, image-guided therapy and device development, neuroscience, stem cells and regenerative medicine, and structural biology. For detailed information, please visit the departmental website.

Wang, Bo - BS, MS, PhD
Weersink, Robert - BSc, PhD

Medical Biophysics: Medical Biophysics MSc

Master of Science

Program Description

The objective of the MSc program is for students to acquire written and oral scholarly research skills in Medical Biophysics. Students carry out a research project (which is usually laboratory-based), prepare a research thesis, take graduate-level courses, and attend and participate in research seminars. Students select from a flexible, modular curriculum and participate in department-wide Medical Biophysics Graduate Student Seminars which develop skills in cross-disciplinary communication.

All MSc students carry out a thesis project in a laboratory that they select by means of a rotations program on entry to the department. Through this project they acquire knowledge in the design of experiments and in the interpretation and critical analysis of research findings. Students submit a thesis that reports critically on their research and pass an oral examination. They are guided by a supervisory committee through which they have access to the wide range of expertise in our faculty.

Students participate in student symposium, invited lecture series, and research seminars throughout their program. They are encouraged to reclassify (transfer) into the PhD program through an examination during Year 2, taken about 20 months after entry.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Medical Biophysics' additional admission requirements stated below.
- Applicants from diverse academic backgrounds are encouraged to apply.

Program Requirements

- **Coursework.** Students must complete a total of **2.5 full-course equivalents (FCEs)** as follows:
  - MBP1015Y[0] *Biophysics Seminar* (1.0 FCE). Note that students must attend this continuous course until their degree program is completed.
  - MBP1200H *Scientific Exposition and Ethics* (0.25 FCE).
  - MBP1201H *Biostatistics* (0.25 FCE).
  - One of the following two options:
    - a biology-stream module (0.25 FCE) or
    - a graduate course (0.25 FCE) chosen in consultation with the department that provides a foundation in biology.
  - The balance of 0.75 FCE is chosen from any of the other course modules; or (with departmental approval) graduate courses in another department.
  - Modules are taken within courses. See the course list below.
- Successful completion of an **oral examination** of the student's research thesis.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Medical Biophysics: Medical Biophysics PhD

Doctor of Philosophy

Program Description

The objective of the PhD program is to prepare students for a career in biomedical research. It is designed to provide both a broad knowledge of biomedical science and advanced training in basic research at a subspecialty level. Thesis work may address fundamental and/or translational problems in the biology, diagnosis, and therapy of cancer, as well as areas of neuroscience and cardiovascular medicine. By the end of the program, graduates will have acquired the ability to conduct independent theoretical and/or experimental research which makes an original contribution to the field, prepare publications, and give public presentations of their work at national and international venues.

These objectives are met through a combination of coursework, teaching, and research seminars, mentored laboratory research, and preparation of manuscripts for publication. Graduates may attain professorial positions in academic research and teaching institutions, hospital laboratories, and in the medical device, pharmaceutical, and biomedical science and information industries, including startup companies which they have founded.

Applicants may enter the PhD program via one of three routes: 1) following completion of an MSc degree into the four-year full-time program; 2) transfer from the University of Toronto MSc program; or 3) direct entry following completion of a BSc degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Medical Biophysics' additional admission requirements stated below.
- Applicants may be admitted following completion of an MSc degree program in biological, physical, chemical, or medical sciences from a recognized Canadian university or equivalent.
- Admission to the PhD program is highly selective and attainment of minimum admission requirements does not guarantee acceptance.

Program Requirements

- All students, regardless of entry option, complete the same program requirements.
- Considering the broad range of topics available for thesis research and the different backgrounds of students admitted, each student, in consultation with their supervisor, will plan a program of study that provides the appropriate background for the area of investigation.
- All PhD students will participate in MBP1015Y[0] *Biophysics Seminar* regardless of whether or not they have previously received credit for it.
- Students who transfer/reclassify into the doctoral program will receive credit for all courses taken during their MSc program in Medical Biophysics.
- Except by special arrangement, students are required to attend the research institute or campus laboratory and participate full-time until all program requirements are completed.
- **Coursework.** Students must complete a total of **3.5 full-course equivalents (FCEs)** as follows:
  - MBP1015Y[0] *Biophysics Seminar* (1.0 FCE). Note that this is a continuous course which students must attend until their degree is completed.
  - MBP1200H *Scientific Exposition and Ethics* (0.25 FCE).
  - MBP1201H *Biostatistics* (0.25 FCE).
  - One of the following two options:
    - a biology-stream module (0.25 FCE) or
    - a graduate course (0.25 FCE) chosen in consultation with the department that provides a foundation in biology.

    - The balance of 1.75 FCE is chosen from any of the other course modules; or (with departmental approval) graduate courses in another department.
- Students must complete all required coursework by the end of Year 3 in order to achieve candidacy. Upon achieving candidacy, completion is noted on the student's transcript.
- Students must take a **PhD Qualifying Examination** in Year 2.
- Successful completion of a **Doctoral Final Oral Examination** of the student's research thesis.

Program Length

4 years full-time

Time Limit

6 years full-time

[0] Course that may continue over a program. The course is graded when completed.

PhD Program (Transfer)

Transfer Requirements

- Applicants may be accepted into the PhD program via transfer from the University of Toronto Medical Biophysics MSc program with an A– average and by successfully defending a research proposal during a reclassification oral examination within 20 months in the program.

Program Requirements

- All PhD students will participate in MBP1015Y[0] *Biophysics Seminar* regardless of whether or not they have previously received credit for it.
- Students who transfer/reclassify into the doctoral program will receive credit for all courses taken during their MSc program in Medical Biophysics. See the course requirements above for the PhD program. Students must have an A– average in these courses.
- Students will defend a research thesis at the **Doctoral Final Oral Examination** conducted by Medical Biophysics and the School of Graduate Studies.
- Except by special arrangement, students must attend the research institute or campus laboratory and participate full-time until all program requirements are completed.
- **Coursework.** Students must complete a total of **3.5 full-course equivalents (FCEs)** as follows:
    - MBP1015Y[0] *Biophysics Seminar* (1.0 FCE). Note that this is a continuous course which students must attend until their degree is completed.
    - MBP1200H *Scientific Exposition and Ethics* (0.25 FCE).
    - MBP1201H *Biostatistics* (0.25 FCE).
    - One of the following two options:
        - a biology-stream module (0.25 FCE) or
        - a graduate course (0.25 FCE) chosen in consultation with the department that provides a foundation in biology.
    - The balance of 1.75 FCE is chosen from any of the other course modules; or (with departmental approval) graduate courses in another department.
    - Students must complete all required coursework by the end of Year 4 in order to achieve candidacy. Upon achieving candidacy, completion is noted on the student's transcript.
- Successful completion of a **Doctoral Final Oral Examination** of the student's research thesis.

Program Length

5 years

Time Limit

7 years

[0] Course that may continue over a program. The course is graded when completed.

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Medical Biophysics' additional admission requirements stated below.
- Outstanding students may be admitted directly to the PhD program following completion of a BSc degree with an A– average in biological, physical, chemical, or medical sciences from a recognized Canadian university or equivalent.
- Applicants holding bachelor’s degrees from non-Canadian universities must provide Graduate Record Examination scores (General and Subject) with their application.
- Admission to the PhD program is highly selective and attainment of minimum admission requirements does not guarantee acceptance.

Program Requirements

- Students must successfully defend a research proposal during a qualifying oral examination within 18 months of entry into the program.
- Students will defend a research thesis at the **Doctoral Final Oral Examination** conducted by the Department of Medical Biophysics and the School of Graduate Studies.
- Except by special arrangement, students must attend the research institute or campus laboratory and participate full-time until all program requirements are completed.
- **Coursework.** Students must complete a total of **3.5 full-course equivalents (FCEs)** as follows:
    - MBP1015Y[0] *Biophysics Seminar* (1.0 FCE). Note that this is a continuous course which students must attend until their degree is completed.
    - MBP1200H *Scientific Exposition and Ethic*s (0.25 FCE).
    - MBP1201H *Biostatistics* (0.25 FCE).
- One of the following two options:

        - a biology-stream module (0.25 FCE) or
        - a graduate course (0.25 FCE) chosen in consultation with the department that provides a foundation in biology.
    - The balance of 1.75 FCE is chosen from any of the other course modules; or (with departmental approval) graduate courses in another department.
    - Students must complete all required coursework by the end of Year 4 in order to achieve candidacy. Upon achieving candidacy, completion is noted on the student's transcript.
- Students must take a **PhD Qualifying Examination** in Year 2.
- Successful completion of a **Doctoral Final Oral Examination** of the student's research thesis.

Program Length

5 years

Time Limit

7 years

[0] Course that may continue over a program. The course is graded when completed.

Medical Biophysics: Medical Biophysics MSc, PhD Courses

Each September the department publishes a list of specific modules available to students during the following two academic years. Please consult with the department.

MBP1015Y[0] (1.0 FCE)	Biophysics Seminar
MBP1200H (0.25 FCE)	Scientific Exposition and Ethics
MBP1201H (0.25 FCE)	Biostatistics
MBP1300H (0.25 FCE)	Quantitative Cancer Genomics
MBP1301H (0.5 FCE)	Radiation Oncology: Clinical and Experimental Radiobiology
MBP1302H (0.25 FCE)	Structural Biology and Proteomics
MBP1303H (0.25 FCE)	Cell Signaling and Metabolism
MBP1304H (0.25 FCE)	Predictive Oncology and Therapeutics
MBP1305H (0.25 FCE)	Experimental Models for Cancer Research
MBP1306H (0.25 FCE)	Cancer Epigenetics
MBP1307H (0.25 FCE)	Development, Stem Cells, and Cancer
MBP1308H (0.25 FCE)	Radiation Biology and DNA Repair
MBP1309H (0.25 FCE)	Clinical Imaging for Physical Scientists
MBP1310H (0.25 FCE)	Cancer Immunotherapy
MBP1311H (0.25 FCE)	Tumour Microenvironment
MBP1400H (0.25 FCE)	Advanced Magnetic Resonance Imaging
MBP1401H (0.25 FCE)	Advanced Ultrasound
MBP1402H (0.25 FCE)	Biological Imaging
MBP1403H (0.25 FCE)	Biophysics of Focused Ultrasound, Thermal Biophysics
MBP1404H (0.25 FCE)	Cell and Molecular Biology for Physicists – Introduction
MBP1405H (0.25 FCE)	Introduction to Bio-Microscopies
MBP1406H (0.25 FCE)	Introduction to Biophotonics
MBP1407H (0.25 FCE)	Magnetic Resonance Imaging – Overview
MBP1408H (0.25 FCE)	Medical Device Commercialization Essentials
MBP1409H (0.25 FCE)	Medical Device Innovation and Entrepreneurship
MBP1410H (0.25 FCE)	Nanotechnology for Medicine
MBP1411H (0.25 FCE)	Overview of Medical Imaging
MBP1412H (0.25 FCE)	Ultrasound – Overview
MBP1413H (0.25 FCE)	Advanced Biostatistics
MBP1414H (0.25 FCE)	Reading Special Topics

[0] Course that may continue over a program. The course is graded when completed.

  - Biomedical Science;
  - Clinical Science;
  - Health Professions Education;
  - Population Health/Health Services;
  - Radiation Oncology

Combined Degree Programs

- STG, MD / PhD

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Addiction Studies
  - Medical Science, MSc, PhD
- Aging, Palliative and Supportive Care Across the Life Course
  - Medical Science, MSc, PhD
- Bioethics
  - Medical Science, MSc, PhD
- Biomedical Engineering
  - Medical Science, MSc, PhD
- Cardiovascular Sciences
  - Medical Science, MSc, PhD
- Developmental Biology
  - Medical Science, MSc, PhD
- Environment and Health
  - Medical Science, MSc, PhD
- Genome Biology and Bioinformatics
  - Medical Science, PhD
- Global Health (U of T Global Scholar)
  - Medical Science, PhD
- Health Services and Policy Research
  - Medical Science, MSc, PhD
- Indigenous Health
  - Medical Science, MSc, PhD
- Knowledge Media Design
  - Medical Science, MSc, PhD
- Musculoskeletal Sciences
  - Medical Science, MSc, PhD
- Neuroscience
  - Medical Science, MSc, PhD
- Resuscitation Sciences (admissions have been administratively suspended)
  - Medical Science, MSc, PhD
- Toxicology
  - Medical Science, MSc, PhD
- Women's Health
  - Medical Science, MSc, PhD

Diploma Programs

Graduate Diploma in Health Research

GDipHR

Overview

With over 600 faculty and 550 students, the Institute of Medical Science (IMS) was established to foster education and scholarship in the Clinical Departments of the Faculty of Medicine. IMS specializes in translational research with a strong emphasis on bench-to-bedside clinical applications. Degree candidates have the opportunity to conduct research in one of four training areas: bio-medical science; clinical science; health systems and services; and population health. Graduates have been appointed to positions as academics and health-care professionals in universities, government, and industry.

Medical Science: Biomedical Communications MScBMC

Master of Science in Biomedical Communications

Program Description

The MScBMC is a two-year, course-based professional graduate program that prepares students for careers in the visual communication of science, medicine, and health. Students in this interdisciplinary program explore the use of images, interactive technologies, and animation/simulation to effectively communicate complex science and health topics to a range of audiences.

The program offers two fields: Biomedical Media Design and Biomedical Visualization Design. Students take the same courses in Year 1 and then choose their field at the start of the Summer session between Year 1 and Year 2.

Field: Biomedical Media Design

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Institute of Medical Science's additional admission requirements stated below.
- Graduation from a recognized university with an appropriate four-year bachelor's degree that includes a variety of courses in the arts, sciences, and humanities.
- Minimum mid-B standing in the final two years of undergraduate study. Prerequisite courses: English (or an effective writing substitute); a humanities or social science course; biology; cell and molecular biology and/or histology; introductory physiology.
- At least one third- or fourth-year undergraduate course, or graduate course, from one or more of the following subject areas: Biochemistry, Cell Biology, Embryology, Genetics, Histology, Immunology, Molecular Biology, Pharmacology, or Physiology.
- A high-quality portfolio of visual material; consult the MScBMC website for guidance.

Program Requirements

- **Coursework.** Students must complete **8.5 full-course equivalents (FCEs)** including:
  - in Year 1, complete 5.0 FCEs: MSC1001Y, MSC2001Y, MSC2003Y, MSC2004H, MSC2009H, MSC2020H, and MSC2023H
  - in Year 2, complete 1.5 FCEs: MSC2002H, MSC2012H, and MSC2018H+
  - complete at least 1.0 FCE chosen from MSC2006H, MSC2008H, MSC2015H, and MSC2016H
  - complete 1.0 FCE chosen from MSC2007H, MSC2011H, MSC2013Y, MSC2014H, and MSC2022H (or any other appropriate graduate course[s]).

- Students must complete MSC2025Y ***Master's Research Project for BMC***.

Program Length

6 sessions (2 years) full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Field: Biomedical Visualization Design

Minimum Admission Requirements

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Medical Science: Biomedical Communications MScBMC Courses

Consult the department each session regarding course offerings.

Required Courses

MSC1001Y	Human Anatomy
MSC2001Y	Visual Representation of Medical Knowledge
MSC2002H	Sequential Medical Communication
MSC2003Y	Biomedical Communications Technologies
MSC2004H	Research Methods
MSC2009H	Ethics and Professionalism in Biomedical Communications
MSC2012H	Neuroanatomy for Visual Communication
MSC2018H[+]	Visual Representation of Processes in Human Pathology
MSC2020H	Visual Representation of Biomolecular Structure and Function
MSC2023H	Information Visualization (prerequisite: MSC1001Y; exclusion: MSC2019H)
MSC2025Y	Master's Research Project for BMC

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Elective Courses

Students are encouraged to take at least one of their electives in a graduate program other than Biomedical Communications.

MSC2005H	Evolution of Medical Illustration
MSC2006H	Advanced Media Design Technologies
MSC2007H	Visual Synthesis of Medical/Scientific Process
MSC2008H	Community-Centred Design Research
MSC2011H	Special Topics in Biomedical Communications
MSC2013Y	Master's Research Project and Paper

MSC2014H	Fundamentals of Scripting for Health Science Communication
MSC2015H	Interpretive Visualization: Cinematic Design and Preproduction
MSC2016H	Visualization Methods
MSC2017H	Visualization Technology
MSC2022H	Graphic Medicine Seminar

Medical Science: Medical Science MSc

Master of Science

Program Description

The MSc program is available in a wide range of basic sciences, clinical sciences, and population health research. Under the mentorship of a faculty member, a student receives specialized training and exposure to Toronto's finest multidisciplinary research. Students conduct research in one of six fields: Bioethics; Biomedical Science; Clinical Science; Health Professions Education; Population Health/Health Services; and Radiation Oncology.

The program emphasizes hands-on research, rather than coursework. Faculty conduct research in the following areas: cardiovascular sciences, bioethics, neuroscience, membrane biology, respiratory medicine, and psychosomatic medicine. The Institute of Medical Science (IMS) is the graduate unit of choice for undergraduates and MDs seeking training as clinician investigators, and graduates may seek positions as academics and health-care professionals in universities, government, and industry. The IMS participates in the Royal College of Physicians and Surgeons Clinical Investigator Program (CIP).

Students will complete the program in two years over six sessions.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Institute of Medical Science's additional admission requirements stated below.
- An appropriate BSc or an MD degree from a recognized university and academic credentials and background preparation appropriate to the field of study. Qualified university graduates with a professional health science degree (e.g., MD, BScN) or an undergraduate arts and science degree of appropriate background who wish to pursue graduate studies in basic or clinical biomedical sciences are encouraged to apply.
- Applicants lacking adequate background in biological, natural, or social sciences may be required to take undergraduate or graduate courses considered necessary to provide a proper basis for their research.
- A– (80%) average in the final year of undergraduate study and an A– cumulative average over three of the four total years of study.
- Applicants whose primary language is not English, and who graduated from a university where the language of instruction was not English, must demonstrate proficiency in the **English language** through the successful completion of one of the following English language proficiency tests:
  - **Test of English as a Foreign Language (TOEFL):**
    - a minimum score of 600 on the paper-based test and 5 on the Test of Written English (TWE); or
    - a minimum score of 100 on the Internet-based test and 25 on the writing and speaking sections.
  - **International English Language Testing System (IELTS):** minimum score of 7.5 with 6.5 in each component.
  - **Certificate of Proficiency in English (COPE):** minimum total of 86 with a minimum writing score of 32, reading score of 22, and listening score of 22. Test of Oral Proficiency assessment band = 7.

Program Requirements

- **Coursework.** Students must complete a minimum of **2.0 graduate full-course equivalent (FCEs)** as follows:
  - 0.5 FCE: MSC1010H[0] *MSc Student Seminars in Translational Research* (Credit/No Credit).
  - 0.5 FCE: MSC modular courses (two courses worth 0.25 FCE each; Credit/No Credit).
  - 1.0 elective FCE.
- A **research thesis** and **oral thesis examination**.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

[0] Course that may continue over a program. Credit is given when the course is completed.

Medical Science: Medical Science PhD

Doctor of Philosophy

Program Description

The PhD program is available in a wide range of basic sciences, clinical sciences, and population health research. Under the mentorship of a faculty member, a student receives specialized training and exposure to Toronto's finest multidisciplinary research. Students conduct research in one of six fields: Bioethics; Biomedical Science; Clinical Science; Health Professions Education; Population Health/Health Services; and Radiation Oncology.

The program emphasizes hands-on research, rather than coursework. Faculty conduct research in the following areas: cardiovascular sciences, bioethics, neuroscience, membrane

biology, respiratory medicine, and psychosomatic medicine. The Institute of Medical Science (IMS) is the graduate unit of choice for undergraduates and MDs seeking training as clinician investigators, and graduates may seek positions as academics and health-care professionals in universities, government, and industry. The IMS participates in the Royal College of Physicians and Surgeons Clinical Investigator Program (CIP).

Applicants may enter the PhD program via one of three routes: 1) following completion of a two-year MSc degree with a defended MSc thesis; 2) transfer from the IMS MSc program; or 3) direct entry following completion of an appropriate BSc or MD degree.

Completion of the PhD may take longer than the program length indicated below.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Institute of Medical Science's additional admission requirements stated below.
- Applicants whose primary language is not English, and who graduated from a university where the language of instruction and examination was not English, must demonstrate facility in the English language through the successful completion of one of the following English-language proficiency tests:
  - Test of English as a Foreign Language (TOEFL):
    - a minimum score of 600 on the paper-based test and 5 on the Test of Written English (TWE); or
    - a minimum score of 100 on the Internet-based test and 25 on the writing and speaking sections.
  - International English Language Testing System (IELTS): minimum score of 7.5 with 6.5 in each component.
  - Certificate of Proficiency in English (COPE): minimum total score of 86 with minimum writing score of 32, reading score of 22, and listening score of 22. Test of Oral Proficiency assessment band = 7.
- Applicants may be accepted into the PhD program after completing a two-year MSc degree (with a defended MSc thesis) with at least an A– standing from a recognized university.

Program Requirements

- Coursework. Students must complete a minimum of **2.0 graduate full-course equivalents (FCEs)** as follows:
  - 0.5 FCE: MSC1011H[0] *PhD Student Seminars in Translational Research* (Credit/No Credit).
  - 0.5 FCE: MSC modular courses (two courses worth 0.25 FCE each; Credit/No Credit).
  - 1.0 elective FCE.
  - Students may be required to take extra courses in addition to the degree requirements.
- A **research thesis** must be submitted and the student must pass an **departmental examination** before proceeding to the **Doctoral Final Oral Examination** conducted by the School of Graduate Studies.
- At the end of Year 3, students must have completed all program requirements exclusive of the thesis research in order to achieve candidacy.

Program Length

4 years

Time Limit

6 years

[0] Course that may continue over a program. The course is graded when completed.

PhD Program (Transfer)

Transfer Requirements

- Applicants may be accepted into the PhD program via transfer from the University of Toronto MSc program. Outstanding students may be considered for reclassification/transfer into the PhD program without writing an MSc thesis.

Program Requirements

- Students must complete **3.0 graduate full-course equivalents (FCEs)** as follows:
  - 0.5 FCE: MSC1010H[0] *MSc Student Seminars in Translational Research* (Credit/No Credit).
  - 0.5 FCE: MSC modular courses (two courses worth 0.25 FCE each; Credit/No Credit).
  - 1.0 elective FCE with a minimum A– average.
  - If recommended by the Program Advisory Committee, the student will be evaluated in an **oral transfer examination** within 18 to 21 months of initial graduate registration. Alternatively, the Exam Committee may decide that the student must complete the MSc degree before being considered for admission to the PhD program.
  - The successful applicant will enter the PhD program and complete:
    - 0.5 FCE: MSC1011H[0] *PhD Student Seminars in Translational Research* (Credit/No Credit) if credit for MSC1010H has not been obtained prior to transfer.
    - 1.0 elective FCE.
- A **research thesis** must be submitted and the student must pass an **internal examination** before proceeding to the **Doctoral Final Oral Examination** conducted by the School of Graduate Studies.
- At the end of Year 3, students must have completed all program requirements exclusive of the thesis research in order to achieve candidacy.

Program Length

5 years

Time Limit

7 years

[0] Course that may continue over a program. The course is graded when completed.

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Institute of Medical Science's additional admission requirements stated below.
- Applicants whose primary language is not English, and who graduated from a university where the language of instruction and examination was not English, must demonstrate facility in the English language through the successful completion of one of the following English-language proficiency tests:
  - Test of English as a Foreign Language (TOEFL):
    - a minimum score of 600 on the paper-based test and 5 on the Test of Written English (TWE); or
    - a minimum score of 100 on the Internet-based test and 25 on the writing and speaking sections.
  - International English Language Testing System (IELTS): minimum score of 7.5 with 6.5 in each component.
  - Certificate of Proficiency in English (COPE): minimum total score of 86 with minimum writing score of 32, reading score of 22, and listening score of 22. Test of Oral Proficiency assessment band = 7.
- Students are accepted via direct entry into the PhD program after completing an appropriate BSc or an MD degree, without completing an MSc degree.

Program Requirements

- **Coursework.** Students must complete a minimum of **3.0 graduate full-course equivalents (FCEs)** as follows:
  - 0.5 FCE: MSC1011H[0] *PhD Student Seminars in Translational Research* (Credit/No Credit).
  - 0.5 FCE: MSC modular courses (two courses worth 0.25 FCE each; Credit/No Credit).
  - 2.0 elective FCEs.
  - Students may be required to take extra courses in addition to the degree requirements.
- Students must pass a **qualifying examination** within 18 to 21 months of entry.
- A research thesis must be submitted and the student must pass an internal examination before proceeding to the Doctoral Final Oral Examination conducted by the School of Graduate Studies.
- At the end of Year 4, students must have completed all program requirements exclusive of the thesis research in order to achieve candidacy.

Program Length

5 years

Time Limit

7 years

[0] Course that may continue over a program. The course is graded when completed.

Medical Science: Health Research GDipHR

Graduate Diploma in Health Research

Program Description

The Graduate Diploma in Health Research provides a select group of medical students high-quality training in health research in order to understand, interpret, and apply the rapid changes in the scientific underpinnings of health care. Future physicians will gain skills relevant to contributing to health-related studies in their future careers, some of whom will become leaders of health research. Taken concurrently with the MD program, the Graduate Diploma in Health Research aims to engage medical students in health research with the intent to develop applicable knowledge and skills that will inform and support a future career in any field of health research.

Minimum Admission Requirements

- Diploma students must meet the School of Graduate Studies minimum admission requirements for master's-level diploma programs. Applicants must be enrolled, and in good academic standing, in Year 1 of the MD program of the Temerty Faculty of Medicine of the University of Toronto.

- Applicants must submit the following:
  - curriculum vitae (CV)
  - a personal statement explaining their interest in the program
  - a description of a research project they are interested in
  - written confirmation of Good Standing in the MD program (letter from the program, signed by the Registrar or Vice-Dean
  - undergraduate and/or graduate academic transcripts.

Program Requirements

- Students must complete a total of **2.5 full-course equivalents (FCEs)** as follows:
  - Two required courses (2.0 FCEs):
    - MSC1991Y[0] *Supervised Research Project* (Credit/No Credit).
    - MSC1992Y[0] *Research Skills for the Physician-Scientist* (Credit/No Credit).
  - 0.5 elective FCE selected from an approved list. Substitution of any other graduate-level course relevant to the student's research course but not found on the approved list will require completion of a course exemption form signed by the Institute of Medical Science's Graduate Coordinator. The selection of the course will be done in consultation with the Program Director.
- Students must maintain good academic standing in the MD program throughout.

Program Length

5 sessions part-time (W/S/F/W/S)

Time Limit

8 sessions part-time

[0] Course that may continue over a program. Credit is given when the course is completed.

Medical Science: Health Research GDipHR Courses

Medieval Studies: Introduction

Faculty Affiliation

Arts and Science

Degree Programs

Medieval Studies

MA and PhD

- Fields:
  - Auxiliary Sciences;
  - History and Religion;
  - Language and Literature;
  - Music and Art;
  - Philosophy and Theology

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Ancient and Medieval Philosophy
  - Medieval Studies, PhD
- Book History and Print Culture
  - Medieval Studies, MA, PhD
- Jewish Studies
  - Medieval Studies, MA, PhD
- Sexual Diversity Studies
  - Medieval Studies, MA, PhD
- Women and Gender Studies
  - Medieval Studies, MA, PhD

Overview

The Centre for Medieval Studies is concerned with the history, thought, and artistic expression of the various cultures of Europe and adjacent regions over the course of a millennium (circa 500 to 1500). The Centre for Medieval Studies in Toronto has an international reputation, resting on the wide-ranging interests of its faculty, the calibre and preparation of its graduates, and its outstanding library facilities.

The Centre for Medieval Studies provides interdepartmental programs in the medieval period. Students are expected to cross the limits of traditional subjects, and research is especially encouraged in often-neglected boundary areas between traditional departments.

The centre offers its students training in basic skills and tools in order to read the materials remaining from the medieval past and to explore them with learning and imagination. All students entering the centre are asked to improve their proficiency in Latin before registration, since there are Medieval Latin requirements for all degrees. Examinations in Medieval Latin are set at the beginning of the Fall session and at the end of the Spring session. All incoming students must take the Level One Latin examination at the beginning of the Fall session for placement purposes.

Medieval Studies: Medieval Studies MA

Master of Arts

Program Description

Students may be admitted to a one-year MA program as full-time or part-time.

Students may obtain an MA in Medieval Studies by coursework or by a combination of coursework plus thesis.

MA Program (Coursework Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Centre for Medieval Studies' additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university with an average grade of at least a B+ in previous courses. Coursework in the medieval period must have formed part of the program.
- Applicants are required to have taken at least one full-year Latin introductory course with a grade of at least B+ or equivalent.
- Applicants for the MA degree, full-time and part-time, must:
  - Follow the application instructions on the department's website.
  - Complete forms in which they state the reasons for undertaking graduate studies in the medieval area and their qualifications for applying to do so.

Program Requirements

- MA students must pass the Level One Medieval Latin examination upon arrival or else attain credit in MST1000Y (1.0 full-course equivalent [FCE]) in the first year of enrolment in the MA program.
- For the **coursework option**, students:
  - Who pass the Level One Latin examination upon arrival must successfully complete 3.0 FCEs.
  - Who do not pass the Level One Latin examination on arrival must successfully complete 4.0 FCEs (including MST1000Y).
- In the MA program, course training in Latin is given at two levels. All students are expected to arrive with knowledge equivalent to at least a first-year university course in Latin language. MST1000Y *Medieval Latin I* is the MA-level course. While this course is preparatory to the departmental Level One Latin examination, a pass in the course does not guarantee a pass of the departmental examination at the corresponding level. Advanced seminars are open to those MA students who have achieved a pass of the Level Two Latin examination.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

MA Program (Coursework-Plus-Thesis Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Centre for Medieval Studies' additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university with an average grade of at least a B+ in previous courses. Coursework in the medieval period must have formed part of the program.
- Applicants are required to have taken at least one full-year Latin introductory course with a grade of at least B+ or equivalent.
- Applicants for the MA degree, full-time and part-time, must:
  - Follow the application instructions on the department's website.
  - Complete forms in which they state the reasons for undertaking graduate studies in the medieval area and their qualifications for applying to do so.

Program Requirements

- MA students must pass the Level One Medieval Latin examination upon arrival or else attain credit in MST1000Y (1.0 FCE) in Year 1 of the MA program.
- For the **coursework-plus-thesis option**, students must successfully complete:
  - Coursework: 3.0 FCEs or 2.0 FCEs plus a pass at the Level One Latin examination upon arrival in the program.
  - A thesis. An MA thesis must be on a topic approved by the Centre for Medieval Studies. The topic must be submitted to the Centre by November 30 of the MA year.
- In the MA program, course training in Latin is given at two levels. All students are expected to arrive with knowledge equivalent to at least a first-year university course in Latin language. MST1000Y Medieval Latin I is the MA-level course. While this course is preparatory to the departmental Level One Latin examination, a pass in the course does not guarantee a pass of the departmental examination at the corresponding level. Advanced seminars are open to those MA students who have achieved a pass of the Level Two Latin examination.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Medieval Studies: Medieval Studies PhD

Doctor of Philosophy

Program Description

The PhD is offered only on a full-time basis. Applicants may enter the PhD program via one of two routes: 1) following completion of a master's degree in medieval studies or a related field; or 2) direct entry after completing an appropriate bachelor's degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Centre for Medieval Studies (CMS)'s additional admission requirements stated below.
- Applicants enter with a master's degree in medieval studies or a related field from a recognized university with an average grade of at least A– in the applicant's overall program. Students in the CMS MA program must apply formally for admission to the PhD program on the same basis as all other applicants.
- All applicants must:
  - Follow the application instructions on the department's website.
  - Complete the forms in which they state the reasons for undertaking graduate studies in the medieval area and their qualifications for applying to do so.
  - Pass the Level One Latin examination before they may register in the PhD program.

Program Requirements

- During Years 1 and 2, students must take a minimum of **3.0 full-course equivalents (FCEs)**, i.e., 2.0 FCEs in a major field and 1.0 FCE in a minor field. In view of the CMS's interdepartmental nature, some of these courses on the Middle Ages can be taken in other departments, with the approval of the PhD coordinator. MST1001Y may not be counted towards the 1.0 FCE minor field requirements or included in the 3.0 FCEs minimum for the degree; but it must be taken in addition to the 3.0 FCEs minimum by all those who do not pass the Level Two Latin examination right before or upon arrival in the program. In addition to the 3.0 FCEs minimum, MST1003H *Professional Development for Medieval Studies PhDs* (Credit /No Credit) must be taken by all students over the course of the first three years of registration.
- In the PhD program, course training in Latin is given at two levels. **MST1001Y *Medieval Latin II*** is the PhD-level course. While this course is preparatory to the departmental Level Two Latin examination, a pass in the course does not guarantee a pass of the departmental examination at the corresponding level. Advanced seminars are open to those with either prior credit in MST1001Y or else a pass of the Level Two Latin

examination. These seminars thus serve both advanced students of medieval Latin as well as those who have passed MST1001Y but require further training in order to achieve the Level Two Latin examination pass.

- By the end of the Fall session of Year 2, students should have a full Advisory Committee, consisting of a supervisor and two other members. The Advisory Committee must be formally approved by the PhD coordinator. During the Spring session of the same academic year, students should develop the **Special Field Proposal** in consultation with the Advisory Committee. The proposal consists of three documents:
  - the **Reading List** (minimum 150 and maximum 250 items, including both primary and secondary sources) — should be submitted to the Advisory Committee members by June 30 of Year 2;
  - the **Field paper** (approximately 8,000 to 12,000 words, including footnotes) — should be submitted to the Advisory Committee members and the CMS Executive Committee for approval by January 15 of Year 3; and
  - the **Syllabus** — should be submitted, together with the final version of the Field paper, to the Advisory Committee members by March 31 of Year 3.

  The proposal must be prepared according to CMS guidelines.
- Students must pass the **Level Two Latin examination** and the CMS's **examinations in the French and German languages** before moving on to the Special Field Examination. In exceptional cases, a student may petition to replace one of the modern languages (French and German) with another language in their area of research. A written request, with a signed confirmation of support for the petition from the supervisor, must be submitted as early as possible, and no later than the end of the Fall session of Year 2 for consideration by the Executive Committee. In the case of a successful petition, the student will be expected to take the exam no later than the next examination date. Such substitute examinations will be offered no more than two times per year (April and September). Failure to pass all the language exams by the end of Year 3 leads to an automatic failure of the Special Field Examination and thus, to termination from the program.
- The purpose of the **Special Field Examination** is to demonstrate both the student's scholarly expertise in the particular area of doctoral dissertation and a broader academic competence. The Special Field Examination is a two-hour-long oral exam to be held by April 30 of Year 3. The Special Field Examination is graded on a pass/fail basis. The Advisory Committee, in consultation with the Executive Committee, has the discretion to determine if a student may retake the Special Field Examination. Only one retake is permitted and must take place within two months of the first exam. Students who do not pass the Special Field Examination before the beginning of Year 4 will be recommended to SGS for termination of registration.
- The candidate will be required to defend the dissertation at the **Doctoral Final Oral Examination**.
- It is possible to complete a PhD in Medieval Studies in four years, but some students, depending on their background preparation, find that it takes longer than four years. Students intending to work in an area of medieval studies that requires the acquisition of one or more extra languages may find that it is not possible to complete a doctorate within four years.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Centre for Medieval Studies (CMS)'s additional admission requirements stated below.
- Applicants enter with an appropriate bachelor's degree from a recognized university with an average grade of at least A– in the applicant's overall program. Coursework in the medieval period must have formed part of the program.
- All applicants must:
  - Follow the application instructions on the department's website.
  - Complete the forms in which they state the reasons for undertaking graduate studies in the medieval area and their qualifications for applying to do so.
  - Pass the Level One Latin examination before they may register in the PhD program.

Program Requirements

- During Years 1, 2, and 3, students must take a minimum of **5.0 full-course equivalents (FCEs)**, including 2.0 FCEs in a major field and 1.0 FCE in a minor field. In view of the CMS's interdepartmental nature, some of these courses on the Middle Ages can be taken in other departments, with the approval of the PhD coordinator. MST1001Y may not be counted towards the 1.0 FCE minor field requirements or included in the 5.0 FCEs minimum for the degree, but it must be taken in addition to the 5.0 FCEs minimum by all those who do not pass the Level Two Latin examination right before or upon arrival in the program. In addition to the 5.0 FCEs minimum, **MST1003H *Professional Development for Medieval Studies PhDs* (Credit /No Credit)** must be taken by all students over the course of the first three years of registration.
- In the PhD program, course training in Latin is given at two levels. **MST1001Y *Medieval Latin II*** is the PhD-level course. While this course is preparatory to the departmental **Level Two Latin examination**, a pass in the course does not guarantee a pass of the departmental examination at the corresponding level. Advanced seminars are open to those with either prior credit in MST1001Y or else a pass of the Level Two Latin examination. These seminars thus serve both advanced students of medieval Latin as well as those who have passed MST1001Y but require further training in order to achieve the Level Two Latin examination pass.
- By the end of the Fall session of Year 3, students should have a full Advisory Committee, consisting of a supervisor and two other members. The Advisory Committee must be

formally approved by the PhD coordinator. During the Spring session of the same academic year, students should develop the **Special Field Proposal** in consultation with the Advisory Committee. The proposal consists of three documents:
  - the **Reading List** (minimum 150 and maximum 250 items, including both primary and secondary sources) — should be submitted to the Advisory Committee members by June 30 of Year 2;
  - the **Field paper** (approximately 8,000 to 12,000 words, including footnotes) — should be submitted to the Advisory Committee members and the CMS Executive Committee for approval by January 15 of Year 3; and
  - the **Syllabus** — should be submitted, together with the final version of the Field paper, to the Advisory Committee members by March 31 of Year 3.

  The proposal must be prepared according to CMS guidelines.
- Students must pass the **Level Two Latin examination** and the CMS's **examinations in the French and German languages** before moving on to the Special Field Examination. In exceptional cases, a student may petition to replace one of the modern languages (French and German) with another language in their area of research. A written request, with a signed confirmation of support for the petition from the supervisor, must be submitted as early as possible, and no later than the end of the Fall session of Year 2 for consideration by the Executive Committee. In the case of a successful petition, the student will be expected to take the exam no later than the next examination date. Such substitute examinations will be offered no more than two times per year (April and September). Failure to pass all the language exams by the end of the Spring session of Year 4 leads to an automatic failure of the Special Field Examination and thus to termination from the program.
- The purpose of the **Special Field Examination** is to demonstrate both the student's scholarly expertise in the particular area of doctoral dissertation and a broader academic competence. The Special Field Examination is a two-hour-long oral exam to be held by April 30 of Year 3. The Special Field Examination is graded on a pass/fail basis. The Advisory Committee, in consultation with the Executive Committee, has the discretion to determine if a student may retake the Special Field Examination. Only one retake is permitted and must take place within two months of the first exam. Students who do not pass the Special Field Examination before the beginning of Year 5 will be recommended to SGS for termination of registration.
- The candidate will be required to defend the dissertation at the **Doctoral Final Oral Examination**.
- It is possible to complete a direct-entry PhD in Medieval Studies in five years but some students, depending on their background preparation, find that it takes longer than five years. Students intending to work in an area of medieval studies that requires the acquisition of one or more extra languages may find that it is not possible to complete a doctorate within five years.

Program Length

5 years

7 years

Medieval Studies: Medieval Studies MA, PhD Courses

Not all courses are offered every year. Please consult the Centre for Medieval Studies (CMS)' website which lists the courses that will be offered this year as well as those offered by associated departments. A graduate course is understood to require at least two hours per week of class meeting and such research hours as may be required. Courses marked (PR) have prerequisites; visit the CMS website for details about prerequisites.

Art History

FAH1114H	Multicultural Arts of Medieval Sicily
FAH1118H	The Medieval Treasury
FAH1119H	Global Medieval Art in China
FAH1121H	12th-Century Renaissance?
FAH1125H	Medieval Pilgrimage Art and Architecture
FAH1127H	Early Medieval Art

Book History and Print Culture

BKS1001H	Introduction to Book History
BKS1002H	Book History in Practice
BKS2000H	Advanced Seminar in Book History and Print Culture
BKS2001H	Individual Practicum in Book History and Print Culture

Classics

CLA5007H	Criticism of Latin Poetry

Comparative Literature

COL5032H	Feminist Approaches to Medieval Literature
COL5086H	Literature, Culture, and Contact in Medieval Iberia

English

ENG1001H	Old English I
ENG1002H	Introduction to Old English II: Beowulf
ENG1009H	Writing the Nation: Pre-modern Historigraphies
ENG1011H	Economies of Medieval Drama: East Anglia, Kent, Sussex

ENG1551H	The Canterbury Tales
ENG1552H	Chaucer's Troilus and Criseyde and Other Works
ENG1582H	Piers Plowman
ENG1730H	Medieval Drama: The Biblical Cycles and Fragments

French Language and Literature

FRE1164H	Initiation au français médiéval
FRE1203H	Séminaire de littérature II : période

Germanic Languages and Literatures

GER1200H	Middle High German
GER1220H	Medieval Arthurian Romance

History

HIS1213H	Medieval Institutes of Perfection (joint graduate/undergraduate)
HIS1215H	Social Change in Medieval England, 1154–1279
HIS1221H	Topics in Early Modern European Social History
HIS1283H	Crusades, Conversion, and Colonialization in the Medieval Baltic (joint graduate/undergraduate)

Italian Studies

ITA1025H	Old Italian
ITA1165H	Introduction to Italian Philology
ITA1200H	Dante
ITA1202H	Dante as a Reader of Augustine's City of God: Augustinian Textual Communities at the Beginning of the 14th Century
ITA1203H	Boccaccio
ITA1330H	Petrarch and Petrarchism
ITA1535H	Topics in Italian Literature
ITA1540H	Renaissance Italian Theatre
ITA1597H	The Commedia dell'Arte

Medieval Studies

MST1000Y	Medieval Latin I
MST1001Y	Medieval Latin II
MST1002H	Advanced Medieval Latin: Boethius (PR)
MST1003H	Professional Development for Medieval Studies PhDs (Credit/No Credit)
MST1015H	Medieval Representation of Sexual Dissidence
MST1020H	The Medieval Latin Epic (PR)
MST1021H	The Bibliographic Imagination in the Middle Ages
MST1022H	Transmission and Reception: the Survival and Use of the Latin Classics (Prerequisite: Level One Latin Pass, or permission of instructor. MST1104H or MST1105H is recommended.)
MST1023H	Early Medieval Latin and Greek Poetry
MST1101H	Codicology (PR)
MST1102H	Practical Palaeography (PR)
MST1104H	Latin Palaeography I (PR)
MST1105H	Paleography II (PR)

MST1115H	English Palaeography (PR)
MST1327H	Death, Dying, and Society in Medieval Northern Europe
MST1370H	From Farm to Market: Social and Economic Transformation in Medieval Europe
MST1371H	Old English Philology: Grammar (PR)
MST1372H	Why Europe Grew Rich and Asia Did Not: the Great Divergence Debate
MST1373H	English Language and Literature in Transition, 1100–1250
MST1383H	Poetry and Prose of the Vercelli Book
MST1384H	The Exeter Book of Old English Verse (PR)
MST1388H	The Junius Manuscript: Old Testament Narratives (Prerequisite: ENG1001H or equivalent.)
MST1398H	Alfredian Prose (Prerequisite: ENG1001H or equivalent; MA Latin.)
MST1422H	Introduction to the Study of Magic in the Middle Ages
MST2001H	Old Saxon
MST2007H	Old High German
MST2010H	Old Norse I
MST2015H	Studies in Old Norse Texts (PR)

MST2018H	Introduction to Celtic Latin (Prerequisite: MST1001Y or a pass of Level 2 Latin Exam.)
MST2029H	Introduction to Old Irish (Exclusion: MST2030Y.)
MST2030H	Old Irish Texts (Prerequisite: MST2029H or equivalent. Exclusion: MST2030Y.)
MST2030Y	Old and Middle Irish
MST2032H	Medieval Irish Poetry 500–1600 (PR)
MST2033H	Textual Studies in Medieval Irish Poetry (PR)
MST2037H	Legendary History of Britain and Ireland from Celtic Sources
MST2038H	Medieval Brittany (PR)
MST2040H	Beginnings of Medieval Rhetoric and Poetics (PR)
MST2042H	Medieval Literary Theory in the Later Middle Ages
MST2051H	Introduction to Middle Welsh
MST2052H	Medieval Welsh Texts
MST2055Y	Studies in Middle Welsh Texts (PR)
MST3015H	Introduction to Ge'ez (Classical Ethiopic)
MST3016H	Intermediate Ge'ez (Classical Ethiopic) (Prerequisite: MST3015H.)
MST3021H	Boethius (PR)
MST3022H	Consolation Through the Ages: Later Medieval Approaches to Boethius's Consolation of Philosophy (PR)
MST3035H	Medieval Representations of Death, Sickness, and Crime (1100–1500)
MST3113H	Figures of Heroism in Old English Literature (PR)
MST3123H	Introduction to Medieval Medicine
MST3124H	Medieval Studies in the Digital Age
MST3125H	The Medieval Short Story
MST3126H	The Apocalypse in Medieval English Literature
MST3135H	Digital Old English
MST3140Y	Medieval Catalan Language and Literature
MST3150H	Medieval French Epic: Kings and Heroes (PR)
MST3152H	Introduction to Medieval Occitan (PR)
MST3153H	Medieval Occitan Literature
MST3155H	Middle French Literature
MST3158H	The Roman de la Rose and Medieval Allegory (PR)
MST3159H	Classical Antiquity in the French Middle Ages (PR)
MST3160H	Introduction to Romance Philology: From Vulgar Latin to the First Literary Texts
MST3163H	Medieval French Historiography
MST3164H	Medieval French Romance: The Grail
MST3203H	Topics in Medieval Economic History
MST3205H	Violence in Medieval Society
MST3207H	Decretists and Decretalists: Canonical Jurisprudence 1140–1300
MST3225H	Jews and Christians in Medieval and Renaissance Europe
MST3226H	Medieval Mediterranean History
MST3231H	Clio's Workshop: Introduction to Historical Methods
MST3232H	Vernacular Literature in Medieval Europe: Status and Function (Prerequisite: basic reading knowledge of Latin and at least one medieval vernacular language.)
MST3235H	Communal Florence, 1150–1530
MST3237H	Through the Lens of Monastic Rules and Customaries
MST3241H	Everyday Life in Medieval Europe
MST3242H	Carolingian Europe 750–900 CE
MST3244H	Saints of Early Medieval Italy
MST3251H	The Merovingians
MST3255H	Bishops in the High Middle Ages
MST3301H	Themes in Medieval Philosophy
MST3309H	Birth of the Will: Augustine and Anselm
MST3311H	Topics in Medieval Metaphysics (PR)
MST3321H	Philosophy of Mind in the Middle Ages (PR)
MST3322H	William of Ockham
MST3327H	Free Will and Human Action in Medieval Philosophy
MST3346H	Medieval Islamic Philosophy
MST3501H	Introduction to the Medieval Christian Liturgy
MST3601H	Medieval Spanish Sources in Context
MST3602H	Crime and Punishment in the Middle Ages
MST9310Y, H	Directed Reading
MST9315H	Directed Reading

Near and Middle Eastern Civilizations

NMC1500Y	Archaeology, from Alexander to Muhammad
NMC2090Y	The Prophet and the Caliphates: Early Islamic History to 1258
NMC2119H	Readings in Medieval Arabic Documents
NMC2221H	Persian Mirrors for Princes
NMC2226H	Medieval Persian Historical and Diplomatics

Religion

RLG3653H	Jewish Exegetical Traditions in Antiquity

Slavic Languages and Literatures

SLA1104H	Introduction to Old Church Slavonic (Credit/No Credit)
SLA1109H	Studies in Old Church Slavonic

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Developmental Biology
  - Molecular Genetics, MSc, PhD
- Genome Biology and Bioinformatics
  - Molecular Genetics, PhD
- Next-Generation Precision Medicine
  - Molecular Genetics, PhD

Overview

The Department of Molecular Genetics is administered from the Medical Sciences Building and has nearly 100 faculty members whose labs are located within the Medical Sciences Building, the MaRS Centre, the Donnelly Centre, the Hospital for Sick Children, Mount Sinai Hospital, and the Ontario Institute for Cancer Research.

Faculty members run a variety of research programs in diverse areas such as genetic models of development and disease; molecular medicine and human genetics; cellular and molecular structure and function; molecular microbiology and infectious disease; computational and systems biology; functional genomics and proteomics.

Molecular Genetics: Genetic Counselling MSc

Master of Science

Program Description

The MSc program is a full-time degree program (non-thesis) that prepares students with relevant academic knowledge and clinical skills so that upon graduating, they may work as highly competent genetic counsellors in a variety of practice settings. Genetic counsellors are employed in many areas of healthcare, providing genetic assessment and counselling to individuals and families with, or at risk for, a genetic disorder. There is also an increasing demand for genetic counsellors to join genetic/genomic testing laboratories, industry, public health settings, etc. Genetic counsellors are often involved in academic activities including teaching and research, administrative leadership roles, advisory roles for government and/or support organizations, and other precision medicine leadership capacities. This program is accredited by the Accreditation Council for Genetic Counseling.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Molecular Genetics' additional admission requirements stated below.
- A four-year undergraduate degree from a recognized university with a minimum B+ average, both cumulatively and in the upper years.
- Successful completion or proof of current enrolment of undergraduate courses at a recognized university in biology, molecular biology/genetics, biochemistry, embryology/animal developmental biology, statistics, and psychology.
- The development of strong interpersonal and communication skills, as evidenced by experience in a counselling setting (volunteer or paid).
- All applicants must register with the National Matching System (NMS); instructions are provided in the department's application procedures.

Program Requirements

- Students must complete **13.0 full-course equivalents (FCEs)** as follows:
  - 10.0 FCEs in coursework with a minimum B– standing. Lectures, meetings, and rounds must be attended at a minimum of 90% of scheduled occurrences.
  - 1.0 FCE independent research project. Students are expected to develop and implement a research study designed and carried out by them under the supervision of a faculty member. The independent research project must be relevant to the field of genetic counselling and/or clinical genetics. Students must present the independent research project both orally and in a written format suitable for publication.
  - 2.0 FCEs in clinical practicums.
- Students spend a minimum of 21 months over a two-year period in full-time attendance.
- Students are required to complete an intervening summer rotation (six weeks duration).

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Molecular Genetics: Genetic Counselling MSc Courses

Required Courses

MSC2010Y	Molecular Medicine in Human Genetic Disease
MMG1120Y+	Clinical Rotations I
MMG1122Y	Issues in Genetic Counselling I
MMG1124Y	Principles of Effective Counselling
MMG1126Y	Clinical Issues in Pregnancy and Child Development
MMG1128Y	Risk Calculation and Research Methodology
MMG1130Y	Tutorial in Molecular Genetics
MMG1132H	Laboratory Skills
MMG1220Y	Clinical Rotations II
MMG1222Y	Issues in Genetic Counselling II
MMG1224Y	Advanced Principles of Effective Counselling
MMG1226Y	Concepts in Clinical Genetics
MMG1228Y	Independent Research Project
MMG1230H	Cancer Genetic Counselling

+ *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Molecular Genetics: Medical Genomics MHSc

Master of Health Science

Program Description

The professional master's program in Medical Genomics is a fast-paced, content-dense degree program delivered over five continuous sessions. This program will provide medical trainees, clinicians, research scientists, and laboratory professionals with the theory and practical knowledge necessary to incorporate the generation, analysis, and interpretation of genomics data into research and medical practice. Preferred applicants have relevant research and/or clinical experience and can demonstrate an immediate and substantive use of this degree in professional practice.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Molecular Genetics' additional admission requirements stated below.
- An appropriate BSc degree with high academic standing from a recognized university, with a B+ average or better. Applicants would normally possess an undergraduate degree displaying competence in genetics, molecular biology, or related fields.

  or

  An appropriate MD degree with high academic standing from a recognized university, with a B+ average or better.
- Applicants will complete an application package including:
  - all previous university transcripts
  - a transcript summary form for either the clinical or laboratory stream
  - curriculum vitae (CV)
  - statement of interest (one to two pages maximum), including how this program will have an impact on future career path
  - three letters of reference from professional, academic, or other qualified referees.
- Interview (15 minutes).

Program Requirements

Students must complete a total of **9.0 full-course equivalents (FCEs)** as follows:

- Year 1:
  - MMG3001Y *Advanced Human Genetics* (2.0 FCEs, Fall and Winter)
  - MMG3002Y *Biological Statistics* (1.0 FCE, Fall)
  - MMG3003Y *Genomics Methodologies* (2.0 FCEs, Winter and Summer).
- Year 2:
  - MMG3004Y *Communication of Genetic Information* (1.0 FCE, Fall)
  - MMG3005Y *Ethical and Legal Implications of Genomics* (1.0 FCE, Fall)
  - MMG3007Y *Clinical Practicum in Medical Genomics*, an elective for clinical-stream students and trainees in patient-facing medical fields (1.0 FCE; Credit/No Credit, Winter)
    or
    MMG3008Y *Practicum in Modern Genomics*, an elective for laboratory professional-stream students in clinical/research science careers (1.0 FCE; Credit/No Credit, Winter).
- MMG3006Y[0] *Future Directions in Medical Genomics* (1.0 FCE, Credit/No Credit).

Program Length

5 sessions full-time (typical registration sequence: F/W/S/F/W)

Time Limit

3 years

[0] Course that may continue over a program. Credit is given when the course is completed.

Molecular Genetics: Medical Genomics MHSc Courses

Required Courses

MMG3001Y (2.0 FCEs)	Advanced Human Genetics
MMG3002Y	Biological Statistics
MMG3003Y (2.0 FCEs)	Genomics Methodologies
MMG3004Y	Communication of Genetic Information
MMG3005Y	Ethical and Legal Implications of Genomics
MMG3006Y[0]	Future Directions in Medical Genomics (Credit/No Credit)

[0] Course that may continue over a program. Credit is given when the course is completed.

Required Elective (choose one)

MMG3007Y	Clinical Practicum in Medical Genomics (Credit/No Credit)
MMG3008Y	Practicum in Modern Genomics (Credit/No Credit)

Molecular Genetics: Molecular Genetics MSc

Master of Science

Program Description

The MSc program offers research training in a broad range of genetic systems from bacteria and viruses to humans. Research projects include DNA repair, recombination and segregation, transcription, RNA splicing and catalysis, regulation of gene expression, signal transduction, interactions of host cells with bacteria and viruses, developmental genetics of simple organisms (worms and fruit flies) as well as complex organisms (mice), molecular neurobiology, molecular immunology, cancer biology and virology, structural biology, and human genetics and gene therapy.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Molecular Genetics' additional admission requirements stated below.
- Normally, a BSc or MD degree or equivalent with excellent academic credentials in molecular biology, genetics, microbiology, and/or biochemistry. Applicants trained in other quantitative sciences (math, physics, chemistry, computer science, engineering, etc.) are also strongly encouraged to apply.

Program Requirements

- **Coursework.** Successful completion of **1.5 full-course equivalents (FCEs)** as follows:
  - MMG1001H (0.5 FCE)
  - MMG1003H (0.25 FCE)
  - MMG1004H (0.25 FCE)
  - MMG1113H (0.25 FCE)
  - MMG1114H (0.25 FCE).
- Students must also attend each of the following graduate seminars two times:
  - MMG1111H (0.0 FCE; Credit/No Credit)
  - MMG1112H (0.0 FCE; Credit/No Credit).
- A **thesis** on a research project.
- Defence of the thesis at an **oral examination**.
- **Residency.** Students are required to spend 12 months in full-time attendance.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years

Molecular Genetics: Molecular Genetics PhD

Doctor of Philosophy

Program Description

The PhD program offers research training in a broad range of genetic systems from bacteria and viruses to humans. Research projects include DNA repair, recombination and segregation, transcription, RNA splicing and catalysis, regulation of gene expression, signal transduction, interactions of host cells with bacteria and viruses, developmental genetics of simple organisms (worms and fruit flies) as well as complex organisms (mice), molecular neurobiology, molecular immunology, cancer biology and virology, structural biology, and human genetics and gene therapy.

Applicants may enter the PhD program via one of three routes: 1) following completion of an MSc degree; 2) transfer from the University of Toronto MSc program; or 3) direct entry following completion of a BSc, MD, or equivalent degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Molecular Genetics' additional admission requirements stated below.
- An MSc degree in Molecular Genetics, or equivalent, from the University of Toronto or another recognized university. As a condition of admission, applicants who have completed their MSc outside of the Department of Molecular Genetics may be required to complete additional course requirements.
- Normally, an MSc degree or equivalent with wet or dry lab experience related to molecular biology, genetics, microbiology, and/or biochemistry is required. Applicants trained in other quantitative sciences (math, physics, chemistry, computer science, engineering, etc.) are also strongly encouraged to apply.
- Attainment of minimum admission standards does not guarantee acceptance into the PhD program.

Program Requirements

- **Coursework.** Students must successfully complete a total of **1.0 full-course equivalent (FCEs)** as follows:
  - MMG1115H (0.5 FCE)
  - Two modular courses (0.25 FCE each), which must be taken after successfully completing the qualifying examination prior to the Summer session of Year 4. If a program extension is granted beyond Year 4, students have until the Summer session of Year 5 to complete.
- Students must also attend each of the following graduate seminars four times:
  - MMG1111H (0.0 FCE; Credit/No Credit)

    - MMG1112H (0.0 FCE; Credit/No Credit).
- A **thesis** on a research project.
- Successful completion of a **qualification examination** in Year 2. The qualifying exam consists of the submission of a **written proposal and an oral examination**. If a student is unsuccessful at the first attempt at the qualifying exam, there are three possible outcomes:
    - The student may retake the oral exam within four to eight weeks without revision of the written proposal; or
    - The student may submit a revised written proposal and retake the oral exam within four to eight weeks; or
    - The student may withdraw from the program after consultation with the Graduate Coordinator. In cases where the student does not have an MSc in Molecular Genetics, the Exam Committee may recommend the student reclassify into the MSc program.
- **Residency.** Students who enter the doctoral program after completing a master's program must spend a minimum of two sessions in full-time attendance.

Program Length

4 years

Time Limit

6 years

PhD Program (Transfer)

Transfer Requirements

- Transfer applicants must be enrolled in the Department of Molecular Genetics MSc program.
- Students must have successfully completed the following:
    - MMG1001H (0.5 FCE)
    - MMG1003H (0.25 FCE)
    - MMG1004H (0.25 FCE)
    - MMG1113H (0.25 FCE)
    - MMG1114H (0.25 FCE).
- Students must be enrolled in MMG1111H and MMG1112H in order to qualify to transfer to the PhD program.
- Transfer applicants must successfully complete a reclassification transfer exam within the first 24 months of registration in the MSc program.

Program Requirements

- **Coursework.** Students must successfully complete a total of **1.0 full-course equivalent (FCE)** as follows:
    - MMG1115H (0.5 FCE)
    - Two modular courses (0.25 FCE each), which must be taken after successfully completing the transfer examination and prior to the Summer session of Year 5.
- Students must also attend any remaining graduate seminar sessions not completed prior to transferring. Students must attend each graduate seminar four times:
    - MMG1111H (0.0 FCE, Credit/No Credit)
    - MMG1112H (0.0 FCE, Credit/No Credit).
- A **thesis** on a research project.
- Successful completion of a **transfer examination** in Year 2. The transfer exam consists of the submission of **a written proposal and an oral examination**. If a student is unsuccessful at the first attempt at the transfer exam, there are four possible outcomes:
    - The student may retake the oral exam within four to eight weeks without revision of the written proposal; or
    - The student may submit a revised written proposal and retake the oral exam within four to eight weeks; or
    - The student is asked to complete and defend an MSc thesis; or
    - The student may withdraw from the program after consultation with the Graduate Coordinator.
- **Residency.** Students who enter the doctoral program after completing a master's program must spend a minimum of two sessions in full-time attendance.

Program Length

5 years

Time Limit

7 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Molecular Genetics' additional admission requirements stated below.
- Students with a BSc degree, an MD degree, or equivalent may be accepted directly into the PhD program.
- Normally, a BSc degree or equivalent with academic credentials and wet or dry lab experience related to molecular biology, genetics, microbiology, and/or biochemistry is required. Applicants trained in other quantitative sciences (math, physics, chemistry, computer science, engineering, etc.) are also strongly encouraged to apply.
- Attainment of minimum admission standards does not guarantee acceptance into the PhD program.

Program Requirements

- **Coursework.** Students must successfully complete a total of **2.5 full-course equivalents (FCEs)** as follows:
    - MMG1001H (0.5 FCE)
    - MMG1003H (0.25 FCE)
    - MMG1004H (0.25 FCE)
    - MMG1113H (0.25 FCE)
    - MMG1114H (0.25 FCE)
    - MMG1115H (0.5 FCE)
    - Two modular courses (0.25 FCE each), which must be taken after successfully completing the qualifying examination and prior to the Summer session of Year 5.
- Students must also attend each of the following graduate seminars four times:

    - MMG1111H (0.0 FCE; Credit/No Credit)
    - MMG1112H (0.0 FCE; Credit/No Credit)
- A **thesis** on a research project.
- Successful completion of a **qualification examination** in Year 2. The qualifying exam consists of the submission of **a written proposal and an oral examination**. If a student is unsuccessful at the first attempt at the qualifying exam, there are four possible outcomes:
    - The student may retake the oral exam within four to eight weeks without revision of the written proposal; or
    - The student may submit a revised written proposal and retake the oral exam within four to eight weeks; or
    - The student may choose to reclassify in the MSc program; or
    - The student may withdraw from the program after consultation with the Graduate Coordinator.
- **Residency.** Students who enter the doctoral program after completing a master's program must spend a minimum of two sessions in full-time attendance.

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Aging, Palliative and Supportive Care Across the Life Course
  - Music, MA, PhD
- Book History and Print Culture
  - Music, MA, PhD
- Environmental Studies
  - Music, MA, PhD
- Environment and Health
  - Music, MA, MMus, PhD
- Jewish Studies
  - Music, MA, PhD
  - Music Performance, DMA
- Neuroscience
  - Music, MA, PhD
- Sexual Diversity Studies
  - Music, MA, PhD
- South Asian Studies
  - Music, MA, PhD

Overview

A taught graduate degree program at the Faculty of Music was inaugurated in 1954. The Faculty of Music currently offers graduate degrees in 17 areas of concentration and fosters the institutional alliance of all areas of advanced music study. Graduate degrees are offered at both master's and doctoral levels in areas such as composition, ethnomusicology, music education, musicology, and performance. Graduates from all areas of the program occupy leading positions in music departments across Canada and around the world.

Music: Music MA; Field: Ethnomusicology

Master of Arts (Field: Ethnomusicology)

Minimum Admission Requirements

- Applicants to the MA in Music, Ethnomusicology field are accepted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- An appropriate Bachelor of Arts specialist degree or Bachelor of Music degree from a recognized university, with an average standing equivalent to a University of Toronto mid-B or better over the final two years.
- Applicants whose undergraduate degrees do not meet this standard may be required to take up to a full year of prerequisite courses.
- Applicants must submit an essay representative of their work in music history or ethnomusicology.

Program Requirements

- **Coursework.** Students must complete **6.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE: MUS1000H *Introduction to Music Research I* in Year 1
  - 0.5 FCE: MUS1002H *Fieldwork Methods and Practicum*, offered in alternate years
  - 3.5 of the 6.0 FCEs must be in the discipline; this includes MUS1000H
  - Up to 1.0 FCE may be taken outside of Musicology, Ethnomusicology, or Music Theory (either in the Graduate Department of Music or another graduate unit) with approval of the course and program advising committee.
  - The primary means of evaluating quality are research essays and seminar presentations. MUS1990H *MA Major Paper or Project* is optional.
- A course and program advising (CPA) committee will review course selections. The CPA committee will ensure course selections meet the program requirements and are appropriate to the field.
- Students must maintain a **minimum average of A–** in Year 1 of the program in order to progress to Year 2.
- **One language** other than English is required: this should be relevant to a student's musical and scholarly interests. The chosen language must be approved by the department. Students are strongly encouraged to complete the language requirement in Year 1.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Music: Music MA; Field: Music and Health Sciences

Master of Arts (Field: Music and Health Sciences)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- A Bachelor of Music or Bachelor of Music Therapy degree with an average standing of mid-B or better over the final two years, or an equivalent program and standing from another recognized university. Applicants who have taken

courses in music therapy, psychology, kinesiology, and/or rehabilitation science are preferred. Applicants whose undergraduate degree does not meet this standard may be required to take appropriate prerequisite courses.
- Selected applicants will be scheduled for an interview. Depending on circumstances, an assigned essay may be substituted for the interview with faculty approval.
- Two letters of reference commenting on the applicant's professional performance and promise.

Program Requirements

- **Coursework.** Students must complete **4.0 full-course equivalents [FCEs]** as follows:
  - Required courses (3.0 FCEs)
    - One of the following quantitative methods research courses (0.5 FCE), approved by the advisor:
      - CHL5201H *Biostatistics I*
      - JOI1287H *Introduction to Applied Statistics*
      - NUR1075H *Introductory Statistics for Health Sciences Research*
      - REH1120H *Research Methods for Rehabilitation*
    - MUS7110H *Neurosciences of Music: Scientific Foundations, Clinical Translations* (0.5 FCE)
    - MUS7412H *Elementary Improvisation Methods* (0.5 FCE)
    - Three of the following courses (1.5 FCEs) or other course(s) as approved by the department:
      - MUS4248H *Optimizing the Singing Mind*
      - MUS4613H *Performance Techniques for Hospice Palliative Care*
      - MUS7400H *Introduction to Music and Health Care*
      - MUS7406H *Music Psychology*
      - MUS7407H[0] *Clinical Research Practicum*
      - MUS7415H *Topics in Music and Health I*
      - MUS7416H *Topics in Music and Health II*
  - Elective courses (1.0 FCE) from health-related music courses or from health-related departments as approved by the advisor. Students may choose to enrol in a recommended collaborative specialization during their study, such as the Collaborative Specialization in Aging, Palliative and Supportive Care Across the Life Course or the Collaborative Specialization in Neuroscience. The course(s) taken as part of the collaborative specialization may count towards this elective requirement.
- All students are assigned a faculty advisor.
- Students must pass, by the end of Year 1, a **comprehensive examination** (oral) in music and health, based on four selected essays representing a cohesive research direction. Two attempts to complete the exam are permitted. If the second attempt is unsuccessful, the department will recommend termination of the student's program.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

[0] *Course that may continue over a program. The course is graded when completed.*

Music: Music MA; Field: Music Education

Master of Arts (Field: Music Education)

Students may complete the degree program full-time or part-time.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- Bachelor of Music degree in Music Education from the University of Toronto with an average standing of mid-B or better over the final two years, or an equivalent program and standing from another recognized university. Applicants whose undergraduate degree does not meet this standard may be required to take appropriate prerequisite courses.
- Applicants will normally have two years of teaching experience, although this requirement may be waived at the discretion of the department.
- An interview with the Music Education faculty must be scheduled whenever possible. With faculty approval, an assigned essay may be substituted for the interview.
- Appropriate letters of reference commenting on professional performance and promise are also required.

Program Requirements

- **Coursework.** Students must complete **4.0 full-course equivalents (FCEs)** as follows:
  - A minimum of 2.5 FCEs in Music Education, including MUS2111H *Introduction to Research in Music Education* and MUS2151H *Philosophy and Music Education*.
  - Elective courses may be chosen from the MA/PhD/MMus/DMA courses of instruction and/or other graduate courses available in the University, subject to the approval of the department.
  - A major essay (MUS2990Y[0]) may be substituted for 1.0 FCE with the approval of the department.
- Pass a **comprehensive examination** in music education (written and oral). Students must successfully complete the comprehensive exam by the end of Year 1. Students are permitted two attempts to complete the exam. If students are unsuccessful in their second attempt at the comprehensive exam, the department will make a recommendation for program termination.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

[0] Course that may continue over a program. The course is graded when completed.

Music: Music MA; Field: Musicology

Master of Arts (Field: Musicology)

Minimum Admission Requirements

- Applicants to the MA in Music, Musicology field are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- An appropriate Bachelor of Arts specialist degree or Bachelor of Music degree from a recognized university, with an average standing equivalent to a University of Toronto mid-B or better over the final two years. Applicants whose undergraduate degrees do not meet this standard may be required to take up to a full year of prerequisite courses.
- Applicants must submit an essay representative of their work in music history.

Program Requirements

- **Coursework.** Students must complete **6.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE: MUS1000H *Introduction to Music Research I* in Year 1.
  - 3.0 of the 6.0 FCEs must be in the discipline; this includes MUS1000H.
  - Up to 1.0 FCE may be taken outside of Musicology, Ethnomusicology, or Music Theory (either in the Graduate Department of Music or another graduate unit) with approval of the course and program advising (CPA) committee.
  - The primary means of evaluating quality are research essays and seminar presentations. MUS1990H *MA Major Paper or Project* is optional.
  - A CPA committee will review course selections. The CPA committee will ensure course selections meet the program requirements and are appropriate to the field.
- **One language** other than English is required. The default language at the MA level is German. Students may petition to substitute another language if it is more relevant to their research. Petitions must be submitted to the Division Head (Musicology or Music Theory) by the end of the first session of Year 1. Information on petitioning is available at the Faculty of Music Graduate Studies Office.

  Students can fulfil the language requirement in one of the following three ways:
  - Complete GER300H at U of T or its equivalent from another university with a minimum grade of B+; or
  - Complete GER6000H; or
  - Pass a proficiency exam set by the Division.
- Students must maintain a **minimum average of A–** in Year 1 in order to progress to Year 2.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Music: Music MA; Field: Music Theory

Master of Arts (Field: Music Theory)

Minimum Admission Requirements

- Applicants to the MA in Music, Music Theory field are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- An appropriate Bachelor of Arts specialist degree or Bachelor of Music degree from a recognized university, with an average standing equivalent to a University of Toronto mid-B or better over the final two years.
- Applicants must submit an essay that represents their work in music theory.

Program Requirements

- **Coursework.** Students must complete **6.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE: MUS1000H *Introduction to Music Research* in Year 1.
  - A minimum of 3.0 FCEs in graduate courses in music theory; at least two of these (2.0 FCEs) must be graduate-only seminars.
  - Up to 1.0 FCE may be taken outside of musicology, ethnomusicology, and music theory (either in the Graduate Department of Music or another graduate unit) with approval of the department.
  - MUS1990H *MA Major Paper or Project* (0.5 FCE) is optional.
  - A course and program advising (CPA) committee will review course selections. The CPA committee will ensure course selections meet the requirements of the program and are appropriate to the field.
- **One language** other than English is required. The default language at the MA level is German. Students may petition to substitute another language if it is more relevant to their research. Petitions must be submitted to the Division Head (Musicology or Music Theory) by the end of the first session of Year 1. Information on petitioning is available at the Faculty of Music Graduate Studies Office.

  Students can fulfil the language requirement in one of the following three ways:
  - Complete GER300H at U of T or its equivalent from another university with a minimum grade of B+; or

    - Complete GER6000H; or
    - Pass a proficiency exam set by the Division.
- Students must maintain a **minimum average of A–** in Year 1 in order to progress to Year 2.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Music: Music PhD; Field: Ethnomusicology

Doctor of Philosophy (Field: Ethnomusicology)

Applicants may enter the PhD program via one of two routes: 1) following completion of an appropriate master's degree or 2) direct entry following completion an appropriate bachelor's degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- The PhD in Music, Ethnomusicology field is a research degree. Applicants must hold a master's degree with specialization in ethnomusicology, musicology, or music theory, but may also be in a cognate field such as anthropology or cultural studies. Applicants must have an average standing of B+ or better.
- An essay of approximately 3,000 words which demonstrates their ability to handle a research problem.
- Applicants, whether from the University of Toronto or elsewhere, may be interviewed by the department.

Program Requirements

- **Coursework.** Students holding a master's degree specializing in musicology, ethnomusicology, or theory must fulfil the following requirements by the end of Year 2:
    - **3.0 full-course equivalents (FCEs)** as follows:
        - 0.5 FCE: MUS1250H *PhD Seminar*, taken in the first session
        - 0.5 FCE: MUS1997H[0] *Research in Ethnomusicology*
        - 1.0 FCE in graduate-only seminars in ethnomusicology
        - 1.0 FCE in electives, of which 0.5 FCE may be taken outside of musicology, ethnomusicology, and music theory (either in the Graduate Department of Music or another graduate unit). With approval from the course and program advising (CPA) committee, one 0.5 FCE course may be deferred to the first session of Year 2.
    - Coursework should be completed during Year 1 with an **average grade of at least A–**. The exception is MUS1997H[0] *Research in Ethnomusicology*, which lays the groundwork for the field examination and the dissertation: this course must be started at the beginning of the second session of Year 1 and completed by the end of the first session of Year 2.
    - The CPA committee will review course selections to ensure that they meet the requirements of the program and are appropriate to the field. The department may prescribe additional courses if it is felt they are necessary to develop the knowledge and skills required for a student's proposed subject of study.
- Advanced oral and reading knowledge of a **language** other than English is required: this should be relevant to a student's musical and scholarly interests. The department may also require competence in additional languages deemed necessary for a proposed area of research. Language requirements must be completed successfully by the end of Year 2.
- **Supervisor.** During Year 1, students are expected to discuss their interests, expectations, and research objectives with faculty members. An appropriate supervisor of MUS1997H[0] must then be agreed upon. The supervisor will be primarily responsible for determining the structure and content of MUS1997H[0], which will include a research paper.
- A set of **three comprehensive exams** in (1) contemporary issues, (2) history of the field, and (3) repertoire, to be taken at the beginning of Year 2.
    - Students are permitted two attempts to complete each exam. A second attempt must take place at the beginning of the second session. If students are unsuccessful in their second attempt at the comprehensive exam, the department will make a recommendation for program termination.
- Students must prepare a **thesis** and will defend it at a Doctoral Final Oral Examination.
- The **residency** requirement for all students is three years, whereby students must be on campus full-time and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.

Program Length

4 years

Time Limit

6 years

[0] Course that may continue over a program. The course is graded when completed.

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- The PhD in Music, Ethnomusicology field is a research degree. Exceptional students may be admitted directly to the doctoral stream with an appropriate bachelor's degree (direct entry). Applicants must have an average standing of A– or better.
- An essay of approximately 3,000 words which demonstrates their ability to handle a research problem.
- Applicants, whether from the University of Toronto or elsewhere, may be interviewed by the department.

Program Requirements

- **Coursework.** Students must complete **6.0 full-course equivalents (FCEs)** as follows:
  - Year 1: complete **3.0 FCEs**, exclusive of MUS1250H and MUS1997H[0]. Students must maintain an average grade of at least A– in order to continue with the doctorate; otherwise, the student will be required to transfer into the master's program. Successful direct entry students go on to Year 2.
  - Years 2 and 3: **3.0 FCEs** as follows:
    - 0.5 FCE: MUS1250H *PhD Seminar*, taken in the first session of Year 2.
    - 0.5 FCE: MUS1997H[0] *Research in Ethnomusicology* lays the groundwork for the field examination and the dissertation. This course must be started at the beginning of the second session of Year 2 and completed by the end of the first session of Year 3.
    - 1.0 FCE in graduate-only seminars in ethnomusicology.
    - 1.0 FCE in electives, of which 0.5 FCE may be taken outside of musicology, ethnomusicology, and music theory (either in the Graduate Department of Music or another graduate unit). With approval from the course and program advising (CPA) committee, one 0.5 FCE course may be deferred to the first session of Year 2.
    - All course requirements must be completed by the end of Year 3.
  - The CPA committee will review course selections to ensure that they meet the requirements of the program and are appropriate to the field. The department may prescribe additional courses if it is felt they are necessary to develop the knowledge and skills required for a student's proposed subject of study.
- Students must complete an intermediate-level **language examination** in Year 1. Advanced oral and reading knowledge of a language other than English is required: this should be relevant to the student's musical and scholarly interests. The department may also require competence in additional languages deemed necessary for a proposed area of research. Language requirements must be completed successfully by the end of Year 3.
- **Supervisor.** During Year 1, students are expected to discuss their interests, expectations, and research objectives with faculty members. An appropriate supervisor of MUS1997H[0] must then be agreed upon. The supervisor will be primarily responsible for determining the structure and content of MUS1997H[0], which will include a research paper.
- A set of **three comprehensive exams** in (1) contemporary issues, (2) history of the field, and (3) repertoire, to be taken at the beginning of Year 3.
  - Students are permitted two attempts to complete each exam. A second attempt must take place at the beginning of the second session. If students are unsuccessful in their second attempt at the comprehensive exam, the department will make a recommendation for program termination.
- Students must prepare a **thesis** and will defend it at a Doctoral Final Oral Examination.
- The **residency** requirement for all students is three years, whereby students must be on campus full-time and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.

Program Length

5 years

Time Limit

7 years

[0] Course that may continue over a program. The course is graded when completed.

Music: Music PhD; Field: Music and Health Sciences

Doctor of Philosophy (Field: Music and Health Sciences)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- Applicants must hold a four-year bachelor’s degree, either in music (or with a musical credential [e.g., ARCT]) or music therapy, plus a field-related master’s degree (e.g., master of music, master of music therapy, master’s degree in a health field such as kinesiology, neuroscience, or speech-language pathology). Applicants must have a standing of B+ or better, from the University of Toronto, or an equivalent degree and standing from another recognized university.
- An interview with Music and Health faculty members whenever possible. With faculty approval, an assigned essay may be substituted for the interview.
- Appropriate letters of reference commenting on the applicant's professional experience and academic ability.

Program Requirements

- **Coursework.** Students must complete **6.0 full-course equivalents (FCEs)** as follows:
  - Required courses (4.0 FCEs):
    - MUS7995Y[0] *Music and Health Doctoral Research Project* (1.0 FCE)
    - Two of the following quantitative methods research courses (1.0 FCE), approved by the advisor:
      - CHL5201H *Biostatistics I*
      - NUR1075H *Introductory Statistics for Health Sciences Research*
      - REH1120H *Research Methods for Rehabilitation*
      - JOI1287H *Introduction to Applied Statistics*
    - Four of the following courses (2.0 FCEs) or other course(s) as approved by the department:
      - MUS4248H *Optimizing the Singing Mind*
      - MUS4613H *Performance Techniques for Hospice Palliative Care*
      - MUS7110H *Neurosciences of Music: Scientific Foundations, Clinical Translations*
      - MUS7406H *Music Psychology*
      - MUS7407H[0] *Clinical Research Practicum*
      - MUS7412H *Elementary Improvisation Methods*
      - MUS7415H *Topics in Music and Health I*
      - MUS7416H *Topics in Music and Health II*
  - Elective courses (2.0 FCEs) from the Faculty of Music or related departments as approved by the advisor. Students in the Collaborative Specialization in Aging, Palliative and Supportive Care Across the Life Course or the Collaborative Specialization in Neuroscience may use the core course(s) from the collaborative specialization for these electives.
- **Residence.** Students must be registered full-time, on campus for a minimum of six sessions, in order to be in such geographical proximity as to be able to participate fully in the department's activities associated with the program.
- **Language requirements**, if any, will be established by the student's advisory committee, based on specific research needs.
- **Supervision.** As early as possible in Year 2, the student will submit a thesis proposal that must be approved by the end of that year. On approval of the proposal by the Music and Health Sciences division, a principal advisor and an advisory committee of at least three members (including the advisor as chair) will be appointed. The committee will meet with the student at least two times each academic year.
- Students must complete a **comprehensive examination** successfully by the end of Year 2. Students are permitted two attempts to complete the exam. If the second attempt is unsuccessful, the department will recommend termination of the student's program.
- **Thesis.** Upon successful completion of the field examination, the candidate proceeds to complete an oral defence of the thesis proposal, a thesis, and an oral defence of the thesis.
- Following successful completion of the comprehensive exam, a **thesis supervisory committee** is formed. The committee membership must be approved by the Academic Dean of Graduate Studies and should include at least one member from the Faculty of Music. The supervisor may be from an appropriate department. The supervisory committee must approve the thesis proposal. Thesis research involving facilities or research participants in other departments (e.g., fMRI scanning or use of hospital patients) must be approved by the Director of the Music and Health Research Collaboratory (MaHRC).

Program Length

4 years full-time

Time Limit

6 years full-time

[0] Course that may continue over a program. The course is graded when completed.

Music: Music PhD; Field: Music Education

Doctor of Philosophy (Field: Music Education)

The PhD program in Music, Music Education field may be completed as a full-time program or a flexible-time program.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- Applicants must hold a master's degree specializing in Music Education from the University of Toronto with an average standing of B+ or better, or an equivalent degree and standing from another recognized university.
- An interview with the Music Education faculty must be scheduled whenever possible.
- An assigned essay may be substituted for the interview with faculty approval.
- At the discretion of the faculty, applicants may be required to provide a videotape of their teaching expertise.
- Appropriate letters of reference commenting on the applicant's teaching experience, music performance ability, and academic ability.

Program Requirements

- **Coursework.** Students must complete **6.0 full-course equivalents (FCEs)** including:
  - At least 2.0 FCEs (including MUS2995Y[0] *Music Education Doctoral Research Project*) must be taken from the departmental offerings in music education.
  - The balance of the student's required program must be approved by the department and may include courses from the MA/MMus/PhD/DMA list and/or from another graduate unit.

    - At the department's discretion, the student may receive credit for up to 3.0 FCEs from an acceptable master's degree program.
- **Residence.** Students must be registered full-time and on campus full-time for two years in order to be in such geographical proximity to be able to participate fully in the department's activities associated with the program.
- **Language requirements**, if any, will be established by the student's advisory committee, based on specific research needs.
- **Supervision.** As early as possible in Year 2, the student will submit a thesis proposal which must be approved by the end of that year. On approval of the proposal by the Music Education division of the department, a principal advisor and an advisory committee of at least three members (including the advisor as chair) will be appointed. The committee will meet with the student at least two times each academic year.
- Students must successfully complete a **comprehensive exam** by the end of Year 2. Students are permitted two attempts to complete the exam. If students are unsuccessful in their second attempt at the comprehensive exam, the department will make a recommendation for program termination.
- **Thesis.** Upon successful completion of the comprehensive examination, the candidate proceeds to complete an oral defence of the thesis proposal, a thesis, and an oral defence of the thesis.

Program Length

4 years full-time

Time Limit

6 years full-time

[0] Course that may continue over a program. The course is graded when completed.

PhD Program (Flexible-Time)

Minimum Admission Requirements

- The flexible-time option is offered to practising professionals whose employment or other professional work is related to their research or study interests.
- Applicants to the flexible-time PhD program option must apply specifically to this program to be considered.
- The admission, course, and degree requirements for the flexible-time option are identical to those listed for the full-time PhD program.
- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- Applicants must hold a master's degree specializing in Music Education from the University of Toronto with an average standing of B+ or better, or an equivalent degree and standing from another recognized university.
- An interview with the Music Education faculty must be scheduled whenever possible.
- An assigned essay may be substituted for the interview with faculty approval.
- At the discretion of the faculty, applicants may be required to provide a videotape of their teaching expertise.
- Appropriate letters of reference commenting on the applicant's teaching experience, music performance ability, and academic ability.
- Students who are considering the flexible-time PhD should ensure that they have adequate time on campus to attend classes and to fulfil the academic requirements of a PhD program.

Program Requirements

- **Coursework.** Students must complete **6.0 full-course equivalents (FCEs)** including:
    - At least 2.0 FCEs (including MUS2995Y[0] *Music Education Doctoral Research Project*) must be taken from the departmental offerings in music education.
    - The balance of the student's required program must be approved by the department and may include courses from the MA/MMus/PhD/DMA list and/or from another graduate unit.
    - At the department's discretion, the student may receive credit for up to 3.0 FCEs from an acceptable master's degree program.
- **Residence.** Students must be registered full-time and on campus full-time for two years in order to be in such geographical proximity to be able to participate fully in the department's activities associated with the program.
- **Language requirements**, if any, will be established by the student's advisory committee, based on specific research needs.
- **Supervision.** As early as possible in Year 2, the student will submit a thesis proposal which must be approved by the end of that year. On approval of the proposal by the Music Education division of the department, a principal advisor and an advisory committee of at least three members (including the advisor as chair) will be appointed. The committee will meet with the student at least two times each academic year.
- Students must successfully complete a **comprehensive exam** by the end of Year 2. Students are permitted two attempts to complete the exam. If students are unsuccessful in their second attempt at the comprehensive exam, the department will make a recommendation for program termination.
- **Thesis.** Upon successful completion of the comprehensive examination, the candidate proceeds to complete an oral defence of the thesis proposal, a thesis, and an oral defence of the thesis.
- As governed by University of Toronto regulations, flexible-time students must be registered full-time and pay full-time fees for four years, and may apply to be registered part-time thereafter. The program requirements will be the same as those required for the full-time PhD. The difference is that students enrolled in the flexible-time PhD will have the flexibility of a part-time course load and will have an overall time limit to completion of eight years.

Program Length

6 years

Time Limit

8 years

[0] Course that may continue over a program. The course is graded when completed.

Music: Music PhD; Field: Musicology

Doctor of Philosophy (Field: Musicology)

Applicants may enter the PhD program via one of two routes: 1) following completion of an appropriate master's degree or 2) direct entry following completion an appropriate bachelor's degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- The PhD in Music, Musicology field is a research degree. Applicants must hold a master's degree with specialization in musicology, ethnomusicology, or theory, and must have an average standing of B+ or better.
- Applicants must submit an essay of approximately 3,000 words which demonstrates their ability to handle a research problem.
- Applicants, whether from the University of Toronto or elsewhere, may be interviewed by the department.

Program Requirements

- **Coursework.** Students holding a master's degree specializing in musicology, ethnomusicology, or theory must fulfil the following requirements:
  - A minimum of **3.0 full-course equivalents (FCEs)** as follows:
    - 0.5 FCE: MUS1250H *PhD Seminar* is taken in the first session
    - 0.5 FCE: MUS1999H[0] *Research in Musicology*
    - 1.0 FCE in graduate-only seminars in musicology
    - 1.0 FCE in electives, of which 0.5 FCE may be taken outside of Musicology, Ethnomusicology, and Music Theory (either in the Graduate Department of Music or another graduate unit). With approval from the CPA committee, one 0.5 FCE course may be deferred to the first session of Year 2.
  - Coursework should be completed during Year 1 with an average grade of at least A–. The exception is MUS1999H[0], which lays the groundwork for the field examination and the dissertation: this course must be started at the beginning of the second session of Year 1 and completed by the end of the first session of Year 2.
  - A course and program advising (CPA) committee will review course selections. The CPA committee will ensure course selections meet the requirements of the program and are appropriate to the field. Students may be required to take additional courses or acquire other skills to meet the needs of their proposed subjects of study.
- A set of three (written) **comprehensive exams** in (1) contemporary issues, (2) history of the field, and (3) repertoire, to be taken at the beginning of Year 2.
  - Students are permitted two attempts to complete each exam. A second attempt must take place at the beginning of the second session. If students are unsuccessful in their second attempt at the comprehensive exam, the department will make a recommendation for program termination.
- **Two research languages** in addition to English are required: one secondary and one primary. The goal is to have all language requirements fulfilled by the end of Year 2.
  - **The secondary language requirement** is the same as the MA language requirement. The default language for the secondary language requirement is German. Students who wish to choose languages other than German must submit a petition to the Division Head (either Musicology or Music Theory) by the end of the first session of Year 1. Students can fulfil the secondary language requirement in one of the following three ways:
    - Complete GER300H at U of T or its equivalent from another university, with a minimum grade of B+; or
    - Complete GER6000H; or
    - Pass a proficiency exam set by the Division.
  - Students who have fulfilled the MA language requirement at U of T may count this as the secondary language or use it as a stepping stone towards the primary language. Students are expected to complete the secondary language requirement by the end of Year 1.
  - **The primary language requirement** involves advanced reading proficiency in the chosen language. Students who wish to choose languages other than German must submit a petition to the Division Head (either Musicology or Music Theory) by the end of the first session of Year 1. Information on petitioning is available at the Faculty of Music Graduate Studies Office. Students can fulfil the secondary language requirement in one of the following three ways:
    - Complete a 400-level language course at U of T or its equivalent from another university, with a minimum grade of B+; or
    - Pass a proficiency exam set by the Division; or
    - Pass an exam in another graduate unit by arrangement through the Graduate Department of Music.
- Students are allowed two attempts at the **in-house exam**, after which they must take a language course at the appropriate MA or PhD level. All language requirements must be completed by the end of Year 3. Exceptions are granted only in extenuating circumstances and by petition.
- Students must prepare a **thesis** under the direction of an advisor and a committee and will defend it at a Doctoral Final Oral Examination. The thesis, including bibliography and appendices, should ideally be between 75,000 and 80,000 words in length. The department will not consider a thesis that exceeds 100,000 words.

- The **residency** requirement for all students is two years, whereby students must be on campus full-time and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- The PhD in Music, Musicology field is a research degree. Exceptional students may be admitted directly to the doctoral stream with an appropriate bachelor's degree (direct entry). Applicants must have an average standing of A– or better.
- Applicants must submit an essay of approximately 3,000 words which demonstrates their ability to handle a research problem.
- Applicants, whether from the University of Toronto or elsewhere, may be interviewed by the department.

Program Requirements

- **Coursework.** Students must complete **6.0 full-course equivalents (FCEs)** as follows:
  - 3.0 FCEs at the graduate level in Year 1 with a minimum average of A–. The exception is MUS1999H^0, which lays the groundwork for the field examination and the dissertation: this course must be started at the beginning of the second session of Year 1 and completed by the end of the first session of Year 2.
  - An intermediate-level language exam in Year 1. All language requirements must be completed by Year 3.
  - Following successful completion of Year 1, students must then complete all program requirements of the four-year PhD program.
  - 0.5 FCE: MUS1250H *PhD Seminar*, taken in the first session of Year 2.
  - 0.5 FCE: MUS1999H^0 *Research in Musicology.*
  - 1.0 FCE in graduate-only seminars in musicology.
  - 1.0 FCE in electives, of which 0.5 FCE may be taken outside of Musicology, Ethnomusicology, and Music Theory (either in the Graduate Department of Music or another graduate unit). With approval from the course and program advising (CPA) committee, one 0.5 FCE course may be deferred to the first session of Year 2.
  - The CPA committee will review course selections, ensuring that course selections meet the requirements of the program and are appropriate to the field. Students may be required to take additional courses or acquire other skills to meet the needs of their proposed subjects of study.
- A set of three (written) **comprehensive exams** in (1) contemporary issues, (2) history of the field, and (3) repertoire, to be taken at the beginning of Year 3.
  - Students are permitted two attempts to complete each exam. A second attempt must take place at the beginning of the second session. If students are unsuccessful in their second attempt at the comprehensive exam, the department will make a recommendation for program termination.
- **Two research languages** in addition to English are required: one secondary and one primary. The goal is to have all language requirements fulfilled by the end of Year 2.
  - **The secondary language requirement** is the same as the MA language requirement. The default language for the secondary language requirement is German. Students who wish to choose languages other than German must submit a petition to the Division Head (either Musicology or Music Theory) by the end of the first session of Year 1. Students can fulfil the secondary language requirement in one of the following three ways:
    - Complete GER300H at U of T or its equivalent from another university, with a minimum grade of B+; or
    - Complete GER6000H; or
    - Pass a proficiency exam set by the Division.
  - Students who have fulfilled the MA language requirement at U of T may count this as the secondary language or use it as a stepping stone towards the primary language. Students are expected to complete the secondary language requirement by the end of Year 1.
  - **The primary language requirement** involves advanced reading proficiency in the chosen language. Students who wish to choose languages other than German must submit a petition to the Division Head (either Musicology or Music Theory) by the end of the first session of Year 1. Information on petitioning is available at the Faculty of Music Graduate Studies Office. Students can fulfil the secondary language requirement in one of the following three ways:
    - Complete a 400-level language course at U of T or its equivalent from another university, with a minimum grade of B+; or

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- The PhD in Music, Music Theory field is a research degree. Exceptional students may be admitted directly to the doctoral stream with an appropriate four-year University of Toronto bachelor's degree (normally in music theory or musicology), or its equivalent from a recognized university, with at least an A– average in courses.
- Applicants must submit an essay of approximately 3,000 words pertaining to music theory and which demonstrates their ability to handle a research problem.
- Applicants, whether from the University of Toronto or elsewhere, may be interviewed by the department.

Program Requirements

- **Coursework.** Students must complete **6.0 full-course equivalents (FCEs)** as follows:
  - 3.0 FCEs at the graduate level in Year 1 with a minimum average of A–. The exception is MUS3997H^0 *Research in Music Theory*, which lays the groundwork for the field examination and dissertation: this course must be started at the beginning of the second session of Year 1 and completed by the end of the first session of Year 2.
  - An intermediate-level language exam in Year 1. All language requirements must be completed by Year 3.
  - Following successful completion of Year 1, students must then complete all program requirements of the four-year PhD program.
  - 0.5 FCE: MUS1250H *PhD Seminar*, taken in the first session of Year 2.
  - 0.5 FCE: MUS3997H^0 *Research in Music Theory*.
  - 1.0 FCE in graduate-only seminars in music theory.
  - 1.0 FCE in electives, of which 0.5 FCE may be taken outside of musicology, ethnomusicology, and music theory (either in the Graduate Department of Music or another graduate unit). With approval from the CPA committee, one 0.5 FCE course may be deferred to the first session of Year 2.
  - Students may be required to take additional courses or acquire other skills to meet the needs of their proposed subjects of study.
  - A course and program advising (CPA) committee will review course selections. The CPA committee will ensure course selections meet the requirements of the program and are appropriate to the field.
- A set of three (written) **comprehensive exams** in (1) history of the field; (2) current issues in the field; and (3) repertoire and analysis, to be taken at the beginning of Year 3.
  - Students are permitted two attempts to complete each exam. A second attempt must take place at the beginning of the second session. If the second attempt is unsuccessful, the department will recommend termination of the student's program.
- **Two research languages** in addition to English are required: one secondary and one primary. The goal is to have all language requirements fulfilled by the end of Year 2.
  - **The secondary language requirement** is the same as the MA language requirement. The default language for the secondary language requirement is German. Students who wish to choose languages other than German must submit a petition to the Division Head (either Musicology or Music Theory) by the end of the first session of Year 1. Students can fulfil the secondary language requirement in one of the following three ways:
    - Complete GER300H at U of T or its equivalent from another university, with a minimum grade of B+; or
    - Complete GER6000H; or
    - Pass a proficiency exam set by the Division.
  - Students who have fulfilled the MA language requirement at U of T may count this as the secondary language or use it as a stepping stone towards the primary language. Students are expected to complete the secondary language requirement by the end of Year 1.
  - **The primary language requirement** involves advanced reading proficiency in the chosen language. Students who wish to choose languages other than German must submit a petition to the Division Head (either Musicology or Music Theory) by the end of the first session of Year 1. Information on petitioning is available at the Faculty of Music Graduate Studies Office. Students can fulfil the primary language requirement in one of the following three ways:
    - Complete a 400-level language course at U of T or its equivalent from another university, with a minimum grade of B+; or
    - Pass a proficiency exam set by the Division; or
    - Pass an exam in another graduate unit by arrangement through the Graduate Department of Music.

Music: Music MA, PhD; Fields: Ethnomusicology and Musicology Courses

Final course offerings may vary. Students should consult the departmental handbook.

MUS1000H	Introduction to Music Research I
MUS1002H	Fieldwork Methods and Practicum
MUS1042H	The Ballets Russes
MUS1055H	Oratorio
MUS1056H	Approaches to Meaning in the Renaissance Motet
MUS1057H	Performing Politics: Individuality and the Collective in Music and Dance
MUS1058H	Music and Politics
MUS1059H	Ars Nova
MUS1061H	Performance Space in Seventeenth-Century Music
MUS1065H	Music History Pedagogy
MUS1066H	Music and the Racial and Ethnic Imaginations
MUS1069H	Remix Music, from Analogue to Digital
MUS1070H	Music, Genre, and Variation
MUS1131H	Popular Music and the Immaterial: From Spirituality to Virtuality
MUS1132H	Community-Engaged Music Archiving
MUS1134H	Music, Capital, Markets, and Industries
MUS1135H	Music, Sound, and the Environment
MUS1137H	Nationalism in Music and Dance
MUS1140H	Romantic Musings on the Middle Ages
MUS1141H	Ethnomusicology of Voice
MUS1144H	Music in the Films of Sir Alfred Hitchcock
MUS1145H	Sonic Innovations in Black Popular Musics
MUS1146H	Geographies of Opera: Wagner and Puccini
MUS1147H	Music After the DJ, from Soundsystems to Serato
MUS1149H	Jews' Sonic Worlds from Early Modernity to the Present
MUS1150H	Music and Land: Sounds of Belonging and Exclusion
MUS1169H	Listening to Cities: Music, Sound, and Noise in Urban Environments
MUS1223H	Virtuosity in Baroque Music
MUS1234H	Health, Aging and Popular Music
MUS1235H	Topics in Music and the History of Medicine
MUS1236H	Haydn
MUS1240H	Diegetic Music in Film
MUS1246H	Music and Colonialism
MUS1250H	PhD Seminar
MUS1254H	Critical Approaches to Popular Music
MUS1255H	Issues in Music and Philosophy
MUS1258H	Keywords in African Sound
MUS1260H	Music and the Enlightenment
MUS1267H	Popular Music and Identity
MUS1270H	Music and East Asian Modernity
MUS1271H	Music and Circulation
MUS1272H	19th Century Music and Discourses of Nature
MUS1275H	Sound and Music in the Middle East
MUS1276H	Music and Material Culture
MUS1277H	Ethnomusicology and Cultural Geography
MUS1278H	Music and Cultures of Listening in Late Modernity
MUS1279H	Ethnomusicology without Music
MUS1280H	Analysis and its Futures in Ethnomusicology
MUS1281H	Ethnomusicology Dissertation Writing Seminar
MUS1317H	Music in Canada
MUS1990H	MA Major Paper or Project
MUS1997H[0]	Research in Ethnomusicology
MUS1998H	Individual Reading and Research
MUS1999H[0]	Research in Musicology

[0] Course that may continue over a program. The course is graded when completed.

Music: Music MA, PhD; Field: Music and Health Sciences Courses

MUS7110H	Neurosciences of Music: Scientific Foundations, Clinical Translations
MUS7199H[0]	Special Research Topic in Music and Health
MUS7400H	Introduction to Music and Health Care
MUS7405H	Health in Music Performance
MUS7406H	Music Psychology
MUS7407H[0]	Clinical Research Practicum
MUS7412H	Elementary Improvisation Methods
MUS7415H	Topics in Music and Health
MUS7416H	Topics in Music and Health II
MUS7995Y[0]	Music and Health Doctoral Research Project
MUS7998H[0]	Readings in Advanced Topics in Music and Health

[0] Course that may continue over a program. The course is graded when completed.

Music: Music MA, PhD; Field: Music Education Courses

MUS2001H	Music in Cultural Perspective
MUS2004H	Music in Childhood
MUS2010H	Music and Social Movements
MUS2111H	Introduction to Research in Music Education
MUS2112H	Advanced Topics in Research in Music Education (prerequisite: MUS2111H)
MUS2113H	Musically Queer
MUS2115H	Truth and Reconciliation
MUS2116H	Moral Economy of Death in Music, Education, and Pedagogy
MUS2117H	Sound Studies and Music Education
MUS2132H	Jazz Education
MUS2151H	Philosophy and Music Education
MUS2160H	Contemporary Perspectives in Music Education
MUS2167H	Curriculum Inquiry
MUS2175H	Teacher Perspectives in Music Education
MUS2176H	Social Psychology of Music
MUS2185H	Curriculum and Instruction in Instrumental Music
MUS2186H	(Un)popular Music Education
MUS2199H[0]	Special Topics in Music Education
MUS2203H	Development of the Wind Band
MUS2222H	Conducting and Teaching Choral Music I
MUS2223H	Conducting and Teaching Choral Music II
MUS2990Y[0]	MA Major Essay (Music Education)
MUS2995Y[0]	Music Education Doctoral Research Project
MUS2998H	Reading in Advanced Topics in Music Education
MUS3231H	Conducting for Composers
MUS7406H	Music Psychology
MUS7412H	Elementary Improvisation Methods

[0] Course that may continue over a program. The course is graded when completed.

Music: Music MA, PhD; Field: Music Theory Courses

MUS1250H	PhD Seminar
MUS1990H	MA Major Paper
MUS1998H	Individual Reading and Research
MUS3101H	Seminar in Schenkerian Analysis I
MUS3113H	Symphonic Modernisms, 1900–1925
MUS3232H	Romantic Form
MUS3243H	The Music of Elliott Carter
MUS3245H	Music of Ligeti and Lutoslawski
MUS3248H	Current Compositional Practices
MUS3251H	Late Schubert
MUS3261H	Theory and Analysis of Popular Music
MUS3306H	Pedagogy of Music Theory
MUS3309H	Brahms: Symphonies and Chamber Music
MUS3316H	Cognitive Perspectives in Music Theory
MUS3403H	Theory and Analysis of Atonal Music
MUS3404H	Extended Tonal Techniques in Twentieth-Century Music

MUS3405H	Topics in the History of Music Theory: 1600–1950
MUS3412H	Theories of Rhythm and Metre
MUS3413H	Music and Drama in Wagner's Ring des Nibelungen
MUS3997H[0]	Research in Music Theory

[0] Course that may continue over a program. The course is graded when completed.

Music: Music Performance MMus; Field: Applied Music and Health

Master of Music (Field: Applied Music and Health)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- Applicants to the MMus program must hold a Bachelor of Music degree in the area of specialization from the University of Toronto with an average standing of mid-B or better over the final two years or an equivalent program (Bachelor of Music or Bachelor of Arts in Music) and standing from another recognized university.
- Selected applicants must pass an audition and interview.

Program Requirements

- **Coursework.** Students must complete **7.0 full-course equivalents (FCEs)** as follows:
  - 1.0 FCE: MUS4165Y[0] *Applied Music for Clinical Practice* (Year 1)
  - 0.5 FCE: MUS7110H *Neurosciences of Music: Scientific Foundations, Clinical Translations* (Year 1)
  - 0.5 FCE: MUS7400H *Introduction to Music and Health Care* (Year 1)
  - 0.5 FCE: MUS7407H[0] *Clinical Research Practicum* (Year 1)
  - 0.5 FCE: MUS7412H *Elementary Improvisation Methods* (Year 1)
  - 0.5 FCE: MUS7415H *Topics in Music and Health Care I* (Year 1)
  - 0.5 FCE: MUS7416H *Topics in Music and Health Care II* (Year 2)
  - 1.0 FCE: MUS4112Y *Clinical Performance Practicum* (Year 2)
  - 1.0 FCE: MUS4115Y *Principles of Clinical Performance Pedagogy* (Year 2)
  - 1.0 FCE: general electives (in Music or, with permission, outside of Music).
- MUS4166Y ***Performance Project*** (Credit/No Credit) (end of Year 1).
- MUS4188Y ***Public Capstone Presentation*** (Credit/No Credit) (end of Year 2).

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

[0] Course that may continue over a program. The course is graded when completed.

Music: Music Performance MMus; Field: Collaborative Piano

Master of Music (Field: Collaborative Piano)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- Applicants to the MMus program must hold a Bachelor of Music degree in the area of specialization from the University of Toronto with an average standing of mid-B or better over the final two years or an equivalent program and standing from another recognized university.
- Selected applicants must pass an audition.

Program Requirements

- **Coursework.** Students must complete **7.0 full-course equivalents (FCEs)** as follows:
  - 1.0 FCE: MUS4200Y *Critical Approaches to Music History*, normally taken in Year 1
  - 1.0 FCE: MUS4444Y[0] *Applied Music I*
  - 1.0 FCE: MUS4445Y[0] *Applied Music II*
  - 0.5 FCE selected from
    - MUS4600H *Performance Practices Before 1800*
    - MUS4610H *Analysis and Performance: Music of the Eighteenth and Nineteenth Centuries*
    - MUS4615H *Analysis and Performance Practices of Twentieth-Century Music*
  - 0.5 FCE: MUS4210H *Introduction to Music Analysis*
  - 0.5 FCE: MUS4213H *Advanced Repertoire for Singers and Pianists I*
  - 0.5 FCE: MUS4214H *Advanced Repertoire for Singers and Pianists II*
  - 0.5 FCE: MUS4502H *Collaborative Piano Techniques I*
  - 0.5 FCE: MUS4506H *Sonata Coaching I*
  - 0.5 FCE: MUS4508H *Collaborative Piano Techniques II* **or** MUS4509H *Collaborative Piano Techniques II Vocal*
  - 0.5 FCE: elective.
- Based on the outcome of preliminary consultations with the department, students may be required to take:
  - 0.5 FCE: MUS4520H *Advanced Diction Studies I* **or**
  - 0.5 FCE: MUS4521H *Advanced Diction Studies II* **or**
  - 0.5 FCE: MUS4522H *Advanced Diction Studies III*.

- **Two recitals**, one in each year:
  - 1.0 FCE: MUS6666Y[0] *Recital I*
  - 1.0 FCE: MUS8888Y[0] *Recital II*.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

[0] Course that may continue over a program. The course is graded when completed.

Music: Music Performance MMus; Field: Composition

Master of Music (Field: Composition)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- Applicants to the MMus program must hold a Bachelor of Music degree in the area of specialization from the University of Toronto with an average standing of mid-B or better over the final two years or an equivalent program and standing from another recognized university.
- Applicants must submit several original compositions, at least one of which shall be with moderately large instrumentation.

Program Requirements

- **Coursework.** Students must complete a minimum of **6.0 full-course equivalents (FCEs)** taken over two years, including:
  - 1.0 FCE: MUS3100Y *MMus Advanced Composition I*
  - 1.0 FCE: MUS3105Y *MMus Advanced Composition II*
  - 1.0 FCE: MUS3990Y *MMus Composition Thesis*
  - 3.0 elective FCEs.
- Students may be required to take courses in addition to the 6.0 FCEs based on the results of diagnostic tests in musical analysis, counterpoint, and harmony given upon entrance.
- Under the guidance of an advisor, each student will prepare an **original composition** in large form or an electroacoustic composition of comparable dimensions which will be defended at a **Final Oral Examination**.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Music: Music Performance MMus; Field: Conducting

Master of Music (Field: Conducting)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- Applicants to the MMus program must hold a Bachelor of Music degree in the area of specialization from the University of Toronto with an average standing of mid-B or better over the final two years or an equivalent program and standing from another recognized university.
- Selected applicants must pass an audition.

Program Requirements

- **Coursework.** Students must complete **7.0 full-course equivalents (FCEs)** including:
  - 1.0 FCE: MUS4200Y *Critical Approaches to Music History*, normally taken in Year 1.
  - 0.5 FCE selected from:
    - MUS4600H *Performance Practices Before 1800* **or** MUS4606H *Special Topics in Performance Practice*
    - MUS4610H *Analysis and Performance: Music of the Eighteenth and Nineteenth Centuries*
    - MUS4615H *Analysis and Performance Practices of Twentieth-Century Music*
  - 0.5 FCE: MUS4210H *Introduction to Music Analysis*
  - 1.0 FCE: MUS4444Y[0] *Applied Music I*
  - 1.0 FCE: MUS4445Y[0] *Applied Music II*
  - Students in **orchestral conducting** must also complete 3.0 FCEs as follows:
    - 0.5 FCE: MUS4220H *Orchestral Conducting I*
    - 0.5 FCE: MUS4221H *Orchestral Conducting II*
    - 1.0 FCE: MUS4222Y *Advanced Orchestral Conducting*
    - 0.5 FCE: MUS4223H *Choral Conducting I*
    - 0.5 FCE: elective
  - Students in **wind ensemble conducting** must also complete 3.0 FCEs as follows:
    - 0.5 FCE: MUS2203H *Development of the Wind Band*
    - 0.5 FCE: MUS4226H *Wind Ensemble Conducting I*
    - 0.5 FCE: MUS4227H *Wind Ensemble Conducting II*
    - 0.5 FCE: MUS4228H *Advanced Wind Conducting I*
    - 0.5 FCE: MUS4229H *Advanced Wind Conducting II*
    - 0.5 FCE: elective
  - Students in **choral conducting** must also complete 3.0 FCEs as follows:
    - 0.5 FCE: MUS4220H *Orchestral Conducting I*
    - 0.5 FCE: MUS4223H *Choral Conducting I*

        - 0.5 FCE: MUS4224H *Choral Conducting II*
        - 1.0 FCE: MUS4225Y *Advanced Choral Conducting*
        - 1.0 FCE: MUS4230Y *Vocal-Choral Pedagogy for Conductors*
        - 0.5 FCE: MUS4700H *Major Ensemble I* (choral).
- **Two recitals**, one in each year:
    - 1.0 FCE: MUS6666Y[0] *Recital I*
    - 1.0 FCE: MUS8888Y[0] *Recital II*.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

[0] Course that may continue over a program. The course is graded when completed.

Music: Music Performance MMus; Field: Historical Performance

Master of Music (Field: Historical Performance)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- Applicants to the MMus program must hold a Bachelor of Music degree in the area of specialization from the University of Toronto with an average standing of mid-B or better over the final two years or an equivalent program and standing from another recognized university.
- Selected applicants must pass an audition.

Program Requirements

- **Coursework.** Students must complete **7.0 full-course equivalents (FCEs)** as follows:
    - 5.0 FCEs must include:
        - 1.0 FCE: MUS4200Y *Critical Approaches to Music History*, normally taken in Year 1
        - 2.0 FCEs: MUS4444Y[0] *Applied Music I* and MUS4445Y[0] *Applied Music II*
        - 0.5 FCE selected from:
            - MUS4600H *Performance Practices Before 1800*
            - MUS4606H *Special Topics in Performance Practice*
            - MUS4610H *Analysis and Performance: Music of the Eighteenth and Nineteenth Centuries*
            - MUS4615H *Analysis and Performance Practices of Twentieth-Century Music*
        - 0.5 FCE: MUS4210H *Introduction to Music Analysis*
        - 1.0 FCE in large ensembles:
            - MUS4774H *Schola Cantorum I* and MUS4775H *Schola Cantorum II* **or**
            - MUS4776H *Collegium Musicum I* and MUS4777H *Collegium Musicum II*
    - 2.0 elective FCEs from a specified list approved by the department.
- **Two recitals**, one in each year. Recitals may include a chamber component with the approval of the department.
    - 1.0 FCE: MUS6666Y[0] *Recital I*
    - 1.0 FCE: MUS8888Y[0] *Recital II*.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

[0] Course that may continue over a program. The course is graded when completed.

Music: Music Performance MMus; Field: Instrumental

Master of Music (Field: Instrumental)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- Applicants to the MMus program must hold a Bachelor of Music degree in the area of specialization from the University of Toronto with an average standing of mid-B or better over the final two years or an equivalent program and standing from another recognized university.
- Selected applicants must pass an audition.

Program Requirements

- **Coursework.** Students must complete **7.0 full-course equivalents (FCEs)**, of which 5.0 FCEs must include:
    - 1.0 FCE: MUS4200Y *Critical Approaches to Music History*, normally taken in Year 1
    - 1.0 FCE: MUS4444Y[0] *Applied Music I* and MUS4445Y[0] *Applied Music II*
    - 1.0 FCE selected from
        - MUS4600H *Performance Practices Before 1800* **or** MUS4606H *Special Topics in Performance Practice*
        - MUS4610H *Analysis and Performance: Music of the Eighteenth and Nineteenth Centuries*
        - MUS4615H *Analysis and Performance Practices of Twentieth-Century Music*
    - Students in brass, percussion, strings, and woodwinds will complete 1.0 FCE as two years of ensemble performance. Placement to be determined by audition.

- Students in piano solo performance must complete MUS5700H *Piano Master Class I* (0.5 FCE) and MUS5701H *Piano Master Class II* (0.5 FCE).
- In place of the ensemble performance, accordion, guitar, harp, harpsichord, organ, and piano students will select 1.0 FCE in elective courses from a specified list approved by the department.

- **Two recitals**, one in each year. Recitals may include a chamber music component with the approval of the department:
  - 1.0 FCE: MUS6666Y[0] *Recital I*
  - 1.0 FCE: MUS8888Y[0] *Recital II*.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

[0] Course that may continue over a program. The course is graded when completed.

Music: Music Performance MMus; Field: Jazz

Master of Music (Field: Jazz)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- Applicants to the MMus program must hold a Bachelor of Music degree in the area of specialization from the University of Toronto with an average standing of mid-B or better over the final two years or an equivalent program and standing from another recognized university.
- Selected applicants must pass an audition.

Program Requirements

- **Coursework.** Students must complete **7.0 full-course equivalents (FCEs)** including:
  - 1.0 FCE: MUS4300Y, normally taken in Year 1
  - 1.0 FCE: MUS4444Y[0] *Applied Music I*
  - 1.0 FCE: MUS4445Y[0] *Applied Music II*
  - 1.0 FCE: MUS4606H *Special Topics in Performance Practice* **and** MUS4615H *Analysis and Performance Practices of Twentieth-Century Music*
  - 1.0 FCE: either
    - MUS4310Y *Advanced Jazz Composition and Arranging I* **or**
    - MUS4311Y *Advanced Jazz Composition and Arranging II* **or**
    - 1.0 FCE chosen from a specified list approved by the department.
  - Students must also include in their programs 1.0 FCE selected from one or more of the following areas:
    - Small Group Jazz Ensemble Performance
      - MUS4740H *Small Group Jazz Performance I*
      - MUS4741H *Small Group Jazz Performance II*
      - MUS4742H *Small Group Jazz Performance III*
    - Jazz Orchestra
      - MUS4750H *Jazz Orchestra I*
      - MUS4751H *Jazz Orchestra II*
      - MUS4752H *Jazz Orchestra III*
      - MUS4753H *Jazz Orchestra IV*
    - Vocal Jazz Ensemble
      - MUS4760H *Vocal Jazz Ensemble I*
      - MUS4761H *Vocal Jazz Ensemble II*
      - MUS4762H *Vocal Jazz Ensemble III*
      - MUS4763H *Vocal Jazz Ensemble IV*.
- **Two recitals**, one in each year. However, students may elect to replace one recital with a significant recording project.
  - 1.0 FCE: MUS6666Y[0] *Recital I*
  - 1.0 FCE: MUS8888Y[0] *Recital II*.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

[0] Course that may continue over a program. The course is graded when completed.

Music: Music Performance MMus; Field: Music Technology and Digital Media

Master of Music (Field: Music Technology and Digital Media)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- Applicants to the MMus program must hold a Bachelor of Music degree in the area of specialization from the University of Toronto with an average standing of mid-B or better over the final two years or an equivalent program and standing from another recognized university.
- Applicants must submit a portfolio (e.g., scores, recordings, multimedia creations) that demonstrates at least two of the following:
  - knowledge of computer applications in music;
  - competency in music performance or composition (acoustic or digital);

    - released body of musical works/recordings as composer, sound engineer, or producer.
- Selected applicants must pass an audition and interview.

Program Requirements

- **Coursework.** Students must complete **7.0 full-course equivalents (FCEs)** as follows:
    - Year 1 (3.5 FCEs)
        - 0.5 FCE: MUS3610H *Music Entrepreneurship: Music and Cities*
        - 0.5 FCE: MUS3611H *Creative Applications of Technology I*
        - 0.5 FCE: MUS3612H *Creative Applications of Technology II*
        - 0.5 FCE: MUS3614H *Sound Recording I*
        - 0.5 FCE: MUS3615H *Sound Recording II*
        - 1.0 elective FCE:
            - 0.5 FCE selected from Music Technology and Digital Media and
            - 0.5 FCE selected from any of the Faculty of Music graduate courses.
    - Year 2 (3.5 FCEs)
        - 0.5 FCE: JDM3619H *Digital Media Distribution* (Credit/No Credit)
        - 2.0 FCEs: electives selected from an approved department list, or from another graduate unit, with permission.
        - 1.0 FCE: MUS3666Y[0] *Music Technology and Digital Media Major Project* (Credit/No Credit), completed in Year 2, consisting of a new musical composition or version recorded, mixed, produced, and mastered, integrating at least two media such as electronic and acoustic, music for picture, or live performance with multimedia.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

[0] Course that may continue over a program. Credit is given when the course is completed.

Music: Music Performance; MMus Field: Opera

Master of Music (Field: Opera)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- Applicants to the MMus program must hold a Bachelor of Music degree in the area of specialization from the University of Toronto with an average standing of mid-B or better over the final two years or an equivalent program and standing from another recognized university.
- Selected applicants must pass an audition.

Program Requirements

- **Coursework.** Students must complete **7.0 full-course equivalents (FCEs)** as follows:
    - 1.0 FCE: MUS4200Y *Critical Approaches to Music History*, taken in Year 1
    - 0.5 FCE: MUS4210H *Introduction to Music Analysis*
    - 1.0 FCE: MUS4444Y[0] *Applied Music I*
    - 1.0 FCE: MUS4445Y[0] *Applied Music II*
    - 1.0 FCE: MUS4513Y *Operatic Repertory*, taken in Year 2
    - 2.0 FCEs: MUS4900Y *Operatic Studies I* and MUS4901Y *Operatic Studies II*
    - 0.5 FCE: elective chosen from a specified list approved by the department.
- **Performance** in operatic productions will be evaluated by a committee and assigned grades under MUS4966Y[0] *Operatic Roles I* (1.0 FCE) and MUS4988Y[0] *Operatic Roles II* (1.0 FCE).

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

[0] Course that may continue over a program. The course is graded when completed.

Music: Music Performance MMus; Field: Piano Pedagogy

Master of Music (Field: Piano Pedagogy)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- Applicants to the MMus program must hold a Bachelor of Music degree in the area of specialization from the University of Toronto with an average standing of mid-B or better over the final two years or an equivalent program and standing from another recognized university.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- Applicants to the MMus program must hold a Bachelor of Music degree in the area of specialization from the University of Toronto with an average standing of mid-B or better over the final two years or an equivalent program and standing from another recognized university.
- Selected applicants must pass an audition.

Program Requirements

- **Coursework.** Students must complete **8.0 full-course equivalents (FCEs)** as follows:
  - 1.0 FCE: MUS4200Y *Critical Approaches to Music History*, normally taken in Year 1
  - 0.5 FCE: MUS4210H *Introduction to Music Analysis*
  - 0.5 FCE selected from:
    - MUS4213H *Advanced Repertoire for Singers and Pianists I*
    - MUS4231H *Advanced Vocal Repertoire Study I*
  - 1.0 FCE: MUS4240Y *Introduction to Voice Pedagogy and Vocology*
  - 1.0 FCE: MUS4241Y *Advanced Vocal Pedagogy and Vocology*
  - 0.5 FCE: MUS4248H *Optimizing the Singing Mind*
  - 1.0 FCE: MUS4444Y[0] *Applied Music I*
  - 1.0 FCE: MUS4445Y[0] *Applied Music II*
  - 0.5 FCE selected from
    - MUS4600H *Performance Practices Before 1800*
    - MUS4610H *Analysis and Performance: Music of the Eighteenth and Nineteenth Centuries*
    - MUS4615H *Analysis and Performance Practices of Twentieth-Century Music*
  - 0.5 FCE: MUS7406H *Music Psychology*
  - 0.5 FCE: elective chosen from a list of courses approved by the department.
- **Two recitals:**
  - 1.0 FCE: MUS6666Y[0] *Recital I*
  - 1.0 FCE: MUS8888Y[0] *Recital II*.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

[0] Course that may continue over a program. The course is graded when completed.

Music: Music Performance DMA; Field: Composition

Doctor of Musical Arts (Field: Composition)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.
- Applicants for the DMA in the Composition field must hold a Master of Music Performance degree specializing in Composition from the University of Toronto, or its equivalent from another recognized university, with an average standing of B+ or better.
- Two or more extended compositions in various media and a recording of at least one of these works must be submitted together with the application and complete academic credentials.

Program Requirements

- **Coursework.** Students must complete a minimum of **5.0 full-course equivalents (FCEs)**, including:
  - 1.0 FCE: MUS3300Y *DMA Advanced Composition I*
  - 1.0 FCE: MUS3305Y *DMA Advanced Composition II*
  - 1.0 FCE: MUS3999Y[0] *Research in Composition*, selected in consultation with the advisory committee
  - Students entering from outside the University of Toronto will be given diagnostic tests in musical analysis, counterpoint, and harmony, the result of which may be additional course requirements beyond the 5.0 FCEs.
- Upon completion of coursework, students are required to present a **recital of original works** (MUS3888Y[0] *DMA Recital of Works*; 1.0 FCE) to the satisfaction of the department. In some cases, professional-quality tapes of performances totalling the equivalent of a full recital may be substituted.
- The **thesis** for the DMA shall be an extended composition approved by the department, prepared under the supervision of an advisory committee and defended at the **Doctoral Final Oral Examination**.
- The **residency** requirement for all students is two years, whereby students must be on campus full-time and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.

Program Length

4 years full-time

Time Limit

6 years full-time

[0] Course that may continue over a program. The course is graded when completed.

Music: Music Performance DMA; Field: Performance

Doctor of Musical Arts (Field: Performance)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Music's additional admission requirements stated below.

- Applicants for the DMA in the Performance field must hold a Master of Music degree specializing in Performance from the University of Toronto, or its equivalent from another university, with an average standing of B+ or better.
- Applicants are required to pass an audition.
- An essay of approximately 3,000 words which demonstrates the student's ability to handle a research problem.
- Applicants, whether from the University of Toronto or elsewhere, may be interviewed by the department.

Program Requirements

- **Coursework.** Students must complete a minimum of **5.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE: MUS4800H *DMA Seminar,* taken in the first session.
  - 0.5 FCE: MUS4899H *Research in Performance,* begun in the second session.
  - 1.0 FCE: MUS4844Y[0] *Advanced Applied Music I*.
  - 1.0 FCE: MUS4845Y[0] *Advanced Applied Music II*.
  - The remaining 2.0 FCEs must be graduate seminar courses.
  - Coursework should be completed by the end of Year 2 with an average grade of at least A–. Exceptions to the time of completion are:
    - MUS4899Y *Research in Performance*, to be taken in the Winter session of Year 1 and the Fall of Year 2, which lays the groundwork for the dissertation research and leads to a field examination at the end of Year 2; and
    - MUS4845Y[0] *Advanced Applied Music II*. Students may be required to take additional courses or acquire other skills to meet the needs of their proposed areas of study.
- Students are permitted two attempts to complete the **field examination**. If students are unsuccessful in their second attempt at the field examination, the department will make a recommendation for program termination.
- **Three DMA recitals.**
  - 1.0 FCE: MUS4866Y[0] *DMA Recital I*
  - 1.0 FCE: MUS4877Y[0] *DMA Recital II*
  - 1.0 FCE: MUS4888Y[0] *DMA Recital III*.
  - The format of these recitals will be determined in consultation with the supervisor and the supervisory committee.
- Reading knowledge of **one language** other than English is required. The required language will be determined by the department. The department may require competence in additional languages. All remaining course and language requirements, including the field exam, must be completed successfully by the end of Year 2.
- The **residence** requirement is two years, whereby students must be on campus full-time and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.

Degree Programs

Near and Middle Eastern Civilizations

MA and PhD

- Fields:
  - Ancient and Near Eastern Studies;
  - Middle Eastern and Islamic Studies

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Diaspora and Transnational Studies
  - Near and Middle Eastern Civilizations, MA, PhD
- Jewish Studies
  - Near and Middle Eastern Civilizations, MA, PhD
- Mediterranean Archaeology
  - Near and Middle Eastern Civilizations, PhD
- Sexual Diversity Studies
  - Near and Middle Eastern Civilizations, MA, PhD
- Women and Gender Studies
  - Near and Middle Eastern Civilizations, MA, PhD

Overview

In the Department of Near and Middle Eastern Civilizations, faculty conduct research in the following areas: Egyptology, including archaeology, language, history, and religion; Mesopotamia and the Near East, including archaeology and Assyriology; Syro-Palestinian archaeology; Hebrew and Judaic studies, including Biblical and Rabbinic Hebrew, law, history, religion, and modern Hebrew literature; Aramaic (Ancient, Biblical, Targumic, and Talmudic Aramaic) and Syriac studies, including language, history, religion; Arabic studies; Islamic studies; history of the Islamic world and the modern Middle East; Islamic art; Persian studies; and Turkish studies, including Ottoman language and history.

NMC: Near and Middle Eastern Civilizations MA

Master of Arts

Program Description

Depending on the amount of undergraduate preparation, students may enrol in either a two-year MA program or a one-year MA program option. Students can also complete the MA through a coursework option or a thesis option. The MA program may be taken on a part-time basis.

MA Program (One-Year Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Near and Middle Eastern Civilizations' additional admission requirements stated below.
- An appropriate bachelor's degree in a relevant program from a recognized university with an average of at least B+, or equivalent, in the final year.
- Two letters of reference.
- Statement of academic intent.
- Some programs may require appropriate knowledge of a primary source language, or one or more European languages.
- Students choosing to focus on Islamic Art and Material Culture must have a reading knowledge of French or German at the time of admission.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

Program Requirements

Coursework Option

- Students must complete 3.0 full-course equivalents (FCEs).

Thesis Option

- Students must complete a thesis (1.0 FCE) under the guidance of a supervisor on a topic approved by the supervisor.
- 2.0 FCEs in coursework.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
9 sessions part-time

Time Limit

3 years full-time;
6 years part-time

MA Program (Two-Year Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Near and Middle Eastern Civilizations' additional admission requirements stated below.
- An appropriate bachelor's degree in a relevant program from a recognized university with an average of at least B+, or equivalent, in the final year.
- Two letters of reference.
- Statement of academic intent.
- Some programs may require appropriate knowledge of a primary source language, or one or more European languages.
- Students choosing to focus on Islamic Art and Material Culture must have a reading knowledge of French or German at the time of admission.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

Program Requirements

All students must complete 6.0 full-course equivalents (FCEs). Students who choose to focus on Islamic art and material culture must successfully complete at least 2.0 FCEs each in art and in Near and Middle Eastern Civilizations.

Coursework Option

- Students must complete 6.0 FCEs.

Thesis Option

- Students must complete a thesis (1.0 FCE) under the guidance of a supervisor on a topic approved by the supervisor.
- 5.0 FCEs in coursework.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S);
18 sessions part-time

Time Limit

3 years full-time;
6 years part-time

NMC: Near and Middle Eastern Civilizations PhD

Doctor of Philosophy

Program Description

Applicants may enter the PhD program via one of two routes: 1) following completion of an appropriate MA or 2) direct entry following completion of a bachelor's degree.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Near and Middle Eastern Civilizations' additional admission requirements stated below.
- Admission via one of two routes:
  - MA degree in a relevant program from a recognized university with at least an A– average or equivalent in courses taken for the MA program.
  - Direct entry from a bachelor's degree for exceptionally qualified applicants, at the discretion of the department.
- Ability to conduct independent research.
- Competence in primary source language(s) relevant to the applicant's research.
- Two letters of reference.
- Statement of academic intent.
- Writing sample of no more than 12 double-spaced pages including footnotes.
- Curriculum vitae (CV)/resumé up to three pages in length.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

Program Requirements

- The program of study is determined in consultation with the department and includes **written and oral general examinations**.
- Each year of the PhD program, students are obligated to consult with their advisor and Graduate Coordinator to see that appropriate coursework is done and that the language requirements are completed on schedule.
- The minimum **course requirement** will normally be **6.0 full-course equivalents (FCEs)** as follows:
  - Year 1: 3.0 FCEs.
  - Year 2: 3.0 FCEs.
- Students who have completed a two-year MA in the department may apply for a course reduction that will be granted at the discretion of the department. The reduction should normally be 1.0 FCE, but may be up to 3.0 FCEs in cases of students who also have an exceptional preparation in their area of study at the BA level. Coursework and all language requirements are to be completed by the end of Year 2.
- In consultation with the supervisor, examining committee, and supervisory committee (if it has already been established), students will prepare a **short draft proposal** of two to four pages with bibliography by May of Year 2. The short draft proposal will direct some of the preparation for the **comprehensive examinations** which will take place by the end of the first session of Year 3. A final proposal of at least 10 pages plus bibliography is to be approved by the supervisory committee within one to two months of the completion of the comprehensive exams.
- Students are required to demonstrate reading comprehension in **two languages** of modern scholarship (typically French and German), the first by the end of Year 1 in residence, and the second by the end of Year 2 of residence. A language other than French or German may be substituted with approval of the Academic Advisor and the Graduate Coordinator. In some cases, the department may require competence in another language relevant to the student's program. The choice of language(s) must be approved by the department.
- **Residence**. Students are required to be registered on campus for the period during which coursework requirements are being fulfilled, and in no case for less than two academic years.
- **Thesis**. The thesis must embody the results of original investigation and constitute a significant contribution to knowledge in the field. It must be based on research conducted while registered in the PhD program. The thesis must be successfully defended at a Final Oral Examination.

Program Length

4 years full-time; 5 years direct-entry

Time Limit

6 years full-time; 7 years direct-entry

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Addiction Studies
  - Nursing Science, PhD
- Aging, Palliative and Supportive Care Across the Life Course
  - Nursing Science, MN, PhD
- Bioethics
  - Nursing Science, MN, PhD
- Global Health (U of T Global Scholar)
  - Nursing Science, PhD
- Resuscitation Sciences (admissions have been administratively suspended)
  - Nursing Science, MN, PhD
- Women's Health
  - Nursing Science, MN, PhD

Overview

The Lawrence S. Bloomberg Faculty of Nursing is committed to student-centred learning that encompasses the principles of empowerment, engagement, discovery, diversity, equity, and knowledge transformation for nursing practice.

Students have opportunities to engage with expert clinicians, scientists, and theorists and have access to a variety of interprofessional and interdisciplinary experiences with other health profession Faculties, the University, and community partners. These resources enable students to develop their intellectual capacity; their research, critical thinking, judgment abilities; and skills required to be exemplar nurses, advanced practice nurses, leaders, scientists, scholars, and educators.

Nursing Science: Nursing Science MN

Master of Nursing

Program Description

The MN program prepares advanced nurses with specialized knowledge, skills, and expertise in a defined area of nursing. The program offers three fields: Clinical Nursing; Health Systems Leadership and Administration; and Nurse Practitioner.

Field: Clinical Nursing

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Nursing Science's additional admission requirements stated below.
- Applicants must hold the BScN degree of the University of Toronto or an equivalent degree. Applicants must have obtained at least a mid-B standing in the final year of undergraduate study and, in addition, must have obtained at least a B standing in the next-to-final year.
- Applicants must hold current registration as a Registered Nurse or equivalent.
- For further information about applying, please email connect.nursing@utoronto.ca or visit the website.

Program Requirements

- To qualify for the degree, students shall complete a program of study outlined by the Graduate Department of Nursing Science.
- **Coursework.** The MN program requires **5.0 full-course equivalents (FCEs)** as follows:
  - NUR1170H, NUR1171H, NUR1174H, NUR1175H, NUR1176H, and NUR1177H;
  - a 1.0 FCE practicum-based course (NUR1179Y), which should be taken alone in the final session and only after completion of all other coursework and program requirements;
  - two elective field of study courses (1.0 FCE). One of these two field of study courses may be selected from outside the Faculty of Nursing.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Field: Health Systems Leadership and Administration

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Nursing Science's additional admission requirements stated below.
- Applicants must hold the BScN degree of the University of Toronto or an equivalent degree. Applicants must have obtained at least a mid-B standing in the final year of undergraduate study and, in addition, must have obtained at least a B standing in the next-to-final year.
- Applicants must hold current registration as a Registered Nurse or equivalent.
- For further information about applying, please email connect.nursing@utoronto.ca or visit the Nursing website.

Program Requirements

- To qualify for the degree, students shall complete a program of study outlined by the Graduate Department of Nursing Science.
- **Coursework.** The MN program requires **5.0 full-course equivalents (FCEs)** including:
  - NUR1016H, NUR1027H, NUR1127H, NUR1151H, NUR1152H, NUR1156H, NUR1157H, and NUR1161H;
  - a 1.0 FCE practicum-based course (NUR1169Y), which should be taken alone in the final session and only after completion of all other coursework and program requirements.
- This field of study is offered in a hybrid learning format including online and required on-campus, in-class learning. There are two required on-campus learning periods: one embedded in NUR1151H in Year 1 and the second embedded in NUR1169Y in Year 2. Courses are prescribed and normally students progress through the program within a defined student cohort. Normally, successful completion of Year 1 courses is required for students to enter Year 2 of their program.
- **Year 1** course sequencing:
  - Fall — NUR1156H and NUR1027H
  - Winter — NUR1127H and NUR1151H*
  - Summer — NUR1152H*
- **Year 2** course sequencing:
  - Fall — NUR1016H and NUR1161H
  - Winter — NUR1157H
  - Summer — NUR1169Y*
- *NUR1151H and NUR1169Y both include a required on-campus, in-class learning experience. NUR1152H and NUR1169Y include a required practicum component and required eLearning activities.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Field: Nurse Practitioner

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Nursing Science's additional admission requirements stated below.
- Applicants must hold the BScN degree of the University of Toronto or an equivalent degree. Applicants must have obtained at least a mid-B standing in the final year of undergraduate study and, in addition, must have obtained at least a B standing in the next-to-final year.
- Applicants must hold current registration as a Registered Nurse or equivalent and must have a minimum of two years of clinical experience as a Registered Nurse.
- For further information about applying, please email connect.nursing@utoronto.ca or visit the Nursing website.

Program Requirements

- To qualify for the degree, students shall complete a program of study outlined by the Graduate Department of Nursing Science.
- **Coursework.** The MN program requires **5.5 full-course equivalents (FCEs)**, including:
  - NUR1094H, NUR1095H, NUR1097H, and NUR1138H;
  - a combination of courses based on the student's emphasis:
    - Adult: NUR1101H; NUR1115H; NUR1140H; NUR1141H; NUR1215H; and NUR1221Y **or**
    - Paediatric*: NUR1102H; NUR1116H and NUR1216H; NUR1144H; NUR1145H; and NUR1222Y **or**
    - Primary Health Care — Global Health: NUR1114H; NUR1117H and NUR1217H; NUR1142H; NUR1143H; and NUR1223Y
    - NUR1221Y, NUR1222Y, and NUR1223Y must be taken alone in the final session and only after completion of all other coursework and program requirements.
- This field of study is offered in a hybrid learning format including online and required on-campus, in-class learning.
- *The Paediatric emphasis is available to students every other year. Visit the Nursing website for details.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Nursing Science: Nursing Science DN

Doctor of Nursing

Program Description

The Doctor of Nursing (DN) is a professional doctoral program designed to prepare nurses with the required skills to apply knowledge in diverse settings and (a) lead in dynamic, fast-paced, technologically advanced and sophisticated health-care environments and (b) teach in nursing education. Students will engage in advanced education related to leadership and knowledge application in health-care or nursing education.

The DN is offered in a hybrid online (required courses) and on-site (required residencies) delivery model. Students will normally complete this full-time program in eight sessions compressed over three years due to cohort-based delivery and extensive use of the Summer sessions.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Nursing Science's additional admission requirements stated below.
- Applicants must have a master's degree in nursing or a closely related field, such as education, public health, health science, health policy, or business administration, with a minimum B+ standing from a recognized university.
- Applicants must hold current registration as a Registered Nurse and must have a minimum of two years of relevant health-care leadership experience or advanced nursing education teaching experience.
- Applicants must provide three reference letters: two work-related and one academic.
- Applicants must submit a letter of intent outlining their reasons for applying to the program and a proposed thesis project.
- Applicants whose primary language is not English and who have graduated from a university where the primary language of instruction and examination is not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements. An interview may be required.

Program Requirements

- **Coursework.** Students must successfully complete a total of **4.0 full-course equivalents (FCEs)** as follows:
  - 1.5 required FCEs: NUR1301H, NUR1302H, and NUR1303H
  - 0.5 elective FCE relevant to the student's focus: NUR1331H, NUR1332H, NUR1333H, NUR1334H, or NUR1335H
  - 2.0 FCEs in seminar courses: NUR1311H, NUR1312H, NUR1313H, and NUR1314H.
- **Internships or practica.** Students must complete two internships (health-care leadership) or two practica (educational leadership).
- **Residencies.** Students must complete three residencies consisting of intensive on-campus classes.
- **Symposium.** In the final session, students will present their thesis and discuss knowledge transfer and exchange plans for implementing their innovations in practice, policy, and/or education.
- **Literature review paper.** Students must demonstrate their ability to review, analyze, and synthesize relevant material by the end of the third session (Year 1). The paper includes published and peer-reviewed research, gray literature, policies, guidelines, etc.
- **Thesis.** Students must complete a written thesis proposal by the end of the fifth session (Year 2). The thesis requires students to identify and investigate a practice problem, articulate and apply theory and evidence to the problem, design strategies for action to address the problem, report on strategies implemented to address the problem, and discuss the results and knowledge dissemination plan.
- **Doctoral Final Oral Examination (FOE).** Students must complete an FOE of the thesis by the end of the final session in Year 3.

Program Length

4 years

Time Limit

6 years

Nursing Science: Nursing Science PhD

Doctor of Philosophy

Program Description

The full-time PhD program prepares scientists with the required analytical and research skills to study nursing, health systems, or other related problems.

Applicants may enter the PhD program via one of two routes: 1) following completion of an appropriate master’s degree; or 2) transfer from the University of Toronto MN program.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies.
- Applicants must also satisfy the Graduate Department of Nursing Science's additional admission requirements stated below. Applicants must have a master's degree or its equivalent in nursing or related field with at least a B+ standing from a recognized university.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

- For further information about admissions, please contact the Graduate Department of Nursing Science.

Program Requirements

Courses

Successful completion of **all required** courses by the end of Year 2 in the program.

- Students must successfully complete a **minimum of 3.0 full-course equivalents (FCEs)** that include:
  - PhD Seminar (1.0 FCE)
  - Research methods course NUR1079Y *Research Methods for Knowledge Discovery* (1.0 FCE)
  - one course (0.5 FCE) related to the substantive area of study and thesis plans
  - one course (0.5 FCE) may be either a method or substantive area course as determined by the student and the supervisory committee.
- Students must attain a minimum average standing at the B+ level for required courses.
- Students are normally expected to complete all required courses (3.0 FCEs) by the end of Year 2. If all required courses are not successfully completed (with a minimum average standing at the B+ level) by the end of Year 3, the Faculty of Nursing will normally make a recommendation to SGS for termination of registration.

Literature Review Paper

Successful completion of the literature review paper.

- The literature review paper topic as well as type and format of the literature review paper must be approved by the supervisor (with signed documentation by the student and supervisor) by March 1 of Year 1. This agreement should specify the problem statement, the format/type of literature review that is appropriate to the area of study, and to the scholarly traditions within which the student's research is situated.
- The literature review paper must be submitted by September 30 of Year 2. The submitted literature review paper will be formally reviewed and evaluated by the supervisor and at least one additional thesis committee member. Written and verbal feedback about the submitted literature review paper will be provided to the student at a supervisory committee meeting. For the literature review paper to be considered a pass, both faculty members' assessments of the literature review paper must be at the **successful completion** or **pass level**. If both examinations are considered pass, the student may receive either a **satisfactory** or **excellent** rating at their supervisory committee meeting. If one or both paper reviews are rated unsatisfactory or not pass, then the student receives an **unsatisfactory** rating at the supervisory committee meeting.
- If the student does not successfully complete the literature review paper first submitted, the student will have one additional opportunity to revise and rewrite the literature review paper, based on the feedback received at the supervisory committee. The student must resubmit the revised literature review paper by December 1 of Year 2. This revised literature review paper must be formally evaluated by the supervisor and one other thesis committee member (normally the same committee member who completed the assessment of the original literature review paper). The student will receive feedback about the revised literature review paper at a supervisory committee meeting. For the literature review to be considered a pass, both faculty members' assessments of the literature review must be at the **pass** level. If both reviews are considered pass, the student may receive either a **satisfactory** or **excellent** rating at their supervisory committee meeting. If one or both reviews are rated **failure/not pass**, then the student receives an **unsatisfactory** rating at the supervisory committee meeting.
- If the student does not successfully complete the literature review paper on the second attempt, the Faculty of Nursing will normally recommend to SGS that the student's registration in the PhD program be terminated.

Thesis Proposal

Successful defence of the thesis proposal, normally by the end of Year 2.

- Students are normally expected to defend their thesis proposal by the end of Year 2 of their program. Students must successfully defend their thesis proposal no later than the end of Year 3. The format of the proposal will be similar to that of a modified tri-council grant application. Assessment of the thesis proposal consists of both the written proposal and the oral defence of the proposal. Students who do not successfully defend the proposal after the first attempt may have one additional opportunity to successfully present and defend the written proposal, and this must be accomplished before the end of Year 3 of the program.
- If the student does not successfully defend the thesis proposal by the end of Year 3 (including a second attempt, if required), the Faculty of Nursing will recommend to SGS that the student's registration in the PhD program be terminated.
- The student's dissertation will be defended in the Doctoral Final Oral Examination of the School of Graduate Studies.

Program Length

4 years full-time; 5 years transfer-from-master's

Time Limit

6 years full-time; 7 years transfer-from-master's

Nursing Science: Nursing Science PMNP Diploma

Post-Master's Nurse Practitioner (PMNP) Diploma

Program Description

The PMNP Diploma provides students holding an appropriate graduate degree the opportunity to develop the knowledge and skills required to practise as a nurse practitioner. Students choose one of the following emphases: Adult, Paediatric, or Primary Health Care — Global Health.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Nursing Science's additional admission requirements stated below.
- Applicants to the Post-Master's Nurse Practitioner (PMNP) diploma program must have completed a master's degree in nursing or an equivalent graduate degree that includes clinical nursing experience and a minimum of two years of clinical nursing experience.
- Preference is given to applicants who have one or more years in an advanced nursing practice role (in addition to clinical experience) and support within their employment setting.
- Applicants must hold current registration as a Registered Nurse or equivalent.

Program Requirements

All students in the PMNP diploma program are required to complete a total of **3.5 full-course equivalents (FCEs)** as follows:

- Emphasis: Adult
  - NUR1101H *Advanced Health Assessment and Clinical Reasoning (Adult)*
  - NUR1115H *Advanced Health Assessment and Therapeutic Management (Adult) 1*
  - NUR1140H *Pathophysiology and Pharmacotherapeutics 1 (Adult)*
  - NUR1141H *Pathophysiology and Pharmacotherapeutics 2 (Adult)*
  - NUR1215H *Advanced Health Assessment and Therapeutic Management (Adult) 2*
  - NUR1221Y *Nurse Practitioners: Roles and Issues (Adult)*
- Emphasis: Paediatric
  - NUR1102H *Advanced Health Assessment and Clinical Reasoning (Paediatric)*
  - NUR1116H *Advanced Health Assessment and Therapeutic Management (Paediatric) 1*
  - NUR1144H *Pathophysiology and Pharmacotherapeutics 1 (Paediatric)*
  - NUR1145H *Pathophysiology and Pharmacotherapeutics 2 (Paediatric)*
  - NUR1216H *Advanced Health Assessment and Therapeutic Management (Paediatric) 2*
  - NUR1222Y *Nurse Practitioners: Roles and Issues (Paediatric)*
- Emphasis: Primary Health Care — Global Health
  - NUR1114H *Advanced Health Assessment and Clinical Reasoning (Primary Health Care — Global Health)*
  - NUR1117H *Advanced Health Assessment and Therapeutic Management (Primary Health Care — Global Health) 1*
  - NUR1142H *Pathophysiology and Pharmacotherapeutics 1 (Primary Health Care — Global Health)*
  - NUR1143H *Pathophysiology and Pharmacotherapeutics 2 (Primary Health Care — Global Health)*
  - NUR1217H *Advanced Health Assessment and Therapeutic Management (Primary Health Care — Global Health) 2*
  - NUR1223Y *Nurse Practitioners: Roles and Issues (Primary Health Care — Global Health)*
- NUR1221Y, NUR1222Y, and NUR1223Y must be taken alone in the final session and only after completion of all other coursework and program requirements.
- In each emphasis, four courses require learners to be engaged in clinical practice.

Program Length

6 sessions (2 years) part-time

Time Limit

6 years part-time

- Public Health Policy
  - Nutritional Sciences, MSc, PhD
- Women's Health
  - Nutritional Sciences, MSc, PhD
- Toxicology
  - Nutritional Sciences, MSc, PhD

Overview

The Department of Nutritional Sciences is one of the few departments of nutrition in North America to be located within a Faculty of Medicine. This, together with its close linkages with the University of Toronto's Dalla Lana School of Public Health, allows the department to fully explore the relationships between nutrition and human health and disease, and to influence clinical practice and public health programs. It also creates unique opportunities for collaboration with the highest concentration of University-affiliated hospitals, clinicians, and health researchers in North America.

Although the department is centered in the Basic Sciences sector of the Faculty, its activities include not only basic science but also clinical and community aspects of nutrition and food and nutrition policy. These activities that range from "bench to bedside to populations" make it a model of integration within the whole of the health sciences complex at U of T, enabling a full exploration of the relationships between nutrition and human health to influence both clinical practice and public health policy.

Applicants interested in pursuing a Master of Public Health degree in Nutrition and Dietetics are advised to consult the calendar entry of the Dalla Lana School of Public Health for details.

Nutritional Sciences: Nutritional Sciences MSc

Master of Science

Program Description

The aim of the MSc program is to develop the student's abilities to conceptualize research problems in the area of human nutrition, synthesize ideas and approaches in the research problem, analyze and interpret data, transmit his or her findings to peers, and expand his or her knowledge in, and perspective of, the field of human nutrition. Thus, major emphasis is placed on the research project and thesis.

The MSc program can be taken on a full-time or part-time basis. A limited number of students are admitted to the program on a part-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Students with diverse backgrounds are encouraged to apply. Applicants must also satisfy the Department of Nutritional Sciences' additional admission requirements stated below.
- A- standing in the final two years of a bachelor's degree program or evidence of strong potential as a researcher.

Program Requirements

- **Coursework.** Students must complete **2.0 full-course equivalents (FCEs)** as follows:
  - participation in NFS1204Y *Master's Seminars in Nutritional Sciences* (1.0 FCE) throughout their period of full-time registration and
  - a minimum of two half courses (1.0 FCE).
- For students with undergraduate training in nutritional sciences, at least one of these courses must be taken in the department. Students with undergraduate training in disciplines other than nutritional sciences must take at least two half courses from the department.
- A course in statistical methods or research design and analysis is required if not completed previously.
- **Thesis** on an approved research area and its defence at an oral examination.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Nutritional Sciences: Nutritional Sciences PhD

Doctor of Philosophy

Program Description

The aim of the PhD program is to develop the student's abilities to conceptualize research problems in the area of human nutrition, synthesize ideas and approaches in the research problem, analyze and interpret data, transmit their findings to peers, and expand their knowledge in, and perspective of, the field of human nutrition. Thus, major emphasis is placed on the research project and thesis.

Applicants may enter the PhD program via one of three routes: 1) following completion of an MSc degree; 2) transfer from the University of Toronto MASc program; or 3) direct entry following completion a bachelor’s degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies.
- Applicants must also satisfy the Department of Nutritional Sciences' additional admission requirements stated below.
- Applicants may enter the PhD program with an appropriate MSc degree with at least an A– standing or evidence of strong potential as a researcher. Exceptional students may be allowed to reclassify (transfer) into the PhD program after one year without completing the MSc on the recommendation of an advisory committee and successful completion of a reclassification examination.

Program Requirements

- **Coursework.** Students must complete **3.0 full-course equivalents (FCEs)** as follows:
  - NFS1304Y *Doctoral Seminars in Nutritional Sciences*
  - a minimum of four half courses (2.0 FCEs)
- The courses will be chosen by each student to provide an appropriate background for their area of investigation. It is expected that all students will have an adequate knowledge of research design and statistics through coursework in their past or the current graduate program. The choice of courses will be made in consultation with the supervisor and the student's advisory committee and is subject to the approval of the department.
- Successful completion of a **PhD qualifying examination** in nutritional sciences is required by the end of Year 1. The examination is designed to ensure that students have developed a rigorous and comprehensive research proposal in a timely fashion. The oral examination is approximately two hours long, is graded as pass/fail, and takes place approximately nine months following initial registration. The examination will be conducted by the PhD Qualifying Examination Committee consisting of two faculty members appointed by the department and two faculty members chosen by the student. A student who fails the first attempt at the exam will be permitted one more attempt. Failure of the second attempt will result in a recommendation for program termination.
- **Thesis.**
- Student must pass the **departmental examination** before proceeding to the Doctoral Final Oral Examination.
- The **residence** requirement is two years, whereby students must be on campus full-time and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.
- It is expected that students can complete their PhD in a period of four years of full-time study, research, and thesis preparation; however, some students may require longer.

Program Length

4 years full-time; 5 years transfer-from-master's

Time Limit

6 years full-time; 7 years transfer-from-master's

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies.
- Applicants must also satisfy the Department of Nutritional Sciences' additional admission requirements stated below.
- Applicants may enter the PhD program directly from a bachelor's degree if their background is deemed appropriate and they have an A– or better average in their final two years.

Program Requirements

- **Coursework.** Students must complete **4.0 full-course equivalents (FCEs)** as follows:
  - NFS1304Y *Doctoral Seminars in Nutritional Sciences* (1.0 FCE)
  - a minimum of six half courses (3.0 FCEs)
- The courses will be chosen by each student to provide an appropriate background for their area of investigation. It is expected that all students will have an adequate knowledge of research design and statistics through coursework in their past or the current graduate program. The choice of courses will be made in consultation with the supervisor and the student's advisory committee and is subject to the approval of the department.
- Successful completion of a **PhD qualifying examination** in nutritional sciences is required by the end of Year 1. The examination is designed to ensure that students have developed a rigorous and comprehensive research proposal in a timely fashion. The oral examination is approximately two hours long, is graded as pass/fail, and takes place approximately nine months following initial registration. The examination will be conducted by the PhD Qualifying Examination Committee consisting of two faculty members appointed by the department and two faculty members chosen by the student. A student who fails the first attempt at the exam will be permitted one more attempt. Failure of the second attempt will result in a recommendation for program termination.
- **Thesis.**
- Student must pass the **departmental examination** before proceeding to the Doctoral Final Oral Examination.
- The **residence** requirement is three years, whereby students must be on campus full-time and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.
- It is expected that students can complete their PhD in a period of five years of full-time study, research, and thesis preparation; however, some students may require longer.

Program Length

5 years

Time Limit

7 years

Nutritional Sciences: Nutritional Sciences MSc, PhD Courses

Occupational Therapy

MScOT

Collaborative Specializations

The following collaborative specialization is available to students in the participating degree program as listed below:

- Women's Health
  - Occupational Therapy, MScOT

Overview

The Department of Occupational Science and Occupational Therapy is committed to providing graduate and continuing education programs that enable occupational therapists to be leaders in research, clinical practice, and the promotion of health and well-being. Core and clinical faculty members provide dynamic, evidence-based, and comprehensive instruction and mentorship. Graduates are innovative professionals focused on enabling occupation and enhancing health and well-being.

Since September 2018, the MScOT is offered both at the St. George (downtown Toronto) campus and at the University of Toronto Mississauga (UTM) campus. Applicants will have an opportunity to indicate their preferred campus. Campus preferences will be considered but they are not guaranteed.

Occupational Science and Occupational Therapy: Occupational Therapy MScOT

Master of Science in Occupational Therapy

Program Description

The MScOT program prepares students in advanced academic and professional knowledge and applied research skills for leadership in occupational therapy practice. The program emphasizes the application of theory and research evidence to clinical practice through rigorous studies in occupational therapy and research production and utilization.

Graduates are eligible to write the certification examination of the Canadian Association of Occupational Therapists, a requirement for registration with the College of Occupational Therapists of Ontario and most other professional regulatory colleges in Canada. Practice in another country generally requires the graduate to pass the licensing requirement specific to that country. Graduates are eligible to:

- practise independently in a variety of roles, such as consultants and case managers, and in a range of settings, such as acute care, interdisciplinary programs, private practice, and primary health care;
- supervise rehabilitation assistants, OT aides, or other support workers;
- use principles of research-based practice to guide and evaluate service delivery;
- contribute to research that will advance the knowledge base of the discipline;
- assume management roles;
- take leadership roles in the profession;
- take leadership roles in health care and other sectors including social services, education, and labour;
- fill academic-practitioner positions; and
- pursue doctoral studies and careers in academia or clinical research.

The MScOT program is offered as a two-year full-time program. Admissions to the one-year, advanced-standing part-time option have been suspended.

MScOT Program (24-Month Full-Time)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Occupational Science and Occupational Therapy's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university with high academic standing and a mid-B average or better in the final year of study.
- To determine initial ranking only, the department will review the last 10.0 full-course equivalents (FCEs) completed at the undergraduate level by the application deadline.
- Apply online using the Ontario Rehabilitation Sciences Programs Application Service (ORPAS). Applications are accepted around October each year, with a deadline near the end of December or early January. Exact deadlines are posted on the ORPAS website and in the *ORPAS Instruction Booklet*.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction is not English must provide proof of English proficiency by March 1 of the year of application. See General Regulations, section 4.3 English-Language Proficiency in this calendar for general information and acceptable tests. The department strongly prefers the Test of English as a Foreign Language (TOEFL) and requires a minimum score of:
  - 600 on the paper-based test, accompanied by a minimum score of 5 on the Test of Written English (TWE)
  - 100/120 on the Internet-based test with 22/30 on the speaking section and 22/30 on the writing section.

  TOEFL candidates should request that results be sent to institution code 0982.
- Visit the Occupational Therapy and ORPAS websites for additional information regarding application document submissions (e.g., confidential assessment forms, resumé, personal statement submission).

Program Requirements

- The MScOT is a two-year, 24-course (18.5-FCE) program of continuous, full-time study.
- Students begin their studies in September and complete six consecutive sessions, with a range of four to six concurrent courses in each session.
- There are four full-time block fieldwork components within the program of study.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

MScOT Program (12-Month, Advanced-Standing Part-Time Option)

Admissions to the advanced-standing option have been suspended.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Occupational Science and

Occupational Therapy's additional admission requirements stated below.

- A bachelor's degree in occupational therapy from a recognized university with high academic standing and a mid-B average or better in the final year of study.
- Applicants must be registered, or eligible for registration, for independent practice as an occupational therapist in Canada with a provincial regulating body.
- Apply online using the SGS online application system. Applications are accepted approximately in mid-February each year, with a deadline approximately at the end of March (subject to change).
- Applicants whose primary language is not English and who graduated from a university where the language of instruction is not English must provide proof of English proficiency by March 1 of the year of application. See General Regulations, section 4.3 English-Language Proficiency in this calendar for general information and acceptable tests. The department strongly prefers the Test of English as a Foreign Language (TOEFL) and requires a minimum score of:
  - 600 on the paper-based test, accompanied by a minimum score of 5 on the Test of Written English (TWE)
  - 100/120 on the Internet-based test with 22/30 on the speaking section and 22/30 on the writing section.

  TOEFL candidates should request that results be sent to institution code 0982.
- Visit the Occupational Therapy website for additional information regarding application document submissions (e.g., reference letters, resumé, personal statement submission).

Program Requirements

- The advanced-standing option is a three-consecutive-session, part-time program of study beginning in September. Students must complete 3.5 full-course equivalents (FCEs): OCT1111Y, OCT1122Y+, and OCT1220Y0.
- Students complete the advanced-standing option in an online environment with a mandatory one-week, on-campus residency.
- For more information about the application process, tuition, and supervision, etc., please visit the Occupational Science and Occupational Therapy website.

Program Length

3 sessions part-time (typical registration sequence: F/W/S)

Time Limit

3 years part-time

+ Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.

0 Course that may continue over a program. The course is graded when completed.

Occupational Science and Occupational Therapy: Occupational Therapy MScOT Courses

Required Courses for the 24-Month Full-Time Option

OCT1100H0	Applied Skills and Technology: Human Factors and Design in Occupational Therapy
OCT1111Y	Occupational Science: Foundations for Occupational Therapy
OCT1122Y+	Research Approaches and Methods in Occupational Therapy
OCT1131H	Occupational Therapy Practice I
OCT1132H	Occupational Therapy Practice II
OCT1141H	Assessment in Occupational Therapy
OCT1152Y	Musculo-Skeletal Foundations for Occupational Therapy Practice
OCT1162Y	Mental Health Foundations for Occupational Therapy Practice
OCT1172Y+	Neurological Foundations for Occupational Therapy Practice
OCT1183Y	Occupational Therapy Fieldwork I
OCT1190Y0	Building Practice Through Mentorship
OCT1193H	Enabling Occupation Across the Life Course
OCT1220Y0 (1.5 FCEs)	Graduate Research Project
OCT1233H	Occupational Therapy Practice III
OCT1236H	Transition to Occupational Therapy Practice
OCT1251H	Enabling Occupation with Children: Part I
OCT1252H	Enabling Occupation with Children: Part II
OCT1261H	Enabling Occupation with Adults: Part I
OCT1262Y	Enabling Occupation with Adults: Part II
OCT1271H	Enabling Occupation with Older Adults: Part I
OCT1272H	Enabling Occupation with Older Adults: Part II
OCT1281Y	Occupational Therapy Fieldwork II
OCT1282Y+	Occupational Therapy Fieldwork III
OCT1283Y	Occupational Therapy Fieldwork IV

Required Courses for the 12-Month, Advanced-Standing Part-Time Option

OCT1111Y	Occupational Science: Foundations for Occupational Therapy
OCT1122Y[+]	Research Approaches and Methods in Occupational Therapy
OCT1220Y[0]	Graduate Research Project (1.5 FCEs)

[0] Course that may continue over a program. The course is graded when completed.

[+] Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.

  - Pharmaceutical Sciences, MSc, PhD

Overview

Pharmaceutical sciences encompasses all aspects of the discovery, development, administration, distribution, and utilization of therapeutic drugs, and the nature, functioning, and dysfunctioning of the biological systems with which drugs interact. As a global leader in pharmaceutical research, the Leslie Dan Faculty of Pharmacy is home to some of the most prominent and distinguished experts in the area of pharmaceutical sciences. The department is centrally located in the heart of Toronto's Health Sciences Discovery District. Students have the opportunity to conduct their research in collaboration with a wide range of departments at the University of Toronto and nearby world-class teaching hospitals and research institutes to solve some of health science's most pressing problems.

A degree in Pharmaceutical Sciences can lead to a variety of career opportunities. Graduates have found employment in academia, the pharmaceutical industry, government, community or hospital pharmacy, consulting, and other businesses.

The Graduate Department of Pharmaceutical Sciences offers research opportunities and courses in two fields of study:

- Biomolecular Pharmaceutical Sciences: drug receptor interactions, molecular biology, electrophysiology, biochemistry, clinical, adverse drug reactions, drug metabolism; pharmaceutical and medicinal chemistry, pharmaceutical formulations, radiopharmaceutical synthesis, drug discovery, biophysical chemistry, basic pharmacokinetics, and clinical research;
- Clinical, Social, and Administrative Pharmaceutical Sciences: clinical and pharmacy practice, sociology of health, social psychology, health policy, and health economics.

Pharmaceutical Sciences: Pharmaceutical Sciences MSc

Master of Science

Program Description

The Graduate Department of Pharmaceutical Sciences at the Leslie Dan Faculty of Pharmacy offers students in the physical, biological, clinical, and social sciences a challenging and rewarding research-intensive program leading to the MSc degree. The result is an educational program that encourages multidisciplinary approaches to problems and collaboration between students and faculty members. Graduate students participating in this process are immersed in a challenging program that equips them with new ways of thinking and provides them with multiple tools to approach problems.

The MSc program can be taken on a full-time or part-time basis. All admission and program requirements are the same for the full-time and part-time options. A limited number of students will be admitted to the part-time option.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Pharmaceutical Sciences' additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university with at least a mid-B average in each of the last two years of undergraduate study.
- The Pharmaceutical Sciences Graduate Admissions Committee considers the applicant's background and accomplishments, academic standing, and financial support from the potential supervisor.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination is not English, must demonstrate facility in the English language through the successful completion of one of the following English-language proficiency tests:
  - Test of English as a Foreign Language (TOEFL) with the following minimum scores:
    - paper-based TOEFL: 600 and 5 on the Test of Written English (TWE)
    - Internet-based TOEFL: 100/120 and 22/30 on the writing and speaking sections.
  - International English Language Testing System (IELTS): a score of 7.0 (Academic) with at least 6.5 in each component.
  - The Certificate of Proficiency in English (COPE): a score of 76, with at least 22 in each component and 32 in the writing component.
  - Academic Preparation Course: a final grade of B in Level 60.
- If the undergraduate degree was not obtained from a recognized Canadian or US university, the applicant must write and achieve scores at the 50th percentile ranking or better on the Graduate Record Examination (GRE; General Test).

Program Requirements

- The MSc is a program of study that provides the appropriate foundation for thesis research. The program depends on the student's background and is planned in consultation with the supervisor and advisory committee, with the approval of the graduate director.
- **Coursework.** Students must successfully complete a minimum of **1.0 full-course equivalent (FCE)**.
- Yearly advisory committee meetings.
- Attend at least one **research ethics workshop** (0.0 FCE) for graduate students.
- **One poster presentation** to all faculty and graduate students at Graduate Research in Progress (GRIP).
- Annual attendance at GRIP.
- Regular attendance at a minimum of **eight Pharmaceutical Sciences departmental seminars** as well as student group seminars for two years (or less if all other program requirements are completed).
- An **oral presentation** of the student's own research work is given in the student seminar series after the first 12 months of registration in the program.
- Final seminar to be given during the **thesis defence**.
- A **thesis** based on an approved research problem in an area of pharmaceutical sciences.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S);
14 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Pharmaceutical Sciences: Pharmaceutical Sciences PhD

Doctor of Philosophy

Program Description

The Graduate Department of Pharmaceutical Sciences offers a challenging and rewarding research-intensive program leading to the PhD degree. Students in the program are immersed in pharmaceutical sciences, working and collaborating with world-renowned researchers while gaining profound depth and experience in their area of study.

Applicants may enter the PhD program via one of three routes: 1) following completion of an appropriate master's degree; 2) transfer from the University of Toronto MSc program; or 3) direct entry following completion of an appropriate bachelor's degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Pharmaceutical Sciences' additional admission requirements stated below.
- Appropriate master's degree from a recognized university with a minimum overall B+ average.
- The Pharmaceutical Sciences Graduate Admissions Committee considers the applicant's background and accomplishments, academic standing, and financial support from the potential supervisor.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination is not English, must demonstrate facility in the English language through the successful completion of one of the following English-language proficiency tests:
  - Test of English as a Foreign Language (TOEFL) with the following minimum scores:
    - paper-based TOEFL: 600 and 5 on the Test of Written English (TWE)
    - Internet-based TOEFL: 100/120 and 22/30 on the writing and speaking sections.
  - International English Language Testing System (IELTS): a score of 7.0 (Academic) with at least 6.5 in each component.
  - The Certificate of Proficiency in English (COPE): a score of 76, with at least 22 in each component and 32 in the writing component.
  - Academic Preparation Course: a final grade of B in Level 60.
- If the undergraduate degree was not obtained from a recognized Canadian or US university, the applicant must write the Graduate Record Examination (GRE; General Test) and achieve scores at the 50th percentile ranking or better on the Verbal and Quantitative components and a minimum score of 5.0 on the Analytical Writing component.

Program Requirements

- The PhD is a program of study that provides the appropriate foundation for thesis research. The program depends on the student's background and is planned in consultation with the supervisor and advisory committee, as well as with the approval of the graduate chair.
- **Coursework.** Students normally complete **2.0 full-course equivalents (FCEs)** within the first three years of registration.
- Yearly advisory committee meetings.
- Successful completion of a **PhD qualifying examination** within the first 24 months of the program. Students are permitted a second attempt, if necessary, to satisfactorily complete the examination. The format of the examination will include the student giving a 20-minute presentation based on the proposal distributed to the Qualifying Examination Committee, followed by a question period. The student is expected to demonstrate appropriate understanding of the scientific basis of the research, the methodological approaches, and the technical details. Failure to successfully complete the PhD qualifying examination will result in a recommendation for termination of registration in the program.

- Attend at least one **research ethics workshop** (0.0 FCE) for graduate students. Students who completed this requirement while registered in the MSc program are not required to attend a second workshop.
- **One poster presentation** to all faculty and graduate students at **Graduate Research in Progress (GRIP)**.
- Annual attendance at GRIP.
- Regular attendance at a minimum of **eight Pharmaceutical Sciences departmental seminars** as well as student group seminars in each academic year for four years (or less if all other program requirements are completed).
- In the student seminar series, students must give an **oral research presentation** of approximately 20 to 30 minutes every year after the first 12 months of registration in the program.
- An **open final oral presentation** (50 minutes long) immediately prior to a **closed thesis defence**.
- A **thesis** in conformity with University of Toronto regulations, based on research conducted while registered in a PhD program at the University of Toronto.
- Students must be on campus and participate full-time (including Summer) until all program requirements are completed. Simultaneous registration in another full-time degree program is not allowed.

Program Length

4 years

Time Limit

6 years

PhD Program (Transfer)

Transfer Requirements

- Students who have a high academic standing and a clearly demonstrated ability to do research at the doctoral level may be eligible to transfer to the PhD program after one year in the MSc program. The student must have completed at least 1.0 full-course equivalent (FCE) with an average grade of A– during Year 1 of the master's program, and must have financial support.
- A transfer from the MSc program to the PhD program occurs normally within 15 to 18 months of the student's first registration in the MSc program.

Program Requirements

- **Coursework.** Students must successfully complete a total of **3.0 full-course equivalents (FCEs)**.
- Successful completion of the **MSc to PhD transfer examination**.
- The transferred student must complete all remaining course requirements of the MSc program, except the thesis, in addition to the requirements of the PhD program. Credit is given in the doctoral program for research and graduate courses completed prior to the transfer.
- Yearly advisory committee meetings.
- Attend at least one **research ethics workshop** (0.0 FCE) for graduate students. Students who completed this requirement while registered in the MSc program are not required to attend a second workshop.
- **Two poster presentations** to all faculty and graduate students at **Graduate Research in Progress (GRIP)**, one of which may be at a peer-reviewed conference upon approval.
- Annual attendance at GRIP.
- Regular attendance at a minimum of **eight Pharmaceutical Sciences departmental seminars** as well as student group seminars in each academic year for four years (or less if all other program requirements are completed).
- In the student seminar series, students must give an **oral research presentation** of approximately 20 to 30 minutes every year.
- An **open final oral presentation** (50 minutes long) immediately prior to a **closed thesis defence**.
- A **thesis** in conformity with University of Toronto regulations, based on research conducted while registered in a PhD program at the University of Toronto.
- Students must be on campus and participate full-time (including Summer) until all program requirements are completed. Simultaneous registration in another full-time degree program is not allowed.

Program Length

5 years

Time Limit

7 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Pharmaceutical Sciences' additional admission requirements stated below.
- Under exceptional circumstances, students may be admitted directly to the PhD program with an appropriate bachelor's degree from a recognized university with a minimum A– (80%) average, or its equivalent, in senior-level courses.
- The Pharmaceutical Sciences Graduate Admissions Committee considers the applicant's background and accomplishments, academic standing, and financial support from the potential supervisor.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination is not English, must demonstrate facility in the English language through the successful completion of one of the following English-language proficiency tests:
  - Test of English as a Foreign Language (TOEFL) with the following minimum scores:

    - paper-based TOEFL: 600 and 5 on the Test of Written English (TWE)
    - Internet-based TOEFL: 100/120 and 22/30 on the writing and speaking sections.
  - International English Language Testing System (IELTS): a score of 7.0 (Academic) with at least 6.5 in each component.
  - The Certificate of Proficiency in English (COPE): a score of 76, with at least 22 in each component and 32 in the writing component.
  - Academic Preparation Course: a final grade of B in Level 60.
- If the undergraduate degree was not obtained from a recognized Canadian or US university, the applicant must write the Graduate Record Examination (GRE; General Test) and achieve scores at the 50th percentile ranking or better on the Verbal and Quantitative components and a minimum score of 5.0 on the Analytical Writing component.

Program Requirements

- The PhD is a program of study that provides the appropriate foundation for thesis research. The program depends on the student's background and is planned in consultation with the supervisor and advisory committee, as well as with the approval of the graduate chair.
- **Coursework.** Students must successfully complete a total of **3.0 full-course equivalents (FCEs)**.
- Yearly advisory committee meetings.
- Successful completion of a **PhD qualifying examination** within the first 24 months of the program. Students are permitted a second attempt, if necessary, to satisfactorily complete the examination. The format of the examination will include the student giving a 20-minute presentation based on the proposal distributed to the Qualifying Examination Committee, followed by a question period. The student is expected to demonstrate appropriate understanding of the scientific basis of the research, the methodological approaches, and the technical details. Failure to successfully complete the PhD qualifying examination will result in a recommendation for termination of registration in the program.
- Attend at least one **research ethics workshop** (0.0 FCE) for graduate students. Students who completed this requirement while registered in the MSc program are not required to attend a second workshop.
- **Two poster presentation(s)** to all faculty and graduate students at **Graduate Research in Progress (GRIP)**, one of which may be at a peer-reviewed conference upon approval.
- Annual attendance at GRIP.
- Regular attendance at a minimum of **eight Pharmaceutical Sciences departmental seminars** as well as student group seminars in each academic year for four years (or less if all other program requirements are completed).
- In the student seminar series, students must give an **oral research presentation** of approximately 20 to 30 minutes every year after the first 12 months of registration in the program.
- An **open final oral presentation** (50 minutes long) immediately prior to a **closed thesis defence**.
- A **thesis** in conformity with University of Toronto regulations, based on research conducted while registered in a PhD program at the University of Toronto.
- Students must be on campus and participate full-time (including Summer) until all program requirements are completed. Simultaneous registration in another full-time degree program is not allowed.

Program Length

5 years

Time Limit

7 years

PhD Program (Flexible-Time)

The department offers a flexible-time PhD program option for selected students. This program benefits professionals with career obligations and whose employment is closely related to their intended area of research. Applicants must meet all the admission requirements for entry to the full-time PhD program in Pharmaceutical Sciences. The program requirements for the flexible-time PhD option are identical to those for the full-time PhD program.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Pharmaceutical Sciences' additional admission requirements stated below.
- Appropriate master's degree from a recognized university with a minimum overall B+ average.
- The Pharmaceutical Sciences Graduate Admissions Committee considers the applicant's background and accomplishments, academic standing, and financial support from the potential supervisor.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination is not English are required to write the Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - paper-based TOEFL: 600 and 5 on the Test of Written English (TWE)
  - Internet-based TOEFL: 100/120 and 22/30 on the writing and speaking sections.
- If the undergraduate degree was not obtained from a recognized Canadian or US university, the applicant must write the Graduate Record Examination (GRE; General Test) and achieve scores at the 50th percentile ranking or better on the Verbal and Quantitative components and a minimum score of 5.0 on the Analytical Writing component.
- A letter of support from the employer.
- The departmental admissions committee reviews the applications; admission is highly selective with preference given to applicants who are members in good standing of a regulated profession or scientific society.

Program Requirements

- The PhD is a program of study that provides the appropriate foundation for thesis research. The program depends on the student's background and is planned in consultation with the supervisor and advisory committee, with the approval of the graduate chair.
- **Coursework.** Students normally complete a total of **2.0 full-course equivalents (FCEs)**.
- Yearly advisory committee meetings.
- Successful completion of a **PhD qualifying examination** within the first 32 months of the program. Students are permitted a second attempt, if necessary, to satisfactorily complete the examination. The format of the examination will include the student giving a 20-minute presentation based on the proposal distributed to the Qualifying Examination Committee, followed by a question period. The student is expected to demonstrate appropriate understanding of the scientific basis of the research, the methodological approaches, and the technical details. Failure to successfully complete the PhD qualifying examination will result in a recommendation for termination of registration in the program.
- Attend at least one **research ethics workshop** (0.0 FCE) for graduate students. Students who completed this requirement while registered in the MSc program are not required to attend a second workshop.
- **One poster presentation, or two poster presentations by those without a master's degree**, to all faculty and graduate students at **Graduate Research in Progress (GRIP)**.
- Annual attendance at GRIP.
- Regular attendance at a minimum of **eight Pharmaceutical Sciences departmental seminars** as well as student group seminars in each academic year for four years. Students whose current professional background is such that they would be deemed to have fulfilled a significant portion of the requirements contained in the department seminar series may be eligible for a reduction of four seminars upon consultation with the Director.
- In the student seminar series, students must give an **oral research presentation** of approximately 20 to 30 minutes every year after the first 12 months of registration in the program.
- An **open final oral presentation** (50 minutes long) immediately prior to a **closed thesis defence**.
- A **thesis** in conformity with University of Toronto regulations, based on research conducted while registered in a PhD program at the University of Toronto.
- Students must ensure that they have adequate time on campus to attend classes and to fulfil the academic requirements.
- Full-time registration is required for the first four years and thereafter, students may register part-time.

Pharmaceutical Sciences: Pharmaceutical Sciences MSc, PhD Courses

Please consult the department's timetable for courses offered in a given year.

PHM1107H	Advanced Pharmacokinetics Course I
PHM1109H	Recent Developments in Dosage Form Design (prerequisite: PHM224Y or equivalent)
PHM1115H	Special Topics in Radiopharmaceuticals II
PHM1130H	Biomolecular Interactions and Thermodynamics I
PHM1133H	Special Topics in Pharmaceutical Sciences Reading Course
PHM1135H	Nanomedicines in Oncology
PHM1136H	Introduction to Biostatistics
PHM1137H	Introduction to Qualitative Research Methods in the Health Sciences
PHM1138H	Electronics for Pharmaceutics Applications
PHM1139H	Diagnosing Corruption in the Health Sector and Anti-Corruption Policies and Tools
PHM1140H	Principles of Synthetic Biology
PHM2100H (0.25 FCE)	Pharmaceutical Sciences Module: Sciences in New Drugs and Biologics
PHM2101H (0.25 FCE)	Pharmaceutical Sciences Module: Precision in Vitro Diagnostics
PHM2102H (0.25 FCE)	Pharmaceutical Sciences Module: Introduction to Fundamentals of Drug Discovery Process
JFK1122H	Drug Transport Across Biological Membranes
JNP1014Y	Interdisciplinary Toxicology
JNP1017H[+]	Current Topics in Molecular and Biochemical Toxicology
JNP1018H[+]	Molecular and Biochemical Basis of Toxicology
JRH1000H	Introduction to Pharmacoepidemiology
JRH5124H	Public Health Ethics
PAS3700H	Multidisciplinary Aspects of Addictions
PCL1004Y	Clinical Pharmacology
PPG2010H	Panel Data Methods for Public Policy Analysis

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Pharmaceutical Sciences: Pharmacy MScPhm

Master of Science in Pharmacy

Program Description

The Master of Science in Pharmacy (MScPhm) program is designed to train future academic clinical pharmacist leaders. As members of patient care teams and as pharmacy practice researchers, graduates of the MScPhm program will influence the provision of pharmaceutical care at the patient and population level. As teachers, they will shape the development of current and future pharmacists.

Applicants may apply to the Fall session only.

Full-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Pharmaceutical Sciences' additional admission requirements stated below.
- Applicants must have status as a pharmacist, based on one of the following:
  - a bachelor's degree from a Canadian pharmacy program accredited by the Canadian Council for Accreditation of Pharmacy Programs (CCAPP) or an American pharmacy program accredited by the Accreditation Council for Pharmacy Education (ACPE); or
  - a license to practise pharmacy (any Canadian jurisdiction); or
  - a bachelor's degree, or equivalent, from any international pharmacy school **and** successful completion of the Pharmacy Examining Board of Canada (PEBC) Evaluating Exam.
- Applicants with pharmacy practice experience, including completion of a Year 1 Pharmacy residency program, are preferred. Applicants must also have an equivalent of a University of Toronto B+ (77 to 79%) in the last two years of study and have identified a primary graduate supervisor for the program.

Program Requirements

- Each student's program will be tailored to suit the student's background and interests and will be planned in consultation with the supervisor and graduate advisory committee, with the approval of the graduate chair.
- Students must complete a minimum of **9.0 full-course equivalents (FCEs)**, including a clinical practicum (3.0 FCEs) and a research project (3.0 FCEs).
- Graduate advisory committee meetings will be held at minimum once each year.
- One **poster presentation** given to all faculty and graduate students at Graduate Research in Progress (GRIP).
- Annual attendance at GRIP.
- Regular attendance at the graduate departmental and student group seminars for two years.
- An **oral presentation** of the completed research work will be submitted and assessed at an oral examination.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Part-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Pharmaceutical Sciences' additional admission requirements stated below.
- Applicants must have status as a pharmacist, based on one of the following:
  - a bachelor's degree from a Canadian pharmacy program accredited by the Canadian Council for Accreditation of Pharmacy Programs (CCAPP) or an American pharmacy program accredited by the Accreditation Council for Pharmacy Education (ACPE); or
  - a license to practise pharmacy (any Canadian jurisdiction); or
  - a bachelor's degree, or equivalent, from any international pharmacy school **and** successful completion of the Pharmacy Examining Board of Canada (PEBC) Evaluating Exam.
- Applicants with pharmacy practice experience, including completion of a Year 1 Pharmacy residency program, are preferred. Applicants must also have an equivalent of a University of Toronto B+ (77 to 79%) in the last two years of study and have identified a primary graduate supervisor for the program.

Program Requirements

- Each student's program will be tailored to suit the student's background and interests and will be planned in consultation with the supervisor and graduate advisory committee, with the approval of the graduate chair.
- Students must complete a minimum of **9.0 full-course equivalents (FCEs)**, including a clinical practicum (3.0 FCEs) and a research project (3.0 FCEs).
- Graduate advisory committee meetings will be held at minimum once each year.
- One **poster presentation** given to all faculty and graduate students at Graduate Research in Progress (GRIP). Students will attend GRIP yearly.
- Regular attendance at the graduate departmental and student group seminars for four years.

- An **oral presentation** of the completed research work will be submitted and assessed at an oral examination.

Program Length

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Addiction Studies
  - Pharmacology, MSc, PhD
- Cardiovascular Sciences
  - Pharmacology, MSc, PhD
- Musculoskeletal Sciences
  - Pharmacology, MSc, PhD
- Neuroscience
  - Pharmacology, MSc, PhD
- Resuscitation Sciences (admissions have been administratively suspended)
  - Pharmacology, MSc, PhD
- Toxicology
  - Pharmacology, MSc, PhD
- Women's Health
  - Pharmacology, MSc, PhD

Overview

Faculty in the Department of Pharmacology and Toxicology conduct research in the following areas:

- biochemical and molecular pharmacology
- cardiovascular pharmacology
- clinical pharmacology
- drug addiction
- drug metabolism, distribution, and pharmacokinetics
- endocrine pharmacology
- immunopharmacology
- neuropharmacology
- pharmacogenetics
- psychopharmacology
- receptor pharmacology
- second messengers and signal transduction
- toxicology

Woodland, Cindy - PhD

Pharmacology and Toxicology: Pharmacology MSc (Thesis-Based Option)

Master of Science

Program Description

In the MSc program, students are expected to undertake self-directed study and demonstrate proficiency in pharmacological principles throughout the course of the program. They are able to engage in one of two formats of study: 1) thesis-based study or 2) course-based study in the field of Applied Clinical Pharmacology.

In the thesis-based study, students are expected to think critically about scientific issues and develop a knowledge base in pharmacology while formulating hypotheses in a specific area of pharmacological research. They will test their hypotheses through active research and present their investigations in a thesis.

In the course-based Applied Clinical Pharmacology field, students will engage in research and hands-on training in academic, commercial, health care, and/or government settings. Courses will feature a breadth of fundamental and applied pharmacology topics with emphasis on translational research.

The MSc program can be taken on a full-time or part-time basis.

MSc Program (Thesis-Based Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Pharmacology and Toxicology's additional admission requirements stated below.
- Appropriate bachelor's degree from a recognized university with a final-year average of at least a B+.
- Applicants are normally required to have taken courses in physiology, biochemistry, or applied sciences sufficient to form a foundation for their work in pharmacology.
- All successful applicants are responsible for obtaining research supervision and financial support before they are permitted to officially register in their program.

Program Requirements

- **Coursework.** Students must complete PCL1002Y *Graduate Pharmacology* (1.0 full-course equivalent [FCE]). The academic program may require additional coursework.
- Each student will present a **departmental seminar** after approximately one year in the program.
- Each student will participate in a research program and present the results of the investigation as a **written thesis**. The thesis will be evaluated and defended to the satisfaction of a thesis examination committee.
- MSc students in pharmacology who intend to continue their studies in the PhD program may choose to be evaluated during their MSc **oral defence**.
- Minimum period of one full year of **residence**, during which time the student is required to be on campus full-time and consequently in such geographical proximity as to be able to participate fully in the department's activities associated with the program.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S);
9 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Pharmacology and Toxicology: Pharmacology MSc; Field: Applied Clinical Pharmacology

MSc Program: Applied Clinical Pharmacology Field (Course-Based Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Pharmacology and Toxicology's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university with a final-year average of at least a B+.
- Applicants are normally required to have taken courses in physiology and biochemistry, or applied sciences sufficient to form a foundation for their work in pharmacology.

Program Requirements

Coursework. Students must complete **8.0 full-course equivalents (FCEs)**. The curriculum is designed in an integrated fashion such that each subsequent course reinforces and builds upon prior knowledge. Students are expected to complete the required courses in Year 1. Elective courses may be taken in either year with practicum opportunities offered following successful completion of the required courses.

- **Year 1 required courses (6.0 FCEs);** these courses are spread throughout the first 12 months of the program:
  - PCL1001Y *Systems Pharmacology*
  - PCL1002Y *Graduate Pharmacology*
  - PCL1004Y *Clinical Pharmacology*
  - PCL1100H[0] *Applied Skills in Clinical Pharmacology*
  - PCL1101H[0] *Technology, Techniques, and Translation in Pharmacology and Toxicology*
  - PCL1402H *Pharmacology and Toxicology in Drug Development*
  - PCL1491H *Clinical Pharmacology: Principles in Practice*
  - PCL2200Y[0] *Major Research Project.*

Plus

- **Elective courses (2.0 FCEs).** Elective coursework is selected through consultation with the program director with the intention to allow individual students to tailor their degree towards their interests and career goals. Popular elective courses include:
  - PCL1300H *Selected Topics in Clinical Pharmacology* (Credit/No Credit)
  - PCL2100Y[0] *Practicum in Clinical Pharmacology* (Credit/No Credit; 2.0 FCEs)
  - PCL2101Y[0] *Practicum in Clinical Pharmacology I* (Credit/No Credit)
  - PCL2102Y[0] *Practicum in Clinical Pharmacology II* (Credit/No Credit)
  - PCL2201Y[0] *Research Project Extended Study* (Credit/No Credit)
  - APS1001H *Project Management*
  - CHL5201H *Biostatistics I*
  - JNP1014Y *Interdisciplinary Toxicology*
  - JPM1005Y *Behavioural Pharmacology*
  - RSM2017H *Pharmaceutical Strategy.*

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S);
9 sessions part-time

Time Limit

3 years full-time;
6 years part-time

[0] Course that may continue over a program. The course is graded when completed, or credit is given when the course is completed.

MSc Program: Applied Clinical Pharmacology Field (Course-Based, Advanced-Standing Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Pharmacology and Toxicology's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university with a final-year average of at least a B+.
- Applicants are normally required to have taken courses in physiology and biochemistry, or applied sciences sufficient to form a foundation for their work in pharmacology.
- At the discretion of the program director, applicants who demonstrate pharmacology knowledge that significantly overlaps with the Applied Clinical Pharmacology curriculum **may be considered** for advanced standing with either:
  - a bachelor's degree specializing in pharmacology or biomedical toxicology **or**
  - MD degree (undergraduate medical education) with coursework in pharmacology.

Program Requirements

Coursework. Students must complete **at least 4.0 full-course equivalents (FCEs)** as follows:

- PCL1002Y *Graduate Pharmacology* (1.0 FCE)
- PCL1004Y *Clinical Pharmacology* (1.0 FCE)
- PCL1100H[0] *Applied Skills in Clinical Pharmacology* (0.5 FCE)
- PCL2200Y[0] *Major Research Project* (1.0 FCE), starting in the Fall of Year 1.
- At least one half-course elective (0.5 FCE) chosen from the following list, and upon recommendation and approval by the program director:
  - PCL1101H[0] *Technology, Techniques, and Translation in Pharmacology and Toxicology*

- PCL1300H *Selected Topics in Clinical Pharmacology and Toxicology* (Credit/No Credit)
- CHL5201H *Biostatistics I* (exclusion: LMP1407H)
- JNP1014Y *Interdisciplinary Toxicology*
- JPM1005Y *Behavioural Pharmacology*

- Note: students participating in this advanced-standing option are not eligible to enrol in a practicum course.

Program Length

3 sessions (typical registration sequence: F/W/S)

Time Limit

3 years

[0] Course that may continue over a program. The course is graded when completed.

Pharmacology and Toxicology: Pharmacology PhD

Doctor of Philosophy

Program Description

The objective of the PhD degree is to have students possess a comprehensive understanding of the general area of pharmacology, in addition to specific expertise in their particular area of interest. They build on their knowledge of pharmacology so that they are able to think critically about specific areas in pharmacology. They should be able to formulate and design, as well as carry out and interpret investigations. Their findings should be publishable. They should show capacity for continuing significant contributions in pharmacology and for conducting independent research.

Applicants may enter the PhD program via one of three routes: 1) following completion of an appropriate master's degree; 2) transfer from the University of Toronto MSc program; or 3) direct entry following completion of an appropriate bachelor's degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Pharmacology and Toxicology's additional admission requirements stated below.
- Appropriate master's degree from a recognized university with an average of at least a B+ in master's degree courses.
- Applicants are normally required to have taken courses in physiology, biochemistry, or applied sciences sufficient to form a foundation for their work in pharmacology.
- The department determines the eligibility of prospective students. The department assesses the student's ability for advanced study and independent research in pharmacology.
- Students transferring from the master's program in Pharmacology to the PhD program may receive full credit for master's courses towards doctoral course requirements, with the department's permission.
- Well-qualified students with excellent research potential holding an appropriate bachelor's degree from a recognized university may be considered for direct entry to the PhD program. These applicants must have achieved a minimum final-year average of A–.
- Applicants admitted without prior screening (i.e., with MSc degrees from other departments or universities, and students admitted with a bachelor's degree) will have their research ability reviewed after completion of one year. Upon successful completion of a departmental seminar and recommendation from the student's advisory committee, the student will be permitted to proceed with the PhD program.
- The department must be satisfied about the applicant's background, accomplishments, and financial support.
- All successful applicants are responsible for obtaining research supervision and financial support before they are permitted to officially register in their program.

Program Requirements

- **Coursework.** Students must complete **3.0 full-course equivalents (FCEs)** as follows:
  - PCL1002Y *Graduate Pharmacology* (primary subject)
  - PCL1003Y[0] *Seminars in Pharmacology* (Credit/No Credit)
  - 1.0 additional FCE (secondary subject)
  - Any other courses advised by the Graduate Education Committee. The student's advisory committee should help the student determine the secondary course.
- Pharmacology graduate faculty members also offer a variety of laboratory-based and tutorial-based learning modules to provide breadth to the student's training experience beyond their particular areas of research focus. During their program, PhD students are required to choose **four breadth modules** from among available options. 0.5 FCE from outside the student's research area may substitute for one of the five breadth modules. The student's advisory committee will assist the student in choosing suitable modules.
- As part of the course requirement for PCL1003Y[0] *Seminars in Pharmacology*, the student must present thesis material in **seminars** to the department on two occasions, one of which will take place between two and six months prior to the departmental Final Oral Examination.
- Each student will participate in a research program and present the results of the investigation as a **written thesis**. The thesis must be **orally defended** to the satisfaction of a thesis examination committee.
- Minimum period of two full years of **residence**, during which time the student is required to be on campus full-time and consequently in such geographical proximity as to be able to participate fully in the department's activities associated with the program.

Program Length

4 years full-time; 5 years transfer-from-master's; 5 years direct-entry

Time Limit

6 years full-time; 7 years transfer-from-master's; 7 years direct-entry

[0] Course that may continue over a program. The course is graded when completed.

Pharmacology and Toxicology: Pharmacology MSc, PhD Courses

The department should be consulted each session as to course offerings. Students may also find up-to-date course information on the departmental website.

PCL1001Y	Systems Pharmacology
PCL1002Y	Graduate Pharmacology
PCL1003Y[0]	Seminars in Pharmacology (Credit/No Credit)
PCL1004Y	Clinical Pharmacology
PCL1100H[0]	Applied Skills in Clinical Pharmacology
PCL1101H[0]	Technology, Techniques, and Translation in Pharmacology and Toxicology
PCL1110H	Applied Skills in Clinical Pharmacology
PCL1300H	Selected Topics in Clinical Pharmacology and Toxicology (Credit/No Credit)
PCL1402H	Pharmacology and Toxicology in Drug Development
PCL1491H	Clinical Pharmacology: Principles in Practice (co-requisite: PCL1004Y or prior pharmacokinetics course)
PCL2100Y[0]	Practicum in Clinical Pharmacology (Credit/No Credit; 2.0 FCEs) (prerequisite: PCL1100H[0])
PCL2101Y[0]	Practicum in Clinical Pharmacology I (Credit/No Credit) (prerequisite: PCL1100H[0])
PCL2102Y[0]	Practicum in Clinical Pharmacology II (Credit/No Credit) (prerequisite: PCL1100H[0])
PCL2200Y[0]	Major Research Project (prerequisite or co-requisite: PCL1100H[0])
PCL2201Y[0]	Research Project Extended Study (Credit/No Credit) (prerequisite: PCL2200Y[0])
CHL5201H	Biostatistics I (exclusion: LMP1407H)
JFK1121H	Selected Topics in Drug Development II
JFK1122H	Drug Transport Across Biological Membranes
JNP1014Y	Interdisciplinary Toxicology
JNP1016H	Graduate Seminar in Toxicology (prerequisite or co-requisite: JNP1014Y)
JNP1017H[+]	Current Topics in Molecular and Biochemical Toxicology
JNP1018H[+]	Molecular and Biochemical Basis of Toxicology
JNR1444Y	Fundamentals of Neuroscience: Cellular and Molecular
JPM1005Y	Behavioural Pharmacology
JYG1555H	Advanced Topics: Cellular and Molecular Neurobiology

[0] Course that may continue over a program. The course is graded when completed, or credit is given when the course is completed.

[+] Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.

Combined Degree Programs

- STG, Law, Juris Doctor / Philosophy, PhD

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Ancient and Medieval Philosophy
  - Philosophy, PhD
- Bioethics
  - Philosophy, MA, PhD
- Jewish Studies
  - Philosophy, MA, PhD
- Sexual Diversity Studies
  - Philosophy, MA, PhD
- Women and Gender Studies
  - Philosophy, MA, PhD

Overview

Philosophy has been taught at the University of Toronto since 1843. Much has changed in that time, but the department remains Canada's preeminent philosophy department. It is an international leader in the history of philosophy — especially ancient and medieval philosophy — as well as ethics, philosophy of science, and philosophy of mind. In all of these areas, department members take contemporary philosophical problems and their historical antecedents to illuminate one another.

The department's most distinctive strength is its broad coverage of the history of philosophy. While peer departments usually have one or two experts in a few historical periods, U of T has specialists in every area of the history of Western philosophy, as well as in aspects of the history of non-Western philosophy. This historical focus engages with other areas of strength: ethics, philosophy of science, and philosophy of mind.

Many U of T faculty working in these areas also study their history; they use that study to inform their contributions to contemporary debates. At the same time, these historians of philosophy benefit from and contribute to ground-breaking work in systematic philosophy. This integration of historical and systematic philosophy sets this department apart from other top philosophy departments where the history of philosophy is often segregated from the rest of the discipline.

Philosophy: Philosophy MA

Master of Arts

Program Description

The MA may be taken on a full-time or part-time basis.

Applicants should consult the department's web page for complete details on graduate programs, course offerings, short academic profiles of graduate faculty, and application procedures.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Philosophy's additional admission requirements stated below.
- Admission requires an appropriate bachelor's degree from a recognized university. Applicants must have a strong background in philosophy (roughly equivalent to an undergraduate major), with an average grade of at least a mid-B in the applicant's overall program and at least an A– in the applicant's philosophy courses.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must complete the Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - Paper-based TOEFL exam: 600 and 5 on the Test of Written English (TWE).
  - Internet-based TOEFL exam: 100/120 and 22/30 on the writing and speaking sections.
- Equivalent results in some other recognized test of English-language proficiency are acceptable.

Program Requirements

- **Coursework.** Students must successfully complete **3.5 full-course equivalents (FCEs)** in philosophy as follows:
  - At least 1.0 FCE in the history of philosophy.
  - At least 1.0 FCE in the problems of philosophy.
  - 1.0 FCE designated courses only for MA students. One 0.5 FCE in the broad area of ethics/politics and the other 0.5 FCE in the broad area of metaphysics and epistemology. Either could be historical. The timing of the course requirement is:
    - PHL2222H *MA Proseminar I* (0.5 FCE), taken in the first session.
    - PHL2223H *MA Proseminar II* (0.5 FCE), taken in the second session.
  - PHL3000H *MA Professional Development Workshop* (0.5 FCE).
- Each MA student is assigned an advisor who will recommend a suitable program of philosophy courses. The student's choice of courses must be approved by the department.
- It is possible for a full-time student to complete all requirements for the MA degree in the Fall and Winter sessions; however, the department encourages students to take no more than 3.0 FCEs during the Fall and Winter sessions and to complete the last course during the Summer session.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
5 years part-time

Time Limit

3 years full-time;
6 years part-time

Concentration: Philosophy of Science

The Philosophy of Science concentration will provide students with a background in general philosophy of science and with specific topics in philosophy of science. Students will be prepared for academic work at the PhD level in philosophy and for non-academic career tracks that require strong critical thinking skills, as well as an understanding of science and its role in knowledge and society.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Philosophy's additional admission requirements stated below.
- Admission requires an appropriate bachelor's degree from a recognized university. Applicants must have a strong interest in:
  - Philosophy (evidenced in a strong writing sample, personal statement, and letters of reference).
  - A strong academic background in either philosophy or, typically, a subject in the natural and social sciences, with minimum average grades of A–.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must complete the Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - Paper-based TOEFL exam: 600 and 5 on the Test of Written English (TWE).
  - Internet-based TOEFL exam: 100/120 and 22/30 on the writing and speaking sections.
- Equivalent results in some other recognized test of English-language proficiency are acceptable.

Program Requirements

- **Coursework.** Students must successfully complete **3.5 full-course equivalents (FCEs)** including:
  - PHL2198H *Advanced Introduction to the Philosophy of Science* (0.5 FCE)
  - 1.5 FCE in graduate seminars in philosophy of science or cognate areas of philosophy such as logic, philosophy of language, epistemology, metaphysics, or philosophy of mind.
  - 1.0 FCE in the history of science from the following courses: HPS2000H, HPS2001H, HPS2003H, HPS2004H, HPS2008H, HPS2009H.
  - PHL3000H *MA Professional Development Workshop* (0.5 FCE).
- Each MA student is assigned an advisor who will recommend a suitable program of philosophy courses. The student's choice of courses must be approved by the department.
- It is possible for a full-time student to complete all requirements for the MA degree in the Fall and Winter sessions; however, the department encourages students to take no more than 3.0 FCEs during the Fall and Winter sessions and to complete the last course during the Summer session.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
5 years part-time

Time Limit

3 years full-time;
6 years part-time

Philosophy: Philosophy PhD

Doctor of Philosophy

Program Description

The PhD program has two options: a five-year option and a four-year option. The five-year option is the most common and is the only direct-entry option for students with a bachelor's degree. The five-year option provides five years of funding and requires two years of coursework, while the four-year option provides four years of funding and requires one year of coursework. The program requirements are summarized below.

Students enrolled in graduate programs in philosophy in other universities are welcome to apply to spend a year studying at the University of Toronto. Please direct any inquiries to the Director of Graduate Studies.

Students who wish to take, for credit, one or more of the courses offered by the department as non-degree students, should apply for admission as Special Students. The application procedures and deadlines are the same as those for the MA program.

Applicants should consult the department's web page for complete details on graduate programs, course offerings, short academic profiles of graduate faculty, and application procedures.

PhD Program

Minimum Admission Requirements

- Applicants approved by the department are admitted under the General Regulations of the School of Graduate Studies.
- Applicants should have a master's degree in philosophy from a recognized university with an average grade of at least an A– in the applicant's overall program. Applicants must satisfy the department that they are capable of independent research in philosophy at an advanced level.
- Applicants whose primary language is not English and who are not graduates of a university whose language of instruction is English must complete the Test of English as a Foreign Language (TOEFL) with the following minimum scores:

- Paper-based TOEFL exam: 600 and 5 on the Test of Written English (TWE).
- Internet-based TOEFL exam: 100/120 and 22/30 on the writing and speaking sections.

- Equivalent results in some other recognized test of English-language proficiency are acceptable.

Program Requirements

- **Course Requirements**
  - Students must complete a minimum of 3.0 FCEs in philosophy, with a minimum A– average by the end of Year 1 including:
  - At least 1.0 FCE which must comprise courses from philosophical traditions from different geographical regions and/or different historical periods.
  - At least 1.0 FCE which must comprise problems of philosophy courses.
  - The proseminar in philosophy (PHL1111H) worth 0.5 FCE during the Fall session of Year 1.
  - With the department's permission, a student may replace up to 1.0 FCE in philosophy with graduate courses offered by another department, provided that the courses are required for the student's planned research.
- **Breadth Requirement**. A student must demonstrate competence in at least six areas of philosophy, including the following:
  - Each of the following three areas in the problems of philosophy:
    - Contemporary issues in metaphysics, epistemology, and philosophy of science.
    - Contemporary issues in values (ethics, politics, aesthetics, and philosophy of religion).
    - Contemporary issues in mind, language, and logic.
  - The remaining three areas must be chosen from philosophical traditions from different geographical regions such as South Asian or East Asian philosophy, and/or different historical periods such as Medieval or Twentieth-Century philosophy.
  - Competence in any area is normally established by successful completion of a graduate 0.5 FCE in that area.
  - A student must also demonstrate competence in logic (defined as proficiency in first-order symbolic logic with identity). This competence is expected of all students prior to beginning doctoral studies. Where this is not the case, competence must be acquired as a supplement to the required number of courses and be demonstrated to the satisfaction of the department by the time the qualifying requirement is met.
- **Revision Paper Requirement.** To be satisfied either sometime during coursework or in the summer immediately following coursework. Students will designate a particular paper typically written during coursework as their revision paper and will solicit supervision on the revision of the paper from a faculty member. Students will receive verbal and written feedback on their paper from their faculty supervisor and will revise their paper in light of this feedback. A second round of feedback and revision may be sought by the student or the faculty supervisor, after which time the student will again revise and submit. Students should plan to complete the requirement over one or two months depending on whether one or two rounds of revision are undertaken.
- **Qualifying Requirement**. After completing all course requirements, the student selects a thesis committee that will oversee his or her academic progress through the final thesis defence. The student meets with the committee to discuss a tentative thesis topic, construct an appropriate research reading list, and receive guidance on writing a qualifying paper. After submitting the qualifying paper and making any required adjustments to the reading list, the student takes a two-part (written and oral) qualifying examination based on the paper and the reading list. The paper will be submitted and written and oral exams taken four to six weeks later, during the Winter session of Year 2.
- **Dissertation Prospectus Requirement.** To be satisfied at the September meeting of the student and their dissertation committee. The prospectus can take many forms and could, for example, proceed by indicating chapters, problems, and literature, and/or theses that will organize, be discussed, or be argued for in the dissertation. Committees will then give feedback on the overall plan. The length of the prospectus will vary from committee to committee but as a rough guideline, the prospectus may comprise a document of three to five pages.
- **Research Tools Requirement**. Each PhD student must demonstrate competence in at least one research tool. A research tool may be one of the following:
  - Reading knowledge of a language other than English.
  - Familiarity with a discipline other than philosophy (e.g., linguistics, psychology, or mathematics).
  - Mastery of research methods not typical in philosophy (e.g., statistical methods).
  - The research tool will be determined by the Graduate Coordinator in consultation with the student's thesis committee.
- **Thesis**. A candidate must submit a thesis on an approved subject and defend the thesis at a Doctoral Final Oral Examination. The department is not obligated to provide supervision in areas falling outside the competency, interest, or availability of its graduate faculty.
- **Residence**. Students must be registered as full-time, on-campus students and must reside in sufficient geographical proximity to enable them to fulfil the course, breadth, qualifying, and language requirements set by the department in a smooth and timely fashion. They are also expected to participate fully in departmental activities. While writing the thesis, candidates are expected to be in residence, with the exception of absence for research.
- **Normal Timeline Through the Program**. By the end of Year 1 of registration, students should have completed all the course requirements for the degree. By the end of the following year of registration, all students should have satisfied any remaining breadth requirements, selected a thesis committee, and passed the qualifying examination. (These are general deadlines; consult the department's web page for specific dates and further details.) Thereafter, the candidate selects a member of the thesis committee to be the thesis supervisor and begins work on the thesis, which he or she is expected to finish within two years.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants approved by the department are admitted under the General Regulations of the School of Graduate Studies.
- Applicants should have an appropriate bachelor's degree from a recognized university; a strong background in philosophy (roughly equivalent to an undergraduate major); and an average grade of at least a B+ in the overall program and at least an A– in philosophy courses.
- Applicants whose primary language is not English and who are not graduates of a university whose language of instruction is English must complete the Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - Paper-based TOEFL exam: 600 and 5 on the Test of Written English (TWE).
  - Internet-based TOEFL exam: 100/120 and 22/30 on the writing and speaking sections.
- Equivalent results in some other recognized test of English-language proficiency are acceptable.

Program Requirements

- **Course Requirements**
  - Students must take a minimum of 6.0 FCEs in philosophy, with an average grade of at least an A– including:
    - At least 2.0 FCEs which must comprise courses from philosophical traditions from different geographical regions such as South Asian or East Asian philosophy, and/or different historical periods such as Medieval or Twentieth-Century philosophy.
    - At least 2.0 FCEs which must comprise problems of philosophy courses.
    - The proseminar in philosophy (PHL1111H) worth 0.5 FCE during the Fall session of Year 1.
    - With the department's permission, a student may replace up to 1.0 FCE in philosophy with graduate courses offered by another department, provided that the courses are required for the student's planned research.
  - To remain in good standing, students must complete 3.0 FCEs with an A– average by the end of Year 1, and 6.0 FCEs with an A– average by the end of Year 2.
- **Breadth Requirement**. A student must demonstrate competence in at least six areas of philosophy, including the following:
  - Each of the following three areas in the problems of philosophy:
    - Contemporary issues in metaphysics, epistemology, and philosophy of science.
    - Contemporary issues in values (ethics, politics, aesthetics, and philosophy of religion).
    - Contemporary issues in mind, language, and logic.
  - The remaining three required areas must be chosen from philosophical traditions from different geographical regions such as South Asian or East Asian philosophy, and/or different historical periods such as Medieval or Twentieth-Century philosophy.
  - Competence in any area is normally established by successful completion of a graduate 0.5 FCE in that area.
  - A student must also demonstrate competence in logic (defined as proficiency in first-order symbolic logic with identity). This competence is expected of all students prior to beginning doctoral studies. Where this is not the case, competence must be acquired as a supplement to the required number of courses and be demonstrated to the satisfaction of the department by the time the qualifying requirement is met.
- **Revision Paper Requirement.** To be satisfied either sometime during coursework or in the summer immediately following coursework. Students will designate a particular paper typically written during coursework as their revision paper and will solicit supervision on the revision of the paper from a faculty member. Students will receive verbal and written feedback on their paper from their faculty supervisor and will revise their paper in light of this feedback. A second round of feedback and revision may be sought by the student or the faculty supervisor, after which time the student will again revise and submit. Students should plan to complete the requirement over one or two months depending on whether one or two rounds of revision are undertaken.
- **Qualifying Requirement**. After completing all course requirements, the student selects a thesis committee that will oversee his or her academic progress through the final thesis defence. The student meets with the committee to discuss a tentative thesis topic, construct an appropriate research reading list, and receive guidance on writing a qualifying paper. After submitting the qualifying paper and making any required adjustments to the reading list, the student takes a two-part (written and oral) qualifying examination based on the paper and the reading list. The paper will be submitted and written and oral exams taken four to six weeks later, during the Winter session of Year 3.
- **Dissertation Prospectus Requirement.** To be satisfied at the September meeting of the student and her dissertation committee. The prospectus can take many forms and could, for example, proceed by indicating chapters, problems, and literature, and/or theses that will organize, be discussed, or be argued for in the dissertation. Committees will then give feedback on the overall plan. The length of the prospectus will vary from committee to committee but as a rough guideline, the prospectus may comprise a document of three to five pages.
- **Research Tools Requirement**. Each PhD student must demonstrate competence in at least one research tool. A research tool may be one of the following:
  - Reading knowledge of a language other than English.
  - Familiarity with a discipline other than philosophy (e.g., linguistics, psychology, or mathematics).
  - Mastery of research methods not typical in philosophy (e.g., statistical methods).
  - The research tool will be determined by the Graduate Coordinator in consultation with the student's thesis committee.
- **Thesis**. A candidate must submit a thesis on an approved subject and defend the thesis at a Doctoral Final Oral Examination. The department is not obligated to provide supervision in areas falling outside the competency, interest, or availability of its graduate faculty.
- **Residence**. Students must be registered as full-time, on-campus students and must reside in sufficient geographical proximity to enable them to fulfil the course, breadth, qualifying, and language requirements set by the department in a smooth and timely fashion. They are also expected to participate fully in departmental activities. While writing the thesis, candidates are expected to be in residence, with the exception of absence for research.

- **Normal Timeline Through the Program**. By the end of Year 2 of registration, students should have completed all course requirements for the degree. By the end of the following year of registration, all students should have satisfied any remaining breadth requirements, selected a thesis committee, and passed the qualifying examination. (These are general deadlines; consult the department's web page for specific dates and further details.) Thereafter, the candidate selects a member of the thesis committee to be the thesis supervisor and begins work on the thesis, which he or she is expected to finish within two years.

Program Length

5 years

Time Limit

7 years

Philosophy: Philosophy MA, PhD Courses

Not all courses are offered every year. Please consult the department's website, which lists the courses the department will offer this year as well as those offered by other departments that may be taken for philosophy credit.

Required Courses

PHL1111H	PhD Proseminar
PHL2222H	MA Proseminar I
PHL2223H	MA Proseminar II
PHL3000H	MA Professional Development Workshop

Concentration: Philosophy of Science

PHL2198H	Advanced Introduction to the Philosophy of Science

Reading Courses

PHL1000H,Y	Reading Course
PHL1001H,Y	Reading Course
PHL1500H,Y	Reading Course

History of Philosophy

Classical Greek and Roman Philosophy

PHL2000H	Early Greek Philosophy
PHL2002H	Plato
PHL2003H	Aristotle
PHL2005H	Seminar in Plato
PHL2007H	Seminar in Aristotle
PHL2009H	Seminar in Greek Philosophy
PHL2010H	Late Greek Philosophy
PHL2011H	Seminar in Hellenistic Philosophy

East Asian Philosophy

PHL2013H	Topics in Chinese Philosophy
PHL2014H	Topics in Chinese Moral Psychology
PHL2015H	Confucianism
PHL2016H	Taoism: Philosophy and Religion

South Asian Philosophy

PHL2018H	South Asian Philosophy
PHL2019H	Topics in South Asian Philosophy

Medieval Philosophy

MST3301H	Themes in Medieval Philosophy
MST3309H	Birth of the Will: Augustine and Anselm
MST3311H	Topics in Medieval Metaphysics (PR)
MST3322H	William of Ockham
MST3327H	Free Will and Human Action in Medieval Philosophy
MST3346H	Medieval Islamic Philosophy

Early Modern Philosophy

PHL2051H	The Rationalists
PHL2055H	The Empiricists
PHL2057H	Seminar in Seventeenth-and Eighteenth-Century Philosophy
PHL2063H	Kant's Ethics

Feminist Philosophy

PHL2140H	Topics in Feminist Philosophy

Nineteenth- and Twentieth-Century Philosophy

PHL2076H	Hegel
PHL2078H	Kierkegaard
PHL2079H	Marxist Philosophy
PHL2084H	Seminar in Nineteenth-Century Continental Philosophy
PHL2085H	Husserl
PHL2089H	Seminar in Twentieth-Century Continental Philosophy
PHL2090H	Hermeneutics
PHL2091H	The Critical Theory of Society
PHL2092H	Pragmatism
PHL2093H	Frege
PHL2094H	Russell
PHL2095H	Wittgenstein
PHL2096H	Early Analytic Philosophy
PHL2097H	Later Analytic Philosophy
PHL2192H	Seminar in Analytic Philosophy
PHL2193H	Topics in Analytic Philosophy

History and Philosophy of Science and Technology

For MA students in the Philosophy of Science concentration.

HPS2000H	History of Mathematics
HPS2001H	History of Physics
HPS2003H	History of Biology
HPS2004H	History of Medicine
HPS2008H	History of Psychology
HPS2009H	History and Philosophy of the Social Sciences

Problems of Philosophy

Metaphysics and Epistemology

PHL2101H	Seminar in Metaphysics
PHL2105H	Topics in Metaphysics
PHL2111H	Seminar in Epistemology
PHL2115H	Topics in Epistemology
PHL2117H	Formal Epistemology
PHL2119H	Philosophical Foundations of Multidisciplinary Studies
PHL2171H	Philosophy of Mind
PHL2172H	Seminar in Philosophy of Mind
PHL2175H	Philosophy of Perception
PHL2181H	Philosophy of Religion

Logic and the Philosophy of Language

PHL2120H	Introductory Mathematical Logic
PHL2122H	Advanced Logic
PHL2124H	Seminar in Logic
PHL2125H	Many Valued and Modal Logics
PHL2126H	Philosophy of Logic
PHL2127H	Philosophy of Mathematics
PHL2128H	Decision and Game Theory
PHL2130H	Topics in Informal Logic
PHL2137H	Philosophy of Action
PHL2190H	Philosophy of Language
PHL2191H	Seminar in the Philosophy of Language
PHL2197H	Foundations of Computation and Information

Value Theory

PHL2131H	Ethics
PHL2132H	Seminar in Ethics
PHL2133H	Topics in Ethics
PHL2135H	Metaethics
PHL2141H	Political Philosophy
PHL2142H	Seminar in Political Philosophy
PHL2143H	Social Philosophy
PHL2144H	Seminar in Social Philosophy
PHL2145H	Bioethics
PHL2146Y	Topics in Bioethics
PHL2148H	Philosophy of Law
JPL2149H	Legal Theory
PHL2151H	Aesthetics
PHL2152H	Philosophy and Teaching

Philosophy of Science

JPH2194H	Topics in the History of the Philosophy of Science

PHL2195H	Philosophy of Biology
PHL2196H	Topics in the Philosophy of Science
PHL2198H	Advanced Introduction to the Philosophy of Science
PHL2199H	Seminar in the Philosophy of Science
PHL2200H	Philosophy of Physics

Miscellaneous

PHL3101H	Intensive Special Course
PHL4900H	Research Seminar

Physical and Environmental Sciences

Physical and Environmental Sciences: Introduction

Faculty Affiliation

University of Toronto Scarborough (UTSC)

Degree Programs

Environmental Science

MEnvSc

- Fields:
  - Climate Change Impacts and Adaptation;
  - Conservation and Biodiversity;
  - Terrestrial and Aquatic Systems

PhD

- Concentrations:
  - Climate Change and the Environment;
  - Contaminant Flux;
  - Environmental Science in Transitional Economies;
  - Great Lakes Ecosystems;
  - Remediation and Restoration of Degraded Environmental Systems;
  - Urban Geoscience

Combined Degree Programs

- UTSC, Conservation and Biodiversity (Specialist), HBSc / MEnvSc
- UTSC, Environmental Biology (Specialist), HBSc / MEnvSc
- UTSC, Environmental Biology (Specialist Co-op), HBSc / MEnvSc
- UTSC, Environmental Chemistry (Specialist), HBSc / MEnvSc
- UTSC, Environmental Chemistry (Specialist Co-op), HBSc / MEnvSc
- UTSC, Environmental Geoscience (Specialist), HBSc / MEnvSc
- UTSC, Environmental Geoscience (Specialist Co-op), HBSc / MEnvSc
- UTSC, Environmental Physics (Specialist), HBSc / MEnvSc
- UTSC, Environmental Physics (Specialist Co-op), HBSc / MEnvSc
- UTSC, Integrative Biology (Specialist), HBSc / MEnvSc

Collaborative Specializations

The following collaborative specializations are available to students in the participating degree programs as listed below:

- Development Policy and Power
  - Environmental Science, MEnvSc
- Environmental Studies
  - Environmental Science, MEnvSc, PhD
- Environment and Health
  - Environmental Science, MEnvSc, PhD
- Food Studies
  - Environmental Science, PhD

Overview

The Graduate Department of Physical and Environmental Sciences offers opportunities for graduate studies in environmental science, leading to the degrees of **Master of Environmental Science** (MEnvSc) and **Doctor of Philosophy** (PhD) **in Environmental Science**.

Yerubandi, Ram - MTech, PhD
Young, Joelle - BSc, MA, PhD
Zhu, Jiping - BS, MSc, DSc

Physical and Environmental Sciences: Environmental Science MEnvSc

Master of Environmental Science

Program Description

The MEnvSc is a 12-month degree program committed to the development of well-trained practitioners in environmental science in all fields, primarily to meet the needs of industry, governments, and environmental policy/education organizations.

The MEnvSc offers three enrolment options — research, internship, and part-time studies — in each of the three fields. The three designated fields of study are:

- **Climate Change Impacts and Adaptation**: Students are trained in the science, data analysis, and rigorous assessment process for the impacts of climate change on a wide range of natural and human systems.
- **Conservation and Biodiversity**: A major focus is the application of ecological theory and principles to real-world conservation challenges.
- **Terrestrial and Aquatic Systems**: A major focus is understanding the flux of contaminants and excess nutrients through surface and sub-surface environments and the methods/solutions needed to remediate contaminated or damaged environmental systems.

In all three fields, students can opt for an internship or a research option after eight months of coursework. The Department of Physical and Environmental Sciences has the support of two dedicated internship coordinators who help students find and successfully complete an internship by providing them with professional skills training and in-class workshops on topics that include job search preparation and skills such as: environmental labour market, workplace expectations, professionalism, networking, and more. The MEnvSc program works closely with a broad employer base for internship opportunities. Research-stream MEnvSc students receive intensive and individualized academic and research support from mentors of their choice.

Full-time and part-time study options are available in all fields of study.

Field: Climate Change Impacts and Adaptation

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Physical and Environmental Sciences' additional admission requirements stated below.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- A minimum mid-B grade average in the last two years of the undergraduate program.
- Applicants must submit a written statement explaining their objectives for entering the program and the suitability of their background. Appropriate post-graduate work experiences will be considered as part of the admission application.
- A science or engineering undergraduate degree including at least two half courses or one full course in each of chemistry, physics, calculus, and biology.

Program Requirements

- **Coursework** consists of **5.5 full-course equivalents (FCEs)** as follows:
  - EES1100H *Advanced Seminar in Environmental Science* (0.5 FCE)
  - EES1117H *Climate Change Impact Assessment* (0.5 FCE)
  - EES1132H *Climate Data Analysis* (0.5 FCE).
    - Note: students who have completed EESD21H3 as part of their undergraduate degree, and achieved a minimum grade of 70%, should replace EES1132H with another elective graduate course of the same credit weight (0.5 FCE).
  - EES1133H *Climate Change Science and Modelling* (0.5 FCE)
  - Completion of two of the following three courses:
    - EES1131H *Applied Climatology* (0.5 FCE)
      - Note: students who have completed EESD31H3 as part of their undergraduate degree, and achieved a minimum grade of 70%, cannot complete EES1131H as part of the MEnvSc program; they should complete EES1134H and EES1136H.
    - EES1134H *Climate Change Policy* (0.5 FCE)
    - EES1136H *Climate Change Adaptation* (0.5 FCE)
  - Completion of either:
    - 0.5 FCE in elective courses (see course list) and 2.0 FCEs for the internship (EES1116Y), **or**
    - 1.0 FCE in elective courses (see course list) and 1.5 FCEs for the research paper (EES1101Y). Students planning to complete the research paper option must complete the prerequisite (EES1114H).
- Students will choose either a research or internship option.
  - **Research option:** Each student is required to have a research supervisor. For full-time students, the intensive research necessary for the research paper will normally be completed in the final Summer session. The final research paper needs to be written in scientific journal format and will be presented and defended orally in front of an examination committee. The committee will include the supervisor and two other members of the graduate faculty.
  - **Internship option:** For full-time students, the internship in private industry, government, or a non-governmental organization (NGO) will normally be completed in the final Summer session. It will consist of a minimum of four consecutive months. Successful completion of the internship is based on an assessment completed by the student's work supervisor, the satisfactory completion of a written experience report, and the satisfactory completion and presentation of a poster highlighting the internship experience.
- A final grade below 70% in any course equates to an FZ, which is an insufficient grade. A MEnvSc student who receives more than one final grade of FZ (i.e., two or more) will be recommended for termination of registration from the MEnvSc program.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Field: Conservation and Biodiversity

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Physical and Environmental Sciences' additional admission requirements stated below.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- A minimum mid-B grade average in the last two years of the undergraduate program.
- Applicants must submit a written statement explaining their objectives for entering the program and the suitability of their background. Appropriate post-graduate work experiences will be considered as part of the admission application.
- An undergraduate degree in biology or a closely related field, and successful completion of an undergraduate course in conservation biology. Students who have not successfully completed an undergraduate course in conservation biology will be required to complete an undergraduate course, BIOC63H3 *Conservation Biology* (0.5 FCE), as an extra (EXT) course.

Program Requirements

- **Coursework** consists of **5.5 full-course equivalents (FCEs)** as follows:
  - EES1100H *Advanced Seminar in Environmental Science* (0.5 FCE)
  - EES3000H *Applied Conservation Biology* (0.5 FCE)
  - EES3001H *Professional Scientific Literacy* (0.5 FCE)
  - EES3002H *Conservation Policy* (0.5 FCE)
  - EES3003H *Topics in Applied Biodiversity* (0.5 FCE)
  - Completion of either:
    - 1.0 FCE in elective courses (see the course list) and 2.0 FCEs for the internship (EES1116Y) **or**
    - 1.5 FCEs in elective courses (see the course list) and 1.5 FCEs for the research paper (EES1101Y).
- Students will choose either a research or internship option.
  - **Research option:** Each student is required to have a research supervisor. For full-time students, the intensive research necessary for the research paper will normally be completed in the final Summer session. The final research paper needs to be written in scientific journal format and will be presented and defended orally in front of an examination committee. The committee will include the supervisor and two other members of the graduate faculty.
  - **Internship option:** For full-time students, the internship in private industry, government, or a non-governmental organization (NGO) will normally be completed in the final Summer session. It will consist of a minimum of four consecutive months. Successful completion of the internship is based on an assessment completed by the student's work supervisor, the satisfactory completion of a written experience report, and the satisfactory completion and presentation of a poster highlighting the internship experience.
- A final grade below 70% in any course equates to an FZ, which is an insufficient grade. A MEnvSc student who receives more than one final grade of FZ (i.e., two or more) will be recommended for termination of registration from the MEnvSc program.

Physical and Environmental Sciences: Environmental Science MEnvSc Courses

Please note that not all courses are offered every year.

EES1100H	Advanced Seminar in Environmental Science
EES1101Y	Research Paper in Environmental Science
EES1102H	Analytical Chemistry for Geoscientists
EES1103H	Field Measurements and Sampling: The Essentials
EES1104H	Microorganisms and the Environment
EES1105H	Soil Contamination Chemistry
EES1106H	Geological Evolution and Environmental History of North America
EES1108H	Environmental Science Field Camp
EES1109H	Advanced Techniques in Geographic Information Systems
EES1111H	Freshwater Ecology and Biomonitoring
EES1112H	Boundary Layer Climates and Contaminant Fate
EES1113H	Groundwater Hydrochemistry and Contaminant Transport
EES1114H	Directed Readings in Environmental Science I
EES1115H	Directed Readings in Environmental Science II
EES1116Y	Internship
EES1117H	Climate Change Impact Assessment
EES1118H	Fundamentals of Ecological Modelling
EES1119H	Quantitative Environmental Analysis
EES1120H	Fluid Dynamics of Contaminant Transport
EES1121H	Modelling the Fate of Organic Chemicals in the Environment
EES1122H	Global Environmental Security and Sustainable Development
EES1123H	Environmental Regulations
EES1124H	Environmental Project Management
EES1125H	Contaminated Site Remediation
EES1126H	Hydrology and Watershed Management
EES1127H	Applied Biogeochemistry and Geomicrobiology
EES1128H	Biophysical Interactions in Managed Environments
EES1129H	Brownfields Redevelopment
EES1130H	Ontario BioGeospheres Field Course
EES1131H	Applied Climatology (exclusion: EESD31H3)
EES1132H	Climate Data Analysis (exclusion: EESD21H3)
EES1133H	Climate Change Science and Modelling
EES1134H	Climate Change Policy
EES1135H	Environmental Change and Human Health
EES1136H	Climate Change Adaptation
EES1137H	Quantitative Applications for Data Analysis
EES1701H	Environmental Legislation and Policy
EES1704H	Environmental Risk Assessment
EES3000H	Applied Conservation Biology
EES3001H	Professional Scientific Literacy
EES3002H	Conservation Policy
EES3003H	Topics in Applied Biodiversity
EES3111H	Conservation Genetics
EES3113H	Topics in Population and Community Ecology
EES3114H	Topics in Urban and Rural Ecology
EES4001H	Internship Training 1 (restricted to students enrolled in one of the approved combined degree programs with the MEnvSc)
EES4003H	Academic Training 1 (restricted to students enrolled in one of the approved combined degree programs with the MEnvSc)

Physical and Environmental Sciences: Environmental Science PhD

Doctor of Philosophy

Program Description

Research and teaching are focused on the interfaces between traditional disciplines in dealing with fundamental scientific issues. Faculty members are cross-appointed from several departments including: chemistry, earth sciences, geography, ecology and evolutionary biology, cell and systems biology, engineering, forestry, physics, and social sciences. Research is clustered into six major concentrations:

- Climate Change and the Environment
- Contaminant Flux
- Environmental Science in Transitional Economies
- Great Lakes Ecosystems
- Remediation and Restoration of Degraded Environmental Systems
- Urban Geoscience

Applicants may be accepted into the PhD program via one of three routes: 1) following completion of an appropriate master's degree; 2) transfer from an appropriate master's program; or 3) direct entry following completion of an appropriate BSc degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Physical and Environmental Sciences' additional admission requirements stated below.
- Applicants may be accepted into the PhD program:
  - Following completion of the MEnvSc degree, an MSc degree in environmental science, or a related discipline, or the MASc degree in environmental engineering or related discipline, or equivalent from a recognized university with a minimum of B+ average in all work completed in the master's program.
  - By requesting transfer from a suitable master's program (see above); students may reclassify from the master's program after 12 months of full-time study. Transfer from the MEnvSc program is not permitted

Program Requirements

- **Coursework.** A total of **2.0 full-course equivalents (FCEs)** as follows:
  - A mandatory 0.5 FCE (EES2200H *Advanced Seminar in Environmental Science*) plus 1.5 FCEs to provide background for the student's research. Courses selected must be approved by the student's supervisor and the Graduate Chair. In some cases, additional courses may be required if a student's preparedness is assessed as being insufficient.
  - Students may apply to take a number of PhD-level courses taught by the core faculty, both within the Graduate Department of Physical and Environmental Sciences and outside the Graduate Department of Physical and Environmental Sciences as part of their 1.5 FCEs for the degree. However, all courses for the PhD degree must be approved by the student's supervisor and the Graduate Chair.
- **Thesis.** The execution of an original piece of research in environmental science carried out under faculty supervision and presented in thesis form. The program requires the development and submission of a thesis proposal, and its examination in an oral thesis proposal appraisal (before the end of Year 2), a departmental oral examination of the completed thesis, and a Doctoral Final Oral Examination (FOE) carried out under the auspices of the School of Graduate Studies (SGS) involving examination by an appropriate at-arms-length external examiner.
  - The PhD proposal appraisal consists of a 20-minute presentation given by the student on the proposed thesis work followed by a question period where the student is examined on their proposal and their mastery of concepts in environmental science. The emphasis will be on the theory and proposed approach, rather than on progress to date. A negative outcome requires that the student retake the exam within four months after incorporating recommendations from the committee for improving the thesis research proposal. The outcome of the second exam will be either a pass or withdrawal from the program.
  - The Graduate Department of Physical and Environmental Sciences' PhD program requires that all PhD candidates complete two thesis defences: a Departmental Thesis Defence and an FOE with SGS. Normally, the Departmental Thesis Defence will be held at least eight weeks prior to the FOE. The committee will notify the Graduate Chair that the thesis is ready to be forwarded to SGS for the FOE. If the PhD candidate does not pass the Departmental Thesis Defence, the committee may recommend that the PhD candidate postpone their FOE.

Program Length

4 years full-time; 5 years transfer-from-master's

Time Limit

6 years full-time; 7 years transfer-from-master's

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Physical and Environmental Sciences' additional admission requirements stated below.
- In the case of exceptional students, applicants may be accepted into the PhD program by direct entry; that is, after completing an honours BSc degree in a related discipline with a minimum University of Toronto average of A– or equivalent.

Program Requirements

- **Coursework.** A total of **3.0 full-course equivalents (FCEs)** as follows:
  - A mandatory 0.5 FCE (EES2200H *Advanced Seminar in Environmental Science*) plus 2.5 FCEs to provide background for the student's research. Courses selected must be approved by the student's supervisor and the Graduate Chair. In some cases, additional courses may be required if a student's preparedness is assessed as being insufficient.
  - Students may apply to take a number of PhD-level courses taught by the core faculty, both within the Graduate Department of Physical and Environmental Sciences and outside the Graduate Department of Physical and Environmental Sciences as part of their 2.5 FCEs for the degree. However, all courses for the PhD degree must be approved by the student's supervisor and the Graduate Chair.

- **Thesis.** The execution of an original piece of research in environmental science carried out under faculty supervision and presented in thesis form. The program requires the development and submission of a thesis proposal, and its examination in an oral thesis proposal appraisal (before the end of Year 2), a departmental oral examination of the completed thesis, and a Doctoral Final Oral Examination (FOE) carried out under the auspices of the School of Graduate Studies (SGS) involving examination by an appropriate at-arms-length external examiner.
  - The PhD proposal appraisal consists of a 20-minute presentation given by the student on the proposed thesis work followed by a question period where the student is examined on their proposal and their mastery of concepts in environmental science. The emphasis will be on the theory and proposed approach, rather than on progress to date. A negative outcome requires that the student retake the exam within four months after incorporating recommendations from the committee for improving the thesis research proposal. The outcome of the second exam will be either a pass or withdrawal from the program.
  - The Graduate Department of Physical and Environmental Sciences' PhD program requires that all PhD candidates complete two thesis defences: a Departmental Thesis Defence and an FOE with SGS. Normally, the Departmental Thesis Defence will be held at least eight weeks prior to the FOE. The committee will notify the Graduate Chair that the thesis is ready to be forwarded to SGS for the FOE. If the PhD candidate does not pass the Departmental Thesis Defence, the committee may recommend that the PhD candidate postpone their FOE.

Physical and Environmental Sciences: Environmental Science PhD Courses

Core Course

EES2200H	Advanced Seminar in Environmental Science

The following are courses offered within the Department of Physical and Environmental Sciences. With the approval of the Graduate Chair, relevant courses from other graduate departments can be applied to the required full-course equivalents. Not all courses are offered every year.

Elective Courses

EES1102H	Analytical Chemistry for Geoscientists
EES1103H	Field Measurements and Sampling: The Essentials
EES1104H	Microorganisms and the Environment
EES1105H	Soil Contamination Chemistry
EES1106H	Geological Evolution and Environmental History of North America
EES1109H	Advanced Techniques in Geographic Information Systems
EES1111H	Freshwater Ecology and Biomonitoring
EES1112H	Boundary Layer Climates and Contaminant Fate
EES1113H	Groundwater Hydrochemistry and Contaminant Transport
EES1117H	Climate Change Impact Assessment
EES1118H	Fundamentals of Ecological Modelling
EES1119H	Quantitative Environmental Analysis
EES1120H	Fluid Dynamics of Contaminant Transport
EES1121H	Modeling the Fate of Organic Chemicals in the Environment
EES1122H	Global Environmental Security and Sustainable Development
EES1126H	Hydrology and Watershed Management
EES1127H	Applied Biogeochemistry and Geomicrobiology
EES1128H	Biophysical Interactions in Managed Environments
EES1131H	Applied Climatology (exclusion: EESD31H3)
EES1132H	Climate Data Analysis (exclusion: EESD21H3)
EES1133H	Climate Change Science and Modelling
EES1134H	Climate Change Policy
EES1135H	Environmental Change and Human Health
EES1136H	Climate Change Adaptation
EES1137H	Quantitative Applications for Data Analysis
EES2201H	Advanced Readings in Environmental Science
EES3000H	Applied Conservation Biology
EES3001H	Professional Scientific Literacy
EES3002H	Conservation Policy
EES3003H	Topics in Applied Biodiversity
EES3111H	Conservation Genetics
EES3113H	Topics in Population and Community Ecology
EES3114H	Topics in Urban and Rural Ecology

Physical Therapy: Physical Therapy MScPT

Master of Science in Physical Therapy

Program Description

24-Month Option

The MScPT is a 24-month professional program leading to entry to practice. The program is accredited by Physiotherapy Education Accreditation Canada (PEAC) and more information about accreditation is available on the Department of Physical Therapy's website. Graduates will be eligible to write the Physiotherapy Competency Examination (PCE), administered by the Canadian Alliance of Physiotherapy Regulators, which qualifies them to practise physical therapy in Canada. Graduates will be eligible to register in the Canadian Physiotherapy Association and the Colleges of Physiotherapy in all Canadian provinces.

12-Month Option

Admissions to the 12-month advanced-standing option have been administratively suspended.

The Master of Science in Physical Therapy, Advanced-Standing Option allows eligible physical therapists with a bachelor's degree in physiotherapy to acquire the master's degree in an online environment with on-campus residency. There is a strong focus on research and best practices integrated throughout the program.

MScPT Program (24-Month Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Physical Therapy's additional admission requirements stated below.

- Applicants are considered if they hold an appropriate bachelor's degree with high academic standing from a recognized university, with a minimum mid-B average in the final year.
- Prerequisite courses include human vertebrate physiology (0.5 full-course equivalent [FCE]); human anatomy (0.5 FCE); life and/or physical sciences (1.0 FCE); social sciences, and/or humanities, and/or languages (1.0 FCE); and statistics or research methods (0.5 FCE). A minimum grade of B– (or 70%) in each of these courses, as per the grade recorded on the transcript, is required.
- Proficiency in the English language must be demonstrated by all applicants educated outside Canada whose primary language is not English and who graduated from a university where the language of instruction and examination was not English. The department prefers the Test of English as a Foreign Language (TOEFL):
  - Paper-based test: a minimum score of 600, with 5 on the Test of Written English (TWE) and 50 on the Test of Spoken English (TSE)
  - Internet-based test: a minimum score of 100/120 overall, and 22/30 on the writing and speaking sections.
  - TOEFL candidates must request that results be sent to institution code 0982.
  - Results are due by March 1 of the application year.
- Complete a mandatory, 90-minute computer-based situational judgment test (CASPer) to assist with the selection process. CASPer assesses for non-cognitive skills and interpersonal characteristics that are important for successful students and graduates of the program.
  - The CASPer z-score will be used as the initial screening process. Applicants must score ≥ -1 in order to proceed to the next stage of the admission cycle. Please refer to the Physical Therapy website for details on how the results are used in the admission process.
- Applicants can apply online using the Ontario Rehabilitation Sciences Programs Application Service (ORPAS). Visit the Physical Therapy and the ORPAS websites for more information regarding application requirements and document submissions.

Program Requirements

- **Coursework.** Students must complete **18.75 full-course equivalents (FCEs)** over two years of continuous, full-time study.
- Included within the program structure are 30 weeks of full-time clinical internships.
- Students are required to complete all courses included in the required course list below.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years

MScPT Program (12-Month Advanced-Standing Option)

Admissions have been administratively suspended.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Physical Therapy's additional admission requirements stated below.
- Applicants who are eligible physical therapists will be considered if they have completed an appropriate bachelor's degree in physiotherapy with a minimum mid-B average in the final year.
- Applicants must have successfully completed the national Canadian Physiotherapy Competency Examination (with the exception of individuals licensed to practise in Quebec) and be licensed for independent practice in Canada with a provincial regulating body.
- Proficiency in the English language must be demonstrated by all applicants educated outside Canada whose primary language is not English and who graduated from a university where the language of instruction and examination was not English. The department prefers the Test of English as a Foreign Language (TOEFL):
  - Paper-based test: a minimum score of 600, with 5 on the Test of Written English (TWE) and 50 on the Test of Spoken English (TSE)
  - Internet-based test: a minimum score of 100/120 overall, and 22/30 on the writing and speaking sections.
- Applicants apply using the SGS Online Admissions Application system. Visit the Physical Therapy website for more information on application requirements and document submissions.

Program Requirements

- Students must complete this program option in an online environment with mandatory on-campus residency requirements.
- Students must attend unit 6 PHT1006Y (0.75 FCE) and unit 12 PHT1012Y (1.0 FCE) in on-campus residency periods.
- Students must complete unit 10 PHT1010Y, a group research project, via online format (0.75 FCE).
- Students must complete PHT1016H *Evidence Based Practice in Physical Therapy* (0.5 FCE).
- Complete an elective course (0.5 FCE) either online or on campus.
- For information on units of instruction, please visit the Physical Therapy website.
- Students must complete the program option in an online environment. In addition, there are two mandatory on-campus residencies, whereby students must be on campus full-time and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.

Program Length

3 sessions (typical registration sequence: F/W/S)

Time Limit

3 years

Physical Therapy: Physical Therapy MScPT Courses

Required Courses

PHT1101H (0.5 FCE)	Critical Foundations of Physical Therapy
PHT1102Y (3.0 FCEs)	Physical Therapy Practice I
PHT1103Y (3.0 FCEs)	Physical Therapy Practice II
PHT1104Y[+] (3.0 FCEs)	Physical Therapy Practice III
PHT1105Y (0.75 FCE)	Clinical Internship I (Honours/Pass/Fail)
PHT1106H (0.5 FCE)	Advanced Critical Thinking in Physical Therapy
PHT1107H (0.5 FCE)	Scholarly Practice I
PHT1108Y (0.75 FCE)	Clinical Internship II (Honours/Pass/Fail)
PHT1109Y (0.75 FCE)	Clinical Internship III (Honours/Pass/Fail)
PHT1110Y (3.0 FCEs)	Physical Therapy Practice IV
PHT1111H (0.5 FCE)	Selected Topics in Physical Therapy
PHT1112Y (0.75 FCE)	Clinical Internship IV (Honours/Pass/Fail)
PHT1113Y (1.0 FCE)	Scholarly Practice II
PHT1114Y (0.75 FCE)	Clinical Internship V (Honours/Pass/Fail)

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Biomedical Engineering
  - Physics, MSc, PhD
- Environmental Studies
  - Physics, MSc, PhD

Overview

The Department of Physics carries out research in experimental and theoretical physics in the following fields: earth, atmospheric, and planetary physics; quantum optics; condensed matter physics; subatomic physics and astrophysics; and biological physics. The department is involved in many collaborative efforts and has close ties to many institutes worldwide. Eight of them have a particular impact on students. Not only are they concerned with interdisciplinary work, but they are based, in whole or in part, at the University of Toronto and provide novel research opportunities for students at their “home base.” They include: CGCS (Centre for Global Change Science), CIFAR (Canadian Institute for Advanced Research), IPP (Institute for Particle Physics), CITA (Canadian Institute for Theoretical Astrophysics), CQIQC (Center for Quantum Information and Quantum Control), the Fields Institute for Research in Mathematical Sciences, IBBME (Institute of Biomaterials and Biomedical Engineering), and PRO (Photonics Research Ontario).

Physics: Physics MSc

Master of Science

Program Description

The MSc program is directed primarily to qualified students seeking a career in scientific research, with an emphasis on doctoral-stream studies. The MSc can be taken both with or without a thesis, the latter being the norm.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Physics' additional admission requirements stated below.
- An appropriate bachelor's degree with a final-year average equivalent to at least a University of Toronto mid-B.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

Program Requirements

- Students normally complete program requirements in one of three ways:
  - **Option 1: Coursework plus MSc Research Report:**
    - graduate lecture courses (3.0 full-course equivalents [FCEs]);
    - a Research Report, which consists of a 6000-series research course appropriate to the field of physics (1.0 FCE) and PHY3400Y (1.0 FCE).
  - **Option 2: Coursework plus MSc Research Project:**
    - graduate lecture courses (2.0 FCEs);
    - a 6000-series research course appropriate to the field of physics (1.0 FCE);
    - a Research Project, which consists of a 7000-series seminar course appropriate to the field of physics (1.0 FCE) and PHY3400Y (1.0 FCE).
  - **Option 3: Coursework plus MSc Research Thesis:**
    - graduate lecture courses (2.0 FCEs);
    - thesis;
    - selection of the program is made by the student and faculty advisor in consultation with the Associate Chair.
- MSc students are expected to attend the weekly general colloquium conducted by the department.
- The residence requirement is one year, whereby students must be on campus full-time and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

Physics: Physics PhD

Doctor of Philosophy

Program Description

The Department of Physics offers excellent quality and breadth of research fields. Its internationally leading research teams, in both theory and experiment, operate across a broad spectrum of topics as well as collaborative specializations in interdisciplinary subjects. Graduates work in government, industry, and education around the world.

Applicants may enter the PhD program via one of two routes: 1) following completion of an appropriate master’s degree; 2) direct entry after completing a bachelor’s degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Physics' additional admission requirements stated below.
- An appropriate University of Toronto master's degree with an average of at least B+ or demonstrated comparable research competence.

- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

Program Requirements

- The core of the PhD program is an original investigation, the results of which are embodied in a thesis. Lecture courses constitute a subsidiary but important part of the program. Consult the department for details.
- Complete **3.0 full-course equivalents (FCEs)**: graduate lecture **courses and a thesis**. Course credit will normally be given towards the PhD for all graduate lecture courses taken during a master's program in this department. Students who have completed an appropriate MSc elsewhere and are entering the PhD program will generally be given a course credit of up to 2.0 FCEs in graduate lecture courses towards their PhD course requirement.
- Complete a **qualifying oral examination**. Students must complete the qualifying examination within eight months. Students who fail at the first attempt have the opportunity to take the examination again within a time period specified by the examination committee.
- Students are expected to attend the weekly general colloquium conducted by the department.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Physics' additional admission requirements stated below.
- Outstanding applicants may be considered directly from undergraduate programs. Normally, these applicants will have an undergraduate average of A or higher.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

Program Requirements

- The core of the PhD program is an original investigation, the results of which are embodied in a thesis. Lecture courses constitute a subsidiary but important part of the program. Consult the department for details.
- Complete **3.0 full-course equivalents (FCEs)**: graduate lecture **courses and a thesis**.
- Students must complete a **qualifying oral examination** within 20 months. Students who fail at the first attempt have the opportunity to take the examination again within a time period specified by the examination committee.
- Students are expected to attend the weekly general colloquium conducted by the department.

Program Length

5 years

Time Limit

7 years

All courses are not given every year. Please check the departmental brochure or website for course availability.

Introductory Courses

PHY1460H	Nonlinear Physics
PHY1483H	Relativity Theory I
PHY1484H	Relativity Theory II
PHY1485H	Laser Physics
PHY1487H	Quantum Theory of Solids I
PHY1489H	Introduction to High Energy Physics
PHY1491H	Current Interpretations of Quantum Mechanics
PHY1492H	Physics of the Earth
PHY1498H	Introduction to Atmospheric Physics

General Courses

PHY1500H	Statistical Mechanics
PHY1510H	Electromagnetism
PHY1520H	Quantum Mechanics
PHY1530H	Fluid Mechanics
PHY1540H	Mathematical Methods in Physics
PHY1600H	Effective Communication for Physicists
PHY1610H	Scientific Computing for Physicists

Specialized Courses

PHY2108H (0.25 FCE)	Special Topics in Physics I
PHY2109H (0.25 FCE)	Special Topics in Physics II
PHY2202H	Atomic and Molecular Physics
PHY2203H	Quantum Optics I
PHY2204H	Quantum Optics II
PHY2205H	Special Topics in Quantum Optics I
PHY2206H	Special Topics in Quantum Optics II
PHY2208H	Nonlinear Optics
PHY2211H	Quantum Information Theory
PHY2212H	Entanglement Physics
PHY2303H	Quantum Theory of Solids II
PHY2313H	Special Topics in Condensed Matter Physics I
PHY2314H	Special Topics in Condensed Matter Physics II
PHY2315H	Advanced Statistical Mechanics
PHY2321H	Many Body Physics I
PHY2322H	Many Body Physics II
PHY2403H	Quantum Field Theory I
PHY2404H	Quantum Field Theory II
PHY2405H	Experimental High Energy Physics
PHY2406H	Special Topics in Particle Physics I
PHY2407H	Special Topics in Particle Physics II
PHY2408H	Phenomenology of the Standard Model
PHY2502H	Climate System Dynamics
PHY2504H	Advanced Atmospheric Dynamics
PHY2505H	Atmospheric Radiative Transfer and Remote Sounding
PHY2506H	Data Assimilation and Retrieval Theory
PHY2509H	Special Topics in Atmospheric Physics I
PHY2510H	Special Topics in Atmospheric Physics II
PHY2603H	Inverse Theory
PHY2609H	Planetary Physics
PHY2706H	Special Topics in Biological Physics
PHY2707H	Cellular and Molecular Biophysics I
PHY2708H	Cellular and Molecular Biophysics II
PHY2709H	Quantitative Biology of Systems, Organisms, and Populations
PHY2710H	Computational Methods in Biophysics
PHY2711H	Biophysical Techniques
JGP4170H	Geotectonics
JPE2605H	Advanced Seismology

Report Course for MSc Students

PHY3400Y+	Selected Topics in Physics

+ *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Seminar Courses

PHY7001Y+	Atmospheric Physics Seminar
PHY7002Y+	Biophysics Seminar
PHY7003Y+	Condensed Matter Physics Seminar
PHY7004Y+	Geophysics Seminar
PHY7005Y+	Quantum Optics Seminar
PHY7007Y+	Subatomic Physics and Astrophysics Seminar

+ *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Research Courses

PHY6011Y	Research in Atmospheric Physics
PHY6021Y	Research in Biophysics

Physiology: Medical Physiology MHSc

Master of Health Science

Program Description

The MHSc in Medical Physiology is a professional course-based master's program, designed to provide graduates with the analytical and professional skills to interpret and apply physiology to health-related contexts.

The program blends advanced topic-specific physiology courses with:

- a mentored current literature review, where graduates acquire the critical analysis skills to identify new knowledge relevant to specific problems in human health;
- a big data and health course, where students gain the skills to analyze and interpret data sets relevant to human health;
- a commercialization and collaboration course, where students will acquire skills to understand how to commercialize new discoveries and how to work in a team science environment; and
- a practicum opportunity, where students will experience how physiological knowledge is applied to real-life scenarios in their area of interest.

Each graduate will develop the analytical and communication skills to design and implement new health interventions. Students will develop an individual program based on their area of interest.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Physiology's additional admission requirements stated below.
- Admission is based on demonstrated exceptional scholarly achievement based on the following criteria:
  - a one-page statement summarizing how this program will contribute to the advancement of the applicant's professional goals
  - a curriculum vitae (CV)
  - two letters of reference.
- Applicants must have an appropriate bachelor's degree from a recognized university with an average of at least A– in the last two years of study. Students must have completed at least third year-level physiology or equivalent courses and demonstrate an interest in physiology.
- Selected applicants will be interviewed prior to final acceptance into the program.
- Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction was not English, must demonstrate proficiency in the English language through the successful completion of the Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - Internet-based TOEFL: 100/120 and 22/30 on the writing and speaking sections.
  - Other English proficiency tests are acceptable. Please consult the Physiology website for departmental standards.

Program Requirements

All students are required to:

- Take **6.0 full-course equivalents (FCEs)** in physiology courses:
  - 1.0 FCE: PSL4000Y[0] *Seminars and Graduate Professional Development* (Credit/No Credit)
  - 1.0 FCE: PSL4010Y *Mentored Literature Review Project in Physiology*
  - 1.0 FCE: PSL4020Y *Medical Physiology Practicum* (Credit/No Credit)
  - 0.5 FCE: PSL4030H *Clinical Physiology*
  - 0.5 FCE: PSL4040H *Big Data and Health*
  - 0.5 FCE: PSL4050H *Collaboration and Commercialization in Physiology*
  - 1.5 elective FCEs.

Students will be matched with a mentor and practicum placement in consultation with the relevant course director and MHSc program director.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

[0] Course that may continue over a program. Credit is given when the course is completed.

Physiology: Physiology MSc

Master of Science

Program Description

The MSc program provides advanced training in physiology, with an emphasis on gaining experience in conducting research using modern experimental methods under the direct supervision of a member of the department's graduate faculty. Students will complete coursework, attend and give presentations of scientific work, submit a written thesis based on original research, and defend the thesis at an oral examination. It is not required that the thesis work be published or represent a finished research project, but it must show the student's mastery of specific techniques, their application to a specific problem, and a scholarly understanding of the research subject. Through this program, students will broaden and deepen their knowledge of physiology and its current scientific literature. They will learn and practise scientific skills of critical thinking, devising research questions, and communicating scientific ideas orally and in writing.

Students may begin in Fall, Winter, or Summer.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Physiology's additional admission requirements stated below.
- Admission is based on academic record, an essay summarizing background strengths and scientific aims, a curriculum vitae (CV), and at least two confidential letters of reference.
- Applicants must have an appropriate bachelor's degree from a recognized university with an average of at least A– in the last two years of study and with courses such as biology, biochemistry, calculus, organic and physical chemistry, general physics, and physiology.
- Physical-science-stream students from undergraduate programs in physics, mathematics, engineering, and other sciences are encouraged to apply to the MSc program.
- Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction was not English, must demonstrate proficiency in the English language through the successful completion of the Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - Internet-based TOEFL: 100/120 and 22/30 on the writing and speaking sections.
  - Other English proficiency tests are acceptable. Please consult the Physiology website for departmental standards.

Program Requirements

All students are required to:

- Take **1.5 full-course equivalents (FCEs)** in physiology courses, with the following guidelines:
  - 0.5 FCE in PSL1000H[0] *MSc Seminars in Physiology* (Credit/No Credit), mandatory for all graduate students in Physiology
  - 0.5 FCE in physiology graduate-only courses
  - 0.5 FCE with a choice of (i) a physiology graduate-only course or physiology joint graduate-undergraduate course (preferable option) or (ii) a course taken in another department (rare choice).
- Select courses in consultation with the supervisor and/or advisory committee. See the Physiology website for details.
- Complete and defend a **research thesis** acceptable to the graduate department.
- Do one of the following within 12 to 18 months in the MSc program:
  - Write and defend an MSc thesis and graduate.
  - Write and defend a thesis and go on to the PhD program.
  - Transfer from the MSc into the PhD program. Transfer is encouraged for students who have made substantial progress in their research and have demonstrated the desire and potential to meet the requirements of a rigorous research training program. Such students will have fulfilled all course requirements for the MSc with at least an A– average and have demonstrated potential for publication of their work. There must be a clearly identified program for future research that continues, or is consistent with, work already underway. Too large a project for the MSc is not a reason for transfer to the PhD.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

[0] Course that may continue over a program. Credit is given when the course is completed.

Physiology: Physiology PhD

Doctor of Philosophy

The PhD degree is an advanced research degree. Upon its completion, graduates are expected to function as independent research scientists. Students will complete coursework, attend and give multiple presentations of scientific work, and demonstrate the ability to carry out research of publishable quality as evidenced by a written thesis based on original research and an oral defence of the work. Through this program, students will broaden and deepen their knowledge of physiology and its current scientific literature. They will develop and practise scientific skills of critical thinking, devising research questions, understanding experimental design, techniques, and analysis, and communicating scientific ideas orally and in writing.

Applicants may enter the PhD program via one of three routes: 1) following completion of an appropriate MSc degree; 2) transfer from the University of Toronto MSc program in Physiology; or 3) direct entry after completing a bachelor's degree.

Students may begin or transfer in Fall, Winter, or Summer.

PhD Program (Following Completion of an MSc)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Physiology's additional admission requirements stated below.
- Admission is based on academic record, a statement summarizing background strengths and scientific aims, a curriculum vitae (CV), and at least two confidential letters of reference.
- Students may be admitted into the PhD program after completion of an appropriate MSc degree program with an average of at least A– from a recognized university. Students with excellent research experience are encouraged to apply.
- Applicants should have taken courses such as biology, biochemistry, calculus, organic and physical chemistry, general physics, and physiology.
- Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction was not English, must demonstrate proficiency in the English language through the successful completion of the Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - Internet-based TOEFL: 100/120 and 22/30 on the writing and speaking sections.
  - Other English proficiency tests are acceptable. Please consult the Physiology website for departmental standards.

Program Requirements

- Students must take **2.5 full-course equivalents (FCEs)** in physiology courses in which an average standing of at least A– is maintained, with the following guidelines:
  - 0.5 FCE in PSL2000H[0] *PhD Seminars in Physiology* (Credit/No Credit), mandatory for all graduate students in Physiology
  - 0.5 FCE in physiology graduate-only courses
  - 0.5 FCE in PSL1066H[0] *Research Grant Proposal* (Credit/No Credit), mandatory for all PhD students in physiology
  - 1.0 FCE with a choice of (i) a physiology graduate-only course or physiology joint graduate-undergraduate course (preferable option) or (ii) a course taken in another department (rare choice).

- Up to 1.0 FCE can be claimed from the student's MSc program completed in another department or university, subject to approval by the Graduate Studies Committee.
- Courses are selected in consultation with the supervisor and/or advisory committee. See the Physiology website for details.
- The recommended completion time for the doctoral program is approximately four years, by which time the candidate will write and defend a research thesis, first before a departmental committee and subsequently before a committee approved by the School of Graduate Studies.

Program Length

4 years

Time Limit

6 years

[0] Course that may continue over a program. Credit is given when the course is completed.

PhD Program (Transfer)

Transfer Requirements

- Students may be admitted via transfer from the University of Toronto MSc program in Physiology. Transfer from the MSc into the PhD program is encouraged for students who have made substantial progress in their research and have demonstrated the desire and potential to meet the requirements of a rigorous research training program. Such students will have fulfilled all course requirements for the MSc with at least an A– average and have demonstrated potential for publication of their work. Students with excellent research experience are encouraged to apply. There must be a clearly identified program for future research that continues, or is consistent with, work already underway. Too large a project for the MSc is not a reason for transfer to the PhD.

Program Requirements

- Students must take **2.5 full-course equivalents (FCEs)** in physiology courses in which an average standing of at least A- is maintained, with the following guidelines:
  - 0.5 FCE in PSL2000H[0] *PhD Seminars in Physiology* (Credit/No Credit), mandatory for all graduate students in Physiology
  - 0.5 FCE in PSL1066H[0] *Research Grant Proposal* (Credit/No Credit), mandatory for all PhD students in Physiology
  - 0.5 FCE in physiology graduate-only courses
  - 1.0 FCE with a choice of (i) a physiology graduate-only course or physiology joint graduate-undergraduate course (preferable option) or (ii) a course taken in another department (rare choice).
  - Students who transfer from the MSc program in Physiology may claim up to 1.0 FCE from the MSc program in Physiology.
- Courses are selected in consultation with the supervisor and/or advisory committee. See the Physiology website for details on course requirements.
- The recommended completion time for the doctoral program is approximately five years from the start of the MSc, by which time the candidate will write and defend a research thesis, first before a departmental committee and subsequently before a committee approved by the School of Graduate Studies.

Program Length

5 years

Time Limit

7 years

[0] Course that may continue over a program. Credit is given when the course is completed.

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Physiology's additional admission requirements stated below.
- Admission is based on academic record, a statement summarizing background strengths and scientific aims, a curriculum vitae (CV), and at least two confidential letters of reference.
- For exceptional students with an A– standing in appropriate courses taken during the two preceding undergraduate years, direct entry into the doctoral program is possible. However, this will require specific approval by the Graduate Studies Committee. Students with excellent research experience are encouraged to apply.
- Applicants should have taken courses such as biology, biochemistry, calculus, organic and physical chemistry, general physics, and physiology.
- Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction was not English, must demonstrate proficiency in the English language through the successful completion of the Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - Internet-based TOEFL: 100/120 and 22/30 on the writing and speaking sections.
  - Other English proficiency tests are acceptable. Please consult the Physiology website for departmental standards.

Program Requirements

- Students must take **2.5 full-course equivalents (FCEs)** in physiology courses in which an average standing of at least A– is maintained, with the following guidelines:

- 0.5 FCE in PSL2000H[0] *PhD Seminars in Physiology* (Credit/No Credit), mandatory for all graduate students in Physiology
- 0.5 FCE in physiology graduate-only courses
- 0.5 FCE in PSL1066H[0] *Research Grant Proposal* (Credit/No Credit), mandatory for all PhD students in physiology
- 1.0 FCE with a choice of (i) a physiology graduate-only course or physiology joint graduate-undergraduate course (preferable option) or (ii) a course taken in another department (rare choice).

- Courses are selected in consultation with the supervisor and/or advisory committee. See the Physiology website for details.
- The recommended completion time for the doctoral program is five years, by which time the candidate will write and defend a research thesis, first before a departmental committee and subsequently before a committee approved by the School of Graduate Studies.

Program Length

5 years

Time Limit

7 years

[0] Course that may continue over a program. Credit is given when the course is completed.

Overview

The Department of Political Science is one of the largest political science departments in the western world. It is committed to fostering a collegial environment for graduate students and personal interaction between faculty and students.

The department has a large and academically diverse research-oriented faculty, well represented in the various sub-fields of the discipline (Political Theory, International Relations, Comparative Politics, Development Studies, Canadian Politics, and Public Policy). The department also participates in a wide range of interdisciplinary graduate programs.

Since entrance requirements and standards of work are high, so is the calibre of students. Many hold prestigious fellowships, and several have recently won major awards, including the Canadian Political Science Association and American Political Science Association's prizes for best doctoral theses in their areas.

Graduates have gone on to academic careers, public service, and other work in all provinces of Canada, the United States, and many other countries. The University maintains an active placement service to assist graduate students seeking employment in the academic world. Graduate students have established the Graduate Association for Students in Political Science to foster intellectual exchanges, social events, and student participation in all aspects of department life.

Political Science: Political Science MA

Master of Arts

Program Description

The MA program is designed to satisfy the diverse interests of students who wish to pursue a year of graduate study in political science. Students admitted to the MA program may choose from three fields: Political Economy of International Development; Political Science; and Political Theory. Students whose interests are primarily normative and philosophical may choose the field of Political Theory.

The MA program may be taken on a full-time or part-time basis.

Field: Political Economy of International Development (PEID)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Political Science's additional admission requirements stated below.
- Cumulative grade average equivalent to a University of Toronto B+ or better in an appropriate bachelor's degree program. Preference will be given to applicants with outstanding academic records and a strong background in political science.
- Applicants must provide evidence of a satisfactory background in political science and a second social science. Applicants intending to enrol in a master's-level economics course must meet undergraduate prerequisites in microeconomics, macroeconomics, and statistics. A satisfactory background in political science means a minimum of five well-distributed courses including at least one relating to development.
- Admission is competitive. Enrolment in the program is limited, and meeting minimum requirements does not guarantee admission. All applicants are considered on their individual merit by a departmental admissions committee. Applicants lacking an adequate background in political science may be required to complete additional undergraduate courses before being considered for admission. Such work should be undertaken in consultation with the MA supervisor.
- Applicants must submit a complete application according to instructions on the department's website.

Program Requirements

- **Coursework.** Students must complete a minimum of **4.0 full-course equivalents (FCEs)** as follows:
  - POL2408H *Political Economy of International Development* (0.5 FCE).
  - Either POL2345H *Politics of Growth in Developing Countries* or POL2400H *Theories and Issues — The Politics of Development* (0.5 FCE).
  - 0.5 FCE in anthropology, geography, or economics, selected from an approved course list.
  - 1.0 FCE taken from the approved political science course list.
  - A research essay in the political economy of international development within the context of the *MA Research Seminars*, POL2810Y *MA Research Seminar I* or POL2811Y *MA Research Seminar II* (1.0 FCE). Students enrolled in a collaborative specialization with a similar requirement are exempted.
  - 0.5 FCE from either list of approved courses.
- The equivalent of 1.0 FCE may be taken in a cognate discipline with the approval of the department.
- Programs in which additional requirements or prerequisites must be met may take longer than three sessions to complete.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time; 6 years part-time

Field: Political Science

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Political Science's additional admission requirements stated below.
- Cumulative grade average equivalent to a University of Toronto B+ or better in an appropriate bachelor's degree program. Preference will be given to applicants with outstanding academic records and a strong background in political science.
- Admission is competitive. Enrolment in the program is limited, and meeting minimum requirements does not guarantee admission. All applicants are considered on their individual merit by a departmental admissions committee. Applicants lacking an adequate background in political science may be required to complete additional undergraduate courses before being considered for admission. Such work should be undertaken in consultation with the MA supervisor.
- Applicants must submit a complete application according to instructions on the department's website.

Program Requirements

- **Coursework.** Students must complete a minimum of **4.0 full-course equivalents (FCEs)** including:
  - At least 0.5 FCE in Political Theory, which can be either POL2040H *Horizons of Political Reflection* or any other theory course.
  - At least 0.5 FCE in statistics or research design. POL2503H *Thinking Through Research Design* and POL2504H *Statistics for Political Scientists* are among the courses currently offered by the department which meet this requirement.
  - The equivalent of 1.0 FCE may be taken in a cognate discipline with the approval of the department.
  - A research essay (1.0 FCE) within the context of the *MA Research Seminars*, POL2810Y *MA Research Seminar I* or POL2811Y *MA Research Seminar II*. Students enrolled in a collaborative specialization with a similar requirement are exempted.
- Programs in which additional requirements or prerequisites must be met may take longer than three sessions to complete.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time; 6 years part-time

Field: Political Theory

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Political Science's additional admission requirements stated below.
- Cumulative grade average equivalent to a University of Toronto B+ or better in an appropriate bachelor's degree program. Preference will be given to applicants with outstanding academic records and a strong background in political science.
- Admission is competitive. Enrolment in the program is limited, and meeting minimum requirements does not guarantee admission. All applicants are considered on their individual merit by a departmental admissions committee. Applicants lacking an adequate background in political science may be required to complete additional undergraduate courses before being considered for admission. Such work should be undertaken in consultation with the MA supervisor.
- Applicants must submit a complete application according to instructions on the department's website.

Program Requirements

- **Coursework.** Students must complete a minimum of **4.0 full-course equivalents (FCEs)** as follows:
  - 2.0 FCEs in Political Theory.
  - At least 1.0 FCE in an area outside Political Theory.
  - The equivalent of 1.0 FCE may be taken in a cognate discipline with the approval of the department.
  - All courses must be chosen in consultation with the MA supervisor.
- Programs in which additional requirements or prerequisites must be met may take longer than three sessions to complete.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time; 6 years part-time

Political Science: Political Science PhD

Doctor of Philosophy

Program Description

PhD students will declare two fields:

- Field 1 will be one of:
  - Canadian Politics
  - Comparative Politics
  - International Relations
  - Political Theory
  - Public Policy
- Field 2 will be one of:
  - Canadian Politics
  - Comparative Politics
  - Development Studies
  - International Relations
  - Political Theory
  - Public Policy

Applicants may be admitted to the PhD program via one of three routes:

- **With an MA**: excellent students who have completed an MA degree in political science (or its equivalent) by the time of enrolment.
- **Transfer**: in exceptional cases, on the initiative of the Director of Graduate Studies, MA students may be transferred to the PhD program. Such transfers will occur only where a full assessment of an applicant's bachelor's record (or equivalent) was impossible and where that student's instructors concur that the student in question has excelled in the first half of the MA program.
- **Direct-entry**: exceptional students who have completed an appropriate bachelor's degree with a concentration in political science by the time of enrolment. Students admitted to the PhD from a bachelor's degree who receive less than an A– average in their first four courses will be recommended to SGS to transfer to the MA program. If the transfer is approved, these students will graduate with a terminal MA, provided their grades meet the requirements for the MA degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Political Science's additional admission requirements stated below.
- Applicants must have completed an MA degree in political science (or its equivalent) by the time of enrolment.
- Applicants are expected to have achieved grades averaging A– or better in their most recent degree.
- Applicants must submit a complete application according to the instructions.

Program Requirements

- **Coursework.** Students must complete **2.0 to 5.0 full-course equivalents (FCEs)** depending on the student's relevant background in the fields or areas of choice:
  - Most students entering with an MA take the equivalent of 4.0 FCEs to satisfy program requirements; students must take a minimum of 2.0 FCEs with the department after entering the PhD program.
  - Graduate courses taken at the MA level at the University of Toronto or elsewhere may be counted, with the department's permission, towards meeting some course requirements.

- Students will declare two fields:
  - **Field 1** will be one of Canadian Politics, Comparative Politics, International Relations, Political Theory, or Public Policy. The normal course requirement for Field 1 will be 2.0 FCEs, including a 1.0 FCE core course requirement.
  - **Field 2** will be one of Canadian Politics, Comparative Politics, Development Studies, International Relations, Political Theory, or Public Policy. The normal course requirement for Field 2 will be 1.5 FCEs, including a 1.0 FCE core course requirement (with the exception of a 0.5 FCE core course requirement in Development Studies).
- The Director of Graduate Studies may exercise discretion to waive the Field 2 requirement for students enrolled in collaborative specializations.
- Students who do not designate Political Theory as Field 1 must complete 0.5 graduate-level FCE in Political Theory.
- Students must complete 0.5 FCE in qualitative methods. This requirement may be waived on the basis of MA work.
- Students who do not designate Political Theory as Field 1 must complete 0.5 FCE in quantitative methods. This requirement may be waived on the basis of MA work. Students who designate Political Theory as Field 1 will substitute a non-waivable 0.5 FCE intensive reading requirement for the quantitative methods requirement.
- Students must complete POL2812Y *PhD Research Design* (1.0 FCE), normally during Year 3; students who have designated Political Theory as Field 1 are exempted.
- **Field examinations.**
  - Students must complete field examinations in Field 1 and Field 2 by the end of Year 2.
  - The Field 1 examination should be taken in May or August of the year in which the core course is taken as long as all assignments in the core course have been completed.
  - The Field 2 examination must be taken no later than Year 2.
  - A student who fails to achieve a grade of at least A– is permitted one opportunity to retake a field examination. After failing the examination once, the student is permitted two attempts to pass the examination in a new field.
- **Thesis proposal, thesis committee, and thesis schedule.** Students should assign a high priority to defining a thesis topic and choosing a thesis committee. By December of Year 3, students must have:
  - Established a thesis committee of three faculty members including a thesis supervisor and
  - Completed a draft of a thesis proposal of approximately 25 pages for submission to the thesis committee. Final revisions of the proposal must be approved by the end of Year 3. The research and writing of the thesis will follow the acceptance of the thesis proposal. The work schedule should permit the student to complete the thesis by the end of Year 5.
- **Language requirement.** Students must demonstrate competence in the language that is appropriate to the nature of the graduate work in which they are engaged. Students whose Field 1 is Canadian Politics are strongly encouraged to demonstrate competence in French.
- University policy requires that students complete all their non-thesis requirements (coursework, thesis proposal, Field 1 and Field 2 qualifying exams, and language requirements) by the end of Year 3.
- Students must achieve an A– average in coursework and an A– in their field examinations to remain in good standing.
- Minimum of three sessions in **residence**, whereby students must be on campus full-time and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.
- Although the program has been designed for completion in four years, some students may require longer to complete all the requirements.

Program Length

4 years full-time; 5 years transfer-from-master's

Time Limit

6 years full-time; 7 years transfer-from-master's

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies.
- Applicants must also satisfy the Department of Political Science's additional admission requirements stated below.
- Exceptional students who have completed an appropriate bachelor's degree with a concentration in political science by the time of enrolment. Such students who receive less than an A– average in their first four courses will be recommended to SGS to transfer to the MA program. If the transfer is approved, these students will graduate with a terminal MA, provided their grades meet the requirements for the MA degree and provided they meet the course requirements of one of the three MA fields
- Applicants are expected to have achieved grades averaging A– or better in their most recent degree. Applicants from the BA level will apply to the MA program but indicate on the MA application that they wish to be considered for direct entry to the PhD program.
- Applicants must submit a complete application according to the instructions.

Program Requirements

- **Coursework.** Students must complete **6.0 full-course equivalents (FCEs)** with at least an A– average in their first four courses in order to continue in the PhD program. In selecting courses, students should ensure that they satisfy the following field requirements.
- Students will declare two fields:
  - **Field 1** will be one of Canadian Politics, Comparative Politics, International Relations, Political Theory, or Public Policy. The normal course requirement for Field 1 will be 2.0 FCEs, including a 1.0 FCE core course requirement.

  - **Field 2** will be one of Canadian Politics, Comparative Politics, Development Studies, International Relations, Political Theory, or Public Policy. The normal course requirement for Field 2 will be 1.5 FCEs, including a 1.0 FCE core course requirement (with the exception of a 0.5 FCE core course requirement in Development Studies).
- The Director of Graduate Studies may exercise discretion to waive the Field 2 requirement for students enrolled in collaborative specializations.
- Students who do not designate Political Theory as Field 1 must complete 0.5 graduate-level FCE in Political Theory.
- Students must complete 0.5 FCE in qualitative methods. This requirement may be waived on the basis of MA work.
- Students who do not designate Political Theory as Field 1 must complete 0.5 FCE in quantitative methods. Students who designate Political Theory as Field 1 will substitute a non-waivable 0.5 FCE intensive reading requirement for the quantitative methods requirement.
- Students must complete POL2812Y *PhD Research Design* (1.0 FCE), normally during Year 4; students who have designated Political Theory as Field 1 are exempted.
- **Field examinations.**
  - Students must complete field examinations in Field 1 and Field 2 by the end of Year 2.
  - The Field 1 examination should be taken in May or August of the year in which the core course is taken as long as all assignments in the core course have been completed.
  - The Field 2 examination must be taken no later than Year 2. A student who fails to achieve a grade of at least A– is permitted one opportunity to retake a field examination. After failing the examination once, the student is permitted two attempts to pass the examination in a new field.
- **Thesis proposal, thesis committee, and thesis schedule.** Students should assign a high priority to defining a thesis topic and choosing a thesis committee. By December of Year 4, students must have:
  - Established a thesis committee of three faculty members including a thesis supervisor and
  - Completed a draft of a thesis proposal of approximately 25 pages for submission to the thesis committee. Final revisions of the proposal must be approved by the end of Year 4. The research and writing of the thesis will follow the acceptance of the thesis proposal. The work schedule should permit the student to complete the thesis by the end of Year 6.
- **Language requirement.** Students must demonstrate competence in the language that is appropriate to the nature of the graduate work in which they are engaged. Students whose Field 1 is Canadian Politics are strongly encouraged to demonstrate competence in French.
- University policy requires that students complete all their non-thesis requirements (coursework, thesis proposal, Field 1 and Field 2 qualifying exams, and language requirements) by the end of Year 4.
- Students must achieve an A– average in coursework and an A– in their field examinations to remain in good standing.
- Minimum of six sessions in **residence**, whereby students must be on campus full-time and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.
- Although the program has been designed for completion in five years, some students may require longer to complete all the requirements.

Program Length

5 years

Time Limit

7 years

Political Science: Political Science MA, PhD Courses

Some listed courses have an undergraduate component and begin the first week of the session. Not all courses are given every year. Consult the departmental timetable.

Canadian Politics

POL2100H	Issues and Foundations in Canadian Government (core)
POL2102H	Topics in Canadian Politics I
POL2103H	Topics in Canadian Politics II
POL2104H	Political Analysis in Canadian and Comparative Politics (core)
POL2105H	Canadian and Comparative Political Development (core)
POL2128H	Federalism and Diversity in Canada (and Beyond)
POL2139H	The Canadian Welfare State in Comparative Perspective
POL2167H	The Politics of Immigration and Multiculturalism in Canada
POL2316H	Women and Politics
POL2317H	Politics and Policy Analysis
HAD5765H	Case Studies in Health Policy

Comparative Politics

POL2139H	The Canadian Welfare State in Comparative Perspective
POL2241H	Civil War and Counterinsurgency
POL2301H	Political Parties in Comparative Perspective
POL2307H	Political Economy of Technology: from the Auto-Industrial to the Information Age
POL2314H	Public, Private, and the Liberal State
POL2316H	Women and Politics
POL2317H	Politics and Policy Analysis

JRA2321H	Topics in Comparative Politics
POL2321H	Topics in Comparative Politics I
POL2322H	Topics in Comparative Politics II
POL2326H	Democracy and Dictatorship
POL2335H	Business and Politics: Power in a Global World
JRA2337H	Government Law and Politics in Russia
POL2345H	Politics of Growth in Developing Countries
POL2351H	Contentious Politics and Social Movements
JPA2353H	Authoritarianism in Comparative Perspective
POL2364H	Urban Policy and Policymaking
POL2372H	The Comparative Political Economy of Industrial Societies
JRA2391H	Topics in Comparative Politics
POL2391H	Topics in Comparative Politics III
POL2392H	Topics in Comparative Politics IV
POL2394H	Innovation and Knowledge Transfer in City Regions
POL2411H	Topics in Asian Politics
POL2418H	Topics in Middle East Politics
JPF2430H	Conceptualizing Cities in a Global Context
JPF2431H	Global Cities — Core Issues and Challenges (exclusion: JPF2409Y)
POL2700H	Foundations and Approaches to Comparative Politics (core)
POL2701H	Comparative Institutional Politics: Governance, Parties, and Structures of State Power (core)
POL2702H	Constituent Power in Comparative Perspective: Identity, Contention, and Mobilization (core)

Development Studies

POL2326H	Democracy and Dictatorship
POL2345H	Politics of Growth in Developing Countries
POL2351H	Contentious Politics and Social Movements
JPA2353H	Authoritarianism in Comparative Perspective
POL2400H	Theories and Issues — The Politics of Development
POL2405H	Topics in Latin American Politics
POL2408H	Political Economy of International Development
POL2411H	Topics in Asian Politics
POL2416Y	Politics and Society in Contemporary China
POL2418H	Topics in Middle East Politics
JPF2430H	Conceptualizing Cities in a Global Context
JPF2431H	Global Cities — Core Issues and Challenges (exclusion: JPF2409Y)

International Relations

JPJ2037H	International Trade Regulation
JPJ2046H	Law, Institutions, and Development
POL2200Y	International Politics (core)
POL2205H	Topics in International Politics I
POL2206H	Topics in International Politics II
POL2207H	Topics in International Politics III
POL2212H	Human Rights, Politics, and International Relations
POL2213H	Global Environmental Politics
POL2226H	Ethics and International Relations
POL2240H	Geopolitics of Cyberspace
POL2241H	Civil War and Counterinsurgency
POL2256H	Global Summit Governance and Diplomacy
POL2258H	Global Summit Policy Performance
POL2335H	Business and Politics: Power in a Global World

Political Theory

POL2000H	Ancient Political Thought to the Rise of Modernity (core)
POL2002H	Modern and Contemporary Political Thought (core)
POL2007H	Twentieth-Century Political Thought
POL2011H	Problems in the Political Thought of the Socratic School
POL2019Y	Moral Reason and Economic History
POL2021Y	Comparative Studies in Jewish and Non-Jewish Political Thought
POL2024H	Feminist Theory
POL2025H	Enlightenment and its Critics
POL2026H, Y	Topics in Political Thought I
POL2027H	Topics in Political Thought II
POL2028H	Approaches to Political Theory
POL2038H	Studies in Comparative Political Theory
POL2040H	Horizons of Political Reflection

JPR2051H	Fanaticism: A Political History
JPR2058H	Post-secular Political Thought: Religion, Radicalism, and the Limits of Liberalism
POL2061H	Studies in Civic Republicanism
POL2075H	Post-Modern and Contemporary Thought
POL2226H	Ethics and International Relations
JHP2351Y	The People From Nowhere
POL2371H	Urban Revolution: Contemporary Constellations of Spatial Politics
RLG3622H	Maimonides and His Modern Interpreters

Public Policy

POL2167H	The Politics of Immigration and Multiculturalism in Canada
POL2213H	Global Environmental Politics
POL2307H	Political Economy of Technology: From the Auto-Industrial to the Information Age
POL2317H	Politics and Policy Analysis
POL2318H	Public Policy: Theories and Approaches (core)
POL2319H	Public Policy: Applications (core)
POL2335H	Business and Politics: Power in a Global World
POL2364H	Urban Policy and Policymaking
POL2376H	Topics in Public Policy
HAD5765H	Case Studies in Health Policy

Methods and Research Seminars

POL2503H	Thinking Through Research Design
POL2504H	Statistics for Political Scientists
POL2505H	Qualitative Methods in Political Research
POL2507H	Multiple Regression Analysis for Political Scientists
POL2519H	Quantitative Methods and Data Analysis
POL2578H	Topics in Methods
POL2810Y	MA Research Seminar I
POL2811Y	MA Research Seminar II
POL2812Y	PhD Dissertation Proposal Seminar (Credit/No Credit)

Independent Study and Special Topics

POL2800H	Special Topics I
POL2801H	Special Topics II
POL2893H	Topics in Politics I
POL2904Y	Reading course in an approved special field
POL2905H	Reading course in an approved special field

Psychological Clinical Science

Psychological Clinical Science: Introduction

Faculty Affiliation

University of Toronto Scarborough (UTSC)

Degree Programs

Counselling and Clinical Psychology

MA and PhD

- Fields:
  - Clinical Psychology — offered by the Graduate Department of Psychological Clinical Science, UTSC;
  - Clinical and Counselling Psychology — offered by the Department of Applied Psychology and Human Development, Ontario Institute for Studies in Education [OISE], St. George campus

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Addiction Studies
  - Counselling and Clinical Psychology (OISE and UTSC), MA, PhD
- Aging, Palliative and Supportive Care Across the Life Course
  - Counselling and Clinical Psychology (OISE), MA, PhD
- Community Development
  - Counselling and Clinical Psychology (OISE), MA, PhD
- Environmental Studies
  - Counselling and Clinical Psychology (OISE), MA, PhD
- Indigenous Health
  - Counselling and Clinical Psychology (OISE), MA, PhD
- Sexual Diversity Studies
  - Counselling and Clinical Psychology (OISE), MA, PhD
- Women and Gender Studies
  - Counselling and Clinical Psychology (OISE), MA, PhD

Overview

The Graduate Department of Psychological Clinical Science (UTSC) and the Department of Applied Psychology and Human Development (OISE) offer a graduate program in Counselling and Clinical Psychology leading to the MA and PhD degrees.

Psychological Clinical Science: Counselling and Clinical Psychology MA; Field: Clinical Psychology

Master of Arts

Program Description

The field in Clinical Psychology is offered primarily by the Department of Psychological Clinical Science at UTSC. Clinical Psychology at UTSC adheres to a Clinical Science model of training and is accredited by the Canadian Psychological Association (CPA). The primary and overriding objective of graduate training in Clinical Psychology at UTSC is to foster exceptional clinical scientists according to the highest standards of research and professional practice.

Graduate training in Clinical Psychology at UTSC has primary research strengths in the areas of: clinical and cognitive neuroscience, psychological assessment and clinical neuropsychology, psychopathology, personality, and mindfulness- and acceptance-based psychotherapies.

The field in Clinical Psychology adheres to a generalist model of training, with a primary focus on adults. A unifying theme of faculty research in Clinical Psychology at UTSC is to advance knowledge of the etiology and assessment and treatment of mental disorders. Instruction is provided in psychopathology, assessment, and intervention, and students are trained to practise with a variety of adult populations. The field also boasts strength in neuropsychology.

The full-time, two-year MA program is designed for applicants interested in working as researchers or practitioners in a variety of psychological and academic settings. This program enables students to apply for registration with the College of Psychologists of Ontario (CPO) as a Psychological Associate. It also meets the needs of students who plan to apply to the PhD program in Counselling and Clinical Psychology.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Psychological Clinical Science's additional admission requirements stated below.
- A four-year bachelor's degree from a recognized university with at least an A– (or first-class standing) in the final two years of undergraduate study, and at least 4.0 to 6.0 full-course equivalents (FCEs) in psychology including statistics and some laboratory research experience. Students who are admitted to the program without 4.0 to 6.0 FCEs in required undergraduate coursework may be required to complete additional courses in the master's program. Applicants with a strong background in mathematics, computer science, statistics, biological science, or neuroscience are encouraged to apply.
- Competitive scores on General and Subject (Psychology) tests of the Graduate Record Examinations (GRE). Note: the GRE requirement has been waived for the 2022-23 admissions cycle.
- Two academic letters of reference.
- A personal statement.
- A curriculum vitae.
- Completion of the Department Application Form.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction is not English must demonstrate proficiency in English. Applicants must complete the Test of English as a Foreign Language (TOEFL), or its equivalent according to SGS regulations, prior to submitting the application. See General Regulations section 4.3 for requirements.

Program Requirements

- **Coursework.** The Clinical Psychology field for the MA in Counselling and Clinical Psychology requires **5.0 full-course equivalents (FCEs)**, including an ethics course, practicum-based courses, a clinical practicum, and a thesis.
  - 4.5 FCEs as follows:
    - **Year 1:**
      - CPS1601H *Psychopathology* (0.5 FCE);
      - CPS1701H *Psychological Assessment I* (0.5 FCE);
      - CPS1702H *Psychological Assessment II* (0.5 FCE);
      - CPS1801H *Psychotherapy* (0.5 FCE);
      - CPS1901H *Ethics* (0.5 FCE).
    - **Year 2:**
      - CPS1101H *Clinical Research Design* (0.5 FCE);
      - CPS1102H *Statistical Techniques I* (0.5 FCE);
      - CPS1802H *Applied Interventions in Clinical Psychology* (0.5 FCE);
      - CPS1803H *Practicum in Psychological Interventions* (0.5 FCE).
  - 0.5 FCE: Students must complete a clinical practicum at a pre-approved placement site in the final Summer of the program (CPS2999H *Summer Practicum*).
- **Research thesis** to be completed and orally defended in Year 2 of the program.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Psychological Clinical Science: Counselling and Clinical Psychology PhD; Field: Clinical Psychology

Doctor of Philosophy

Program Description

The **field in Clinical Psychology** is offered primarily by the Graduate Department of Psychological Clinical Science at UTSC. Clinical Psychology adheres to a Clinical Science model of training and is accredited by the Canadian Psychological Association (CPA). The primary and overriding objective of graduate training is to foster exceptional clinical scientists according to the highest standards of research and professional practice. Graduate training in Clinical Psychology at UTSC has primary research strengths in the areas of: clinical and cognitive neuroscience, psychological assessment and clinical neuropsychology, psychopathology, personality, and mindfulness- and acceptance-based psychotherapies.

The field in Clinical Psychology adheres to a generalist model of training, with a primary focus on adults. A unifying theme of faculty research in Clinical Psychology at UTSC is to advance knowledge of the etiology and assessment and treatment of mental disorders. Instruction is provided in psychopathology, assessment, and intervention, and students are trained to practise with a variety of adult populations. The field also boasts strength in neuropsychology.

The PhD program is designed for applicants interested in a career as a clinical psychologist based on a **Clinical Science** model of training. Graduate training in Clinical Psychology at UTSC prepares graduates primarily for research and clinical careers as clinical scientists in university and medical and psychological settings.

The field is distinguished by its innovative cross-disciplinary approach that emphasizes scientific innovation through novel research collaborations that push traditional boundaries in clinical psychology. Importantly, the program meets the needs of students who plan to engage in research, teaching, and/or evidence-based clinical practice. This program is intended to meet the registration requirements of the College of Psychologists of Ontario (CPO) at the doctoral level.

The Counselling and Clinical Psychology program (Clinical Psychology field) is offered on a full-time basis, and progress in the program will be reviewed annually.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Psychological Clinical Science's additional admission requirements stated below.
- A master's degree in Clinical Psychology (or its equivalent) from a recognized university, with a minimum A– average and excellent research performance.
- Competitive scores on General and Subject (Psychology) tests of the Graduate Record Examinations (GRE). Note: the GRE requirement has been waived for the 2022-23 admissions cycle.
- Two academic letters of reference.
- A personal statement.
- A curriculum vitae.
- Completion of the Department Application Form.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction is not English must demonstrate proficiency in English. Applicants must complete the Test of English as a Foreign Language (TOEFL), or its equivalent according to SGS regulations, prior to submitting the application. See General Regulations section 4.3 for requirements.

Program Requirements

- The PhD program requires **5.5 full-course equivalents (FCEs)** including coursework, three clinical placements, plus a comprehensive examination, thesis proposal, thesis, and thesis defence:
  - 3.5 FCEs in coursework, normally completed by the end of Year 3 (CPS1103H, CPS1201H, CPS1301H, CPS1401H, CPS2901H, CPS2902H, CPS3901H).
  - 2.0 FCEs in clinical work:
    - 1.0 FCE in two separate part-time clinical placements during Years 1 and 2 (CPS3999H and CPS4999H).
    - 1.0 FCE in a one-year, full-time clinical internship at a Canadian Psychological Association- or American Psychological Association-accredited clinical setting (or equivalent), which normally takes place during Year 5 (CPS5999Y). Eligibility for the clinical internship will be assessed by the Director of Clinical Training (DCT) prior to Year 4 of the program.
- The **comprehensive examination** requirement consists of two mandatory components:
  - An oral examination focused on clinical expertise (normally completed in the Fall session of Year 2); and
  - A research-focused grant proposal (normally completed in the Fall session of Year 2).
  - A pass on both components is required for a student to continue on to PhD candidacy. Students who fail the oral exam will have the opportunity to retake the exam. Students who fail the grant proposal will have the opportunity to revise and resubmit. Students who fail either or both component(s) on the second attempt should consult the School of Graduate Studies' Academic Appeals Policy. If after the appeals process and second attempts at either or both component(s) result in a failure, the student will no longer be eligible to continue in the PhD program. Guidelines on the comprehensive requirement can be found in the PCS Graduate Handbook.
- **Thesis proposal**, normally approved prior to the start of Year 3 of the program.
- **Completed thesis**.
- Successful **defence of the thesis** at the Final Oral Examination.
- For students interested in acquiring additional clinical hours, the PhD program provides the following optional courses: CPS6999H and CPS7999H. Please note that optional courses for the PhD must be approved by the faculty supervisor, the DCT, and the Graduate Chair prior to course enrolment.

- Supervisors will have annual meetings with students to assess academic progress and to develop plans of study. The DCT will also hold formal annual meetings with students to assess clinical and professional progress.
- The program length is five years, which includes a pre-doctoral internship.

Program Length

5 years

Time Limit

6 years

Psychological Clinical Science: Counselling and Clinical Psychology MA, PhD; Field: Clinical Psychology Courses

CPS1101H	Clinical Research Design (Exclusion: APD1263H Seminar in Research Methods for MA Students.)
CPS1102H	Statistical Techniques I (Exclusion: JOI1287H Introduction to Applied Statistics.)
CPS1103H	Statistical Techniques II (Exclusion: JOI1288H Intermediate Statistics and Research Design.)
CPS1201H	Neurobiological Bases of Behaviour
CPS1209H	Clinical Neuropsychology
CPS1301H	Cognitive-Affective Bases of Behaviour
CPS1401H	Social and Interpersonal Bases of Behaviour
CPS1501H	Personality
CPS1601H	Psychopathology (Exclusion: APD3260H Psychodiagnostic Systems.)
CPS1701H	Psychological Assessment I (Exclusion: APD3224H Individual Cognitive and Personality Assessment.)
CPS1702H	Psychological Assessment II
CPS1801H	Psychotherapy (Exclusion: APD1202Y Theories and Techniques of Counselling and Psychotherapy.)
CPS1802H	Applied Interventions in Clinical Psychology (Exclusion: APD1203Y+ Practicum I: Interventions in Counselling Psychology.)
CPS1803H	Practicum in Psychological Interventions (Exclusion: APD1203Y+ Practicum I: Interventions in Counselling Psychology.)
CPS1809H	Clinical Psychopharmacology
CPS1810H	Advanced Psychotherapy
CPS1901H	Ethics (Exclusion: APD1219H Ethical Issues in Professional Practice in Psychology and Psychotherapy.)
CPS2901H	Practicum in Clinical Supervision
CPS2902H	Quality Assurance and Consultation
CPS2999H	Summer Practicum
CPS3801H	Multi-Person Therapies (Exclusions: APD1228H Couples Counselling, APD1260H Family Therapy, APD1261H Group Work in Counselling.)

APHD: Counselling and Clinical Psychology MA; Field: Clinical and Counselling Psychology

Master of Arts

Overview

The **Counselling and Clinical Psychology program** offers studies leading to the MA and PhD degrees. It is offered by the graduate Department of Applied Psychology and Human Development at the Ontario Institute for Studies in Education (OISE), St. George campus, and the graduate Department of Psychological Clinical Science at the University of Toronto Scarborough (UTSC).

This graduate program is intended for students seeking to pursue careers in research, teaching, and clinical practice. At the time of application, students will be required to identify a preference for a specific field as well as for a potential supervisor with whom they would work if admitted to the program.

The program has two fields:

- Clinical and Counselling Psychology, offered primarily by OISE
- Clinical Psychology, offered primarily by UTSC

The **field in Clinical and Counselling Psychology** is offered primarily by the OISE Department of Applied Psychology and Human Development. This field is based on a bio-psycho-social model with an emphasis on diversity. It shares an emphasis with the Clinical Psychology field on assessment and the treatment of psychopathology in adults.

Department of Applied Psychology and Human Development
Ontario Institute for Studies in Education (OISE)
University of Toronto
252 Bloor Street West
Toronto, Ontario M5S 1V6
Canada

Program Description

This **MA program** is designed for applicants interested in working as researchers or practitioners in a variety of psychological and educational settings. This program enables students to apply for registration with the College of Psychologists of Ontario (CPO) as a Psychological Associate. It also fulfils the requirements of students who plan to apply to the PhD program, Clinical and Counselling Psychology field.

The MA is taken on a full-time or part-time basis. However, students in the part-time option will be required to complete one year of full-time study to fulfil their degree requirements.

For 2021-22 and further extension to the 2022-23 academic year, admissions to the part-time option have been administratively suspended.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Applied Psychology and Human Development's additional admission requirements stated below.
- An appropriate bachelor's degree in psychology or any appropriate bachelor's degree that would contain the psychology requirement equivalent (defined as 6.0 full-course equivalents [FCEs] in psychology, including 0.5 FCE in research methods, 0.5 FCE in statistics, and at least 3.0 FCEs at the third- and fourth-year levels).
- A standing equivalent to a University of Toronto A– or better in the final year.

Program Requirements

- **Coursework.** Students must complete a total of **4.5 FCEs** as follows:
  - APD1203Y+ *Practicum I: Interventions in Counselling Psychology and Psychotherapy* (1.0 FCE) (500 hours of practicum). MA students will attend a minimum of three colloquium presentations during their program, which partially fulfills the course requirements for APD1203Y+.
  - 0.5 elective FCE.
  - APD1208Y+ *Cognitive and Personality Theory and Assessment* (1.0 FCE).
  - APD1219H *Ethical Issues in Professional Practice in Psychology and Psychotherapy* (0.5 FCE).
  - APD1228H *Couples Counselling* (0.5 FCE) **or** APD1261H *Group Work in Counselling and Psychotherapy* (0.5 FCE) (or an equivalent course).
  - APD1263H *Research Methods for Clinical and Counselling Psychology* (0.5 FCE) (RM).
  - JOI1288H *Intermediate Statistics and Research Design (RM)* (0.5 FCE).
- **Master's thesis.**
- **Full-time option:** Full-time, on-campus study is required from September to April, which represents the Fall and Winter sessions. Normally, 1.5 FCEs are taken in each of the Fall and Winter sessions and a maximum of 1.0 FCE in the Summer session. Under this option, it is expected that all degree requirements will be completed within two years.
- **Part-time option (for 2021-22 and further extension to the 2022-23 academic year, admissions to the part-time option have been administratively suspended):** For this option, students can register as part-time students at the beginning of their program. However, they will be required to register as full-time students for one year of the program. In this option, students will normally take 1.0 FCE annually during the beginning of their program and 1.5 FCEs in each of the Fall and Winter sessions in their year of full-time study. Once they have begun their last required course, they must register annually and pay the part-time fees until all degree requirements have been completed. Under this option, it is expected that all degree requirements will be completed within two to three years, up to a maximum of six years.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

+ *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Program Description

The principal aim of the **PhD program** is the development of research and theoretical knowledge in counselling and clinical psychology, assessment skills, and knowledge and training in professional issues. Students are expected to conduct advanced research and to develop professional knowledge and skills. Graduates will be prepared to assume a variety of positions in psychological teaching, research, and practice in universities, community settings and agencies offering psychological services, and in university or college counselling centres.

The Counselling and Clinical Psychology program offers both a full-time and flexible-time PhD, and progress in the program will be reviewed annually. The program in Clinical and Counselling Psychology at OISE was accredited by the Canadian Psychological Association (CPA) in 2015-2016 for a six-year term.

For 2021-22 and further extension to the 2022-23 academic year, admissions to the flexible-time PhD option have been administratively suspended.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Applied Psychology and Human Development's additional admission requirements stated below.
- An appropriate bachelor's degree in psychology or any appropriate bachelor's degree that would contain the psychology requirement equivalent (defined as 6.0 full-course equivalents [FCEs] in psychology, including 0.5 FCE in research methods, 0.5 FCE in statistics, and at least 3.0 FCEs at the second-, third-, and fourth-year levels), with a standing equivalent to a University of Toronto A– or better in the final year.
- A University of Toronto MA degree in Clinical and Counselling Psychology with a grade of A– or better, or its equivalent.

Program Requirements

- **Coursework.** Students must complete a minimum of **5.5 FCEs** as follows:
  - 2.5 FCEs in Counselling and Psychotherapy:
    - APD3215H *Advanced Psychotherapy Seminar*;
    - APD3217Y+ *Advanced Practicum in Clinical and Counselling Psychology* (Credit/No Credit; 600-hour practicum); and APD3268Y *Internship in Clinical and Counselling Psychology* (1,600-hour internship — arrangements must be made in consultation with the Director of Clinical Training). MA students will attend a minimum of three colloquium presentations during their program, which partially fulfills the course requirements for APD3268Y.
  - 1.0 FCE in Psychology Measurement/Assessment and Diagnosis:
    - APD3225H *Assessment and Diagnosis of Personality and Psychopathology*; and
    - APD3260H *Psychodiagnostic Systems*.
  - 0.5 FCE in Supervision and Consultation:
    - APD3261H+ *Clinical Supervision and Consultation Practicum.*
  - 1.0 FCE in Advanced Research Methods:
    - APD3202H *A Foundation of Program Evaluation in Social Sciences (RM)*.
    - An advanced-level statistics course (in consultation with supervisors). Courses can be drawn from those offered at OISE or other Faculties with the permission of the instructor.

    - 0.5 FCE in History and Systems Psychology:
        - APD3204H *Contemporary History and Systems in Human Development and Applied Psychology*.
- **Comprehensive examination:** In addition to normal course requirements, students will complete two comprehensive components. First, a manuscript for publication and presentation at a peer review conference, normally in Year 1 of the program. Second, students will be examined systematically in general psychology and in professional psychology. The examination will normally be taken at the end of Year 2 of full-time study.
- **Doctoral dissertation:** All students must develop, complete, and defend in a Doctoral Final Oral Examination a doctoral dissertation supervised by a full-time member of the Counselling and Clinical Psychology faculty. The content of such dissertation research may address theoretical issues applicable to clinical and counselling concerns and practice, relate to the development of programs in a variety of educational or applied settings, or in some other way contribute to the development and practice of clinical and counselling psychology.
- Students must register continuously and pay the full-time fee until all degree requirements have been fulfilled.
- Students cannot transfer between the full-time and flexible-time PhD options.

Program Length

5 years

Time Limit

6 years

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

PhD Program (Flexible-Time)

For 2021-22 and further extension to the 2022-23 academic year, admissions to the flexible-time PhD option have been administratively suspended.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Applied Psychology and Human Development's additional admission requirements stated below.
- An appropriate bachelor's degree in psychology or any appropriate bachelor's degree that would contain the psychology requirement equivalent (defined as 6.0 full-course equivalents [FCEs] in psychology, including 0.5 FCE in research methods, 0.5 FCE in statistics, and at least 3.0 FCEs at the second-, third-, and fourth-year levels), with a standing equivalent to a University of Toronto A– or better in the final year.
- A University of Toronto MA degree in Clinical and Counselling Psychology with a grade of A– or better, or its equivalent.
- Applicants to the flexible-time PhD option are accepted under the same admission requirements as applicants to the full-time PhD option.
- Applicants must demonstrate that they are currently employed and are active professionals engaged in activities related to their proposed program of study.

Program Requirements

- **Coursework.** Students must complete a minimum of **5.5 FCEs** as follows:
    - 2.5 FCEs in Counselling and Psychotherapy:
        - APD3215H *Advanced Psychotherapy Seminar*;
        - APD3217Y[+] *Advanced Practicum in Clinical and Counselling Psychology* (Credit/No Credit; 600-hour practicum); and APD3268Y *Internship in Clinical and Counselling Psychology* (1,600-hour internship — arrangements must be made in consultation with the Director of Clinical Training). PhD students will attend a minimum of six colloquium presentations during their program, which partially fulfills the course requirements for APD3268Y.
    - 1.0 FCE in Psychology Measurement/Assessment and Diagnosis:
        - APD3225H *Assessment and Diagnosis of Personality and Psychopathology*; and
        - APD3260H *Psychodiagnostic Systems*.
    - 0.5 FCE in Supervision and Consultation:
        - APD3261H[+] *Clinical Supervision and Consultation Practicum.*
    - 1.0 FCE in Advanced Research Methods:
        - APD3202H *A Foundation of Program Evaluation in Social Sciences (RM)*.
        - An advanced-level statistics course (in consultation with supervisors). Courses can be drawn from those offered at OISE or other Faculties with the permission of the instructor.
    - 0.5 FCE in History and Systems Psychology:
        - APD3204H *Contemporary History and Systems in Human Development and Applied Psychology*.
- **Comprehensive examination:** In addition to normal course requirements, students will complete two comprehensive components. First, a manuscript for publication and presentation at a peer review conference, normally in Year 1 of the program. Second, students will be examined systematically in general psychology and in professional psychology. The examination will normally be taken at the end of Year 2 of full-time study.
- **Doctoral dissertation:** All students must develop, complete, and defend in a Doctoral Final Oral Examination a doctoral dissertation supervised by a full-time member of the Counselling and Clinical Psychology faculty. The content of such dissertation research may address theoretical issues applicable to clinical and counselling concerns and practice, relate to the development of programs in a variety of educational or applied settings, or in some other way contribute to the development and practice of clinical and counselling psychology.
- Students must register continuously until all degree requirements have been fulfilled. They must register full-time during the first four years and may continue as part-time thereafter, with their department's approval.

- Students cannot transfer between the full-time and flexible-time PhD options.

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Addiction Studies
  - Psychology, MA, PhD
- Aging, Palliative and Supportive Care Across the Life Course
  - Psychology, MA, PhD
- Neuroscience
  - Psychology, MA, PhD
- Psychology and Engineering
  - Psychology, MA, PhD
- Sexual Diversity Studies
  - Psychology, MA, PhD
- Women's Health
  - Psychology, MA, PhD

Overview

Graduate training in Psychology stresses training in general experimental psychology. Areas of specialization include the following:

- Behavioural Neuroscience
- Perception, Cognition, and Cognitive Neuroscience
- Developmental
- Social and Personality.

Psychology: Psychology MA

Note: admissions to the Master of Arts program have been administratively suspended.

Master of Arts

Program Description

The MA program is designed to provide students with rigorous scientific training in experimental psychology. The program is one year in duration, during which time students obtain instruction in statistics and research design, and carry out a research project that culminates in a written thesis and oral examination. Students admitted to the MA program are expected to continue to the PhD program.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Psychology's additional admission requirements stated below.
- Appropriate bachelor's degree from a recognized university with a minimum A– average (or first-class standing) in the last two undergraduate years, and the equivalent of 6.0 full-course equivalents (FCEs) in psychology including statistics and adequate research performance.
- It is assumed that all students entering the MA program intend to continue in the PhD program.

Program Requirements

- Courses and individual research training leading to a thesis.
- **Coursework.** Students must successfully complete a total of **2.0 FCEs** as follows:
  - PSY1000H *Directed Studies* to prepare for the MA thesis research (0.5 FCE)
  - PSY2001H *Statistics I*, experimental design and statistics (0.5 FCE)
  - two half-course Psychology electives (1.0 FCE total).
- **MA thesis.**

It is expected that following the MA year, students will proceed to the PhD program. To be eligible for admission, adequate research performance and at least an A– average are required.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

Psychology: Psychology PhD

Doctor of Philosophy

Program Description

The principal aim of the PhD program is to equip students with the skills to carry out advanced research within experimental psychology, and to become independent research scientists. Students work closely with a faculty adviser to develop and conduct a specialized (often multidisciplinary) program of research that ultimately culminates in a written dissertation and final oral examination. Through additional coursework and research opportunities, students gain breadth in their knowledge base and skill set in experimental psychology. The program is designed to prepare students for careers in academia, or a variety of non-academic careers where rigorous and in-depth research training is required.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Psychology's additional admission requirements stated below.
- Appropriate University of Toronto master's degree, or its equivalent from a recognized university, with a minimum A– average and adequate research performance.

Program Requirements

- **Coursework.** Students must successfully complete a total of **3.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE: an advanced statistics course chosen from a list provided by the department (typically PSY2002H *Statistics II*, taken in Year 1).
  - 0.5 FCE: PSY3000H[0] *External Research Project*, a research project course supervised by a faculty member other than the student's PhD supervisor, completed during Years 1 and 2.
  - 0.5 FCE: PSY3001H[0] *Professional Psychology* (Credit/No Credit), taken in two modules in Years 1 and 3.
  - 1.0 FCE in Psychology course electives. Of this requirement, 0.5 FCE can be achieved through two 0.25 FCE Psychology module electives (PSY3100H *Psychological Science Skills*).
  - 0.5 FCE: PSY4000H[0] *Doctoral Research Project*, thesis proposal, and oral exam (examination in the student's area of research).
- **PhD thesis.**
- Students may take other courses, but it is expected that the requirements will be completed in the first two years of the PhD program. Students admitted with a master's degree from another university will normally be required to fulfil the PhD course requirements; however, exemptions may be granted by the Graduate Director of the Department of Psychology.

Program Length

4 years full-time

Time Limit

6 years full-time

[0] Course that may continue over a program. The course is graded when completed.

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Psychology's additional admission requirements stated below.
- Appropriate University of Toronto bachelor's degree, or its equivalent from a recognized university, with a minimum A– average and adequate research performance.
- Applicants with a master's degree in Psychology or a cognate discipline will likely be admitted to the four-year PhD program, whereas students with a master's degree in an unrelated discipline will be admitted to the direct-entry PhD option. Such admission decisions will be made by the Graduate Director.

Program Requirements

- **Coursework.** Students must successfully complete a total of **5.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE: PSY1100H *Foundational Research Project*, a research project course supervised by the student's supervisor plus two other faculty members, completed during Years 1 and 2.
  - 0.5 FCE: PSY2001H *Statistics I*, an introductory statistics course taken in Year 1.
  - 0.5 FCE: an advanced statistics course chosen from a list provided by the department (typically PSY2002H *Statistics II*, taken in Year 1).
  - 0.5 FCE: PSY3000H[0] *External Research Project*, a research project course supervised by a faculty member other than the student's PhD supervisor, completed during Years 2 and 3.
  - 0.5 FCE: PSY3001H[0] *Professional Psychology* (Credit/No Credit), taken in two modules in Years 1 and 3.
  - 2.0 FCEs in Psychology course electives. Of this requirement, 0.5 FCE can be achieved through two 0.25 FCE Psychology module electives (PSY3100H *Psychological Science Skills*).
  - 0.5 FCE: PSY4000H[0] *Doctoral Research Project*, thesis proposal, and oral exam (examination in the student's area of research).
- **PhD thesis.**

- Students may take other courses, but it is expected that the requirements will be completed in the first three years of the PhD program. Students admitted with a master's degree from another university will normally be required to fulfil the PhD course requirements; however, exemptions may be granted by the Graduate Director of the Department of Psychology.

Program Length

5 years full-time

Time Limit

7 years full-time

[0] Course that may continue over a program. The course is graded when completed.

Psychology: Psychology MA, PhD Courses

Not all courses are offered each year. See the current offerings.

MA and PhD Core Courses

PSY1000H	Directed Studies
PSY1100H[0]	Foundational Research Project
PSY1200H	Selected Topics in Psychology
PSY1210H	Selected Topics in Psychology
PSY1500H	Conceptual Bases of Psychology
PSY2001H	Statistics I
PSY2002H	Statistics II
PSY3000H[0]	External Research Project
PSY3001H[0]	Professional Psychology (Credit/No Credit)
PSY3100H	Psychological Science Skills
PSY4000H[0]	Doctoral Research Project (Credit/No Credit)

Behavioural Neuroscience Core Courses

PSY5101H	Mechanisms of Behaviour
PSY5110H	Advanced Topics in Behavioural Neuroscience I
PSY5111H	Advanced Topics in Behavioural Neuroscience II
PSY5112H	Advanced Topics in Behavioural Neuroscience III
PSY5121H	Advanced Topics in Animal Behaviour and Motivation II
PSY5130H	Advanced Topics in Neuropsychology I

Developmental Core Courses

PSY5303H	Cognitive Development
PSY5304H	Language Development
PSY5305H	Social Development
PSY5310H	Advanced Topics in Development I
PSY5311H	Advanced Topics in Development II

Perception/Cognition/Cognitive Neuroscience Core Courses

PSY5201H	Audition
PSY5203H	Higher Cognition
PSY5204H	Attention
PSY5205H	Memory
PSY5210H	Advanced Topics in Perception I
PSY5211H	Advanced Topics in Perception II
PSY5212H	Advanced Topics in Perception III
PSY5220H	Advanced Topics in Cognition I
PSY5221H	Advanced Topics in Cognition II
PSY5222H	Advanced Topics in Cognition III

Social and Personality Core Courses

PSY5402H	Personality
PSY5403H	Social Cognition
PSY5410H	Advanced Topics in Abnormal I
PSY5411H	Advanced Topics in Abnormal II
PSY5420H	Advanced Topics in Personality I
PSY5421H	Advanced Topics in Personality II
PSY5430H	Advanced Topics in Social Psychology I
PSY5431H	Advanced Topics in Social Psychology II
PSY5432H	Advanced Topics in Social Psychology III
PSY5433H	Advanced Topics in Social Psychology IV

Cross-Listed Courses

JNS1000Y	Fundamentals of Neuroscience: Systems and Behaviour
JPM1005Y	Behavioural Pharmacology
JPX1001Y	Parenting: Multidisciplinary Perspectives

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Addiction Studies
  - Public Health Sciences, MPH, MSc, PhD
- Aging, Palliative and Supportive Care Across the Life Course
  - Public Health Sciences, MPH, MSc, PhD
- Bioethics
  - Public Health Sciences, MPH, MSc, PhD
- Community Development
  - Public Health Sciences, MPH
- Development Policy and Power
  - Public Health Sciences, MPH
- Environment and Health
  - Community Health, MScCH
  - Public Health Sciences, MPH, PhD
- Food Studies
  - Public Health Sciences, PhD
- Global Health (U of T Global Scholar)
  - Public Health Sciences, MPH, MSc (thesis only), MScCH, PhD
- Health Services and Policy Research
  - Public Health Sciences, PhD
- Indigenous Health
  - Public Health Sciences, MPH, PhD
- Neuroscience
  - Bioethics, MHSc
  - Community Health, MScCH
  - Public Health Sciences, MPH, MSc, PhD
- Public Health Policy
  - Public Health Sciences, MPH, MSc, PhD
- Resuscitation Sciences (admissions have been administratively suspended)
  - Community Health, MScCH
  - Public Health Sciences, MPH, MSc, PhD
- Sexual Diversity Studies
  - Public Health Sciences, MPH, MSc, PhD
- Women and Gender Studies
  - Public Health Sciences, MPH, PhD
- Women's Health
  - Public Health Sciences, MPH, PhD

Overview

The Dalla Lana School of Public Health is an internationally recognized community of researchers, teachers, students, practitioners, policy makers, and citizens creating new knowledge, educating change makers, advancing practice, and guiding the way to better, more equitable outcomes in population health and health systems — locally, nationally, and globally.

The Graduate Department of Public Health Sciences in the Dalla Lana School of Public Health enrols almost 500 graduate students in its master's and doctoral degree programs. In addition, the school has more than 40 postgraduate students in

its two Royal College Residency programs: Public Health and Preventive Medicine and Occupational Medicine. The school is also engaged in teaching at the undergraduate level in the Faculty of Medicine, Faculty of Arts and Science, Bloomberg Faculty of Nursing, and University of Toronto Scarborough (UTSC).

Public Health Sciences: Public Health Sciences MPH

Master of Public Health

Program Description

The MPH degree is designed to prepare the next generation of public health professionals and is aimed at students interested in professional and/or research careers in the community, academic, public, or private sectors. Applicants apply and may be admitted to one of the following fields:

- Epidemiology
- Family and Community Medicine
- Indigenous Health
- Nutrition and Dietetics
- Occupational and Environmental Health
- Social and Behavioural Health Sciences

The program may be taken on a full-time or part-time basis.

Field: Epidemiology

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Dalla Lana School's additional admission requirements stated below.
- Appropriate bachelor's degree from a recognized university with a minimum mid-B average in the final year.
- At least one course in undergraduate statistics.
- Relevant work or volunteer experience.

Program Requirements

- Completion of **10.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE core course: CHL5004H *Introduction to Public Health Sciences*
  - 1.0 FCE in research methods: CHL5401H *Epidemiologic Methods I* and CHL5402H *Epidemiologic Methods II*
  - 1.0 FCE in biostatistics: CHL5201H *Biostatistics I* and CHL5202H *Biostatistics II*
  - 1.5 FCEs in epidemiology: CHL5405H *Health Trends and Surveillance*, CHL5418H *Scientific Overview in Epidemiology*, and CHL5426H *Population Perspectives for Epidemiology*
  - 0.5 FCE in public health policy: CHL5300H *Public Health Policy*
  - Minimum 1.0 FCE: practicum placement
  - Elective courses
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.
- Full-time students normally require longer to complete the program, including time spent in the practicum placement.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F);
12 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Field: Family and Community Medicine

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Dalla Lana School's additional admission requirements stated below.
- Appropriate bachelor's degree from a recognized university with a minimum mid-B average in the final year.
- At least one course in undergraduate statistics.
- Relevant work or volunteer experience.

Program Requirements

- Completion of **10.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE core course: CHL5004H *Introduction to Public Health Sciences*
  - 0.5 FCE: CHL5601H *Appraising and Applying Evidence to Assist Clinical Decision-Making*
  - 1.0 FCE: CHL5603Y *Social, Political, and Scientific Issues in Family Medicine*
  - 0.5 FCE: CHL5605H *Research Issues in Family Medicine/Primary Care* or an equivalent research course, subject to approval
  - 1.0 FCE: CHL5607H *Teaching and Learning by the Health Professions: Principles and Theories* and CHL5608H *Teaching and Learning by the Health Professions: Practical Issues and Approaches*
  - 0.5 FCE: CHL5613H *Leading Improvement in the Quality of Health Care for Community Populations*
  - 0.5 FCE: CHL5622H *Patient-Related Health Care and Public Policy in Canada*
  - Minimum 1.0 FCE: practicum placement
  - Elective courses
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.
- Full-time students normally require longer to complete the program, including time spent in the practicum placement.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F);
12 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Field: Family and Community Medicine (Advanced-Standing Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Dalla Lana School's additional admission requirements stated below.
- Appropriate bachelor's degree from a recognized university with a minimum mid-B average in the final year.
- Completion in good standing of the public health curriculum of an accredited Canadian medical school and/or meeting the required examinable competencies of the Medical Council of Canada.

Program Requirements

- Completion of **5.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE core course: CHL5004H *Introduction to Public Health Sciences*
  - 1.0 FCE core course: CHL5603Y *Social, Political, and Scientific Issues in Family Medicine*
  - 0.5 FCE core course: CHL5622H *Patient-Related Health Care and Public Policy in Canada*
  - 0.5 FCE core course: CHL5624H *Historical, Ethical, and Philosophical Foundations of Public Health*
  - 0.5 FCE research methods course selected from the following list:
    - CHL5601H *Appraising and Applying Evidence to Assist Clinical Decision-Making*
    - CHL5605H *Research Issues in Family Medicine/Primary Care*
    - CHL5613H *Leading Improvement in the Quality of Health Care for Community Populations*
    - CHL5616H *Applied Survey Methods for Health Care Professionals*
  - 0.5 FCE: CHL6013H[0] *Required MPH Advanced Standing Practicum*
  - 1.5 FCEs in elective courses
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

[0] *Course that may continue over a program. The course is graded when completed.*

Field: Indigenous Health

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Dalla Lana School's additional admission requirements stated below.
- Appropriate bachelor's degree from a recognized university with a minimum mid-B average in the final year.
- At least one course in undergraduate statistics.
- Relevant work or volunteer experience.

Program Requirements

- Completion of **10.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE core course: CHL5004H *Introduction to Public Health Sciences*
  - 0.5 FCE: CHL5300H *Public Health Policy*
  - 1.0 FCE in research methods: CHL5220H and CHL5811H or approved equivalents
  - 0.5 FCE: CHL5520H *Indigenous Health*
  - 0.5 FCE: CHL5521H *Indigenous Practicum Preparation*
  - 0.5 FCE: CHL5522H *Indigenous Food Systems, Environment, and Health*
  - 0.5 FCE: CHL5523H *Indigenous Health and Social Policy*
  - 0.5 FCE: CHL5524H: *Indigenous Health Theory and Methods*
  - 0.5 FCE: CHL5801H *Health Promotion 1* or CHL5105H *Social Determinants of Health*
  - Minimum 1.0 FCE: practicum placement
  - Elective courses
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.
- Full-time students normally require longer to complete the program, including time spent in the practicum placement.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F);
12 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Field: Nutrition and Dietetics

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Dalla Lana School's additional admission requirements stated below and may be considered for the advanced-standing option.
- Appropriate bachelor's degree in food and nutrition (or equivalent) from a recognized university with a minimum mid-B average in the final year.
- At least one course in undergraduate statistics.
- Relevant work or volunteer experience.

Program Requirements

- Completion of **10.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE core course: CHL5004H *Introduction to Public Health Sciences*
  - 0.5 FCE: CHL5300H *Public Health Policy*
  - 0.5 FCE in quantitative research methods: CHL5220H *Introduction to Quantitative Research* or an approved equivalent
  - 0.5 FCE: CHL5654H *Nutrition Programs and Strategies*
  - 0.5 FCE: CHL5811H *Introduction to Qualitative Research*
  - 2.5 FCEs in foundations of practice for students who have not completed dietetic practical training (dietetic internship): CHL5650H, CHL5651H, CHL5652H, and CHL5656Y
  - 0.5 FCE in nutrition science
  - Minimum 1.0 FCE: practicum placement
  - Elective courses
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.
- Full-time students normally require longer to complete the program, including time spent in the practicum placement.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F);
12 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Field: Nutrition and Dietetics (Advanced-Standing Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Dalla Lana School's additional admission requirements stated below and may be considered for the advanced-standing option.
- Appropriate bachelor's degree in food and nutrition (or equivalent) from a recognized university with a minimum mid-B average in the final year.
- Membership in a provincial dietetics regulatory body or equivalent in the home country. Those planning to practise in Canada must be eligible for membership in a provincial regulatory body of dietetics.
- Five years of professional work experience in clinical, community, administrative, or public health dietetics.
- At least one course in undergraduate statistics.

Program Requirements

- Completion of **5.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE: CHL5004H *Introduction to Public Health Sciences*
  - 0.5 FCE in public health policy: CHL5300H *Public Health Policy* or CHL5622H *Patient-Related Health Care and Public Policy in Canada*
  - 1.0 FCE in research methods: CHL5220H *Introduction to Quantitative Research*, or an approved equivalent, and CHL5811H *Introduction to Qualitative Research*
  - 0.5 FCE in population or public health nutrition from the following list:
    - CHL5522H *Indigenous Food Systems, Environment, and Health*
    - CHL5653H *Community Nutrition*
    - CHL5654H *Nutrition Programs and Strategies*
    - NFS1201H *Public Health Nutrition*
    - NFS1212H *Regulation of Food, Composition, Health Claims, and Safety*
    - other courses approved by the Program Director
  - 0.5 FCE in nutrition science from the following list:
    - NFS1220H *Clinical Nutrition*
    - NFS1223H *Dietary Carbohydrate and Glycaemic Index in Health and Disease*
    - NFS1484H *Advanced Nutrition*
    - other courses approved by the Program Director
  - 0.5 FCE: CHL6013H[0] *Required MPH Advanced Standing Practicum*
  - Elective courses
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.

Program Length

3 sessions full-time advanced standing (typical registration sequence: F/W/S);
9 sessions part-time advanced standing

Time Limit

3 years full-time;
6 years part-time

[0] Course that may continue over a program. The course is graded when completed.

Emphases in the MPH Program

Students in the **Nutrition and Dietetics field of study** may complete an emphasis by completing **1.0 full-course equivalent (FCE)** in the given area. The emphasis requirements will also count toward their 10.0 FCE degree program requirements.

Emphasis: Clinical Nutrition

- 0.5 FCE: complete a four-week Clinical Nutrition practicum in a tertiary-care clinical nutrition setting, in addition to the standard practicum requirements for the field.
- 0.5 FCE from the following list:
  - NFS1220H *Clinical Nutrition*
  - CHL5610H *Theory and Practice of Behaviour Change in Health Professional Settings*.
- A relevant research assignment for an appropriate agency focussed on clinical nutrition as part of CHL5656Y *Nutrition and Dietetics Culminating Project*, to be approved by the program director or course instructor.

Emphasis: Management and Food Systems

- 0.5 FCE: complete a four-week Management and Food Systems practicum in a management and food provision setting, in addition to the standard practicum requirements for the field.
- 0.5 FCE: graduate-level course in management or food systems to be approved by the program director and course instructor.
- A relevant research assignment for an appropriate agency focussed on management of food provision and food systems as part of CHL5656Y *Nutrition and Dietetics Culminating Project*, to be approved by the program director or course instructor.

Emphasis: Public Health Nutrition

- 0.5 FCE: complete a four-week Public Health Nutrition practicum in a regional, provincial, or federal public health agency setting, in addition to the standard practicum requirements for the field.
- 0.5 FCE: NFS1201H *Public Health Nutrition*.
- A relevant research assignment for an appropriate agency focussed on public health nutrition as part of CHL5656Y *Nutrition and Dietetics Culminating Project*, to be approved by the program director or course instructor.

Field: Occupational and Environmental Health

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Dalla Lana School's additional admission requirements stated below.
- Appropriate bachelor's degree from a recognized university with a minimum mid-B average in the final year.
- At least one course in undergraduate statistics.
- Relevant work or volunteer experience.

Program Requirements

- Completion of **10.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE core course: CHL5004H *Introduction to Public Health Sciences*
  - 0.5 FCE: CHL5904H *Perspectives in Occupational and Environmental Health — Legal and Social Context*
  - 0.5 FCE: CHL5910H *Occupational and Environmental Hygiene I*
  - 0.5 FCE: CHL5912H *Occupational and Environmental Toxicology*
  - 0.5 FCE in physical agents: CHL5907H *Radiological Health* **or** CHL5914H *Physical Agents I-Noise*
  - 0.5 FCE in research methods: CHL5220H *Introduction to Quantitative Research* **or** CHL5401H *Epidemiologic Methods I*
  - 3.0 FCEs in one of the emphases described below
  - up to 2.5 FCEs in approved courses related to the student's area of study
  - minimum 1.0 FCE in a practicum placement
  - Elective courses
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.
- Full-time students may require longer to complete the program, including time spent in the practicum placement.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F);
12 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Emphases in the MPH Program

Students in the **Occupational and Environmental Health field** of study must complete an emphasis by completing **3.0 full-course equivalents (FCEs)** in the given area. The emphasis requirements will also count toward their 10.0 FCE degree program requirements.

Emphasis: Occupational Hygiene

- 0.5 FCE: CHL5410H *Occupational Epidemiology*
- 0.5 FCE: CHL5902H *Advanced Occupational Hygiene*
- 0.5 FCE: CHL5911H *Occupational and Environmental Hygiene II*
- 0.5 FCE: CHL5915H *Control of Occupational Hazards*
- 0.5 FCE: CHL5917H *Concepts in Safety Management*
- 0.5 FCE: CHL5918H *Biological Hazards in the Workplace and Community*

Emphasis: Environmental Public Health

- 0.5 FCE: CHL5201H *Biostatistics I*
- 0.5 FCE: CHL5413H *Public Health Sanitation*
- 0.5 FCE: CHL5416H *Environmental Epidemiology*
- 0.5 FCE: CHL5903H *Environmental Health*
- 0.5 FCE: CHL5921H *Protecting the Public from Air Pollution*
- 0.5 FCE: CHL5950H *Special Topics in Occupational and Environmental Health* or equivalent

Field: Social and Behavioural Health Sciences

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Dalla Lana School's additional admission requirements stated below.
- Appropriate bachelor's degree from a recognized university with a minimum mid-B average in the final year.
- At least one course in undergraduate statistics.
- Relevant work or volunteer experience.

Program Requirements

- Completion of **10.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE core course: CHL5004H *Introduction to Public Health Sciences*
  - 1.0 FCE: CHL5801H *Health Promotion 1* and CHL5803H *Health Promotion 2*
  - 0.5 FCE: CHL5105H *Social Determinants of Health*
  - 0.5 FCE: CHL5110H *Theory and Practice of Program Evaluation*
  - 0.5 FCE: CHL5300H *Public Health Policy*
  - 1.5 FCEs in research methods: CHL5201H *Biostatistics I*, CHL5401H *Epidemiologic Methods I,* and CHL5811H *Introduction to Qualitative Research* or approved equivalents
  - Minimum 1.0 FCE: practicum placement
  - Elective courses
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.
- Full-time students normally require longer to complete the program, including time spent in the practicum placement.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F);
12 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Public Health Sciences: Public Health Sciences MSc

Master of Science

Program Description

The MSc degree is designed for students interested in research and academic careers involving the development and application of statistical methodology to further our understanding of data arising in the health sciences. The program is offered in the field of Biostatistics, both full-time and part-time.

Field: Biostatistics

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Dalla Lana School's additional admission requirements stated below.
- Appropriate bachelor's degree from a recognized university with a minimum mid-B average in the final year.

Program Requirements

Two options are available:

- Thesis option comprising 4.0 full-course equivalents (FCEs) and a thesis.
- Coursework-only option comprising 5.0 FCEs.

Thesis MSc

- Completion of 4.0 FCEs as follows:
  - CHL5004H, CHL5207Y[0], CHL5209H, CHL5210H, and CHL5250H
  - CHL5226H or STA2112H (*Mathematical Statistics I*)
  - CHL5223H or STA2212H (*Mathematical Statistics II)*
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.
- A thesis written under the supervision of a thesis committee. An oral defence of the thesis is required.

Coursework-Only MSc

- Completion of 5.0 FCEs as follows:
  - CHL5004H, CHL5207Y[0], CHL5209H, CHL5210H, and CHL5250H
  - CHL5226H or STA2112H (*Mathematical Statistics I*)
  - CHL5223H or STA2212H (*Mathematical Statistics II)*
  - 1.0 FCE in electives from an approved list of courses
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
9 sessions part-time

Time Limit

3 years full-time;
6 years part-time

[0] Course that may continue over a program. The course is graded when completed.

Emphasis in the MSc Program

Students in the **Biostatistics (Coursework-Only) field** of study have the option to complete an emphasis by completing appropriate coursework in a given area. The emphasis requirements will also count toward their 5.0 full-course equivalent (FCE) field requirement.

Emphasis: Artificial Intelligence and Data Science

- Students must complete **1.0 FCE** from the following list:
  - CHL5212H *Predictive Modelling in the Health Sciences*
  - CHL5213H *Methods for Analysis of Microbiome Data*
  - CHL5229H *Modern Biostatistics and Statistical Learning*
  - CHL5230H *Applied Machine Learning for Health Data.*
- Students must complete a practical component in the area of Artificial Intelligence and Data Science through CHL5207Y[0] *Laboratory in Statistical Design and Analysis*.

[0] Course that may continue over a program. The course is graded when completed.

Public Health Sciences: Public Health Sciences DrPH

Doctor of Public Health

Program Description

The Doctor of Public Health (DrPH) program advances public health education, addressing evaluation and translation of evidence in policy and practice decision-making contexts. The doctoral professional program is based on existing areas of faculty expertise within the Dalla Lana School of Public Health (including Public Health Sciences and the Institute of Health Policy, Management and Evaluation). Additionally, the program is the first of its kind in English Canada and will further raise the profile of the public health workforce.

The focus of the program is to contribute to emerging needs in public health to address increasingly complex issues. Graduates will develop skills and knowledge in four major competency areas, as defined by the Council on Education for Public Health: (1) Data & Analysis; (2) Leadership, Management, Governance; (3) Policy & Programs; and (4) Education & Workforce Development. The DrPH will allow graduates to take on advanced roles (e.g., leadership, knowledge translation) in public health policy and practice settings.

The program is offered on a full-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Dalla Lana School's additional admission requirements stated below.
- Master's degree in a relevant public health sciences or health services-related discipline such as a Master of Public Health, Master of Science (with a health-related thesis), Master of Health Administration, or Master of Health Science with an average grade equivalent to a B+ or better.
- At least five years of mid-level management experience in a relevant field or organization.
- Candidates with less than five years of relevant experience may also be considered in exceptional circumstances.
- At least two letters of reference.

Program Requirements

- **Coursework.** Completion of **6.5 full-course equivalents (FCEs)** as follows:
  - **Year 1** (3.5 FCEs):
    - 0.5 FCE: CHL4001H *Contemporary Approaches to Population Health and Health Equity*
    - 0.5 FCE: CHL5005H *Public Health Research* (Credit/No Credit)
    - 0.5 FCE: CHL5624H *Historical, Ethical, and Philosophical Foundations of Public Health*
    - 0.5 FCE: one research methods course, for example:
      - HAD5763H *Advanced Methods in Health Services Research* or
      - HAD6501H *Introduction to Methods for Health Professions Education Research*
    - 0.5 FCE: CHL4002H *Critical Appraisal and Use of Evidence*
    - 0.5 FCE: CHL4003H[0] *Leading High-Performing Health Systems*
    - 0.5 FCE: CHL4004H *Global Health Policy*
    - Applied Research Project
  - **Year 2** (2.5 FCEs):
    - 0.5 FCE: CHL4005H *Governance and Financial Leadership*
    - 0.5 FCE: CHL5132H *Population Health Intervention Research (PHIR)*
    - 0.5 FCE: HAD5778H *Comparative Health Systems and Policy*
    - 1.0 FCE: two elective courses
    - Written comprehensive examination in public health sciences
  - **Years 3 and 4** (0.5 FCE):
    - 0.5 FCE: HAD5765H *Case Studies in Health Policy*

- Writing of a **doctoral thesis** under the supervision of an approved thesis committee (supervisor with an appointment in Public Health Sciences plus two additional faculty members)
- A **final oral defence** of the thesis before an examination committee approved by the School of Graduate Studies
- Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.

Program Length

4 years

Time Limit

6 years

[0] Course that may continue over a program. The course is graded when completed.

Public Health Sciences: Public Health Sciences PhD

Doctor of Philosophy

Program Description

The PhD program prepares students for research and academic careers. Fieldwork and research enhance theoretical studies and expose students to the full breadth and depth of their public health science disciplines. Applicants apply and may be admitted to one of the following fields:

- Biostatistics
- Epidemiology
- Occupational and Environmental Health
- Social and Behavioural Health Sciences

The PhD program may be completed on a full-time or flexible-time basis.

With the approval of the graduate chair, some applicants may be admitted to a flexible-time PhD program. This program will benefit mature students with career obligations, and applicants must demonstrate that they are practising professionals. Degree requirements for the flexible-time program are identical to those for the full-time PhD program. Students are required to register full-time for the first four years of their program, after which they may register part-time. A plan of study and research activities will be negotiated at initial registration, to be reviewed and updated annually.

Field: Biostatistics

PhD Program (Full-Time and Flexible-Time)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Dalla Lana School's additional admission requirements stated below.
- Master's degree in a public health science-related discipline from a recognized university, with a minimum A– standing.
- Demonstrated educational and/or professional experience that indicates a capacity to undertake research-oriented doctoral studies.

Program Requirements

- **Coursework.** Completion of **5.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE: CHL5005H *Public Health Research*
  - 1.0 FCE: CHL5208Y *Advanced Laboratory in Statistical Design and Analysis*
  - 0.5 FCE: CHL5209H *Survival Analysis I*
  - 0.5 FCE: CHL5210H *Categorical Data Analysis*
  - 0.5 FCE: CHL5250H[+] *Special Topics in Biostatistics* (seminar)
  - 0.5 FCE: CHL5260H[o] *Doctoral Seminar Series in Biostatistics*
  - 1.0 FCE: STA2112H and STA2212H *Mathematical Statistics*
  - 0.5 FCE: elective course that relates to the student's area of study
  - Students who have taken their MSc in the department may have taken some or all of these courses already. In this case, their program of study will be designed with consultation of the program director at the time of admission.
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.
- Demonstrated proficiency in **statistics or research methods**.
- A written **qualifying examination** in biostatistics.
- A departmental defence of the **dissertation proposal**.
- Writing of a **PhD dissertation** under the supervision of an approved dissertation committee (supervisor plus two additional faculty members).
- A **departmental defence** of the dissertation prior to the SGS Final Oral Examination.
- A **final oral defence** of the dissertation before an examination committee approved by the School of Graduate Studies.

Program Length

4 years full-time; 6 years flexible-time

Time Limit

6 years full-time; 8 years flexible-time

Field: Epidemiology

PhD Program (Full-Time and Flexible-Time)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Dalla Lana School's additional admission requirements stated below.
- Master's degree in a public health science-related discipline from a recognized university, with a minimum A– standing.
- Demonstrated educational and/or professional experience that indicates a capacity to undertake research-oriented doctoral studies.

Program Requirements

- **Coursework.** Completion of **4.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE: CHL5005H *Public Health Research*
  - 1.0 FCE: CHL5404H and CHL5408H *Research Methods*
  - 1.0 FCE: CHL5406H and CHL5424H *Quantitative Methods*
  - 0.5 FCE: CHL5423H^{0} *Doctoral Seminar in Epidemiology*
  - 0.5 FCE: CHL5428H *Epidemiological Methods for Causal Mediation Analyses*
  - 0.5 FCE: elective courses that relate to the student's area of study
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.
- Demonstrated proficiency in **statistics or research methods**.
- A written **qualifying examination** in epidemiology.
- A departmental defence of the **dissertation proposal**.
- Writing of a **PhD dissertation** under the supervision of an approved dissertation committee (supervisor plus two additional faculty members).
- A **departmental defence** of the dissertation prior to the SGS Final Oral Examination.
- A **final oral defence** of the dissertation before an examination committee approved by the School of Graduate Studies.

Program Length

4 years full-time; 6 years flexible-time

Time Limit

6 years full-time; 8 years flexible-time

Emphasis in the PhD Program

Students in the **Epidemiology field** of study have the option to complete an emphasis by completing appropriate coursework in a given area. The emphasis requirements will also count toward, but may exceed, the 4.0 full-course equivalent (FCE) field requirement.

Emphasis: Artificial Intelligence and Data Science

- Students must complete **1.5 FCEs** from the following list:
  - CHL5212H *Predictive Modelling in the Health Sciences*
  - CHL5213H *Methods for Analysis of Microbiome Data*
  - CHL5229H *Modern Biostatistics and Statistical Learning*
  - CHL5230H *Applied Machine Learning for Health Data*
  - CHL5429H *Advanced Analytic Methods for Bias in Epidemiologic Studies*
  - CHL3020H *Ethics and Artificial Intelligence for Health*
  - HAD5306H *Introduction to Health Services Research and the Use of Health Administrative Data*
  - MHI2012H *Introduction to Big Data for Health: Foundations and Methodologies*
  - Other course(s) approved by the Program Director.

Field: Occupational and Environmental Health

PhD Program (Full-Time and Flexible-Time)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Dalla Lana School's additional admission requirements stated below.
- Master's degree in a public health science-related discipline from a recognized university, with a minimum A– standing.
- Demonstrated educational and/or professional experience that indicates a capacity to undertake research-oriented doctoral studies.

Program Requirements

- **Coursework.** Completion of **3.5 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE: CHL5005H *Public Health Research*
  - 0.5 FCE in either occupational or environmental health
  - 1.0 FCE in advanced research methods (including biostatistics)
  - 0.5 FCE: doctoral seminar in occupational and environmental health
  - 1.0 FCE: elective courses that relate to the student's area of study
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.
- Demonstrated proficiency in **statistics or research methods**.
- A written **qualifying examination** in occupational and environmental health.

- A departmental defence of the **dissertation proposal**.
- Writing of a **PhD dissertation** under the supervision of an approved dissertation committee (supervisor plus two additional faculty members).
- A **departmental defence** of the dissertation prior to the SGS Final Oral Examination.
- A **final oral defence** of the dissertation before an examination committee approved by the School of Graduate Studies.

Program Length

4 years full-time; 6 years flexible-time

Time Limit

6 years full-time; 8 years flexible-time

Field: Social and Behavioural Health Sciences

PhD Program (Full-Time and Flexible-Time)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Dalla Lana School's additional admission requirements stated below.
- Master's degree in a public health science-related discipline from a recognized university, with a minimum A– standing.
- Demonstrated educational and/or professional experience that indicates a capacity to undertake research-oriented doctoral studies.

Program Requirements

- **Coursework.** Completion of **3.5 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE: CHL5005H *Public Health Research*
  - 0.5 FCE: CHL5101H *Social and Behavioural Theory and Health*
  - 0.5 FCE: CHL5102H *Social and Political Forces in Health*
  - 1.0 FCE in approved research methods courses
  - 1.0 FCE: elective courses that relate to the student's area of study
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.
- Demonstrated proficiency in **statistics or research methods**.
- A written **qualifying examination** in social and behavioural health sciences.
- A departmental defence of the **dissertation proposal**.
- Writing of a **PhD dissertation** under the supervision of an approved dissertation committee (supervisor plus two additional faculty members).
- A **departmental defence** of the dissertation prior to the SGS Final Oral Examination.
- A **final oral defence** of the dissertation before an examination committee approved by the School of Graduate Studies.

Program Length

4 years full-time; 6 years flexible-time

Time Limit

6 years full-time; 8 years flexible-time

[+] Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.
[0] Course that may continue over a program. The course is graded when completed.

Public Health Sciences: Bioethics MHSc

Master of Health Science

Program Description

The MHSc in Bioethics is a two-year, course-based program with no thesis requirement. It is conducted in modular format to allow high-achieving professionals to earn a master's degree without interrupting their careers. The program's interactive, problem-based learning approach provides students with knowledge and skills that can be applied to a variety of health, health care, and health research contexts. Expert faculty and guest lecturers help students bring theory and practice together to address real-world ethical challenges. Students interested in a research-stream program should consider the Collaborative Specialization in Bioethics.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Dalla Lana School's additional admission requirements stated below.
- Normally, an appropriate bachelor's degree and a recognized degree in one of the health sciences (e.g., MD, BScN, BScOT, BScPT, BSW) or equivalent with a minimum mid-B average in the final year. Applicants from other disciplines are considered on an individual basis.
- The program favours individuals with outstanding academic credentials and demonstrated evidence of scholarly ability and personal maturity.
- Potential that the applicant will provide significant bioethics leadership in his or her home institution or local community upon completion of the MHSc in Bioethics.

Program Requirements

- This course-based program is offered in modular format in 24 two-day Thursday/Friday blocks from September to April, normally over two years; certain international students may complete all coursework in one academic year. The program does not include a distance-learning option.
- A major **paper** of publishable quality on a topic of the student's choice.
- Students must complete **8.5 full-course equivalents (FCEs)**, including a 1.0 FCE practicum as outlined below.
- Courses as outlined below.

Program Length

5 sessions full-time (typical registration sequence: F/W/S/F/W)

Time Limit

3 years full-time

Required Courses

Courses are restricted to students officially enrolled in the MHSc in Bioethics and the Collaborative Specialization in Bioethics, except where noted.

Year 1

- CHL3001Y *Core Topics in Bioethics*
- CHL3003Y *Empirical Approaches in Bioethics*
- CHL3005H *Legal Approaches to Bioethics*
- HAD5771H *Resource Allocation Ethics*
- PHL2146Y *Topics in Bioethics*

Year 2

- CHL3002Y *Teaching Bioethics*
- CHL3004Y *Ethics and Health Institutions*
- CHL3006H *Writing in Bioethics*
- CHL3008Y[0] *Applied Learning in Bioethics* (practicum)
- CHL3051H *Research Ethics*
- CHL3052H[0] *Practical Bioethics* (capstone course)

[0] Course that may continue over a program. The course is graded when completed.

Public Health Sciences: Community Health MScCH

Master of Science in Community Health

Program Description

The MScCH is an innovative program designed to meet the needs of experienced health professionals who wish to enhance their knowledge and skills in public health. It is intended for practising health professionals and/or individuals who can demonstrate significant experience in the health-care field. Five fields are offered:

- Addictions and Mental Health
- Family and Community Medicine
- Health Practitioner Teacher Education
- Occupational Health Care
- Wound Prevention and Care

The program may be taken on a full-time or part-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Dalla Lana School's additional admission requirements stated below.
- A bachelor's degree from a recognized university in a public health specialty and/or one of the regulated health professions in Ontario with the equivalent of a minimum mid-B average in the final academic year.
- Relevant academic preparation and professional experience as a public health, community, or clinical practitioner.
- Some fields (i.e., Family and Community Medicine, Occupational Health Care, and Wound Prevention and Care) require appropriate certification/licensure in a regulated health profession and may require a valid license to practise in Canada or the student's home jurisdiction.

Program Requirements

- The MScCH is a **coursework**-only program which requires the completion of **5.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE of a core public health sciences subject
  - 0.5 to 1.0 FCE in supervised field placements or practica
  - Normally 2.5 FCEs in field-specific required courses
  - 1.0 to 1.5 FCEs in elective courses
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.
- A diploma in Community Health may be awarded in exceptional circumstances to students who have completed 70% of the program requirements (at least 3.5 full-course equivalents (FCEs), including the required courses for the field, and with the approval of the department.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
9 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Public Health Sciences: Public Health Sciences MPH, MSc, DrPh, PhD, Community Health MScCH Courses

Core Courses

CHL5004H	Introduction to Public Health Sciences
CHL5005H	Public Health Research (Credit/No Credit)

Students in the Master of Public Health, Master of Science, Master of Science in Community Health, Doctor of Philosophy, and Doctor of Public Health may elect to be assessed on a Credit/No Credit basis in courses marked by the symbol ⌘ up to a total of 0.5 FCE.

Biostatistics

CHL5201H⌘	Biostatistics I
CHL5202H⌘	Biostatistics II
CHL5203H⌘	Survey Design and Social Research Methods in Public Health
CHL5207Y[0]	Laboratory in Statistical Design and Analysis
CHL5208Y	Advanced Laboratory in Statistical Design and Analysis
CHL5209H⌘	Survival Analysis I
CHL5210H⌘	Categorical Data Analysis
CHL5212H⌘	Predictive Modelling in the Health Sciences
CHL5213H⌘	Methods for Analysis of Microbiome Data
CHL5220H⌘	Introduction to Quantitative Research
CHL5221H⌘	Introduction to Qualitative Research
CHL5222H⌘	Analysis of Correlated Data
CHL5223H⌘	Applied Bayesian Methods
CHL5224H⌘	Modern Statistical Genetics
CHL5225H⌘	Advanced Statistical Methods for Clinical Trials
CHL5226H⌘	Mathematical Foundations of Biostatistics
CHL5227H⌘	Introduction to Statistical Methods for Clinical Trials
CHL5228H	Statistical Methods for Genetics and Genomics Research Seminar (Credit/No Credit)
CHL5229H⌘	Modern Biostatistics and Statistical Learning (prerequisite: CHL5226H)
CHL5230H⌘	Applied Machine Learning for Health Data
CHL5250H[+,⌘]	Special Topics in Biostatistics
CHL5260H[0,⌘]	Doctoral Seminar Series in Biostatistics

[+] Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.

[0] Course that may continue over a program. The course is graded when completed.

Clinical Public Health

CHL5630Y	Wound Prevention and Care
CHL5631H⌘	Integrating Public Health and Clinical Care: The Case of TB
CHL5632H⌘	Application of Implementation Science in Global Health (prerequisite: one or more qualitative or quantitative research methods course, or one program evaluation course)
CHL5633H⌘	Planetary and Global Health Ethics

Epidemiology

CHL5401H⌘	Epidemiologic Methods I
CHL5402H	Epidemiologic Methods II
CHL5403H⌘	Epidemiology of Non-Communicable Diseases
CHL5404H⌘	Research Methods I
CHL5405H⌘	Health Trends and Surveillance
CHL5406H	Quantitative Methods for Biomedical Research
CHL5407H⌘	Categorical Data Analysis for Epidemiologic Studies
CHL5408H⌘	Research Methods II
CHL5409H⌘	Cancer Epidemiology
CHL5410H⌘	Occupational Epidemiology

CHL5412H⌘	Communicable Disease Epidemiology, Prevention, and Control
CHL5413H⌘	Public Health Sanitation
CHL5416H⌘	Environmental Epidemiology
CHL5417H⌘	Tobacco and Health: From Cells to Society
CHL5418H⌘	Scientific Overview in Epidemiology
CHL5419H⌘	Social Epidemiology
CHL5420H⌘	Global Health Research
CHL5423H[0]	Doctoral Seminar in Epidemiology
CHL5424H⌘	Advanced Quantitative Methods in Epidemiology
CHL5425H⌘	Mathematical Epidemiology of Communicable Diseases: An Introduction
CHL5426H⌘	Population Perspectives for Epidemiology
CHL5428H⌘	Epidemiological Methods for Causal Mediation Analyses
CHL5429H⌘	Advanced Analytic Methods for Bias in Epidemiologic Studies (prerequisites: at least two graduate-level epidemiology courses and at least two graduate-level biostatistics courses; or by permission of the instructor)
CHL5430H⌘	Fundamentals of Genetic Epidemiology
CHL5431H⌘	Spatial Epidemiology: Introductory Methods and Applications
CHL5432H⌘	Epidemiological Methods for Communicable Diseases (prerequisites: CHL5201H, CHL5401H, and CHL5412H; or equivalent)
JRH1000H	Introduction to Pharmacoepidemiology

[0] Course that may continue over a program. The course is graded when completed.

Family and Community Medicine

CHL5601H⌘	Appraising and Applying Evidence to Assist Clinical Decision-Making
CHL5603Y	Social, Political, and Scientific Issues in Family Medicine
CHL5605H⌘	Research Issues in Family Medicine/Primary Care
CHL5606H	Research in Family Medicine/Primary Care Methodological Applications
CHL5607H⌘	Teaching and Learning by the Health Professions: Principles and Theories
CHL5608H⌘	Teaching and Learning by the Health Professions: Practical Issues and Approaches
CHL5609H⌘	Continuing Education in the Health Professions
CHL5610H⌘	Theory and Practice of Behaviour Change in Health Professional Settings
CHL5611H⌘	Continuing Education Planning, Management and Evaluation in the Health Professions
CHL5612H⌘	The Theory and Application of Interprofessional Education for Collaborative Patient-Centred Practice
CHL5613H⌘	Leading Improvement in the Quality of Health Care for Community Populations
CHL5614H⌘	Curriculum Foundations in Health Practitioner Field-Based Education
CHL5615H⌘	Assessment and Evaluation Issues in Health Practitioner Field-Based Education
CHL5616H⌘	Applied Survey Methods for Health Care Professionals
CHL5617H⌘	Educational Technology for Health Practitioner Education
CHL5618H⌘	Family Medicine and Interprofessional Primary Care in the Global Health Context
CHL5619H⌘	Faculty Development in the Health Professions (prerequisites: CHL5607H and CHL5608H)
CHL5622H⌘	Patient-Related Health Care and Public Policy in Canada
CHL5623H⌘	Practical Management Concepts and Cases in Leading Small Health Organizations
CHL5624H⌘	Historical, Ethical, and Philosophical Foundations of Public Health

[0] Course that may continue over a program. The course is graded when completed.

Global Health

CHL5700H⌘	Global Health
CHL5701H	Doctoral Seminar, Collaborative Specialization in Global Health (Credit/No Credit)
CHL5702H⌘	History of International Health
CHL5704H⌘	International Human Rights Law and Global Health: The Right to Health in Theory and Practice
CHL5706H⌘	Women and Women's Health in Countries in Conflict
CHL5707H⌘	Health: An Engine for the Journey to Peace

Health Promotion

CHL5801H⌘	Health Promotion 1
CHL5803H⌘	Health Promotion 2
CHL5804H⌘	Theories for Health Promotion and Public Health Intervention
CHL5805H⌘	Critical Issues in Health Promotion Practice
CHL5806H+,⌘	Health Promotion Field Research
CHL5807H⌘	Health Communications
CHL5808H⌘	Health-in-All-Policies: Approaches to Achieve a Healthier City
CHL5809H⌘	Ecological Public Health
CHL5810H⌘	Race, Ethnicity, and Culture in Health (REACH)
CHL5811H⌘	Introduction to Qualitative Research

+ Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.

Indigenous Health

CHL5520H⌘	Indigenous Health
CHL5521H⌘	Indigenous Practicum Preparation
CHL5522H⌘	Indigenous Food Systems, Environment, and Health
CHL5523H⌘	Indigenous Health and Social Policy
CHL5524H⌘	Indigenous Health Theory and Methods

Nutrition and Dietetics

CHL5650H⌘	Foundations of Practice I
CHL5651H⌘	Foundations of Practice II
CHL5652H⌘	Foundations of Practice III
CHL5653H⌘	Community Nutrition
CHL5654H⌘	Nutrition Programs and Strategies
CHL5655H⌘	Nutrition Metabolism for Public Health Nutrition Professionals
CHL5656Y	Nutrition and Dietetics Culminating Project (prerequisites: CHL5650H, CHL5651H, and CHL5652H)
NFS1201H	Public Health Nutrition
NFS1484H	Advanced Nutrition

Occupational and Environmental Health

CHL5902H⌘	Advanced Occupational Hygiene
CHL5903H⌘	Environmental Health
CHL5904H⌘	Perspectives in Occupational and Environmental Health — Legal and Social Context
CHL5905H⌘	Clinical Studies in Occupational Health
CHL5907H⌘	Radiological Health
CHL5910H⌘	Occupational and Environmental Hygiene I
CHL5911H⌘	Occupational and Environmental Hygiene II
CHL5912H⌘	Occupational and Environmental Toxicology
CHL5914H⌘	Physical Agents I — Noise
CHL5915H⌘	Control of Occupational Hazards
CHL5917H⌘	Concepts in Safety Management
CHL5918H⌘	Biological Hazards in the Workplace and Community
CHL5919H⌘	Public Health Mycology
CHL5920H0,⌘	Occupational and Environmental Health Doctoral Seminar Series
CHL5921H⌘	Protecting the Public from Air Pollution
CHL5950H⌘	Special Topics in Occupational and Environmental Health

0 Course that may continue over a program. The course is graded when completed.

Public Health Policy

CHL5300H⌘	Public Health Policy
CHL5308H⌘	Tools and Approaches for Public Health Policy Analysis and Evaluation
CHL5309H⌘	Advanced Analysis of Topical Issues in Public Health Policy

Public Health Sciences

JRH5124H⌘	Public Health Ethics

Social and Behavioural Health Sciences

CHL5101H⌘	Social and Behavioural Theory and Health
CHL5102H⌘	Social and Political Forces in Health
CHL5105H⌘	Social Determinants of Health

CHL5109H⌘	Gender and Health
CHL5110H⌘	Theory and Practice of Program Evaluation
CHL5113H⌘	Global Migration and Health
CHL5115H⌘	Qualitative Analysis and Interpretation
CHL5117H⌘	Women, Children, and Adolescent Health: A Glocal Perspective
CHL5118H⌘	International Health, Human Rights, and Peace-Building
CHL5120H⌘	Population Health Perspectives on Mental Health and Addictions
CHL5121H⌘	Genomics, Bioethics, and Public Policy
CHL5122H⌘	Advanced Qualitative Research: Framing, Writing, Beyond (Credit/No Credit)
CHL5126H⌘	Building Community Resilience
CHL5128H⌘	Intersectionality, Inequity, and Public Health
CHL5129H⌘	Introduction to Mixed Methods Research for Public Health
CHL5130H⌘	Advanced Methods in Applied Indigenous Health Research
CHL5131H⌘	Theoretical Foundations of Qualitative Health Research
CHL5132H⌘	Population Health Intervention Research (PHIR)
CHL5133H⌘	Evaluating Quantitative Public Health Research
CHL5134H⌘	Institutional Ethnography
CHL5150H⌘	Data Collection Methods for Research and Evaluation Projects
JRP1000H⌘	Theory and Method for Qualitative Researchers: An Introduction

Practica Courses

CHL5620Y[0]	Practicum in Family Community Medicine (Credit/No Credit)
CHL5621H[+]	Extension to Practicum in Family Community Medicine (Credit/No Credit)
CHL5690H[0]	MScCH Required Practicum (Credit/No Credit)
CHL5691H[0]	MScCH Optional Practicum (Credit/No Credit)
CHL6010Y[+]	Required MPH Practicum (Credit/No Credit)
CHL6011H[+]	Required Practicum Extension (Credit/No Credit)
CHL6012Y[+]	Long Extension to Required Practicum (Credit/No Credit)
CHL6013H[0]	Required MPH Advanced Standing Practicum (Credit/No Credit)
CHL6020Y[+]	Optional MPH Practicum (Credit/No Credit)
CHL6021H[+]	Optional Practicum Extension (Credit/No Credit)
CHL6022Y[+]	Long Extension to Optional Practicum (Credit/No Credit)

[0] Course that may continue over a program. The course is graded when completed, or credit is given when the course is completed.

[+] Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.

Reading Courses and Research Projects

CHL7001H	Directed Reading
CHL7002H	Directed Research

Special Topics Courses

CHL8001H	Selected Topics in Public Health Issues
CHL8002H	Selected Topics in Public Health: Methods and Approaches to Research and Practice

Doctor of Public Health Courses

CHL4001H⌘	Contemporary Approaches to Population Health and Health Equity
CHL4002H⌘	Critical Appraisal and Use of Evidence
CHL4003H[0,⌘]	Leading High Performing Health Systems
CHL4004H⌘	Global Health Policy
CHL4005H⌘	Governance and Financial Leadership
CHL5005H	Public Health Research (Credit/No Credit)
CHL5132H	Population Health Intervention Research (PHIR)
CHL5624H	Historical, Ethical, and Philosophical Foundations of Public Health
HAD5763H	Advanced Methods in Health Services Research
HAD5765H	Case Studies in Health Policy
HAD5778H	Comparative Health Systems and Policy
HAD6501H	Introduction to Methods/Methodologies for HPER

[0] Course that may continue over a program. The course is graded when completed.

Collaborative Specialization Courses

Addiction Studies

PAS3700H⌘	Multidisciplinary Aspects of Addictions
PAS3701H⌘	Advanced Research Issues in Addictions

Bioethics

CHL3020H⌘	Ethics and Artificial Intelligence for Health

Community Development

UCS1000H⌘	Community Development

Degree Programs

Rehabilitation Science

MSc and PhD

- Fields:
  - Movement Science;
  - Occupational Science;
  - Practice Science (admissions have been administratively suspended);
  - Rehabilitation Health Services Studies;
  - Rehabilitation Technology Sciences;
  - Social and Cognitive Rehabilitation Sciences

Speech-Language Pathology

MSc and PhD

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Aging, Palliative and Supportive Care Across the Life Course
  - Rehabilitation Science, MSc, PhD
  - Speech-Language Pathology, MSc, PhD
- Bioethics
  - Rehabilitation Science, MSc, PhD
- Biomedical Engineering
  - Rehabilitation Science, MSc, PhD
- Cardiovascular Sciences
  - Rehabilitation Science, MSc, PhD
- Global Health (U of T Global Scholar)
  - Rehabilitation Science, MSc, PhD
- Health Services and Policy Research
  - Rehabilitation Science, MSc
- Musculoskeletal Sciences
  - Rehabilitation Science, MSc, PhD
- Neuroscience
  - Rehabilitation Science, MSc, PhD
  - Speech-Language Pathology, MSc, PhD
- Resuscitation Sciences (admissions have been administratively suspended)
  - Rehabilitation Science, MSc, PhD
- Women's Health
  - Rehabilitation Science, MSc, PhD
- Workplace Learning and Social Change
  - Rehabilitation Science, MSc, PhD

Overview

Rehabilitation sciences is a multidisciplinary, integrated science dedicated to the study of human function and participation and its relationship to health and well-being. Using basic and applied methods, the science is focused on phenomena at the level of the cell, person, family, community, or society to develop and evaluate theories, models, processes, measures, interventions, and policies to prevent, reverse, or minimize impairments, enable activity, and facilitate participation.

The academic activities of students in the Rehabilitation Sciences Institute (RSI) cover the full breadth of rehabilitation sciences with over 100 RSI faculty who are distributed throughout the University of Toronto, including teaching hospitals and research institutes.

There are five areas of research in the Rehabilitation Sciences program:

- Movement science
- Occupational science
- Rehabilitation health services studies
- Rehabilitation technology sciences
- Social and cognitive rehabilitation sciences.

There are four areas of research in the Speech-Language Pathology program:

- Alternative and augmentative communication sciences
- Hearing and aural rehabilitation sciences
- Language, voice, and speech sciences
- Swallowing sciences.

Rehabilitation Sciences: Rehabilitation Science MSc

Master of Science

Program Description

The MSc program is designed for graduate students who ultimately want careers as independent scientists in health-related disciplines. It can also serve as a stepping stone on the pathway to advanced research training for students planning to pursue a PhD in Rehabilitation Science or related fields.

The program is offered in the following fields: 1) Movement Science; 2) Occupational Science; 3) Practice Science; 4) Rehabilitation Health Services Studies; 5) Rehabilitation Technology Sciences; 6) Social and Cognitive Rehabilitation Sciences.

Fields:
Movement Science;
Occupational Science;
Rehabilitation Health Services Studies;
Rehabilitation Technology Sciences;
Social and Cognitive Rehabilitation Sciences

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Rehabilitation Sciences Institute's additional admission requirements stated below.
- Applicants must have graduated with a minimum B+ average in senior-level courses in the final two years of a four-year degree program from a recognized university, with a strong undergraduate science background including a course in research design and/or statistics. The four-year degree may be in Occupational Therapy, Physical Therapy, Speech-Language Pathology, or a related discipline. Related disciplines include basic sciences, engineering, kinesiology, nursing, psychology, social work, sociology, and physical and health education.
- Applicants must identify a faculty member who has agreed to serve as research supervisor. The research supervisor is expected to examine a completed thesis and/or manuscripts and university transcripts.
- Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction and examination was not English, must demonstrate proficiency in the English language through the successful completion of one of the following tests:
  - **Test of English as a Foreign Language (TOEFL) and the Test of Written English (TWE)** with the following minimum scores:
    - paper-based TOEFL: 600 and 5 on the TWE
    - Internet-based TOEFL (IBT): 100/120 and 22/30 on the writing and speaking sections.
  - **International English Language Testing System (IELTS):** minimum score of 7.5.
  - **Certificate of Proficiency in English (COPE):** see General Regulations, 4.3 English-Language Proficiency.
  - **U of T School of Continuing Studies academic preparation:** see General Regulations, 4.3 English-Language Proficiency.

Program Requirements

- **Coursework.** Students must complete **2.5 full-course equivalents (FCEs)** as follows:
  - REH1100H *Theory and Research in Rehabilitation Science* (0.5 FCE).
  - REH2001Y[0] *Rehabilitation Presentations and Proceedings* (1.0 FCE; Credit/No Credit). Students are expected to attend for one year.
  - 0.5 graduate FCE in research methods.
  - 0.5 graduate FCE in an area related to the student's thesis.
  - Students may be required to take extra courses in addition to the degree requirements listed above.
- Submission of a **thesis** and completion of an **oral examination** of the thesis.
- Minimum of 12 months of full-time study. Students should be aware that the completion of the thesis may take longer.
- Exceptional students may be considered for enrolment in a part-time option. Requirements are the same as for the full-time MSc option with the following exceptions:
  - Residency requirements (full-time, on-campus attendance) are waived.
  - Coursework must be completed within two years of initial registration.
  - Program must be completed within five years of registration.
  - Completion of an annual learning contract and program map planned with the supervisor.
  - Part-time students should be aware that it is the student's responsibility to modify his or her work schedule to accommodate required coursework since course times are not flexible.
- Reclassification (transfer). MSc students who demonstrate outstanding potential for advanced research in the discipline may be recommended by their supervisory committee for a reclassification examination which, when passed, allows them to transfer into the PhD program. The examination is normally undertaken following the completion of at least one session and within 18 months of registration in the MSc program.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S);
15 sessions part-time

Time Limit

3 years full-time;
6 years part-time

[0] Course that may continue over a program. Credit is given when the course is completed.

Field: Practice Science

Effective January 2021, admissions to the field in Practice Science have been administratively suspended.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Rehabilitation Sciences Institute's additional admission requirements stated below.
- Applicants must have graduated with a minimum B+ average in senior-level courses in the final two years of a four-year degree program from a recognized university, with a strong undergraduate science background including a course in research design and/or statistics. The four-year degree may be in Occupational Therapy, Physical Therapy, Speech-Language Pathology, or a related discipline. Related disciplines include basic sciences, engineering,

kinesiology, nursing, psychology, social work, sociology, and physical and health education.
- Applicants must identify a faculty member who has agreed to serve as research supervisor. The research supervisor is expected to examine a completed thesis and/or manuscripts and university transcripts.
- Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction and examination was not English, must demonstrate proficiency in the English language through the successful completion of one of the following tests:
  - **Test of English as a Foreign Language (TOEFL) and the Test of Written English (TWE)** with the following minimum scores:
    - paper-based TOEFL: 600 and 5 on the TWE
    - Internet-based TOEFL (IBT): 100/120 and 22/30 on the writing and speaking sections.
  - **International English Language Testing System (IELTS):** minimum score of 7.5.
  - **Certificate of Proficiency in English (COPE):** see General Regulations, 4.3 English-Language Proficiency.
  - **U of T School of Continuing Studies academic preparation:** see General Regulations, 4.3 English-Language Proficiency.

Program Requirements

- **Coursework.** Students must complete **3.5 full-course equivalents (FCEs)** as follows:
  - REH1100H *Theory and Research in Rehabilitation Science* (0.5 FCE).
  - REH2001Y[0] *Rehabilitation Presentations and Proceedings* (1.0 FCE; Credit/No Credit). Students are expected to attend for one year.
  - 0.5 graduate FCE in research methods.
  - REH3301H *Knowledge Translation in Rehabilitation: Foundational Knowledge and Innovative Applications* (0.5 FCE).
  - REH3302H *Determinants of Rehabilitation Practice* (0.5 FCE).
  - REH3303H *Rehabilitation Clinical Practicum* (0.5 FCE).
  - Students may be required to take extra courses in addition to the degree requirements listed above.
- Submission of a **thesis** and completion of an **oral examination** of the thesis.
- Minimum of 12 months of full-time study. Students should be aware that the completion of the thesis may take longer.
- The part-time option is not available in the Practice Science field.
- Reclassification (transfer). MSc students who demonstrate outstanding potential for advanced research in the discipline may be recommended by their supervisory committee for a reclassification examination which, when passed, allows them to transfer into the PhD program. The examination is normally undertaken following the completion of at least one session and within 18 months of registration in the MSc program.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

[0] Course that may continue over a program. Credit is given when the course is completed.

Rehabilitation Sciences: Rehabilitation Science PhD; Fields: 1) Movement Science; 2) Occupational Science; 3) Rehabilitation Health Services Studies; 4) Rehabilitation Technology Sciences; 5) Social and Cognitive Rehabilitation Sciences

Doctor of Philosophy

Program Description

The PhD program will prepare candidates for a career in scientific research; i.e., graduates will feed the demand for rehabilitation scientists and academic faculty in Canada and the global market. Graduates will be expected to acquire autonomy in conducting research and developing an independent research program. The program is designed to provide a broad knowledge of rehabilitation science research as well as advanced research skills and methodologies including acquisition of funding, formulation of research questions, discovery of new knowledge, data collection, analysis and interpretation, scholarly presentation, and publication and translation of knowledge for consumption by appropriate stakeholders.

The program is offered in the following fields: 1) Movement Science; 2) Occupational Science; 3) Practice Science; 4) Rehabilitation Health Services Studies; 5) Rehabilitation Technology Sciences; 6) Social and Cognitive Rehabilitation Sciences.

Applicants may enter the PhD program via one of two routes: 1) following completion of an appropriate master's degree or 2) direct entry following completion of a BSc degree.

Fields:
1) Movement Science;
2) Occupational Science;
3) Rehabilitation Health Services Studies;
4) Rehabilitation Technology Sciences;
5) Social and Cognitive Rehabilitation Sciences

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Rehabilitation Sciences Institute's additional admission requirements stated below.
- Applicants must have graduated with a minimum A– from a relevant thesis-based master's program, such as Occupational Therapy, Physical Therapy, Rehabilitation Sciences, and Speech-Language Pathology.
- Applicants must submit the following along with their application: a letter of intent, two confidential reference letters that indicate the applicant's preparation and competence to conduct research, and curriculum vitae.
- Applicants may be counselled prior to admission and provided with materials regarding potential PhD supervisors. Applicants must identify a faculty member who has agreed to serve as research supervisor. The research supervisor is expected to examine a completed thesis and/or manuscripts and university transcripts.
- Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction and examination was not English, must demonstrate proficiency in the English language through the successful completion of one of the following tests:
  - **Test of English as a Foreign Language (TOEFL) and the Test of Written English (TWE)** with the following minimum scores:
    - paper-based TOEFL: 600 and 5 on the TWE
    - Internet-based TOEFL (IBT): 100/120 and 22/30 on the writing and speaking sections.
  - **International English Language Testing System (IELTS):** minimum score of 7.5.
  - **Certificate of Proficiency in English (COPE):** see General Regulations, 4.3 English-Language Proficiency.
  - **U of T School of Continuing Studies academic preparation:** see General Regulations, 4.3 English-Language Proficiency.

Program Requirements

- **Coursework.** A minimum of **2.0 full-course equivalents (FCEs)** as follows:
  - REH3100H *Advanced Rehabilitation Research Issues* or equivalent (0.5 FCE) if an equivalent was not taken at the master's level.
  - REH3001Y[0] *Advanced Rehabilitation Presentation and Proceedings* (1.0 FCE; Credit/No Credit). Attendance is expected during the first two years of the program. Students remain enrolled and are encouraged to attend until completion of the degree.
  - An advanced research methods course (0.5 FCE).
  - Students may be required to take extra courses in addition to the degree requirements listed above.
- A **comprehensive examination**, with written and oral components, to be taken in the first 18 months of the program.
- Completion and defence of a **thesis**.
- Students are encouraged to participate in student and faculty **research seminars** in addition to their regular course requirements.
- **Residence.** Students are expected to be on campus and participating full-time until all program requirements are completed.

Program Length

4 years

Time Limit

6 years

[0] Course that may continue over a program. Credit is given when the course is completed.

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Rehabilitation Sciences Institute's additional admission requirements stated below.
- Well-qualified students with excellent research potential holding a BSc degree may be considered for direct admission to the PhD program. These applicants must:
  - Have a minimum A+/A average (GPA 4.0) in an undergraduate program from a recognized university;
  - Have previous relevant research experience, outstanding references, and a personal recommendation from a potential supervisor.
- Applicants must submit the following along with their application: a letter of intent, two confidential reference letters that indicate the applicant's preparation and competence to conduct research, and curriculum vitae.
- Applicants may be counselled prior to admission and provided with materials regarding potential PhD supervisors. Applicants must identify a faculty member who has agreed to serve as research supervisor. The research supervisor is expected to examine a completed thesis and/or manuscripts and university transcripts.
- Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction and examination was not English, must demonstrate proficiency in the English language through the successful completion of one of the following tests:
  - **Test of English as a Foreign Language (TOEFL) and the Test of Written English (TWE)** with the following minimum scores:
    - paper-based TOEFL: 600 and 5 on the TWE

        - Internet-based TOEFL (IBT): 100/120 and 22/30 on the writing and speaking sections.
    - **International English Language Testing System (IELTS):** minimum score of 7.5.
    - **Certificate of Proficiency in English (COPE):** see General Regulations, 4.3 English-Language Proficiency.
    - **U of T School of Continuing Studies academic preparation:** see General Regulations, 4.3 English-Language Proficiency.

Program Requirements

- **Coursework.** A minimum of **3.5 full-course equivalents (FCEs)** as follows:
    - REH3100H *Advanced Rehabilitation Research Issues* or equivalent (0.5 FCE).
    - REH3001Y[0] *Advanced Rehabilitation Presentation and Proceedings* (1.0 FCE; Credit/No Credit). Attendance is expected during the first two years of the program. Students remain enrolled and are encouraged to attend until completion of the degree.
    - REH1100H *Theory and Research in Rehabilitation Science* (0.5 FCE).
    - REH1120H *Research Methods for Rehabilitation Science* (0.5 FCE).
    - REH1130H *Theory and Research in Occupational Science* **or** REH1140H *Theory and Research in Physical Therapy* (0.5 FCE).
    - An advanced research methods course (0.5 FCE).
    - Students may be required to take extra courses in addition to the degree requirements listed above.
- A **comprehensive examination**, with written and oral components, to be taken in the first 2.5 years of the program.
- Completion and defence of a **thesis**.
- Students are encouraged to participate in student and faculty **research seminars** in addition to their regular course requirements.
- **Residence.** Students are expected to be on campus and participating full-time until all program requirements are completed.

Program Length

Rehabilitation Sciences: Rehabilitation Science MSc, PhD Courses

Since not all courses are offered each academic year, the department should be consulted each session as to course offerings.

REH1100H	Theory and Research in Rehabilitation Science
REH1120H	Research Methods for Rehabilitation Science
REH1130H	Theory and Research in Occupational Science
REH1140H	Theory and Research in Physical Therapy
REH1510H	Disordered and Restorative Motor Control
REH2000H	Individual Reading and Research Course
REH2001Y[0]	Rehabilitation Presentations and Proceedings (Credit/No Credit)
REH3001Y[0]	Advanced Rehabilitation Presentation and Proceedings (Credit/No Credit)
REH3100H	Advanced Rehabilitation Research Issues
REH3140H	Disability, Embodiment, and Voice in the Rehabilitation Science Context
REH3301H	Knowledge Translation in Rehabilitation: Foundational Knowledge and Innovative Applications
REH3302H	Determinants of Rehabilitation Practice
REH3303H	Rehabilitation Clinical Practicum
REH3400H	Therapeutic Exercise in Rehabilitation: Emerging Trends and Research Approaches
REH3500H	Gender, Work, and Health
REH5100H	Introduction to Cognitive Rehabilitation Neuroscience I: Basic Science to Clinical Applications
REH3600H	Synthesis Toolkit: Approaches and Methodologies
JRP1000H	Theory and Method for Qualitative Researchers: An Introduction

[0] Course that may continue over a program. Credit is given when the course is completed.

Rehabilitation Sciences: Speech-Language Pathology MSc

Master of Science

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies.
- Applicants must also satisfy the Rehabilitation Sciences Institute's additional admission requirements stated below.
- An appropriate bachelor's degree in speech-language pathology or a related discipline, with a minimum of a mid-B in the final year of the program.
- Prior to admission, an applicant must identify a faculty member who has agreed to serve as research supervisor. The research supervisor may want to examine a completed thesis and/or manuscripts and university transcripts.
- Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction and examination was not English, must demonstrate proficiency in the English language through the successful completion of one of the following tests:

- Test of English as a Foreign Language (TOEFL) and the Test of Written English (TWE):
  - paper-based TOEFL: minimum 600 and 5 on the TWE
  - Internet-based TOEFL (IBT): minimum 100/120 and 22/30 on the writing and speaking sections
- International English Language Testing System (IELTS): minimum score of 7.5
- Certificate of Proficiency in English (COPE): see General Regulations, section 4.3 English-Language Proficiency
- U of T School of Continuing Studies Academic English preparation: see General Regulations, section 4.3 English-Language Proficiency.

Program Requirements

- **Coursework.** Normally, students must complete a minimum of **2.0 full-course equivalents (FCEs)** as follows:
  - At least 1.0 FCE in research design and methodology.
  - At least 1.0 FCE in the area of research interest.
  - Course requirements are determined by the student's supervisory committee.
- Participate in student and faculty **research seminars**.
- Submission of a **thesis** based on the student's research, and completion of an **oral examination** of the thesis.
- Minimum of 12 months of full-time study. Students should be aware that completion of the thesis may take longer.
- Reclassification. MSc students who demonstrate outstanding potential for advanced research in the discipline may be recommended by their supervisory committee for a reclassification examination which, when passed, allows them transfer into the PhD program. Examination normally is undertaken following the completion of at least one session and within 18 months of registration in the MSc program.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Rehabilitation Sciences: Speech-Language Pathology PhD

Doctor of Philosophy

Applicants may enter the PhD program via one of two routes: 1) following completion of an appropriate master's degree or 2) transfer from the University of Toronto MSc program.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies.
- Applicants must also satisfy the Rehabilitation Sciences Institute's additional admission requirements stated below.
- Normally, applicants are expected to have completed an MSc or MA degree in speech-language pathology or a related discipline, with a minimum of a B+ average over the course of the program.
- Applicants must submit the following with their application: a letter of intent, two confidential reference letters that indicate the applicant's preparation and competence to conduct research, and curriculum vitae.
- Demonstrated advanced research qualifications in speech and language sciences.
- Applicants may be counselled prior to admission and provided with materials regarding potential PhD supervisors. Applicants must identify a faculty member who has agreed to serve as research supervisor. The research supervisor is expected to examine a completed thesis and/or manuscripts, reference letters, and university transcripts.
- Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction and examination was not English, must demonstrate proficiency in the English language through the successful completion of one of the following tests:
  - Test of English as a Foreign Language (TOEFL) and the Test of Written English (TWE):
    - paper-based TOEFL: minimum 600 and 5 on the TWE
    - Internet-based TOEFL (IBT): minimum 100/120 and 22/30 on the writing and speaking sections
  - International English Language Testing System (IELTS): minimum score of 7.5
  - Certificate of Proficiency in English (COPE): see General Regulations, section 4.3 English-Language Proficiency
  - U of T School of Continuing Studies Academic English preparation: see General Regulations, section 4.3 English-Language Proficiency.
- Students who graduated from a university outside North America are strongly encouraged to contact the Coordinator of Graduate Studies before applying.
- Reclassification. MSc students who demonstrate outstanding potential for advanced research in the discipline may be recommended by their supervisory committee for a reclassification examination which, when passed, allows them transfer into the PhD program. Examination normally is undertaken following the completion of at least one session and within 18 months of registration in the MSc program.

Program Requirements

- **Coursework.** Students must complete a minimum of **2.0 full-course equivalents (FCEs)** as follows:
  - REH3100H *Advanced Rehabilitation Research Issues* (0.5 FCE) if an equivalent was not taken at the master's level.

    - Advanced research methods and design courses (minimum 1.0 FCE).
    - 0.5 graduate FCE related to the area of study.
    - Attendance every two weeks at the SLP Research Colloquia (0.0 FCE).
    - Course requirements are determined by the student's supervisory committee.
    - Students may be required to take extra courses in addition to the degree requirements listed above.
- Students must demonstrate evidence of adequate **knowledge in research design and statistics** or must include suitable coursework as determined by the supervisory committee.
- A **comprehensive examination**, with written and oral components, to be taken in the first 18 months of the program.
- Completion and defence of a **thesis** in a formal departmental defence, followed by the SGS Doctoral Final Oral Examination.
- Participation in student and faculty **research seminars** in addition to the regular course requirements.
- Students are expected to be on campus and participating full-time until all program requirements are completed.

Program Length

4 years full-time; 5 years transfer-from-master's

Time Limit

6 years full-time; 7 years transfer-from-master's

Overview

The Department for the Study of Religion offers **Master of Arts** and **Doctor of Philosophy** programs in the study of religion and facilitates research and publication on religion. The department consolidates the vast curricular and faculty resources that are distributed throughout the many departments and colleges of the University and enables its students to use any resource in the University which serves the study of religion.

The department conceives the academic study of religion in interdisciplinary terms and embraces humanistic, historical, and social scientific approaches and methods. Programs of study are constructed individually to fit the specific needs and interests of each student. As a guideline for areas of strength in the department, the department is organized by the following fields:

- Buddhist Studies
- Christianity
- Hinduism and South Asian Religions
- Islam
- Judaism
- Religion, Culture, and Politics
- Religion, Ethics, and Modern Thought
- Religion and Medicine
- Religions of Mediterranean Antiquity.

These fields do not determine program requirements. Most faculty and students participate in multiple fields.

Religion: Religion MA

Master of Arts

Program Description

The MA program may be taken on a full-time or part-time basis. The department's Graduate Studies Handbook, available on the web and from the department, provides details on admissions and programs as well as the research and teaching interests of the faculty.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department for the Study of Religion's additional admission requirements stated below.
- Normally, an appropriate bachelor's degree with specialization in religion or a cognate discipline from a recognized university, broadly equivalent to the University of Toronto's BA Specialist degree in religion, with at least A– standing in the final year. Students without appropriate preparation may be required to take additional work either before admission or during an extended master's program.

Program Requirements

- **Courses.** Students must complete **4.0 full-course equivalents (FCEs)** including:
  - RLG2000Y *Major Research Paper* (1.0 FCE).
  - RLG1200H *MA Method and Theory Workshop* (0.5 FCE).
  - One Gateway Seminar (0.5 FCE).
  - One Religion course (0.5 FCE).
  - In some cases, students may be required to take additional courses, some of which may be at the undergraduate level. Students may be required to take more than 4.0 FCEs if their preparation is considered deficient in a subject required for their program.
  - Satisfactory performance requires the completion of all coursework taken for graduate credit with an average grade of at least A–.
- **Language(s).** Reading knowledge of at least one language, in addition to English, selected from languages of modern scholarship and/or necessary source languages, as approved by the Director of Graduate Studies.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 to 8 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Religion: Religion PhD

Doctor of Philosophy

Program Description

From the point of admission onward, doctoral student programs must be matched with the expertise of at least three professors who help supervise the student's work. The department's Graduate Studies Handbook, available on the web and from the department, provides details on admissions and programs as well as the research and teaching interests of the faculty. The PhD program is taken on a full-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department for the Study of Religion's additional admission requirements stated below.
- Normally, completion of all requirements of the department's MA program, or a comparable program at another university, with an average of at least A– in coursework and with no individual course falling below B.

Program Requirements

- **Courses.** Students must complete a minimum of **4.0 full-course equivalents (FCEs)**, including the following:
  - RLG1000Y *Method and Theory in the Study of Religion* (1.0 FCE).
  - One Gateway Seminar (0.5 FCE).
  - Two Religion courses (1.0 FCE).
  - Students may be required to take more than 4.0 FCEs if their preparation is considered deficient in a subject required for their program.
  - Satisfactory performance requires the completion of all coursework taken for graduate credit with an average grade of at least A–.
- **Languages.** Reading knowledge of at least two languages in addition to English, selected from languages of scholarship and necessary source languages, as approved by the Director of Graduate Studies. Classical and modern forms of the same language are not permitted. The language requirements must be fulfilled before writing the general examinations.
- **Professionalization seminar.** Doctoral students must complete SRD4444Y *Doctoral Seminar Series — Compulsory Attendance* (CR/NCR, 0.0 FCE). This seminar consists of a series of workshops which must be completed to fulfil the requirement.
- **General examinations.** Upon completion of coursework, the language requirements, and the thesis pre-proposal, the student's supervisory committee will set General Examinations to assess the student's readiness for thesis research. There are three components in the General Examinations:
  - A four-hour written examination will cover the student's area of specialization;
  - A three-hour written examination will cover at least one important cognate area; and
  - A two-hour oral examination on all materials assigned for the General Examinations.
- A student who fails any portion of the General Examinations may be re-examined once, no later than nine months after the date of the first examination. The General Examinations must be completed before the end of the third year of doctoral study.
- **Thesis proposal.** Within three months of successful completion of the General Examinations, the student must submit a thesis proposal for approval by the student's supervisory committee.
- **Thesis.** Upon approval of the thesis proposal by the student's supervisory committee, the candidate proceeds to research and write a doctoral thesis which must be defended successfully at a Doctoral Final Oral Examination.
- **Colloquium presentation.** Once general examinations are completed, PhD candidates are required to present at least once in the Department for the Study of Religion's colloquium before undertaking their Doctoral Final Oral Examination.
- **Doctoral Final Oral Examination.** The supervisory committee must approve the completed thesis before it is submitted for examination.
- **Residence.** Students are required to spend at least two Fall and Winter sessions on campus in full-time study, normally in Years 1 and 2.

Program Length

4 years (some students may take longer)

Time Limit

6 years

Religion: Religion MA, PhD Courses

Not all courses are offered every year. Please consult the department's website, which lists the courses the department will offer this year as well as those cross-listed from other departments.

Religion

- Fields:
  - Slavic Linguistics;
  - Slavic Literatures

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Diaspora and Transnational Studies
  - Slavic Languages and Literatures, MA, PhD
- Jewish Studies
  - Slavic Languages and Literatures, MA, PhD
- Sexual Diversity Studies
  - Slavic Languages and Literatures, MA, PhD

Overview

The Graduate Department of Slavic Languages and Literatures offers instruction leading to two degrees — **Master of Arts** and **Doctor of Philosophy** — in one of the broadest ranges of Slavic languages and literatures available in a North American university. Courses are offered in the following areas: Croatian and Serbian Languages and Literatures, Czech and Slovak Languages and Literatures, Polish Language and Literature, Russian Language and Literature, Slavic Linguistics, and Ukrainian Language and Literature.

The department's literature programs are especially strong in nineteenth and twentieth century literary and cultural history, modernism, avant-garde and contemporary movements, literary theory, drama, cinema, and Slavic-Jewish cultural relations.

The department's linguistics unit has particular strengths in language acquisition and pedagogy, and socio-linguistics. Students are advised to consult the list of faculty members and the description of their particular areas of expertise for more details.

Over the last decade, curricula in all the languages, literatures and cultures taught in the department have been rewritten to mirror the dramatic social, cultural and political changes in Central, Eastern and Southern Europe. The department has developed new areas of research and expertise. Due to extensive internal cooperation and interdisciplinary focus, new common ground among disciplines has been found; the study of the interrelations of these cultures is promoted.

Slavic Languages and Literatures: Slavic Languages and Literatures MA

Master of Arts

Program Description

All applicants complete the same application process. The department's admissions committee then determines each applicant's suitability for the one-year MA or two-year MA option, depending on their level of preparation. Students in the one-year MA program have the option to complete the program by coursework or coursework plus research paper.

MA Program (One-Year Coursework Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Slavic Languages and Literatures' additional admission requirements stated below.
- An appropriate bachelor's degree (preferably in a cognate area) with an overall standing equivalent to at least a University of Toronto mid-B in the final year.
- A minimum A– average in all Slavic subjects taken in the final two years is recommended.
- Proficiency in a Slavic language equivalent to at least three full years of language training, and broad familiarity with the literary and cultural history of the applicant's proposed disciplinary area(s) of interest (currently, Czech and Slovak, Polish, Russian, South Slavic, Slavic Linguistics, Ukrainian), as evidenced by undergraduate coursework at the 300 or 400 level, are required.

Program Requirements

- **Coursework.** Students must complete **4.0 full-course equivalents (FCEs)** including:
  - SLA1040H *Methods of Teaching Slavic Languages* (0.5 FCE)
  - Students who provide evidence of satisfactory completion of an equivalent course to SLA1040H may be exempted from this course.
- **Language.** Proficiency in the language of the major field of study must be demonstrated during the first week of the first session in the program. Additional language courses at the undergraduate level may be required. These courses will not count toward the 4.0 FCEs required to complete the program. Successful completion of all coursework in the undergraduate language courses is part of a student's good progress in the MA program.
- **Residence.** Normally, students spend a year in residence when they must be on campus and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.

Program Length

2 sessions (typical registration sequence: F/W)

Time Limit

3 years

MA Program (One-Year Coursework-Plus-Research-Paper Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Slavic Languages and Literatures' additional admission requirements stated below.
- An appropriate bachelor's degree (preferably in a cognate area) with an overall standing equivalent to at least a University of Toronto mid-B in the final year.
- A minimum A– average in all Slavic subjects taken in the final two years is recommended.
- Proficiency in a Slavic language equivalent to at least three full years of language training, and broad familiarity with the literary and cultural history of the applicant's proposed disciplinary area(s) of interest (currently, Czech and Slovak, Polish, Russian, South Slavic, Slavic Linguistics, Ukrainian), as evidenced by undergraduate coursework at the 300 or 400 level, are required.

Program Requirements

- **Coursework**. Students must complete **3.0 full-course equivalents (FCEs)** including:
  - SLA1040H *Methods of Teaching Slavic Languages* (0.5 FCE).
  - Students who provide evidence of satisfactory completion of an equivalent course to SLA1040H may be exempted from this course.
  - Students who intend to complete the Slavic linguistics field must complete SLA1109H *Studies in Old Church Slavonic* (0.5 FCE).
- **Language.** Proficiency in the language of the major field of study must be demonstrated during the first week of the first session in the program. Additional language courses at the undergraduate level may be required. These courses will not count toward the 3.0 FCEs required to complete the program. Successful completion of all coursework in the undergraduate language courses is part of a student's good progress in the MA program.
- **Research paper** written in English.
- **Residence.** Normally, students spend a year in residence when they must be on campus and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.

Program Length

2 sessions (typical registration sequence: F/W)

Time Limit

3 years

MA Program (Two-Year Coursework Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Slavic Languages and Literatures' additional admission requirements stated below.
- An appropriate bachelor's degree (preferably in a cognate area) with an overall standing equivalent to at least a University of Toronto mid-B in the final year.
- A minimum A– average in all Slavic subjects taken in the final two years is recommended.
- Intermediate proficiency in a Slavic language, as evidenced by two full years of language training or equivalent, is required.

Program Requirements

- **Coursework**: Students must complete **7.0 full-course equivalents (FCEs)** including:
  - SLA1040H *Methods of Teaching Slavic Languages* (0.5 FCE)
  - Students who provide evidence of satisfactory completion of an equivalent course to SLA1040H may be exempted from this course.
  - Students who intend to complete the Slavic linguistics field must complete SLA1109H *Studies in Old Church Slavonic* (0.5 FCE).
- **Language.** Level of proficiency in the language of the major field of study must be established no later than the first week of the first session in the program to determine the required language courses.
- **Residence.** Normally, students spend two years in residence when they must be on campus and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.

Program Length

4 sessions (typical registration sequence: F/W/F/W)

Time Limit

3 years

Slavic Languages and Literatures: Slavic Languages and Literatures PhD

Doctor of Philosophy

Program Description

PhD students may choose to complete a program in one of two fields:

- Slavic Linguistics
- Slavic Literatures.

Field: Slavic Linguistics

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Slavic Languages and Literatures' additional admission requirements stated below.
- An appropriate University of Toronto master's degree with a minimum A– average in graduate courses and demonstrated research competence.

Program Requirements

Students are normally required to:

- Demonstrate **proficiency in the language of the major field of study** during the session's first week. Undergraduate language courses may be required. These are not tabulated as part of graduate program course requirements. Successful completion of all coursework in these remedial undergraduate courses is part of a student's good progress in the PhD program.
- Complete a major field of study and a minor field of study program.
- Complete **9.0 full-course equivalents (FCEs)** including:
  - At least 3.0 FCEs in Slavic linguistics.
  - 2.0 FCEs in theoretical linguistics from cognate disciplines (e.g., linguistics, anthropology).
  - 1.0 FCE in the literature of the major field of study language is strongly advised.
  - At least one course (0.5 FCE) in Slavic languages from each of the three groups: West Slavic, East Slavic, and South Slavic by the end of Year 3 (minimum 1.5 FCEs total).
  - Students may be given a course exemption up to 3.0 FCEs for work completed in the MA.
- **Minor field of study** programs should include 2.0 FCEs from any one of:
  - Croatian and Serbian Languages and Literatures.
  - Czech and Slovak Languages and Literatures.
  - Polish Language and Literature.
  - Russian Language and Literature.

    - Slavic Linguistics, and Ukrainian Language and Literature.
    - A cognate discipline, with departmental approval (e.g., cinema studies, comparative literature, drama, history, philosophy).
- Maintain a minimum **annual average of A–** to continue in the PhD program. Poor performance in one session (below a B average) may result in the termination of a student's PhD eligibility.
- Demonstrate a reading knowledge of **French or German**.
- After successful completion of coursework and the French or German language requirement, students must pass written **comprehensive examinations** in the major field of study field and written and oral comprehensive examinations in the special field. The major field of study field exam cannot be taken if students have any outstanding coursework.
- By the time of their major field of study field exam, students should have chosen their supervisor and the rest of their committee (in consultation with the supervisor).
- **Dissertation.**
- **Residence.** In Years 1 and 2, students must take courses and be on campus full-time to participate fully in the PhD program's activities.

Program Length

4 years (many students require 5 years to complete the program)

Time Limit

6 years

Field: Slavic Literatures

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Slavic Languages and Literatures' additional admission requirements stated below.
- An appropriate University of Toronto master's degree with a minimum A– average in graduate courses and demonstrated research competence.

Program Requirements

Students are normally required to:

- Demonstrate **proficiency in the language of the major field of study** during the session's first week. Undergraduate language courses may be required. These are not tabulated as part of graduate program course requirements. Successful completion of all coursework in these remedial undergraduate courses is part of a student's good progress in the PhD program.
- Complete SLA1010H *Slavic Proseminar* prior to taking comprehensive examinations.
- Complete a major field of study and a minor field of study program.
- Complete **9.0 full-course equivalents (FCEs)** with at least 0.5 FCE in Slavic linguistics. Students may be given a course exemption up to 3.0 FCEs for work completed in the MA.
    - Complete SLA1104H *Introduction to Old Church Slavonic* (0.5 FCE; Credit/No Credit) if specializing in Russian, Ukrainian, or Bosnian-Croatian-Serbian.
- **Minor field of study** programs should include 2.0 FCEs from any one of:
    - Croatian and Serbian Languages and Literatures.
    - Czech and Slovak Languages and Literatures.
    - Polish Language and Literature.
    - Russian Language and Literature.
    - Slavic Linguistics, and Ukrainian Language and Literature.
    - A cognate discipline, with departmental approval (e.g., cinema studies, comparative literature, drama, history, philosophy).
- Maintain a minimum **annual average of A–** to continue in the PhD program. Poor performance in one session (below a B average) may result in the termination of a student's PhD eligibility.
- Acquire a working knowledge of a **Slavic language other than their major field of study language of study** or complete at least two approved undergraduate courses in a Slavic language that is different than their major field of study language of study by the end of Year 3. A working knowledge is defined as proficiency equivalent to a second-year course. Students must also satisfy departmental requirements for their major field of study language. Students who do not major field of study in Russian most often choose it as their second Slavic language.
- Demonstrate a reading knowledge of **French or German**.
- After successful completion of coursework and the French or German language requirement, students must pass written **comprehensive examinations** in the major field of study field and written and oral comprehensive examinations in the special field. The major field of study field exam cannot be taken if students have any outstanding coursework.
- By the time of their major field of study field exam, students should have chosen their supervisor and the rest of their committee (in consultation with the supervisor).
- **Dissertation.**
- **Residence.** In Years 1 and 2, students must take courses and be on campus full-time to participate fully in the PhD program's activities.

Program Length

4 years (many students require 5 years to complete the program)

Time Limit

  - Social Justice Education, MA, MEd, EdD, PhD
- South Asian Studies
  - Social Justice Education, MA, MEd, EdD, PhD
- Women and Gender Studies
  - Social Justice Education, MA, MEd, EdD, PhD
- Workplace Learning and Social Change
  - Social Justice Education, MA, MEd, EdD, PhD

Overview

The Department of Social Justice Education offers a multi- and interdisciplinary graduate program developed from the past programs of History and Philosophy of Education as well as Sociology and Equity Studies in Education. It is an intellectual community committed to producing and advancing knowledge on social justice education in Canada and beyond. Social justice education is a robust term, allowing for diverse meanings and methodologies.

The department's graduate programs are concerned with both theoretical and empirical problems regarding in/equity in educational spaces, broadly conceived. Faculty and students approach their inquiries from disciplinary (e.g., anthropology, history, philosophy, political science, or sociology) and/or interdisciplinary (e.g., anti-colonial, critical race, disability, feminist, francophone, indigenous, or queer) perspectives. They focus on identifying new relationships and making connections by asking significant questions about social justice education within and across disciplines. Hence, they foreground research and teaching in social justice education, pursued through analytical and empirical tools from the humanities and social sciences.

The department's vision is to enable both graduate students and initial teacher education students to explore questions such as, “What was, what is, and what should be the relationship between education and society?” and “What kinds of knowledge do educators need to answer those questions?” The department aims to provide students with the academic knowledge and skills necessary to engage and raise questions of critical importance to educational theories and practices, and their relationship to individuals, communities, and societies.

Social Justice Education: Social Justice Education MA

Master of Arts

Program Description

The Social Justice Education (SJE) program welcomes applicants with diverse but relevant backgrounds. The MA program is a research-based degree program which can be taken on a full-time or part-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the department's additional admission requirements stated below.
- Admission to the MA program requires an appropriate bachelor's degree in a humanities, social science, or cognate discipline from a recognized university, with standing equivalent to a University of Toronto mid-B or better in the final year.
- Applicants are required to submit the following; incomplete applications may be subject to processing delays or rejection:
  - A careful statement of intellectual interests and concerns relevant to the humanities, or social sciences, and social justice in education as well as reasons for undertaking a program in the department, including a statement of preference for one or more faculty members whose research is best matched to the student's research interests.
  - Two letters of reference, preferably from university instructors with whom the applicant has studied or worked.
  - At least one sample of written work that demonstrates engagement with the humanities, or social sciences, and social justice in education.
  - Resumé that provides clear and complete information about the applicant's work or field experience related to their proposed studies.

Program Requirements

- **Coursework.** Students must complete **3.0 full-course equivalents (FCEs)** as follows:
  - Subject to consultation with a faculty advisor, SJE1903H *Major Concepts and Issues in Social Justice Education* (0.5 FCE) is recommended.
  - 2.5 other FCEs, of which at least 1.5 FCEs must be SJE courses.
  - Students who are registered in a collaborative specialization may apply to have their SJE course requirement reduced by 0.5 FCE.
  - Students must consult with their faculty advisor before enrolling in any out-of-department course for which they wish to receive SJE credit.
  - Additional courses may be required of some students, and some students may be required to take specified courses in research methods and/or theory.
- Students complete a **thesis** which may lay the groundwork for doctoral research.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Social Justice Education: Social Justice Education MEd

Master of Education

Program Description

The Department of Social Justice Education (SJE) welcomes applicants with diverse but relevant backgrounds. The Master of Education (MEd) program can be taken on a full-time or part-time basis.

Students may complete the MEd program by one of three options:

- Coursework Only Option
- Coursework Plus Major Research Paper (MRP) Option
- Coursework Plus Thesis Option (admissions have been administratively suspended)

Students who are accepted into the MEd program are automatically assigned to the Coursework Only Option. They can transfer to the Coursework Plus Major Research Paper Option after they begin their program and have secured an SJE faculty supervisor for the MRP or thesis.

MEd Program (Coursework Only Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the department's additional admission requirements stated below.
- Admission to the MEd program requires an appropriate bachelor's degree from a recognized university, with a standing equivalent to a University of Toronto mid-B or better in the final year.
- Applicants must have the equivalent of 12 months of professional experience.
- Applicants must submit the following; incomplete applications may be subject to processing delays or rejection:
  - A careful statement of intellectual interests and concerns relevant to the humanities, or social sciences, and social justice in education as well as reasons for undertaking a program in the department, including a statement of preference for one or more faculty members whose research is best matched to the student's research interests.
  - Two letters of reference, preferably from university instructors with whom the applicant has studied or worked; the second letter of reference may be written by a work or community-based supervisor.
  - At least one sample of written work that demonstrates engagement with the humanities or social sciences, and social justice in education.
  - Resumé that provides clear and complete information about the applicant's work or field experience related to their proposed studies.

Program Requirements

- **Coursework.** Students must complete **5.0 full-course equivalents (FCES)** including:
  - Subject to consultation with a faculty advisor, SJE1903H *Major Concepts and Issues in Social Justice Education* (0.5 FCE) is recommended.
  - At least half of the FCEs in an MEd program must be SJE courses.
  - Students who are registered in a collaborative specialization may apply to have their SJE course requirement reduced by 0.5 FCE.
  - Students must consult with their faculty advisor before enrolling in any out-of-department course for which they wish to receive SJE credit.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

MEd Program (Coursework Plus Major Research Paper Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the department's additional admission requirements stated below.
- Admission to the MEd program requires an appropriate bachelor's degree from a recognized university, with a standing equivalent to a University of Toronto mid-B or better in the final year.
- Applicants must have the equivalent of 12 months of professional experience.
- Applicants must submit the following; incomplete applications may be subject to processing delays or rejection:
  - A careful statement of intellectual interests and concerns relevant to the humanities or social sciences, and social justice in education as well as reasons for undertaking a program in the department, including a statement of preference for one or more faculty members whose research is best matched to the student's research interests.
  - Two letters of reference, preferably from university instructors with whom the applicant has studied or worked; the second letter of reference may be written by a work or community-based supervisor.

- At least one sample of written work that demonstrates engagement with the humanities or social sciences, and social justice in education.
- Resumé that provides clear and complete information about the applicant's work or field experience related to their proposed studies.

Program Requirements

- **Coursework.** Students must complete **4.0 full-course equivalents (FCES)** including:
  - Subject to consultation with a faculty advisor, SJE1903H *Major Concepts and Issues in Social Justice Education* (0.5 FCE) is recommended.
  - At least half of the FCEs in an MEd program must be SJE courses.
  - Students who are registered in a collaborative specialization may apply to have their SJE course requirement reduced by 0.5 FCE.
  - Students must consult with their faculty advisor before enrolling in any out-of-department course for which they wish to receive SJE credit.
- **Major Research Paper (MRP)**: SJE2001Y[0] *Major Research Paper*.

Program Length

5 sessions full-time (typical registration sequence: F/W/S/F/W);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

[0] Course that may continue over a program. The course is graded when completed.

MEd Program (Coursework Plus Thesis Option)

Admissions have been administratively suspended.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the department's additional admission requirements stated below.
- Admission to the MEd program requires an appropriate bachelor's degree from a recognized university, with a standing equivalent to a University of Toronto mid-B or better in the final year.
- Applicants must have the equivalent of 12 months of professional experience.
- Applicants must submit the following; incomplete applications may be subject to processing delays or rejection:
  - A careful statement of intellectual interests and concerns relevant to the humanities or social sciences, and social justice in education as well as reasons for undertaking a program in the department, including a statement of preference for one or more faculty members whose research is best matched to the student's research interests.
  - Two letters of reference, preferably from university instructors with whom the applicant has studied or worked; the second letter of reference may be written by a work or community-based supervisor.
  - At least one sample of written work that demonstrates engagement with the humanities or social sciences, and social justice in education.
  - Resumé that provides clear and complete information about the applicant's work or field experience related to their proposed studies.

Program Requirements

- **Coursework.** Students must complete **3.0 full-course equivalents (FCES)** including:
  - Subject to consultation with a faculty advisor, SJE1903H *Major Concepts and Issues in Social Justice Education* (0.5 FCE) is recommended.
  - At least half of the FCEs in an MEd program must be SJE courses.
  - Students who are registered in a collaborative specialization may apply to have their SJE course requirement reduced by 0.5 FCE.
  - Students must consult with their faculty advisor before enrolling in any out-of-department course for which they wish to receive SJE credit.
- **Thesis**.

Program Length

JTE1952H	Language, Culture, and Education / Langue, culture, et éducation

[0] Course that may continue over a program. The course is graded when completed.

Social Justice Education: Social Justice Education EdD

Doctor of Education

Program Description

The Doctor of Education (EdD) degree program is distinct from the PhD in that students are encouraged to orient towards applied and theoretical dimensions of professional educational practice understood as knowledge, teaching, and learning which takes place within or beyond schooling.

The EdD in Social Justice Education (SJE) is ideal for those with an interest in professional and/or voluntary practice in relevant field domains, where there is an interface between theory and

practice and where the vision, skills, and commitment of dedicated and research-informed practitioners are pivotal to outcomes. Those interested in the degree program will be working professionals including teachers, school and community leaders, health and legal professionals, and those working, volunteering, or seeking employment in related fields in social justice education.

The Department of Social Justice Education welcomes applicants with diverse but relevant backgrounds. The EdD program can be taken on a full-time or part-time basis.

Students cannot transfer between the EdD and PhD programs.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the department's additional admission requirements stated below.
- Admission to the EdD program requires a University of Toronto MEd or MA in education, or its equivalent from a recognized university, in the same field of specialization proposed at the doctoral level, completed with a standing equivalent to a University of Toronto B+ or better in master's courses.
- Applicants must have the equivalent of 12 months of professional experience.
- Applicants must submit the following; incomplete applications may be subject to processing delays or rejection:
  - A careful statement of intellectual interests and concerns relevant to the humanities or social sciences, and social justice in education as well as reasons for undertaking a program in the department, including a statement of preference for one or more faculty members whose research is best matched to the student's research interests.
  - Two letters of reference, preferably from university instructors with whom the applicant has studied or worked; the second letter of reference may be written by a work-based supervisor.
  - At least one sample of written work that demonstrates engagement with the humanities or social sciences, and social justice in education.
  - Resumé that provides clear and complete information about the applicant's work or field experience related to their proposed studies.

Program Requirements

- **Coursework.** Students must complete **4.0 full-course equivalents (FCEs)** as follows:
  - Required half course (0.5 FCE): SJE3997H *Practicum in Social Justice Education* (72 hours).
  - Subject to consultation with a faculty advisor, SJE3905H *Interdisciplinary Approaches to Research: Theory and Praxis* (0.5 FCE) is recommended.
  - Students who have completed the recommended course SJE3905H must take 3.0 other FCEs, of which at least 1.5 FCEs must be SJE courses.
  - Students who are registered in a collaborative specialization may apply to have their SJE course requirement reduced by 0.5 FCE.
  - Students must consult with their faculty advisor before enrolling in any out-of-department course for which they wish to receive SJE credit.
- **Thesis (dissertation in practice).** Students submit a thesis and defend it at a **Doctoral Final Oral Examination**. The thesis (dissertation in practice) is the culminating component of the EdD degree in Social Justice Education that shall include an identification and investigation of a problem of practice, the application of theory and research to the problem of practice, and a design for action to address the problem of practice. Specifically, the thesis (dissertation in practice) is expected to be the product of original research, designed and implemented in the form of an innovative, impactful, and potentially sustainable plan, policy, guideline, advocacy or activism model, relevant to an educational setting, broadly defined, and aimed at improving practice on a local, regional, national or international scale.
- Students may begin their studies on a part-time basis. However, they must register full-time for a minimum of two consecutive sessions, not including Summer, of on-campus study. Once enrolled full-time, students must maintain continuous registration full-time and pay full-time fees until all degree requirements, including the thesis, are completed.

Program Length

4 years full-time; 6 years part-time

Time Limit

6 years full-time; 6 years part-time

Social Justice Education: Social Justice Education PhD

Doctor of Philosophy

Program Description

The PhD degree program is designed to provide opportunities for advanced study, original research, and theoretical analysis. The PhD program can be taken on a full-time or flexible-time basis. The Department of Social Justice Education (SJE) welcomes applicants with diverse but relevant backgrounds.

The flexible-time PhD degree is designed to accommodate demand by practising professionals for a PhD degree that permits continued employment in areas related to their areas of research. Degree requirements for the flexible-time and full-time PhD programs are the same. Flexible-time PhD students register full-time during the first four years and part-time during subsequent years of the program.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the department's additional admission requirements stated below.
- PhD students who are admitted without sufficient previous study in a humanities, social science, or a cognate discipline may be required to take additional courses.
- Applicants are required to submit the following; incomplete applications may be subject to processing delays or rejection:
  - A careful statement of intellectual interests and concerns relevant to the humanities or social sciences, and social justice in education as well as reasons for undertaking a program in the department, including a statement of preference for one or more faculty members whose research is best matched to the student's research interests.
  - Two letters of reference, preferably from university instructors with whom the applicant has studied or worked.
  - At least one sample of written work that demonstrates engagement with the humanities or social sciences, and social justice in education.
  - Resumé that provides clear and complete information about the applicant's work or field experience related to their proposed studies.

Program Requirements

- **Coursework.** Students must complete **3.0 full-course equivalents (FCEs)** including:
  - Subject to consultation with a faculty advisor, SJE3905H *Interdisciplinary Approaches to Research: Theory and Praxis* (0.5 FCE) is recommended. Additional courses may be required, and some students may be required to take other specified courses in research methods and/or theory.
  - At least 2.0 FCEs must be taken within SJE.
  - Students who are registered in a collaborative specialization may apply to have their SJE course requirement reduced by 0.5 FCE.
  - Students must consult with their faculty advisor before enrolling in any out-of-department course for which they wish to receive SJE credit.
- **Comprehensive examination**:
  - Students are encouraged to take, as part of their program requirements, one half course (0.5 FCE) focused on the substantive area on which they will be examined.
  - Students choose one of the following:
    - a major paper (30 to 40 pages); or
    - a substantive course outline (30 to 40 pages) for a topic of interest to the student within the area of social justice education; or
    - a solid draft of a scholarly article.
  - The option selected and the date for the comprehensive exam will be decided by the student and the supervisor. The comprehensive exam should be taken no later than the end of Year 3.
  - A student who fails the comprehensive exam will be permitted one additional attempt to pass. A second failure will result in the recommendation for termination of the student's registration.
  - Comprehensive exams will be graded on a pass or fail basis.
- Students must submit a **thesis** and defend it at a **Doctoral Final Oral Examination**. The thesis must embody the results of original investigation conducted by the student under the direction of an OISE thesis committee. The thesis must constitute a significant contribution to the knowledge of the field of study. The student must have an approved thesis topic, supervisor, and an approved thesis committee by the end of Year 3, and must have completed all other program requirements.
- PhD students must register continuously and pay the full-time fee until all degree requirements have been fulfilled.
- Students cannot transfer between the full-time and flexible-time PhD options.
- Students cannot transfer between the EdD program and PhD programs.

Program Length

4 years

Time Limit

6 years

PhD Program (Flexible-Time)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the department's additional admission requirements stated below.
- PhD students who are admitted without sufficient previous study in a humanities, social science, or a cognate discipline may be required to take additional courses.
- Applicants are required to submit the following; incomplete applications may be subject to processing delays or rejection:
  - A careful statement of intellectual interests and concerns relevant to the humanities or social sciences, and social justice in education as well as reasons for undertaking a program in the department, including a statement of preference for one or more faculty members whose research is best matched to the student's research interests
  - Two letters of reference, preferably from university instructors with whom the applicant has studied or worked
  - At least one sample of written work that demonstrates engagement with the humanities or social sciences, and social justice in education.
  - Resumé that provides clear and complete information about the applicant's work or field experience related to their proposed studies.
- Applicants must demonstrate that they are currently employed and are active professionals engaged in activities related to their proposed program of study.

Program Requirements

- **Coursework.** Students must complete at least **3.0 full-course equivalents (FCEs)** including:
  - At least 2.0 FCEs taken in SJE, with the possibility to apply for a reduction of 0.5 FCE in the SJE course requirement if the student is also registered in a collaborative specialization.
  - Subject to consultation with a faculty advisor, SJE3905H *Interdisciplinary Approaches to Research: Theory and Praxis* (0.5 FCE) is recommended.
  - Students must consult with their faculty advisor before enrolling in any out-of-department course for which they wish to receive SJE credit.
- **Comprehensive examination**:
  - Students are encouraged to take, as part of their program requirements, one half course (0.5 FCE) focused on the substantive area on which they will be examined.
  - Students choose one of the following:
    - a major paper (30 to 40 pages); or
    - a substantive course outline (30 to 40 pages) for a topic of interest to the student within the area of social justice education; or
    - a solid draft of a scholarly article.
  - The option selected and the date for the comprehensive exam will be decided by the student and the supervisor. The comprehensive exam should be taken no later than the end of Year 4.
  - A student who fails the comprehensive exam will be permitted one additional attempt to pass. A second failure will result in the recommendation for termination of the student's registration.
  - Comprehensive exams will be graded on a pass or fail basis.
- Students must submit a **thesis** and defend it at a **Doctoral Final Oral Examination**. The thesis must embody the results of original investigation conducted by the student under the direction of an OISE thesis committee. The thesis must constitute a significant contribution to the knowledge of the field of study. The student must have an approved thesis topic, supervisor, and an approved thesis committee by the end of Year 3, and must have completed all other program requirements.
- Students must register continuously until all degree requirements have been fulfilled. Students register full-time during the first four years and may continue as part-time thereafter, with their department's approval.
- Students cannot transfer between the full-time and flexible-time PhD options.
- Students cannot transfer between the EdD and PhD programs.

Program Length

6 years

Time Limit

8 years

Overview

As the oldest school of social work in Canada, the Factor-Inwentash Faculty of Social Work at the University of Toronto has been on the cutting edge of education, policy, research, and practice in social work for almost 100 years. The Faculty offers a professional/academic program of study leading to **Master of Social Work (MSW)** and **Doctor of Philosophy (PhD)** degrees.

The mission of the Faculty at the University of Toronto has an international perspective that is influenced by its position within one of the top universities in North America located in a global metropolis. As such, the Faculty is committed to:

- Educating and developing professionals who have the capacity to engage in and influence our changing world through social work practice, policy, and research.
- Advancing research, practice, and policy that shapes the future of a profession that crosses national boundaries.
- Providing leadership by mobilizing knowledge that incorporates the range of expertise existing within the broader social work communities that exist internationally.
- Collaborating with our diverse partners to address social inequities at local, national, and global levels.

Social Work: Social Work MSW

Master of Social Work

Program Description

The MSW program is distinguished by the integration of research and practice in both the classroom and its practicum education. The program offers six fields of specialization:

- Children and Their Families (MSW)
- Gerontology (MSW)
- Health and Mental Health (MSW)
- Human Services Management and Leadership (MSW)
- Indigenous Trauma and Resiliency (MSW)
- Social Justice and Diversity (MSW)

It is fully accredited by the Canadian Association for Social Work Education.

The Faculty of Social Work offers the Master of Social Work (MSW) program in a two-year option or an advanced-standing option for applicants entering with a Bachelor of Social Work (BSW) degree.

All students are expected to graduate with an advanced level of knowledge and professional competence in a chosen area of social work practice.

Social Work: Social Work MSW; Field: Children and Their Families

Master of Social Work (Field: Children and Their Families)

Within the MSW degree program, the field in Children and Their Families is designed to prepare students for social work practice with children and their families at all levels of intervention, from individual to group work with children, to family and couple intervention, to community organization, and to program and policy development.

Minimum Admission Requirements

MSW Two-Year Program and MSW Advanced-Standing Option

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Social Work's additional admission requirements stated below.
- Applicants with an **appropriate bachelor's degree** with a minimum average equivalent to at least a University of Toronto mid-B in the final year of full-time study from a recognized university are admitted to a two-year MSW program.
- Applicants who hold a **BSW degree** with mid-B average in the final year of full-time study, or its equivalent from a recognized university, may be eligible for the MSW advanced-standing option.
- All applicants must have included 3.0 full-course equivalents (FCEs) in social science courses, including 0.5 FCE in research methodology. A mid-B is strongly recommended in the research methodology course.
- Experience (voluntary or paid) in the social services or related field and knowledge of critical social issues are recommended. Suitability for professional practice in social work will also be considered.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements. Advanced-standing applicants must declare their field and a preference for full-time or part-time studies at the time of application.
- Initial admission inquiries should be made directly to the Faculty of Social Work. Please note that applicants holding the minimum admission requirements are not guaranteed admission. All admission decisions are final.

Program Requirements

MSW Two-Year Program and MSW Advanced-Standing Option

- **All MSW students**: Agencies that offer practica will likely require a Vulnerable Sector Verification prior to commencing the practicum. Failure to pass this check will jeopardize a student's entry to practicum. Cost and time factors are associated with the Vulnerable Sector Verification. A delay in obtaining the results can impact the start time of a student's practicum. In anticipation of this requirement for the practicum, it is strongly recommended that students begin this process early.
- In the event that a student does not complete two or more required courses, or receives an FZ (inadequate) after repeating any course, normally steps will be taken by the Faculty to recommend the termination of the student's registration.

Compulsory Courses

Year 1 MSW students in the Children and Their Families field must complete eight half courses (4.0 FCEs) and the Year 1 practicum (0.5 FCE) from the list of required courses below.

SWK4102H	Social Policy and Social Welfare in the Canadian Context
SWK4103H	Elements of Social Work Practice
SWK4105H	Social Work Practice Laboratory
SWK4107H	Foundations of Social Work: Knowledge, Theory, and Values that Inform Practice
SWK4510H	Research for Evidence-Based Social Work Practice (SWK4510H must be completed before taking any of the research courses in the field)
SWK4602H	Social Work Practice with Groups
SWK4605H	Social Work Practice with Individuals and Families
SWK4654H	Social Work Practice in Organizations and Communities
SWK4701H[+]	Social Work Practicum I (prerequisite: SWK4105H completed prior to beginning practicum)

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

- **Students in the MSW two-year program** must declare their field by mid-February of Year 1. See below for information by field.
- Note: Advanced-standing students normally complete the program in one year of full-time study or two years of part-time study.
- The MSW thesis option provides hands-on research experience. The thesis is an independent piece of research intended to enable students to develop and apply research skills within the context of social work practice and to write a graduate thesis of publishable quality. Note: The thesis option is available to a limited number of students — maximum three in any given year — whose proposed research must be approved by a review panel and by the Associate Dean, Research.
- Students in the thesis option who have a minimum of two years' prior full-time social work experience are eligible to apply to take an additional 1.0 elective FCE in place of the Year 2 practicum. Workplace supervision must have occurred with an MSW supervisor; requests for substitution must be reviewed and approved by the Faculty Assessment Committee.
- Students who choose the thesis option may require at least one additional academic session to complete the program.

MSW Two-Year Program

- Students must complete a total of **8.5 FCEs** including core MSW coursework (4.0 FCEs), required field coursework

(2.0 FCEs), elective coursework (1.0 FCE), and practica (1.5 FCEs). The practicum (0.5 FCE) is required for students in Year 1 and is offered in the Winter session; the Year 2 practicum (September to April) is equivalent to 1.0 FCE and must be in the student's field.
- Thesis: Students complete a total of **8.5 FCEs**, including core MSW coursework (4.0 FCEs), required field coursework (2.0 FCEs), practica (1.5 FCEs), and a thesis (1.0 FCE).

MSW Advanced-Standing Option

- Students will normally complete a total of **4.5 FCEs** including required coursework (2.5 FCEs), elective coursework (1.0 FCE), and a practicum (1.0 FCE) in their field.
- Thesis: Students complete a total of **4.5 FCEs** including required coursework (2.5 FCEs), a practicum (1.0 FCE), and a thesis (1.0 FCE).

Compulsory Courses — Year 2

SWK4514H	Research for Practice with Children and their Families
SWK4608H	Social Work Practice with Families
SWK4620H	Social Work Practice with Children and Adolescents
SWK4625H	The Intersection of Policy and Practice with Children and their Families
SWK4702Y	Social Work Practicum II (full credit)

- **Students in the advanced-standing option** must complete the above courses plus a compulsory course: SWK4510H *Research for Evidence-Based Social Work Practice* (SWK4510H must be completed before taking any of the research courses in the field).

Program Length

6 sessions two-year full-time (typical registration sequence: F/W/S/F/W/S);
3 sessions advanced-standing full-time (typical registration sequence: F/W/S);
6 sessions advanced-standing part-time

Time Limit

3 years full-time;
6 years part-time

Social Work: Social Work MSW; Field: Gerontology

Master of Social Work (Field: Gerontology)

Social workers provide a wide variety of services and programs, both in the community and in institutions that are aimed at enhancing the quality of life of older people and assisting families to adjust to the aging of their family member. Social workers also play a vital role in the development and implementation of social and economic policies at the provincial and national levels through research on aging, consultation with government, and through social advocacy.

All students enrolled in the Social Work in Gerontology field will automatically be enrolled in the Collaborative Specialization in Aging, Palliative and Supportive Care Across the Life Course.

Minimum Admission Requirements

MSW Two-Year Program and MSW Advanced-Standing Option

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Social Work's additional admission requirements stated below.
- Applicants with an appropriate bachelor's degree with a minimum average equivalent to at least a University of Toronto mid-B in the final year of full-time study from a recognized university are admitted to a two-year MSW program.
- Applicants who hold a BSW degree with mid-B average in the final year of full-time study, or its equivalent from a recognized university, may be eligible for the MSW advanced-standing option.
- All applicants must have included 3.0 full-course equivalents (FCEs) in social science courses, including 0.5 FCE in research methodology. A mid-B is strongly recommended in the research methodology course.
- Experience (voluntary or paid) in the social services or related field and knowledge of critical social issues are recommended. Suitability for professional practice in social work will also be considered.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements. Advanced-standing applicants must declare their field and a preference for full-time or part-time studies at the time of application.
- Initial admission inquiries should be made directly to the Faculty of Social Work. Please note that applicants holding the minimum admission requirements are not guaranteed admission. All admission decisions are final.

Program Requirements

MSW Two-Year Program and MSW Advanced-Standing Option

- All MSW students: Agencies that offer practica will likely require a Vulnerable Sector Verification prior to commencing the practicum. Failure to pass this check will jeopardize a student's entry to practicum. Cost and time factors are associated with the Vulnerable Sector Verification. A delay in obtaining the results can impact the start time of a student's practicum. In anticipation of this requirement for the practicum, it is strongly recommended that students begin this process early.
- In the event that a student does not complete two or more required courses, or receives an FZ (inadequate) after repeating any course, normally steps will be taken by the Faculty to recommend the termination of the student's registration.

Compulsory Courses

Year 1 MSW students in the Gerontology field must complete eight half courses (4.0 FCEs) and the Year 1 practicum (0.5 FCE) from the list of required courses below. Students in the Indigenous Trauma and Resiliency field should consult the specific course requirements listed separately in this entry.

SWK4102H	Social Policy and Social Welfare in the Canadian Context
SWK4103H	Elements of Social Work Practice
SWK4105H	Social Work Practice Laboratory
SWK4107H	Foundations of Social Work: Knowledge, Theory, and Values that Inform Practice
SWK4510H	Research for Evidence-Based Social Work Practice (SWK4510H must be completed before taking any of the research courses in the field)
SWK4602H	Social Work Practice with Groups
SWK4605H	Social Work Practice with Individuals and Families
SWK4654H	Social Work Practice in Organizations and Communities
SWK4701H[+]	Social Work Practicum I (prerequisite: SWK4105H completed prior to beginning practicum)

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

- **Students in the MSW two-year program** must declare their field by mid-February of Year 1.
- **Note**: Advanced-standing students normally complete the program in one year of full-time study or two years of part-time study.
- The MSW thesis option provides hands-on research experience. The thesis is an independent piece of research intended to enable students to develop and apply research skills within the context of social work practice and to write a graduate thesis of publishable quality. **Note**: The thesis option is available to a limited number of students — maximum three in any given year — whose proposed research must be approved by a review panel and by the Associate Dean, Research.
- Students in the thesis option who have a minimum of two years' prior full-time social work experience are eligible to apply to take an additional 1.0 elective FCE in place of the Year 2 practicum. Workplace supervision must have occurred with an MSW supervisor; requests for substitution must be reviewed and approved by the Faculty Assessment Committee.
- Students who choose the thesis option may require at least one additional academic session to complete the program.

MSW Two-Year Program

- Students in the MSW two-year program must complete a total of **9.0 FCEs**, including core MSW coursework (4.0 FCEs), required field coursework (2.5 FCEs), elective coursework (1.0 FCE), and practica (1.5 FCEs) in the student's field.
- Thesis: Students in the two-year MSW program complete a total of **9.0 FCEs**, including core MSW coursework (4.0 FCEs), required field coursework (2.5 FCEs), elective coursework (1.0 FCE, 0.5 of which must be from the Collaborative Specialization in Aging, Palliative and Supportive Care Across the Life Course listing), the Year 1 practicum (0.5 FCE), and a thesis (1.0 FCE).

MSW Advanced-Standing Option

- Students in the MSW advanced-standing option will normally complete a total of **5.0 FCEs**, including required coursework (3.0 FCEs), elective coursework (1.0 FCE), and a practicum (1.0 FCE).
- Thesis: Students in the MSW advanced-standing option complete a total of **5.0 FCEs**, including required coursework (3.0 FCEs), elective coursework (1.0 FCE, 0.5 of which must be from the Collaborative Specialization in Aging, Palliative and Supportive Care Across the Life Course listing), and a thesis (1.0 FCE).

Compulsory Courses — Year 2

AGE2000H	Principles of Aging
SWK4513H	Knowledge Building in Social Work
SWK4612Y	Social Work and Aging: Integrated Policy and Practice (full credit)
SWK4618H	Special Issues in Gerontological Social Work
SWK4702Y	Social Work Practicum II (full credit)

- **Students in the MSW advanced-standing option** must complete the above courses plus a compulsory course: SWK4510H *Research for Evidence-Based Social Work Practice* (SWK4510H must be completed before taking any of the research courses in the field).

Program Length

6 sessions two-year full-time (typical registration sequence: F/W/S/F/W/S);
3 sessions advanced-standing full-time (typical registration sequence: F/W/S);
6 sessions advanced-standing part-time

Time Limit

3 years full-time;
6 years part-time

Social Work: Social Work MSW; Field: Health and Mental Health

Master of Social Work (Field: Health and Mental Health)

As members of inter-professional health teams, social workers seek to assist others in understanding the social and community context in which physical and mental illness occur, and the way in which these larger systems contribute to the development of illness and disability and exacerbate or ameliorate the challenges in adapting to illness and living with disability.

Minimum Admission Requirements

MSW Two-Year Program and MSW Advanced-Standing Option

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Social Work's additional admission requirements stated below.
- Applicants with an **appropriate bachelor's degree** with a minimum average equivalent to at least a University of Toronto mid-B in the final year of full-time study from a recognized university are admitted to a two-year MSW program.
- Applicants who hold a **BSW degree** with mid-B average in the final year of full-time study, or its equivalent from a recognized university, may be eligible for the MSW advanced-standing option.
- All applicants must have included 3.0 full-course equivalents (FCEs) in social science courses, including 0.5 FCE in research methodology. A mid-B is strongly recommended in the research methodology course.
- Experience (voluntary or paid) in the social services or related field and knowledge of critical social issues are recommended. Suitability for professional practice in social work will also be considered.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements. Advanced-standing applicants must declare their field and a preference for full-time or part-time studies at the time of application.
- Initial admission inquiries should be made directly to the Faculty of Social Work. Please note that applicants holding the minimum admission requirements are not guaranteed admission. All admission decisions are final.

Program Requirements

MSW Two-Year Program and MSW Advanced-Standing Option

- **All MSW students**: Agencies that offer practica will likely require a Vulnerable Sector Verification prior to commencing the practicum. Failure to pass this check will jeopardize a student's entry to practicum. Cost and time factors are associated with the Vulnerable Sector Verification. A delay in obtaining the results can impact the start time of a student's practicum. In anticipation of this requirement for the practicum, it is strongly recommended that students begin this process early.
- In the event that a student does not complete two or more required courses, or receives an FZ (inadequate) after repeating any course, normally steps will be taken by the Faculty to recommend the termination of the student's registration.

Compulsory Courses

SWK4102H	Social Policy and Social Welfare in the Canadian Context
SWK4103H	Elements of Social Work Practice
SWK4105H	Social Work Practice Laboratory
SWK4107H	Foundations of Social Work: Knowledge, Theory, and Values that Inform Practice
SWK4510H	Research for Evidence-Based Social Work Practice (SWK4510H must be completed before taking any of the research courses in the field)
SWK4602H	Social Work Practice with Groups
SWK4605H	Social Work Practice with Individuals and Families
SWK4654H	Social Work Practice in Organizations and Communities
SWK4701H[+]	Social Work Practicum I (prerequisite: SWK4105H completed prior to beginning practicum)

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

- **Students in the MSW two-year program** must declare their field by mid-February of Year 1.
- **Note**: Advanced-standing students normally complete the program in one year of full-time study or two years of part-time study.

- The MSW thesis option provides hands-on research experience. The thesis is an independent piece of research intended to enable students to develop and apply research skills within the context of social work practice and to write a graduate thesis of publishable quality. **Note**: The thesis option is available to a limited number of students — maximum three in any given year — whose proposed research must be approved by a review panel and by the Associate Dean, Research.
- Students in the thesis option who have a minimum of two years' prior full-time social work experience are eligible to apply to take an additional 1.0 elective FCE in place of the Year 2 practicum. Workplace supervision must have occurred with an MSW supervisor; requests for substitution must be reviewed and approved by the Faculty Assessment Committee.
- Students who choose the thesis option may require at least one additional academic session to complete the program.

MSW Two-Year Program

- Students in the MSW two-year program must complete a total of **8.5 FCEs** including core MSW coursework (4.0 FCEs), required field coursework (2.0 FCEs), elective coursework (1.0 FCE), and practica (1.5 FCEs). The practicum (0.5 FCE) is required for students in Year 1 and is offered in the Winter session; the Year 2 practicum (September to April) is equivalent to 1.0 FCE and must be in the student's field.
- Thesis: Students in the MSW two-year program complete a total of **8.5 FCEs**, including core MSW coursework (4.0 FCEs), required field coursework (2.0 FCEs), practica (1.5 FCEs), and a thesis (1.0 FCE).

MSW Advanced-Standing Option

- Students in the MSW advanced-standing option will normally complete a total of **4.5 FCEs** including required coursework (2.5 FCEs), elective coursework (1.0 FCE), and a practicum (1.0 FCE) in their field.
- Thesis: Students in the MSW advanced-standing option complete a total of **4.5 FCEs** including required coursework (2.5 FCEs), a practicum (1.0 FCE), and a thesis (1.0 FCE).

Compulsory Courses — Year 2

SWK4412H	The Context of Mental Health and Health Practice
SWK4511H	Practice-Based Research in Mental Health and Health
SWK4702Y	Social Work Practicum II (full credit)

- Plus students can then elect to take **one** of three choices:
  - SWK4622H *Social Work Practice in Health* and SWK4604H *Social Work Practice in Mental Health*
  - SWK4622H *Social Work Practice in Health* followed by SWK4632H *Advanced Social Work Practice in Health* (prerequisite: SWK4622H)
  - SWK4604H *Social Work Practice in Mental Health* followed by SWK4631H *Advanced Social Work Practice in Mental Health* (prerequisite: SWK4604H)
- **Students in the MSW advanced-standing option** must complete the above courses plus a compulsory course: SWK4510H *Research for Evidence-Based Social Work Practice* (SWK4510H must be completed before taking any of the research courses in the field).

Program Length

6 sessions two-year full-time (typical registration sequence: F/W/S/F/W/S);
3 sessions advanced-standing full-time (typical registration sequence: F/W/S);
6 sessions advanced-standing part-time

Time Limit

3 years full-time;
6 years part-time

Social Work: Social Work MSW; Field: Human Services Management and Leadership

Master of Social Work (Field: Human Services Management and Leadership)

The not-for-profit sector is primarily responsible for the delivery of social services in Canada. There is a critical need for people who are able to assume leadership roles in the community social services sector.

Minimum Admission Requirements

MSW Two-Year Program and MSW Advanced-Standing Option

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Social Work's additional admission requirements stated below.
- Applicants with an **appropriate bachelor's degree** with a minimum average equivalent to at least a University of Toronto mid-B in the final year of full-time study from a recognized university are admitted to a two-year MSW program.
- Applicants who hold a **BSW degree** with mid-B average in the final year of full-time study, or its equivalent from a recognized university, may be eligible for the MSW advanced-standing option.
- Students applying to the Human Services Management and Leadership field must have at least two years of volunteer or work experience in human services.
- All applicants must have included 3.0 full-course equivalents (FCEs) in social science courses, including 0.5 FCE in research methodology. A mid-B is strongly recommended in the research methodology course.

- Experience (voluntary or paid) in the social services or related field and knowledge of critical social issues are recommended. Suitability for professional practice in social work will also be considered.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements. Advanced-standing applicants must declare their field and a preference for full-time or part-time studies at the time of application.
- Initial admission inquiries should be made directly to the Faculty of Social Work. Please note that applicants holding the minimum admission requirements are not guaranteed admission. All admission decisions are final.

Program Requirements

MSW Two-Year Program and MSW Advanced-Standing Option

- **All MSW students**: Agencies that offer practica will likely require a Vulnerable Sector Verification prior to commencing the practicum. Failure to pass this check will jeopardize a student's entry to practicum. Cost and time factors are associated with the Vulnerable Sector Verification. A delay in obtaining the results can impact the start time of a student's practicum. In anticipation of this requirement for the practicum, it is strongly recommended that students begin this process early.
- In the event that a student does not complete two or more required courses, or receives an FZ (inadequate) after repeating any course, normally steps will be taken by the Faculty to recommend the termination of the student's registration.

Compulsory Courses

Year 1 MSW students in the Human Services Management and Leadership field must complete eight half courses (4.0 FCEs) and the Year 1 practicum (0.5 FCE) from the list of required courses below.

SWK4102H	Social Policy and Social Welfare in the Canadian Context
SWK4103H	Elements of Social Work Practice
SWK4105H	Social Work Practice Laboratory
SWK4107H	Foundations of Social Work: Knowledge, Theory, and Values that Inform Practice
SWK4510H	Research for Evidence-Based Social Work Practice (SWK4510H must be completed before taking any of the research courses in the field)
SWK4602H	Social Work Practice with Groups
SWK4605H	Social Work Practice with Individuals and Families
SWK4654H	Social Work Practice in Organizations and Communities
SWK4701H[+]	Social Work Practicum I (prerequisite: SWK4105H completed prior to beginning practicum)

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

- **Students in the MSW two-year program** must declare their field by mid-February of Year 1.
- **Note**: Advanced-standing students normally complete the program in one year of full-time study or two years of part-time study.
- The MSW thesis option provides hands-on research experience. The thesis is an independent piece of research intended to enable students to develop and apply research skills within the context of social work practice and to write a graduate thesis of publishable quality. **Note**: The thesis option is available to a limited number of students — maximum three in any given year — whose proposed research must be approved by a review panel and by the Associate Dean, Research.

- Students in the MSW two-year program must complete a total of **8.5 FCEs** including core MSW coursework (4.0 FCEs), required field coursework (2.0 FCEs), elective coursework (1.0 FCE), and practica (1.5 FCEs). The practicum (0.5 FCE) is required for students in Year 1 of the MSW two-year program and is offered in the Winter session; the Year 2 practicum (September to April) is equivalent to 1.0 FCE and must be in the student's field.
- Students in the Human Services Management and Leadership field do not have the option of doing a thesis.

MSW Advanced-Standing Option

- Students in the MSW advanced-standing option will normally complete a total of **4.5 FCEs** including required coursework (2.5 FCEs), elective coursework (1.0 FCE), and a practicum (1.0 FCE) in their field.

Compulsory Courses — Year 2

SWK4425H	Human Services Management and Leadership
SWK4426H	Financial Management and Leadership in Human Service Organizations
SWK4427H	Human Resource Management in Human Service Organizations

SWK4515H	Research and Quality Improvement in Human Service Organizations
SWK4702Y	Social Work Practicum II (full credit)

- **Students in the MSW advanced-standing option** must complete the above courses plus a compulsory course: SWK4510H *Research for Evidence-Based Social Work Practice* (SWK4510H must be completed before taking any of the research courses in the field.)

Program Length

6 sessions two-year full-time (typical registration sequence: F/W/S/F/W/S);
3 sessions advanced-standing full-time (typical registration sequence: F/W/S);
6 sessions advanced-standing part-time

Time Limit

3 years full-time;
6 years part-time

Social Work: Social Work MSW; Field: Indigenous Trauma and Resiliency

Master of Social Work (Field: Indigenous Trauma and Resiliency)

The Indigenous Trauma and Resiliency field integrates theory and research drawn from social work and Indigenous knowledge for application in the delivery of services and interventions for Indigenous populations. There is an emphasis on the First Nations, Métis, and Inuit peoples of Canada and other Indigenous groups. The curriculum is offered through online and intensive classroom formats.

Initial admission inquiries should be made directly to the Factor-Inwentash Faculty of Social Work. Applicants holding the minimum admission requirements are not guaranteed admission. All admission decisions are final.

This field is offered only as a two-year, full-time program.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Factor-Inwentash Faculty of Social Work's additional admission requirements stated below.
- Applicants with an appropriate bachelor's degree or Bachelor of Social Work (BSW) degree with a minimum average equivalent to at least a University of Toronto mid-B in the final year of full-time study from a recognized university can be admitted to this field.
- All applicants must have completed 3.0 full-course equivalents (FCEs) in social science courses, including 0.5 FCE in research methodology. A mid-B is strongly recommended in the research methodology course.
- Three years of experience (voluntary or paid) in the social services or related field and knowledge of critical social issues. Suitability for professional practice in social work will also be considered.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements
- Applicants must submit a resumé and demonstrate at least three years of experience in social services, preferably working with Aboriginal or Indigenous communities.
- Applicants may be asked to complete an admissions interview in person or by Skype as part of the application process.

Program Requirements

- Students must complete **7.5 FCEs** as follows:
  - Year 1: seven half courses (3.5 FCEs)
  - Year 2:
    - six half courses (3.0 FCEs) and
    - a 450-hour summer practicum (1.0 FCE).
- Students entering the program with BA or BASc courses must complete an additional 1.0 FCE (two half courses SWK4102H and SWK4516H [summer practicum]) in Year 1.
- Students are expected to submit a Vulnerable Sector Verification by June 1 prior to the course registration. It is strongly recommended that students begin this process early.

Year 1 Courses

SWK4101H	Understanding Historical and Multigenerational Trauma
SWK4102H	Social Policy and Social Welfare in the Canadian Context
SWK4106H	Social Work Ethics and Indigenous Communities
SWK4108H	Sexual Abuse, Sexual Assault, and the Family
SWK4109H	Trauma and Human Development
SWK4110H	Trauma and Addiction
SWK4111H	Trauma-Informed Schools, Community Intervention, and the Healing Power of Ceremony
SWK4510H	Research for Evidence-Based Social Work Practice
SWK4516H	Indigenous Trauma and Resiliency Practicum

Year 2 Courses

SWK4517H	Indigenous and Participatory Research Methods

SWK4703Y	MSW ITR Practicum III
SWK4901H	Facilitating Training in Indigenous Communities
SWK4902H	Indigenous Perspectives on Grief, Loss, and Unattended Sorrow
SWK4903H	Trauma-Informed Care, Organizations, Supervision, and Leadership
SWK4904H	Working with Couples and Families in Indigenous Context
SWK4905H	Seeing the Need, Creating the Solution

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Social Work: Social Work MSW; Field: Social Justice and Diversity

Master of Social Work (Field: Social Justice and Diversity)

Reducing inequalities and marginalization is in line with professional social work's agenda of anti-oppression and social justice. Social work is committed to working with and on behalf of people from disenfranchised backgrounds.

Minimum Admission Requirements

MSW Two-Year Program and MSW Advanced-Standing Option

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Social Work's additional admission requirements stated below.
- Applicants with an **appropriate bachelor's degree** with a minimum average equivalent to at least a University of Toronto mid-B in the final year of full-time study from a recognized university are admitted to a two-year MSW program.
- Applicants who hold a **BSW degree** with mid-B average in the final year of full-time study, or its equivalent from a recognized university, may be eligible for the MSW advanced-standing option.
- All applicants must have included 3.0 full-course equivalents (FCEs) in social science courses, including 0.5 FCE in research methodology. A mid-B is strongly recommended in the research methodology course.
- Experience (voluntary or paid) in the social services or related field and knowledge of critical social issues are recommended. Suitability for professional practice in social work will also be considered.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements. Advanced-standing applicants must declare their field and a preference for full-time or part-time studies at the time of application.
- Initial admission inquiries should be made directly to the Faculty of Social Work. Please note that applicants holding the minimum admission requirements are not guaranteed admission. All admission decisions are final.

Program Requirements

MSW Two-Year Program and MSW Advanced-Standing Option

- **All MSW students**: Agencies that offer practica will likely require a Vulnerable Sector Verification prior to commencing the practicum. Failure to pass this check will jeopardize a student's entry to practicum. Cost and time factors are associated with the Vulnerable Sector Verification. A delay in obtaining the results can impact the start time of a student's practicum. In anticipation of this requirement for the practicum, it is strongly recommended that students begin this process early.
- In the event that a student does not complete two or more required courses, or receives an FZ (inadequate) after repeating any course, normally steps will be taken by the Faculty to recommend the termination of the student's registration.

SWK4102H	Social Policy and Social Welfare in the Canadian Context
SWK4103H	Elements of Social Work Practice
SWK4105H	Social Work Practice Laboratory
SWK4107H	Foundations of Social Work: Knowledge, Theory, and Values that Inform Practice
SWK4510H	Research for Evidence-Based Social Work Practice (SWK4510H must be completed before taking any of the research courses in the field)
SWK4602H	Social Work Practice with Groups
SWK4605H	Social Work Practice with Individuals and Families
SWK4654H	Social Work Practice in Organizations and Communities
SWK4701H[+]	Social Work Practicum I (prerequisite: SWK4105H completed prior to beginning practicum)

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

- **Students in the MSW two-year program** must declare their field by mid-February of Year 1.
- **Note**: Advanced-standing students normally complete the program in one year of full-time study or two years of part-time study.
- The MSW thesis option provides hands-on research experience. The thesis is an independent piece of research intended to enable students to develop and apply research skills within the context of social work practice and to write a graduate thesis of publishable quality. **Note**: The thesis option is available to a limited number of students — maximum three in any given year — whose proposed research must be approved by a review panel and by the Associate Dean, Research.
- Students in the thesis option who have a minimum of two years' prior full-time social work experience are eligible to apply to take an additional 1.0 elective FCE in place of the Year 2 practicum. Workplace supervision must have occurred with an MSW supervisor; requests for substitution must be reviewed and approved by the Faculty Assessment Committee.
- Students who choose the thesis option may require at least one additional academic session to complete the program.

MSW Two-Year Program

- Students must complete a total of **8.5 FCEs** including core MSW coursework (4.0 FCEs), required field coursework (2.0 FCEs), elective coursework (1.0 FCE), and practica (1.5 FCEs). The practicum (0.5 FCE) is required for students in Year 1 and is offered in the Winter session; the Year 2 practicum (September to April) is equivalent to 1.0 FCE and must be in the student's field.
- Thesis: Students complete a total of **8.5 FCEs**, including core MSW coursework (4.0 FCEs), required field coursework (2.0 FCEs), practica (1.5 FCEs), and a thesis (1.0 FCE).

MSW Advanced-Standing Option

- Students in the MSW advanced-standing option will normally complete a total of **4.5 FCEs** including required coursework (2.5 FCEs), elective coursework (1.0 FCE), and a practicum (1.0 FCE) in their field.
- Thesis: Students complete a total of **4.5 FCEs** including required coursework (2.5 FCEs), a practicum (1.0 FCE), and a thesis (1.0 FCE).

Compulsory Courses — Year 2

SWK4304H	Globalization and Transnationalism: Intersections of Policy and Community Practice Locally and Globally
SWK4306H	Theoretical Approaches to Defining Social Injustice and Engaging in Social Change
SWK4512H	Research Knowledge for Social Justice
SWK4606H	Diversity, Access, and Equity in Social Work Practice
SWK4702Y	Social Work Practicum II (full credit)

- **Students in the MSW advanced-standing option** must complete the above courses plus a compulsory course: SWK4510H *Research for Evidence-Based Social Work Practice* (SWK4510H must be completed before taking any of the research courses in the field).

Program Length

6 sessions two-year full-time (typical registration sequence: F/W/S/F/W/S);
3 sessions advanced-standing full-time (typical registration sequence: F/W/S);
6 sessions advanced-standing part-time

Time Limit

3 years full-time;
6 years part-time

Social Work: Social Work MSW Courses

Elective Courses

Courses are offered in various areas of social work practice. The choice of electives in any given year is contingent on available faculty resources. Not every course is given in any one year. Please consult the Faculty of Social Work website.

AGE2000H	Principles of Aging
EIP3000H	Coordinating Seminar: Ethnic, Immigration and Pluralism Studies
PAS3700H	Multidisciplinary Aspects of Addictions
SWK4210H	Promoting Empowerment: Working at the Margins
SWK4417H	Adolescence: Social Work Challenges and the Role of Social Work
SWK4420H	Human Rights and Social Justice
SWK4422H	Social Housing and Homelessness
SWK4506H	Applied Quantitative Data Analysis
SWK4516H	Indigenous Trauma and Resiliency Practicum
SWK4610H	Advanced Social Work Practice with Couples
SWK4614H	Social Work Practice in Palliative Care
SWK4615H	Cognitive Behavioural Theories and Clinical Social Work Practice
SWK4616H	Drug Dependencies: Interventive Approaches
SWK4619H	Family Mediation: Theory and Practice
SWK4623H	Violence in Families: Multilevel Intervention in Interdisciplinary Practice
SWK4624H	Feminist Social Work Practice

SWK4629H	Social Work Practice and Aboriginal Peoples
SWK4634H	Family Practice Across the Life Cycle
SWK4636H	Special Topics in Mental Health Social Work
SWK4637H	Special Topics in Health Social Work
SWK4638H	Social Work Practice in Children's Mental Health
SWK4639H	Special Topics in Child and Family Social Work
SWK4640H	Special Topics in Mental Health Social Work II
SWK4641H	Special Topics in Social Work in Gerontology
SWK4642H	Special Topics in Human Services Management and Leadership
SWK4643H	Special Topics in Social Justice and Diversity
SWK4645H	Special Topics in Children and their Families II
SWK4646H	Special Topics in Human Services Management and Leadership II (modular course)
SWK4647H	Family-Centred Practices in Addictions and Mental Health
SWK4658H	Social Work with Immigrants and Refugees
SWK4667H	Information Technology in Professional Social Work Practice
SWK4668H	Welfare of Children
SWK4669H	Psychodynamic Theories and Clinical Social Work Practice
SWK4670H	Cybercounselling and Social Work Practice
SWK4671H	Neuroscience and Social Work Practice
SWK4673H	Mindfulness Therapy and Social Work Practice

Special Studies

Special Studies courses are designed to provide seminars or tutorials under the direction of a faculty member. The focus is on a topic of particular interest to the student which is not included in available courses.

SWK4801H	Special Studies I
SWK4802H	Special Studies II
SWK4803H	Special Studies III
SWK4804H	Special Studies IV

Social Work: Social Work PhD

Doctor of Philosophy

Program Description

The PhD program has a tradition of scholarly excellence based on the quality of the research knowledge, competence, and output of its faculty. Doctoral graduates are practice leaders and faculty members throughout the world. Enrolment in the Faculty of Social Work entails adherence to the standards of professional behaviour for the social work profession set forth in the Social Work Code of Ethics of the Canadian Association of Social Workers.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the graduate unit's additional admission requirements stated below.
- Master of Social Work degree or an equivalent master's degree with at least a B+ standing from an accredited program in a recognized university.
- Competency in basic statistical methods at an introductory level.
- Educational and professional experience that indicates a capacity to undertake research-oriented post-graduate work.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements. Advanced-standing applicants must declare their field of specialization and a preference for full-time or part-time studies at the time of application.
- Initial admission inquiries should be made directly to the Faculty of Social Work. The application deadline for the PhD program is December 1. The Faculty of Social Work does not guarantee admission to all applicants who meet its minimum requirements.

Program Requirements

- **Coursework.** Students must complete a total of **5.5 full-course equivalents (FCEs)**, generally within two years of registration, as follows:
  - 2.0 FCEs in required research courses:
    - SWK6301H *Intermediate Statistics and Data Analysis* (0.5 FCE)
    - SWK6302H *Epistemology and Social Work Research* (0.5 FCE)
    - SWK6307H *Designing and Implementing Qualitative Social Work Research* (0.5 FCE)
    - SWK6308H *Designing and Implementing Quantitative Social Work Research* (0.5 FCE)
  - Students may be exempt from these research courses but will substitute alternate elective courses for each exempted course. Note: SWK4506H (0.5 FCE) is a prerequisite for SWK6301H, or an equivalent competency exam must be passed by all incoming students with a grade of A.

- 2.5 FCEs in graduate-level electives, including at least 0.5 FCE from Social Work and at least 0.5 FCE from another graduate unit (with the approval of the PhD Director).
- SWK7000H *Doctoral Thesis Seminar* (Credit/No Credit) (0.5 FCE) is required during the Fall session of Year 2.
- Year 1 PhD students will attend a mandatory Year 1 colloquium during the Winter session (two full days), no credit.
- Following completion of **at least nine of the above courses**, students must satisfactorily complete SWK8000H *Comprehensive Exam* (Credit/No Credit) (0.5 FCE) during the Winter session of Year 2.

- Following completion of all coursework, students must satisfactorily complete:
  - a **thesis proposal**,
  - a **thesis,**
    - which can be in the traditional thesis format, which constitutes a distinct contribution to knowledge in the field of social work, or
    - a three-paper option based on the same fundamental principles of independent student work and scholarly rigour. The three-paper dissertation option allows students to write three related papers in a given topic or area of interest in which they have conducted research as required for the PhD program.
  - and finally, an **oral thesis defence**.
- Students are expected to complete their coursework, comprehensive paper, and have their thesis proposal approved by the end of August of Year 3. The research, writing, and Doctoral Final Oral Examination of the thesis are typically completed by the end of Year 5.
- Students must have an adequate knowledge of a language other than English if an additional language is deemed essential for satisfactory completion of research for the thesis. The Faculty is responsible for ensuring that an acceptable certificate of language competence is deposited with the School of Graduate Studies.
- In the event that a student does not complete two or more required courses (excluding SWK8000H *Comprehensive Exam*), or receives an FZ (inadequate) after repeating any course, the Faculty will take steps to recommend the termination of the student's registration.
- In the event that a student receives an NCR (No Credit) for SWK8000H *Comprehensive Exam*, the Faculty will take steps to recommend the termination of the student's registration.

Program Length

4 years

Time Limit

6 years

Social Work: Social Work PhD Courses

Compulsory Courses

SWK6301H	Intermediate Statistics and Data Analysis (prerequisite: SWK4506H or pass a competency exam)
SWK6302H	Epistemology and Social Work Research
SWK6307H	Designing and Implementing Qualitative Social Work Research
SWK6308H	Designing and Implementing Quantitative Social Work Research
SWK7000H	Doctoral Thesis Seminar (Credit/No Credit)
SWK8000H	Comprehensive Exam (Credit/No Credit)

Recommended Course

SWK4506H	Applied Quantitative Data Analysis (prerequisite for SWK6301H; students who pass a competency exam will be exempted from taking SWK4506H)

Elective Courses

The choice of electives in any given year is contingent on available faculty resources. Not every course is available in any one year. Please consult the Faculty of Social Work website.

SWK6006H	Theory and Practice of Teaching Social Work
SWK6007H	Advanced Qualitative Research Methods in Social Work
SWK6101H	Critical Evaluation of Social Work Practice Theories
SWK6106H	Family Mediation: Research and Practice
SWK6203H	Comparative Social Welfare Systems
SWK6205H	Social Planning in Social Welfare
SWK6401H	Sociocultural Issues in Social Work
SWK6406H	Housing Theory and Research Methods

These courses are designed to provide seminars or tutorials according to the particular interests of students enrolled:

SWK6501H	Special Studies 1
SWK6502H	Special Studies 2
SWK6503H	Special Studies 3
SWK6504H	Special Studies 4

Social Work: Social Work Advanced Diploma in Social Service Administration

Admissions to this diploma program have closed.

The goal of this program is to provide a rigorous, comprehensive grounding in the key values, skills, and knowledge required by administrators, managers, and leaders of social service organizations. The diploma program is designed for students who are active in the work force.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Social Work's additional admission requirements stated below.
- Applicants must have an MSW or master's degree in a related social service field and have at least three years of experience in social services.

Program Requirements

- Students must complete **3.0 full-course equivalents (FCEs)** offered in modular format one full day per month.

Program Length

3 sessions (1 year) full-time;
6 sessions (2 years) part-time

Time Limit

5 years full-time;
5 years part-time

Social Work: Social Work Advanced Diploma in Social Service Administration Courses

Compulsory Courses

SWK4425H	Leadership Skills in Social Service Organizations
SWK4426H	Financial Management of Social Service Organizations
SWK4427H	Human Resource Management in Social Service Organizations
SWK4515H	Research and Quality Improvement in Human Service Organizations

Elective Courses

1.0 elective full-course equivalent (FCE) taken in conjunction with the MSW curriculum or 0.5 elective FCE and a major paper addressing a funding, management, or structural challenge in a social service agency.

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Addiction Studies
  - Sociology, MA, PhD
- Aging, Palliative and Supportive Care Across the Life Course
  - Sociology, MA, PhD
- Contemporary East and Southeast Asian Studies
  - Sociology, MA
- Development Policy and Power
  - Sociology, MA
- Diaspora and Transnational Studies
  - Sociology, MA, PhD
- Environmental Studies
  - Sociology, MA, PhD
- Ethnic, Immigration and Pluralism Studies
  - Sociology, MA, PhD
- Food Studies
  - Sociology, MA, PhD
- Jewish Studies
  - Sociology, MA, PhD
- Sexual Diversity Studies
  - Sociology, MA, PhD
- Women and Gender Studies
  - Sociology, MA, PhD

Overview

The Department of Sociology is consistently the top-ranked sociology department in Canada, with internationally renowned scholars who have an excellent track record for securing research funding, producing outstanding sociological research, and mentoring graduate students extensively. A collegial atmosphere encourages innovation and rigour in research and teaching. The community of scholars includes faculty members, outstanding postdoctoral scholars, and creative and engaged graduate students.

The department's graduate programs provide exceptional training to students in advanced social research. The focus is on transforming graduate students from consumers of academic research into producers of new sociological knowledge. To that end, there is a strong focus on methodological training; graduate students are integrated thoroughly into the faculty research programs in the department.

Sociology: Sociology MA

Master of Arts

Program Description

The MA program trains students in the theoretical approaches, research designs, and analytical skills central to the field of Sociology. It provides extensive background and knowledge valuable for a number of rewarding careers in the public and private sectors. The program also builds a strong foundation in sociological training for those who plan to pursue a doctoral degree in Sociology.

Students have the option of completing the master's degree in one of two ways:

- Coursework (the preferred option for those proceeding to the PhD).
- Coursework plus research paper.

Students can take the program on a part-time or full-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Sociology's additional admission requirements stated below.
- An appropriate bachelor's degree with 5.0 full-course equivalents (FCEs) in sociology, with an overall B+ average in each of the last two years of post-secondary education. Those with excellent grades but whose preparation is insufficient will be required to take additional courses.
- Applicants are also expected to have acquired basic research and statistical skills.
- Admission decisions are based on grades and indications of superior qualifications such as letters of recommendation and a sample of the applicant's work.
- In addition to the School of Graduate Studies' online application form, applicants must submit:
  - Two letters of reference from instructors or research supervisors.
  - A paper, including summary, which the student feels represents his or her best work.
  - A one-page, single-spaced typed statement of interest indicating research interests, research experience, and reasons for applying to study sociology at the University of Toronto.
- Proficiency in the English language, demonstrated by all applicants educated outside Canada whose primary language is not English. See General Regulations section 4.3 English-Language Proficiency for minimum TOEFL (Test of English as a Foreign Language and TWE (Test of Written English) scores required.

Program Requirements

- **Coursework Option:** the preferred option for those proceeding to the PhD
  - 4.0 FCEs or eight half courses including:
    - SOC6001H *Classical Sociological Theory I*
    - SOC6302H *Statistics for Sociologists*
    - SOC6712H *Qualitative Methods I.*
- **Coursework Plus Research Paper Option**
  - 3.0 FCEs or six half courses including:
    - SOC6001H *Classical Sociological Theory I*
    - SOC6302H *Statistics for Sociologists*
    - SOC6712H *Qualitative Methods I.*
  - A research paper.
- Regardless of option, the MA program is completed in 12 months.

- The choice of courses in all programs must be approved by the department.
- A maximum of 0.5 FCE in reading courses may be counted towards the degree requirements.
- A maximum of 0.5 FCE in elective courses taken outside the department may be counted towards the degree requirements unless approval of the Graduate Coordinator is obtained.
- Students must maintain a **B average** to be recommended for the MA degree.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
15 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Sociology: Sociology PhD

Doctor of Philosophy

Program Description

The PhD program provides training in conducting theoretically rich and methodologically sophisticated sociological research. Through the program, students design and carry out research projects, present their work at professional conferences, and author scholarly publications. The program is designed to provide both a broad knowledge of the discipline and specialized methodological and subject matter expertise.

Applicants may enter the PhD program via one of two routes: 1) following completion of an appropriate MA or 2) direct entry after completing a bachelor's degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Sociology's additional admission requirements stated below.
- The normal requirement is completion of the University of Toronto MA, with at least an A- standing. All students must demonstrate that their master's degree program included coursework equivalent to Classical Social Theory, Social Statistics, and Qualitative Methods I. Some students may be required to take prescribed additional courses.
- Admission decisions are based on grades and indications of superior qualifications such as letters of recommendation and a sample of the applicant's work.
- In addition to the School of Graduate Studies' online application form, applicants must submit:
  - Two letters of reference from instructors or research supervisors.
  - A paper, including summary, which the student feels represents his or her best work.
  - A one-page, single-spaced typed statement of interest indicating research interests, research experience, and reasons for applying to study sociology at the University of Toronto.
  - Proficiency in the English language, demonstrated by all applicants educated outside Canada whose primary language is not English. See General Regulations section 4.3 English-Language Proficiency for minimum TOEFL (Test of English as a Foreign Language and TWE (Test of Written English) scores required.

Program Requirements

- **Coursework.** Students must complete **5.0 full-course equivalents (FCEs)** including:
  - SOC6101H *Contemporary Sociological Theory*
  - SOC6707H *Intermediate Data Analysis*
  - SOC6511H *Professional Development Seminar I*
  - SOC6611H *Professional Development Seminar II*
  - SOC6711Y *Research Practicum*
  - If a student has already taken these courses at the graduate level, other courses will be substituted to obtain the 5.0 FCEs total.
  - A maximum of 0.5 FCE in reading courses may be counted towards the degree requirements.
  - A maximum of 0.5 FCE in elective courses taken outside the department may be counted towards the degree requirements unless approval of the Graduate Coordinator is obtained.
- An average of **at least B+** is required in order to be eligible to continue in the following year of any program. Failure in any course (that is, less than a B-) will require a review of the student's total program by the department.
- Doctoral students must complete SOC6511H and SOC6611H **Professional Seminar Series** (CR/NCR). These seminars consist of a series of workshops designed to guide students in their graduate school career and beyond. SOC6511H *Professional Development Seminar I* must be completed in the Fall session of Year 1. SOC6611H *Professional Development Seminar II* must be completed in the Fall session of Year 3.
- Two **comprehensive examinations**, which must be completed by the end of Year 2. If a student fails a comprehensive exam, the student has one attempt to rewrite the exam. The rewrite must occur in the next available exam session.
- Submission of a written **thesis proposal** and its successful oral defence before a supervisory committee consisting of three faculty members. If a student should fail, the student is permitted one additional opportunity to defend a revised thesis proposal.
- University policy requires that students complete all their non-thesis requirements (coursework, comprehensive examinations, thesis proposal, and language requirement if applicable) by the end of Year 3.
- Preparation of an original **PhD thesis**, which must be defended at a **Doctoral Final Oral Examination**.
- Candidates must have an adequate knowledge of **a language other than English** if an additional language is deemed essential for satisfactory completion of research for the thesis.

- Two years of **residence**, whereby students must be on campus and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Sociology's additional admission requirements stated below.
- The department may recommend admission directly after completion of an appropriate bachelor's degree. Direct entry of this kind will only be recommended for outstanding students who have provided a clear and detailed plan for thesis research.
- Admission decisions are based on grades and indications of superior qualifications such as letters of recommendation and a sample of the applicant's work.
- In addition to the School of Graduate Studies' online application form, applicants must submit:
  - Two letters of reference from instructors or research supervisors.
  - A paper, including summary, which the student feels represents his or her best work.
  - A one-page, single-spaced typed statement of interest indicating research interests, research experience, and reasons for applying to study sociology at the University of Toronto.
  - Proficiency in the English language, demonstrated by all applicants educated outside Canada whose primary language is not English. See General Regulations section 4.3 English-Language Proficiency for minimum TOEFL (Test of English as a Foreign Language and TWE (Test of Written English) scores required.

Program Requirements

- **Coursework.** Students must complete **6.5 full-course equivalents (FCEs)** including:
  - SOC6001H *Classical Sociological Theory I*
  - SOC6101H *Contemporary Sociological Theory*
  - SOC6302H *Statistics for Sociologists*
  - SOC6511H *Professional Development Seminar I*
  - SOC6611H *Professional Development Seminar II*
  - SOC6707H *Intermediate Data Analysis*
  - SOC6711Y *Research Practicum*
  - SOC6712H *Qualitative Methods I.*
  - A maximum of 0.5 FCE in reading courses and 0.5 FCE in elective courses taken outside the department may be counted towards the degree requirements.
- An average of **at least B+** is required in order to be eligible to continue in the following year of any program. Failure in any course (that is, less than a B-) will require a review of the student's total program by the department.
- Doctoral students must complete SOC6511H and SOC6611H **Professional Seminar Series** (CR/NCR). These seminars consist of a series of workshops designed to guide students in their graduate school career and beyond. SOC6511H *Professional Development Seminar I* must be completed in the Fall session of Year 1. SOC6611H *Professional Development Seminar II* must be completed in the Fall session of Year 3.
- Two **comprehensive examinations**, which must be completed by the end of Year 2. If a student fails a comprehensive exam, the student has one attempt to rewrite the exam. The rewrite must occur in the next available exam session.
- Submission of a written **thesis proposal** and its successful oral defence before a supervisory committee consisting of three faculty members. If a student should fail, the student is permitted one additional opportunity to defend a revised thesis proposal.
- University policy requires that students complete all their non-thesis requirements (coursework, comprehensive examinations, thesis proposal, and language requirement if applicable) by the end of Year 3.
- Preparation of an original **PhD thesis**, which must be defended at a **Doctoral Final Oral Examination**.
- Candidates must have an adequate knowledge of **a language other than English** if an additional language is deemed essential for satisfactory completion of research for the thesis.
- Two years of **residence**, whereby students must be on campus and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.

Sociology: Sociology MA, PhD Courses

For details on course offerings, check with the departmental graduate office.

Theory and Methods of Sociology — Core Courses

• SOC6001H	• Sociological Theory I
• SOC6101H	• Sociological Theory II
• SOC6201H	• Sociological Theory III

• SOC6301H	• Sociological Theory IV
• SOC6302H	• Statistics for Sociologists
• SOC6303H	• Ethnography
• SOC6309H	• Indigeneity I
• SOC6401H	• Special Topics in Sociological Theory
• SOC6502H	• The Sociology Curriculum
• SOC6707H	• Intermediate Data Analysis
• SOC6708H	• Advanced Data Analysis
• SOC6710H	• The Logic of Social Inquiry
• SOC6711Y+	• Research Practicum
• SOC6712H	• Qualitative Methods I
• SOC6713H	• Qualitative Methods II
• SOC6715H	• Historical Sociology

+ *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Areas of Specialization

Gender and Family

SOC6017H	Sociology of Families I
SOC6019H	Gender Relations I
SOC6119H	Gender Relations II
SOC6219H	Gender Relations III

Health and Mental Health

SOC6022H	Sociology of Health
SOC6023H	Sociology of Mental Health I
SOC6024H	Special Topics in Health
SOC6122H	Sociology of Mental Health II
SOC6126H	The Social Ecology of Health

Immigration, Ethnicity, and Race

SOC6002H	Immigration I
SOC6003H	Immigration II
SOC6009H	Ethnicity I
SOC6109H	Ethnicity II
SOC6209H	Ethnicity III

Networks and Community

SOC6008H	Network Analysis I
SOC6108H	Network Analysis II
SOC6214H	Sociology of Urbanization
SOC6314H	Community
SOC6414H	Urban Organization

Political Sociology

SOC6010H	Political Sociology I
SOC6110H	Political Sociology II
SOC6210H	Political Sociology III
SOC6014H	Environmental Sociology I
SOC6125H	Theories of Social Change

Sociology of Crime and Law

CRI3140H	Special Topics in Criminology and Sociolegal Studies
SOC6006H	Sociology of Crime and Law I: Criminology
SOC6106H	Sociology of Crime and Law II: Sociology of Law
SOC6206H	Sociology of Crime and Law III: Punishment
SOC6306H	Advanced Topics in Sociology of Crime and Law I
SOC6406H	Advanced Topics in Sociology of Crime and Law II
SOC6506H	Advanced Topics in Sociology of Crime and Law III

Sociology of Culture

SOC6516H	Sociology of Culture
SOC6517H	Culture and Cognition
SOC6518H	Culture Industries
SOC6520H	Special Topics in Sociology of Culture

Work, Stratification, and Markets

SOC6012H	Work, Stratification, and Markets I
SOC6013H	Social Inequality I

SOC6212H	Work, Stratification, and Markets III
SOC6312H	Work, Stratification, and Markets IV

Other Courses

SOC6021Y	Sociology and the Policy Process in Canada
SOC6511H	Professional Development Seminar I (Credit/No Credit)
SOC6611H	Professional Development Seminar II (Credit/No Credit)
SOC6811H	Seminar in Teaching

Special Reading Courses

SOC6015H	A reading course or individual research in an approved field I
SOC6115H	A reading course or individual research in an approved field II

MA Research Paper

SOC6215Y	MA Research Paper

Spanish

Spanish: Introduction

Faculty Affiliation

Arts and Science

Degree Programs

Spanish

MA and PhD

- Fields:
  - Hispanic Linguistics;
  - Hispanic Literatures and Cultures

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Book History and Print Culture
  - Spanish, MA, PhD
- Diaspora and Transnational Studies
  - Spanish, MA, PhD
- Women and Gender Studies
  - Spanish, MA, PhD

Overview

The Department of Spanish offers graduate programs leading to two degrees: Master of Arts and Doctor of Philosophy. MA and PhD students specialize in one of two fields:

- Hispanic Linguistics
- Hispanic Literatures and Cultures.

Applicants are admitted under the General Regulations of the School of Graduate Studies and must also satisfy the department's requirements stated below. In all cases, programs must be approved by the department.

The application process for the **Master of Arts** program is competitive; meeting the minimum standards for admission does not guarantee acceptance.

The admissions process for the **Doctor of Philosophy** program is competitive; it is based on a number of factors in addition to grades. The principal factors include the ability of the department to offer graduate work in the applicant's preferred areas of interest, the availability of appropriate supervisory resources, and the suitability of the applicant in relation to the academic profile and programs of the department. The department does not allow direct entry to the PhD program with a BA, nor does it allow MA students to transfer to the PhD program before the coursework for the MA is completed.

Spanish: Spanish MA

Master of Arts

Program Description

The application process for the Master of Arts program is competitive; meeting the minimum standards for admission does not guarantee acceptance.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Spanish's additional admission requirements stated below.
- An appropriate bachelor's degree in Spanish or a cognate discipline from a recognized university.
- Fluency in spoken and written Spanish with a general background in Hispanic literature and/or linguistics, normally demonstrated through undergraduate coursework.
- Applicants apply online and should arrange for electronic submission of the following materials:
  - A one-page statement of purpose, outlining the applicant's areas of interest (in English).
  - A sample of written work in Spanish (10 to 12 pages).
  - Two letters of recommendation, ideally in English (one of the letters must comment on the applicant's fluency in Spanish).
  - A curriculum vitae in English.

Program Requirements

- 4.0 full-course equivalents (FCEs) at the graduate level.
- MA students specialize in one of two fields:
  - Hispanic Linguistics.
  - Hispanic Literatures and Cultures.
- The specialization requires that each student complete coursework in accordance with distribution requirements for each field, defined in terms of the various areas of the graduate curriculum.
- Courses are selected in consultation with the Graduate Coordinator. With departmental approval, courses may be taken in a cognate unit (e.g., Comparative Literature, French, History, Linguistics, Medieval Studies, Women's Studies).
- It is the department's expectation that full-time students will complete all program requirements in one academic year. The MA program is also available on a part-time basis. Applicants should be aware that part-time students are not eligible for funding.
- Students in the field of Hispanic Linguistics must have completed an introductory course in linguistics (LIN100Y or an equivalent course). Students who have not completed LIN100Y as part of their undergraduate studies must take this course in the summer directly preceding their admission to the MA program.

Program Length

2 sessions full-time (typical registration sequence: F/W);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Spanish: Spanish PhD

Doctor of Philosophy

Program Description

The admissions process for the Doctor of Philosophy program is competitive; it is based on a number of factors in addition to grades. The principal factors include the ability of the department to offer graduate work in the applicant's preferred areas of interest, the availability of appropriate supervisory resources, and the suitability of the applicant in relation to the academic profile and programs of the department.

The department does not allow direct entry to the PhD program with a BA degree. Students in the MA program in Spanish who would like to continue to the PhD must apply through the regular application process; there is no process for direct transfer from MA to PhD.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Spanish's additional admission requirements stated below.
- Master's degree from a recognized university in an appropriate discipline with an average of A– or higher. Applicants apply online and should arrange for electronic submission of the following material:
  - A one-page statement of purpose, outlining the applicant's areas of interest (in English).
  - A sample of written work in Spanish (10 to 12 pages).
  - Two letters of recommendation, ideally in English (one of the letters must comment on the applicant's fluency in Spanish).
  - A curriculum vitae in English.

Program Requirements

- PhD students specialize in one of two fields:
  - Hispanic Linguistics.
  - Hispanic Literatures and Cultures.
- **Coursework.** Students must successfully complete a total of **4.0 full-course equivalents (FCEs)**. Course selection is proposed to the Graduate Coordinator, who reviews and approves the plan. It is expected that students will complete the required coursework in Year 1. However, with the approval of the Graduate Coordinator, up to 1.0 FCE may be taken in Year 2. Each field has distribution requirements. Students must maintain a minimum average of A– in order to remain in good academic standing.
- By March 25 of Year 1, each student must seek approval from the Graduate Advisory Committee for the proposed area of his/her dissertation and the membership of the

Field Examination Committee (normally the proposed dissertation supervisor and two other members of the graduate faculty). The Graduate Advisory Committee will respond in writing by May 1 of the same year. The final decision in this matter rests with the Graduate Advisory Committee. In consultation with their committee, students must start their preparation for their field exams in the Summer session of Year 1.

- The **field examination** centres on two subfields: the subfield of the student's proposed dissertation research and a subfield relevant to the student's research and general preparation.
- By October 1 of Year 2, each student must submit to the Graduate Coordinator a brief statement (three to four pages double spaced) concerning the primary and secondary subfields for their field examination and two reading lists (one for each subfield). Each reading list should consist of 25 to 30 items and should include primary and secondary sources. The student's Field Committee will review this material and meet with the student to indicate revisions or additions to the reading lists. The student must file final copies of the two reading lists and statements, as approved by the committee, with the Graduate Coordinator by November 1.
- The field examination will take place between January 15 and February 15 of Year 2. It has two parts: a written examination of six hours and an oral examination of two hours. Each part will cover the primary and secondary subfields that the student has prepared.
  - The written examination will consist of three questions. At least one of the questions must be answered in Spanish, and at least one of the questions must be answered in English.
  - The oral examination will follow two weeks after the written exam; it will normally be conducted in Spanish, although English may be used to accommodate committee members from cognate units. The Field Committee will grade the two parts of the examination together, on a credit/non-credit basis. A student who does not receive credit on the first attempt must retake both parts of the examination by May 10.
- Each student must submit a written **dissertation proposal** to the Graduate Coordinator by April 25 of Year 2 of enrolment in the program. The written proposal articulates the topic, the research questions and methodology of the student's proposed research, and presents a sample of analysis, in approximately 25 pages double spaced. In addition, the proposal should include a bibliography, an outline of the dissertation, and a plan of action which associates the outline with activities of research and writing within a timeline for the three sessions per year. The proposal should be written in the language that the student intends to use in writing the dissertation (Spanish or English).
  - Each student must defend their dissertation proposal (including the outline and plan of action) in a two-hour, public oral examination to be held by May 15, normally conducted in the language of the student's proposal.
  - The student's Field Committee will grade the written proposal and the oral examination on a credit/non-credit basis. A student who does not receive credit on the first attempt must revise and resubmit the dissertation proposal by September 15 of Year 3 of enrolment and retake the oral examination on the proposal by October 15 of that year.
- **Language requirements** must be fulfilled before registering for Year 4. Each student must demonstrate a reading knowledge of French and of a third non-English language relevant to their area of research. These language requirements may be satisfied by passing the appropriate reading knowledge courses or examinations offered by the corresponding departments of the Faculty of Arts and Science at the University of Toronto (including the exams offered in-house by the Department of Spanish and Portuguese).
  - Significant prior training in a language (such as an undergraduate major or minor) will also be accepted as demonstration of reading knowledge.
  - Native speakers of languages other than English and Spanish, who have received their formal education in that language (minimum of a high school diploma) may request an exemption for the third-language requirement.
- Years 3 and 4 are devoted to researching and writing the **doctoral dissertation**. The Supervisory Committee must normally approve the complete draft of the dissertation before the candidate can proceed to the Doctoral Final Oral Examination.
- Students fulfil the **residence requirement** by being registered as full-time on-campus and must reside in sufficient geographical proximity to enable them to fulfil the requirements of the program in a timely fashion. They are also expected to participate fully in departmental activities. While writing the dissertation, candidates are expected to be in residence, with the exception of absences for research purposes and approved leaves.

Program Length

4 years full-time

Time Limit

6 years full-time

Spanish: Spanish MA, PhD Courses

Most graduate courses are offered in a regular rotation. As a result, only a subset of the courses that appear in this calendar entry will be available in a given academic session. A list of offered courses is posted on the department's website.

SPA1053H	History of the Spanish Language
SPA1080H	Descriptive Grammar of Spanish
SPA1082H	Sociolinguistics of Spanish
SPA1083H	Microvariation in Spanish

Speech-Language Pathology

MHSc

Overview

The Department of Speech-Language Pathology was established at the University of Toronto in 1958 with the creation of a two-year postgraduate diploma program, the first English-speaking program in Canada. The **Master of Health Science (MHSc)** program was established in 1978 and is a full-time professional graduate program. Academic and clinical faculty provide innovative teaching and learning opportunities for students in a unique integrated curriculum.

Speech-Language Pathology: Speech-Language Pathology MHSc

Master of Health Science

Program Description

The MHSc program educates highly competent graduate-level clinicians in the profession of speech-language pathology. It prepares students to work in a variety of settings, such as hospitals, schools, and community clinics. Speech-language pathologists provide service across the lifespan to individuals with a wide range of speech, language, hearing, and swallowing disorders. The integrated curriculum places equal emphasis on theoretical and practical competencies regarding normal development, as well as on the assessment and treatment of disorders in human communication and swallowing.

The MHSc program extends over 22.5 months and comprises five academic and four clinical units with a capstone portfolio in a unique and internationally acclaimed curriculum. The themed academic units are directly followed by full-time clinical placements targeting the same areas of practice, enabling a strong research-to-practice focus.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies.
- Applicants must also satisfy the Department of Speech-Language Pathology's additional admission requirements stated below and outlined in the Ontario Rehabilitation Sciences Application Service (ORPAS) Application Guide.
- Applicants must obtain an appropriate bachelor's degree from a recognized university, with a standing equivalent to at least a University of Toronto mid-B in the final year.
- Applicants must complete prerequisite undergraduate university-level courses with grades of at least a B+ in child development (one half course), general linguistics (one half course), phonetics (one half course), elementary statistics (one half course), research methods (one half course), and human physiology (one full course).

- Applicants must arrange to have two academic referees complete the Confidential Assessment Form and write an academic reference letter.
- Applicants must complete a minimum of 14 hours of clinical experience supervised by a registered speech-language pathologist.
- Applicants must arrange for a Clinical Reference Form and accompanying letter from the primary supervisor of the clinical experience.
- Applicants must complete a Statement of Intent that has two components: 1) the reasons for choosing speech-language pathology as a career; specific personal attributes that would be relevant to the profession; academic and non-academic accomplishments and reasons for choosing the MHSc program in Speech-Language Pathology at the University of Toronto; and 2) a summary of volunteer experiences.
- Proficiency in oral and written English is required for both the academic and applied aspects of the program. Applicants who were educated outside Canada, whose primary language is not English and who graduated from a university where the language of instruction was not English, must demonstrate proficiency in the English language through the successful completion of one of the English proficiency tests. To satisfy the requirement, the department strongly prefers the Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - Internet-based TOEFL: 100/120 with 22/30 on the speaking section and 22/30 on the writing section.
- If an applicant finds it impossible to take the TOEFL, Test of Written English (TWE), and Test of Spoken English (TSE), the department will accept the International English Language Testing System (IELTS) with a minimum score of 8.0.
- Applicants may be requested to attend a personal meeting with members of the Department of Speech-Language Pathology to provide an opportunity to clarify documentation and explore in-depth issues, such as spoken and written language ability and areas of academic performance or interpersonal communication skills.
- See the departmental website and the ORPAS Application Guide for details on application instructions.

Program Requirements

- The professional MHSc program is divided into **five academic and four clinical units**. Each academic unit is composed of related coursework. Teaching within and across units emphasizes integrated learning experiences. Academic units are followed by full-time clinical placements, four overall for a total of 30 weeks of clinical experience throughout the two-year program. Students should anticipate receiving at least one placement outside the Greater Toronto Area. Students must accept placements offered to them and are responsible for all travel and accommodation costs.
- Prior to graduation, all MHSc students are required to complete a **capstone portfolio** that demonstrates their proficiency in key areas of professional practice.
- Students must complete all requirements within two consecutive years.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Speech-Language Pathology: Speech-Language Pathology MHSc Courses

Consult the department for courses offered during each academic year.

Year 1

SLP1500Y	Internship (Credit/No Credit)
SLP1502Y	Anatomy and Embryology
SLP1503Y	Articulation and Related Disorders
SLP1505Y	Child Language I
SLP1506H	Child Language II
SLP1507H	Clinical Laboratory in Speech-Language Pathology
SLP1514Y	Applied Audiology
SLP1516H	Aural Rehabilitation
SLP1520H[+]	Principles of Clinical Practice
SLP1521H	Augmentative Communication
SLP1522Y	Speech Physiology and Acoustics
SLP1529H	Fluency Disorders
SLP1530H	Voice Disorders
SLP1532H[0]	Clinical Laboratory in Hearing Disorders (Credit/No Credit)
SLP1539H[0]	Capstone Portfolio

[+] Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.

[0] Course that may continue over a program. Credit is given when the course is completed, or the course is graded when completed.

Year 2

SLP1508Y	Advanced Clinical Laboratory in Speech-Language Pathology

SLP1525H	Structurally Related Disorders
SLP1527H[+]	Clinical Analysis of Communication and Swallowing Disorders
SLP1528H[+]	Research in Speech-Language Pathology
SLP1533Y	Aphasia
SLP1534H	Motor Speech Disorders

MFI

Statistics

MSc

- Fields:
  - Statistical Theory and Applications;
  - Probability

PhD

- Fields:
  - Statistical Theory and Applications;
  - Probability;
  - Actuarial Science and Mathematical Finance

Overview

Statistical Sciences involves the study of random phenomena and encompasses a broad range of scientific, industrial, and social processes. As data become ubiquitous and easier to acquire, particularly on a massive scale, and computational tools become more efficient, models for data are becoming increasingly complex. The past several decades have witnessed a vast impact of statistical methods on virtually every branch of knowledge and empirical investigation.

Please visit the departmental website for details about the fields offered, the research being conducted, and the courses. The department offers substantial computing facilities and operates a statistical consulting service for the University's research community. Programs of study may involve association with other departments such as Computer Science, Economics, Engineering, Mathematics, Public Health Sciences, and the Rotman School of Management. The department maintains an active seminar series and strongly encourages graduate student participation.

Students may be interested in the Data Science concentration within the Master of Science in Applied Computing program.

Statistical Sciences: Financial Insurance MFI

Master of Financial Insurance

Program Description

The MFI is a full-time professional program based on three pillars: data science, financial mathematics, and insurance modelling. This program is appropriate for students with backgrounds in statistics, actuarial science, economics, and mathematics. Students with a quantitative background (such as physics and engineering) and sufficient statistical training are also encouraged to apply.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Statistical Sciences' additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university in a related field such as statistics, mathematics, finance, and actuarial science, or any discipline where there is a significant quantitative component. Studies must include significant exposure to statistics, mathematics, finance, and actuarial science, including coursework in advanced calculus, computational methods, linear algebra, probability, and statistics.
- An average grade equivalent to at least a University of Toronto B+ in the final year or over senior courses; applicants who meet the SGS grade minimum of mid-B and demonstrate exceptional ability through appropriate workplace experience will be considered.
- Three letters of reference including two academic references, one of which should be in a quantitative discipline.
- A curriculum vitae detailing the student's educational background, professional experience, and skills.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English using one of the official methods outlined in the *SGS Calendar*.
- Selected applicants may be required to attend an interview.

Admission to the program is competitive, and achievement of the minimum admission standards does not guarantee admission into the program.

Program Requirements

- Students must successfully complete **5.5 full-course equivalents (FCEs)** as follows:
  - Eight and a half required half courses (4.0 FCEs).
  - STA2546H *Data Analytics in Practice* (0.25 FCE).
  - Any one of Statistical Sciences' 0.25 FCE 4000-level graduate course offerings with significant financial, insurance, or data science components, with approval of the MFI program director.
  - STA2560Y *Industrial Internship*, a four-month summer internship (1.0 FCE). Students must submit a project proposal to the program director and select an advisor by April 15. Students will propose a placement site to be approved by the department. The department will provide approval of the proposal by May 15. An interim report is required by July 7. Students must prepare a final written report and deliver an oral presentation on the internship project at the conclusion of the internship.

Required Courses

Fall Session

STA2503H	Applied Probability for Mathematical Finance
STA2530H	Applied Time-Series Analysis
STA2535H	Life Insurance Mathematics
STA2536H	Data Science for Risk Modelling
STA2550H[+]	Industrial Seminar Series

Winter Session

STA2540H	Insurance Risk Management

STA2546H	Data Analytics in Practice
STA2550H+	Industrial Seminar Series
STA2551H	Finance and Insurance Case Studies
STA2570H	Numerical Methods for Finance and Insurance
STA 45##	[To be selected by the student with approval of the Director.]

Summer Session

STA2560Y	Industrial Internship

+ *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

Statistical Sciences: Statistics MSc

Master of Science

Program Description

Students in the MSc program can conduct research in the fields of 1) Statistical Theory and Applications or 2) Probability. The program offers numerous courses in theoretical and applied aspects of Statistical Sciences, which prepare students for pursuing a PhD program or directly entering the data science workforce.

The MSc program can be taken on a full-time or part-time basis. Program requirements are the same for the full-time and part-time options.

Fields:
1) Statistical Theory and Applications;
2) Probability

Minimum Admission Requirements

- Admission to the MSc program is competitive, and applicants are admitted under the General Regulations of the School of Graduate Studies. Admission requirements for the Statistical Theory and Applications field and the Probability field are identical. Successful applicants have:
  - An appropriate bachelor's degree from a recognized university in a related field such as statistics, actuarial science, mathematics, economics, engineering, or any discipline where there is a significant quantitative component. Studies must include significant exposure to statistics, computer science, and mathematics, including coursework in advanced calculus, computational methods, linear algebra, probability, and statistics.
  - An average grade equivalent to at least a University of Toronto mid-B in the final year or over senior courses.
  - Three letters of reference.
  - A curriculum vitae.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

Program Requirements

- Both the Statistical Theory and Applications field and the Probability field have the same program requirements. All programs must be approved by the Associate Chair for Graduate Studies.
- Students must complete a total of 4.0 full-course equivalents (FCEs), of which 2.0 must be chosen from the list below:
  - STA2101H *Methods of Applied Statistics I*
  - STA2201H *Methods of Applied Statistics II*
  - STA2111H *Probability Theory I*
  - STA2211H *Probability Theory II*
  - STA2112H *Mathematical Statistics I*
  - STA2212H *Mathematical Statistics II*
- The remaining 2.0 FCEs may be selected from:
  - Any Department of Statistical Sciences 2000-level course or higher.
  - Any 1000-level course or higher in another graduate unit at the University of Toronto with sufficient statistical, computational, probabilistic, or mathematical content.
  - One 0.5 FCE as a reading course.
  - One 0.5 FCE as a research project.
  - A maximum of 1.0 FCE from any STA 4500-level modular course (each are 0.25 FCE).
- All programs must be approved by the Associate Chair for Graduate Studies. Students must meet with the Associate Chair to ensure that their program meets the requirements and is of sufficient depth.
- **Part-time students** are limited to taking 1.0 FCE during each session. In exceptional cases, the Associate Chair for Graduate Studies may approve 1.5 FCEs in a given session.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Statistical Sciences: Statistics PhD

Doctor of Philosophy

Program Description

Students in the PhD program can conduct research in the fields of 1) Statistical Theory and Applications or 2) Probability or 3) Actuarial Science and Mathematical Finance. The research conducted in the department is vast and covers a diverse set of areas in theoretical and applied aspects of Statistical Sciences. Students have the opportunity to work in multidisciplinary areas and team up with researchers in, for example, Biostatistics, Computer Science, Economics, Engineering, and the Rotman School of Management. The main purpose of the program is to prepare students for pursuing advanced research both in academia and in research institutes.

Applicants may enter the PhD program via one of two routes: 1) following completion of an appropriate master's degree or 2) direct entry after completing an appropriate bachelor's degree (excluding Actuarial Science and Mathematical Finance).

Fields:
1) Statistical Theory and Applications;
2) Probability

PhD Program

Minimum Admission Requirements

- Admission to the PhD program is competitive, and applicants are admitted under the General Regulations of the School of Graduate Studies.
- Applicants may be accepted with a master's degree in statistics from a recognized university with at least a B+ average. Applicants with degrees in biostatistics, computer science, economics, engineering, mathematics, physics, or any discipline where there is a significant quantitative component will be also be considered.
- Three letters of recommendation.
- A curriculum vitae.
- A letter of intent or personal statement outlining goals for graduate studies.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

Program Requirements

Course Requirements

- During Year 1, students are required to complete the following 3.0 full-course equivalents (FCEs):
  - STA2111H *Probability Theory I*.
  - STA2211H *Probability Theory II*.
  - STA2101H *Methods of Applied Statistics I*.
  - STA2201H *Methods of Applied Statistics II*.
  - STA3000Y *Advanced Theory of Statistics*.

Comprehensive Examination Requirements

- Within Years 1 and 2, students must complete a two-part comprehensive examination: 1) an in-class written comprehensive exam and 2) a research comprehensive exam.
  - Students must attempt the in-class written comprehensive by the end of Year 1. If a student fails this portion of the comprehensive exam, one further attempt will be allowed by the end of Year 2. Students who achieve A or A+ grades in all required coursework are exempt from the in-class written exam.
  - Students must attempt the research comprehensive exam by the beginning of Year 2, which includes a technical report and an oral presentation. If a student fails this portion of the comprehensive exam, one further attempt will be allowed at the end of Year 2.
  - Students must pass both the in-class written exam and the research exam to continue in the program.

Thesis Requirements

Conducting original research is the most important part of doctoral work. The thesis document must constitute significant and original contribution to the field. Students will have yearly meetings with a committee of no less than three faculty members to assess their progress. The completed thesis must be presented and defended within the Department of Statistical Sciences in addition to being presented and defended at the School of Graduate Studies.

Residency Requirements

Students must also satisfy a two-year residency requirement, whereby students must be on campus full-time and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Admission to the PhD program is competitive, and applicants are admitted under the General Regulations of the School of Graduate Studies.

- Applicants may be accepted via direct entry with a bachelor's degree in statistics from a recognized university with at least an A– average. The department also encourages applicants from biostatistics, computer science, economics, engineering, mathematics, physics, or any discipline where there is a significant quantitative component.
- Three letters of recommendation.
- A curriculum vitae.
- A letter of intent or personal statement outlining goals for graduate studies.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

Program Requirements

Course Requirements

- During Year 1, students are required to complete the following 3.0 full-course equivalents (FCEs):
  - STA2111H *Probability Theory I*.
  - STA2211H *Probability Theory II*.
  - STA2101H *Methods of Applied Statistics I*.
  - STA2201H *Methods of Applied Statistics II*.
  - STA3000Y *Advanced Theory of Statistics*.
- Students must complete an additional 2.0 FCEs at the graduate level. The additional courses must be approved by the Associate Chair of Graduate Studies.

Comprehensive Examination Requirements

- Within Years 1 and 2, students must complete a two-part comprehensive examination: 1) an in-class written comprehensive exam and 2) a research comprehensive exam.
  - Students must attempt the in-class written comprehensive by the end of Year 1. If a student fails this portion of the comprehensive exam, one further attempt will be allowed by the end of Year 2. Students who achieve A or A+ grades in all required coursework are exempt from the in-class written exam.
  - Students must attempt the research comprehensive exam by the beginning of Year 2, which includes a technical report and an oral presentation. If a student fails this portion of the comprehensive exam, one further attempt will be allowed at the end of Year 2.
  - Students must pass both the in-class written exam and the research exam to continue in the program.

Thesis Requirements

Conducting original research is the most important part of doctoral work. The thesis document must constitute significant and original contribution to the field. Students will have yearly meetings with a committee of no less than three faculty members to assess their progress. The completed thesis must be presented and defended within the Department of Statistical Sciences in addition to being presented and defended at the School of Graduate Studies.

Residency Requirements

Students must also satisfy a three-year residency requirement, whereby students must be on campus full-time and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.

Program Length

5 years

Time Limit

7 years

Field: Actuarial Science and Mathematical Finance

PhD Program

Minimum Admission Requirements

- Admission to the PhD program is competitive, and applicants are admitted under the General Regulations of the School of Graduate Studies.
- Applicants may be accepted with a master's degree in statistics from a recognized university with at least a B+ average. Applicants with degrees in biostatistics, computer science, economics, engineering, mathematics, physics, or any discipline where there is a significant quantitative component will be also be considered.
- Three letters of recommendation.
- A curriculum vitae.
- A letter of intent or personal statement outlining goals for graduate studies.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

Program Requirements

Course Requirements

- During Year 1, students must complete the following 3.0 full-course equivalents (FCEs):
  - All of:
    - STA2111H *Probability Theory I*,
    - STA2211H *Probability Theory II*, and
    - STA2503H *Applied Probability for Mathematical Finance*.
  - One of:
    - STA4246H *Research Topics in Mathematical Finance* ***or***
    - STA2501H *Mathematical Risk Theory*.
  - Either:
    - STA3000Y *Advanced Theory of Statistics* ***or***

- STA2101H *Methods of Applied Statistics I* ***and***
- STA2201H *Methods of Applied Statistics II.*

Comprehensive Examination Requirements

- Within Years 1 and 2, students must complete a two-part comprehensive examination: 1) an in-class written comprehensive exam and 2) a research comprehensive exam.
  - Students must attempt the in-class written comprehensive by the end of Year 1. If a student fails this portion of the comprehensive exam, one further attempt will be allowed by the end of Year 2. Students who achieve A or A+ grades in all required coursework are exempt from the in-class written exam.
  - Students must attempt the research comprehensive exam by the beginning of Year 2, which includes a technical report and an oral presentation. If a student fails this portion of the comprehensive exam, one further attempt will be allowed at the end of Year 2.
  - Students must pass both the in-class written exam and the research exam to continue in the program.

Thesis Requirements

Statistical Sciences: Statistics MSc, PhD Courses

The department offers a selection of courses each year from the following list with the possibility of additions. The core courses will be offered each year. Consult the department for courses offered in the current academic year.

STA1001H	Applied Regression Analysis
STA1002H	Methods of Data Analysis
STA1003H	Sample Survey Theory and its Application
STA1004H	Introduction to Experimental Design
STA1007H	Statistics for Life and Social Scientists
JAS1101H	Topics in Astrostatistics
STA2005H	Applied Multivariate Analysis
STA2006H	Applied Stochastic Processes
STA2016H	Theory and Methods for Complex Spatial Data (prerequisite: STA302H1)
STA2051H	Topics in Numerical Methods in Data Science
STA2052H	Statistics, Ethics, and Law
STA2080H	Fundamentals of Statistical Genetics
STA2101H	Methods of Applied Statistics I
STA2102H	Computational Techniques in Statistics
STA2104H	Statistical Methods for Machine Learning and Data Mining
STA2111H	Probability Theory I
STA2112H	Mathematical Statistics I
STA2163H	Online Learning and Sequential Decision Theory
STA2201H	Methods of Applied Statistics II
STA2202H	Time Series Analysis
STA2211H	Probability Theory II
STA2212H	Mathematical Statistics II
STA2453H	Data Science Methods, Collaboration, and Communication
STA2501H	Mathematical Risk Theory
STA2502H	Stochastic Models in Investments
STA2503H	Applied Probability for Mathematical Finance
STA2505H	Credibility Theory and Simulation Methods
STA2530H	Applied Time-Series Analysis
STA2535H	Life Insurance Mathematics
STA2536H	Data Science for Risk Modelling
STA2540H	Insurance Risk Management
STA2546H	Data Analytics in Practice
STA2550H^{+}	Industrial Seminar Series
STA2551H	Finance and Insurance Case Studies
STA2555H	Information Visualization

STA2560Y	Industrial Internship
STA2570H	Numerical Methods for Finance and Insurance
STA2600H	Teaching and Learning of Statistics in Higher Education
STA2700H	Computational Inference and Graphical Models
STA3000Y	Advanced Theory of Statistics
STA3431H	Monte Carlo Methods
STA4000H, Y	Supervised Reading Project I
STA4001H, Y	Supervised Reading Project II
STA4002H	Supervised Reading Project for an Advanced Special Topic
STA4246H	Research Topics in Mathematical Finance
STA4273H	Research Topics in Statistical Machine Learning
STA4364H	Conditional Inference: Sample Space Analysis
STA4372H	Foundations of Statistical Inference
STA4412H	Topics in Theoretical Statistics Modular Courses

Note: The following **modular** courses are each worth **0.25 full-course equivalent (FCE)**.

STA4500H	Statistical Dependence: Copula Models and Beyond
STA4501H	Functional Data Analysis and Related Topics
STA4502H	Topics in Stochastic Processes
STA4505H	Applied Stochastic Control: High Frequency and Algorithmic Trading
STA4506H	Non-stationary Time Series Analysis
STA4507H	Extreme Value Theory and Applications
STA4508H	Topics in Likelihood Inference
STA4509H	Insurance Risk Models I
STA4510H	Insurance Risk Models II
STA4512H	Logical Foundations of Statistical Inference
STA4514H	Modelling and Analysis of Spatially Correlated Data
STA4515H	Multiple Hypothesis Testing and its Applications
STA4516H	Topics in Probabilistic Programming
STA4517H	Foundations and Trends in Causal Inference
STA4518H	Robust Statistical Methods (prerequisite: STA2112H or permission)
STA4519H	Optimal Transport: Theory and Algorithms (prerequisites: STA2111H and STA2211H, or permission by the instructor)
STA4522H	The Measurement of Statistical Evidence
STA4523H	Bayesian Computation with Massive Data and Intractable Likelihoods
STA4524H	Advanced Topics in Statistical Genetics
STA4525H	Demographic Methods
STA4526H	Stochastic Control and Applications in Finance
STA4527H	Random Matrix Theory and Its Applications
STA4528H	Dependence Modelling With Application to Risk Management
STA4529H	Applications of Nonstandard Analysis to Statistics and Probability Theory
STA4530H	Derivatives for Institutional Investing

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Theoretical Astrophysics

Theoretical Astrophysics: Introduction

Faculty Affiliation

Arts and Science

Degree Programs

The Canadian Institute for Theoretical Astrophysics (CITA) does not offer an independent graduate degree program. Students interested in theoretical astrophysics are encouraged to enrol in the graduate programs offered by cognate departments such as Astronomy and Astrophysics, Chemistry, and Physics.

All CITA faculty hold cross-appointments in one or more of these departments; students seeking research supervision by CITA faculty are welcome to inquire. CITA research fellows and visitors are also encouraged to work with graduate students.

Overview

Established in 1984, the Canadian Institute for Theoretical Astrophysics (CITA) is a national institute specializing in theoretical astrophysics. CITA is supported by the University of Toronto, the Natural Sciences and Engineering Research Council of Canada (NSERC), and the Canadian Institute for Advanced Research (CIFAR).

CITA owns an extensive and powerful network of workstations, including a 200-node, 1600-core Beowulf computing cluster. CITA also uses the 30,000 core computing cluster housed at the SciNet consortium at the University of Toronto.

The research activities at CITA span most of the areas of modern theoretical astrophysics, including accretion disks, active galactic nuclei, general relativity, and gravitational waves, cosmology and cosmological aspects of particle physics, the cosmic microwave background, gravitational lenses, dark matter, galaxy formation, galaxy structure and evolution, dynamics of stellar systems, physics and chemistry of the interstellar medium, star formation, stellar evolution, novae, supernovae, compact objects and gamma-ray bursts, nucleosynthesis, solar system formation and dynamics, and comets.

CITA has the support of over 50 faculty members from about 20 Canadian universities. CITA also maintains a rotating complement of more than 30 postdoctoral fellows and research associates, and hosts an active program of visitors from other universities. The theoretical interests of many CITA staff are complemented by observational research. CITA researchers have active observing programs at a wide variety of ground-based and satellite telescopes in many different wavelength bands.

- South Asian Studies
  - Women and Gender Studies, MA, PhD
- Women's Health
  - Women and Gender Studies, MA, PhD
- Workplace Learning and Social Change
  - Women and Gender Studies, MA

Overview

The overall graduate program is cutting edge for its focus on transnational feminist studies. Graduate students and faculty investigate how gender and sexuality are informed, lived, and reinvented amidst entwined yet discrepant narratives, geographies, and histories.

Graduate work at the Women and Gender Studies Institute (WGSI) encourages an engagement with an interdisciplinary range of theories and methods that grapple with how gender and sexuality are entangled with questions of race, citizenship, embodiment, colonialism, nation, global capitalism, violence, political economy, cultural formations, aesthetics, and other pressing concerns.

The core faculty brings transnational feminist commitments to the study of diverse sites and their interconnection with particular focus on Canada, the Caribbean, Africa, the Middle East, South Asia, East Asia, and the United States. In doing so, the institute seeks to ask feminist questions as well as put feminism into question.

Areas of focus within the transnational feminist approach include:

- gender, sexuality and queer studies
- political economy and critical development studies
- feminist studies of technology, science, environment and biomedicine
- feminist cultural studies.

The MA and PhD degree programs also feature the option of a practicum that aspires to strengthen students' ability to interrogate the application of theories and methods to lived practice.

Women and Gender Studies: Women and Gender Studies MA

Master of Arts

Program Description

The MA program in Women and Gender Studies focuses on feminist colonial, post-colonialism, diasporic, and transnational studies as rubrics for studying gender, sex, and feminism. This perspective explores the temporal and geographic processes through which women's and men's lives, sexed relations, gendered subjectivities, and sexualities are situated.

The MA program is a full-time program and cannot be taken on a part-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Women and Gender Studies Institute's additional admission requirements stated below.
- An appropriate bachelor's degree in women's studies and gender studies or a related area at an approved university. Applicants must have obtained an average equivalent to a University of Toronto B+ or better in their final year of undergraduate study.
- Letter of intent outlining the academic goals the applicant wishes to pursue in the program, two letters of recommendation, and transcripts from all post-secondary institutions.

Program Requirements

- The student's program of study must be approved by the Women and Gender Studies Institute. Students must complete a total of **3.5 full-course equivalents (FCEs)** as follows:
  - 0.5 core FCEs in women and gender studies (WGS5000H).
  - 1.0 elective FCE in women and gender studies; either a special topics seminar (please see course list of special topics seminars) or an independent research/reading course (WGS1007H).
  - 1.0 FCE *MA Research Paper* (WGS1005Y).
  - 1.0 FCE (one year-long or two half-year courses) offered by other departments and chosen in consultation with the faculty advisor.
- The MA degree program is not offered on a part-time basis.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

Women and Gender Studies: Women and Gender Studies PhD

Doctor of Philosophy

Program Description

The PhD program in Women and Gender Studies has four areas of focus:

- gender, sexuality, and queer studies
- feminist cultural studies

- feminist studies of technology, science, environment, and biomedicine
- transnational political economy and development studies.

The offerings bring feminist scholarship to the tasks of challenging and investigating colonial, postcolonial, and transnational contexts. Central themes of the program include global capitalism, nation and state formation, empire, citizenship, diaspora, and cultural flows, all of which are examined through the lenses of diverse feminist scholarship. The program welcomes applications from international students.

Applicants may enter the PhD program via one of two routes:

- following completion of an appropriate MA
- direct entry after completing a bachelor's degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Women and Gender Studies Institute's additional admission requirements stated below.
- A master's degree in women and gender studies, or a master's degree in a related discipline from a recognized university. Applicants must have obtained an average of A– or better in the master's program.
- Letter of intent outlining the academic goals the applicant wishes to pursue in the program, two letters of recommendation, a writing sample, and transcripts from all post-secondary institutions.

Program Requirements

- The student's program of study must be approved by the Women and Gender Studies Institute.
- All **coursework** should normally be completed by the end of Year 1 of PhD study. Students must complete **3.0 full-course equivalents (FCEs)** as follows:
  - 1.0 FCE in Women and Gender Studies (WGS5000H and WGS5001H). Students who have already taken these courses, or their equivalent, will be required to enrol in alternate course selections, with institute approval.
  - 0.5 elective FCE in Women and Gender Studies.
  - 1.5 FCEs offered in Women and Gender Studies or by other graduate units and chosen in consultation with the student's faculty advisor.
- Completion of WGS2000H (0.0 FCE), a credit/non-credit course, requiring participation in the **WGS Research Seminar Series**. Normally, students enrol in WGS2000H in Year 1 of their PhD program. Attendance at 80% of the seminars is required. After completion of this course, students are recommended to attend this seminar regularly, as a crucial part of their graduate education. In addition, students must present their research in the seminar once before graduating.
- **Comprehensive examinations:**
  - Completion of two comprehensive exams, one in a primary and one in a secondary area of study, defined in consultation with the advisor and other committee members.
  - The dissertation proposal, an integral part of the comprehensive exams, should be defended and accepted no later than August 31 of Year 2.
  - Examinations are marked on a pass/fail basis. Candidates are allowed two attempts to pass a comprehensive examination. A failure to pass on the second attempt results either in the student's voluntary withdrawal from the program, or a recommendation by the institute for termination of the student's registration in the program.
  - Comprehensives should be completed by April 30 of Year 2.
- Completion of a **PhD dissertation** based on original research conducted by the candidate on an approved topic in women and gender studies, and successful defence at the SGS Final Oral Examination.
- Each student will meet at least annually with their supervisor and other doctoral committee members to review **academic progress** and to consult about future directions.

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Women and Gender Studies Institute's additional admission requirements stated below.
- In exceptional cases, direct-entry admission is offered to outstanding students with a bachelor's degree in women and gender studies or a related area, from a recognized university. Direct-entry students must have a cumulative average of A or better. Applicants must also have obtained an average equivalent to an A– or better in their final year of undergraduate study.
- Letter of intent outlining the academic goals the applicant wishes to pursue in the program, two letters of recommendation, a writing sample, and transcripts from all post-secondary institutions.

Program Requirements

- The student's program of study must be approved by the Women and Gender Studies Institute.
- All **coursework** should normally be completed by the end of Year 2 of PhD study. Students must complete **5.0 full-course equivalents (FCEs)** as follows:

- 1.0 FCE in Women and Gender Studies (WGS5000H and WGS5001H).
- 2.0 elective FCEs in Women and Gender Studies.
- 2.0 FCEs offered in Women and Gender Studies or by other graduate units and chosen in consultation with the student's faculty advisor.

- Completion of WGS2000H (0.0 FCE), a credit/non-credit course, requiring participation in the **WGS Research Seminar Series**. Normally, students will enrol in WGS2000H in Year 1 of their PhD program. Attendance at 80% of the seminars is required. After completion of this course, students are recommended to attend this seminar regularly, as a crucial part of their graduate education. In addition, students must present their research in the seminar once before graduating.
- **Comprehensive examinations**:
  - Completion of two comprehensive exams, one in a primary and one in a secondary area of study, defined in consultation with the advisor and other committee members.
  - The dissertation proposal, an integral part of the comprehensive exams, should be defended and accepted no later than December 31 of Year 2.
  - Examinations are marked on a pass/fail basis. Candidates are allowed two attempts to pass a comprehensive examination. A failure to pass on the second attempt results either in the student's voluntary withdrawal from the program or a recommendation by the institute for termination of the student's registration in the program.
  - Comprehensives should be completed by September 30 of Year 2.
- Completion of a **PhD dissertation** based on original research conducted by the candidate on an approved topic in women and gender studies, and successful defence at the SGS Final Oral Examination.
- Each student will meet at least annually with their supervisor and other doctoral committee members to review **academic progress** and to consult about future directions.

Collaborative Specializations

The School of Graduate Studies offers approximately 40 graduate collaborative specializations (CSs). This specialization category emerges from cooperation between two or more graduate units and their graduate programs. The student has a broader base from which to explore a novel interdisciplinary area or some special development in a particular discipline.

The student must be admitted to, and enrol in, one of the collaborating graduate units (known as a “home” unit) and must fulfil all the requirements of the degree program in the home unit and any additional requirements of the CS. Each CS is designed to allow a focus in the area of specialty. On successful completion of the specialization, the student receives a transcript notation indicating completion of the collaborative specialization, in addition to the degree.

Addiction Studies

Addiction Studies: Introduction

Lead Faculty of the Collaborative Specialization

Public Health

Participating Degree Programs

Counselling and Clinical Psychology (Clinical Psychology field) — MA, PhD
Criminology and Sociolegal Studies — MA, PhD
Medical Science — MSc, PhD
Nursing Science — PhD
Pharmaceutical Sciences — MSc, PhD
Pharmacology — MSc, PhD
Psychology — MA, PhD
Public Health Sciences — MPH, MSc, PhD
Social Work — MSW, PhD
Sociology — MA, PhD

Overview

The graduate programs listed above, in collaboration with the Centre for Addiction and Mental Health and the Ontario Tobacco Research Unit, participate in the Collaborative Specialization in Addiction Studies at the University of Toronto. The purpose of the Addiction Studies specialization is to develop and integrate graduate training in the multidisciplinary field of addictions, an area that includes the use and abuse of alcohol, tobacco, and psychoactive substances, as well as gambling and other addictive behaviours. Master's programs requiring a thesis, practicum, or research paper, and doctoral programs are included. Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Addiction Studies” on their transcript.

Addiction Studies: Master's Level

Admission Requirements

- Applicants must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units. They must contact the collaborating professor within their graduate unit directly.

Specialization Requirements

- Students must meet all requirements of their home graduate unit in terms of coursework and thesis work, or equivalent.
- Master's students in the collaborative specialization are required to take PAS3700H *Multidisciplinary Aspects of Addictions*, plus 0.5 full-course equivalent (FCE) selected from the list of approved elective courses presented below or an approved directed reading course.
- The student's thesis must deal with a subject in the field of addictions. The thesis is supervised and evaluated in the same manner as others in the home graduate unit, but normally involves, as appropriate, supervisory and examining professors from other disciplines represented in the collaborative specialization. In collaborating graduate units that do not require a thesis, a practicum or major research paper will be accepted instead of a thesis, as long as the topic or focus is directly related to addictions. In collaborating graduate unit that do not have a thesis or equivalent requirement, students must take a third 0.5 FCE from the list of approved electives.

Addiction Studies: Doctoral Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units. They must contact the collaborating professor within their graduate unit directly.

Specialization Requirements

- Doctoral students in the collaborative specialization are required to take PAS3700H *Multidisciplinary Aspects of Addictions*, if they have not already done so, plus an additional 0.5 full-course equivalent (FCE) (not taken previously) from the approved listing of elective courses presented below or an approved directed reading course.
- Students must meet all requirements of their home graduate unit in terms of coursework and thesis work, or equivalent.
- The student's thesis must deal with a subject in the field of addictions. The thesis is supervised and evaluated in the same manner as others in the home graduate unit, but normally involves, as appropriate, supervisory and examining professors from other disciplines represented in the collaborative specialization. In collaborating graduate units that do not require a thesis, a practicum or major research paper will be accepted instead of a thesis, as long as the topic or focus is directly related to addictions. In collaborating graduate units that do not have a thesis or equivalent requirement, students must take a third 0.5 FCE from the list of approved electives.

Addiction Studies: Courses

Core Course

PAS3700H	Multidisciplinary Aspects of Addictions

Elective Courses

APD1291H	Addictive Behaviours: Approaches to Assessment and Intervention
CHL5120H	Population Health Perspectives on Mental Health and Addictions
CHL5417H	Tobacco and Health: From Cells to Society
CRI2040H	Drugs and Crime
JPM1005Y	Behavioural Pharmacology
MSC1085H	Molecular Approaches to Mental Health and Addictions
PAS3701H	Advanced Research Issues in Addictions
SWK4616H	Drug Dependencies: Interventive Approaches

Aging, Palliative and Supportive Care Across the Life Course

Aging, Palliative and Supportive Care Across the Life Course: Introduction

Lead Faculty of the Collaborative Specialization

Social Work

Participating Degree Programs

Adult Education and Community Development — MA, MEd, PhD
Anthropology — MA, MSc, PhD
Counselling and Clinical Psychology — MA, PhD
Counselling Psychology — MEd, EdD
Dentistry — MSc, PhD
Health Administration — MHSc
Health Policy, Management and Evaluation — MSc, PhD
Information — MI, PhD
Kinesiology — MSc, PhD
Medical Science — MSc, PhD
Music — MA, PhD
Nursing Science — MN, PhD
Pharmaceutical Sciences — MSc, PhD
Psychology — MA, PhD
Public Health Sciences — MPH, MSc, PhD
Rehabilitation Science — MSc, PhD
Social Work — MSW, PhD
Sociology — MA, PhD
Speech-Language Pathology — MSc, PhD
Women and Gender Studies — MA

Overview

The Collaborative Specialization in Aging, Palliative and Supportive Care Across the Life Course prepares students for specialization in the field of aging and/or the field of palliative and supportive care, with an emphasis on viewing aging and palliative issues within the perspective of the life course. The collaborative specialization offers students two options of study:

- aging and the life course;
- palliative and supportive care.

Students must apply to and register in a home participating unit (i.e., one of the graduate programs listed above), and follow a course of study acceptable to both the graduate unit and the Collaborative Specialization in Aging, Palliative and Supportive Care Across the Life Course.

Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation "Completed Collaborative Specialization in Aging, Palliative and Supportive Care Across the Life Course" on their transcript.

Canada

Aging, Palliative and Supportive Care Across the Life Course: Master's Level

Admission Requirements

- Applicants must apply to a participating graduate unit and comply with the admission procedures of that unit. Applicants may apply concurrently to their participating graduate unit and to the Collaborative Specialization in Aging, Palliative and Supportive Care Across the Life Course.
- Applicants must forward the following to the committee of the Collaborative Specialization in Aging, Palliative and Supportive Care Across the Life Course:
  - a. A copy of the School of Graduate Studies application form submitted to the participating graduate unit.
  - b. Copies of official undergraduate and graduate transcripts from all institutions previously or currently attended.
  - c. A resumé or curriculum vitae (CV).
  - d. A letter explaining how their course of study and specific research interests relate to either option 1 in aging and the life course, or option 2 in palliative and supportive care at the graduate level.
- Students may use copies of official documents (a. and b. above) for their application to the Collaborative Specialization in Aging, Palliative and Supportive Care Across the Life Course. These may be obtained from their home participating graduate unit.

Specialization Requirements

MA in Adult Education and Community Development;
MA and MSc in Anthropology;
MA in Counselling and Clinical Psychology;
MEd in Counselling Psychology;
MSc in Dentistry;
MHSc in Health Administration;
MSc in Health Policy, Management and Evaluation;
Master of Information (Thesis and Co-op Options);
MSc in Kinesiology;
MSc in Medical Science;
MA in Music;
Master of Nursing;
MSc in Pharmaceutical Sciences;
MA in Psychology;
Master of Public Health;
MSc in Rehabilitation Science;
Master of Social Work;
MA in Sociology;
MSc in Speech-Language Pathology;
MA in Women and Gender Studies

In addition to meeting the program requirements of their home graduate unit, students must complete:

- The core course (0.5 full-course equivalent [FCE]) for the chosen option (i.e., aging and the life course or palliative and supportive care).
- One elective course (0.5 FCE) from a) the chosen option's pre-approved elective list **or** b) the student's home graduate unit list of courses and/or other graduate-level elective courses, provided the focus of the student's assignments is in the area of this specialization (aging or palliative) and the course is approved by the specialization committee as a suitable elective.
- The major research paper, thesis, or practicum in the participating degree program will be on a topic in the chosen option of this specialization.

Specialization Requirements

Master of Information (Coursework-Only Option)

In addition to meeting the program requirements of their home graduate unit, students must complete:

- The core course (0.5 full-course equivalent [FCE]) for the chosen option (i.e., aging and the life course or palliative and supportive care).
- Four elective courses (2.0 FCEs), one of which can be a practicum course, from a) the chosen option's pre-approved elective list **or** b) the student's home graduate unit list of courses and/or graduate-level elective courses, where the topic of the major paper or practicum field is in the area of the chosen specialization (aging or palliative). Courses not on the pre-approved list must be approved by the collaborative specialization director and/or committee, after consultation with the Information faculty member associated with the collaborative specialization and, as needed, the course instructor, to count towards the collaborative specialization requirements.

Specialization Requirements

MEd in Adult Education and Community Development

In addition to meeting the program requirements of their home graduate unit, students must complete:

- The core course (0.5 full-course equivalent [FCE]) for the chosen option (i.e., aging and the life course or palliative and supportive care).
- Two elective courses (1.0 FCE) from a) the chosen option's pre-approved elective list **or** b) the student's home graduate unit list of courses and/or other graduate-level courses, provided the focus of the student's assignments is in the area of this specialization (aging or palliative) and the course is approved by the specialization committee as a suitable elective.

Aging, Palliative and Supportive Care Across the Life Course: Doctoral Level

Admission Requirements

- Applicants must apply to a participating graduate unit and comply with the admission procedures of that unit.
- Applicants may apply concurrently to their participating graduate unit and to the Collaborative Specialization in Aging, Palliative and Supportive Care Across the Life Course.
- Applicants must forward the following to the collaborative specialization committee:
  - A copy of the School of Graduate Studies application form submitted to the participating graduate unit.
  - Copies of official undergraduate and graduate transcripts from all institutions previously or currently attended.
  - A resumé or curriculum vitae (CV).
  - A letter explaining how their course of study and specific research interests relate to either option 1 in aging and the life course, or option 2 in palliative and supportive care at the graduate level.
  - Two letters of reference.
- Students may use copies of official documents (i.e., application form and transcripts) for their application to the Collaborative Specialization in Aging, Palliative and Supportive Care Across the Life Course. These may be obtained from the participating home graduate unit.

Specialization Requirements

- In addition to meeting the program requirements of their home graduate unit, students will be required to complete both the master's- and doctoral-level core courses (0.5 full-course equivalent [FCE] each) and one elective course (0.5 FCE) for either of the two options. The master's-level course must be completed before enrolling in the doctoral-level course.
- It is expected that the student's thesis or practicum (whichever is included in his or her program of study) would be in his or her chosen study areas (i.e., in either aging and the life course or palliative and supportive care).

Aging, Palliative and Supportive Care Across the Life Course: Courses

Core Courses for Option 1: Aging and the Life Course

Master's Level

AGE2000H	Principles of Aging

Doctoral Level

AGE3000H	Advanced Research Seminar in Aging and the Life Course (AGE2000H is a prerequisite for entry into the doctoral level of the collaborative specialization)

Core Courses for Option 2: Palliative and Supportive Care

Master's Level

AGE1000H	Multidisciplinary Research Concepts in Palliative and Supportive Care

Doctoral Level

AGE1500H	Advanced Research Methodologies in Palliative and Supportive Care (AGE1000H is a prerequisite for entry into the doctoral level of the collaborative specialization)

Elective Courses for Option 1 or 2

Special topics courses can be taken as part of the program requirements of this collaborative specialization. Students must check their home graduate unit's website for course availability in any given session.

AGE2500H	Current Research Topics in Aging and the Life Course
DEN1003H	Preventive Dentistry
NUR1057H	Interventions to Enhance Health, Abilities, and Well-Being
SLP1533Y	Aphasia
SLP1534H	Motor Speech Disorders
SOC6707H	Intermediate Data Analysis
SWK4614H	Social Work Practice in Palliative Care (social work students only)
SWK4618H	Special Issues in Gerontological Social Work
SWK4634H	Family Practice Across the Life Cycle
SWK4641H	Special Topics in Social Work in Gerontology
SWK4803H	Special Studies III

Requests to approve other courses as equivalent to fulfil collaborative specialization requirements may be made to the collaborative specialization committee. Students taking either option may choose the master's core course in the other option as an elective.

Additional Electives for Option 2 Only

HAD5301H	Introduction to Clinical Epidemiology and Health Care Research
HAD5730H	Economic Evaluation Methods for Health Service Research
HAD5771H	Resource Allocation Ethics
MSC1090H	Introduction to Computational Biostatistics with R
NUR1021H	Nursing Ethics
NUR1024H	Foundations of Qualitative Inquiry
NUR1025H	Doing Qualitative Research: Design and Data Collection
NUR1045H	Theories of Pain: Impact on the Individual, Family, and Society
NUR1046H	Persistent Illness: Theoretical, Research, and Practice Implications
NUR1050H	Coping With Illness
PHL2145H	Bioethics
PHL2146Y	Topics in Bioethics

Ancient and Medieval Philosophy

Ancient and Medieval Philosophy: Introduction

Lead Faculty of the Collaborative Specialization

Arts and Science

Participating Degree Programs

Classics — PhD
Medieval Studies — PhD
Philosophy — PhD

Overview

The graduate units listed above participate in the Collaborative Specialization in Ancient and Medieval Philosophy. The three units contribute courses and provide facilities and supervision of doctoral research. Ancient and Medieval Philosophy operates only at the doctoral level. The specialization is administered by a committee, which is drawn from all three units and is chaired by the director, who is a member of the committee.

Students who wish to enrol in the collaborative specialization must apply to and be admitted to both the doctoral program in one of the collaborating graduate units and the collaborative specialization. Upon successful completion of the doctoral degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Ancient and Medieval Philosophy” on their transcript.

Interested students should contact the director and the graduate coordinator of the unit in which they intend to register.

Contact and Address

Telephone: (416) 978-3178
Fax: (416) 978-8703

Ancient and Medieval Philosophy: Doctoral Level

Admission Requirements

- All applicants must meet the admission criteria of the unit through which they wish to enrol.

Specialization Requirements

- Students must fulfil the normal requirements of the PhD in their home unit.
- Students will normally concentrate in either ancient or medieval philosophy, though it is not necessary to indicate such specialization formally. Their plan of study must also be approved by the collaborative specialization committee and must include the following elements:
  - 1.0 full-course equivalent (FCE) in some area of philosophy other than the history of philosophy.
  - Successful completion of the proseminar (AMP2000Y).
  - A language competence examination at the appropriate level (in at least one of Greek, Classical or Medieval Latin, or Arabic, as relevant) consisting of unseen translation must be successfully completed before the major field or area examinations are first attempted.
  - Area, qualifying, or major field examinations must contain a paper involving translation from at least one of Greek, Classical or Medieval Latin, or Arabic (as appropriate to the area or field). This examination will be based on a substantial list of texts relevant to the field or area.
  - A reading knowledge of two modern languages other than English.
- In most cases, some of these elements will be fulfilled by program requirements in the doctoral program of the home unit.

Collaborative Specialization in Bioethics
Joint Centre for Bioethics (JCB)
University of Toronto
Suite 754, 155 College Street
Toronto, Ontario M5T 1P8
Canada

Bioethics: Master's Level

Admission Requirements

- Applicants to the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.
- Students interested in the master's programs apply to both the collaborating graduate unit and the Collaborative Specialization in Bioethics. Applications for admission to the collaborative specialization are considered only after admission to the collaborating graduate unit. If a student applies to more than one unit, a copy of each file must be submitted to the collaborative specialization at the contact above.
- Visit the Collaborative Specialization in Bioethics' website for the application form and details about supporting documentation. The application must be accompanied by:
  - application form
  - an up-to-date curriculum vitae (CV)
  - up-to-date copies of all transcripts
  - a one-page letter of intent
  - two letters of reference.
- Where a thesis is required, an email or note from the proposed supervisor indicating willingness to supervise the student should be submitted to the Collaborative Specialization in Bioethics at the contact above. The JCB website lists faculty and bioethicists who are available for advice relating to research proposals.

Specialization Requirements

- Students will be expected to meet the requirements of the home graduate unit as well as those of the Collaborative Specialization in Bioethics. Students should check with their home graduate program whether the collaborative specialization course requirements may be counted towards the degree.
- Students must complete:
  - SRM3333Y, a credit/no credit graduate seminar series in bioethics.
  - PHL2145H, a review of the philosophical foundations of bioethics. Students who have completed an equivalent graduate course in philosophical bioethics may apply to the Program Director to have this requirement waived.
  - Bioethics-related 0.5 full-course equivalent (FCE), normally from the suggested list below.
- Master's programs require either a thesis or equivalent research project as determined by the home unit. The thesis will be supervised by a thesis committee comprising a supervisor and two other members, at least one of whom is identified as an affiliated Collaborative Specialization in Bioethics faculty member. The thesis is evaluated according to the procedures and standards of the home graduate unit and must fall within the broad area of bioethics. Non-thesis projects require supervision; requirements for such projects will be determined by the home unit. Students in coursework-only degree programs must complete additional coursework in approved bioethics electives. For the Master of Laws (LLM) coursework-only option, 1.0 FCE in additional courses in bioethics are required.

Bioethics: Doctoral Level

Admission Requirements

- Applicants to the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.
- Students interested in the doctoral programs apply to both the collaborating graduate unit and the Collaborative Specialization in Bioethics. Applications for admission to the collaborative specialization are considered only after admission to the collaborating graduate unit. If a student applies to more than one unit, a copy of each file must be submitted to the collaborative specialization at the contact above.
- Visit the Collaborative Specialization in Bioethics website for the application form and details about supporting documentation. The application must be accompanied by:
  - application form
  - an up-to-date curriculum vitae (CV)
  - up-to-date copies of all transcripts
  - a one-page letter of intent
  - two letters of reference
- For the doctoral thesis, an email or note from the proposed supervisor indicating willingness to supervise the student should be submitted to the Collaborative Specialization in Bioethics at the contact above. The JCB website lists faculty and bioethicists who are available for advice relating to research proposals.

Specialization Requirements

- Students will be expected to meet the requirements of the home graduate unit as well as those of the Collaborative Specialization in Bioethics. Students should check with their home graduate program whether the collaborative specialization course requirements may be counted towards the degree.
- Students must complete:
  - SRD4444Y, a credit/no credit graduate seminar series in bioethics.
  - PHL2145H, a review of the philosophical foundations of bioethics. Students who have completed an equivalent graduate course in philosophical bioethics may apply to the collaborative specialization director to have this requirement waived.
  - Bioethics-related 0.5 full-course equivalent (FCE), normally from the suggested list below.
- All doctoral candidates must complete a thesis. The thesis will be supervised by a thesis committee comprising a supervisor and normally two other members, at least one of whom is identified as an affiliated Collaborative Specialization in Bioethics faculty member. The thesis is evaluated according to the procedures and standards of the home graduate unit and must fall within the broad area of bioethics.

Bioethics: Courses

Please note that these courses are not offered every year. Consult each unit's website for details.

Health Policy, Management and Evaluation

HAD5011H	Canada's Health Care System and Health Policy
HAD5306H	Introduction to Health Services Research and the Use of Health Administrative Data
HAD5741H	Health Law and Ethics
HAD5768H	International Perspectives on Health Services Management
HAD5771H	Resource Allocation Ethics

Law

Participation in LAW courses is at the discretion of the Faculty of Law upon presentation, to the Faculty of Law Records Office, of a signed permission form from the student's home graduate unit. Note that preference is given to JD students and that many LAW courses are full by the end of the Faculty of Law add/drop period.

LAW6003Y	Health Law and Bioethics
LAW6006H	Public Health Law
LAW582H	Privacy, Property, and the Human Body

Nursing Science

NUR1021H	Nursing Ethics

Philosophy

PHL2131H	Ethics
PHL2132H	Seminar in Ethics
PHL2133H	Topics in Ethics

Public Health Sciences

CHL3001Y	Core Topics in Bioethics
CHL3002Y	Teaching Bioethics
CHL3003Y	Empirical Approaches in Bioethics
CHL3004Y	Ethics and Health Institutions
CHL3051H	Research Ethics
CHL5121H	Genomics, Bioethics, and Public Policy

CHL5401H	Epidemiologic Methods I
JRH5124H	Public Health Ethics

Social Work

Mechanical and Industrial Engineering — MASc, PhD
Medical Biophysics — MSc, PhD
Medical Science — MSc, PhD
Pharmaceutical Sciences — MSc, PhD
Physics — MSc, PhD
Physiology — MSc, PhD
Rehabilitation Science—MSc, PhD

Overview

The graduate programs listed above participate in the Collaborative Specialization in Biomedical Engineering at the University of Toronto. This specialization offers the opportunity for research in biomedical engineering leading to master's and doctoral degrees. The collaborative program is housed in the Institute of Biomedical Engineering (IBME).

Biomedical engineering is a multidisciplinary field that integrates engineering with biology and medicine. It uses methods, principles, and tools of engineering, physical sciences, and mathematics to solve problems in the medical and life sciences. Biomedical engineering consists of the application of the concepts and methods of engineering and physics to the study of living systems, to the enhancement and replacement of those systems, to the design and construction of systems to measure basic physiological parameters, to the development of instruments, materials, and techniques for biological and medical practice, and to the development of artificial organs. By its nature the field is interdisciplinary and involves close collaboration between many departments of the university and associated hospitals.

Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation "Completed Collaborative Specialization in Biomedical Engineering" on their transcript.

Collaborative Specialization in Biomedical Engineering
Institute of Biomedical Engineering
University of Toronto
Rosebrugh Building, Room 407, 164 College Street
Toronto, Ontario M5S 3G9 Canada

Biomedical Engineering: Master's Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.
- Applicants must be graduates in dentistry, engineering, engineering science, medicine, or one of the physical or biological sciences and must be accepted to the Collaborative Specialization in Biomedical Engineering through one of the collaborating graduate units (home graduate units) listed above.

Specialization Requirements

Students register in the School of Graduate Studies through their home graduate unit; they will meet all respective degree requirements as described by SGS and the collaborative specialization committee. As part of these requirements:

- The program of study for each MASc or MSc degree student registered in the collaborative specialization must meet the requirements of the collaborating unit and will normally comprise **at least 2.0 full-course equivalents (FCEs) and a thesis** in the biomedical field.
  - Engineering and physical science students will be required to take a biological sciences course such as JPB1022H *Human Physiology as Related to Biomedical Engineering* (or an equivalent).
  - Biological science students will be expected to take a physical sciences course such as JPB1055H *Bioengineering for Life Scientists* (or an equivalent).
  - Students will be expected to take BME1477H *Biomedical Engineering Project Design and Execution* and pursue a thesis topic relevant to biomedical engineering.
- In addition to the 2.0 FCEs, students registered in a graduate degree program involving research are required to participate in **two seminar courses**: one of BME1010H or BME1011H *Graduate Seminar Series* (0.0 FCE) and JDE1000H *Ethics in Research* (0.0 FCE).
- Students are required to have a supervisory committee approved by the collaborative specialization committee and consisting of a supervisor from IBME, with a cross-

appointment in the home unit, and other members from other collaborating units as required.
- The examination committee will be constituted according to procedures in the home graduate unit and will include a member from that collaborating unit.

Biomedical Engineering: Doctoral Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.
- Applicants must be graduates in dentistry, engineering, engineering science, medicine, or one of the physical or biological sciences and must be accepted to the Collaborative Specialization in Biomedical Engineering through one of the collaborating graduate units (home graduate units) listed above.
- Before PhD students are accepted, the collaborative specialization committee must be satisfied with the applicant's ability to undertake advanced graduate studies.

Specialization Requirements

- A **qualifying examination** may be required by the collaborating unit.
- Students admitted to the collaborative specialization who are admitted to a PhD program in their home unit will be subject to the requirements of the collaborating unit. The plan of study for each PhD student registered in the Collaborative Specialization in Biomedical Engineering must be approved by the collaborating unit and the collaborative specialization committee; the plan of study will normally comprise **at least 1.0 full-course equivalent (FCE) and a thesis**.
  - Engineering and physical science students will be required to take a biological sciences course such as JPB1022H *Human Physiology as Related to Biomedical Engineering* (or an equivalent).
  - Biological science students will be expected to take a physical sciences course such as JPB1055H *Bioengineering for Life Scientists* (or an equivalent).
  - Students will be expected to take BME1477H *Biomedical Engineering Project Design and Execution* and pursue a thesis topic relevant to biomedical engineering.
- In addition to the 1.0 FCE, students are required to participate in **two seminar courses**: one of BME1010H or BME1011H *Graduate Seminar* series (0.0 FCE), and JDE1000H *Ethics in Research* (0.0 FCE).
- Each PhD student is normally required to have a supervisory committee consisting of at least three persons, including a supervisor who has an appropriate graduate appointment and who is also a member of the graduate faculty in the home unit. When appropriate, an additional member of the supervisory committee may be from outside the University of Toronto, with approval from the School of Graduate Studies.
- For doctoral degrees, the examination committee will be constituted according to procedures in the home graduate unit and will include a member from that collaborating unit.

Biomedical Engineering: Courses

Not all courses are offered every year. Students should contact the BME office for details.

BME1010H	Graduate Seminar
BME1011H	Graduate Seminar
BME1405H	Clinical Engineering Instrumentation I
BME1436H	Clinical Engineering Surgery
BME1439H	Clinical Engineering Instrumentation II
BME1453H	Genomics and Synthetic Nucleic-Acid Technologies
BME1454H	Regenerative Medicine: Fundamentals and Applications
BME1457H	Biomedical Nanotechnology
BME1459H	Protein Engineering
BME1460H	Quantitative Fluorescence Microscopy: Theory and Application to Live Cell Imaging
BME1477H	Biomedical Engineering Project Design and Execution
BME1478H	Coding for Biomedical Engineers
BME1480H	Experimental Design and Multivariate Analysis in Bioengineering
BME4444Y	Practice in Clinical Engineering
CHE1107H	Applied Mathematics
CHE1141H	Advanced Chemical Reaction Engineering
CHE1143H	Transport Phenomena
CHE1310H	Chemical Properties of Polymers
DEN1070H	Advances in Dental Materials Science
DEN1081H	Bone Interfacing Implants
ECE1228H	Electromagnetic Theory
ECE1352H	Analog Circuit Design I
ECE1475H	Bio Photonics
ECE1502H	Information Theory
ECE1511H	Signal Processing
ECE1521H	Detection and Estimation Theory
ECE1647H	Introduction to Nonlinear Control Systems

JCB1349H	Molecular Assemblies: Structure/Function/Properties
JEB1365H	Ultrasound: Theory and Applications in Biology and Medicine
JEB1433H	Medical Imaging
JEB1444H	Neural Engineering
JEB1447H	Sensory Communications
JMB1050H	Biological and Bio-inspired Materials
JNP1017H[+]	Current Topics in Molecular and Biochemical Toxicology
JNP1018H[+]	Molecular and Biochemical Basis of Toxicology
JNR1444Y	Fundamentals of Neuroscience: Cellular and Molecular — Lectures
JNS1000Y	Fundamentals of Neuroscience: Systems and Behaviour
JPB1022H	Human Physiology as Related to Engineering II
JPB1055H	Bioengineering for Life Scientists
JTC1135H	Applied Surface Chemistry
JTC1331H	Biomaterials Science
MIE1001H	Advanced Dynamics
MIE1101H	Advanced Classical Thermodynamics
MIE1201H	Advanced Fluid Mechanics I
MIE1452H	Signal Processing for Bioengineering
MSE1026H	Analytical Electron Microscopy
PHM1109H	Recent Developments in Dosage Form Design
PSL1432H	Theoretical Physiology
PSL1452H	Fundamentals of Ion Channel Function
REH1100H	Theory and Research in Rehabilitation Science

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Book History and Print Culture: Introduction

Lead Faculty of the Collaborative Specialization

Arts and Science

Participating Degree Programs

Art History — MA, PhD
Classics — MA, PhD
Comparative Literature — MA, PhD
East Asian Studies — MA, PhD
English — MA, PhD
French Language and Literature — MA, PhD
Germanic Languages and Literatures — MA
Germanic Literature, Culture and Theory — PhD
History — MA, PhD
History and Philosophy of Science and Technology — MA, PhD
Information — MI, PhD
Italian Studies — MA, PhD
Medieval Studies — MA, PhD
Museum Studies — MMSt
Music — MA, PhD
Religion — MA, PhD
Spanish — MA, PhD

Overview

Histoire du livre, History of the Book, Textual Studies, Print Culture, Sociology of the Text: all these names have been used to describe a growing international academic movement. The graduate programs listed above, in conjunction with Massey College, sponsor an interdisciplinary study in Book History and Print Culture (BHPC) in which the rich physical and human resources of the University of Toronto are brought to bear on multiple aspects of the creation, transmission, and reception of the written word. BHPC brings together graduate students from a variety of disciplines based on their common research interest in the physical, cultural, and theoretical aspects of the book. As a collaborative specialization, it is designed to augment the learning and research potential of existing master's and doctoral programs by pooling the expertise of University of Toronto faculty members in this field from several disciplines.

Students register first for a master's or doctoral degree in their home graduate unit and then apply to the collaborative specialization. Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Book History and Print Culture” on their transcript.

Telephone: (416) 946-3560

Alan Galey, Director
Collaborative Specialization in Book History and Print Culture
University of Toronto
Massey College, 4 Devonshire Place
Toronto, Ontario M5S 2E1 Canada

Book History and Print Culture: Master's Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and one of the participating degree programs (home unit). Applicants to the collaborative specialization write to the director giving information about their background and relevant interests, identifying the degree and home unit for which they are applying, and outlining a proposed plan of study by April 10 for September admission. Applicants need not wait for a final decision from the home unit before applying to the collaborative specialization. Academic transcript(s) should be included in the application; unofficial transcripts are acceptable and may be sent either as scans attached to your email or as printouts from a student web service mailed to the BHPC office. Advice is available from the director and the collaborative specialization committee.
- Applications from the participating units have priority in admissions. If there is space in the collaborative specialization, students from other units may apply; they should consult the graduate coordinator in their home unit and the director of the BHPC specialization. Since course requirements vary from unit to unit, it is essential that there be close consultation between the collaborative specialization and the home unit at the time of the application.

Specialization Requirements

MA in Art History;
MA in Classics;
MA in East Asian Studies (Thesis Option);
MA in English (Creative Writing Field);
MA in French Language and Literature;
MA in Germanic Languages and Literatures;
MA in History;
MA in History and Philosophy of Science and Technology;
Master of Information (Thesis Option);
MA in Medieval Studies (Thesis Option);

Master of Museum Studies;
MA in Religion

- Students must fulfil the degree requirements of the unit in which they are enrolled.
- BKS1001H *Introduction to Book History* (0.5 full-course equivalent [FCE]) and BKS1002H *Book History in Practice* (0.5 FCE), both of which should be taken in Year 1.
- The thesis or exhibition project (MSL4000Y) in the participating degree program will be on a topic related to book history and print culture, approved by the collaborative specialization committee.
- Collaborative specialization courses may be taken as electives for the purpose of satisfying home program requirements.

Specialization Requirements

MA in Comparative Literature;
MA in East Asian Studies (Coursework-Only Option);
MA in English;
MA in Italian Studies;
MA in Medieval Studies (Coursework-Only Option);
MA in Spanish

Students must fulfil the degree requirements of the unit in which they are enrolled.

- BKS1001H *Introduction to Book History* (0.5 full-course equivalent [FCE]) and BKS1002H *Book History in Practice* (0.5 FCE), both of which should be taken in Year 1.
- At least 0.5 FCE in additional elective courses related to book history and print culture.
- Collaborative specialization courses may be taken as electives for the purpose of satisfying home program requirements.

Specialization Requirements

Master of Information (Coursework-Only Option)

- Students must fulfil the degree requirements of the unit in which they are enrolled.
- BKS1001H *Introduction to Book History* (0.5 full-course equivalent [FCE]) and BKS1002H *Book History in Practice* (0.5 FCE), both of which should be taken in Year 1.
- At least 1.5 FCEs in additional elective courses related to book history and print culture.
- Collaborative specialization courses may be taken as electives for the purpose of satisfying home program requirements.

Specialization Requirements

MA in Music

- Students must fulfil the degree requirements of the unit in which they are enrolled.
- BKS1001H *Introduction to Book History* (0.5 full-course equivalent [FCE]) and BKS1002H *Book History in Practice* (0.5 FCE), both of which should be taken in Year 1.
- At least 1.0 FCE in additional elective courses related to book history and print culture.
- Collaborative specialization courses may be taken as electives for the purpose of satisfying home program requirements.

Elective courses will come from the BHPC roster of cross-listed courses, though students may substitute other courses with the director's approval. Students are encouraged to take courses outside their home graduate unit, if possible.

Book History and Print Culture: Doctoral Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and one of the participating degree programs (home unit). Applicants to the collaborative specialization write to the director giving information about their background and relevant interests, identifying the degree and home unit for which they are applying, and outlining a proposed plan of study by April 10 for September admission. Applicants need not wait for a final decision from the home unit before applying to the collaborative specialization. Academic transcript(s) should be included in the application; unofficial transcripts are acceptable and may be sent either as scans attached to your email or as printouts from a student web service mailed to the BHPC office. Advice is available from the director and the collaborative specialization committee.
- Applications from the participating units have priority in admissions. If there is space in the collaborative specialization, students from other units may apply; they should consult the graduate coordinator in their home unit and the director of the BHPC specialization. Since course requirements vary from unit to unit, it is essential that there be close consultation between the collaborative specialization and the home unit at the time of the application.

Specialization Requirements

- Students must fulfil the degree requirements of the unit in which they are enrolled.

- The plan of study must also be approved by the BHPC specialization committee. The plan of study includes BKS1001H *Introduction to Book History* (if that course has not been taken previously at the master's level), BKS2000H *Advanced Seminar in Book History and Print Culture*, and BKS2001H *Individual Practicum in Book History and Print Culture*. BKS1001H must be taken as a prerequisite or co-requisite to BKS2000H and BKS2001H.
- The dissertation topic will be in the area of book history and print culture. The advisory committee will include at least one faculty member affiliated with BHPC, and students are encouraged, but not required, to seek representation on the committee from outside the home unit.
- The collaborative specialization may be completed on a flexible-time basis only by Faculty of Information students registered for the Information flexible-time PhD.

Book History and Print Culture: Courses

BKS1001H	Introduction to Book History
BKS1002H	Book History in Practice
BKS2000H	Advanced Seminar in Book History and Print Culture
BKS2001H	Individual Practicum in Book History and Print Culture

Cardiovascular Sciences

Cardiovascular Sciences: Introduction

Lead Faculty of the Collaborative Specialization

Medicine

Participating Degree Programs

Biomedical Engineering — MASc, PhD
Chemical Engineering and Applied Chemistry — MASc, PhD
Clinical Engineering — MHSc
Dentistry — MSc, PhD
Kinesiology — MSc, PhD
Laboratory Medicine and Pathobiology — MSc, PhD
Medical Biophysics — MSc, PhD
Medical Science — MSc, PhD
Pharmaceutical Sciences — MSc, PhD
Pharmacology — MSc, PhD
Physiology — MSc, PhD
Rehabilitation Science — MSc, PhD

Overview

The graduate programs listed above, together with the clinical departments of Anesthesia, Medical Imaging, Medicine, and Surgery, participate in the graduate Cardiovascular Sciences Collaborative Specialization at the University of Toronto. Units participating in the collaborative specialization contribute graduate courses and provide facilities and supervision for graduate research. Applicants must first be accepted by one of the participating graduate units and then complete a separate application to register in the collaborative specialization.

Students follow a plan of study acceptable to both the participating unit and the Cardiovascular Sciences specialization. Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Cardiovascular Sciences” on their transcript.

Contact and Address

Web: www.cscp.utoronto.ca
Email: cv.program@utoronto.ca
Telephone: (416) 978-0746

Cardiovascular Sciences Collaborative Specialization
University of Toronto
Room 413, 4th Floor, 263 McCaul Street
Toronto, Ontario M5T 1W7
Canada

Cardiovascular Sciences: Master's Level

Admission Requirements

- Normally, an A– average in previous coursework (publications and research work may be considered for mature students).
- The student has already been accepted into a home graduate unit that participates in the Cardiovascular Sciences Collaborative Specialization.
- Acceptance by a supervisor who is a faculty member of the Cardiovascular Sciences Collaborative Specialization.
- Research area falls within the mandate of the Cardiovascular Sciences Collaborative Specialization.

Specialization Requirements

- Students must meet the requirements of their home graduate unit in terms of coursework and thesis work.
- Write a thesis under the supervision of a faculty member of the collaborative specialization. The thesis topic will be in the area of cardiovascular sciences. An electronic copy of the accepted thesis in final form must be submitted to the Cardiovascular Sciences Collaborative Specialization.
- Complete 0.5 full-course equivalent (FCE) in an approved cardiovascular course listed under the approved Course List.
- Students must attend the annual Student Research Day each year they are in this collaborative specialization, and make one presentation during training. The presentation must demonstrate excellence in cardiovascular research.

Cardiovascular Sciences: Doctoral Level

Admission Requirements

- Normally, an A– average in previous coursework (publications and research work may be considered for mature students).
- The student has already been accepted into a home graduate unit that participates in the Cardiovascular Sciences Collaborative Specialization.
- Acceptance by a supervisor who is a faculty member of the Cardiovascular Sciences Collaborative Specialization.
- Research area falls within the mandate of the Cardiovascular Sciences Collaborative Specialization.

Specialization Requirements

- Students must meet the requirements of their home graduate unit in terms of coursework and thesis work.
- Write a thesis under the supervision of a faculty member of the collaborative specialization. The thesis topic will be in the area of cardiovascular sciences. An electronic copy of the accepted thesis in final form must be submitted to the Cardiovascular Sciences Collaborative Specialization.

- Complete two half courses or 1.0 full-course equivalent (FCE) chosen from among the following seven courses: JCV1060H, JCV3060H, JCV3061H, JCV3062H, JCV3063H, JCV3064H, and JCV3065H.
- Students must attend the annual Student Research Day each year they are in this collaborative specialization, and make one presentation during training. The presentation must demonstrate excellence in cardiovascular research.

Cardiovascular Sciences: Courses

Cardiovascular sciences courses offered by the participating units are listed below. Not all courses are offered each year. For course details, consult the Cardiovascular Sciences website.

JCV1060H	Developmental Cardiovascular Physiology
JCV3060H	Advanced Topics in Cardiovascular Sciences — Molecular Biology and Heart Signal Transduction
JCV3061H	Advanced Topics in Cardiovascular Sciences — Hormones and the Cardiovascular System
JCV3062H	Advanced Topics in Cardiovascular Sciences — Heart Function
JCV3063H	Advanced Topics in Cardiovascular Sciences — Vascular
JCV3064H	Advanced Topics in Cardiovascular Sciences — Microvascular Medicine
JCV3065H	Advanced Topics in Cardiovascular Sciences — Systems Biology
JTC1331H	Biomaterials Science
KIN5508H	Cardiovascular Disease and Exercise
LMP1104H (0.25 FCE)	Current Understanding of Ischemic Heart Disease
LMP1105H (0.25 FCE)	Current Understanding of Atherosclerosis
PSL1462H	Molecular Aspects of Cardiac Function

Community Development

Community Development: Introduction

Lead Faculty of the Collaborative Specialization

Public Health

Participating Degree Programs

Adult Education and Community Development — MA, MEd
Counselling and Clinical Psychology (Clinical and Counselling Psychology field) — MA
Counselling Psychology — MEd
Geography — MA
Planning — MScPl
Public Health Sciences — MPH
Social Work — MSW

Overview

The Collaborative Specialization in Community Development provides students with a multidisciplinary graduate education in community development. Community development involves working with community members and groups to effect positive change in the social, economic, organizational, or physical structures of a community that improve both the welfare of community members and the community's ability to direct its future.

Students must first apply to and register in one of the participating master's degree programs listed above, and then apply to the collaborative specialization. Students must follow a course of study acceptable to both the home unit and the collaborative specialization. Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Community Development” on their transcript.

Contact and Address

Telephone: (416) 978-7542

Collaborative Specialization in Community Development
Dalla Lana School of Public Health
University of Toronto
155 College Street, 6th Floor
Toronto, Ontario M5T 3M7
Canada

Community Development: Master's Level

Admission Requirements

- Collaborative specializations are administered under the auspices of the School of Graduate Studies.
- Applicants must be accepted for admission to a participating graduate unit and comply with the admission procedures of that unit before applying to the Collaborative Specialization in Community Development.
- Applicants must submit the following to the collaborative specialization committee:
  - A copy of the letter accepting you into one of the participating graduate units.
  - A resumé or curriculum vitae (CV).
  - A letter explaining how your plan of study, your specific interests, and your career goals relate to community development (i.e., why you want to enrol in the Collaborative Specialization in Community Development); maximum length: 500 words. Include reference to any relevant experience (volunteer, work, education, etc.).

Specialization Requirements

- Students must register in the master's degree program through one of the participating home graduate units. They must meet all respective degree requirements of the School of Graduate Studies and their participating home graduate unit.
- To fulfil the requirements of the Collaborative Specialization in Community Development, students must complete the following:
  - The core course UCS1000H *Community Development.*
  - An additional 1.0 full-course equivalent (FCE) in the subject area of the collaborative specialization, to be approved by the collaborative specialization director, of which at least 0.5 FCE must be external to the student's home graduate unit.
  - Participation in a non-credit coordinating seminar on community development.
  - Where required by the home degree program, a thesis or the major research paper (as designated by the home degree program) on a topic related to community development; a member of the thesis committee or the reader of the major research paper must be a faculty member associated with the collaborative specialization. Or where required by the home degree program, a practicum placement with community development content as approved by the collaborative specialization director or core faculty member from that home degree program.
- Normally, the required courses listed below are taken as options within regular departmental or faculty degree requirements, not as additional courses.

Community Development: Courses

Core Course

UCS1000H	Community Development

In addition to the core course (UCS1000H), students must take an additional 1.0 FCE in the subject area of the collaborative specialization, to be approved by the collaborative specialization director. The following is a list of the currently approved courses; the list is reviewed annually and posted on the Community Development website.

Adult Education

LHA1102H	Community Development: Innovative Models
LHA1104H	Social Action Education: Community Development, Social Services, and Social Movements
LHA1182H	Nonprofits, Co-operatives, and the Social Economy: An Overview
LHA1190H	Community Healing and Peacebuilding
LHA1194H	Cyberliteracy and Adult Education
LHA1196H	Walking Together, Talking Together: The Praxis of Reconciliation
LHA5100H	Special Topics in Adult Education and Community Development: Master's Level (with approval of the Director)
LHA6100H	Special Topics in Adult Education and Community Development: Doctoral Level (with approval of the Director)

Counselling Psychology

APD1290H	Indigenous Healing in Counselling and Psychoeducation

Nursing

NUR1047Y	Community Participation and Health
NUR1083H	Comparative Politics of Health Policy in a Globalizing World

Planning

JPG1507H	Housing Markets and Housing Policy Analysis
JPG1512H	Place, Politics, and the Urban
JPG1518H	Sustainability and Urban Communities
JPG1615H	Planning the Social Economy
JPG1812Y	Planning for Change: Community Development in Practice

Public Health Sciences

CHL5126H	Building Community Resilience
CHL7001H	Directed Reading

Social Work

SWK4210H	Promoting Empowerment: Working at the Margins
SWK4304H	Globalization and Transnationalism: Intersections of Policy and Community Practice Locally and Globally
SWK4306H	Theoretical Approaches to Defining Social Injustice and Engaging in Social Change
SWK4422H	Social Housing and Homelessness
SWK4512H	Research Knowledge for Social Justice

Comparative, International and Development Education

Comparative, International and Development Education: Introduction

Lead Faculty of the Collaborative Specialization

Ontario Institute for Studies in Education (OISE)

Participating Degree Programs

Adult Education and Community Development — MA, MEd, PhD
Curriculum and Pedagogy — MA, MEd, PhD
Educational Leadership and Policy — MA, MEd, EdD, PhD
Higher Education — MA, MEd, EdD, PhD
Language and Literacies Education — MA, MEd, PhD
Social Justice Education — MA, MEd, EdD, PhD

Overview

Comparative, International and Development Education (CIDE) is one of the world's largest, most diverse and dynamic graduate specializations in the field of comparative education. Research interests span an exciting range of theoretical and practical issues, from the study of ethnicity and identity to the issues of globalization and global governance, from non-formal learning and citizenship education to concrete problems of educational reform, social equality, language education, conflict resolution, and community development. These issues are approached from a range of theoretical and disciplinary frames including: economic, political, sociological, historical, and philosophical approaches taught alongside vibrant interpretations of feminist, critical, post-structuralist, and cultural theories.

The broad and diverse scope of the CIDE graduate specialization will appeal to both Canadian and international students interested in applying a comparative and international lens in their professional and scholarly work at home or abroad.

CIDE students can take courses in multiple fields within education, political science, feminist studies, sociology, and geography. The CIDE collaborative specialization is linked with events and programming at the Munk School of Global Affairs and Public Policy at the University of Toronto.

Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students receive the notation “Completed Collaborative Specialization in Comparative, International and Development Education" on their transcript and parchment.

Collaborative Specialization in Comparative, International and Development Education
Comparative, International and Development Education Centre (CIDEC)
Ontario Institute for Studies in Education, University of Toronto
252 Bloor Street West, 7th Floor
Toronto, Ontario M5S 1V6
Canada

Comparative, International and Development Education: Master's Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units. Applicants should apply to the appropriate degree program in one (or more) of the collaborating graduate units that corresponds most closely to their general background and interests.
- Applicants to the CIDE collaborative specialization are normally expected to have had at least one year of international or cross-cultural experience (includes Indigenous nation settings).
- Applicants who have questions concerning their eligibility should contact the CIDEC administrator at cidec.oise@utoronto.ca.
- Prospective applicants should review the detailed information about the CIDE collaborative specialization at www.oise.utoronto.ca/cidec.

Specialization Requirements

- Individual student programs of study must meet the requirements of both the home graduate unit and the collaborative specialization. Normally, a careful selection of cross-listed courses will satisfy this requirement without any additional course load.
- Course requirements are as follows:
  - 0.5 full-course equivalent (FCE) required introduction: CIE1001H *Introduction to Comparative, International and Development Education*. CIE1001H must be taken in Year 1 of the full-time student's academic course load, or within the first four courses of the part-time and flexible-time student's academic work.
  - 0.5 core FCE CIDE graduate course.
  - 1.0 FCE (equivalent to two half courses) other core CIDE or elective graduate courses. CIDE courses must be taught by CIDE affiliated graduate faculty members.
- Regular participation in and attendance at the CIDE Seminar Series. Participation at a minimum of five seminars is required; some may be attended live online.

- Students who write a thesis or major research paper as part of their program are also required to make at least one presentation to the CIDE community related to their research/development work.
- In master's programs requiring a major research paper or a thesis, the topic must relate to and demonstrate master's-level understanding of the research/ theory base of CIDE. Participating CIDE faculty and the home graduate unit must be represented on the thesis committee.

Comparative, International and Development Education: Doctoral Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units. Applicants should apply to the appropriate degree program in one (or more) of the collaborating graduate units that corresponds most closely to their general background and interests.
- Applicants to the CIDE collaborative specialization are normally expected to have had at least one year of international or cross-cultural experience (includes Indigenous nation settings).
- Applicants who have questions concerning their eligibility should contact the CIDEC administrator at cidec.oise@utoronto.ca.
- Prospective applicants should review the detailed information about the CIDE collaborative specialization at www.oise.utoronto.ca/cidec. They are strongly advised to contact one of the participating CIDE faculty members in their home graduate unit to discuss their research interests and goals.

Specialization Requirements

- Individual student programs of study must meet the requirements of both the home graduate unit and the collaborative specialization. Normally, a careful selection of cross-listed courses will satisfy this requirement without any additional course load.
- Course requirements are as follows:
  - 0.5 full-course equivalent (FCE) required introduction: CIE1001H *Introduction to Comparative, International and Development Education*, if not already taken, or equivalent if transferring from another university. CIE1001H must be taken in Year 1 of the full-time student's academic course load, or within the first four courses of the part-time and flexible-time student's academic work. Students who have completed CIE1001H at the master's level must select (in lieu, in addition to the requirements below) a 0.5 FCE course from the list of core courses, with approval from the CIDE Specialization Director at the time of course selection.
  - 0.5 FCE core CIDE graduate (preferably doctoral-level) course.
  - 1.0 FCE (equivalent to two half courses) additional core CIDE or elective graduate (preferably doctoral-level) courses. CIDE courses must be taught by CIDE affiliated graduate faculty members.
- Regular participation in and contribution to the CIDE Seminar Series (at least one major presentation to the seminar group related to the student's thesis research/development work in addition to regular participation). Participation at a minimum of five seminars is required; some may be attended live online.
- Completion of a thesis that contributes to the research/theory base of CIDE. Participating CIDE faculty and the home graduate unit must be represented on the thesis committee.

Comparative, International and Development Education: Courses

Not all courses are offered each year. Visit the Comparative, International, and Development Education (CIDE) website for current course offerings, including special topics courses that do not appear in the list below.

In addition to the courses listed here, a defined list of special topics courses, taught by CIDE participating faculty members in any of the participating graduate departments, can be taken to meet core or elective graduate course requirements for CIDE.

Core Courses

Comparative Education

CIE1001H	Introduction to Comparative, International, and Development Education
CIE1002H	Practicum for Comparative, International, and Development Education
CIE1006H	Transnational Perspectives on Democracy, Human Rights, and Democratic Education in an Era of Globalization
CIE6000H	Special Topics in Comparative, International, and Development Education

Curriculum, Teaching and Learning

Curriculum and Pedagogy Program

CTL1037H	Teacher Development: Comparative and Cross-Cultural Perspectives
CTL1060H	Education and Social Development
CTL1312H	Democratic Citizenship Education
CTL1319H	Religious Education: Comparative and International Perspectives
CTL1330H	Education and Peacebuilding in Conflict Zones: International Comparative Perspectives

Leadership, Higher and Adult Education

Adult Education and Community Development Program

LHA1146H	Women, War, and Learning
LHA3064H	Global Governance and Educational Change: the Politics of International Cooperation in Education
LHA3104H	Adult Education, Marxism, and Feminism

Educational Leadership and Policy Program

LHA1065H	Educational Equity and Excellence in International Comparison
LHA1066H	Comparative and International Perspectives on Gender and Education Policy and Practice

Higher Education Program

LHA1806H	Systems of Higher Education
LHA1807H	System-Wide Planning and Policy for Higher Education
LHA1825H	Comparative Education Theory and Methodology (RM)
LHA1826H	Comparative Higher Education
LHA1846H	Internationalization of Higher Education in a Comparative Perspective
LHA3810H	International Academic Relations

Social Justice Education

SJE1924H	Modernization, Development, and Education in African Contexts
SJE1927H	Migration and Globalization
SJE1976H	Critical Media Literacy Education
SJE3911H	Cultural Knowledges, Representation, and Colonial Education

Elective Courses

Curriculum, Teaching and Learning

Curriculum and Pedagogy Program

CTL1031H	Language, Culture, and Identity: Using the Literary Text in Teacher Development
CTL1063H	Pedagogies of Solidarity
CTL1218H	Culture and Cognition in Mathematics, Science, and Technology Education
CTL1221H	Education for Human Goals Local and Global: How's Science Education Helping?
CTL1307H	Identity Construction and Education of Minorities
CTL1318H	Teaching Conflict and Conflict Resolution
CTL1320H	Introduction to Aboriginal Land-Centered Education: Historical and Contemporary Perspectives
CTL1321H	Aboriginal Civilization: Language, Culture, and Identity
CTL1332H	Introduction to Decolonization in Education
CTL1406H	The Origins of Modern Schooling: Issues in the Development of the North American Educational System
CTL1430H	Gendered Colonialisms, Imperialisms, and Nationalisms in History

Language and Literacies Education Program

CTL3000H	Foundations of Bilingual and Multicultural Education
CTL3008H	Critical Pedagogy, Language, and Cultural Diversity
CTL3011H	Cognitive Sociolinguistic and Sociopolitical Orientations in Bilingual Education Research
CTL3015H	Language and Literacies Education in Multilingual Contexts
CTL3018H	Language Planning and Policy
CTL3024H	Language Teacher Education
CTL3025H	Educational Sociolinguistics
CTL3026H	Pragmatics in Language Education
CTL3031H	Children's Literature Within a Multicultural Context
CTL3100H	Communication and Second Language Learning in the Workplace
CTL3805H	Multilingualism and Pluralism

Leadership, Higher and Adult Education

Adult Education and Community Development Program

LHA1102H	Community Development: Innovative Models
LHA1113H	Gender and Race at Work
LHA1115H	Learning for the Global Economy

LHA1142H	Young Adulthood in Crisis: Learning, Transitions, and Activism
LHA1145H	Participatory Research in the Community and the Workplace (RM)
LHA1147H	Women, Migration, and Work
LHA1180H	Indigenous Worldviews: Implications for Education
LHA1181H	Embodied Learning and Alternative Approaches to Community Wellness
LHA1184H	Aboriginal Knowledge: Implications for Education
LHA1190H	Community Healing and Peacebuilding
LHA1196H	Walking Together, Talking Together: The Praxis of Reconciliation
LHA3140H	Decolonization and Transformative Education

Educational Leadership and Policy Program

LHA1029H	Special Applications of the Administrative Process
LHA1041H	Educational Administration II: Social and Policy Context of Schooling
LHA3041H	Administrative Theory and Educational Problems II: Doctoral Seminar on Policy Issues in Education
LHA3055H	Democratic Values, Student Engagement, and Democratic Leadership

Higher Education Program

LHA1803H	Recurring Issues in Postsecondary Education

Social Justice Education

SJE1912H	Foucault and Research in Education and Culture: Discourse, Power, and the Subject
SJE1921Y	The Principles of Anti-Racism Education
SJE1922H	Sociology of Race and Ethnicity
SJE1925H	Indigenous Knowledge and Decolonization: Pedagogical Implications
SJE1926H	Race, Space, and Citizenship: Research Methods
SJE1951H	The School and the Community
SJE1956H	Social Relations of Cultural Production in Education
SJE2941H	Bourdieu: Theory of Practice in Social Sciences
SJE3905H	Interdisciplinary Approaches to Research: Theory and Praxis
SJE3912H	Race and Knowledge Production: Research Methods
SJE3914H	Anti-Colonial Thought and Pedagogical Challenges
SJE3915H	Franz Fanon and Education
SJE3933H	Globalisation and Transnationality: Feminist Perspectives

Contemporary East and Southeast Asian Studies

Contemporary East and Southeast Asian Studies: Introduction

Lead Faculty of the Collaborative Specialization

Arts and Science

Participating Degree Programs

Anthropology — MA
East Asian Studies — MA
Geography — MA
Global Affairs — MGA
History — MA
Management — MBA
Planning — MScPl
Political Science — MA
Public Policy — MPP
Social Work — MSW
Sociology — MA
Women and Gender Studies — MA

Overview

The Collaborative Master's Specialization in Contemporary East and Southeast Asian Studies (CESEAS) is designed to provide graduates with advanced training in a particular discipline and in the historical and social science studies of modern East and Southeast Asia. The major topics of emphasis are political economy, modern and contemporary social history, international relations, gender, political and social change, economic development, and cultural studies. The collaborative specialization contributes to the development of an integrated and interdisciplinary research community in Contemporary East and Southeast Asian Studies at the University.

The graduate programs listed above participate in the Collaborative Specialization in CESEAS at the University of Toronto. The collaborating units contribute courses and provide facilities and supervision for master's-level research. This specialization is administered by a committee chaired by a director.

Applicants are expected to meet the admission and degree requirements of both their home unit and the collaborative specialization in Contemporary East and Southeast Asian Studies. The specialization requirements can be met concurrently with, or in addition to, home unit requirements. Upon successful completion of the master's degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Contemporary East and Southeast Asian Studies” on their transcript.

Canada

Contemporary East and Southeast Asian Studies: Master's Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.
- To be considered for admission to the collaborative specialization in Contemporary East and Southeast Asian Studies, applicants are expected to have completed coursework on Asia or have had relevant working or living experience in East or Southeast Asia.

Specialization Requirements

- Students must satisfy the degree requirements of both the home graduate unit and the collaborative specialization. This can be done concurrently with, or in addition to, home unit requirements.
- Attend the year-long, interdisciplinary core seminar ASI1000Y *Issues in Asia-Pacific Studies* (1.0 full-course equivalent [FCE]). Topics vary from year to year.
- Complete 0.5 elective FCE on East or Southeast Asia, or in Asia-related courses within the home graduate unit or any other units (subject to approval from the collaborative specialization director).
- Complete a Major Research Paper, usually written in the context of a 0.5 FCE independent study course (for example, ASI1001H *Independent Research in Asia-Pacific Studies*). The Major Research Paper must address a topic on contemporary East and Southeast Asian Studies, and be based on original and in-depth research that goes beyond a normal seminar paper at the graduate level. The length is approximately 50 to 60 pages, although certain types of research might well be communicated in formats of shorter length. The Major Research Paper requirement can be met in the home graduate unit for a major research paper, as long as the topic is related to Asia and is approved by the collaborative specialization director. In rare cases when a student undertakes a master's thesis in a home unit, the additional Major Research Paper will be waived. Students must seek approval for topics and format from the collaborative specialization director.

- By the time of graduation from the master's degree program, every student is strongly encouraged to have a working knowledge of an East or Southeast Asian language as needed for his or her course of study.

Contemporary East and Southeast Asian Studies: Courses

Course List

ASI1001H	Independent Research in Contemporary East and Southeast Asian Studies
ASI1000Y	Issues in Contemporary East and Southeast Asian Studies
ASI4140H	The Public Event in Asia
ASI4200H	Asia and the New Global Economy
ASI4300H	Nationalism and Revolution in Asia
ASI4900H	Special Topics in Contemporary Asian Studies

Please consult the website for courses offered by participating graduate units.

Development Policy and Power

Development Policy and Power: Introduction

Lead Faculty of the Collaborative Specialization

University of Toronto Scarborough

Participating Degree Programs

Environmental Science — MEnvSc
Geography — MA
Political Science — MA
Public Health Sciences — MPH
Sociology — MA
Social Justice Education — MA, MEd
Women and Gender Studies — MA

Supporting Unit

Centre for Critical Development Studies

Overview

The Collaborative Specialization in Development Policy and Power is designed to provide master's students with a critical and historicized understanding of the nature of some of the main policy debates within the field of international development. These include: power dynamics and their shifts over time within particular development policy domains at the global, national, and local levels of analysis; the role of the power struggles around development policy making in the processes of program design and implementation; and the ways in which these power struggles shape the institutionalization of policies that are equitable and social justice oriented.

In addition to examining contestations around the development field's major historical and theoretical threads, students will be immersed in thematic discussions around development policy fields such as: trade, financialization, and illicit financial flows; agriculture and land struggles; political ecology and extra-activism; the politics of sustainability and environmental survival; health governance and health inequities; displacement, immigration, and citizenship; foreign aid and South-South cooperation; indigenous, racial justice, and gender equity struggles; political economy of knowledge production; commodity booms, poverty reduction, and the exercise of state power; and neoliberal globalization and corporate power, and associated resistance and popular mobilization, writ large.

The graduate programs listed above participate in the Collaborative Specialization in Development Policy and Power at the University of Toronto. The collaborating graduate units contribute courses and provide facilities, support, and supervision for master's-level research and practicum placements.

Upon successful completion of the master's degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation "Completed Collaborative Specialization in Development Policy and Power" on their transcript.

Development Policy and Power: Master's Level

Admission Requirements

Applicants must:

- Meet the admission requirements of both the home graduate unit and the collaborative specialization.
- Be enrolled in, or applying to, a participating master's degree program.
- Submit a copy of the CV and reference letters submitted at the time of applying to their home graduate unit.
- Submit a one-page essay describing why and how their interests coincide with the Collaborative Specialization in Development Policy and Power.

Optional Preparation

- The Centre for Critical Development Studies will provide students interested in the collaborative specialization with a list of key background readings. Students with no critical development studies exposure through their undergraduate studies, a placement or internship, or relevant work experience are strongly encouraged to review all the material identified in the list. Students with a critical development background are encouraged to review the texts they have not been exposed to.

Specialization Requirements

MA and MSc in Anthropology;
MA in Geography;
MA in Political Science (Fields: Political Economy of International Development; Political Science);
Master of Public Health (Field: Health Promotion);
Social Justice Education (MA; MEd Coursework Plus Major Research Paper Option; MEd Coursework Plus Thesis Option);
MA in Sociology (Research Paper Option);
MA in Women and Gender Studies

- Students must meet all the respective degree requirements of the School of Graduate Studies and the participating graduate unit.
- Students must meet the requirements of the collaborative specialization as follows:
  - IDS1000H (0.5 full-course equivalent [FCE]): a core course meeting every other week throughout the academic year involving a mix of classes covering a substantive theme.
  - Participate regularly and actively in the *Development Policy and Power Seminar Series* SRM3333H.
  - The major research paper, thesis, or practicum placement in the participating degree program will be on a topic in critical development studies, approved by the collaborative specialization committee.
- Collaborative specialization courses may be taken as electives for the purpose of satisfying home program requirements.

Specialization Requirements

Social Justice Education (MEd Coursework Only Option)

- Students must meet all the respective degree requirements of the School of Graduate Studies and the participating graduate unit.
- Students must meet the requirements of the collaborative specialization as follows:
  - IDS1000H (0.5 full-course equivalent [FCE]): a core course meeting every other week throughout the academic year involving a mix of classes covering a substantive theme.
  - Participate regularly and actively in the *Development Policy and Power Seminar Series* SRM3333H.
  - 1.0 elective FCE related to development policy and power.
- Collaborative specialization courses may be taken as electives for the purpose of satisfying home program requirements.

Specialization Requirements

Sociology (Coursework Only Option)

- Students must meet all the respective degree requirements of the School of Graduate Studies and the participating graduate unit.
- Students must meet the requirements of the collaborative specialization as follows:
  - IDS1000H (0.5 full-course equivalent [FCE]): a core course meeting every other week throughout the academic year involving a mix of classes covering a substantive theme.
  - Participate regularly and actively in the *Development Policy and Power Seminar Series* SRM3333H.
  - 0.5 elective FCE related to development policy and power.
- Collaborative specialization courses may be taken as electives for the purpose of satisfying home program requirements.

Specialization Requirements

Master of Environmental Science (Research Paper Option)

- Students must meet all the respective degree requirements of the School of Graduate Studies and the participating graduate unit.
- Students must meet the requirements of the collaborative specialization as follows:
  - IDS1000H (0.5 full-course equivalent [FCE]): a core course meeting every other week throughout the academic year involving a mix of classes covering a substantive theme. This course must be taken in addition to the 5.5 FCEs required for the MEnvSc program.
  - Participate regularly and actively in the *Development Policy and Power Seminar Series* SRM3333H.
  - The major research paper in the participating degree program will be on a topic in critical development studies, approved by the collaborative specialization committee.
- Collaborative specialization courses may be taken as electives for the purpose of satisfying home program requirements.

Specialization Requirements

Master of Environmental Science (Internship Option)

- Students must meet all the respective degree requirements of the School of Graduate Studies and the participating graduate unit.
- Students must meet the requirements of the collaborative specialization as follows:

- IDS1000H (0.5 full-course equivalent [FCE]): a core course meeting every other week throughout the academic year involving a mix of classes covering a substantive theme. This course must be taken in addition to the 5.5 FCEs required for the MEnvSc program.
- Participate regularly and actively in the *Development Policy and Power Seminar Series* SRM3333H.
- 1.5 elective FCEs from the following: EES1122H, EES1134H, EES1135H, EES3002H.

- Collaborative specialization courses may be taken as electives for the purpose of satisfying home program requirements.

Development Policy and Power: Courses

Core Courses

IDS1000H	Development Policy and Power
SRM3333H	Master's Seminar Series

Elective Courses by Graduate Unit

These courses may have prerequisites and enrolment limits and may not be offered every year. Students may take courses not listed here with approval of the collaboration specialization director.

Anthropology

ANT6019H	Anthropology of Neoliberalism
ANT7002H	Medical Anthropology II

Comparative, International and Development Education

CIE1001H	Introduction to Comparative, International, and Development Education
CIE1006H	Transnational Perspectives on Democracy, Human Rights, and Democratic Education in an Era of Globalization

Curriculum, Teaching and Learning

CTL1060H	Education and Social Development

Geography and Planning

GGR1807H	Special Topics: Geographies of Postcoloniality and Development: Exploring the 'Infrastructure Turn'
JPG1426H	Natural Resources, Difference, and Conflict
JPG1429H	Political Ecology of Food and Agriculture
JPG1502H	Global Urbanism and Cities of the Global South
JPG1520H	Contested Geographies of Class-Race Formation
JPG1706H	Violence and Security

Leadership, Higher and Adult Education

Biomedical Engineering — MASc, PhD
Cell and Systems Biology — MSc, PhD
Clinical Engineering — MHSc
Immunology — MSc, PhD
Laboratory Medicine and Pathobiology — MSc, PhD
Medical Science — MSc, PhD
Molecular Genetics — MSc, PhD
Physiology — MSc, PhD

Overview

The graduate programs listed above participate in the Collaborative Specialization in Developmental Biology. The objectives of the specialization are to:

- promote and foster excellence in developmental biology research in Toronto;
- provide a means for master's and PhD graduate students working on developmental biology projects to be exposed to a broad range of issues and approaches in modern developmental biology;
- provide a single, comprehensive, advanced PhD-level graduate course to complement a number of introductory courses provided by different graduate units;
- provide a forum for interaction between investigators in developmental biology in different graduate units via participation in student seminars, supervisory committees, journal clubs, retreats, and seminars/symposia.

Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Developmental Biology” on their transcript.

Developmental Biology: Master's Level

Admission Requirements

- Students who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.

Program Requirements

Students must:

- Be registered in the master's program of one of the participating graduate units and must be undertaking research in developmental biology under the supervision of a member of the collaborative specialization.
- Complete all degree program requirements of the participating graduate unit. In addition, they must complete the interdepartmental course JDB1024Y.
- Complete an MSc thesis in the topic area of developmental biology.

Developmental Biology: Doctoral Level

Admission Requirements

- Students who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.
- Prospective students should contact the collaborative specialization director for additional details on admission procedures and course requirements.

Program Requirements

Students must:

- Meet all respective degree requirements of the School of Graduate Studies, the home graduate unit, and the collaborative specialization.
- Be registered in the doctoral program of one of the host graduate units and must be undertaking research in developmental biology under the supervision of a member of the collaborative specialization.

- Complete all degree requirements of the participating graduate unit. In addition, they must complete the interdepartmental course JDB1025H and the seminar course JDB1026Y. These courses may be taken in place of some host graduate unit courses.
- Complete a PhD thesis in the topic area of developmental biology.

Developmental Biology: Courses

The following courses are offered every year:

JDB1024Y	Topics in Developmental Biology
JDB1025H	Developmental Biology
JDB1026Y	Student Seminars in Developmental Biology

Centre for Diaspora and Transnational Studies

Overview

Diaspora in contemporary thought involves the shifting relations between homelands and host nations from the perspective of those who have moved, whether voluntarily or not. Diaspora emphasizes the inescapable lived translocal experiences of many migrant communities that exceed the boundaries of the nation-state. Questions of nostalgia, of the dynamics of co-ethnic identification, of the politics of homeland and host nation, and of the inter-generational shifts in responses to all these are central to studies of diaspora.

Transnationalism, on the other hand, focuses on flows and counterflows and the multistriated connections to which they give rise. It encompasses in its ambit not just the movement of people but also concepts of citizenship and multinational governance, the resources of information technology, and the realities of the global marketplace, among others.

Taken together, the two concepts of diaspora and transnationalism enable our understanding of the complex realities of vast movements of people, goods, ideas, images, technologies, and finance in the world today.

This collaborative specialization is designed to bring together both social science and humanities perspectives to augment our existing tri-campus undergraduate program and to contribute to increased research collaboration between participants in the collaborative specialization.

Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Diaspora and Transnational Studies” on their transcript.

Diaspora and Transnational Studies: Master's Level

Admission Requirements

- Applicants are enrolled in a participating master's degree program in the graduate unit in which the research is conducted, which is known as the participating home graduate unit. The applicant must meet the admission requirements of both the home graduate unit and the collaborative specialization.

Specialization Requirements

- Students must meet all respective degree requirements of the School of Graduate Studies and the participating unit.
- Students must meet the requirements of the collaborative specialization as follows:
  - 0.5 full-course equivalent (FCE) seminar in *Comparative Research Methods in Diaspora and Transnational Studies* (DTS). As part of the Research Methods seminar, students are required to submit an ethnographic, archival, or documentary paper on a diasporic community in Toronto or elsewhere.
  - 0.5 FCE DTS topics course (DTS2000H, DTS2001H, or DTS2002H); course themes to be decided each year by the collaborative specialization committee. The DTS collaborative components may be taken as electives for the purpose of satisfying home unit requirements.

- The DTS collaborative components may be taken as electives for the purpose of satisfying home unit requirements.
- If the student undertakes a major paper or thesis in their home unit, this will be on a topic in diaspora and transnational studies, approved by the collaborative specialization committee.

Diaspora and Transnational Studies: Doctoral Level

Admission Requirements

- Applicants shall be enrolled in a participating doctoral degree program in the graduate unit in which the research is conducted, which is known as the participating home graduate unit. The applicant shall meet the admission requirements of both the home graduate unit and the collaborative specialization.
- Students who complete the collaborative specialization at the master's level will not be eligible for the program at the doctoral level.

Specialization Requirements

- Students must meet all respective degree requirements of the School of Graduate Studies and the participating unit.
- Students must meet the requirements of the collaborative specialization as follows:
  - 0.5 full-course equivalent (FCE) seminar in *Comparative Research Methods in Diaspora and Transnational Studies* (DTS). As part of the Research Methods seminar, students are required to submit an ethnographic, archival, or documentary paper on a diasporic community in Toronto or elsewhere.
  - 0.5 FCE DTS topics course (DTS2000H, DTS2001H, or DTS2002H); course themes to be decided each year by the collaborative specialization committee. The DTS collaborative components may be taken as electives for the purpose of satisfying home unit requirements.
  - The DTS collaborative components may be taken as electives for the purpose of satisfying home department requirements.
  - The student's dissertation in their home department must be on a topic in diaspora and transnational studies, approved by the collaborative specialization committee.

Editing Ancient and Medieval Texts

Editing Ancient and Medieval Texts: Introduction

This collaborative specialization will close on August 31, 2026.

Lead Faculty of the Collaborative Specialization

Arts and Science

Participating Degree Programs

Classics — PhD
English — PhD
History — PhD
Italian Studies — PhD
Medieval Studies — PhD
Music — PhD
Philosophy — PhD
Religion — PhD
Spanish — PhD

Overview

The Collaborative Specialization in Editing Ancient and Medieval Texts offers intensive training in the editing of medieval Latin and vernacular texts, including music. Training in all areas is based on a sound knowledge of Latin, a facility in examining manuscript documents, and an understanding of the principles of editorial method.

Students can choose to focus on editing texts in Latin, texts in Old and Middle English, or texts in other vernacular languages. Students complete a series of courses that deal with the techniques of reading, transcribing, and editing manuscripts, and then complete an editorial project. Upon successful completion of the PhD requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Editing Ancient and Medieval Texts” on their transcript.

Collaborative Specialization in Editing Ancient and Medieval Texts
Centre for Medieval Studies
University of Toronto
3rd Floor, 125 Queen's Park
Toronto, Ontario M5S 2C7
Canada

Editing Ancient and Medieval Texts: Doctoral Level

Admission Requirements

- The Collaborative Specialization in Editing Ancient and Medieval Texts is only available to doctoral students in one of the collaborating graduate units.
- Students who wish to be admitted to the collaborative specialization must have passed the Centre for Medieval Studies' Level One Latin examination.

Specialization Requirements

- Students must complete a total of **1.0 full-course equivalent (FCE)** as follows:
  - The year-long core seminar MST1111H *Higher Seminar in Editing Ancient and Medieval Texts*[+] (0.5 FCE; Credit/No Credit)
  - 0.5 FCE from a course in the relevant language and/or philology of the student’s field, chosen with the approval of the home graduate unit and the collaborative specialization director.
- An approved editorial project, which can be a paper for a course in any of the collaborating graduate units, an independent publishable project, or the student's dissertation.
- The student's course of study and overall progress will be reviewed annually by the collaborative specialization director, though ultimate responsibility for the student's progress will remain with the graduate chair of the home program.

Education, Francophonies and Diversity

Education, Francophonies and Diversity: Introduction

This information is available in French.

Lead Faculty of the Collaborative Specialization

Ontario Institute for Studies in Education (OISE)

Participating Degree Programs

Curriculum and Pedagogy — MA, MEd, PhD
Language and Literacies Education — MA, MEd, PhD
Social Justice Education — MA, MEd, EdD, PhD

Overview

The Collaborative Specialization in Education, Francophonies and Diversity will critically examine educational issues in the context of Francophone linguistic minorities in Ontario, in Canada, and in the world, with the notions of equity, diversity, and minoritization at the core of this critical examination. The emphasis will be on understanding social practices in education, looking specifically at how difference gets constructed, problematized, and transformed.

Upon successful completion of the requirements of the home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Education, Francophonies and Diversity” on their transcript.

Toronto, Ontario M5S 1V6 Canada

Education, Francophonies and Diversity: Master's Level

Admission Requirements

- Applicants must apply to and be accepted by both their home program and the Collaborative Specialization in Education, Francophonies and Diversity.
- In addition to corresponding to all home program requirements, applicants must submit:
  - a curriculum vitae
  - a personal statement explaining how their program of study and specific research interests relate to Francophone linguistic minorities education.

Specialization Requirements

- Complete the core course CRE1001H *Séminaire d’études : Éducation, francophonies et diversité* (0.5 full-course equivalent [FCE]).
- Complete two Education, Francophonies and Diversity elective courses (1.0 FCE).
- Attend at least three sessions in the CREFO Conference Series. Students who are enrolled in an MA or MEd program with a Major Research Project (MRP) component must present their research paper at the CREFO Conference Series (SRM3333H *Master's Seminar Series*).
- Prepare a thesis or major research paper (depending on the requirements of the home graduate unit) which relates to the focus of the collaborative specialization. Students will be supervised by one of the collaborative specialization's core faculty in their home graduate unit.

Education, Francophonies and Diversity: Doctoral Level

Admission Requirements

- Applicants must apply to and be accepted by both their home program and the Collaborative Specialization in Education, Francophonies and Diversity.
- In addition to corresponding to all home program requirements, applicants must submit:
  - a curriculum vitae
  - a personal statement explaining how their program of study and specific research interests relate to Francophone linguistic minorities education.

Specialization Requirements

- Complete the core course CRE1001H *Séminaire d’études : Éducation, francophonies et diversité* (0.5 full-course equivalent [FCE]).
- Complete two Education, Francophonies and Diversity elective courses (1.0 FCE).
- Attend at least three sessions in the CREFO Conference Series. Students must present their research paper at the

CREFO Conference Series (SRM4444H *Doctoral Seminar Series*).
- Prepare a thesis which relates to the focus of the collaborative specialization. Students will be supervised by one of the collaborative specialization's core faculty in their home graduate unit.

Education, Francophonies and Diversity: Courses

Not all courses are offered every year. Please consult the respective graduate unit's course schedule for details.

Core Course

CRE1001H	Séminaire d'études : Éducation, francophonies et diversité

Elective Courses

CTL1000H	Les fondements du curriculum et de la pédagogie
CTL1011H	L'éducation pour l'anti-oppression en milieu scolaire
CTL1304H	Études culturelles et éducation
CTL1306H	La recherche qualitative en éducation : bases théoriques et pratiques
CTL1307H	Identité collective et éducation minoritaire de langue française
CTL3200H	Analyse du discours
CTL3201H	Bilinguisme et éducation
CTL3202H	Politique et aménagement linguistique
SJE1900H	Introduction à la sociologie de l'éducation
SJE1951H	L'école, la participation parentale et la communauté
JTE1952H	Langue, culture, et éducation

Educational Policy

Educational Policy: Introduction

Lead Faculty of the Collaborative Specialization

Ontario Institute for Studies in Education (OISE)

Participating Degree Programs

Adult Education and Community Development — MA, MEd, PhD
Curriculum and Pedagogy — MA, MEd, PhD
Developmental Psychology and Education — MA, MEd, PhD
Educational Leadership and Policy — MA, MEd, EdD, PhD
Higher Education — MA, MEd, EdD, PhD
Language and Literacies Education — MA, MEd, PhD
Social Justice Education — MA, MEd, EdD, PhD

Overview

The Collaborative Specialization in Educational Policy serves students interested in developing an understanding of the factors associated with educational policy development and implementation, with particular emphasis on developing theoretical and practical strategies for improving educational processes. The collaborative specialization's intellectual objectives include providing students with exposure to cross-field and cross-disciplinary approaches to educational problem framing and problem solving in order to broaden the possibilities for innovative and effective policy analysis; helping students understand how to apply theoretical concepts to particular social and educational problems in particular settings; and understanding the broader social, institutional, and policy contexts within which educational policy processes occur. There are two required courses and an annual lecture series.

Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation "Completed Collaborative Specialization in Educational Policy" on their transcript.

Educational Policy: Master's Level

Admission Requirements

- Applicants must apply to and be accepted by both their home program and the Collaborative Specialization in Educational Policy.
- In addition to corresponding to all home program requirements, the applicant shall submit a sample of writing, no longer than three pages, that includes:
  - Relevant personal and/or professional experiences, a career plan, and motivation in seeking admission to the Collaborative Specialization in Educational Policy.
  - An indication of specific courses of interest.
  - For thesis students, a brief outline of a proposed research project.
  - For thesis students, indication of preference of supervisor.
- Applicants who are interested in applying to the collaborative specialization at the time of their initial application to their home graduate program should indicate this on their application and advise referees that letters of support will be used in application for both the home program and the collaborative specialization.
- Students who develop an interest in admission to the collaborative specialization after they have been admitted to their home program may also apply during their course of study. Please direct inquiries to the address listed above.

Specialization Requirements

- All master's students in the collaborative specialization:
  - Take the core half course EDP3045H *Educational Policy and Program Evaluation* (0.5 FCE).
  - Attend the Collaborative Specialization in Educational Policy Seminar Series over two consecutive sessions. Collaborative Educational Policy Seminars occur once a month; attendance is required.
  - Are encouraged, but not required, to enrol in an elective half course in the area of educational policy selected from the list of electives below.
  - Take the remaining courses for the fulfillment of the degree requirements of the home program.
  - Enrolled in home programs requiring a master's research project or thesis will be required to incorporate educational policy issues in their research; a member of the collaborative specialization core faculty will serve as supervisor or committee member.
- MEd program:
  - The total number of courses required for graduation will equal 6, 8, or 10.
  - Course-only MEd students must take two electives from the list below.
- MA program:
  - The total number of courses required for graduation will equal 6 or 8.

Educational Policy: Doctoral Level

Admission Requirements

- Students interested in participating in the Collaborative Specialization in Educational Policy at the doctoral level must apply to and be accepted by both their home program and the collaborative specialization.
- In addition to corresponding to all home program requirements, the application shall include a sample of writing, no longer than three pages, that includes:
  - Relevant personal and/or professional experiences, a career plan, and motivation in seeking admission to the Collaborative Specialization in Educational Policy.
  - An indication of specific courses of interest.
  - A brief outline of proposed research project.
  - Indication of preference of supervisor.
- Applicants who are interested in applying to the collaborative specialization at the time of their initial application to their home graduate program should indicate this on their application and advise referees that letters of support will be used in application for both the home program and the collaborative specialization.
- Students who develop an interest in admission to the collaborative specialization after they have been admitted to their home program may also apply during their course of study. Please direct inquiries to the address listed above.

Specialization Requirements

- All doctoral students in the collaborative specialization:
  - Take the core half course (0.5 full-course equivalent [FCE]) EDP3045H *Educational Policy and Program Evaluation*, if not already taken.
  - Take the core half course (0.5 FCE) EDP3145H *Advanced Issues in Educational Policy Analysis and Program Evaluation*.
  - Attend the Collaborative Specialization in Educational Policy Seminar Series over two consecutive sessions. Collaborative Educational Policy Seminars occur once a month; attendance is required.
  - Are encouraged, but not required, to consider one or more elective half courses in the area of educational policy selected from the list of electives below. The remaining half courses will be those required for the fulfillment of the degree requirements of the home program.
  - Are required to complete a thesis which incorporates issues of educational policy. A member of the collaborative specialization core faculty will serve as supervisor or committee member.
- The total number of courses required for graduation for both the EdD and PhD will equal eight, depending on the requirements of the student's home program.

Educational Policy: Courses

Not all courses are offered each year. Visit the Collaborative Specialization in Educational Policy (CSEP) website for current course offerings.

Master's-Level Core Course

EDP3045H	Educational Policy and Program Evaluation

Master's-Level Electives

APD1211H	Psychological Foundations of Early Development and Education
APD1241H	Outcomes of Early Education and Child Care

LHA5801H*	Special Topics in Higher Education: Master's Level*
LHA5807H	Special Topics in Higher Education: Master's Level
SJE1902H	Introductory Sociological Research Methods in Education
SJE1903H	Major Concepts and Issues in Social Justice Education
SJE1912H	Foucault and Research in Education and Culture: Disclosure, Power, and the Subject
SJE1922H	Sociology of Race and Ethnicity
SJE1951H	The School and the Community
SJE1954H	Marginality and the Politics of Resistance

SJE5000H*	Special Topics in Social Justice Research in Education: Master's Level*
SJE5005H	Special Topics in Social Justice Research in Education: Master's Level

Doctoral-Level Core Courses

EDP3045H	Educational Policy and Program Evaluation
EDP3145H	Advanced Issues in Educational Policy Analysis and Program Evaluation

Doctoral-Level Electives

CTL3000H	Foundations of Bilingual and Multicultural Education
CTL3008H	Critical Pedagogy, Language, and Cultural Diversity
CTL3018H	Language Planning and Policy (Exclusion: CTL3202H)
JOI3048H	Intermediate Statistics in Educational Research: Multiple Regression Analysis (RM)
JSA5147H	Language, Nationalism, and Post-nationalism
LHA3041H	Administrative Theory and Educational Problems II: Doctoral Seminar on Policy Issues in Education
LHA3043H	Survey Research in Educational Leadership and Policy (RM)
LHA3064H	Global Governance and Educational Change: the Politics of International Cooperation in Education
LHA6000H*	Special Topics in Educational Leadership and Policy: Doctoral Level*
LHA6002H	Special Topics in Educational Leadership and Policy: Doctoral Level
LHA6005H	Special Topics in Educational Leadership and Policy: Doctoral Level
SJE2941H	Bourdieu: Theory of Practice in Social Sciences
SJE6000H*	Special Topics in Social Justice Research in Education: Doctoral Level*

*** Special topics courses:** Only the special topics course titles listed on the CSEP website can be counted toward CSEP program requirements in the current year. Please confirm current year courses with the CSEP program administrator.

Engineering Education

Engineering Education: Introduction

Lead Faculty of the Collaborative Specialization

Applied Science and Engineering

Participating Degree Programs

Chemical Engineering and Applied Chemistry — MASc, PhD
Civil Engineering — MASc, PhD
Curriculum and Pedagogy — MA, PhD
Higher Education — MA, MEd, PhD
Mechanical and Industrial Engineering — MASc, PhD

Overview

The Collaborative Specialization in Engineering Education is an interdisciplinary initiative designed for students within home programs in engineering or education who are interested in pursuing courses and research in engineering education. This collaborative specialization allows students to join a small community of scholars interested in research and learning at the nexus of education and engineering practice. A core course provides students with an introduction to engineering learning, knowledge, assessment, and culture and community, while the theoretical foundations, methods, and topics related to engineering education research are explored in a seminar course.

Research is supervised by a graduate faculty member in the student's home graduate unit. Opportunities exist to assess and apply research findings as part of instructional initiatives within the Faculty of Applied Science and Engineering. Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation "Completed Collaborative Specialization in Engineering Education" on their transcript.

Collaborative Specialization in Engineering Education
Institute for Studies in Transdisciplinary Engineering Education & Practice (ISTEP)
55 College Street, Room 723
Toronto, Ontario M5S 0C9
Canada

Engineering Education: Master's Level

Admission Requirements

- Applicants to the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.
- Applicants to the collaborative specialization must submit the following:
  - curriculum vitae (CV)
  - personal statement explaining how the proposed plan of study and specific research interests relate to engineering education
  - letter of recommendation from a faculty member confirming their willingness to supervise and support the student's research and outlining why the student would be well suited for the Engineering Education Collaborative Specialization.

Specialization Requirements

Students must meet all respective degree requirements of the School of Graduate Studies, the participating home graduate unit, and the collaborative specialization. Collaborative specialization students must:

- Successfully complete a total of 0.5 full-course equivalent (FCE) as follows:
  - the core course TEP1204H *Instructional Design in Engineering Education*.
- Participate continuously in a seminar series TEP1205Y *Engineering Education Research Seminar* (Credit/No Credit).
- Undertake the major paper or thesis required by the home degree program with a focus on engineering education under the supervision of a collaborative specialization core faculty member.

Engineering Education: Doctoral Level

Admission Requirements

- Applicants to the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.
- Applicants to the collaborative specialization must submit the following:
  - curriculum vitae (CV)
  - personal statement explaining how the plan of study and specific research interests relate to engineering education
  - letter of recommendation from a faculty member confirming their willingness to supervise and support the student's research and outlining why the student would be well suited for the Engineering Education Collaborative Specialization.

Specialization Requirements

Students must meet all respective degree requirements of the School of Graduate Studies, the participating home graduate unit, and the collaborative specialization. Collaborative specialization students must:

- Successfully complete a total of **1.0 full-course equivalent (FCE)** as follows:
  - the core course TEP1204H *Instructional Design in Engineering Education* (0.5 FCE)
  - an elective course in engineering education (0.5 FCE); see the elective course list.
- Participate continuously in a seminar series TEP1206Y[0] *Engineering Education Research Seminar — Doctoral Level* (Credit/No Credit) beginning in Year 1; deliver a seminar on the research topic in Year 2; design and deliver one or more instructional workshops and make a final presentation on their research, both in the final year.
- Complete the thesis required by the home degree program with a focus on engineering education under the supervision of a collaborative specialization core faculty member.
- Complete the core course TEP1204H; students who have completed the course at the master's level may substitute an elective course at the doctoral level from the elective list and with the approval of the collaborative specialization director.

[0] Course that may continue over a program. The course is graded when completed.

Overview

The graduate degree programs listed above participate in the Collaborative Specialization in Environmental Studies (CSES), which is offered through the School of the Environment. Students admitted to a graduate degree program in a participating degree-granting unit, also called the home department or home unit, can apply to the CSES and pursue coursework and research on topics related to the environment. The School of the Environment currently has graduate students from across the disciplinary spectrum.

The CSES provides interested students an opportunity to examine environmental-related issues from different disciplinary perspectives and gain insights about the importance of understanding and applying interdisciplinary approaches and methodological concepts and tools in environmental decision making. The purpose is to complement the discipline-based learning and research focus of their home units by providing students an interdisciplinary forum to examine, discuss, and address environmental issues. With participating students from as many as 20 different disciplines, the core course, ENV1001H *Environmental Decision Making*, gives students a unique opportunity to engage with faculty and peers coming from a range of academic backgrounds and perspectives.

Upon successful completion of the degree requirements of the participating home graduate unit and the CSES, students will receive the notation “Completed Collaborative Specialization in Environmental Studies” on their transcript.

Collaborative Specialization in Environmental Studies
School of the Environment, Earth Sciences Centre
University of Toronto
Room 1016V, 33 Willcocks Street
Toronto, Ontario M5S 3E8
Canada

Environmental Studies: Master's Level

Admission Requirements

- Students who wish to enrol in the Collaborative Specialization in Environmental Studies (CSES) offered by the School of the Environment must first apply to and be accepted into a master's program in a degree-granting unit, also called a home department or home unit. Information about applying to a master's program can be found on the School of Graduate Studies website as well as on the respective websites of participating degree-granting units.
- Prospective students who are planning to enrol in the CSES are strongly encouraged to submit copies of the documents outlined on the School of the Environment website by the application deadline established by the degree program admission committee in the home department. Applicants should contact the home department they are applying to in order to confirm its application deadline. The School of the Environment also allows potential students to enrol in the CSES beyond the deadline set by their home department, provided that students will be able to complete the CSES requirements by the time they are ready to graduate from their degree program.

Specialization Requirements

- The requirements listed below must be completed in combination with that expected for the master's degree program of the home department. These are normally counted as electives toward the degree program requirements of the student’s home department. Typically, students complete up to 1.0 full-course equivalent (FCE) and conduct research on an environmental topic. Please note that requirements in some participating programs may

vary. Therefore, students are encouraged to check the calendar entries for their respective home department degree programs. The School of the Environment also offers students in the non-thesis master's degree stream the opportunity to complete an internship in fulfilment of the CSES, unless they have an internship component built into their degree program. The CSES requirements for each participating degree program are listed on the School of the Environment website under the Collaborative Specialization in Environmental Studies.

Master's Degrees Coursework Option

- Complete the mandatory core course ENV1001H (0.5 FCE).
- Complete one elective course (0.5 FCE) from the School's list of approved courses.
- Complete an environment-related internship of approximately three months full-time employment (ENV4444Y; 1.0 FCE), unless students have an internship requirement included in their degree program.
- Produce a brief research paper on an environment-related topic, which may be related to the internship experience (ENV5555Y; 1.0 FCE), unless students have a research paper requirement included in their degree program.

Note: For a complete and most up-to-date list of CSES requirements by each participating degree program for master's students in the coursework option, please visit the School of the Environment website and click on the home department or degree program.

Master's Degrees Thesis Option

- Complete the mandatory core course ENV1001H (0.5 FCE).
- Complete one elective course (0.5 FCE) from the School's list of approved courses.
- Write a thesis in the home department on an environment-related topic.

Note: For a complete and most up-to-date list of CSES requirements by each participating degree program for master's students in the thesis option, please visit the School of the Environment website and click on the home department or degree program.

Environmental Studies: Doctoral Level

Admission Requirements

- Students who wish to enrol in the CSES offered by the School of the Environment must first apply to and be accepted into a doctoral program in a degree-granting unit, also called a home department or home unit. Information about applying to a home graduate unit can be found on the School of Graduate Studies website as well as on the respective websites of participating degree-granting units.
- Prospective students are strongly encouraged to submit copies of the documents indicated on the School of the Environment website by the application deadline established by the degree program admission committee in the home department. Applicants should contact the home department they are applying to in order to confirm its application deadline. The School of the Environment also allows potential students to enrol in the CSES beyond the deadline set by their home department, provided that students will be able to complete the CSES requirements by the time they are ready to graduate from their degree program.

Specialization Requirements

- The requirements listed below must be completed in combination with the PhD degree program requirements of the student's home department. These are normally counted as electives toward the degree program requirements of the student's respective home department. Typically, students complete up to 1.0 full-course equivalent (FCE) and conduct research on an environmental topic. Please note that requirements in some participating programs vary slightly. Therefore, students are encouraged to check the calendar entries for their respective home department programs. Specific requirements for each participating degree program are listed on the School of the Environment's website under the Collaborative Specialization in Environmental Studies.
- Complete the mandatory core course ENV1001H (0.5 FCE), unless already completed at the master's level.
- Complete one elective course (0.5 FCE) from the School's list of approved courses.
- Give an oral presentation of their doctoral research as part of the School's Environment Seminar Series or Research Day, which is held once per year. For the latter, the oral presentation may or may not be done in conjunction with a summary poster, depending on the decided format of the School's Research Day in any given year.
- Complete a thesis on an environmental topic in the home department. It is recommend that the thesis committee membership will include a supervisor (from the student's home department who is a member of the CSES core faculty and a member of the graduate faculty in the School of the Environment) and at least one other member from a collaborating unit. If the student's primary thesis supervisor does not hold a graduate faculty membership (GFM) at the School of the Environment, the School's Director will initiate the process of assigning a GFM to the primary supervisor. A copy of the final thesis must be submitted to the School of the Environment prior to graduation.
- Additional courses may be required by the home department and/or by the supervisor or supervisory committee, depending on academic and/or career goals of the student, as well as graduate unit regulations.
- A supervisor or supervisory committee may be appointed for each student by the home department and the School of the Environment.

Note: For a complete and most up-to-date list of CSES by each participating degree program for doctoral students, please visit the School of the Environment website and click on the home graduate unit or degree program.

Environmental Studies: Courses

The School of the Environment offers individual credit courses that are open to graduate students from all parts of the University, subject to enrolment limits. Except for the core course, ENV1001H, not all courses are offered every year. Graduate students enrolled in the CSES are also allowed to take electives listed for the School's Collaborative Specialization in Environment and Health (CSEH) to fulfil the specialization requirements. For a current graduate course listing, please refer to the School of the Environment's website.

Core Course

ENV1001H	Environmental Decision Making

Elective Courses

ENV1002H	Environmental Policy
ENV1007H	The Warming Papers: The Scientific Foundation of Climate Change
ENV1008H	Worldviews and Ecology
ENV1103H	Living Labs for Applied Sustainability
ENV1444H	Capitalist Nature
ENV1701H	Environmental Law
ENV1703H	Water Resource Management and Policy
ENV1704H	Environmental Risk Analysis and Management
ENV1707H	Environmental Finance and Sustainable Investing
ENV2000H,Y	Topics in Environment
ENV2002H	Special Topics in Environment
ENV4444Y	Internship
ENV5555Y	Research Paper

Elective Joint Courses with the School of the Environment

JGE1413H	Workshop in Environmental Impact Assessment
JGE1420H	Urban Waste Management: an International Perspective
JGE1425H	Livelihoods, Poverty, and Environment in the Developing Countries
JSE1708H	Sustainability and the Western Mind

Other Elective Courses

Adult Education and Community Development (Department of Leadership, Higher and Adult Education)

LHA1104H	Social Action Education — Community Development, Social Services, and Social Movements
LHA1160H	Introduction to Transformative Learning Studies
LHA1193H	Adult Education for Sustainability
LHA5100H	Special Topics in Adult Education and Community Development: Master's Level
LHA6100H	Special Topics in Adult Education and Community Development: Doctoral Level

Anthropology

ANT6018H	Approaches to Nature and Culture

Chemical Engineering and Applied Chemistry

CHE1435H	Fundamentals of Aerosol Physics and Chemistry
JNC2503H	Environmental Pathways

Chemistry

CHM1401H	Transport and Fate of Chemical Species in the Environment
CHM1404H	Molecular Analysis of Natural Systems
CHM1410H	Analytical Environmental Chemistry
CHM1415H	Atmospheric Chemistry
CHM1420H	Environmental Chemistry of Soil
CHM1425H	Modelling the Fate of Organic Chemicals in the Environment

Computer Science

CSC2720H	Systems Thinking for Global Problems

English

ENG5580H	American Pastoral
ENG6181H	Permaculture and Literature

Forestry

FOR1270H	Forest Biomaterial Sciences: Fundamentals, Applications, and the Next Frontier

Environment and Health

Environment and Health: Introduction

Lead Faculty of the Collaborative Specialization

Arts and Science

Participating Degree Programs

Adult Education and Community Development — MA, MEd, PhD
Chemical Engineering and Applied Chemistry — MASc, MEng, PhD
Community Health — MScCH
Environmental Science — MEnvSc, PhD
Forest Conservation — MFC
Forestry — MScF, PhD
Geography — MA, MSc, PhD
Landscape Architecture — MLA
Medical Science — MSc, PhD
Music — MA, MMus, PhD
Planning — MScPl, PhD
Public Health Sciences — MPH, PhD
Women and Gender Studies — MA, PhD

Overview

The graduate degree programs listed above participate in the Collaborative Specialization in Environment and Health (CSEH), which is offered through the School of the Environment. Graduate students admitted to a participating graduate degree program in a degree-granting unit, also called the home department or home unit, can apply to the CSEH and pursue coursework and research in areas related to environment and health. The School of the Environment currently has graduate students from across the disciplinary spectrum.

The study of environment and health recognizes that human health is fundamentally dependent on a healthy environment. With a focus on understanding the human health implications of chemical, biological, and physical hazards in our environment, it encompasses topics such as the health impacts of air and water quality, climate change, contaminated lands and urban design, and the need for interdisciplinary approaches to address them. The CSEH exposes students in the health sciences to broader environmental perspectives on related health issues, while students in environmental studies and sciences can have the opportunity to gain insight about the health implications of environmental quality. This specialization may also be of interest to students who are concerned with ethical, pedagogical, and policy approaches to understanding and addressing environment and health issues.

Upon successful completion of the degree requirements of the participating home department and the CSEH, students will receive the notation “Completed Collaborative Specialization in Environment and Health” on their transcript.

Collaborative Specialization in Environment and Health
School of the Environment, Earth Sciences Centre
University of Toronto
Room 1016V, 33 Willcocks Street
Toronto, Ontario M5S 3E8
Canada

Environment and Health: Master's Level

Admission Requirements

- Students who wish to enrol in the CSEH offered by the School of the Environment must first apply to and be accepted into a master's program in a degree-granting unit, also called a home department or home unit. Information about applying to a home unit can be found on the School of Graduate Studies website as well as on the respective websites of participating degree-granting units.
- Prospective students who are planning to enrol in the CSEH are strongly encouraged to submit copies of the documents outlined on the School of the Environment's website by the application deadline established by the degree program admission committee in their home department. Applicants should contact the home department they are applying to confirm its application deadline. The School of the Environment also allows potential students to enrol in the CSEH beyond the deadline set by their home department, provided that students will be able to complete the CSEH requirements by the time they are ready to graduate from their degree program.

Specialization Requirements

- The requirements listed below must be completed in combination with that expected for the master's degree program requirements of the home department. These are normally counted as electives toward the degree program requirements of the student’s home unit. Typically, students complete up to 1.0 full-course equivalent (FCE) and conduct research on an environment and health topic. Please note that requirements in some participating programs vary slightly. Therefore, students are encouraged to check the calendar entries of their respective home department programs. The CSEH requirements for each participating degree program are listed on the School of the Environment's website under the Collaborative Specialization in Environment and Health.

Master's Degree Coursework Option

- Complete the mandatory core course ENV4001H (0.5 FCE).
- Complete one elective course (0.5 FCE) from the School's list of approved electives below.
- For coursework degree programs that require a research project in their home department, the topic should be within the field of environment and health, as approved by the home department and the School of the Environment. A copy of the final research project must be submitted to the School of the Environment prior to graduation.

Note: For a complete and most up-to-date list of the CSEH requirements by each participating degree program for master's students in the coursework option, please visit the School of the Environment website and click on the home graduate unit or degree program.

Master's Degree Thesis Option

- Complete the mandatory core course ENV4001H (0.5 FCE).
- Complete one elective course (0.5 FCE) from the School's list of approved electives below.
- For degree programs that require a thesis in their home graduate unit, the topic should be within the field of environment and health, as approved by the home unit and the School of the Environment. A copy of the final thesis must be submitted to the School of the Environment prior to graduation.

Note: For a complete and most up-to-date list of the CSEH requirements by each participating degree program for master's students in the coursework option, please visit the School of the Environment website and click on the home graduate unit or degree program.

Environment and Health: Doctoral Level

Admission Requirements

- Students who wish to enrol in the CSEH offered by the School of the Environment must first apply to and be accepted into a doctoral program in a degree-granting unit, also called a home department or home unit. Information about applying to a home department can be found on the School of Graduate Studies website as well as on the respective websites of participating degree-granting units.
- Prospective students are strongly encouraged to submit copies of the documents indicated on the School of the Environment website by the application deadline established by the degree program admission committee in the home unit. Applicants should contact the home department they are applying to in order to confirm its application deadline. The School of the Environment also allows potential students to enrol in the CSEH beyond the deadline set by their home department, provided that students will be able to complete the CSEH requirements by the time they are ready to graduate from their degree program.

Specialization Requirements

- The requirements listed below must be completed in combination with the PhD degree program requirements of the student's respective home department. These are normally counted as electives toward the degree program requirements of the student's home department. Typically, students complete up to 1.0 full-course equivalent (FCE) and conduct research on an environment and health topic. Please note that requirements in some participating programs vary slightly. Therefore, students are encouraged to check the calendar entries of their respective home department programs. Specific CSEH requirements for each participating degree program are listed on the School of the Environment website under the Collaborative Specialization in Environment and Health.
- Complete the mandatory core course ENV4001H (0.5 FCE), unless already completed at the master's level.
- Complete one elective course (0.5 FCE) from the School's list of approved courses.
- Give an oral presentation of their doctoral research as part of the School's Environment and Health Seminar Series or Research Day, which is held once per year. For the latter, the oral presentation may or may not be done in conjunction with a summary poster, depending on the decided format of the School's Research Day in any given year.
- Complete a thesis on a theme in environment and health. It is recommended that the thesis committee membership will include a supervisor (from the student's home department who is a member of the CSEH core faculty and a member of the graduate faculty in the School of the Environment) and at least one other member from a collaborating department. If the student's primary thesis supervisor does not hold a graduate faculty membership (GFM) at the School of the Environment, the School's Director will initiate the process of assigning a GFM to the primary supervisor. A copy of the final thesis must be submitted to the School of the Environment prior to graduation.
- Additional courses may be required by the home department and/or by the supervisor or supervisory committee, depending on academic and/or career goals of the student, as well as departmental regulations.
- A supervisor or supervisory committee may be appointed for each student by the home department and the School of the Environment.

Note: For a complete and most up-to-date list of CSEH requirements by each participating degree program for doctoral students, please visit the School of the Environment website and click on the home department or degree program.

Environment and Health: Courses

The School of the Environment offers individual credit courses that are open to graduate students from all units of the University, subject to enrolment limits. Except for the core course, ENV4001H, not all courses are offered every year. Graduate students enrolled in the CSEH are also allowed to take electives listed for the School's Collaborative Specialization in Environmental Studies (CSES) to fulfil the specialization requirements. For a current graduate course listing, please refer to the School of the Environment website.

Core Course

ENV4001H	Graduate Seminars in Environment and Health

Elective Courses

ENV1703H	Water Resources Management and Policy
ENV1704H	Environmental Risk Analysis and Management
ENV3000H,Y	Topics in Environment and Health

Elective Joint Courses with the School of the Environment

JGE1425H	Livelihoods, Poverty, and Environment in the Developing Countries
JNC2503H	Environmental Pathways
JNP1014Y	Interdisciplinary Toxicology
JNP1016H	Graduate Seminar in Toxicology

Other Elective Courses

Adult Education and Community Development (Department of Leadership, Higher and Adult Education)

LHA1197H	The Pedagogy of Food

Chemical Engineering and Applied Chemistry

CHE1435H	Fundamentals of Aerosol Physics and Chemistry
JNC2503H	Environmental Pathways

Chemistry

CHM1401H	Transport and Fate of Chemical Species in the Environment
CHM1410H	Analytical Environmental Chemistry
CHM1415H	Atmospheric Chemistry
CHM1420H	Environmental Chemistry of Soil
CHM1425H	Modelling the Fate of Organic Chemicals in the Environment

Civil and Mineral Engineering

CIV1399H	Special Studies in Civil Engineering (this course will be allowed as an elective provided it has environment and health content)

Earth Sciences

ESS1463H	Contaminants in the Environment

Forestry

FOR1575H	Urban Forest Conservation

Geography and Planning

GGR1422H	The Geography of Urban Air Pollution
JGE1425H	Livelihoods, Poverty, and Environment in the Developing Countries
JPG1421H	Health in Urban Environments
JPG1428H	Greening the City: Urban Environmental Planning and Management

Pharmacology and Toxicology

JNP1014Y	Interdisciplinary Toxicology
JNP1016H	Graduate Seminar in Toxicology

Public Health Sciences

CHL5126H	Building Community Resilience
CHL5413H	Public Health Sanitation
CHL5416H	Environmental Epidemiology
CHL5809H	Ecological Public Health
CHL5903H	Environmental Health
CHL5910H	Occupational and Environmental Hygiene I
CHL5911H	Occupational and Environmental Hygiene II
CHL5921H	Protecting the Public from Air Pollution
CHL7001H	Directed Reading
CHL8001H	Selected Topics in Public Health Issues (this course will be allowed as an elective provided it has environmental studies content)

Social Justice Education

SJE1909H	Environmental Sustainability and Social Justice 1
SJE1919H	Advanced Topics in Environmental Justice Education
SJE2999H	Special Topics in Sociological Research in Education

Ethnic, Immigration and Pluralism Studies

Ethnic, Immigration and Pluralism Studies: Introduction

Lead Faculty of the Collaborative Specialization

Arts and Science

Participating Degree Programs

Anthropology — MA, PhD
Educational Leadership and Policy — MA, MEd, EdD, PhD
European and Russian Affairs — MA
Geography — MA, PhD
Global Affairs — MGA
History — MA, PhD
Industrial Relations and Human Resources — MIRHR, PhD
Language and Literacies Education — MA, MEd, PhD
Political Science — MA, PhD
Public Policy — MPP
Religion — MA, PhD
Social Justice Education — MA, MEd, EdD, PhD
Social Work — MSW, PhD
Sociology — MA, PhD
Women and Gender Studies — MA, PhD

Overview

Ethnic, Immigration and Pluralism Studies at the University of Toronto offers students with interests in ethnic, immigration, and pluralism studies the opportunity to widen their horizons, to expand their knowledge beyond a single disciplinary base, and to take advantage of the wealth and diversity of academic resources available at the University of Toronto — a great university situated in a large and culturally cosmopolitan city.

The graduate programs listed above participate in the Collaborative Specialization in Ethnic, Immigration and Pluralism Studies. They contribute courses and provide facilities and supervision for graduate research.

Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Ethnic, Immigration and Pluralism Studies” on their transcript.

Collaborative Specialization in Ethnic, Immigration and Pluralism Studies
Munk School of Global Affairs and Public Policy
University of Toronto
1 Devonshire Place, room 064S
Toronto, Ontario M5S 3K7
Canada

Ethnic, Immigration and Pluralism Studies: Master's Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.
- Applicants to the Master of Arts, Master of Education, Master of Global Affairs, Master of Industrial Relations and Human Resources, Master of Public Policy, Master of Science, and Master of Social Work degree programs are admitted by the participating graduate unit under the General Regulations of the School of Graduate Studies.

Specialization Requirements

- Students must follow a plan of studies acceptable to both the participating graduate unit and the Ethnic, Immigration and Pluralism Studies specialization.
- Collaborative specialization requirements may be met concurrent with, or in addition to, graduate unit requirements. Students should consult specific graduate unit listings for information.
- 1.0 full-course equivalent (FCE) in ethnicity, immigration, or pluralism, of which at least 0.5 FCE will be in a discipline other than the one in which the student is enrolled. Normally, these courses are taken as options within regular graduate unit or Faculty degree requirements, not as additional courses.
- A coordinating 0.5 FCE seminar in ethnicity, immigration, and pluralism. The seminar is the place to discuss, compare, and bring together the various approaches to the study of ethnicity, immigration, and pluralism. As well, students will be expected to present and discuss their projects.
- When a practicum is required, it will focus on ethnicity, immigration, and/or pluralism.
- It is understood that the major paper or thesis as required by the graduate unit will be in an area relevant to the specialization.

Ethnic, Immigration and Pluralism Studies: Doctoral Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.
- Applicants to the Doctor of Education and Doctor of Philosophy degree programs are admitted under the General Regulations of the School of Graduate Studies.

Specialization Requirements

- Students must follow a plan of studies acceptable to both the participating graduate unit and the Ethnic, Immigration and Pluralism Studies specialization.
- Collaborative specialization requirements may be met concurrent with, or in addition to, graduate unit requirements. Students should consult specific graduate unit listings for information.
- 2.0 full-course equivalents (FCEs) in ethnicity, immigration, or pluralism including master's-level courses, of which at least 1.0 FCE will be in disciplines other than the one in which the student is enrolled. Normally, these courses are taken as options within regular graduate unit or Faculty degree requirements, not as additional courses.
- A coordinating 0.5 FCE seminar in ethnicity, immigration, and pluralism. The seminar is the place to discuss, compare, and bring together the various approaches to the study of ethnicity, immigration and pluralism. As well, students will be expected to present and discuss their projects. Students who have taken this course for the master's degree need not repeat it.
- When the student's graduate unit requires more than one comprehensive examination, one of the examinations will be in a topic relevant to the specialization.
- When there are no comprehensive examinations, but an examination on the thesis proposal is required, the examination will focus on ethnicity, immigration, and/or pluralism. In all cases the thesis will be on a subject matter dealing with ethnicity, immigration, and/or pluralism.
- The PhD thesis will focus on ethnicity, immigration, and/or pluralism. The supervisor of the thesis committee will be a specialist in the area of ethnicity, immigration, and/or pluralism.

Ethnic, Immigration and Pluralism Studies: Courses

- Courses eligible for credit towards meeting specialization requirements in Ethnic, Immigration and Pluralism Studies are listed below.
- Students should check with the professor responsible for each course since a prerequisite may be required.
- Not all courses are offered each year. Please consult the collaborative specialization office or the appropriate graduate unit for course availability.
- Students wishing to use courses other than those listed below for credit towards meeting specialization requirements must submit a formal request in writing.

Coordinating Seminar

EIP3000H	Coordinating Seminar: Ethnic, Immigration and Pluralism Studies (formerly known as JTH3000H Coordinating Seminar: Ethnic Relations Theory, Research, and Policy)

Anthropology

ANT5150H	Nation, State, and Language in Francophone Canada
ANT6033H	Advanced Research Seminar III

Curriculum, Teaching and Learning

CTL1320H	Introduction to Aboriginal Land-Centered Education: Historical and Contemporary Perspectives
CTL1321H	Aboriginal Civilization: Language, Culture, and Identity
CTL1424H	Religion, Ideology, and Social Movement in the Development of North American Education
CTL1428H	Immigration and the Development of Canadian Education
CTL1429H	Ethnicity and the Development of Canadian Education
CTL3026H	Pragmatics in Language Education
CTL3799H	Special Topics in Language and Literacies Education Program: Master's Level
JTE1952H	Language, Culture, and Education

Economics

ECO3800H	Labour Economics I

Geography

JPG1506H	State/Space/Difference: Understanding the New Social Geography of the State
JPG1805H	Transnationalism, Diaspora, and Gender

History

HIS1117H	Canada: Colonialism/Postcolonialism

HIS1287H	Polish Jews Since the Partitions of Poland (joint graduate/undergraduate)
HIS1440H	Irish Nationalism in Canada, 1858–1870 (joint graduate/undergraduate)

Industrial Relations and Human Resources

IRE1725H	Cross Cultural Differences in Organizational Contexts

Law

Participation in LAW courses is at the discretion of the Faculty of Law upon presentation, to the Faculty of Law Records Office, of a signed permission form from the student's home graduate unit. Note that preference is given to JD students and that many LAW courses are full by the end of the Faculty of Law add/drop period.

LAW5022H	Introduction to Islamic Law
LAW7024H	Citizenship: Inside and Out
LAW7052Y	Aboriginal Peoples and Canadian Law
LAW7053H	Intensive Course: Who Belongs? Dilemmas of Citizenship and Immigration
LAW7060Y	Discrimination Law
LAW7066H	Canadian Migration Law
LAW7076H	Refugee Law
LAW7078H	Law of Forced Migration

Leadership, Higher and Adult Education

LHA1029H	Special Applications of the Administrative Process
LHA1042H	Educational Leadership and Diversity
LHA3042H	Field Research in Educational Leadership and Policy (RM)

Political Science

POL2026H,Y	Topics in Political Thought I
POL2102H	Topics in Canadian Politics I
POL2103H	Topics in Canadian Politics II
POL2167H	The Politics of Immigration and Multiculturalism in Canada
POL2207H	Topics in International Politics III
JRA2391H	Topics in Comparative Politics
POL2392H,Y	Topics in Comparative Politics IV

Public Policy

PPG1005H	The Social Context of Policy-Making (this course often includes content related to ethnicity and immigration; verify a particular instructor's course with the Ethnic, Immigration and Pluralism Studies specialization)
PPG2001H	Legal Analysis of Public Policy

Religion

RLG2027H	Law and Religion: Critical Conversations
RLG3931H	Topics in North American Religions

Social Justice Education

JSA5147H	Language, Nationalism, and Post-Nationalism
JTE1952H	Language, Culture, and Education
SJE1921Y	The Principles of Anti-Racism Education
SJE1922H	Sociology of Race and Ethnicity
SJE1926H	Race, Space, and Citizenship: Research Methods
SJE1927H	Migration and Globalization
SJE3933H	Globalisation and Transnationality: Feminist Perspectives

Social Work

SWK4210H	Promoting Empowerment: Working at the Margins
SWK4304H	Globalization and Transnationalism: Intersections of Policy and Community Practice Locally and Globally
SWK4306H	Theoretical Approaches to Defining Social Injustice and Engaging in Social Change
SWK4658H	Social Work with Immigrants and Refugees

Sociology

SOC6002H	Immigration I
SOC6003H	Immigration II
SOC6009H	Ethnicity I
SOC6109H	Ethnicity II

Women and Gender Studies

WGS1026H	Special Topics in Race and Feminism

Nutritional Sciences — MSc, PhD
Public Health Sciences — PhD
Sociology — MA, PhD

Supporting Units

Culinaria Research Centre

Overview

Food Studies is an interdisciplinary field dedicated to understanding where our food comes from and how it shapes our bodies and identities. The production and consumption of food has gone through tremendous changes in the past few hundred years. Before industrialization, most food was grown in the place where it was eaten. With the rise of global commodity agriculture, it is often hard to find out exactly what our food is and where it comes from. Then, famine was a constant spectre, whereas today, over-eating has become a significant health problem.

Particular attention will be given to the material nature of food, the way it tastes and smells, and the changes it undergoes through natural decomposition and through the human intervention of preservation and cooking. Students will learn the importance of food in religion, society, the family, gender roles, the environment, agriculture, urbanization, immigration, colonialism, and race and ethnicity. Food Studies will leverage the University's urban location and its proximity to Canada's agricultural heartland to broaden students' experience. The study of food provides both theoretical understanding and practical knowledge for professional careers in health care, business, government service, non-governmental organizations, and educational and community programs. This specialization will draw on a variety of disciplinary approaches emphasizing different knowledge and skills.

The collaborative specialization is open to master's and PhD students in the participating graduate programs listed above. Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation "Completed Collaborative Specialization in Food Studies" on their transcript.

Collaborative Specialization in Food Studies
University of Toronto Scarborough
1265 Military Trail
Toronto, Ontario M1C 1A4
Canada

Food Studies: Master's Level

Admission Requirements

- Applicants must meet the admission requirements of both the home graduate unit and the collaborative specialization.
- Applicants must apply to and be admitted to both the collaborative specialization and a participating master's degree program.
- A curriculum vitae (CV).
- Applicants must demonstrate superior writing and research skills, as well as an interest in the socio-cultural aspects of food. Applicants will submit to the collaborative specialization committee a research paper (maximum 30 pages) that has been submitted to the home graduate unit, or one that is focused on food studies.
- Letters from two references. The letters of reference should describe the student's academic ability and career aspirations, and comment on the student's potential benefit from the collaborative specialization.
- Some undergraduate experience in food-related coursework is desired.

Specialization Requirements

MA in Anthropology; MA in East Asian Studies (Thesis Option); MA and MSc in Geography; MA in History; MSc in Nutritional Sciences; MA in Sociology (Research Paper Option); MI Concentration Plus Thesis Option; MI General Pathway Plus Thesis Option

- Students must meet all the degree requirements of the School of Graduate Studies, the participating home program, and the collaborative specialization.
- Successful completion of the seminar FST1000H *Comparative Research Methods in Food Studies* (0.5 full-course equivalent [FCE]).
- Regular and active participation in SRM3333H *Culinaria Seminar Series*.
- The major research paper or thesis in the participating degree program will be on a topic in food studies, approved by the collaborative specialization committee.

- Collaborative specialization courses may be taken as electives for the purpose of satisfying home program requirements.

Specialization Requirements

MA in East Asian Studies (Coursework-Only Option); MA in Sociology (Coursework-Only Option)

- Students must meet all the degree requirements of the School of Graduate Studies, the participating home program, and the collaborative specialization.
- Successful completion of the seminar FST1000H *Comparative Research Methods in Food Studies* (0.5 full-course equivalent [FCE]).
- Successful completion of 1.0 elective FCE related to food studies.
- Regular and active participation in SRM3333H *Culinaria Seminar Series*.
- Collaborative specialization courses may be taken as electives for the purpose of satisfying home program requirements.

Specialization Requirements

MI Coursework-Only Option

- Students must meet all the degree requirements of the School of Graduate Studies, the participating home program, and the collaborative specialization.
- Successful completion of the seminar FST1000H *Comparative Research Methods in Food Studies* (0.5 full-course equivalent [FCE]).
- Successful completion of the practicum INF2173H (0.5 FCE; Credit/No Credit) in an area related to food studies.
- Successful completion of 1.5 elective FCEs related to food studies.
- Regular and active participation in SRM3333H *Culinaria Seminar Series*.
- Collaborative specialization courses may be taken as electives for the purpose of satisfying home program requirements.

Specialization Requirements

MMSt Coursework-Only Option

- Students must meet all the degree requirements of the School of Graduate Studies, the participating home program, and the collaborative specialization.
- Successful completion of the seminar FST1000H *Comparative Research Methods in Food Studies* (0.5 full-course equivalent [FCE]).
- Successful completion of 2.0 FCEs from a combination of:
  - an internship MSL3000Y (1.0 FCE) related to food studies;
  - a project MSL4000Y (1.0 FCE) related to food studies;
  - up to 2.0 elective FCEs related to food studies.
- Regular and active participation in SRM3333H *Culinaria Seminar Series*.
- Collaborative specialization courses may be taken as electives for the purpose of satisfying home program requirements.

Food Studies: Doctoral Level

Admission Requirements

- Applicants must meet the admission requirements of both the home graduate unit and the collaborative specialization.
- Applicants must apply to and be admitted to both the collaborative specialization and a participating doctoral degree program.
- Students who complete the collaborative specialization at the master's level will be eligible for the program at the doctoral level, but will be expected to complete an additional topics course (see below).
- A curriculum vitae (CV).
- Applicants must demonstrate superior writing and research skills, as well as an interest in the socio-cultural aspects of food. Applicants will submit to the collaborative specialization committee a master's-level research project paper or thesis. Experience in a food-related field (either practical, scholarly, or policy/political/social service) is beneficial.

Specialization Requirements

- Students must meet the degree requirements of the School of Graduate Studies, the participating home program, and the collaborative specialization.
- Successful completion of the seminar FST1000H *Comparative Research Methods in Food Studies* (0.5 full-course equivalent [FCE]), if not already taken at the master's level. Students who have completed the Food Studies collaborative specialization at the master's level are exempted from this requirement.
- Successful completion of the topics course FST2000H *Food, Culture, and Society* (0.5 FCE). The course theme will be decided each year by the collaborative specialization committee.
- Regular and active participation in SRD4444H *Culinaria Seminar Series*.
- The student's dissertation in their home graduate unit must be on a topic in food studies, approved by the specialization committee.
- Collaborative specialization courses may be taken as electives for the purpose of satisfying home program requirements.

Food Studies: Courses

Required

FST1000H	Comparative Research Methods in Food Studies

FST2000H	Food, Culture, and Society

Electives

These courses may have prerequisites and enrolment limits. These courses may not be offered every year. Students may take courses not listed below with approval of the collaborative specialization director.

ANT4039H	Origin and Nature of Food Producing Societies
CHL5652H	Foundations of Practice III
HIS1301H	History of Food and Drink
JPG1429H	Political Ecology of Food and Agriculture
LHA1197H	The Pedagogy of Food
MST1370H	From Farm to Market: Social and Economic Transformation in Medieval Europe
NFS1201H	Public Health Nutrition
NFS1212H	Regulation of Food Composition, Health Claims, and Safety
NFS1216H	Selected Topics in Nutrition
NFS1218H	Recent Advances in Nutritional Sciences I

Genome Biology and Bioinformatics

Genome Biology and Bioinformatics: Introduction

Lead Faculty of the Collaborative Specialization

Arts and Science

Participating Degree Programs

Biochemistry — PhD
Biomedical Engineering — PhD
Cell and Systems Biology — PhD
Chemical Engineering and Applied Chemistry — PhD
Computer Science — PhD
Ecology and Evolutionary Biology — PhD
Laboratory Medicine and Pathobiology — PhD
Medical Biophysics — PhD
Medical Science — PhD
Molecular Genetics — PhD

Overview

The availability of complete genome sequences of many organisms has led to the appreciation that our knowledge of the function of the genome and other omes of any given organism is far from complete. A wide range of computational, theoretical, biochemical, structural, cell biological, and genetic approaches need to cooperate to establish the connections between sequence and function. The Collaborative Specialization in Genome Biology and Bioinformatics addresses this need for cooperation with a coherent course of study that educates, trains, and provides community for doctoral graduate students across these diverse disciplines.

The graduate programs listed above participate in the Collaborative Specialization in Genome Biology and Bioinformatics. Upon successful completion of the PhD requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation "Completed Collaborative Specialization in Genome Biology and Bioinformatics" on their transcript.

Genome Biology and Bioinformatics: Doctoral Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units. Since this is a doctoral-level course of study, students must be registered in the doctoral program of one of the host graduate units and must be undertaking research with a significant genome biology and/or bioinformatics component under the supervision of a member of the collaborative specialization.

Program Requirements

- Complete a PhD thesis in the area of the collaborative specialization, and any core courses as required by the student's host graduate unit.
- Complete the seminar series in Genome Biology and Bioinformatics (GBB1001H; 0.5 FCE). Students will be required to present and discuss their research projects in this seminar series.
- Participate in collaborative traineeships in which an aggregate time of two to four months is spent in a collaborating laboratory, thematically working on an aspect of the thesis project but with a complementary method. The goal of the collaborative traineeship is ideally a joint publication between the two member labs.

Genome Biology and Bioinformatics: Courses

Students are required to enrol in the seminar course GBB1001H.

Required Seminar Series

GBB1001H Seminar in Genome Biology and Bioinformatics

Elective

CSB1482H Readings in Genome Biology and Bioinformatics

Global Health

Global Health (U of T Global Scholar): Introduction

Lead Faculty of the Collaborative Specialization

Public Health

Participating Degree Programs

Anthropology — MA, MSc, PhD
Chemical Engineering and Applied Chemistry — MASc, MEng, PhD
Community Health — MScCH
Dentistry — MSc (thesis only), PhD
Geography — MA, MSc, PhD
Health Policy, Management and Evaluation — MSc (thesis only), PhD
Law — LLM, SJD
Management — PhD
Medical Science — PhD
Nursing Science — PhD
Pharmaceutical Sciences — MSc (thesis only), PhD
Planning — MScPl, PhD
Political Science — PhD
Public Health Sciences — MPH, MSc (thesis only), PhD
Rehabilitation Science — MSc, PhD

Overview

The graduate programs listed above participate in the Collaborative Specialization in Global Health (U of T Global Scholar). This specialization offers students collaborative and interdisciplinary graduate education and research opportunities in global health. Global health is viewed as an integrative construct that focuses on the inter-relationships between local, regional, national, and international factors influencing health and health equity and effective programs and policies that will address these factors.

The Collaborative Specialization in Global Health (U of T Global Scholar) enhances the student experience by exposing students to a broad base of faculty expertise and an opportunity to share research ideas and results from multiple disciplinary perspectives. This specialization signals the University's commitment to improving the well-being of people in Canada and around the world through higher education and advanced research in global health.

Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Global Health (U of T Global Scholar)” on their transcript.

Students who complete the requirements of the Collaborative Specialization in Global Health are considered University of Toronto Global Scholars.

Global Health (U of T Global Scholar): Master's Level

Admission Requirements

- Applicants must meet the admission requirements of both the home graduate program in which they are registered as well as the collaborative specialization.
- Applicants must be admitted to a master's program in one of the collaborating home graduate units before they may apply to the Collaborative Specialization in Global Health (U of T Global Scholar).

Specialization Requirements

- Meet all the degree requirements of the School of Graduate Studies, the home graduate unit, and the Collaborative Specialization in Global Health (U of T Global Scholar).
- Students must successfully complete the global health core course, CHL5700H *Global Health* (0.5 full-course equivalent [FCE]).
- Depending on the requirements of their core master's programs, collaborative specialization students must complete either a practicum placement, a major research paper, or a master's thesis related to global health.
- Master's students will be encouraged to participate in a series of shared co-curricular global health activities organized by the Dalla Lana School of Public Health and other participating graduate units.
- Students in coursework-only programs in Engineering (MEng) and Public Health (MScCH) must complete an additional 1.0 FCE in approved global health electives. Students in the coursework-only Law program (LLM) must complete an additional 1.5 FCE in approved global health electives.

Core Course

CHL5700H Global Health

Elective Courses

Students in coursework-only master's programs must take additional global health electives as outlined above. The elective must be approved by the program director of the collaborative specialization.

Global Health (U of T Global Scholar): Doctoral Level

Admission Requirements

- Applicants must meet the admission requirements of both the home graduate program in which they are registered as well as the collaborative specialization.
- Applicants must be admitted to a doctoral program in one of the collaborating home graduate units before they may apply to the Collaborative Specialization in Global Health (U of T Global Scholar).
- Applicants should have professional, academic, or volunteer experience in global health.

Specialization Requirements

- Meet all the degree requirements of the School of Graduate Studies, the home graduate unit, and the Collaborative Specialization in Global Health (U of T Global Scholar).
- Students must successfully complete:
  - The global health research seminar series CHL5701H (0.5 full-course equivalent [FCE]) over two academic sessions. Students must attend all seminars offered during the two sessions.
  - One of the following courses:
    - 0.5 FCE: CHL5702H, CHL5704H, HAD5768H, NUR1038H, NUR1083H, or
    - 1.0 FCE: JCR1000Y.
  - One elective (0.5 FCE) from outside the home graduate unit, selected in consultation with the collaborative specialization director.
  - A thesis on an issue related to global health, to be approved by both the home unit and the Collaborative Specialization in Global Health Director (U of T Global Scholar).

Core Courses

CHL5701H	Doctoral Seminar, Collaborative Specialization in Global Health

Plus one of the following:

CHL5702H	History of International Health
CHL5704H	International Human Rights Law and Global Health: The Right to Health in Theory and Practice
HAD5768H	International Perspectives on Health Services Management
JCR1000Y	An Interdisciplinary Approach to Addressing Global Challenges
NUR1038H	Social Determinants of Health in a Global Context
NUR1083H	Comparative Politics of Health and Health Policy in a Globalizing World

Elective Courses

Students must take one global health elective from outside of their home graduate unit. The elective must be approved by the collaborative specialization director.

Health Care, Technology, and Place

Health Care, Technology, and Place: Introduction

Effective September 2015, admissions to this collaborative specialization have closed.

Lead Faculty of the Collaborative Specialization

Medicine

Participating Degree Programs

Biomedical Engineering — PhD
Health Policy, Management and Evaluation — PhD
Mechanical and Industrial Engineering — PhD
Medical Science — PhD
Pharmaceutical Sciences — PhD
Public Health Sciences — PhD
Rehabilitation Sciences — PhD
Social Work — PhD

Overview

The graduate programs listed above participate in the Collaborative Doctoral Specialization in Health Care, Technology, and Place (HCTP). The objectives of this collaborative specialization are to:

- Prepare doctoral students to understand, explain, and improve health outcomes associated with technologically mediated health care.
- Bridge knowledge gaps among doctoral students working in the life sciences, physical sciences, social sciences, and humanities who are concerned with innovative technologies, diverse settings, and complex work and personal practices of modern health in Canada.
- Provide mentorship in interdisciplinary research and scholarship, including leadership skills, negotiation and collaboration, grant writing, and knowledge transfer. Ultimately, the goal is to facilitate research conducted by scientifically informed humanists and philosophically informed physical and social scientists.

Students who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units. Applicants may apply concurrently to the participating home graduate unit and to the HCTP collaborative specialization. Students follow a course of study acceptable to both the home unit and the HCTP collaborative specialization.

Upon successful completion of the PhD degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Health Care, Technology, and Place” on their transcript.

Contact and Address

Fax: (416) 978-7350

Collaborative Doctoral Specialization in Health Care, Technology, and Place
University of Toronto
Suite 425, 155 College Street
Toronto, Ontario M5T 3M6
Canada

Health Care, Technology, and Place: Doctoral Level

Admission Requirements

- Applicants must apply to a participating graduate unit and comply with the admission procedures of that unit.
- Applicants must forward the following to the HCTP collaborative specialization committee:
  - a copy of the School of Graduate Studies application form submitted to the participating graduate unit;
  - copies of official undergraduate and graduate transcripts from all institutions previously or currently attended, which should reflect a minimum 3.5 GPA (A-);
  - a resumé or curriculum vitae (CV);
  - a research plan (maximum 800 words) summarizing research goals and past research experience, the relevance of the HCTP specialization to this plan, and justification for the identified HCTP project mentor;
  - two confidential letters of recommendation from scholars familiar with the applicant's research background and aptitude for the interdisciplinary study;
  - a confidential letter from an HCTP mentor providing: formal agreement to participate on the applicant's dissertation committee; and commentary written for reviewers outside the discipline, evaluating the applicant's level of achievement relative to peers in the same discipline, the objectives and methods of the proposed program of research, and the relative merit of such research within the applicant's home discipline.

Specialization Requirements

- At least 0.5 full-course equivalent (FCE), selected from the list of core courses.
- Students must attend the monthly seminar series (SRD4444H [CR/NCR]), during their involvement with HCTP.
- Students must participate in at least one Annual Interdisciplinary Research Workshop.

- Completion of a dissertation under the supervision of a core faculty member in the student's home graduate unit. The dissertation must address the theme of health care, technology, and place.
- It is the objective of this collaborative specialization to enrich the PhD experience without unduly extending the duration of students' graduate education. Every student enrolled in the collaborative doctoral specialization must complete the requirements of the collaborative specialization and the requirements of the doctoral program in their home graduate unit. It will be up to each participating home graduate unit to determine whether HCTP courses are completed in addition to the graduate unit's customary course requirements or as a part of those requirements.

Health Care, Technology, and Place: Courses

Core Courses

Public Health

Participating Degree Programs

Health Policy, Management and Evaluation — MSc, PhD
Kinesiology — MSc, PhD
Pharmaceutical Sciences — MSc, PhD
Public Health Sciences — PhD
Rehabilitation Science — MSc
Social Work — PhD

Overview

The Collaborative Specialization in Health Services and Policy Research began in 2001 as a consortium of six Ontario universities, called the Ontario Training Centre. It was established in a response to the need for increased numbers of health services researchers to address critical issues in effective and efficient health-care delivery (which has been identified as a top priority by national research funding agencies). The Ontario Training Centre was part of a pan-Canadian initiative involving other provincial centres. After its first decade of operations, funding for the centre has concluded. However, the Collaborative Specialization in Health Services and Policy Research continues to attract graduate students from the University of Toronto from a variety of disciplines.

The overall goal of the collaborative specialization is to increase health research capacity in Ontario through an innovative training program that builds on existing strengths in university and decision-making environments.

Partnering with a number of health-care organizations, the Collaborative Specialization in Health Services and Policy Research offers graduate training leading to a Diploma in Health Services and Policy Research.

Specific objectives of the collaborative specialization include:

- providing training in health services research for graduate students;
- enhancing the quality and breadth of transdisciplinary training in health services research; and
- including decision makers as active partners in teaching, program and curriculum planning, and the provision of field placements for students.

This competency-based collaborative specialization focuses on the following five areas:

- understanding the Canadian health-care system;
- ability to carry out health services research;
- understanding theories regarding how the health of populations is produced;
- understanding theories of health and health services knowledge production; and
- knowledge exchange and development of research partnerships.

Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Health Services and Policy Research” on their transcript.

Health Services and Policy Research: Master's Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.
- Master's students are admitted under the General Regulations of the School of Graduate Studies and the specific criteria of the participating unit.
- An overall B+ average in the last two years of an appropriate bachelor's degree from a recognized university.
- An interest in health services and policy research outlined in an autobiographical letter including the applicant's reasons for becoming a health services or policy researcher.

Specialization Requirements

Students must meet all respective degree requirements of the School of Graduate Studies and the participating graduate unit.

- **Coursework.** Students must complete a total of **1.5 full-course equivalents (FCEs)** as follows:
  - HSR1000H *Research and/or Policy Practicum*
  - HSR1002H *Health Services Research Seminar* (Credit/No Credit)
  - 0.5 FCE from the elective course list.
- Students are required to write a **thesis** under the supervision of a core faculty member of the collaborative specialization. The thesis must address the theme of health services and policy research.

Health Services and Policy Research: Doctoral Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.
- Doctoral students are admitted under the General Regulations of the School of Graduate Studies and the specific criteria of the participating unit.
- Applicants are required to:
  - demonstrate academic excellence in completed courses (B+ average in graduate courses), scholarships and academic awards received;
  - demonstrate aptitude for health services and policy research (letter of recommendation from a previous professor or thesis supervisor, commenting on the applicant's academic abilities and likelihood for success as a health services researcher);
  - outline career plans (in an autobiographical letter including their reasons for becoming a health services researcher and their career plans); and
  - propose a plan of study in the collaborative specialization.
- Students who complete the collaborative specialization at the master's level are not eligible to participate at the PhD level.

Specialization Requirements

Students must meet all respective degree requirements of the School of Graduate Studies and the participating graduate unit.

- **Coursework.** Students must complete a total of **1.5 full-course equivalents (FCEs)** as follows:
  - HSR1000H *Research and/or Policy Practicum*
  - HSR1002H *Health Services Research Seminar* (Credit/No Credit)
  - 0.5 FCE from the elective course list.
- Students are required to complete a **dissertation** under the supervision of a core faculty member of the collaborative specialization. The dissertation must address the theme of health services and policy research.

Health Services and Policy Research: Courses

Required

HSR1000H	Research and/or Policy Practicum
HSR1002H	Health Services Research Seminar (Credit/No Credit)

Electives

HAD5011H	Canada's Health Care System and Health Policy
HAD5727H	Knowledge Transfer and Exchange
HAD5728H	Performance Measurement in Health Care: Theory and Application
HAD5780H	Program Planning and Evaluation for Health Services and Policy Research
HAD7001H	Reading Course
HSR1001H	Introduction to Qualitative Methods for Health Services and Policy Research

Supporting Units

Indigenous Studies program (undergraduate), Faculty of Arts and Science

Overview

The Collaborative Specialization in Indigenous Health (CSIH) is situated in the Dalla Lana School of Public Health at the Waakebiness-Bryce Institute for Indigenous Health (WBIIH). The main objective is to provide training in Indigenous health research and practice for graduate students across U of T, while enhancing mutually beneficial and authentic relationships with Indigenous peoples, communities, and organizations.

Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation "Completed Collaborative Specialization in Indigenous Health" on their transcript.

Indigenous Health: Master's Level

Admission Requirements

- Applicants who wish to enrol in a collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.
- Applicants must submit a completed Collaborative Specialization in Indigenous Health (CSIH) application form to the CSIH committee.

Specialization Requirements

- All master's students in the collaborative specialization will take the core course CHL5520H *Indigenous Health* (0.5 full-course equivalent [FCE]) that runs in August annually.
- In home graduate units where a thesis or major research paper is required, it must deal with an Indigenous health topic. At least one member of the student's thesis committee must be a core faculty member of the collaborative specialization.
- In home graduate units where students undertake a practicum or equivalent, it must focus on an Indigenous health topic and be supervised by a core faculty member of the collaborative specialization.
- Students in coursework-only programs must complete additional coursework in approved Indigenous health electives. For the MEd in Adult Education and Community Development and the MEd in Social Justice Education (Coursework Only Option), 1.0 FCE in additional courses in Indigenous Health are required.
- Students must participate in at least 80% of the Research Seminar Series, held monthly, as well as participate in at least one Indigenous land-based activity.
- Students must complete the requirements of the collaborative specialization in addition to those requirements for the degree program in their home graduate unit.

Indigenous Health: Doctoral Level

Admission Requirements

- Applicants who wish to enrol in a collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.
- Applicants must submit a completed Collaborative Specialization in Indigenous Health (CSIH) application form to the CSIH committee.

Specialization Requirements

- The requirements are the same as for the master's program listed above.

- Students who have previously taken the core course CHL5520H *Indigenous Health* during their master's program are required to take a different course, approved by the collaborative specialization director, during their doctoral program.
- Students participate in at least 80% of a new Research Seminar Series held monthly and at least one Indigenous land-based activity.

Overview

The Collaborative Specialization in Jewish Studies offers both broad and intensive exposure to the constituent fields within Jewish Studies. Because of Jewish civilization's vast chronological and geographical range, as well as its constant interaction and cross-fertilization with other cultures, graduate work within Jewish Studies demands intensive exposure to a wide variety of languages, textual traditions, and scholarly disciplines.

The collaborative specialization involves the graduate master's and doctoral programs listed above. Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation "Completed Collaborative Specialization in Jewish Studies" on their transcript.

Canada

Jewish Studies: Master's Level

Admission Requirements

- In addition to the admission requirements of the home graduate unit, sufficient linguistic knowledge, textual training, and familiarity with relevant scholarship in order to carry out graduate work in Jewish Studies within the chosen field are required.

Specialization Requirements

- Completion of CJS1000H, the core methods seminar in Jewish Studies. This seminar will introduce students to the different disciplines, methods, and approaches within Jewish Studies.
- 0.5 full-course equivalent (FCE) in Jewish Studies taken within the student's home graduate unit or in another unit (may count towards the course requirements of the student's home unit).
- A comprehensive exam in Jewish Studies, supervised by a faculty member chosen from Jewish Studies and in consultation with the graduate chair from the student's home unit, in which the student will be asked to show knowledge of areas of Jewish Studies relevant to his or her disciplinary focus.
- If the student's home program requires a major research paper or thesis, the focus of the paper must pertain to Jewish Studies, and the topic must be approved by the collaborative specialization director.

Jewish Studies: Doctoral Level

Admission Requirements

- In addition to the admission requirements of the home graduate unit, sufficient linguistic knowledge, textual training, and familiarity with relevant scholarship in order to carry out graduate work in Jewish Studies within the chosen field are required.

Specialization Requirements

- Completion of CJS2000H, the core research colloquium in Jewish Studies that runs biweekly throughout the year.

- Two half courses (1.0 full-course equivalent [FCE]), one within and one outside of the student's home unit, taught by a member of the CJS faculty (may count towards the course requirements of the student's home unit).
- A doctoral dissertation that deals substantively with topics in Jewish Studies and is supervised or co-supervised by a Jewish Studies graduate faculty member.
- Students will be required to give one presentation at the Jewish Studies graduate student conference over the course of their doctoral program. The conference will be held each year in the spring. The paper presentation must be completed before the completion of the doctoral program.

Jewish Studies: Courses

Not all courses are offered every year. Please consult the graduate unit for information about course availability. **Courses marked with # are taught by Jewish Studies faculty members and incorporate themes within and outside of Jewish Studies.** Major research and writing assignments for such courses must focus on topics in Jewish Studies.

Core Courses

CJS1000H	Jewish Studies Master's Seminar
CJS2000H	Jewish Studies Doctoral Seminar

Elective Courses

History

HIS1279H	World War II in East Central Europe
HIS1287H	Polish Jews Since the Partitions of Poland

Medieval Studies

MST3225H#	Jews and Christians in Medieval and Renaissance Europe

Music

CJS1010H	Representations of Jews and Jewishness in Opera

Near and Middle Eastern Civilizations

NMC1100Y#	Introduction to Aramaic
NMC1101Y#	Early Syriac Texts
NMC1102Y	Palestinian Aramaic Texts
NMC1105Y#	Syriac Historical Texts
NMC1106Y#	Syriac Exegetical Texts
NMC1111Y#	Babylonian Aramaic

Museum Studies — MMSt
Religion — MA, PhD
Urban Design — MUD

Overview

The Collaborative Specialization in Knowledge Media Design (KMD) was launched in 2002 as the teaching arm of the Knowledge Media Design Institute (KMDI). KMD provides a specialization for graduate students from a variety of academic backgrounds to engage in the design, prototyping, evaluation, and use of knowledge media. In keeping with KMDI's human-centred approach, students explore the design and use of new media in the context of real-world practices of individuals and communities. Access to an intensely collaborative and cross-disciplinary faculty encourages students to take a broader view of technological and social change and to be constructively critical of technological utopian and dystopian visions alike. The goal is for students to take into account heritage and history, to understand the realities of today, and to design for tomorrow.

Students have access to a community of scholars and the network of relationships that the institute coordinates. They gain first-hand experience of a living network of innovation, an environment in which the resources are people and knowledge, and the social capital and value that are generated through collaboration.

The collaborative specialization is open to master's and PhD students in the participating graduate programs listed above. Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Knowledge Media Design” on their transcript.

Knowledge Media Design: Master's Level

Admission Requirements

- Students wanting to apply to the collaborative specialization must be enrolled, or anticipate being enrolled, in a participating degree program. They must apply separately to the collaborative specialization and the home graduate unit.
- Please consult the KMDI website for application guidelines. Admission will be subject to the approval of the graduate unit concerned and the collaborative specialization committee.

Specialization Requirements

Master of Architecture;
MSc in Computer Science;
MA in Curriculum and Pedagogy;
MA in Drama, Theatre and Performance Studies;
Mechanical and Industrial Engineering (MASc; MEng Project Option),
Master of Landscape Architecture,
MA in Language and Literacies Education;
Master of Museum Studies;
MSc in Medical Science;
MA in Religion;
Master of Urban Design

- Students must meet all the requirements of their home program.
- Students must successfully complete a total of **1.0 full-course equivalent (FCE)**:
  - KMD1001H (0.5 FCE);

    - 0.5 elective FCE related to knowledge media and design. Courses are subject to availability.
- Students must attend two KMDI Speaker Series Lectures during one academic year of their degree program. Attendance will be monitored and appear on the transcript as KMD2100Y (Credit/No Credit).
- The thesis or major research project in the participating degree program should be relevant to the area of knowledge media design, as approved by the home graduate unit and the collaborative specialization committee.
- Students must submit a portfolio that includes completed student coursework and research in knowledge media design. The collaborative specialization committee will review all portfolios for their quality and contribution to the area of knowledge media design. Students' thesis or major research project will be a component of their portfolios.
- Collaborative specialization courses may be taken as electives for the purpose of satisfying home program requirements.

Specialization Requirements

MEd in Curriculum Studies and Teacher Development; MEd in Language and Literacies Education; MEng in Mechanical and Industrial Engineering (Coursework-Only Option)

- Students must meet all the requirements of their home program.
- Students must successfully complete a total of **1.5 full-course equivalents (FCEs)**:
    - KMD1001H (0.5 FCE);
    - 1.0 elective FCE related to knowledge media and design. Courses are subject to availability.
- Students must attend two KMDI Speaker Series Lectures during one academic year of their degree program. Attendance will be monitored and appear on the transcript as KMD2100Y (Credit/No Credit).
- Students must submit a portfolio that includes completed student coursework in knowledge media design. The collaborative specialization committee will review all portfolios for their quality and contribution to the area of knowledge media design.
- Collaborative specialization courses may be taken as electives for the purpose of satisfying home program requirements.

Specialization Requirements

Master of Information (Coursework-Only Option)

- Students must meet all the requirements of their home program.
- Students must successfully complete a total of **2.5 full-course equivalents (FCEs)**:
    - KMD1001H (0.5 FCE);
    - 2.0 elective FCEs related to knowledge media and design. Courses are subject to availability.
- Students must attend two KMDI Speaker Series Lectures during one academic year of their degree program. Attendance will be monitored and appear on the transcript as KMD2100Y (Credit/No Credit).
- Students must submit a portfolio that includes completed student coursework in knowledge media design. The collaborative specialization committee will review all portfolios for their quality and contribution to the area of knowledge media design.
- Collaborative specialization courses may be taken as electives for the purpose of satisfying home program requirements.

Specialization Requirements

Master of Information (Thesis Option)

- Students must meet all the requirements of their home program.
- Students must successfully complete a total of **1.0 full-course equivalent (FCE)**:
    - KMD1001H (0.5 FCE);
    - 0.5 elective FCE related to knowledge media and design. Courses are subject to availability.
- Students must attend two KMDI Speaker Series Lectures during one academic year of their degree program. Attendance will be monitored and appear on the transcript as KMD2100Y (Credit/No Credit).
- Students must submit a portfolio that includes completed student coursework and research in knowledge media design. The collaborative specialization committee will review all portfolios for their quality and contribution to the area of knowledge media design. Students' thesis will be a component of their portfolios.
- The thesis in the participating degree program should be relevant to the area of knowledge media design, as approved by the home graduate unit and the collaborative specialization committee.
- Collaborative specialization courses may be taken as electives for the purpose of satisfying home program requirements.

Knowledge Media Design: Doctoral Level

Admission Requirements

- Students wanting to apply to the collaborative specialization must be enrolled, or anticipate being enrolled, in a participating degree program. They must apply separately to the collaborative specialization and the home graduate unit.
- Please consult the KMDI website for application guidelines. Admission will be subject to the approval of the graduate unit concerned and the collaborative specialization committee.

Specialization Requirements

- Students must meet all the requirements of their home program.

- Students must successfully complete a total of **1.5 full-course equivalents (FCEs)**:
  - KMD1001H and KMD1002H if not already taken in the master's program, and
  - 0.5 FCE from the KMD series or a list of recognized affiliate courses.
- Students must attend four KMDI Speaker Series Lectures during one academic year of their degree program. Attendance will be monitored and appear on the transcript as KMD2200Y (Credit/No Credit).
- Students must submit a portfolio that includes completed student coursework and research in knowledge media design. The collaborative specialization committee will review all portfolios for their quality and contribution to the area of knowledge media design. Students' portfolios will most often be connected with one or more chapters of their dissertation.
- The dissertation topic must be in the area of knowledge media design. The thesis advisor and at least one other committee member must be from participating graduate units.
- The home graduate unit and the student's supervising committee will determine further requirements. The participating graduate units cooperate in jointly developing a program that is tailored to meet the needs of each student.

Knowledge Media Design: Courses

For courses offered in a particular year, check the KMD website.

Knowledge Media Design

Required

KMD1001H	Theory and Methods in Knowledge Media Design (Required for master's and PhD students.)
KMD1002H	Applications in Knowledge Media (Credit/No Credit. Required for PhD students only; elective for master's students. Offered once every two years.)
KMD2100Y	Master's Seminar (Credit/No Credit)
KMD2200Y	Doctoral Seminar (Credit/No Credit)

Electives

KMD2002H	Technologies for Knowledge Media
KMD3000H	Readings in Knowledge Media Design
KMD3001H	Readings in Knowledge Media Design
KMD4000H	Knowledge Media Design: Special Topics (Prerequisite: KMD1001H.)

Participating Graduate Unit Electives

Not all courses are offered every year. Please consult the KMD website for a full list of eligible electives that meet the KMD collaborative specialization requirements. Courses that are mandatory for a student's degree from the home graduate unit cannot normally be counted. Some of the elective courses may require a significant amount of background knowledge and experience. Enrolment in such courses may require the permission of the instructor.

Mediterranean Archaeology

Mediterranean Archaeology: Introduction

Lead Faculty of the Collaborative Specialization

Arts and Science

Participating Degree Programs

Anthropology — PhD
Art History — PhD
Classics — PhD
Near and Middle Eastern Civilizations — PhD
Religion — PhD

Supporting Units

Archaeology Centre

Overview

The Mediterranean Archaeology Collaborative Specialization (MACS) will expose students to the range of current approaches on the cutting-edge of Mediterranean archaeology. The Mediterranean offers unrivalled opportunities for exploring the complexities of economic, social, political, and religious change over centuries and millennia, across a vast area that is at once a coherent unit and a region with incredible diversity.

Students will be trained in the various methods required to undertake innovative research in the Mediterranean's varied prehistoric and historic contexts. Upon successful completion of the PhD requirements of the home graduate unit and the collaborative specialization, students will receive the notation "Completed Mediterranean Archaeology Collaborative Specialization" on their transcript.

Fax: (416) 978-3217

Mediterranean Archaeology Collaborative Specialization
Archaeology Centre, University of Toronto
19 Russell Street
Toronto, Ontario M5S 2S2
Canada

Mediterranean Archaeology: Doctoral Level

Admission Requirements

- Applicants to the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units. Applicants must meet the admission requirements of the graduate unit in which they intend to enrol. Admission will be subject to the approval of the graduate unit concerned and the collaborative specialization committee.
- Students requesting admission to the collaborative specialization following admission to a degree program should contact the specialization committee in order to formalize their admission to MACS.

Specialization Requirements

- **Coursework.** Students must complete **1.0 full-course equivalent (FCE)**: MAC1000Y *Methods in Mediterranean Archaeology*.
- **Fieldwork** (MAC2000H) four weeks of participation on an approved archaeological excavation, survey, or study season in the Mediterranean.
- **Thesis.** The topic must be in the area of Mediterranean archaeology, ancient history, or classical archaeology.

Musculoskeletal Sciences

Musculoskeletal Sciences: Introduction

Lead Faculty of the Collaborative Specialization

Medicine

Participating Degree Programs

Biomedical Engineering — MASc, PhD
Dentistry — MSc, PhD
Kinesiology — MSc, PhD
Laboratory Medicine and Pathobiology — MSc, PhD
Medical Science — MSc, PhD
Pharmacology and Toxicology — MSc, PhD
Rehabilitation Science — MSc, PhD

Overview

There is an increasing burden of illness related to musculoskeletal disorders. The Collaborative Specialization in Musculoskeletal Sciences focuses on educating and training graduate students to carry out musculoskeletal research and helping them see how their work fits into the larger community of musculoskeletal research that ranges from bench to bedside to society.

The collaborative specialization nurtures leaders in the field of musculoskeletal sciences who possess the knowledge and capability to promote transformational change.

The University of Toronto has a cohort of stellar faculty with expertise in all related medical research disciplines, constituting one of the largest musculoskeletal research communities in the world. Research areas include immunology, cell biology, molecular medicine and genomics, muscle physiology, imaging, pathology, bioengineering, and related clinical areas such as orthopaedics, rheumatology, dentistry, kinesiology, rehabilitation, injury prevention, and pain management.

Advances in these areas are converging to allow major advances in translating research to musculoskeletal care and health. This collaborative specialization builds on this community to provide a unique education and training program.

Musculoskeletal Sciences interests graduate students wishing to enhance their interdisciplinary knowledge and advance their careers. Participation in this collaborative specialization enhances professional contacts throughout the international musculoskeletal research community. Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Musculoskeletal Sciences” on their transcript.

Toronto, Ontario M5S 1A8
Canada

Musculoskeletal Sciences: Master's Level

Admission Requirements

- Applicants who wish to enrol in Musculoskeletal Sciences must apply to and be admitted to both a graduate degree program in one of the participating units and to the collaborative specialization. In addition to the application requirements of the home degree program, the collaborative specialization requires:
  - a curriculum vitae (CV)
  - a one-page letter explaining how the applicant's plan of study and specific research interests relate to musculoskeletal science
  - a letter of recommendation from a faculty member (if possible the thesis supervisor in a thesis-based graduate program), commenting on the applicant's academic abilities and likelihood for research success.

Specialization Requirements

- Meet all requirements of the home degree program and the collaborative specialization.
- Complete the required core course: MSC3001H *Foundations In Musculoskeletal Science*.
- Attend and participate in 12 seminars of the SRM3335H[+] *Master’s Seminar Series — Compulsory Attendance* (Credit/No Credit).
- Complete a thesis or major project or placement in the area of musculoskeletal sciences under the supervision of a collaborative specialization core faculty member.

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Musculoskeletal Sciences: Doctoral Level

Students enrolled in the collaborative specialization at the master's level who transfer to the doctoral level will have the course MSC3001H *Foundations in Musculoskeletal Science* counted toward the completion of the doctoral collaborative specialization requirements.

Admission Requirements

- Applicants who wish to enrol in Musculoskeletal Sciences must apply to and be admitted to both a graduate degree program in one of the collaborating units and to the collaborative specialization. In addition to the application requirements of the home degree program, the collaborative specialization requires:
  - a curriculum vitae (CV)
  - one-page letter explaining how the applicant's plan of study and specific research interests relate to musculoskeletal science
  - a letter of recommendation from a faculty member (usually the thesis supervisor in a thesis-based graduate program), commenting on the applicant's academic abilities and likelihood for research success at the doctoral level.

Specialization Requirements

- Meet all requirements of the home degree program and collaborative specialization.
- Complete the required core course: MSC3001H *Foundations in Musculoskeletal Science*. Students who have completed MSC3001H at the master's level and who transfer to a doctoral degree and the doctoral level of the collaborative specialization are not required to complete an additional core course.
- Attend and participate in 18 seminars of the SRD4445H *Doctoral Seminar Series*. Students who transfer from a master's degree and master's collaborative specialization to a doctoral degree and the doctoral collaborative specialization will be required to attend 18 seminars in total; the total will include the number of seminars attended at both the master's and doctoral levels.
- Complete a thesis in the area of musculoskeletal sciences under the supervision of a collaborative specialization core faculty member.
- In the rare instance that a student who has completed the collaborative specialization at the master's level wishes to also enrol in the collaborative specialization at the doctoral level, the student will not be required to repeat the core course, MSC3001H. However, the student will be required to attend and participate in 18 seminars of the SRD4445H *Doctoral Seminar Series* and complete the doctoral thesis in the area under the supervision of a core faculty member.

Musculoskeletal Sciences: Courses

MSC3001H	Foundations in Musculoskeletal Science

Pharmacology — MSc, PhD
Physiology — MSc, PhD
Psychology — MA, PhD
Public Health Sciences — MPH, MSc, PhD
Rehabilitation Science — MSc, PhD
Speech-Language Pathology — MSc, PhD

Overview

The graduate programs listed above participate in the Collaborative Specialization in Neuroscience.

Participating graduate units contribute courses and provide facilities and supervision for graduate research. Students must follow a plan of studies acceptable to both the participating unit and the Neuroscience collaborative specialization. Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Neuroscience” on their transcript.

Students interested in joining the specialization should visit the Neuroscience website and complete the application form. Students should register within one month of initial registration in their participating degree unit. The Neuroscience website provides areas of research for all faculty in the collaborative specialization, their graduate unit affiliations and contact information, as well as additional information on neuroscience courses.

Students in the specialization receive the Neuroscience newsletter and notification about neuroscience lectures held on campus. The collaborative specialization runs a Distinguished Lectureship Series of talks by eminent neuroscientists and an annual research day; students are required to attend and present at this event.

Collaborative Specialization in Neuroscience
University of Toronto
Room 3306, 1 King's College Circle
Toronto, ON M5S 1A8
Canada

Neuroscience: Master's Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating units.

Specialization Requirements

- The thesis topic must be in the neuroscience area.
- The student's supervisor must be a core faculty member of the Collaborative Specialization in Neuroscience.
- All master's-level students must complete at least 0.5 full-course equivalent (FCE) chosen from the list of courses approved by the collaborative specialization, as listed below.
- The student must attend the Annual Collaborative Specialization in Neuroscience Research Day at least once.
- The student must complete NEU1000H *Neuroscience Distinguished Lecture Series (Master's)* by attending at least 70% of the lectures in the CPIN Distinguished Lectureship Series (including the Raymond and Beverly Sackler Distinguished Visiting Neuroscientist Lecture) or CPIN Emerging Leaders in Neuroscience Lecture Series, during one academic year (or a minimum of seven lectures in total over the program). As part of the seminar series, the student must present his/her work at least once at the CPIN Research Day.

Neuroscience: Doctoral Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating units.

Specialization Requirements

- The thesis topic must be in the neuroscience area.
- The student's supervisor must be a core faculty member of the Collaborative Specialization in Neuroscience.
- All PhD students must complete at least 1.0 full-course equivalent (FCE) course, such as JNR1444Y *Fundamentals of Neuroscience: Cellular and Molecular*, or JNS1000Y *Fundamentals of Neuroscience: Systems and Behaviour*, or one of several additional courses in cognitive psychology or imaging, or neuroscience-related course to be determined by the collaborative specialization committee and posted on the Neuroscience website in July of each year.
- The student must attend the Annual Collaborative Specialization in Neuroscience Research Day at least twice.
- The student must complete NEU2000H *Neuroscience Distinguished Lecture Series (Doctoral)* by attending at least 70% of the lectures in the CPIN Distinguished Lectureship Series (including the Raymond and Beverly Sackler Distinguished Visiting Neuroscientist Lecture) or CPIN Emerging Leaders in Neuroscience Lecture Series, during three academic years (or a minimum of 21 lectures in total over the program). As part of the seminar series, the student must present his/her work at least twice at the CPIN Research Day.
- MSc or MA students who have completed the Neuroscience specialization and who wish to continue on to complete at the doctoral level must register in NEU2000H *Neuroscience Distinguished Lecture Series (Doctoral)* and fulfil the doctoral requirements.

Neuroscience: Courses

Neuroscience courses offered by the participating units are listed below. Not all courses are offered each year.

APD3286H	Developmental Neurobiology
APD5000H	Special Topics in Applied Psychology and Human Development: Master's Level
CSC2506H	Probabilistic Learning and Reasoning
CSC2515H	Introduction to Machine Learning
CSC2523H	Object Modelling and Recognition
CSC2545H	Kernel Methods and Support Vector Machines
DEN1060H	Oral Physiology: Sensory and Neuromuscular Function
JEB1444H	Neural Engineering
JNP1017H+	Current Topics in Molecular and Biochemical Toxicology
JNP1018H+	Molecular and Biochemical Basis of Toxicology
JNR1444Y	Fundamentals of Neuroscience: Cellular and Molecular — Lectures
JNS1000Y	Fundamentals of Neuroscience: Systems and Behaviour
JPB1071H	Advanced Topics: Computational Neuroscience
JPM1005Y	Behavioural Pharmacology
JYG1555H	Advanced Topics: Cellular and Molecular Neurobiology
LMP2222H	Neurodegenerative Disease — Mechanisms, Models, and Methods
MSC1006H	Neuroanatomy
MSC1081H	Studies in Schizophrenia
MSC1085H	Molecular Approaches to Mental Health and Addictions
MSC1087H	Neuroimaging Methods Using Magnetic Resonance Imaging
MSC1088H	Brain Positron Emission Tomography
MSC6000H	Special Topics Reading Course (requires prior permission of the Neuroscience Program Director)
MUS7110H	Neurosciences of Music: Scientific Foundations, Clinical Translations
NEU1000H0	Neuroscience Distinguished Lecture Series (Master's) (Credit/No Credit)
NEU2000H0	Neuroscience Distinguished Lecture Series (Doctoral) (Credit/No Credit)
PSL1024H	Advanced Topics: Neuroendocrinology
PSL1026H	Advanced Topics: Experimental Cell Physiology
PSL1047H	Advanced Topics: Somatosensory and Pain Neuroscience
PSL1050H	Advanced Topics: The Hippocampus from Cell to Behaviour
PSL1053H	Advanced Topics: Critical Assessment of Ion Channel Function
PSL1068H	Advanced Topics: Molecular Basis of Behaviour
PSL1075H	Biology In Time
PSL1441H	Systems Level Neuroplasticity
PSL1445H	Mechanistic Molecular and Cellular Neuroscience
PSL1446H	Molecular and Cellular Aspects of Neural Disorders
PSL1452H	Fundamentals of Ion Channel Function
PSY1200H	Selected Topics in Psychology
PSY4706H	Human Brain Neuroanatomy
PSY5101H	Mechanisms of Behaviour

PSY5110H	Advanced Topics in Behavioural Neuroscience I
PSY5111H	Advanced Topics in Behavioural Neuroscience II
PSY5112H	Advanced Topics in Behavioural Neuroscience III
PSY5121H	Advanced Topics in Animal Behaviour and Motivation II
PSY5130H	Advanced Topics in Neuropsychology I
PSY5201H	Audition
PSY5203H	Higher Cognition
PSY5204H	Attention
PSY5205H	Memory
PSY5210H	Advanced Topics in Perception I
PSY5211H	Advanced Topics in Perception II
PSY5212H	Advanced Topics in Perception III
PSY5220H	Advanced Topics in Cognition I
PSY5221H	Advanced Topics in Cognition II
PSY5222H	Advanced Topics in Cognition III
PSY5310H	Advanced Topics in Development I
PSY5311H	Advanced Topics in Development II
REH1510H	Disordered and Restorative Motor Control
REH5100H	Introduction to Cognitive Rehabilitation Neuroscience I: Basic Science to Clinical Applications

[0] Course that may continue over a program. Credit is given when the course is completed.

[+] Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.

Other Courses

Courses not specifically in neuroscience which do not fulfil the requirements as neuroscience courses but might be useful for neuroscience students.

JBL1507H	Biochemistry of Inherited Disease
JDB1025H	Developmental Biology
PSY5102H	Motivational Processes
SLP1522Y	Speech Physiology and Acoustics
SLP1533Y	Aphasia
SLP3001H	Theoretical Foundations of Communication Sciences

Next-Generation Precision Medicine

Next-Generation Precision Medicine: Introduction

Lead Faculty of the Collaborative Specialization

Pharmacy

Participating Degree Programs

Chemistry — PhD
Chemical Engineering and Applied Chemistry — PhD
Molecular Genetics — PhD
Pharmaceutical Sciences — PhD

Supporting Units

Graduate Department of Pharmaceutical Sciences;
Precision Medicine Initiative at U of T (PRiME)

Overview

The graduate programs listed above participate in the doctoral Collaborative Specialization (CS) in Next-Generation Precision Medicine, which offers the opportunity for cross-disciplinary research leading to doctoral degrees.

This CS is designed to foster cross-disciplinary training and collaboration across diverse departments at the University. The academic research focus is on cutting-edge technologies and methods to develop novel therapeutic strategies, create new tools for disease diagnosis, and enable a deeper understanding of disease biology through integration of principles and methods across the physical and life sciences and engineering. Future advances in precision medicine will require a multidisciplinary perspective and creative solutions beyond conventional genomics and mutational profiling. This CS aims to equip researchers with novel approaches to address unmet human health challenges by providing an understanding of commercialization and translation activities that will help advance research discoveries into impactful outcomes.

Upon successful completion of the PhD degree requirements of the participating home graduate unit and the CS, students will receive the notation “Completed Collaborative Specialization in Next-Generation Precision Medicine” on their transcript.

Next-Generation Precision Medicine: Doctoral Level

Admission Requirements

- Applicants must meet the admission requirements of both the home graduate unit and the collaborative specialization (CS).
- Applicants must apply to and be admitted to both the CS and a participating doctoral degree program.
- Applicants must be supervised by a core faculty member of the CS and are encouraged to have a co-supervisor or a member of their supervisory committee with research expertise in a different field of study.
- Applicants must have a thesis project focused on drug discovery, diagnostic development, or another topic related to next-generation precision medicine.

Specialization Requirements

- Students must meet the degree requirements of the School of Graduate Studies, the participating home graduate program, and the collaborative specialization.
- The student’s thesis in their home program must be in the area of next-generation precision medicine.
- The plan of study will include at least **1.0 full-course equivalent (FCE)** (combined course modules and seminar course as described below):
  - Students must complete PHM1500H *Next-Generation Precision Medicine Seminar Series* (0.5 FCE), offered through the Graduate Department of Pharmaceutical Sciences.
  - Course modules (0.25 or 0.5 FCE each) will be offered through the CS and participating departments. Students must take any (one or two) of the modules recognized by the CS for a total of 0.5 FCE.

Next-Generation Precision Medicine: Courses

Required Course

PHM1500H	Next-Generation Precision Medicine Seminar Series

Modular Courses

Each modular course is worth 0.25 full-course equivalent (FCE).

CHE1134H	Advances in Bioengineering
CHE1333H	Biomaterials Engineering for Nanomedicine
CHE1334H	Organ-on-a-chip Engineering
CHM1056H	Techniques for Studying the Chemical, Structural, and Dynamic Properties of Biomolecules
CHM1059H	Chemical Biology in Complex Systems
CHM1068H	Topics in Biological and Medicinal Chemistry
PHM1500H	Next-Generation Precision Medicine Seminar Series
PHM2101H	Pharmaceutical Sciences Module: Precision in vitro Diagnostics
PHM2102H	Pharmaceutical Sciences Module: Introduction to Fundamentals of Drug Discovery

Psychology and Engineering

Civil Engineering — MASc, PhD
Electrical and Computer Engineering — MASc, PhD
Mechanical and Industrial Engineering — MASc, PhD
Psychology — MA, PhD

Supporting Units

Department of Mechanical and Industrial Engineering

Overview

The Collaborative Master's Specialization in Psychology and Engineering (PsychEng) is between the Departments of Mechanical and Industrial Engineering, Civil and Mineral Engineering, Electrical and Computer Engineering in the Faculty of Applied Science and Engineering, and the Department of Psychology in the Faculty of Arts and Science.

Engineering involves the creative application of science to the design of systems, processes, structures, and technologies. Psychology is a science that focuses on the mind and behaviour of people and animals to understand individuals and groups across all levels of analyses, from the cellular to the cultural. The Psychology and Engineering collaborative specialization supports graduate students and faculty interested in contributing to the growing interdisciplinary scholarship at the nexus of psychology and engineering. Fields of study that may benefit from this collaborative specialization include, but are not limited to: human factors, design theory and methodology, artificial intelligence and information engineering, operations research, and robotics. This specialization strengthens ties between the two departments, and may propel research of interest to both beyond what is possible individually.

Upon successful completion of the master's and/or doctoral degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation "Completed Collaborative Specialization in Psychology and Engineering" on their transcript.

Collaborative Specialization in Psychology and Engineering
Department of Mechanical and Industrial Engineering
University of Toronto
5 King's College Road
Toronto, Ontario M5S 3G8
Canada

Psychology and Engineering: Doctoral Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to a doctoral-level graduate degree program in one of the collaborating graduate units.
- Applicants must provide:
  - A statement of purpose that describes the applicant's background experience relating to psychology and engineering, and motivation for pursuing studies in PsychEng. Complete the online application form.
  - A supervisor's letter of recommendation in support of the student's application to PsychEng.

Specialization Requirements

- Two sessions of APS1308Y *PsychEng Seminar Series — PhD Level* (Credit/No Credit) worth 0.0 full-course equivalent (FCE).
- Two PsychEng elective half courses (1.0 FCE). One of the courses must be from the other discipline. Students from either discipline (psychology or engineering) should first consult with the instructor before registering for a course in the other discipline to ensure adequate fit in terms of interest and preparation.
- A thesis focused on a topic in the area of the collaborative specialization.
- Students who have completed the PsychEng collaborative specialization at the master's level must take the core seminar course at the PhD level, which requires a higher level of participation; i.e., present more frequently and/or take a leadership role in seminar activities such as the discussion of research papers. Students take two further (different) PsychEng electives during their doctoral program, and their research will be at a level appropriate to a PhD degree.
- All students enrolled in the collaborative specialization must complete the requirements of the collaborative specialization, in addition to those requirements for the degree program in their home graduate unit. The collaborative specialization director and/or specialization committee is/are responsible for certifying the completion of the collaborative specialization requirements. The home graduate unit is solely responsible for the approval of the student's home degree requirements.

Psychology and Engineering: Master's Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.
- Applicants must provide:
  - A statement of purpose that describes background experience relating to psychology and engineering, and motivation for pursuing studies in PsychEng. Complete the online application form.
  - A supervisor's letter of recommendation in support of the student's application to PsychEng.

Specialization Requirements

- Two sessions of APS1305H *PsychEng Seminar Series* — Master's Level (Credit/No Credit) worth 0.0 full-course equivalent (FCE).
- Two PsychEng elective half courses (1.0 FCE). One of the courses must be from the other discipline. Students from either discipline (psychology or engineering) should first consult with the instructor before registering for a course in the other discipline to ensure adequate fit in terms of interest and preparation.
- A thesis focused on a topic in the area of the collaborative specialization.
- All students enrolled in the collaborative specialization must complete the requirements of the collaborative specialization, in addition to those requirements for the degree program in their home graduate unit. The collaborative specialization director and/or specialization committee is/are responsible for certifying the completion of the collaborative specialization requirements. The home graduate unit is solely responsible for the approval of the student's home degree requirements.

Dalla Lana School of Public Health

Overview

The Collaborative Specialization in Public Health Policy provides students with exemplary training in public health policy, which fosters synergies and cross-disciplinary learning. It gives students the capacity to engage in current events and contribute to the development, refinement, and evaluation of policies to address society's pressing and emerging public health priorities.

The collaborative specialization is cross-disciplinary, bringing together a broad range of disciplines, substantive foci, and theoretical and methodological underpinnings, to synergistically build an engaged community of practice of students and faculty focused on public health policy. It contributes to the creation of the next generation of public health policy research leaders and creative agents for change, able to address current health issues and challenges.

Through the direction of the stellar team of academics and policy-makers associated with the collaborative specialization, students are provided with real-world skills to address the complex and demanding task of public health policy-making (including insight into a wide array of legislative and regulatory interventions, administrative practices, financing and funding decisions, and various forms of soft law, such as guidelines and informal processes) which operate at the international, federal, provincial, and municipal levels in ways that are both cross-jurisdictional and cross-sectoral.

Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Public Health Policy" on their transcript.

Collaborative Specialization in Public Health Policy
University of Toronto
Suite 534, 155 College Street
Toronto, Ontario M5T 3M7
Canada

Public Health Policy: Master's Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.
- Complete the application form available on the website.
- Curriculum vitae (CV); maximum length: five pages.
- Two-page, free-form essay outlining:
  - interest in public health policy
  - aspirations
  - learning goals
  - career plans
  - specific research plans (if in a research program of study)
  - experience relevant to public health policy.
- Letters from two references. The letters of reference should describe the student's academic ability and career aspirations and comment on the student's potential benefit from the collaborative specialization.

Specialization Requirements

- Individual student plans of study must meet the requirements of both the home graduate unit and the collaborative specialization. To fulfil the requirements of the collaborative specialization, students must complete the following:
  - Undertake the major paper, thesis, or practicum placement with a public health policy focus under the supervision of one of the collaborative specialization's core faculty members.
  - Complete 1.0 full-course equivalent (FCE) in public health policy from the following list: CHL5300H *Public Health Policy*, CHL5308H *Tools and Approaches for Public Health Policy Analysis and Evaluation*, HAD5011H *Canada's Health Care System*, or PPG1001H *The Policy Process*.
  - Complete the *Master's Seminar Series* course, SRM3333H.
- All students enrolled in the collaborative specialization must complete the requirements of the collaborative specialization, in addition to those requirements for the degree program in their home graduate unit.

Public Health Policy: Doctoral Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.
- Complete the application form available on the website.
- Curriculum vitae (CV); maximum length: five pages.
- Two-page, free-form essay outlining:
  - interest in public health policy
  - aspirations
  - learning goals
  - career plans
  - specific research plans
  - experience relevant to public health policy.
- Letters from two references. One letter should come from the prospective supervisor and should describe availability of resources necessary to carry out research, including the type of mentoring the supervisor will be able to provide, comments on academic progress, and the student's potential benefit from the collaborative specialization.

Specialization Requirements

- Individual student plans of study must meet the requirements of both the home graduate unit and the collaborative specialization.
- To fulfil the requirements of the collaborative specialization, students must complete the following:
  - Undertake thesis research with a public health policy focus under the supervision of one of the collaborative specialization's core faculty members.
  - Complete 1.0 full-course equivalent (FCE) in public health policy from the following list: CHL5300H *Public Health Policy*, CHL5308H *Tools and Approaches for Public Health Policy Analysis and Evaluation*, HAD5011H *Canada's Health Care System*, or PPG1001H *The Policy Process*. Students who have completed two of the four courses listed above may be considered for a course reduction of up to 1.0 FCE in the PhD program.
  - Completion of the graduate seminar series course CHL5309H.
- All students enrolled in the collaborative specialization must complete the requirements of the collaborative specialization, in addition to those requirements for the degree program in their home graduate unit.

Public Health Policy: Courses

CHL5300H	Public Health Policy
CHL5308H	Tools and Approaches for Public Health Policy Analysis and Evaluation
CHL5309H	Advanced Analysis of Topical Issues in Public Health Policy
HAD5011H	Canada's Health Care System and Health Policy (Doctoral Stream)
PPG1001H	The Policy Process
SRM3333H	Public Health Policy Seminar Series (Master's Level)

Resuscitation Sciences

Resuscitation Sciences: Introduction

Admissions to the collaborative specialization in Resuscitation Sciences have been administratively suspended.

Lead Faculty of the Collaborative Specialization

Medicine

Participating Degree Programs

Biomedical Engineering — PhD
Clinical Engineering — MHSc
Community Health — MScCH
Health Policy, Management and Evaluation — MSc, PhD
Immunology — MSc, PhD
Laboratory Medicine and Pathobiology — MSc, PhD
Mechanical and Industrial Engineering — MASc, MEng, PhD
Medical Science — MSc, PhD
Nursing Science — MN, PhD
Pharmacology — MSc, PhD
Physiology — MSc, PhD
Public Health Sciences — MPH, MSc, PhD
Rehabilitation Science — MSc, PhD

Overview

The goal of the Collaborative Specialization in Resuscitation Sciences is to train scientists pursuing research in the optimal care of the acutely ill and injured patient and, ultimately, to create leaders in the discipline who will supervise others providing this level of scientific inquiry. The collaborative specialization appeals to students from a wide variety of backgrounds with an interest in any aspect of resuscitation science.

Resuscitation Sciences includes a number of medical areas such as trauma, critical care, emergency medicine, neurotrauma, anaesthesia, shock, sepsis, acute coronary syndrome, paediatric care, cardiovascular, peripheral vascular, and rehabilitation medicine. Many non-medicine disciplines such as engineering, basic science, and public health, as well as allied health professions such as nursing, pharmacy, and paramedicine, will find synergies in the Resuscitation Sciences specialization. Research programs can use methodologies ranging from molecular medicine and genomics through clinical trials and outcomes to engineering, health administration, and health prevention strategies. Resultant advances in knowledge will ultimately be applied to the clinical setting.

Interested students must first apply to and be accepted in one of the participating degree programs listed above, and then apply to the collaborative specialization. Students must follow a course of study acceptable to both the home unit and the collaborative specialization. Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation "Completed Collaborative Specialization in Resuscitation Sciences" on their transcript.

Collaborative Specialization in Resuscitation Sciences
c/o Rescu, St. Michael's Hospital
30 Bond Street
Toronto, Ontario M5B 1W8
Canada

Resuscitation Sciences: Master's Level

Admission Requirements

- Collaborative specializations are administered under the auspices of the School of Graduate Studies.
- Applicants must be accepted for admission to a participating graduate unit and comply with the admission procedures of that unit before applying to the Collaborative Specialization in Resuscitation Sciences.
- Applicants must submit the following to the collaborative specialization committee:
  - a resumé or curriculum vitae (CV)
  - a personal statement explaining how their course of study and specific research interests relate to resuscitation science
  - a letter of recommendation from a faculty member, usually the thesis supervisor in a thesis-based graduate program, commenting on the student's academic abilities and likelihood for research success in the field of resuscitation sciences.

Specialization Requirements

- Students must register in the master's degree program through one of the participating home graduate units. They must meet all respective degree requirements of the School of Graduate Studies and their participating home graduate unit.
- In addition to meeting the home graduate unit program requirements, students will be required to:
  - take the core course MSC4001H *Foundations in Resuscitation Science Research*
  - attend at least 75% of the SRM3333H *Resuscitation Sciences Graduate Seminar Series* over two consecutive sessions
  - complete a thesis, comprehensive paper, or practicum (whichever is included in their course of study) in the area of resuscitation sciences under the supervision of a faculty member affiliated with the collaborative specialization

- present their research at least once at either the Resuscitation in Motion scientific meeting or in the Foundations MSC4001H core course.

SRM3333H	Resuscitation Sciences Graduate Seminar Series (master's level)
SRD4444H	Resuscitation Sciences Graduate Seminar Series (doctoral level)

Resuscitation Sciences: Doctoral Level

Admission Requirements

- Collaborative specializations are administered under the auspices of the School of Graduate Studies.
- Applicants must be accepted for admission to a participating graduate unit and comply with the admission procedures of that unit before applying to the Collaborative Specialization in Resuscitation Sciences.
- Applicants must submit the following to the collaborative specialization committee:
  - a resumé or curriculum vitae (CV)
  - a personal statement explaining how their course of study and specific research interests relate to resuscitation science
  - a letter of recommendation from a faculty member, usually the thesis supervisor in a thesis-based graduate program, commenting on the student's academic abilities, and likelihood for research success in the field of resuscitation sciences.

Specialization Requirements

- Students must register in the degree program through one of the participating home graduate units. They must meet all respective degree requirements of the School of Graduate Studies and their participating home graduate unit.
- In addition to meeting the home graduate unit program requirements, students will be required to:
  - take the core course MSC4001H *Foundations in Resuscitation Science Research* (doctoral students who have already taken this course as part of their master's program will be exempted)
  - take MSC4002H *Advanced Topics in Resuscitation Science Research*, a type 2 graduate seminar series
  - complete a thesis in the area of resuscitation sciences
  - attend at least 75% of the SRD4444H *Resuscitation Sciences Graduate Seminar Series* over two consecutive years
  - present their research at least twice at either the Resuscitation in Motion scientific meeting or in the Foundations MSC4001H core course.

Resuscitation Sciences: Courses

MSC4001H	Foundations in Resuscitation Science Research
MSC4002H	Advanced Topics in Resuscitation Science Research (PhD students only)

Supporting Unit

Mark S. Bonham Centre for Sexual Diversity Studies

Overview

The Collaborative Specialization in Sexual Diversity Studies, offered by the Mark S. Bonham Centre for Sexual Diversity Studies, is rigorously interdisciplinary and recognizes sexual diversity studies as an interdisciplinary field of inquiry. While it has emerged as an autonomous scholarly area, many of those who work within it engage questions of gender, ethnicity, race, Aboriginal status, (dis)ability, and class, to highlight the importance of exploring their interaction with sexual differences.

The graduate degree programs listed above participate in the collaborative specialization. From their home graduate units, students may take up questions from their own disciplinary or programmatic perspective, but explore it through the theoretical and methodological lens of sexuality studies. Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Sexual Diversity Studies” on their transcript.

Contact and Address

University of Toronto
Room 251, University College
15 King's College Circle
Toronto, Ontario M5S 3H7
Canada

Sexual Diversity Studies: Master's Level

Admission Requirements

- Each graduate student in the collaborative specialization shall be enrolled in a participating degree program in the graduate unit where the research is conducted, which is known as the home graduate unit. The student shall meet the admission requirements of both the home graduate unit and the collaborative specialization.

Specialization Requirements

- Students must meet all respective degree requirements of the School of Graduate Studies and the participating graduate unit, and meet the requirements of the collaborative specialization as follows:
  - 0.5 full-course equivalent (FCE) core course in Sexual Diversity Studies (SDS1000H)
  - 0.5 FCE in other courses with substantial treatment of sexual diversity
  - thesis or major research paper (if applicable) must be on a sexual diversity studies topic.

- Courses may be counted towards the 0.5 FCE beyond the core course if a significant portion of the course addresses questions related to sexuality, or if most of the session work completed in association with it explores such questions.
- All course selection for the additional 0.5 FCE must be approved by the collaborative specialization director.

Sexual Diversity Studies: Doctoral Level

Admission Requirements

- Each graduate student in the collaborative specialization shall be enrolled in a participating degree program in the graduate unit where the research is conducted, which is known as the home graduate unit. The student shall meet the admission requirements of both the home graduate unit and the collaborative specialization.

Specialization Requirements

- Students must meet all respective degree requirements of the School of Graduate Studies and the participating graduate unit; and meet the requirements of the collaborative specialization as follows:
  - 0.5 FCE core course in Sexual Diversity Studies (SDS1000H)
  - 0.5 FCE in other courses with substantial treatment of sexual diversity
  - thesis or major research paper (if applicable) must be on a sexual diversity studies topic.
- Doctoral students in the program who have completed the collaborative specialization at the master's level will not be required to repeat SDS1000H. All course selection for the additional 0.5 FCE must be approved by the collaborative specialization director.
- The doctoral thesis committee should include at least one faculty member associated with Sexual Diversity Studies. In most cases, the supervisor would be associated with Sexual Diversity Studies, though in some cases, the student's particular analytical perspective will suggest another faculty member in her or his discipline.
- The student's course of study and overall progress will be reviewed annually by the collaborative specialization director, though ultimate responsibility for the student's progress will remain with the graduate chair of the home program.

Sexual Diversity Studies: Courses

SDS1000H	Theoretical and Methodological Issues in Sexual Diversity Studies
SDS1002H	Comparative Disciplinary Approaches: A Research Seminar (prerequisite: SDS1000H or permission of the instructor)

South Asian Studies

South Asian Studies: Introduction

Lead Faculty of the Collaborative Specialization

Arts and Science

Participating Degree Programs

Anthropology — MA, MSc, PhD
Comparative Literature — MA, PhD
Drama, Theatre and Performance Studies — MA, PhD
East Asian Studies — MA, PhD
English — MA, PhD
Geography — MA, PhD
History — MA, PhD
Music — MA, PhD
Political Science — PhD
Religion — MA, PhD
Social Justice Education — MA, MEd, EdD, PhD
Women and Gender Studies — MA, PhD

Overview

The interdisciplinary Collaborative Master's and Doctoral Specialization in South Asian Studies is designed for students who wish to acquire a nuanced understanding of South Asia as a secondary area of specialization while pursuing graduate studies in another discipline. The focus of South Asian Studies is necessarily broad in that it provides students with an understanding of ancient and modern history, social change, economic development, contemporary politics, religious traditions, literary culture, and a spectrum of related topics.

The Centre for South Asian Studies, which administers the collaborative specialization, provides a nucleus for the participation of South Asian Studies scholars from across the University. Students will benefit from the physical presence of the centre and its regular activities of research fora, conferences, and visiting lecturer and scholar programs. In addition, the University's library collection in South Asian studies is the largest in Canada.

Master's and doctoral students wishing to be admitted to the collaborative specialization must apply to one of the participating graduate programs.

Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in South Asian Studies” on their transcript.

South Asian Studies: Master's Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units. Applicants must meet the admission requirements of the graduate unit in which they intend to enrol. Admission will be subject to the approval of the graduate unit concerned and the collaborative specialization committee.

Specialization Requirements

- A mandatory half-year core course entitled *Issues in South Asian Studies* taught by the core faculty. The core course will be the same for both master's and doctoral students. Master's students who proceed to the doctoral program will not be required to take the core course again. With the permission of the home graduate unit, the core course can be taken in lieu of one of the courses required by the home unit.
- Attendance at a minimum of two lectures per session from the lecture series organized by the Centre for South Asian Studies during the academic year in which the student takes the core course (September to May).
- If writing a thesis, it is expected to include a significant South Asian component.
- For master's students writing a research paper, the home unit will determine whether a South Asian component is required in the research paper.
- For master's students writing a thesis and master's students writing a research paper, language requirements will be assessed on a case-by-case basis.

South Asian Studies: Doctoral Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units. Applicants must meet the admission requirements of the graduate unit in which they intend to enrol. Admission will be subject to the approval of the graduate unit concerned and the collaborative specialization committee.

Specialization Requirements

- A mandatory half-year core course entitled *Issues in South Asian Studies* taught by the core faculty (unless already taken in the master's program). With the permission of the home graduate unit, the core course can be taken in lieu of one of the courses required by the home unit.
- Attendance at a minimum of two lectures per session from the lecture series organized by the Centre for South Asian Studies (CSAS) for a total of two years, including the academic year in which the student takes the core course (September to May).
- Submission of two short articles responding to CSAS events (one per year during the two years of attendance at the CSAS lecture series), to be submitted to the collaborative specialization administrator for review by the collaborative specialization director and potentially shared online.
- The dissertation to include a significant South Asian component.
- A research presentation to the collaborative specialization committee on a South Asian topic in Year 3 or Year 4.
- Language requirement, depending on the student's area of specialization.

Toxicology

Toxicology: Introduction

Lead Faculty of the Collaborative Specialization

Medicine

Participating Degree Programs

Laboratory Medicine and Pathobiology — MSc, PhD
Medical Science — MSc, PhD
Nutritional Sciences — MSc, PhD
Pharmaceutical Sciences — MSc, PhD
Pharmacology — MSc, PhD

Overview

The Collaborative Specialization in Toxicology provides graduate students with a unique opportunity to gain breadth and depth of knowledge in toxicology beyond their thesis research area. This collaborative specialization aims to prepare participants for careers related to toxicology. It emphasizes the development of critical thinking and effective communication skills in addition to acquiring greater knowledge of basic principles and specific aspects of toxicology.

The graduate programs listed above participate in this collaborative specialization. Students may pursue an MSc or PhD degree. Graduate units participating in the program contribute graduate courses, provide facilities, and provide supervision for graduate research.

Graduate students from units other than the participating units listed who are interested in pursuing a program in toxicology should speak to the Director of the Collaborative Specialization in Toxicology and the graduate advisor(s) in their home graduate unit to discuss the possibility. Detailed information is available on the Toxicology website and from the Department of Pharmacology and Toxicology.

Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Toxicology” on their transcript.

Collaborative Specialization in Toxicology
Department of Pharmacology and Toxicology
University of Toronto, Medical Sciences Building
Room 4207, 1 King's College Circle
Toronto, Ontario M5S 1A8 Canada

Toxicology: Master's Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must first apply to and be admitted by one of the participating home graduate units under its regulations. Once students have been admitted to their home graduate unit, they should register in the Collaborative Specialization in Toxicology by contacting the collaborative specialization director.

Specialization Requirements

- Students must complete JNP1016H *Graduate Seminar in Toxicology*.
- Students may be required to take JNP1014Y *Interdisciplinary Toxicology* if they have not previously completed coursework in advanced toxicology.
- Students must attend a minimum of six academic seminars related to toxicology during the master's program.
- Students must complete a research thesis or project as required by the home graduate unit. It is understood that the research topic will be in the area of toxicology.

Toxicology: Doctoral Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must first apply to and be accepted by one of the participating home graduate units under its regulations. Once students have been admitted to their home graduate unit, they should register in the Collaborative Specialization in Toxicology by contacting the collaborative specialization director.

Specialization Requirements

- Students must complete JNP1016H *Graduate Seminar in Toxicology*, plus a 0.5 full-course equivalent (FCE) in the area of toxicology (approved by the collaborative specialization director). The home unit and the collaborative specialization director will decide whether these courses are in addition to, or substitutions for, requirements of the home graduate unit.
- Students may be required to take JNP1014Y *Interdisciplinary Toxicology* if they have not previously completed coursework in advanced toxicology.
- Students must attend a minimum of 12 academic seminars related to toxicology during the doctoral specialization.
- Students must complete a research thesis or project as required by the home graduate unit. It is understood that the research topic will be in the area of toxicology.

Overview

The Graduate Collaborative Specialization in Women and Gender Studies (CWGS) provides students with an opportunity for advanced feminist studies in concert with an MA or PhD degree in another discipline. The Collaborative Specialization offers a rich interdisciplinary environment in which to grapple with how gender and sexuality are entangled with questions of race, citizenship, embodiment, colonialism, nation, global capitalism, violence, political economy, cultural formations, aesthetics, and other pressing concerns.

The graduate programs listed above participate in the Collaborative Specialization in Women and Gender Studies at the University of Toronto. The collaborating units contribute courses and provide facilities and supervision for graduate research. The collaborative specialization is administered by the Women and Gender Studies Institute (WGSI), bringing together 34 graduate programs, more than 100 courses, and more than 100 graduate faculty members. Core faculty members bring transnational feminist commitments to the study of diverse sites and their interconnection with particular focus on Canada, the Caribbean, Africa, the Middle East, South Asia, East Asia, and the United States.

Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Women and Gender Studies” on their transcript.

Women and Gender Studies: Master's Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units. Applicants must fulfil all the degree requirements in the home graduate unit.
- Applicants to the collaborative specialization should have a substantial undergraduate background in gender and feminist studies or an equivalent focus within a discipline. In exceptional cases, extensive work or activist experience which also requires academic knowledge of research on women and/or gender will also be considered.
- Two-page statement of research intent explaining how the applicant’s course of study and specific research interests relate to women and gender studies at the master's level.
- Two letters of reference outlining the applicant’s background in women and gender studies.

Specialization Requirements

- The course of study should be planned in consultation with the CWGS graduate coordinator as well as the coordinator of graduate studies in the student's home graduate unit.
- Courses should be selected from the established cross-listed courses or approved by the graduate coordinator of the collaborative specialization.

Non-thesis Master's

- A required 0.5 full-course equivalent (FCE) (WGS5000H).
- 0.5 FCE of cross-listed or approved courses with a focus on women/gender/feminist/sexuality/critical race/postcolonial studies.
- Regular attendance at the WGS Research Seminar.

Thesis Master's

- A required 0.5 FCE (WGS5000H).
- 0.5 FCE of cross-listed or approved courses with a focus on women/gender/feminist/sexuality/critical race/postcolonial studies.
- Regular attendance at the WGS Research Seminar
- The thesis, or major paper, dealing with a subject in the area of women and gender studies.
- Theses will be supervised and evaluated in the same manner as those in the home graduate unit. Normally, at least one cross-listed or core graduate faculty member of WGSI will be a member of the thesis or supervisory committee of collaborative specialization students.

Women and Gender Studies: Doctoral Level

Admission Requirements

- Applicants who wish to enrol in the collaborative specialization must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units. Students must fulfil all the degree requirements in the home graduate unit.
- Applicants to the collaborative specialization should have a substantial undergraduate or graduate background in gender and feminist studies or an equivalent focus within a discipline. In exceptional cases, extensive work or activist experience which also requires academic knowledge of research on women and/or gender will also be considered.
- Two-page statement of research intent explaining how the applicant's course of study and specific research interests relate to women and gender studies at the doctoral level.
- Two letters of reference outlining the applicant's background in women and gender studies.

Specialization Requirements

- The course of study should be planned in consultation with the CWGS graduate coordinator as well as the coordinator of graduate studies in the student's home graduate unit.
- Courses should be selected from the established cross-listed courses approved by the graduate coordinator of the collaborative specialization.
- A required 0.5 FCE selected from WGS5000H or WGS5001H.
- Any other 0.5 FCE course in women and gender studies.
- 1.0 FCE of cross-listed or approved courses with a focus on women/gender/feminist/sexuality/critical race/postcolonial studies.
- Regularly participate in the WGS Research Seminar.
- Students are required to present their work in the seminar at least once before graduating.
- Doctoral thesis dealing with a subject in the area of women and gender studies. Theses will be supervised and evaluated in the same manner as those in the home graduate unit. Normally, at least one cross-listed or core graduate faculty member with WGSI will be a member of the thesis or supervisory committee of collaborative specialization students.

Women and Gender Studies: Courses

Core Courses

WGS5000H	Feminist Theories, Histories, Movements I
WGS5001H	Feminist Theories, Histories, Movements II

Elective Courses

For courses offered by WGSI and cross-listed by the participating units offered in a particular year, check the collaborative specialization website.

Overview

The Collaborative Graduate Specialization in Women's Health provides interdisciplinary training in women's health research and practice for graduate students at the University of Toronto with the goal of:

- helping students develop shared understandings of the complex interactions of biology and environment, sex and gender;
- providing students with the necessary skill set to undertake and lead interdisciplinary, collaborative health-care research projects; and
- enhancing mutually beneficial relationships among researchers and practitioners of women's health across the University and its affiliated teaching hospitals.

Students must be registered in the School of Graduate Studies through one of the participating graduate units in order to apply to the Collaborative Specialization in Women's Health. Applicants must comply with the admission procedures of that unit. There is no deadline to apply to this collaborative specialization; applications will be reviewed as they are received.

Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Women's Health” on their transcript.

Women's Health: Master's Level

Admission Requirements

- Applicants must be registered with the School of Graduate Studies through an affiliated home graduate unit. Before applying to the Women's Health collaborative specialization, applicants must comply with the admission procedures of their home graduate unit.
- Applicants must submit the following for review by the Executive Committee:
  - a curriculum vitae (CV)
  - a personal statement (via a concise letter no longer than two pages) describing relevant personal and/or professional experiences, a career plan, and motivation in seeking advanced training in women's health.

Specialization Requirements

- To successfully complete the collaborative specialization, students must also successfully complete the requirements of their home graduate unit.
- Complete the core course (CHL5109H *Gender and Health*).
- Participate in at least six monthly sessions in the Student Research Seminar Series. Students will be encouraged to build relationships with peers and faculty that cross disciplinary boundaries.
- In instances where home graduate units require a thesis, it is desirable, but not required, that this work be relevant to women's health.

Women's Health: Doctoral Level

Admission Requirements

- Applicants must be registered with the School of Graduate Studies through an affiliated home graduate unit. Before

applying to the Women's Health collaborative specialization, applicants must comply with the admission procedures of their home graduate unit.
- Applicants must submit the following for review by the Executive Committee:
  - a curriculum vitae (CV)
  - a personal statement (via a concise letter no longer than two pages) describing relevant personal and/or professional experiences, a career plan, and motivation in seeking advanced training in women's health.

Specialization Requirements

- To successfully complete the collaborative specialization, students must also successfully complete the requirements of their home graduate unit.
- Complete the core course (CHL5109H *Gender and Health*). Doctoral students who have satisfactorily completed the core course during their master's program are not required to repeat the course during their doctoral program.
- Students must participate in at least six monthly sessions in the Student Research Seminar Series and present their completed or in-progress research at a seventh student research seminar. Students will be encouraged to build relationships with peers and faculty that cross disciplinary boundaries.
- In addition to their home graduate unit supervisor, students must also identify a mentor — a faculty member of the collaborative specialization whose own methodologies represent a different approach than that used by the student's primary mentor.
- Devise a research plan that builds interdisciplinary research skills in women's health. The plan is developed with guidance from the graduate supervisor from their home unit and the mentor, who both sign the study/research plan.
- Complete a dissertation on a topic relevant to women's health.

CHL5109H Gender and Health

Workplace Learning and Social Change

Workplace Learning and Social Change: Introduction

Lead Faculty of the Collaborative Specialization

Ontario Institute for Studies in Education (OISE)

Participating Degree Programs

Adult Education and Community Development — MA, MEd, PhD
Industrial Relations and Human Resources — MIRHR, PhD
Rehabilitation Science — MSc, PhD
Social Justice Education — MA, MEd, PhD, EdD
Women and Gender Studies — MA

Overview

The Collaborative Specialization in Workplace Learning and Social Change is particularly suited to students interested in developing their understanding of work and learning trends in Canada and internationally, with a focus on the relationships between workplace learning and social change. The collaborative specialization has three intellectual objectives:

- to situate workplace learning within broader social trends such as globalization, neoliberalism, and organizational restructuring;
- to allow exploration of the connections between learning as an individual phenomenon and learning as a social/organizational and public policy phenomenon; and
- to highlight the learning strategies that seek to foster social change through greater equality of power, inclusivity, participatory decision-making, and economic democracy.

Applicants to participating programs who are interested in participating in the collaborative specialization must apply to and be accepted by both the graduate unit and the collaborative specialization. For admission, applicants should submit a statement of interest to the collaborative specialization director.

Upon successful completion of the degree requirements of the participating home graduate unit and the collaborative specialization, students will receive the notation “Completed Collaborative Specialization in Workplace Learning and Social Change” on their transcript.

Workplace Learning and Social Change: Master's Level

Admission Requirements

- Applicants must apply to and be admitted to both the collaborative specialization and a graduate degree program in one of the collaborating graduate units.
- Applicants must submit a statement of interest which includes:
  - relevant personal and/or professional experiences and motivation in seeking training in workplace learning and social change (all applicants)
  - a brief outline of their proposed research project (thesis students)
  - indication of their preference of supervisor, if any (thesis students).

Specialization Requirements

- Individual student programs of study must meet the requirements of both the home graduate unit and the collaborative specialization. Normally, the selection of courses to satisfy the collaborative specialization requirements will not extend the program length.
- Course requirements are as follows:
  - 0.5 core full-course equivalent (FCE) — WPL1131H *Introduction to Workplace Learning and Social Change*
  - 0.5 elective FCE in the area of workplace learning and social change.
- In addition, students in a thesis-based MA program will be required to complete a thesis which incorporates issues of workplace learning and social change. A member of the collaborative specialization core faculty will serve as supervisor or committee member.
- Course-only MEd students will be required to complete an additional 0.5 elective FCE in the area of workplace learning and social change.

Workplace Learning and Social Change: Doctoral Level

Admission Requirements

- Applicants should apply to the collaborating degree program that corresponds most closely to their general background and interests.

- Applicants must submit a statement of interest which includes:
  - relevant personal and/or professional experiences and motivation in seeking training in workplace learning and social change (all applicants)
  - a brief outline of their proposed research project
  - indication of their preference of supervisor, if any.

Specialization Requirements

Doctor of Education

Offered to students in the Social Justice Education program only.

- Individual student programs of study must meet the requirements of both the home graduate unit and the collaborative specialization. Normally, the selection of courses to satisfy the collaborative specialization requirements will not extend the program length.
- Course requirements are as follows:
  - 0.5 core full-course equivalent (FCE) — WPL3931H *Advanced Studies in Workplace Learning and Social Change*
  - 0.5 elective FCE in the area of workplace learning and social change.
- In addition, students will be required to complete a thesis which incorporates issues of workplace learning and social change. A member of the collaborative specialization core faculty will serve as supervisor or committee member.

Doctor of Philosophy

- Individual student programs of study must meet the requirements of both the home graduate unit and the collaborative specialization. Normally, the selection of courses to satisfy the collaborative specialization requirements will not extend the program length.
- Course requirements are as follows:
  - 0.5 core full-course equivalent (FCE) — WPL3931H *Advanced Studies in Workplace Learning and Social Change*
  - 0.5 elective FCE in the area of workplace learning and social change.
- In addition, students will be required to complete a thesis which incorporates issues of workplace learning and social change. A member of the collaborative specialization core faculty will serve as supervisor or committee member.

Workplace Learning and Social Change: Courses

Not all elective courses are offered each year. Visit the Workplace Learning and Social Change (WLSC) website for current course offerings.

Master's-Level Core Course

WPL1131H	Introduction to Workplace Learning and Social Change

Master's-Level Electives

The list of electives is subject to change.

IRE1362H	Organizational Behaviour
IRE1611H	Sociology of Work and Organizations
IRE1615H	Labour and Globalization
IRE1620H	Labour Relations Problems in Historical Perspective
LHA1113H	Gender and Race at Work
LHA1115H	Learning for the Global Economy
LHA1119H	Creating a Learning Organization
LHA1145H	Participatory Research in the Community and the Workplace
LHA1146H	Women, War, and Learning
LHA1147H	Women, Migration, and Work
LHA1148H	Introduction to Workplace, Organizational, and Economic Democracy
LHA1150H	Critical Perspectives on Organizational Change
LHA1182H	Nonprofits, Co-operatives, and the Social Economy: An Overview
LHA1185H	Leadership in Organizations: Changing Perspectives
LHA1186H	Organizational Change in the Nonprofit and Public Sectors
LHA1195H	Technology @ Work: The Internet in Workplace Learning and Change
LHA5100H*	Special Topics in Adult Education and Community Development (Master's Level)*
LHA5800H*	Special Topics in Higher Education: Master's Level*
SJE3916H	Women in Leadership Positions: Intersectionalities and Leadership Practices: Sociological Implications in Education
SJE5000H*	Special Topics in Social Justice Research in Education: Master's Level*
WGS 486 / WGS1020H*	Gender and Globalization: Transnational Perspectives
WPL2944H	Sociology of Learning and Social Movements

***Special topics courses: Only the special topics course titles listed can be counted toward the WLSC specialization requirements in the current year. Please confirm current year courses with the WLSC administrator.**

Doctoral-Level Core Course

WPL3931H	Advanced Studies in Workplace Learning and Social Change

Doctoral-Level Electives

The list of electives is subject to change. Doctoral students can select an elective course from the list above **or** take one of the following to meet their elective requirement:

LHA1108H	Adult Learning
LHA3183H	Introduction to Institutional Ethnography (RM)
LHA5105H	Special Topics in Adult Education and Community Development: Master's Level
LHA6100H*	Special Topics in Adult Education and Community Development: Doctoral Level*
WPL2944H	Sociology of Learning and Social Movements

***Special topics courses: Only the special topics course titles listed can be counted toward the WLSC specialization requirements in the current year. Please confirm current year courses with the WLSC administrator.**

Combined Degree Programs

The University of Toronto offers approximately 140 combined degree programs (CDPs). This program category allows a student to study in two approved degree programs at the same time and to complete the requirements of both, providing a distinctive academic benefit to the student either through academic enrichment or academic acceleration. CDPs build on a strong academic rationale or synergy between the programs in the combination.

CDPs may embody the following combinations:

- undergraduate / master's degree programs
- second-entry undergraduate / master's degree programs
- second-entry undergraduate / doctoral degree programs
- master's / master's degree programs

A CDP is an entity; the student is registered in a CDP as well as in the two participating degree programs. On successful completion of the CDP, the student receives two degrees.

UTM, Astronomical Sciences (Specialist), Honours Bachelor of Science / Master of Teaching

UTM Ast Sci (Spec) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTM, Honours Bachelor of Science, Specialist in Astronomical Sciences / Master of Teaching** (MT) is designed for students interested in studying the intersections of astronomy and education. Students may apply studies in these areas towards professional training leading to teacher certification.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a bachelor's degree from the University of Toronto Mississauga (UTM) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

For a general description of CDPs, see General Regulations section 1.4.3.

UTM Ast Sci (Spec) HBSc / MT: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTM Ast Sci (Spec) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Astronomical Sciences specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBSc program:

  - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the specialist in Astronomical Sciences, which fulfils the 6.0 FCEs required for Science-Physics as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the specialist in Astronomical Sciences, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc and MT degree programs.

5 and 6	Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTSC, Biochemistry (Major), Honours Bachelor of Science / Master of Teaching

UTSC Bch (Maj) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Major in Biochemistry / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTM, Biological Chemistry (Specialist), Honours Bachelor of Science / Master of Teaching

UTM Bio Chm (Spec) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTM, Honours Bachelor of Science, Specialist in Biological Chemistry / Master of Teaching** (MT) is designed for students interested in studying the intersections of chemistry and education. Students may apply studies in these areas towards professional training leading to teacher certification.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a bachelor's degree from the University of Toronto Mississauga (UTM) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

For a general description of CDPs, see General Regulations section 1.4.3.

UTM Bio Chm (Spec) HBSc / MT: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTM Bio Chm (Spec) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Biological Chemistry specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing to the HBSC program:

  - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the specialist in Biological Chemistry, which fulfils the 6.0 FCEs required for Science-Biology, Science-Chemistry, or Science-General as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the specialist in Biological Chemistry, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTSC, Biological Chemistry (Specialist), Honours Bachelor of Science / Master of Teaching

UTSC Bio Chm (Spec) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist in Biological Chemistry / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Bio (Maj) HBSc / MT: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTSC Bio (Maj) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Biology major program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.

- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the major in Biology, which fulfils the 6.0 FCEs required for Science-Biology as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the major in Biology, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc degree and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTM, Biology (Specialist), Honours Bachelor of Science / Master of Teaching

UTM Bio (Spec) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTM, Honours Bachelor of Science, Specialist in Biology / Master of Teaching** (MT) is designed for students interested in studying the intersections of biology and education. Students may apply studies in these areas towards professional training leading to teacher certification.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a bachelor's degree from the University of Toronto Mississauga (UTM) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

For a general description of CDPs, see General Regulations section 1.4.3.

UTM Bio (Spec) HBSc / MT: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTM Bio (Spec) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Biology specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBSc program:

  - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the specialist in Biology, which fulfils the 6.0 FCEs required for Science-Biology as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the specialist in Biology, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTM, Biology for Health Sciences (Major), Honours Bachelor of Science / Master of Teaching

UTM Bio Health Sci (Maj) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTM, Honours Bachelor of Science, Major in Biology for Health Sciences / Master of Teaching** (MT) is designed for students interested in studying the intersections of biology and education. Students may apply studies in these areas towards professional training leading to teacher certification.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a bachelor's degree from the University of Toronto Mississauga (UTM) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC, Chemistry (Major), Honours Bachelor of Science / Master of Teaching

UTSC Chm (Maj) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Major in Chemistry / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Chm (Maj Co-op) HBSc / MT: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTSC Chm (Maj Co-op) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Chemistry major co-op program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBSc program.
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the major co-op in Chemistry, which fulfils the 6.0 FCEs required for Science-Chemistry as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the major co-op in Chemistry, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTM, Chemistry (Specialist), Honours Bachelor of Science / Master of Teaching

UTM Chm (Spec) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTM, Honours Bachelor of Science, Specialist in Chemistry / Master of Teaching** (MT) is designed for students interested in studying the intersections of chemistry and education. Students may apply studies in these areas towards professional training leading to teacher certification.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a bachelor's degree from the University of Toronto Mississauga (UTM) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

For a general description of CDPs, see General Regulations section 1.4.3.

UTM Chm (Spec) HBSc / MT: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTM Chm (Spec) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Chemistry specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBSc program;

    - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2.
    - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
    - Complete the specialist in Chemistry, which fulfils the 6.0 FCEs required for Science-Chemistry as a first teaching subject.
    - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
        - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the specialist in Chemistry, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses are counted towards the completion of both the HBSc and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTSC, Chemistry (Specialist), Honours Bachelor of Science / Master of Teaching

UTSC Chm (Spec) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist in Chemistry / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the specialist in Comparative Physiology, which fulfils the 6.0 FCEs required for Science-Biology as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the specialist in Comparative Physiology, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc and MT degree programs.

5 and 6	• Remaining courses from Year 1 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTSC, Conservation and Biodiversity (Specialist), Honours Bachelor of Science / Master of Environmental Science

UTSC Cons Bio (Spec) HBSc / MEnvSc: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist in Conservation and Biodiversity / Master of Environmental Science** (MEnvSc) is designed for students interested in studying the intersections of environmental sciences with professional experiential preparation in emerging environmental challenges.

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and a Master of Environmental Science degree. Distinct advantages include:

- early application to the MEnvSc program (in Year 3) and conditional admission to the MEnvSc program;
- addressing demand from undergraduate students for further training in order to improve their level of competence as environmental practitioners; and
- the opportunity to enrol in the MEnvSc program in the Summer session between Years 4 and 5 in order to complete either a two-month academic or internship training, in addition to the mandatory four-month academic or internship opportunity completed by students in the MEnvSci program alone.

This CDP permits the completion of both degrees in five years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Cons Bio (Spec) HBSc / MEnvSc: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MEnvSc program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MEnvSc program; those accepted will receive a conditional offer to start the MEnvSc program upon completion of their HBSc program and degree requirements.

UTSC Cons Bio (Spec) HBSc / MEnvSc: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MEnvSc program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Conservation and Biodiversity specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MEnvSc program.
- Be enrolled full-time and in good standing in the HBSc program:

  - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Complete the following undergraduate courses (1.0 FCE) as part of the HBSc degree requirements:
  - BIOC63H3 *Conservation Biology* and
  - BIOD54H3 *Applied Conservation Biology*.

To be given **full, unconditional admission to the MEnvSc program**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a grade of B– in both of the graduate courses taken in Year 4 of undergraduate study, chosen in consultation with the graduate program supervisor, as indicated below for each MEnvSc field.
  - Climate Change Impacts and Adaptation field: EES1133H *Climate Change Science and Modelling* plus an additional 0.5 FCE.
  - Conservation and Biodiversity field: EES3002H *Conservation Policy* plus an additional 0.5 FCE.
  - Terrestrial and Aquatic Systems field: 1.0 FCE.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements

1 to 3	• HBSc degree requirements.	• The undergraduate degree will include the specialist in Conservation and Biodiversity.
		• By the end of Year 3, students will select one of the three fields of study within the MEnvSc program at the time of application:
		  ○ Climate Change Impacts and Adaptation;
		  ○ Conservation and Biodiversity; or
		  ○ Terrestrial and Aquatic Systems.

4	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements, including specific undergraduate courses for the CDP.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
		• Students who receive a conditional offer of admission to the CDP must complete the following undergraduate courses
		  ○ BIOC63H3 *Conservation Biology* (0.5 FCE) and
		  ○ BIOD54H3 *Applied Conservation Biology* (0.5 FCE).
		• Students must complete 1.0 FCE in graduate courses, chosen in consultation with the graduate program supervisor, as follows:
		  ○ Climate Change Impacts and Adaptation field: EES1133H *Climate Change Science and Modelling* (0.5 FCE) plus an elective (0.5 FCE);
		  ○ Conservation and Biodiversity field: EES3002H *Conservation Policy* (0.5 FCE) plus an elective (0.5 FCE);
		  ○ Terrestrial and Aquatic Systems field: 1.0 FCE.

Optional registration in the Summer session prior to Year 5	• Optional two-month academic or internship training.	• EES4001H *Internship Training 1* (0.5 FCE) **or** EES4003H *Academic Training 1* (0.5 FCE).

5	• Remaining courses from Year 1 and Year 2 of the MEnvSc program.	• Students registered in the optional Summer academic or internship training must complete 4.0 FCEs as follows:
		  ○ coursework (2.0 FCEs) and internship (2.0 FCEs) **or**
		  ○ coursework (2.5 FCEs) and research paper (1.5 FCEs).
		• Students not registered in the optional Summer academic or internship training must complete 4.5 FCEs as follows:
		  ○ internship option: coursework (2.5 FCEs) and internship (2.0 FCEs) **or**
		  ○ research option: coursework (3.0 FCEs) and research paper (1.5 FCEs).

UTSC, Conservation and Biodiversity (Major), Honours Bachelor of Science / Master of Teaching

UTSC Cons Bio (Maj) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Major in Conservation and Biodiversity / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Cons Bio (Maj) HBSc / MT: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTSC Cons Bio (Maj) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Conservation and Biodiversity major program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the major in Conservation and Biodiversity, which fulfils the 6.0 FCEs required for Science-Biology as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the major in Conservation and Biodiversity, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc degree and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTSC, Conservation and Biodiversity (Specialist), Honours Bachelor of Science / Master of Teaching

UTSC Cons Bio (Spec) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist in Conservation and Biodiversity / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Cons Bio (Spec) HBSc / MT: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTSC Cons Bio (Spec) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Conservation and Biodiversity specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the specialist in Conservation and Biodiversity, which fulfils the 6.0 FCEs required for Science-Biology as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the specialist in Conservation and Biodiversity, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc degree and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTM, Ecology and Evolution (Specialist), Honours Bachelor of Science / Master of Teaching

UTM Eco Evo (Spec) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTM, Honours Bachelor of Science, Specialist in Ecology and Evolution / Master of Teaching** (MT) is designed for students interested in studying the intersections of biology and education. Students may apply studies in these areas towards professional training leading to teacher certification.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a bachelor's degree from the University of Toronto Mississauga (UTM) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

For a general description of CDPs, see General Regulations section 1.4.3.

STG, Engineering, Bachelor of Applied Science / Management, Master of Business Administration

STG Eng BASc / MBA: Introduction

Overview

The Jeffrey Skoll Combined Bachelor of Applied Science in Engineering / Management, Master of Business Administration, established by the Faculty of Applied Science and Engineering and the Rotman School of Management, provides a fast track for students to earn their bachelor's degree in engineering and an MBA in six years and eight months.

For a general description of CDPs, see General Regulations section 1.4.3.

Contact

Master of Business Administration Program
Rotman School of Management
Email: mba@rotman.utoronto.ca

STG Eng BASc / MBA: Application Process

- Applicants must apply to both the BASc program and the MBA program as specified in the admission requirements.
- Applicants must gain independent admission to both the BASc and MBA programs before they may be considered for admission to the CDP.
- BASc students may apply to the CDP in Year 4.

STG Eng BASc / MBA: Requirements

Minimum Admission Requirements

- Applicants must meet the admission requirements of the BASc program, the School of Graduate Studies, and the MBA program.
  - Note: graduates of the BASc program who have completed the Professional Experience Year (PEY) internship need not meet the recommended MBA admission requirement of at least two years of full-time work experience.
- Applicants need a minimum B+ average in each of the following four sessions: 2F, 2W, 3F, 3W. Students with one session slightly below B+ who meet all other entrance parameters are welcome to apply.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1 to 5	• BASc program and degree requirements. • Professional Experience Year (PEY) internship.	• Complete 20.0 full-course equivalents (FCEs) in BASc program and degree requirements • In Year 4, apply to the CDP and MBA programs. • Normally, after Year 3, complete the 16-month PEY internship in a business or not-for-profit setting. Students may opt to complete the PEY after Year 2.
6 and 7	• In Years 6 and 7, register for the MBA program and complete the MBA program requirements.	• Students complete all the full-time MBA program requirements as detailed in the Management, Rotman School calendar entry.

STG, English (Major), Honours Bachelor of Arts / Master of Teaching

STG Eng (Maj) HBA / MT: Introduction

Overview

The **Combined Degree Program (CDP): STG, Honours Bachelor of Arts, Major in English / Master of Teaching** (MT) is designed for students interested in studying the intersections of English and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a bachelor's degree from the Faculty of Arts and Science and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE), St. George (STG) campus. They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in their final year of study in the HBA program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which applicants are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the major in English, which fulfils the 6.0 FCEs required for English as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBA academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBA degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBA degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the minor in Education and Society;
		  ○ a minimum of 6.0 FCEs as part of the English major requirements, which will also qualify as prerequisite courses in the first teaching subject; and
		• a second minor, which will also qualify as the minimum of 3.0 FCEs in the second teaching subject[1].
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCE in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBA and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTSC, English (Major), Honours Bachelor of Arts / Master of Teaching

UTSC Eng (Maj) HBA / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Arts, Major in English / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

UTSC Eng (Maj) HBA / MT: Application Process

- Applicants must apply to the Honours Bachelor of Arts (HBA) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBA degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBA program and degree requirements.

UTSC Eng (Maj) HBA / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBA degree program and the English major program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBA program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBA program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which applicants are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the major in English, which fulfils the 6.0 FCEs required for English as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBA academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBA degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBA degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the major in English, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBA degree and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTSC, English (Major Co-op), Honours Bachelor of Arts / Master of Teaching

UTSC Eng (Maj Co-op) HBA / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Arts, Major Co-op in English / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Eng (Maj Co-op) HBA / MT: Application Process

- Applicants must apply to the Honours Bachelor of Arts (HBA) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBA degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBA program and degree requirements.

UTSC Eng (Maj Co-op) HBA / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBA degree program and the English major co-op program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBA program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBA program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the major co-op in English, which fulfils the 6.0 FCEs required for English as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBA academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBA degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBA degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the major co-op in English, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).

UTSC Env Bio (Spec) HBSc / Chem MEng: Application Process

- UTSC students in Year 3 of the Honours Bachelor of Science (HBSc) program in Environmental Biology (Specialist) who are interested in the CDP must contact Professor M. Meriano before the end of the Fall session.
- Qualified UTSC students will be able to apply to the CDP.
- UTSC students who are accepted to the CDP will receive a conditional offer to start the Master of Engineering (MEng) program upon completion of their HBSc program requirements.

UTSC Env Bio (Spec) HBSc / Chem MEng: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MEng program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc program and Environmental Biology specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MEng program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).

To be given **full, unconditional admission to the MEng program in Chemical Engineering and Applied Chemistry**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in Year 3 and Year 4 of their HBSc program.
- Complete two prescribed undergraduate engineering half courses (1.0 FCE) as part of the HBSc degree requirements.
- Students who choose the option of taking up to 1.0 FCE in graduate courses in Year 4 must achieve a minimum grade of B–. These courses can be counted towards the completion of the HBSc degree requirements and the MEng program and degree requirements.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1 to 4	• HBSc degree requirements. • By the end of Year 4, fulfill both the undergraduate program requirements and the undergraduate degree requirements. • Between Years 4 and 5, eligible students may begin the MEng program in the Summer session.	• Students are expected to carry a course load of 5.0 full-course equivalents (FCEs) over the three academic sessions (Fall, Winter, Summer) of each year. • In Year 3, qualified students may apply to the CDP and may be offered conditional admission to the MEng program. • In Year 4, students who receive a conditional offer of admission to the CDP and MEng program **must** complete 1.0 FCE in prescribed undergraduate engineering courses offered by the Faculty of Applied Science and Engineering. These courses can be counted towards the completion of the HBSc degree requirements. • In Year 4, students who receive a conditional offer of admission to the CDP and MEng program **may** complete up to 1.0 FCE in graduate courses with the permission of the Chemical Engineering and Applied Chemistry Department; students are graded as graduate students and must achieve a minimum grade of B–. These courses can be counted towards the completion of the HBSc degree requirements and the MEng program and degree requirements.
5	• Remaining MEng program requirements.	• Conditions of admission are removed. • Complete 5.0 FCEs in MEng courses. Students who have completed up to 1.0 credit in MEng courses in Year 4 may subtract those courses from the total 5.0 FCEs required.

UTSC Env Bio (Spec) HBSc / Civ MEng: Application Process

- UTSC students in Year 3 of the Honours Bachelor of Science (HBSc) program in Environmental Biology (Specialist) who are interested in the CDP must contact Professor M. Meriano before the end of the Fall session.
- Qualified UTSC students will be able to apply to the CDP.
- UTSC students who are accepted to the CDP will receive a conditional offer to start the Master of Engineering (MEng) program upon completion of their HBSc program requirements.

UTSC Env Bio (Spec) HBSc / Civ MEng: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MEng program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc program and Environmental Biology specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MEng program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).

To be given **full, unconditional admission to the MEng program in Civil Engineering**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in Year 3 and Year 4 of their HBSc program.
- Complete two prescribed undergraduate engineering half courses (1.0 FCE) as part of the HBSc degree requirements.
- Students who choose the option of taking up to 1.0 FCE in graduate courses in Year 4 must achieve a minimum grade of B–. These courses can be counted towards the completion of the HBSc degree requirements and the MEng program and degree requirements.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1 to 4	• HBSc degree requirements. • By the end of Year 4, fulfil both the undergraduate program requirements and the undergraduate degree requirements. • Between Years 4 and 5, eligible students may begin the MEng program in the Summer session.	• Students are expected to carry a course load of 5.0 full-course equivalents (FCEs) over the three academic sessions (Fall, Winter, Summer) of each year. • In Year 3, qualified students may apply to the CDP and may be offered conditional admission to the MEng program. • In Year 4, students who receive a conditional offer of admission to the CDP and MEng program **must** complete 1.0 FCE in prescribed undergraduate engineering courses offered by the Faculty of Applied Science and Engineering. These courses can be counted towards the completion of the HBSc degree requirements. • In Year 4, students who receive a conditional offer of admission to the CDP and MEng program **may** complete up to 1.0 FCE in graduate courses with the permission of the Civil Engineering Department; students are graded as graduate students and must achieve a minimum grade of B–. These courses can be counted towards the completion of the HBSc degree requirements and the MEng program and degree requirements.
5	• Remaining MEng program requirements.	• Conditions of admission are removed. • Complete 5.0 FCEs in MEng courses. Students who have completed up to 1.0 credit in MEng courses in Year 4 may subtract those courses from the total 5.0 FCEs required.

UTSC, Environmental Biology (Specialist), Honours Bachelor of Science / Master of Environmental Science

UTSC Env Bio (Spec) HBSc / MEnvSc: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist in Environmental Biology / Master of Environmental Science** (MEnvSc) is designed for students interested in studying the intersections of environmental sciences with professional experiential preparation in emerging environmental challenges.

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and a Master of Environmental Science degree. Distinct advantages include:

- early application to the MEnvSc program (in Year 3) and conditional admission to the MEnvSc program;
- addressing demand from undergraduate students for further training in order to improve their level of competence as environmental practitioners; and
- the opportunity to enrol in the MEnvSc program in the Summer session between Years 4 and 5 in order to complete either a two-month academic or internship training, in addition to the mandatory four-month academic or internship opportunity completed by students in the MEnvSci program alone.

This CDP permits the completion of both degrees in five years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Env Bio (Spec) HBSc / MEnvSc: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MEnvSc program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MEnvSc program; those accepted will receive a conditional offer to start the MEnvSc program upon completion of their HBSc program and degree requirements.

UTSC Env Bio (Spec) HBSc / MEnvSc: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MEnvSc program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Environmental Biology specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MEnvSc program.
- Be enrolled full-time and in good standing in the HBSc program:
- Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2.
- Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Complete the following undergraduate courses (1.5 FCEs) as part of the HBSc degree requirements:
  - EESC24H3 *Advanced Reading* (can be taken in Year 3 of the HBSc program).
  - EESD10Y3 *Research Project in Environmental Science*.

To be given **full, unconditional admission to the MEnvSc program**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a grade of B– in both of the graduate courses taken in Year 4 of undergraduate study, chosen in consultation with the graduate program supervisor, as indicated below for each MEnvSc field:
  - Climate Change Impacts and Adaptation field: EES1133H *Climate Change Science and Modelling* plus an additional 0.5 FCE.
  - Conservation and Biodiversity field: EES3002H *Conservation Policy* plus an additional 0.5 FCE.
  - Terrestrial and Aquatic Systems field: 1.0 FCE.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements

1 to 3	HBSc degree requirements.	• The undergraduate degree will include the specialist in Environmental Biology.
		• By the end of Year 3, students will select one of the three fields of study within the MEnvSc program at the time of application:
		  ○ Climate Change Impacts and Adaptation;
		  ○ Conservation and Biodiversity; or
		  ○ Terrestrial and Aquatic Systems.

4	By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements, including specific undergraduate courses for the CDP.
	
	In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
		• Students who receive a conditional offer of admission to the CDP must complete the following undergraduate courses:
		  ○ EESC24H3 *Advanced Reading* (0.5 FCE) and
		  ○ EESD10Y3 *Research Project in Environmental Science* (1.0 FCE).
		• Students must complete 1.0 FCE in graduate courses, chosen in consultation with the graduate program supervisor, as follows:
		  ○ Climate Change Impacts and Adaptation field: EES1133H *Climate Change Science and Modelling* (0.5 FCE) plus an elective (0.5 FCE);
		  ○ Conservation and Biodiversity field: EES3002H *Conservation Policy* (0.5 FCE) plus an elective (0.5 FCE);
		  ○ Terrestrial and Aquatic Systems field: 1.0 FCE.

Optional registration in the Summer session prior to Year 5	Optional two-month academic or internship training.	• EES4001H *Internship Training 1* (0.5 FCE) **or** EES4003H *Academic Training 1* (0.5 FCE).

5	Remaining courses from Year 1 and Year 2 of the MEnvSc program.	• Students registered in the optional Summer academic or internship training must complete 4.0 FCEs as follows:
		  ○ coursework (2.0 FCEs) and internship (2.0 FCEs) **or**
		  ○ coursework (2.5 FCEs) and research paper (1.5 FCEs).
		• Students **not** registered in the optional Summer academic or internship training must complete 4.5 FCEs as follows:
		  ○ internship option: coursework (2.5 FCEs) and internship (2.0 FCEs) **or**
		  ○ research option: coursework (3.0 FCEs) and research paper (1.5 FCEs).

		  ○ research option: coursework (3.0 FCEs) and research paper (1.5 FCEs).

UTSC, Environmental Biology (Specialist), Honours Bachelor of Science / Master of Teaching

UTSC Env Bio (Spec) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist in Environmental Biology / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Env Bio (Spec) HBSc / MT: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTSC Env Bio (Spec) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Environmental Biology specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the specialist in Environmental Biology, which fulfils the 6.0 FCEs required for Science-Biology as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the specialist in Environmental Biology, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc degree and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTSC, Environmental Biology (Specialist Co-op), Honours Bachelor of Science / Master of Teaching

UTSC Env Bio (Spec Co-op) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist Co-op in Environmental Biology / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the specialist co-op in Environmental Biology, which fulfils the 6.0 FCEs required for Science-Biology as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the specialist co-op in Environmental Biology, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc degree and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.

UTSC Env Chm (Spec) HBSc / Chem MEng: Application Process

- UTSC students in Year 3 of the Honours Bachelor of Science (HBSc) program in Environmental Chemistry (Specialist) who are interested in the CDP must contact Professor M. Meriano before the end of the Fall session.
- Qualified UTSC students will be able to apply to the CDP.
- UTSC students who are accepted to the CDP will receive a conditional offer to start the Master of Engineering (MEng) program upon completion of their HBSc program requirements.

UTSC Env Chm (Spec) HBSc / Chem MEng: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MEng program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc program and Environmental Chemistry specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MEng program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2;
  - Carry a full course load of 5.0 FCEs each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).

To be given **full, unconditional admission to the MEng program in Chemical Engineering and Applied Chemistry**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in Year 3 and Year 4 of their HBSc program.
- Complete two prescribed undergraduate engineering half courses (1.0 FCE) as part of the HBSc degree requirements.
- Students who choose the option of taking up to 1.0 FCE in graduate courses in Year 4 must achieve a minimum grade of B–. These courses can be counted towards the completion of the HBSc degree requirements and the MEng program and degree requirements.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1 to 4	• HBSc degree requirements. • By the end of Year 4, fulfil both the undergraduate program requirements and the undergraduate degree requirements. • Between Years 4 and 5, eligible students may begin the MEng program in the Summer session.	• Students are expected to carry a course load of 5.0 full-course equivalents (FCEs) over the three academic sessions (Fall, Winter, Summer) of each year. • In Year 3, qualified students may apply to the CDP and may be offered conditional admission to the MEng program. • In Year 4, students who receive a conditional offer of admission to the CDP and MEng program must complete 1.0 FCE in prescribed undergraduate engineering courses offered by the Faculty of Applied Science and Engineering. These courses can be counted towards the completion of the HBSc degree requirements. • In Year 4, students who receive a conditional offer of admission to the CDP and MEng program may complete up to 1.0 FCE in graduate courses offered by the Chemical Engineering and Applied Chemistry Department; students are graded as graduate students and must achieve a minimum grade of B–. These courses can be counted towards the completion of the MEng program and degree requirements.
5	• Remaining MEng program requirements.	• Conditions of admission are removed. • Complete 5.0 FCEs in MEng courses. Students who have completed up to 1.0 credit in MEng courses in Year 4 may subtract those courses from the total 5.0 FCEs required.

UTSC, Environmental Chemistry (Specialist), Honours Bachelor of Science / Master of Environmental Science

UTSC Env Chm (Spec) HBSc / MEnvSc: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist in Environmental Chemistry / Master of Environmental Science** (MEnvSc) is designed for students interested in studying the intersections of environmental sciences with professional experiential preparation in emerging environmental challenges.

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and a Master of Environmental Science degree. Distinct advantages include:

- early application to the MEnvSc program (in Year 3) and conditional admission to the MEnvSc program;
- addressing demand from undergraduate students for further training in order to improve their level of competence as environmental practitioners; and
- the opportunity to enrol in the MEnvSc program in the Summer session between Years 4 and 5 in order to complete either a two-month academic or internship training, in addition to the mandatory four-month academic or internship opportunity completed by students in the MEnvSc program alone.

This CDP permits the completion of both degrees in five years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Env Chm (Spec) HBSc / MEnvSc: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MEnvSc program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MEnvSc program; those accepted will receive a conditional offer to start the MEnvSc program upon completion of their HBSc program and degree requirements.

UTSC Env Chm (Spec) HBSc / MEnvSc: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MEnvSc program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Environmental Chemistry specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MEnvSc program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2;
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Complete the following undergraduate courses (1.5 FCEs) as part of the HBSc degree requirements:
  - EESC24H3 *Advanced Reading* (can be taken in Year 3 of the HBSc program);
  - EESD10Y3 *Research Project in Environmental Science*.

To be given **full, unconditional admission to the MEnvSc program**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a grade of B– in both of the graduate courses taken in Year 4 of undergraduate study, chosen in consultation with the graduate program supervisor, as indicated below for each MEnvSc field:
  - Climate Change Impacts and Adaptation field: EES1133H *Climate Change Science and Modelling* plus an additional 0.5 FCE;
  - Conservation and Biodiversity field: EES3002H *Conservation Policy* plus an additional 0.5 FCE;
  - Terrestrial and Aquatic Systems field: 1.0 FCE.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements

1 to 3	• HBSc degree requirements.	• The undergraduate degree will include the specialist in Environmental Chemistry.
		• By the end of Year 3, students will select one of the three fields of study within the MEnvSc program at the time of application:
		  ○ Climate Change Impacts and Adaptation;
		  ○ Conservation and Biodiversity; or
		  ○ Terrestrial and Aquatic Systems.

4	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements, including specific undergraduate courses for the CDP.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
		• Students who receive a conditional offer of admission to the CDP must complete the following undergraduate courses:
		  ○ EESC24H3 *Advanced Reading* (0.5 FCE) and
		  ○ EESD10Y3 *Research Project in Environmental Science* (1.0 FCE).
		• Students must complete 1.0 FCE in graduate courses, chosen in consultation with the graduate program supervisor, as follows:
		  ○ Climate Change Impacts and Adaptation field: EES1133H *Climate Change Science and Modelling* (0.5 FCE) plus an elective (0.5 FCE);
		  ○ Conservation and Biodiversity field: EES3002H *Conservation Policy* (0.5 FCE) plus an elective (0.5 FCE);
		  ○ Terrestrial and Aquatic Systems field: 1.0 FCE.

Optional registration in the Summer session prior to Year 5	• Optional two-month academic or internship training.	• EES4001H *Internship Training 1* (0.5 FCE) **or** EES4003H *Academic Training 1* (0.5 FCE).

5	• Remaining courses from Year 1 and Year 2 of the MEnvSc program.	• Students registered in the optional Summer academic or internship training must complete 4.0 FCEs as follows:
		  ○ coursework (2.0 FCEs) and internship (2.0 FCEs) **or**
		  ○ coursework (2.5 FCEs) and research paper (1.5 FCEs).
		• Students **not** registered in the optional Summer academic or internship training must complete 4.5 FCEs as follows:
		  ○ internship option: coursework (2.5 FCEs) and internship (2.0 FCEs) **or**
		  ○ research option: coursework (3.0 FCEs) and research paper (1.5 FCEs).

Year	Progression	Specific Requirements

1 to 3	• HBSc degree requirements.	• The undergraduate degree will include the specialist co-op in Environmental Chemistry.
		• By the end of Year 3, students will select one of the three fields of study within the MEnvSc program at the time of application:
		  ○ Climate Change Impacts and Adaptation;
		  ○ Conservation and Biodiversity; or
		  ○ Terrestrial and Aquatic Systems.

4	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements, including specific undergraduate courses for the CDP.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
		• Students who receive a conditional offer of admission to the CDP must complete the following undergraduate courses:
		  ○ EESC24H3 *Advanced Reading* (0.5 FCE) and
		  ○ EESD10Y3 *Research Project in Environmental Science* (1.0 FCE).
		• Students must complete 1.0 FCE in graduate courses, chosen in consultation with the graduate program supervisor, as follows:
		  ○ Climate Change Impacts and Adaptation field: EES1133H *Climate Change Science and Modelling* (0.5 FCE) plus an elective (0.5 FCE);
		  ○ Conservation and Biodiversity field: EES3002H *Conservation Policy* (0.5 FCE) plus an elective (0.5 FCE);
		  ○ Terrestrial and Aquatic Systems field: 1.0 FCE.

Optional registration in the Summer session prior to Year 5	• Optional two-month academic or internship training.	• EES4001H *Internship Training 1* (0.5 FCE) **or** EES4003H *Academic Training 1* (0.5 FCE).

5	• Remaining courses from Year 1 and Year 2 of the MEnvSc program.	• Students registered in the optional Summer academic or internship training must complete 4.0 FCEs as follows:
		  ○ coursework (2.0 FCEs) and internship (2.0 FCEs) **or**
		  ○ coursework (2.5 FCEs) and research paper (1.5 FCEs).
		• Students **not** registered in the optional Summer academic or internship training must complete 4.5 FCEs as follows:
		  ○ internship option: coursework (2.5 FCEs) and internship (2.0 FCEs) **or**
		  ○ research option: coursework (3.0 FCEs) and research paper (1.5 FCEs).

UTSC, Environmental Chemistry (Specialist), Honours Bachelor of Science / Master of Teaching

UTSC Env Chm (Spec) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist in Environmental Chemistry / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Env Chm (Spec) HBSc / MT: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTSC Env Chm (Spec) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Environmental Chemistry specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the specialist in Environmental Chemistry, which fulfils the 6.0 FCEs required for Science-Chemistry as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• · By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		• the specialist in Environmental Chemistry, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		  ○ By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.

UTSC Env Geo (Spec) HBSc / Chem MEng: Application Process

- UTSC students in Year 3 of the Honours Bachelor of Science (HBSc) program in Environmental Geoscience (Specialist) who are interested in the CDP must contact Professor M. Meriano before the end of the Fall session.
- Qualified UTSC students will be able to apply to the CDP.
- UTSC students who are accepted to the CDP will receive a conditional offer to start the Master of Engineering (MEng) program upon completion of their HBSc program requirements.

UTSC Env Geo (Spec) HBSc / Chem MEng: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MEng program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc program and Environmental Geoscience specialist program.
- Meet the admission requirements of School of Graduate Studies and the MEng program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average (CGPA of 3.3) or higher in Year 2;
  - Carry a full course load of 5.0 FCEs each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).

To be given **full, unconditional admission to the MEng program in Chemical Engineering and Applied Chemistry**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in Year 3 and Year 4 of their HBSc program.
- Complete two prescribed undergraduate engineering half courses (1.0 FCE) as part of the HBSc degree requirements.
- Students who choose the option of completing up to 1.0 FCE in graduate courses in Year 4 must achieve a minimum grade of B–. These courses can be counted towards the completion of the HBSc degree requirements and the MEng program and degree requirements.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1 to 4	• HBSc degree requirements. • By the end of Year 4, fulfil both the undergraduate program requirements and the undergraduate degree requirements. • Between Years 4 and 5, eligible students may begin the MEng program in the Summer session.	• · Students are expected to carry a course load of **5.0 full-course equivalents (FCEs)** over the three academic sessions (Fall, Winter, Summer) of each year. • · In Year 3, qualified students may apply to the CDP and may be offered conditional admission to the MEng program. • · In Year 4, students who receive a conditional offer of admission to the CDP and MEng program **must** complete 1.0 FCE in prescribed undergraduate engineering courses offered by the Faculty of Applied Science and Engineering. These courses can be counted towards the completion of the HBSc degree requirements. • In Year 4, students who receive a conditional offer of admission to the CDP and MEng program **may** complete up to 1.0 FCE in graduate courses with the permission of the Chemical Engineering and Applied Chemistry Department; students are graded as graduate students and must achieve a minimum grade of B–. These courses can be counted towards the completion of the HBSc degree requirements and the MEng program and degree requirements.
5	• Remaining MEng program requirements.	• Conditions of admission are removed. • Complete 5.0 FCEs in MEng courses. Students who have completed up to 1.0 credit in MEng courses in Year 4 may subtract those courses from the total 5.0 FCEs required.

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1 to 4	• HBSc degree requirements. • By the end of Year 4, fulfil both the undergraduate program requirements and the undergraduate degree requirements. • Between Years 4 and 5, eligible students may begin the MEng program in the Summer session.	• Students are expected to carry a course load of **5.0 full-course equivalents (FCEs)** over the three academic sessions (Fall, Winter, Summer) of each year. • In Year 3, qualified students may apply to the CDP and may be offered conditional admission to the MEng program. • In Year 4, students who receive a conditional offer of admission to the CDP and MEng program **must** complete 1.0 FCE in prescribed undergraduate engineering courses offered by the Faculty of Applied Science and Engineering. These courses can be counted towards the completion of the HBSc degree requirements. • In Year 4, students who receive a conditional offer of admission to the CDP and MEng program **may** complete up to 1.0 FCE in graduate courses with the permission of the Civil Engineering Department; students are graded as graduate students and must achieve a minimum grade of B–. These courses can be counted towards the completion of the HBSc degree requirements and the MEng program and degree requirements.
5	• Remaining MEng program requirements.	• Conditions of admission are removed. • Complete 5.0 FCEs in MEng courses. Students who have completed up to 1.0 FCE in MEng courses in Year 4 may subtract those courses from the total 5.0 FCEs required.

UTSC, Environmental Geoscience (Specialist), Honours Bachelor of Science / Master of Environmental Science

UTSC Env Geo (Spec) HBSc / MEnvSc: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist in Environmental Geoscience / Master of Environmental Science** (MEnvSc) is designed for students interested in studying the intersections of environmental sciences with professional experiential preparation in emerging environmental challenges.

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and a Master of Environmental Science degree. Distinct advantages include:

- early application to the MEnvSc program (in Year 3) and conditional admission to the MEnvSc program;
- addressing demand from undergraduate students for further training in order to improve their level of competence as environmental practitioners; and
- the opportunity to enrol in the MEnvSc program in the Summer session between Years 4 and 5 in order to complete either a two-month academic or internship training, in addition to the mandatory four-month academic or internship opportunity completed by students in the MEnvSc program alone.

This CDP permits the completion of both degrees in five years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Env Geo (Spec) HBSc / MEnvSc: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MEnvSc program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MEnvSc program; those accepted will receive a conditional offer to start the MEnvSc program upon completion of their HBSc program and degree requirements.

UTSC Env Geo (Spec) HBSc / MEnvSc: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MEnvSc program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Environmental Geoscience specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MEnvSc program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2;
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Complete the following undergraduate courses (1.5 FCEs) as part of the HBSc degree requirements:
  - EESC24H3 *Advanced Reading* (can be taken in Year 3 of the HBSc program);
  - EESD10Y3 *Research Project in Environmental Science*.

To be given **full, unconditional admission to the MEnvSc program**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses;
- Achieve at least a grade of B– in both of the graduate courses taken in Year 4 of undergraduate study, chosen in consultation with the graduate program supervisor, as indicated below for each MEnvSc field:
  - Climate Change Impacts and Adaptation field: EES1133H *Climate Change Science and Modelling* plus an additional 0.5 FCE;
  - Conservation and Biodiversity field: EES3002H *Conservation Policy* plus an additional 0.5 FCE;
  - Terrestrial and Aquatic Systems field: 1.0 FCE.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements

1 to 3	• HBSc degree requirements.	• The undergraduate degree will include the specialist in Environmental Geoscience.
		• By the end of Year 3, students will select one of the three fields of study within the MEnvSc program at the time of application:
		  ○ Climate Change Impacts and Adaptation;
		  ○ Conservation and Biodiversity; or
		  ○ Terrestrial and Aquatic Systems.

4	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements, including specific undergraduate courses for the CDP.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
		• Students who receive a conditional offer of admission to the CDP must complete the following undergraduate courses:
		  ○ EESC24H3 *Advanced Reading* (0.5 FCE) and
		  ○ EESD10Y3 *Research Project in Environmental Science* (1.0 FCE).
		• Students must complete 1.0 FCE in graduate courses, chosen in consultation with the graduate program supervisor, as follows:
		  ○ Climate Change Impacts and Adaptation field: EES1133H *Climate Change Science and Modelling* (0.5 FCE) plus an elective (0.5 FCE);
		  ○ Conservation and Biodiversity field: EES3002H *Conservation Policy* (0.5 FCE) plus an elective (0.5 FCE);
		  ○ Terrestrial and Aquatic Systems field: 1.0 FCE.

Optional registration in the Summer session prior to Year 5	• Optional two-month academic or internship training.	• EES4001H *Internship Training 1* (0.5 FCE) **or** EES4003H *Academic Training 1* (0.5 FCE).

5	• Remaining courses from Year 1 and Year 2 of the MEnvSc program.	• Students registered in the optional Summer academic or internship training must complete 4.0 FCEs as follows:
		  ○ coursework (2.0 FCEs) and internship (2.0 FCEs) **or**
		  ○ coursework (2.5 FCEs) and research paper (1.5 FCEs).
		• Students not registered in the optional Summer academic or internship training must complete 4.5 FCEs as follows:
		  ○ internship option: coursework (2.5 FCEs) and internship (2.0 FCEs) **or**
		  ○ research option: coursework (3.0 FCEs) and research paper (1.5 FCEs).

UTSC, Environmental Geoscience (Specialist Co-op), Honours Bachelor of Science / Master of Environmental Science

UTSC Env Geo (Spec Co-op) HBSc / MEnvSc: Introduction

		• Students not registered in the optional Summer academic or internship training must complete 4.5 FCEs as follows:
		  ○ internship option: coursework (2.5 FCEs) and internship (2.0 FCEs) **or**
		  ○ research option: coursework (3.0 FCEs) and research paper (1.5 FCEs).

UTM, Environmental Management (Major), Honours Bachelor of Arts / Sustainability Management, Master of Science

UTM Env Mgt (Maj) HBA / MScSM: Introduction

Overview

The **Combined Degree Program (CDP): UTM, Honours Bachelor of Arts, Major in Environmental Management / Master of Science in Sustainability Management** allows students to complete an undergraduate degree with an early conditional admission offer to the Master of Science in Sustainability Management (MScSM) program in their final year of study.

Although there is no acceleration in time to completion in this CDP, students will benefit from early admission to the MScSM program, early exposure to graduate-level courses, and a reduced course load while completing their MScSM degree.

For a general description of CDPs, see General Regulations section 1.4.3.

UTM Env Mgt (Maj) HBA / MScSM: Application Process

- Applicants apply to the Honours Bachelor of Arts (HBA) program, the MScSM program, and the CDP.
- Applicants must gain independent admission to both the HBA and MScSM programs before they may be considered for admission to the CDP.
- Applicants apply to the CDP at the end of Year 3 of undergraduate study.
- Applicants apply and interview for early conditional admission to the MScSM program.

UTM Env Mgt (Maj) HBA / MScSM: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MScSM program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBA degree program and the Environmental Management major program.
- Meet the admission requirements of the School of Graduate Studies and the MScSM program.
- Be enrolled full-time and in good standing in the HBA program:
  - Have either completed or are currently enrolled in a minimum of 15.0 total full-course equivalents (FCEs).
  - Have a minimum annual grade point average (AGPA) of 3.7 in their most recent 5.0 FCEs.

To be given **full, unconditional admission to the MScSM program**, applicants must meet the following admission requirements:

- Be conferred with the HBA degree.
- Successfully complete 1.0 graduate FCE in MScSM courses.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1	• Normally, 5.0 full-course equivalents (FCEs) towards the HBA program requirements.	• Students must complete a minimum of **2.0 FCEs** in core courses: ○ Introduction: ENV100Y5 (1.0 FCE). ○ Foundation: 1.0 FCE chosen from ANT102H5, ECO100Y5, GGR111H5, PHL105Y5, POL112H5, POL113H5, POL114H5, SOC100H5.
2	• Normally, 5.0 FCEs towards the HBA program requirements.	• Students must complete a minimum of **2.5 FCEs** in core courses: ○ Environmental Management: ENV201H5 (0.5 FCE). ○ Social Science/Humanities: 1.0 FCE chosen from ANT204Y5, ANT241Y5, ENG259H5, ENV250Y5, GGR202H5, GGR207H5, GGR208H5, GGR209H5, GGR210H5, GGR267H5, GGR269H5, GGR278H5, GGR288H5, PHL273H5. ○ Science: 0.5 FCE chosen from BIO205H5, ERS201H5, GGR201H5, GGR214H5, GGR217H5, GGR227H5, PHY237H5. ○ Analytical and Research Methods: 0.5 FCE chosen from GGR276H5, GGR277H5, GGR278H5, STA220H5, or another program-relevant 200/300-level research methods course, with the program advisor's permission.
3 and 4	• Normally, 5.0 FCEs each year towards the HBA program requirements. • In order to be eligible for the CDP, students must have completed a minimum of 15.0 FCEs by the end of Year 3. • Students must complete all HBA program requirements (20.0 FCEs) by the end of Year 4, in order to fulfil the conditions of the MScSM offer.	• Students must complete a minimum of **3.5 FCEs** in core courses: ○ Environmental Management Perspectives: 1.0 FCE chosen from ANT357H5, ENV310H5, ENV393H5, HIS318H5, HIS319H5. ○ Social, Economic, and Policy Perspectives: 1.5 FCEs chosen from ANT357H5, ANT368H5, ANT370H5, ECO373H5, ENV310H5, ENV320H5, ENV345H5, ENV351H5, ENV420H5, ENV425H5, ENV452H5, GGR318H5, GGR329H5, GGR333H5, GGR348H5, GGR349H5, GGR361H5, GGR365H5, GGR370H5, GGR418H5, GGR419H5, GGR425H5, GGR426H5, JGE378H5, MGT394H5, PHL373H1, POL343Y5, SOC339H5, SOC349H5, SOC356H5, WRI375H5. ○ Scientific Perspectives: 0.5 FCE chosen from BIO333H5, BIO464H5, ENV495H5, ENV496H5, ERS313H5, ERS315H5, ERS321H5, GGR305H5, GGR307H5, GGR309H5, GGR311H5, GGR317H5, GGR337H5, GGR374H5, GGR377H5, GGR384H5, GGR484H5; JGE378H5, SCI395H5, SCI396H5. ○ Field, Project-Based, and Research Perspectives: 0.5 FCE chosen from ENV299Y5, ENV331H5, ENV332H5, ENV399Y5, GGR379H5, GGR389H5, JEG400Y5, JEG401Y5, or another program-relevant field, experiential, or research course, with the program advisor's permission. • Students apply to the CDP and MScSM program at the end of Year 3. Students accepted to the CDP will receive a conditional offer of admission to the MScSM program. • In Year 4, students complete 1.0 FCE in MScSM courses, chosen from EES1124H, EES1125H, ENV1002H, ENV1704H, ENV1707H, SSM1010Y, SSM1020H, SSM1030H, SSM1040H, SSM1050H, SSM1060H, SSM1070H, SSM1080H, SSM2010H, SSM2020H, or another program-relevant graduate course with the MScSM program director's permission.

		• Once accepted to the CDP, students will work with the MScSM director to choose appropriate graduate-level courses to complete during their final undergraduate year.

5 and 6	• Students complete all MScSM program requirements with advanced standing of 1.0 FCE granted.
	• Students complete an additional 8.0 FCEs towards the MScSM program requirements.
		• Conditions of admission to the MScSM program are removed.
		• Exact courses will vary based on the 1.0 FCE completed in Year 4.
		• **5.0 to 6.0 FCEs in core courses:** SSM1010Y, SSM1020H, SSM1030H, SSM1040H, SSM1050H, SSM1060H, SSM1070H, SSM1080H, SSM1090H, SSM1100Y, SSM1110H.
		• **2.0 to 3.0 FCEs in elective courses;** examples include:
		  ○ Science electives: EES1117H, EES1125H, ENV1002H, ENV1704H.
		  ○ Management electives: EES1124H, ENV1707H, RSM2918H, SSM2010H, SSM2020H.
		• The **internship placement** (SSM1110H) will range from 2 to 4 months in length.

UTM, Environmental Management (Specialist), Honours Bachelor of Arts / Sustainability Management, Master of Science

UTM Env Mgt (Spec) HBA / MScSM: Introduction

Overview

The **Combined Degree Program (CDP): UTM, Honours Bachelor of Arts, Specialist in Environmental Management / Master of Science in Sustainability Management** allows students to complete an undergraduate degree with an early conditional admission offer to the Master of Science in Sustainability Management (MScSM) program in their final year of study.

Although there is no acceleration in time to completion in this CDP, students will benefit from early admission to the MScSM program, early exposure to graduate-level courses, and a reduced course load while completing their MScSM degree.

UTM Env Mgt (Spec) HBA / MScSM: Application Process

- Applicants apply to the Honours Bachelor of Arts (HBA) program, the MScSM program, and the CDP.
- Applicants must gain independent admission to both the HBA and MScSM programs before they may be considered for admission to the CDP.
- Applicants apply to the CDP at the end of Year 3 of undergraduate study.
- Applicants apply and interview for early conditional admission to the MScSM program.

UTM Env Mgt (Spec) HBA / MScSM: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MScSM program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBA degree program and the Environmental Management specialist program.inteive biology
- Meet the admission requirements of the School of Graduate Studies and the MScSM program.

- Be enrolled full-time and in good standing in the HBA program:
  - Have either completed or are currently enrolled in a minimum of 15.0 total full-course equivalents (FCEs).
  - Have a minimum annual grade point average (AGPA) of 3.7 in their most recent 5.0 FCEs.

To be given **full, unconditional admission to the MScSM program**, applicants must meet the following admission requirements:

- Be conferred with the HBA degree.
- Successfully complete 1.0 graduate FCE in MScSM courses.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1	• Normally, 5.0 full-course equivalents (FCEs) towards the HBA program requirements.	• Students must complete a minimum of **3.0 FCEs** in core courses: ○ Introduction: ENV100Y5 (1.0 FCE). ○ Economics: ECO100Y5 (1.0 FCE). ○ Foundation: 1.0 FCE chosen from ANT102H5, GGR111H5, PHL105Y5, POL112H5, POL113H5, POL114H5, SOC100H5.
2	• Normally, 5.0 FCEs towards the HBA program requirements.	• Students must complete a minimum of **4.0 FCEs** in core courses: ○ Environmental Management: ENV201H5 (0.5 FCE). ○ Social Science/Humanities: 1.5 FCEs chosen from ANT204Y5, ANT241Y5, ECO200Y5, ENG259H5, ENV250Y5, GGR202H5, GGR207H5, GGR208H5, GGR209H5, GGR210H5, GGR267H5, GGR269H5, GGR287H5, GGR288H5, MAT102H5, MAT133Y5, MAT134Y5, MAT135Y5, PHL273H5. ○ Science: 1.0 FCE chosen from BIO201H5, BIO205H5, ERS201H5, ERS202H5, ERS203H5, GGR201H5, GGR214H5, GGR217H5, GGR227H5, PHY237H5. ○ Statistics: 0.5 FCE chosen from GGR276H5, STA220H5, or other 200/300-level statistics course with the program advisor's permission. ○ Analytical and Research Methods: 0.5 FCE chosen from GGR277H5, GGR278H5, STA221H5, or another program-relevant 200/300-level research methods course, with the program advisor's permission.
3 and 4	• Normally, 5.0 FCEs each year towards the HBA program requirements. • In order to be eligible for the CDP, students must have completed a minimum of 15.0 FCEs by the end of Year 3. • Students must complete all HBA program requirements (20.0 FCEs) by the end of Year 4, in order to fulfil the conditions of the MScSM offer.	• Students must complete a minimum of **5.0 FCEs** in core courses: ○ Environmental Management Perspectives: 1.5 FCEs chosen from ANT357H5, ENV310H5, ENV393H5, HIS308H5, HIS319H5. ○ Social, Economic, and Policy Perspectives: 2.0 FCEs chosen from ANT357H5, ANT368H5, ANT380H5, ECO373Y5, ENV320H5, ENV345H5, ENV351H5, ENV420H5, ENV425H5, ENV452H5, GGR318H5, GGR321H1, GGR329H5, GGR333H5, GGR348H5, GGR349H5, GGR361H5, GGR365H5, GGR370H5, GGR418H5, GGR419H5, GGR426H5, GGR493HS, JGE378H5, JUG320H1, MGT395H5, PHL373H1, POL343Y5, SOC339H5, SOC349H5, SOC356H5, WR1375H5. ○ Scientific Perspectives: 0.5 FCE chosen from BIO333H5, BIO464H5, ENV495H5, ENV496H5, ERS313H5, ERS315H5, ERS321H5, GGR305H5, GGR307H5, GGR309H5, GGR311H5, GGR317H5, GGR337H5, GGR374H5, GGR377H5, GGR384H5, GGR484H5, JGE378H5, SCI395H5, SCI396H5. ○ Field, Project-Based, and Research Perspectives: 1.0 FCE chosen from ENV299Y5, ENV331H5, ENV332H5, ENV399Y5, ENV497H5, ENV498Y5, GGR379H5, GGR389H5, JEG400Y5, JEG401Y5, SCI498H5, SCI499H5, or another program-relevant field, experiential, or research course, with the program advisor's permission. • Students apply to the CDP and the MScSM program at the end of Year 3. Students accepted to the CDP will receive a conditional offer of admission to the MScSM program. • In Year 4, students complete **1.0 FCE** in MScSM courses, chosen from EES1124H, EES1125H, ENV1002H, ENV1704H, ENV1707H, SSM1010Y, SSM1020H, SSM1030H, SSM1040H, SSM1050H, SSM1060H, SSM1070H, SSM1080H, SSM2010H, SSM2020H, or another program-relevant graduate course with the MScSM director's permission.

		• Once accepted into the CDP, students will work with the MScSM director to choose appropriate graduate-level courses to complete during their final undergraduate year.

5 and 6	• Students complete all MScSM program requirements with advanced standing of 1.0 FCE granted.
	
	• Students complete an additional 8.0 FCEs towards the MScSM program requirements.
		• Conditions of admission to the MScSM program are removed.
		
		• Exact courses will vary based on the 1.0 FCE completed in Year 4.
		
		• **5.0 to 6.0 FCEs in core courses:** SSM1010Y, SSM1020H, SSM1030H, SSM1040H, SSM1050H, SSM1060H, SSM1070H, SSM1080H, SSM1090H, SSM1100Y, SSM1110H.
		
		• **2.0 to 3.0 FCEs in elective courses**; examples include:
		  ○ Science electives: EES1117H, EES1125H, ENV1002H, ENV1704H.
		  ○ Management electives: EES1124H, ENV1707H, RSM2918H, SSM2010H, SSM2020H.
		
		• The internship placement (SSM1110H) will range from 2 to 4 months in length.

UTSC, Environmental Physics (Specialist), Honours Bachelor of Science / Chemical Engineering and Applied Chemistry, Master of Engineering

UTSC Env Phy (Spec) HBSc / Chem MEng: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist in Environmental Physics / Chemical Engineering and Applied Chemistry, Master of Engineering** is a five-year program. For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Env Phy (Spec) HBSc / Chem MEng: Application Process

- UTSC students in Year 3 of the Honours Bachelor of Science (HBSc) program in Environmental Physics (Specialist) who are interested in the CDP must contact Professor M. Meriano before the end of the Fall session.
- Qualified UTSC students will be able to apply to the CDP.
- UTSC students who are accepted to the CDP will receive a conditional offer to start the Master of Engineering (MEng) program upon completion of their HBSc program requirements.

UTSC Env Phy (Spec) HBSc / Chem MEng: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MEng program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc program and Environmental Physics specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MEng program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2;
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).

To be given **full, unconditional admission to the MEng program in Chemical Engineering and Applied Chemistry**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in Year 3 and Year 4 of their HBSc program.
- Complete two prescribed undergraduate engineering half courses (1.0 FCE) as part of the HBSc degree requirements.
- Students who choose the option of taking up to 1.0 FCE in graduate courses in Year 4 must achieve a minimum grade of B–. These courses can be counted towards the completion of the HBSc degree requirements and the MEng program and degree requirements.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1 to 4	• HBSc degree requirements. • By the end of Year 4, fulfil both the undergraduate program requirements and the undergraduate degree requirements. • Between Years 4 and 5, eligible students may begin the MEng program in the Summer session.	• Students are expected to carry a course load of **5.0 full-course equivalents (FCEs)** over the three academic sessions (Fall, Winter, Summer) of each year. • In Year 3, qualified students may apply to the CDP and may be offered conditional admission to the MEng program. • In Year 4, students who receive a conditional offer of admission to the CDP and MEng program **must** complete 1.0 FCE in prescribed undergraduate engineering courses offered by the Faculty of Applied Science and Engineering. These courses can be counted towards the completion of the HBSc degree requirements. • In Year 4, students who receive a conditional offer of admission to the CDP and MEng program **may** complete up to 1.0 FCE in graduate courses with the permission of the Chemical Engineering and Applied Chemistry Department; students are graded as graduate students and must achieve a minimum grade of B–. These courses can be counted towards the completion of the HBSc degree requirements and the MEng program and degree requirements.
5	• Remaining MEng program requirements.	• Conditions of admission are removed. • Complete 5.0 FCEs in MEng courses. Students who have completed up to 1.0 FCE in MEng courses in Year 4 may subtract those courses from the total 5.0 FCEs required.

UTSC, Environmental Physics (Specialist), Honours Bachelor of Science / Master of Environmental Science

UTSC Env Phy (Spec) HBSc / MEnvSc: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist in Environmental Physics / Master of Environmental Science** (MEnvSc) is designed for students interested in studying the intersections of environmental sciences with professional experiential preparation in emerging environmental challenges.

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and a Master of Environmental Science degree. Distinct advantages include:

- early application to the MEnvSc program (in Year 3) and conditional admission to the MEnvSc program;
- addressing demand from undergraduate students for further training in order to improve their level of competence as environmental practitioners; and
- the opportunity to enrol in the MEnvSc program in the Summer session between Years 4 and 5 in order to complete either a two-month academic or internship training, in addition to the mandatory four-month academic or internship opportunity completed by students in the MEnvSc program alone.

This CDP permits the completion of both degrees in five years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Env Phy (Spec) HBSc / MEnvSc: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MEnvSc program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MEnvSc program; those accepted will receive a conditional offer to start the MEnvSc program upon completion of their HBSc program and degree requirements.

UTSC Env Phy (Spec) HBSc / MEnvSc: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MEnvSc program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Environmental Physics specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MEnvSc program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2;
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Complete the following undergraduate courses (1.5 FCEs) as part of the HBSc degree requirements:
  - EESC24H3 *Advanced Reading* (can be taken in Year 3 of the HBSc program);
  - EESD10Y3 *Research Project in Environmental Science*.

To be given **full, unconditional admission to the MEnvSc program**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses;
- Achieve at least a grade of B– in both of the graduate courses taken in Year 4 of undergraduate study, chosen in consultation with the graduate program supervisor, as indicated below for each MEnvSc field:
  - Climate Change Impacts and Adaptation field: EES1133H *Climate Change Science and Modelling* plus an additional 0.5 FCE;
  - Conservation and Biodiversity field: EES3002H *Conservation Policy* plus an additional 0.5 FCE;
  - Terrestrial and Aquatic Systems field: 1.0 FCE.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1 to 3	• HBSc degree requirements.	• The undergraduate degree will include the specialist in Environmental Physics. • By the end of Year 3, students will select one of the three fields of study within the MEnvSc program at the time of application: o Climate Change Impacts and Adaptation; o Conservation and Biodiversity; or o Terrestrial and Aquatic Systems.
4	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements, including specific undergraduate courses for the CDP • In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.	• Students who receive a conditional offer of admission to the CDP must complete the following undergraduate courses: o EESC24H3 *Advanced Reading* (0.5 FCE) and o EESD10Y3 *Research Project in Environmental Science* (1.0 FCE). • Students must complete 1.0 FCE in graduate courses, chosen in consultation with the graduate program supervisor, as follows: o Climate Change Impacts and Adaptation field: EES1133H *Climate Change Science and Modelling* (0.5 FCE) plus an elective (0.5 FCE); o Conservation and Biodiversity field: EES3002H *Conservation Policy* (0.5 FCE) plus an elective (0.5 FCE); o Terrestrial and Aquatic Systems field: 1.0 FCE.
Optional registration in the Summer session prior to Year 5	• Optional two-month academic or internship training.	• EES4001H *Internship Training 1* (0.5 FCE) **or** EES4003H *Academic Training 1* (0.5 FCE).
5	• Remaining courses from Year 1 and Year 2 of the MEnvSc program.	• Students registered in the optional Summer academic or internship training must complete 4.0 FCEs as follows: o coursework (2.0 FCEs) and internship (2.0 FCEs) **or** o coursework (2.5 FCEs) and research paper (1.5 FCEs). • Students not registered in the optional Summer academic or internship training must complete 4.5 FCEs as follows: o internship option: coursework (2.5 FCEs) and internship (2.0 FCEs) **or** o research option: coursework (3.0 FCEs) and research paper (1.5 FCEs).

UTSC, Environmental Physics (Specialist Co-op), Honours Bachelor of Science / Master of Environmental Science

UTSC Env Phy (Spec Co-op) HBSc / MEnvSc: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist Co-op in Environmental Physics / Master of Environmental Science** (MEnvSc) is designed for students interested in studying the intersections of environmental sciences with professional experiential preparation in emerging environmental challenges.

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and a Master of Environmental Science degree. Distinct advantages include:

- early application to the MEnvSc program (in Year 3) and conditional admission to the MEnvSc program;
- addressing demand from undergraduate students for further training in order to improve their level of competence as environmental practitioners; and
- the opportunity to enrol in the MEnvSc program in the Summer session between Years 4 and 5 in order to complete either a two-month academic or internship training, in addition to the mandatory four-month academic or internship opportunity completed by students in the MEnvSc program alone.

This CDP permits the completion of both degrees in five years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Env Phy (Spec Co-op) HBSc / MEnvSc: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MEnvSc program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MEnvSc program; those accepted will receive a conditional offer to start the MEnvSc program upon completion of their HBSc program and degree requirements.

UTSC Env Phy (Spec Co-op) HBSc / MEnvSc: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MEnvSc program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Environmental Physics specialist co-op program.
- Meet the admission requirements of the School of Graduate Studies and the MEnvSc program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2;
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Complete the following undergraduate courses (1.5 FCEs) as part of the HBSc degree requirements:
  - EESC24H3 *Advanced Reading* (can be taken in Year 3 of the HBSc program);
  - EESD10Y3 *Research Project in Environmental Science*.

To be given **full, unconditional admission to the MEnvSc program**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses;
- Achieve at least a grade of B– in both of the graduate courses taken in Year 4 of undergraduate study, chosen in consultation with the graduate program supervisor, as indicated below for each MEnvSc field.
  - Climate Change Impacts and Adaptation field: EES1133H *Climate Change Science and Modelling* plus an additional 0.5 FCE;
  - Conservation and Biodiversity field: EES3002H *Conservation Policy* plus an additional 0.5 FCE;
  - Terrestrial and Aquatic Systems field: 1.0 FCE.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements

1 to 3	• HBSc degree requirements.	• The undergraduate degree will include the specialist co-op in Environmental Physics.
		• By the end of Year 3, students will select one of the three fields of study within the MEnvSc program at the time of application:
		  ○ Climate Change Impacts and Adaptation;
		  ○ Conservation and Biodiversity; or
		  ○ Terrestrial and Aquatic Systems.

4	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements, including specific undergraduate courses for the CDP.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
		• Students who receive a conditional offer of admission to the CDP must complete the following undergraduate courses:
		• EESC24H3 *Advanced Reading* (0.5 FCE) and
		• EESD10Y3 *Research Project in Environmental Science* (1.0 FCE).
		• Students must complete 1.0 FCE in graduate courses, chosen in consultation with the graduate program supervisor, as follows:
		  ○ Climate Change Impacts and Adaptation field: EES1133H *Climate Change Science and Modelling* (0.5 FCE) plus an elective (0.5 FCE);
		  ○ Conservation and Biodiversity field: EES3002H *Conservation Policy* (0.5 FCE) plus an elective (0.5 FCE);
		  ○ Terrestrial and Aquatic Systems field: 1.0 FCE.

Optional registration in the Summer session prior to Year 5	• Optional two-month academic or internship training.	• EES4001H *Internship Training 1* (0.5 FCE) **or** EES4003H *Academic Training 1* (0.5 FCE).

5	• Remaining courses from Year 1 and Year 2 of the MEnvSc program.	• Students registered in the optional Summer academic or internship training must complete 4.0 FCEs as follows:
		  ○ coursework (2.0 FCEs) and internship (2.0 FCEs) **or**
		  ○ coursework (2.5 FCEs) and research paper (1.5 FCEs).
		• Students not registered in the optional Summer academic or internship training must complete 4.5 FCEs as follows:
		  ○ internship option: coursework (2.5 FCEs) and internship (2.0 FCEs) **or**
		  ○ research option: coursework (3.0 FCEs) and research paper (1.5 FCEs).

UTSC, Environmental Physics (Specialist), Honours Bachelor of Science / Master of Teaching

UTSC Env Phy (Spec) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist in Environmental Physics / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Env Phy (Spec) HBSc / MT: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTSC Env Phy (Spec) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Environmental Physics specialist program.

- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Complete the requirements of their HBSc program.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the specialist in Environmental Physics, which fulfils the 6.0 FCEs required for Science-Physics as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the specialist in Environmental Physics, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTSC, Environmental Physics (Specialist Co-op), Honours Bachelor of Science / Master of Teaching

UTM, Environmental Science (Major), Honours Bachelor of Science / Sustainability Management, Master of Science

UTM Env Sci (Maj) HBSc / MScSM: Introduction

Overview

The **Combined Degree Program (CDP): UTM, Honours Bachelor of Science, Major in Environmental Science / Master of Science in Sustainability Management** (MScSM) allows students to complete an undergraduate degree with an early conditional admission offer to the Master of Science in Sustainability Management program in their final year of study.

Although there is no acceleration in time to completion in this CDP, students will benefit from early admission to the MScSM program, early exposure to graduate-level courses, and a reduced course load while completing their MScSM.

For a general description of CDPs, see General Regulations section 1.4.3.

UTM Env Sci (Maj) HBSc / MScSM: Application Process

- Applicants apply to the Honours Bachelor of Science (HBSc), the MScSM program, and the CDP.
- Applicants must gain independent admission to both the HBSc and MScSM programs before they may be considered for admission to the CDP.
- Applicants apply to the CDP at the end of Year 3 of undergraduate study.
- Applicants apply and interview for early conditional admission to the MScSM program.

UTM Env Sci (Maj) HBSc / MScSM: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MScSM program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Environmental Science major program.
- Meet the admission requirements of the School of Graduate Studies and the MScSM program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have either completed or are currently enrolled in a minimum of 15.0 total full-course equivalents (FCEs).
  - Have a minimum annual grade point average (AGPA) of 3.7 in their most recent 5.0 FCEs.

To be given **full, unconditional admission to the MScSM program**, applicants must meet the following admission requirements:

- Be conferred with the HBSc degree.
- Successfully complete 1.0 graduate FCE in MScSM courses.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1	• Normally, 5.0 full-course equivalents (FCEs) towards the HBSc program requirements.	• Students must complete a minimum of 3.0 FCEs in core courses: o Introduction: ENV100Y5 (1.0 FCE). o Quantitative and Basic Science Foundation: 2.0 FCEs chosen from BIO152H5, BIO153H5, CHM110H5, CHM120H5, ERS120H5, GGR112H5, MAT134Y5, MAT135Y5, MAT137Y5, PHY135Y5, PHY136H5, PHY137H5.
2	• Normally, 5.0 FCEs towards the HBSc program requirements.	• Students must complete a minimum of 2.5 FCEs in core courses: o Environmental Management: ENV201H5 (0.5 FCE). o Biological and Ecological Perspectives: 0.5 FCE chosen from BIO202H5, BIO203H5, BIO205H5, BIO206H5. o Geographical Perspectives: 0.5 FCE chosen from GGR201H5, GGR214H5, GGR217H5, GGR227H5. o Physical and Chemical Perspectives: 0.5 FCE chosen from CHM231H5, CHM242H5, ERS201H5, JCP221H5, PHY237H5. o Analytical and Research Methods: 0.5 FCE chosen from BIO360H5, CHM211H5, GGR276H5, STA220H5, or another program-relevant 200/300-level research methods course (SCI) with the program advisor's permission.
3 and 4	• Normally, 5.0 FCEs each year towards the HBSc program requirements. • In order to be eligible for the CDP, students must have completed a minimum of 15.0 FCEs by the end of Year 3. • Students must complete all HBSc program requirements (20.0 FCEs) by the end of Year 4, in order to fulfil the conditions of the MScSM offer.	• Students must complete a minimum of 2.5 FCEs in core courses: o Environmental Science: ENV330H5 (0.5 FCE). o Field, Project-Based, and Research Perspectives: 0.5 FCE chosen from ANT318H5, BIO3313H5, BIO329H5, BIO416H5, ERS325H5, ENV229Y5, ENV331H5, ENV332H5, ENV399Y5, GGR379H5, JEG400Y5, JEG401Y5, SCI395H5, SCI396H5, SCI498H5, SCI499H5, or another program-relevant field course (SCI) with the program advisor's permission. o Biogeochemical Perspectives: 1.0 FCE chosen from BIO311H5, BIO312H5, BIO318Y5, BIO328H5, BIO330H5, BIO333H5, BIO373H5, BIO405H5, BIO406H5, BIO436H5, BIO464H5, CHM310H5, CHM311H5, CHM331H5, CHM333H5, CHM347H5, CHM361H5, CHM362H5, CHM391H5, CHM393H5, ENV495H5, ENV496H5, ERS313H5, ERS315H5, ERS321H5, GGR305H5, GGR307H5, GGR309H5, GGR311H5, GGR312H5, GGR315H5, GGR316H5, GGR317H5, GGR338H5, GGR372H5, GGR374H5, GGR377H5, GGR403H1, GGR406H5, GGR407H5, GGR409H1, GGR413H1, GGR463H5, GGR464H5, GGR479H5, JGE378H5, PHY331H5. o Social, Economic, and Policy Perspectives: 0.5 FCE chosen from ANT357H5, ANT368H5, ECO373Y5, ENV250Y5, ENV310H5, ENV320H5, ENV345H5, ENV393H5, ENV420H5, ENV425H5, GGR318H5, GGR329H5, GGR333H5, GGR348H5, GGR349H5, GGR361H5, GGR365H5, GGR370H5, GGR418H5, GGR419H5, GGR420H5, HIS318H5, HIS319H5, JGE378H5, MGT394H5, PHL255H5, PHL273H5, PHL373H1, POL343Y5, SOC226H5, SOC339H5, SOC356H5, WRI375H5. • Students apply to the CDP and the MScSM program at the end of Year 3. Students accepted to the CDP will receive a conditional offer of admission to the MScSM program.

		• In Year 4, students complete 1.0 FCE in MScSM courses, chosen from EES1124H, EES1125H, ENV1002H, ENV1704H, ENV1707H, SSM1010Y, SSM1020H, SSM1030H, SSM1040H, SSM1050H, SSM1060H, SSM1070H, SSM1080H, SSM2010H, SSM2020H, or another program-relevant graduate course with the MScSM director's permission. • Once accepted into the CDP, students will work with the MScSM director to choose appropriate graduate-level courses to complete during their final undergraduate year.
5 and 6	• Students complete all MScSM program requirements with advanced standing of 1.0 FCE granted. • Students complete an additional 8.0 FCEs towards the MScSM program requirements.	• Conditions of admission to the MScSM program are removed. • Exact courses will vary based on the 1.0 FCE completed in Year 4. • 5.0 to 6.0 FCEs in core courses: SSM1010Y, SSM1020H, SSM1030H, SSM1040H, SSM1050H, SSM1060H, SSM1070H, SSM1080H, SSM1090H, SSM1100Y, SSM1110H. • 2.0 to 3.0 FCEs in elective courses; examples include: o Science electives: EES1117H, EES1125H, ENV1002H, ENV1704H. o Management electives: EES1124H, ENV1707H, RSM2918H, SSM2010H, SSM2020H. • The internship placement (SSM1110H) will range from two to four months in length.

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1	• Normally, 5.0 full-course equivalents (FCEs) towards the HBSc program requirements.	• Students must complete a minimum of **4.0 FCEs** in core courses: ○ Introduction: ENV100Y5 (1.0 FCE). ○ Quantitative and Basic Science Foundation: 3.0 FCEs chosen from BIO152H5, BIO153H5, CHM110H5, CHM120H5, ERS120H5, GGR112H5, MAT134Y5, MAT135Y5, MAT137Y5, PHY135Y5, PHY136H5, PHY137H5.
2	• Normally, 5.0 FCEs towards the HBSc program requirements.	• Students must complete a minimum of **4.0 FCEs** in core courses: ○ Environmental Management: ENV201H5 (0.5 FCE). ○ Biological and Ecological Perspectives: 0.5 FCE chosen from BIO202H5, BIO203H5, BIO205H5, BIO206H5. ○ Geographical Perspectives: 0.5 FCE chosen from GGR201H5, GGR214H5, GGR217H5, GGR227H5. ○ Earth Science Perspectives: ERS201H5 (0.5 FCE). ○ Physical and Chemical Perspectives: 1.0 FCE chosen from CHM231H5, CHM242H5, ERS202H5, ERS203H5, JCP221H5, PHY237H5. ○ Analytical and Research Methods: 0.5 FCE chosen from BIO360H5, BIO361H5, CHM211H5, GGR276H5, STA220H5, STA221H5. ○ Additional Analytical and Research Methods: 0.5 FCE chosen from the course list above or GGR278H5, GGR337H5, GGR308H5.
3 and 4	• Normally, 5.0 FCEs each year towards the HBSc program requirements. • In order to be eligible for the CDP, students must have completed a minimum of 15.0 FCEs by the end of Year 3. • Students must complete all HBSc program requirements (20.0 FCEs) by the end of Year 4, in order to fulfil the conditions of the MScSM offer.	• Students must complete a minimum of **4.0 FCEs** in core courses: ○ Environmental Science: ENV330H5 (0.5 FCE). ○ Field Perspectives: 0.5 FCE chosen from ANT318H5, BIO313H5, BIO329H5, BIO416H5, ENV331H5, ERS325H5, GGR379H5, GGR390H1, or another program-relevant field course (SCI) with the program advisor's permission. ○ Field, Project-Based, and Research Perspectives: 1.0 FCE chosen from BIO400Y5, ENV332H5, ENV399Y5, ENV497H5, ENV498Y5, GGR417Y5, JEG400Y5, JEG401Y5, SCI395H5, SCI396H5, SCI498H5, SCI499H5, or another program-relevant, project-based research course (SCI) with the program advisor's permission. ○ Biogeochemical Perspectives: 1.5 FCEs chosen from BIO311H5, BIO312H5, BIO318Y5, BIO328H5, BIO330H5, BIO333H5, BIO373H5, BIO405H5, BIO406H5, BIO436H5, BIO464H5, CHM310H1, CHM311H5, CHM331H5, CHM333H5, CHM347H5, CHM361H5, CHM362H5, CHM391H5, CHM393H5, CHM416H5, ENV490H5, ENV491H5, ENV495H5, ENV496H5, ERS313H5, ERS315H5, ERS321H5, GGR305H5, GGR307H5, GGR309H5, GGR311H5, GGR312H5, GGR315H5, GGR316H5, GGR317H5, GGR338H5, GGR372H5, GGR374H5, GGR375H5, GGR377H5, GGR384H5, GGR403H1, GGR406H5, GGR407H5, GGR409H1, GGR413H1, GGR463H5, GGR464H5, GGR479H5, GGR484H5, JGE378H5, PHY331H5. ○ Social, Economic, and Policy Perspectives: 0.5 FCE chosen from ANT357H5, ANT368H5, ECO373Y5, ENV250Y5, ENV310H5, ENV320H5, ENV345H5, ENV351H5, ENV393H5, ENV420H5, ENV425H5, ENV452H5; GGR318H5, GGR329H5, GGR333H5, GGR348H5, GGR349H5, GGR361H5, GGR365H5, GGR370H5, GGR418H5, GGR419H5, GGR420H5, GGR426H5, JGE378H5, HIS318H5, HIS319H5, MGT394H5, PHL273H5, PHL373H1, POL343Y5, SOC226H5, SOC339H5, SOC356H5, WRI375H5. • Students apply to the CDP and the MScSM program at the end of Year 3. Students accepted to the CDP will receive a conditional offer of admission to the MScSM program.

		• In Year 4, students complete **1.0 FCE in MScSM** courses, chosen from EES1124H, EES1125H, ENV1002H, ENV1704H, ENV1707H, SSM1010Y, SSM1020H, SSM1030H, SSM1040H, SSM1050H, SSM1060H, SSM1070H, SSM1080H, SSM2010H, SSM2020H or another program-relevant graduate course with the MScSM director's permission. • Once accepted to the CDP, students will work with the MScSM director to choose appropriate graduate-level courses to complete during their final undergraduate year.
5 and 6	• Students complete all MScSM program requirements with advanced standing of 1.0 FCE granted. • Students complete an additional 8.0 FCEs towards the MScSM program requirements.	• Conditions of admission to the MScSM program are removed. • Exact courses will vary based on the 1.0 FCE completed in Year 4. • **5.0 to 6.0 FCEs in core courses**: SSM1010Y, SSM1020H, SSM1030H, SSM1040H, SSM1050H, SSM1060H, SSM1070H, SSM1080H, SSM1090H, SSM1100Y, SSM1110H. • **2.0 to 3.0 FCEs in elective courses**; examples include: ○ Science electives: EES1117H, EES1125H, ENV1002H, ENV1704H. ○ Management electives: EES1124H, ENV1707H, RSM2918H, SSM2010H, SSM2020H. • The internship placement (SSM1110H) will range from 2 to 4 months in length.

STG, Education and Society (Minor), Honours Bachelor of Arts / Child Study and Education, Master of Arts

STG ES (Min) HBA / CSE MA: Introduction

Overview

The **Combined Degree Program (CDP): STG, Honours Bachelor of Arts, Minor in Education and Society / Child Study and Education, Master of Arts** is designed for students interested in studying the intersections of child study, education, and human development, coupled with professional teacher preparation.

This CDP permits the completion of both degrees in six years with 1.0 full-course equivalent (FCE) that may be counted towards both the undergraduate and graduate degree. Students admitted to the CDP will follow the academic path to completion outlined below.

For a general description of CDPs, see General Regulations section 1.4.3.

Email: cse.program@utoronto.ca

STG ES (Min) HBA / CSE MA: Application Process

- Applicants must apply to the Honours Bachelor of Arts (HBA) program, the MA in Child Study and Education (MA-CSE) program, and the CDP.

STG ES (Min) HBA / CSE MA: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MA-CSE program and the CDP**, students must meet the qualifications as specified by the MA-CSE program (i.e., experience working with children, submission of a Statement of Intent, and resumé/CV) and the following requirements:

- Be admitted to the HBA degree program and the Education and Society minor program.
- Meet the admission requirements of the School of Graduate Studies and MA-CSE program.
- Be enrolled full-time and in good standing in the HBA degree program.
  - Be registered in Year 3 of the HBA program.
  - Have completed or be in progress to complete VIC360H/Y *Education Internship*, which will take place in a setting involving young children.
  - Have an average grade equivalent to at least an A– (cumulative grade point average [CGPA] of 3.7), normally demonstrated by an average grade in Year 2.
- Provide two letters of reference: one professional, one academic.

To be given **full, unconditional admission to the MA-CSE program**, students must meet the following requirements:

- Maintain at least an A– average (3.7 CGPA) in their final year or over senior (Years 3 and 4) courses.
- Achieve a least a B+ average in the 1.0 FCE graduate course taken in Year 4.
- Successfully complete the requirements for the HBA program with the minor in Education and Society.
- Be conferred with the HBA degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Note: at the undergraduate level, a credit is equal to a graduate-level full-course equivalent (FCE). Course weight is measured for both using a Y (1.0 weight) or H (0.5 weight) suffix.

Year	Progression	Specific Requirements
1 to 3	• Undergraduate courses in accordance with Faculty of Arts and Science regulations for the HBA degree and Education and Society minor.	• 15.0 credits toward the HBA program and degree requirements. • In the Fall session, students registered in Year 3 express interest in the CDP to the Victoria College Registrar's Office, which advises applicants on the process in collaboration with the OISE Office of the Registrar and Student Services. Successful applicants receive conditional acceptance to the CDP and MA-CSE.
4	• Undergraduate courses in accordance with the U of T regulations for the Education and Society minor. • Graduate courses in accordance with the U of T regulations for the CDP.	• 4.0 credits toward the HBA program and degree requirements. • 1.0 FCE in MA-CSE elective courses in consultation with the MA-CSE program chair. This will be counted as one credit toward the overall requirements of the HBA and MA-CSE programs. This 1.0 FCE is chosen from among master's-level courses in the Department of Applied Psychology and Human Development. Elective courses that are especially recommended for Child Study and Education students are listed in the Applied Psychology and Human Development calendar entry.
5 and 6	• Remaining graduate courses in accordance with the U of T regulations for the MA-CSE program.	• 10.0 FCEs in MA-CSE program requirements. See the Child Study and Education calendar entry for full course requirements. • Note that students will have previously completed the 1.0 FCE in electives in Year 4 of the HBA program.

STG, Education and Society (Minor), Honours Bachelor of Science / Child Study and Education, Master of Arts

STG ES (Min) HBSc / CSE MA: Introduction

UTSC, Evolutionary Anthropology (Major), Honours Bachelor of Science / Master of Teaching

UTSC Evo Ant (Maj) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Major in Evolutionary Anthropology / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Evo Ant (Maj) HBSc / MT: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTSC Evo Ant (Maj) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Evolutionary Anthropology major program.

- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the major in Evolutionary Anthropology, which fulfils the 6.0 FCEs required for Social Science-General as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the major in Evolutionary Anthropology, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc degree and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTSC, Evolutionary Anthropology (Specialist), Honours Bachelor of Science / Master of Teaching

UTSC Evo Ant (Spec) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist in Evolutionary Anthropology / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the specialist in Evolutionary Anthropology, which fulfils the 6.0 FCEs required for Social Science-General as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the specialist in Evolutionary Anthropology, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc degree and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• ·11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTM, Exceptionality in Human Learning (Specialist), Honours Bachelor of Science / Child Study and Education, Master of Arts

UTM EHL (Spec) HBSc / CSE MA: Introduction

Overview

The **Combined Degree Program (CDP): UTM, Honours Bachelor of Science, Specialist in Exceptionality in Human Learning / Child Study and Education, Master of Arts** is designed for students interested in studying human development and related areas, such as diversity and inclusion. Students may apply studies in these areas towards professional training leading to teacher certification.

This CDP permits the completion of both degrees in six years. One full graduate course (1.0 full-course equivalent [FCE]) can be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the Master of Arts (MA) program, and the CDP.
- Applicants must gain independent admission to both the HBSc and MA programs before they may be considered for admission to the CDP.

UTM EHL (Spec) HBSc / CSE MA: Requirements

Minimum Admission Requirements

- Applicants must meet the admission requirements of the HBSc program, the School of Graduate Studies, and the MA program.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1	• Undergraduate courses in accordance with the U of T regulations for the Exceptionality in Human Learning (Specialist), HBSc program.	• 5.0 full-course equivalents (FCEs) toward the HBSc program and degree requirements.
2	• Undergraduate courses in accordance with the U of T regulations for the Exceptionality in Human Learning (Specialist), HBSc program.	• 5.0 FCEs toward the HBSc program and degree requirements.
3	• Undergraduate courses in accordance with the U of T regulations for the Exceptionality in Human Learning (Specialist), HBSc program. • Graduate courses in accordance with the U of T regulations for the MA program.	• 5.0 FCEs toward the HBSc program and degree requirements. • In the Winter session, students apply to the MA program. Upon conditional acceptance, they may apply to the CDP.
4	• Undergraduate courses in accordance with the U of T regulations for the Exceptionality in Human Learning (Specialist), HBSc program.	• 5.0 FCEs as follows: • 4.0 FCEs toward the HBSc program and degree requirements. • 1.0 FCE in MA elective courses in the spring/summer between Year 3 and Year 4; this will be counted toward the overall requirements of the HBSc and MA degree requirements. This 1.0 FCE is chosen from among master's-level courses in the Department of Applied Psychology and Human Development and, in some cases, other departments. Elective courses that are especially recommended for Child Study and Education students are listed in the Applied Psychology and Human Development calendar entry. Students without an undergraduate course in child development must take APD1201H *Child and Adolescent Development* as an elective. • Upon degree conferral, students apply to the MA program in order to lift conditions of admission.
5 and 6	• Remaining graduate courses in accordance with the U of T regulations for the MA program.	• 10.0 FCEs in MA program requirements. See the Child Study and Education program entry for full course requirements. • Note that students will have previously completed the 1.0 FCE in electives in the Spring and Summer sessions of Year 3 and Year 4 of the HBSc program.

UTM, Forensic Biology (Specialist), Honours Bachelor of Science / Master of Teaching

UTM For Bio (Spec) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTM, Honours Bachelor of Science, Specialist in Forensic Biology / Master of Teaching** (MT) is designed for students interested in studying the intersections of biology and education. Students may apply studies in these areas towards professional training leading to teacher certification.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a bachelor's degree from the University of Toronto Mississauga (UTM) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

For a general description of CDPs, see General Regulations section 1.4.3.

UTM For Bio (Spec) HBSc / MT: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTM For Bio (Spec) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Forensic Biology specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.

- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
  Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the specialist in Forensic Biology, which fulfils the 6.0 FCEs required for Science-Biology or Science-General as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the specialist in Forensic Biology, where the course requirements will fulfil 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.

UTSC, French (Major), Honours Bachelor of Arts / Master of Teaching

UTSC Fre (Maj) HBA / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Arts, Major in French / Master of Teaching** (MT) is designed for students interested in studying the intersections of French and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Fre (Spec) HBA / MT: Application Process

- Applicants must apply to the Honours Bachelor of Arts (HBA) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBA degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBA program and degree requirements.

UTSC Fre (Spec) HBA / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBA degree program and the French specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.

- Be enrolled full-time and in good standing in the HBA program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBA program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the specialist in French, which fulfils the 6.0 FCEs required for French (Second Language) as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBA academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBA degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*
1 to 4	• HBA degree requirements. • In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses. • By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.	• The undergraduate degree will include: ○ the specialist in French, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and ○ a minimum of 3.0 FCEs in the second teaching subject.[1] • By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCE in the second teaching subject (or 3.0 FCEs if the second teaching subject is a science). • In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBA and MT degree programs.
5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTSC, French (Specialist Co-op), Honours Bachelor of Arts / Master of Teaching

UTSC Fre (Spec Co-op) HBA / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Arts, Specialist Co-op in French / Master of Teaching** (MT) is designed for students interested in studying the intersections of French and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Fre (Spec Co-op) HBA / MT: Application Process

- Applicants must apply to the Honours Bachelor of Arts (HBA) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBA degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBA program and degree requirements.

UTSC Fre (Spec Co-op) HBA / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBA degree program and the French specialist co-op program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.

- Be enrolled full-time and in good standing in the HBA program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBA program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the specialist co-op in French, which fulfils the 6.0 FCEs required for French (Second Language) as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBA academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBA degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBA degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree includes:
		  ○ the specialist co-op in French, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCE in the second teaching subject (or 3.0 FCEs if the second teaching subject is a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBA and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTM, French Studies (Major), Honours Bachelor of Arts / Master of Teaching

UTM Fre St (Maj) HBA / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTM, Honours Bachelor of Arts, Major in French Studies / Master of Teaching** (MT) is designed for students interested in studying the intersections of French and education. Students may apply studies in these areas towards professional training leading to teacher certification.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a bachelor's degree from the University of Toronto Mississauga (UTM) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

For a general description of CDPs, see General Regulations section 1.4.3.

STG, Health Administration, Master of Health Science / Master of Social Work

STG HA MHSc / MSW: Introduction

Admissions to this combined degree program (CDP) have closed. The CDP will close on August 31, 2022.

Overview

The **Combined Degree Program (CDP): STG, Health Administration, Master of Health Science / Master of Social Work** students can integrate their commitment to serving vulnerable individuals and populations with the knowledge and skills needed to lead in today's challenging health and social services environment.

For a general description of CDPs, see General Regulations section 1.4.3.

Master of Health Science in Health Administration Program
Institute of Health Policy, Management and Evaluation
Email: ihpme@utoronto.ca

Master of Social Work Program
Factor-Inwentash Faculty of Social Work
Email: admissions.fsw@utoronto.ca

STG HA MHSc / MSW: Application Process

- Applicants must apply to the Master of Health Science (MHSc), program, the Master of Social Work (MSW) program, and the CDP.
- Students with a Bachelor of Social Work (BSW) from a recognized university may be admitted with advanced standing. They will complete the program in 2.5 years rather than 3 years without a bachelor's degree.
- Applicants gain independent admission to both the MHSc and MSW program before they may be considered for admission to the CDP. Note that the deadline for receipt of applications to the MHSc program is February 1 and the deadline for the MSW program is December 1.

STG HA MHSc / MSW: Requirements

Minimum Admission Requirements

- Applicants must meet the admission requirements of the MHSc program, the School of Graduate Studies, and the MSW program.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1	• MSW Year 1 program requirements.	• Complete 4.0 full-course equivalents (FCEs) in required social work courses. • Complete 0.5 FCE, the Year 1 social work extended practicum (SWK4701H).

	• Students entering with a BSW are exempt from the MSW Year 1 program requirements.	
2 and 3	• MHSc program requirements. • MSW Year 2 program requirements.	• Complete 10.0 FCEs in health administration including a minimum 1.0 FCE field placement. • Select an MSW field of specialization and complete courses required for that field. • Complete 1.0 FCE, the Year 2 social work practicum (SWK4702Y). • In Year 2, complete a minimum of 0.5 FCE elective in each academic session from either the MHSc or MSW program.

Program Length

3 years

Time Limit

4 years

STG, History (Major), Honours Bachelor of Arts / Master of Teaching

STG His (Maj) HBA / MT: Introduction

Overview

The **Combined Degree Program (CDP): STG, Honours Bachelor of Arts, Major in History / Master of Teaching** (MT) is designed for students interested in studying the intersections of history and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a bachelor's degree from the Faculty of Arts and Science and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE), St. George (STG) campus. They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

STG His (Maj) HBA / MT: Application Process

- Applicants apply to the Honours Bachelor of Arts (HBA) program, then to the MT program and the CDP.
- In the Spring session of Year 3 of the HBA program, students apply for conditional admission to the MT program.

STG His (Maj) HBA / MT: Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBA degree program and the History major program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.

- Be enrolled full-time and in good standing in the HBA degree program:
  - Be registered in Year 3 of the HBA program.
  - Have an average grade equivalent to at least a B+, normally demonstrated by an average grade in Year 2.
- Have completed or be on course to complete the Education and Society minor program (Victoria College).
- Have completed at least half of the teaching subjects' prerequisite courses—i.e., 3.0 full-course equivalents [FCEs] in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in their final year of study in the HBA program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which applicants are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the major in History, which fulfils the 6.0 FCEs required for History as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBA academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBA degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*
1 to 4	• HBA degree requirements. • In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses. • By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.	• The undergraduate degree will include: o the minor in Education and Society; o a minimum of 6.0 FCEs as part of the History major requirements, which will also qualify as prerequisite courses in the first teaching subject; and • a second minor, which will also qualify as the minimum of 3.0 FCEs in the second teaching subject[1]. • By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science). • In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBA and MT degree programs.
5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three options: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which option is selected. For details, see the MT calendar entry.		

UTSC, History (Major), Honours Bachelor of Arts / Master of Teaching

UTSC His (Maj) HBA / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Arts, Major in History / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC His (Maj) HBA / MT: Application Process

- Applicants must apply to the Honours Bachelor of Arts (HBA) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBA degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBA program and degree requirements.

UTSC His (Maj) HBA / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBA degree program and the History major program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.

- Be enrolled full-time and in good standing in the HBA program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBA program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the major in History, which fulfils the 6.0 FCEs required for History as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBA academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBA degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBA degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the major in History, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBA degree and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTSC, History (Specialist), Honours Bachelor of Arts / Master of Teaching

UTSC His (Spec) HBA / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Arts, Specialist in History / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Hum Ggr (Spec) HBA / MT: Application Process

- Applicants must apply to the Honours Bachelor of Arts (HBA) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBA degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBA program and degree requirements.

UTSC Hum Ggr (Spec) HBA / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBA degree program and the Geography specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBA program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBA program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the specialist in Geography, which fulfils the 6.0 FCEs required for Geography as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - · Students should consult often with their HBA academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBA degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBA degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the specialist in Geography, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBA degree and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

STG, Master of Information / Master of Museum Studies

STG MI / MMSt: Introduction

Overview

The **Combined Degree Program (CDP): STG, Master of Information / Master of Museum Studies** is designed for students interested in museum informatics, digital cultural heritage, cultural information policy, the intersection of cultural memory institutions (libraries, archives, and museums), digital curation, and use of social networking technologies in museums. The CDP permits completion of both degrees in three years rather than the four years it would take to acquire them independently.

For a general description of CDPs, see General Regulations section 1.4.3.

Master of Museum Studies Program
Faculty of Information
Email: admissions.ischool@utoronto.ca

STG MI / MMSt: Application Process

- Applicants must apply to the Master of Information (MI) program, the Master of Museum Studies (MMSt) program, and the CDP.
- Students who have been accepted into both participating programs, with the permission of each Program Coordinator, may register concurrently in the MI and MMSt programs.
- Applicants must gain independent admission to both the MI and MMSt programs before they may be considered for admission to the CDP.

STG MI / MMSt: Requirements

Minimum Admission Requirements

- Applicants must meet the admission requirements of the MI program, the MMSt program, and the School of Graduate Studies.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*
1	• Complete 5.0 full-course equivalents (FCEs) towards the MI program requirements.	• General Program Pathway: ○ 2.0 required FCEs as follows: INF1001H, INF1003H, INF1005H, INF1006H, and INF1240H ○ 3.0 FCEs in electives. • Concentration Pathway: ○ 0.5 core FCE as follows: INF1005H and INF1006H ○ 2.0 to 2.5 FCEs in courses required for the selected concentration ○ 2.0 to 2.5 FCEs in electives.

2	• Complete 4.5 FCEs towards the MMSt program requirements.	• General Program Pathway:
		  ○ 2.0 required FCEs as follows: MSL1150H, MSL1230H, MSL2231H, and MSL2370H
		  ○ 0.5 FCE: MSL2350H or INF2040H
		  ○ MSL4000Y (1.0 FCE)
		  ○ 1.0 FCE in electives.
		• Concentration Pathway:
		  ○ 2.0 required FCEs as follows: MSL1150H, MSL1230H, MSL2231H, and MSL2370H
		  ○ 0.5 FCE: MSL2350H or INF2040H
		  ○ MSL4000Y (1.0 FCE)
		  ○ 1.0 FCE in electives.

3	• Complete 3.5 FCEs towards the MI and MMSt program requirements.	• General Program Pathway:
		  ○ 3.5 FCEs in electives.
		• Concentration Pathway:
		  ○ 3.5 FCEs in courses remaining for the concentration, and electives.

Program Length

3 years

Time Limit

4 years

UTSC, Integrative Biology (Specialist), Honours Bachelor of Science / Master of Environmental Science

UTSC Int Bio (Spec) HBSc / MEnvSc: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist in Integrative Biology / Master of Environmental Science** (MEnvSc) is designed for students interested in studying the intersections of environmental sciences with professional experiential preparation in emerging environmental challenges.

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and a Master of Environmental Science degree. Distinct advantages include:

- early application to the MEnvSc program (in Year 3) and conditional admission to the MEnvSc program;
- addressing demand from undergraduate students for further training in order to improve their level of competence as environmental practitioners; and
- the opportunity to enrol in the MEnvSc program in the Summer session between Years 4 and 5 in order to complete either a two-month academic or internship training, in addition to the mandatory four-month academic or internship opportunity completed by students in the MEnvSc program alone.

This CDP permits the completion of both degrees in five years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Int Bio (Spec) HBSc / MEnvSc: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MEnvSc program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MEnvSc program; those accepted will receive a conditional offer to start the MEnvSc program upon completion of their HBSc program and degree requirements.

UTSC Int Bio (Spec) HBSc / MEnvSc: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MEnvSc program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Integrative Biology specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MEnvSc program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2;
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Complete the following undergraduate courses (1.0 FCE) as part of the HBSc degree requirements:
  - BIOC63H3 *Conservation Biology* and
  - BIOD54H3 *Applied Conservation Biology*.

To be given **full, unconditional admission to the MEnvSc program**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses;
- Achieve at least a grade of B– in both of the graduate courses taken in Year 4 of undergraduate study, chosen in consultation with the graduate program supervisor, as indicated below for each MEnvSc field.
  - Climate Change Impacts and Adaptation field: EES1133H *Climate Change Science and Modelling* plus an additional 0.5 FCE.
  - Conservation and Biodiversity field: EES3002H *Conservation Policy* plus an additional 0.5 FCE.
  - Terrestrial and Aquatic Systems field: 1.0 FCE.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1 to 3	• · HBSc degree requirements.	• The undergraduate degree will include the specialist in Integrative Biology. • By the end of Year 3, students will select one of the three fields of study within the MEnvSc program at the time of application: o Climate Change Impacts and Adaptation; o Conservation and Biodiversity; or o Terrestrial and Aquatic Systems.
4	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements, including specific undergraduate courses for the CDP. • · In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.	• Students who receive a conditional offer of admission to the CDP must complete the following undergraduate courses: o BIOC63H3 *Conservation Biology* (0.5 FCE) and o BIOD54H3 *Applied Conservation Biology* (0.5 FCE). • Students must complete 1.0 FCE in graduate courses, chosen in consultation with the graduate program supervisor, as follows: o Climate Change Impacts and Adaptation field: EES1133H *Climate Change Science and Modelling* (0.5 FCE) plus an elective (0.5 FCE); o Conservation and Biodiversity field: EES3002H *Conservation Policy* (0.5 FCE) plus an elective (0.5 FCE); o Terrestrial and Aquatic Systems field: 1.0 FCE.
Optional registration in the Summer session prior to Year 5	• Optional two-month academic or internship training.	• EES4001H *Internship Training 1* (0.5 FCE) **or** EES4003H *Academic Training 1* (0.5 FCE).

5	• Remaining courses from Year 1 and Year 2 of the MEnvSc program.	• Students registered in the optional Summer academic or internship training must complete 4.0 FCEs as follows: o coursework (2.0 FCEs) and internship (2.0 FCEs) **or** o coursework (2.5 FCEs) and research paper (1.5 FCEs). • Students **not** registered in the optional Summer academic or internship training must complete 4.5 FCEs as follows: o internship option: coursework (2.5 FCEs) and internship (2.0 FCEs) **or** o research option: coursework (3.0 FCEs) and research paper (1.5 FCEs).

UTSC, Integrative Biology (Specialist), Honours Bachelor of Science / Master of Teaching

UTSC Int Bio (Spec) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist in Integrative Biology / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

STG Kin BKin / MT: Application Process

- Applicants apply to the BKin program, the MT program, and the CDP.
- Applicants may apply to the CDP in Year 3 of the BKin program for an early conditional admission to the MT program.

STG Kin BKin / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the BKin program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the BKin program:
  - Have a cumulative grade point average (CGPA) of between 3.15 and 3.49 or higher, normally demonstrated by an average grade in Year 2 of the BKin program.
  - Have completed at least half of the teaching subjects' prerequisite courses—i.e., 3.0 full-course equivalents [FCEs] in the first teaching subject and a minimum of 1.0 FCE (or 2.0 FCEs where applicable) in the second teaching subject by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a CGPA of between 3.15 and 3.49 or higher in their final year of study in the BKin program.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete 6.0 FCEs in the first teaching subject (i.e., health and physical education).
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their BKin academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the BKin degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*
1 to 4	• BKin degree requirements. • In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses. • By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.	• The undergraduate degree will include: ○ a minimum of 6.0 FCEs in the first teaching subject (i.e., health and physical education); ○ a minimum of 3.0 FCEs in the second teaching subject[1]. • By the end of Year 3, complete 3.0 FCEs in the first teaching subject and 1.0 FCE in the second teaching subject. • In Year 4, students who receive a conditional offer of admission to the CDP complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the BKin and MT degree programs.
5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] Note that the teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
*The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1	• Year 1 JD program requirements.	• Complete all Year 1 courses of the JD program at the Faculty of Law.
2 and 3	• JD program requirements. • MA program requirements.	• Complete 45 JD credits including a moot, an extended paper, a perspective course, and an international/comparative/transnational (ICT) course. • Complete 3.0 full-course equivalents (FCEs) toward the MA program requirements including CRI2010H (0.5 FCE) and a course in theory or research methods. Students may choose to complete the continuous course CRI3360Y *Research Paper* (1.0 FCE). • Complete a minimum of 1.0 FCE with a CRI designation in each of Years 2 and 3, and a maximum of 2.0 FCEs in CRI courses per year. The number of JD credits completed each year will be adjusted accordingly, with the only requirement being that 45 credits are completed over the two years.

STG, Law, Juris Doctor / Economics, Doctor of Philosophy

STG JD / Eco PhD: Introduction

Overview

The **Combined Degree Program (CDP): STG, Law, Juris Doctor / Economics, Doctor of Philosophy** allows a student to complete all the requirements for the Juris Doctor (JD) program and all the requirements for the PhD program (except a dissertation) in four years rather than the five years it would take to acquire them independently. In Years 5 and 6, students will complete a dissertation.

For a general description of CDPs, see General Regulations section 1.4.3.

STG JD / Eco PhD: Application Process

- Applicants must apply to the Juris Doctor (JD) program, the Economics PhD program, and the CDP.
- Applicants are considered for the CDP after they have secured independent admission to the JD and PhD programs.
- Applicants admitted to both the JD and PhD must inform both programs of their status and request admission to the CDP.
- Applicants may also be considered for the CDP while they are in Year 1 of the JD program. Interested students should contact the Faculty of Law about this before applying to the CDP.

STG JD / Eco PhD: Requirements

Minimum Admission Requirements

· Applicants must meet the admission requirements of the JD program, the School of Graduate Studies, and the PhD program.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*
1	• Year 1 JD program requirements.	• Complete all Year 1 courses of the JD program at the Faculty of Law.
2	• PhD program requirements.	• Students normally complete ECO2010H *Mathematics and Statistics for PhD Students* (0.5 full-course equivalent [FCE]; Credit/No Credit) plus 3.0 FCEs as follows: ECO2200H and ECO2201H, macroeconomics (ECO2100H and ECO2101H), and econometrics (ECO2400H and ECO2401H). • Complete theory comprehensive exams.
3	• PhD and JD program requirements.	• Complete an additional 3.0 FCEs in economics courses including the required courses for a major field and minor field of specialization. • May be required to complete a field comprehensive exam in the major field of specialization. • Complete 0.5 FCE in law and economics. • Participate in the full-year continuous course ECO4060Y *Graduate Research Seminar* (Credit/No Credit). • Complete the Year 2 economics paper. • Complete 14 to 16 JD credit hours.
4	• JD program requirements.	• Complete 28 to 32 JD credit hours including the extended paper requirement in law.
5 and 6	• PhD program requirements.	• Complete a PhD dissertation. • It is expected, but not required, that a student's dissertation committee will include a member of the Faculty of Law.

STG, Law, Juris Doctor / Economics, Master of Arts

STG JD / Eco MA: Introduction

Overview

The **Combined Degree Program (CDP): STG, Law, Juris Doctor / Economics, Master of Arts** is designed for students who intend to pursue careers in areas that require some sophistication in economics, such as competition policy, commercial contracting, mergers and acquisitions, business organization, tax policy, environmental law, and international trade regulation.

The CDP permits the completion of both the Juris Doctor (JD) program and the eight-month MA program in three years rather than the four years it would take to acquire the degrees independently. (Note that this program cannot be combined with any of the collaborative specializations.)

For a general description of CDPs, see General Regulations section 1.4.3.

1	• Year 1 JD program requirements	• Complete all Year 1 courses of the JD program at the Faculty of Law.
2	• Year 1 MPP program requirements, with the exception of PPG1008H.	• Complete 3.0 full-course equivalents (FCEs) in the MPP program: ○ PPG1000H *Governance, Institutions, and Public Policy*; ○ PPG1002H *Microeconomics for Policy Analysis*; ○ PPG1003H *Macroeconomics for Policy Analysis*; ○ PPG1004H *Quantitative Methods for Policy Analysis*; ○ PPG1005H *The Social Context of Policy-Making*; and ○ PPG1007H *Strategic Policy Implementation*. • Substitute PPG1008H with an equivalent Law course (0.5 FCE) and obtain a minimum B+. • In the Summer session of Year 2, complete PPG2006Y *MPP Internship*.
3 and 4	• MPP and JD program requirements.	• Complete 2.5 FCEs in the MPP program: ○ · PPG2000H *Politics and the Policy Process*; ○ · PPG2002H *Topics in Applied Economics for Public Policy*; ○ · PPG2003H *Capstone Course: Integrating Issues in Public Policy*; ○ · either PPG2011H *Ethics and the Public Interest* or PPG2022H *Moral Foundations of Public Policy*; and ○ · either GLA2029H *Sustainability in the World: A Living Lab Course* or GLA2034H *Decision Making and Strategic Thinking*. • ·In Year 3, complete a minimum of 2.0 elective FCEs in the MPP program. • In Years 3 and 4, complete a total of 41 to 45 JD credits, of which at least 18 credits are completed in Year 3. These include a perspective course, a moot (compulsory or competitive), and a Supervised Upper-Year Research Paper (SUYRP). Students graduating in 2017 or later will earn 45 JD credits.

STG, Law, Juris Doctor / Master of Social Work

STG JD / MSW: Introduction

Overview

The **Combined Degree Program (CDP): STG, Law, Juris Doctor / Master of Social Work** combines the Faculty of Law's interdisciplinary teaching environment with its commitment to public interest law. The program is designed for students who wish to practise in the areas in which law and social work interact (for example, child welfare, mental health, social policy, human rights).

The CDP permits completion of both the Juris Doctor (JD) and Master of Social Work (MSW) degrees in four years rather than the five years it would take to acquire them independently.

Students who enter with a Bachelor of Social Work (BSW) will be given advanced standing and are exempted from completing Year 1 of the MSW. Therefore, they will complete Years 1, 3, and 4 of the CDP only, completing the CDP in three years.

For a general description of CDPs, see General Regulations section 1.4.3.

STG, Law, Juris Doctor / Philosophy, Doctor of Philosophy

STG JD / Phl PhD: Introduction

Overview

The **Combined Degree Program (CDP): STG, Law, Juris Doctor / Philosophy, Doctor of Philosophy** enables students to pursue a deep investigation of the complex issues that lie at the intersection between law and philosophy. The CDP permits completion of both the Juris Doctor (JD) and PhD degrees one year sooner than it would take to acquire them independently. At the end of that period, the student will have completed the JD degree and reached the dissertation stage of the PhD in Philosophy.

For a general description of CDPs, see General Regulations section 1.4.3.

STG JD / Phl PhD: Application Process

- Applicants must apply to the JD program, the PhD (Philosophy) program, and the CDP.
- Applicants may be considered for the CDP after they have gained independent admission to both the JD and PhD programs.
- Only after admission has been secured from both departments will the coordinator advise the applicant of admission into the program.
- Applicants may also be considered for the CDP while they are in Year 1 of the JD program. Interested students should contact the Faculty of Law about this before applying to the CDP.

STG JD / Phl PhD: Requirements

Minimum Admission Requirements

- Applicants must meet the admission requirements of the JD program, the School of Graduate Studies, and the PhD program.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1	• Year 1 JD program requirements.	• Complete all Year 1 courses of the JD program at the Faculty of Law.
2 and 3	• JD program requirements. • PhD program requirements.	• Complete 48 JD credits including a moot, a perspective course, and an international/comparative/transnational (ICT) perspective course. • 2.0 full-course equivalents (FCEs) in Philosophy courses, which will count as 8 JD credits toward the total JD credits required.
4	• PhD program requirements.	• Complete any remaining courses in the PhD program. • Complete area and language exams required for the PhD program.
5 and 6	• PhD program requirements.	• Complete any remaining PhD program requirements and a PhD thesis.

STG, Law, Juris Doctor / Political Science, Doctor of Philosophy

STG JD / Pol PhD: Introduction

Overview

The **Combined Degree Program (CDP): STG, Law, Juris Doctor / Political Science, Doctor of Philosophy** is designed for students interested in studying the intersection of law and political science. The CDP permits completion of both the Juris Doctor (JD) and PhD degrees at least one year sooner than it would take to acquire them independently.

For a general description of CDPs, see General Regulations section 1.4.3.

Juris Doctor Program
Faculty of Law
Email: law.admissions@utoronto.ca

Doctor of Philosophy Program in Political Science
Department of Political Science
Email: poligrad@utoronto.ca

STG JD / Pol PhD: Application Process

- Applicants must apply to the Juris Doctor (JD) program, the PhD (Political Science) program, and the CDP.
- Applicants may be considered for admission to the CDP after they have gained independent admission to both the JD and PhD programs.
- Applicants admitted to the JD and PhD must inform both programs of their status and request admission to the CDP.
- Applicants may also be considered for the CDP while they are in Year 1 of the JD program. Interested students should contact the Faculty of Law about this before applying to the CDP.

STG JD / Pol PhD: Requirements

Minimum Admission Requirements

- Applicants must meet the admission requirements of the JD program, the School of Graduate Studies, and the PhD program.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1	• Year 1 JD program requirements.	• Complete all Year 1 courses of the JD program at the Faculty of Law.
2	• PhD program requirements.	• Students complete coursework and exams required for the PhD program. • ·Specific requirements will vary based on the student's choice of fields and whether a PhD student is admitted via direct entry.
3 and 4	• JD program requirements.	• Complete 48 JD credits including the Directed Research Program. • Any language requirements for the PhD must be completed by the end of Year 4.
5 and 6	• PhD program requirements.	• Complete any remaining PhD program requirements and also a PhD thesis.

STG, Management, Master of Business Administration / Master of Global Affairs

STG MBA / MGA: Introduction

Overview

The **Combined Degree Program (CDP): STG, Management, Master of Business Administration / Master of Global Affairs** is designed for students interested in studying the intersections of business and global affairs. The CDP permits the completion of both degrees in three years rather than the four years it would take to acquire them independently.

For a general description of CDPs, see General Regulations section 1.4.3.

Master of Business Administration Program
Rotman School of Management
Email: ro@rotman.utoronto.ca

Master of Global Affairs Program
Munk School of Global Affairs and Public Policy
Email: mga@utoronto.ca

STG MBA / MGA: Application Process

- Applicants must apply to the Master of Business Administration (MBA) program, the Master of Global Affairs (MGA) program, and the CDP.
- Applicants must gain independent admission to both the MBA and MGA programs before they may be considered for admission to the CDP. Alternatively, applicants may apply to the MBA program and CDP in Year 1 of the MGA program.

STG MBA / MGA: Requirements

Minimum Admission Requirements

- Applicants must meet the admission requirements of the School of Graduate Studies, the MBA program, and the MGA program.
- Applicants to the MBA program must meet the following admission requirements:
- An appropriate bachelor's degree from a recognized university.
- A satisfactory score on the Graduate Management Admissions Test (GMAT) or the Graduate Record Examination (GRE; General Test). Test results are valid for five years.
- The minimum two-year work experience requirement will be waived for CDP applicants.
- The Full-Time MBA program starts annually in August. Applicants to the full-time program are encouraged to apply as per the deadline dates (beginning in October with a final deadline in May).
- Applicants to the MGA program must meet the following admission requirements:
- An appropriate bachelor's degree with a minimum standing in the final year equivalent to at least a University of Toronto B+.
- The program is open to all disciplinary backgrounds.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1	• 5.0 full-course equivalents (FCEs) in MGA program requirements with a minimum B+ standing. • At the end of Year 1, declare an emphasis as part of the MGA degree program.	• **3.5 required FCEs:** o GLA1001H *Macroeconomics: Markets, Institutions, and Growth*; o GLA1003H *Global Security*; o GLA1006H *International Legal Challenges*; o GLA1010H *Microeconomics for Global Affairs*; o GLA1011H *Global Innovation Policy*; o GLA1012H *Statistics for Global Affairs*; o GLA1014H *Global Development*. • **1.0 elective FCE** from the following Year MGA courses: o 0.5 FCE from GLA2027H *Ethics and Global Affairs*, GLA2029H *Sustainability in the World: A Living Lab Course*, or GLA2034H *Decision Making and Strategic Thinking*; o 0.5 FCE from the MGA elective course list. • **0.5 FCE:** GLA1007H *Global Internship*, to be taken in the Summer session.
2	• 5.63 FCEs in MBA program requirements.	• **4.13 required FCEs in MBA courses**: o RSM1165H *Leveraging Diverse Teams* (Credit/No Credit); o RSM1201H *Foundations of Strategic Management*; o RSM1210H *Managerial Economics*; o RSM1211H *Economic Environment of Business*; o RSM1215H *Decision Making with Models and Data*; o RSM1220H *Financial Accounting and Reporting: A Global Perspective*; o RSM1222H *Managerial Accounting*; o RSM1231H *Finance I: Global Markets and Valuation*; o RSM1232H *Finance II: Corporate Finance*; o RSM1240H *Operations Management*; o RSM1250H *Managing Customer Value*; o RSM1260H *Leading People in Organizations*; and o RSM1282H *Statistics for Management.* • **1.5 elective FCEs** from the 2000-level MBA course list. • Specific restrictions apply for students who wish to take MBA experiential learning courses. Please refer to the MBA program requirements for more information.
3	• 3.17 FCEs in MBA program requirements. • 3.5 FCEs in MGA program requirements.	• **0.17 required FCE** in MBA courses: RSM1160H *Business Ethics*. • **3.0 elective FCEs** from the 2000-level MBA course list. • **2.5 elective FCEs** in MGA courses. Of these, 1.5 FCEs are taken in the chosen emphasis. • **1.0 required FCE:** GLA2000H *Capstone Seminar* and GLA2111H *Research Methods for Global Affairs*.

To participate in the Rotman Student Exchange Program, students must get permission from both programs. Students in the CDP can only participate in the Rotman Exchange program and not the MGA Exchange Program. No MGA course requirements can be met while on exchange. While on exchange, students must take the equivalent of five elective courses (2.5 FCEs) to meet their MBA elective requirements.

Program Length

3 years

Time Limit

4 years

UTM, Language Teaching and Learning: French (Major), Honours Bachelor of Arts / Master of Teaching

UTM Lang Teach Learn Fre (Maj) HBA / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTM, Honours Bachelor of Arts, Major in Language Teaching and Learning: French / Master of Teaching** (MT) is designed for students interested in studying the intersections of French and education. Students may apply studies in these areas towards professional training leading to teacher certification.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a bachelor's degree from the University of Toronto Mississauga (UTM) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

For a general description of CDPs, see General Regulations section 1.4.3.

UTM Lang Teach Learn Fre (Maj) HBA / MT: Application Process

- Applicants must apply to the Honours Bachelor of Arts (HBA) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBA degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBA program and degree requirements.

UTM Lang Teach Learn Fre (Maj) HBA / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBA degree program and the Language Teaching and Learning: French major program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBA program:

  - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in their final year of study in the HBA program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the major in Language Teaching and Learning: French, which fulfils the 6.0 FCEs required for French (Second Language) as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBA academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBA degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*
1 to 4	• HBA degree requirements. • In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses. • By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.	• The undergraduate degree will include: ○ the major in Language Teaching and Learning: French, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and ○ a minimum of 3.0 FCEs in the second teaching subject.[1] • By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is a science). • In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBA and MT degree programs.
5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTM, Language Teaching and Learning: French and Italian (Specialist), Honours Bachelor of Arts / Master of Teaching

UTM Lang Teach Learn Fre Ita (Spec) HBA / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTM, Honours Bachelor of Arts, Specialist in Language Teaching and Learning: French and Italian / Master of Teaching** (MT) is designed for students interested in studying the intersections of French and education. Students may apply studies in these areas towards professional training leading to teacher certification.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a bachelor's degree from the University of Toronto Mississauga (UTM) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and

UTM Mat Sci (Spec) HBSc / MT: Application Process

- Applicants apply to the Honours Bachelor of Science (HBSc) program, then to the MT program and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTM Mat Sci (Spec) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Mathematical Sciences specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBSc program:

  - Have a B+ average (cumulative grade point average [CGPA]) of 3.3) or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents [FCEs] each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Have an average grade equivalent to at least a B+, normally demonstrated by an average grade in Year 2.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for two teaching subjects as follows:
  - Complete the specialist in Mathematical Sciences, which fulfils the 6.0 FCEs required for Mathematics as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• ·By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the specialist in Mathematical Sciences, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject [1].
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

STG, Mathematics (Major), Honours Bachelor of Science / Master of Teaching

STG Mat (Maj) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): STG, Honours Bachelor of Science, Major in Mathematics / Master of Teaching** (MT) is designed for students interested in studying the intersections of math and education, coupled with professional teacher preparation. Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a bachelor's degree from the Faculty of Arts and Science and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE), St. George (STG) campus. They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

STG Mat (Maj) HBSc / MT: Application Process

- Applicants apply to the Honours Bachelor of Science (HBSc) program, then to the MT program and the CDP.
- In the Spring session of Year 3 of the HBSc program, students apply for conditional admission to the MT program.

STG Mat (Maj) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Mathematics major program.

- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBSc degree program:
  - Be registered in Year 3 of the HBSc program.
  - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2.
- Have completed or be on course to complete the Education and Society minor program (Victoria College).
- Have completed at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which applicants are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the major in Mathematics, which fulfils the 6.0 FCEs required for Mathematics as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - · Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the MT program website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*
1 to 4	• HBSc degree requirements. • In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses. • By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.	• The undergraduate degree will include: ○ the major in Mathematics, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; ○ the minor in Education and Society; and ○ a second minor, which will also qualify as the minimum 3.0 FCEs required for the second teaching subject[1]. • By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science). • In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc and MT degree programs.
5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTSC, Mathematics (Major), Honours Bachelor of Science / Master of Teaching

UTSC Mat (Maj) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Major in Mathematics / Master of Teaching** (MT) is designed for students interested in studying the intersections of math and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

UTSC Mat (Spec Co-op) HBSc / MT: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTSC Mat (Spec Co-op) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Mathematics specialist co-op program.

- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing the HBSc program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the specialist co-op in Mathematics, which fulfils the 6.0 FCEs required for Mathematics as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the specialist co-op in Mathematics, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science)..
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc and MT degree programs.

5 and 6	• Remaining courses from Year 1 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.

[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.

* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.

STG, Medicine, Doctor of / Management, Full-Time Option, Master of Business Administration

STG MD / MBA: Introduction

Overview

The **Combined Degree Program (CDP): STG, Medicine, Doctor of / Management, Full-Time Option, Master of Business Administration (MD/MBA FT)** offered jointly by the Temerty Faculty of Medicine and the Rotman School of Management. The MD/MBA FT CDP is intended for a small number of medical students who have an interest in becoming health sector leaders with management competencies. Graduates of this CDP will be well positioned to act as the health-care executives of tomorrow, in both the public and private sectors. The MBA FT coursework, combined with the MD curriculum, will prepare students for significant leadership opportunities throughout their career.

Students will complete both programs in five years rather than the six years it would take to acquire the degrees independently.

For a general description of CDPs, see General Regulations section 1.4.3.

Doctor of Medicine Program
Temerty Faculty of Medicine
Email: reception.registrar@utoronto.ca

Master of Business Administration Program
Rotman School of Management
Email: ro@rotman.utoronto.ca

STG MD / MBA: Application Process

- Applicants must apply to the Doctor of Medicine (MD) program, the Master of Business Administration (MBA) Full-Time Option, and the CDP.
- Applicants must gain independent admission to both the MD and MBA programs before they may be considered for admission to the CDP.
- Qualified students in Year 3 of the MD degree program apply to the MBA Full-Time Option and the CDP.

STG MD / MBA: Requirements

Minimum Admission Requirements

- Applicants must meet the admission requirements of the MD program, the School of Graduate Studies, and the full-time MBA program.
- Applicants must meet the same admission requirements as regular FT MBA applicants, except where noted below:
- Obtain a satisfactory score on the Medical College Admission Test (MCAT).
- Graduate Management Admission Test (GMAT) and Graduate Record Examination (GRE) General Test scores will be waived.
- Provide two references — these can be related to applicants' MD experience, pre-MD experience, and volunteering, in addition to professional experiences.
- MD students must be in good academic standing.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1	• Year 1 MD program requirements.	• Complete Year 1 courses of the MD program: 6.0 full-course equivalents (FCEs).
2	• Year 2 MD program requirements.	• Complete Year 2 courses of the MD program: 5.0 FCEs.
3	• Year 3 MD program requirements. • Students apply to the CDP.	• Complete Year 3 courses of the MD program: 27.5 FCEs.
4	• Year 1 MBA program requirements (including the Summer session).	• Complete Year 1 courses of the MBA program: 9.96 FCEs. • Students may take up to eight electives. • Students will be exempt from taking the following: o RSM1165H *Leveraging Diverse Teams* (0.17 FCE; Credit/No Credit); o RSM1380H *Applied Management Placement* (0.5 FCE); o ·and one Year 2 elective (0.5 FCE).
5	• Year 4 MD program requirements. • Year 2 MBA program requirements.	• MD program: o Complete Year 4 MD courses (7.5 FCEs). o MD students complete the Canadian Resident Matching Service (CaRMS) process. • MBA program: o Complete Year 2 MBA courses (2.5 FCEs). o Students may take up to five electives. CDP students are subject to the same limits on experiential electives as full-time MBA students at the Rotman School. o Students will be exempt from taking RSM1160H *Business Ethics* (0.17 FCE).

Program Length

4 years

Time Limit

5 years

STG, Medicine, Doctor of / Doctor of Philosophy

STG MD / PhD: Introduction

Overview

The **Combined Degree Program (CDP): STG, Medicine, Doctor of / Doctor of Philosophy** is offered jointly by the Temerty Faculty of Medicine and the School of Graduate Studies. Selected and highly qualified students have the opportunity to combine their medical school experience with intensive scientific training in a chosen field. Students in this program are eligible for financial support.

Students carry out research under the supervision of a faculty member at the University and should consult the appropriate department or institute regarding specific research programs.

For a general description of CDPs, see General Regulations section 1.4.3.

Degree Programs in This Combination

Students may combine the MD program with one of the following PhD programs:

Biochemistry
Immunology
Laboratory Medicine and Pathobiology
Medical Biophysics
Medical Science
Molecular Genetics
Nutritional Sciences
Pharmacology
Physiology

Contact

Doctor of Medicine / Doctor of Philosophy Program
Temerty Faculty of Medicine
Web: md.utoronto.ca
Email: mdphd.program@utoronto.ca

STG MD / PhD: Requirements

Minimum Admission Requirements

- Applicants must be accepted by the Temerty Faculty of Medicine and meet the requirements of the School of Graduate Studies and the department in which they intend to carry out their graduate studies.
- Students with a master's degree and medical students are eligible to apply.

Program Requirements

- Applicants may pursue the dual degrees via an integrated or a sequential route.
- **Integrated:** Students with a master's or bachelor's degree enter the MD/PhD program and, within a six- to seven-year period, complete the requirements of the first two years of the MD program and all requirements of the PhD program. During this time, a predetermined program of integration is pursued which provides time allocation for both medical school and graduate study. On completion of the PhD requirements, students return full-time to the medical program.
- **Sequential:** Students with a master's or bachelor's degree enter the medical program on a full-time basis. After 12 to 18 months of medical school, they proceed to full-time graduate work until the PhD requirements are completed. Students then return to medical school to complete the last 2 to 3 years.

UTSC, Management and Accounting (Specialist), Bachelor of Business Administration / Master of Accounting and Finance

UTSC Mgt Acc (Spec) BBA / MAccFin: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Bachelor of Business Administration (BBA), Specialist in Management and Accounting / Master of Accounting and Finance (MAccFin)** allows exceptional students who are registered in the Management and Accounting (Specialist) program to apply during Year 2 of their studies and be considered for admission to the MAccFin program. The CDP is designed for students with no prior work experience who are interested in pursuing careers in account management, wealth management, consultancy, and entrepreneurship.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Mgt Acc (Spec) BBA / MAccFin: Application Process

- Applicants must apply to the BBA program, the MAccFin program, and the CDP.
- Qualified students in Year 2 of their BBA program apply to the MAccFin program; those accepted will receive a conditional offer to start the MAccFin program upon completion of their BBA program and degree requirements.
- Students may apply after they have completed up to 10.0 full-course equivalents (FCEs); however, students who have completed more than 10.0 FCEs may not be considered for admission to the program.
- Provide official transcripts.
- Provide at least two reference letters.
- Provide a resumé.
- Applicants will be scored on each admission requirement and then ranked based on their overall score. Top-ranked applicants will be invited for an interview.

UTSC Mgt Acc (Spec) BBA / MAccFin: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MAccFin program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the BBA degree program and the Management and Accounting specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MAccFin program.
- Be enrolled full-time and in good standing in the BBA program.
  - Maintain a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2.
  - Carry a full course load of 5.0 FCEs each year (i.e., complete 5.0 FCEs over three academic sessions: Fall, Winter, Summer).
- Complete all of the requirements of the Management and Accounting specialist program, with the following modifications:
  - MGEC08H3 *Economics of Markets and Financial Decision Making* replaces 1.0 FCE in C-level Economics courses;

- Students are exempted from MGEB12H3 *Quantitative Methods in Economics II* and MGAD70H3 *Advanced Accounting Case Analysis: A Capstone Course*;
- Students must complete MGFD10H3 *Investments* (0.5 FCE in Finance courses);
  - In the Summer session of Year 3 of their undergraduate studies, students must complete the following graduate courses; the 1.0 FCE in graduate courses will be graded as graduate courses, as per the University Assessment and Grading Practices and Policy, 2020 (section B.4.1.2), and will count towards both the BBA degree and the MAccFin program and degree:
    - MAF2001H *Economics and Quantitative Methods* (0.5 FCE);
    - MAF2002H *Advanced Corporate Finance* (0.5 FCE).
- Students are required to complete all of the following advanced accounting courses, which are necessary for Chartered Professional Accountant (CPA) designation: MGAD20H3, MGAD40H3, MGAD45H3, MGAD50H3, and MGAD65H3.

To be given **full, unconditional admission to the MAccFin program**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in their final year of study in the BBA program or over upper-level (C- and D-level) courses.
- Students must have completed the following courses: MGAB02H3, MGAB03H3, MGAC01H3, MGFB10H3, and MGEB11H3, and have achieved a minimum grade of C+ (65%) in each course and an overall average of B+ (77%) across the courses.
- Students must have successfully completed specific non-core courses as determined by their undergraduate degree, and must have successfully completed specific core courses with a minimum grade of C+ (65%) in each course and an overall average of B (73%) across all core courses.
- Be conferred with the BBA degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1 to 4	• BBA degree requirements.	• Students must complete all BBA program requirements, with the modifications described above, and the degree requirements. • Students are expected to carry a full course load of 5.0 full-course equivalents (FCEs) over the three academic sessions (Fall, Winter, Summer) of each year. • By the end of the Summer session of Year 3, students who receive a conditional offer of admission to the CDP must complete MAF2001H and MAF2002H. These courses (1.0 FCE) are counted towards the completion of both the BBA degree and MAccFin degree. • By the end of Year 4, fulfil both the undergraduate program requirements and the undergraduate degree requirements.
5 and 6	• Remaining MAccFin program requirements.	• Conditions of admission are removed following the student's graduation from the BBA program. • Sessions 1 to 4: students must complete the remaining 7.5 FCEs of the MAccFin program and degree requirements.

UTSC, Mental Health Studies (Specialist), Honours Bachelor of Science / Master of Social Work

UTSC MHS (Spec) HBSc / MSW: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist in Mental Health Studies / Master of Social Work** (MSW) provides a rich intellectual pathway for exceptional undergraduate students pursuing a career in social work. The CDP gives students access to social work research before they complete their undergraduate degree.

Students have an opportunity to become equipped for evidence-informed social work practice, through a research course in Year 4, with a Factor-Inwentash Faculty of Social Work co-supervisor.

The CDP allows well-qualified students in this specialist undergraduate program to apply during Year 3 and be considered for admission into the MSW two-year full-time program.

For a general description of CDPs, see General Regulations section 1.4.3.

Minimum Admission Requirements

- Applicants must meet the admission requirements of the HBSc program, the School of Graduate Studies, and the MSW program.
- · Applicants to the HBSc program must:
  - be enrolled full-time and in good standing;
  - have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2;
  - carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Applicants to the MSW program must:
  - maintain a B+ average (CGPA of 3.3) or higher in Year 3 and Year 4 of their HBSc program;
  - complete the requirements of their HBSc program;
  - be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements

1 to 4	• HBSc degree requirements.	• Students must complete all HBSc program requirements and degree requirements.
		• Students are expected to carry a full course load of **5.0 full-course equivalents (FCEs)** over the three academic sessions (Fall, Winter, Summer) of each year.
		• In Year 3, qualified students may apply to the MSW program and the CDP and may be offered conditional admission.
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete 1.5 FCEs as follows:
		  ○ UTSC D-level research course PSYD98Y3 *Thesis in Psychology* under the supervision of a UTSC Psychology faculty member in consultation with a Social Work faculty member (1.0 FCE).
		  ○ UTSC D-level course PSYD37H3 *The Social Context of Mental Health and Illness* (0.5 FCE).
		• By the end of Year 4, fulfil both the undergraduate program requirements and the undergraduate degree requirements.

5	• MSW Year 1 program requirements. • Students must select a specialization by the end of Year 1 of the MSW program.	• Conditions of admission are removed. • Students must complete **4.0 FCEs** as follows: SWK4102H, SWK4103H, SWK4105H, SWK4107H, SWK4510H, SWK4602H, SWK4605H, SWK4654H. • Student must complete the Year 1 practicum (SWK4701H+). • By the end of Year 1 of the MSW program, students must select one of the following fields of specializations: Children and Their Families; Gerontology; Health and Mental Health; Social Justice and Diversity; Social Service Administration.

6	• MSW Year 2 program requirements.	• In Year 2 of the MSW program, all students complete **1.0 FCE** in electives, the Year 2 practicum (SWK4702Y), and additional courses in their chosen field of specialization:
		  ○ Children and Their Families: SWK4514H, SWK4608H, SWK4620H, SWK4625H.
		  ○ Gerontology: AGE2000H, SWK4513H, SWK4612Y, SWK4618H.
		  ○ Health and Mental Health: SWK4412H, SWK4511H, and *either:* SWK4622H and SWK4604H, *or* SWK4622H and SWK4632H, *or* SWK4604H and SWK4631H.
		  ○ Social Justice and Diversity: SWK4304H, SWK4306H, SWK4512H, SWK4606H.
		  ○ Social Service Administration: SWK4425H, SWK4426H, SWK4427H, SWK4515H.

+ Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.

- Qualified students in Year 3 of the HBSc program apply to the MSW program; those accepted will receive a conditional offer to start the MSW program upon completion of their HBSc program requirements.

UTSC MHS (Spec Co-op) HBSc / MSW: Requirements

Minimum Admission Requirements

- Applicants must meet the admission requirements of the HBSc program, the School of Graduate Studies, and the MSW program.
- Applicants to the HBSc program must:
  - be enrolled full-time and in good standing;
  - have a B+ average (CGPA of 3.3) or higher in Year 2;
  - carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer].
- Applicants to the MSW program must:
  - maintain a B+ average (CGPA of 3.3) or higher in Year 3 and Year 4 of their HBSc program;
  - complete the requirements of their HBSc program;
  - be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements

1 to 4	• HBSc degree requirements.
	• Work terms to fulfil the co-op requirement.
		• Students must complete all HBSc program requirements and degree requirements.
		• Students are expected to carry a full course load of **5.0 full-course equivalents (FCEs)** over the three academic sessions (Fall, Winter, Summer) of each year.
		• In Year 3, qualified students may apply to the MSW program and the CDP and may be offered conditional admission.
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete 1.5 FCEs as follows:
		  ○ UTSC D-level research course PSYD98Y3 *Thesis in Psychology* under the supervision of a UTSC Psychology faculty member in consultation with a Social Work faculty member (1.0 FCE).
		  ○ UTSC D-level course PSYD37H3 *The Social Context of Mental Health and Illness* (0.5 FCE).
		• By the end of Year 4, fulfil both the undergraduate program requirements and the undergraduate degree requirements.

5	• MSW Year 1 program requirements. • Students must select a specialization.	• Conditions of admission are removed. • Students must complete **4.0 FCEs** as follows: SWK4102H, SWK4103H, SWK4105H, SWK4107H, SWK4510H, SWK4602H, SWK4605H, SWK4654H. • Students must complete the Year 1 practicum (SWK4701H+). • By the end of Year 1 of the MSW program, students must select one of the following fields of specializations: Children and Their Families; Gerontology; Health and Mental Health; Social Justice and Diversity; or Social Service Administration.

6	• MSW Year 2 program requirements.	• In Year 2 of the MSW program, all students complete **1.0 FCE** in electives, the Year 2 practicum (SWK4702Y), and additional courses in their chosen field of specialization:
		  ○ Children and Their Families: SWK4514H, SWK4608H, SWK4620H, SWK4625H.
		  ○ Gerontology: AGE2000H, SWK4513H, SWK4612Y, SWK4618H.
		  ○ Health and Mental Health: SWK4412H, SWK4511H, and *either:* SWK4622H and SWK4604H*, *or* SWK4622H and SWK4632H, *or* SWK4604H* and SWK4631H.
		  ○ Social Justice and Diversity: SWK4304H, SWK4306H, SWK4512H, SWK4606H.
		  ○ Social Service Administration: SWK4425H, SWK4426H, SWK4427H, SWK4515H.
		  ○ *Students who have completed the specialist co-op in Mental Health Studies are exempt from SWK4604H and must replace this with another SWK elective.

+ Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.

UTM, Molecular Biology (Specialist), Honours Bachelor of Science / Master of Teaching

UTM Mol Bio (Spec) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTM, Honours Bachelor of Science, Specialist in Molecular Biology / Master of Teaching** (MT) is designed for students interested in studying the intersections of biology and education. Students may apply studies in these areas towards professional training leading to teacher certification.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a bachelor's degree from the University of Toronto Mississauga (UTM) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

For a general description of CDPs, see General Regulations section 1.4.3.

UTM Mol Bio (Spec) HBSc / MT: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTM Mol Bio (Spec) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Molecular Biology specialist program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBSc program:

    - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2.
    - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
    - Complete the specialist in Molecular Biology, which fulfils the 6.0 FCEs required for Science-Biology, Science-Chemistry, or Science-General as a first teaching subject.
    - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
        - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*
1 to 4	• HBSc degree requirements. • In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses. • By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.	• The undergraduate degree will include: ○ the specialist in Molecular Biology, where the course requirements will fulfil 6.0 FCEs required for the first teaching subject; and ○ a minimum of 3.0 FCEs in the second teaching subject.[1] • By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science). • In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc and MT degree programs.
5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTSC, Molecular Biology and Biotechnology (Specialist), Honours Bachelor of Science / Master of Teaching

UTSC Mol Bio Biotech (Spec) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist in Molecular Biology and Biotechnology / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

STG, Music Education (Stream), Bachelor of Music / Master of Teaching

STG Mus MusEd MusBac / MT: Introduction

Overview

The **Combined Degree Program (CDP): STG, Bachelor of Music, Music, Stream in Music Education / Master of Teaching** (MT) is designed for Music Education students who are interested in pursuing a teaching career to gain early, conditional admission to the Master of Teaching program.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a bachelor's degree and an accredited professional MT degree, and will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

For a general description of CDPs, see General Regulations section 1.4.3.

STG Mus MusEd MusBac / MT: Application Process

- Applicants must apply to the Bachelor of Music (MusBac) program (Stream in Music Education), the MT program, and the CDP.
- Applicants must gain independent admission to both the MusBac (Stream in Music Education) and MT programs before they may be considered for admission to the CDP.

STG Mus MusEd MusBac / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the MusBac (Stream in Music Education) degree program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the MusBac (Stream in Music Education) program:
  - Have a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).

- Have completed at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants should list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average (CGPA of 3.3) or higher in their final year of study in the MusBac (Stream in Music Education) program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which applicants are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the MusBac (Stream in Music Education) program, which fulfils the 6.0 FCEs required for Music-Instrumental or Music-Vocal as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their MusBac (Stream in Music Education) academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the MusBac (Stream in Music Education) degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*
1 to 4	• MusBac (Stream in Music Education) degree requirements. • In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses. • By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.	• The undergraduate degree will include: o a minimum of 6.0 FCEs in the first teaching subject: Music-Instrumental or Music-Vocal; and o a minimum of 3.0 FCEs in the second teaching subject.[1] • By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science). • In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the MusBac (Stream in Music Education) and MT degree programs.
5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.

STG PharmD / MBA: Introduction

Overview

The Leslie Dan Faculty of Pharmacy (LDFP) and the Rotman School of Management offer the **Combined Degree Program (CDP): STG, Doctor of Pharmacy / Management, Master of Business Administration**. Unique in Canada, this CDP provides graduates with unparalleled opportunities for leadership within the health-care and pharmaceutical manufacturing sectors. The CDP permits completion of both the Doctor of Pharmacy (PharmD) and Full-Time Master of Business Administration (MBA) programs in less time than it would take to acquire them separately.

The CDP is only open to applicants who have completed a bachelor's degree (e.g., BA, BSc, BEng) prior to enrolling in the PharmD program and who have successfully completed admission requirements for entry to the Full-Time MBA program.

For a general description of CDPs, see General Regulations section 1.4.3.

STG PharmD / MBA: Application Process

- Applicants must apply to the PharmD program, the MBA program, and the CDP.
- Applicants may be considered for admission to the CDP after they have gained independent admission to both the PharmD and MBA programs.
- Applicants are required to:
  - Be enrolled full-time in the PharmD program
  - Complete all Year 2 PharmD requirements successfully
  - Be in good academic standing
  - Meet the admission requirements of the two-year MBA program. There are five admission rounds, each with their own deadlines. Applicants to the CDP must apply in round 1 or 2 in order to be considered for admission.

STG PharmD / MBA: Requirements

Minimum Admission Requirements

- Applicants must meet the admission requirements of the PharmD program, the School of Graduate Studies, and the MBA program.
- Complete all required PharmD coursework and clinical rotations successfully prior to starting the MBA program.
- Apply the first session of coursework in the MBA program as fulfilling the elective requirement for the PharmD program.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*
1 and 2	• PharmD program requirements. • Apply to the MBA program in Year 2.	• Complete Year 1 and Year 2 PharmD courses and gain acceptance to the MBA program. • At the end of Year 2 in May, complete Early Practice Experience II (EPE II). • Complete clinical rotation requirements including the Transitional Pharmacy Practice Experience I (TPPE I), a five-week CDP experiential education rotation that will generally run from late July to late August. This TPPE rotation satisfies PharmD clinical rotation requirements for the PharmD degree.
3	• PharmD program requirements.	• Complete all required and elective PharmD courses for the Fall session. Students may choose to take PHM389 *Research Project*. • In early January, complete an Experiential APPE Transition course before starting Advanced Pharmacy Practice Experience (APPE) rotations. • From January to August, complete six APPE rotations organized by the Office of Experiential Education.
4 and 5	• Final PharmD program requirements. • MBA program requirements.	• MBA courses taken in the Fall session of Year 4 will count as electives toward the PharmD program requirements. • Complete remaining MBA program requirements in the Winter session of Year 4 and Fall and Winter sessions of Year 5. • Specific restrictions apply for students who wish to take MBA experiential learning courses. Please refer to the MBA program requirements for more information.

Program Length

5 years

Time Limit

6 years

UTSC, Physical and Mathematical Sciences (Specialist), Honours Bachelor of Science / Master of Teaching

UTSC Phy Mat Sci (Spec) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Specialist in Physical and Mathematical Sciences / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Phy Mat Sci (Spec) HBSc / MT: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTSC Phy Mat Sci (Spec) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Physical and Mathematical Sciences specialist program.

- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must:

- Maintain a B+ average or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the specialist in Physical and Mathematical Sciences, which fulfils the 6.0 FCEs required for Science-Physics as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- · Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• ·In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• A minimum of 20.0 FCEs in undergraduate courses. This includes:
		  ○ the specialist in Physical and Mathematical Sciences, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc degree (20.0 FCEs) and MT degree (10.0 FCEs).

5 and 6	• · Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

STG, Physical Education and Health, Bachelor of Physical and Health Education / Master of Teaching

STG PEH BPHE / MT: Introduction

This combined degree program will close on August 31, 2025.

Overview

The **Combined Degree Program (CDP): STG, Bachelor of Physical and Health Education / Master of Teaching** (MT) is designed for students interested in studying the intersections of kinesiology and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a Bachelor of Physical and Health Education (BPHE) degree from the Faculty of Kinesiology and Physical Education and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

STG PEH BPHE / MT: Application Process

- Applicants apply to the BPHE program, the MT program, and the CDP.
- Applicants may apply to the CDP in Year 3 of the BPHE program for an early conditional admission to the MT program.

STG PEH BPHE / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the BPHE program.

- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the BPHE program.
  - Have a cumulative grade point average (CGPA) of between 3.15 and 3.49 or higher, normally demonstrated by an average grade in Year 2 of the BPHE program.
  - Have completed at least half of the teaching subjects' prerequisite courses—i.e., 3.0 full-course equivalents [FCEs] in the first teaching subject and a minimum of 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a CGPA of between 3.15 and 3.49 or higher in their final year of study in the BPHE program.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete 6.0 FCEs in the first teaching subject (i.e., health and physical education).
  - Complete a minimum of 3.0 FCEs in the second teaching subject. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their BKin academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the BPHE degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*
1 to 4	• BPHE degree requirements. • In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses. • By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.	• The undergraduate degree will include: ○ a minimum of 6.0 FCEs in the first teaching subject (i.e., health and physical education); ○ a minimum of 3.0 FCEs in the second teaching subject[1]. • By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science). • In Year 4, students who receive a conditional offer of admission to the CDP complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the BPHE and MT degree programs.
5 and 6	• · Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] Note that the teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
*The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTM, Physics (Major), Honours Bachelor of Science / Master of Teaching

UTM Phy (Maj) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTM, Honours Bachelor of Science, Major in Physics / Master of Teaching** (MT) is designed for students interested in studying the intersections of physics and education. Students may apply studies in these areas towards professional training leading to teacher certification.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a bachelor's degree from the University of Toronto Mississauga (UTM) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Phy Ast (Spec) HBSc / MT: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTSC Phy Ast (Spec) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Physics and Astrophysics specialist program.

- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for two teaching subjects as follows:
  - Complete the specialist in Physics and Astrophysics, which fulfils the 6.0 FCEs required for Science-Physics as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the specialist in Physics and Astrophysics, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc and MT degree programs.

5 and 6	• · Remaining courses from Year 1 and Year 2 of the MT program.	• · 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTSC, Plant Biology (Major), Honours Bachelor of Science / Master of Teaching

UTSC Pla Bio (Maj) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Science, Major in Plant Biology / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Pla Bio (Maj) HBSc / MT: Application Process

- Applicants must apply to the Honours Bachelor of Science (HBSc) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBSc degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBSc program and degree requirements.

UTSC Pla Bio (Maj) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Plant Biology major program.

- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBSc program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
- Complete the major in Plant Biology, which fulfils the 6.0 FCEs required for Science-Biology as a first teaching subject.
- Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
- Students should consult often with their HBSc academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- · Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBSc degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the major in Plant Biology, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc degree and MT degree programs.

STG, Psychology (Major), Honours Bachelor of Science / Master of Teaching

STG Psy (Maj) HBSc / MT: Introduction

Overview

The **Combined Degree Program (CDP): STG, Honours Bachelor of Science, Major in Psychology / Master of Teaching** (MT) is designed for students interested in studying the intersections of psychology and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a bachelor's degree from the Faculty of Arts and Science and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE), St. George (STG) campus. They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- · early application to the MT program (in Year 3) and conditional admission to the MT program;
- · eligibility for certification as a teacher in Ontario; and
- · eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

STG Psy (Maj) HBSc / MT: Application Process

- Applicants apply to the Honours Bachelor of Science (HBSc) program, then to the MT program and the CDP.
- In the Spring session of Year 3 of the HBSc program, students apply for conditional admission to the MT program.

STG Psy (Maj) HBSc / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBSc degree program and the Psychology major program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBSc degree program:
  - Be registered in Year 3 of the HBSc program.
  - Have an average grade equivalent to at least a B+, normally demonstrated by an average grade in Year 2.
- Have completed or be on course to complete the Education and Society minor program (Victoria College).
- Have completed at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in their final year of study in the HBSc program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which applicants are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the major in Psychology, which fulfils the 6.0 FCEs required for Psychology as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBA academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the MT program website for more information.
- Be conferred with the HBSc degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*
1 to 4	• HBSc degree requirements. • In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses. • By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.	• The undergraduate degree will include: ○ the major in Psychology, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; ○ the minor in Education and Society; and ○ a second minor, which will also qualify as the minimum 3.0 FCEs required for the second teaching subject[1]. • By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science). • In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBSc and MT degree programs.
5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTM, Psychology (Major), Honours Bachelor of Science / Child Study and Education, Master of Arts

UTM Psy (Maj) HBSc / CSE MA: Introduction

Overview

The **Combined Degree Program (CDP): UTM, Honours Bachelor of Science, Major in Psychology / Child Study and Education, Master of Arts** is designed for students interested in studying human development and related areas, such as diversity and inclusion. Students may apply studies in these areas towards professional training leading to teacher certification.

This CDP permits the completion of both degrees in six years. One full graduate course (1.0 full-course equivalent [FCE]) can be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTM Psy (Maj) HBA / CSE MA: Application Process

- Applicants must apply to the Honours Bachelor of Arts (HBA) program, the MA in Child Study and Education (MA-CSE) program, and the CDP.

UTM Psy (Maj) HBSc / CSE MA: Requirements

Minimum Admission Requirements

- Applicants must meet the admission requirements of the HBSc program, the School of Graduate Studies, and the MA program.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements
1	• Undergraduate courses in accordance with the U of T regulations for the Psychology (Major), HBSc program.	• 5.0 full-course equivalents (FCEs) toward the HBSc program and degree requirements.
2	• Undergraduate courses in accordance with the U of T regulations for the Psychology (Major), HBSc program.	• 5.0 FCEs toward the HBSc program and degree requirements.
3	• Undergraduate courses in accordance with the U of T regulations for the Psychology (Major), HBSc program. • Graduate courses in accordance with the U of T regulations for the MA program.	• 5.0 FCEs toward the HBSc program and degree requirements. • In the Winter session, students apply to the MA program. Upon conditional acceptance, they may apply to the CDP.
4	• Undergraduate courses in accordance with the U of T regulations for the Psychology (Major), HBSc program.	• 5.0 FCEs as follows: • 4.0 FCEs toward the HBSc program and degree requirements. • 1.0 FCE in MA elective courses in the spring and summer between Year 3 and Year 4; this will be counted toward the overall requirements of the HBSc and MA degree requirements. This 1.0 FCE is chosen from among master's-level courses in the Department of Applied Psychology and Human Development and, in some cases, other departments. Elective courses that are especially recommended for Child Study and Education students are listed in the Applied Psychology and Human Development calendar entry. Students without an undergraduate course in child development must take APD1201H *Child and Adolescent Development* as an elective. • Upon degree conferral, students apply to the MA program in order to lift conditions of admission.
5 and 6	• Remaining graduate courses in accordance with the U of T regulations for the MA program.	• 10.0 FCEs in MA program requirements. See the Child Study and Education program entry for full course requirements. • Note that students will have previously completed the 1.0 FCE in electives in the Spring and Summer sessions of Year 3 and Year 4 of the HBSc program.

UTSC Soc Ant (Maj) HBA / MT: Application Process

- Applicants must apply to the Honours Bachelor of Arts (HBA) program, the MT program, and the CDP.
  Qualified students in Year 3 of their HBA degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBA program and degree requirements.

UTSC Soc Ant (Maj) HBA / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBA degree program and the Socio-Cultural Anthropology major program.

- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBA program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBA program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the major in Socio-Cultural Anthropology, which fulfils the 6.0 FCEs required for Social Science-General as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - · Students should consult often with their HBA academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBA degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*

1 to 4	• HBA degree requirements.
	• In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses.
	• By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.
		• The undergraduate degree will include:
		  ○ the major in Socio-Cultural Anthropology, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and
		  ○ a minimum of 3.0 FCEs in the second teaching subject.[1]
		• By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science).
		• In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBA degree and MT degree programs.

5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• ·11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTSC, Socio-Cultural Anthropology (Specialist), Honours Bachelor of Arts / Master of Teaching

UTSC Soc Ant (Spec) HBA / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Arts, Specialist in Socio-Cultural Anthropology / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees.

For a general description of CDPs, see General Regulations section 1.4.3.

UTSC Soc Ant (Spec) HBA / MT: Application Process

- Applicants must apply to the Honours Bachelor of Arts (HBA) program, the MT program, and the CDP.
- Qualified students in Year 3 of their HBA degree program apply to the MT program; those accepted will receive a conditional offer to start the MT program upon completion of their HBA program and degree requirements.

UTSC Soc Ant (Spec) HBA / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBA degree program and the Socio-Cultural Anthropology specialist program.

- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBA program:
  - Have a B+ average or higher in Year 2.
  - Carry a full course load of 5.0 full-course equivalents (FCEs) each year (i.e., complete a minimum of 5.0 FCEs over the three academic sessions [Fall, Winter, Summer]).
- Have completed at least half the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average or higher in their final year of study in the HBA program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which they are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the specialist in Socio-Cultural Anthropology, which fulfils the 6.0 FCEs required for Social Science-General as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBA academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBA degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*
1 to 4	• HBA degree requirements. • In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses. • By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.	• The undergraduate degree will include: o the specialist in Socio-Cultural Anthropology, where the course requirements will fulfil the 6.0 FCEs required for the first teaching subject; and o a minimum of 3.0 FCEs in the second teaching subject.[1] • By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science). • In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBA degree and MT degree programs.
5 and 6	• Remaining courses from Year 1 and Year 2 of the MT program.	• 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

STG, Sociology (Major), Honours Bachelor of Arts / Master of Teaching

STG Soc (Maj) HBA / MT: Introduction

Overview

The **Combined Degree Program (CDP): STG, Honours Bachelor of Arts, Major in Sociology / Master of Teaching** (MT) is designed for students interested in studying the intersections of sociology and education, coupled with professional teacher preparation. Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn a bachelor's degree from the Faculty of Arts and Science and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE), St. George (STG) campus. They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:

- early application to the MT program (in Year 3) and conditional admission to the MT program;
- eligibility for certification as a teacher in Ontario; and
- eligibility to apply for doctoral study.

This CDP permits the completion of both degrees in six years with 1.0 credit (full-course equivalent [FCE]) that may be counted towards both the undergraduate and graduate degrees. For a general description of CDPs, see General Regulations section 1.4.3.

STG Soc (Maj) HBA / MT: Application Process

- Applicants apply to the Honours Bachelor of Arts (HBA) program, then to the MT program and the CDP.
- In the Spring session of Year 3 of the HBA program, students apply for conditional admission to the MT program.

STG Soc (Maj) HBA / MT: Requirements

Minimum Admission Requirements

To be considered for **conditional admission to the MT program and the CDP**, applicants must meet the following admission requirements:

- Be admitted to the HBA degree program and the Sociology major program.
- Meet the admission requirements of the School of Graduate Studies and the MT program.
- Be enrolled full-time and in good standing in the HBA degree program:

  - Be registered in Year 3 of the HBA program.
  - Have an average grade equivalent to at least a B+, normally demonstrated by an average grade in Year 2.
- Have completed or be on course to complete the Education and Society minor program (Victoria College).
- Have completed at least half of the teaching subjects' prerequisite courses—i.e., 3.0 full-course equivalents [FCEs] in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science) by the end of Year 3.
- Provide at least two letters of reference.
- Provide a Statement of Intent indicating their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of children. With reference to these experiences, applicants should identify insights gained about teaching and learning and explain how, based on these insights, they might contribute to the education of students in today's schools. On their resumé, applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students.
- Meet other qualifications as specified by the MT program (a police record check, relevant teaching experiences, academic and professional references, and satisfying teaching subject prerequisites).

To be given **full, unconditional admission to the MT program**, applicants must meet the following admission requirements:

- Maintain a B+ average (cumulative grade point average [CGPA] of 3.3) or higher in their final year of study in the HBA program or over upper-level (C- and D-level) courses.
- Achieve at least a B+ average in the 1.0 graduate FCE taken in Year 4.
- Regardless of the division to which applicants are applying (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior), complete the prerequisites for both the first and second teaching subjects as follows:
  - Complete the major in Sociology, which the fulfils the 6.0 FCEs required for Sociology as a first teaching subject.
  - Complete a second teaching subject consisting of 3.0 FCEs. However, if students are pursuing French or a science as their second teaching subject, 6.0 FCEs are required.
    - Students should consult often with their HBA academic program supervisor to ensure they fulfil all the requirements of the CDP. Visit the Master of Teaching website for more information.
- Be conferred with the HBA degree.

Academic Path to Completion

Every CDP involves a specific combination of approved degree programs. The CDP requirements build on those of the two separate degree programs. Each CDP has a unique pattern of academic activity year by year.

Year	Progression	Specific Requirements*
1 to 4	· HBA degree requirements. · In Year 4, complete 1.0 full-course equivalent (FCE) in graduate courses. · By the end of Year 4, fulfil both the undergraduate program requirements and undergraduate degree requirements.	· The undergraduate degree will include: · the minor in Education and Society; · a minimum of 6.0 FCEs as part of the Sociology major requirements, which will also qualify as prerequisite courses in the first teaching subject; and · a second minor, which will also qualify as the minimum of 3.0 FCEs in the second teaching subject[1]. · By the end of Year 3, complete at least half of the teaching subjects' prerequisite courses—i.e., 3.0 FCEs in the first teaching subject and 1.5 FCEs in the second teaching subject (or 3.0 FCEs if the second teaching subject is French or a science). · In Year 4, students who receive a conditional offer of admission to the CDP must complete any two of the elective half courses recommended for CDP students. These courses (1.0 FCE) are counted towards the completion of both the HBA and MT degree programs.
5 and 6	· Remaining courses from Year 1 and Year 2 of the MT program.	· 11.0 FCEs during Year 1 and Year 2 of the MT program.
[1] The teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General require a minimum of 6.0 FCEs in university courses regardless of whether these teaching subjects are first or second subject specializations.		
* The MT program has three divisions: Primary/Junior, Junior/Intermediate, and Intermediate/Senior. The specific requirements vary based on which division is selected. For details, see the MT calendar entry.		

UTSC, Sociology (Major), Honours Bachelor of Arts / Master of Teaching

UTSC Soc (Maj) HBA / MT: Introduction

Overview

The **Combined Degree Program (CDP): UTSC, Honours Bachelor of Arts, Major in Sociology / Master of Teaching** (MT) is designed for students interested in studying the intersections of science and education, coupled with professional teacher preparation.

Applicants to the MT program must have strong content knowledge in two teaching subjects taught in Ontario schools regardless of the division they are applying to (see the admission requirements below for details).

Students earn an honours bachelor's degree from the University of Toronto Scarborough (UTSC) and an accredited professional Master of Teaching degree at the Ontario Institute for Studies in Education (OISE). They will be recommended to the Ontario College of Teachers for an Ontario Teacher's Certificate of Qualifications as elementary or secondary school teachers. Distinct advantages include:
