Important note: Ontario's response to the COVID-19 pandemic continues to evolve. Changes will likely occur as the province and its municipalities adjust to new data about the virus. In these circumstances, please be advised that changes to the delivery of courses, co-curricular opportunities, programs (including clinical programs or opportunities), and services may become necessary during the academic year. The University thanks its students, faculty, and staff for their flexibility during these challenging times as we work together to maintain the standards of excellence that are the hallmark of the University.

Graduate Studies at the University of Toronto

Established in 1827 by royal charter, the University of Toronto is the largest research-intensive university in Canada, located in one of the world's great urban regions.

Operating on three campuses with more than 93,000 students, including over 20,000 graduate students, the University is globally renowned for its teaching and research, and ranks third among universities worldwide in total output of academic publications.

Although master's degrees were being awarded by the middle of the nineteenth century and the doctorate was established in the 1890s, the School of Graduate Studies (SGS) did not become a distinct academic division within the University of Toronto until 1922.

In 1965, SGS was reorganized and expanded. Today it comprises more than 80 graduate units (departments, centres, and institutes), offering approximately 300 graduate programs.

Most graduate units, while large enough to have a diversity of graduate courses, are small enough to allow students to have a sense of belonging to a recognized community of scholars, colleagues, and associates.

The goal of graduate studies at the University of Toronto is to provide students with the best material and human resources to learn the methods and standards of research necessary to work professionally at the frontiers of knowledge.

Research is central to graduate studies, particularly at the doctoral level. Research-oriented training conveys the importance of keeping pace with a subject, the knowledge of which is always changing. It fosters intellectual curiosity and a creative response to problems. It encourages students to communicate original discoveries effectively.

In the process of education, the graduate student comes to grips with the phenomenon of emerging knowledge. The process enriches the individual as well as the community participating in the exercise. The training and experience are valuable for all areas of work, whether one is teaching in a university; conducting research in government, industry, or private enterprise; or pursuing a professional career.

Research-oriented graduate training provides the means to embark on a lifelong voyage of intellectual discovery, an opportunity and challenge that gives graduate studies pre-eminence in formal education.

Mission Statement

Our mission is to foster excellence in graduate education by supporting and promoting outstanding graduate learning and research in an environment that encourages an exceptional student experience.

The School of Graduate Studies achieves its mission by:

- Working collaboratively to advance excellence and innovation in graduate research and education.
- Fostering an outstanding graduate experience for our diverse student population.
- Creating and promoting opportunities for graduate student professional development.
- Advancing integrity and ethical conduct in graduate research and education.
- Establishing policy and promoting best practices for graduate research and education.
- Providing registrarial and support services for the graduate community.

Dean's Welcome

On behalf of the School of Graduate Studies, welcome to the University of Toronto. I encourage you to make the most of your graduate experience this year by engaging with our top-ranked faculty, who are immersed in innovative research in all disciplines; by connecting and collaborating with others in the graduate community; and by taking advantage of opportunities with leading hospitals, industries, community organizations, and educational facilities across North America. Despite the challenges we have all faced over the past year and a half, the University of Toronto is committed to providing you with an enriching experience over the course of your graduate program.

In the SGS Calendar, we outline the parameters of your program, the regulations and policies that guide it, and some of the key expectations that will inform your time here. SGS also offers a range of graduate-focussed services designed to support you holistically at every stage of your graduate program. These resources are available on the SGS website and the new SGS GradHub, our accessible and user-friendly web space for resources, supports, and services provided by SGS and its partners across the University. I also encourage you to read the monthly Gradschool e-news, our comprehensive e-bulletin about key resources and opportunities for graduate students across the University of Toronto's three campuses.

Whatever your program and specialization, I hope you will find a way to stay connected to the University's vibrant communities as you explore and advance your knowledge in the year ahead.

I wish you the best in your studies and look forward to supporting your journey,

Joshua Barker
Dean, School of Graduate Studies and

About This Calendar

Effective Academic Period

The *2021-222 School of Graduate Studies Calendar* is effective for the academic period September 1, 2021 to August 31, 2022. References in the calendar to “current academic year” refer to this period.

Available Calendar Formats

The *SGS Calendar* is edited annually; it is available online in HTML and PDF versions in June. The last print edition was published in September 2016.

In the case of any discrepancy, the HTML version shall apply. Any post-publication corrections and/or updates to this calendar will be posted as amendments. Students are strongly advised to consult the web page regularly to keep informed of changes.

While graduate administrators are available to provide advice and guidance, it must be clearly understood that the ultimate responsibility rests with the student for completeness and correctness of program requirements and observance of regulations and deadlines. Students are responsible for seeking guidance from a responsible officer if they are in any doubt; misunderstanding or advice received from another student will not be accepted as cause for dispensation from any regulation, deadline, program, or degree requirement.

The *SGS Calendar* describes the broad range of graduate study opportunities available at the University of Toronto. It also contains policies and procedures related to graduate studies. The calendar is divided into five major sections.

Sections

General Regulations outlines admission, registration, enrolment, grading, and graduation policies and procedures. Selected policies, codes, and guidelines established by the University of Toronto are also featured in this section with links to the full policy.

Degree Regulations discusses general admission and degree requirements for graduate degree programs. More details about each program are outlined in Programs by Graduate Unit.

Fee Regulations explains fee schedules, types of fees, and fees for graduate student categories.

Financial Support describes awards, assistantships, grants, and loans available to graduate students.

Graduate Programs. The largest component of the calendar features a comprehensive list of the graduate units that offer degree programs. The term “graduate unit” refers to a department, centre, institute, school, or Faculty.

The section is divided into three categories:

- degree and diploma programs by graduate unit
- combined degree programs
- collaborative specializations

Each graduate unit entry contains information about the programs offered, admission and program requirements, and courses. Faculty who are affiliated with the graduate unit and hold a graduate faculty membership are listed by appointment category: full member, member emeritus, and associate member.

For more details about a graduate program, visit the graduate unit's website.

Important Notices

Changes in Programs of Study and/or Courses

The programs of study that the *SGS Calendar* lists and describes are available for the academic year September 1, 2021 to August 31, 2022. They may not necessarily be available in later years.

If the University of Toronto or the School of Graduate Studies must change the content of programs of study or withdraw them, all reasonable possible advance notice and alternative instruction will be given. However, the University will not be liable for any loss, damages, or other expenses that such changes might cause.

For each program of study offered by the University through SGS, the courses necessary to complete the minimum requirements of the program will be made available annually. However, we reserve the right otherwise to change the content of courses, instructors and instructional assignments, enrolment limitations, prerequisites and co-requisites, grading policies, requirements for promotion, and timetables without prior notice.

Regulations and Policies

As members of the University of Toronto community, students assume certain responsibilities and are guaranteed certain rights and freedoms.

The University has several policies that are approved by the Governing Council and which apply to all students. All students must become familiar with the policies, and the University will assume that they have done so. The rules and regulations of SGS are listed in this calendar.

In applying to SGS, the student assumes certain responsibilities to the University and SGS and, if admitted and registered, shall be subject to all rules, regulations, and policies cited in the calendar, as amended from time to time, with the exception of program requirements. Each student is required to satisfy the program requirements found in the *SGS Calendar* (see Programs by Graduate Unit) of the academic year in which the student first registered in the graduate program.

All University policies can be found on the Governing Council website. Those of particular importance to students are:

- *Code of Behaviour on Academic Matters*
- *Code of Student Conduct*
- *University Assessment and Grading Practices Policy*
- *Policy on Official Correspondence with Students*

Find out more about students' rights and responsibilities.

Enrolment Limitations

The University makes every reasonable effort to plan and control enrolment to ensure that all of our students are qualified to complete the programs to which they are admitted and to strike a practicable balance between enrolment and available instructional resources.

Sometimes such a balance cannot be struck, and the number of qualified students exceeds the instructional resources that we can reasonably make available while at the same time maintaining the quality of instruction. In such cases, we must reserve the right to limit enrolment in the programs, courses, or sections listed in the calendar, and to withdraw courses or sections for which enrolment or resources are insufficient. The University will not be liable for any loss, damages, or other expenses that such limitations or withdrawals might cause.

Copyright in Instructional Settings

If students wish to voice-record, photograph, video-record, or otherwise reproduce lecture presentations, course notes, or other similar materials provided by instructors, they must obtain the instructor's written consent beforehand. Otherwise, all such reproduction is an infringement of copyright and is absolutely prohibited. In the case of private use by students with disabilities, the instructor's consent will not be unreasonably withheld.

Person ID (Student Number)

Each student at the University is assigned a unique identification number. The number is confidential. The University strictly controls access to Person ID numbers. The University assumes and expects that students will protect the confidentiality of their Person IDs.

Notice of Collection of Personal Information

The University of Toronto respects the privacy of students.

Personal information that is provided to the University is collected pursuant to section 2(14) of the University of Toronto Act, 1971.

It is collected for the purpose of administering admissions, registration, academic programs, university-related student activities, activities of student societies, safety, financial assistance and awards, graduation and university advancement, and reporting to government.

In addition, the Ministry of Training, Colleges, and Universities has asked that we notify students of the following: The University of Toronto is required to disclose personal information such as Ontario Education Numbers, student characteristics, and educational outcomes to the Minister of Training, Colleges and Universities under s. 15 of the *Ministry of Training, Colleges and Universities Act, R.S.O. 1990*, Chapter M.19, as amended. The ministry collects this data for purposes such as planning, allocating and administering public funding to colleges, universities, and other post-secondary educational and training institutions and to conduct research and analysis, including longitudinal studies, and statistical activities conducted by or on behalf of the ministry for purposes that relate to post-secondary education and training. Further information on how the Minister of Training, Colleges and Universities uses this personal information is available on the ministry's website.

At all times it will be protected in accordance with the *Freedom of Information and Protection of Privacy Act*.

If there are questions, please refer to www.utoronto.ca/privacy

Fees and Other Charges

The University reserves the right to alter the fees and other charges described in the *SGS Calendar*.

2021-2022 Sessional Dates

View previous years' sessional dates.

2021 Fall Session

M July 19	Registration for Fall session begins
M August 2	Civic Holiday (University closed)[1]
F August 27	Recommended tuition fee payment deadline for students registering or starting their program in the Fall session to ensure payment is received by the registration deadline of September 10, and to avoid cancellation of registration and course enrolment. International students must make a payment by this date to ensure they are covered by the University Health Insurance Plan (UHIP) at the beginning of September.[2][3]
F September 3	Coursework must be completed and grades submitted for Summer session courses and extended courses[4]
M September 6	Labour Day (University closed)[1]
T September 7	Most formal graduate courses and seminars begin[5]
W September 8	Grades for all Summer session courses available for viewing by students on ACORN
F September 10	Registration deadline for students registering or starting their program in the Fall (September to December) session; after this date, a late registration fee will be assessed. Minimum required payment due (unpaid fees from previous session[s] + 100% of current Fall tuition fee charges).[2]
W September 15	Final date to submit final doctoral theses to SGS to avoid fee charges for 2021-22[6]
M September 20	Final date to add full-year and Fall session courses
Th September 30	Payment deadline to avoid service charges on unpaid Fall (September to December) session tuition and non-tuition fees for students registered in the Fall session only, except for those who have successfully registered without payment because they are receiving a full funding package via a research stipend, a major award or scholarship, teaching assistantships, tuition waiver, and/or sponsorships. Monthly service charges will begin accruing on October 15.[3]
F October 1	Final date to submit final doctoral theses for Fall Convocation
F October 1	Final date for receipt of degree recommendations and submission of any required theses for master's degrees for Fall Convocation without fees being charged for the Fall session[7]
M October 11	Thanksgiving Day (University closed)[1]
M October 25	Final date to drop Fall session courses without academic penalty[8]
November	Fall Convocation information and dates are posted at governingcouncil.utoronto.ca/convocation.
November	Some Faculties offer a Fall session reading week, although SGS regulations do not require this. For example, the Faculty of Arts and Science Fall session reading week takes place from November 8 to 12. To find out if your Faculty has a reading week, please contact them directly.
T November 30	Payment deadline to avoid service charges on unpaid Winter (January to April) session tuition and non-tuition fees for students registered in the Fall and Winter sessions, except for those who have successfully registered without payment because they are receiving Ontario Student Assistance Program (OSAP) or other government loans, a full funding package via a research stipend, a major award or scholarship, teaching assistantships, tuition waiver, and/or sponsorships. Monthly service charges will begin accruing on December 15.[3]
F December 17	Recommended tuition fee payment deadline for all tuition fees billed for the 2021 tax year (Winter 2021, Summer 2021, and Fall 2021) for students who want eligible 2021 tuition fee payments to be reported on the 2021 calendar T2202 tax certificate, available for students to view and print on ACORN on February 21, 2022
T December 21	Recommended tuition fee payment deadline for **international students** registering or starting their program in the Winter session (i.e., those who were not registered in the previous Fall session) to ensure they are covered by UHIP at the beginning of January[2][3]

W December 22	University closed for the winter break from Wednesday, December 23 to Friday, December 31 inclusive. For the last day of classes before the winter break, consult your graduate unit(s).[1]

2022 Winter Session

M January 3	University re-opens
M January 3 or 10	Most formal graduate courses and seminars begin either on January 3 or January 10, depending on the graduate unit. Please consult with your graduate unit(s) to confirm when your courses will begin.[5]
F January 7	Coursework must be completed and grades submitted for Fall session courses[4]
M January 10	Recommended tuition fee payment deadline for students registering or starting their program in the Winter session (i.e., those who were not registered in the previous Fall session) to ensure payment is received by the registration deadline of January 24, and to avoid cancellation of registration and course enrolment[2][3]
W January 12	Grades for Fall session courses available for viewing by students on ACORN
M January 17	Final date to submit doctoral theses without payment of incidental Winter session fees[9]
M January 17	Final date to add Winter session courses
F January 21	Final date for receipt of master's degree recommendations from graduate units and submission of any required theses for March or June graduation for master's students without fees being charged for the Winter session[7]
F January 21	Final date for all students to request that their degrees be conferred *in absentia* in March
F January 21	Final date to submit final doctoral theses for March graduation *in absentia*[6]
F January 21	Students dually registered in the Fall session must be recommended for the master's degree by this date to maintain their PhD registration[7][10]
M January 24	Registration deadline for students registering or starting their program in the Winter (January to April) session; after this date, a late registration fee will be assessed. Minimum required payment due (unpaid fees from previous session[s] + 100% of current Winter session tuition fee charges).[2]
M January 31	Payment deadline to avoid service charges on unpaid Winter (January to April) session tuition and non-tuition fees for students registered in the Winter session only, except for those who have successfully registered without payment because they are receiving a full funding package via a research stipend, a major award or scholarship, teaching assistantships, tuition waiver, and/or sponsorships. Monthly service charges will begin accruing on February 15.[3]
February	Some Faculties offer a Winter session reading week, although SGS regulations do not require this. For example, the Faculty of Arts and Science Winter session reading week takes place from February 21 to 25. To find out if your Faculty has a reading week, please contact them directly.
S February 20	Final date to drop full-year and Winter session courses without academic penalty[8]
M February 21	Family Day (University closed)[1]
March	March graduation *in absentia* information is posted at governingcouncil.utoronto.ca/convocation
April	For the last day of Winter classes, consult your graduate unit(s)
Th April 14	Final date for receipt of master's degree recommendations from graduate units and submission of any required theses from master's students for June Convocation[7]
Th April 14	Final date for submission of final doctoral theses for students whose degrees are to be conferred at the June Convocation[6]
Th April 14	Students dually registered in the Winter session must be recommended for the master's degree by this date to maintain their PhD registration[7][10]
F April 15	Good Friday (University closed)[1]
Th April 21	For students obtaining degrees at June Convocation, coursework must be completed and grades submitted for full-year and Winter session courses
F April 22	Recommended tuition fee payment deadline for students registering or starting their program in the Summer session to ensure payment is received by the registration deadline of May 6, and to avoid cancellation of registration and course enrolment[2][3]

S April 30	Payment deadline to avoid service charges on unpaid Fall/Winter (September to April) session tuition and non-tuition fees for students who have successfully registered without payment because they are receiving a full funding package via a research stipend, a major award or scholarship, teaching assistantships, and/or sponsorships. Monthly service charges will begin accruing on May 15.[2][3]

2022 Summer Session

May	For the first day of Summer classes, consult your graduate unit(s)
F May 6	Registration deadline for students registering or starting their program in the Summer (May to August) session; after this date, a late registration fee will be assessed. Minimum required payment due (unpaid fees from previous session[s] + 50% of Summer session tuition fees).[2]
M May 9	Final date to enrol in May-to-June or May-to-August session courses
F May 13	Coursework must be completed and grades submitted for full-year and Winter session courses (except for extended courses)[4]
W May 18	Winter session grades available for viewing by students on ACORN
M May 23	Victoria Day (University closed)[1]
F May 27	Final date to drop May-to-June F section courses without academic penalty[8]
T May 31	Payment deadline to avoid service charges on unpaid Summer (May to August) session tuition and non-tuition fees for students registered in the Summer session, except for those who have successfully registered without payment because they are receiving a full funding package via a research stipend, a major award or scholarship, teaching assistantships, tuition waiver, and/or sponsorships. Monthly service charges will begin accruing on June 15.[3]
June	June Convocation information and dates are posted at governingcouncil.utoronto.ca/convocation
M June 13	Final date to drop May-to-August session Y section courses without academic penalty[8]
F July 1	Canada Day (University closed)[1]
M July 4	Final date to enrol in July-to-August courses[11]
F July 8	Coursework must be completed and grades submitted for May-to-June F section courses[4]
W July 13	Grades for May-to-June F section courses available for viewing by students on ACORN
F July 22	Final date to drop July-to-August S section courses without academic penalty[8]
M August 1	Civic Holiday (University closed)[1]

Footnotes

1	University holiday schedule
2	To be registered, students must pay at least the Minimum Payment to Register Amount displayed on their current session ACORN invoice or have an approved request to register without payment (fee deferral) in place before the SGS registration deadline. A student's status will change from "Invited" to "Registered" on ACORN when registration is complete. Students who successfully register without payment should arrange to make payments throughout the academic year as they receive funding from their scholarship, award, or other sources. Full payment of Fall and Winter session tuition and residence fees is due by April 30 at the latest. Students registered in the Fall and Winter sessions are not normally charged Summer fees. For students starting in the Summer, fees will appear in their ACORN invoice accordingly.
3	This allows up to 10 business days for processing and recording of the fee payment in the student's ACORN account before the monthly service charge billing date for unpaid tuition and non-tuition fees. More information on service charges can be found on the Student Accounts website.

4	Graduate units may establish earlier deadlines for completion of coursework and may prescribe penalties for late completion of work and for failure to complete work, provided that these penalties are announced at the time the instructor makes known to the class the methods by which student performance shall be evaluated.
5	The precise dates of commencement of courses are determined by the graduate units; students are advised to contact the relevant graduate units for information. SGS maintains the 13-week graduate instruction period; however, if a course does not fall into the traditional 13-week period, the graduate unit will inform students of important dates and deadlines in the course syllabus. The University welcomes and includes students, staff, and faculty from a wide range of cultural, traditional, and spiritual beliefs. As per the *Policy on Scheduling of Classes and Examinations and Other Accommodations for Religious Observances*, the University will "…arrange reasonable accommodation of the needs of students who observe religious holy days other than those already accommodated by ordinary scheduling and statutory holidays." For more information, please refer to Accommodation: Religious Observances. The obligation not to discriminate on the basis of religion is a statutory duty arising from the *Ontario Human Rights Code*, which carries an obligation to accommodate religious requirements. Graduate students may only enrol in undergraduate courses with the approval of their supervisor or graduate unit. Students are responsible for meeting the deadlines and requirements of the undergraduate course as presented in class and in the undergraduate division's calendar. Graduate students will be graded under the graduate grading scale. Students should consult the appropriate undergraduate calendar for enrolment and dates.
6	A final thesis is the corrected, approved version of the thesis which is submitted to SGS following the Final Oral Examination.
7	Graduate units may establish earlier deadlines for completing degree requirements. Students are advised to consult their own graduate unit for information.
8	Graduate units may establish earlier deadlines to add/drop courses but these dates must clearly be communicated to students. The last date to cancel a course or registration with no academic penalty is not the same as the last date to be eligible for a refund. Please refer to the Tuition Fee & Refund Schedules for Graduate Studies on the Student Accounts website.
9	Academic fees for full-time doctoral students in the final year of their program, and who are before their maximum time limit, are pro-rated based on the 12-month academic year. Sessional incidentals will be charged at a full rate. Academic fees for doctoral students in the final extension year, and who are beyond their maximum time limit, are prorated based on 50% of the annual domestic fee for the 12-month academic year. Sessional incidentals will be charged at a full rate. For details, visit Final-Year Fees.
10	Please refer to the SGS policy on Dual Registration under General Regulations section 6.1.13
11	Students who start their program in the Summer and returning Ontario Institute for Studies in Education (OISE) students who are only enrolled in July-to-August Summer courses are required to register by this date by paying the minimum tuition amount stated in their invoice.

Programs by SGS Division

Graduate units (departments, centres, institutes, schools, or Faculties) are allocated into four divisions. Collaborative (interdisciplinary) specializations are designated as CS.

Division 1: Humanities
Ancient and Medieval Philosophy (CS)
Art History
Book History and Print Culture (CS)
Cinema Studies
Classics
Comparative Literature
Diaspora and Transnational Studies (CS)
Drama, Theatre and Performance Studies
East Asian Studies
Editing Ancient and Medieval Texts (CS)
English
French Language and Literature
Germanic Languages and Literatures
History
History and Philosophy of Science and Technology
Italian Studies
Jewish Studies (CS)
Linguistics
Medieval Studies
Mediterranean Archaeology (CS)
Museum Studies (program housed in Information)
Music
Near and Middle Eastern Civilizations
Philosophy
Religion
Slavic Languages and Literatures
South Asian Studies (CS)
Spanish
Visual Studies (program housed in Architecture, Landscape, and Design)
Women and Gender Studies
Women and Gender Studies (CS)

Division 2: Social Sciences
Anthropology
Applied Psychology and Human Development
Architecture, Landscape, and Design
Community Development (CS)
Comparative, International and Development Education (CS)
Contemporary East and Southeast Asian Studies (CS)
Criminology and Sociolegal Studies
Curriculum, Teaching and Learning
Development Policy and Power (CS)
Economics
Education, Francophonies and Diversity (CS)
Educational Policy (CS)
Ethnic, Immigration and Pluralism Studies (CS)
European, Russian, and Eurasian Studies
Financial Economics
Financial Insurance (program housed in Statistical Sciences)
Forensic Accounting (program housed in Management & Innovation)
Food Studies (CS)
Geography and Planning
Global Affairs and Public Policy
Industrial Relations and Human Resources
Information
Investigative and Forensic Accounting (diploma program housed in Management & Innovation)
Law
Leadership, Higher and Adult Education
Management, Rotman School of
Management and Professional Accounting (program housed in Management & Innovation)
Management, Tri-campus
Management, University of Toronto Scarborough
Political Science
Psychological Clinical Science
Sexual Diversity Studies (CS)
Social Justice Education
Social Work
Sociology

Urban Innovation (program housed in Management & Innovation)
Workplace Learning and Social Change (CS)

Division 3: Physical Sciences

Aerospace Studies
Astronomy and Astrophysics
Biomedical Engineering
Biomedical Engineering (CS)
Chemical Engineering and Applied Chemistry
Chemistry
Civil and Mineral Engineering
Computer Science
Earth Sciences
Electrical and Computer Engineering
Engineering Education (CS)
Environmental Studies (CS)
Environment and Health (CS)
Environment and Sustainability
Knowledge Media Design (CS)
Materials Science and Engineering
Mathematical Finance
Mathematics
Mechanical and Industrial Engineering
Physical and Environmental Sciences
Physics
Psychology and Engineering (CS)
Statistical Sciences
Theoretical Astrophysics

Division 4: Life Sciences

Addiction Studies (CS)
Aging, Palliative and Supportive Care Across the Life Course (CS)
Biochemistry
Bioethics (CS)
Biotechnology (program housed in Management & Innovation)
Cardiovascular Sciences (CS)
Cell and Systems Biology
Dentistry
Developmental Biology (CS)
Ecology and Evolutionary Biology
Forestry
Genome Biology and Bioinformatics (CS)
Global Health (CS)
Health Policy, Management and Evaluation
Health Services and Policy Research (CS)
Immunology
Indigenous Health (CS)
Kinesiology
Laboratory Medicine
Laboratory Medicine and Pathobiology
Management of Innovation (program housed in Management & Innovation)
Medical Biophysics
Medical Science
Molecular Genetics
Musculoskeletal Sciences (CS)
Neuroscience (CS)
Next-Generation Precision Medicine (CS)
Nursing Science
Nutritional Sciences
Occupational Science and Occupational Therapy
Pharmaceutical Sciences
Pharmacology and Toxicology
Physical Therapy
Physiology
Psychology
Public Health Policy (CS)
Public Health Sciences
Rehabilitation Sciences
Resuscitation Sciences (CS)
Speech-Language Pathology
Sustainability Management (program housed in Management & Innovation)
Toxicology (CS)
Women's Health (CS)

Graduate Programs at a Glance

Degree Programs

All degree programs are offered full-time unless otherwise indicated.

Legend

Symbol	Meaning
EFT	Extended full-time option
flex	Flexible-time program option available in addition to full-time program
p	Part-time option available in addition to full-time program
p~	Program only offered part-time

	Forestry	MScF, PhD
French Language and Literature	French Language and Literature	MA[p], PhD
Geography and Planning	Geography	MA[p], MSc[p], PhD
	Planning	MScPl[p], PhD
Germanic Languages and Literatures	Germanic Languages and Literatures	MA[p]
	Germanic Literature, Culture and Theory	PhD
Global Affairs and Public Policy	Global Affairs	MGA
	Public Policy	MPP
Health Policy, Management and Evaluation	Health Administration	MHSc
	Health Informatics	MHI
	Health Policy, Management and Evaluation	MSc[p], PhD[flex]
History	History	MA[p], PhD[flex]
History and Philosophy of Science and Technology	History and Philosophy of Science and Technology	MA[p], PhD[flex]

Immunology	Immunology	MSc, PhD
Industrial Relations and Human Resources	Industrial Relations and Human Resources	MIRHR[p], PhD
Information	Information	MI[p]
	Information Studies	PhD[flex]
	Museum Studies	MMSt
Italian Studies	Italian Studies	MA[p], PhD
Kinesiology	Kinesiology	MSc[p], PhD[flex]
	Professional Kinesiology	MPK
Laboratory Medicine and Pathobiology	Laboratory Medicine	MHSc
	Laboratory Medicine and Pathobiology	MSc, PhD
	Translational Research in the Health Sciences	MHSc
Law	Global Professional Law	GPLLM
	Law	LLM[p], MSL, SJD
Leadership, Higher and Adult Education	Adult Education and Community Development	MA[p], MEd[p], PhD[flex]
	Educational Leadership and Policy	MA[p], MEd[p], EdD[p], PhD[flex]
	Higher Education	MA[p], MEd[p], EdD[p], PhD[flex]
Linguistics	Linguistics	MA, PhD
Management & Innovation	Biotechnology	MBiotech
	Forensic Accounting	MFAcc
	Management & Professional Accounting	MMPA
	Management of Innovation	MMI
	Sustainability Management	MScSM
	Urban Innovation	MUI
Management, Rotman School of	Finance	MF[p]
	Financial Risk Management	MFRM
	Management	MBA[EFT]
	Management Analytics	MMA
Management, Tri-campus	Management	PhD
Management, University of Toronto Scarborough	Accounting and Finance	MAccFin
Materials Science and Engineering	Materials Science and Engineering	MASc, MEng[EFT, p], PhD[flex]
Mathematical Finance	Mathematical Finance	MMF[p]
Mathematics	Mathematics	MSc[p], PhD
Mechanical and Industrial Engineering	Mechanical and Industrial Engineering	MASc, MEng[EFT, p], PhD[flex]
Medical Biophysics	Medical Biophysics	MSc, PhD
Medical Science	Biomedical Communications	MScBMC
	Medical Science	MSc, PhD

Medieval Studies	Medieval Studies	MA[p], PhD
Molecular Genetics	Genetic Counselling	MSc
	Medical Genomics	MHSc
	Molecular Genetics	MSc, PhD
Music	Music	MA[p], PhD[flex]
	Music Performance	MMus, DMA
Near and Middle Eastern Civilizations	Near and Middle Eastern Civilizations	MA[p], PhD
Nursing Science	Nursing Science	MN, DN, PhD
Nutritional Sciences	Nutritional Sciences	MSc[p], PhD
Occupational Science and Occupational Therapy	Occupational Therapy	MScOT
Pharmaceutical Sciences	Pharmaceutical Sciences	MSc[p], PhD[flex]s
	Pharmacy	MScPhm
Pharmacology and Toxicology	Pharmacology	MSc[p], PhD
Philosophy	Philosophy	MA[p], PhD
Physical and Environmental Sciences	Environmental Science	MEnvSc[p], PhD
Physical Therapy	Physical Therapy	MScPT
Physics	Physics	MSc, PhD
Physiology	Medical Physiology	MHSc
	Physiology	MSc, PhD
Political Science	Political Science	MA[p], PhD
Psychological Clinical Science	Counselling and Clinical Psychology	MA, PhD
Psychology	Psychology	MA, PhD
Public Health Sciences	Bioethics	MHSc
	Community Health	MScCH[p]

Sociology	Sociology	MA[p], PhD
Spanish	Spanish	MA[p], PhD
Speech-Language Pathology	Speech-Language Pathology	MHSc
Statistical Sciences	Financial Insurance	MFI
	Statistics	MSc[p], PhD
Women and Gender Studies	Women and Gender Studies	MA, PhD

Combined Degree Programs

Undergraduate / Master's Degree Programs

Degrees in the Combination	Combined Degree Program
BASc / MBA	STG, The Jeffrey Skoll Combined Bachelor of Applied Science in Engineering / Management, Master of Business Administration
BBA / MAccFin	UTSC, Bachelor of Business Administration, Specialist in Management and Accounting / Master of Accounting and Finance
BBA / MAccFin	UTSC, Bachelor of Business Administration, Specialist Co-op in Management and Accounting / Master of Accounting and Finance
BKin / MT	STG, Bachelor of Kinesiology / Master of Teaching
HBA / MA	STG, Honours Bachelor of Arts, Minor in Education and Society / Child Study and Education, Master of Arts
HBA / MScSM	UTM, Honours Bachelor of Arts, Major in Environmental Management / Master of Science in Sustainability Management
HBA / MScSM	UTM, Honours Bachelor of Arts, Specialist in Environmental Management / Master of Science in Sustainability Management
HBA / MT	STG, Honours Bachelor of Arts, Major in English / Master of Teaching
HBA / MT	STG, Honours Bachelor of Arts, Major in History / Master of Teaching
HBA / MT	STG, Honours Bachelor of Arts, Major in Sociology / Master of Teaching
HBA / MT	UTM, Honours Bachelor of Arts, Major in French Studies / Master of Teaching
HBA / MT	UTM, Honours Bachelor of Arts, Major in Language Teaching and Learning: French / Master of Teaching
HBA / MT	UTM, Honours Bachelor of Arts, Specialist in French Studies / Master of Teaching
HBA / MT	UTM, Honours Bachelor of Arts, Specialist in Language Teaching and Learning: French and Italian /
HBA / MT	UTSC, Honours Bachelor of Arts, Major in English / Master of Teaching
HBA / MT	UTSC, Honours Bachelor of Arts, Major Co-op in English / Master of Teaching
HBA / MT	UTSC, Honours Bachelor of Arts, Major in French / Master of Teaching
HBA / MT	UTSC, Honours Bachelor of Arts, Major Co-op in French / Master of Teaching
HBA / MT	UTSC, Honours Bachelor of Arts, Major in History / Master of Teaching
HBA / MT	UTSC, Honours Bachelor of Arts, Major in Human Geography / Master of Teaching
HBA / MT	UTSC, Honours Bachelor of Arts, Major in Socio-Cultural Anthropology / Master of Teaching

HBA / MT	UTSC, Honours Bachelor of Arts, Major in Sociology / Master of Teaching
HBA / MT	UTSC, Honours Bachelor of Arts, Major in Theatre and Performance / Master of Teaching
HBA / MT	UTSC, Honours Bachelor of Arts, Specialist in English / Master of Teaching
HBA / MT	UTSC, Honours Bachelor of Arts, Specialist Co-op in English / Master of Teaching
HBA / MT	UTSC, Honours Bachelor of Arts, Specialist in French / Master of Teaching
HBA / MT	UTSC, Honours Bachelor of Arts, Specialist Co-op in French / Master of Teaching
HBA / MT	UTSC, Honours Bachelor of Arts, Specialist in History / Master of Teaching
HBA / MT	UTSC, Honours Bachelor of Arts, Specialist in Human Geography / Master of Teaching
HBA / MT	UTSC, Honours Bachelor of Arts, Specialist in Socio-Cultural Anthropology / Master of Teaching
HBA / MT	UTSC, Honours Bachelor of Arts, Specialist in Sociology / Master of Teaching
HBSc / MA	STG, Honours Bachelor of Science, Minor in Education and Society / Child Study and Education, Master of Arts
HBSc / MA	UTM, Honours Bachelor of Science, Major in Psychology / Child Study and Education, Master of Arts
HBSc / MA	UTM, Honours Bachelor of Science, Specialist in Exceptionality in Human Learning / Child Study and Education, Master of Arts
HBSc / MA	UTM, Honours Bachelor of Science, Specialist in Psychology / Child Study and Education, Master of Arts
HBSc / MEng	UTSC, Honours Bachelor of Science, Specialist in Environmental Biology / Chemical Engineering and Applied Chemistry, Master of Engineering
HBSc / MEng	UTSC, Honours Bachelor of Science, Specialist Co-op in Environmental Biology / Chemical Engineering and Applied Chemistry, Master of Engineering
HBSc / MEng	UTSC, Honours Bachelor of Science, Specialist in Environmental Biology / Civil Engineering, Master of Engineering
HBSc / MEng	UTSC, Honours Bachelor of Science, Specialist Co-op in Environmental Biology / Civil Engineering, Master of Engineering
HBSc / MEng	UTSC, Honours Bachelor of Science, Specialist in Environmental Chemistry / Chemical Engineering and Applied Chemistry, Master of Engineering
HBSc / MA	UTSC, Honours Bachelor of Science, Specialist Co-op in Environmental Chemistry / Chemical Engineering and Applied Chemistry, Master of Engineering
HBSc / MEng	UTSC, Honours Bachelor of Science, Specialist in Environmental Chemistry / Civil Engineering, Master of Engineering
HBSc / MEng	UTSC, Honours Bachelor of Science, Specialist Co-op in Environmental Chemistry / Civil Engineering, Master of Engineering
HBSc / MEng	UTSC, Honours Bachelor of Science, Specialist in Environmental Geoscience / Chemical Engineering and Applied Chemistry, Master of Engineering
HBSc / MEng	UTSC, Honours Bachelor of Science, Specialist Co-op in Environmental Geoscience / Chemical Engineering and Applied Chemistry, Master of Engineering

HBSc / MEng	UTSC, Honours Bachelor of Science, Specialist in Environmental Geoscience / Civil Engineering, Master of Engineering
HBSc / MEng	UTSC, Honours Bachelor of Science, Specialist Co-op in Environmental Geoscience / Civil Engineering, Master of Engineering
HBSc / MEng	UTSC, Honours Bachelor of Science, Specialist in Environmental Physics / Chemical Engineering and Applied Chemistry, Master of Engineering
HBSc / MEng	UTSC, Honours Bachelor of Science, Specialist Co-op in Environmental Physics / Chemical Engineering and Applied Chemistry, Master of Engineering
HBSc / MEng	UTSC, Honours Bachelor of Science, Specialist in Environmental Physics / Civil Engineering, Master of Engineering
HBSc / MEng	UTSC, Honours Bachelor of Science, Specialist Co-op in Environmental Physics / Civil Engineering, Master of Engineering
HBSc / MEnvSc	UTSC, Honours Bachelor of Science, Specialist in Conservation and Biodiversity / Master of Environmental Science
HBSc / MEnvSc	UTSC, Honours Bachelor of Science, Specialist in Environmental Biology / Master of Environmental Science
HBSc / MEnvSc	UTSC, Honours Bachelor of Science, Specialist Co-op in Environmental Biology / Master of Environmental Science
HBSc / MEnvSc	UTSC, Honours Bachelor of Science, Specialist in Environmental Chemistry / Master of Environmental Science
HBSc / MEnvSc	UTSC, Honours Bachelor of Science, Specialist Co-op in Environmental Chemistry / Master of Environmental Science
HBSc / MEnvSc	UTSC, Honours Bachelor of Science, Specialist in Environmental Geoscience / Master of Environmental Science
HBSc / MEnvSc	UTSC, Honours Bachelor of Science, Specialist Co-op in Environmental Geoscience / Master of Environmental Science
HBSc / MEnvSc	UTSC, Honours Bachelor of Science, Specialist in Environmental Physics / Master of Environmental Science
HBSc / MEnvSc	UTSC, Honours Bachelor of Science, Specialist Co-op in Environmental Physics / Master of Environmental Science
HBSc / MEnvSc	UTSC, Honours Bachelor of Science, Specialist in Integrative Biology / Master of Environmental Science
HBSc / MScSM	UTM, Honours Bachelor of Science, Major in Environmental Science / Master of Science in Sustainability Management
HBSc / MScSM	UTM, Honours Bachelor of Science, Specialist in Environmental Science / Master of Science in Sustainability Management
HBSc / MSW	UTSC, Honours Bachelor of Science, Specialist in Mental Health Studies / Master of Social Work
HBSc / MSW	UTSC, Honours Bachelor of Science, Specialist Co-op in Mental Health Studies / Master of Social Work
HBSc / MT	STG, Honours Bachelor of Science, Major in Mathematics / Master of Teaching
HBSc / MT	STG, Honours Bachelor of Science, Major in Psychology / Master of Teaching
HBSc / MT	UTM, Honours Bachelor of Science, Major in Biology / Master of Teaching
HBSc / MT	UTM, Honours Bachelor of Science, Major in Biology for Health Sciences / Master of Teaching

HBSc / MT	UTM, Honours Bachelor of Science, Major in Chemistry / Master of Teaching
HBSc / MT	UTM, Honours Bachelor of Science, Major in Mathematical Sciences / Master of Teaching
HBSc / MT	UTM, Honours Bachelor of Science, Major in Physics / Master of Teaching
HBSc / MT	UTM, Honours Bachelor of Science, Specialist in Astronomical Sciences / Master of Teaching
HBSc / MT	UTM, Honours Bachelor of Science, Specialist in Biological Chemistry / Master of Teaching
HBSc / MT	UTM, Honours Bachelor of Science, Specialist in Biology / Master of Teaching
HBSc / MT	UTM, Honours Bachelor of Science, Specialist in Chemistry / Master of Teaching
HBSc / MT	UTM, Honours Bachelor of Science, Specialist in Comparative Physiology / Master of Teaching
HBSc / MT	UTM, Honours Bachelor of Science, Specialist in Ecology and Evolution / Master of Teaching
HBSc / MT	UTM, Honours Bachelor of Science, Specialist in Forensic Biology / Master of Teaching
HBSc / MT	UTM, Honours Bachelor of Science, Specialist in Forensic Chemistry / Master of Teaching
HBSc / MT	UTM, Honours Bachelor of Science, Specialist in Mathematical Sciences / Master of Teaching
HBSc / MT	UTM, Honours Bachelor of Science, Specialist in Molecular Biology / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Major in Biochemistry / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Major Co-op in Biochemistry / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Major in Biology / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Major in Chemistry / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Major Co-op in Chemistry / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Major in Conservation and Biodiversity / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Major in Evolutionary Anthropology / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Major in Human Biology / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Major in Mathematics / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Major Co-op in Mathematics / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Major in Molecular Biology, Immunology and Disease / Master of Teaching

HBSc / MT	UTSC, Honours Bachelor of Science, Major in Physics and Astrophysics / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Major in Plant Biology / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist in Biological Chemistry / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist Co-op in Biological Chemistry / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist in Chemistry / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist Co-op in Chemistry / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist in Conservation and Biodiversity / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist in Environmental Biology / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist Co-op in Environmental Biology / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist in Environmental Chemistry / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist Co-op in Environmental Chemistry / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist in Environmental Physics / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist Co-op in Environmental Physics / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist in Evolutionary Anthropology / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist in Human Biology / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist in Integrative Biology / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist in Mathematics / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist Co-op in Mathematics / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist in Molecular Biology and Biotechnology / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist Co-op in Molecular Biology and Biotechnology / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist in Physical and Mathematical Sciences / Master of Teaching
HBSc / MT	UTSC, Honours Bachelor of Science, Specialist in Physics and Astrophysics / Master of Teaching
MusBac / MT	STG, Bachelor of Music, Music, Stream in Music Education / Master of Teaching

Second-Entry Undergraduate / Master's Degree Programs

Degrees in the Combination	Combined Degree Program
JD / MA	STG, Law, Juris Doctor / Criminology and Sociolegal Studies, Master of Arts
JD / MA	STG, Law, Juris Doctor / Economics, Master of Arts
JD / MA	STG, Law, Juris Doctor / English, Master of Arts
JD / MA	STG, Law, Juris Doctor / European and Russian Affairs, Master of Arts
JD / MA	STG, Law, Juris Doctor / Management, Master of Business Administration
JD / MGA	STG, Law, Juris Doctor / Master of Global Affairs
JD / MI	STG, Law, Juris Doctor / Master of Information
JD / MPP	STG, Law, Juris Doctor / Master of Public Policy
JD / MSW	STG, Law, Juris Doctor / Master of Social Work
MD / MBA	STG, Medicine, Doctor of / Management, Master of Business Administration
PharmD / MBA	STG, Pharmacy, Doctor of / Management, Master of Business Administration

Second-Entry Undergraduate / Doctoral Degree Programs

Degrees in the Combination	Combined Degree Program
JD / PhD	STG, Law, Juris Doctor /Criminology and Sociolegal Studies, Doctor of Philosophy
JD / PhD	STG, Law, Juris Doctor /Economics, Doctor of Philosophy
JD / PhD	STG, Law, Juris Doctor /Philosophy, Doctor of Philosophy
JD / PhD	STG, Law, Juris Doctor /Political Science, Doctor of Philosophy
MD / PhD	STG, Medicine, Doctor of /Doctor of Philosophy

Master's / Master's Degree Programs

Degrees in the Combination	Combined Degree Program
MBA / MGA	STG, Management, Master of Business Administration / Master of Global Affairs
MHSc / MSW (admissions have closed)	STG, Health Administration, Master of Health Science / Master of Social Work
MI / MMSt	STG, Master of Information / Master of Museum Studies

Dual Degree Programs

Graduate Unit	Program Name	Degrees
Applied Psychology and Human Development	Master of Education (University of Toronto) / Master of Medicine (China Medical University)	MEd / MMed
Global Affairs and Public Policy	Master of Global Affairs (University of Toronto) / Master of International Affairs (Hertie School of Governance)	MGA / MIA
	Master of Global Affairs (University of Toronto) / Master of Public Administration (London School of Economics)	MGA / MPA
	Master of Global Affairs (University of Toronto) / Master of Public Policy (Sciences Po)	MGA / MPP
Law	Bachelor of Laws (National University of Singapore) / Master of Laws (University of Toronto)	LLB / LLM
	Bachelor of Laws (Tsinghua University) / Master of Laws (University of Toronto)	LLB / LLM
	Master of Laws (University of Toronto) / Juris Master (Tsinghua University)	LLM / JM
	Master of Laws (University of Toronto) / Master of Laws (Tsinghua University)	LLM / LLM
Management, Rotman School of Management	Global Executive Master of Business Administration (University of Toronto / Bocconi University)	MBA / MBA
Mechanical and Industrial Engineering	Bachelor of Engineering (South China University of Technology) / Master of Engineering (University of Toronto)	BEng / MEng

Collaborative Specializations

Social Work	Advanced Diploma in Social Service Administration (admissions closed)	DSSA^{p}

General Regulations

All graduate students are accepted under the General Regulations of the School of Graduate Studies (SGS). See also Degree Regulations and the program entries.

Exemptions: The Graduate Education Council of the School of Graduate Studies has the power to waive the application of a regulation in individual cases. Such exemptions are granted only in exceptional circumstances and require the favourable recommendation of the graduate unit and of the School of Graduate Studies**.**

1 Organization of the School of Graduate Studies

The School of Graduate Studies (SGS) is responsible for the oversight of all graduate programs in the University of Toronto and for developing and implementing appropriate regulations and operating procedures for admissions, programs of study, and completion of degree requirements.

According to its constitution, the School of Graduate Studies has a council and is organized into four divisions. Each of the departments, centres, institutes, schools, and Faculties (referred to generally as "graduate units") belongs to one of the divisions.

1.1 The Divisions

- Division I — Humanities
- Division II — Social Sciences
- Division III — Physical Sciences
- Division IV — Life Sciences

1.2 Graduate Education Council

The Graduate Education Council is an academic advisory and regulatory body. It exercises powers and duties, subject to the approval of Governing Council, as required, under the provisions of the University of Toronto Act. The Graduate Education Council consists of 35 elected members and numerous ex-officio members. Each division elects five faculty members and three graduate students to the council; a senior representative of the Graduate Students' Union is a voting member. There are three administrative staff seats. The Graduate Education Council is chaired by the Dean of Graduate Studies and Vice-Provost, Graduate Research and Education.

The Graduate Education Council is primarily responsible for determining policies and regulations affecting the administration and operation of graduate studies, and for advising Governing Council on initiatives in graduate studies. The Graduate Education Council is concerned with the quality of graduate education across the University.

1.3 Graduate Units

A graduate unit offers degree programs or graduate diplomas, courses, and research. It may be a department, centre, institute, school, or Faculty.

Each graduate student is enrolled in one of the units that offer graduate study. The graduate unit is responsible for ensuring that each student is admitted and enrolled in an appropriate program of studies and is responsible for thesis/research supervision in conformity with the policies and procedures of the School of Graduate Studies.

The unit's chair, dean, or director is responsible for the graduate affairs within the unit. The administrative duties may be delegated by the unit's chair or director, as appropriate.

1.4 Graduate Programs

Graduate programs are listed alphabetically in the Programs by Graduate Unit section of this calendar.

1.4.1 Degree Programs

A diverse range of both research-oriented and professional degree programs is offered at both the master's and doctoral levels.

1.4.2 Collaborative Specializations

Collaborative specializations (CSs) emerge from cooperation between two or more graduate units and their graduate programs. The student has a broader base from which to explore a novel interdisciplinary area or some special development in a particular discipline.

The student must be admitted to, and enrol in, one of the collaborating graduate units (known as a "home" unit) and must fulfil all the requirements of the degree program in the home unit and any additional requirements of the CS. On successful completion of the program, the student receives a transcript notation indicating completion of the collaborative specialization, in addition to the degree.

1.4.3 Combined Degree Programs

Combined degree programs (CDPs) allow a student to study in two approved degree programs at the same time and to complete the requirements of both, providing a distinctive academic benefit to the student either through academic enrichment or academic acceleration. CDPs build on a strong academic rationale or synergy between the programs in the combination.

CDPs may embody the following combinations: undergraduate/graduate, second-entry undergraduate/graduate, or graduate/graduate. A CDP is an entity; the student is registered in a CDP as well as in the two participating degree programs. On successful completion of the CDP, the student receives two degrees.

1.4.4 Graduate Diploma Programs

Graduate diplomas may be offered at the master's, post-master's, and doctoral levels. They consist of approved graduate courses or other graduate academic activities appropriate to the diploma level. The University of Toronto offers graduate diploma programs in conjunction with a master's or doctoral degree and also graduate diplomas as a standalone program with direct admission.

1.4.5 Conjoint Programs

The University of Toronto and the Toronto School of Theology, in accord with the Memorandum of Agreement between the two institutions, offer specific and approved conjoint programs, some of which are graduate degree programs. Students in a conjoint program are students at the University of Toronto; however, they are not registered at the School of Graduate Studies.

1.4.6 Joint Programs

A graduate joint degree program is a program of study offered by two or more universities, or equivalent institutions, in which successful completion of the requirements is confirmed by a single degree document.

1.4.7 Dual Degree Programs

A dual degree program is a program of study offered in partnership by the University of Toronto and an international peer university, or equivalent institution. In a dual degree program, a student's successful completion of the program requirements of two existing degree programs is conferred with two degree documents or parchments. Dual degree programs build on a strong academic rationale between the programs in the combination and provide a distinctive academic benefit to students. Dual degree programs are governed by a memorandum of agreement.

1.5 Graduate Faculty

Responsibility for directing all elements of graduate teaching and supervision of students rests with members of the graduate faculty.

Graduate faculty membership is initiated by the chair/director of the graduate unit. With the approval of the School of Graduate Studies, the chair confirms graduate membership to the faculty member. Membership is offered in the following categories:

1.5.1 Full Members

Full members may:

- act as the sole or major supervisor of a doctoral or master's thesis for students in the graduate unit;
- act as a member of thesis committees of students in any graduate unit, as appropriate;
- serve as chair or voting member of a Final Oral Examination committee;
- assume responsibility for the setting and marking of comprehensive (general) examinations;
- teach, set, and mark examinations for a graduate course;
- give such other graduate direction as may be required.

1.5.2 Associate Members

Associate Members may be permitted to undertake all the duties of a full member but shall not serve as a sole or major supervisor, whether formally or otherwise, of a doctoral student nor act as the chair of a Final Doctoral Oral Examination.

1.5.3 Associate (Restricted) Members

Associate (restricted) members may be permitted to undertake the duties available to an associate member, but only as specified in writing at the time that the graduate membership is offered.

1.5.4 Members Emeriti

Members emeriti may perform all duties of a full member, but may only take on new supervision with the approval of the graduate chair, dean, or director of the graduate unit.

2 Categories of Students

The University offers admissions to three categories of graduate students:

1. degree or diploma student;
2. special (non-degree) student;
3. visiting student.

2.1 Degree or Diploma Student

A degree or diploma student is registered in a graduate degree or diploma program in the School of Graduate Studies.

A student who has completed all requirements for the doctoral degree exclusive of thesis research is deemed to have achieved candidacy and will be designated as a "doctoral candidate" in the School of Graduate Studies.

2.1.1 Degree or Diploma Student Conditionally Registered

Admission conditions enable a graduate unit to offer admission, and in some cases even allow registration, conditional upon satisfying some outstanding admission requirement(s) such as conferral of admitting degree. When credentials are from a university where the program of study cannot readily be appraised by the graduate unit, the applicant may be required to register conditionally (i.e., conditional upon demonstrating satisfaction of one or more admission requirements) for a period

not to exceed one academic session (four months). Applicants must hold a recognized degree with appropriate standing.

Failure to satisfy the condition by the registration deadline will result in the withdrawal of the offer of admission, at the request of the graduate unit.

2.2 Special (Non-degree) Student

Two categories of special students are described below. Special students are not registered in a program of study which may lead to a degree or diploma. All special students must be enrolled in at least one graduate course; some may be enrolled in both undergraduate and graduate courses. Special students must submit an application for admission for each academic year of study.

2.2.1 Special Student, Full-Time

Students who are changing disciplines or require preparatory work may be admitted as full-time special students and enrol in a full-time program of study not leading to a degree or diploma. Full-time special students are enrolled in more than 1.0 full course equivalent (FCE) per session.

2.2.2 Special Student, Part-Time

Students wishing to take 0.5 or 1.0 full course equivalent (FCE) may be admitted as part-time special students. Part-time special students may take a maximum of 0.5 or 1.0 full course equivalent (FCE) in any session as approved by the graduate unit. Coursework does not count for degree/diploma credit.

2.3 Visiting Student

Visiting students are registered under special arrangements in the School of Graduate Studies and are not admitted to a degree. For more information, visit the web pages on Visiting and Exchange Opportunities and International Visiting Graduate Students.

Students registered at Canadian universities can apply through the Ontario Visiting Student (OVGS) program, the Canadian University Graduate Transfer Agreement (CUGTA), or the Canadian Association for Graduate Students (CAGS) research mobility agreement. For further information on all three programs, students should consult their home university.

Students registered at international universities can apply to conduct research as a visiting student through the International Visiting Graduate Student (IVGS) program. Students must secure a U of T supervisor. They must also obtain approval from their home institution.

For all categories of visiting student, students must be registered in a graduate degree program at a recognized institution. Students in diploma or certificate programs, undergraduate students, and students on leave from their degree programs are not eligible.

3 Application for Admission to a Degree Program

3.1 Procedures

4. Application for admission should be submitted using the SGS Online Admissions Application. The exceptions for using the SGS Admissions Application are:
   - all programs offered through the Rotman School of Management;
   - MScPT, MScOT, and the MHSc in Speech-Language Pathology, which participate in a common provincial application for professional rehabilitation medicine programs (ORPAS).
5. Applicants must pay a non-refundable application fee of $125. Some graduate units have set higher application fees. Payment is made online at the time of application using a credit card. Application will not be processed until the application fee is received.
6. Applicants are required to provide a copy of their complete academic record issued directly from all of the universities attended. Letters of reference are also required. Individual graduate units may require further documentation.
7. Certified English translations of all international documentation written in a language other than English or French must also be submitted.

3.2 Application Deadlines

The graduate unit determines the deadline date for applicants to submit their applications, supporting documentation, and at least two letters of reference to be assured that they will be considered for a place in the program of their choice and for financial support.

For specific information on application and financial support deadlines, contact the graduate unit offering the program to which you are applying.

International applicants are encouraged to initiate their application early in the cycle to ensure timely submission, particularly where special documentation (and/or translation) and proof of English-language proficiency are required.

Most programs commence in Fall session. Some commence in Winter or Summer session. Applicants should consult the graduate unit to confirm program start times.

3.3 Acceptance to Program

Admission decisions are made by the graduate unit. The official acceptance letter is issued by the School of Graduate Studies. Admission decisions are final and are not appealable.

Applicants who are offered acceptance pending receipt of final transcripts must submit one official copy of their final transcripts to the graduate unit before final acceptance can be approved. If final transcripts do not indicate that the expected degree has been conferred, official documentation indicating the anticipated date of degree conferral must be submitted before registration.

Normally, students accepted to the School of Graduate Studies must commence their program of study on the date specified in their letter of acceptance. If circumstances prevent a student from starting study on the specified date, the graduate unit may approve to defer admission for a period not to exceed 12 months from the original commencement date. In such a case, an official transcript will be required to document any new study completed in the interim. If the period exceeds 12 months from the original date of expected commencement, the admission will be withdrawn and a new application must be submitted.

With the approval of the graduate unit, students accepted to begin their programs in September will be permitted to start the preceding summer. Students taking courses during the summer will pay the Summer session fees (academic, incidental, and ancillary), which is additional to the Fall and Winter session fees. Students engaged only in research must register but do not pay Summer session fees.

4 Admission Regulations and Procedures

The University's admission regulations and procedures are designed so that students entering a graduate program may normally have the capacity and preparation necessary to meet the challenges of the program effectively.

The School of Graduate Studies regulations for admission specify minimal requirements only. Graduate units may have additional requirements and/or set higher than SGS minimum admission requirements. Meeting the minimal requirements of the graduate unit and the School of Graduate Studies does not guarantee admission.

The University reserves the right to determine whether credentials of other degree-granting institutions meet the standards for admission to University of Toronto programs. Admission decisions are final and are not appealable. The University also reserves the right to verify the accuracy of any documentation submitted as part of an application.

4.1 Academic Requirements for Admission

All applicants will be considered on their individual merits for admission to any graduate program at the University of Toronto. See Degree Regulations for further information.

4.1.1 Master's Programs

Minimum Requirements

1. An appropriate bachelor's degree with high academic standing from a recognized university, that has appropriate breadth and depth in a discipline deemed appropriate for the intended field of study.
2. An average grade equivalent to at least mid-B or better, normally demonstrated by an average grade in the final year or over senior courses.
3. At least two letters of reference.
4. Other qualifications as specified by the graduate unit.

4.1.2 Doctor of Philosophy Programs

Minimum Requirements

1. An appropriate master's degree, or in some programs an appropriate bachelor's degree with high academic standing, from a recognized university in a discipline deemed appropriate for the intended field of study.
2. An average grade equivalent to a B+ or better in a previous master's degree program. Where relevant, demonstrated research competence equivalent to at least a B+ grade will be considered.
3. Direct entry from a bachelor's degree to a PhD program may be available when permitted by the graduate unit. For direct-entry applicants, an average grade equivalent to A– or better in courses in the relevant discipline is required.
4. At least two letters of reference.
5. Other qualifications as specified by the graduate unit.

4.1.3 Other Doctoral Programs

Normally, an appropriate master's degree with high academic standing from a recognized university in a discipline deemed appropriate for the intended field of study is required. See appropriate graduate unit entry for details about specific minimum admission requirements.

4.1.4 Graduate Diploma Programs

Graduate diploma programs involve concurrent or standalone registration with a graduate degree program. Applicants to graduate diploma programs should complete the SGS Online Admissions Application.

Minimum Requirements

1. A bachelor's degree in a discipline deemed appropriate for the intended field of study is an appropriate degree for a graduate diploma.
2. Other qualifications may apply, as specified by the graduate unit.

4.1.5 Special Students

Before applying, applicants should identify the courses they wish to take and obtain approval from the graduate unit offering the course. With the approval of the graduate unit, they may serve to satisfy prerequisite requirements. Special students' programs must include at least one graduate course. Any tuition fees paid as a special student cannot be transferred to a subsequent degree program.

1. Full-time special students must have obtained an average grade equivalent to mid-B or better in the final year (or over senior courses) of an appropriate bachelor's degree program.
2. Part-time special students who are accepted with less than mid-B standing are not normally considered admissible to a master's degree at a later date.
3. At least two letters of reference are required for full-time special students.
4. Other qualifications as specified by the graduate unit.

4.2 Regulations and Procedures

4.2.1 Advanced Standing

Advanced standing refers to academic credit awarded upon admission to a program of study that enables direct entry to an identified higher academic achievement level of the program. Students are eligible for advanced standing if they meet a clearly articulated set of objectives and/or course requirements for an advanced-standing option as defined in the graduate program calendar entry. Not every program offers an advanced-standing option.

4.2.2 Eligibility of Students for Second Graduate Degree of Same Title

The University may confer upon a student a graduate degree having the same title as a previous degree, if that initial degree was obtained at a different institution. For students who already have obtained a University of Toronto degree, a second degree of the same name will not be conferred unless it is undertaken in a different field of study from the first.

4.2.3 Mature Students

Applicants who graduated five or more years ago but without achieving sufficiently high standing for admission to a graduate program may be considered for admission if, since graduation, they have done significant intellectual work and/or made a significant professional contribution that can be considered equivalent to a higher academic standing. This means that the mere passage of time in a profession is not sufficient. Graduate units must submit recommendations for admission to the School of Graduate Studies for approval.

This contribution and its impact on the profession must be detailed, documented, and presented as part of the application. Such applicants may be considered for admission if they can document that they have achieved qualifications at least equivalent to those stated in the preceding sections and if a graduate unit so recommends. Applicants should explain why they think their professional development activities or work experiences should be viewed as equivalent to academic work conducted at a university.

Examples of evidence may include but are not limited to:

- publications and/or research which is professionally relevant (including published papers, technical reports, or patents)
- a record of outstanding advancement in one's profession (e.g., progressive leadership roles, management of projects and personnel, professional or scientific citations, and awards)
- professional designations, diplomas, or certificates
- training or courses taken subsequent to the undergraduate degree and/or being an instructor of professional development courses to others in one's profession
- development of new skills over and above what would normally be expected in one's profession.

4.2.4 Eligibility of Members of Teaching and Administrative Staff

Members of teaching or administrative staff of the University or its federated or affiliated colleges who are engaged in graduate instructional and/or graduate administrative activities within the graduate unit offering the graduate program to which they are seeking admission are normally not eligible to be graduate students within that graduate unit at the University of Toronto.

Exceptions may be granted by SGS when it is confident that the graduate program is sufficiently remote from the faculty or staff member's usual work that academic impartiality is not compromised.

4.2.5 Transfers

4.2.5.1 Master's to Doctoral

A student may be recommended for transfer from a master's program to a doctoral program. In such cases, the student will transfer to a five-year doctoral program with the years in the master's program being counted as part of the doctoral program. Courses may be excluded in the transfer. The total number of courses required for the doctoral program is the sum of the normal master's and doctoral course requirements, unless otherwise specified by the graduate unit. Where flexible-time is an approved option, a student may also be recommended for transfer to a flexible-time doctoral option with the years in the master’s program being counted as part of the doctoral program. Such a transfer must occur within 24 months of initial registration.

4.2.5.2 Doctoral to Master's

Students transferring from the doctoral to the master's program must complete all of the normal master's degree requirements, or their equivalent, in order to be awarded the master's degree. These transfers are made on the recommendation of the graduate unit and must be approved by the School of Graduate Studies.

A second University of Toronto master's degree of the same name will not be conferred unless it is undertaken in a different field of study from the first. Students who transfer from the doctoral to the master's program will not be permitted to transfer subsequently to the doctoral program within the same graduate unit unless approved by the School of Graduate Studies.

4.3 English-Language Proficiency

Students must be able to communicate effectively in English to study at the University of Toronto. Proficiency in the English language must be demonstrated by all applicants educated outside Canada whose primary language is not English. This is a requirement of admission and should be met before application, but must be met before the deadline to register.

This requirement may be satisfied using one of the English-language proficiency tests below. Test results that are older than two years at the time of application cannot be accepted. In these circumstances, the applicant must retake the English-language proficiency test. Minimum scores are indicated; however, many graduate units require a higher score.

4.3.1 Test of English as a Foreign Language (TOEFL)

Educational Testing Service (ETS)
Web: www.ets.org/toefl

The TOEFL examination is offered in two formats:

1. the Internet-based format (iBT) offered year-round
2. the paper-based format (PBT) only offered on specific dates in a limited number of countries

The iBT TOEFL must include the writing and speaking sections.

The PBT TOEFL must include the Test of Written English (TWE) component.

All applicants must satisfy the minimum TOEFL score requirements set by each of the four SGS academic divisions listed in the following chart.

TOEFL Minimum Score Requirements

Consult the graduate unit to which you are applying to determine if a higher minimum score is required.

Academic Division	Internet-Based Test (TOEFL iBT) Including Writing and Speaking Sections	Paper-Based Test (TOEFL PBT) and TWE
I. Humanities	Overall score: 93 Writing: 22 Speaking: 22	Overall score: 580 TWE: 5
II. Social Sciences	Overall score: 93 Writing: 22 Speaking: 22	Overall score: 580 TWE: 5
III. Physical Sciences	Overall score: 93 Writing: 22 Speaking: 22	Overall score: 580 TWE: 4
IV. Life Sciences	Overall score: 93 Writing: 22 Speaking: 22	Overall score: 580 TWE: 5

4.3.2 International English Language Testing System (IELTS)

Web: www.ielts.org
Required score: 7.0 (Academic) with at least 6.5 for each component.

4.3.3 Academic English Level 60

School of Continuing Studies, University of Toronto
Web: https://learn.utoronto.ca/english-language-program/programs/english-for-academic-purposes
Required score: B

4.3.4 Canadian Academic English Language (CAEL) Online

Web: www.cael.ca
Required score: 70 minimum total with at least 60 in each part.

4.3.5 The Certificate of Proficiency in English (COPE)

English Language Diagnosis and Assessment (ELDA)
Web: www.copetest.com
Required score: 76 minimum total with at least 22 in each component and 32 in writing

5 Structure of Academic Programs

5.1 Academic Year

In the School of Graduate Studies, the academic year begins in September and ends in August. The academic year is divided into three sessions:

- Fall (F) session (September to December)
- Winter (W) session (January to April)
- Summer (S) session (May to August)

5.2 Academic Programs

Academic programs leading to graduate degrees and diplomas are defined by the units that offer them and by the degree regulations. Consult the Degree and Diploma Programs by Graduate Unit section of this calendar.

5.3 Program Length

Program length is established at the time of initial approval of the program. Program length refers to the period of time (in sessions or academic years) for an academically well-prepared student to complete all program requirements while registered full-time. The program length is the period of time upon which the minimum degree fee is based (for master's programs only).

The typical registration sequence for full-time master's programs is shown in individual graduate unit entries: for example, the F/W/S abbreviation is used for Fall/Winter/Summer.

Actual time to complete a program may vary for individual students and across disciplines. Doctoral program length is established through the Doctoral Degree Regulations. All requirements for the degree must be completed within the time limit (see 5.5).

5.4 Period of Residence

Many programs specify a period of residence whereby students must be on campus full-time and consequently in geographical proximity to be able to participate fully in the University activities associated with the program. Residence provides the student with an opportunity to become immersed in the intellectual environment of the University. Exceptions to the residency requirement must be approved by the graduate unit.

5.5 Time Limit

All program requirements must be completed within a specific period of time. The time limit for a degree is the maximum period of registration permitted for the completion of the program. The time limit for all graduate degrees and combined programs are as follows:

Doctoral	6 years
Direct-entry doctoral	7 years
Flexible-time PhD program option	6 to 8 years (depending on program)
Professional doctoral	5 to 6 years (depending on program)
Full-time master's	3 years (except for the MArch: 4 years; Dentistry MSc: 3 to 5 years)
Part-time master's	6 years
Combined degree programs	Time limit is established for each combined degree program. The time limit will be set at one year (or two for doctoral programs) beyond the established combined program length.

6 Registration and Enrolment

Registration is the process by which a person has established, for an academic period, an active association with a program of study.

Enrolment is a separate process from registration. It is the approved engagement by a student in a course or other academic activity or component of a program of study.

See the complete policy on *Association, Admission, and Registration*.

6.1 Registration Policies and Procedures

6.1.1 Registration Procedures

Students are required to register at the beginning of each session they wish to attend. The first step to registration is the payment of fees or arrangements to pay such fees. A student is considered to be registered once any conditions of admission have been satisfied and academic, incidental, and ancillary fees are paid or a fees arrangement has been made. New students who have received a conditional offer of admission should make arrangements with their graduate unit to clear conditions as soon as possible.

New graduate students will receive registration instructions prior to the registration dates listed in Sessional Dates. Students may access registration instructions from the SGS website and the graduate unit.

Registration material is posted online and students should consult the SGS website or their graduate unit's website for detailed registration information. Students are asked to check their ACORN account to view their invoice online. Every effort is made to ensure that only students who are eligible to register receive registration material. However, receiving such material does not override any other notification students receive about academic status and eligibility.

6.1.2 Full-Time Studies

Students registered as full-time students in the School of Graduate Studies must be engaged in their studies on a full-time basis, as required by government regulations for full-time graduate studies.

Full-time graduate students are defined according to government regulations as follows:

1. They must be pursuing their studies as a full-time occupation and identify themselves as full-time graduate students.
2. They must be designated by the University as full-time students.
3. They must be geographically available and visit the campus regularly.
4. They must be considered to be full-time students by their supervisors.
5. If an academic program requires an absence from the University, students must apply through their graduate unit for permission to be off campus.

A full-time student may be absent from the University for an extended period or may participate in a program offered by another university if, and only if, the student has received written permission from the graduate unit in which they are registered. A graduate student who, in a given session, is absent from the University without receiving prior approval may lose good academic standing. In exceptional cases, a graduate unit may recommend to the School of Graduate Studies the termination of the student's registration and eligibility.

6.1.3 Extended Full-Time (EFT) Studies

The EFT option permits an additional year of full-time studies to complete the program where the option is offered in a program.

1. The EFT registration option is available in professional master’s or professional doctoral programs where offered. Registration is full-time. A prescribed path to completion over the extended period is set out in the graduate unit’s calendar entry.

2. Full-time time limits apply to this option; the extended period may not exceed the time limit for the full-time program.
3. Students are charged the equivalent of the minimum degree fee which is spread out over the extended period; full-time incidental fees apply for each year of registration.
4. Students who do not complete the program in the prescribed period may apply for an extension and will be subject to the usual extension regulations.
5. Transfers between the EFT registration option and any other registration option are not permitted.
6. Students in this option are subject to the rules and conditions of full-time studies as set out in the Full-Time Studies section above.

6.1.4 Part-Time Studies

1. The option to undertake studies on a part-time basis is available in some master's programs.
2. A student enrolled in part-time studies may, over the course of each academic year, normally take a maximum of one-third of the annual program requirements, as defined by the graduate unit; enrolment each session by part-time students is subject to graduate unit approval.
3. A prescribed path to completion may or may not be provided for part-time studies; where provided, it will be set out in the graduate unit's entry in the *SGS Calendar*.
4. A student who is registered in part-time studies is subject to the minimum degree fee (see section 14.4 Minimum Degree Fee).
5. Transfer from part-time studies to full-time studies requires the approval of the graduate unit and may not be permitted in some programs.
6. Transfer from part-time studies to the extended full-time registration option is not permitted.
7. Time limits for part-time studies are outlined in section 14.4 Minimum Degree Fee.
8. Part-time special (non-degree) students may take a maximum of 0.5 or 1.0 full course equivalent (FCE) in any session as approved by the graduate unit; work does not count for degree credit.

6.1.5 Flexible-Time PhD Studies

1. Some PhD programs are approved to offer flexible-time studies.
2. Students in a flexible-time PhD program option will register full-time during the first four years and will switch to part-time registration during subsequent years in the program.
3. Students are required to be registered for every successive session, including summers, following the first session of registration unless granted a leave of absence.
4. The time limit, between six and eight years, will be established through the departmental regulations.
5. Transfers between the full-time PhD program and the flexible-time PhD program option are not permitted.

6.1.6 Summer Session Courses

Students enrolled in courses or engaging in research or project work in the summer must register for the Summer session.

Doctoral, MSc, and MASc students are already registered for the Summer session when they first register in:

- September for the September-to-August period or
- January for the January-to-August period.

In addition to a large program of research supervision and independent study, the School of Graduate Studies offers a limited number of graduate courses for credit towards higher degrees during the summer. Summer courses are equivalent to those offered during the Fall and Winter sessions but vary in duration and thus in frequency of meeting. Some courses will last 12 to 14 weeks while others will meet for 7 weeks.

For students enrolled in the May-to-August session, the maximum possible load is 2.0 full-course equivalents (FCEs). The maximum load in the May-to-June or July-to-August period is 1.0 FCE.

6.1.7 First Registration

Students beginning their degree programs normally register for the first time in the Fall session. In some cases, graduate units may give permission for new students to register for the first time in their program in the Winter or Summer session.

6.1.8 Continuity of Registration

Students in a thesis program (doctoral or master's) or in a coursework-only master's program with other requirements to complete, such as a project, major research paper, or recital, must be continuously registered or have an approved leave of absence.

6.1.8.1 Master's Students: Continuous Registration

Once they have first registered, full-time, part-time, and extended full-time master's students in programs that require continuous registration must register annually until all degree requirements have been completed. Full-time master's students who have completed the program length defined for the program may not register as part-time students.

6.1.8.2 Master's Students: Coursework-Only

Full-time master's students in coursework-only programs must register initially for the program length defined for the program and thereafter for each session in which they are completing requirements for the degree.

Master's students in coursework-only programs proceeding to their degree on a part-time basis register in those sessions in which they are completing course requirements for the degree. When all course requirements have been completed, part-time master's students must register annually until all other requirements have been completed. A switch from full-time to part-time status is not permitted once the program length defined for the program has been completed.

Prior to completing all courses in a coursework-only program, and with the permission of their graduate unit, master's students admitted to a full-time or part-time program may "stop out" between sessions for up to 12 months. However, no change is made to the time limit for completing the degree.

Master's students are advised to consult their graduate units for further information on continuity of registration requirements, particularly with regard to the Summer session; many graduate units expect their students to be registered for all three sessions.

6.1.8.3 Doctoral Students

All doctoral students must register continuously until all degree requirements have been fulfilled.

6.1.9 Late Registration Fee

Since it is the student's responsibility to ensure that proper registration is completed on time, late registration will be subject to an additional fee as specified in the Fee Regulations section of this calendar.

6.1.10 Failure to Register

Students will not receive credit for work completed during a session in which they have not registered.

Students who fail to register during a program requiring continuity of registration and who do not have an approved leave may only apply to re-register if, at the time of application, they are still within the maximum allowable time for the degree program (normal time limit plus maximum extension years). A student wishing to re-register must apply to the relevant graduate unit.

Re-registration requires approval from both the graduate unit and SGS. The program's normal requirements and time limits (as defined by regulation 5.5 Time Limit) will apply to reinstated students as if they had been continuously registered; reinstated students must pay fees owing for any session(s) in which they did not register. Non-registered students forfeit any funding that would have been available had they been registered.

6.1.11 Extension of Time for Completion of Degree Requirements

6.1.11.1 Master's Students

In exceptional circumstances, a master's student who did not complete all the requirements for the degree within the time limit specified in the degree regulations may be considered for a maximum of three one-year extensions provided that the graduate unit concerned so approves. The first two extension requests require departmental approvals; the third requires departmental and School of Graduate Studies approvals.

To apply for an extension, the student must complete the Program Extension form and present to the graduate unit concerned the causes for the delay. If an extension request is made for a third and final extension, the student and the department must each provide confirmation that the degree requirements can be met within the time limits of the final extension. No registration beyond the extension period will be permitted.

6.1.11.2 Doctoral Students

In exceptional circumstances, a doctoral student who has not completed all the requirements for the degree within the time limit for the doctoral degree is eligible to apply for four one-year extensions. The first two extension requests require graduate unit approvals; the second two require graduate unit and School of Graduate Studies approvals.

To qualify for an extension, the student must complete the Program Extension form and present to the graduate unit concerned the causes for the delay. If an extension request is made for a fourth and final extension, the student, the supervisor, and the department must each provide confirmation that the degree requirements can be met within the time limits of the final extension. No registration beyond the four-year extension period will be permitted.

6.1.12 Joint Educational Placement (JEP) for Doctoral Students

A Joint Educational Placement (JEP) is an opportunity for individual students to pursue their doctoral degree program under the joint supervision of faculty at the University of Toronto and a partner Canadian or international university. The JEP is intended to allow exceptional doctoral students to pursue research opportunities and acquire research experience in two institutions at an early stage in their doctoral studies.

At the time of application to the JEP, the applicant designates one of the participating institutions as the lead institution, the other as the collaborator. For students who designate the University of Toronto as the lead institution, the agreement must be completed prior to achieving candidacy. Regardless of whether the University of Toronto is the lead or collaborator institution, all U of T course requirements for the doctoral degree must be met as defined in the graduate unit entry in the *SGS Calendar*.

Applicants must meet the admission, registration, and degree requirements of both SGS and the partner institution. To be considered for this option, an applicant must complete the Joint Educational Placement agreement, must be recommended for admission as a full-time doctoral degree student, and must be deemed admissible by both institutions. Applications are assessed on a case-by-case basis by the graduate unit in consultation with SGS.

The academic and research program of a student enrolled in a JEP should be based on ongoing or developing research collaboration between supervisors and/or research groups in the two participating institutions. The academic and research program of a student enrolled in a JEP should be based on ongoing or developing research collaboration between supervisors and/or research groups in the two participating institutions. Students enrolled at the University of Toronto who successfully complete the requirements of the program receive a U of T degree with the parchment and transcript noting that the degree is “Awarded as a single degree under a Joint Placement arrangement (with the collaborator institution)” and may participate in a U of T convocation ceremony. The partner institution may also issue a parchment.

For the JEP agreement template and additional information, visit the SGS web page on Joint Educational Placement Students.

6.1.13 Dual Registration

A student in a master's program at this University who has been offered admission to a doctoral program conditional on completion of the master's program may be a dual registrant for only one session in both programs under the following conditions:

1. A minimal amount of work remains to complete the requirements for the master's degree. A student may enrol in a maximum of 0.5 full-course equivalent (FCE; one half course) for the master's program in the one session of dual registration with the approval of the graduate unit.
2. Permission has been granted by the graduate unit.
3. The student will be engaged in full-time doctoral studies and will be registered full-time in the doctoral and part-time in the master's program. Only the appropriate doctoral fees will be charged.
4. The period of dual registration will be either September 1 to December 31 or January 1 to April 30.

In order to receive credit for the doctoral program for the period as a dual registrant, the student must be recommended for the award of the master's degree by the deadlines in the SGS Sessional Dates. Otherwise, the doctoral registration will be cancelled, no credit for the doctoral program will be allowed, and the student will continue to be registered as a master's student only. An appropriate fees adjustment will be made so that the student will be charged fees only as a master's student.

Doctoral program course credit will be retained for courses completed in the period of dual registration, provided the graduate unit has informed the School of Graduate Studies.

Students who are not recommended for the master's degree by the deadline and whose enrolment in the doctoral program is thereby cancelled may not apply for dual registration a second time. They must successfully complete the requirements for the master's degree before registering in the doctoral program.

6.1.14 Simultaneous Registration

Simultaneous registration in two full-time programs is not permitted. With the consent of both graduate units concerned, or of the graduate unit and another Faculty or School, and written notification to the School of Graduate Studies, simultaneous registration in a full-time program and a part-time program may be permitted. Two part-time registrations in different programs also may be permitted. Students are responsible for the fees charged for both programs.

6.1.15 Leave Policy

Graduate students may apply to their graduate unit for a one-session to three-session leave during their program of study for:

1. health or personal problems which temporarily make it impossible to continue in the program; or
2. parental leave by either parent at the time of pregnancy, birth or adoption, and/or to provide full-time care during the child's first year. Normally, parental leave is completed within 12 months of the date of birth or custody. Where both parents are graduate students taking leave, the combined total number of sessions may not exceed four.

Once on leave, students will neither be registered nor will they be required to pay fees for this period. In general, students on leave may not make demands upon the resources of the University, attend courses, or expect advice from their supervisor. Students on an approved leave of absence may opt in to paying compulsory non-academic incidental fees and receive continued access to campus services offered by Student Life (Academic Success Centre, Career Centre, Centre for International Experience, Centre for Community Partnerships, Health and Wellness, Housing Services, Indigenous Student Services, Multi-Faith Centre, Student and Campus Community Development, etc.), Hart House, and the Faculty of Kinesiology & Physical Education during the leave of absence. Students on leave for parental or health reasons who wish to consult with their supervisor or other faculty are advised to make special arrangements through their graduate unit.

Students on leave will not be eligible to receive University of Toronto financial assistance. In the case of other graduate student awards, the regulations of the particular granting agency apply. Master's students whose programs do not require continuous registration may "stop out" as an alternative to taking a formal leave — see section 6.1.8.2 Master's Students: Coursework-Only.

Students may make application for a leave by completing the Leave of Absence form and submitting it to their graduate unit for approval. The form is then sent to the School of Graduate Studies for processing.

The time limit of the degree program will be extended by the duration of the leave taken, i.e., one, two, or three sessions as appropriate. Except for parental leave or in exceptional circumstances, it is not expected that a student will be granted more than one leave under the terms of this policy.

It is expected that leaves coincide with sessional start and end dates. In exceptional circumstances, students may request special arrangements, which require the approval of both the graduate unit and the School of Graduate Studies.

6.1.16 Withdrawal from a Graduate Program

A student may withdraw voluntarily from their program at any point. To withdraw from a program, a student first must submit a Program Withdrawal Form to the graduate unit and then to SGS. The withdrawal is recorded on the student academic record and reflected on the transcript; the University determines fee rebates, if applicable. Should the student wish to return, they must reapply. An application for re-admission by a student who has withdrawn will be made in competition with all other applicants.

6.1.17 Graduate Courses and Other Academic Activities

See the guidelines on Graduate Courses and Other Academic Activities.

6.1.17.1 Graduate Courses

All graduate programs are composed of a number of academic requirements that include graduate courses and other academic activities. A graduate course is a discrete, time-delimited unit of instructional/learning activity identified by a course code in which students enrol. Graduate courses must be approved as minor modifications. All graduate courses must have an instructor in charge who has a graduate faculty membership in the graduate unit(s) responsible for the course.

Graduate courses may vary in timing, weight, delivery mode, and format. Course codes may serve as markers for Other Academic Activities. See the guidelines on Graduate Courses and Other Academic Activities including Program Examinations.

If a course is not offered for more than five years, it becomes inactive; SGS will archive the course in ACORN. See the SGS guidelines for De-activating/Archiving and Re-activating Graduate Courses.

6.1.17.2 Course Code and Weight

All graduate courses have course codes consisting of:

- a prefix associated with the academic unit or program (three letters);
- a four-digit course number; and
- a suffix associated with the course weight (alpha character).

Normally, course weight is measured in full-course equivalencies (FCEs) and is indicated using a Y or H suffix:

- Y (full course): 1.0 FCE, normally taken over two sessions
- H (half course): 0.5 FCE, normally taken over one session

A full graduate course (course weight of 1.0 full-course equivalent [FCE]) should involve a minimum of 48 to 72 hours of organized activity (e.g., two lectures or three hours of laboratory work a week over two sessions). A half course (0.5 FCE) should require approximately half this time commitment.

Normally, the beginning and end dates for courses should coincide with the beginning and end dates of University sessions. Graduate units may offer modular courses which have enrolment deadlines that do not conform to the beginning and end of the sessions.

6.1.17.3 Other Academic Activities Including Program Examinations

Graduate programs may have a variety of requirements that are not courses but constitute other academic activities that have been approved according to SGS policies and procedures. Some common non-course academic activities are theses, major research papers, placements (including field work, clinical placements, and internships), and program examinations, etc.

Included in the category of program examinations are examinations such as comprehensive, qualifying, and field examinations. See individual program requirements in the Programs by Graduate Unit section of this calendar. Individual program requirements will identify the:

- different components of each examination;
- format of each examination and its components, if any;
- deadlines and timelines associated with required completion of examinations; and
- consequences for failure of a required examination and/or its components, including information about the number of attempts permitted to satisfactorily complete the examination.

6.2 Enrolment Policies and Procedures

6.2.1 Enrolment

Students enrol with their graduate units and arrange programs of study (courses, research topics, supervisors, etc.). Students should contact the graduate unit regarding enrolment procedures. Enrolment should be completed by the deadline noted in the Sessional Dates.

Most formal classes and seminars in the:

- Fall session begin in the week of September following Labour Day
- Winter session begin during the first week of January
- Summer session begin in May.

However, starting dates are determined by the graduate units; students are urged to contact the relevant graduate unit for information.

Not every course will be offered in any one year. Consult the graduate unit concerning course availability.

6.2.2 Deadlines for Enrolment Changes

Graduate units may establish earlier deadlines for course changes. Courses must be dropped by completing an Add/Drop Course(s) form or by using ACORN, if the graduate unit permits access.

In order to avoid academic penalties, courses must be dropped by the following deadlines:

Sept. 20, 2021	Final date to add full-year and Fall session courses.
Oct. 25, 2021	Final date to drop Fall session courses without academic penalty.
Jan. 17, 2022	Final date to add Winter session courses.
Feb. 14, 2022	Final date to drop full-year and Winter session courses without academic penalty.
May 9, 2022	Final date to enrol in May-to-June or May-to-August session courses.
May 27, 2022	Final date to drop May-to-June F section courses without academic penalty.

June 13, 2022	Final date to drop May-to-August session Y section courses without academic penalty.
July 4, 2022	Final date to enrol in July-to-August courses.
July 18, 2022	Final date to drop a July-to-August S section courses without academic penalty.

Students enrolled in coursework-only programs who drop all courses by the deadlines must withdraw from the program.

Some graduate units offer modular courses which have enrolment deadlines that do not conform to the deadlines in the above chart. All modular courses with non-standard start/end dates require the graduate unit to establish suitable drop dates.

6.2.3 Exceptional Circumstances Affecting Student Performance

Students with health problems or other personal circumstances which may adversely affect their performance in, or their ability to complete coursework, examinations, or other departmental or graduate program assessments may request special consideration. Students with long-term needs are encouraged to register with Accessibility Services.

Written requests, supported by a medical certificate or other appropriate evidence, must be submitted to the instructor or the graduate unit as soon as possible. If a medical certificate is submitted, it must confirm the student was adversely affected by health problems and must show the dates of illness and that the physician was consulted at the time of the illness.

If a student is affected by health problems or other personal circumstances during an examination that affect the completion of the examination, the student must notify the instructor or invigilator immediately; that is, the student should not wait until the end of the examination. Such notification must be followed up with a written request for special consideration as above.

6.2.4 Completion of Coursework and Grade Submission

Coursework must be completed and grades submitted by the following dates:

Jan. 7, 2022	Coursework must be completed and grades submitted for Fall session courses.
May 13, 2022	Coursework must be completed and grades submitted for full-year and Winter session courses (except for extended courses). *For students receiving degrees at June convocation, grades must be submitted by April 14.
July 8, 2022	Coursework must be completed and grades submitted for May-to-June F section courses.
Sept. 2, 2022	Coursework must be completed and grades submitted for July/August Summer session courses and extended courses.

Graduate units may establish earlier deadlines for completion of coursework and may prescribe penalties for late completion of work and for failure to complete work, provided that these penalties are announced at the time the instructor makes available to the class the methods by which student performance shall be evaluated.

6.2.5 Coursework Extensions

Students are expected to meet the course deadlines, both of the School of Graduate Studies and of the graduate units in which they are registered, and are advised to plan their research projects accordingly. Students who find themselves unable to meet SGS deadlines for completing coursework can, under certain conditions, receive extensions for completing the work after the date set by SGS. Students must be registered in the session in which they are completing coursework extensions.

6.2.5.1 Petitions for Course Extensions

The authority to grant an extension for the completion of work in a course beyond the original SGS deadline for that course rests with the graduate unit in which the course was offered, not the instructor of the course. Students will petition the graduate unit for extensions, using a standard form provided by SGS.

The deadline for requesting an initial extension is the deadline for completion of coursework and grade submission for courses offered in the relevant session, as specified in this calendar.

A student on extension who is unable to complete the required coursework in the extension period specified by the graduate unit may apply to the graduate unit for a continuation of the extension (subject to the time limits and deadlines for extensions, set out below); however, the student must make such a request before the expiry date of the extension period in place.

6.2.5.2 Grounds for Course Extensions

Legitimate reasons for an extension can be academic in nature (e.g., unexpected problems of research in a course) or non-academic (e.g., illness). In order to ensure as much uniformity and fairness as possible in the granting of extensions (or continuations of extensions), the relevant graduate unit must be reasonably certain that:

1. the reasons for the delay are both serious and substantiated: the student must provide a statement detailing the reasons, together with a physician's letter in the case of illness;
2. the student would not be granted an unfair academic advantage over fellow students in the course;
3. the student would not be placing in jeopardy the normal and satisfactory completion of new coursework; and
4. the student does have a reasonable chance of completing outstanding requirements within the time to be allotted.

6.2.5.3 Deadlines for Course Extensions

If a graduate unit grants a petition for a course extension, it must specify an extension period which is not to run beyond the SGS deadline for completion of coursework and grade submission following the original SGS deadline for the course. Thus, the deadlines for course extensions are as follows:

May 13, 2022	Fall session (Y, H) courses
Sept. 2, 2022	Fall/Winter session (Y) and Winter session (Y, H) courses
Jan. 7, 2023	Summer session courses and extended courses

A graduate unit may grant a continuation of an extension that is already in place provided that it does not extend the total period of the extension beyond the foregoing deadlines.

Extensions beyond these deadlines will require the approval of both the graduate unit and the School of Graduate Studies.

6.2.5.4 Grade-Reporting Procedures

The graduate unit will assign the temporary course report of SDF (Standing Deferred) to a student on an approved coursework extension, pending receipt from the instructor and graduate unit of a final course report. The final course report is due no later than the SGS deadline for completion of coursework and grade submission in the subsequent session.

If, by that date, the student has not submitted the outstanding coursework, the submitted grade should be the actual grade earned in the course, calculated with zero assigned to any coursework that is still incomplete.

If there are compelling reasons for a further extension, and a graduate unit-supported request is approved by SGS, then the temporary report of SDF will be maintained until either a final course report is received by SGS, or the relevant deadline has expired.

Use of non-grade course reports such as WDR or INC, and amendments to submitted grades, must be approved by the School of Graduate Studies. Grade and non-grade notations appear in transcripts and are governed by the *University Assessment and Grading Practices Policy*.

6.2.5.5 SGS and Graduate Unit Notification

Graduate units are to notify SGS of extensions no later than the original deadlines for submitting grades for the relevant courses or, in case of continuations, no later than the expiry dates of the original periods of extension, providing in each case the new deadline for completion of coursework.

In addition, a graduate unit should notify the graduate unit in which the student is registered when it is not the same as the one granting the extension.

6.2.6 Extra Courses Not Required for the Degree

Graduate units may permit students to enrol in additional courses not required for the degree. Such courses must be so designated on the student's enrolment form.

These courses are subject to the same regulations regarding withdrawal, failure, and failure to complete work as are courses required for the degree, except that repetition or replacement of failed or incomplete courses may be waived by the graduate unit.

6.2.7 Prerequisite Courses

At least B– is required in all prerequisite courses but some graduate units may require a higher average; students should consult the graduate unit in advance.

6.2.8 Auditing a Graduate Course

Graduate units determine if they wish to allow auditing of their courses and which groups of students and non-students specified in the University of Toronto's *Policy on Auditing of Courses* they wish to allow. When auditing is allowed, the final decision to permit an individual to audit rests with the instructor of the course. In all cases, students registered in the University who wish to audit courses have priority over others.

An auditor may attend lectures and other class meetings, take part in class discussions, and, when the appropriate fee is paid, receive written confirmation of attendance. An auditor will not receive evaluations of participation and will not be allowed to submit assignments or write examinations and tests except by special and express permission.

Audited courses are not recorded on the student's official transcript. The following University of Toronto codes apply to auditors:

- Code of Student Conduct
- Code of Behaviour on Academic Matters

Further information about access, certificates of attendance, and fees for auditing may be obtained from Student Services at the School of Graduate Studies.

6.2.9 Transfer Credit and Exemptions

Transfer credit for graduate work completed in another program or as an SGS special student is limited to 1.0 full-course equivalent (FCE) or 25% of the course requirements for any degree, whichever is greater, provided that the courses have not been credited towards another degree, diploma, certificate, or any other qualifications. Such credit may be given on the recommendation of the student's graduate unit and with the School of Graduate Studies' approval, normally upon admission. Exceptions to the limit are allowed when approved for specific degrees.

Students participating in an approved exchange program on the recommendation of their graduate unit may receive transfer credit for up to 50% of the course requirements for their degree. They may also complete language requirements while on the exchange. When recommended by the unit and approved by SGS, that percentage may be exceeded by doctoral students.

In all cases, transfer credit arrangements for exchange program participants must be approved in advance by SGS.

Transfer of credit and course exemptions include the following categories:

1. Transfer Credit: Course Equivalent Credit received for course completed in a prior program is considered to be equivalent to course offered by the graduate unit, thus reducing the overall course credit requirements for degree.
2. Transfer Credit: General Equivalent Unassigned credit for course not identifiable with course offerings but which is evaluated as being appropriate for academic credit on transfer, thus reducing overall course credit requirements for degree.
3. Course Exemption: The graduate unit may exempt a student from a specific course requirement permitting the substitution of another course to meet degree requirements. Overall course credit requirements for degree are not reduced.

6.2.10 Credit/No Credit (CR/NCR)

Degree students in the School of Graduate Studies may not normally select any degree credits to be assessed on a Credit/No Credit basis. Graduate units may identify specific graduate programs in which students may elect to be assessed on a Credit/No Credit basis in specific courses on a limited basis. This information appears under the entry of the graduate unit offering the program.

Deadline

In graduate programs where this option is enabled, students can choose or remove this mode of assessment on ACORN; the deadline to do so is the last date to drop the relevant course without academic penalty. Once the deadline has passed, students may not reverse this decision.

Eligibility for CR or NCR

To achieve a status of CR (Credit), a student must achieve a final mark of at least B–. Marks below that will be assessed as NCR (No Credit).

Students taking a course on a CR/NCR basis will not be identified individually to the instructor teaching that course; they will be assessed in the same way as all other students in the course, i.e., will have the same assignments and tests and will be evaluated with the same expectations.

This option is not available to SGS non-degree students.

Note to graduating students: The CR/NCR option is only open to degree students. Once students have graduated, they become non-degree students and they may not complete courses on a CR/NCR basis, even if they enrolled in the course before their graduation. For example, if a student is graduating in June and they select the CR/NCR option for a Summer course, or if a student is graduating in November and they select the CR/NCR option for a Fall or Winter course, the CR/NCR option will be removed upon graduation and a refined letter grade will appear on the student’s record.

The CR/NCR option cannot be selected for a course if there is an allegation of academic misconduct. If a student has specified the CR/NCR option for a course in which an academic offence has been committed, the CR/NCR option will be revoked and the refined letter grade will stand as the course grade.

Important Notes and Limitations of CR/NCR

The underlying mark of a course completed on a CR/NCR basis will not be released or reported in any way. However, the School of Graduate Studies cannot determine how an external body may read or interpret the CR/NCR on a transcript. If a specific mark may be required in a course for professional or graduate school applications or for other reasons in the future, students should not choose the CR/NCR option. Students may wish to seek advice of their Graduate Coordinator when considering the use of CR/NCR.

7 Good Academic Standing and Satisfactory Academic Progress, Time Limits, Supervision, and Candidacy

7.1 All Degree Students

To be in good academic standing, a student registered in a degree program in the School of Graduate Studies must:

1. comply with the General Regulations of the School of Graduate Studies as well as with the Degree Regulations and program requirements governing that degree program; and
2. make satisfactory progress towards the completion of the degree.

All degree students are admitted under the General Regulations of the School of Graduate Studies, described in this section of this calendar. The degree regulations for the various doctoral and master's degrees offered by the School of Graduate Studies are specified in the Degree Regulations section of this calendar and in the Programs by Graduate Unit section, under the entry of the graduate unit offering the graduate program leading to the relevant degree. The specific requirements for the various graduate programs offered in the School of Graduate Studies are described under the entry of the graduate unit offering the program.

Each student is required to satisfy the program requirements found in the *SGS Calendar* (see Programs by Graduate Unit) of the academic year in which the student first registered in the graduate program. Failure to maintain good academic standing may result in various sanctions, including ineligibility for financial assistance, lowest priority for bursaries and assistantships, and even termination of registration.

The School of Graduate Studies may terminate the registration and eligibility of a student

1. who fails to comply with the General Regulations of the School of Graduate Studies, the relevant Degree Regulations, or the specific degree requirements of the graduate unit in which the student is registered; or
2. who fails to maintain satisfactory progress in the degree program in which the student is registered, as measured either by the general standards of the School of Graduate Studies or by the specific standards of the graduate unit.

7.2 Full-Time Students

Students must meet the full-time studies requirements to be in good academic standing — see General Regulations, section 6.1.1 Registration Procedures.

7.3 Timely Completion of Graduate Program Requirements

Each graduate unit establishes specific requirements for degree programs, in addition to those of the School of Graduate Studies, as well as standards of satisfactory performance and progress. These requirements and standards are described in the appropriate entry in the Programs by Graduate Unit section of this calendar and in material published separately by graduate units.

Continuation in a degree program requires satisfactory progress towards the completion of that program. A student's progress in a degree program will be considered satisfactory only if the student satisfies and completes the various requirements for that degree in a manner consistent with the SGS General Regulations and Degree Regulations and the graduate unit's timeline for completion of the degree program.

A graduate unit may recommend to the School of Graduate Studies that a student's registration and degree eligibility be terminated when a student fails to maintain satisfactory progress towards the completion of the degree.

7.4 Satisfactory Completion of Graduate Courses

Satisfactory performance in a degree program requires the completion of every course taken for graduate credit with a grade of at least a B–; some graduate units may require a minimum grade above a B– for some or all courses.

If a student fails to complete a graduate course in a satisfactory manner (i.e., receives a grade report of FZ or NCR in a course or receives a grade report below the minimum acceptable by the graduate unit), then the graduate unit in which the student is registered may recommend to the School of Graduate Studies the termination of registration and eligibility of that student.

If the student is permitted to continue, the student must repeat the relevant course, or take an alternative course recommended by the graduate unit and approved by the School of Graduate Studies, and obtain a satisfactory grade. The report for the course that was not completed in a satisfactory manner as well as the report for the repeated or alternative course will appear on the student's academic record.

7.5 Doctoral Students

7.5.1 Achieving Candidacy: Requirements and Time Limit

A degree student who has completed all requirements for the doctoral degree exclusive of thesis research will be designated as a "doctoral candidate" in the School of Graduate Studies.

To achieve candidacy, students in doctoral degree programs must:

1. complete all requirements for the degree exclusive of thesis research and courses such as ongoing research seminars that run continuously through the program; and
2. have an approved thesis topic, supervisor, and supervisory committee.

Candidacy must be achieved by the end of Year 3 for all doctoral programs, except for the five-year doctoral program, flexible-time PhD program option, and professional doctoral programs begun on a part-time basis. For those exceptions, candidacy must be achieved by the end of Year 4 of registration (see chart below).

Note: The foregoing time limits do not apply to courses that run continuously throughout the program.

Doctoral Degree Program Categories	Time Limit to Achieve Candidacy
Doctoral, four-year program	by end of Year 3
Doctoral, five-year program (direct-entry)	by end of Year 4
Flexible-time PhD program option	by end of Year 4
Professional doctoral program, full-time	by end of Year 3
Professional doctoral program, part-time	by end of Year 4

In exceptional circumstances, a student who has not met these requirements may be permitted to register in the program for up to 12 months (3 sessions) at the discretion of the graduate unit in which the student is registered. Continuation beyond 12 months will require the approval of both the graduate unit and the School of Graduate Studies.

Completion of the program requirements identified above will signal the achievement of candidacy. Successful completion of candidacy is recognized by a notation on the transcript.

See also requirements and deadlines in the Degree Regulations and unit entries in the Programs by Graduate Unit section of this calendar.

7.5.2 Supervision and Satisfactory Progress

All doctoral students must have an identified supervisor and supervisory committee as early as practicable in their program. The supervisory committee should consist of the supervisor chosen from among the graduate faculty members of the graduate unit in which the student is registered and two other members of the graduate faculty.

Where appropriate, the graduate unit should assist in selection of the supervisor. Both student and supervisor should be involved in the selection and approval of other supervisory committee members.

Unless the graduate unit has specified earlier deadlines, supervisory committees should be established no later than the end of the fourth session in all doctoral programs, except in five-year (direct-entry) doctoral programs, flexible-time PhD program options, and part-time professional doctoral programs, where the supervisory committee should be established no later than the end of the seventh session (see chart below).

Doctoral Degree Program Categories	Time Limit for Constituting Supervisory Committee
Doctoral, four-year program	by end of first session in Year 2
Doctoral, five-year program (direct-entry)	by end of first session in Year 3
Flexible-time PhD program option	by end of first session in Year 2
Professional doctoral program, full-time	by end of first session in Year 2
Professional doctoral program, part-time	by end of first session in Year 3

The student's choice of supervisor and supervisory committee is subject to the approval of the graduate unit in which the student is registered. A student who encounters difficulties setting up a supervisory committee should consult the chair, director, or graduate coordinator of the graduate unit in advance of the relevant deadline.

A student who fails to constitute a supervisory committee by the required time may lose good academic standing.

A student is expected to meet with this committee at least once a year, and more often if the committee so requires. At each meeting, the supervisory committee will assess the student's progress in the program and provide advice on future work. In each of two consecutive meetings, if a student's supervisory committee reports that the student's progress is unsatisfactory, the graduate unit may recommend to the School of Graduate Studies the termination of registration and eligibility of that student.

A student who encounters difficulties arranging a meeting of this committee should consult the chair, director, or graduate coordinator of the graduate unit in advance of the relevant deadline for doing so.

A student who, through their own neglect, fails to meet with the supervisory committee in a given year will be considered to have received an unsatisfactory progress report from the committee.

See also General Regulations, section 8 Thesis and Graduate Student Supervision; Degree Regulations, section 12 Doctoral Degrees; and specific program requirements in the Programs by Graduate Unit section.

8 Thesis and Graduate Student Supervision

8.1 Thesis Topic and Supervision

A thesis is a piece of scholarly writing. In those degree programs for which a thesis is part of the requirements, the work upon which the thesis is based must be conducted under the direction of one or more members of the faculty of the School of Graduate Studies.

Students must choose a thesis topic for which the graduate unit in which they are registered is able to provide adequate supervision.

A student's choice of thesis topic, as well as their choice of supervisor from among the graduate faculty members available in the graduate unit and supervisory committee, is subject to the approval of the Graduate chair, director, or dean in the graduate unit in which the student is registered.

8.2 Doctoral and Master's Supervision

While the special, collaborative relationship between student and supervisor serves as a foundation for graduate education, particularly at the doctoral level, the primary responsibility for graduate programs and their supervision rests with the graduate unit. The chair, director, or dean of the graduate unit has the principal obligation and authority for exercising these responsibilities, in accordance with the Constitution of the School of Graduate Studies, and, therefore, for implementing the academic and procedural standards established in the School of Graduate Studies.

Although this calendar outlines procedures to be followed in the supervision of doctoral and master's students, it is clear that these have general applicability for all graduate students to some degree. It is essential that students have access to information relevant to their graduate program of studies, in all domains.

Thus, each graduate unit will provide students with documentation that provides details of all procedures involved with graduate training, a list of members of the graduate faculty with relevant information concerning their participation, fields of expertise and supervision, and access to the SGS Graduate Supervision Guidelines.

In addition, updated statements must be made available to students on a regular basis. These will include the availability of financial assistance, and relevant information to affected students about the expected absences of their supervisor(s) and/or advisor(s).

Any graduate student who believes that their graduate unit is not following the supervision guidelines may inform their graduate unit or the School of Graduate Studies.

The academic experience is greatly enhanced if members of the academic faculty, in addition to the direct supervisor, are readily and formally available for consultation and discussion with the graduate student. Therefore, an individual thesis supervisory committee or, as an alternative, an area supervisory committee, should be struck as early as possible for each graduate student, and certainly from the commencement of thesis supervision.

The graduate unit is responsible for adopting a procedure for monitoring the progress of doctoral students registered in its programs. Consistent with the SGS Graduate Supervision Guidelines, the procedure must contain, at minimum, a supervisory committee that:

1. consists of the supervisor, chosen from among the graduate faculty members of the graduate unit in which the student is registered, and at least two graduate faculty members who hold a graduate faculty membership;
2. if a co-supervisor is identified, must also hold a graduate faculty membership in the student's graduate unit;
3. meets with the student at least once per year to assess the student's progress in the program and to provide advice on future work; and
4. submits a report detailing its observations of the student's progress and its recommendations.

Further, the student must be given the opportunity to respond to the supervisory committee's report and recommendations and to append a response to the committee's report. Copies of the report must be given to the student and filed with the graduate unit.

8.3 Doctoral Final Oral Examination

All doctoral students must defend a thesis at a Final Oral Examination organized by the graduate unit with the cooperation of the School of Graduate Studies, as follows:

1. The candidate shall defend the thesis at a Final Oral Examination organized by the graduate unit with the cooperation of SGS. The process of scheduling the examination, allowing time for professional appraisal, can be expected to take at least eight weeks, and candidates should discuss the timing with the graduate administration of their unit. Candidates should also ascertain whether their unit imposes regulations over and above the minimal conditions required by SGS.
2. The graduate unit will notify SGS eight weeks prior to the examination when the thesis is ready to go forward for examination. In the absence of any particular local procedure, the candidate's supervising committee will advise SGS that the thesis is ready to proceed. In rare cases, a thesis may proceed to examination without the approval of the supervising committee; candidates who wish to proceed without such approval should contact SGS.
3. The thesis will be sent to an appraiser external to the University of Toronto, appointed by SGS on the recommendation of the graduate unit. (The supervisor of the thesis will propose a list of names of possible external appraisers to the graduate coordinator or chair, who will choose one and send the recommendation to SGS for approval. The graduate unit will certify that the external appraiser has an arm's-length relationship to the candidate and supervisor.) The external appraiser must be a recognized expert on the subject of the thesis and must be external to the University as well as to its affiliated teaching hospitals and research institutes. Such an individual must be an associate or full professor at the home institution or, if the individual comes from outside the academic sector, must possess the qualifications to be appointed to an academic position at this level. Arrangements with external appraisers are the responsibility of the graduate unit. In particular, the graduate unit must allow the external appraiser sufficient time to act. The graduate unit must have a copy of the thesis delivered to the appraiser at least six weeks, and preferably longer, in advance of the examination date. Appraisals must be submitted to SGS at least two weeks in advance of the examination date; if they are not, the examination may have to be rescheduled. The graduate unit must also ensure that copies of the thesis are made available to all other voting members of the examination committee at least four weeks in advance of the examination date.
4. An examination committee, appointed by SGS on the recommendation of the graduate unit, will conduct the Final Oral Examination. The examination committee must include at least four, but no more than six, voting members: one to three of the voting members will have served on the candidate's supervisory committee, and at least two voting members will not have been closely involved in the supervision of the thesis. Eligible for inclusion in the latter group are the external appraiser (in person or remotely), members of the graduate faculty of the candidate's graduate unit, and members of the graduate faculty of other departments, centres, or institutes of the University. The examination committee may include, in addition, up to two non-voting members, who will be members of the graduate faculty of the candidate's graduate unit or members of the graduate faculty of another graduate unit of the University. A quorum is four voting members, two of whom must not have been closely involved in the supervision of the thesis. Graduate units must ascertain in advance the willingness of the persons named to act. SGS may modify the composition of the examination committee to fit exceptional circumstances.
5. SGS will appoint a non-voting chair to the examination committee. The chair will be a full member or member emeritus of the graduate faculty, holding no appointment to the graduate faculty of the candidate's graduate unit.
6. The graduate unit is responsible for scheduling the examination, booking a room, and making appropriate technical arrangements.
7. The graduate unit must submit to SGS, via ROSI, a nomination form; an abstract of the thesis, in English, not longer than 350 words; and a copy of the examination program.
8. The graduate unit will send a copy of the external appraisal of the thesis to SGS as soon as it is received. The graduate unit is responsible for the distribution of copies of the external appraisal to the candidate (two weeks before the examination) and members of the examination committee. It should not be distributed beyond that group and the relevant administrative officers before the examination. The candidate is to be instructed not to communicate with the external appraiser/examiner until the examination is under way.
9. Members of the graduate faculty are entitled to attend the examination, and with the permission of the chair, they may ask questions of the candidate, but they must

withdraw before the committee's discussion and vote. A qualified observer may attend, subject to the same restrictions, if the graduate unit has received approval for such attendance in writing beforehand from SGS. Otherwise, the examination is closed to the public. The vote at the examination takes into account both the thesis and the oral defence itself.

10. The examination committee represents the SGS Graduate Education Council and through it the University. It is therefore responsible for the standard of the doctoral degree in this University. Graduate unit examinations held immediately in advance of the final oral must not therefore interfere with attendance at, or thoroughness of, the final examination. The committee must evaluate the external appraisal of the thesis, which is to be considered only as an individual opinion to be employed as the committee sees fit. It must examine the candidate on the content and implications of the thesis. Where someone other than the candidate is a co-author of any portion of the thesis, the examination committee must be satisfied that the candidate's personal contribution to the thesis is sufficient to fulfil the requirements of the doctoral degree. In addition to determining the adequacy of the thesis, the committee must satisfy itself that the thesis document meets the proper standards of scholarship. The committee possesses the full authority of the School of Graduate Studies with respect to the examination.
11. A quorum for the final examination is four voting members, two of whom must not have been closely involved in the thesis, plus the examination committee chair, who has no vote. Voting shall be by signed ballot, and the names of the examiners and their respective votes shall be read to the examination committee by the chair. If a quorum is not present, the chair must delay the examination to obtain a quorum or may postpone the examination to another date.
12. The candidate passes on the first examination:
    a. if the decision is unanimous;
    b. or if there is not more than one negative vote or abstention.

If there is more than one negative vote or abstention, adjournment is mandatory. In the event of adjournment, the examination committee must provide the candidate, as soon as possible, with a written statement that indicates the reasons for adjournment and the committee's requirements for the reconvened oral examination. In addition, the examination committee must decide the approximate date of the reconvened examination. The time between the adjourned examination and the reconvened examination should be as short as circumstances will permit and in no case shall exceed one year.

At the reconvened examination, no new committee members shall be added, except for necessary replacements. It is the obligation of the examiners to attend the reconvened examination

The candidate passes on the reconvened examination:
a. if the decision is unanimous;
b. or if there is not more than one negative vote or abstention.

No further adjournment will be allowed. If a candidate is not recommended for the degree by the committee in charge of the second examination, the candidate is ineligible for further doctoral candidacy at the University. The examination committee must provide the candidate, as soon as possible, with a written statement that explains clearly and directly why the examiners found the candidate's performance unsatisfactory on the written and/ or oral components of the examination, as may be relevant. The candidate’s registration in the graduate program will be terminated.

1. If minor corrections in style are a condition of acceptance of the thesis, the candidate must complete the corrections within one month of the date of the examination, and the supervisor will inform the candidate of the necessary corrections. The supervisor must notify the School of Graduate Studies directly in writing that the required corrections have been made by the candidate, with a copy of the correspondence sent to the graduate coordinator of the graduate unit, before the candidate is recommended for the degree.
2. If minor modifications are a condition of acceptance of the thesis, the chair of the examination committee will appoint a subcommittee of the examination committee (to be approved by the examination committee) to supervise the proposed modifications. One member of the subcommittee is designated by the chair, with the approval of the examination committee, as the convenor. The convenor will be responsible for the preparation of a statement detailing the modifications required. Modifications must be completed within three months of the date of the oral examination. The members of the subcommittee will report on the acceptability of the completed modifications to the convenor. If all members of the subcommittee approve the completed modification, the candidate will be passed without the necessity of reconvening the examination committee. The convenor of the subcommittee must certify in writing to the School of Graduate Studies, within three months of the original examination, that the modifications have or have not been satisfactorily completed. If one or more members of the subcommittee do not approve the completed modifications, the Final Oral Examination must be reconvened within a year of the date of the original examination.
3. The examination committee must decide the nature of minor modifications, but it is intended that minor modifications should be more than corrections in style and less than major changes in the thesis. A typical example of minor modifications might be clarification of textual material or qualification of research findings and conclusions.

For further details, students should consult the Producing Your Thesis section of the SGS website.

8.4 Submission of Theses

One electronic copy of the final approved version of the defended thesis (master's or doctoral) must be submitted to SGS through the digital research repository for the University of Toronto community.

The format of the submitted thesis must comply with the School of Graduate Studies guidelines.

SGS requires that every doctoral thesis be published substantially as it is accepted. The preservation and public dissemination of original dissertation research is a principle to which the University, as a publicly funded institute of higher

education, is strongly committed. Unrestricted release of theses means permanent worldwide access through the Internet. Students retain copyright on the thesis as the thesis author. However, in exceptional cases, the author, in consultation with the thesis supervisor and with the approval of the chair of the graduate unit, shall have the right to postpone distribution and publication for a period up to two years from the date of acceptance of the thesis. In exceptional circumstances and on written petition to the Dean of the School of Graduate Studies, the period might be extended, but in no case for more than five years from the date of acceptance of the thesis unless approved by the SGS Graduate Education Council.

All theses will be submitted to ProQuest, which in turn makes theses available for purchase on its ProQuest Dissertations and Theses Global Database and includes the catalogue records in its bibliographic services. Following submission to ProQuest, theses will be made openly available on TSpace, the University of Toronto's research repository, and submitted to the national thesis program at Library and Archives Canada.

Thesis submission initiates the request for graduation. A bound printed copy of the doctoral thesis in its final form may be required by the candidate's graduate unit. Candidates should consult their unit to determine the format, number, and distribution of such copies.

Students must agree to the Library and Archives Canada Theses Non-exclusive License when making an electronic submission; any necessary copyright permissions will be uploaded to the digital research repository at this time.

Specific formatting guidelines must be followed so that theses conform to the requirements of SGS and for the publication of the thesis. Theses that do not conform to these formatting guidelines will not be accepted. For more information about required fees, forms, copyright, thesis formatting, and other related matters, visit the Producing Your Thesis section of the SGS website.

8.4.1 Doctoral Thesis

Prior to the Final Oral Examination, required copies of the doctoral thesis must be submitted by the candidate to the graduate unit. The candidate should consult the graduate coordinator regarding requirements and deadlines for submission of material.

The graduate unit is responsible for ensuring that a copy of the thesis is available at the Final Oral Examination.

Following successful completion of the Final Oral Examination, an electronic copy of the final approved version of the thesis and the required form(s) must be submitted to SGS (see section 8.4 Submission of Theses).

Confirmation in writing that any corrections or modifications deemed necessary after the defence must also be received by SGS (see General Regulations section 8.3 Doctoral Final Oral Examination).

8.4.2 Master's Thesis

Students should consult their graduate unit for additional local format requirements, submission deadlines, and procedures concerning master's theses.

An electronic copy of the thesis must be submitted to the School of Graduate Studies only after the thesis has been successfully defended and any final corrections have been made. The School of Graduate Studies also requires a copy of the letter from the student's supervisor confirming completion of any required corrections.

Students may also be required to submit a bound copy or copies of the thesis to the relevant graduate unit.

9 Graduation

9.1 Degree Recommendations

When all requirements for a **master's degree program** or **graduate diploma program** have been fulfilled, the graduate unit is required to submit a degree recommendation or diploma recommendation to the School of Graduate Studies indicating that the program has been satisfactorily completed by the student. Students should note that in the case of thesis master's programs, degree recommendations are only approved after the thesis and required supporting documents have been submitted to SGS.

When all requirements for a **doctoral program** have been fulfilled and a final copy of the thesis, as well as required supporting documents, have been submitted to SGS, the student will be recommended for graduation by SGS.

Master's and doctoral students must graduate at the convocation immediately following the completion of their degree requirements.

9.2 Convocation Ceremonies

Convocation ceremonies are held twice a year, in the spring and fall. Students who choose to attend a ceremony must attend the ceremony which directly follows the completion of their degree requirements. SGS Student Services submits the names of the graduands to the Office of Convocation, which is responsible for the procedures for the convocation ceremony and the issuance of diplomas.

Students who complete degree requirements by the January deadline can choose to have their degree conferred in absentia in March (there is no ceremony) or attend the ceremony in June.

The School of Graduate Studies will not release the official diploma to students who have outstanding debts or obligations to the University in accordance with the *Policy on Academic Sanctions for Students Who Have Outstanding University Obligations*. See section 11.9 Access to Official Student Academic Records.

Graduation information is available at governingcouncil.utoronto.ca/convocation.

10 Academic Appeals Policy

10.1 General

Graduate students may appeal substantive or procedural academic matters, including grades, evaluation of comprehensive examinations and other program requirements; decisions about the student's continuation in any program; or concerning any other decision with respect to the application of academic regulations and requirements to a student.

Decisions related to admission to an academic program, including admission to the doctoral program for current master's students, are not subject to appeal.

Appeals (except those under 10.1.1) must be initiated within the student's home graduate unit unless the appeal relates to a course outside the graduate unit, in which case it must be initiated in the graduate unit in which the course was taken, with notification to the student's home graduate unit. In the case of collaborative specialization core courses, the appeal is pursued through the student's home graduate unit where representation from the collaborative specialization will be included in the constitution of an appeal committee or hearing.

10.1.1 Exception

The process of academic appeal described in this policy must be followed for all disputes except appeals related to failure of a Final Doctoral Oral Examination or related to termination of registration in a program. Such appeals must be made directly to the SGS Graduate Academic Appeals Board (GAAB).

These appeals begin at Graduate Appeal Step 3 (section 10.3.3). In some such cases, the chair of GAAB may refer the appeal to the Graduate Department Academic Appeals Committee (GDAAC) for prior consideration and a recommendation to GAAB. The GDAAC does not have the right to overturn a failed Final Doctoral Oral Examination result or a termination of registration, but may recommend that such a decision be considered further by GAAB.

10.2 Informal Mediation

At any stage before filing and until the hearing of any appeal with the SGS Graduate Academic Appeals Board, a student may consult SGS for advice and/or informal mediation. With the consent of both parties, a representative of SGS will serve as informal mediator, attempting to resolve the dispute or clarify issues. Timelines are not affected by mediation. Consultation with SGS at an early stage is encouraged.

In cases where SGS has approved the termination of a student's registration or in cases where perceived or actual conflict of interest is identified, the student will have access to an alternate informal mediator.

10.3 Steps

The overall graduate appeals process is set out in the table below. Students should note the timelines for each stage carefully.

10.3.1 Step 1: Informal

In the case of dispute, students must first attempt to resolve the matter with the instructor or other person whose ruling is in question. Should the matter not be resolved with the instructor, and should the student wish to pursue the matter, the student must discuss the matter with the graduate coordinator/chair/dean of the graduate unit.

10.3.2 Step 2: Department Appeal

Should such discussions fail to resolve the matter, the student may make a formal appeal in writing to the Graduate Department Academic Appeals Committee (GDAAC).

The student must complete a Notice of Appeal to GDAAC; a copy of this notice is available from the graduate coordinator/chair/dean in every graduate unit. This form must be completed and delivered to the chair/dean of the graduate unit or the chair of GDAAC within the specified timeline of eight weeks from the date of the decision under appeal.

The chair of the GDAAC will determine, at their sole discretion, whether the appeal will proceed by way of an oral hearing and/or written submissions. In either case, at the conclusion of the hearing and/or review of the written submissions, the GDAAC will make a recommendation to the chair/dean of the graduate unit regarding the merits of the appeal. The chair/dean of the graduate unit will then render the department-level appeal decision. GDAAC guidelines for chairs/deans are made available to all parties in an appeal.

10.3.3 Step 3: Appeal to GAAB

1. The student may appeal the decision of the chair/dean of the graduate unit by filing a Notice of Appeal to the SGS Graduate Academic Appeals Board (GAAB) within eight weeks of the decision of the chair/dean of the graduate unit.
2. Filing a Notice of Appeal to GAAB is the first step for a student who is making an appeal regarding the failure of the Final Doctoral Oral Examination or termination of registration in a graduate program.

10.3.4 Step 4: Governing Council Appeal

A decision of the SGS Graduate Academic Appeals Board (GAAB) may subsequently be appealed by a student to the Governing Council's Academic Appeals Committee, in accordance with its guidelines and procedures. An appeal to this committee shall be commenced by filing a notice of appeal with its Secretary no later than 90 days after the date of the GAAB decision under appeal.

Steps and Timelines		
Timeline for Student Action at Each Stage **See Note A below**	Step **See Note B below**	Timeline for Decision/Action by University Body at Each Stage **See Note C below**
	1. Informal a. Student to instructor b. Student to graduate coordinator/chair/dean	
8 weeks from date of decision being appealed	**2. Graduate-Unit-Level Appeal** Notice of Appeal to GDAAC[1] **Note:** Appeals related to failure of the Final Doctoral Oral Examination or to termination of registration in a graduate program must be made directly to GAAB[2]; see Step 3b below.	**8 weeks** from filing of Notice of Appeal to GDAAC[1]
a. **8 weeks** from decision of graduate unit chair/dean b. **8 weeks** from written notification of failure of the Final Doctoral Oral Examination or termination of registration in a graduate program	**3. SGS Appeal** a. Notice of Appeal to GAAB[2] b. Appeal begins here for students who wish to appeal failure of the Final Doctoral Oral Examination or termination of registration in a graduate program.	**8 weeks** from filing of Notice of Appeal to GAAB[2]
90 days from decision of GAAB2	**4. Governing Council Appeal** Notice of Appeal to GCAAC[3]	N/A

Note A: A student may apply, in writing and with reasons, for an extension of time. Such applications may be made to the chair of GDAAC for graduate-unit-level appeals or to the GAAB for SGS-level appeals. Any extension is within the discretion of the GDAAC chair, or the GAAB, as appropriate, where the view is that compelling reasons exist.

Note B: Informal mediation is available via the SGS Vice-Dean at any stage before filing an appeal with the GAAB. Consultation with the SGS Vice-Dean at an early stage is encouraged. In cases where SGS has approved the termination of a student's registration or in cases where perceived or actual conflict of interest is identified, the student will have access to an alternate informal mediator.

Note C: The chair of the appeal body retains discretion to extend time limits applicable to its response at any stage where, in its view, compelling reasons exist.

11 Policies and Guidelines

Important School of Graduate Studies policies and guidelines affecting graduate students are included in the *SGS Calendar*. However, there are numerous additional policies and guidelines affecting graduate studies on the SGS website.

Furthermore, University of Toronto-wide policies affecting students are posted on the Governing Council website.

11.1 University Assessment and Grading Practices Policy

The *University Assessment and Grading Practices Policy* sets out the principles and key elements that should characterize the assessment and grading of student work in for-credit programming at the University of Toronto.

For graduate programs and students, any reference to "division/Faculty" should be understood to refer to the School of Graduate Studies, and any reference to department should be understood to refer to the relevant graduate unit.

The School of Graduate Studies is the only division that may develop additional grading regulations and guidelines for graduate studies. Where undergraduate and graduate practices differ, this has been indicated explicitly in the text. Otherwise, all clauses should be understood to apply equally to students at either level of study. Divisions/Faculties may wish to develop procedures for implementing these policies according to their needs. These procedures must be consistent with this policy. In case of conflict or lack of clarity, this policy will be understood to take precedence.

See the full text of the *University Assessment and Grading Practices Policy*.

11.2 Academic Continuity Policy

This policy provides a framework that will guide the University in enhancing its ability to fulfil its academic mission in the face of potential threats to academic continuity. It is intended to apply to circumstances and events that are potential threats to the continuity of the academic operations of the University and relates entirely to the principles and processes that should guide the University in this context. It applies to instances when the academic continuity of one or more programs, one or more departments or Faculties, one or more campuses, or the whole University is disrupted and changes need to be made to the normal academic operations of the University.

See the full text of the *Policy on Academic Continuity*.

11.3 Intellectual Property

The University believes that all contributors to the successful realization of new technologies and knowledge should share fairly and appropriately in the benefits. For details and further information, visit www.research.utoronto.ca.

11.4 Research Ethics

The University's *Policy on Ethical Conduct in Research* requires each academic division to formulate its own guidelines. The divisional guidelines apply to graduate students enrolled in graduate units within those Faculties. For details and further information, visit www.research.utoronto.ca.

11.5 Policy on Academic Sanctions for Students Who Have Outstanding Obligations to the University

Academic sanctions are applicable to any student who has an outstanding obligation to the University. Recognized obligations are as follows:

1. tuition fees
2. academic and other incidental fees
3. residence fees and other residence charges
4. library fines
5. bookstore accounts
6. loans made by colleges, Faculties, or the University
7. health service accounts
8. unreturned or damaged instruments, materials and equipment
9. orders for the restitution, rectification, or the payment of damages, fines, bonds for good behaviour, and requirement of public service work imposed under the authority of the *Code of Student Conduct*.

See the full text of the *Policy on Academic Sanctions for Students Who Have Outstanding University Obligations*.

11.6 Code of Behaviour on Academic Matters

The *Code of Behaviour on Academic Matters* addresses the responsibilities of all students and faculty to the integrity of the teaching and learning experience.

See the full text of the Code of Behaviour on Academic Matters.

11.7 Policy on Sexual Violence and Sexual Harassment

The *Policy on Sexual Violence and Sexual Harassment* protects students, faculty, and staff from sexual harassment within the University community.

See the full text of the *Policy on Sexual Violence and Sexual Harassment*.

11.8 Code of Student Conduct

Non-academic offences are defined in the University's *Code of Student Conduct*. The *Code* addresses offences, procedures, interim conditions and measures, and sanctions.

See the full text of the *Code of Student Conduct*.

11.9 Access to Official Student Academic Records

Academic records of students are ultimately the property of the University. The *Guidelines Concerning Access to Official Student Academic Records* establishes University-wide aims, objectives, criteria, and procedures that apply to the academic records of students.

See the full text of the *Guidelines Concerning Access to Official Student Academic Records*.

The School of Graduate Studies will withhold access to statements of results and transcripts of students, alumni, and former students who have outstanding debts or obligations to the University in accordance with the *Policy on Academic Sanctions for Students Who Have Outstanding University Obligations*. The School of Graduate Studies will not release the official diploma to such persons nor will it provide written or oral certifications of degree on their behalf.

11.10 Transcript Policy

This policy sets out the principles that underpin the University’s understanding of its official academic transcript and to describe the minimum information that the transcript must include. The academic transcript is the primary, official, consolidated record of a student’s academic performance and achievement.

University of Toronto consolidated transcripts are limited to degree-level studies.

See the full text of the *Transcript Policy*.

11.11 Policy on Official Correspondence with Students

The University and its divisions may use the postal mail system and/or electronic message services (e.g., electronic mail and other computer-based online correspondence systems) as mechanisms for delivering official correspondence to students. Official correspondence may include, but is not limited to, matters related to students' participation in their academic programs, important information concerning University and program scheduling, fees information, and other matters concerning the administration and governance of the University.

Students are responsible for maintaining and advising the University — via the University's student information system (currently ACORN) — of a current and valid postal address as well as the address for a University-issued electronic mail account that meets a standard of service set by the Vice-President and Provost.

Failure to do so may result in a student missing important information and will not be considered an acceptable rationale for failing to receive official correspondence from the University.

The University provides centrally supported technical services and the infrastructure to make electronic mail and/or online communications systems available to students. University correspondence delivered by electronic mail is subject to the same public information, privacy, and records retention requirements and policies as are other University correspondence and student records. The University's expectations concerning use of information and communication technology are articulated in the guidelines on *Appropriate Use of Information and Communication Technology*.

Students are expected to monitor and retrieve their mail, including electronic messaging account(s) issued to them by the University, on a frequent and consistent basis. Students have the responsibility to recognize that certain communications may be time critical. Students have the right to forward their University-issued electronic mail account to another electronic mail service provider address but remain responsible for ensuring that all University electronic message communication sent to the official University-issued account is received and read.

See the full text of the *Policy on Official Correspondence with Students*.

11.12 Policy on the Framework on Off-Campus Safety

The Policy on the Framework on Off-Campus Safety is designed to provide University staff and faculty involved in the planning and execution of University-related off-campus activities with a set of core planning principles with respect to safety.

See the full text of the *Policy on the Framework on Off-Campus Safety*.

Students are also encouraged to review the *Guidelines on Safety in Field Research* produced by the Office of Environmental Health and Safety.

11.13 Statement on Appropriate Use of Information and Communication Technology

The University of Toronto provides guidelines on the appropriate use of information and communication technology (ICT) within the University community. ICT resources are made available for all employees, students, and other members of the University community, but remain the property of the University. Users are expected to limit their use to the performance of University-related activities, although a reasonable allowance will be made for personal use. Users should not have an expectation of complete privacy in using the University's ICT and related services.

See the full text of the *Appropriate Use of Information and Communication Technology*.

11.14 Statement on Human Rights

Acknowledging its fundamental and distinctive commitment to freedom of thought, inquiry, and expression, the University of Toronto affirms its commitment to the values of equal opportunity, equity, and social justice.

See the full text of the *Statement on Human Rights*.

11.15 University-Mandated Leave of Absence Policy

The University is committed to providing students with the opportunity to pursue their educational goals. It is also committed to maintaining a safe environment for study and work. Pursuant to the University's commitment to providing supports and accommodations for students and its obligation under the *Ontario Human Rights Code*, the University provides accommodative resources through a number of services, each involving specialized attention by experienced and qualified staff to the specific needs of students.

In most circumstances, these resources, combined with the engagement and cooperation of the student, will allow a student to obtain their educational goals. However, on a small number of occasions, this approach may not be successful, or a student, for whatever reason, may not engage with the supportive resources, and the result may be an impact on the health and safety of the student or others, or on the ability of the student to engage in the essential elements of the educational activity. In these infrequent circumstances, the potential application of the *Code of Student Conduct* will not be suitable, since it entails a disciplinary approach. Similarly, it may not be consistent with the duty to accommodate to merely let the student confront significant negative academic consequences in these situations. This Policy, therefore, sets out additional options to better reflect the needs and the situation of the student.

This Policy will be applied in a manner that fully complies with the *Ontario Human Rights Code* including (where applicable) the duty to provide reasonable accommodation to the point of undue hardship.

See the full text of the *University-Mandated Leave of Absence Policy*.

Degree Regulations

All degree students are accepted under the General Regulations of the School of Graduate Studies.

All degree program students are subject to both the General Regulations and Degree Regulations in this calendar. In particular, note section 7 of the General Regulations, Good Academic Standing and Satisfactory Academic Progress, Time Limits, Supervision, and Candidacy.

The University of Toronto offers graduate programs leading to doctoral and master's degrees. Numerous degree types are offered in a variety of programs in multiple graduate units. Degree types that are specific to one graduate program are listed below with a link to details contained in the graduate unit entry. See Programs by Graduate Unit.

12 Doctoral Degrees

The University of Toronto offers programs of study leading to five doctoral degrees:

- Doctor of Philosophy (PhD)
- Doctor of Education (EdD)
- Doctor of Juridical Science (SJD)
- Doctor of Musical Arts (DMA)
- Doctor of Nursing (DN)

Degrees offered in multiple programs are listed first, followed by degrees specific to one graduate program.

12.1 Doctor of Philosophy (PhD)

The PhD is offered in a variety of programs in multiple graduate units. For specific admission and program requirements, consult graduate unit entries. The Graduate Education Council of the School of Graduate Studies has recommended that all graduate units offering the PhD degree design a four-year program that can be completed on a full-time basis by a student who holds a master's degree in a discipline appropriate to the intended field of study. Where graduate units are aware that it may be difficult for students to complete their PhD programs within four years, they should include a statement to that effect in their calendar entries. Where students are not able to complete all degree requirements within four years, all requirements for the degree must be completed within six years from first enrolment.

12.1.1 Admission Requirements

12.1.1.1 Four-Year PhD Program

Students admitted to this program require an appropriate master's degree with at least B+ standing from a recognized university in a discipline deemed appropriate for the intended field of study.

A student who is admitted on condition that the requirements for an acceptable master's degree at another university are completed may be permitted conditional registration, unless this is excluded by the terms of the letter of admission. A student who is conditionally registered must submit to the graduate unit, not later than January 31 of the first year of enrolment, official verification of completion of the requirements for the master's degree. If verification is not submitted by that date, additional requirements may be added to the PhD program. See further information in section 4 of General Regulations, Admission Regulations and Procedures.

12.1.1.2 Five-Year PhD Program (Referred to as "Direct-Entry")

Students admitted to this program, where offered, require an appropriate bachelor's degree with at least A– standing from a recognized university in courses in a discipline deemed appropriate for the intended field of study. Students who hold a master's degree in a discipline deemed not appropriate or require further preparation would normally be admitted to this program.

12.1.1.3 Flexible-Time PhD Program Option

Applicants may apply to a flexible-time PhD program option in a graduate unit offering such an option that has been approved through University of Toronto governance. Details are found in each program entry; see Programs by Graduate Unit. Applications to flexible-time PhD program options are subject to the SGS General Regulations and Degree Regulations and must meet the same admission requirements as applicants to the full-time PhD program.

In addition, applicants to the flexible-time PhD program option must demonstrate that they are "practising professionals"; that is, they are active professionals who are engaged in work activities that may include consulting, community organizing, self-employment, contractual work, or equivalent.

Applicants to the flexible-time PhD program option must demonstrate:

1. that the research and proposed program of study is related to the applicant's professional work and vice versa;
2. that they will continue to be professionally engaged while registered in the program.

12.1.2 Program Requirements

PhD students must register for every successive session, including summers, on a full-time basis following the first session of registration unless granted a leave of absence. The minimum degree fee is based on one academic year, that is, three consecutive sessions. All PhD students are subject to rules and regulations outlined in the General Regulations, including section 7 on Good Academic Standing requirements, in addition to these PhD degree requirements and those of the graduate unit in which the student is registered. See also Flexible-Time PhD Program Option, below.

12.1.2.1 Four-Year PhD Program

Most PhD applicants are admitted to a four-year PhD program based on the completion of an appropriate master's degree as detailed in the admission requirements section above and the

General Regulations section. Where graduate units are aware that it may be difficult for students to complete their PhD programs within four years, they have been asked to include a statement to that effect in their calendar entries. Where students are not able to complete all degree requirements within four years, all requirements for the degree must be completed within six years from first enrolment.

12.1.2.2 Five-Year PhD Program (Direct-Entry)

Graduate units may offer a five-year PhD program, approved through University of Toronto governance. Qualified students may be admitted into a five-year PhD program (direct-entry) based on the completion of an appropriate bachelor's degree as detailed in the admission requirements section above and in the General Regulations. See the above section 12.1.1.2 Five-Year PhD Program (Direct-Entry) Admission Requirements.

Students in a direct-entry PhD program will register full-time. Five-year PhD program requirements will include:

- The program requirements for the four-year PhD program;
- A substantial portion of the requirements for the master's degree;
- Additional requirements may be required by the graduate unit;
- Achieving acceptable minimum grades or averages for Year 1 courses;
- Students must be in Good Academic Standing at the end of Year 1.

Other than the requirements stated here, the five-year PhD program differs from the four-year PhD program requirements only in the additional first year of the program and related effects to timing of other PhD program components.

12.1.2.3 Flexible-Time PhD Program Option

Graduate units may offer a flexible-time PhD program option, approved through University of Toronto governance. Such a program option is offered where there is sufficient demand by practising professionals in related fields. The design and delivery of a flexible-time PhD program option permits continued employment by the student in areas related to the student's field of research, except for short specified periods of time. In these programs, theory and praxis uniquely engage and inform each other. See further information in Degree Regulations, Admission Requirements section 12.1.1.3 Flexible-Time PhD Program Option.

The flexible-time PhD program option differs from the full-time PhD program only in design and delivery. Students in a flexible-time PhD program option will register full-time during the first four years and part-time during subsequent years in the program. Students are required to be registered for every successive session, including summers, following the first session of registration unless granted a leave of absence. Each graduate unit offering a flexible-time PhD option will identify a program length for students in the option, which normally will be five or six years.

The time limit, between six and eight years, will be established through the graduate unit practice. Transfers between the full-time PhD program and the flexible-time PhD program option are not permitted. Students in the flexible-time option must satisfy the SGS General Regulations and Degree Regulations in the *SGS Calendar*, including good academic standing, supervision, and candidacy regulations.

12.1.2.4 Approval

The graduate unit must approve a student's program of study and research.

12.1.2.5 Program

Specific program requirements are set by the graduate units and are found in their respective entries. The thesis topic and the name of the supervisor must be submitted by the middle of the first session in Year 2. Graduate units may, at their discretion, require an earlier date.

12.1.2.6 Language Requirement

Individual graduate units may require that students have an adequate knowledge of such language or languages, other than English, in order to complete the degree program. (See individual graduate unit entries for specific requirements.)

Testing and certification of languages may be administered by the appropriate language department or by the student's own graduate unit.

The graduate unit in which the student is registered is responsible for ensuring that an appropriate certificate of language competence is recorded in the official student file.

12.1.2.7 Achieving Candidacy: Requirements and Time Limit

See General Regulations, section 7 on Good Academic Standing for detailed requirements.

12.1.2.8 Thesis

The candidate, through the graduate unit, shall present a thesis embodying the results of original investigation, conducted by the candidate, on the approved topic from the major field. The thesis, which is a piece of scholarly writing, shall constitute a significant contribution to the knowledge of the field and must be based on research conducted while registered for the PhD program.

A thesis should have a coherent topic with an introduction presenting the general theme of the research and a conclusion summarizing and integrating the major findings. A common thesis format reflects the original conception of a thesis as a "book" presenting the candidate's research project. This traditional format is organized as a single narrative describing the research problem, the context of the research, the methods used, the findings, and the conclusions.

The publication-based thesis (PBT), also referred to as the manuscript or article-based thesis, is a coherent work consisting of a number of scholarly publications focusing on the same research problem. The PBT, which takes many forms, generally includes an introductory section, the publishable manuscripts, and a cumulative discussion or conclusion chapter. To promote coherence, the introduction and cumulative concluding chapters

clearly explain how these separate manuscripts fit together into a unified body of research. All doctoral theses must contain a written component; however, other elements may be included in addition to the written text. Some examples of other elements that may be included with the written text are films or videos, electronically interactive word/image-based texts, poems, novels or sections of a novel, play scripts, short stories, documentation of performances, or pieces of art. A thesis must be prepared in a standard format (see National Library guidelines and Guidelines for the Preparation of Theses).

The thesis should normally be written in English, but with the permission of the School of Graduate Studies, a graduate unit may permit or require students in that unit to write the thesis in French.

In Division I, the Humanities, permission may be given for a thesis to be written in a language other than English or French when the language has been approved for use in theses by the graduate unit concerned. Before such permission can be granted, the graduate unit chair must certify in writing to the School of Graduate Studies that the candidate has passed a supervised essay type examination, written in English, which demonstrates the candidate's proficiency in writing correct and idiomatic English prose. A supplementary abstract of about 5,000 words in English or French must form part of a thesis that is written in a language other than English or French. No language other than English or French may be used for the conduct of Doctoral Final Oral Examinations.

See also General Regulations sections 8.2 Doctoral and Master's Supervision and 8.4 Submission of Theses.

12.1.2.9 Final Oral Examination

All students must defend a thesis at a Final Oral Examination organized by the graduate unit with the cooperation of SGS. See General Regulations section 8.3 Doctoral Final Oral Examination for detailed requirements and deadlines.

12.1.2.10 Time for Completion of Degree

All requirements must be completed within six years from first enrolment for the four-year PhD program and within seven years for the five-year PhD program. In exceptional circumstances, a candidate who has failed to complete all the requirements for the degree within this period may be considered for a maximum of four one-year extensions. See General Regulations section 6.1.11.2 Extension of Time for Completion of Degree Requirements, Doctoral Students.

PhD students who have not completed the degree requirements before the time limit for the degree or by the end of the approved extension period may not enrol further.

For flexible-time PhD program option, see section 12.1.1.3 Flexible-Time PhD Program Option.

12.2 Doctor of Education (EdD)

The EdD program is offered in a variety of programs in multiple graduate units within the Ontario Institute for Studies in Education (OISE). The EdD program is designed to provide opportunities for more advanced study for those already engaged in a career related to education.

All students are subject to rules and regulations outlined in the General Regulations section, including section 7 on Good Academic Standing requirements, in addition to these degree requirements and those of the graduate unit in which the student is registered. See specific admission and program requirements in the Programs by Graduate Unit section.

All students must defend a thesis at a Final Oral Examination organized by the graduate unit with the cooperation of SGS. See General Regulations section 8.3 Doctoral Final Oral Examination for detailed requirements and deadlines. In exceptional circumstances, a candidate who has failed to complete all the requirements for the degree within the time limit of six years may be considered for a maximum of four one-year extensions. See 6.1.11 Extension of Time for Completion of Degree Requirements.

Students who have not completed the degree requirements before the six-year time limit or by the end of the extension period may not enrol further.

12.2.1 Admission Requirements

Students admitted to this program require an appropriate master's degree with at least B+ standing from a recognized university in a discipline deemed appropriate for the intended field of study.

A student may be enrolled in one of the following graduate units:

- Applied Psychology and Human Development
- Leadership, Higher and Adult Education
- Social Justice Education

12.2.2 Program Requirements

For specific program and registration requirements, see the Programs by Graduate Unit section of this calendar.

1. Normally, a minimum of one Fall session and one Winter session of full-time study must be taken consecutively, i.e., Fall session (September to December) followed by Winter session (January to April) or Winter session (January to April) followed by Fall session (September to December).
2. In most programs, students may begin their studies on a part-time basis.
3. Eight half courses are required for students who have an MEd or MA degree or the equivalent in the same area of specialization proposed at the doctoral level.

An eight half-course EdD program should include at least four half courses in the home graduate unit except as otherwise stated in graduate unit program descriptions.

1. Students in some graduate programs may be required to take a comprehensive examination. Consult the specific graduate unit entry for details.

2. Students undergo an SGS Final Oral Examination on the content and implications of the thesis to determine the adequacy of both the thesis and its defence by the student.
3. All requirements for the EdD must be completed within six years of first enrolment as an EdD student.

12.2.3 EdD Thesis (Dissertation in Practice)

The EdD candidate, through the graduate unit, shall present a thesis (professional doctoral thesis in practice), which is the culminating component of the Doctor of Education degree. The professional doctoral thesis in practice shall include an identification and investigation of a problem of practice, the application of theory and research to the problem of practice, and a design for action to address the problem of practice. It must be the result of original research undertaken while the candidate is a registered student.

A professional doctoral thesis in practice should have a coherent topic, describe a challenge in educational practice, include a review or research literature and/or policy analysis related to the challenge, as well as the investigation of the challenge and/or possible solution(s) to address the challenge. It should have direct implications for policy and/or practice and uphold common standards of high quality (well written, conceptualized and structured, rigorous and coherent approach to methodology, yield generative impacts in the field). The professional doctoral thesis in practice can take two formats: (1) a traditional format where, similarly to a traditional doctoral thesis, the research problem is a complex problem of practice and the inquiry is presented in an authored, multi-chapter document; (2) a mixed format where the problem of practice and related review and analysis of applicable scholarship and policy is presented in a written research document combined with a practical component, which may take form of, for example, school/community improvement project, organization restructuring plan, policy or guideline, installation, film or website, or other endeavour relevant to the field.

The professional doctoral thesis in practice should normally be written/produced in English, but with the permission of the School of Graduate Studies, a graduate unit may permit or require students in that unit to write the professional doctoral thesis in practice in French.

See General Regulations sections 8.2 and 8.4.

12.2.4 Final Oral Examination

All students must defend the thesis (dissertation in practice) at a Final Oral Examination organized by the graduate unit with the cooperation of SGS. See General Regulations section 8.3 Doctoral Final Oral Examination for detailed requirements and deadlines.

12.3 Doctor of Juridical Science (SJD)

This degree is offered in the Faculty of Law. Admission and program requirements for the degree program are outlined in the Law entry in the Degree and Diploma Programs by Graduate Unit section. All SJD students are subject to rules and regulations outlined in the General Regulations, including section 7 on Good Academic Standing requirements, in addition to the degree requirements specified in the Faculty of Law entry.

All doctoral students must defend a thesis at a Final Oral Examination organized by the graduate unit with the cooperation of SGS. See General Regulations section 8.3 Doctoral Final Oral Examination for detailed requirements and deadlines.

12.4 Doctor of Musical Arts (DMA)

This degree is offered in the Faculty of Music. Admission and program requirements for the degree program are outlined in the Music entry in the Degree and Diploma Programs by Graduate Unit section. All DMA students are subject to rules and regulations outlined in the General Regulations, including section 7 on Good Academic Standing requirements, in addition to the degree requirements specified in the Faculty of Music entry.

All doctoral students must defend a thesis at a Final Oral Examination organized by the graduate unit with the cooperation of SGS. See General Regulations section 8.3 Doctoral Final Oral Examination for detailed requirements and deadlines.

12.5 Doctor of Nursing (DN)

This degree is offered in the Lawrence S. Bloomberg Faculty of Nursing. Admission and program requirements for the degree program are outlined in the Nursing Science entry in the Degree and Diploma Programs by Graduate Unit section. All DN students are subject to rules and regulations outlined in the General Regulations, including section 7 on Good Academic Standing requirements, in addition to the degree requirements specified in the Lawrence S. Bloomberg Faculty of Nursing entry.

All doctoral students must defend a thesis at a Final Oral Examination organized by the graduate unit with the cooperation of SGS. See General Regulations section 8.3 Doctoral Final Oral Examination for detailed requirements and deadlines.

12.6 Doctor of Public Health (DrPH)

This degree is offered by the Dalla Lana School of Public Health. Admission and program requirements for the degree program are outlined in the Public Health Sciences entry in the Degree and Diploma Programs by Graduate Unit section. All DrPH students are subject to rules and regulations outlined in the General Regulations, including section 7 on Good Academic Standing requirements, in addition to the degree requirements specified in the Dalla Lana School of Public Health entry.

All doctoral students must defend a thesis at a Final Oral Examination organized by the graduate unit with the cooperation of SGS. See General Regulations section 8.3 Doctoral Final Oral Examination for detailed requirements and deadlines.

13 Master's Degrees

The University of Toronto offers programs of study leading to the master's degrees listed below. All master's students are subject to rules and regulations outlined in the General Regulations, including section 7 on Good Academic Standing requirements, in addition to the degree requirements specified in the relevant graduate unit entry. Numerous degree types are offered in a variety of programs in multiple graduate units.

Degrees offered in multiple graduate programs are listed first, followed by a chart containing degrees specific to one graduate program.

13.1 Degrees in Multiple Graduate Programs

13.1.1 Master of Arts (MA)

The MA program is offered in a variety of programs in multiple graduate units.

13.1.1.1 Admission Requirements

1. Applicants must hold an appropriate bachelor's degree with high academic standing from a recognized university.
2. If the master's program is not a continuation of a course of study previously pursued as an undergraduate, or if there are deficiencies in meeting graduate unit admission requirements, prerequisite work may be required and the normal length of program may be extended.

13.1.1.2 Program Requirements

1. Under the direction of a graduate unit, a student must pursue a program of advanced study approved by the graduate unit.
2. All requirements for the MA degree must be satisfactorily completed within 3 years (full-time) or 6 years (part-time) from first enrolment.

Admission and program requirements may vary; consult the individual unit entry for details.

13.1.2 Master of Science (MSc)

The MSc program is offered in a variety of programs in multiple graduate units.

13.1.2.1 Admission Requirements

1. Applicants must hold an appropriate bachelor's degree with high academic standing from a recognized university.
2. If the master's program is not a continuation of a course of study previously pursued as an undergraduate, or if there are deficiencies in meeting graduate unit admission requirements, prerequisite work may be required and the minimum length of program may be extended.

13.1.2.2 Program Requirements

1. Under the direction of a graduate unit, a student must pursue a program of advanced study approved by the graduate unit.
2. All requirements for the MSc degree must be satisfactorily completed within 3 years (full-time) or 6 years (part-time) from first enrolment.

Admission and program requirements may vary; consult the individual unit entry for details.

13.1.3 Master of Applied Science (MASc)

The MASc program is offered in a variety of programs in multiple graduate units. The MASc degree is intended primarily for those who wish to prepare for a career in research and/or plan to continue their graduate studies through the PhD degree.

13.1.3.1 Admission Requirements

1. Applicants must hold the degree of Bachelor of Applied Science or an equivalent degree in engineering. An applicant having an appropriate bachelor's degree in science or applied mathematics may be admitted as a student by the graduate unit concerned.

A student may be enrolled in one of the following graduate units:

- Aerospace Studies
- Biomedical Engineering
- Chemical Engineering and Applied Chemistry
- Civil and Mineral Engineering
- Earth Sciences
- Electrical and Computer Engineering
- Materials Science and Engineering
- Mechanical and Industrial Engineering

13.1.3.2 Program Requirements

1. Under the direction of a graduate unit, a student must pursue a program of study approved by the graduate unit. Normally, the program will include not more than three full-year courses or equivalent and the preparation of a research thesis, the latter being the major requirement.
2. All requirements for the MASc degree must be satisfactorily completed within 3 years (full-time) or 6 years (part-time) from first enrolment.

Admission and program requirements may vary; consult the individual unit entry for details.

13.1.4 Master of Education (MEd)

The MEd program is offered in a variety of programs in multiple graduate units.

13.1.4.1 Admission Requirements

1. Applicants must hold an appropriate bachelor's degree from a recognized university, completed with standing equivalent to a mid-B or better in the final year.
2. A year of professional education for teaching, or the equivalent in pedagogical content, is helpful.
3. Normally, at least one year of relevant, successful, professional experience is required.
4. A student may be enrolled in one of the following graduate units:
   - Applied Psychology and Human Development
   - Curriculum, Teaching and Learning

- Leadership, Higher and Adult Education
- Social Justice Education

13.1.4.2 Program Requirements

The minimum program requirements for the MEd degree are as follows:

1. Under the direction of a graduate unit, a student must pursue a program of advanced study approved by the graduate unit, which in addition to coursework may include a major research paper or a comprehensive examination requirement. Each individual graduate unit calendar entry specifies the options available for each MEd degree.
2. The MEd degree program requires that a minimum of half of the courses must be taken in the home department unless otherwise specified by the department.
3. All requirements for the MEd degree must be satisfactorily completed within 3 years (full-time) or 6 years (part-time) from first enrolment.

Admission and program requirements may vary; consult the individual unit entry for details.

13.1.5 Master of Engineering (MEng)

The MEng program is offered in a variety of programs in multiple graduate units. The MEng degree is intended primarily for those who wish to pursue advanced study at the master's level, which is especially suited for professional practice.

13.1.5.1 Admission Requirements

1. Applicants must hold the degree of Bachelor of Applied Science or an equivalent degree in engineering. An applicant having an appropriate bachelor's degree in science or applied mathematics may be admitted as a student by the graduate unit concerned.

A student may be enrolled in one of the following graduate units:

- Aerospace Studies
- Biomedical Engineering
- Chemical Engineering and Applied Chemistry
- Civil and Mineral Engineering
- Electrical and Computer Engineering
- Materials Science and Engineering
- Mechanical and Industrial Engineering

13.1.5.2 Program Requirements

1. Under the direction of a graduate unit, a student must pursue a program of study approved by the graduate unit. The program will be equivalent in weight to full-time study for at least two sessions (eight months), and may include a project in addition to lecture and laboratory courses.
2. There is no general residence requirement for the degree. However, a period of residence may be required, depending on the individual student's program and experience. This required period will be as recommended by the graduate unit and approved by the School of Graduate Studies, but must not exceed two sessions.
3. The MEng degree program must be completed within 3 years (full-time) or 6 years (part-time) from first enrolment.

Admission and program requirements may vary; consult the individual unit entry for details.

13.1.6 Master of Health Science (MHSc)

The MHSc program is offered in a variety of programs in multiple graduate units. Admission and program requirements vary; consult the individual unit entry for details.

- Biomedical Engineering
- Health Policy, Management and Evaluation
- Laboratory Medicine and Pathobiology
- Medical Science
- Speech-Language Pathology
- Translational Research in the Health Sciences

13.2 Degrees in Single Graduate Programs

Each of the following degrees is offered in an individual graduate unit and program. Admission and program requirements for the degree program vary and are outlined in the applicable entry in the Programs by Graduate Unit section of this calendar, unless otherwise noted. All master's students are subject to rules and regulations outlined in the General Regulations, including section 7 on Good Academic Standing requirements, in addition to the degree requirements specified in the relevant graduate unit entry.

The degree names are listed alphabetically; visit the relevant graduate unit web page where the degree program is described.

Degree Name	Degree Abbreviation	Graduate Unit
Global Professional Master of Laws	GPLLM	Law
Master of Architecture	MArch	Architecture, Landscape, and Design
Master of Biotechnology	MBiotech	Management & Innovation
Master of Business Administration	MBA	Management, Rotman School of
Master of Engineering in Cities Engineering and Management	MEngCEM	Civil and Mineral Engineering
Master of Environmental Science	MEnvSc	Physical and Environmental Sciences

Master of Environment and Sustainability	MES	Environment
Master of Finance	MF	Management, Rotman School of
Master of Financial Economics	MFE	Financial Economics
Master of Financial Insurance	MFI	Statistical Sciences
Master of Financial Risk Management	MFRM	Management, Rotman School of
Master of Forensic Accounting	MFAcc	Management & Innovation
Master of Forest Conservation	MFC	Forestry
Master of Global Affairs	MGA	Global Affairs and Public Policy
Master of Health Informatics	MHI	Health Policy, Management and Evaluation
Master of Industrial Relations and Human Resources	MIRHR	Industrial Relations and Human Resources
Master of Information	MI	Information
Master of Landscape Architecture	MLA	Architecture, Landscape, and Design
Master of Laws	LLM	Law
Master of Management and Professional Accounting	MMPA	Management & Innovation
Master of Management of Innovation	MMI	Management & Innovation
Master of Mathematical Finance	MMF	Mathematical Finance
Master of Museum Studies	MMSt	Information
Master of Music	MMus	Music
Master of Nursing	MN	Nursing Science
Master of Professional Kinesiology	MPK	Kinesiology
Master of Public Health	MPH	Public Health Sciences
Master of Public Policy	MPP	Global Affairs and Public Policy
Master of Science in Applied Computing	MScAC	Computer Science
Master of Science in Biomedical Communications	MScBMC	Medical Science
Master of Science in Community Health	MScCH	Public Health Sciences
Master of Science in Forestry	MScF	Forestry
Master of Science in Occupational Therapy	MScOT	Occupational Science and Occupational Therapy
Master of Science in Pharmacy	MScPhm	Pharmaceutical Sciences
Master of Science in Physical Therapy	MScPT	Physical Therapy
Master of Science in Planning	MScPl	Geography and Planning
Master of Science in Sustainability Management	MScSM	Management & Innovation
Master of Social Work	MSW	Social Work
Master of Studies in Law	MSL	Law
Master of Teaching	MT	Curriculum, Teaching and Learning
Master of Urban Design	MUD	Architecture, Landscape, and Design
Master of Urban Innovation	MUI	Management & Innovation
Master of Visual Studies	MVS	Architecture, Landscape, and Design

Fee Regulations

14.1 Schedule of Fees

The annual Schedule of Fees, updated each year in June, is available on the Student Accounts website, studentaccount.utoronto.ca.

14.2 Fees and Registration

Students are informed of fees payable online through ACORN (www.acorn.utoronto.ca).

University of Toronto students normally pay tuition fees from a Canadian Bank account, with a Canadian dollar denominated Mastercard or Visa credit card, or with Higher Ed Points. Fee options for making a fee payment within Canada are found on the Student Accounts website. Holders of certain scholarships, awards, research assistantships, teaching assistantships, or loans may request to register without payment through their graduate unit.

To be registered, students must pay at least the Minimum Payment to Register Amount displayed on their current session ACORN invoice or have an approved request to register without payment in place before the SGS registration deadline. By virtue of being registered, a student thereby agrees to abide by all of the academic and non-academic policies, rules, and regulations of the University of Toronto, the School of Graduate Studies, and the graduate unit in which the student is registered.

14.3 Academic Fees Structure

Because the course of study in many graduate units is program/student specific and often cannot be described in terms of a specific number of courses, and because graduate education more often than not results from the sum of experience encountered during the program, School of Graduate Studies fees are assessed on a program basis rather than on the number of courses taken.

Degree students and special students who pay the full-time fee for the previous Fall or Winter session do not pay fees for the Summer session. However, part-time special students pay Summer fees. In addition, part-time degree students who register for the Summer session, but who have not registered in both sessions of the previous academic year, pay Summer fees.

A degree program is defined on a sessional basis and the full fee is charged regardless of the number of courses taken. All students (except special students not proceeding to a degree) are accepted into a program with a defined program length (see General Regulations section 5.3 Program Length). This period establishes the minimum degree fee that must be paid before graduation.

14.4 Minimum Degree Fee

14.4.1 Master's Programs

The minimum degree fee is the academic fee associated with the program length for each graduate master's program and represents the minimum amount of academic fees that every student, regardless of registration option or status, must pay upon completion of the program prior to graduation. Full-time program length is associated with the minimum degree fee that is based on the Fall session as the start of the program, even if some students commence the program in the Winter or Summer session.

14.4.2 Balance of Degree Fee

Master's students who finish the degree program requirements in less time than the defined program length, regardless of registration option, will be subject to a balance of degree fee. The balance of degree fee is the minimum degree fee minus program fees already paid by the student. The balance of degree fee is assessed just prior to graduation. The payment due date for the balance of degree fee is three months from the student's convocation. If the fee is unpaid, students are charged the monthly service fee of 1.5% compounded (19.56% per annum).

For international students who change to domestic status during their study period, the minimum degree fee will be assessed as follows:

- if the legal status change occurred within the program length, the minimum degree fee will be based on the domestic program fee;
- if the legal status change occurred after the program length, the minimum degree fee will be based on the international program fee.

14.4.3 Doctoral Programs

The minimum degree fee for PhD and professional doctoral programs is the academic fee associated with one year (three sessions) of full-time studies and represents the minimum amount of academic fees that every PhD or professional doctoral student, regardless of registration status or option, must pay upon completion of the program prior to graduation.

All students are subject to tuition and fees for each session and year of registration, including sessions following the defined program length, until the program is completed.

14.4.4 Degree or Special (Non-degree) Students

The SGS-approved transfer of graduate academic credit as a degree or special (non-degree) student does not alter or reduce the required minimum degree fee.

14.5 Full-Time Student Fee

The full-time student fee is the fee charged to a full-time student. See also: Minimum Degree Fee above; Fees for Final-Year Doctoral Students below; and Fees for Students on Extension below, regarding fees for graduate students on extension.

14.6 Dual Registrations

Dual registrants will be required to maintain their registration for the master's degree, register also for the PhD degree, and pay only the appropriate PhD fees.

14.7 Full-Time Students Commencing a Degree Program in January

Students commencing a degree program in January will pay half the appropriate fee for the year.

14.8 Summer Students

Students commencing a degree program in the Summer and taking courses will pay the Summer session fee. These fees are in addition to the annual fees which will be assessed in September.

Students commencing a degree program in September but who start research in the preceding Summer do not pay fees for the Summer session. Continuing degree students and special students who pay the full-time fee for the previous Fall or Winter session do not pay fees for the Summer session. However, part-time special students pay Summer fees. In addition, part-time degree students who register for the Summer session but who have not registered in both sessions of the previous academic year pay Summer fees.

Students returning in the Summer session from an approved leave (see General Regulations section 6.1.15 Leave Policy) do not pay Summer session fees.

14.9 Part-Time Degree Students

Students undertaking their studies on a part-time basis are required to pay the part-time academic and incidental fees each year they register until the completion of their program. See also Minimum Degree Fee above.

14.10 Flexible-Time PhD Degree Students

Students undertaking a flexible-time PhD program are required to pay full-time academic and incidental fees during the first four years of the program and may pay part-time academic and incidental fees thereafter up to the time limit for the degree.

Extensions are permitted under existing policy: students granted an extension may register full-time or part-time and pay fees accordingly.

See also: Minimum Degree Fee above; and General Regulations section 6.1.11 Extension of Time for Completion of Degree Requirements.

14.11 Special Students

Full-time special students pay the full academic fee per session. Special students enrolling on a part-time basis will pay for each course or half course. Fees paid as a special student cannot be applied to any subsequent degree program.

Refund dates are different for part-time special students. For details, visit the Student Accounts website.

14.12 International Students

Certain categories of international students are charged academic fees equal to those for Canadian citizens and permanent residents. For more information and to see whether you may be eligible for an international fee exemption, please consult the Student Accounts website.

If an international student's status in Canada changes during a session, exemption from the higher fees may be granted. The fees will be adjusted in the current session, provided the status change occurs before November 1 in the Fall session or before February 1 in the Winter session.

Status changes with supporting documents must be reported to the SGS Student Academic Services Office prior to the above deadlines. However, if a status change effective before these dates is reported with a minor delay, a fee adjustment may still be possible.

14.13 Incidental Fees

Compulsory incidental fees are charged for the Graduate Students' Union, Health Services, Hart House, the Athletic Centre, and other student services. See the University's *Policy for Compulsory Non-Academic Incidental Fees*.

14.14 Minimum Required Payment

Students have the option to make payments on a sessional basis.

The Fall-Winter minimum required payment consists of any arrears plus Fall session tuition fees.

For students registering in the Winter session only, the minimum required payment consists of arrears plus Winter session tuition fees.

For students registering in the Summer session only, and for students starting in the Summer session, the minimum required payment consists of arrears plus 50% of Summer session tuition fees.

For details regarding fee payment and service charge billing deadlines, students should visit University of Toronto Student Accounts.

Students should check ACORN for account balances and details to avoid service charges.

14.15 Service Charges

If not paid in full, any outstanding account balance, regardless of the source of payment, is subject to a monthly service charge of 1.5% compounded (19.56% per annum). This is the case even if students have registered without payment on the basis of an Ontario Student Assistance Program (OSAP) or other provincial government loan, a US government loan, or University funding package.

For details regarding fee payment and service charge billing deadlines, students should visit University of Toronto Student Accounts.

Students should check ACORN for account balances and details to avoid service charges.

14.16 Late Registration

Any student registering after the deadline date specified in the academic calendar (sessional dates) is required to pay a late registration fee of $44.

14.17 Fees for Graduating Master's Students

Master's students who are recommended for graduation by the deadline date for Fall Convocation will not be assessed fees for the Fall session. Master's students who miss this deadline are required to register for the Fall session and pay the appropriate fees.

14.18 Fees for Final-Year Doctoral Students

Doctoral student academic fees for the final year will be pro-rated, based on a 12-month academic year, for the number of months that elapse between September and (including) the month in which the final thesis (including corrections required by the Final Oral Examination committee) is submitted to the School of Graduate Studies. Fees for the final month will not be charged if the requirements are met before the 16th day of the month. Incidental and ancillary fees will be charged per session and are not pro-rated monthly.

Academic fees for the final extension year will be pro-rated, based on 50% of the domestic fee for the 12-month academic year, for the number of months that elapse between September and (including) the month in which the thesis (including corrections required by the Final Oral Examination committee) is submitted to the School of Graduate Studies. Fees for the final month will not be charged if the requirements are met by the 15th day of the month. Incidental and ancillary fees will be charged per session and are not pro-rated monthly.

14.19 Fees for Students on Extension

All full-time graduate students on extension, both domestic and international, will be registered as full-time students and charged an academic fee equal to 50% of the domestic fee and full-time incidental and ancillary fees during each year of extension. Part-time students will pay the relevant part-time, incidental, and ancillary fees.

14.20 Reinstatement Fees

Reinstated students in programs requiring continuity of registration must pay a reinstatement fee equivalent to the academic fee owing for any session(s) in which they did not register, including program extension session(s), as well as the appropriate fee for the current year.

Academic fees charged for sessions before the time limit will be assessed at 100% of the annual academic fee according to the program delivery option (full-time or part-time) and student status (domestic or international).

Academic fees charged during the program extension period for full-time students will be calculated at the rate of 50% of the annual domestic fee, for both domestic and international students, plus full-time incidental and ancillary fees and the University Health Insurance Plan (UHIP), if applicable.

Part-time students are charged the relevant part-time academic fees during the program extension period plus part-time incidental and ancillary fees and UHIP, if applicable.

Reinstated students in programs not requiring continuity of registration are charged academic fees plus incidental and ancillary fees and UHIP, if applicable, for the year in which they are reinstated.

See also General Regulations section 6.1.10 Failure to Register.

14.21 Outstanding Fees and Charges

See General Regulations section 11.5 Policy on Academic Sanctions for Students Who Have Outstanding Obligations to the University.

14.22 Receipts for Income Tax

Tuition Fee Certificates are available online from ACORN.

14.23 Transcripts

A $15 fee is charged for each copy of a transcript of record. These fees are subject to change.

Transcripts will not be issued for students whose fees are in arrears.

Transcripts may be ordered online from ACORN or at the University of Toronto Transcript Centre, 172 St. George Street, Toronto, Ontario M5R 0A3.

Financial Support

15.1 Graduate Funding

The University of Toronto gives high priority to graduate financial support. For doctoral-stream students in the funded cohort, graduate units provide base funding at the beginning of each year. Students in professional-stream graduate programs typically self-fund their education and rely on student loans and lines of credit. Students may be eligible for a limited number of graduate awards available through their graduate units and various external agencies. For more information about graduate funding and award opportunities for graduate students, visit the Awards and Funding section of the SGS website.

Students are encouraged to contact their graduate unit or the SGS Graduate Awards Office for information about financial assistance.

15.2 Admission Awards

SGS administers a number of awards to meritorious incoming graduate students. During the admissions process, students may automatically be considered and nominated by their home graduate unit for some awards while other awards require an application. For more information on admission awards, visit the Admission Awards section of the SGS website.

15.3 Graduate Awards

SGS administers many awards from sources internal and external to the University of Toronto (e.g., awards established through SGS, federal, provincial, and external agencies). Some competitions require that the student's application be submitted to the graduate unit or to SGS for consideration, while other applications must be sent directly to the awarding institution.

Current award opportunities with detailed information for applicants are identified in the Awards and Funding section of the SGS website.

15.4 Awards for International Students

In addition to any internal departmental funding that may be available to international students in the funded cohort, there are a number of other funding sources listed on the SGS website. International students are also encouraged to investigate and apply for all possible funding opportunities provided by their home country. For more information on these awards and other funding opportunities, visit the International Awards section of the SGS website.

15.5 Government Student Assistance Program and Financial Aid

The federal and provincial governments provide financial support to qualified students who are Canadian citizens or permanent residents. The loan and grant amounts depend on a student's assessed financial need. Information on the Ontario Student Assistance Program (OSAP) and other government aid is available on the U of T Enrolment Services' web page. Students who receive government loans may also qualify for the University of Toronto Advance Planning for Students (UTAPS) grant.

15.6 Teaching and Research Assistantships

Some graduate units offer teaching and/or research assistantship opportunities as a component or outside a student funding package. Teaching assistants may be assigned teaching tasks such as conducting tutorials, grading undergraduate essays and exams, and acting as a resource for undergraduate students. Research assistants normally work with a faculty member, assisting with research projects.

For more information, write to the chair of your graduate unit, giving full particulars of your academic training and experience.

15.7 SGS Financial Aid and Advising Programs

Financial advising is available through SGS to assist students with managing educational expenses, budgeting, and planning. Financial advising staff can provide information and direction on various financial aid programs such as student loans, grants, and other resources available. Graduate students facing sudden and unanticipated financial need may be eligible for SGS emergency financial assistance programs. Financial advising is confidential, free of charge, and normally available in person, by email, or phone, video, and teleconferencing. Visit the Financial Aid and Advising section of the SGS website.

Emergency Grant Program

The SGS Emergency Grant Program assists currently registered, full-time graduate students who encounter a sudden and unanticipated serious financial emergency. This is not considered to be a source of routine or long-term funding or serve to address general unmet need.

Emergency Loan Program

The SGS Emergency Loan Program alleviates temporary cash flow problems for registered graduate students who are expecting to receive a University-issued payment in the near future. The average loan is approximately $1,000 to $1,500, but may be approved for a larger amount. Loans are interest free until the mutually agreed upon repayment date up to 120 days.

Accessibility Grant Program

The Accessibility Grant Program assists currently registered, full-time graduate students with academic accommodations necessary to meet unexpected needs arising from the particular demands of their graduate program. Though students are expected to plan for long-term assistance, the grant can assist with short-term essential educational expenses that are not normally covered by the student, the graduate unit, provincial or

federal agencies. Students must apply for this grant through Accessibility Services.

Graduate Programs

This section contains a listing of graduate programs offered by the School of Graduate Studies at the University of Toronto. It is divided into three categories, by program type:

- Degree and diploma programs by graduate unit
- Combined degree programs
- Collaborative specializations

SGS comprises approximately 80 graduate units, 140 combined degree programs, 10 dual degree programs, and 40 collaborative (interdisciplinary) specializations.

Within each program type, entries are listed alphabetically with an introduction (including overview and contact), a list of programs offered (including admission and program requirements), and courses.

For further details about a program, visit the graduate unit's website, listed in the contact information.

Degree and Diploma Programs by Graduate Unit

A diverse range of research-oriented and professional programs are offered at both the master's and doctoral levels. A limited number of graduate diploma programs are also offered.

Overview

Aerospace science and engineering is a cross-disciplinary and multidisciplinary field that allows exploration of the broadest and most fascinating fields of engineering, areas that capture the imagination and encourage exploration beyond our terrestrial existence. The University of Toronto Institute for Aerospace Studies (UTIAS) is Canada's leader for education and research in aerospace engineering, focusing on the technical fields needed to design aircraft and spacecraft. Faculty perform research in the following areas:

- Aeronautics: Aircraft design, systems, and control
- Experimental methods: Laser diagnostics, structural/material analysis, field testing of robotics and aircraft
- Flight simulation: Full motion-based flight simulation with virtual reality capability
- Fluid dynamics: Flow of gasses over aircraft and in engines
- Numerical methods: Computer modeling for fluid flows, structures, design, and optimization
- Orbital mechanics: Satellite/spacecraft dynamics and control
- Propulsion systems: Jet and rocket engines, turbomachinery, combustion science
- Robotics and autonomous systems: Ground, air and space-based systems
- Spacecraft design and construction: Design, construction, and launch of satellites
- Structures and materials: Structural design and optimization, material testing.

Much of this research falls into three main themes:

- Reducing the environmental impact of aviation
- Aerial robotics, drones and unmanned aerial vehicles
- Autonomous systems for space exploration.

Aerospace Studies: Aerospace Science and Engineering: MASc

Master of Applied Science

Program Description

The MASc degree is a research-based program focused on the completion of a research thesis. The MASc is considered to provide basic training in research for students subsequent to an undergraduate program. Under the direction of a faculty supervisor, students will select a research topic, perform experiments, computation, or analysis relevant to the topic, and report their results in a thesis. Upon completion of the thesis, students will be prepared for further academic research or employment in industry, including in research and development settings. Top students may have the opportunity to transfer directly to the PhD program after their first year of MASc studies.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy UTIAS's additional admission requirements stated below.
- An appropriate four-year undergraduate degree in in engineering, mathematics, physics, or chemistry from a recognized university.

Program Requirements

- **Coursework** to be completed in Year 1. Students must complete a minimum of **2.5 full-course equivalents (FCEs)** (five half courses) as follows:
  - All courses must be technical.
  - At least half of the required FCEs must be courses offered at UTIAS.
  - Complete AER1800H *Research Seminar in Aerospace Science and Engineering* (0.5 FCE).
  - Students must achieve at least a B- average to be in good academic standing. Failure in any course taken for credit may result in termination of the student's registration.
  - Students deemed to have insufficient background may be required to complete supplementary coursework in addition to the required 2.5 FCEs.
- Complete the non-credit course JDE1000H *Ethics in Research* (0.0 FCE).
- Attend a total of **12 approved seminars**.
- Have **research** performance assessed by a Research Assessment Committee (RAC), which includes the student's supervisor. For students making excellent research progress, the RAC may recommend that a student be considered for direct transfer to the PhD program.
- Write a **thesis** based on research performed during the period of registration for the MASc based on a topic selected in consultation with the student's supervisor.
- Present a **seminar on the student's research** at the UTIAS Departmental MASc Seminar (DMS).
- Students have the option of completing an emphasis in Aerial Robotics; Robotics; Sustainable Aviation; or Sustainable Energy as part of their degree program. Please see details in the Aerospace Science and Engineering MASc, MEng, PhD Emphases section.

Program Length

5 sessions full-time (typical registration sequence: F/W/S/F/W)

Time Limit

3 years full-time

Aerospace Studies: Aerospace Science and Engineering: MEng

Master of Engineering

Program Description

The Master of Engineering (MEng) is a course-based program designed to lead to employment in the aerospace industry. Students select from the wide range of UTIAS courses, as well as courses offered by other University of Toronto departments, to create a personalized curriculum. Students can also opt to follow one of several emphases, which provide more concentrated teaching in a specific area, and which are recorded on the student's transcript.

The MEng program can be taken on a full-time, extended full-time, or part-time basis. Transfer between the full-time, extended full-time, and part-time options is not permitted after registration. The default registration is the extended full-time option.

Full-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy UTIAS's additional admission requirements stated below.
- An appropriate bachelor of applied science degree in engineering, or an equivalent four-year degree from a recognized undergraduate engineering program.

Program Requirements

- **Coursework.** Completion of **5.0 full-course equivalents (FCEs)** (10 half courses) as follows:
  - A minimum of seven half courses (3.5 FCEs) must be technical.
  - A minimum of half the courses must be offered at UTIAS.
  - A maximum of three 500-level courses (1.5 FCEs) is permitted.
  - Students must achieve at least a B– average to be in good academic standing. Failure in any course taken for credit may result in termination of the student's registration.
  - Students deemed to have insufficient background may be required to complete supplementary coursework in addition to the required 5.0 FCEs. A maximum of 5.5 FCEs may be taken; permission must be granted by the graduate office to exceed 5.0 FCEs.
  - Students must complete all the required courses within three sessions (one year).
- Once students are registered, transfer between the full-time, extended full-time, or part-time option is not permitted.
- Students have the option of completing an emphasis in Advanced Manufacturing; Aerial Robotics; Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); Robotics; Sustainable Aviation; or Sustainable Energy as part of their degree program. Please see details in the Aerospace Science and Engineering MASc, MEng, PhD Emphases section.

Program Length

3 sessions (typical registration sequence: F/W/S)

Time Limit

3 years

Extended Full-Time Option

Minimum Admission Requirements

- Applicants holding an appropriate bachelor of applied science degree in engineering are considered for admission under the General Regulations of the School of Graduate Studies.
- An appropriate bachelor of applied science degree in engineering, or an equivalent four-year degree from a recognized undergraduate engineering program.

Program Requirements

- **Coursework.** Students must complete **5.0 full-course equivalents (FCEs)** (10 half courses).
  - A minimum of seven half courses (3.5 FCEs) must be technical.
  - A minimum of half the courses must be offered at UTIAS.
  - A maximum of three 500-level courses (1.5 FCEs) is permitted.
  - A maximum of three half courses (1.5 FCEs) may be taken in any session.
  - A maximum of six half courses (3.0 FCEs) may be taken in any academic year.
  - Students must achieve at least a B– average to be in good academic standing. Failure in any course taken for credit may result in termination of the student's registration.
  - Students deemed to have insufficient background may be required to complete supplementary coursework in addition to the required 5.0 FCEs. A maximum of 5.5 FCEs may be taken; permission must be granted by the graduate office to exceed 5.0 FCEs.
  - Students must complete all the required courses within six sessions (two years).
- Once students are registered, transfer between the full-time, extended full-time, or part-time option is not permitted.
- Students have the option of completing an emphasis in Advanced Manufacturing; Aerial Robotics; Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); Robotics; Sustainable Aviation; or Sustainable Energy as part of their degree program. Please see details in the Aerospace Science and Engineering MASc, MEng, PhD Emphases section.

Program Length

6 sessions (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years

Part-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy UTIAS's additional admission requirements stated below.
- An appropriate bachelor of applied science degree in engineering, or an equivalent four-year degree from a recognized undergraduate engineering program.

Program Requirements

- **Coursework.** Students must complete **5.0 full-course equivalents (FCEs)** (10 half courses).
  - A minimum of seven half courses (3.5 FCEs) must be technical.
  - A minimum of half the courses must be offered at UTIAS.
  - A maximum of three 500-level courses (1.5 FCEs) is permitted.

- A maximum of two half courses (1.0 FCE) may be taken in any session.
- A maximum of four half courses (2.0 FCEs) may be taken in any academic year.
- Students must achieve at least a B– average to be in good academic standing. Failure in any course taken for credit may result in termination of the student's registration.
- Students deemed to have insufficient background may be required to complete supplementary coursework in addition to the required 5.0 FCEs. A maximum of 5.5 FCEs may be taken; permission must be granted by the graduate office to exceed 5.0 FCEs.
- Students must complete all the required courses within nine sessions (three years).

- Once students are registered, transfer between the full-time, extended full-time, or part-time option is not permitted.
- Students have the option of completing an emphasis in Advanced Manufacturing; Aerial Robotics; Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); Robotics; Sustainable Aviation; or Sustainable Energy as part of their degree program. Please see details in the Aerospace Science and Engineering MASc, MEng, PhD Emphases section.

Program Length

9 sessions

Time Limit

6 years

Aerospace Studies: Aerospace Science and Engineering: PhD

Doctor of Philosophy

Program Description

The Doctor of Philosophy degree is a research-based program leading to the production of a research thesis. Doctoral research at UTIAS is expected to be internationally recognized for its originality, rigour, and importance. Supervised by a faculty member, students select a research topic, develop a plan to address the topic, and implement this plan, leading to a major research thesis and contributions to the academic literature. This is the pinnacle of academic achievement, and holders of the PhD are well prepared for academic positions and leadership roles in industrial research and development.

Applicants may enter the PhD program via one of two routes: 1) following completion of an MASc degree in engineering, mathematics, physics, or chemistry; 2) transfer from the University of Toronto MASc program. The program can also be taken on a flexible-time basis.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy UTIAS's additional admission requirements stated below.
- An MASc degree in engineering, mathematics, physics, or chemistry and demonstrated ability to perform advanced research.

Program Requirements

- Students must maintain **full-time, continuous registration** for every session, including the Summer session, until all degree requirements are completed.
  - Students starting with an MASc degree must spend a minimum of two years in the PhD program.
  - Students with an MASc in a discipline relevant to the field of PhD study are expected to complete the PhD program in less than four years.
- **Coursework.** Students must complete a minimum of **2.0 full-course equivalents (FCEs)** (four half courses) in Years 1 and 2.
  - All courses must be technical.
  - At least half of the required FCEs must be courses offered at UTIAS.
  - Students must achieve at least a B– average to be in good academic standing. Failure in any course taken for credit may result in termination of the student's candidacy.
  - Students deemed to have insufficient background may be required to complete supplementary coursework in addition to the required 2.0 FCEs.
- Students must complete the non-credit course JDE1000H *Ethics in Research* (0.0 FCE) (a half-day workshop).
- Students must attend a total of **24 approved seminars**.
- Students undertake a program of research under the guidance of a Doctoral Examination Committee (DEC), which includes the student's supervisor and two other UTIAS professors. The DEC shall:
  - Ascertain the suitability of the student for advanced research
  - Assess the thesis topic
  - Conduct formal reviews of the student's thesis progress at least once per year; unsatisfactory progress may result in the termination of the student's registration)
  - Determine whether a student qualifies as a candidate for the PhD degree at the second DEC meeting (qualifying DEC), approximately 1.5 years after program start
  - Provide the first assessment of the PhD thesis.
- Students must complete a **thesis** based upon research carried out during the period of registration for the PhD degree.
- Students must present the thesis work at a seminar at the UTIAS **Departmental Doctoral Seminar** (DDS).
- Students must defend the thesis at the **Doctoral Final Oral Examination** pursuant to the SGS Degree Regulations.
- Students must prepare at least one **formal manuscript for publication** in a refereed journal or refereed conference proceedings.

- Students have the option of completing an emphasis in Aerial Robotics; Robotics; Sustainable Aviation; or Sustainable Energy as part of their degree program. Please see details in the Aerospace Science and Engineering MASc, MEng, PhD Emphases section.

Program Length

4 years

Time Limit

6 years

PhD Program (Transfer)

Transfer Requirements

- Students who have achieved excellent performance in the MASc program at UTIAS at the end of Year 1 are recommended to transfer directly into the PhD program under the same supervisor. Approval for transfer is based on the student's research ability, research progress during Year 1, and academic standing.

Program Requirements

- Students must maintain **full-time, continuous registration** for every session, including the Summer session, until all degree requirements are completed.
  - Students transferring directly from the MASc program must spend a minimum of three years in the program from the date of initial MASc registration.
  - Students are expected to complete the PhD program in less than five years.
- **Coursework.** Students must complete a total of **3.5 full-course equivalents (FCEs)** as follows:
  - 2.5 FCEs already completed during the MASc program.
  - A minimum of 1.0 FCE (two half courses) in the PhD program.
  - At least half of the required FCEs must be courses offered at UTIAS.
  - Students must achieve at least a B– average to be in good academic standing. Failure in any course taken for credit may result in termination of the student's registration.
  - All required courses must be completed in the first two years of the program, starting from the initial registration in the MASc program.
- Students must complete the non-credit course JDE1000H *Ethics in Research* (0.0 FCE) (a half-day workshop).
- Students must attend a total of **24 approved seminars**.
- Students undertake a program of research under the guidance of a Doctoral Examination Committee (DEC), which includes the student's supervisor and two other UTIAS professors. The DEC shall:
  - Ascertain the suitability of the student for advanced research
  - Assess the thesis topic
  - Conduct formal reviews of the student's thesis progress at least once per year; unsatisfactory progress may result in the termination of the student's registration
  - Determine whether a student qualifies as a candidate for the PhD degree at the second DEC meeting (qualifying DEC), approximately 1.5 years after program start
  - Provide the first assessment of the PhD thesis.
- Students must present the thesis work at the UTIAS **Departmental Doctoral Seminar (DDS)**.
- Students must defend the thesis at the **Doctoral Final Oral Examination** pursuant to the SGS Degree Regulations.
- Students must prepare at least **one formal manuscript for publication** in a refereed journal or refereed conference proceedings.
- Students have the option of completing an emphasis in Aerial Robotics; Robotics; Sustainable Aviation; or Sustainable Energy as part of their degree program. Please see details in the Aerospace Science and Engineering MASc, MEng, PhD Emphases section.

Program Length

5 years

Time Limit

7 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy UTIAS's additional admission requirements stated below.
- Applicants must have a four-year undergraduate degree in engineering, mathematics, physics, or chemistry.
- Applicants are expected to have achieved grades averaging the equivalent of a University of Toronto A– or better in their last full year of study.

Program Requirements

- Students must maintain **full-time, continuous registration** for every session, including the Summer session, until all degree requirements are completed.
  - Students must spend a minimum of three years in the direct-entry PhD program.
  - Students are expected to complete the direct-entry PhD program in less than five years.
- **Coursework.** Students must complete a total of **3.5 full-course equivalents (FCEs)** as follows:
  - At least half of the required FCEs must be courses with AER or ROB designators.
  - Students must achieve at least a B– average to be in good academic standing. Failure in any course taken for credit may result in termination of the student's candidacy.

    - All required courses must be completed in the first two years of the program.
    - All courses must be technical.
- Students must complete the non-credit course JDE1000H *Ethics in Research* (0.0 FCE) (a half-day workshop).
- Students must attend a total of **24 approved seminars**.
- Students must undertake a program of research under the guidance of a Doctoral Examination Committee (DEC), which includes the student's supervisor and two other UTIAS professors. The DEC shall:
    - Ascertain the suitability of the student for advanced research
    - Assess the thesis topic
    - Conduct formal reviews of the student's thesis progress at least once per year; unsatisfactory progress may result in the termination of the student's registration)
    - Determine whether a student qualifies as a candidate for the PhD degree at the second DEC meeting (qualifying DEC), approximately 1.5 years after program start
    - Provide the first assessment of the PhD thesis.
- Students must present the thesis work at a seminar at the UTIAS **Departmental Doctoral Seminar** (DDS).
- Students must defend the thesis at the **Doctoral Final Oral Examination** pursuant to the SGS Degree Regulations.
- Students must prepare at least one **formal manuscript for publication** in a refereed journal or refereed conference proceedings.
- Students have the option of completing an emphasis in Aerial Robotics; Robotics; Sustainable Aviation; or Sustainable Energy as part of their degree program. Please see details in the Aerospace Science and Engineering MASc, MEng, PhD Emphases section.

Program Length

5 years

Time Limit

7 years

PhD Program (Flexible-Time)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy UTIAS's additional admission requirements stated below.
- An MASc degree in engineering, mathematics, physics, or chemistry and demonstrated ability to perform advanced research.

Program Requirements

- Students must maintain full-time, continuous registration for the first four years of study. Part-time registration is expected for the remaining period of study within the normal length.
    - Students starting with an MASc degree must spend a minimum of two years in the PhD program.
    - Students with an MASc in a discipline relevant to the field of PhD study are expected to complete the PhD program in less than six years.
- **Coursework.** Students must complete a minimum of **2.0 full-course equivalents (FCEs)** (four half courses) in Years 1 and 2 as follows:
    - All courses must be technical.
    - At least half of the required FCEs must be courses offered at UTIAS.
    - Students must achieve at least a B– average to be in good academic standing. Failure in any course taken for credit may result in termination of the student's candidacy.
    - Students deemed to have insufficient background may be required to complete supplementary coursework in addition to the required 2.0 FCEs.
- Students must complete the non-credit course JDE1000H *Ethics in Research* (0.0 FCE) (a half-day workshop).
- Students must attend a total of **24 approved seminars**.
- Students undertake a program of research under the guidance of a Doctoral Examination Committee (DEC), which includes the student's supervisor and two other UTIAS professors. The DEC shall:
    - Ascertain the suitability of the student for advanced research
    - Assess the thesis topic
    - Conduct formal reviews of the student's thesis progress at least once per year; unsatisfactory progress may result in the termination of the student's registration)
    - Determine whether a student qualifies as a candidate for the PhD degree at the second DEC meeting (qualifying DEC), approximately 24 months after program start
    - Provide the first assessment of the PhD thesis.
- Students must complete a **thesis** based upon research carried out during the period of registration for the PhD degree.
- Students must present the thesis work at a seminar at the UTIAS **Departmental Doctoral Seminar** (DDS).
- Students must defend the thesis at the **Doctoral Final Oral Examination** pursuant to the SGS Degree Regulations.
- Students must prepare at least one **formal manuscript for publication** in a refereed journal or refereed conference proceedings.
- Students have the option of completing an emphasis in Aerial Robotics; Robotics; Sustainable Aviation; or Sustainable Energy as part of their degree program. Please see details in the Aerospace Science and Engineering MASc, MEng, PhD Emphases section.

Program Length

6 years

Time Limit

8 years

Aerospace Studies: Aerospace Science and Engineering: MASc, MEng, PhD Emphases

Emphasis: Advanced Manufacturing (MEng only)

MEng students must successfully complete:

- **Four half courses (2.0 full-course equivalents [FCEs])**, including at least one core course.
- Elective courses may include other core courses, and courses from either of two streams: Manufacturing Engineering and Manufacturing Management.

Core Courses

AER501H *Advanced Mechanics of Structures*
AER1403H *Advanced Aerospace Structures*
APS1028H *Operations and Production Management for Manufacturing and Services*
CHE1123H *Liquid Biofuels*
MIE519H *Advanced Manufacturing Technologies*
MIE1740H *Smart Materials and Structures*.

Elective Courses — Manufacturing Engineering

AER521H, AER 1415H,
CHE575H, CHE1134H, CHE1475H,
MIE506H, MIE540H, MIE1706H, MIE1713H, MIE1718H, MIE1743H,
MSE1013H, MSE1015H, MSE1028H, MSE1031H, MSE1058H, MSE1061H,
ROB501H.

Elective Courses — Manufacturing Management

APS1005H, APS1012H, APS1013H, APS1017H, APS1020H, APS1023H, APS1040H, APS1088H, APS1420H,
CHE561H, CHE1434H,
MIE523H, MIE1022H, MIE1505H, MIE1514H, MIE1715H, MIE1721H, MIE1723H, MIE1727H,
TEP1011H, TEP1026H, TEP1501H.

Emphasis: Aerial Robotics (MASc, MEng, PhD)

MASc and PhD students must successfully complete:

- **1.0 full-course equivalent [FCE])**: AER1216H *Fundamentals of Unmanned Aerial Vehicles* and AER1217H *Development of Autonomous Unmanned Aerial Systems;*
- **one other course** from the approved course list, which will be updated on a regular basis, or other related courses approved by professors; and
- one MASc or PhD **thesis** relevant to unmanned aerial vehicles.

MEng students must successfully complete:

- **1.0 full-course equivalent [FCE])**: AER1216H *Fundamentals of Unmanned Aerial Vehicles* and AER1217H *Development of Autonomous Unmanned Aerial Systems;*
- **one other course** from the approved list or other related courses approved by professors; and
- one MEng **project course** related to unmanned aerial vehicles.

Elective Courses

AER501H, AER503H, AER506H, AER510H, AER521H, AER525H, AER1202H, AER1211H, AER1214H, AER1215H, AER1303H, AER1308H, AER1316H, AER1324H, AER1403H, AER1410H, AER1415H, AER1503H, AER1513H, AER1514H, CSC411H, CSC2503H, CSC2545H,
ECE537H, ECE1512H, ECE1505H, ECE1747H, ECE1762H, MIE506H, MIE1068H, MIE1740H, MIE1742H, MIE1809H, ROB521H, ROB1514H.

Emphasis: Engineering and Globalization (MEng only)

MEng students must successfully complete **four half courses (2.0 full-course equivalents [FCEs])** from the following lists, with at least two half courses (or one full course) taken from Group A.

Group A

APS510H, APS530H, APS1420H, JCR1000Y (full-year course).

Group B

APS1015H, APS1020H, APS1024H, CHL5700H, CIV1399H, JMG2020H.

Note: Students who choose to pursue an MEng project in their home department that aligns with the Centre for Global Engineering (CGEN)'s disciplinary focus, as deemed by the CGEN Director, may count the project as one required Group B course.

Students who complete the requirements of the emphasis in Engineering and Globalization and wish to obtain a notation on their transcript should contact the Faculty Graduate Studies office.

Emphasis: Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE) (MEng only)

MEng students must successfully complete **any four of the following courses (2.0 full-course equivalents [FCEs])**:

Leadership

TEP1010H, TEP1011H, TEP1026H, TEP1027H, TEP1029H, TEP1030H, TEP1501H, TEP1502H, TEP1601H.

Entrepreneurship and Innovation

APS1012H, APS1013H, APS1015H, APS1023H, APS1033H, APS1035H, APS1036H, APS1041H, APS1061H, APS1088H.

Finance and Management

AER1601H, APS502H, APS1001H, APS1004H, APS1005H, APS1009H, APS1016H, APS1017H, APS1020H, APS1022H, APS1028H, APS1032H, APS1038H, APS1039H, APS1040H, APS1043H, APS1049H, APS1050H, APS1051H, APS1052H.

Engineering and Society

APS510H, APS1018H, APS1024H, APS1025H, APS1031H, APS1034H, APS1101H, APS1420H.

Emphasis: Robotics (MASc, MEng, PhD)

Students must successfully complete **four courses (2.0 full-course equivalents [FCEs])** chosen from at least two of the following groups, and no more than two in any given group:

Group 1: Planning and Control

AER1516H, AER1517H,
ECE557H (exclusion: ECE410H), ECE1619H, ECE1635H, ECE1636H, ECE1647H, ECE1653H, ECE1657H,
MIE1064H, MIE1068H.

Group 2: Perception and Learning

AER1513H, AER1515H,
CSC2503H, CSC2506H, CSC2515H, CSC2541H, CSC2548H,
ECE516H, ECE521H, ECE1511H, ECE1512H,
JEB1433H,
ROB501H.

Group 3: Modelling and Dynamics

AER506H, AER1503H, AER1512H,
JEB1444H,
MIE1001H.

Group 4: Systems Design and Integration

AER525H (exclusion: ECE470H), AER1216H, AER1217H,
CSC2621H,
ECE470H (exclusion: AER525H),
MIE505H, MIE506H, MIE1070H, MIE1075H, MIE1076H, MIE1080H, MIE1809H,
ROB521H, ROB1514H.

Emphasis: Sustainable Aviation (MASc, MEng, PhD)

MASc and PhD students must successfully complete:

- At least **two half courses (1.0 full-course equivalent [FCE])** from: AER1303H, AER1304H, AER1306H, AER1308H, AER1310H, AER1316H, AER1318H, AER1319H, AER1322H, AER1403H, AER1418H, AER501H, AER510H, CIV1307H, PHY1498H, PHY2504H, PHY2505H, CHE1123H, JCC1313H.
- AER1315H (0.5 FCE).
- A thesis in an area of relevance to sustainable aviation with approval of the Scientific Committee.

MEng students must successfully complete:

- At least **four half courses (2.0 FCEs)** from: AER1303H, AER1304H, AER1306H, AER1308H, AER1310H, AER1316H, AER1318H, AER1319H, AER1322H, AER1403H, AER1418H, AER501H, AER510H, CIV1307H, PHY1498H, PHY2504H, PHY2505H, CHE1123H, JCC1313H.
- AER1315H (0.5 FCE).

Emphasis: Sustainable Energy (MASc, MEng, PhD)

MASc and PhD students must successfully complete:

- At least **three half courses (1.5 full-course equivalents [FCEs])** from either of the following lists below.
- A thesis towards their degree on a topic related to sustainable energy. Topics must be approved by the steering committee of the Institute of Sustainable Energy. Contact: Mandeep Rayat.

MEng students must successfully complete:

- **Four half courses (2.0 FCEs)** from either of the following lists below, including at least one core course (0.5 FCE).

Core Courses

APS1032H *Introduction to Energy Project Management*
MIE515H *Alternative Energy Systems*
MIE1120H *Current Energy Infrastructure and Resources*.

Elective Courses

AER507H, AER1304H, AER1315H, AER1415H,
CHE568H, CHE1053H, CHE1118H, CHE1123H, CHE1142H, CHE1143H,
CIV575H, CIV576H, CIV577H, CIV1303H, CIV1307H,
ECE533H, ECE1030H, ECE1055H, ECE1057H, ECE1059H, ECE1085H, ECE1086H, ECE1092H, ECE1094H, ECE1476H,
MIE516H, MIE517H, MIE1128H, MIE1129H, MIE1130H,

MIE1240H, MIE1241H, MIE1715H, MSE1023H, MSE1028H, MSE1058H.

Students who complete the requirements of the emphasis in Sustainable Energy will receive a notation on their transcript from the Faculty Graduate Studies Office following a recommendation from the Institute of Sustainable Energy. Contact: Mandeep Rayat.

Aerospace Studies: Aerospace Science and Engineering: MASc, MEng, PhD Courses

This list represents course offerings at the time of publication. Course descriptions are available on the UTIAS website. Courses marked (PR) have prerequisites.

Aircraft Flight Systems

AER0503H	Aeroelasticity
AER1202H	Advanced Flight Dynamics
AER1211H	Human Control of Flight Systems
AER1216H	Fundamentals of Unmanned Aerial Vehicles
AER1217H	Development of Autonomous Unmanned Aerial Systems (prerequisite: AER1216H)

Aerodynamics, Fluid Dynamics, and Propulsion

AER0510H	Aerospace Propulsion
AER1301H	Kinetic Theory of Gases
AER1303H	Advanced Fluid Mechanics (PR)
AER1304H	Fundamentals of Combustion
AER1306H	Special Topics in Reacting Flows
AER1308H	Introduction to Modern Flow Control
AER1310H	Turbulence Modelling
AER1311H	Unsteady Gasdynamics
AER1316H	Fundamentals of Computational Fluid Dynamics
AER1318H	Topics in Computational Fluid Dynamics
AER1319H	Finite Volume Methods for Computational Fluid Dynamics
AER1322H	Modern Aircraft Propulsion (prerequisite: AER0510 or equivalent; undergraduate-level training in compressible flow)
AER1324H	Introduction to Turbulence (exclusion: MIE1207H)
AER1326H	Aeroacoustics

Structures and Multidisciplinary Optimization

AER0501H	Advanced Mechanics of Structures
AER1403H	Advanced Aerospace Structures (PR)
AER1410H	Topology Optimization
AER1415H	Computational Optimization
AER1416H	Numerical Methods for Uncertainty Quantification
AER1418H	Variational Methods for Partial Differential Equations

Sustainable Aviation

AER1315H	Sustainable Aviation

Robotics and Space Systems Engineering

AER0506H	Spacecraft Dynamics and Control I
AER0521H	Mobile Robotics and Perception
AER0525H	Robotics
AER1503H	Spacecraft Dynamics and Control II
AER1512H	Multibody Dynamics
AER1513H	State Estimation for Aerospace Vehicles
AER1515H	Perception for Robotics (exclusions: AER1514H, ROB1514H)
AER1516H	Robot Motion Planning
AER1517H	Control for Robotics
AER1520H	Microsatellite Design I
AER1521H	Microsatellite Design II
ROB1514H	Mobile Robotics

Management and Policy

AER1601H	Aerospace Engineering and Operations Management
AER1604H	Air Accident Investigation

Engineering Physics

AER0507H	Introduction to Fusion Energy
AER1717H	Applied Plasma Physics I (reading course)

Research Seminars and Professional Courses

AER1800H	Research Seminar in Aerospace Science and Engineering (for first-year MASc students only)
AER1810H	MEng Project (for MEng students only)
JDE1000H	Ethics in Research (Students registered in the MASc or PhD programs are required to participate in this non-credit seminar course during their first or second session of registration. This course must be completed in order to graduate.)

Reading Courses

AER1820H	Directed Reading in Aerospace Studies

APS Engineering Course

APS1012H	Managing Business Innovation and Transformational Change
APS1043H	Writing Your Own Patent Application

Anthropology

Anthropology: Introduction

Faculty Affiliation

Arts and Science

Degree Programs

Anthropology

MA and PhD

- Fields:
  - Archaeology;
  - Evolutionary Anthropology;
  - Linguistic and Semiotic Anthropology;
  - Medical Anthropology;
  - Sociocultural Anthropology

MSc

- Fields:
  - Archaeology;
  - Evolutionary Anthropology;
  - Medical Anthropology

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Aging, Palliative and Supportive Care Across the Life Course
  - Anthropology, MA, MSc, PhD
- Contemporary East and Southeast Asian Studies
  - Anthropology, MA
- Development Policy and Power
  - Anthropology, MA, MSc
- Diaspora and Transnational Studies
  - Anthropology, MA, MSc, PhD
- Environmental Studies
  - Anthropology, MA, MSc, PhD
- Ethnic, Immigration and Pluralism Studies
  - Anthropology, MA, PhD
- Food Studies
  - Anthropology, MA, PhD
- Global Health (U of T Global Scholar)
  - Anthropology, PhD
- Indigenous Health
  - Anthropology, MA, MSc, PhD
- Jewish Studies
  - Anthropology, MA, PhD
- Mediterranean Archaeology
  - Anthropology, PhD
- Sexual Diversity Studies
  - Anthropology, MA, MSc, PhD
- South Asian Studies
  - Anthropology, MA, MSc, PhD
- Women and Gender Studies
  - Anthropology, MA, MSc, PhD
- Women's Health
  - Anthropology, MA, MSc, PhD

Overview

Anthropology is concerned with the unity, diversity, and evolution of humanity (and non-human primates) and of human culture and society from a comparative and global perspective. The Department of Anthropology was established in 1936 and has included many of the most prominent figures in Canadian anthropology. The first MA degree was awarded in 1949; the first PhD in 1956.

Members of the department conduct research on present and past human societies, cultural knowledge and practice, evolutionary antecedents, and closely related species. Graduate training is offered in socio-cultural, medical, evolutionary/ biological, linguistic, and archaeological branches of the field. Anthropology students at the University of Toronto can study human biology and evolution; human behaviour from its first appearance in the archaeological record to the first appearance of writing; language and society; anthropology of health; and the diversity of human culture in today's world. Since Anthropology concerns the diversity and commonality of humans over time and around the globe, faculty and graduate research is broadly international and varies in method and theoretical frame. Nonetheless, it coheres in the quest to understand past and present human experience in social, cultural, and evolutionary contexts.

Anthropology: Anthropology MA

Master of Arts

Program Description

The department offers a Master of Arts degree program, both full-time and part-time. The full-time option normally extends over a 12-month period lasting from September to September.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Anthropology's additional admission requirements stated below.
- B+ average or equivalent.
- Applicants must satisfy the department that they have the appropriate background to enter a particular program of graduate study.
- Two letters of reference.
- A brief statement of interest (not exceeding 1,000 words).

Program Requirements

- **Coursework.** Students must complete **3.5 full-course equivalents (FCEs)** including:
  - 0.5 FCE: ANT3047H or ANT4020H or ANT6100H
  - 1.0 FCE: ANT2000Y
  - 2.0 FCEs, of which at least 1.0 FCEs must be in Anthropology
  - Exceptions to coursework requirements must be approved by the advisor and Graduate Coordinator.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Anthropology: Anthropology MSc

Master of Science

Program Description

The MSc program is most appropriate for students who are considering careers in consulting archaeology, some aspects of medical or forensic anthropology, NGO work, or application to PhD programs in Anthropology at other Canadian universities.

The full-time two-year program is normally completed by the summer of Year 2. The MSc program can be taken on a full-time or part-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Anthropology's additional admission requirements stated below.
- B+ average or equivalent.
- Applicants must satisfy the department that they have the appropriate background to enter a particular program of graduate study.
- Two letters of reference.
- A brief statement of interest (not exceeding 1,000 words).

Program Requirements

- **Coursework.** Students must complete **4.5 full-course equivalents (FCEs)** including:
  - 0.5 FCE: ANT3047H or ANT4020H or ANT6100H
  - 1.0 FCE: ANT2500Y
  - 3.0 FCEs, of which 1.5 FCEs will normally be science courses in archaeology, evolutionary anthropology, medical anthropology, or related disciplines depending on the student's program
  - Exceptions to coursework requirements must be approved by the advisor and Graduate Coordinator.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S);
9 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Anthropology: Anthropology PhD

Doctor of Philosophy

Program Description

The Doctor of Philosophy is primarily a research degree. A program of study is designed for each student to ensure competence in a field of research, culminating in the writing of a thesis.

Applicants may enter the PhD program via one of two routes: 1) following completion of an appropriate master's degree or 2) direct entry after completing a bachelor's degree.

Depending on subfield or area of research, completion of the PhD may take longer than the indicated program length below. See the departmental handbook for details.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Anthropology's additional admission requirements stated below.
- Admission is offered primarily to excellent students who, by the time of enrolment, have completed a master's degree in anthropology (or a cognate subject).
- All applicants are expected to have achieved grades averaging the equivalent of a University of Toronto A– or better in their last full year of study. Most successful applicants will have finished or be in the process of completing an MA or MSc.
- Applicants must satisfy the department that they have the appropriate background to enter a particular program of graduate study.
- Two letters of reference.
- A brief statement of interest (not exceeding 1,000 words).
- Applicants are required to identify departmental members with whom they want to conduct PhD research. The department regrets that it cannot admit students to the PhD program, regardless of their qualifications, unless a supervisor is available.
- Undergraduate students with strong backgrounds in anthropology or relevant disciplines (GPA of 3.70 or above in their last 5.0 full-course equivalents [FCEs]) and who have earned an appropriate bachelor's degree with a concentration in anthropology or a cognate discipline may apply directly for admission to the PhD program.

Program Requirements

- At the beginning of the academic year, each student will submit, with the SGS enrolment form, a program statement describing his or her plan to meet program requirements.
- A minimum of **3.0 full-course equivalents (FCEs)**, of which at least 1.5 FCEs are normally in anthropology.

- Attain at least **an A– average** in coursework to continue in the PhD program in good standing.
- Submit research proposal by the end of the second session of Year 2 (e.g., May 1 for students who start in September).
- Before proceeding to **full-time research** (achieving candidacy), students must:
  - Be resident on campus for one year.
  - Complete the minimum of 3.0 FCEs (noted above), of which at least 1.5 FCEs are normally in anthropology.
  - Gain experience in research methods and design; requirement can be filled by completing coursework in methodology or, with the department's assent, undertaking faculty-supervised fieldwork or laboratory research. Each student will normally be involved in fieldwork, in the broad meaning of the term, and in theoretical analysis.
  - Present and defend a **thesis proposal**.
  - Demonstrate an adequate knowledge of at least **one language other than English**, unless their program of study requires the intensive and time-consuming mastery of another research tool; demonstration of adequate language or equivalent knowledge can be accomplished in a variety of ways, a list of which is available in the Department of Anthropology's Graduate Student Handbook.
  - An approved Ethics Protocol for all students working with living organisms and modern human remains.

Program Length

4 years

Although the program has been designed for completion in four years, some students may require a longer period to complete all of the requirements.

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Anthropology's additional admission requirements stated below.
- Undergraduate students with strong backgrounds in anthropology or relevant disciplines (GPA of 3.70 or above in their last 5.0 full-course equivalents [FCEs]) and who have earned an appropriate bachelor's degree with a concentration in anthropology or a cognate discipline may apply directly for admission to the PhD program.
- All applicants are expected to have achieved grades averaging the equivalent of a University of Toronto A– or better in their last full year of study.
- Applicants must satisfy the department that they have the appropriate background to enter a particular program of graduate study.
- Two letters of reference.
- A brief statement of interest (not exceeding 1,000 words).
- Applicants are required to identify departmental members with whom they want to conduct PhD research. The department regrets that it cannot admit students to the PhD program, regardless of their qualifications, unless a supervisor is available.

Program Requirements

- At the beginning of the academic year, each student will submit, with the SGS enrolment form, a program statement describing his or her plan to meet program requirements.
- Students must complete **5.0 graduate full-course equivalents (FCEs)** as follows:
  - 3.0 FCEs, normally taken in Year 1
  - 2.0 FCEs taken in Year 2, when work on the research proposal is also expected to begin.
- Attain an annual average of **at least A–** to continue in the PhD program in good standing.
- Submit **research proposal** by the end of the second session of Year 3 (e.g., May 1 for students who start in September).
- Before proceeding to **full-time research** (achieving candidacy), students must:
  - Be resident on campus for one year.
  - Complete the minimum 5.0 FCEs (noted above), of which at least 2.5 FCEs are normally in anthropology.
  - Gain experience in research methods and design; requirement can be filled by completing coursework in methodology or, with the department's assent, undertaking faculty-supervised fieldwork or laboratory research. Each student will normally be involved in fieldwork, in the broad meaning of the term, and in theoretical analysis.
  - Present and defend a **thesis proposal**.
  - Demonstrate an adequate knowledge of at least **one language other than English**, unless their program of study requires the intensive and time-consuming mastery of another research tool; demonstration of adequate language or equivalent knowledge can be accomplished in a variety of ways, a list of which is available in the Department of Anthropology's Graduate Student Handbook.
  - An approved Ethics Protocol for all students working with living organisms and modern human remains.

Program Length

5 years

Although the program has been designed for completion in five years, some students may require a longer period to complete all of the requirements.

Time Limit

7 years

Anthropology: Anthropology MA, MSc, PhD Courses

Not all courses are offered every year. Check with the department for the current year's offerings.

General

ANT1096H	Quantitative Methods I
ANT1099H	Quantitative Methods II
ANT1155H,Y[+]	Research (or reading seminar)
ANT1156H,Y[+]	Research (or reading seminar)
ANT1157H,Y[+]	Research (or reading seminar)
ANT1158H,Y[+]	Research (or reading seminar)
ANT2000Y[0]	MA Research Paper
ANT2500Y[0]	MSc Research Paper
EIP3000H	Coordinating Seminar: Ethnic, Immigration and Pluralism Studies (for students in the Ethnic, Immigration and Pluralism Studies collaborative specialization)

[0] Course that may continue over a program. The course is graded when completed.

[+] Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.

Archaeology

JPA1040Y	Advanced Physics and Archaeology
ANT4010H	Archaeology in Contemporary Society
ANT4020H	Archaeology Theory
ANT4025H	Archaeology of Eastern North America
ANT4026H	Arctic Archaeology
ANT4030H	Artifacts
ANT4031H	Value
ANT4038H	Archaeology of Urban Development
ANT4039H	Origin and Nature of Food Producing Societies
ANT4040H	Archaeology of Hunter-Gatherers
ANT4041H	Landscape Archaeology
ANT4042H	Archaeology of Complex Hunter-Gatherers
ANT4043H	Archaeology of Ritual, Religion, and Ideology
ANT4044H	Interregional Interaction in the Ancient World
ANT4050H	Zooarchaeology
ANT4051H	Archaeology and Climate Change
ANT4059H	Anthropological Understanding of Cultural Transmission
ANT4060H	Specific Problems I
ANT4065H	Specific Problems II
ANT4066H	Household Archaeology
ANT4068H	Archaeology of Technology
ANT4069H	Writing Archaeology
ANT4070H	Archaeologies of Place, Urbanism, and Infrastructures

Evolutionary Anthropology

ANT3005H	Advanced Topics in Paleoanthropology
ANT3010H	Human Osteology: Theory and Practice
ANT3011H	Palaeopathology
ANT3031H,Y	Advanced Research Seminar I
ANT3032H,Y	Advanced Research Seminar II
ANT3033H,Y	Advanced Research Seminar III
ANT3034H,Y[+]	Advanced Research Seminar IV
ANT3041H	Evolutionary Perspectives on Growth and Development
ANT3042H	Advanced Topics in Primate Ecology
ANT3045H	Advanced Topics in Non-Human Primate Evolution
ANT3046H	Paleoecology in Primate and Human Evolution
ANT3047H	Evolutionary Anthropology Theory
ANT3048H	Primatological Theory and Methods
ANT3049H	Advanced Seminar in Evolutionary Morphology (prerequisite: ANT3047H)
ANT3050H	Species Concepts and Human Evolution
ANT3438H	Skeletal Trauma and Violence: Theory and Practice
ANT3439H	Advanced Seminar in Forensic Anthropology
ANT3440H	Molecular Anthropology: Theory and Practice

[+] Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.

Linguistic and Semiotic Anthropology

JAL1155H	Language and Gender
ANT5144H	Foundations in Linguistic Anthropology
ANT5148H	Language, Ideology and Political Economy
ANT5150H	Nation, State, and Language in Francophone Canada
ANT5151H	Metaphor, Language, and Science
JSA5147H	Language, Nationalism, and Post-Nationalism

Medical Anthropology

ANT7001H	Medical Anthropology I
ANT7002H	Medical Anthropology II
ANT7003H	Global Health: Anthropological Perspectives

Sociocultural Anthropology

ANT6003H	Critical Issues in Ethnography I
ANT6004H	Critical Issues in Ethnography II
ANT6005H	The Politics of Distribution: Work, Welfare and Abandonment in Precarious Times
ANT6006H	Genealogies of Anthropological Thought
ANT6007H	Magic, Science, and Religion
ANT6014H	Media and Mediation
ANT6017H	Post-colonial Science Studies and the Cultural Politics of Knowledge Translation
ANT6018H	Approaches to Nature and Culture
ANT6019H	Anthropology of Neoliberalism
ANT6021H	Political Anthropology: State, Power, and Sovereignty
ANT6027H	Anthropology of Violence
ANT6029H	Anthropology of Capitalism
ANT6030H	Anthropology and the Ethical Imagination
ANT6031H,Y	Advanced Research Seminar I
ANT6032H	Advanced Research Seminar II
ANT6032Y	Advanced Research Seminar
ANT6033H,Y	Advanced Research Seminar III
ANT6034H,Y	Advanced Research Seminar IV
ANT6035H	Advanced Research Seminar
ANT6036H	Advanced Research Seminar
ANT6037H,Y	Advanced Research Seminar VII
ANT6038H,Y[+]	Advanced Research Seminar VIII
ANT6040H	Research Design and Fieldwork Methods
ANT6050H	Reading Course
ANT6055H	Anthropology of Subjectivity and Personhood
ANT6056H	Decolonizing Diversity Discourse: Critical and Comparative Accounts of Multiculturalism and Settler Colonialism
ANT6057H	Anthropology and Literature
ANT6058H	Anthropology of Normativity
ANT6059H	Anthropology and History
ANT6060H	Anthropology and Indigenous Studies in North America
ANT6061H	Anthropology of Sexuality and Gender
ANT6062H	Disability Anthropology
ANT6063H	Anthropology of Infrastructures
ANT6064H	Evidence and Uncertainty: The Politics of Law and Science
ANT6065H	Anthropology in/of Troubled Times
ANT6100H	History of Anthropological Thought
ANT6150H	Proposing Ethnographic Research
ANT6200H	Ethnographic Practicum

Applied Psychology and Human Development

APHD: Introduction

Faculty Affiliation

Ontario Institute for Studies in Education (OISE)

Degree Programs

Child Study and Education

MA

- Fields:
  - Practice-Based Inquiry in Psychology and Educational Practice;
  - Research-Intensive Training in Psychology and Education (admissions have been administratively suspended)

EdD

- Emphases:
  - Early Learning and Early Years;
  - Mental Health and Wellbeing;
  - Special Education

Counselling and Clinical Psychology

MA

- Fields:
  - Clinical and Counselling Psychology — offered by the Department of Applied Psychology and Human Development, OISE, St. George campus;
  - Clinical Psychology — offered by the Graduate Department of Psychological Clinical Science, University of Toronto Scarborough (UTSC)

PhD

- Fields:
  - Clinical and Counselling Psychology — offered by the Department of Applied Psychology and Human Development, OISE, St. George campus;
  - Clinical Psychology — offered by the Graduate Department of Psychological Clinical Science, University of Toronto Scarborough (UTSC)

Counselling Psychology

MEd

- Fields:
  - Counselling and Psychotherapy;
  - Global Mental Health and Counselling Psychology
    - Dual degree program: MEd (University of Toronto) / MMed (China Medical University);
  - Guidance and Counselling

EdD

- Fields:
  - Counselling and Psychotherapy
  - School Psychology

Developmental Psychology and Education

MA, MEd, and PhD

- Emphases:
  - Early Learning (PhD, flexible-time only)
  - Program Evaluation (MEd only)

School and Clinical Child Psychology

MA and PhD

Combined Degree Programs

- STG, Education and Society (Minor), Honours BA / Child Study and Education, MA
- STG, Education and Society (Minor), Honours BSc / Child Study and Education, MA
- UTM, Exceptionality in Human Learning (Specialist), Honours BSc / Child Study and Education, MA
- UTM, Psychology (Major), Honours BSc / Child Study and Education, MA
- UTM, Psychology (Specialist), Honours BSc / Child Study and Education, MA

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Addiction Studies
  - Counselling and Clinical Psychology, MA, PhD
- Aging, Palliative and Supportive Care Across the Life Course
  - Counselling and Clinical Psychology, MA, PhD
  - Counselling Psychology, MEd, EdD
- Community Development
  - Counselling and Clinical Psychology (Clinical and Counselling Psychology field), MA
  - Counselling Psychology, MEd
- Educational Policy
  - Developmental Psychology and Education, MA, MEd, PhD
- Indigenous Health
  - Counselling and Clinical Psychology, MA, PhD
  - Counselling Psychology, MEd, EdD

- Neuroscience
  - Developmental Psychology and Education, MA, PhD
- Sexual Diversity Studies
  - Counselling and Clinical Psychology, MA, PhD
  - Counselling Psychology, MEd, EdD
- Women and Gender Studies
  - Counselling and Clinical Psychology, MA, PhD
  - Counselling Psychology, MEd, EdD

Overview

Guided by the highest standards of scholarship and a commitment to equity and social justice, students and faculty in the Department of Applied Psychology and Human Development examine major issues in education, human development, applied psychology and professional practice, answering the critical questions that create action in the professional practice of the hundreds of thousands of teachers, researchers, counsellors, clinical psychologists, professionals, policy makers, leaders, and influencers who are part of the OISE community worldwide.

All programs in the department commence in September.

Contact and Address

Admissions

Initial inquiries regarding admission to graduate studies in the Department of Applied Psychology and Human Development should be made directly to:

Wade, Mark - PhD

APHD: Child Study and Education MA

Master of Arts

Program Description

The Master of Arts in Child Study and Education Program is offered at the Dr. Eric Jackman Institute of Child Study, a centre of professional teacher training and research in childhood and education, which includes a Nursery through Grade 6 Laboratory School.

The philosophy of this program is based on the belief that successful teaching requires an understanding of how children's capacities, concerns, and behaviour change with age, how individual differences reflect developmental changes, and how social and physical environments influence children's development.

The program introduces students to educational and developmental theory and research relevant to educational settings, showing how this research can inform classroom practice. Students also learn how to objectively study children, using both practical assessment and formal methods of inquiry. These areas of knowledge combined with knowledge of effective teaching methods (such as an inquiry-based approach) and learning environments result in educational practices that build on children's current levels of development.

The non-thesis program requires two years of full-time study leading to a Master of Arts degree. Graduates are recommended to the Ontario College of Teachers for a **Certificate of Qualification**, which qualifies the holder to teach in the primary and junior divisions (junior kindergarten to grade 6) of Ontario schools. Research is embedded throughout the courses and the program.

This program offers two fields:

- Practice-Based Inquiry (PBI) in Psychology and Educational Practice
- Research-Intensive Training (RIT) in Psychology and Education (admissions have been administratively suspended)

Field: Practice-Based Inquiry (PBI) in Psychology and Educational Practice

The Practice-Based Inquiry (PBI) in Psychology and Educational Practice field of study is for those who wish to become classroom teachers and acquire the skills to continuously grow, improve, and lead. The field is based on the use of collaborative inquiry and data-based decision making to enhance teachers' practice and student learning and success (working cooperatively with colleagues and using data and research findings to meet student needs). This field will provide a foundation in the use of a broad range of information sources to address questions of practice using an inquiry cycle.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Applied Psychology and Human Development's additional admission requirements stated below.
- An appropriate bachelor's degree (usually a four-year degree) with the equivalent of a University of Toronto mid-B or better in the final year.
- Applicants are also expected to have experience working with groups of children, preferably in responsible positions.
- Normally, an interview is required prior to admission.
- A satisfactory vulnerable sector screening (VSS) police check is required prior to having direct contact with students. Without proof of a satisfactory VSS, schools will not allow teacher education candidates to participate in practice teaching.

Program Requirements

- **Coursework.** Students must complete **11.0 full-course equivalents (FCEs)** including practicum placements and an internship as follows:
  - **Year 1** — 7.0 FCEs as follows:
    - APD2200Y *Child Study: Observation, Evaluation, Reporting, and Research* (1.0 FCE).
    - APD2201Y *Childhood Education Seminar I* (1.0 FCE).
    - APD2210Y *Introduction to Curriculum I: Core Areas* (1.0 FCE).
    - APD2220Y *Teaching Practicum* (1.0 FCE): three eight-week, half-day placements in kindergarten, grades 1 to 3, and grades 4 to 6.
    - APD2270Y *Introduction to Special Education and Adaptive Instruction* (1.0 FCE.
    - APD1226H *Foundations in Inquiry and Data-Based Decision Making* (0.5 FCE).
    - 1.5 elective FCEs (equivalent to three half courses) chosen from among master's-level courses in the Department of Applied Psychology and Human Development and, in some cases, other departments; to be completed during the Spring (May/June) and Summer (July/August) sessions.
    - Students without an undergraduate course in child development must take APD1201H *Child and Adolescent Development* (0.5 FCE) as an elective.
    - Registration in Year 2 of the program is contingent upon successful completion of all Year 1 work.

- **Year 2** — 4.0 FCEs as follows:
  - APD2211H *Theory and Curriculum I: Language and Literacy* (0.5 FCE).
  - APD2212H *Theory and Curriculum II: Mathematics* (0.5 FCE).
  - APD2214H *Curriculum and Pedagogies for Cross-Curricular Teaching* (0.5 FCE).
  - APD2221Y *Advanced Teaching Practicum* (1.0 FCE), a 12-week full-time internship to be taken in one session.
  - APD2222H *Professional Practice Project: Role A* (0.5 FCE). Taken during the internship session of Year 2.
  - APD2223H *Professional Practice Project: Role B* (0.5 FCE). Taken during the academic session of Year 2.
  - APD2202H *Childhood Education Seminar II: Advanced Teaching* (0.5 FCE), taken during the internship session of Year 2.

Program Length

5 sessions full-time (typical registration sequence: F/W/S/F/W)

Time Limit

3 years full-time

Field: Research-Intensive Training (RIT) in Psychology and Education

Admissions to this field have been administratively suspended.

The field provides concurrent training in research methods and educational practice for elementary teacher certification, including extensive practicum in classrooms. It supports the development of expertise in scientific examination of educational and psychological issues and highlights the integration between science and classroom practice. RIT students must complete a Major Research Paper (MRP) by April of Year 2 in order to graduate.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Applied Psychology and Human Development's additional admission requirements stated below.
- An appropriate bachelor's degree (usually a four-year degree) with the equivalent of a University of Toronto mid-B or better in the final year.
- Applicants are also expected to have strong research experience and experience working with groups of children, preferably in responsible positions.
- Normally, an interview is required prior to admission.
- A satisfactory vulnerable sector screening (VSS) police check is required prior to having direct contact with students. Without proof of a satisfactory VSS, schools will not allow teacher education candidates to participate in practice teaching.

Program Requirements

- **Coursework.** Students must complete **11.0 full-course equivalents (FCEs)** including practicum placements and an internship as follows (although a thesis paper is not required, students must complete a Major Research Paper):
  - **Year 1** — 7.0 FCEs as follows:
    - APD2200Y *Child Study: Observation, Evaluation, Reporting, and Research* (1.0 FCE).
    - APD2201Y *Childhood Education Seminar I* (1.0 FCE).
    - APD2210Y *Introduction to Curriculum I: Core Areas* (1.0 FCE).
    - APD2220Y *Teaching Practicum* (1.0 FCE): three eight-week, half-day placements in kindergarten, grades 1 to 3, and grades 4 to 6.
    - APD2270Y *Introduction to Special Education and Adaptive Instruction* (1.0 FCE).
    - APD1209H *Research Methods and Thesis Preparation in AP&HD* (0.5 FCE).
    - 1.5 elective FCEs (equivalent to three half courses) chosen from among master's-level courses in the Department of Applied Psychology and Human Development and, in some cases, other departments; to be completed during the Spring (May/June) and Summer (July/August) sessions.
    - Students without an undergraduate course in child development must take APD1201H *Child and Adolescent Development* (0.5 FCE) as an elective.
    - Registration in Year 2 of the program is contingent upon successful completion of all Year 1 work.
  - **Year 2** — 4.0 FCEs as follows:
    - APD2211H *Theory and Curriculum I: Language and Literacy* (0.5 FCE).
    - APD2212H *Theory and Curriculum II: Mathematics* (0.5 FCE).
    - APD2214H *Curriculum and Pedagogies for Cross-Curricular Teaching* (0.5 FCE).
    - APD2221Y *Advanced Teaching Practicum* (1.0 FCE), a 12-week full-time internship to be taken in one session.
- APD2001Y^0 *Major Research Paper* (1.0 FCE).
- APD2202H *Childhood Education Seminar II: Advanced Teaching* (0.5 FCE), taken during the internship session of Year 2.

Program Length

5 sessions full-time (typical registration sequence: F/W/S/F/W)

Time Limit

3 years full-time

APHD: Child Study and Education EdD

Doctor of Education

Program Description

This professional doctorate is designed to prepare professionals working in the field of education (or a highly related area) to extend their professional knowledge and practice to further develop their ability to be scholar-practitioners within child study. This program aims to provide practitioners with an advanced degree to enable them to engage in innovation, advanced professional practice, and understand how the field of child study can inform decision making in multiple contexts including the classroom.

This degree is designed for practitioners who are working within contexts in which children are served or supported and/or with individuals who support or guide those who work with children (e.g., parents, families, and teachers).

The Doctor of Education (EdD) program is only available on a full-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the additional admission requirements of the Department of Applied Psychology and Human Development stated below. Please note that applicants will be accepted into this degree program **every other year**.
- A master's degree: an MA or MEd degree in Education (e.g., Master of Arts in Child Study and Education, Master of Education degree, Master of Teaching degree) with high academic standing (equivalent to a B+ or better) from a recognized university. Applicants with master's degrees in other disciplines may be eligible to apply for admission, but may have to complete additional courses in developmental psychology and/or child study.
- Letter of Intent: applicants must submit a well-written letter of intent in which they highlight their research interests, provide some insight into the problem of practice they are currently wishing to address, and describe their professional experiences and how these relate to their research interests and proposed problem of practice.
- Normally applicants will have in-depth work experience (i.e., normally a minimum of 3 years of current or recent work experience) in an education-related field within a school or community setting. They should be able to identify how their work environment would be able to support and facilitate their research related to their problem of practice, which is a major outcome of this degree.
- A letter from an employer supporting the potential candidate's goals and ability to conduct their applied research within the school or community setting is required.
- Applicants who hold an MEd or other non-thesis master's degree must submit evidence of their ability to identify a research question or problem, to design and conduct a research study or project, and to report the findings or results, all in a rigorous manner. This constitutes a Qualifying Research Paper (QRP) or Major Research Paper (MRP). Applicants who do not have a QRP or MRP must provide a writing sample that highlights their ability to write clearly and analytically about issues in education and/or child study. Examples include a single authored master's-level course paper, a policy document, or a professional publication.
- Normally, an interview is required prior to admission.

Program Requirements

- **Coursework.** Students must complete a minimum of **4.0 full-course equivalents (FCEs)** as follows:
  - APD3301H *Issues in Child Study and Education: Research, Policy, and Problems of Practice (RM)* (0.5 FCE).
  - APD3302H *Advanced Study of Critical Issues in Special Education, Mental Health, and Child Security* (0.5 FCE).
  - APD3303H *Advanced Study of Tools and Research Methods for Investigating Problems of Practice: Data-Driven Research for Decision-Making* (0.5 FCE).
  - APD3304H *Research Proposal Development (RM)* (0.5 FCE).
  - Two half courses (1.0 FCE) from one of the three emphases: 1) Early Learning and Early Years; 2) Mental Health and Wellbeing; or 3) Special Education. See details on each emphasis below.
  - Research Methods course (select from the list of available research methods courses) (0.5 FCE).
  - APD3305H *Systems and Organizational Change* (0.5 FCE).
- Students will have successfully reached candidacy once their thesis committee is formed and formal approval of the thesis proposal has been given by the committee.
- The **thesis (Dissertation in Practice)** is the culminating component of the Doctor of Education degree in Child Study and Education that shall include an identification and investigation of a problem of practice, the application of theory and research to problems of practice and/or policy and a design for implementation of ideas arising. Specifically, the thesis (Dissertation in Practice) consists of original research in the form of a written proposal or plan for innovative and impactful educational policy, guideline, advocacy, development project, or activism within an education-related field, aimed at improving practice at local, regional, national, or international levels.
- Students are full-time and must maintain continuous, full-time registration and pay full-time fees until all degree requirements, including the thesis (Dissertation in Practice), are completed.
- Students cannot transfer between the EdD and PhD programs.

Program Length

4 years full-time

Time Limit

6 years

APHD: Child Study and Education EdD Emphases

Emphasis: Early Learning and Early Years

This emphasis will allow students to take specialized courses which address social emotional wellbeing in the early years. This emphasis is designed to help students gain a deeper understanding and expertise in early learning and early years while also integrating their knowledge and understanding of special education, security, and child and youth wellbeing.

- **Coursework.** From the following course list, EdD students must successfully complete **1.0 full-course equivalent (FCE)**, which is counted towards the total FCEs required for the student's degree program:
  - APD1211H, APD1249H, APD1272H, APD1280H, APD1286H, APD1299H, APD3273H.

Upon successful completion of the emphasis requirements and degree requirements, students may make a request to the CSE Program Administrator to have the emphasis noted on the student transcript. This request must be made before graduation. A course can only be applied to the requirements of a single emphasis.

Emphasis: Mental Health and Wellbeing

This emphasis will allow students to take specialized courses which address the mental health of children and/or youth in various settings including the classroom as well as delve into issues of risk and resilience and culture. This emphasis is designed to help students gain a deeper understanding of and expertise in special education, security, and child and youth wellbeing.

- **Coursework.** From the following course list, EdD students must successfully complete **1.0 full-course equivalent (FCE)**, which is counted towards the total FCEs required for the student's degree program:
  - APD1236H, APD1256H, APD1279H, APD1295H, APD1297H, APD3221H, APD3232H, APD5284Y.

Upon successful completion of the emphasis requirements and degree requirements, students may make a request to the CSE Program Administrator to have the emphasis noted on the student transcript. This request must be made before graduation. A course can only be applied to the requirements of a single emphasis.

Emphasis: Special Education

This emphasis will allow students to take specialized courses that delve into specific domains of special education. This emphasis is designed to help students gain a deeper understanding of and expertise in special education while also considering issues pertaining to security and child and youth wellbeing.

- **Coursework.** From the following course list, EdD students must successfully complete **1.0 full-course equivalent (FCE**), which is counted towards the total FCEs required for the student's degree program:
  - APD1271H, APD1285H, APD1296H, APD2275H, APD2296H.

Upon successful completion of the emphasis requirements and degree requirements, students may make a request to the CSE Program Administrator to have the emphasis noted on the student transcript. This request must be made before graduation. A course can only be applied to the requirements of a single emphasis.

APHD: Child Study and Education MA Courses

Year 1 Required Courses

APD2200Y	Child Study: Observation, Evaluation, Reporting, and Research
APD2201Y	Childhood Education Seminar I
APD2210Y	Introduction to Curriculum I: Core Areas
APD2220Y	Teaching Practicum
APD2270Y	Introduction to Special Education and Adaptive Instruction
Plus	PBI field only: APD1226H Foundations in Inquiry and Data-Based Decision Making **or** RIT field only: APD1209H Research Methods and Thesis Preparation in AP&HD
Plus	Three elective half courses to be completed during the Spring/Summer session.
Plus	Full-year religious education course (if interested in teaching in the Roman Catholic separate school board). This course does not count towards the Child Study and Education program requirements. There is a separate fee. Students interested in this option should contact the OISE Continuing and Professional Learning Office for course enrolment information.

Note: Students without an undergraduate course credit in child development must take APD1201H *Child and Adolescent Development* as one of their electives.

Year 2 Required Courses

Registration in Year 2 is contingent upon successful completion of all Year 1 work.

Academic Session

APD2211H	Theory and Curriculum I: Language and Literacy
APD2212H	Theory and Curriculum II: Mathematics
APD2214H	Curriculum and Pedagogies for Cross-Curricular Teaching (Prerequisite: APD2210Y.)
Plus	PBI field only: APD2222H Professional Practice Project: Role A and APD2223H Professional Practice Project: Role B **or** RIT field only: APD2001Y^{0} Major Research Paper

Internship Session

APD2202H	Childhood Education Seminar II: Advanced Teaching
APD2221Y	Advanced Teaching Practicum

In addition, students must demonstrate knowledge of the Acts and Regulations respecting education in Ontario (addressed in APD2202H).

Recommended Elective Courses

Depending on their career goals, students may wish to select courses and placements to focus on particular areas:

Special Education

Students planning a career in special needs education may consider Special Education as a focused area of study. Such students are strongly encouraged to complete two recommended Special Education electives beyond their core foundation course (APD2270Y).

Early Childhood

Students interested in kindergarten programs may consider Early Childhood as a focused area of study. Such students are strongly encouraged to complete one or more recommended Early Childhood elective course plus an internship in a kindergarten class.

Course List

Not all courses are offered every year. Please consult the Office of the Registrar and Student Services' course schedule.

APD1201H	Child and Adolescent Development
APD1209H	Research Methods and Thesis Preparation in AP&HD
APD1211H	Psychological Foundations of Early Development and Education
APD1217H	Foundations of Proactive Behavioural and Cognitive-Behavioural Intervention with Children
APD1226H	Foundations in Inquiry and Data-Based Decision Making
APD1256H	Child Abuse: Intervention and Prevention
APD1271H	Perspectives on Executive Functions in Education: From Theory to Practice
APD1272H	Play and Education
APD1280H	Symbolic Development and Learning
APD1286H	Foundations of Literacy Development for School Age Children
APD1289H	Multivariate Analysis with Applications (RM)
APD1294H	Technology, Psychology, and Play
APD1296H	Assessing School-Aged Language Learners
APD1298H	Imagination, Reasoning, and Learning
APD1299H	Language Acquisition and Development in Early Childhood
APD2001Y^{0}	Major Research Paper
APD2200Y	Child Study: Observation, Evaluation, Reporting, and Research
APD2201Y	Childhood Education Seminar I
APD2202H	Childhood Education Seminar II: Advanced Teaching
APD2210Y	Introduction to Curriculum I: Core Areas
APD2211H	Theory and Curriculum I: Language and Literacy
APD2212H	Theory and Curriculum II: Mathematics
APD2214H	Curriculum and Pedagogies for Cross-Curricular Teaching (Prerequisite: APD2210Y.)
APD2220Y	Teaching Practicum
APD2221Y	Advanced Teaching Practicum
APD2222H	Professional Practice Project: Role A
APD2223H	Professional Practice Project: Role B

APD2232H	Consultation Skill Development for Educators
APD2270Y	Introduction to Special Education and Adaptive Instruction
APD2275H	Technology for Adaptive Instruction and Special Education
APD2293H	Interpretation of Educational Research
APD2296H	Reading and Writing Difficulties
APD3303H	Advanced Study of Tools and Research Methods for Investigating Problems of Practice: Data-Driven Research for Decision-Making
APD3305H	Systems and Organizational Change
APD5000H	Special Topics in Applied Psychology and Human Development: Master's Level
APD6000H	Special Topics in Applied Psychology and Human Development: Doctoral Level
JDS1249H	Social-Emotional Development and Applications

Individual Reading and Research Courses

APD2252H	Individual Reading and Research in Human Development and Applied Psychology: Master's Level

[0] Course that may continue over a program. The course is graded when completed.

APHD: Child Study and Education EdD Courses

APD1289H	Multivariate Analysis with Applications (RM)
APD3202H	A Foundation of Program Evaluation in Social Sciences (RM)
APD3301H	Issues in Child Study and Education: Research, Policy, and Problems of Practice (RM)
APD3302H	Advanced Study of Critical Issues in Special Education, Mental Health, and Child Security (Prerequisite: APD3301H.)
APD3303H	Advanced Study of Tools and Research Methods for Investigating Problems of Practice: Data-Driven Research for Decision-Making
APD3304H	Research Proposal Development (RM)
APD3305H	Systems and Organizational Change
JOI1288H	Intermediate Statistics and Research Design (RM)
JOI3228H	Mixed Methods Research Design in Social Sciences (RM)
LHA1105H	Introduction to Qualitative Research: Part I (RM)

APHD: Counselling and Clinical Psychology MA; Field: Clinical and Counselling Psychology

Master of Arts

Program Description

The **Counselling and Clinical Psychology program** offers studies leading to the MA and PhD degrees. It is offered by the graduate Department of Applied Psychology and Human Development at the Ontario Institute for Studies in Education (OISE), St. George campus, and the graduate Department of Psychological Clinical Science at the University of Toronto Scarborough (UTSC).

This graduate program is intended for students seeking to pursue careers in research, teaching, and clinical practice. At the time of application, students will be required to identify a preference for a specific field as well as for a potential supervisor with whom they would work if admitted to the program.

The program has two fields:

- Clinical and Counselling Psychology, offered primarily by OISE;
- Clinical Psychology, offered primarily by UTSC.

The **field in Clinical and Counselling Psychology** is offered primarily by the OISE Department of Applied Psychology and Human Development. This field is based on a bio-psycho-social model with an emphasis on diversity. It shares an emphasis with the Clinical Psychology field on assessment and the treatment of psychopathology in adults.

This **MA program** is designed for applicants interested in working as researchers or practitioners in a variety of psychological and educational settings. This program enables students to apply for registration with the College of Psychologists of Ontario (CPO) as a Psychological Associate. It also fulfils the requirements of students who plan to apply to the PhD program, Clinical and Counselling Psychology field.

The MA is taken on a full-time or part-time basis. However, students in the part-time option will be required to complete one year of full-time study to fulfil their degree requirements.

For 2021-22 and further extension to the 2022-23 academic year, admissions to the part-time option have been administratively suspended.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Applied Psychology and Human Development's additional admission requirements stated below.
- An appropriate bachelor's degree in psychology or any appropriate bachelor's degree that would contain the psychology requirement equivalent (defined as 6.0 full-course equivalents [FCEs] in psychology, including 0.5 FCE in research methods, 0.5 FCE in statistics, and at least 3.0 FCEs at the second-, third-, and fourth-year levels).
- A standing equivalent to a University of Toronto A– or better in the final year.

Program Requirements

- **Coursework.** Students must complete a total of **4.5 FCEs** as follows:
  - APD1203Y+ *Practicum I: Interventions in Counselling Psychology and Psychotherapy* (1.0 FCE) (500 hours of practicum). MA students will attend a minimum of three colloquium presentations during their program, which partially fulfills the course requirements for APD1203Y+.
  - 0.5 elective FCE.
  - APD1208Y+ *Cognitive and Personality Theory and Assessment* (1.0 FCE).
  - APD1219H *Ethical Issues in Professional Practice in Psychology and Psychotherapy* (0.5 FCE).
  - APD1228H *Couples Counselling* (0.5 FCE) **or** APD1261H *Group Work in Counselling and Psychotherapy* (0.5 FCE) (or an equivalent course).
  - APD1263H *Research Methods for Clinical and Counselling Psychology* (RM) (0.5 FCE).
  - JOI1288H *Intermediate Statistics and Research Design (RM)* (0.5 FCE).
- **Master's thesis.**
- **Full-time option:** Full-time, on-campus study is required from September to April, which represents the Fall and Winter sessions. Normally, 1.5 FCEs are taken in each of the Fall and Winter sessions and a maximum of 1.0 FCE in the Summer session. Under this option, it is expected that all degree requirements will be completed within two years.
- **Part-time option (for 2021-22 and further extension to the 2022-23 academic year, admissions to the part-time option have been administratively suspended):** For this option, students can register as part-time students at the beginning of their program. However, they will be required to register as full-time students for one year of the program. In this option, students will normally take 1.0 FCE annually during the beginning of their program and 1.5 FCEs in each of the Fall and Winter sessions in their year of full-time study. Once they have begun their last required course, they must register continuously and pay the part-time fees until all degree requirements have been completed. Under this option, it is expected that all degree requirements will be completed within two to three years, up to a maximum of six years.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

+ *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

APHD: Counselling and Clinical Psychology PhD; Field: Clinical and Counselling Psychology

Doctor of Philosophy

Program Description

The **Counselling and Clinical Psychology program** offers studies leading to the MA and PhD degrees. It is offered by the graduate Department of Applied Psychology and Human Development at the Ontario Institute for Studies in Education (OISE), St. George campus, and the graduate Department of Psychological Clinical Science at the University of Toronto Scarborough (UTSC).

This graduate program is intended for students seeking to pursue careers in research, teaching, and clinical practice. At the time of application, students will be required to identify a preference for a specific field as well as for a potential supervisor with whom they would work if admitted to the program.

The program has two fields:

- Clinical and Counselling Psychology, offered primarily by OISE;
- Clinical Psychology, offered primarily by UTSC.

The **field in Clinical and Counselling Psychology** is offered primarily by the OISE Department of Applied Psychology and Human Development. This field is based on a bio-psycho-social model with an emphasis on diversity. It shares an emphasis with the Clinical Psychology field on assessment and the treatment of psychopathology in adults.

The principal aim of this **PhD program** is the development of research and theoretical knowledge in counselling and clinical psychology, assessment skills, and knowledge and training in professional issues. Students are expected to conduct advanced research and to develop professional knowledge and skills. Graduates will be prepared to assume a variety of positions in psychological teaching, research, and practice in universities,

community settings and agencies offering psychological services, and in university or college counselling centres.

The Counselling and Clinical Psychology program offers both a full-time and flexible-time PhD, and progress in the program will be reviewed annually. The program in Clinical and Counselling Psychology at OISE was accredited by the Canadian Psychological Association (CPA) in 2015-2016 for a six-year term.

For 2021-22 and further extension to the 2022-23 academic year, admissions to the flexible-time PhD option have been administratively suspended.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Applied Psychology and Human Development's additional admission requirements stated below.
- An appropriate bachelor's degree in psychology or any appropriate bachelor's degree that would contain the psychology requirement equivalent (defined as 6.0 full-course equivalents [FCEs] in psychology, including 0.5 FCE in research methods, 0.5 FCE in statistics, and at least 3.0 FCEs at the second-, third- and fourth-year levels), with a standing equivalent to a University of Toronto A– or better in the final year.
- A University of Toronto MA degree in Clinical and Counselling Psychology with a grade of A– or better, or its equivalent.

Program Requirements

- **Coursework.** Students must complete a minimum of **5.5 FCEs** as follows:
  - 2.5 FCEs in Counselling and Psychotherapy:
    - APD3215H *Advanced Psychotherapy Seminar*;
    - APD3217Y+ *Advanced Practicum in Clinical and Counselling Psychology* (Credit/No Credit; 600-hour practicum); and APD3268Y *Internship in Clinical and Counselling Psychology* (1,600-hour internship — arrangements must be made in consultation with the Director of Clinical Training). PhD students will attend a minimum of six colloquium presentations during their program, which partially fulfills the course requirements for APD3268Y.
  - 1.0 FCE in Psychology Measurement/Assessment and Diagnosis:
    - APD3225H *Assessment and Diagnosis of Personality and Psychopathology*; and
    - APD3260H *Psychodiagnostic Systems.*
  - 0.5 FCE in Supervision and Consultation:
    - APD3261H+ *Clinical Supervision and Consultation Practicum.*
  - 1.0 FCE in Advanced Research Methods:
    - APD3202H *A Foundation of Program Evaluation in Social Sciences (RM)*; and
    - An advanced-level statistics course (in consultation with supervisors). Courses can be drawn from those offered at OISE or other Faculties with the permission of the instructor.
  - 0.5 FCE in History and Systems Psychology:
    - APD3204H *Contemporary History and Systems in Human Development and Applied Psychology.*
- **Comprehensive examination:** In addition to normal course requirements, students will complete two comprehensive components. First, a manuscript for publication and presentation at a peer review conference, normally in Year 1 of the program. Second, students will be examined systematically in general psychology and in professional psychology. The examination will normally be taken at the end of Year 2 of full-time study.
- **Doctoral dissertation:** All students must develop, complete, and defend in a Doctoral Final Oral Examination a doctoral dissertation supervised by a full-time member of the Counselling and Clinical Psychology faculty. The content of such dissertation research may address theoretical issues applicable to clinical and counselling concerns and practice, relate to the development of programs in a variety of educational or applied settings, or in some other way contribute to the development and practice of clinical and counselling psychology.
- Students must register continuously and pay the full-time fee until all degree requirements have been fulfilled.
- Students cannot transfer between the full-time and flexible-time PhD options.

Program Length

5 years

Time Limit

6 years

+ *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

PhD Program (Flexible-Time)

For 2021-22 and further extension to the 2022-23 academic year, admissions to the flexible-time PhD option have been administratively suspended.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Applied Psychology and Human Development's additional admission requirements stated below.
- An appropriate bachelor's degree in psychology or any appropriate bachelor's degree that would contain the psychology requirement equivalent (defined as 6.0 full-course equivalents [FCEs] in psychology, including 0.5 FCE in research methods, 0.5 FCE in statistics, and at least 3.0 FCEs at the second-, third- and fourth-year

levels), with a standing equivalent to a University of Toronto A– or better in the final year.
- A University of Toronto MA degree in Clinical and Counselling Psychology with a grade of A– or better, or its equivalent.
- Applicants to the flexible-time PhD option are accepted under the same admission requirements as applicants to the full-time PhD option.
- Applicants must demonstrate that they are currently employed and active professionals engaged in activities relevant to their proposed program of study.

Program Requirements

- **Coursework.** Students must complete a minimum of **5.5 FCEs** as follows:
  - 2.5 FCEs in Counselling and Psychotherapy:
    - APD3215H *Advanced Psychotherapy Seminar;*
    - APD3217Y+ *Advanced Practicum in Clinical and Counselling Psychology* (Credit/No Credit; 600-hour practicum); and APD3268Y *Internship in Clinical and Counselling Psychology* (1,600-hour internship — arrangements must be made in consultation with the Coordinator of Internship and Counselling Services). PhD students will attend a minimum of six colloquium presentations during their program, which partially fulfills the course requirements for APD3268Y.
  - 1.0 FCE in Psychology Measurement/Assessment and Diagnosis:
    - APD3225H *Assessment and Diagnosis of Personality and Psychopathology*; and
    - APD3260H *Psychodiagnostic Systems.*
  - 0.5 FCE in Supervision and Consultation:
    - APD3261H+ *Clinical Supervision and Consultation Practicum*.
  - 1.0 FCE in Advanced Research Methods:
    - APD3202H *A Foundation of Program Evaluation in Social Sciences (RM)*; and
    - An advanced-level statistics course (in consultation with supervisors). Courses can be drawn from those offered at OISE or other Faculties with the permission of the instructor.
  - 0.5 FCE in History and Systems Psychology:
    - APD3204H *Contemporary History and Systems in Human Development and Applied Psychology*.
- **Comprehensive examination:** In addition to normal course requirements, students will complete two comprehensive components. First, a manuscript for publication and presentation at a peer review conference, normally in Year 1 of the program. Second, students will be examined systematically in general psychology and in professional psychology. The examination will normally be taken at the end of Year 2 of full-time study.
- **Doctoral dissertation:** All students must develop, complete, and defend in a Doctoral Final Oral Examination a doctoral dissertation supervised by a full-time member of the Counselling and Clinical Psychology faculty. The content of such dissertation research may address theoretical issues applicable to clinical and counselling concerns and practice, relate to the development of programs in a variety of educational or applied settings, or in some other way contribute to the development and practice of clinical and counselling psychology.
- Students must register continuously until all degree requirements have been fulfilled. They must register full-time during the first four years and may continue as part-time thereafter, with their department's approval.
- Students cannot transfer between the full-time and flexible-time PhD options.

Program Length

6 years

Time Limit

8 years

+ *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Psychological Clinical Science: Counselling and Clinical Psychology MA; Field: Clinical Psychology

Master of Arts

Overview

The field in Clinical Psychology is offered primarily by the Department of Psychological Clinical Science at the University of Toronto Scarborough (UTSC). Clinical Psychology at UTSC adheres to a Clinical Science model of training and is accredited by the Canadian Psychological Association (CPA). The primary and overriding objective of graduate training in Clinical Psychology at UTSC is to foster exceptional clinical scientists according to the highest standards of research and professional practice.

Graduate training in Clinical Psychology at UTSC has primary research strengths in the areas of: clinical and cognitive neuroscience, psychological assessment and clinical neuropsychology, psychopathology, personality, and mindfulness- and acceptance-based psychotherapies.

The field in Clinical Psychology adheres to a generalist model of training, with a primary focus on adults. A unifying theme of faculty research in Clinical Psychology at UTSC is to advance knowledge of the etiology and assessment and treatment of mental disorders. Instruction is provided in psychopathology, assessment, and intervention, and students are trained to practise with a variety of adult populations. The field also boasts strength in neuropsychology.

Program Description

The full-time, two-year MA program is designed for applicants interested in working as researchers or practitioners in a variety of psychological and academic settings. This program enables students to apply for registration with the College of Psychologists of Ontario (CPO) as a Psychological Associate. It also meets the needs of students who plan to apply to the PhD program in Counselling and Clinical Psychology.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Psychological Clinical Science's additional admission requirements stated below.
- A four-year bachelor's degree from a recognized university with at least an A– (or first-class standing) in the final two years of undergraduate study, and at least 4.0 to 6.0 full-course equivalents (FCEs) in psychology including statistics and some laboratory research experience. Students who are admitted to the program without 4.0 to 6.0 FCEs in required undergraduate coursework may be required to complete additional courses in the master's program. Applicants with a strong background in mathematics, computer science, statistics, biological science, or neuroscience are encouraged to apply.
- Competitive scores on General and Subject (Psychology) tests of the Graduate Record Examination (GRE). Note: the GRE requirement has been waived for the 2022-23 admissions cycle.
- Two academic letters of reference.
- A personal statement.
- A curriculum vitae.
- Completion of the Department's Program Faculty Selection Form.
- Applicants whose primary language is not English and who graduated from a university where the language of

instruction is not English must demonstrate proficiency in English. Applicants must complete the Test of English as a Foreign Language (TOEFL), or its equivalent according to SGS regulations, prior to submitting the application. See General Regulations section 4.3 for requirements.

Program Requirements

- **Coursework.** The Clinical Psychology field for the MA in Counselling and Clinical Psychology requires **5.0 full-course equivalents (FCEs)** including an ethics course, practicum-based courses, a clinical practicum, and a thesis.
  - 4.5 FCEs as follows:
    - **Year 1:**
      - CPS1601H *Psychopathology* (0.5 FCE);
      - CPS1701H *Psychological Assessment I* (0.5 FCE);
      - CPS1702H *Psychological Assessment II* (0.5 FCE);
      - CPS1801H *Psychotherapy* (0.5 FCE);
      - CPS1901H *Ethics* (0.5 FCE).
    - **Year 2:**
      - CPS1101H *Clinical Research Design* (0.5 FCE);
      - CPS1102H *Statistical Techniques I* (0.5 FCE);
      - CPS1802H *Applied Interventions in Clinical Psychology* (0.5 FCE);
      - CPS1803H *Practicum in Psychological Interventions* (0.5 FCE).
  - 0.5 FCE: Students must complete a clinical practicum at a pre-approved placement site in the final Summer of the program (CPS2999H *Summer Practicum*)
- **Research thesis** to be completed and orally defended in Year 2 of the program.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Program Description

The PhD program is designed for applicants interested in a career as a clinical psychologist based on a **Clinical Science** model of training. Graduate training in Clinical Psychology at UTSC prepares graduates primarily for research and clinical careers as clinical scientists in university and medical and psychological settings.

The field is distinguished by its innovative cross-disciplinary approach that emphasizes scientific innovation through novel research collaborations that push traditional boundaries in clinical psychology. Importantly, the program meets the needs of students who plan to engage in research, teaching, and/or evidence-based clinical practice. This program is intended to meet the registration requirements of the College of Psychologists of Ontario (CPO) at the doctoral level.

The Counselling and Clinical Psychology program (Clinical Psychology field) is offered on a full-time basis, and progress in the program will be reviewed annually.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Applied Psychology and Human Development's additional admission requirements stated below.
- A master's degree in Clinical Psychology (or its equivalent) from a recognized university, with a minimum A– average and excellent research performance.
- Competitive scores on General and Subject (Psychology) tests of the Graduate Record Examinations (GRE). Note:

the GRE requirement has been waived for the 2022-23 admissions cycle.
- Two academic letters of reference.
- A personal statement.
- A curriculum vitae.
- Completion of the Department's Faculty Selection Form.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction is not English must demonstrate proficiency in English. Applicants must complete the Test of English as a Foreign Language (TOEFL), or its equivalent according to SGS regulations, prior to submitting the application. See General Regulations section 4.3 for requirements.

Program Requirements

- The PhD program requires **5.5 full-course equivalents (FCEs)** including coursework, three clinical placements, plus a comprehensive examination, thesis proposal, thesis, and thesis defence:
  - 3.5 FCEs in coursework, normally completed by the end of Year 3 (CPS1103H, CPS1201H, CPS1301H, CPS1401H, CPS2901H, CPS2902H, and CPS3901H).
  - 2.0 FCEs in clinical work:
    - 1.0 FCE in two separate part-time clinical placements during Years 1 and 2 (CPS3999H, CPS4999H).
    - 1.0 FCE in a one-year, full-time clinical internship at a Canadian Psychological Association- or American Psychological Association-accredited clinical setting (or equivalent), which normally takes place during Year 5 (CPS5999Y). Eligibility for the clinical internship will be assessed by the Director of Clinical Training (DCT) prior to Year 4 of the program.
- The **comprehensive examination** requirement consists of two mandatory components:
  - An oral examination focused on clinical expertise (normally completed in the Fall session of Year 2); and
  - A research-focused grant proposal (normally completed in the Fall session of Year 2).
  - A pass on both components is required for a student to continue on to PhD candidacy. Students who fail the oral exam will have the opportunity to retake the exam. Students who fail the grant proposal will have the opportunity to revise and resubmit. Students who fail either or both component(s) on the second attempt should consult the School of Graduate Studies' *Academic Appeals Policy*. If after the appeals process and second attempts at either or both component(s) result in a failure, the student will no longer be eligible to continue in the PhD program. Guidelines on the comprehensive requirement can be found in the PCS Graduate Handbook.
- **Thesis proposal**, normally approved prior to the start of Year 3 of the program.
- **Completed thesis**.
- Successful **defence of the thesis** at the Final Oral Examination.
- For students interested in acquiring additional clinical hours, the PhD program provides the following optional courses: CPS6999H and CPS7999H. Please note that optional courses for the PhD must be approved by the faculty supervisor, the DCT, and the Graduate Chair prior to course enrolment.
- Supervisors will have annual meetings with students to assess academic progress and to develop plans of study. The DCT will also hold formal annual meetings with students to assess clinical and professional progress.
- The program length is five years, which includes a pre-doctoral internship.

APHD: Counselling Psychology MEd; Field: Counselling and Psychotherapy

Master of Education

Program Description

The **field in Counselling and Psychotherapy**, within the Counselling Psychology MEd degree program, provides individuals with the opportunity to learn and develop counselling skills appropriate for counselling individuals across a variety of work settings. Students are encouraged to tailor their courses and practicum learning experiences to meet their particular learning goals. Examples of the types of goals for which suitable programs of study could be developed include counselling and psychotherapy with adults, college and university students, or older adults: career counselling; counselling with diverse clients; and counselling and psychotherapy in community mental health and family service settings. The program of study provides students with the basic preparation for certification as a Certified Canadian Counsellor (CCC) with the Canadian Counselling and Psychotherapy Association (CCPA) and as a Registered Psychotherapist with the College of Registered Psychotherapists of Ontario (CRPO).

The MEd program is typically offered on a full-time basis with a limited number of part-time spots available.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the additional admission requirements of the Department of Applied Psychology and Human Development stated below.
- An appropriate bachelor's degree of any background or discipline, with a grade equivalent to a University of Toronto B+ or better in the final year, from a recognized university.
- At least one year of relevant counselling-related experience.
- Two letters of reference.

Program Requirements

- **Coursework.** Students must complete **5.0 full-course equivalents (FCEs)** as follows:
  - APD1202Y *Theories and Techniques of Counselling and Psychotherapy* (1.0 FCE).
  - APD1203Y+ *Practicum I: Interventions in Counselling Psychology and Psychotherapy* (1.0 FCE). The practicum placement is the supervised training component of this course.
  - APD1214H *Critical Multicultural Practice: Diversity Issues in Counselling and Psychotherapy* (0.5 FCE; prerequisite: APD1202Y and co-requisite: APD1203Y+).
  - APD1219H *Ethical Issues in Professional Practice and Psychotherapy* (0.5 FCE).
  - APD1260H *Family Therapy* (0.5 FCE) **or** APD1261H *Group Work in Counselling and Psychotherapy* (0.5 FCE).
  - 1.5 FCEs in electives. Recommended electives: one of
    - APD1266H *Career Counselling and Development: Transition from School to Work* (0.5 FCE),
    - APD1268H *Career Counselling and Development: Transitions in Adulthood* (0.5 FCE), or
    - APD1267H *Emotion-Focused Therapy* (0.5 FCE) **or** APD1278H *Cognitive Therapy* (0.5 FCE).
- A **comprehensive examination**. Upon completion of program course requirements, students must pass a written comprehensive exam of selected topics from the program curriculum and training.
- Optional additional practicum, counted as one of the electives. Students may choose to complete a practicum (APD1247H *Practicum in Adult Counselling and Psychotherapy*) for an additional 250 hours of field placement concurrent with the required course (APD1203Y+ *Practicum I: Interventions in Counselling Psychology and Psychotherapy*). Arrangements for the practicum placement must be made in consultation with and the approval of the Director of Clinical Training.

Program Length

5 sessions full-time (typical registration sequence: F/W/S/F/W);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

APHD: Counselling Psychology MEd; Field: Global Mental Health and Counselling Psychology

Master of Education

Program Description

The **field in Global Mental Health and Counselling Psychology**, within the Counselling Psychology MEd degree program, provides individuals with the opportunity to learn and develop skills appropriate for the field of mental health and counselling psychology in international contexts. Students will be prepared to work in a variety of applied settings, including educational, vocational, and mental health globally. This degree program is ideally suited to students interested in an international perspective of mental health and counselling. This field will **not** lead to registration as a Certified Canadian Counsellor with the Canadian Counselling and Psychotherapy Association (CCPA), nor will it provide registration with the College of Registered Psychotherapists of Ontario (CRPO). This degree is cohort based and is offered full-time only.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the additional admission requirements of the Department of Applied Psychology and Human Development stated below.
- An appropriate bachelor's degree, with a grade equivalent to a University of Toronto B+ or better in the final year, from a recognized university.
- At least one year of relevant counselling-related experience.
- Two letters of reference.
- Normally, an interview is required prior to admission.

Program Requirements

- **Coursework.** Students must complete **5.0 full-course equivalents (FCEs)** as follows:
  - APD1219H *Ethical Issues in Professional Practice in Psychology and Psychotherapy* (0.5 FCE).
  - APD1228H *Couples Counselling* (0.5 FCE).
  - APD1245H *Brief Strategies in Counselling and Psychotherapy* (0.5 FCE).
  - APD1268H *Career Counselling and Development: Transitions in Adulthood* (0.5 FCE).
  - APD1278H *Cognitive Therapy* (0.5 FCE).
  - APD1282H *Introduction to Global Mental Health and Counselling Psychology* (0.5 FCE).
  - APD1283H *Peer and Video-Based Counselling With Practicum Field-Based Learning in Global Mental Health* (0.5 FCE).
  - APD1902H *Theories and Techniques of Counselling in a Global Context* (0.5 FCE).
  - APD2293H *Interpretation of Educational Research* (0.5 FCE).
  - APD5000H *Special Topics in Applied Psychology and Human Development: Master's Level* (0.5 FCE).

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F)

Time Limit

3 years full-time

APHD: Counselling Psychology MEd; Field: Global Mental Health and Counselling Psychology (Dual Degree)

Dual Degree Program: Master of Education (University of Toronto) / Master of Medicine (China Medical University)

Program Description

This dual degree program creates a pathway between **U of T's Master of Education (MEd) in Counselling Psychology, Global Mental Health and Counselling Psychology (GMHCP) field** and **China Medical University (CMU)'s Master of Medicine (MMed) in Psychiatry and Mental Health** programs.

In Year 1, students complete MMed coursework at CMU, Liaoning Province, China. In Year 2, students complete MEd coursework at U of T in Toronto, Canada. In the Fall session of Year 3, students complete the last course of the MEd requirement, a practicum, in China along with the Year 3 MMed coursework. In Year 3, students will also complete a master's thesis at CMU as part of the dual degree requirements.

Students will gain both degrees in three years rather than the four years it would take to acquire the degrees independently.

Master of Medicine Program
Department of Medical Psychology and Mental Health, China Medical University
Email: mqu@cmu.edu.cn

Application Process

- Applicants must apply directly to both the Department of Applied Psychology and Human Development at U of T and the Department of Medical Psychology and Mental Health at CMU. Applicants must apply through U of T's School of Graduate Studies online admissions application system.

Minimum Admission Requirements

- In order to be admitted to the dual degree program, applicants must meet the admission requirements of both programs. The admission requirements of the GMHCP field within the MEd program are stated below.
- Applicants are admitted under the General Regulations of the School of Graduate Studies at the University of Toronto as well as the specific requirements of the MEd program.
- An appropriate bachelor's degree from a recognized university with a standing in the final year equivalent to at least a U of T B+.
- At least one year of relevant experience, which could be paid or volunteer.
- Two letters of reference.
- Normally, an interview is required prior to admission to the MEd program.

Program Requirements

During their U of T registration in the GMHCP field within the MEd program, students must successfully complete a total of **5.0 full-course equivalents (FCEs)**.

Year 1

- **Fall, Winter, and Summer sessions:** students complete Year 1 MMed courses at CMU.

Year 2

- Students complete the following Year 2 MEd courses at U of T.
- **Fall session (1.5 FCEs):**
  - APD1268H *Career Counselling and Development: Transitions in Adulthood*.
  - APD1282H *Introduction to Global Mental Health and Counselling Psychology*.
  - APD1902H *Theories and Techniques of Counselling in a Global Context*.
- **Winter session (1.5 FCEs):**
  - APD1219H *Ethical Issues in Professional Practice in Psychology and Psychotherapy*.
  - APD1278H *Cognitive Therapy*.
  - APD2293H *Interpretation of Educational Research*.
- **May-to-June period of the Summer session (1.0 FCE):**
  - APD1228H *Couples Counselling*.
  - APD1245H *Brief Strategies in Counselling and Psychotherapy*.
- **July-to-August period of the Summer session (0.5 FCE):**
  - APD5000H *Special Topics in Applied Psychology and Human Development: Master's Level*.

Year 3

- **Fall session (0.5 FCE):**
  - Complete the U of T MEd course APD1283H* *Peer and Video-Based Counselling With Practicum Field-Based Learning in Global Mental Health*. This is a 250-hour placement in an approved field setting and must be arranged prior to admission to this program.
  - Continue the MMed program requirements at CMU.
- **Winter and Summer sessions:**
  - Complete the MMed program requirements at CMU.

Program Length

9 sessions full-time (typical registration sequence: F/W/S/F/W/S/F/W/S)

APHD: Counselling Psychology MEd; Field: Guidance and Counselling

Master of Education

Program Description

The **field in Guidance and Counselling**, within the Counselling Psychology MEd degree program, provides individuals with the opportunity to learn and develop skills appropriate for the field of guidance and counselling in the schools. Strong preference for admission to this field is given to experienced teachers who are interested in specializing in guidance and counselling in the schools. The program of study provides students with the basic preparation for certification as a Certified Canadian Counsellor (CCC) with the Canadian Counselling and Psychotherapy Association (CCPA).

The MEd program is typically offered on a full-time basis with a limited number of part-time spots available.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the additional admission requirements of the Department of Applied Psychology and Human Development stated below.
- An appropriate bachelor's degree, with a grade equivalent to a University of Toronto B+ or better in the final year, from a recognized university.
- Teacher certification.

Program Requirements

- **Coursework.** Students must complete **5.0 full-course equivalents (FCEs)** as follows:
  - APD1202Y *Theories and Techniques of Counselling and Psychotherapy* (1.0 FCE).
  - APD1203Y+ *Practicum I: Interventions in Counselling Psychology and Psychotherapy* (1.0 FCE). The practicum placement is the supervised training component of this course.
  - APD1214H *Critical Multicultural Practice: Diversity Issues in Counselling and Psychotherapy* (0.5 FCE; prerequisite: APD1202Y and co-requisite: APD1203Y+).
  - APD1219H *Ethical Issues in Professional Practice in Psychology and Psychotherapy* (0.5 FCE).
  - APD1260H *Family Therapy* (0.5 FCE) **or** APD1261H *Group Work in Counselling and Psychotherapy* (0.5 FCE).
  - APD1262H *Educational Psychological Testing for Counselling* (0.5 FCE).
  - APD1266H *Career Counselling and Development: Transition from School to Work* (0.5 FCE).
  - 0.5 FCE in electives.
- A **comprehensive examination**. Upon completion of program course requirements, students will take a comprehensive examination of selected topics from the program curriculum and training.
- **Optional additional practicum**. Students may choose to complete a practicum (APD1247H *Practicum in Adult Counselling and Psychotherapy*) for an additional 250 hours of field placement concurrent with the required course APD1203Y+ *Practicum I: Interventions in Counselling Psychology and Psychotherapy*. Arrangements for the practicum placement must be made in consultation with and the approval of the Director of Clinical Training.

Program Length

APHD: Counselling Psychology EdD; Field: Counselling and Psychotherapy

Doctor of Education

Program Description

Counsellor training in this degree program emphasizes the role of the counsellor in educational and community settings with expertise in supervisory and consultative skills and advanced counselling theory and practice. Graduates will be prepared to take leadership positions in the field of counselling and psychotherapy as educators in colleges and institutes of education; as directors and coordinators of school guidance programs; as specialists in the provision of counselling-related, in-service training for school and college personnel; and as providers of advanced levels of personal counselling in community and educational settings.

The **field in Counselling and Psychotherapy** will be especially attractive to individuals who have demonstrated a career commitment to the provision of counselling-related services in an educational and community setting. This professional doctorate is designed to prepare students to refine and build on professional knowledge and practice to support the development of scholar-practitioners to be leaders in their fields of professional practice.

The Doctor of Education (EdD) program is only available on a full-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the additional admission requirements of the Department of Applied Psychology and Human Development stated below.
- Applicants must have the following to be admitted to the EdD program:
  - A **bachelor's degree**: an appropriate bachelor's degree of any background or discipline from a recognized university, with high academic standing.
  - A **master's degree**: an MA or MEd degree in Counselling Psychology or School and/or Clinical Child Psychology from the University of Toronto with a grade of B+ or better, or its equivalent from a recognized university. The applicant must have had successful professional experience and interest to increase and advance their knowledge of counselling and psychotherapy to become leaders in their fields. Applicants who hold an MEd or other non-thesis master's degree must submit evidence of their ability to identify a research question or problem, to design and conduct a research study or project, and to report the findings or results, all in a rigorous manner. This constitutes a Qualifying Research Paper (QRP).

Program Requirements

- **Coursework.** Students must take courses related to the development of advanced competence in counselling, psychotherapy, and mental health theory and practice and become sophisticated consumers of research in these and related fields. Students must complete a minimum of **5.5 full-course equivalents (FCEs)** including a practicum, internship, and thesis (dissertation in practice) as follows:
  - APD3115H[+] *Research Proseminar in Counselling and Psychotherapy* (0.5 FCE).
  - APD3215H *Advanced Psychotherapy Seminar* (0.5 FCE).
  - APD3261H[+] *Clinical Supervision and Consultation Practicum* (0.5 FCE).
  - APD3217Y[+] *Advanced Practicum in Clinical and Counselling Psychology* (1.0 FCE; Credit/No Credit): complete a 500-hour practicum before the Final Oral Examination.
  - APD3270H *EdD Internship* (0.5 FCE): complete 500 hours of internship, typically after the Final Oral Examination. All internship arrangements must be made in consultation with the Director of Clinical Training.
  - Three courses, one from each of the following three groupings:
    - APD3178H *Advanced Cognitive Behaviour Therapy* (0.5 FCE) **or** APD3160H *Advanced Family Therapy* (0.5 FCE)
    - APD3260H *Psychodiagnostic Systems* (0.5 FCE) **or** one elective in a special focus of interest (0.5 FCE)
    - APD3202H *A Foundation of Program Evaluation in Social Sciences (RM)* (0.5 FCE) **or** JOI3228H *Mixed Methods Research Design in Social Sciences (RM)* (0.5 FCE) or an equivalent course (with approval of the Program Chair).
  - In addition, students must take 1.0 FCE in their specific area of **focus**.
    - Option 1: Counselling and Psychotherapy for Adults
      - APD3163H *Advanced Multicultural Counselling and Psychotherapy* (0.5 FCE)
      - One elective in a special **focus** of interest (0.5 FCE)
    - Option 2: Counselling and Psychotherapy for Schools and Youth
      - APD5284Y *Assessment and Intervention with Culturally and Linguistically Diverse Children, Youth, and Families* (1.0 FCE).
- **Optional additional practicum.** Students may choose to take an optional continuous practicum (APD3271H[0] *Additional PhD Practicum*) in conjunction with the required doctoral practicum course APD3217Y[+] *Advanced Practicum in Clinical and Counselling Psychology* (Credit/No Credit).
- **Thesis (dissertation in practice).** All students must complete a thesis (dissertation in practice), the aim of which is to ensure excellent knowledge of counselling and psychotherapy theory, practice, and policy for professionals working with adults or children/youth to function as leading scholar-practitioners. The thesis (dissertation in practice) should be: a) well conceived, original, and likely to make a sustained contribution to mental health practice; b) involve creativity, innovative methods and techniques, and have the potential to improve practice; c) exemplary, sets high standards in the field, and can be emulated and; d) has the potential for significant public impact. The focus of the thesis (dissertation in practice) is expected to be on contributions to field development or to innovations in practice. Students will defend their thesis (dissertation in practice) at a Final Oral Examination.
- Students are full-time and must maintain continuous, full-time registration and pay full-time fees until all degree requirements, including the thesis (dissertation in practice), are completed.
- Students cannot transfer between the EdD and PhD programs.

Program Length

4 years full-time

Time Limit

6 years full-time

[0] Course that may continue over a program. The course is graded when completed.

APHD: Counselling Psychology EdD; Field: School Psychology

Doctor of Education

Program Description

Counsellor training in this degree program emphasizes the role of the counsellor in educational and community settings with the goal of enhancing their expertise in their professional roles including supervisory and consultative skills and the advanced study of counselling theory and practice. Graduates will be prepared to take leadership positions in the field of counselling and psychotherapy; as educators in colleges and institutes of education; as directors and coordinators of school guidance programs; as specialists in the provision of counselling-related, in-service training for school and college personnel; and as providers of advanced levels of personal counselling in community and educational settings.

The **field in School Psychology** will be especially attractive to practitioners providing direct services to children and youth in the education system (K-12) and will provide school psychology practitioners with core theoretical and practical training needed to develop research-informed leaders in the field of school psychology. The program is structured to provide students with the requirements necessary for registration as a School Psychologist with the College of Psychologists of Ontario.

The Doctor of Education (EdD) program is only available on a full-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the additional admission requirements of the Department of Applied Psychology and Human Development stated below.
- Applicants must have the following to be admitted to the EdD program:
  - A **bachelor's degree**: an appropriate bachelor's degree of any background or discipline from a recognized university, with high academic standing.
  - A **master's degree**: an MA or MEd degree in Counselling Psychology or School and/or Clinical Child Psychology from the University of Toronto with a grade of B+ or better, or its equivalent from a recognized university. The applicant must have had successful professional experience and interest to increase and advance their knowledge of counselling and psychotherapy to become leaders in their fields. Applicants who hold an MEd or other non-thesis master's degree must submit evidence of their ability to identify a research question or problem, to design and conduct a research study or project, and to report the findings or results, all in a rigorous manner. This constitutes a Qualifying Research Paper (QRP).
  - Applicants must demonstrate either undergraduate- or graduate-level competence in each of the five core content areas of psychology: 1) Biological Bases of Behaviour; 2) Cognitive/Affective Bases of Behaviour; 3) Historical and Scientific Foundations of Psychology; 4) Scientific and Professional Ethics (graduate level); and 5) Social Bases of Behaviour, by successful completion of
    - 1.0 full-course equivalent (FCE) at the second-, third-, or fourth-year undergraduate level **or**
    - 0.5 FCE at the graduate level.
  - If the above requirements are not met, students must take additional courses to ensure they have completed the above requirements by the end of their program.

Program Requirements

- **Coursework.** Students must take courses related to the development of advanced competence in counselling, psychotherapy, and mental health theory and practice and become sophisticated consumers of research in these and related fields. Students must complete a minimum of **5.5 full-course equivalents (FCEs)** including a practicum, internship, and thesis (dissertation in practice) as follows:
  - APD3115H[+] *Research Proseminar in Counselling and Psychotherapy* (0.5 FCE).
  - APD3215H *Advanced Psychotherapy Seminar* (0.5 FCE).
  - APD3261H[+] *Clinical Supervision and Consultation Practicum* (0.5 FCE).
  - APD3217Y[+] *Advanced Practicum in Clinical and Counselling Psychology* (1.0 FCE; Credit/No Credit): complete a 500-hour practicum before the Final Oral Examination.
  - APD3401H *Assessment With Culturally and Linguistically Diverse Children, Youth, and Families* (0.5 FCE)
  - APD3402H *Intervention With Culturally and Linguistically Diverse Children, Youth, and Families* (0.5 FCE)
  - APD3403H *EdD Internship in School Psychology* (0.5 FCE): complete 1,600 hours of internship, typically after the Final Oral Examination. All internship arrangements must be made in consultation with the Director of Clinical Training.
  - Three courses, one from each of the following three groupings:
    - APD3178H *Advanced Cognitive Behaviour Therapy* (0.5 FCE) **or** APD3160H *Advanced Family Therapy* (0.5 FCE)
    - APD3260H *Psychodiagnostic Systems* (0.5 FCE) **or** one elective in a special focus of interest (0.5 FCE)
    - An advanced-level statistics or research methods course (in consultation with the student's supervisor). Courses can be drawn from those offered at OISE or other Faculties with the permission of the instructor (0.5 FCE).
- **Optional additional practicum.** Students may choose to take an optional continuous practicum (APD3271H[0] *Additional PhD Practicum*) in conjunction with the required doctoral practicum course APD3217Y[+] *Advanced Practicum in Clinical and Counselling Psychology* (Credit/No Credit).
- **Thesis (dissertation in practice).** All students must complete a thesis (dissertation in practice), the aim of which is to ensure excellent knowledge of counselling or school psychology theory, practice, and policy for professionals working with adults or children/youth to function as leading scholar-practitioners. The thesis (dissertation in practice) should be: a) well conceived, original, and likely to make a sustained contribution to mental health or school psychology practice; b) involve creativity, innovative methods and techniques, and have the potential to improve practice; c) exemplary, sets high standards in the field, and can be emulated and; d) has the potential for significant public impact. The focus of the thesis (dissertation in practice) is expected to be on contributions to field development or to innovations in practice. Students will defend their thesis (dissertation in practice) at a Final Oral Examination.
- Students are full-time and must maintain continuous, full-time registration and pay full-time fees until all degree requirements, including the thesis (dissertation in practice), are completed.
- Students cannot transfer between the EdD and PhD programs.

APHD: Developmental Psychology and Education MA

Master of Arts

Program Description

The Developmental Psychology and Education program offers studies leading to the MA, MEd, and PhD degrees. Students have an opportunity to construct an overall perspective on developmental psychology and human development and their implications for practice with children in educational and other applied settings.

Students take foundation courses in human development and research methodology in consultation with their advisor. Elective courses cover a range of areas including cognitive, social, and emotional development; cognition and instruction (language, literacy, and mathematics); special education and adaptive instruction; developmental neuroscience; advanced research methodology and evaluation; and early childhood policy and programs, including child care. The MA program is designed for students wishing to pursue an academic or research-based career.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Applied Psychology and Human Development's additional admission requirements stated below.
- An appropriate bachelor's degree with the equivalent of a University of Toronto A– or better. Although most applicants will have a degree in psychology, applicants with an appropriate bachelor's degree in cognitive science, computer science, linguistics, or a helping profession such as occupational therapy, speech-language pathology, physiotherapy, nursing, social work, or another discipline relevant to their specific program of study are also eligible to apply for admission.

Program Requirements

- **Coursework.** Students must complete **2.0 full-course equivalents (FCEs)** as follows:
  - APD1209H *Research Methods and Thesis Preparation in Human Development and Applied Psychology* (0.5 FCE)
  - JOI1288H *Intermediate Statistics and Research Design (RM)* (0.5 FCE)
  - Two elective courses (1.0 FCE total) chosen in consultation with the student's advisor, which may include APD2252H *Individual Reading and Research* (0.5 FCE).
  - Students who have not taken a previous course in human development are required to take APD1201H *Child and Adolescent Development* (0.5 FCE) or an equivalent.
  - In addition to their required 2.0 FCEs, students who have not taken a previous course in statistics are required to take JOI1287H *Introduction to Applied Statistics* or an equivalent course.
- **Master's thesis.**

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

APHD: Developmental Psychology and Education MEd

Master of Education

Program Description

The Developmental Psychology and Education program offers studies leading to the MA, MEd, and PhD degrees. Students have an opportunity to construct an overall perspective on

developmental psychology and human development and their implications for practice with children in educational and other applied settings. The Master of Education (MEd) program is designed for the reflective teacher or other practitioner in education or related fields. This is a degree primarily designed for those working in applied settings and it does not require a research thesis.

Students take foundation courses in human development and research methodology. Elective courses cover a range of areas including cognitive, social, and emotional development; cognition and instruction (language, literacy, and mathematics); special education and adaptive instruction; developmental neuroscience; advanced research methodology and evaluation; and early childhood policy and programs, including child care.

The MEd program can be taken on a full-time or part-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the department's additional admission requirements stated below.
- Admission to the MEd program normally requires an appropriate bachelor's degree with standing equivalent to a University of Toronto mid-B or better.
- Applicants normally possess a teaching certificate and have at least one year of relevant professional experience.

Program Requirements

- **Coursework.** Students must complete **5.0 full-course equivalents (FCEs)** as follows:
  - APD1200H *Foundations of Human Development and Education* (0.5 FCE).
  - APD2293H *Interpretation of Educational Research* (0.5 FCE).
  - 2.0 additional FCEs must be selected from the department electives list, available on the departmental website or in the Applied Psychology and Human Development program guidelines.
  - The remaining 2.0 elective FCEs may be taken from within or outside the department. Elective courses must be chosen in consultation with the student's faculty advisor. Students are asked to meet with their faculty advisor in the first session of their program.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

APHD: Developmental Psychology and Education MEd; Emphasis: Program Evaluation

Emphasis: Program Evaluation

Program Description

Within the MEd program in Developmental Psychology and Education, the emphasis in Program Evaluation is designed to engage students in an exploration of program evaluation used in education, psychology, and social sciences. Program evaluation is a systematic analysis of the process, effectiveness, and outcomes of programs. The primary purpose of program evaluation is to assess what components of a program is working or not and why. Students will learn to understand the concepts and theories needed to be a critical reviewer of evaluation designs and develop core components of program evaluation proposals and reports. As such, students will develop the basic competencies needed for program evaluation, including critically appraising evaluation research; assessing program needs; developing a logic model; evaluating process and outcomes of the program; evaluating efficiency; dealing with ethical issues; warranting evaluation claims; and communicating with stakeholders. Furthermore, students will develop an understanding of how social, cultural, and political factors impact program evaluation.

Program Requirements

Coursework. Students must successfully complete a total of **1.5 full-course equivalents (FCEs)**, which are counted towards the total FCEs required for the student's degree program, as follows: 1.0 FCE from the Program Evaluation menu **and** 0.5 FCE from the Research Methods menu, listed below.

- Program Evaluation menu (1.0 FCE from the following):
  - APD1212H *Basics to Program Evaluation in Social Sciences*
  - APD1226H *Foundations in Inquiry and Data-Based Decision Making*
  - APD1241H *Outcomes of Early Education and Child Care*
  - APD3202H *A Foundation of Program Evaluation in Social Sciences (RM)*
  - APD3301H *Issues in Child Study and Education: Research, Policy, and Problems of Practice (RM)*
  - APD3305H *Systems and Organizational Change.*
- Research Methods menu (0.5 FCE from the following):
  - APD1210H *Research Practicum*
  - APD1289H *Multivariate Analysis with Applications (RM)*
  - APD1292H *Instrument Design and Analysis (RM)*
  - APD3201H *Qualitative Research Methods in Human Development and Applied Psychology (RM)*
  - JOI1287H *Introduction to Applied Statistics (RM)*
  - JOI1288H *Intermediate Statistics and Research Design (RM)*
  - JOI3043H *Development and Use of Surveys in Education Research (RM)*
  - JOI3048H *Intermediate Statistics in Educational Research: Multiple Regression Analysis (RM)*
  - JOI3228H *Mixed Methods Research Design in Social Sciences (RM).*

Upon successful completion of the emphasis requirements and successful completion of the degree requirements, students may make a request to the Developmental Psychology and Education Program Liaison to have the emphasis noted on the student transcript. This request must be made before graduation.

APHD: Developmental Psychology and Education PhD

Doctor of Philosophy

Program Description

The Developmental Psychology and Education program offers studies leading to the MA, MEd, and PhD degrees. Students have an opportunity to construct an overall perspective on developmental psychology and human development and their implications for practice with children in educational and other applied settings.

Students take courses in human development and research methodology. Elective courses, chosen in consultation with their advisor, cover a range of areas including cognitive, social, and emotional development; cognition and instruction (language, literacy, and mathematics); special education and adaptive instruction; developmental neuroscience; advanced research methodology and evaluation; and early childhood policy and programs, including child care. The PhD program is designed for students wishing to pursue an academic or research-based career.

The Developmental Psychology and Education program offers both a full-time and a flexible-time PhD program option. Applicants must declare the option for which they are interested in applying. The flexible-time PhD degree program is designed to accommodate demand by practising professionals for a PhD degree that permits continued employment in areas related to their fields of research. Degree requirements for the full-time and flexible-time options are the same.

PhD students have the option of completing an emphasis in Early Learning. Please see details below.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Applied Psychology and Human Development's additional admission requirements stated below.
- Normally, an appropriate bachelor's degree and a master's degree in developmental psychology and education, cognitive psychology, applied developmental psychology, or child study, with standing equivalent to a University of Toronto A– or better in the master's degree. Applicants with master's degrees in other disciplines such as adult education, anthropology, computer science, curriculum, philosophy, or a profession such as speech-language pathology, nursing, social work, physiotherapy, or occupational therapy may be eligible to apply for admission, but may have to complete additional courses to fulfil master's-level requirements equivalent to the MA in Developmental Psychology and Education. Students who have not completed a master's thesis will be required to submit a Qualifying Research Paper (QRP) prior to final admission to the program.
- Required letters of recommendation and a second academic letter of recommendation.

Program Requirements

- **Coursework.** Students must complete **2.0 full-course equivalents (FCEs)** as follows:
  - APD3200H *Research Proseminar in Human Development and Applied Psychology* (0.5 FCE).
  - 0.5 FCE in statistics and research methods from an approved menu.
  - 1.0 FCE in electives (2 X 0.5 FCE).
  - The 2.0 FCEs are normally completed in Year 1 and should be chosen in consultation with the faculty advisor. Students who have an insufficient background in developmental psychology may have to complete additional courses.
- A **comprehensive examination**.
  - The purposes of the comprehensive examination are threefold:
    - To demonstrate the student's ability to work independently within an area of concern in human development.
    - To gain knowledge of a new area, a new technique or method in a specified area in human development.
    - To demonstrate the ability to integrate information at the accepted standard for a PhD student.
  - Students have two options when fulfilling their PhD comprehensive requirements:
    - Option 1: Empirical Research Paper or
    - Option 2: Internship.
- A **thesis and Doctoral Final Oral Examination**.
- Students must register continuously and pay the full-time fee until all degree requirements have been fulfilled.
- Students cannot transfer between the full-time and flexible-time PhD options.

Program Length

4 years

Time Limit

6 years

PhD Program (Flexible-Time)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Applied Psychology and Human Development's additional admission requirements stated below.
- Normally, an appropriate bachelor's degree and a master's degree in developmental psychology and education, cognitive psychology, applied developmental psychology, or child study, with standing equivalent to a University of Toronto A- or better in the master's degree. Applicants with master's degrees in other disciplines such as adult education, anthropology, computer science, curriculum, philosophy, or a profession such as speech-language pathology, nursing, social work, physiotherapy, or occupational therapy may be eligible to apply for admission, but may have to complete additional courses to fulfil master's-level requirements equivalent to the MA in Developmental Psychology and Education. Students who have not completed a master's thesis will be required to submit a Qualifying Research Paper (QRP) prior to final admission to the program.
- Required letters of recommendation and a second academic letter of recommendation.
- Applicants to the flexible-time PhD option are accepted under the same admission requirements as applicants to the full-time PhD option.
- Applicants must demonstrate that they are currently employed and are active professionals engaged in activities relevant to their proposed program of study.

Program Requirements

- **Coursework.** Students must complete **2.0 full-course equivalents (FCEs)** as follows:
  - APD3200H *Research Proseminar in Human Development and Applied Psychology* (0.5 FCE).
  - 0.5 FCE in statistics and research methods from an approved menu.
  - 1.0 FCE in electives (2 X 0.5 FCE).
  - The 2.0 FCEs are normally completed in Year 1 and should be chosen in consultation with the faculty advisor. Students who have an insufficient background in developmental psychology may have to complete additional courses.
- A **comprehensive examination**.
  - The purposes of the comprehensive examination are threefold:
    - To demonstrate the student's ability to work independently within an area of concern in human development.
    - To gain knowledge of a new area, a new technique or method in a specified area in human development.
    - To demonstrate the ability to integrate information at the accepted standard for a PhD student.
  - Students have two options when fulfilling their PhD comprehensive requirements:
    - Option 1: Empirical Research Paper or
    - Option 2: Internship.
- A **thesis and Doctoral Final Oral Examination**.
- Students must register continuously and pay the full-time fee until all degree requirements have been fulfilled. They must register full-time during the first four years and may continue as part-time thereafter, with their department's approval.
- Students cannot transfer between the full-time and flexible-time PhD options.

Program Length

6 years

Time Limit

8 years

APHD: Developmental Psychology and Education PhD Emphasis: Early Learning

Emphasis: Early Learning

Admissions to this emphasis have been administratively suspended.

Students interested in the Early Learning emphasis should consult with the Graduate Coordinator.

- Students wishing to complete the emphasis in Early Learning will include the following courses (**2.0 full-course equivalents [FCEs]**) in their overall PhD program:
  - APD3200H *Researching Proseminar in Human Development and Applied Psychology* (0.5 FCE).
  - APD3273H *Researching Early Learning* (0.5 FCE): an overview course of quantitative and qualitative methodology which meets the requirements of an intermediate or higher-level statistics course required of all Developmental Psychology and Education students).
  - APD1211H *Psychological Foundations of Early Development and Education* (0.5 FCE).
  - APD3274H *Early Learning and Thesis Development* (0.5 FCE).

APHD: Developmental Psychology and Education MA, MEd, and PhD Courses

Not all courses are offered every year. Please consult the Office of the Registrar and Student Services' course schedule.

APD1200H	Foundations of Human Development and Education
APD1201H	Child and Adolescent Development (Prerequisite: at least one of APD1233H or APD1249H, or permission of the instructor.)

APD1206H	Mind, Brain, and Instruction (Prerequisite: at least one of APD1233H or APD1249H, or permission of the instructor. Exclusion: APD5012H.)
APD1209H	Research Methods and Thesis Preparation in Human Development and Applied Psychology
APD1210H	Research Practicum (RM)
APD1211H	Psychological Foundations of Early Development and Education
APD1212H	Basics to Program Evaluation in Social Sciences (Exclusion: APD5021H.)
APD1213H	Psychology and Education of Students with ADHD (Prerequisite: at least one of APD1281H, APD1297H, or permission of the instructor. Exclusion: APD5001H.)
APD1217H	Foundations of Proactive Behavioural and Cognitive-Behavioural Intervention with Children
APD1231H	Mindful Self-Compassion for Educators (Exclusion: APD5018H.)
APD1233H	Cognitive Development and Applications
APD1235H	Technology, Play, and Social Media in Adolescence (Prerequisite: at least one of APD1233H, APD1249H, APD1281H, or permission of the instructor. Exclusion: APD5017H.)
APD1236H	Developmental Psychopathology (Prerequisite: at least one of APD1233H, APD1249H, or permission of the instructor.)
APD1241H	Outcomes of Early Education and Child Care
APD1256H	Child Abuse: Intervention and Prevention
APD1271H	Perspectives on Executive Functions in Education: From Theory to Practice
APD1272H	Play and Education
APD1280H	Symbolic Development and Learning
APD1281H	Education Exceptionalities, Special Education, and Adaptive Instruction
APD1286H	Foundations of Literacy Development for School Age Children
APD1289H	Multivariate Analysis with Applications (RM)
APD1290H	Indigenous Healing in Counselling and Psychoeducation
APD1292H	Instrument Design and Analysis (RM)
APD1294H	Technology, Psychology, and Play
APD1295H	Adolescent Mental Health: An Examination of Risk and Resilience (Prerequisites: APD1249H and APD1297H.)
APD1296H	Assessing School-Aged Language Learners
APD1297H	Mental Health in the Classroom: How Educators Can Help Our Most Vulnerable Students
APD1298H	Imagination, Reasoning, and Learning
APD1299H	Language Acquisition and Development in Early Childhood
APD2275H	Technology for Adaptive Instruction and Special Education
APD2293H	Interpretation of Educational Research
APD2296H	Reading and Writing Difficulties
APD3200H	Research Pro-seminar in Human Development and Applied Psychology
APD3201H	Qualitative Research Methods in Human Development and Applied Psychology (RM)
APD3202H	A Foundation of Program Evaluation in Social Sciences (RM) (Prerequisite: MEd students must have completed APD1212H or APD2293H or JOI1287H.)
APD3273H	Researching Early Learning: An Overview Course of Quantitative and Qualitative Methodology
APD3274H	Early Learning and the Thesis
APD3305H	Systems and Organizational Change (Exclusion: APD6006H.)
APD5000H	Special Topics in Applied Psychology and Human Development: Master's Level
APD6000H	Special Topics in Applied Psychology and Human Development: Doctoral Level
JDS1249H	Social-Emotional Development and Applications
JDS3000H	Advanced Methods in Developmental Science
JOI1287H	Introduction to Applied Statistics (RM)
JOI1288H	Intermediate Statistics and Research Design (RM)

Individual Reading and Research Courses

APD2252H	Individual Reading and Research in Human Development and Applied Psychology: Master's Level
APD3252H	Individual Reading and Research in Human Development and Applied Psychology: Doctoral Level

APHD: School and Clinical Child Psychology MA

Master of Arts

Program Description

The mission of the School and Clinical Child Psychology (SCCP) program is to provide students with theoretical, research, and professional training in preparation for leadership in psychological practice with children, adolescents, and families in school, mental health, private practice, and research settings. The program follows a scientist-practitioner model and is designed to train students to conduct basic and applied research and provide professional training in psychological assessment, therapy, and other psychosocial and instructional interventions, professional consultation, and prevention.

Opportunities are available for research and professional work with infants, young children, adolescents, adults, and families. The degrees are intended to meet the academic requirements of the College of Psychologists of Ontario (CPO) for registration as a Psychological Associate (MA) or Psychologist (PhD).

The curriculum of the SCCP program is designed to establish a strong foundation of core knowledge and skills early in the program, with students free to specialize later on. The program reflects a mix of courses and training opportunities.

A systemic approach is the basis for the training that is provided in assessment and intervention. The knowledge and skills necessary for the practice of school psychology and clinical child psychology overlap considerably, and experience in school and clinical settings complement and enhance each other. Therefore, over the course of the program of study, students are required to undertake practica in both school and clinical child settings.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Applied Psychology and Human Development's additional admission requirements stated below.
- An appropriate bachelor's degree in psychology, defined as 6.0 full-course equivalents (FCEs) in psychology, including 0.5 FCE in child development and 1.0 FCE in research methods/statistics (of which at least 0.5 FCE must be at the third or fourth-year levels) and at least 3.0 FCEs at the second, third-, or fourth-year levels. The usual admission standard is equivalency to a University of Toronto A– or better.
- Most applicants will have evidence of relevant professional experience and research experience.
- Applicants are requested to submit, in addition to two academic references, a letter of recommendation from an applied setting.

Program Requirements

- **Coursework.** Students must complete **5.0 FCEs** (including a practicum course) and a thesis.
  - APD1205H *Ethical Issues in Applied Psychology* (0.5 FCE).
  - APD1215H *Psychological Assessment of School-Aged Children* (0.5 FCE).
  - APD1216H *Psychoeducational Assessment* (0.5 FCE).
  - APD1218H *Seminar and Practicum in School-Based Assessment, Consultation, and Intervention* (0.5 FCE). The practicum portion consists of 250 hours (one day a week from September to June) and is normally taken in a school setting.
  - APD1222H *Approaches to Psychotherapy-Lifespan* (0.5 FCE).
  - APD1236H *Developmental Psychopathology* (0.5 FCE).
  - APD1285H *Psychology and Education of Children with Learning Disabilities* (0.5 FCE).
  - JOI1288H *Intermediate Statistics and Research Design (RM)* (0.5 FCE).
  - APD3240H *Advanced Social and Emotional Assessment Techniques* (0.5 FCE).
  - 0.5 FCE in Cognitive/Affective bases of behaviour from an approved course listing. Note: Students who have a 1.0 FCE in Cognitive/Affective bases of behaviour at the senior undergraduate level approved by the program may substitute an elective course for this requirement or a course in the Biological Bases of Behaviour or Social Bases of Behaviour menus, or APD3204H, *Contemporary History and Systems in Human Development and Applied Psychology*.
- **Thesis.**
- A listing of approved Cognitive/Affective, Social, and Biological bases of behaviour courses is available on the departmental website and in the Applied Psychology and Human Development program guidelines.
- In addition to the above course requirements, students who have not taken a previous child development course in their undergraduate degree program will be required to take APD1201H *Childhood and Adolescent Development*.
- Students who have not taken a previous statistics course or its equivalent must take JOI1287H *Introduction to Applied Statistics* (RM).
- Students must achieve a minimum of A– in at least one of APD1215H *Psychological Assessment of School-Aged Children* and APD1216H *Psychoeducational Assessment*, and must complete APD1218H *Seminar and Practicum in School-Based Assessment, Consultation, and Intervention* in order to remain in good standing and be permitted to continue in the program.
- Failure to meet these criteria will normally result in a recommendation to the School of Graduate Studies to terminate the student's registration in the program.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

APHD: School and Clinical Child Psychology PhD

Doctor of Philosophy

Program Description

The mission of the School and Clinical Child Psychology (SCCP) program is to provide students with theoretical, research, and professional training in preparation for leadership in psychological practice with children, adolescents, and families in school, mental health, private practice, and research settings. The program follows a scientist-practitioner model and is designed to train students to conduct basic and applied research and provide professional training in psychological assessment, therapy, and other psychosocial and instructional interventions, professional consultation, and prevention.

Opportunities are available for research and professional work with infants, young children, adolescents, adults, and families. The degrees are intended to meet the academic requirements of the College of Psychologists of Ontario (CPO) for registration as a Psychological Associate (MA) or Psychologist (PhD).

The curriculum of the SCCP program is designed to establish a strong foundation of core knowledge and skills early in the program, with students free to specialize later on. The program reflects a mix of courses and training opportunities.

A systemic approach is the basis for the training that is provided in assessment and intervention. The knowledge and skills necessary for the practice of school psychology and clinical child psychology overlap considerably, and experience in school and clinical settings complement and enhance each other. Therefore, over the course of the program of study, students are required to undertake practica in both school and clinical child settings.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Applied Psychology and Human Development's additional admission requirements stated below.
- Normally, an appropriate bachelor's degree in psychology or its equivalent and a University of Toronto MA in School and Clinical Child Psychology or its equivalent. The usual admission standard is equivalency to a University of Toronto A– or better in the master's degree. A limited number of outstanding applicants holding equivalent bachelor's and master's degrees in psychology from elsewhere may be considered. However, if the master's program was not equivalent to the University of Toronto MA in School and Clinical Child Psychology, the student will be required to take additional courses to receive equivalent training.
- Cognate course requirements. 1.0 full-course equivalent (FCE) at the senior undergraduate level, or 0.5 FCE at the graduate level, in each of the following cognate areas: Biological Bases of Behaviour, Cognitive/Affective Bases of Behaviour, Social Bases of Behaviour, and History and Systems of Psychology.

Program Requirements

- Students must complete **5.5 FCEs**, including a doctoral practicum course and an internship course, as follows:
  - APD3202H *A Foundation of Program Evaluation in Social Sciences (RM)* (0.5 FCE).
  - APD3222H *Approaches to Psychotherapy Across the Lifespan* (0.5 FCE), normally taken in Year 1.
  - APD3241H+ *Seminar and Practicum in Clinical Assessment and Intervention*, normally taken in Year 2. The practicum portion of APD3241H+ consists of 500 hours (two days a week from September to June) and is normally taken in a clinical setting. Students must complete APD3241H+ in order to remain in good standing and be permitted to continue in the program.
  - APD3260H *Psychodiagnostic Systems* (0.5 FCE).
  - APD5284Y+ *Assessment and Intervention with Culturally and Linguistically Diverse Children, Youth, and Families* (1.0 FCE).
  - 0.5 FCE from the Psychosocial Interventions course menu:
    - APD3224H *Advanced Proactive Behavioural and Cognitive-Behavioural Interventions** or
    - APD3231H *Psychodynamic Bases of Therapy**.

    * Note: the course is offered every other year. Students interested in other courses that may fulfil the Psychosocial Interventions requirement must receive approval from the SCCP Program Coordinator.
- 1.0 elective FCE.
- APD3242Y *Internship in School and Clinical Child Psychology* (1.0 FCE). The internship consists of a 1,600-hour placement, normally taken on a full-time basis over the course of a year in the final year of the student's program.
- A **comprehensive examination**. The purpose of the SCCP comprehensive examination is to:
  - Ensure an adequate level of psychological knowledge for professional functioning as a practitioner, academic, and/or researcher.
  - Demonstrate an ability to integrate information at the accepted standard for a doctoral student.
- A **doctoral dissertation**.
- Students must have successfully completed all coursework, passed the comprehensive examination, and have their dissertation completed or well underway, prior to commencing their internship.
- For each missing **cognate course requirement** (see Cognitive/Affective, Social, or Biological Bases of Behaviour; Admission Requirements above), students are required to take a 0.5 FCE course from the applicable course menu, which can be found on the departmental website and in the Applied Psychology and Human Development program guidelines. Students may use their elective course to cover one of these requirements.
- In addition to the above course requirements, students who have not taken a previous child development course must take APD1201H *Childhood and Adolescent Development*. Students who have not taken a previous statistics course or its equivalent must take JOI1287H *Introduction to Applied Statistics* (RM).
- Students must complete APD3241H+ *Seminar and Practicum in Clinical Assessment and Intervention* in order to remain in good standing and be permitted to continue in the program.
- Students who are required to take APD1215H, APD1216H, and APD1218H in addition to other courses in the PhD (which is the case for most students coming into the

program from elsewhere) must achieve a minimum of A- in at least one of APD1215H *Psychological Assessment of School-Aged Children* and APD1216H *Psychoeducational Assessment*, and must complete APD1218H[+] *Seminar and Practicum in School-Based Assessment, Consultation, and Intervention* in order to remain in good standing and be permitted to continue in the program. Failure to meet these criteria will normally result in a recommendation to the School of Graduate Studies to terminate the student's registration in the program.

- Students must register continuously and pay the full-time fee until all degree requirements have been fulfilled.

Program Length

5 years full-time

Time Limit

  - Landscape Architecture, MLA
  - Urban Design, MUD
- Sexual Diversity Studies
  - Visual Studies, MVS

Overview

The Faculty of Architecture, Landscape, and Design offers professional graduate programs in areas characterized by exceptional change. Globalization and the convergence of new media, new materials, and new building technologies have led to significant economic, technological, and aesthetic shifts. As a leading school of architecture, landscape, forestry, and design in North America, the Faculty is responding to these changing realities.

The greater Toronto region serves as a dynamic laboratory for critical studies and the exploration of design alternatives of international significance. Students also have access to Toronto's large professional design community. Students and faculty are incredibly cosmopolitan in sensibility, hailing from every part of the world, with their work crossing geographic and cultural boundaries. The city's multicultural networks and international connections make the Faculty a powerful place to start a career.

The Faculty has grown exceptionally in recent years with the hiring of new faculty and the revamping of its master's programs. With architecture, landscape architecture, forestry, urban design, and visual studies sharing facilities, the Faculty benefits from rich collaborations and crossover between related disciplines.

The growth has led to the recent construction of a new building which doubles the Faculty's size and creates a new and unprecedented centre at the University of Toronto for education, research, and public outreach on architecture, urbanism, visual arts, landscape, and conservation.

Architecture, Landscape, and Design: Architecture MArch

Master of Architecture

Program Description

The Master of Architecture (MArch) is a professional degree program and provides a thorough base of knowledge in history, theory, technology, ecology, society, and professional practice, while developing skills in design through an intensive sequence of design studio courses. These are supported by courses in visual communication and architectural representation including computer modelling and other new media. The program aims to develop critical, creative, and independent thinking and research that responds to current design issues and societal changes. The greater Toronto region is used as an urban laboratory for the development of new knowledge and forms of practice.

In Canada, the Canadian Architectural Certification Board (CACB) is the sole agency authorized by the Canadian Architectural Licensing Authorities (CALA) to accredit Canadian professional degree programs in architecture for the purposes of architectural licensure.

MArch Program (3-Year Option)

The 3-year option within the MArch program is accredited by the Canadian Architectural Certification Board. Graduates are eligible to begin the process of professional licensure to become an Architect in North America. The qualification is also transferable to many other countries and regions; students are advised to inquire with their local licensing body.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Architecture, Landscape, and Design's additional admission requirements stated below.
- A bachelor's degree (BA, BSc, BASc, BES, BFA, BCom) with a final-year grade point average of at least mid-B.
- Recommended: courses in secondary calculus, secondary physics, and university-level architectural history (0.5 full-course equivalent [FCE]).
- Some preparation or experience in architectural design or the creative arts is encouraged, but not required, such as hand or digital drawing, film or animation, graphic design, or sculpture. This program is suitable for those without formal training in design or the arts; graduates of any discipline are encouraged to apply.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

Program Requirements

- The course of study is a rigorous full-time, comprehensive program and prepares graduates for the full range of professional activities in architecture. The core program is extensive, and students are required to use their electives to develop an area of special skill and knowledge through an independent study program that culminates in a design thesis.
- Students study full-time, taking all required courses in each given session. An FZ (fail) in any one course, or a B– grade in two studio courses or in any three courses normally results in a recommendation to the School of Graduate Studies to terminate the student's registration in the degree program.
- There is no additional language requirement other than proficiency in English on admission. Writing support is integrated into the program to develop specialized skills that are essential to effective learning and communication in the design fields.
- Progress in the program is dependent upon satisfactory completion of studio and required core courses in sequence. Exceptions can be made at the discretion of the

Program Director, and in consultation with the Office of the Registrar and Student Services in the case of accessibility.
- Students who complete their Master of Architecture program and are eligible to graduate will have their relevant information automatically forwarded by the John H. Daniels Faculty of Architecture, Landscape, and Design to the Canadian Architectural Certification Board (CACB), unless the student opts out in writing. The certification confirms the individual's academic qualifications in compliance with the Canadian Education Standard (CES) in Architecture for entry to the profession. CACB grants and issues certification to applicants who meet the Education Standard and maintains a National Register of those certified and confidential records of all pertinent documentation for all applicants.
- **Coursework.** Students must complete a total of **16.0 full-course equivalents (FCEs)** as follows:
  - 13.5 FCEs in core courses:
    - 4.0 FCEs: Design Studio
    - 2.0 FCEs: Design Studio Research
    - 0.5 FCE: Research Methods
    - 0.5 FCE: Visual Communication
    - 1.0 FCE: History
    - 1.0 FCE: Design Technology
    - 3.5 FCEs: Technics and Planning
    - 1.0 FCE: Professional Practice
  - 2.5 elective FCEs, of which 0.5 FCE must be in the History and Theory category.

Program Length

6 sessions full-time (typical registration sequence: F/W/F/W/F/W)

Time Limit

4 years full-time

MArch Program (2-Year: Second-Year Advanced-Standing Option)

The 2-year option within the MArch program is accredited by the Canadian Architectural Certification Board. Graduates are eligible to begin the process of professional licensure to become an Architect in North America. The qualification is also transferable to many other countries and regions; students are advised to inquire with their local licensing body.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Architecture, Landscape, and Design's additional admission requirements stated below.
- An appropriate non-professional bachelor's degree in architectural studies or environmental design, or a comparable degree focusing on the built environment.
- Admission to the advanced-standing option is based on the merits of the student's overall academic background and strength of design portfolio as evaluated by the MArch admissions committee.
- Required: minimum previous completion of three design studio courses, two courses in visual communications or representation, two courses in architecture history and theory (one in 20th-century), and two courses in architectural technology and ecology.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

Program Requirements

- The course of study is a rigorous full-time, comprehensive program and prepares graduates for the full range of professional activities in architecture. The core program is extensive, and students are required to use their electives to develop an area of special skill and knowledge through an independent study program that culminates in a design thesis.
- Students study full-time, taking all required courses in each given session. An FZ (fail) in any one course, or a B– grade in two studio courses or in any three courses normally results in a recommendation to the School of Graduate Studies to terminate the student's registration in the degree program.
- There is no additional language requirement other than proficiency in English on admission. Writing support is integrated into the program to develop specialized skills that are essential to effective learning and communication in the design fields.
- Progress in the program is dependent upon satisfactory completion of studio and required core courses in sequence. Exceptions can be made at the discretion of the Program Director, and in consultation with the Office of the Registrar and Student Services in the case of accessibility.
- Students who complete their Master of Architecture program and are eligible to graduate will have their relevant information automatically forwarded by the John H. Daniels Faculty of Architecture, Landscape, and Design to the Canadian Architectural Certification Board (CACB), unless the student opts out in writing. The certification confirms the individual's academic qualifications in compliance with the Canadian Education Standard (CES) in Architecture for entry to the profession. CACB grants and issues certification to applicants who meet the Education Standard and maintains a National Register of those certified and confidential records of all pertinent documentation for all applicants.
- **Coursework.** Students must complete a total of **10.5 full-course equivalents (FCEs)** as follows:
  - 8.0 FCEs in core courses:
    - 2.0 FCEs: Design Studio
    - 2.0 FCEs: Design Studio Research
    - 0.5 FCE: Research Methods
    - 0.5 FCE: Design Technology
    - 2.0 FCEs: Technics and Planning
    - 1.0 FCE: Professional Practice
  - 2.5 elective FCEs, of which 0.5 FCE must be in the History and Theory category.

Program Length

4 sessions full-time (typical registration sequence: F/W/F/W)

Time Limit

4 years full-time

MArch Program (1-Year: Post-Professional Advanced-Standing Option)

The 1-year option within the MArch program is ideal for those who wish to undertake a graduate-level, academic research project, independent of the pathway to professional licensure. Those who wish to become a licensed Architect should consider the 2- or 3-year program options above.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Architecture, Landscape, and Design's additional admission requirements stated below.
- A post-professional advanced-standing option is available for students who are interested in pursuing advanced studies in architecture beyond their professional degree.
- Applicants must have completed all requirements for an accredited architectural professional degree from a recognized university.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- The post-professional advanced-standing option does not grant a professionally accredited degree.

Program Requirements

- The course of study is a rigorous full-time, comprehensive program and prepares graduates for the full range of professional activities in architecture. The core program is extensive, and students are required to use their electives to develop an area of special skill and knowledge through an independent study program that culminates in a design thesis.
- Students study full-time, taking all required courses in each given session. An FZ (fail) in any one course, or a B– grade in two studio courses or in any three courses normally results in a recommendation to the School of Graduate Studies to terminate the student's registration in the degree program.
- There is no additional language requirement other than proficiency in English on admission. Writing support is integrated into the program to develop specialized skills that are essential to effective learning and communication in the design fields.
- Progress in the program is dependent upon satisfactory completion of studio and required core courses in sequence. Exceptions can be made at the discretion of the Program Director, and in consultation with the Office of the Registrar and Student Services in the case of accessibility.
- Each student's program of study must receive the approval of the Program Director and, in general, shall consist of a research or design project on which a thesis must be submitted. Faculty members have research expertise in the following areas of interest, which students may pursue: Computation and Fabrication; Health and Society; and Sustainability and Environment.
- **Coursework.** Students must complete a total of **6.0 full-course equivalents (FCEs)** as follows:
  - 4.0 FCEs in core courses:
    - 0.5 FCE: ALA4010H *Field Course*
    - 0.5 FCE: ALA4020H *Thesis Preparation*
    - 1.0 FCE: ALA4021Y *Thesis I*
    - 1.5 FCE: ALA4022Y *Thesis II*
    - 0.5 FCE: ALA4030H *Colloquium*
  - 2.0 elective FCEs, of which 1.0 FCE must be in the student's area of interest.

Program Length

2 sessions full-time (typical registration sequence: F/W)

Architecture, Landscape, and Design: Architecture MArch Courses

Not all electives are offered every year. Please check the timetable for current listings available.

Core Courses

Design Studio

ARC1011Y	Design Studio 1
ARC1012Y	Design Studio 2
ARC2013Y	Design Studio 3
ARC2014Y	Design Studio 4

Design Studio Research

ARC3020Y **or**	Design Studio Research 1 (prerequisite: ARC2014Y; exclusions: ARC3016Y, LAN3016Y, URD2013Y) **or**
LAN3016Y **or**	Landscape Design Studio Research (exclusions: ARC3020Y, URD2013Y) **or**

URD2013Y	Urban Design Studio Options (prerequisites: URD1011Y, URD1012Y; exclusions: ARC3015Y, LAN3016Y)
ARC3021Y	Design Studio Research 2 (prerequisite: ARC3020Y; exclusion: ARC4018Y)

Design Technology

ARC1022H	Design Technology 1
ARC2023H	Design Technology 2

History

ARC1031H	Historical Perspectives on Topics in Architecture 1
ARC1032H	Historical Perspectives on Topics in Architecture 2

Post Professional

ALA4010H	Field Course
ALA4020H	Thesis Preparation
ALA4021Y	Thesis I (prerequisite: ALA4020H)
ALA4022Y	Thesis II (prerequisite: ALA4021Y)
ALA4030H	Colloquium (prerequisites: ALA4010H and ALA4020H; exclusion: ALD4030H)

Professional Practice

ARC3051H	Professional Practice 1
ARC3052H	Professional Practice 2

Research Methods

ARC2017H	Research Methods

Technics and Planning

ARC1041H	Building Science 1
ARC1043H	Building Science 2
ARC1046H	Structures 1
ARC2042H	Site Engineering and Ecology
ARC2046H	Structures 2
ARC2047H	Building Science 3
ARC2048H	Building Science 4

Visual Communication

ARC1021H	Visual Communications

Elective Courses

Architecture and Health

ARC3600H to ARC3625H	Selected Topics in the History and Theory of Architecture and Health

Computer Modelling

ARC3200H to ARC3225H	Selected Topics in Advanced Computer Applications

Design

ARC1100H	Selected Topics in Design
ARC2015H	Global Architecture: Urban Analysis and Documentation

History and Theory

ARC1035H	Toronto Architecture and Urban Form
ARC3031H	Analysis of Architectural Form
ARC3038H	Global Architecture: History and Theory
ARC3100H to ARC3125H	Selected Topics in Urban Design
ARC3300H to ARC3325H	Selected Topics in Architectural History and Theory

Independent Study

ARC3039H	Independent Study and Research in Architecture

Other

ARC3700H to ARC3725H	Selected Topics in Architecture
ARC3705H	Selected Topics in Architecture

ARC3706H	Selected Topics in Architecture

Professional Practice

ARC4500H to ARC4510H	Selected Topics in Professional Practice

Technics and Planning

ARC3400H to ARC3425H	Selected Topics in Architecture and Technology
ARC3500H to ARC3525H	Selected Topics in Sustainable Design

Architecture, Landscape, and Design: Architecture, Landscape, and Design PhD

Doctor of Philosophy

Program Description

The PhD program in Architecture, Landscape, and Design engages students in advanced research from an intra-disciplinary approach to architecture, landscape, and urban design. The program addresses cultural, social, environmental, historical, and technological questions of the art and design disciplines and the built environment. The program is intended for students entering careers that demand a syncretic approach to research in design and related disciplines.

This full-time program normally begins in September.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Architecture, Landscape, and Design's additional admission requirements stated below.
- An appropriate master's degree with an average grade of at least A–. A professional degree in a design discipline is highly desirable, but applicants with a master's degree in a related discipline in the humanities and social sciences may be considered. An additional specialized program of study may be proposed for successful applicants without professional training.
- A writing sample in the form of a substantial research paper or publication.
- Recommendation from three referees.
- A two-page proposal that indicates a topic of research within a design discipline, possible sub-field(s) (if desired), and potential supervisors. Although letters of commitment from faculty members are not required, the proposed topic must be congruent with the interests and expertise of at least one member of the PhD standing committee. The admissions committee will obtain commitment from the potential supervisor before admitting an applicant, and the applicant will be informed of this in the letter of offer.
- A portfolio of creative work may also be requested where it is relevant to the applicant's proposed area of research and the degree to which it may require technical skills typically gained in a professional degree program. For example, this could pertain to an applicant whose proposal includes producing renderings. Questions about whether to include a portfolio in an application should be directed to the Program Director or the applicant's prospective supervisor prior to the application deadline.

Program Requirements

- **Coursework.** Students must complete a total of **6.0 full-course equivalents (FCEs)** including:
  - ALD4030H *Doctoral Research Colloquium* (0.5 FCE).
  - ALD4040H *Theories and Methods* (0.5 FCE).
  - ALD4050H *Research Practicum* (0.5 FCE; Credit/No Credit).
  - ALD4060H *Preparation for Thesis* (0.5 FCE; Credit/No Credit).
  - 4.0 elective FCEs chosen from advanced (3000 and 4000 series) graduate-level courses offered by the John H. Daniels Faculty of Architecture, Landscape, and Design. Depending on their field of study, students may also take advanced graduate courses in cognate disciplines across the University, pending the approval of the Faculty and in consultation with their supervisors.
  - To complete the chosen thesis topic, students may be required to take additional courses or acquire other skills. This will be determined by the supervisor and the Director of Graduate Studies and may include competence in another language.
- **Comprehensive examinations.** All PhD students must complete a two-part comprehensive examination normally before their second Summer session. Successful completion of the examinations is required to achieve PhD candidacy. The exam's specific nature and scope are to be determined in consultation with the student's supervisor.
  - The first part, normally to be completed in the Summer session of Year 1, is to achieve breadth in the primary area of study so that the student can teach and conduct research within a larger chosen area within the design disciplines. This will usually involve preparing an annotated bibliography in consultation with the supervisor in the early Summer and writing the exam at the end of the Summer. The first part of the exam will consist of a written response to three questions, to be answered during a three-hour writing session that takes place on-site at the J. H. Daniels Faculty.
  - The second part, normally to be completed during the second session of Year 2, is to achieve depth in a secondary area of study, within the Faculty or beyond, so that the student can master the context for the advanced research they plan to undertake for their thesis. For the secondary area of study, most students are expected to specialize in one area of study of the design disciplines (for example, architectural history). Alternatively, for this requirement students may focus on a secondary area of study. (For example, computational technologies.) This exam may be administered by a faculty member other than the supervisor, to be determined by the student in

consultation with their supervisor. This second part can take one of two formats:
    - a second annotated bibliography to achieve depth in a sub-section of the primary area of study;
    - a course syllabus with readings and outlines of lectures, themes for tutorial discussions, as well as a minimum of three lectures drawn from across the syllabus.
  - Both parts of the examination are marked on a pass/fail basis. An oral examination will follow the completion of the second part of the exam. The oral examination will last no more than 90 minutes.
  - A second attempt of the comprehensive examinations will be allowed within six months, only on the recommendation of the student's supervisor. If the student fails again, their registration will be terminated. The student must pass both parts of the comprehensive examinations before permission to submit a thesis proposal will be granted.
- **Thesis.** Following completion of the comprehensive exam, the student's supervisory committee will be formed. This will take place no later than the Summer of Year 2 to allow the committee to advise on the development of the student's thesis proposal.
  - No later than the beginning of Year 3, the student must submit to the PhD program director a **thesis proposal** that has been approved by the student's supervisory committee. Once the thesis proposal has been approved, the student will achieve candidacy.
  - The doctoral candidate will then proceed to researching and writing the thesis. The student must meet with their thesis supervisory committee within three months of submitting the thesis proposal; thereafter, the candidate is required to meet at least once a year with the supervisory committee.
  - By the end of Year 4, the candidate should **complete a thesis** based on original research and the thesis should make a significant contribution to the area of study. The supervisory committee must approve the completed thesis before it is submitted for examination.
  - The candidate will defend the thesis at the **Doctoral Final Oral Examination**.

Program Length

4 years full-time

Time Limit

6 years full-time

Architecture, Landscape, and Design: Architecture, Landscape, and Design PhD Courses

Core Courses

ALD4030H	Doctoral Research Colloquium
ALD4040H	Theories and Methods
ALD4050H	Research Practicum (Credit/No Credit)
ALD4060H	Preparation for Thesis (Credit/No Credit)

Elective Courses

Not all electives are offered every year. Please check the timetable for current listings available from the Summer session. Electives are to be selected from advanced (3000 and 4000 series) graduate-level courses offered at the Daniels or other Faculties. These include the following:

ARC3031H	Analysis of Architectural Form
ARC3100H to ARC3125H	Selected Topics in Urban Design
ARC3200H to ARC3225H	Selected Topics in Advanced Computer Applications
ARC3300H to ARC3325H	Selected Topics in Architectural History and Theory
ARC3400H to ARC3425H	Selected Topics in Architecture and Technology
ARC3500H to ARC3525H	Selected Topics in Sustainable Design
ARC3600H to ARC3625H	Selected Topics in the History and Theory of Architecture and Health
ARC3700H to ARC3725H	Selected Topics in Architecture
ARC4090H	Directed Reading in Design (Credit/No Credit)
ARC4500H to ARC4510H	Selected Topics in Professional Practice
LAN3900H to LAN3910H	Landscape Architecture Topics: History, Theory, Criticism
VIS3001H	Advanced Readings in Visual Studies
VIS3002H	Advanced Readings in Curatorial Studies
VIS3003H	Special Topics in Art and Culture

Architecture, Landscape, and Design: Landscape Architecture MLA

Master of Landscape Architecture

Program Description

The Master of Landscape Architecture (MLA) is a professional program that focuses on urban and regional landscape architecture within a studio-based curriculum. Integrated courses in design; visual communication and modelling; history, theory, and criticism; site engineering and material technologies; horticulture, ecology, hydrology; professional practice and research methods seminars, as well as options for electives, provide a comprehensive professional education in landscape architecture. The program prepares students with a strong base in the fundamentals of the profession, while fostering innovative thinkers able to work collaboratively with allied disciplines, in preparation for becoming the next generation of leaders in landscape architecture.

MLA Program (3-Year Option)

The 3-year option within the MLA program is accredited by the Landscape Architecture Accreditation Council. Graduates are eligible to begin the process of professional licensure to become a Landscape Architect in North America. The qualification is also transferable to many other countries and regions; students are advised to inquire with their local licensing body.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Architecture, Landscape, and Design's additional admission requirements stated below.
- A bachelor's degree (such as BA, BSc, BASc, BES, BFA, BCom) with a minimum average of mid-B.
- Some preparation or experience in architectural design or the creative arts is encouraged, but not required, such as hand or digital drawing, film or animation, graphic design, or sculpture. This program is suitable for those without formal training in design or the arts; graduates of any discipline are encouraged to apply.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

Program Requirements

- Students study full-time, taking all required courses in each given session. An FZ (fail) in any one course, or a B– grade in two studio courses or in any three courses normally results in a recommendation to the School of Graduate Studies to terminate the student's registration in the degree program.
- There is no additional language requirement other than proficiency in English on admission. Writing support is integrated into the program to develop specialized skills that are essential to effective learning and communication in the design fields.
- Progress in the program is dependent upon satisfactory completion of studio and required core courses in sequence. Exceptions can be made at the discretion of the Program Director, and in consultation with the Office of the Registrar and Student Services in the case of accessibility.
- **Coursework.** Students must complete a total of **15.5 full-course equivalents (FCEs)** as follows:
  - 14.5 FCEs in core courses:
    - 4.0 FCEs: Design Studio
    - 1.0 FCE: Design Studio Options
    - 1.5 FCEs: Design Studio Thesis
    - 2.0 FCEs: Visual Communication
    - 2.0 FCEs: History, Theory, Criticism
    - 1.5 FCEs: Technology
    - 1.5 FCEs: Environment
    - 1.0 FCE: Professional Practice and Research Methods
  - 1.0 elective FCE.

Program Length

6 sessions full-time (typical registration sequence: F/W/F/W/F/W)

Time Limit

3 years full-time

MLA Program (2-Year: Second-Year Advanced-Standing Option)

The 2-year option within the MLA program is accredited by the Landscape Architecture Accreditation Council. Graduates are eligible to begin the process of professional licensure to become a Landscape Architect in North America. The qualification is also transferable to many other countries and regions; students are advised to inquire with their local licensing body.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Architecture, Landscape, and Design's additional admission requirements stated below.
- An appropriate bachelor's degree in landscape architecture, architecture, architectural studies, or environmental design, or a comparable degree focusing on the design of landscapes and the built environment.
- Admission is based on the merits of the applicant's overall academic background and strength of design portfolio as evaluated by the admissions committee.
- Minimum previous completion of three design studio courses, two courses in digital visual representation (including Rhinoceros, Illustrator, Laser Cutting), two courses in landscape architecture history and theory (one in 20th-century), and two courses in landscape architecture

site engineering (i.e., site grading) and planting design, horticulture, urban ecology, or forest ecology.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

Program Requirements

- Students study full-time, taking all required courses in each given session. An FZ (fail) in any one course, or a B– grade in two studio courses or in any three courses normally results in a recommendation to the School of Graduate Studies to terminate the student's registration in the degree program.
- There is no additional language requirement other than proficiency in English on admission. Writing support is integrated into the program to develop specialized skills that are essential to effective learning and communication in the design fields.
- Progress in the program is dependent upon satisfactory completion of studio and required core courses in sequence. Exceptions can be made at the discretion of the Program Director, and in consultation with the Office of the Registrar and Student Services in the case of accessibility.
- **Coursework.** Students must complete a total of **10.5 full-course equivalents (FCEs)** as follows:
  - 9.5 FCEs in core courses as follows:
    - 2.0 FCEs: Design Studio
    - 1.0 FCE: Design Studio Options
    - 1.5 FCEs: Design Studio Thesis
    - 1.0 FCE: Visual Communication
    - 0.5 FCE: History, Theory, Criticism
    - 1.0 FCE: Technology
    - 1.5 FCEs: Environment
    - 1.0 FCE: Professional Practice and Research Methods
  - 1.0 elective FCE.

Program Length

4 sessions full-time (typical registration sequence: F/W/F/W)

Time Limit

3 years full-time

MLA Program (1-Year: Post-Professional Advanced-Standing Option)

The 1-year option within the MLA program is ideal for those who wish to undertake a graduate-level, academic research project, independent of the pathway to professional licensure. Those who wish to become a licensed Landscape Architect should consider the 2- or 3-year program options above.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Architecture, Landscape, and Design's additional admission requirements stated below.
- A post-professional advanced-standing option is available for students who are interested in pursuing advanced study beyond their professional degree.
- Applicants must have completed all requirements for an accredited professional degree from a recognized university.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- The post-professional advanced-standing option does not grant a professionally accredited degree.

Program Requirements

- Students study full-time, taking all required courses in each given session. An FZ (fail) in any one course, or a B– grade in two studio courses or in any three courses normally results in a recommendation to the School of Graduate Studies to terminate the student's registration in the degree program.
- There is no additional language requirement other than proficiency in English on admission. Writing support is integrated into the program to develop specialized skills that are essential to effective learning and communication in the design fields.
- Progress in the program is dependent upon satisfactory completion of studio and required core courses in sequence. Exceptions can be made at the discretion of the Program Director, and in consultation with the Office of the Registrar and Student Services in the case of accessibility.
- Each student’s program of study must receive the approval of the Program Director and, in general, shall consist of a research or design project on which a thesis must be submitted. Faculty members have research expertise in the following areas of interest, which students may pursue: Computation and Fabrication; Health and Society; and Sustainability and Environment.
- **Coursework.** Students must complete a total of **6.0 full-course equivalents (FCEs)** as follows:
  - 4.0 FCEs in core courses:
    - 0.5 FCE: ALA4010H *Field Course*
    - 0.5 FCE: ALA4020H *Thesis Preparation*
    - 1.0 FCE: ALA4021Y *Thesis I*
    - 1.5 FCE: ALA4022Y *Thesis II*
    - 0.5 FCE: ALA4030H *Colloquium*
  - 2.0 elective FCEs, of which 1.0 FCE must be in the student's area of interest.

Program Length

2 sessions full-time (typical registration sequence: F/W)

Time Limit

3 years full-time

Architecture, Landscape, and Design: Landscape Architecture MLA Courses

Not all electives are offered every year. Please check the timetable for current listings available.

Core Courses

Design Studio

LAN1011Y	Design Studio 1
LAN1012Y	Design Studio 2
LAN2013Y	Design Studio 3 (prerequisite: LAN1012Y)
LAN2014Y	Design Studio 4
LAN3016Y **or**	Landscape Design Studio Research (exclusions: ARC3020Y, URD2013Y) **or**
URD2013Y **or**	Urban Design Studio Research (prerequisites: URD1011Y, URD1012Y; exclusions: ARC3015Y, LAN3016Y) **or**
ARC3020Y	Design Studio Research 1 (prerequisite: ARC2014Y; exclusions: ARC3016Y, LAN3016Y, URD2013Y)
LAN3017Y	Design Studio Thesis

Environment

LAN1041H	Field Studies 1
LAN1043H	Field Studies 2
LAN2045H	Landscape Ecology I
LAN2046H	Landscape Ecology II (prerequisite: LAN2045H)
LAN2047H	Landscape Hydrology I
LAN2048H	Landscape Hydrology II (prerequisite: LAN2047H)

History, Theory, Criticism

LAN1031H	History, Theory, Criticism 1
LAN1032H	History, Theory, Criticism 2
LAN1037H	Plants and Design I
LAN1038H	Plants and Design II (prerequisite: LAN1037H)
LAN2037H	Contemporary Landscape Theory

Post Professional

ALA4010H	Field Course
ALA4020H	Thesis Preparation
ALA4021Y	Thesis I (prerequisite: ALA4020H)
ALA4022Y	Thesis II (prerequisite: ALA4021Y)
ALA4030H	Colloquium (prerequisites: ALA4010H and ALA4020H; exclusion: ALD4030H)

Proseminar

LAN3051H	Landscape Architecture Research Methods
LAN3052H	Professional Practice

Technology

LAN1047H	Site Engineering I
LAN1048H	Site Engineering II
LAN2042H	Landscape Materials, Assemblies, Techniques
LAN3045H	Advanced Site Technologies

Visual Communication

LAN1021H	Visual Communication 1
LAN1022H	Visual Communication 2
LAN2023H	Intermediate Visual Communication
LAN3025H	Advanced Visual Communication

Elective Courses

Design

LAN3200H to LAN3210H	Landscape Architecture Topics: Design

Environment

LAN3300H to LAN3310H	Landscape Architecture Topics: Environment
LAN3500H to LAN3510H	Landscape Architecture Topics: Plants

History, Theory, Criticism

LAN3039H	Independent Study
LAN3700H to LAN3710H	Landscape Architecture Topics: Society
LAN3900H to LAN3910H	Landscape Architecture Topics: History, Theory, Criticism

Proseminar

LAN3600H to LAN3610H	Landscape Architecture Topics: Practice

Technology

LAN3400H to LAN3410H	Landscape Architecture Topics: Techniques
LAN3800H to LAN3810H	Landscape Architecture Topics: Technology

Visual Communication

LAN3100H to LAN3110H	Landscape Architecture Topics: Communication

Architecture, Landscape, and Design: Urban Design MUD

Master of Urban Design

Program Description

The Master of Urban Design (MUD) is a post-professional program that prepares architects and landscape architects for design-based research and professional practice at the urban and regional scales. The MUD program is committed to design as a primary medium of operation and research in a broad intellectual framework that includes geography, environmental studies, social sciences, media studies, economics, and engineering. It aims for responsible and creative design in the context of contemporary city and region building, with attention to new paradigms of urbanization, global economic restructuring, and information technology. The program emphasizes a coherent intellectual approach that is committed to analysis and critique and seeks to become the central Canadian forum for advanced research, design innovation, scholarship, criticism, and debate in urban design.

MUD Program (2-Year)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Architecture, Landscape, and Design's additional admission requirements stated below.
- A professional degree in architecture (BArch or MArch) or landscape architecture (BLA, MLA). Applicants with a degree in urban planning (MCP, MUP, or MScPl) may be considered for admission if they are able to demonstrate design potential in their application portfolio. Applicants may be required to complete design and/or visual communication workshops before they begin the MUD program, to prepare them for the design studio component of the MUD curriculum.
- All applicants must submit a portfolio of design work for review. Admission is based on the merits of the applicant's overall academic background and strength of design portfolio as evaluated by the admissions committee.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

Program Requirements

- Students study full-time, taking all required courses in each given session. An FZ (fail) in any one course, or a B– grade in two studio courses or in any three courses normally results in a recommendation to the School of Graduate Studies to terminate the student's candidacy for the degree program.
- There is no additional language requirement other than proficiency in English on admission. Writing support is integrated into the program to develop specialized skills that are essential to effective learning and communication in the design fields.
- Progress in the program is dependent upon satisfactory completion of studio and required core courses in sequence. Exceptions can be made at the discretion of the Program Director, and in consultation with the Office of the Registrar and Student Services in the case of accessibility.
- **Coursework.** Students must complete a total of **10.0 full-course equivalents (FCEs)** as follows:
  - 7.5 FCEs in core courses:
    - 1.0 FCE: Design Studio
    - 2.0 FCEs: Option Design Studio
    - 0.5 FCE: Thesis Preparation and Research
    - 1.5 FCEs: Design Thesis
    - 1.0 FCE: History, Theory, Criticism
    - 1.5 FCEs: other courses
  - 2.5 elective FCEs, of which 1.5 FCEs must be selected from offerings in the History, Theory, Criticism category.

Program Length

4 sessions full-time (typical registration sequence: F/W/F/W)

Time Limit

3 years full-time

Architecture, Landscape, and Design: Urban Design MUD Courses

Not all electives are offered every year. Please check the timetable for current listings available.

Core Courses

Design

URD1011Y	Urban Design Studio
URD1012Y	Urban Design Studio Options
URD2012Y	Independent Studio in Urban Design (may be undertaken in lieu of an option studio)
URD2013Y **or** LAN3016Y **or** ARC3020Y	Urban Design Studio Research (prerequisites: URD1011Y, URD1012Y; exclusions: ARC3015Y, LAN3016Y) **or** Landscape Design Studio Research (exclusions: ARC3020Y, URD2013Y) **or** Design Studio Research 1 (prerequisite: ARC2014Y; exclusions: ARC3016Y, LAN3016Y, URD2013Y)
URD2015Y	Urban Design Studio Thesis

History, Theory, Criticism

URD1031H	The History of Toronto Urban Form
URD1041H	Introduction to Urban Design Theory

Other

URD1021H	Urban Design Visual Communications
URD1044H	Urban Design and Development
URD2014H	Thesis Research and Preparation
URD2041H	Business and Land Use Planning in Real Estate Development

Elective Courses

History, Theory, Criticism

URD1200H to URD1225H	Selected Topics in History and Theory of Urban Design
URD1500H to URD1525H	Selected Topics in Urban Design

Other

URD1022H	Topics in Computer-Aided Urban Design
URD1042H	Urban Design and Environmental Systems
URD1300H	Selected Topics in Digital Urbanism

Architecture, Landscape, and Design: Visual Studies MVS

Master of Visual Studies

Program Description

The Master of Visual Studies (MVS) is a two-year, full-time professional program with two fields:

- Curatorial Studies: prepares students for contemporary curatorial practice in the visual arts.
- Studio: prepares students to further their visual art practice.

The program normally begins in September.

Field: Curatorial Studies

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Architecture, Landscape, and Design's additional admission requirements stated below.
- An appropriate bachelor's degree with significant coursework in humanities and cultural theory from a recognized university, or an appropriate BFA degree from a recognized university.
- Overall average of at least a B+.
- Applications must include:
  - artist's statement that includes a description of the proposed body of work in curatorial to be undertaken during the two-year program;

  - full curriculum vitae (CV) with details of exhibition, professional activity, and education;
  - documentation of recent curatorial work;
  - three letters of recommendation;
  - a critical writing sample;
  - transcripts;
  - a portfolio of previous work dependent on the field of future study.
- Applicants must present a portfolio with documentation of exhibitions including exhibition brochures, curatorial essays, announcement cards, and/or catalogues from curatorial work.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

Program Requirements

- **Coursework.** Students must complete a total of **6.0 full-course equivalents (FCEs)** as follows:
  - 4.5 FCEs from the approved course list for curatorial studies
  - 1.5 FCEs in electives. Elective courses are selected in consultation with the student's advisor and are subject to the approval of the Program Director.
- The **internship** requirement is normally completed during the Summer session between Year 1 and Year 2.
- MVS Curatorial Studies students are supervised by an **Advisory Panel** made up of the Director of the Visual Studies program (or their designate), a graduate faculty member who will be considered to be the student's Principal Advisor, one of the University of Toronto's gallery directors, and an external reader chosen upon approval of the Principle Advisor and Program Director.
- The graduating **thesis project** is composed of an exhibition and a qualifying paper.
- **MVS Proseminar**, a non-credit course.
- An FZ (fail) in any one course or a B– grade in any two courses normally results in a recommendation to the School of Graduate Studies to terminate the student’s registration in the degree program.

Program Length

5 sessions full-time (typical registration sequence: F/W/S/F/W)

Time Limit

3 years full-time

Field: Studio

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Architecture, Landscape, and Design's additional admission requirements stated below.
- An appropriate bachelor's degree with significant coursework in humanities and cultural theory from a recognized university, or an appropriate BFA degree from a recognized university.
- Overall average of at least a B+.
- Applications must include:
  - artist's statement that includes a description of the proposed body of work in studio to be undertaken during the two-year program;
  - full curriculum vitae (CV) with details of exhibition, professional activity, and education;
  - documentation of recent studio work;
  - three letters of recommendation;
  - a critical writing sample;
  - transcripts;
  - a portfolio of previous work dependent on the field of future study.
- Applicants must present a portfolio with documentation of their artworks. Applicants will also include a fully annotated listing for all portfolio materials that provides detailed information about media, year of production, dimensions, part of a series, full running length (in the case of media artworks), and circumstances of display (in the case of installation works and performance works).
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

Program Requirements

- **Coursework.** Students must complete a total of **6.0 full-course equivalents (FCEs)** as follows:
  - 4.5 FCEs from the approved course list for curatorial studies
  - 1.5 FCEs in electives. Elective courses are selected in consultation with the student's advisor and are subject to the approval of the Program Director.
- The **internship** requirement is normally completed during the Summer session between Year 1 and Year 2.
- MVS Studio students are supervised by an **Advisory Panel** made up of the Director of the Visual Studies program (or designate), a studio faculty member of the MVS program who is considered the student's Principal Advisor, a second MVS studio faculty member, and another faculty member (not necessarily a member of the MVS program). The Final Studio Thesis defence requires an external reader chosen upon approval of the Principal Advisor and Program Director.
- The graduating **thesis project** is composed of an exhibition and a qualifying paper.
- **MVS Proseminar**, a non-credit course.
- An FZ (fail) in any one course or a B– grade in any two courses normally results in a recommendation to the School of Graduate Studies to terminate the student’s registration in the degree program.

Program Length

5 sessions full-time (typical registration sequence: F/W/S/F/W)

Time Limit

3 years full-time

Architecture, Landscape, and Design: Visual Studies MVS Courses

MVS Curatorial Studies Courses

VIS1000Y	MVS Proseminar
VIS1004H	Internship

Degree Programs

Art History

MA and PhD

- Fields:
  - Ancient;
  - Medieval;
  - Early Modern;
  - Modern and Contemporary

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Book History and Print Culture
  - Art History, MA, PhD
- Diaspora and Transnational Studies
  - Art History, MA, PhD
- Jewish Studies
  - Art History, MA, PhD
- Mediterranean Archaeology
  - Art History, PhD
- Sexual Diversity Studies
  - Art History, MA, PhD

Overview

The Department of Art History's graduate programs emphasize the research, writing, and teaching necessary to pursue a career in academia or museum work. The programs benefit from affiliations at the University with the Centre for Medieval Studies and the Centre for Renaissance and Reformation Studies, as well as resources in Toronto including the Royal Ontario Museum, the Art Gallery of Ontario, the Aga Khan Museum, and the Gardiner Museum.

Art History: Art History MA

Master of Arts

Program Description

The MA program is a course-based and research-intensive degree designed to prepare art history students for doctoral research, curatorial work, art consultation, heritage programs, cultural journalism, and secondary school teaching.

The MA program can be taken on a full-time or part-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Art History's additional admission requirements stated below.
- Strong overall grade average in art history and closely related subjects and at least a B+ average in recent senior art history courses. Outstanding applicants with other backgrounds may be considered.

Program Requirements

- **Coursework.** Students must successfully complete a total of **3.0 graduate full-course equivalents (FCEs)** as follows:
  - Coursework must be chosen from at least three of four fields: 1) Ancient, 2) Medieval, 3) Early Modern, 4) Modern and Contemporary. No more than 2.0 FCEs may be taken in any one of the four fields.
  - Coursework must also be taken in at least two geographic zones (Western, East Asian, South Asian, African, etc.). Courses without a specific regional focus may count toward the geographical distribution requirement if the student's final paper is on an appropriate topic.
  - The equivalent of 1.0 FCE may be taken in another graduate department (e.g., Medieval Studies, Near and Middle Eastern Civilizations), subject to approval of the Department of Art History and the other department concerned.
- Reading knowledge of a language other than English (normally French, German, Italian, Arabic, or Chinese); tested in the first session.
- *Orientation to Art Historical Research Methods*, a workshop led by the Department of Art History's librarian, normally taken in Year 1.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Art History: Art History PhD

Doctor of Philosophy

Program Description

The PhD program is designed to prepare art history students for college and university teaching, museum curatorships, and other research positions.

Applicants may enter the PhD program via one of two routes: 1) following completion of an appropriate master's degree or 2) direct entry after completing a bachelor's degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Art History's additional admission requirements stated below.
- Minimum A– average in their master's program.
- Reading knowledge of two foreign languages relevant to the student's research.
- Students unable to meet language requirements for particular courses may be refused admission to courses; enrolment in Fall courses is limited and subject to instructor's approval.

Program Requirements

- **Coursework**. Students must successfully complete a total of **3.0 full-course equivalents (FCEs)** of graduate courses as follows:
  - FAH5000Y *Comprehensive Examinations and Dissertation Topic Reading Course* (1.0 FCE; Credit/No Credit) with the student's interim supervisor to prepare for the comprehensive examinations.
  - FAH1001H *Methods of Art History* (0.5 FCE), a departmental methodology course, must be taken in Year 1. With departmental approval, credit may be given for a research methodology course taken previously.
  - Students are encouraged to take courses reflecting a variety of time periods and geographic zones.
- *Orientation to Art Historical Research Methods*, a workshop for new students, is recommended.
- At the end of each academic year, students' progress will be reviewed to ensure that they have made **satisfactory progress** through the program; this includes maintaining full-time status with a GPA of at least A– and completion of all language requirements.
- Students must pass **examinations in two foreign languages** by the end of Year 2. Students who have completed a language exam during their MA may apply to have the exam counted towards fulfilling one of the two foreign language requirements. The appropriate languages will be set by the interim supervisor in consultation with the Director of Graduate Studies, and additional languages may be required depending on the research needs of the student's dissertation topic.
- Within Years 1 and 2, students complete coursework and language requirements and secure a **prospective supervisor** with whom they will discuss plans for the comprehensive examinations.
- Additionally, within Years 1 and 2, students must take a three-part **comprehensive examination:** 1) the first part focusing on one of the four fields, 2) the second on the student's dissertation field, and 3) the third (oral) discussing the first two.

    - The exam consists of an in-house written section, a take-home essay, and an oral exam.
    - The student will meet with the Examination Committee (normally made up of at least three members of the department, one of whom will be the prospective dissertation supervisor), in order to define the areas of the examination, the length of study, and such readings and special topics as deemed appropriate.
    - If a student fails the comprehensive examinations, one further attempt is allowed, no more than three months later. A second failure results in the immediate removal of the student from the program.
    - Once the student passes the exam, their graduate record will be updated to reflect successful exam completion.
- Immediately following successful completion of comprehensive examinations, students must formally establish their **PhD Supervisory Committee**. This will include the faculty member acting as the dissertation supervisor, and two other graduate faculty members. These arrangements must be approved by the department's Graduate Program Committee.
- Working with the PhD Supervisory Committee, the student will develop a detailed **proposal for their research**, to be submitted 3 months after the successful completion of their comprehensive exam. The length and specific nature of the proposal will be determined by the Supervisory Committee and the PhD student. The drafted proposal must be approved, first by the Supervisory Committee, and then by the Director of Graduate Studies.
- At some point during the dissertation stage, students will present their work to the faculty and students at a colloquium in an appropriate format and at a time to be determined by the supervisor in consultation with the Director of Graduate Studies.
- **Normal timeline through the program:** By the end of Year 1, students should have completed all course requirements for the degree. By the end of the following year of registration, students should satisfy any remaining requirements, select a thesis committee, pass the comprehensive examination, and submit a thesis proposal. Thereafter, the candidate selects a member of the thesis committee to be the thesis supervisor and begins work on their thesis.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Art History's additional admission requirements stated below.
- Applicants with a bachelor's degree who have an exceptionally strong academic record; minimum grade average of A– in art history and humanities courses in the last two years.
- Reading knowledge of two foreign languages relevant to the student's research.
- Students unable to meet language requirements for particular courses may be refused admission to courses; enrolment in Fall courses is limited and subject to instructor's approval.

Program Requirements

- **Coursework**. Students must successfully complete **at least 5.5 full-course equivalents** (FCEs) in art history as follows:
    - FAH5000Y *Comprehensive Examinations and Dissertation Topic Reading Course* (1.0 FCE; Credit/No Credit) must be taken in Year 2 with the student's interim supervisor to prepare for the comprehensive examinations.
    - FAH1001H *Methods of Art History* (0.5 FCE), a departmental methodology course, must be taken in Years 1 and 2. With departmental approval, credit may be given for a research methodology course taken previously.
    - The remaining 4.0 FCEs must be chosen from at least three of the following fields: (1) Ancient, (2) Medieval, (3) Early Modern, 4) Modern and Contemporary. Any course that covers more than one of these time periods may only be used to fulfil one of the FCE distributions.
    - Coursework must be taken in at least two geographic zones (Western, East Asian, South Asian, African, etc.). Courses without a specific regional focus may count toward the geographical distribution requirement if the student's final paper is on an appropriate topic.
- Students must maintain an A– average.
- *Orientation to Art Historical Research Methods*, a workshop led by the Department of Art History's librarian, normally taken in Year 1.
- Students must pass **examinations in two foreign languages** by the end of Year 2. Students focusing on Ancient, Medieval, and Renaissance and Baroque will normally be expected to pass the examination in German as one of their two languages. The appropriate languages will be set by the interim supervisor in consultation with the Director of Graduate Studies, and additional languages may be required depending on the research needs of the student's dissertation topic. Language requirements must be completed prior to approval of the dissertation proposal.
- At the beginning of Year 3, students' progress will be reviewed to ensure that they have made **satisfactory progress** through the program; this includes maintaining full-time status with a GPA of at least A– and completion of all language requirements.
- Within the first three years, students must take a **three-part comprehensive examination**: 1) the first part focusing on one of the four fields, 2) the second on the dissertation field, and 3) the third (oral) discussing the first two.
    - The exam consists of an in-house written section, a take-home essay, and an oral exam.
    - Upon the completion of all coursework, PhD students must seek out and secure the participation of a **prospective supervisor** with whom they will discuss plans for the comprehensive examinations.

    - The student will meet with the Examination Committee (normally made up of at least three members of the department, one of whom will be the prospective dissertation supervisor) in order to define the areas of the examination, the length of study, and such readings and special topics as deemed appropriate.
    - If a student fails the comprehensive examinations, one further attempt is allowed, no more than three months later. A second failure results in the immediate removal of the student from the program.
    - Once the student passes the exam, their graduate record will be updated to reflect successful exam completion.
- Immediately following successful completion of comprehensive examinations, students must formally establish their **PhD Supervisory Committee**. This will include the faculty member acting as the dissertation supervisor, and two other graduate faculty members. These arrangements must be approved by the department's Graduate Program Committee.
- Working with the PhD Supervisory Committee, the student will develop a detailed **proposal for their research**, to be submitted 3 months after the successful completion of their comprehensive exam. The length and specific nature of the proposal will be determined by the Supervisory Committee and the PhD student. The drafted proposal must be approved, first by the Supervisory Committee, and then by the department's Director of Graduate Studies.
- At some point during the dissertation stage, students will present their work to the faculty and students at a colloquium in an appropriate format and at a time to be determined by the supervisor in consultation with the Director of Graduate Studies.
- **Normal timeline through the program:** By the end of Year 2, students should have completed all course requirements for the degree. By the end of the following year of registration, students should satisfy any remaining requirements, select a thesis committee, pass the comprehensive examination, and submit a thesis proposal. Thereafter, the candidate selects a member of the thesis committee to be the thesis supervisor and begins work on their thesis.

Not all courses are offered each year. Check the departmental website for course availability under the current timetable.

Methods

FAH1001H	Methods of Art History

Ancient

FAH2018H	Art and the Aegean Bronze Age: Contemporary Perspectives
FAH2021H	Myth and Fantasy in Roman Painting
FAH2023H	Mind and Materiality: Views from Art History and Archaeology
FAH2025H	Visual Narrative and Time in Ancient Greek and Roman Art
FAH2027H	Women and Gender in Ancient Greece
FAH2028H	Art and the Philosophy of Time
FAH2029H	The Art of Perception
FAH2034H	Topics in Roman Imperial Art
FAH2037H	Empathy, Embodiment, and Emotion in Ancient Art
FAH2038H	Greek and Roman Sculpture in the Royal Ontario Museum
FAH2060H	Artisans and Artists in the Ancient Mediterranean

Medieval

FAH1114H	Multicultural Arts of Medieval Sicily
FAH1118H	The Medieval Treasury
FAH1119H	Global Medieval Art in China
FAH1121H	12th-Century Renaissance?
FAH1125H	Medieval Pilgrimage Art and Architecture
FAH1127H	Early Medieval Art
FAH1175H	Early Islamic Architecture: 7th–10th c.
FAH1176H	History of Islamic Cairo (7th–16th c.)
FAH1177H	Building the Islamic Empire: Architecture of the Umayyads

Early Modern

FAH1202H	Correggio and the Problem of Italian Renaissance Art
FAH1204H	The Cassinese Art of Reform in Renaissance Italy
FAH1205H	Early Modern Intermediality
FAH1206H	Artistic Localities in the Early Modern World
FAH1207H	Formalism and Its Objects
FAH1221H	Inside the Painter's Studio
FAH1229H	Architecture of the Global Renaissance

FAH1231H	Northern European Sculpture 1400–1600
FAH1232H	Liquescent Art and Cultures
FAH1249H	Margaret of Austria and the Renaissance in the Netherlands
FAH1299H	Heinrich Wölfflin's Principles of Art History (1915) @ 100: A Worldwide Reception History

Modern and Contemporary

FAH1410H	Artwriting, Past and Present
FAH1411H	Art and Analogy
FAH1457H	Vernacular Photography
FAH1458H	Viewing History: The Visual Experience of the Past, 1750–1900
FAH1463H	Realisms
FAH1464H	The Recalcitrant Icon
FAH1471H	The Aesthetics of Democracy
FAH1475H	Picasso in View of Nanette
FAH1476H	Surrealism and Art
FAH1482H	The Time of Art History
FAH1486H	Bloomsbury and Vorticism
FAH1488H	The Nature of Landscape
FAH1489H	Re: Vision (Comparative Histories of the Senses)
FAH1495H	Art, Empire, Colonization
FAH1500H	Augmented Reality Art
FAH1755H	Architecture and the Project of Industrial Modernity
FAH1756H	Acoustic Space
FAH1757H	Animal Images
FAH1758H	What Images Do: Approaches From South Asia
FAH1759H	Modern Architecture and Its Representations
FAH1801H	Portraiture in Canada: 1750–1870
FAH1920H	Primitivism to Globalism: Theories of Otherness in Modern and Contemporary Arts
FAH1921H	GeoAesthetics
FAH1922H	Contemporary Art and Ethnography: Renewed Exchanges
FAH1934H	Cosmopolitan/Comparative Modernisms
FAH1935H	Contemporary Art Practices and the Modernist Archive
FAH1936H	The Retro-Modern and the Time of the Contemporary
FAH1940H	Photography and Humour
FAH1951H	Contemporary Chinese Art and its Discontents
FAH1960H	Indigenous Art, Land, and Material Relations in the Great Lakes
FAH1961H	Art and Activism

Reading Courses

FAH3000H	Special Studies in History of Art (only 1.0 FCE with this prefix is permitted in any one degree program)
FAH3011H	Readings in Ancient Art
FAH3012H	Readings in Medieval Art
FAH3013H	Readings in Renaissance and Baroque Art
FAH3014H	Readings in Modern and Contemporary Art
FAH5000Y	Comprehensive Examinations and Dissertation Topic Reading Course

Undergraduate/Graduate Courses

Periodically, the department may offer fourth-year undergraduate courses that have been recognized for graduate credit. Please visit the departmental website and discuss with the Graduate Coordinator.

Relevant Courses in Other Departments

EAS1229H	Topics in Chinese Aesthetics
EAS1339H	Topics in Chinese Art Theories
MSL2240H	The Photographic Record

Astronomy and Astrophysics: Introduction

Faculty Affiliation

Arts and Science

Degree Programs

Astronomy and Astrophysics

MSc
PhD

Overview

The David A. Dunlap Department of Astronomy and Astrophysics is actively engaged in a wide range of observational and theoretical research on solar system dynamics, stars, stellar systems, the interstellar medium, the Galaxy, galaxies, quasars, clusters of galaxies, cosmology, and problems in general relativity. The department has close ties with the Canadian Institute for Theoretical Astrophysics (CITA) and the Dunlap Institute for Astronomy and Astrophysics (Dunlap). These ties provide great flexibility to students with a broad array of interests, giving them the option to work with a supervisor from one of these sibling units, and further enhance the opportunities for students to interact with leading researchers.

Faculty and students use the major optical, radio, and satellite observing facilities of the world. Of particular importance are the national facilities: the Canada France-Hawaii optical telescope, the James Clerk Maxwell radio telescope, and the Gemini telescopes located at the world's finest observing sites.

The department has an active experimental program using telescopes on long-duration stratospheric balloons and a complementary program designing and building instrumentation for large optical telescopes, and for cosmological and Galactic research.

There are approximately 100 faculty, postdoctoral fellows, graduate students, and staff in the Department of Astronomy and Astrophysics, CITA, and Dunlap. Students benefit from direct interactions with the broad range of external speakers invited to weekly seminar programs and colloquia.

Astronomy and Astrophysics: Astronomy and Astrophysics MSc

Master of Science

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Astronomy and Astrophysics' additional admission requirements stated below.
- Applicants must hold an appropriate bachelor's degree with high academic standing from a recognized university.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- Because many universities do not offer extensive undergraduate training in astronomy and astrophysics, preparation in physics and mathematics is an acceptable background.

Program Requirements

- **Coursework.** Students must successfully complete **2.0 required full-course equivalents (FCEs)**: AST1501Y and AST1500Y, with different supervisors. Students are immediately engaged in original research throughout these two required research courses. An oral exam by committee is held for each. AST1501Y is normally completed during the Fall/Winter of Year 1, and AST1500Y is completed in the following Summer session.
- Students must complete a minimum of **1.5 FCEs (three half courses)** from the AST preparatory, elective, or specialized courses. More courses may be taken for credit or audited as appropriate.
- Students are expected to attend the weekly general colloquium conducted by the department.
- **Residence.** Students are normally expected to be on campus full-time for the duration of the program.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

Astronomy and Astrophysics: Astronomy and Astrophysics PhD

Doctor of Philosophy

Program Description

The Department of Astronomy and Astrophysics offers dynamic and competitive doctoral programs which emphasize research.

Students may be accepted into the PhD program via one of two routes: 1) following completion of an appropriate master's degree or 2) direct entry following completion of a bachelor's degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Astronomy and Astrophysics' additional admission requirements stated below.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- Applicants may be accepted into the PhD program following completion of an MSc degree in Astronomy and Astrophysics from the University of Toronto, or an MSc degree in another appropriate discipline or from elsewhere deemed equivalent, with an average of at least B+ or demonstrated comparable research competence.

Program Requirements

- There is no minimum course requirement in the four-year program except for **courses** deemed necessary by the student's PhD supervisory or qualifying examination committees.
- Students register in the **AST4000Y *Research* course series** (in sequence of the last digit: 2, 3, etc.) beginning in the Summer session of Year 1 and continue through the sequence through Year 4. The first registration, AST4002Y, corresponds to the qualifying examinations. The series continues with registration each Fall/Winter, starting with AST4003Y and is incremented by one digit each subsequent academic year. This registration is tied to thesis research progress, which is assessed based on the two required annual PhD supervisory committee meetings in October and April.
- Students must successfully complete the two parts of the **PhD qualifying examinations**: literature-based and thesis proposal. Both are oral examinations conducted by a panel of faculty members.

    - The **literature-based section** evaluates the student's mastery of general astronomy and astrophysics and ability to apply that knowledge to understand relevant research literature.
    - The **thesis proposal section** evaluates the feasibility and value of the proposed thesis and verifies that the student has sufficient preparation in the relevant research area. It is based in part on a written summary of the proposed thesis provided by the student to the examiners.
      The literature qualifying examinations are taken in parallel with the corresponding graduate course offering, with completion of the four sections by the end of Year 1. The thesis proposal examination is taken in the Summer session of Year 1. Students who fail at the first attempt have the opportunity to retake the examinations once, by the deadline of January 31 of Year 2.
- A **thesis** embodying the results of original research, which must be submitted for appraisal in accordance with the regulations of the School of Graduate Studies.
- Students are expected to attend the **weekly general colloquium** conducted by the department.
- **Residence.** Students are normally expected to be on campus full-time for the duration of the program.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Astronomy and Astrophysics' additional admission requirements stated below.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- Students are accepted into the PhD program following completion of a bachelor's degree, with an average in the final two years equivalent to a University of Toronto A– or better from a recognized university.
- Because many universities do not offer extensive undergraduate training in astronomy and astrophysics, preparation in physics and mathematics is an acceptable background.

Program Requirements

- **Coursework.** Students must successfully complete **2.0 full-course equivalents (FCEs)**: AST1500Y and AST1501Y, with different supervisors. Students are immediately engaged in original research throughout these two required research courses. AST1501Y is normally completed during the Fall/Winter of Year 1, and AST1500Y is completed in the following Summer session. An oral exam by committee is held for each.
- Students must complete a minimum of **2.5 FCEs (five half courses)** from the AST preparatory, elective, or specialized courses. Students may petition the associate chair, graduate to include courses offered by a cognate department at the equivalent level. (A maximum of 1.0 FCE may be substituted.) More courses may be taken for credit or audited as appropriate.
- Students register in the **AST4000Y *Research* course series** (in sequence of the last digit: 2, 3, etc,) beginning in the Summer session of Year 2 and continue the sequence through Year 5. The first registration, AST4002Y, corresponds to the qualifying examinations. The series continues with registration each Fall/Winter, starting with AST4003Y and is incremented by one digit each subsequent academic year. This registration is tied to thesis research progress, which is assessed based on the two required annual PhD supervisory committee meetings in October and April.
- Students must successfully complete the two parts of the **PhD qualifying examinations**: literature-based and thesis proposal. Both are oral examinations conducted by a panel of faculty members.
    - The **literature-based section** evaluates the student's mastery of general astronomy and astrophysics and ability to apply that knowledge to understand relevant research literature.
    - The **thesis proposal section** evaluates the feasibility and value of the proposed thesis and verifies that the student has sufficient preparation in the relevant research area. It is based in part on a written summary of the proposed thesis provided by the student to the examiners.
      The literature qualifying examinations are taken in parallel with the corresponding graduate course offering, with completion of the four sections by the end of Year 2. The thesis proposal examination is taken in the Summer session of Year 2. Students who fail at the first attempt have the opportunity to retake the examinations once, by the deadline of January 31 of Year 3.
- A **thesis** embodying the results of original research, which must be submitted for appraisal in accordance with the regulations of the School of Graduate Studies.
- Students are expected to attend the **weekly general colloquium** conducted by the department.
- **Residence.** Students are normally expected to be on campus full-time for the duration of the program.

Astronomy and Astrophysics: Astronomy and Astrophysics MSc, PhD Courses

Preparatory Courses

AST1410H	Stars
AST1420H	Galactic Structure and Dynamics
AST1430H	Cosmology
AST1440H	Radiation Processes and Gas Dynamics

Research Courses

AST1500Y+	Directed Research
AST1501Y	Introduction to Research
AST4000Y+	Research (students register in this 4000Y series each year, beginning in Year 2, in sequence of the last digit: 2, 3, etc.)
AST4002Y+	Research
AST4003Y+	Research
AST4004Y+	Research
AST4005Y+	Research
AST4006Y+	Research

+ *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Elective Courses

AST2010H	Physics of Stellar Atmospheres
AST2020H	Physics of Stellar Interiors
AST2030H	Interstellar Medium and Star Formation
AST2040H	Extragalactic Astronomy
AST2050H	Observational Techniques

Specialized Courses

AST3011H	Advanced Topics in Stellar and Galactic Astronomy II
AST3020H	Advanced Topics in Interstellar Matter and Star Formation I
AST3021H	Advanced Topics in Interstellar Matter and Star Formation II
AST3030H	Advanced Topics in Extragalactic Astronomy and Cosmology I
AST3031H	Advanced Topics in Extragalactic Astronomy and Cosmology II
AST3050Y	Theoretical Cosmology
AST3100H	Lecture Series in Specialized Topics (mini courses)
AST3101H (0.25 FCE)	Specialized Topics in Astronomy and Astrophysics

Biochemistry

MSc and PhD

Combined Degree Programs

STG, MD / PhD

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Biomedical Engineering
  - Biochemistry, MSc, PhD
- Developmental Biology
  - Biochemistry, MSc, PhD
- Genome Biology and Bioinformatics
  - Biochemistry, PhD
- Neuroscience
  - Biochemistry, MSc, PhD

Overview

Biochemistry is the study of the molecular events underlying biological processes. Consequently, it makes fundamental contributions to all disciplines concerned with living systems.

The Department of Biochemistry offers modern facilities for research in a wide variety of areas including the relationship between structure and biological function in proteins, nucleic acids, and lipids as well as complex multicomponent systems such as membranes and subcellular organelles.

Biochemistry: Biochemistry MSc

Master of Science

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Biochemistry's additional admission requirements stated below.
- Normally, a minimum B+ average in the last two years of study in an honours or specialist BSc program in biochemistry or molecular biology. Applicants with strong academic credentials in honours or specialist programs in disciplines related to biochemistry or molecular biology are also considered.
- Applicants arrange for personal reference forms from three individuals familiar with their academic performance.
- Applicants who obtained a degree outside Canada or the United States are generally required to have an MSc degree in Biochemistry or in a closely related subject area.
- Applicants who obtained a degree outside Canada must arrange for general Graduate Record Examination (GRE) results to be sent to the department.
- Applicants whose primary language is not English and who graduated from a non-Canadian university where the language of instruction was not English must provide Test of English as a Foreign Language (TOEFL) and Test of Written English (TWE) scores:
  - paper-based TOEFL: minimum 580 score and 5 on the TWE
  - Internet-based TOEFL: minimum 93/120 score and 22/30 on the writing and speaking sections.
- In the absence of TOEFL results, an International English Language Testing System (IELTS) score of at least 7.0 is also acceptable.

Program Requirements

Students must complete any courses that were a condition of acceptance.

- **Coursework.** Students must successfully complete a total of **1.5 full-course equivalents** (FCEs) as follows:
  - BCH2020Y[0] *Seminar Course in Biochemistry Level 1* (1.0 FCE)
  - BCH2101H *Scientific Skills for Biochemists* (0.25 FCE)
  - at least 0.25 elective FCE.
- Students must submit a **thesis** (RST9999Y; Credit/No Credit) and successfully complete an **oral examination** on their research and related aspects of biochemistry.
- Normally, MSc students are expected to participate as full-time students and to maintain full-time status in their laboratories until thesis completion and final defence.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)**

Time Limit

3 years full-time

[0] Course that may continue over a program. The course is graded when completed.

*** Students may begin the program in the Fall or Winter.*

Biochemistry: Biochemistry PhD

Doctor of Philosophy

Students are accepted into the PhD program via one of three routes: 1) following completion of an MSc degree in biochemistry or a cognate discipline; 2) transfer (reclassification) from the University of Toronto MSc program; or 3) following completion of a BSc degree (direct entry) if, in the opinion of the Biochemistry Graduate Committee, the student has an outstanding academic record.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Biochemistry's additional admission requirements stated below.
- Applicants must arrange for personal reference forms from three individuals familiar with their academic performance.
- Applicants are generally required to have an MSc degree in biochemistry or in a closely related subject area with high academic standing.
- Applicants who obtained a degree outside of Canada must arrange for General Record Examination (GRE) results to be sent to the department.
- Applicants whose primary language is not English and who graduated from a non-Canadian university where the language of instruction was not English must provide Test of English as a Foreign Language (TOEFL) and Test of Written English (TWE) scores:
  - paper-based TOEFL: minimum 580 score and 5 on the TWE
  - Internet-based TOEFL: minimum 93/120 score and 22/30 on the writing and speaking sections.
- In the absence of TOEFL results, an International English Language Testing System (IELTS) score of at least 7.0 is also acceptable.

Program Requirements

Students must complete any courses that were a condition of acceptance.

- **Coursework.** Students must successfully complete a total of **2.0 full-course equivalents (FCEs)** as follows:
  - BCH2022Y[0] *Seminar Course in Biochemistry Level 2* (1.0 FCE)
  - BCH2101H *Scientific Skills for Biochemists* (0.25 FCE). If previously taken students must take a substitute 0.25 FCE course approved by the graduate coordinator.
  - 0.75 elective FCE.
- Students must successfully complete a **qualifying examination** within the first 24 months (ideally 18 months) of the program. To be eligible to write this qualifying examination, students must:
  - complete BCH2101H
  - be concurrently registered in BCH2022Y[0]
  - complete at least 0.25 elective FCE; after completing the qualifying examination, students must complete the remaining 0.5 elective FCE.
- Submit a **thesis** (RST9999Y; Credit/No Credit) and defend it at the **Doctoral Final Oral Examination**.
- Normally, PhD students are expected to participate as full-time students and to maintain full-time status in their laboratories until thesis completion and final defence.

Program Length

4 years full-time

Time Limit

6 years full-time

[0] Course that may continue over a program. Credit is given when the course is completed.

PhD Program (Transfer)

Transfer Requirements

- Transfer applicants must be enrolled in the MSc program in Biochemistry. Excellent students with high academic standing, who have clearly demonstrated the ability to do research at the doctoral level, may be considered for transfer to the PhD program. Recommendation by the student's supervisory committee is required.
- Transfer applicants must successfully complete a **reclassification (transfer) examination** within 18 to 24 months of starting the program.

Program Requirements

Students must complete any courses that were a condition of acceptance.

- **Coursework.** Students must successfully complete a total of **3.5 full-course equivalents (FCEs)** as follows:
  - BCH2020Y[0] *Seminar Course in Biochemistry Level 1* (1.0 FCE)
  - BCH2022Y[0] *Seminar Course in Biochemistry Level 2* (1.0 FCE)
  - BCH2101H *Scientific Skills for Biochemists* (0.25 FCE)
  - 1.25 elective FCEs.
- To be eligible to write the **reclassification examination**, students must:
  - complete BCH2101H
  - be concurrently registered in BCH2022Y[0]
  - complete at least 0.25 elective FCE; after completing the reclassification examination, students must complete the remaining 1.0 elective FCE.
- Submit a **thesis** (RST9999Y; Credit/No Credit) and defend it at the **Doctoral Final Oral Examination**.
- Normally, PhD students are expected to participate as full-time students and to maintain full-time status in their laboratories until thesis completion and final defence.

Program Length

5 years full-time

Time Limit

7 years full-time

[0] Course that may continue over a program. Credit is given when the course is completed.

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Direct entry is available to highly qualified BSc graduates who completed a Biochemistry specialist program or an appropriate undergraduate program in the life sciences from a recognized university, with a minimum A average in the final two years and relevant research experience.
- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Biochemistry's additional admission requirements stated below.
- Applicants must arrange for personal reference forms from three individuals familiar with their academic performance.
- Applicants who obtained a degree outside Canada or the United States are generally required to have an MSc degree in biochemistry or in a closely related subject area with high academic standing.
- Applicants who obtained a degree outside of Canada must arrange for General Record Examination (GRE) results to be sent to the department.
- Applicants whose primary language is not English and who graduated from a non-Canadian university where the language of instruction was not English must provide Test of English as a Foreign Language (TOEFL) and Test of Written English (TWE) scores:
  - paper-based TOEFL: minimum 580 score and 5 on the TWE
  - Internet-based TOEFL: minimum 93/120 score and 22/30 on the writing and speaking sections.
- In the absence of TOEFL results, an International English Language Testing System (IELTS) score of at least 7.0 is also acceptable.

Program Requirements

Students must complete any courses that were a condition of acceptance.

- **Coursework.** Students must successfully complete a total of **3.5 full-course equivalents (FCEs)** as follows:
  - BCH2020Y[0] *Seminar Course in Biochemistry Level 1* (1.0 FCE)
  - BCH2022Y[0] *Seminar Course in Biochemistry Level 2* (1.0 FCE)
  - BCH2101H *Scientific Skills for Biochemists* (0.25 FCE)
  - 1.25 elective FCEs.
- Students must successfully complete a **qualifying examination** within 18 to 24 months of the program. To be eligible to write this qualifying examination, students must:
  - complete BCH2101H
  - be concurrently registered in BCH2020Y[0]
  - complete at least 0.25 elective FCE; after completing the qualifying exam, students must complete the remaining 1.0 elective FCE.
- Submit a **thesis** (RST9999Y; Credit/No Credit) and defend it at the **Doctoral Final Oral Examination**.
- Normally, PhD students are expected to participate as full-time students and to maintain full-time status in their laboratories until thesis completion and final defence.

JBB2025H	Protein Crystallography — Lectures
JBB2026H	Protein Structure, Folding, and Design
JBL1507H	Biochemistry of Inherited Disease
JNP1017H[+]	Current Topics in Molecular and Biochemical Toxicology
JNP1018H[+]	Molecular and Biochemical Basis of Toxicology
JNR1444Y	Fundamentals of Neuroscience: Cellular and Molecular — Lectures (PSL444Y)[§]

Modular Courses

Each modular course is worth 0.25 full-course equivalent (FCE).

BCH2101H	Scientific Skills for Biochemists
BCH2102H	Biomolecular Dynamics and Function
BCH2103H	Current Topics in Prion Biology
BCH2104H	The Biochemistry of Translational Medicine
BCH2105H	Cystic Fibrosis: The Cause, The Treatment
BCH2106H	Membrane Proteomics in Biomedical Research
BCH2107H	Introduction to Biomolecular Simulations
BCH2109H	Engineering Vaccines: Development to Deployment
BCH2110H	Eukaryotic Signaling

BCH2111H	Post-transcriptional Control of Gene Expression
BCH2112H	From Chaperones to CRISPR-Cas: the Incredible Genius of Phages
BCH2113H	Advances in Precision Medicine
BCH2114H	Frontiers in Drug Discovery
BCH2115H	Applying Modern Evolutionary Thinking to Biochemistry, Cell, and Molecular Biology
BCH2116H	Electron Paramagnetic Resonance Spectroscopy in Modern Life Sciences
BCH2119H	Advances in Epigenetics
BCH2120H	Studies of Tissue Barriers: Regulation of Phenotype and Transport Across the Epithelium and Endothelium
BCH2121H	Lipid Metabolism in Health and Disease: Mechanisms of Diabetic Dyslipidemia in Obesity and Type 2 Diabetes
BCH2122H	The Use of High Content Screening in Biomolecular Medicine
BCH2123H	Protein Structure Prediction and Homology Modelling
BCH2124H	Molecular Chaperones and Cellular Protein Homeostasis
BCH2125H	Structure and Dynamics of Biomacromolecules Using Solid State NMR Spectroscopy
BCH2126H	Subcellular Social Networks: Inter-Organelle Contact Sites
BCH2127H	Advances in Optical Microscopy: From Single Molecules to Four-Dimensional Imaging
BCH2128H	Scientific Thinking and Practice
BCH2129H	Genome Instability: Basic Science to Human Disease
BCH2130H	Cancer Biology
BCH2131H	Genomics of Infectious Disease
BCH2132H	Modelling Human Diseases from Cells to Organoids
BCH2133H	Tyrosine Kinase Signaling
BCH2134H	Cytoskeletal Dynamics
BCH2135H	Mitochondria and Metabolism in Human Health and Disease
BCH2136H	Biological Condensates
BCH2137H	Bug v. Host
BCH2138H	Advanced Electron Microscopy
BCH2139H	Islet Biology I: Gene to Cell to Organ to Disease
BCH2140H	Islet Biology II: Beyond Glucose Control: Molecular Targets, Diagnostics and Cutting-Edge Technologies
BCH2141H	Advanced Methods in Biomolecular Interactions
BCH2200H	Design Thinking for Scientists
BCH2201H	Professional Development
BCH2202H	Intro Programming in R
BCH2203H	Intro Programming in Python
BCH2204H	Advanced Programming in R
BCH2205H	Advanced Programming in Python
BCH2206H	Interdisciplinary Science
BCH2207H	Collaborative Science: Student Centered Interdisciplinary Studies

[0] Course that may continue over a program. The course is graded when completed, or credit is given when the course is completed.

[+] Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.

[§] Arts and Science undergraduate course.

Biomedical Engineering

Biomedical Engineering: Introduction

Faculty Affiliation

Applied Science and Engineering

Degree Programs

Biomedical Engineering

MASc

- Fields:
  - Biomaterials, Tissue Engineering and Regenerative Medicine;
  - Engineering in a Clinical Setting;
  - Nanotechnology, Molecular Imaging and Systems Biology;
  - Neural/Sensory Systems and Rehabilitation

MEng

- Fields:
  - Biomaterials, Tissue Engineering and Regenerative Medicine;
  - Engineering in a Clinical Setting;
  - Nanotechnology, Molecular Imaging and Systems Biology;
  - Neural/Sensory Systems and Rehabilitation
- Emphases:
  - Engineering and Globalization;
  - Entrepreneurship, Leadership, Innovation and Technology (ELITE);
  - Forensic Engineering

PhD

- Fields:
  - Biomaterials, Tissue Engineering and Regenerative Medicine;
  - Clinical Engineering;
  - Engineering in a Clinical Setting;
  - Nanotechnology, Molecular Imaging and Systems Biology;
  - Neural/Sensory Systems and Rehabilitation

Clinical Engineering

MHSc

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Cardiovascular Sciences
  - Biomedical Engineering, MASc, PhD
  - Clinical Engineering, MHSc
- Developmental Biology
  - Biomedical Engineering, MASc, PhD
  - Clinical Engineering, MHSc
- Genome Biology and Bioinformatics
  - Biomedical Engineering, PhD
- Musculoskeletal Sciences
  - Biomedical Engineering, MASc, PhD
- Neuroscience
  - Biomedical Engineering, MASc, PhD
  - Clinical Engineering, MHSc
- Resuscitation Sciences (admissions have been administratively suspended)
  - Biomedical Engineering, PhD
  - Clinical Engineering, MHSc

Overview

The Institute of Biomedical Engineering (IBME) offers facilities for research in biomedical engineering and for three educational programs leading to master's and doctoral degrees.

Biomedical engineering is a multidisciplinary field that integrates engineering and biology/medicine. It uses methods, principles, and tools of engineering, physical sciences, and mathematics to solve problems in the medical and life sciences for the study of living systems; the enhancement and replacement of those systems; the design and construction of systems to measure basic physiological parameters; the development of instruments, materials, and techniques for biological and medical practice; and the development of artificial organs and other medical devices. By its nature, the majority of the institute's work is interdisciplinary.

Biomedical Engineering: Biomedical Engineering MASc

Master of Applied Science

Program Description

The MASc program is a research-stream, thesis-based program which provides a strong academic foundation for students who want to become immersed in the discipline of biomedical engineering. This program is designed to offer students challenging and rewarding research opportunities within the context of using engineering principles to enhance the quality of our health-care system.

The MASc program is offered in the fields of 1) Biomaterials, Tissue Engineering and Regenerative Medicine; 2) Engineering in a Clinical Setting; 3) Nanotechnology, Molecular Imaging and Systems Biology; and 4) Neural/Sensory Systems and Rehabilitation.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the institute's additional admission requirements stated below.
- A bachelor's degree in dentistry, engineering, medicine, or one of the physical or biological sciences from a recognized university with a minimum academic standing of mid-B or 3.0 grade point average (GPA) in the final two years of study or over senior-level courses.

Program Requirements

- **Coursework.** The program normally comprises **at least 2.0 full-course equivalents (FCEs)** including:

- Two of the following (1.0 FCE):
  - BME1477H *Biomedical Engineering Project Design and Execution* (0.5 FCE)
  - BME1478H *Coding for Biomedical Engineers* (0.5 FCE)
  - BME1479H *Statistical Discovery Techniques for Biomedical Researchers* (0.5 FCE)
- Two half-course electives relevant to the student's area of research (1.0 FCE).

- Students must participate in:
  - Either BME1010H or BME1011H *Graduate Seminar* series (0.0 FCE).
  - JDE1000H *Ethics in Research* (0.0 FCE).
  - Health and safety training workshops.
- Successful completion of a **research thesis** in at least one of the biomedical engineering research fields: 1) Biomaterials, Tissue Engineering and Regenerative Medicine; 2) Engineering in a Clinical Setting; 3) Nanotechnology, Molecular Imaging and Systems Biology; and 4) Neural/Sensory Systems and Rehabilitation.

Program Length

5 sessions full-time (typical registration sequence: F/W/S/F/W)

Time Limit

3 years full-time

Biomedical Engineering: Biomedical Engineering MEng

Master of Engineering

Program Description

The MEng program is an accelerated, professional program with a focus on the design and commercialization of biomedical devices. Students will have the opportunity to take on applied design challenges and meet the growing demands of this industry through a four-month practical experience through internships, research projects, or practical course activities.

The MEng program is offered in the fields of 1) Biomaterials, Tissue Engineering and Regenerative Medicine; 2) Engineering in a Clinical Setting; 3) Nanotechnology, Molecular Imaging and Systems Biology; and 4) Neural/Sensory Systems and Rehabilitation.

The MEng program can be taken on a full-time, extended full-time, or part-time basis.

Full-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy IBME's additional admission requirements stated below.
- A four-year bachelor's degree in engineering, medicine, dentistry, or one of the physical or biological sciences from a recognized university, with at least a mid-B average (3.0 grade point average [GPA]) in the final two years of study or over senior-level courses.

Program Requirements

- **Coursework.** Students must successfully complete a total of **5.0 full-course equivalents (FCEs)** as follows:
  - At least 2.0 FCEs in biomedical engineering courses; these include all BME and joint BME course offerings.
  - At least 1.0 FCE in commercialization and entrepreneurship courses such as BME1800H, BME1801H, BME1802H, and BME1405H.
  - A 1.0 FCE *Practical Experience in Applied Research* course in biomedical device development, usually over one session for a full-time placement (BME1899Y) or over three sessions for a part-time placement (BME1898Y). The placement must be in at least one of the following biomedical engineering research fields: 1) Biomaterials, Tissue Engineering and Regenerative Medicine; 2) Engineering in a Clinical Setting; 3) Nanotechnology, Molecular Imaging and Systems Biology; or 4) Neural/Sensory Systems and Rehabilitation. The practical experience course can be taken in academic research and teaching laboratories, government institutions, health-care facilities, in the industry, or in health-care consulting firms.
  - The remaining 1.0 FCE can be two half courses in either biomedical engineering, commercialization and entrepreneurship, or any graduate-level course the student is interested in.
- All courses must be at the graduate level, which includes both 500- and 1000-level. Students can take a maximum of one 500-level course.
- Health and safety training workshops.
- Students have the option of completing an emphasis in Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); or Forensic Engineering as part of their degree program. Please see details in the Biomedical Engineering MEng Emphases section.

Program Length

3 sessions (typical registration sequence: F/W/S)

Time Limit

2 years

Extended Full-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy IBME's additional admission requirements stated below.
- A four-year bachelor's degree in engineering, medicine, dentistry, or one of the physical or biological sciences from a recognized university, with at least a mid-B average (3.0 grade point average [GPA]) in the final two years of study or over senior-level courses.

Program Requirements

- **Coursework.** Students must successfully complete a total of **5.0 full-course equivalents (FCEs)** as follows:
  - At least 2.0 FCEs in biomedical engineering courses; these include all BME and joint BME course offerings.
  - At least 1.0 FCE in commercialization and entrepreneurship courses such as BME1800H, BME1801H, BME1802H, and BME1405H.
  - A 1.0 FCE *Practical Experience in Applied Research* course in biomedical device development, usually over one session for a full-time placement (BME1899Y) or over three sessions for a part-time placement (BME1898Y). The placement must be in at least one of the following biomedical engineering research fields: 1) Biomaterials, Tissue Engineering and Regenerative Medicine; 2) Engineering in a Clinical Setting; 3) Nanotechnology, Molecular Imaging and Systems Biology; or 4) Neural/Sensory Systems and Rehabilitation. The practical experience course can be taken in academic research and teaching laboratories, government institutions, health-care facilities, in the industry, or in health-care consulting firms.
  - The remaining 1.0 FCE can be two half courses in either biomedical engineering, commercialization and entrepreneurship, or any graduate-level course the student is interested in.
- All courses must be at the graduate level, which includes both 500- and 1000-level. Students can take a maximum of one 500-level course.
- Health and safety training workshops.
- Students have the option of completing an emphasis in Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); or Forensic Engineering as part of their degree program. Please see details in the Biomedical Engineering MEng Emphases section.

Program Length

6 sessions (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years

Part-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy IBME's additional admission requirements stated below.
- A four-year bachelor's degree in engineering, medicine, dentistry, or one of the physical or biological sciences from a recognized university, with at least a mid-B average (3.0 grade point average [GPA]) in the final two years of study or over senior-level courses.

Program Requirements

- **Coursework.** Students must successfully complete a total of **5.0 full-course equivalents (FCEs)** as follows:
  - At least 2.0 FCEs in biomedical engineering courses; these include all BME and joint BME course offerings.
  - At least 1.0 FCE in commercialization and entrepreneurship courses such as BME1800H, BME1801H, BME1802H, and BME1405H.
  - A 1.0 FCE *Practical Experience in Applied Research* course in biomedical device development, usually over one session for a full-time placement (BME1899Y) or over three sessions for a part-time placement (BME1898Y). The placement must be in at least one of the following biomedical engineering research fields: 1) Biomaterials, Tissue Engineering and Regenerative Medicine; 2) Engineering in a Clinical Setting; 3) Nanotechnology, Molecular Imaging and Systems Biology; or 4) Neural/Sensory Systems and Rehabilitation. The practical experience course can be taken in academic research and teaching laboratories, government institutions, health-care facilities, in the industry, or in health-care consulting firms.
  - The remaining 1.0 FCE can be two half courses in either biomedical engineering, commercialization and entrepreneurship, or any graduate-level course the student is interested in.
- All courses must be at the graduate level, which includes both 500- and 1000-level. Students can take a maximum of one 500-level course.
- Health and safety training workshops.
- Students have the option of completing an emphasis in Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); or Forensic Engineering as part of their degree program. Please see details in the Biomedical Engineering MEng Emphases section.

Program Length

9 sessions part-time (typical registration sequence: F/W/S/F/W/S/F/W/S)

Time Limit

6 years

Biomedical Engineering: Biomedical Engineering PhD; Fields: 1 Biomaterials, Tissue Engineering & Regenerative Medicine; 2 Engineering in a Clinical Setting; 3 Nanotechnology, Molecular Imaging & Systems Biology; 4 Neural/Sensory Systems & Rehabilitation

Doctor of Philosophy

Program Description

The PhD program offers courses and a strong research thesis component. Students emerge from this program ready to pursue careers in academia, medicine, industry, and government. Students with a particular interest in conducting biomedical engineering research with a primary clinical focus may pursue a field in clinical engineering within the Biomedical Engineering PhD program.

Applicants may enter the PhD program via one of three routes: 1) following completion of an appropriate master's degree; 2) transfer from the University of Toronto MASc or MHSc program; or 3) direct entry following completion of an appropriate bachelor's degree.

Fields:

1) Biomaterials, Tissue Engineering and Regenerative Medicine;
2) Engineering in a Clinical Setting;
3) Nanotechnology, Molecular Imaging and Systems Biology;
4) Neural/Sensory Systems and Rehabilitation

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the institute's additional admission requirements stated below.
- Applicants must have a master's degree in dentistry, engineering, medicine, or one of the physical or biological sciences with an overall average of at least B+ (3.3 grade point average [GPA]) from a recognized university.

Program Requirements

- **Coursework.** Normally, students must complete **at least 1.0 full-course equivalent (FCE)** including:
  - Two of the following (1.0 FCE):
    - BME1477H *Biomedical Engineering Project Design and Execution* (0.5 FCE);
    - BME1478H *Coding for Biomedical Engineers* (0.5 FCE); or
    - BME1479H *Statistical Discovery Techniques for Biomedical Researchers* (0.5 FCE).
- Students are also expected to pursue a **thesis topic** relevant to at least one of the following Biomedical Engineering research fields: 1) Biomaterials, Tissue Engineering and Regenerative Medicine; 2) Engineering in a Clinical Setting; 3) Nanotechnology, Molecular Imaging and Systems Biology; and 4) Neural/Sensory Systems and Rehabilitation.
- Within 12 months of registration, students must pass a **qualifying examination** covering the broad field of biomedical engineering appropriate to their background.
- Successful completion of a **thesis**, representing an original investigation in biomedical engineering.
- Students will continue to meet with their supervisory committee at least once every 12 months until recommendation for the **departmental oral examination** is made. On the recommendation of the supervisory committee and special approval from their department Graduate Chair or Coordinator, candidates have the opportunity to waive the departmental oral examination and proceed directly to the **Doctoral Final Oral Examination**.
- Students must participate in:
  - Either BME1010H or BME1011H *Graduate Seminar* series (0.0 FCE);
  - JDE1000H *Ethics in Research* (0.0 FCE);
  - Health and safety training workshops.

Program Length

4 years

Time Limit

6 years

PhD Program (Transfer)

Transfer Requirements

- Highly qualified master's students (MHSc students in Clinical Engineering or MASc students in any field) may be considered for transfer into the PhD program in any of the five fields. MAsc and MHsc students who transfer to a PhD must fulfil the admission requirements listed under the specific field of the PhD program they are transferring to.

Program Requirements for MASc Transfer Students

- **Coursework.** Students who transfer from the MASc program in Biomedical Engineering must complete the total course requirements for both degrees: 2.0 full-course equivalents (FCEs) at the master's level plus 1.0 FCE at the PhD level, for **a total of 3.0 FCEs.**
  - Students must complete two of the following (1.0 FCE):
    - BME1477H *Biomedical Engineering Project Design and Execution* (0.5 FCE);
    - BME1478H *Coding for Biomedical Engineers* (0.5 FCE); or
    - BME1479H *Statistical Discovery Techniques for Biomedical Researchers* (0.5 FCE).
  - Elective courses relevant to the student's area of research (2.0 FCEs).

Program Requirements for MHSc Transfer Students

- **Coursework.** Students who transfer from the MHSc program in Biomedical Engineering must complete the total course requirements for both degrees: 4.0 FCEs at the master's level plus 1.0 FCE at the PhD level, for **a total of 5.0 FCEs**.
  - BME1405H *Clinical Engineering Instrumentation I* (0.5 FCE) and BME1436H *Clinical Engineering Surgery* (0.5 FCE).
  - Students must complete two of the following (1.0 FCE):
    - BME1477H *Biomedical Engineering Project Design and Execution* (0.5 FCE);
    - BME1478H *Coding for Biomedical Engineers* (0.5 FCE); or
    - BME1479H *Statistical Discovery Techniques for Biomedical Researchers* (0.5 FCE);
  - Two half-course electives relevant to the student's area of research (1.0 FCE).
  - BME4444Y *Practical Experience Course* (1.0 FCE) in health-care facilities, the medical device industry, or health-care consulting firms. The practical experience course must total a minimum of 625 hours.

All PhD Students

- Students are expected to pursue a **thesis topic** relevant to at least one of the following Biomedical Engineering research fields: 1) Biomaterials, Tissue Engineering and Regenerative Medicine; 2) Engineering in a Clinical Setting; 3) Nanotechnology, Molecular Imaging and Systems Biology; and 4) Neural/Sensory Systems and Rehabilitation.
- Within 12 months of registration, students must pass a **qualifying examination** covering the broad field of biomedical engineering appropriate to their background.
- Successful completion of a **thesis**, representing an original investigation in biomedical engineering.
- Students will continue to meet with their supervisory committee at least once every 12 months until recommendation for the **departmental oral examination** is made. On the recommendation of the supervisory committee and special approval from their department Graduate Chair or Coordinator, candidates have the opportunity to waive the departmental oral examination and proceed directly to the **Doctoral Final Oral Examination**.
- Students must participate in:
  - Either BME1010H or BME1011H *Graduate Seminar* series (0.0 FCE);
  - JDE1000H *Ethics in Research* (0.0 FCE);
  - Health and safety training workshops.

Program Length

5 years

Time Limit

7 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the institute's additional admission requirements stated below.
- Direct entry with a bachelor's degree may be considered in exceptional cases. Applicants must have an undergraduate degree in dentistry, engineering, medicine, or one of the physical or biological sciences.

Program Requirements

- **Coursework.** Normally, students must complete **3.0 full-course equivalents (FCEs)** including:
  - Two of the following (1.0 FCE):
    - BME1477H *Biomedical Engineering Project Design and Execution* (0.5 FCE);
    - BME1478H *Coding for Biomedical Engineers* (0.5 FCE); or
    - BME1479H *Statistical Discovery Techniques for Biomedical Researchers* (0.5 FCE).
  - Elective courses relevant to the student's area of research (2.0 FCEs).
- Students are also expected to pursue a **thesis topic** relevant to at least one of the following Biomedical Engineering research fields: 1) Biomaterials, Tissue Engineering and Regenerative Medicine; 2) Engineering in a Clinical Setting; 3) Nanotechnology, Molecular Imaging and Systems Biology; and 4) Neural/Sensory Systems and Rehabilitation.
- Successful completion of a **thesis**, representing an original investigation in biomedical engineering.
- Students will continue to meet with their supervisory committee at least once every 12 months until recommendation for the **departmental oral examination** is made. On the recommendation of the supervisory committee and special approval from their department Graduate Chair or Coordinator, candidates have the opportunity to waive the departmental oral examination and proceed directly to the **Doctoral Final Oral Examination**.
- Students must participate in:
  - Either BME1010H or BME1011H *Graduate Seminar* series (0.0 FCE);

- JDE1000H *Ethics in Research* (0.0 FCE);
- Health and safety training workshops.

Program Length

5 years

Time Limit

Biomedical Engineering: Biomedical Engineering PhD; Field: Clinical Engineering

Doctor of Philosophy

Program Description

The PhD program offers courses and a strong research thesis component. Students emerge from this program ready to pursue careers in academia, medicine, industry, and government. Students with a particular interest in conducting biomedical engineering research with a primary clinical focus may pursue a field in clinical engineering within the Biomedical Engineering PhD program.

Applicants may enter the PhD program via one of three routes: 1) following completion of an appropriate master's degree; 2) transfer from the University of Toronto MASc or MHSc program; or 3) direct entry following completion of an appropriate bachelor's degree.

Field: Clinical Engineering

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the institute's additional admission requirements stated below.
- Applicants must have a master's degree in dentistry, engineering, medicine, or one of the physical or biological sciences with an overall average of at least B+ (3.3 grade point average [GPA]) from a recognized university.

Program Requirements

- **Coursework.** Normally, students must complete **at least 1.0 full-course equivalent (FCE)** including:
  - Two of the following (1.0 FCE):
    - BME1477H *Biomedical Engineering Project Design and Execution* (0.5 FCE);
    - BME1478H *Coding for Biomedical Engineers* (0.5 FCE); or
    - BME1479H *Statistical Discovery Techniques for Biomedical Researchers* (0.5 FCE)
  - If a student does not have a formal degree in clinical engineering, 0.5 FCE from one of the BME clinical engineering courses (BME1405H, BME1436H, BME1439H, or BME4444Y) is required. A student who possesses protracted professional engineering experience (five or more years) will be exempt from this requirement.
- Students must (1) conduct their research in a clinical environment and (2) be co-supervised by both engineering and health science faculty. The primary supervisor must be BME-appointed; however, the co-supervisor could be from a clinical unit other than BME but must be appointed to SGS.
- Within 12 months of registration, students must pass a **qualifying examination** covering the broad field of biomedical engineering appropriate to their background.
- Successful completion of a **thesis**, representing an original investigation in biomedical engineering.
- Students will continue to meet with their supervisory committee at least once every 12 months until recommendation for the **departmental oral examination** is made. On the recommendation of the supervisory committee and special approval from their department Graduate Chair or Coordinator, candidates have the opportunity to waive the departmental oral examination and proceed directly to the **Doctoral Final Oral Examination**.
- Students must participate in:
  - Either BME1010H or BME1011H *Graduate Seminar* series (0.0 FCE);
  - JDE1000H *Ethics in Research* (0.0 FCE);
  - Health and safety training workshops.

Program Length

4 years

Time Limit

6 years

PhD Program (Transfer)

Transfer Requirements

- Highly qualified master's students (MHSc students in Clinical Engineering or MASc students in any field) may be considered for transfer into the PhD program in any of the five research fields. To be eligible to transfer to the PhD, Clinical Engineering MHSc students must complete 3.0 full-course equivalents (FCEs) within the MHSc curriculum.
- MHSc students who transfer to the PhD in the field of Clinical Engineering must fulfil the PhD program requirements listed below. MHSc students who transfer to the other PhD fields must fulfil the program requirements of the PhD field as described in the applicable section.

Program Requirements for MASc Transfer Students

- **Coursework.** Students who transfer from the MASc program in Biomedical Engineering must complete the total course requirements for both degrees: 2.0 full-course equivalents (FCEs) at the master's level plus 1.0 FCE at the PhD level, for **a total of 3.0 FCEs.**
  - Students must complete two of the following (1.0 FCE):
    - BME1477H *Biomedical Engineering Project Design and Execution* (0.5 FCE);
    - BME1478H *Coding for Biomedical Engineers* (0.5 FCE); or
    - BME1479H *Statistical Discovery Techniques for Biomedical Researchers* (0.5 FCE).
  - Elective courses relevant to the student's area of research (2.0 FCEs).
  - If a student does not have a formal degree in clinical engineering, 0.5 FCE from one of the BME clinical engineering courses (BME1405H, BME1436H, BME1439H, or BME4444Y) is required. A student who possesses protracted professional engineering experience (five or more years) will be exempt from this requirement.

Program Requirements for MHSc Transfer Students

- **Coursework.** Students who transfer from the MHSc program in Biomedical Engineering must complete the total course requirements for both degrees: 4.0 FCEs at the master's level plus 1.0 FCE at the PhD level, for **a total of 5.0 FCEs**.
  - BME1405H *Clinical Engineering Instrumentation I* (0.5 FCE) and BME1436H *Clinical Engineering Surgery* (0.5 FCE).
  - Students must complete two of the following (1.0 FCE):
    - BME1477H *Biomedical Engineering Project Design and Execution* (0.5 FCE);
    - BME1478H *Coding for Biomedical Engineers* (0.5 FCE); or
    - BME1479H *Statistical Discovery Techniques for Biomedical Researchers* (0.5 FCE);
  - Two half-course electives relevant to the student's area of research (1.0 FCE).
  - BME4444Y *Practical Experience Course* (1.0 FCE) in health-care facilities, the medical device industry, or health-care consulting firms. The practical experience course must total a minimum of 625 hours.
  - If a student does not have a formal degree in clinical engineering, 0.5 FCE from one of the BME clinical engineering courses (BME1405H, BME1436H, BME1439H, or BME4444Y) is required. A student who possesses protracted professional engineering experience (five or more years) will be exempt from this requirement.

All PhD Students

- Students must (1) conduct their research in a clinical environment and (2) be co-supervised by both engineering and health science faculty. The primary supervisor must be BME-appointed; however, the co-supervisor could be from a clinical unit other than BME but must be appointed to SGS.
- Within 12 months of registration, students must pass a **qualifying examination** covering the broad field of biomedical engineering appropriate to their background.
- Successful completion of a **thesis**, representing an original investigation in biomedical engineering.
- Students will continue to meet with their supervisory committee at least once every 12 months until recommendation for the **departmental oral examination** is made. On the recommendation of the supervisory committee and special approval from their department Graduate Chair or Coordinator, candidates have the opportunity to waive the departmental oral examination and proceed directly to the **Doctoral Final Oral Examination**.
- Students must participate in:
  - Either BME1010H or BME1011H *Graduate Seminar* series (0.0 FCE);
  - JDE1000H *Ethics in Research* (0.0 FCE);
  - Health and safety training workshops.

Program Length

5 years

Time Limit

7 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the institute's additional admission requirements stated below.
- Direct entry with a bachelor's degree may be considered in exceptional cases. Applicants must have an undergraduate degree in dentistry, engineering, medicine, or one of the physical or biological sciences.

Program Requirements

- **Coursework.** Normally, students must complete **3.0 full-course equivalents (FCEs)** including:
  - Two of the following (1.0 FCE):
    - BME1477H *Biomedical Engineering Project Design and Execution* (0.5 FCE);
    - BME1478H *Coding for Biomedical Engineers* (0.5 FCE); or
    - BME1479H *Statistical Discovery Techniques for Biomedical Researchers* (0.5 FCE).
  - Elective courses relevant to the student's area of research (2.0 FCEs).
  - If a student does not have a formal degree in clinical engineering, 0.5 FCE from one of the BME clinical engineering courses (BME1405H, BME1436H, BME1439H, or BME4444Y) is required. A student who possesses protracted professional engineering experience (five or more years) will be exempt from this requirement.

- Students in the Clinical Engineering field must (1) conduct their research in a clinical environment and (2) be co-supervised by both engineering and health science faculty. The primary supervisor must be BME-appointed; however, the co-supervisor could be from a clinical unit other than BME but must be appointed to SGS.
- Within 12 months of registration, students must pass a **qualifying examination** covering the broad field of biomedical engineering appropriate to their background.
- Successful completion of a **thesis**, representing an original investigation in biomedical engineering.
- Students will continue to meet with their supervisory committee at least once every 12 months until recommendation for the **departmental oral examination** is made. On the recommendation of the supervisory committee and special approval from their department Graduate Chair or Coordinator, candidates have the opportunity to waive the departmental oral examination and proceed directly to the **Doctoral Final Oral Examination**.
- Students must participate in:
  - Either BME1010H or BME1011H *Graduate Seminar* series (0.0 FCE);
  - JDE1000H *Ethics in Research* (0.0 FCE);
  - Health and safety training workshops.

Program Length

5 years

Time Limit

7 years

Biomedical Engineering: Clinical Engineering MHSc

Master of Health Science

Program Description

The MHSc program educates students on how to apply and implement medical technologies to optimize modern health-care delivery. This professional degree program consists of academic courses and a research thesis and provides students with real-world exposure through a practical experience course with a private sector company, a hospital, or a research facility.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the institute's additional admission requirements stated below.
- Selected students with a four-year bachelor's degree in engineering, medicine, dentistry, or one of the physical or biological sciences from a recognized university, with a mid-B (3.0 grade point average [GPA]) or higher in the final two years of study or over senior-level courses.

Program Requirements

- **Coursework.** Students must normally complete **4.0 full-course equivalents (FCEs)** as follows:
  - BME1405H *Clinical Engineering Instrumentation I* (0.5 FCE) and BME1436H *Clinical Engineering Surgery* (0.5 FCE)
  - Two of the following (1.0 FCE):
    - BME1477H *Biomedical Engineering Project Design and Execution* (0.5 FCE);
    - BME1478H *Coding for Biomedical Engineers* (0.5 FCE); or
    - BME1479H *Statistical Discovery Techniques for Biomedical Researchers* (0.5 FCE)
  - Two half-course electives relevant to the student's area of research (1.0 FCE).
  - BME4444Y *Practical Experience Course* (1.0 FCE) in health-care facilities, the medical device industry, or health-care consulting firms. The practical experience course must total a minimum of 625 hours.
- Students must participate in:
  - Either BME1010H **or** BME1011H *Graduate Seminar* series (0.0 FCE) **and**
  - JDE1000H *Ethics in Research* (0.0 FCE).
- Successful completion of a **thesis**.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Biomedical Engineering: Biomedical Engineering MEng Emphases

Emphasis: Engineering and Globalization (MEng only)

MEng students must successfully complete **four half courses (2.0 full-course equivalents [FCEs])** from the following lists, with at least two half courses (or one full course) taken from Group A.

Group A

APS510H, APS530H, APS1420H, JCR1000Y (full-year course).

Group B

APS1015H, APS1020H, APS1024H, CHL5700H, CIV1399H, JMG2020H.

Note: Students who choose to pursue an MEng project in their home department that aligns with the Centre for Global Engineering (CGEN)'s disciplinary focus, as deemed by the CGEN Director, may count the project as one required Group B course.

Students who complete the requirements of the emphasis in Engineering and Globalization and wish to obtain a notation on their transcript should contact the Faculty Graduate Studies office.

Emphasis: Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE) (MEng only)

MEng students must successfully complete **any four of the following courses (2.0 full-course equivalents [FCEs])**:

Leadership

TEP1010H, TEP1011H, TEP1026H, TEP1027H, TEP1029H, TEP1030H, TEP1501H, TEP1502H, TEP1601H.

Entrepreneurship and Innovation

APS1012H, APS1013H, APS1015H, APS1023H, APS1033H, APS1035H, APS1036H, APS1041H, APS1061H, APS1088H.

Finance and Management

AER1601H, APS502H, APS1001H, APS1004H, APS1005H, APS1009H, APS1016H, APS1017H, APS1020H, APS1022H, APS1028H, APS1032H, APS1038H, APS1039H, APS1040H, APS1043H, APS1049H, APS1050H, APS1051H, APS1052H.

Engineering and Society

APS510H, APS1018H, APS1024H, APS1025H, APS1031H, APS1034H, APS1101H, APS1420H.

Emphasis: Forensic Engineering (MEng only)

MEng students must successfully complete **four courses (one core course and three elective courses)**.

Core Course

MSE1031H *Forensic Engineering*.

Elective Courses

AER1604H,
APS1034H, APS1039H, APS1040H, APS1101H,
BME1480H, BME1800H, BME1801H, BME1802H,
CHE561H, CHE568H, CHE1213H, CHE1431H, CHE1432H, CHE1434H, CHE1436H,
CIV510H, CIV518H, CIV1163H, CIV1171H, CIV1174H, CIV1190H, CIV1201H, CIV1279H, CIV1282H, CIV1422H, CIV1429H,
JMB1050H,
JNC2503H,
MIE507H, MIE533H, MIE566H, MIE1301H, MIE1303H, MIE1411H, MIE1414H, MIE1616H, MIE1708H, MIE1713H, MIE1714H, MIE1721H, MIE1723H, MIE1727H, MIE1804H, MSE1015H, MSE1016H, MSE1022H, MSE1032H, MSE1067H.

Biomedical Engineering: Biomedical Engineering MASc, MEng, PhD, Clinical Engineering MHSc Courses

Not all courses are offered every year. Students should contact the BME office for information about course availability. Outlines of these and other closely related courses may be obtained from the BME office.

Cell and Systems Biology

MSc and PhD

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Developmental Biology
  - Cell and Systems Biology, MSc, PhD
- Genome Biology and Bioinformatics
  - Cell and Systems Biology, PhD
- Neuroscience
  - Cell and Systems Biology, MSc, PhD

Overview

Students undertaking graduate programs in the Department of Cell and Systems Biology pursue research related to fundamental mechanisms in the growth, development, and behaviour of organisms ranging from unicellular microbes to more complex organisms in the plant and animal kingdoms. Research projects extend from the molecular level to that of whole organisms interacting with each other and their environment.

Students enjoy state-of-the-art facilities and make use of cutting-edge approaches including functional genomics, genetics, metabolomics, proteomics, bioinformatics, computational biology, cell biology, developmental biology, molecular biology, and physiology.

Cell and Systems Biology: Cell and Systems Biology MSc

Master of Science

Program Description

The MSc program in Cell and Systems Biology provides ideal training for career paths in education, business, and policy where science-based decision-making and the interpretation and transmission of scientific information are becoming increasingly important, particularly in many of the “knowledge-based” economies that are emerging the world over.

The MSc program trains scientists who are well suited to fill this demand. The program’s objective is to provide students with skills in the generation, critical evaluation, assessment, and communication of data so that they are equipped to proceed with further post-graduate degrees, or other career opportunities where such skills are desired.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Cell and Systems Biology's additional admission requirements stated below.
- An appropriate bachelor's degree with high academic standing from a recognized university, with a B+ (or equivalent) average in the final year of the bachelor's program, and a mid-B overall average in the previous year of study.

Program Requirements

- Complete 0.5 full-course equivalent (FCE) of approved graduate coursework.
- Complete the CSB1010Y *MSc Seminar Series* (1.0 FCE, minimum 24 seminars per year).
- Complete a thesis based on a research project.
- Give a public presentation of thesis research and defend the thesis at an oral examination.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F)

Time Limit

3 years full-time

Cell and Systems Biology: Cell and Systems Biology PhD

Doctor of Philosophy

Program Description

The PhD program in Cell and Systems Biology trains scientists who will form part of the next generation of independent researchers in cell, molecular, and systems biology. Graduates will be the future high-level teachers, frontier expanders, and decision-makers in these fields of inquiry.

PhD graduates are expected to emerge from the program as independent and autonomous scientists, producing a written thesis that describes original research that stands as a testimony to their ability to generate publishable, stand-alone contributions to the peer-reviewed scientific literature. As part of their training, PhD students acquire skills in the communication of scientific research (including teaching skills), and acquire broad-based knowledge of the theory and practice underpinning their chosen field.

Applicants may enter the PhD program via one of three routes: 1) following completion of an MSc degree; 2) transfer from the University of Toronto MSc program; or 3) direct entry following completion of an honours bachelor’s degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Cell and Systems Biology's additional admission requirements stated below.
- Students will be admitted only when they have made arrangements to secure a research supervisor by contacting professors in the department.
- Applicants may be accepted who already hold an MSc degree from a recognized university, with a grade average equivalent to at least a University of Toronto A– during the MSc.

Program Requirements

- Students must successfully complete:
  - **1.0 full-course equivalent (FCE)** of approved graduate coursework.
  - CSB1011Y ***PhD Seminar Series*** (1.0 FCE, minimum 24 seminars per year).
  - A **PhD proposal**, which involves three components:
    - preparation of a written research proposal
    - presentation to the department and questioning by the public
    - *in-camera* questioning by a PhD proposal examination committee immediately following the public presentation.
  - Their **proposal examination** between 13 and 20 months after the start date of enrolment in their graduate program.
- Students must submit a **thesis** and defend it at a **Doctoral Final Oral Examination** conducted by the School of Graduate Studies.

Program Length

4 years

Time Limit

6 years

PhD Program (Transfer)

Transfer Requirements

- Applicants may be accepted first into the University of Toronto MSc program and, conditional upon approval by the thesis supervisory committee, may transfer into the PhD program.

Program Requirements

Students must:

- Be in good academic standing at the end of Year 1.
- Successfully complete **1.0 full-course equivalent (FCE)** of approved graduate coursework. Those who transfer into the PhD program from the MSc may apply 0.5 graduate FCE towards the PhD course requirements.
- Successfully complete CSB1011Y ***PhD Seminar Series*** (1.0 FCE, minimum 24 seminars per year).
- Successfully complete a **PhD transfer examination** between 13 and 20 months after the start date of enrolment in their graduate program. The transfer examination involves three components:
  - preparation of a written research proposal
  - presentation to the department and questioning by the public
  - *in-camera* questioning by a PhD proposal examination committee immediately following the public presentation.
- Deliver **two public seminars** in the department based on their thesis research.
- Submit a **thesis** and defend it at a **Doctoral Final Oral Examination** conducted by the School of Graduate Studies.

Program Length

5 years

Time Limit

7 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Cell and Systems Biology's additional admission requirements stated below.
- Applicants will be admitted only when they have made arrangements to secure a research supervisor by contacting professors in the department.
- Exceptional applicants with a BSc degree may be accepted by direct entry into the PhD program, with a grade point average equivalent to a University of Toronto A– or better in the final year of the BSc. Direct-entry PhD candidates should also display evidence of research potential.

Program Requirements

Students must:

- Be in good academic standing at the end of Year 1.
- Successfully complete **1.0 full-course equivalent (FCE)** of approved graduate coursework.

- Successfully complete CSB1011Y ***PhD Seminar Series*** (1.0 FCE, minimum 24 seminars per year).
- Complete additional courses if their undergraduate preparation does not include the study of subjects deemed to be necessary for research in the chosen area. The courses will be chosen in consultation with the supervisory committee.
- Successfully complete a **PhD proposal**, which involves three components:
  - preparation of a written research proposal
  - presentation to the department and questioning by the public
  - *in-camera* questioning by a PhD proposal examination committee immediately following the public presentation.
- Students must successfully complete their **proposal examination** between 13 and 20 months after the start date of enrolment in their graduate program.
- Deliver **two public seminars** in the department based on their thesis research.
- Submit a **thesis** and defend it at a **Doctoral Final Oral Examination** conducted by the School of Graduate Studies.

Program Length

5 years

Time Limit

7 years

  - Chemical Engineering and Applied Chemistry, PhD

Overview

The Department of Chemical Engineering and Applied Chemistry offers graduate research in pure science, engineering fundamentals, and engineering applications. The department attracts a dynamic professorial staff with outstanding international reputations. Many graduate students work closely with industrial partners during their studies. Research is funded by the government and industry, often by means of a consortium of companies. The experience of dealing with real-world problems prepares graduates for successful professional careers.

Research and teaching are the foundations of the department. Research is clustered into eight major categories:

- Biomolecular and Biomedical Engineering
- Bioprocess Engineering
- Chemical and Materials Process Engineering
- Engineering Informatics
- Environmental Science and Engineering
- Pulp and Paper
- Surface and Interface Engineering
- Sustainable Energy

Chemical Engineering and Applied Chemistry: Chemical Engineering and Applied Chemistry MASc

Master of Applied Science

Program Description

The MASc program is ideal for students who aspire to a rewarding career in research, whether in academia or industry. It is a stepping stone to a doctoral (PhD) degree.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Chemical Engineering and Applied Chemistry's additional admission requirements stated below.
- A four-year degree (or equivalent) in engineering or the physical/chemical/biological sciences with a B+ average (or equivalent) in each of the last two years of full-time study.

Program Requirements

- Each student should discuss possible research projects with several members of the department before selecting a research area and a supervisor. Students must complete a **thesis** on a research topic.
- **Coursework.** Students must successfully complete a total of **1.5 full-course equivalents [FCEs]** (three graduate half courses) as follows:
  - One of these courses must be CHE1102H *Research Methods and Project Execution* (0.5 FCE), typically completed in Year 1.
  - At least one course must be selected in an area outside the student's area of research.
  - Only one 500-level course may be taken for credit towards the degree program.
- All Year 1 and Year 2 students must complete CHE3001H[0] *Leading Edge Seminar Series in Chemical Engineering and Applied Chemistry* (Credit/No Credit) in both the Fall and Winter sessions.
- Students must also complete CHE2222H *Safety Workshop* and JDE1000H *Ethics in Research*.
- The program requires a minimum full-time **residence** of two sessions (eight months). This means students must be on campus full-time and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.
- Students have the option of completing an emphasis in Sustainable Energy as part of their degree program. Please see details in the Chemical Engineering and Applied Chemistry MASc, MEng, PhD Emphases section.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

[0] *Course that may continue over a program. The course is graded when completed.*

Chemical Engineering and Applied Chemistry: Chemical Engineering and Applied Chemistry MEng

Master of Engineering

Program Description

The MEng program is designed for engineers who wish to enhance their career opportunities in as little as one year of full-time study. Students undergo advanced professional training that is respected by employers and differentiates them in a crowded marketplace. The MEng program differs from the MASc and PhD programs in that it is oriented to learning through prescribed courses rather than through research.

The MEng program can be taken on a full-time, extended full-time, or part-time basis. The part-time option is intended primarily for engineers in full-time professional practice.

Full-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Chemical Engineering and Applied Chemistry's additional admission requirements stated below.
- A Bachelor of Engineering (BEng) or Bachelor of Applied Science (BASc) degree in engineering with at least a mid-B (or equivalent) in each of the last two years of full-time study.

Program Requirements

- The MEng program normally requires completion of:
  - a total of 5.0 full-course equivalents (FCEs) **or**
  - 3.5 FCEs plus a 1.5-FCE project supervised by a faculty member. At the discretion of the supervisor, a second reviewer and/or oral defence may be requested for students who plan to enter the doctoral program.
- Students normally complete the requirements in three sessions (one year).

- Students have the option of completing an emphasis in Advanced Manufacturing; Advanced Soft Materials; Advanced Water Technologies; Analytics; Biomanufacturing; Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); Forensic Engineering; or Sustainable Energy as part of their degree program. Please see details in the Chemical Engineering and Applied Chemistry MASc, MEng, PhD Emphases section.

Program Length

3 sessions (typical registration sequence: F/W/S)

Time Limit

3 years

Extended Full-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Chemical Engineering and Applied Chemistry's additional admission requirements stated below.
- A Bachelor of Engineering (BEng) or Bachelor of Applied Science (BASc) degree in engineering with at least a mid-B (or equivalent) in each of the last two years of full-time study.

Program Requirements

- The MEng program normally requires completion of:
  - a total of 5.0 full-course equivalents (FCEs) **or**
  - 3.5 FCEs plus a 1.5-FCE project supervised by a faculty member. At the discretion of the supervisor, a second reviewer and/or oral defence may be requested for students who plan to enter the doctoral program.
- Students are expected to complete the requirements in six sessions (two years). They are limited to six half courses per year and three half courses per session.
- Students have the option of completing an emphasis in Advanced Manufacturing; Advanced Soft Materials; Advanced Water Technologies; Analytics; Biomanufacturing; Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); Forensic Engineering; or Sustainable Energy as part of their degree program. Please see details in the Chemical Engineering and Applied Chemistry MASc, MEng, PhD Emphases section.

Program Length

6 sessions (typical registration sequence: F/W/S/F/W/S)**

Time Limit

3 years

*** Students may begin the program at different times.*

Part-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Chemical Engineering and Applied Chemistry's additional admission requirements stated below.
- A Bachelor of Engineering (BEng) or Bachelor of Applied Science (BASc) degree in engineering with at least a mid-B (or equivalent) in each of the last two years of full-time study.

Program Requirements

- The MEng program normally requires completion of:
  - a total of 5.0 full-course equivalents (FCEs) **or**
  - 3.5 FCEs plus a 1.5-FCE project supervised by a faculty member. At the discretion of the supervisor, a second reviewer and/or oral defence may be requested for students who plan to enter the doctoral program.
- Students normally complete the requirements in nine sessions (three years). They are limited to four half courses per year and two half courses per session.
- Students have the option of completing an emphasis in Advanced Manufacturing; Advanced Soft Materials; Advanced Water Technologies; Analytics; Biomanufacturing; Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); Forensic Engineering; or Sustainable Energy as part of their degree program. Please see details in the Chemical Engineering and Applied Chemistry MASc, MEng, PhD Emphases section.

Program Length

9 sessions

Time Limit

6 years

Chemical Engineering and Applied Chemistry: Chemical Engineering and Applied Chemistry PhD

Doctor of Philosophy

Program Description

The PhD program is designed for students who wish to become an expert in a specific research area and is a stepping stone to a career in academia. Students work alongside world-renowned researchers while gaining profound depth and experience in their field of study.

Applicants may enter the program via one of three routes: 1) following completion of an MASc degree; 2) transfer from the University of Toronto MASc program after completing one year; or 3) direct entry following completion of a bachelor's degree, in exceptional cases. The program can also be taken on a flexible-time basis.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Chemical Engineering and Applied Chemistry's additional admission requirements stated below.
- B+ (or equivalent) in each of the last two years of full-time study in the undergraduate program, and successful completion of a research master's degree with an overall average of at least B+ (or equivalent).
- Applicants may enter the PhD program following **completion of an MASc program** with a minimum B+ average and exceptional all-around scientific and intellectual ability as evidenced from theoretical or experimental research, academic standing, initiative, and publication record.

Program Requirements

- **Coursework.** Students must successfully complete at least **2.0 full-course equivalents (FCEs)** (four graduate half courses).
  - One course must be CHE1102H *Research Methods and Project Execution* (0.5 FCE) taken once during the program, typically in Year 1.
  - Courses must be selected from the calendar and approved by the student's supervisor and the Graduate Coordinator. At least one of these courses must be taken in a secondary area of study. It is recommended that one of these courses should be selected from Category A: fundamental courses.
  - Normally, PhD students are not allowed to take a 500-level course for credit towards the degree program.
- All Year 1, Year 2, Year 3, and Year 4 students must complete CHE3001H *Leading Edge Seminar Series in Chemical Engineering and Applied Chemistry* (Credit/No Credit) in both the Fall and Winter sessions.
- If not already completed, students must take CHE2222H *Safety Workshop* and JDE1000H *Ethics in Research*.
- **Thesis** on a research topic.
- Within 9 to 12 months of starting the PhD program, students must pass a **qualifying examination**.
- Students normally remain in **residence** (full-time, on campus) until the departmental recommendation for the **Doctoral Final Oral Examination** is made, unless special permission to do so has otherwise been granted by the departmental Graduate Studies Committee.
- Students have the option of completing an emphasis in Sustainable Energy as part of their degree program. Please see details in the Chemical Engineering and Applied Chemistry MASc, MEng, PhD Emphases section.

Program Length

4 years

Time Limit

6 years

PhD Program (Transfer)

Transfer Requirements

- B+ (or equivalent) in each of the last two years of full-time study in the undergraduate program.
- Applicants may enter the PhD program by transferring from the University of Toronto MASc program after completing one year; such students must successfully complete a bypass examination.
- International applicants with a master's degree from outside Canada or the United States may be asked to register in the MASc program and follow the transfer route of entry.

Program Requirements

- **Coursework.** Students must successfully complete at least **3.0 full-course equivalents (FCEs)** (six graduate half courses) and do not have to take a separate PhD qualifying examination.
  - One course must be CHE1102H *Research Methods and Project Execution* (0.5 FCE) taken once during the program, typically in Year 1.
  - Courses must be selected from the calendar and approved by the student's supervisor and the Graduate Coordinator. At least one of these courses must be taken in a secondary area of study. It is recommended that one of these courses should be selected from Category A: fundamental courses.
  - Normally, PhD students are not allowed to take a 500-level course for credit towards the degree program.
- All Year 1, Year 2, Year 3, and Year 4 students must complete CHE3001H *Leading Edge Seminar Series in*

Chemical Engineering and Applied Chemistry (Credit/No Credit) in both the Fall and Winter sessions.
- If not already completed, students must take CHE2222H *Safety Workshop* and JDE1000H *Ethics in Research*.
- **Thesis** on a research topic.
- Students normally remain in **residence** (full-time, on campus) until the departmental recommendation for the **Doctoral Final Oral Examination** is made, unless special permission to do so has otherwise been granted by the departmental Graduate Studies Committee.
- Students have the option of completing an emphasis in Sustainable Energy as part of their degree program. Please see details in the Chemical Engineering and Applied Chemistry MASc, MEng, PhD Emphases section.

Program Length

5 years

Time Limit

7 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Chemical Engineering and Applied Chemistry's additional admission requirements stated below.
- Minimum A– average in each of the final two years of study in the undergraduate program, and participation in a research project (either through an undergraduate thesis or through research conducted in a lab).

Program Requirements

- **Coursework.** Students must successfully complete at least **3.0 full-course equivalents (FCEs)** (six graduate half courses).
  - One course must be CHE1102H *Research Methods and Project Execution* (0.5 FCE) taken once during the program, typically in Year 1.
  - Courses must be selected from the calendar and approved by the student's supervisor and the Graduate Coordinator. At least one of these courses must be taken in a secondary area of study. It is recommended that one of these courses should be selected from Category A: fundamental courses.
  - Normally, PhD students are not allowed to take a 500-level course for credit towards the degree program.
- All Year 1, Year 2, Year 3, and Year 4 students must complete CHE3001H *Leading Edge Seminar Series in Chemical Engineering and Applied Chemistry* (Credit/No Credit) in both the Fall and Winter sessions.
- If not already completed, students must take CHE2222H *Safety Workshop* and JDE1000H *Ethics in Research*.
- Within 9 to 12 months of starting the PhD program, students must pass a **qualifying examination**.
- **Thesis** on a research topic.
- Students normally remain in **residence** (full-time, on campus) until the departmental recommendation for the **Doctoral Final Oral Examination** is made, unless special permission to do so has otherwise been granted by the departmental Graduate Studies Committee.
- Students have the option of completing an emphasis in Sustainable Energy as part of their degree program. Please see details in the Chemical Engineering and Applied Chemistry MASc, MEng, PhD Emphases section.

Program Length

5 years

Time Limit

7 years

PhD Program (Flexible-Time)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Chemical Engineering and Applied Chemistry's additional admission requirements stated below.
- B+ (or equivalent) in each of the last two years of full-time study in the undergraduate program, and successful completion of a research master's degree with an overall average of at least B+ (or equivalent).
- Applicants may enter the PhD following completion of an MASc program with a minimum B+ average and exceptional all-around scientific and intellectual ability as evidenced from theoretical or experimental research, academic standing, initiative, and publication record.
- Applicants to the flexible-time PhD option are accepted under the same admission requirements as applicants to the full-time PhD option. However, applicants to the flexible-time PhD option must also demonstrate that they are actively engaged in professional activities related to their proposed program of study.

Program Requirements

- Students in the flexible-time option will be subject to the same requirements as students in the full-time option.
- **Coursework.** Students must successfully complete at least **2.0 full-course equivalents (FCEs)** (four graduate half courses).
  - One course must be CHE1102H *Research Methods and Project Execution* (0.5 FCE) taken once during the program, typically in Year 1.

    - Courses must be selected from the calendar and approved by the student's supervisor and the Graduate Coordinator. At least one of these courses must be taken in a secondary area of study. It is recommended that one of these courses should be selected from Category A: fundamental courses.
    - Normally, PhD students are not allowed to take a 500-level course for credit towards the degree program.
- All Year 1, Year 2, Year 3, and Year 4 students must complete CHE3001H *Leading Edge Seminar Series in Chemical Engineering and Applied Chemistry* (Credit/No Credit) in both the Fall and Winter sessions.
- If not already completed, students must take CHE2222H *Safety Workshop* and JDE1000H *Ethics in Research*.
- Within 16 months of starting the PhD program, students must pass a **qualifying examination**.
- **Thesis** on a research topic.
- Students normally remain in **residence** (full-time, on campus) until the departmental recommendation for the **Doctoral Final Oral Examination** is made, unless special permission to do so has otherwise been granted by the departmental Graduate Studies Committee.
- Students in the PhD program have the option of completing an emphasis in Sustainable Energy as part of their degree program. Please see details in the Chemical Engineering and Applied Chemistry MASc, MEng, PhD Emphases section.

Program Length

6 years

Time Limit

Chemical Engineering and Applied Chemistry: Chemical Engineering and Applied Chemistry MASc, MEng, PhD Emphases

Emphasis: Advanced Manufacturing (MEng only)

MEng students must successfully complete:

- **Four half courses (2.0 full-course equivalents [FCEs])**, including at least one core course.
- Elective courses may include other core courses, and courses from either of two streams: Manufacturing Engineering and Manufacturing Management.

Core Courses

AER501H *Advanced Mechanics of Structures*
AER1403H *Advanced Aerospace Structures*
APS1028H *Operations and Production Management for Manufacturing and Services*
CHE1123H *Liquid Biofuels*
MIE519H *Advanced Manufacturing Technologies*
MIE1740H *Smart Materials and Structures*.

Elective Courses — Manufacturing Engineering

AER521H, AER 1415H,
CHE575H, CHE1134H, CHE1475H,
MIE506H, MIE540H, MIE1706H, MIE1713H, MIE1718H, MIE1743H,
MSE1013H, MSE1015H, MSE1028H, MSE1031H, MSE1058H, MSE1061H,
ROB501H.

Elective Courses — Manufacturing Management

APS1005H, APS1012H, APS1013H, APS1017H, APS1020H, APS1023H, APS1040H, APS1088H, APS1420H,
CHE561H, CHE1434H,
MIE523H, MIE1022H, MIE1505H, MIE1514H, MIE1715H, MIE1721H, MIE1723H, MIE1727H,
TEP1011H, TEP1026H, TEP1501H.

Emphasis: Advanced Soft Materials (MEng only)

MEng students must successfully complete any **four half courses (2.0 full-course equivalents [FCEs])** from the following list:

CHE562H, CHE1310H, CHE1333H, CHE1335H, CHE1475H, JTC1134H, JTC1135H,
MIE1705H, MIE1706H, MIE1707H, MIE1740H,
MSE1032H.

Students may double-count one course at most towards any CHE emphasis, or towards any other emphasis in the Faculty.

Emphasis: Advanced Water Technologies (MEng only)

MEng students must successfully complete a total of **2.0 full-course equivalents (FCEs)** (four half courses). This includes at least one course (0.5 FCE) selected from the core course list. The remaining courses must be selected from the elective course list.

- Core courses (complete at least one):
    - CHE1150H *Industrial Water Technology*
    - CIV1308H *Physical and Chemical Treatment Processes*
    - CIV1309H *Biological Treatment Processes*
    - CIV1311H *Advanced and Sustainable Drinking Water Treatment*
- Elective courses (complete remaining courses):
    - CHE565H *Aqueous Process Engineering*
    - CHE1213H *Corrosion*
    - CHE1430H *Hydrometallurgy Theory and Practice*
    - CIV541H *Environmental Biotechnology*
    - CIV549H *Groundwater Flow and Contamination*

- CIV550H *Water Resources Engineering*
- CIV1303H *Water Resources Systems Modeling*
- CIV1319H *Chemistry and Analysis of Water and Wastes*
- CIV1330H *Water, Sanitation, Hygiene, and Global Health*
- CIV1399H *Special Studies in Civil Engineering* (for example, Water Sanitation and Hygiene; Treatment Wetlands; the topic is subject to obtaining approval from the student's graduate unit)
- CIV1499H *Special Studies in Civil Engineering*
- JCC1313H *Environmental Microbiology*
- JNC2503H *Environmental Pathways*
- MIE1807H *Principles of Measurements*
- STA1004H *Introduction to Experimental Design.*

Enrolment Contact

Enrolment in the emphasis is permitted at any time during the MEng program. After students are admitted to the normal MEng program, students may contact Prof. Ron Hofmann, (416) 946-7508.

Upon successful completion of the emphasis requirements and the successful completion of the MEng degree requirements, students will receive a transcript notation from the Faculty Graduate Studies office (subject to Prof. Hofmann's recommendation).

Emphasis: Analytics (MEng only)

To be admitted to the emphasis in Analytics, MEng students must first successfully complete a **prerequisite course APS1070H (0.5 full-course equivalent [FCE])**.

Subsequently, to earn the emphasis, students must successfully complete **four additional half courses (2.0 FCEs)** from the list of core courses or elective courses. These must include at least one core course; the remaining courses must be selected from the list of elective courses.

Students must have completed the prerequisite course APS1070H before taking any of the core courses.

Prerequisite Course

APS1070H *Foundations of Data Analytics and Machine Learning*.

Core Courses

CHE1147H *Data Mining in Engineering*
ECE1513H *Introduction to Machine Learning* (exclusions: CSC411H, CSC2515H, ECE421H, ECE521H, ECE1504H)
MIE1624H *Introduction to Data Science and Analytics*
MSE1065H *Application of Artificial Intelligence in Materials Design* (exclusion: MSE1063H).

Elective Courses

APS502H, APS1005H, APS1017H, APS1022H, APS1040H, APS1050H, APS1051H, APS1052H, APS1053H, APS1080H, CHE507H, CHE1108H, CHE1148H, CHE1434H, CIV1504H, CIV1506H, CIV1507H, CIV1532H, CIV1538H, ECE537H, ECE1504H (exclusions: CSC411H, CSC2515H, ECE421H, ECE521H, ECE1513H), ECE1505H, ECE1510H, ECE1657H, ECE1778H, ECE1779H, MIE562H, MIE1413H, MIE1501H, MIE1512H, MIE1513H, MIE1517H, MIE1620H, MIE1621H, MIE1622H, MIE1623H, MIE1628H, MIE1653H, MIE1721H, MIE1723H, MIE1727H, MSE1063H (exclusion: MSE1065H).

Emphasis: Biomanufacturing (MEng only)

MEng students must successfully complete any four half courses (2.0 full-course equivalents [FCEs]) from the following list:

CHE1123H, CHE1125H, CHE1133H, CHE1134H, CHE1135H, CHE1334H, CHE1471H,
JCC1313H,
JTC1331H,
BME1459H, BME1480H.

Students may double-count one course at most towards any CHE emphasis, or towards any other emphasis in the Faculty.

Emphasis: Engineering and Globalization (MEng only)

MEng students must successfully complete **four half courses (2.0 full-course equivalents [FCEs])** from the following lists, with at least two half courses (or one full course) taken from Group A.

Group A

APS510H, APS530H, APS1420H, JCR1000Y (full-year course).

Group B

APS1015H, APS1020H, APS1024H, CHL5700H, CIV1399H, JMG2020H.

Note: Students who choose to pursue an MEng project in their home department that aligns with the Centre for Global Engineering (CGEN)'s disciplinary focus, as deemed by the CGEN Director, may count the project as one required Group B course.

Students who complete the requirements of the emphasis in Engineering and Globalization and wish to obtain a notation on their transcript should contact the Faculty Graduate Studies office.

Emphasis: Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE) (MEng only)

MEng students must successfully complete **any four of the following courses (2.0 full-course equivalents [FCEs])**:

Leadership

TEP1010H, TEP1011H, TEP1026H, TEP1027H, TEP1029H, TEP1030H, TEP1501H, TEP1502H, TEP1601H.

Entrepreneurship and Innovation

APS1012H, APS1013H, APS1015H, APS1023H, APS1033H, APS1035H, APS1036H, APS1041H, APS1061H, APS1088H.

Finance and Management

AER1601H, APS502H, APS1001H, APS1004H, APS1005H, APS1009H, APS1016H, APS1017H, APS1020H, APS1022H, APS1028H, APS1032H, APS1038H, APS1039H, APS1040H, APS1043H, APS1049H, APS1050H, APS1051H, APS1052H.

Engineering and Society

APS510H, APS1018H, APS1024H, APS1025H, APS1031H, APS1034H, APS1101H, APS1420H.

Emphasis: Forensic Engineering (MEng only)

MEng students must successfully complete **four courses (one core course and three elective courses)**.

Core Course

MSE1031H *Forensic Engineering*.

Elective Courses

AER1604H,
APS1034H, APS1039H, APS1040H, APS1101H,
BME1800H, BME1801H, BME1802H, BME1480H,
CHE561H, CHE568H, CHE1213H, CHE1431H, CHE1432H, CHE1434H, CHE1436H,
CIV510H, CIV518H, CIV1163H, CIV1171H, CIV1174H, CIV1190H, CIV1201H, CIV1279H, CIV1282H, CIV1422H, CIV1429H,
JMB1050H,
JNC2503H,
MIE507H, MIE533H, MIE1301H, MIE1303H, MIE1411H, MIE1414H, MIE1616H, MIE17108H, MIE1713H, MIE1714H, MIE1721H, MIE1723H, MIE1727H, MIE1804H,
MSE1015H, MSE1016H, MSE1022H, MSE1032H, MSE1067H.

Emphasis: Sustainable Energy (MASc, MEng, PhD)

MASc and PhD students must successfully complete:

- At least **three half courses (1.5 full-course equivalents [FCEs])** from either of the following lists below.
- A **thesis** towards their degree on a topic related to sustainable energy. Topics must be approved by the steering committee of the Institute of Sustainable Energy. Contact: Mandeep Rayat.

MEng students must successfully complete:

- **Four half courses (2.0 FCEs)** from either of the following lists below, including at least one core course (0.5 FCE).

Core Courses

APS1032H *Introduction to Energy Project Management*
MIE515H *Alternative Energy Systems*
MIE1120H *Current Energy Infrastructure and Resources*.

Elective Courses

AER507H, AER1304H, AER1315H, AER1415H,
CHE568H, CHE1053H, CHE1118H, CHE1123H, CHE1142H, CHE1143H,
CIV575H, CIV576H, CIV577H, CIV1303H, CIV1307H,
ECE533H, ECE1030H, ECE1055H, ECE1057H, ECE1059H, ECE1085H, ECE1086H, ECE1092H, ECE1094H, ECE1476H,
MIE516H, MIE517H, MIE1128H, MIE1129H, MIE1130H, MIE1240H, MIE1241H, MIE1715H,
MSE1023H, MSE1028H, MSE1058H.

Students who complete the requirements of the emphasis in Sustainable Energy will receive a notation on their transcript from the Faculty Graduate Studies Office following a recommendation from the Institute of Sustainable Energy. Contact: Mandeep Rayat.

Chemical Engineering and Applied Chemistry: Chemical Engineering and Applied Chemistry MASc, MEng, PhD Courses

An updated course list and schedule is available on the departmental website at the beginning of each session listing the time and room location for each course. Not all courses are given every year.

All students wishing to undertake research and teaching in the Department of Chemical Engineering and Applied Chemistry must successfully complete an intensive occupational health and safety training workshop, CHE2222H *Safety Workshop*, which normally takes place during the week immediately preceding the commencement of graduate courses in the Fall. In each

subsequent year of registration, students must take the Workplace Hazardous Materials Information System refresher workshop. Students registered in a graduate degree program involving research are required to participate in the non-credit seminar course JDE1000H *Ethics in Research* during their first or second session of registration.

Category A: Fundamental Courses

CHE1100H	Fundamentals of Chemical Engineering
CHE1107H	Applied Mathematics
CHE1141H	Advanced Chemical Reaction Engineering
CHE1142H	Applied Chemical Thermodynamics
CHE1143H	Transport Phenomena
CHE1310H	Chemical Properties of Polymers
JTC1134H	Applied Surface and Interface Science
JTC1135H	Applied Surface Chemistry

Category B: Specialized Courses

APS502H	Financial Engineering
APS510H	Innovative Technologies and Organizations in Global Energy Systems
APS530H	Appropriate Technology and Design for Global Development
APS1001H	Project Management
APS1004H	Human Resource Management: An Engineering Perspective
APS1005H	Operations Research for Engineering Management
APS1009H	Natural Resources Management
APS1012H	Managing Business Innovation and Transformational Change
APS1013H	Applying Innovation in Engineering and Business Operations
APS1015H	Social Entrepreneurship
APS1016H	Financial Management for Engineers
APS1017H	Supply Chain Management and Logistics
APS1018H	The Engineer in Society — Ethics, History, and Philosophy
APS1020H	International Business for Engineers
APS1022H	Financial Engineering II
APS1023H	New Production Innovation
APS1024H	Infrastructure Resilience Planning
APS1025H	Infrastructure Protection
APS1028H	Operations and Production Management for Manufacturing and Services
APS1031H	Infrastructure Planning
APS1032H	Introduction to Energy Project Management
APS1033H	Business Innovation Leading to the Future, Based on Imagineering
APS1034H	Making Sense of Accidents
APS1035H	Technology Sales for Entrepreneurs
APS1036H	Formative Experiential Entrepreneurial Learning (FEEL)
APS1043H	Writing Your Own Patent Application
APS1070H	Foundations of Data Analytics and Machine Learning
APS1088H	Entrepreneurship and Business for Engineers
APS1201H	Topics in Engineering and Public Policy 500-Level (undergraduate/graduate) Courses
APS1420H	Technology, Engineering, and Global Development
APS5500H	Research Methods and Project Execution for Graduate Student Success (exclusion: CHE1102H)
CHE507H	Process Modelling and Simulation
CHE553H	Electrochemistry
CHE561H	Risk Based Safety Management
CHE564H	Pulp and Paper Processes
CHE565H	Aqueous Process Engineering
CHE568H	Nuclear Engineering
CHE575H	Mechanical Properties of Bio-Composites and Biomaterials
CHE1053H	Electrochemistry
CHE1108H	Numerical Methods in Chemical Engineering
CHE1123H	Liquid Biofuels
CHE1125H	Modelling and Optimization of Chemical and Biomedical Networks
CHE1133H	Bioprocess Engineering (prerequisite: JCC1313H or equivalent)
CHE1134H	Advances in Bioengineering
CHE1135H	Regulatory Affairs for Industrial Biotechnology and Biopharmaceutical Products
CHE1147H	Data Mining in Engineering
CHE1148H	Process Data Analytics
CHE1150H	Industrial Water Technology
CHE1151H	Engineering Systems Sustainability

CHE1213H	Corrosion
CHE1333H	Biomaterials Engineering for Nanomedicine
CHE1334H	Organ-on-a-Chip Engineering
CHE1430H	Hydrometallurgy, Theory, and Practice (MEng only)
CHE1431H	Environmental Auditing (MEng only)
CHE1432H	Technical Aspects of Environmental Regulations (MEng only)
CHE1433H	Air Dispersion Modelling
CHE1434H	Six Sigma for Chemical Processes
CHE1435H	Fundamentals of Aerosol Physics and Chemistry
CHE1475H	Biocomposite Materials
JCB1349H	Molecular Assemblies: Structure/Function/Properties
JCC1313H	Environmental Microbiology
JCR1000Y	An Interdisciplinary Approach to Addressing Global Challenges
JNC2503H	Environmental Pathways
JTC1331H	Biomaterials Science
TEP1010H	Cognitive and Psychological Foundations of Effective Leadership
TEP1011H	Authentic Leadership: Engineering a Vibrant Future
TEP1026H	Positive Psychology for Engineers
TEP1027H	Engineering Presentations
TEP1029H	The Science of Emotional Intelligence and its Application to Leadership
TEP1030H	Engineering Careers — Theories and Strategies to Manage Your Career for the Future
TEP1501H	Leadership and Leading in Groups and Organizations
TEP1502H	Leadership in Product Design

In addition to the above courses, students may elect to take courses in other engineering or science departments where such courses are deemed relevant to the area of study. These courses require prior approval from the Graduate Coordinator.

MASc and PhD Seminar Courses

CHE1102H	Research Methods and Project Execution
CHE3001H[0]	Leading Edge Seminar Series in Chemical Engineering and Applied Chemistry

[0] Course that may continue over a program. The course is graded when completed.

Chemistry

MSc

- Fields:
  - Analytical Chemistry;
  - Environmental Chemistry;
  - Inorganic Chemistry;
  - Interdisciplinary;
  - Organic and Biological Chemistry;
  - Physical Chemistry and Chemical Physics;
  - Polymers and Materials Chemistry

PhD

- Fields:
  - Analytical Chemistry;
  - Environmental Chemistry;
  - Inorganic Chemistry;
  - Interdisciplinary;
  - Organic and Biological Chemistry;
  - Physical Chemistry and Chemical Physics;
  - Polymers and Materials Chemistry

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Biomedical Engineering
  - Chemistry, MSc, PhD
- Environmental Studies
  - Chemistry, MSc, PhD
- Next-Generation Precision Medicine
  - Chemistry, PhD

Overview

Faculty members of the Department of Chemistry are world leaders and research offerings are made in a rich array of ever evolving sub-disciplines (physical, organic, biological, materials, inorganic, theoretical, analytical, environmental, and nanochemistry). Research is conducted using state-of-the-art instrumentation housed in laboratories that have been newly built or recently renovated.

Modern facilities are available for research in the Department of Chemistry. The areas of interest cover a wide variety of topics in analytical, biological, environmental, inorganic, organic, materials, polymers, physical, and theoretical chemistry and their related interdisciplinary areas.

Full Members

Abbatt, Jonathan - BSc, PhD
Aspuru-Guzik, Alan - PhD
Batey, Robert Alexander - BA, PhD ***(Chair and Graduate Chair)***
Beharry, Andrew - BSc, PhD
Bender, Timothy - PhD
Brumer, Paul - BSc, PhD
Chan, Arthur - BS, MSc, PhD
Chan, Warren - BSc, PhD
Chin, Jik - MS, PhD
Dhirani, Al-Amin - MSc, PhD
Donaldson, D. James - PhD
Fekl, Ulrich - MSc, PhD
Georges, Michael - BS, PhD
Goh, M Cynthia - PhD
Gunning, Patrick - BS, PhD
Houry, Walid - BS, MS, PhD
Izmaylov, Artur - PhD
Jockusch, Rebecca - BA, PhD
Kanelis, Voula - PhD
Kapral, Raymond - BSc, PhD
Kay, Lewis - PhD
Kelley, Shana - BA, PhD
Kerman, Kagan - BScPhm, MSc, ScD
Kluger, Ronald - AB, AM, PhD
Kraatz, Heinz-Bernhard - BA, MC, PhD
Kumacheva, Eugenia - MSc, PhD
Lautens, Mark - BSc, PhD
Mabury, Scott - BS, PhD
Macdonald, Peter - BS, MS, PhD
McMillen, David - BSc, MS, PhD
Miller, R.J. Dwayne - BSc, PhD
Morris, Robert - BSc, PhD, Fellow NATO
Murphy, Jennifer - BCh, DChem
Nitz, Mark - BSc, PhD
Ozin, Geoffrey - BSc, PhD
Polanyi, John - MSc, PhD, DSc, FRS, FRSC
Prosser, Scott - BSc, MSc, DPhil
Schofield, Jeremy - PhD
Scholes, Greg - MSc, PhD

Seferos, Dwight - BCh, DChem
Segal, Dvira - BSc, DSc
Sherwood Lollar, Barbara - PhD
Shin, Jumi - AB, DPhil
Shoichet, Molly - PhD
Simpson, Andre - BSc, PhD
Simpson, Myrna - BS, DPhil
Song, Datong - BSc, PhD
Stephan, Douglas - BSc, PhD
Taylor, Mark - BSc, DSc
Thompson, Michael - BSc, PhD, DSc, FRSC
Tran, Helen - PhD
Voznyy, Oleksandr - BSc, MSc, PhD
Walker, Gilbert - BCh, PhD
Wania, Frank - MPH, PhD
Wheeler, Aaron - BS, PhD
Whittington, Stuart - BA, MA, PhD
Wilson, Mark - PhD
Winnik, Mitchell - BA, PhD
Woolley, G Andrew - PhD
Yudin, Andrei - BS, PhD
Zhang, Xiaoan - MS, PhD

Members Emeriti

Csizmadia, Imre - MSc, PhD
Jones, Bryan - BSc, PhD, DPhil
Krull, Ulrich - BSc, MSc, PhD
McLean, Stewart - BSc, PhD
Menzinger, Michael - MS, PhD
Robinson, Edward - BSc, PhD, DSc
Tidwell, Thomas - BS, AM, PhD
Valleau, John Philip - PhD

Associate Members

Dicks, Andy - PhD

Chemistry: Chemistry MSc

Master of Science

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the department's additional admission requirements stated below.
- Appropriate bachelor's degree from a recognized university with an average equivalent to at least a University of Toronto B+.

Program Requirements

- **Coursework.** Students must successfully complete **1.0 graduate full-course equivalent (FCE)** including at least 0.5 graduate half-course equivalent in chemistry.
- Students must participate in a **seminar** program. Attendance and presentation of a seminar are mandatory in order to receive the credit.
- In Year 1, students must complete the modules in CHM3000H *Graduate Professional Development for Research and Teaching in Chemistry* (0.5 FCE; Credit/No Credit).
- Submission of a **thesis**.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

Chemistry: Chemistry PhD

Doctor of Philosophy

Applicants may enter the PhD program via one of three routes: 1) following completion of an appropriate master's degree; 2) transfer from the University of Toronto master's program; or 3) direct entry following completion of an appropriate BSc degree.

PhD students select one of the following fields:

- Analytical Chemistry
- Environmental Chemistry
- Inorganic Chemistry
- Organic and Biological Chemistry
- Physical Chemistry and Chemical Physics
- Polymers and Materials Chemistry
- Interdisciplinary, which allows combinations with the other fields, or with other disciplines

Each field requires a minimum of 2.0 to 3.0 full-course equivalents (FCEs) from approved graduate courses, depending on the field of study and the student's academic background. The number of courses required will be determined in consultation with the supervisor. Students who have completed the master's program may be considered for a course reduction of up to 1.0 FCE in the PhD program. Specific requirements for each field follow.

Field: Analytical Chemistry

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Chemistry's additional admission requirements stated below.

- Appropriate master's degree from a recognized university with a minimum average equivalent to at least a University of Toronto B+.
- An exceptional student with an appropriate BSc degree may be admitted directly to the PhD program.
- Transfer to the PhD program may be considered during Year 1 of the master's program.

Program Requirements

- **Coursework.** Students must complete a minimum of **2.0 full-course equivalents (FCEs)** from approved graduate courses:
  - 0.5 FCE in analytical chemistry in each of the areas of spectroscopy, separation science/electrochemistry, and advanced instrumentation/data analysis.
  - An additional 0.5 FCE to support the research program.
  - The number of courses required will be determined in consultation with the supervisor. Students who have completed the master's program may be considered for a course reduction of up to 1.0 FCE in the PhD program.
- Presentation of **two seminars**. Participation in the *Analytical Chemistry Seminar* (CHM1190Y). Students must complete 25 Analytical Seminar Plus (ASP) points.
- In Year 1, students must complete the **modules in CHM3000H** *Graduate Professional Development for Research and Teaching in Chemistry* (0.5 FCE; Credit/No Credit).
- Students must complete a minimum of 18 hours (24 hours for direct-entry students) of additional **professional development training** spread evenly over the categories: Communication, Personal Effectiveness, and Research and Teaching Skills. Consult with the Graduate Office for a list of eligible activities.
- Successful completion of an **oral comprehensive field examination** in Analytical Chemistry.
- The main requirement for the PhD program is the execution of an original investigation that is presented in a **thesis**.

Program Length

4 years full-time; 5 years transfer-from-master's; 5 years direct-entry

Time Limit

6 years full-time; 7 years transfer-from-master's; 7 years direct-entry

Field: Environmental Chemistry

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Chemistry's additional admission requirements stated below.
- Appropriate master's degree from a recognized university with a minimum average equivalent to at least a University of Toronto B+.
- An exceptional student with an appropriate BSc degree may be admitted directly to the PhD program.
- Transfer to the PhD program may be considered during Year 1 of the master's program.

Program Requirements

- **Coursework.** Students must complete a minimum of **2.0 full-course equivalents (FCEs)** from approved graduate courses:
  - CHM1401H *Transport and Fate of Chemical Species in the Environment* (0.5 FCE).
  - At least one other course in Environmental Chemistry.
  - At least one CHM course to be chosen in consultation with the supervisor/supervisory committee and confirmed by the field representative.
  - The fourth course may be an approved course offered in a cognate department.
- In Year 1, students must complete the **modules in CHM3000H** *Graduate Professional Development for Research and Teaching in Chemistry* (0.5 FCE; Credit/No Credit).
- Students must complete a minimum of 18 hours (24 hours for direct-entry students) of additional **professional development training** spread evenly over the categories: Communication, Personal Effectiveness, and Research and Teaching Skills. Consult with the Graduate Office for a list of eligible activities.
- Presentation of **two seminars** (normally in Years 2 and 4). Participation in the *Environmental Chemistry Seminar* and colloquia program (CHM1590Y).
- A written **research proposal**, defended orally, on a topic other than the primary research topic delivered prior to the end of Year 2.
- Successful completion of an **oral comprehensive field examination** in Environmental Chemistry, normally completed following coursework and before the end of Year 2.
- The main requirement for the PhD program is the execution of an original investigation that is presented in a **thesis**.

Program Length

4 years full-time; 5 years transfer-from-master's; 5 years direct-entry

Time Limit

6 years full-time; 7 years transfer-from-master's; 7 years direct-entry

Field: Inorganic Chemistry

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Chemistry's additional admission requirements stated below.
- Appropriate master's degree from a recognized university with a minimum average equivalent to at least a University of Toronto B+.
- An exceptional student with an appropriate BSc degree may be admitted directly to the PhD program.
- Transfer to the PhD program may be considered during Year 1 of the master's program.

Program Requirements

- **Coursework.** Students must complete a minimum of **2.0 full-course equivalents (FCEs)** from approved graduate courses:
  - One core half course (0.5 FCE): CHM 1270 **or** CHM1266H.
- In Year 1, students must complete the modules in CHM3000H Graduate Professional Development for Research and Teaching in Chemistry (0.5 FCE; Credit/No Credit).
- Students must complete a minimum of 18 hours (24 hours for direct-entry students) of additional professional development training spread evenly over the categories: Communication, Personal Effectiveness, and Research and Teaching Skills. Consult with the Graduate Office for a list of eligible activities.
- Participation in the Inorganic Chemistry Seminar (CHM1290Y): the presentation of one seminar each year in Years 2, 3, and 4, including one on an original research proposal.
- Successful completion of an oral comprehensive field examination in Inorganic Chemistry.
- The main requirement for the PhD program is the execution of an original investigation that is presented in a thesis.

Program Length

4 years full-time; 5 years transfer-from-master's; 5 years direct-entry

Time Limit

6 years full-time; 7 years transfer-from-master's; 7 years direct-entry

Field: Organic and Biological Chemistry

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Chemistry's additional admission requirements stated below.
- Appropriate master's degree from a recognized university with a minimum average equivalent to at least a University of Toronto B+.
- An exceptional student with an appropriate BSc degree may be admitted directly to the PhD program.
- Transfer to the PhD program may be considered during Year 1 of the master's program.

Program Requirements

- **Coursework.** Students must complete a minimum of **2.0 full-course equivalents (FCEs)** from approved graduate courses:
  - At least two Organic Chemistry graduate half courses selected from CHM1040H to CHM1068H (inclusive).
  - Students may be required to take courses offered in physical organic, synthetic organic, and biological chemistry. The courses will be selected in consultation with the supervisor and confirmed by the Graduate Studies Committee field representative.
- Students must pass **six cumulative exams** in order for students to qualify to give the oral comprehensive field exam and advance to PhD candidacy. They are generally written on the first Friday of the month from October through May (inclusive).
- In Year 1, students must complete the **modules in CHM3000H** *Graduate Professional Development for Research and Teaching in Chemistry* (0.5 FCE; Credit/No Credit).
- Students must complete a minimum of 18 hours (24 hours for direct-entry students) of additional **professional development training** spread evenly over the categories: Communication, Personal Effectiveness, and Research and Teaching Skills. Consult with the Graduate Office for a list of eligible activities.
- Participation in the *Organic Chemistry Seminar* (CHM1090Y): present **two seminars**, normally in Years 2 and 4.
- Upon completion of coursework and cumulative exams, students will take an **oral comprehensive field exam** in Organic and Biological Chemistry.
- The main requirement for the PhD program is the execution of an original investigation that is presented in a **thesis**.

Program Length

4 years full-time; 5 years transfer-from-master's; 5 years direct-entry

Time Limit

6 years full-time; 7 years transfer-from-master's; 7 years direct-entry

Field: Physical Chemistry and Chemical Physics

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Chemistry's additional admission requirements stated below.
- Appropriate master's degree from a recognized university with a minimum average equivalent to at least a University of Toronto B+.
- An exceptional student with an appropriate BSc degree may be admitted directly to the PhD program.
- Transfer to the PhD program may be considered during Year 1 of the master's program.

Program Requirements

- Students may select an Experimental Physical Chemistry path requiring:
  - 2.0 full-course equivalents (FCEs) consisting of a combination of two core half courses and two other half courses. The principle is that breadth of background preparation should be the major objective in course selection.
- **Or** students may select a Theoretical Physical Chemistry path requiring:
  - 3.0 FCEs, including two core half courses. Specifics are to be determined by the research director and the student.
- In Year 1, students must complete the **modules in CHM3000H** *Graduate Professional Development for Research and Teaching in Chemistry* (0.5 FCE; Credit/No Credit).
- Students must complete a minimum of 18 hours (24 hours for direct-entry students) of additional **professional development training** spread evenly over the categories: Communication, Personal Effectiveness, and Research and Teaching Skills. Consult with the Graduate Office for a list of eligible activities.
- Presentation of **two seminars**, normally in Years 2 and 4. Participation in the *Physical Chemistry Seminar* (CHM1490Y).
- Successful completion of an **oral comprehensive field examination** in Physical Chemistry and Chemical Physics.
- The main requirement for the PhD program is the execution of an original investigation that is presented in a **thesis**.

Program Length

4 years full-time; 5 years transfer-from-master's; 5 years direct-entry

Time Limit

6 years full-time; 7 years transfer-from-master's; 7 years direct-entry

Field: Polymers and Materials Chemistry

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Chemistry's additional admission requirements stated below.
- Appropriate master's degree from a recognized university with a minimum average equivalent to at least a University of Toronto B+.
- An exceptional student with an appropriate BSc degree may be admitted directly to the PhD program.
- Transfer to the PhD program may be considered during Year 1 of the master's program.

Program Requirements

- **Coursework.** Students must complete a minimum of **2.0 full-course equivalents (FCEs)** from approved graduate courses:
  - At least one of the three core courses (CHM1206H, CHM1301H, CHM1302H).
  - A list of other courses considered appropriate to the Polymers and Materials Chemistry research area is available from the department.
- In Year 1, students must complete the **modules in CHM3000H** *Graduate Professional Development for Research and Teaching in Chemistry* (0.5 FCE; Credit/No Credit).
- Students must complete a minimum of 18 hours (24 hours for direct-entry students) of additional **professional development training** spread evenly over the categories: Communication, Personal Effectiveness, and Research and Teaching Skills. Consult with the Graduate Office for a list of eligible activities.
- Presentation of at least **three seminars** (a literature talk in Year 1 and presentations on the original research in Years 2 and 4). Participation in the *Polymers and Materials Chemistry Seminar* (CHM1390Y).
- Upon the completion of coursework, successful performance in an **oral comprehensive field examination** in Polymers and Materials Chemistry.
- The main requirement for the PhD program is the execution of an original investigation that is presented in a **thesis**.

Program Length

4 years full-time; 5 years transfer-from-master's; 5 years direct-entry

Time Limit

6 years full-time; 7 years transfer-from-master's; 7 years direct-entry

Field: Interdisciplinary

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Chemistry's additional admission requirements stated below.
- Appropriate master's degree from a recognized university with a minimum average equivalent to at least a University of Toronto B+.
- An exceptional student with an appropriate BSc degree may be admitted directly to the PhD program.
- Transfer to the PhD program may be considered during Year 1 of the master's program.
- Acceptance into this field requires a research topic of a truly interdisciplinary nature; a written request must be submitted to the Graduate Coordinator.

Program Requirements

- **Coursework.** Students must complete a minimum of **2.0 full-course equivalents (FCEs)** including one core half course from the above fields.
- In Year 1, students must complete the **modules in CHM3000H** *Graduate Professional Development for Research and Teaching in Chemistry* (0.5 FCE; Credit/No Credit).
- Students must complete a minimum of 18 hours (24 hours for direct-entry students) of additional **professional development training** spread evenly over the categories: Communication, Personal Effectiveness, and Research and Teaching Skills. Consult with the Graduate Office for a list of eligible activities.
- Presentation of at least **two seminars** (normally in Years 2 and 4). Participation in the seminar program of an existing field of Chemistry.
- Upon completion of coursework, successful completion of an **oral comprehensive field examination** in the fields of Chemistry deemed appropriate.
- The main requirement for the PhD program is the execution of an original investigation that is presented in a **thesis**.

Program Length

4 years full-time; 5 years transfer-from-master's; 5 years direct-entry

Time Limit

6 years full-time; 7 years transfer-from-master's; 7 years direct-entry

Chemistry: Chemistry MSc, PhD Courses

Not all courses are offered every year. Please consult the department each session as to course availability.

All graduate courses for degree credit must be approved by the department. Subject to departmental permission, degree students in chemistry may take a limited number of graduate courses based on fourth-year Faculty of Arts and Science courses in chemistry or a cognate discipline. Approvals of such fourth-year courses will be considered on an individual basis. Third-year arts and science courses, or their essential equivalents, will not receive degree credit.

Professional Development

CHM3000H	Graduate Professional Development for Research and Teaching in Chemistry (Credit/No Credit)

Analytical Chemistry

CHM1102H	Biosensors and Chemical Sensors
CHM1103H	Advanced Topics in Analytical Chemistry
CHM1104H	Separation Science
CHM1105H	Separations, Chromatography, and Microfluidics
CHM1106H	Lab Instrumentation
CHM1107H	The -Omics Revolution and Mass Spectrometry
CHM1150H	Advances in Electroanalytical Chemistry and Electrochemical Sensors
CHM1152H	Chemical Sensors
CHM1190Y	Analytical Chemistry Seminar (Credit/No Credit)
CHM1410H	Analytical Environmental Chemistry
CHM2014H	Research in Analytical Chemistry

Environmental Chemistry

CHM1401H	Transport and Fate of Chemical Species in the Environment
CHM1404H	Molecular Analysis of Natural Systems
CHM1410H	Analytical Environmental Chemistry
CHM1415H	Atmospheric Chemistry
CHM1420H	Environmental Chemistry of Soil
CHM1425H	Modelling the Fate of Organic Chemicals in the Environment
CHM1430H	Advanced Topics in Atmospheric Chemistry
CHM1590Y	Environmental Chemistry Seminar (Credit/No Credit)
CHM2534H	Research in Environmental Chemistry
EES1105H	Soil Contamination Chemistry

Inorganic Chemistry

CHM1204H	Organometallic Chemistry and Catalysis
CHM1205H	Inorganic Reaction Mechanisms
CHM1206H	Solid State Chemistry: Structure-Property Relations
CHM1255H	Supramolecular Chemistry
CHM1258H	Reactions of Coordinated Ligands
CHM1263H	Bio-inorganic Chemistry
CHM1268H	X-Ray Crystallography
CHM1269H	Nanochemistry: A Chemistry Approach to Nanomaterials
CHM1270H	Frontiers in Inorganic Chemistry (core course)
CHM1290Y	Inorganic Chemistry Seminar (Credit/No Credit)
CHM2034H	Research in Inorganic Chemistry

Organic and Biological Chemistry

CHM1003H	Physical Organic Chemistry II
CHM1004H	Synthetic Organic Chemistry
CHM1005H	Applications of Spectroscopy in Organic Structure Determination
CHM1006H	Bioorganic Chemistry
CHM1008H	Biological Chemistry
CHM1040H	Modern Organic Synthesis
CHM1045H	Modern Physical Organic Chemistry
CHM1051H	Current Topics in Chemical Biology
CHM1054H	Topics in Bio-organic Chemistry
CHM1056H	Techniques for Studying the Chemical, Structural, and Dynamic Properties of Biomolecules
CHM1057H	Topics in Synthetic Organic Chemistry
CHM1059H	Chemical Biology in Complex Systems
CHM1060H	Advanced Topics in Synthetic Organic Chemistry
CHM1068H	Topics in Biological and Medicinal Chemistry
CHM1090Y	Organic Chemistry Seminar (Credit/No Credit)
CHM2044H	Research in Organic Chemistry

Physical and Theoretical Chemistry

CHM1441H	Mathematical Methods
CHM1443H	Intermediate Quantum Mechanics
CHM1446H	Quantum Computation and Information Theory
CHM1448H	Modelling of Biochemical Systems
CHM1450H	Nanoscale Characterization with Scan Probe Microscopy
CHM1455H	NMR Spectroscopy I: Basic Theory and Applications for Biological Chemists
CHM1456H	NMR Spectroscopy II: Advanced Theory and Application
CHM1464H	Topics in Statistical Mechanics
CHM1478H	Quantum Mechanics for Physical Chemists (core course)
CHM1480H	Basic Statistical Mechanics (core course)
CHM1481H	Reaction Kinetics and Dynamics
CHM1482H	Laser Spectroscopy and Photophysics
CHM1490Y	Physical Chemistry Seminar (Credit/No Credit)
CHM2024H	Research in Physical Chemistry

Polymers and Materials Chemistry

CHM1206H	Solid State Chemistry: Structure-Property Relations
CHM1300H	Polymer Chemistry
CHM1301H	Organic and Inorganic Polymer Synthesis
CHM1302H	Physical Chemistry of Polymers
CHM1304H	Organic Materials Chemistry
CHM1390Y	Polymer and Materials Chemistry Seminar (Credit/No Credit)
CHM2304H	Research in Polymer and Materials Chemistry

Cinema Studies

Cinema Studies: Introduction

Faculty Affiliation

Arts and Science

Degree Programs

Cinema Studies

MA and PhD

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Diaspora and Transnational Studies
  - Cinema Studies, MA
- Sexual Diversity Studies
  - Cinema Studies, MA
- Women and Gender Studies
  - Cinema Studies, MA

Overview

The Cinema Studies Institute (CSI) comprises 13 full-time faculty, whose competencies and research emphases contribute to a curriculum that encompasses film and media history, theory, analysis, and cultural practices. Specializations include: early cinema, technology, sound studies, architecture and space, animal studies, film philosophy, media archaeology, aboriginal cinemas, national cinemas, animation, critical race theory, postcolonial and subaltern studies, gender, migration and diaspora, documentary, digital and expanded cinemas, avant-garde, and experimental film.

The facilities, both at Innis College and in the Media Commons at Robarts Library, are equipped with the latest technologies; include a lending library dedicated to film scholarship archival and restoration facilities; several seminar rooms; mid-sized classrooms; and a lecture and screening facility, the Innis Town Hall, seating 150 visitors and boasting 35 mm, 16 mm, and digibeta capabilities. Students benefit from both the peerless campus resources as well as those institutions associated with Toronto's wider film and media culture, including the Film Reference Library, TIFF, Bell Lightbox, a multitude of film festivals, and a highly differentiated media production and distribution landscape.

Past graduates of CSI now teach at universities across the continent and are also employed at film and media-related institutions ranging from the Toronto International Film Festival Group to the Pacific Film Archive, serving as respected executives, creators, and curators. The institute is committed to providing students with a rigorous, engaging, and memorable education. Equally important, the institute aims to introduce graduates to a close-knit academic community that shares a common goal: exploring the depth and breadth of film and media scholarship in an environment that stimulates thought and fosters collegiality.

Cinema Studies: Cinema Studies MA

Master of Arts

Program Description

The course-based, one-year MA program offers students the option, during their third term, of pursuing either a professional internship or a major research paper of roughly 40 to 50 pages written under the supervision of a faculty advisor elected by the student. Students have the option to concurrently enrol in one of the collaborative specializations at U of T, such as Sexual Diversity Studies, Women and Gender Studies, or Transnational and Diaspora Studies, which entails also registering for their specific core courses. The MA in Cinema Studies is a full-time program.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Cinema Studies Institute's additional admission requirements stated below.
- Successful completion of an appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university.
- Minimum B+ standing, demonstrated by an average grade in the final year, or over senior-level courses.
- Successful completion of a minimum of 6.0 full-course equivalents (FCEs) in cinema studies, or comparable program preparation.
- A letter of intent addressing the academic goals an applicant wishes to pursue in the program.
- Three letters of recommendation.
- Transcripts from all post-secondary institutions.
- An academic writing sample of no more than 3,000 words.

Program Requirements

- The MA is a coursework-only program and therefore does not require a thesis.
- Students must successfully complete a total of **4.0 full-course equivalents (FCEs)** over the course of an academic year, normally extending from September until August, as follows:
  - 1.0 FCE mandatory core courses: CIN1101H and CIN1102H.
  - 1.0 FCE devoted to either the writing of a major research paper (CIN1006Y) or pursuing an internship (CIN1007Y).
  - 2.0 FCEs may be completed in the following way:
    - from elective CIN courses chosen from rotating special topics courses, also under the CIN rubric, but possibly cross-listed with another department, depending on the instructor's departmental home.
    - from film-related courses offered by other units (non-CIN designator) but approved as relevant to the Cinema Studies master's program curriculum.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

Cinema Studies: Cinema Studies PhD

Doctor of Philosophy

Program Description

Launched in September 2013, the Doctor of Philosophy program in Cinema Studies addresses the changing role of moving image media within global culture. Past and present configurations of cinema are studied through a constellation of theoretical, textual, social, and historical rubrics. The core curricular offerings engage with debates and questions that persist within the scholarship while also examining how the field contends with emerging disciplinary issues and intermedial formats today and at earlier historical junctures. Throughout the program of study, the synthesis of history and theory, textual analysis, and cultural study is emphasized.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Cinema Studies Institute's additional admission requirements stated below.
- Letter of intent outlining the academic ambitions, including possible thesis topic, the applicant aims to pursue in the program.
- Three letters of recommendation.
- A writing sample.
- Transcripts from all post-secondary institutions.

Program Requirements

- The student's program of study must be approved by the Cinema Studies Institute (CSI).
- **Coursework.** Students must successfully complete a total of **4.0 full-course equivalents (FCEs)** as follows:
  - 1.0 FCE required courses: CIN2100H *History and Historiography of Cinematic Media* and CIN2101H *Pressures on the Cinematic.* Students who have already taken these courses, or their equivalent, will be required to enrol in alternate course selections, with the Graduate Coordinator's approval.
  - 1.5 FCEs offered in cinema studies.

    - 1.0 FCE elective courses offered in cinema studies or by other graduate units and chosen in consultation with the student's faculty advisor.
    - 0.5 FCE: CIN2999H *Research Seminar in Cinema Studies* (Credit/No Credit).
- All coursework is normally completed by December of Year 2 of study, except for CIN2999H which may extend beyond that date.
- Completion of **one Qualifying Examination**. Students generally undertake the Qualifying Examination after the completion of coursework in Year 2 of study.
    - The Qualifying Examination covers two special fields and has two components: a written examination and an oral examination. These exams are scheduled by the student's supervisor and committee members. Examinations are marked on a pass/fail basis. (Should the committee deem their work exceptional, students may pass with distinction.) Students are allowed two attempts to pass the written examination and two attempts to pass the oral examination.
- Students must have completed all requirements for the degree, exclusive of thesis research, by the end of Year 3 of study in order to remain in good academic standing and in order to achieve candidacy.
- Completion of a **PhD dissertation** based on original research conducted by the candidate on an approved topic in cinema studies. The dissertation proposal should be approved by the supervisor no later than May of Year 2 of PhD studies. Each student is required to meet at least annually with a supervisory committee, which includes the supervisor and two faculty members, to review academic progress, and to consult about future directions.
- The thesis must be presented within six years of first enrolment in the PhD program. Successful **defence at the SGS Doctoral Final Oral Examination**.

Program Length

4 years full-time

Time Limit

6 years full-time

Cinema Studies: Cinema Studies MA, PhD Courses

Not all elective courses are offered every year. The department should be consulted each session as to elective and non-CIN course offerings.

MA Core Courses

CIN1101H	Theories and Practices of Cinema
CIN1102H	Key Developments in Film History

Plus one of:

CIN1006Y	Major Research Paper in Cinema Studies
CIN1007Y	Internship in Cinema Studies

PhD Core Courses

CIN2100H	History and Historiography of Cinematic Media
CIN2101H	Pressures on the Cinematic
CIN2999H	Research Seminar in Cinema Studies (Credit/No Credit)

Elective Courses (Subject to Change)

CIN1005H	Special Studies in Cinema
CIN1008H	Independent Research and Reading in Cinema Studies
CIN1011H	Colour and the Moving Image
CIN1100H	The Textual Object
CIN1772H	The Politics of Non-Fiction Film
CIN3002H	Cinema and Nation
CIN3004H	Documentary and Non-fiction Media
CIN3006H	Media and Philosophy
CIN3008H	Topics in Film and Media History
CIN3010H	Topics in Film and Media Theory
CIN6153H	Race and Cinema
CIN6803H	Intertextuality in Feminist Cinema: The Counter-Cinematic Impulse
JFF1100H	Surrealism and French Cinema
JFF1101H	The Art of Exploration: How to Think the World

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Engineering Education
  - Civil Engineering, MASc, PhD
- Environmental Studies
  - Civil Engineering, MASc, MEng, MEngCEM, PhD
- Psychology and Engineering
  - Civil Engineering, MASc, PhD

Overview

The research conducted in the Department of Civil and Mineral Engineering is addressing the need for innovative solutions to society's needs, from the deep underground to the world's tallest structures. The dedicated students, staff, and professors are pursuing exciting research ranging from nanoscale investigations into water contamination and concrete properties, to the large-scale tests of structures under full-scale simulated earthquakes, to development of real-time mass transit models to solve urban congestion. Research is informed by extensive collaboration and interaction with industry and government partners. Facilities and breadth of research expertise are among the best in the world, offering great opportunities for involvement in ground-breaking research.

The Department of Civil and Mineral Engineering is organized into five interdisciplinary research themes: Cities & Infrastructure; Complex Systems; Energy & Environment; Mining & Subsurface Systems; and Transformative Technologies. These themes encompass the traditional civil engineering areas of Structural Engineering; Transportation Engineering; Environmental Engineering; Building Engineering and Construction Management; and Mining and Geomechanics.

Civil and Mineral Engineering: Civil Engineering MASc

Master of Applied Science

Program Description

The MASc program includes a foundational base of graduate courses followed by a research thesis. Many research projects involve industrial partnerships and networking opportunities, project management experience, and collaboration with leading experts.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Civil Engineering's additional admission requirements stated below.
- A completed undergraduate degree equivalent to a four-year University of Toronto program with a minimum final-year grade point average (GPA) of a mid B (3.0 out of 4.0, or 75%). Required grades must be achieved in each of the final two years of undergraduate study. Competitive admission averages are typically near or above 80% (A–).
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- Students who do not possess an undergraduate degree in civil engineering may be required to take more than the usual time and number of courses.

Program Requirements

- Each student, in consultation with a staff member at the beginning of the program, will establish the distribution of time between coursework and thesis or design project.
- **Coursework.** Normally, students must complete a minimum of **2.5 full-course equivalents (FCEs)** (five half courses).
- **Research thesis.**
- Students must participate in the non-credit seminar course JDE1000H *Ethics in Research* during their first or second session of registration.
- In addition to the core research area, students have the option of completing an emphasis in Sustainable Energy as part of their degree program. Please see details in the Civil Engineering MASc, MEng, PhD Emphases section.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Civil and Mineral Engineering: Civil Engineering MEng

Master of Engineering

Program Description

The MEng program is course based and intended to provide continuing and advanced education for recent graduates and civil engineers in professional practice. The program can be taken on a full-time, extended full-time, or part-time basis.

Full-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Civil Engineering's additional admission requirements stated below.
- A completed undergraduate degree equivalent to a four-year University of Toronto program with a minimum final-year grade point average (GPA) of a mid-B (3.0 out of 4.0 or 75%). Required grades must be achieved in each of the final two years of undergraduate study.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- Students who do not possess an undergraduate degree in civil engineering may be required to take more than the usual time and number of courses.

Program Requirements

- Each student, in consultation with a staff member at the beginning of the program, will establish the distribution of time between coursework and thesis or design project.
- **Coursework.** Normally, students must complete **5.0 full-course equivalents (FCEs)** (10 half courses). Up to two half courses (1.0 FCE) may be replaced by a research/design project.
- Students have the option of completing an emphasis in Advanced Water Technologies; Analytics; Building Science; Concrete; Construction Management; Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); Environmental Engineering; Forensic Engineering; Geomechanics; Structural Engineering; Sustainable Energy; Sustainable Urban Systems; or Transportation Engineering and Planning as part of their degree program. Please see details in the Civil Engineering MASc, MEng, PhD Emphases section.

Program Length

3 sessions (typical registration sequence: F/W/S)

Time Limit

3 years

Extended Full-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Civil Engineering's additional admission requirements stated below.
- A completed undergraduate degree equivalent to a four-year University of Toronto program with a minimum final-year grade point average (GPA) of a mid-B (3.0 out of 4.0 or 75%). Required grades must be achieved in each of the final two years of undergraduate study.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- Students who do not possess an undergraduate degree in civil engineering may be required to take more than the usual time and number of courses.

Program Requirements

- Each student, in consultation with a staff member at the beginning of the program, will establish the distribution of time between coursework and thesis or design project.
- Coursework. Normally, students must complete 5.0 full-course equivalents (FCEs) (10 half courses). Up to two half courses (1.0 FCE) may be replaced by a research/design project.
- Students are expected to complete the requirements in six sessions (two years) and are limited to six half courses per year and three half courses per session.
- Students have the option of completing an emphasis in Advanced Water Technologies; Analytics; Building Science; Concrete; Construction Management; Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); Environmental Engineering; Forensic Engineering; Geomechanics; Structural Engineering; Sustainable Energy; Sustainable Urban Systems; or Transportation Engineering and Planning as part of their degree program. Please see details in the Civil Engineering MASc, MEng, PhD Emphases section.

Program Length

6 sessions extended full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years

Part-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Civil Engineering's additional admission requirements stated below.
- A completed undergraduate degree equivalent to a four-year University of Toronto program with a minimum final-year grade point average (GPA) of a mid-B (3.0 out of 4.0 or 75%). Required grades must be achieved in each of the final two years of undergraduate study.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- Students who do not possess an undergraduate degree in civil engineering may be required to take more than the usual time and number of courses.

Program Requirements

- Each student, in consultation with a staff member at the beginning of the program, will establish the distribution of time between coursework and thesis or design project.
- **Coursework.** Normally, students must complete **5.0 full-course equivalents (FCEs)** (10 half courses). Up to two half courses (1.0 FCE) may be replaced by a research/design project.
- Students are limited to four half courses per year and two half courses per session. Students normally complete the requirements in nine sessions.
- Students have the option of completing an emphasis in Advanced Water Technologies; Analytics; Building Science; Concrete; Construction Management; Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); Environmental Engineering; Forensic Engineering; Geomechanics; Structural Engineering; Sustainable Energy; Sustainable Urban Systems; or Transportation Engineering and Planning as part of their degree program. Please see details in the Civil Engineering MASc, MEng, PhD Emphases section.

Program Length

9 sessions

Time Limit

6 years

Civil and Mineral Engineering: Civil Engineering PhD

Doctor of Philosophy

Program Description

The PhD program is designed for outstanding individuals interested in a rewarding career in fundamental or applied research. This program involves advanced courses and an intensive research program culminating in a thesis.

Applicants may enter the PhD program via one of three routes: 1) following completion of an MASc degree in engineering, mathematics, physics, or chemistry; 2) transfer from the University of Toronto MASc program; 3) direct entry following completion of a bachelor’s degree.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Civil Engineering's additional admission requirements stated below.
- A completed undergraduate degree equivalent to a four-year University of Toronto program with a minimum final-year grade point average (GPA) of B+ (3.3 out of 4.0 or 78%). Required grades must be achieved in each of the final two years of undergraduate study. Competitive admission averages are typically near or above 80% (A–).

- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- Applicants must satisfy the department of the ability to undertake advanced research.
- Admission directly from a bachelor's degree is permitted in exceptional cases.
- If a student transfers from a master's degree program to a PhD program, courses taken during the master's program may be applied to the PhD program.

Program Requirements

- **Students with an MASc degree** (or equivalent in the same area of study) must complete a minimum of **2.0 full-course equivalents (FCEs)** (four half courses).
- **Students with an MEng degree** must complete a minimum of **4.5 FCEs** (nine half courses). Up to 3.0 FCEs (six graduate half courses) may be used from the MEng program towards the PhD course requirements.
- Students enrolled in the MASc degree program who **transfer** to the PhD program must complete a total of **4.5 full-course equivalents** (**FCEs)** (nine half courses).
- For **direct-entry** students, more FCEs may be required depending on the student's background preparation. It is normally expected that at least one of the half courses will be taken outside of the student's principal area of research.
- **Comprehensive examination** after completing most of the coursework and preferably within one year after first enrolment in the PhD program. This examination consists of a four- to five-day take-home written examination, followed approximately a week later by an oral examination. The examination is administered by a Comprehensive Examination Committee created and supervised by the department's Graduate Studies Committee.
- **Residence.** Students normally must spend at least two academic years of their program on campus on a full-time basis.
- The academic program must be approved by the department's Graduate Studies Committee during the student's first session.
- Students must participate in the non-credit seminar course JDE1000H *Ethics in Research* during their first or second session of registration.
- Students have the option of completing an emphasis in Sustainable Energy as part of their degree program. Please see details in the Civil Engineering MASc, MEng, PhD Emphases section.

Program Length

4 years full-time; 5 years transfer-from-master's; 5 years direct-entry

Time Limit

6 years full-time; 7 years transfer-from-master's; 7 years direct-entry

Civil and Mineral Engineering: Civil Engineering MASc, MEng, PhD Emphases

Emphasis: Advanced Water Technologies (MEng only)

MEng students must successfully complete a total of **2.0 full-course equivalents (FCEs)** (four half courses). This includes at least one course (0.5 FCE) selected from the core course list. The remaining courses must be selected from the elective course list.

- Core courses (complete at least one):
  - CHE1150H *Industrial Water Technology*
  - CIV1308H *Physical and Chemical Treatment Processes*
  - CIV1309H *Biological Treatment Processes*
  - CIV1311H *Advanced and Sustainable Drinking Water Treatment*
- Elective courses (complete remaining courses):
  - CHE565H *Aqueous Process Engineering*
  - CHE1213H *Corrosion*
  - CHE1430H *Hydrometallurgy Theory and Practice*
  - CIV541H *Environmental Biotechnology*
  - CIV549H *Groundwater Flow and Contamination*
  - CIV550H *Water Resources Engineering*
  - CIV1303H *Water Resources Systems Modeling*
  - CIV1319H *Chemistry and Analysis of Water and Wastes*
  - CIV1330H *Water, Sanitation, Hygiene, and Global Health*
  - CIV1399H *Special Studies in Civil Engineering* (for example, Water Sanitation and Hygiene; Treatment Wetlands; the topic is subject to obtaining approval from the student's graduate unit)
  - CIV1499H *Special Studies in Civil Engineering* (for example, Fundamentals of Acid Mine Drainage; the topic is subject to obtaining approval from the student's graduate unit).
  - JCC1313H *Environmental Microbiology*
  - JNC2503H *Environmental Pathways*
  - MIE1807H *Principles of Measurements*
  - STA1004H *Introduction to Experimental Design.*

Enrolment Contact

Enrolment in the emphasis is permitted at any time during the MEng program. After students are admitted to the normal MEng program, students may contact Prof. Ron Hofmann, (416) 946-7508.

Upon successful completion of the emphasis requirements and the successful completion of the MEng degree requirements, students will receive a transcript notation from the Faculty Graduate Studies office (subject to Prof. Hofmann's recommendation).

Emphasis: Analytics (MEng only)

To be admitted to the emphasis in Analytics, MEng students must first successfully complete a **prerequisite course APS1070H (0.5 full-course equivalent [FCE])**.

Subsequently, to earn the emphasis, students must successfully complete **four additional half courses (2.0 FCEs)** from the list of core courses or elective courses. These must include at least one core course; the remaining courses must be selected from the list of elective courses.

Students must have completed the prerequisite course APS1070H before taking any of the core courses.

Prerequisite Course

APS1070H *Foundations of Data Analytics and Machine Learning*

Core Courses

CHE1147H *Data Mining in Engineering*
ECE1513H *Introduction to Machine Learning* (exclusions: CSC411H, CSC2515H, ECE421H, ECE521H, ECE1504H)
MIE1624H *Introduction to Data Science and Analytics*
MSE1065H *Application of Artificial Intelligence in Materials Design* (exclusion: MSE1063H)

Elective Courses

APS502H, APS1005H, APS1017H, APS1022H, APS1040H, APS1050H, APS1051H, APS1052H, APS1053H, APS1080H, CHE507H, CHE1108H, CHE1148H, CHE1434H, CIV1504H, CIV1506H, CIV1507H, CIV1532H, CIV1538H ECE537H, ECE1504H (exclusions: CSC411H, CSC2515H, ECE421H, ECE521H, ECE1513H), ECE1505H, ECE1510H, ECE1657H, ECE1778H, ECE1779H
MIE562H, MIE1413H, MIE1501H, MIE1512H, MIE1513H, MIE1517H, MIE1620H, MIE1621H, MIE1622H, MIE1623H, MIE1628H, MIE1653H, MIE1721H, MIE1723H, MIE1727H
MSE1063H (exclusion: MSE1065H).

Emphasis: Building Science (MEng only)

MEng students must successfully complete at least **six half courses (3.0 full-course equivalents [FCEs])** with a combination of core and elective courses as detailed below. One or two of the optional courses may be a one-session (CIV1001H) or two-session (CIV1002Y) project (not listed below). Other courses may be considered but will require approval of the Building Science emphasis coordinator.

Core Courses (take at least four):

CIV575H *Building Science*
CIV576H *Sustainable Buildings*
CIV578H *Design of Building Enclosures*
CIV1282H *Case Studies in Building Science*
CIV1320H *Indoor Air Quality*
MIE507H *HVAC Fundamentals*.

Elective Courses (others can be approved by the emphasis coordinator):

CIV514H, CIV536H, CIV577H, CIV1279H, CIV1299H, MIE515H, MIE1240H.

Emphasis: Concrete (MEng only)

MEng students must successfully complete **six of the following technical courses (3.0 full-course equivalents [FCEs]**, one or two of which may be a one-session (CIV1001H) or two-session (CIV1002Y) project (not listed below). Other courses may be considered but will require approval of the Concrete emphasis coordinator.

CIV514H, CIV517H, CIV1201H, CIV1250H, CIV1252H, CIV1260H, CIV1262H, CIV1275H, CIV1504H.

Emphasis: Construction Management (MEng only)

MEng students must successfully complete **six of the following technical courses (3.0 full-course equivalents [FCEs]**, one or two of which may be a one-session (CIV1001H) or two-session (CIV1002Y) project (not listed below). Other courses may be considered but will require approval of the Construction Management emphasis coordinator.

APS1001H, APS1004H, APS1005H, APS1017H, CIV1279H, CIV1281H, CIV1299H, CIV1307H, CIV1504H, MIE562H, MIE1413H.

Emphasis: Engineering and Globalization (MEng only)

MEng students must successfully **complete four half courses (2.0 full-course equivalents [FCEs])** from the following lists, with at least two half courses (or one full course) chosen from Group A.

Group A

APS510H, APS530H, APS1420H, JCR1000Y (full-year course).

Group B

APS1015H, APS1020H, APS1024H, CHL5700H, CIV1399H, JMG2020H.

Note: Students who choose to pursue an MEng project in their home department that aligns with the Centre for Global Engineering (CGEN)'s disciplinary focus, as deemed by the CGEN Director, may count the project as one required Group B course.

Students who complete the requirements of the emphasis in Engineering and Globalization and wish to obtain a notation on their transcript should contact the Faculty Graduate Studies office.

Emphasis: Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE) (MEng only)

MEng students must successfully complete **any four of the following courses (2.0 full-course equivalents [FCEs])**:

Leadership

TEP1010H, TEP1011H, TEP1026H, TEP1027H, TEP1029H, TEP1030H, TEP1501H, TEP1502H, TEP1601H

Entrepreneurship and Innovation

APS1012H, APS1013H, APS1015H, APS1023H, APS1033H, APS1035H, APS1036H, APS1041H, APS1061H, APS1088H

Finance and Management

AER1601H, APS502H, APS1001H, APS1004H, APS1005H, APS1009H, APS1016H, APS1017H, APS1020H, APS1022H, APS1028H, APS1032H, APS1038H, APS1039H, APS1040H, APS1043H, APS1049H, APS1050H, APS1051H, APS1052H

Engineering and Society

APS510H, APS1018H, APS1024H, APS1025H, APS1031H, APS1034H, APS1101H, APS1420H.

Emphasis: Environmental Engineering (MEng only)

MEng students must successfully complete **six of the following technical courses (3.0 full-course equivalents [FCEs]**, one or two of which may be a one-session (CIV1001H) or two-session (CIV1002Y) project (not listed below). Other courses may be considered but will require approval of the Environmental Engineering emphasis coordinator.

CHE1134H, CHE1150H, CHE1180H, CHE1431H, CHE1432H, CHL5903H,
CIV541H, CIV549H, CIV550H, CIV577H, CIV1303H, CIV1307H, CIV1308H, CIV1311H, CIV1319H, CIV1320H, CIV1399H, ENV1001H, ENV1701H,
JCC1313H,
JNC2503H,
MIE1240H.

Emphasis: Forensic Engineering (MEng only)

MEng students must successfully complete **four courses (one core course and three elective courses)** from the list below.

Core Course

MSE1031H *Forensic Engineering*.

Elective Courses

AER1604H,
APS1034H, APS1039H, APS1040H, APS1101H,
BME1480H, BME1800H, BME1801H, BME1802H,
CHE561H, CHE568H, CHE1213H, CHE1431H, CHE1432H, CHE1434H, CHE1436H,
CIV510H, CIV518H, CIV1163H, CIV1171H, CIV1174H, CIV1190H, CIV1201H, CIV1279H, CIV1282H, CIV1422H, CIV1429H,
JMB1050H,
JNC2503H,
MIE507H, MIE533H, MIE566H, MIE1301H, MIE1303H, MIE1411H, MIE1414H, MIE1616H, MIE1708H, MIE1713H, MIE1714H, MIE1721H, MIE1723H, MIE1727H, MIE1804H,
MSE1015H, MSE1016H, MSE1022H, MSE1032H, MSE1067H.

Emphasis: Geomechanics (MEng only)

MEng students must successfully complete **six of the following technical courses (3.0 full-course equivalents [FCEs]**, one or two of which may be a one-session (CIV1001H) or two-session (CIV1002Y) project (not listed below). Other courses may be considered but will require approval of the Geomechanics emphasis coordinator.

CIV523H, CIV1404H, CIV1419H, CIV1420H, CIV1429H, CIV1498H, CIV1499H,
MIN540H, MIN565H.

Emphasis: Structural Engineering (MEng only)

MEng students must successfully complete **six of the following technical courses (3.0 full-course equivalents [FCEs]**, one or two of which may be a one-session (CIV1001H) or two-session (CIV1002Y) project (not listed below). Other courses may be considered but will require approval of the Structural Engineering emphasis coordinator.

CIV510H, CIV514H, CIV515H, CIV517H, CIV518H, CIV519H, CIV1163H, CIV1164H, CIV1167H, CIV1169H, CIV1171H, CIV1174H, CIV1175H, CIV1180H, CIV1361H.

Emphasis: Sustainable Energy (MASc, MEng, PhD)

MASc and PhD students must successfully complete:

- At least **three half courses (1.5 full-course equivalents [FCEs])** from either of the following lists below.
- A **thesis** towards their degree on a topic related to sustainable energy. Topics must be approved by the steering committee of the Institute of Sustainable Energy. Contact: Mandeep Rayat.

MEng students must successfully complete:

- **Four half courses (2.0 FCEs)** from either of the following lists below, including at least one core course (0.5 FCE).

Core Courses

APS1032H *Introduction to Energy Project Management*
MIE515H *Alternative Energy Systems*
MIE1120H *Current Energy Infrastructure and Resources*.

Elective Courses

AER507H, AER1304H, AER1315H, AER1415H,
CHE568H, CHE1053H, CHE1118H, CHE1123H, CHE1142H, CHE1143H,
CIV575H, CIV576H, CIV577H, CIV1303H, CIV1307H,
ECE533H, ECE1030H, ECE1055H, ECE1057H, ECE1059H, ECE1085H, ECE1086H, ECE1092H, ECE1094H, ECE1476H,
MIE516H, MIE517H, MIE1128H, MIE1129H, MIE1130H, MIE1240H, MIE1715H,
MSE1023H, MSE1028H, MSE1058H.

Students who complete the requirements of the emphasis in Sustainable Energy will receive a notation on their transcript from the Faculty Graduate Studies Office following a recommendation from the Institute of Sustainable Energy. Contact: Mandeep Rayat.

Emphasis: Sustainable Urban Systems (MEng only)

MEng students must successfully complete **six of the following technical courses (3.0 full-course equivalents [FCEs]**, one or two of which may be a one-session (CIV1001H) or two-session (CIV1002Y) project (not listed below). Other courses may be considered but will require approval of the Sustainable Urban Systems emphasis coordinator.

APS510H, APS1024H, APS1025H,
CIV514H, CIV516H, CIV531H, CIV575H, CIV576H, CIV577H, CIV1201H, CIV1252H, CIV1280H, CIV1303H, CIV1307H, CIV1535H,
ECE1092H,
ENV1001H,
MIE515H, MIE1120H, MIE1240H, MIE1715H.

Emphasis: Transportation Engineering and Planning (MEng only)

MEng students must successfully complete **six of the following technical courses (3.0 full-course equivalents [FCEs]**, one or two of which may be a one-session (CIV1001H) or two-session (CIV1002Y) project (not listed below). Other courses may be considered but will require approval of the Transportation Engineering and Planning emphasis coordinator.

CIV516H, CIV531H, CIV536H, CIV1307H, CIV1506H, CIV1508H, CIV1532H, CIV1535H, CIV1536H, CIV1538H.

Civil and Mineral Engineering: Civil Engineering MASc, MEng, PhD Courses

Not all courses are given every year. Some courses may require a prerequisite. Please consult the department.

Civil and Mineral Engineering: Cities Engineering and Management MEngCEM

Master of Engineering in Cities Engineering and Management

Program Description

Cities are the economic engines of the world. Highly skilled professionals, armed with both technical expertise and a fundamental understanding of the cross-disciplinary issues, are needed to help our cities tackle challenges to ensure the well-being of their inhabitants and economies. In the Master of Engineering: Cities Engineering and Management (MEngCEM) program, students prepare for rewarding careers in government and the private sector, addressing the critical issues and growing needs of urban centres.

To proactively respond to the changing needs of cities, the MEngCEM program offers students a practicum to apply what they have learned in the classroom.

The MEngCEM program can be completed through full-time studies over three continuous sessions or through an extended full-time (EFT) option over six sessions.

Full-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Civil Engineering's additional admission requirements stated below.
- A completed undergraduate degree equivalent to a four-year University of Toronto program with a minimum final-year grade point average (GPA) of mid-B (3.0 out of 4.0 or 75%). Competitive admission averages are typically near or above 80% (A–).
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- Applicants with backgrounds in an applied science other than engineering may be admitted.
- Applicants must have one year of work experience before admission to the program.

Program Requirements

- Students must successfully complete a total of **5.0 full-course equivalents (FCEs)** as follows:
  - 4.0 FCEs (eight half courses) consisting of
    - four core courses:
      - CEM1001H *The Challenges of Urban Policy-Making*
      - CEM1002H *Data Analytics and Cities*
      - CEM1003H *Infrastructure and Urban Prosperity*
      - CEM1004H *Cities as Complex Systems*
    - three infrastructure engineering electives in one of eight specialization areas (see course listing below)
    - one technology management elective (see course listing below).
  - 1.0 FCE Practicum typically completed during the Summer of Year 1.

Program Length

3 sessions (typical registration sequence: F/W/S)

Time Limit

3 years

Extended Full-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Civil Engineering's additional admission requirements stated below.
- A completed undergraduate degree equivalent to a four-year University of Toronto program with a minimum final-year grade point average (GPA) of mid-B (3.0 out of 4.0 or 75%). Competitive admission averages are typically near or above 80% (A–).
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must

demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- Applicants with backgrounds in an applied science other than engineering may be admitted.
- Applicants must have one year of work experience before admission to the program.

Program Requirements

- Students must successfully complete a total of **5.0 full-course equivalents (FCEs)** as follows:
  - 4.0 FCEs (eight half courses) consisting of
    - four core courses:
      - CEM1001H *The Challenges of Urban Policy-Making*
      - CEM1002H *Data Analytics and Cities*
      - CEM1003H *Infrastructure and Urban Prosperity*
      - CEM1004H *Cities as Complex Systems*
    - three infrastructure engineering electives in one of eight specialization areas (see course listing below)
    - one technology management elective (see course listing below).
  - 1.0 FCE Practicum typically completed during the Summer of Year 2.

Program Length

6 sessions (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years

Civil and Mineral Engineering: Cities Engineering and Management MEngCEM Courses

Courses must be approved by the Program Director.

Core Courses

CEM1001H	The Challenges of Urban Policy-Making
CEM1002H	Empirical Study of Cities
CEM1003H	Infrastructure and Urban Prosperity
CEM1004H	Cities as Complex Systems
CEM1000Y	Cities Engineering and Management Practicum

Infrastructure Engineering Course Electives

Students must choose three courses in one of the following specialization areas: Cyber Security, Communications Networks, Environmental Issues for Healthy Cities, Operations Research, Resilience of Critical Infrastructure, Sustainable Energy Systems, Transportation, Urban Structures.

The course selection (subject to change) in each infrastructure engineering specialization area is:

Cybersecurity

ECE568H	Computer Security Planning
ECE1508H	Special Topics in Communications
ECE1518H	Seminar in Identity, Privacy, and Security
ECE1776H	Computer Security, Cryptography, and Privacy

Communications Networks

ECE1508H	Special Topics in Communications
ECE1520H	Data Communications I
ECE1524H	Service Provider Networks
ECE1541H	Communication Networks I
ECE1545H	Bridges and Routers Planning
ECE1548H	Advanced Network Architectures

Environmental Issues for Health Cities

CHE1433H	Air Dispersion Modelling
CIV549H	Groundwater Flow and Contamination
CIV1303H	Water Resources Systems Modelling
CIV1308H	Physical and Chemical Treatment Processes
CIV1309H	Biological Treatment Processes
CIV1311H	Advanced and Sustainable Drinking Water Treatment
CIV1330H	Water, Sanitation, Hygiene, and Global Health

Operations Research

MIE1603H	Integer Programming
MIE1616H	Research Topics in Healthcare Engineering
MIE1620H	Linear Programming and Network Flows
MIE1621H	Non-Linear Optimization
MIE1721H	Reliability
MIE1723H	Engineering Asset Management
MIE1727H	Quality Assurance I

Resilience of Critical Infrastructure

APS1024H	Infrastructure Resilience Planning
APS1025H	Infrastructure Protection
APS1031H	Infrastructure Planning
URD1044H	Urban Design and Development
URD2041H	Business and Land Use Planning in Real Estate Development

Sustainable Energy Systems

APS510H	Innovative Technologies and Organizations in Global Energy Systems
ECE1092H	Smart Grid Case Studies
MIE515H	Alternative Energy Systems
MIE1120H	Current Energy Infrastructure and Resources
MIE1240H	Wind Power
MIE1715H	Life Cycle Engineering

Transportation

CIV516H	Public Transit Operations and Planning
CIV531H	Transport III — Planning
CIV1506H	Freight Transportation and ITS Applications
CIV1508H	Airport Planning and Engineering
CIV1532H	Fundamentals of ITS and Traffic Management
CIV1535H	Transportation and Development
CIV1538H	Transportation Demand Analysis
CIV1598H	Special Studies in Civil Engineering — Transportation: Urban Operations Research

Urban Structures

APS1024H	Infrastructure Resilience Planning
APS1025H	Infrastructure Protection
CIV576H	Sustainable Buildings
CIV1164H	Bridge Engineering
CIV1167H	Advanced Structural Dynamics
CIV1169H	Advanced Topics in Building Design
CIV1252H	Repair and Maintenance of Concrete Structures

Technology Management Course Electives

The course list is subject to change.

APS1001H	Project Management
APS1005H	Operations Research for Engineering Management
APS1009H	Natural Resources Management
APS1012H	Managing Business Innovation and Transformational Change
APS1015H	Social Entrepreneurship
APS1016H	Financial Management for Engineers
APS1017H	Supply Chain Management and Logistics
APS1024H	Infrastructure Resilience Planning
APS1025H	Infrastructure Protection
APS1031H	Infrastructure Planning
APS1036H	Formative Experiential Entrepreneurial Learning (FEEL)
APS1037H	Infrastructure Engineering in Remote First Nation Communities in Ontario
APS1038H	Strategic Sustainability Management for Businesses and Products
APS1039H	Enterprise Risk Management
APS1040H	Quality Control for Engineering Management
APS1088H	Business Planning and Execution for Canadian Entrepreneurs
APS1202H	Engineering and Sustainable Development
CHE1435H	Fundamentals of Aerosol Physics and Chemistry
CIV1307H	Life Cycle Assessment and Sustainability of Engineering Activities
TEP1010H	Cognitive and Psychological Foundations of Effective Leadership

Degree Programs

Classics

MA and PhD

- Fields:
  - Greek and Roman History and Material Culture;
  - Greek and Roman Literature;
  - Ancient Philosophy

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Ancient and Medieval Philosophy
  - Classics, PhD
- Book History and Print Culture
  - Classics, MA, PhD
- Jewish Studies
  - Classics, MA, PhD
- Mediterranean Archaeology
  - Classics, PhD
- Sexual Diversity Studies
  - Classics, MA, PhD
- Women and Gender Studies
  - Classics, MA, PhD

Overview

The Department of Classics provides advanced training in the fields of Greek and Roman History and Material Culture, Greek and Roman Literature, and Ancient Philosophy. Collaborative specializations, listed above, are available to students enrolled in the specified participating degree programs.

Information about admission, application procedures, and funding is available from the department.

Classics: Classics MA

Master of Arts

Program Description

Applicants may be admitted to either the two-year MA program or the one-year advanced-standing option, depending on their level of preparation. At the time of application, students are encouraged to indicate their preference for one of the three fields offered: Greek and Roman History and Material Culture, Greek and Roman Literature, and Ancient Philosophy. The MA program may be taken on a part-time basis.

MA Program (Two-Year)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Classics' additional admission requirements stated below.
- Successful completion of an appropriate bachelor's program in classics or a related field, with at least a B+ average in the final year. For applicants who expect to focus on the areas of Greek and Roman Literature or Ancient Philosophy, the equivalent of three years of training in either Greek or Latin and two years of training in the other language is recommended. For applicants who expect to focus on the area of Greek and Roman History and Material Culture, the equivalent of three years of training in either Greek or Latin and demonstrated excellence in the study of Greek and Roman history and material culture is recommended.
- Students who are otherwise qualified but who lack the required amount of training in Greek and Latin or in Greek and Roman history and material culture should consult with the department about further preparation.

Program Requirements

- **Year 1**: Students normally complete **at least 3.0 full-course equivalents (FCEs)** selected in consultation with the Graduate Coordinator from departmental language courses and seminars. Students who do not complete these courses with appropriate standing may be required to withdraw from the MA program or to retake the courses.
- **Year 2**: Students normally complete **at least 3.0 FCEs**, including the Graduate Research Paper, selected in consultation with the Graduate Coordinator, and complete the **sight translation examination** and **qualifying examination(s)** required by the field they have chosen in consultation with the Graduate Coordinator.
  - Completion of one (0.5 FCE) of GRK1000H or LAT1000H (intensive advanced language skills), or equivalent, or a course from the GRK/LAT1800H series, with a grade of at least B–.
  - Completion of three additional graduate courses (1.5 FCEs).
  - Completion of the Ancient History methods course (CLA3020Y), only for students whose area is Greek and Roman History and Material Culture.
  - Completion of CLA2000Y (1.0 FCE) *Graduate Research Paper* with a grade of at least B. Each student is assigned to a faculty advisor for CLA2000Y and works independently on the preparation of a research paper (about 8,000 words in length). The Graduate Research Paper is assessed by a committee of two faculty members, including the advisor.
  - Completion of the sight translation examination in either Greek or Latin with a grade of at least B–.
  - Completion of the Greek qualifying examination and the Latin qualifying examination (three-hour translation exam in each language, including both prose and poetry) with a grade of at least B–. Students whose field is Greek and Roman History and Material Culture may choose to satisfy this requirement by:
- completing either the Greek or the Latin qualifying examination with a grade of at least B– **and** by completing one language course in the other language with a grade of at least B+, **or by**
- earning credit for the relative 1000H Advanced Language Studies course.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S);
9 sessions part-time

Time Limit

3 years full-time;
6 years part-time

MA Program (One-Year Advanced-Standing Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Classics' additional admission requirements stated below.
- Successful completion of an appropriate bachelor's program in classics or a related field, with at least a B+ average in the final year. For applicants who expect to focus on the areas of Greek and Roman Literature or Ancient Philosophy, the equivalent of at least three and preferably four years of training in Greek and Latin is recommended. For applicants who expect to focus on the area of Greek and Roman History and Material Culture, the equivalent of three years of training in either Greek or Latin and demonstrated excellence in the study of Greek and Roman history and material culture is recommended.
- Students who are otherwise qualified but who lack the required amount of training in Greek and Latin or in Greek and Roman history and material culture should consult with the department about further preparation.

Program Requirements

- Students normally complete **at least 3.0 full-course equivalents (FCEs)**, including the Graduate Research Paper, selected in consultation with the Graduate Coordinator, and complete the **sight translation examination** and **qualifying examination(s)**.
  - Completion of one (0.5 FCE) of GRK1000H or LAT1000H (intensive advanced language skills), or equivalent, or a course from the GRK/LAT1800H series, with a grade of at least B–.
  - Completion of three additional graduate courses (1.5 FCEs).
  - Completion of the Ancient History methods course (CLA3020Y), only for students whose area is Greek and Roman History and Material Culture.
  - Completion of CLA2000Y (1.0 FCE) *Graduate Research Paper* with a grade of at least B. Each student is assigned to a faculty advisor for CLA2000Y and works independently on the preparation of a research paper (about 8,000 words in length). The Graduate Research Paper is assessed by a committee of two faculty members, including the advisor.
  - Completion of the sight translation examination in either Greek or Latin with a grade of at least B–.
  - Completion of the Greek qualifying examination and the Latin qualifying examination (three-hour translation exam in each language, including both prose and poetry) with a grade of at least B–. Students whose field is Greek and Roman History and Material Culture may only choose to satisfy this requirement by:
    - completing either the Greek or the Latin qualifying examination with a grade of at least B– **and** by completing one language course in the other language with a grade of at least B+, **or by**
    - earning credit for the relative 1000H Advanced Language Studies course.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
9 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Classics: Classics PhD

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Classics' additional admission requirements stated below.
- Successful completion of a strong master's program in classics or a related field (with at least a B+ average overall and at least one A–). All students must have the equivalent of at least four years of training in either Latin or Greek and at least three years in the other language, and a broad preparation in the reading of ancient texts in the original languages.

Program Requirements

- **Coursework**. Satisfactory completion of:
  - GRK1000H (0.5 FCE) or equivalent
  - LAT1000H (0.5 FCE) or equivalent.
- At the department's discretion, students who need additional preparation may be required to take a selection of courses approved by the department during Year 1 before beginning to prepare for the qualifying examinations. Students will be notified of such additional requirements at the time of their offers of admission or early in their first session.
  - CLA2000Y (1.0 FCE) *Graduate Research Paper* with a grade of at least A–. Doctoral students who complete the Graduate Research Paper at a lower standard which nevertheless satisfies the MA requirement will be granted the MA. Students admitted with advanced standing are exempt from the Graduate Research Paper.
  - 10 seminars with an A– average, including at least two outside the student's field of specialization (one of which must not be offered or cross-listed by the Department of Classics).
  - Satisfactory participation for at least two years in the seminar series for the student's field (SRD4444Y^0 or AMP2000Y).
- **Qualifying exam**. Completion of the Greek qualifying examination and Latin qualifying examination with grades of at least B+. One of these exams must be passed by the end of Year 2, and both must be passed by the end of Year 3 of the PhD. Doctoral students who complete the qualifying examinations at a lower standard which nevertheless satisfies the MA requirement will be granted the MA.
- Satisfactory completion of **sight translation examinations** in both Greek and Latin with grades of at least B+. This requirement must be completed before the major field examination is attempted. Students whose field is Greek and Roman History may satisfy this requirement with a grade of at least B+ on the sight translation examination in one language and a grade of at least B on the sight translation examination in the other language.
- Demonstration of adequate **reading knowledge of two languages** of research other than English, one of which will normally be German, before the major field examination is attempted.
- Satisfactory completion of the **major field examination** (CLA4000Y^0). The major field defines a broad area of specialization, within which the dissertation topic will fall. It is normally established by Year 3 of the program and is directed by the supervisory committee. Preparation for the major field examination includes the completion of a satisfactory research essay. The major field is examined by means of two written examinations, one of which must involve translation from the list of primary sources, and an oral examination covering the research essay and the examination papers. The major field examination should be completed by the middle of Year 4.
- The **dissertation** should be completed by the end of Year 5.

Program Length

5 years

Time Limit

6 years

[0] Course that may continue over a program. The course is graded when completed.

PhD Program (Advanced-Standing)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Classics' additional admission requirements stated below.
- Applicants are admitted with advanced standing if they have successfully completed a strong master's program in Classics. Students who have completed the MA program in Classics at the University of Toronto are required to have grades of at least B+ in all graded coursework and a grade of at least A– on the *Graduate Research Paper* CLA2000Y.

Program Requirements

- **Coursework**. Satisfactory completion of:
  - GRK1000H (0.5 FCE) or equivalent
  - LAT1000H (0.5 FCE) or equivalent.
- 10 seminars with an A– average, including at least two outside the student's field of specialization (one of which must not be offered or cross-listed by the Department of Classics). Students who have completed CLA2000Y with a grade of at least A– for their MA degree, or who have a comparable achievement, need 8 seminars with an A– average.
- Satisfactory participation for at least two years in the seminar series for the student's field (SRD4444Y[0] or AMP2000Y). This includes the Ancient History methods course for those students whose field is Greek and Roman History and Material Culture.
- **Qualifying exams**.
  - Completion of the Greek qualifying examination and Latin qualifying examination with grades of at least B+. Students whose field is Greek and Roman History and Material Culture may choose to complete either the Greek qualifying examination or the Latin qualifying examination with a grade of B+ based on the MA reading list instead of the PhD reading list. Students in this field who are enrolled in the Mediterranean Archaeology collaborative specialization (MACS) may choose to satisfy the other language examination by passing an 1800H-level language course in that language with a B+. One of these exams must be passed by the end of Year 2, and both must be passed by the end of Year 3 of the four-year PhD program, but passing the exams at an earlier stage is advisable. Doctoral students who complete the qualifying examinations at a lower standard which nevertheless satisfies the MA requirement will be granted the MA.
  - Completion of the respective Area examination with a grade of at least B+ for students whose field is Greek and Roman Literature or Greek and Roman History and Material Culture.
- Satisfactory completion of **sight translation examinations** in both Greek and Latin with grades of at least B+. This requirement must be completed before the major field examination is attempted. Students whose field is Greek and Roman History and Material Culture may satisfy this requirement with a grade of at least B+ on the sight translation examination in one language and a grade of at least B– on the sight translation examination in the other language. Students in this field who are enrolled in the Mediterranean Archaeology collaborative specialization (MACS) may choose to satisfy the other language examination by passing an 1800H-level language course in the other language with a B+.
- Demonstration of adequate **reading knowledge of two languages** of research other than English, one of which will normally be German, before the major field examination is attempted.
- Satisfactory completion of the major field examination (CLA4000Y[0]). The major field defines a broad area of specialization, within which the dissertation topic will fall. It is normally established by Year 2 of the four-year PhD program and is directed by the supervisory committee. Preparation for the **major field examination** includes the completion of a satisfactory research essay. The major field is examined by means of two written examinations, one of which may involve translation from the list of primary sources, and an oral examination covering the research essay and the examination papers. The major field examination should be completed by the middle of Year 3 of the four-year PhD program.
- The **dissertation** should be completed by the end of Year 4.

Program Length

4 years

Time Limit

6 years

[0] Course that may continue over a program. The course is graded when completed.

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Classics' additional admission requirements stated below.
- Successful completion of a strong bachelor's program in classics of a related field with at least an A– average in the final year. For students who expect to focus on the areas of

Greek and Roman Literature or Ancient Philosophy, at least three years of study in both Greek and Latin and a broad preparation in the reading of ancient texts in the original languages is recommended. For applicants who expect to focus on the area of Greek and Roman History and Material Culture, the equivalent of three years of training in either Greek or Latin, familiarity with the other language, and demonstrated excellence in the study of Greek and Roman history and material culture is required.

Program Requirements

- **Coursework**. Satisfactory completion of:
  - GRK1000H (0.5 FCE) or equivalent
  - LAT1000H (0.5 FCE) or equivalent.
- 10 seminars with an A– average, including at least two outside the student's field of specialization (one of which must not be offered or cross-listed by the Department of Classics).
- With permission of the Graduate Coordinator, two of the seminars in Year 1 may be exchanged for CLA2000Y (1.0 FCE) *Graduate Research Paper*. A grade of A– is required for completion. Doctoral students who complete the *Graduate Research Paper* at a lower standard which nevertheless satisfies the MA requirement will be granted the MA.
- Satisfactory participation for at least two years in the seminar series for the student's field (SRD4444Y[0] or AMP2000Y). This includes the Ancient History methods course for those students whose field is Greek and Roman History and Material Culture.
- **Qualifying exams**.
  - Completion of the Greek qualifying examination and Latin qualifying examination with grades of at least B+. Students in the Greek and Roman History and Material Culture field may choose to complete either the Greek qualifying examination or the Latin qualifying examination with a grade of B+ based on the MA reading list instead of the PhD reading list. Students in this field who are enrolled in the Mediterranean Archaeology collaborative specialization (MACS) may choose to satisfy the other language examination by passing an 1800H-level language course in that language with a B+. One of these exams must be passed by the end of Year 2, and both must be passed by the end of Year 3 of the five-year PhD program. Doctoral students who complete the qualifying examinations at a lower standard which nevertheless satisfies the MA requirement will be granted the MA.
  - Completion of the respective Area examination with a grade of at least B+ for students whose field is Greek and Roman Literature or Greek and Roman History and Material Culture.
- Satisfactory completion of **sight translation examinations** in both Greek and Latin with grades of at least B+. This requirement must be completed before the major field examination is attempted. Students whose field is Greek and Roman History and Material Culture may satisfy this requirement with a grade of at least B+ on the sight translation examination in one language and a grade of at least B– on the sight translation examination in the other language. Students in this area of emphasis who are enrolled in the Mediterranean Archaeology collaborative specialization (MACS) may choose to satisfy the other language examination by passing an 1800H-level language course in that language with a B+.
- Demonstration of adequate **reading knowledge of two languages** of research other than English, one of which will normally be German, before the major field examination is attempted.
- Satisfactory completion of the **major field examination** (CLA4000Y[0]). The major field defines a broad area of specialization, within which the dissertation topic will fall. It is normally established by Year 3 of the program and is directed by the supervisory committee. Preparation for the major field examination includes the completion of a satisfactory research essay. The major field is examined by means of two written examinations, one of which may involve translation from the list of primary sources, and an oral examination covering the research essay and the examination papers. The major field examination should be completed by the middle of Year 4.
- The **dissertation** should be completed by the end of Year 5.

Program Length

  - Comparative Literature, MA, PhD
- South Asian Studies
  - Comparative Literature, MA, PhD
- Women and Gender Studies
  - Comparative Literature, MA, PhD

Overview

The Centre for Comparative Literature offers Master of Arts and Doctor of Philosophy degree programs to students qualified to pursue literary studies involving multiple languages. Students pursue research across languages and national literatures, engaging with theoretical issues that cross traditional disciplines. The centre's faculty and students work across linguistic boundaries, employing rigorous critical and theoretical lenses to bring into dialogue literature and other cultural forms that are often kept apart by artificially constructed institutional, geographical or ideological boundaries.

At the heart of the research by faculty and students is the close engagement with cultural products in their original languages. Knowledge of languages is a key component in our practice of Comparative Literature. Comparative Literature examines both the contexts of literature and the interaction among literatures. The practice of Comparative Literature at Toronto extends to visual expression as well, with film, photography or graphic novels figuring prominently in the projects of many faculty and students. Graduate programs at the Centre for Comparative Literature foster rigorous reading practices and theoretical reflection.

Interested applicants should consult the Centre's website. It provides updated information about course scheduling and academic profiles of graduate faculty.

Comparative Literature: Comparative Literature MA

Master of Arts

Program Description

The Comparative Literature MA program is a **course-based program** that accommodates a diverse range of students' interests. The interdisciplinary and transnational character of the program is reflected in the fact that students may take up to half their courses in other departments of their choice. Students work in languages other than English, and their study may include work in a non-literary discipline. The COL1000H *Faculty Seminar* provides a basis for study in the program. All incoming students take this seminar course where they consider core theoretical problems of comparison.

All incoming students meet with the Graduate Coordinator to discuss their program and to decide on their course of study before beginning classes.

Minimum Admission Requirements

- General Regulations of the School of Graduate Studies, provided that applicants also satisfy the Centre for Comparative Literature's requirements stated below. In all cases, programs of study must be approved by the centre.
- An appropriate bachelor's degree from a recognized university that includes courses in literature and languages with an average grade equivalent to at least a University of Toronto B+ in the applicant's overall program.
- Demonstrated experience in the study of two literatures (or in comparative literature and one national literature) at the undergraduate level and an ability to work at the graduate level in at least one language other than English.
- All applicants must register as full-time students.

Program Requirements

- Students admitted to the MA must successfully complete at least **4.0 full-course equivalents (FCEs)** including:
  - COL1000H *Faculty Seminar* (0.5 FCE)
  - at least 1.5 FCEs in COL courses.
- Students may pursue independent research for credit equivalent to 0.5 FCE at the MA level, under the direction of an advisor approved by the Centre for Comparative Literature.
- A plan of study is defined by each MA student through consultation with the Associate Director in light of the student's particular areas of interest and background. This plan of study is subject to the approval of the Centre for Comparative Literature. In addition to the numerous courses in literary theory, methodology, and interdisciplinary topics offered by the centre, courses may also be selected from departments of language and literature, as well as from other units in the humanities.
- Average of at least B+ in coursework.
- MA students who intend to pursue doctoral studies are strongly advised to make appropriate plans for the acquisition of graduate level competence in a second language and literature other than English. An adequate reading knowledge of this second language must be demonstrated before the MA is received.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

Comparative Literature: Comparative Literature PhD

Doctor of Philosophy

Program Description

The Comparative Literature PhD program accommodates a diverse range of students' interests united by a shared concern for comparative issues. The interdisciplinary and transnational character of the program is reflected in the fact that students may take up to approximately half their courses in other departments of their choice. Students work in at least two languages other than English, and their study may include work in a non-literary discipline.

All incoming students meet with the Associate Director to discuss their program and to decide on their course of study before beginning classes.

The Centre for Comparative Literature only provides supervision in areas which fall within the competency, interests, or availability of its graduate faculty. The Centre supports research which engages creative practice with humanities-based theory

and scholarship. Prospective students with an existing creative practice who are interested in using research creation methods are encouraged to contact the Associate Director to discuss the varieties of projects that can be supported. Fields of research creation may include, but are not limited to: architecture, design, creative writing, visual arts, performance, film, video, interdisciplinary arts, media and electronic arts, and new artistic practices (including experiments with the hard and social sciences). The Centre does not provide studio space or production facilities.

PhD Program

Minimum Admission Requirements

- General Regulations of the School of Graduate Studies, provided that applicants also satisfy the Centre for Comparative Literature's requirements stated below. In all cases, programs of study must be approved by the Centre.
- An appropriate master's degree with an average grade of at least A–. Normally, the master's degree will be in comparative literature; however, students with a master's degree in a humanities discipline involving literary studies, especially specific language and literature programs, will also be considered. Demonstrated ability to do advanced research in two languages and literatures other than English.
- Applicants, including those from the University of Toronto, must arrange for recommendations from two referees; must submit a statement of purpose of approximately 500 words; and must submit a sample of written work, preferably a short essay on a literary topic.
- The Centre welcomes applications from people with an established creative practice who would like to incorporate creative research methodologies into their dissertation work. Applicants who are interested in doing so must have the required expertise and resources to carry out the proposed creative work. Their letter of intent must 1) describe the type of creative research practice they intend to pursue so the Centre can determine whether it can provide appropriate supervisory and committee support. The applicant must 2) direct at least one reference letter writer to testify to the applicant’s competency in the relevant creative practice, and the applicant must 3) articulate how the creative practice may be employed as a method for elucidating critical questions animating the dissertation project.

Program Requirements

- A student with an **MA in Comparative Literature** or its equivalent must take at least **3.0 full-course equivalents (FCEs)**, of which a minimum of 2.0 FCEs must be COL courses. A student who has an **MA in a humanities discipline** involving literary studies, especially specific language and literature programs, may be required to take more courses. The actual number of courses required for the PhD will be established at the time of admission through consultation with the Director/Associate Director.
- Students may pursue independent research for credit equivalent to 0.5 FCE at the PhD level, under the direction of an advisor approved by the Centre.
- Students define the scope and approach of their **plan of study** in consultation with the Associate Director and other faculty. During the first two years of the program, students complete coursework, language requirements, and prepare for the field examination. Coursework must be completed within the first two years of the PhD program. Students constitute a field examination/ supervisory committee and submit a dissertation proposal no later than the end of Year 2 of PhD study. The field examination is taken ideally no later than the end of the first session of Year 3.
- Students must demonstrate an ability to work at the graduate level in **two languages and literatures** other than English. An adequate reading knowledge of a third language other than English must be demonstrated before taking the field examination. For this last requirement, it is possible to substitute competency in a non-literary discipline. The Centre reserves the right to determine whether a student has met this requirement. Typically, it will be two graduate half courses. Certification of graduate-level competence and reading knowledge in languages is given to all students who qualify.
- All PhD students are required to take their **field examination** by the end of the Spring session of Year 3 of the program. The examination consists of both a field paper and an oral component.
  - The field paper is a 30-page critical essay based on the candidate’s reading list that assesses the current state of research and delineates issues and questions pertinent to the thesis. The field paper must be submitted two to three weeks prior to the oral field exam.
  - The oral part of the examination begins with a textual explication by the student, no more than 30 minutes in length, of a specific passage or poem from a work in the primary reading list, assigned for preparation at least three days in advance. For the presentation, only notes or a general outline may be used. The rest of the examination usually consists of questions concerning the student's commentary on the text, the written field paper, the reading list of the original field proposal, and/or other aspects of the field. The oral exam lasts for two hours.
- In the event of failure, the student will be given one more chance to take the exam within one year. Failure after two attempts will lead to the termination of the student's registration.
- When the field examination has been completed successfully, the candidate will prepare and defend a dissertation which must be an original and significant contribution to the existing body of knowledge. This dissertation may include a creative research component.
- Students' progress will be assessed at least once a year by the Centre's Graduate Academic Committee and/or their respective supervisory committees. Although the program has been designed for completion in four years, some students may require a longer period to complete all of the requirements.
- The student must be geographically available, visit the campus regularly, and must register as a full-time student. In addition, a full-time student is not permitted to be absent from the University for an extended period or to participate in a program offered by another university without the explicit written permission of the Centre for Comparative Literature.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- General Regulations of the School of Graduate Studies, provided that applicants also satisfy the Centre for Comparative Literature's requirements stated below. In all cases, programs of study must be approved by the Centre.
- Students coming directly out of an appropriate undergraduate program (direct-entry) who have a demonstrated, exceptional ability to undertake advanced research in two languages and literatures other than English may be considered for direct admission into the PhD program.
- Applicants, including those from the University of Toronto, must arrange for recommendations from two referees; must submit a letter of intent not exceeding 500 words; and must submit a sample of written work, preferably a short essay on a literary topic.
- The Centre welcomes applications from people with an established creative practice who would like to incorporate creative research methodologies into their dissertation work. Applicants who are interested in doing so must have the required expertise and resources to carry out the proposed creative work. Their letter of intent must 1) describe the type of creative research practice they intend to pursue so the Centre can determine whether it can provide appropriate supervisory and committee support. The applicant must 2) direct at least one reference letter writer to testify to the applicant's competency in the relevant creative practice, and the applicant must 3) articulate how the creative practice may be employed as a method for elucidating critical questions animating the dissertation project.

Program Requirements

- A student with a **bachelor's degree** who is admitted directly to the PhD program must take at least **6.0 full-course equivalents (FCEs)**, of which 3.0 must be COL courses. The actual number of courses required for the PhD will be established at the time of admission through consultation with the Director/Associate Director.
- Students may pursue independent research for credit equivalent to 0.5 FCE at the PhD level, under the direction of an advisor approved by the Centre.
- Students define the scope and approach of their **plan of study** in consultation with the Associate Director and other faculty. During the first two years of the program, students complete coursework, language requirements, and prepare for the field examination. Coursework must be completed within the first two years of the PhD program. Students constitute a field examination/ supervisory committee and submit a dissertation proposal no later than the end of Year 2 of PhD study. The field examination is taken ideally no later than the end of the first session of Year 3.
- Students must demonstrate an ability to work at the graduate level in two **languages and literatures** other than English. An adequate reading knowledge of a third language other than English must be demonstrated before taking the field examination. For this last requirement, it is possible to substitute competency in a non-literary discipline. The Centre reserves the right to determine whether a student has met this requirement. Typically, it will be two graduate half courses. Certification of graduate-level competence and reading knowledge in languages is given to all students who qualify.
- All PhD students are required to take their **field examination** by the end of the Spring session of Year 3 of the program. The examination consists of both a field paper and an oral component.
  - The field paper is a 30-page critical essay based on the candidate's reading list that assesses the current state of research and delineates issues and questions pertinent to the thesis. The field paper must be submitted two to three weeks prior to the oral field exam.
  - The oral part of the examination begins with a textual explication by the student, no more than 30 minutes in length, of a specific passage or poem from a work in the primary reading list, assigned for preparation at least three days in advance. For the presentation, only notes or a general outline may be used. The rest of the examination usually consists of questions concerning the student's commentary on the text, the written field paper, the reading list of the original field proposal, and/or other aspects of the field. The oral exam lasts for two hours.
- In the event of failure, the student will be given one more chance to take the exam within one year. Failure after two attempts will lead to the termination of the student's registration.
- When the field examination has been completed successfully, the candidate will prepare and defend a **dissertation** which must be an original and significant contribution to the existing body of knowledge. This dissertation may include a creative research component.
- **Students' progress** will be assessed at least once a year by the Centre's Graduate Academic Committee and/or their respective supervisory committees.
- The student must be **geographically available**, visit the campus regularly, and must register as a full-time student. In addition, a full-time student is not permitted to be absent from the University for an extended period or to participate in a program offered by another university without the explicit written permission of the Centre for Comparative Literature.

MSc and PhD

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Genome Biology and Bioinformatics
  - Computer Science, PhD
- Knowledge Media Design
  - Computer Science, MSc, PhD
- Neuroscience
  - Computer Science, MSc, PhD

Overview

Graduate faculty in the Department of Computer Science are interested in a wide range of subjects related to computing, including programming languages and methodology, software engineering, operating systems, compilers, distributed computation, networks, numerical analysis and scientific computing, financial computation, data structures, algorithm design and analysis, computational complexity, cryptography, combinatorics, graph theory, artificial intelligence, neural networks, knowledge representation, computational linguistics, computer vision, robotics, database systems, graphics, animation, interactive computing, and human-computer interaction.

For further details, consult the graduate student handbook prepared by the department and available online.

Computer Science: Applied Computing MScAC

Master of Science in Applied Computing

Program Description

The MScAC program is offered as a general Computer Science program (i.e., no concentration) or as a concentration in Applied Mathematics, Data Science, or Quantum Computing.

The Applied Mathematics concentration is offered jointly by the Department of Computer Science and the Department of Mathematics. The Data Science concentration is offered jointly by the Department of Computer Science and the Department of Statistical Sciences. The Quantum Computing concentration is offered jointly by the Department of Computer Science and the Department of Physics.

MScAC General Program (No Concentration)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Computer Science's additional admission requirements stated below.

- An appropriate bachelor's degree from a recognized university in computer science or a related discipline.
- A standing equivalent to at least B+ in the final year of undergraduate studies.
- Applicants whose primary language is not English and who have graduated from a university where the primary language of instruction is not English must submit results of the Test of English as a Foreign Language (TOEFL) and International English Language Testing System (IELTS) with the following minimum scores:
  - Internet-based TOEFL: 93/120 and 22/30 on the writing and speaking sections.
  - IELTS: an overall score of 7.0, with at least 6.5 for each component.
- If students complete a portion of their degree in English, or part of their degree at another university where English is the language of instruction, applicants must still provide proof of English-language proficiency.
- Three letters of support from faculty and/or employers.
- A statement of purpose explaining the applicant's interest in computer science and objectives for the program.

Program Requirements

- **Coursework.** Students must successfully complete a total of **3.0 full-course equivalents (FCEs)** including:
  - 1.0 FCE in required courses: technical communications (CSC2701H) and technical entrepreneurship (CSC2702H).
- An eight-month industrial **internship**, CSC2703H (3.5 FCEs). The internship is coordinated by the department and evaluated on a pass/fail basis.
- There is no thesis requirement.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F)

Time Limit

3 years full-time

MScAC Program (Applied Mathematics Concentration)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Computer Science's additional admission requirements stated below.
- An appropriate bachelor’s degree from a recognized university in a related area such as applied mathematics, mathematics, physics, computational mathematics, statistics, computer science, or any discipline where there is a significant quantitative and/or mathematical component. The completed bachelor’s degree must include significant exposure to advanced mathematics, statistics, and computer science, including coursework in advanced and multivariate calculus (preferably analysis), linear algebra, probability and statistics, programming languages, and general computational methods.
- A standing equivalent to at least B+ in the final year of undergraduate studies.
- Applicants whose primary language is not English and who have graduated from a university where the primary language of instruction is not English must submit results of the Test of English as a Foreign Language (TOEFL) and International English Language Testing System (IELTS) with the following minimum scores:
  - Internet-based TOEFL: 93/120 and 22/30 on the writing and speaking sections.
  - IELTS: an overall score of 7.0, with at least 6.5 for each component.
- If students complete a portion of their degree in English, or part of their degree at another university where English is the language of instruction, applicants must still provide proof of English-language proficiency.
- Three letters of reference from faculty and/or employers, with preference for at least one such letter from a faculty member in Mathematics or Applied Mathematics.
- A statement of purpose explaining the applicant's interest in applied mathematics and objectives for the program.
- Applicants must indicate a preference for the concentration in Applied Mathematics in their application. Admission is competitive, and students who are admitted into the MScAc program are not automatically admitted to this concentration upon request.
- There is no thesis requirement.

Program Requirements

- **Coursework.** Completion of **3.0 full-course equivalents (FCEs)** including:
  - 1.0 FCE chosen from the MAT 1000-level courses or higher. This may include courses cross-listed as APM400 level.
  - 1.0 FCE chosen from the Computer Science (CSC course designator) graduate course listings.
  - 1.0 FCE in required courses:
    - CSC2701H *Communication for Computer Scientists* (0.5 FCE) and
    - CSC2702H *Technical Entrepreneurship* (0.5 FCE).
  - Course selections should be made in consultation with the Program Director.
- An eight-month industrial **internship**, CSC2703H (3.5 FCEs). The internship is coordinated by the department and evaluated on a pass/fail basis.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F)

Time Limit

3 years full-time

MScAC Program (Data Science Concentration)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Computer Science's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university in a related area such as statistics, computer science, mathematics, or any discipline where there is a significant quantitative component. The completed bachelor's degree must include significant exposure to statistics, computer science, and mathematics, including coursework in advanced calculus, linear algebra, probability and statistics, programming languages, and computational methods.
- A standing equivalent to at least B+ in the final year of undergraduate studies.
- Applicants whose primary language is not English and who have graduated from a university where the primary language of instruction is not English must submit results of the Test of English as a Foreign Language (TOEFL) and International English Language Testing System (IELTS) with the following minimum scores:
  - Internet-based TOEFL: 93/120 and 22/30 on the writing and speaking sections.
  - IELTS: an overall score of 7.0, with at least 6.5 for each component.
- If students complete a portion of their degree in English, or part of their degree at another university where English is the language of instruction, applicants must still provide proof of English-language proficiency.
- Three letters of support from faculty and/or employers.
- A statement of purpose explaining the applicant's interest in data science and objectives for the program.
- Applicants must indicate a preference for the concentration in Data Science in their application. Admission is competitive, and students who are admitted to the MScAC program are not automatically admitted to this concentration upon request.

Program Requirements

- **Coursework.** Completion of **3.0 full-course equivalents (FCEs)** including:
  - 1.0 FCE chosen from the STA 2000-level courses or higher. This may include a maximum of 0.5 FCE chosen from the STA 4500-level of six-week modular courses (0.25 FCE each).
  - 1.0 FCE chosen from the Computer Science (CSC course designator) graduate course listings.
  - 1.0 FCE in required courses:
    - CSC2701H *Communication for Computer Scientists* (0.5 FCE) and
    - CSC2702H *Technical Entrepreneurship* (0.5 FCE).
  - Course selections should be made in consultation with the Program Director.
- An eight-month industrial **internship**, CSC2703H (3.5 FCEs). The internship is coordinated by the department and evaluated on a pass/fail basis.
- There is no thesis requirement.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F)

Time Limit

3 years full-time

MScAC Program (Quantum Computing Concentration)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Computer Science's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university in a related area such as physics, computer science, mathematics, or any discipline where there is a significant quantitative component. The completed bachelor's degree must include significant exposure to physics, computer science, and mathematics, including coursework in advanced quantum mechanics, multivariate calculus, linear algebra, probability and statistics, programming languages, and computational methods.
- A standing equivalent to at least B+ in the final year of undergraduate studies.
- Applicants whose primary language is not English and who have graduated from a university where the primary language of instruction is not English must submit results of the Test of English as a Foreign Language (TOEFL) and International English Language Testing System (IELTS) with the following minimum scores:
  - Internet-based TOEFL: 93/120 and 22/30 on the writing and speaking sections.
  - IELTS: an overall score of 7.0, with at least 6.5 for each component.
- If students complete a portion of their degree in English, or part of their degree at another university where English is the language of instruction, applicants must still provide proof of English-language proficiency.
- Three letters of reference from faculty and/or employers, with preference for at least one such letter from a faculty member in Physics.
- A statement of purpose explaining the applicant's interest in quantum computing and objectives for the program.
- Applicants must indicate a preference for the concentration in Quantum Computing in their application. Admission is competitive, and students who are admitted to the MScAC program are not automatically admitted to this concentration upon request.

Program Requirements

- **Coursework.** Completion of **3.0 full-course equivalents (FCEs)** as follows:

    - 1.0 FCE chosen from the Physics (PHY course designator) graduate course listings. Of eligible courses, the following are examples that are particularly relevant to the Quantum Computing concentration:
        - PHY1500H *Statistical Mechanics* (0.5 FCE)
        - PHY1520H *Quantum Mechanics* (0.5 FCE)
        - PHY1610H *Scientific Computing for Physicists* (0.5 FCE)
        - PHY2203H *Quantum Optics I* (0.5 FCE)
        - PHY2204H *Quantum Optics II* (0.5 FCE)
        - PHY2211H *Quantum Information Theory* (0.5 FCE)
        - PHY2212H *Entanglement Physics* (0.5 FCE)
    - 1.0 FCE chosen from the Computer Science (CSC course designator) graduate course listings. Of eligible courses, the following are examples that are particularly relevant to the Quantum Computing concentration:
        - CSC2305H *Numerical Methods for Optimization Problems* (0.5 FCE)
        - CSC2414H *Topics in Applied Discrete Mathematics* (0.5 FCE)
        - CSC2421H *Topics in Algorithms* (0.5 FCE)
        - CSC2451H *Quantum Computing, Foundations to Frontier* (0.5 FCE)
    - 1.0 FCE in required courses:
        - CSC2701H *Communication for Computer Scientists* (0.5 FCE)
        - CSC2702H *Technical Entrepreneurship* (0.5 FCE)
    - Course selections should be made in consultation with the Program Director. Appropriate substitutions may be possible with approval.
- An eight-month industrial **internship**, CSC2703H (3.5 FCEs). The internship is coordinated by the department and evaluated on a pass/fail basis.
- There is no thesis requirement.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F)

Time Limit

3 years full-time

Computer Science: Computer Science MSc

Master of Science

Program Description

The MSc degree program is designed for students seeking to be trained as a researcher capable of creating original, internationally recognized research in computer science.

Computer Science courses are classified by Methodologies and Research Areas based on their content. Methodologies are core problem-solving approaches and/or techniques and general tools emphasized in the course material, while Research Areas are aligned with the activities of the various research groups in the department.

The MSc program can be taken on a full-time or part-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Computer Science's additional admission requirements stated below.
- An appropriate bachelor's degree with a standing equivalent to at least a University of Toronto B+. Preference given to applicants who have studied computer science or a closely related discipline.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction is not English must achieve a Test of English as a Foreign Language (TOEFL) score of at least 580 on the paper-based test and 4 on the Test of Written English (TWE); 93/120 on the Internet-based test and 22/30 on the writing and speaking sections.

Program Requirements

- **Coursework.** Completion of **2.0 graduate full-course equivalents (FCEs)** in computer science. The courses must satisfy breadth in three of the four different Methodologies of Computer Science to ensure that MSc graduates have a breadth of skills for research and problem solving throughout their careers.
- A major research paper (CSC4000Y; 1.0 FCE) demonstrating the student's ability to do independent work in organizing existing concepts and in suggesting and developing new approaches to solving problems in a research area. The standard for this paper is that it could reasonably be submitted for peer-reviewed publication.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F);
8 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Computer Science: Computer Science PhD

Doctor of Philosophy

Program Description

The PhD degree program is designed for students seeking to be trained as a researcher capable of creating original, internationally recognized research in computer science. Research conducted under the supervision of a faculty member will constitute a significant and original contribution to computer science.

Computer Science courses are classified by Methodologies and Research Areas based on their content. Methodologies are core problem-solving approaches and/or techniques and general tools emphasized in the course material, while Research Areas are aligned with the activities of the various research groups in the department.

Applicants may enter the PhD program via one of two routes: 1) following completion of an appropriate master's degree or 2) direct entry following completion of a bachelor's degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Computer Science's additional admission requirements stated below.
- Successful completion of an appropriate master's degree with a standing equivalent to at least a University of Toronto B+. Preference is given to applicants who have studied computer science or a closely related discipline.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction is not English must achieve a Test of English as a Foreign Language (TOEFL) score of at least 580 on the paper-based test and 4 on the Test of Written English (TWE); 93/120 on the Internet-based test and 22/30 on the writing and speaking sections.

Program Requirements

- **Coursework.** Students must complete **2.0 full-course equivalents (FCEs) and a thesis**.
- The courses must satisfy breadth in four different research areas of computer science to ensure a broad and well-balanced knowledge of computer science.
- Students must meet the department's timeline for satisfactory progress as outlined in the PhD handbook.
- A meeting of the PhD supervisory committee must be held by the 16th month of the PhD program. This is typically the initial meeting with the supervisory committee and is referred to as the qualifying oral examination. After the qualifying oral, the student's PhD supervisory committee must meet at least once annually. The student must have their thesis topic approved at a PhD supervisory committee meeting within the time frame for achieving candidacy. The departmental thesis defense must be passed before the SGS Final Oral Examination can be scheduled.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Computer Science's additional admission requirements stated below.
- In exceptional circumstances, applicants may be admitted to this program directly from a bachelor's degree with a standing equivalent to at least a University of Toronto A–. Preference is given to applicants who have studied computer science or a closely related discipline.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction is not English must achieve a Test of English as a Foreign Language (TOEFL) score of at least 580 on the paper-based test and 4 on the Test of Written English (TWE); 93/120 on the Internet-based test and 22/30 on the writing and speaking sections.

Program Requirements

- **Coursework.** Students must complete **4.0 full-course equivalents (FCEs) and a thesis**.
- The courses must satisfy breadth in four different research areas and three different methodologies of computer science to ensure a broad and well-balanced knowledge of computer science.
- Students must meet the department's timeline for satisfactory progress as outlined in the PhD handbook.
- A meeting of the PhD supervisory committee must be held by the 16th month of the PhD program. This is typically the initial meeting with the supervisory committee and is referred to as the qualifying oral examination. After the qualifying oral, the student's PhD supervisory committee must meet at least once annually. The student must have their thesis topic approved at a PhD supervisory committee meeting within the time frame for achieving candidacy. The departmental thesis defense must be passed before the SGS Final Oral Examination can be scheduled.

Program Length

5 years

Time Limit

7 years

Computer Science: Computer Science MScAC, MSc, PhD Courses

Not all courses are offered every year. Please consult the department for course offerings.

CSC2104H	Formal Methods of Program Design
CSC2107H	Compilers and Interpreters
CSC2108H	Automated Verification
CSC2125H	Algorithmic Program Verification
CSC2206H	Computer Systems Modelling
CSC2208H	Advanced Operating Systems
CSC2209H	Computer Networks
CSC2221H	Introduction to Distributed Computing
CSC2222H	Applications of Parallel and Distributed Computing
CSC2224H	Parallel Computer Architecture and Programming
CSC2226H	Topics in Verification
CSC2227H	Topics in the Design and Implementation of Operating Systems
CSC2228H	Topics in Mobile, Pervasive, and Cloud Computing
CSC2231H	Topics in Computer Systems
CSC2233H	Topics in Storage Systems
CSC2305H	Numerical Methods for Optimization Problems
CSC2306H	High Performance Scientific Computing
CSC2310H	Computational Methods for Partial Differential Equations
CSC2321H	Matrix Calculations
CSC2326H	Topics in Numerical Analysis

Criminology and Sociolegal Studies

Criminology and Sociolegal Studies: Introduction

Faculty Affiliation

Arts and Science

Degree Programs

Criminology and Sociolegal Studies

MA and PhD

Combined Degree Programs

- STG, Law, Juris Doctor / Criminology and Sociolegal Studies, MA
- STG, Law, Juris Doctor / Criminology and Sociolegal Studies, PhD

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Addiction Studies
  - Criminology and Sociolegal Studies, MA, PhD
- Diaspora and Transnational Studies
  - Criminology and Sociolegal Studies, MA, PhD
- Sexual Diversity Studies
  - Criminology and Sociolegal Studies, MA, PhD
- Women and Gender Studies
  - Criminology and Sociolegal Studies, MA, PhD

Overview

The Centre for Criminology and Sociolegal Studies, founded in 1964, offers advanced interdisciplinary study in two closely related, overlapping areas: criminology and sociolegal studies.

MA graduates find employment in government (in areas such as child and youth services or addiction as well as criminal justice fields), in governmental organizations in the criminal justice field, in social science research, or in other positions for which a background in criminology and sociolegal studies is useful. Some choose to go to law school, and many have gone on to other post-graduate work, such as in criminology, sociology, law, and social work.

PhD graduates have mainly found employment in tenure-track positions, most often in sociology departments or in criminology programs. Both the MA and PhD degree programs are academic rather than professional/vocational.

Students enrolled in doctoral programs in other departments of the University of Toronto may apply to be appointed as Junior Fellows at the Centre for Criminology and Sociolegal Studies. The objective of the Junior Fellow Program is to involve doctoral students whose work overlaps with the research conducted at the Centre and to enhance the interdisciplinarity of the Centre. Junior Fellows have come from history, geography, law, and sociology. Exceptionally, doctoral students pursuing degrees at other universities but residing in Toronto may apply to be appointed as Visiting Junior Fellows.

Criminology and Sociolegal Studies: Criminology and Sociolegal Studies MA

Master of Arts

Program Description

The MA program encompasses two related disciplinary and interdisciplinary fields.

The first is criminology, which can be briefly defined as the study of all aspects of crime, including its definitions, causes, and intellectual genealogy, as well as the policy and institutional responses to it. Although criminology features some aspects of a separate discipline, including its own theoretical schools, journals, and university departments, it also draws heavily on related social science disciplines.

The field of sociolegal studies, also known as the law and society movement, is a related interdisciplinary research tradition that investigates a broad range of legal phenomena using the techniques and approaches of social science. Examples of such phenomena that the faculty have studied include citizenship and immigration policy, urban planning, and the regulation of alcohol and sex work.

The program is distinctive in that these bodies of knowledge are treated as closely related, and both of them are incorporated into the program of study. Broad intellectual exploration of these fields is incorporated by limiting the number of required courses and encouraging students to select courses (both in this and other graduate programs) that reflect their own intellectual and professional priorities. Likewise, students are given the option of meeting their degree requirements by completing eight taught half-courses or by completing six taught half-courses and writing a “master’s research paper” that allows them to develop an independent research project under the supervision of a faculty member. While specialized professional or technical training meant to be directly transferable into criminal justice occupations is not provided, we welcome applications by criminal justice professionals who wish to pursue part-time studies.

The MA program enjoys an excellent national and international reputation, and graduates are sought by employers in both the public and private sectors who appreciate the theoretically and academically rigorous interdisciplinary social science training that is provided.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the additional admission requirements of the Centre for Criminology and Sociolegal Studies stated below.
- Applicants must have an appropriate bachelor's degree from a recognized university. An appropriate bachelor's degree normally consists of 20 full-course equivalents (FCEs). Applicants with arts and science degrees will normally be required to have at least a B+ standing. Applicants from law schools who have already completed a JD degree or its equivalent will normally be required to have at least a B standing.
- Although many applicants to the MA program have some training in criminology or sociolegal studies, students from a variety of disciplinary and interdisciplinary backgrounds are welcomed. It would be advantageous for MA students in the program to have some familiarity with the approaches and methodologies associated with the social sciences. However, outstanding students from the humanities and behavioral and natural sciences will also be considered.
- The program can be completed on a full-time or part-time basis. All students will be required to complete the program within the time limits set for the MA degree under the General Regulations of the School of Graduate Studies. Students with professional experience who meet the academic admission requirements are encouraged to apply to the program.
- It is essential that all incoming graduate students have a command of English. Proficiency in the English language must be demonstrated by all applicants educated outside Canada whose primary language is not English, and who graduated from a university where the language of instruction and examination was not English. This requirement must be satisfied using a Test of English as a Foreign Language (TOEFL) with a verbal and a written component. To be considered for admission, applicants must achieve the following minimum scores:
  - paper-based TOEFL exam: 580 and 5 on the Test of Written English (TWE)
  - Internet-based TOEFL exam: 93/120 and 22/30 on the writing and speaking sections.
    Official copies of these scores must be submitted to the University of Toronto before a formal offer of admission can be made.

Program Requirements

- MA students can complete the program in one of two ways:
  - by completing **4.0 full-course equivalents (FCEs)** within 9 months **or**
  - by completing **3.0 FCEs and a research paper** (CRI3360Y) within 12 months.
- The degree program includes compulsory and elective courses.
  - The compulsory course (0.5 FCE) is CRI2010H *Methodological Issues in Criminology and Sociolegal Studies*.
  - The elective courses allow students to engage in specialized study of different approaches to, and topics within, criminology and sociolegal studies. The elective courses offered may vary from year to year. In certain cases a student may, with the approval of the Graduate Coordinator, substitute a maximum of 1.5 FCEs from other graduate units in lieu of elective courses in criminology or sociolegal studies.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Criminology and Sociolegal Studies: Criminology and Sociolegal Studies PhD

Doctor of Philosophy

Program Description

Similar to the MA program, the PhD program reflects the same emphasis on interdisciplinarity and flexibility, as well as an integrated, inclusive approach to criminology and sociolegal studies.

The primary mission of the doctoral program is to prepare future professional academics for a career in teaching and research; graduates hold faculty positions throughout Canada, in the United States, and around the world.

Over the years, PhD students have pursued dissertation projects on extremely varied research questions involving aspects of crime, criminal justice institutions, and a range of sociolegal topics. Regardless of their specific focus, they have found the Centre a supportive and interactive environment. The Centre promotes such collegiality by offering students shared office space in the Centre and encouraging them to work on site and participate in the lively intellectual life and shared scholarly activities. Likewise, although PhD students work closely with a primary supervisor, they also benefit from opportunities to learn from other core and cross-appointed faculty members. In short, the goal is to train broadly educated, thoughtful scholars with a research agenda in criminology or sociolegal studies.

Students are normally paired with a prospective supervisor at the time of admission. Therefore, applicants are encouraged to identify one or more possible supervisors, as well as possible dissertation committee members, and should indicate on their application whether they have made contact with particular core or cross-appointed members of the graduate faculty for these purposes.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Centre for Criminology and Sociolegal Studies' additional admission requirements stated below.
- Applicants normally hold an MA degree in criminology or a cognate field, with a minimum A– standing or its equivalent from a recognized university. Students with MAs in disciplines unrelated to criminology or sociolegal studies may be required to take additional courses as part of their doctoral program.
- It is essential that all incoming graduate students have a command of English. Proficiency in the English language must be demonstrated by all applicants educated outside Canada whose primary language is not English and who graduated from a university where the language of instruction and examination was not English. This requirement must be satisfied using a Test of English as a Foreign Language (TOEFL) with a verbal and a written component. To be considered for admission, applicants must achieve the following minimum scores:
  - paper-based TOEFL exam: 580 and 5 on the Test of Written English (TWE)
  - Internet-based TOEFL exam: 93/120 and 22/30 on the writing and speaking sections.
    Official copies of these scores must be submitted to the University of Toronto before a formal offer of admission can be made.

Program Requirements

- **Course requirements**. Students must complete a minimum of **2.0 full-course equivalents (FCEs)** beyond those taken at the MA level. With approval of the Graduate Coordinator, a maximum of 1.5 FCEs of these may be from another graduate unit. Students must complete, at either the MA or the PhD level, the required research methods course (CRI2010H *Methodological Issues in Criminology and Sociolegal Studies*) and the required theory course (CRI1020H *Law and State Power: Theoretical Perspectives*). With the approval of the Graduate Coordinator, students can take a theory course offered through another graduate unit in lieu of CRI1020H. Students will normally complete all course requirements for the PhD in Year 1.
- **Professional development sequence**. Year 1 doctoral students will participate in CRI1010Y (Credit/No Credit; 0.0 FCE), a sequence of eight monthly workshop meetings of approximately two hours in length led by one or more faculty members and dedicated to discussion of a range of important issues in graduate professional development. Meetings will be scheduled at the beginning of the academic year, and attendance will be taken at each meeting. Students must normally attend at least six workshop meetings by the end of the second session of Year 1 to complete this requirement, and those who do not do so must make up the required sessions by the end of the second session of Year 2.
- **One comprehensive exam**. This exam must take the form of a major review paper. Students are required to read widely on a particular topic and identify and evaluate major theoretical debates and methodological issues. Students should provide an original, critical analysis of the literature and discuss possibilities for future work in their topic area. The comprehensive exam should normally be completed by the end of the second session of Year 2.
- **Language requirements**. Students must have an adequate knowledge of a language other than English if an additional language is deemed essential for satisfactory completion of research for the thesis.

- **Thesis**. PhD students must prepare an original thesis that is a significant contribution to knowledge in criminology or sociolegal studies. The thesis is a sustained piece of research written in an integrated series of chapters. The thesis is normally supervised by a member of the graduate faculty, with two other members of the graduate faculty serving on the thesis committee.
- **Residency**. PhD students are required to be on campus full-time for the period of their program, except for approved field research and academic exchanges. Students are expected to participate in the Centre's activities associated with the program.

Program Length

4 years full-time

Time Limit

6 years full-time

Criminology and Sociolegal Studies: Criminology and Sociolegal Studies MA, PhD Courses

All courses are half courses (0.5 FCE), with the exception of CRI3360Y[0] *Research Paper* (1.0 FCE). Not all courses are offered every year. Consult the Centre for Criminology and Sociolegal Studies regarding course availability.

Due to space limitations, criminology graduate students will be given priority in graduate course enrolment. All other students must receive written permission from the instructor and the Graduate Coordinator before enrolling in any of the Centre's graduate courses.

Required Courses

CRI1010Y[0]	Professional Development Workshops (Credit/No Credit)
CRI2010H	Methodological Issues in Criminology and Sociolegal Studies

Elective Courses

CRI1020H	Law and State Power: Theoretical Perspectives
CRI1030H	Introduction to Science and Technology Studies: Sociolegal Approaches
CRI1050H	Transnationalism, Culture, and Power (TCP)
CRI2040H	Drugs and Crime
CRI2060H	Prisons and Punishment
CRI2120H	Data Analysis
CRI2140H	Guilt, Responsibility, and Forensics
CRI2150H	Preventing Wrongful Convictions
CRI3020H	Criminology and the Policy-Making Process
CRI3110H	Qualitative Research Methods
CRI3120H	Politics and Crime
CRI3130H	Policing
CRI3140H	Special Topics in Criminology and Sociolegal Studies
CRI3146H	Inequality and Criminal Justice
CRI3220H	Organized Crime and Corruption
CRI3240H	Penology
CRI3270H	The Psychology of Criminal Behaviour: Theory and Practice
CRI3310H	Special Topics in Criminology and Sociolegal Studies
CRI3320H	The Criminal Process
CRI3330H	Contemporary Issues in Safety and Security
CRI3340H	Special Topics in Criminology and Sociolegal Studies
CRI3350H	Directed Research in Criminology and Sociolegal Studies
CRI3351H	Directed Research in Criminology and Sociolegal Studies
CRI3355H	Sentencing
CRI3356H	Youth Crime and Youth Justice
CRI3360Y[0]	MA Research Paper

[0] Course that may continue over a program. Credit is given when the course is completed, or the course is graded when completed.

Overview

The Department of Curriculum, Teaching and Learning (CTL) is the largest of four departments at the Ontario Institute for Studies in Education (OISE). With a diverse community of tenured, tenure-stream faculty, and lecturers, the department offers a wide range of graduate courses and programs relating to academic scholarship and professional practice. Faculty and students research, write, and teach about a wide variety of subjects concerning children, youth, and teachers, both in and out of schools.

The department offers graduate programs in three areas of study: 1) Curriculum & Pedagogy; 2) Language and Literacies Education; and 3) Teaching. These programs reflect a variety of scholarly interests and are closely linked with the department's strong research base.

CTL: Curriculum and Pedagogy Overview

Program Description

The Curriculum and Pedagogy (C&P) program is a forum for systematic reflection on curriculum and pedagogy, viewed in the broadest sense as educational experiences and the learning and teaching experiences that occur in both formal and informal settings. This includes a critical examination of the substance (subject matter, courses, programs of study), purposes, and the practices and relationships through which teaching and learning happen in educational settings. Given the diverse academic and research interests of faculty members, the program is organized into seven constituent but optional program emphases.

The C&P program offers the following seven program emphases:

- Arts in Education
- Critical Studies in Curriculum and Pedagogy
- Digital Technologies in Education
- Indigenous Education and Decolonization
- Qualitative Methodologies
- Science, Mathematics and Technology (SMT)
- Wellbeing

PhD, MA, and MEd students enrolled in the C&P program are required to complete three courses from a list of courses affiliated with the emphasis, in order to have the emphasis noted on their transcript. Upon successful completion of the emphasis requirements and successful completion of the degree requirements, students may make a request with the C&P administrator, prior to graduation, to have the emphasis noted on the student transcript.

CTL: Curriculum and Pedagogy MA

Master of Arts

The MA degree program is designed to provide academic study and research training related to curriculum and pedagogy. Applicants who anticipate going on to further study at the PhD level are advised to apply for enrolment in an MA rather than an MEd degree program. The MA can be taken on a full-time or part-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Curriculum, Teaching and Learning's additional admission requirements stated below.
- Admission normally requires an appropriate bachelor's degree, with the equivalent of at least a University of Toronto mid-B or better in the final year, in a relevant discipline or professional program.
- Ordinarily, applicants will have at least one year of relevant, successful, professional experience prior to applying.
- Statement of Intent: Applicants should state the reasons they wish to undertake a research-oriented program of study in curriculum and pedagogy. The chief academic interests and experience, professional concerns, and career plans related to any aspect of curriculum and pedagogy should be discussed. In order to identify their research interests in their Statement of Intent, applicants should visit the Curriculum and Pedagogy program web page.
- The Admissions Committee reviews this statement to determine the areas of study and/or problems of curriculum and pedagogy in which an applicant is most interested and to link the applicant to appropriate faculty advisors.

Program Requirements

- **Coursework.** Students must complete **4.0 full-course equivalents (FCEs)** as follows:
  - At least 2.0 FCEs, normally CTL 1000-level courses undertaken in the Curriculum and Pedagogy program.
  - CTL1000H *Foundations of Curriculum & Pedagogy* (0.5 FCE).
  - A research methods course (0.5 FCE) from an approved course listing.
  - Additional courses may be required of some applicants, depending on previous experience and academic qualifications.
- **Thesis.**
- Students are responsible for meeting deadlines to complete their course requirements, thesis committee formation, and thesis ethical review.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

CTL: Curriculum and Pedagogy MEd

Master of Education

The Master of Education (MEd) degree program is designed chiefly for the professional development of those who are already engaged in a career related to education, broadly defined. Applicants who anticipate going on to further study at the PhD level are advised to apply for enrolment in an MA rather than an MEd degree program. The MEd program is offered as a general program (no field) or as an Online Teaching and Learning field. The field in Ontario Teaching and Learning is designed for students interested in engaging with scholarly research in distance education who want to learn how to effectively instruct and design online courses.

The MEd can be taken on a full-time or part-time basis.

Note: The MEd is not a teacher certification program. Find out more about teacher certification programs.

MEd General Program (No Field)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies, which specify an appropriate bachelor's degree from a recognized university. This degree must be completed with an academic standing equivalent to a University of Toronto mid-B or better in the final year. Applicants must also satisfy the Department of Curriculum, Teaching and Learning's additional admission requirements stated below.
- Ordinarily, applicants will have at least one year of relevant, successful, professional experience prior to applying.
- In the Statement of Intent, applicants should state the reasons they wish to study curriculum at the graduate level. The chief academic interests, professional concerns, and career plans related to curriculum studies and teacher development should be discussed. In order to identify their research interests in their Statement of Intent, applicants should visit the Curriculum and Pedagogy program web page. The admissions committee reviews this statement to determine the kind of focus or area of study in which an applicant is most interested and to link the applicant to appropriate faculty advisors.

Program Requirements

- **Coursework.** Students must complete **5.0 full-course equivalents (FCEs)** as follows:
  - At least 2.5 FCEs, normally CTL 1000-level courses undertaken in the Curriculum and Pedagogy program.

  - CTL1000H *Foundations of Curriculum & Pedagogy* (0.5 FCE).
- Additional study may be required either within the degree program or prior to admission, depending on previous experience and academic qualifications.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

CTL: Curriculum and Pedagogy MEd; Field: Online Teaching and Learning

Master of Education

The Master of Education (MEd) degree program is designed chiefly for the professional development of those who are already engaged in a career related to education, broadly defined. Applicants who anticipate going on to further study at the PhD level are advised to apply for enrolment in an MA rather than an MEd degree program. The MEd program is offered as a general program (no field) or as an **Online Teaching and Learning field**. The field in Online Teaching and Learning is designed for students interested in engaging with scholarly research in distance education, who want to learn how to effectively instruct and design online courses.

The MEd can be taken on a full-time or part-time basis.

Note: The MEd is not a teacher certification program. Find out more about teacher certification programs.

Field: Online Teaching and Learning

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies, which specify an appropriate bachelor's degree from a recognized university. This degree must be completed with an academic standing equivalent to a University of Toronto mid-B or better in the final year. Applicants must also satisfy the Department of Curriculum, Teaching and Learning's additional admission requirements stated below.
- Ordinarily, applicants will have at least one year of relevant, successful, professional experience prior to applying.
- In the Statement of Intent, applicants should state the reasons they wish to study curriculum at the graduate level. The chief academic interests, professional concerns, and career plans related to curriculum studies and teacher development should be discussed. In order to identify their research interests in their Statement of Intent, applicants should visit the Curriculum and Pedagogy program web page. The admissions committee reviews this statement to determine the kind of focus or area of study in which an applicant is most interested and to link the applicant to appropriate faculty advisors.

Program Requirements

- **Coursework.** Students must successfully complete a total of **5.0 full-course equivalents (FCEs)** as follows:
  - 1.5 FCEs in required courses: CTL1000H, CTL1620H, and CTL1624H.
  - 1.5 FCEs from the following: CTL1603H, CTL1606H, CTL1608H, CTL1609H, CTL1615H, CTL1616H, CTL1617H, CTL1621H, CTL1622H, CTL1623H, CTL1625H, CTL1926H.
  - 2.0 FCEs in elective courses.
- Additional study may be required either within the degree program or prior to admission, depending on previous experience and academic qualifications.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

CTL: Curriculum and Pedagogy PhD

Doctor of Philosophy

The PhD program demands a strong commitment to research. The Curriculum and Pedagogy program offers both full-time and flexible-time PhD program options. Degree requirements for both options are the same; only the length of time to completion differs (see Program Length below). Applicants must declare the option for which they wish to apply.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Curriculum, Teaching and Learning's additional admission requirements stated below.
- A master's degree in education from a recognized university with a grade equivalent to a University of Toronto B+ or better and in the same area of specialization as proposed at the doctoral level is required. Further documentation may be required to establish equivalence.

- Applicants ordinarily have a minimum of two years' professional experience prior to applying.
- Applicants are required to submit, along with the application:
  - Their master's thesis or a sample of single-authored scholarly writing; for details about what constitutes an appropriate writing sample, visit the Curriculum and Pedagogy program web page.
  - A Statement of Intent describing their intellectual interests and concerns relevant to curriculum and pedagogy, reasons for wishing to take the program, previous qualifications and professional experiences, and articulating their research and professional interests, and future career goals
  - Two letters of reference: one academic and one professional.

Program Requirements

- **Coursework.** Students must normally complete **3.5 full-course equivalents (FCEs)** as follows:
  - At least 2.0 FCEs, normally CTL 1000-level courses.
  - CTL1899H *C&P Doctoral Proseminar in Curriculum & Pedagogy* (0.5 FCE).
  - Students are expected to take CTL1000H *Foundations of Curriculum & Pedagogy* (0.5 FCE) if they did not complete it at the master's level
  - Additional courses may be required of some students.
  - One research methods course (0.5 FCE) from an approved course listing.
- Comprehensive examination.
- A **thesis** embodying the results of an original investigation, and a **Doctoral Final Oral Examination** on the content and implications of the thesis.
- Students are responsible for meeting deadlines to complete their course requirements, thesis committee formation, comprehensive examination, and thesis ethical review.
- Full-time PhD students must maintain full-time status throughout their program of study.
- Students must register continuously and pay the full-time fee until all degree requirements have been fulfilled.
- Students cannot transfer between the full-time and flexible-time PhD options.

Program Length

4 years

Time Limit

6 years

PhD Program (Flexible-Time)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Curriculum, Teaching and Learning's additional admission requirements stated below.
- A master's degree in education from a recognized university with a grade equivalent to a University of Toronto B+ or better and in the same area of specialization as proposed at the doctoral level is required. Further documentation may be required to establish equivalence.
- Applicants ordinarily have a minimum of two years' professional experience prior to applying.
- Applicants are required to submit, along with the application:
  - Their master's thesis or a sample of single-authored scholarly writing; for details about what constitutes an appropriate writing sample, visit the Curriculum and Pedagogy program web page.
  - A Statement of Intent describing their intellectual interests and research concerns relevant to curriculum and pedagogy, reasons for wishing to take the program, previous qualifications and professional experiences, and articulating their research and professional interests, and future career goals.
  - Two letters of reference: one academic and one professional.
- Applicants to the flexible-time PhD option are accepted under the same admission requirements as applicants to the full-time PhD option. Applicants must demonstrate that they are currently employed and are active professionals engaged in activities relevant to their proposed program of study.

Program Requirements

- **Coursework.** Students must normally complete a total of **3.5 full-course equivalents (FCEs)** as follows:
  - At least 2.0 FCEs, normally CTL 1000-level courses.
  - CTL1899H *C&P Doctoral Proseminar in Curriculum & Pedagogy* (0.5 FCE).
  - Students are expected to take CTL1000H *Foundations of Curriculum & Pedagogy* (0.5 FCE) if they did not complete it at the master's level.
  - One research methods course (0.5 FCE) from an approved course listing.
  - Additional courses may be required of some students.
- Comprehensive examination.
- A **thesis** embodying the results of an original investigation, and a **Doctoral Final Oral Examination** on the content and implications of the thesis.
- Students are responsible for meeting deadlines to complete their course requirements, thesis committee formation, comprehensive examination, and thesis ethical review.
- Students must register continuously until all degree requirements have been fulfilled. They must register full-time during the first four years and may continue as part-time thereafter, with their department's approval.
- Students cannot transfer between the full-time and flexible-time PhD options.

Program Length

8 years

Time Limit

8 years

CTL: Curriculum and Pedagogy MA, MEd, PhD Emphases

Emphasis: Arts in Education

The emphasis in Arts in Education offers students specialized courses in the areas of music and sound; drama, theatre, and performance; media and visual arts; and other courses that manifest social justice concerns reflected through the arts and cultural production. This emphasis brings together students interested in the arts; elementary and secondary arts specialist teachers and community-based educators interested in arts education in the broader community. They are a vibrant community of scholars and graduate students who thrive on collegiality, intellectual debate, critical analyses, and creative inquiry.

- **Coursework.** From the following course list, MA, MEd, and PhD students must successfully complete **1.5 full-course equivalents (FCEs)**, which are counted towards the total FCEs required for the student's degree program:
  - CTL1062H, CTL1064H, CTL1099H, CTL1100H, CTL1104H, CTL1322H, CTL1811H, CTL1818H, CTL1822H, CTL3034H, CTL5013H, CTL5018H, CTL5019H, CTL5020H, CTL5048H.
- Upon successful completion of the emphasis requirements and the successful completion of the degree requirements, students may make a request to the C&P Program Administrator to have the emphasis noted on the student transcript. This request must be made before graduation. A course can only be applied to the requirements of a single emphasis.

Emphasis: Critical Studies in Curriculum and Pedagogy

The emphasis in Critical Studies in Curriculum and Pedagogy (CSCP) encourages a critical exploration of educational phenomena, within and beyond the scope of schools, from local place-based and transnational comparative perspectives. CSCP courses focus on social justice issues in education, including those related to environmental justice, globalization, colonialism, race, disability, gender, sexuality, conflict-peace, and cultural and linguistic differences.

- **Coursework.** From the following course list, MA, MEd, and PhD students must successfully complete **1.5 full-course equivalents (FCEs)**, which are counted towards the total FCEs required for the student's degree program:
  - CTL1011H, CTL1024H, CTL1031H, CTL1037H, CTL1048H, CTL1049H, CTL1062H, CTL1063H, CTL1064H, CTL1065H, CTL1099H, CTL1218H, CTL1219H, CTL1220H, CTL1221H, CTL1304H, CTL1306H, CTL1307H, CTL1312H, CTL1313H, CTL1318H, CTL1319H, CTL1330H, CTL1818H, CTL1822H, CTL3031H, CTL3034H, CTL5010H, CTL5048H, CTL5049H, CTL5050H, CTL5054H, CTL5055H.
- Upon successful completion of the emphasis requirements and the successful completion of the degree requirements, students may make a request to the C&P Program Administrator to have the emphasis noted on the student transcript. This request must be made before graduation. A course can only be applied to the requirements of a single emphasis.

Emphasis: Digital Technologies in Education

What are the emerging trends in the contemporary educational technology landscape? Given the thousands and thousands of educational apps and web-based technologies available to teachers, where are we seeing potential?

The emphasis in Digital Technologies in Education engages educators in an examination of technology and its effective use in educational contexts. Drawing on research from the fields of the learning sciences, psychology, diversity studies, and information and communication technology, learners will deepen their understanding of such topics as knowledge-building, computational thinking, gamification of learning, online knowledge communities, social media, immersive technologies (virtual reality, augmented reality), technology and assessment, and mobile learning.

- **Coursework.** From the following course list, MA, MEd, and PhD students must successfully complete **1.5 full-course equivalents (FCEs)**, which are counted towards the total FCEs required for the student's degree program:
  - CTL1602H, CTL1603H, CTL1606H, CTL1608H, CTL1609H, CTL1615H, CTL1616H, CTL1617H, CTL1620H, CTL1621H, CTL1622H, CTL1623H, CTL1624H, CTL1625H, CTL1926H, CTL5011H, CTL5038H.
- Upon successful completion of the emphasis requirements and the successful completion of the degree requirements, students may make a request to the C&P Program Administrator to have the emphasis noted on the student transcript. This request must be made before graduation. A course can only be applied to the requirements of a single emphasis.

Emphasis: Indigenous Education and Decolonization

The emphasis in Indigenous Education and Decolonization not only examines the complex and tangled histories of those on whose traditional lands OISE/University of Toronto is situated — the Ouendat (Wyandot-Huron), Onondowahgah (Seneca-) and the Misi-zaagiing (Mississaugas-Anishinaabek) nations — but also extends to lands across Turtle Island and Abya-Yala. Tkaronto, as a starting place to understand Indigenous Education and Decolonization more globally, is subject to the *Dish With One Spoon Wampum Belt Covenant*, an agreement between the Hodenosaunee and the Anishinaabe and allied nations to peaceably share and care for the resources around the Great Lakes regions.

This emphasis will provide an entry point into the knowledge systems that emerge from this particular land, with an emphasis on land itself as a teacher and a source of knowledge. The emphasis will be grounded on a decolonial pedagogy, with a commitment to anti-colonization and decolonization practices. Recognizing that these lands have existed, and still do exist, first and foremost in relationship to Indigenous people requires a critical consciousness and acknowledgement of whose traditional lands we are now on as well as the historical and contemporary realities of those relationships. It is this understanding that forms the philosophical foundation upon which all of our courses position themselves within the emphasis.

- **Coursework.** From the following course list, MA, MEd, and PhD students must successfully complete **1.5 full-course equivalents (FCEs)**, which are counted towards the total FCEs required for the student's degree program:
  - CTL1063H, CTL1110H, CTL1320H, CTL1321H, CTL1322H, CTL1331H, CTL1332H, CTL5039H, CTL5049H, CTL5050H, CTL5053H, CTL5054H, CTL5056H.
- Upon successful completion of the emphasis requirements and the successful completion of the degree requirements, students may make a request to the C&P Program Administrator to have the emphasis noted on the student transcript. This request must be made before graduation. A course can only be applied to the requirements of a single emphasis.

Emphasis: Qualitative Methodologies

The emphasis in Qualitative Methodologies will encourage a focused exploration of qualitative paradigms, approaches, and methods within and beyond the scope of schools and education. This emphasis will allow students to take introductory and specialized courses in a range of contemporary qualitative methodologies in areas such as research and participatory inquiry; arts-based research and performed ethnography; feminist and queer approaches; indigenous methodologies, anti-colonial, decolonial, post-foundational, and social justice research. These courses will address the need for students to deepen their understanding, application, and specialization in qualitative methodologies in education. Students will also explore how qualitative methodologies are applied to non-formal education contexts such as social justice pedagogies.

- **Coursework.** From the following course list, MA, MEd, and PhD students must successfully complete **1.5 full-course equivalents (FCEs)**, which are counted towards the total FCEs required for the student's degree program:
  - CTL1018H, CTL1041H, CTL1049H, CTL1062H, CTL1063H, CTL1099H, CTL1211H, CTL1306H, CTL1322H, CTL1809H, CTL1822H, CTL5019H, CTL5029H, CTL5030H.
- Upon successful completion of the Emphasis requirements and the successful completion of the degree requirements, students may make a request to the C&P Program Administrator to have the emphasis noted on the student transcript. This request must be made before graduation. A course can only be applied to the requirements of a single emphasis.

Emphasis: Science, Mathematics and Technology (SMT)

The emphasis in SMT is dedicated to exploring theory, practice, and contemporary issues pertaining to SMT education in diverse settings and contexts. They are a vibrant community of scholars and graduate students who thrive on collegiality, intellectual debate, critical analyses, and inquiry.

Drawing on research and practice, students will explore and critique SMT education while supporting research, curriculum development, teaching, and innovation. With strong connections to the SMT Centre, and the collaborative specialization in Engineering Education, students will engage deeply with topics such as science, technology engineering, and mathematics (STEM) education; SMT education in formal and informal settings; equity; inclusion; diversity; activism; and social and environmental justice.

- **Coursework.** From the following course list, MA, MEd, and PhD students must successfully complete **1.5 full-course equivalents (FCEs)**, which are counted towards the total FCEs required for the student's degree program:
  - CTL1119H, CTL1120H, CTL1202H, CTL1206H, CTL1207H, CTL1209H, CTL1214H, CTL1215H, CTL1217H, CTL1218H, CTL1219H, CTL1221H, CTL1222H, CTL1223H, CTL1224H, CTL1225H, CTL1602H, CTL1606H, CTL1608H, CTL1609H, CTL1841H, CTL1926H, CTL5043H, CTL5044H.
- Upon successful completion of the emphasis requirements and the successful completion of the degree requirements, students may make a request to the C&P Program Administrator to have the emphasis noted on the student transcript. This request must be made before graduation. A course can only be applied to the requirements of a single emphasis.

Emphasis: Wellbeing

The purpose of education should be to move people toward improved connectedness and happiness, as well as to further accomplish and to develop greater opportunities for growth. The emphasis in Wellbeing provides hope and healing for individuals and society through innovative educational experiences by helping people deal well and wisely with issues in their lives and times. The mission is to provide critical educational experiences that awaken the best in the human spirit by addressing issues of public concern.

Critical issues investigated through coursework may be related to mental health, environmental issues, and destructive ethnocentric patterns of behaviour, as well as the wise and ethical use of technology. In addition, strategies for managing anxiety and depression, and for raising awareness of inequitable and discriminatory conditions are similar across differing contexts. Therefore, one must examine one’s own life and circumstances and larger societal and institutional contexts before taking informed action for the greater good of all people.

The goal is agency through self-advocacy and advocacy for others. Through this process, one does not merely deconstruct but also reconstructs through learning about how one’s belief

structures and patterns may become more beneficial to oneself and to those around. More specifically, these holistic approaches involve various forms such as narrative/biography, phenomenology, meditation, mindfulness practice, body work, mental health, and conscious use of technology.

- **Coursework.** From the following course list, MA, MEd, and PhD students must successfully complete **1.5 full-course equivalents (FCEs)**, which are counted towards the total FCEs required for the student's degree program:
  - CTL1016H, CTL1027H, CTL1106H, CTL1110H, CTL1121H, CTL1319H, CTL1331H, CTL1424H, CTL1817H, CTL1825H, CTL3037H, CTL5011H, CTL5042H.
- Upon successful completion of the emphasis requirements and the successful completion of the degree requirements, students may make a request to the CSTD Program Administrator to have the emphasis noted on the student transcript. This request must be made before graduation. A course can only be applied to the requirements of a single emphasis.

CTL: Curriculum and Pedagogy MA, MEd, PhD Courses

Not all courses are offered every year. Please consult the Office of the Registrar and Student Services' course schedule.

Master's Level

CTL1000H	Les fondements du curriculum et de la pédagogie
CTL1000H	Foundations of Curriculum & Pedagogy
CTL1001H	Values and Schooling
CTL1005H	Language, Literacy, and the School Curriculum
CTL1011H	Anti-Oppression Education in School Settings
CTL1011H	L'éducation pour l'anti-oppression en milieu scolaire
CTL1016H	Cooperative Learning Research and Practice
CTL1018H	Introduction to Qualitative Inquiry in Curriculum, Teaching, and Learning
CTL1023H	Technology and Education: Critical Perspectives on Theory and Practice
CTL1024H	Poststructuralism and Education
CTL1026H	Performed Ethnography
CTL1027H	Facilitating Reflective Professional Development
CTL1031H	Language, Culture, and Identity: Using the Literary Text in Teacher Development
CTL1033H	Multicultural Perspectives in Teacher Development: Reflective Practicum
CTL1036H	Thoughtful Teaching and Practitioner Inquiry
CTL1037H	Teacher Development: Comparative and Cross-Cultural Perspectives
CTL1040H	Fundamentals of Program Planning and Evaluation
CTL1041H	Research Methods In Education
CTL1042H	Instrument Development in Education
CTL1043H	Research Issues in Alternative Assessments
CTL1046H	Training Evaluation
CTL1047H	Course Self-Assessment
CTL1048H	Qualitative Methodology: Challenges and Innovations
CTL1049H	Critical Practitioner Research in Education
CTL1060H	Education and Social Development
CTL1062H	Performed Ethnography and Research Informed Theatre
CTL1063H	Pedagogies of Solidarity
CTL1064H	Applied Theatre and Performance in Sites of Learning
CTL1065H	Gender, Sexuality, and Schooling
CTL1099H	Critical Approaches to Arts-Based Research
CTL1100H	Arts in Urban Schools (Exclusion: CTL5033H)
CTL1104H	Play, Drama, and Arts Education
CTL1106H	Spirituality in Education
CTL1110H	The Holistic Curriculum
CTL1117H	Liberatory Practices in Drama and Education
CTL1119H	Gaining Confidence in Mathematics: A Holistic Approach to Rebuilding Math Knowledge and Overcoming Anxiety
CTL1120H	Effective Teaching Strategies in Elementary Mathematics Education: Research and Practice
CTL1121H	Foundations of Wellness Through a Phenomenology of Practice (Exclusion: CTL5045H)
CTL1122H	Exploring the Praxis of Environmental and Sustainability Education (Exclusion: CTL5027H)
CTL1200H	Science in the School Curriculum
CTL1202H	Mathematics in the School Curriculum: Elementary

CTL1206H	Teaching and Learning Science
CTL1207H	Teaching and Learning about Science: Issues and Strategies in Science, Technology, Society, and Environment (STSE) Education
CTL1208H	Curriculum Issues in Science and Technology: An Historical Perspective
CTL1209H	Current Issues in Science and Technology Education
CTL1211H	Action Research in Science, Mathematics, and Technology Education
CTL1212H	Curriculum Making in Science: Some Considerations in the History, Philosophy, and Sociology of Science
CTL1214H	Equity Issues in Science Education
CTL1215H	Teaching and Learning About Science and Technology: Beyond Schools
CTL1217H	Integrating Science, Mathematics, and Technology Curricula
CTL1218H	Culture and Cognition in Mathematics, Science, and Technology Education
CTL1219H	Making Secondary Mathematics Meaningful
CTL1220H	Sociocultural Theories of Learning
CTL1221H	Education for Human Goals Local and Global: How's Science Education Helping?
CTL1222H	Environmental Studies in Science, Mathematics, and Technology Education
CTL1223H	Activist Science and Technology Education
CTL1224H	Curriculum Issues in Science Education (Exclusion: CTL1799H)
CTL1225H	Mathematics Education: Linking Research and Practice (Exclusion: CTL5040H)
CTL1304H	Cultural Studies and Education
CTL1306H	La recherche qualitative en éducation: bases théoriques et pratiques
CTL1306H	Qualitative Research Methods in Education: Concepts and Methods
CTL1307H	Identité collective et éducation minoritaire de langue française
CTL1307H	Identity Construction and Education of Minorities
CTL1309H	Les stéréotypes sexuels dans les programmes scolaires
CTL1312H	Democratic Citizenship Education
CTL1313H	Gender Equity in the Classroom
CTL1316H	Global Education: Theory and Practice
CTL1318H	Teaching Conflict and Conflict Resolution
CTL1319H	Religious Education: Comparative and International Perspectives
CTL1320H	Introduction to Aboriginal Land-Centered Education: Historical and Contemporary Perspectives
CTL1321H	Aboriginal Civilization: Language, Culture, and Identity
CTL1322H	Literacies of Land: Narrative, Storying, and Literature
CTL1325H	Citizenship Education, Pedagogy, and School Communities
CTL1330H	Education and Peacebuilding in Conflict Zones: International Comparative Perspectives
CTL1331H	Land-Centred Approaches to Research and Community Engagement
CTL1332H	Introduction to Decolonization in Education (Exclusion: CTL5010H)
CTL1333H	Settler Colonialism and Pedagogies of Oppression (Exclusion: CTL5042H)
CTL1400H	Classroom Adaptations and Instructional Strategies
CTL1402H	Adaptive Instruction in Inclusive Classrooms
CTL1403H	Special Education and Social Representation of Difference
CTL1406H	The Origins of Modern Schooling: Issues in the Development of the North American Educational System
CTL1407H	Rural Education and Social Reform in Canadian History, 1860–1960
CTL1424H	Religion, Ideology, and Social Movement in the Development of North American Education
CTL1426H	The History of Gender and Education in Canada
CTL1427H	Commemorating Canada, 1800s–1900s
CTL1428H	Immigration and the Development of Canadian Education
CTL1429H	Ethnicity and the Development of Canadian Education
CTL1430H	Gendered Colonialisms, Imperialisms, and Nationalisms in History
CTL1448H	Popular Culture and the Social History of Education II
CTL1454H	The Battle Over History Education in Canada
CTL1602H	Introduction to Computers in Education

CTL1603H	Introduction to Knowledge Building
CTL1604H	Video/Multimedia Design
CTL1606H	Computers in the Curriculum
CTL1608H	Constructive Learning and Design of Online Environments
CTL1609H	Educational Applications of Computer-Mediated Communication
CTL1611H	Computer-Mediated Distance Education
CTL1612H	The Virtual Library (Non-credit)
CTL1615H	Introduction to AI in Education (Exclusion: CTL5052H)
CTL1616H	Blended Learning: Issues and Applications
CTL1617H	Social Media and Education (Exclusion: CTL5015H)
CTL1620H	Foundations of Online Teaching and Learning
CTL1621H	Design and Development of Online Content, Media, and Artifacts
CTL1622H	Data Gathering and Assessment in Online Courses
CTL1623H	Immersive Technology in Education (Exclusion: CTL5047H)
CTL1624H	Instructional Design: Beyond the Lecture (Exclusion: CTL5016H)
CTL1625H	Digital Media and Practices for a Knowledge Society (Exclusion: CTL5036H)
CTL1797H	Practicum in Curriculum & Pedagogy: Master's Level
CTL1798H	Individual Reading and Research in Curriculum & Pedagogy: Master's Level
CTL5010H to CTL5037H	Special Topics in Curriculum: Master's Level
CTL5036H	Digital Media and Practices for a Knowledge Society
CTL5047H	Immersive Technology in Education: Virtual Reality and Augmented Reality Applications
CTL5700H to CTL5715H	Special Topics in Teaching

Doctoral Level

CTL1808H	Curriculum Innovation in Teacher Education
CTL1809H	Narrative and Story in Research and Professional Practice
CTL1811H	Writing Research/Research Writing: Moving from Idea to Reality
CTL1812H	Professional Ethics of Teaching and Schooling
CTL1817H	Current Issues in Teacher Education
CTL1818H	Arts in Education: Concepts, Contexts, and Frameworks
CTL1819H	Multicultural Literature in the Schools: Critical Perspectives and Practices
CTL1822H	Urban School Research: Youth, Pedagogy, and the Arts
CTL1825H	The Teacher as a Contemplative Practitioner
CTL1841H	Research Seminar in Science, Mathematics, and Technology Education
CTL1844H	Seminar in Evaluation Problems (Prerequisite: CTL2803H, CTL1843H, or equivalent)
CTL1899H	C&P Doctoral Proseminar in Curriculum & Pedagogy
CTL1926H	Knowledge Media and Learning
CTL1998H,Y	Individual Reading and Research in Curriculum & Pedagogy: Doctoral Level
CTL6000H	Special Topics in C&P: Doctoral Level

CTL: Language and Literacies Education Overview

Program Description

The Language and Literacies Education program investigates questions about the relationships of literacies in language and language in literacies across communities, societies, instructional environments, and informal learning settings.

Language and Literacies Education courses address current issues in the study of applied linguistics and literacies, such as:

- The learning, teaching, and use of additional, Indigenous, official, international/heritage, and sign languages and literacies;
- Curriculum, instruction, and assessment related to the development of first and additional languages and K–12 literacy skills;
- The development of bilingual, multilingual, and translinguistic abilities;
- Language and literacy education policies and planning;
- Pedagogy oriented to multiliteracies development, including early literacy and adolescent reading, writing and oral language development, and children's literature across the curriculum;
- Social justice issues related to plurilingualism and cultural and linguistic diversity; and

- Pedagogical implications of the fact that language and literacy are infused into all aspects of learning in contexts characterized by linguistic diversity.

CTL: Language and Literacies Education MA

Master of Arts

Applicants expecting to pursue a doctorate in the future are advised to enrol in the MA (rather than the MEd) program in Language and Literacies Education (LLE). The MA program can be taken on a full-time or part-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Admission requires an appropriate bachelor's degree, with the equivalent of a University of Toronto mid-B or better in the final year, in a relevant discipline or professional program. Applicants must also satisfy the Department of Curriculum, Teaching and Learning's additional admission requirements stated below.
- Ordinarily, applicants should have teacher certification and at least one year of relevant successful professional experience prior to applying.
- All applicants must submit a resumé and a Statement of Intent describing their reasons for wishing to take the program, previous qualifications and professional experiences, particular research or professional interests, and future career goals.

Program Requirements

- **Coursework.** Students must complete **4.0 full-course equivalents (FCEs)** or eight half courses as follows.
  - A minimum of 2.0 FCEs in CTL 3000-level courses within the LLE program including CTL3001H *Research Colloquium in Language and Literacies Education* (0.5 FCE).
  - A research methods course relevant to the topic of the thesis (0.5 FCE). Any of the following courses can fulfil this requirement: CTL1018H, CTL1041H, CTL1306H, CTL3033H, CTL3807H, CTL3810H, APD1296H, APD3202H, JOI1287H, JOI1288H, JOI3228H, or SJE1905H.
  - Students wishing to propose an alternative course to fulfil one of the LLE course requirements will be required to obtain the approval of both the LLE graduate program coordinator and either their faculty advisor or their thesis supervisor.
  - Additional courses may be required of some applicants.
- **Thesis.**
- Students are responsible for meeting deadlines to complete their course requirements, thesis committee formation, and thesis ethical review.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

CTL: Language and Literacies Education MEd

Master of Education

The Master of Education (MEd) degree program can be taken on a full-time or part-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies, which specify an appropriate bachelor's degree from a recognized university, with the equivalent of a University of Toronto mid-B or better in the final year. Applicants must also satisfy the Department of Curriculum, Teaching and Learning's additional admission requirements stated below.
- Ordinarily, applicants should have teacher certification and at least one year of relevant successful professional experience prior to applying.
- All applicants are required to submit a resumé and a Statement of Intent describing their reasons for wishing to take the program, previous qualifications and professional experiences, particular research or professional interests, and future goals.

Program Requirements

- **Coursework.** The MEd program consists of **5.0 full-course equivalents (FCEs)** including:
  - A minimum of 2.5 FCEs in CTL 3000-level courses.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

CTL: Language and Literacies Education MEd; Field: Language Teaching

Master of Education (Field: Language Teaching)

Within the existing Master of Education (MEd) degree program, the field in Language Teaching includes a structured focus on language teaching foundations. Language Teaching integrates an engagement with scholarly research in Language and Literacies Education with a commitment to excellence in teaching to support graduate students as novice language teachers. Students pursuing this field will graduate with: (a) a solid theoretical and intellectual grounding in LLE research; (b) a course-based, practitioner focus on language teaching foundations; and (c) gained practical experience in a language-education context through a required practicum.

This field is only available on a full-time basis. Priority will be given to novice teachers with less than a year of teaching experience. This field will not lead to Teaching English as a Second Language (TESL) Ontario certification nor to the Certificate of Qualification and Registration with the Ontario College of Teachers.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies, which specify an appropriate bachelor's degree from a recognized university, with the equivalent of a University of Toronto mid-B or better in the final year. Applicants must also satisfy the Department of Curriculum, Teaching and Learning's additional admission requirements stated below.
- Normally, applicants should have at least one year of professional experience prior to applying. Previous classroom teaching experience is not a requirement.
- All applicants are required to submit a resumé and a Statement of Intent describing their reasons for wishing to pursue this field, previous qualifications and professional experiences, particular research or professional interests, and future goals.

Program Requirements

- **Coursework.** Within the MEd program, the Language Teaching field consists of **5.0 full-course equivalents (FCEs)** as follows.
  - All students in this field must take the following three courses (1.5 FCEs):
    - CTL3002H *Second Language Teaching Methodologies*
    - CTL3010H *Second Language Learning*
    - CTL3797H *Practicum in Language and Literacies Education: Master's Level*
  - Students must then choose any two of the following courses (1.0 FCE):
    - CTL3000H *Foundations of Bilingual and Multicultural Education*
    - CTL3003H *Planning and Organizing the Second Language Curriculum*
    - CTL3008H *Critical Pedagogy, Language, and Cultural Diversity*
    - CTL3013H *Language Assessment*
    - CTL3020H *Writing in a Second Language*
    - CTL3039H *Academic English Research and Acquisition* (Credit/No Credit)
    - CTL3101H *Language Awareness for Language Educators*
  - The remaining 2.5 FCEs can be elective courses taken towards the requirements of a collaborative specialization if applicable, or courses offered within the Department of Curriculum, Teaching and Learning or other departments at OISE or the University of Toronto.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F)

Time Limit

3 years full-time

CTL: Language and Literacies Education PhD

Doctor of Philosophy

Students participating in the PhD program must have a strong commitment to research. The Language and Literacies Education (LLE) program offers both full-time and flexible-time PhD options. Degree requirements for the full-time and flexible-time options are the same. Applicants must declare their preferred option when applying.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Curriculum, Teaching and Learning's additional admission requirements stated below.
- An appropriate master's degree with a grade equivalent to a University of Toronto B+ or better from a recognized university is required.
- Admission is contingent upon satisfactory completion of a master's thesis, or the equivalent in the form of a scholarly piece of writing.
- Ordinarily, applicants will have a minimum of two years of relevant professional experience prior to applying.
- Applicants must submit a resumé and a Statement of Intent describing their reasons for wishing to take the program, previous qualifications and professional experiences, particular research or professional interests, and future career goals.

Program Requirements

- **Coursework.** Students must complete **3.5 to 4.0 full-course equivalents (FCEs)** depending on previous experience and academic qualifications, as follows:
  - A minimum of 2.0 FCEs within the LLE program, including CTL3001H *Research Colloquium in Language and Literacies Education* (0.5 FCE) and CTL3899H *Proseminar in Language and Literacies Education* (0.5 FCE), if not previously taken at the master's level. If CTL3001H or CTL3899H was taken at the master's level, students are not permitted to take it again and should substitute it with another LLE program course (0.5 FCE).
  - A research methods course relevant to the topic of the thesis (0.5 FCE). Any of the following courses can fulfil this requirement: CTL1018H, CTL1041H, CTL1306H, CTL3033H, CTL3807H, CTL3810H, APD1296H, APD3202H, JOI1287H, JOI1288H, JOI3228H, or SJE1905H.
  - A student wishing to propose an alternative course to fulfil one of the LLE course requirements must obtain the approval of the LLE program coordinator and either their faculty advisor or thesis supervisor.
- Comprehensive examination.
- A **thesis** embodying the results of an original investigation, and a **Doctoral Final Oral Examination** on the content and implications of the thesis.
- Students are responsible for meeting deadlines to complete their course requirements, thesis committee formation, comprehensive examination, and thesis ethical review.
- Full-time PhD students must maintain full-time status throughout their program of study.
- Students must register continuously and pay the full-time fee until all degree requirements have been fulfilled.
- Students cannot transfer between the full-time and flexible-time PhD options.

Program Length

4 years

Time Limit

6 years

PhD Program (Flexible-Time)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Curriculum, Teaching and Learning's additional admission requirements stated below.
- An appropriate master's degree with a grade equivalent to a University of Toronto B+ or better from a recognized university is required.
- Admission is contingent upon satisfactory completion of a master's thesis, or the equivalent in the form of a scholarly piece of writing.
- Ordinarily, applicants will have a minimum of two years of relevant professional experience prior to applying.
- Applicants must submit a resumé and a Statement of Intent describing their reasons for wishing to take the program, previous qualifications and professional experiences, particular research or professional interests, and future career goals.
- Applicants must demonstrate that they are currently employed and are active professionals engaged in activities relevant to their proposed program of study.

Program Requirements

- **Coursework.** Students must complete **3.5 to 4.0 full-course equivalents (FCEs)** depending on previous experience and academic qualifications, as follows:
  - A minimum of 2.0 FCEs within the LLE program, including CTL3001H *Research Colloquium in Language and Literacies Education* (0.5 FCE), if not previously taken at the master's level. If CTL3001H was taken at the master's level, students are not permitted to take it again and should substitute it with another LLE program course (0.5 FCE).
  - CTL3899H *Proseminar in Language and Literacies Education* (0.5 FCE), if not previously taken at the master's level. If CTL3899H was taken at the master's level, students are not permitted to take it again and should substitute it with another LLE program course (0.5 FCE).
  - A research methods course relevant to the topic of the thesis (0.5 FCE). Any of the following courses can fulfil this requirement: CTL1018H, CTL1041H, CTL1306H, CTL3033H, CTL3807H, CTL3810H, APD1296H, APD3202H, JOI1287H, JOI1288H, JOI3228H, or SJE1905H.
  - A student wishing to propose an alternative course to fulfil one of the LLE course requirements will be required to obtain the approval of the LLE program coordinator and either their faculty advisor or thesis supervisor.
- Comprehensive examination.
- A **thesis** embodying the results of an original investigation, and a **Doctoral Final Oral Examination** on the content and implications of the thesis.
- Students are responsible for meeting deadlines to complete their course requirements, thesis committee formation, comprehensive examination, and thesis ethical review.
- Students must register continuously until all degree requirements have been fulfilled. They must register full-time during the first four years and may continue as part-time thereafter, with their department's approval.
- Students cannot transfer between the full-time and flexible-time PhD options.

Program Length

7 years

Time Limit

8 years

CTL: Language and Literacies Education MA, MEd, PhD Courses

Not all courses are offered every year. Please consult the Office of the Registrar and Student Services' course schedule.

Master's Level

APD1251H	Reading in a Second Language
APD1296H	Assessing School-Aged Language Learners
CTL3000H	Foundations of Bilingual and Multicultural Education
CTL3001H	Research Colloquium in Language and Literacies Education
CTL3002H	Second Language Teaching Methodologies
CTL3003H	Planning and Organizing the Second Language Curriculum
CTL3004H	Language Awareness and its Role in Teacher Development
CTL3007H	Discourse Analysis (Exclusion: CTL3200H)
CTL3008H	Critical Pedagogy, Language, and Cultural Diversity
CTL3010H	Second Language Learning
CTL3011H	Cognitive, Sociolinguistic, and Sociopolitical Orientations in Bilingual Education Research (Exclusion: CTL3201H)
CTL3013H	Language Assessment
CTL3015H	Language and Literacies Education in Multilingual Contexts
CTL3018H	Language Planning and Policy (Exclusion: CTL3202H)
CTL3020H	Writing in a Second Language
CTL3024H	Language Teacher Education
CTL3025H	Educational Sociolinguistics
CTL3026H	Pragmatics in Language Education
CTL3028H	Literacy in Elementary Education
CTL3029H	Children's Literature as a Foundation of Literate Behaviour Across the Curriculum
CTL3030H	Theory and Practice in Elementary Literacy Instruction
CTL3031H	Children's Literature Within a Multicultural Context
CTL3032H	Teaching Writing in the Classroom
CTL3033H	Literary Research Methodologies
CTL3034H	New Literacies: Making Multiple Meanings
CTL3035H	Critical Literacy in Action
CTL3036H	Expressive Writing: Practice and Pedagogy
CTL3037H	Biography in Educational Contexts
CTL3038H	Play, Language, and Literacy in Primary Classrooms (Exclusion: CTL5302H)
CTL3039H	Academic English Research and Acquisition (Credit/No Credit; exclusion: CTL5305H)
CTL3100H	Communication and Second Language Learning in the Workplace
CTL3101H	Language Awareness for Language Educators
CTL3200H	Analyse du discours (Exclusion: CTL3007H)
CTL3201H	Bilinguisme et éducation (Exclusion: CTL3011H)
CTL3202H	Politique et aménagement linguistique (Exclusion: CTL3018H)
CTL3410H	Schooling in the Movies: Education as Reflected in Hollywood Films
CTL3411H	Cinema and Historical Literacy
CTL3412H	Shakespeare and Cultural Literacy
CTL3413H	Reading Cinema and Cultural Identity
CTL3414H	Historical Literacy and Popular Literacy
CTL3415H	Educational Thought and Historical Literature
CTL3797H	Practicum in Language and Literacies Education: Master's Level
CTL3798H	Individual Reading and Research in Language and Literacies Education: Master's Level
CTL3899H	Proseminar in Language and Literacies Education Program: Master's Level
CTL5300H	Special Topics in Language and Literacies Education Program: Master's Level
CRE1001H	Séminaire d'études : Éducation, francophonies et diversité
JTE1952H	Language, Culture, and Education

Doctoral Level

CTL3805H	Multilingualism and Plurilingualism
CTL3806H	Sociocultural Theory and Second Language Learning
CTL3807H	Second Language Education Research Methods (RM)
CTL3808H	The Role of Instruction in Second Language Learning

CTL3810H	Second Language Classroom Research Methods
CTL3899H	Proseminar in Language and Literacies Education
CTL3998H	Individual Reading and Research in Language and Literacies Education: Doctoral Level
CTL6300H	Special Topics in Language and Literacies Education Program: Doctoral Level

CTL: Teaching MT

Master of Teaching

Program Description

This program involves two years of full-time study leading to a Master of Teaching (MT) degree. Upon successful completion of this program, students will be recommended to the Ontario College of Teachers for an Ontario Teachers' Certificate of Qualification, which qualifies them to teach in either the Primary and Junior (P/J) divisions, the Junior and Intermediate (J/I) divisions, or the Intermediate and Senior (I/S) divisions of Ontario schools.

The MT program offers students a unique educational opportunity, which combines teacher qualification with advanced study of educational theory and an opportunity to conduct research. The program provides students with a strong grounding in curriculum; human development; ethics and educational law; equity diversity and inclusion; Indigenous education; educational technology; instructional planning; instructional design; and learning theory. Students enjoy four practice teaching experiences in which they develop their skills as teachers and extend the theoretical and practical knowledge they acquired in the academic portion of the program.

The program includes: formal coursework, teaching and research seminars, and practice teaching.

The 20-month program is normally completed on a full-time basis in 5 terms:

- Terms 1 and 2 (Fall and Winter sessions [September to April])
- Term 3 (Summer session [May to August])
- Terms 4 and 5 (Fall and Winter sessions [September to April]).

Registration in Terms 4 and 5 is contingent upon successful completion of all courses in Terms 1, 2, and 3 and two successful placements.

Applicants must select one of the following teaching divisions:

- Primary/Junior (junior kindergarten to grade 6)
- Junior/Intermediate (grades 4 to 10)
- Intermediate/Senior (grades 7 to 12).

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Curriculum, Teaching and Learning's additional admission requirements stated below.
- Applicants must have an appropriate bachelor's degree with the equivalent of a University of Toronto mid-B or better in the final year.
- In their Statement of Intent, applicants should indicate their preferred division (i.e., Primary/Junior, Junior/Intermediate, or Intermediate/Senior) and describe three significant teaching and/or teaching-related experiences that they have had, especially with groups of learners. With reference to these experiences, applicants should identify insights gained about teaching and learning, and explain how, based on these insights, they might contribute to the education of students in today's schools. In their resumé applicants are requested to list, in chart form, the extent of their teaching experiences. The chart should include dates, location of experience, role, and number of hours working with students. For details about the Statement of Intent, visit the MT program website.
- **Applicants to the Junior/Intermediate (J/I) division within the Elementary field** must select **one subject specialization, known as "teachable" or "teaching subject**." Before applying to the J/I division, applicants must ensure they have the required number of prerequisite courses for the teaching subject. The prerequisites for teaching subjects in the J/I division are a minimum of 3.0 full-course equivalents (FCEs) for the teaching subject from a recognized university. Note that the prerequisite for French (Second Language) is 5.0 FCEs. For more details about subject specializations and their prerequisites, visit the MT program website.
- **Applicants to the Intermediate/Senior (I/S) division within the Secondary field** must have **two subject specializations, known as "teachable" or "teaching subject"**, of which one subject is selected as their **first** subject specialization and one as their **second** subject specialization. Before applying to the I/S division, applicants must ensure they have the required number of prerequisite courses for the teaching subject. The prerequisites are a minimum of 6.0 FCEs in the first teaching subject and a minimum of 3.0 FCEs in the second teaching subject from a recognized university. Note that the prerequisites for the teaching subjects French (Second Language), Science-Biology, Science-Chemistry, Science-Physics, and Science-General are 6.0 FCEs regardless of whether these teaching subjects are first or second subject specializations. For more details about subject specializations and their prerequisites, visit the MT program website.
- Not all eligible applicants are guaranteed admission.
- A police record check is required in a practicum setting in both Years 1 and 2 of the program.

Program Requirements

- **Coursework.** Students must complete **11.0 full-course equivalents (FCEs)** consisting of:
  - 8.0 FCEs: 16 (or equivalent) compulsory core courses; Primary/Junior and Junior/Intermediate divisions include quarter-credit courses.
  - 1.0 FCE: 2 elective courses.

    - 2.0 FCEs: 4 practice teaching courses: CTL7080H, CTL7081H, CTL7082H, and CTL7083H. There is one placement per course, totalling four teaching placements.
- On successful completion, students receive the MT degree and a recommendation to the Ontario College of Teachers for an Ontario Teachers' Certificate of Qualification.
- Normally, advanced standing is not granted in this program.
- Students registered in the Primary/Junior and Junior/Intermediate divisions must successfully complete the non-credit seminar course CTL7100H *Mathematics Concepts for Elementary Teacher Candidates* (0.0 FCE), also known as MathPlus, during their first session of registration.

Program Length

5 sessions full-time (typical registration sequence: F/W/S/F/W)

Time Limit

3 years full-time

CTL: Teaching MT Courses

Primary/Junior Division (Junior Kindergarten to Grade 6)

Core Courses

CTL7000H	Curriculum and Teaching in Literacy
CTL7001H	Educational Professionalism, Ethics, and Law
CTL7002H	Curriculum and Teaching in Mathematics
CTL7006H	Educational Research 1
CTL7008H	Introduction to Special Education and Mental Health
CTL7009H	Anti-Discriminatory Education
CTL7011H	Child and Adolescent Development and Learning
CTL7014H	Fundamentals of Teaching and Learning
CTL7015H	Educational Research 2
CTL7016H	Integrating Technology into the Classroom: Issues and Activities
CTL7018H	Curriculum and Teaching in Science and Environmental Education
CTL7019H	Supporting English Language Learners
CTL7072H	Curriculum and Teaching in Social Studies and Indigenous Education
CTL7080H	Practice Teaching Year 1 (Part 1) (Credit/No Credit)
CTL7081H	Practice Teaching Year 1 (Part 2) (Credit/No Credit)
CTL7082H	Practice Teaching Year 2 (Part 1) (Credit/No Credit)
CTL7083H	Practice Teaching Year 2 (Part 2) (Credit/No Credit)
CTL7084H	Issues in Numeracy (0.25 FCE)
CTL7085H	Issues in Literacy (0.25 FCE)
CTL7086H	Curriculum and Teaching in Music and Dance (0.25 FCE)
CTL7087H	Curriculum and Teaching in Drama and Dance (0.25 FCE)
CTL7088H	Curriculum and Teaching in Visual Arts (0.25 FCE)
CTL7089H	Curriculum and Teaching in Physical Education (0.25 FCE)
CTL7100H	Mathematics Concepts for Elementary Teacher Candidates* (Non-credit)

*Students registered in the Primary/Junior division must successfully complete the non-credit seminar course CTL7100H *Mathematics Concepts for Elementary Teacher Candidates*, also known as MathPlus, during their first session of registration.

Elective Courses

Plus 1.0 FCE	Two elective courses

Junior/Intermediate Division (Grade 4 to Grade 10)

Core Courses

CTL7000H	Curriculum and Teaching in Literacy
CTL7001H	Educational Professionalism, Ethics, and Law
CTL7002H	Curriculum and Teaching in Mathematics
CTL7006H	Educational Research 1
CTL7008H	Introduction to Special Education and Mental Health
CTL7009H	Anti-Discriminatory Education
CTL7011H	Child and Adolescent Development and Learning
CTL7013H	Arts in Education
CTL7014H	Fundamentals of Teaching and Learning
CTL7015H	Educational Research 2

CTL7016H	Integrating Technology into the Classroom: Issues and Activities
CTL7018H	Curriculum and Teaching in Science and Environmental Education
CTL7019H	Supporting English Language Learners
CTL7072H	Curriculum and Teaching in Social Studies and Indigenous Education
CTL7080H	Practice Teaching Year 1 (Part 1) (Credit/No Credit)
CTL7081H	Practice Teaching Year 1 (Part 2) (Credit/No Credit)
CTL7082H	Practice Teaching Year 2 (Part 1) (Credit/No Credit)
CTL7083H	Practice Teaching Year 2 (Part 2) (Credit/No Credit)
CTL7084H	Issues in Numeracy (0.25 FCE)
CTL7085H	Issues in Literacy (0.25 FCE)
CTL7100H	Mathematics Concepts for Elementary Teacher Candidates* (Non-credit)

*Students registered in the Junior/Intermediate division must successfully complete the non-credit seminar course CTL7100H *Mathematics Concepts for Elementary Teacher Candidates*, also known as MathPlus, during their first session of registration.

Elective Courses

Plus 0.5 FCE	One subject specialization course selected from CTL7050H to CTL7060H
Plus 1.0 FCE	Two elective courses

For Junior/Intermediate certification, students take **one subject specialization course** in Year 2 (the list of subject specializations are subject to change):

Intermediate Subject Specialization Courses for Junior/Intermediate Division Certification

CTL7050H	Intermediate Teaching Subject — English (First Language)
CTL7051H	Intermediate Teaching Subject — French (Second Language)
CTL7052H	Intermediate Teaching Subject — Geography
CTL7053H	Intermediate Teaching Subject — Health and Physical Education
CTL7054H	Intermediate Teaching Subject — History
CTL7055H	Intermediate Teaching Subject — Mathematics
CTL7056H	Intermediate Teaching Subject — Music-Instrumental
CTL7057H	Intermediate Teaching Subject — Music-Vocal
CTL7058H	Intermediate Teaching Subject — Science-General
CTL7059H	Intermediate Teaching Subject — Visual Arts
CTL7060H	Intermediate Teaching Subject — Drama

Prerequisites

Before applying to the Junior/Intermediate division, applicants must ensure they have the required number of prerequisite courses for the teaching subjects. See the admission requirements above for details or visit the MT program website for subject specializations and their required prerequisites.

Intermediate/Senior Division (Grade 7 to Grade 12)

Core Courses

CTL7006H	Educational Research 1
CTL7007H	Authentic Assessment
CTL7008H	Introduction to Special Education and Mental Health
CTL7009H	Anti-Discriminatory Education
CTL7011H	Child and Adolescent Development and Learning
CTL7014H	Fundamentals of Teaching and Learning
CTL7015H	Educational Research 2
CTL7016H	Integrating Technology into the Classroom: Issues and Activities
CTL7019H	Supporting English Language Learners
CTL7070H	Sustainability Education: Issues and Practice
CTL7073H	Indigenous Experiences of Racism and Settler Colonialism in Canada: An Introduction
CTL7074H	Issues in Educational Law, Policy, and Ethics
CTL7080H	Practice Teaching Year 1 (Part 1) (Credit/No Credit)
CTL7081H	Practice Teaching Year 1 (Part 2) (Credit/No Credit)
CTL7082H	Practice Teaching Year 2 (Part 1) (Credit/No Credit)
CTL7083H	Practice Teaching Year 2 (Part 2) (Credit/No Credit)

Elective Courses

Plus 1.0 FCE	First subject specialization course selected from CTL7020Y to CTL7041Y; see full course list below
Plus 1.0 FCE	Second subject specialization course selected from CTL7020Y to CTL7041Y; see full course list below
Plus 1.0 FCE	Two elective courses

Intermediate/Senior Specialization Courses

The Intermediate/Senior students must have two subject specializations. Students must select one subject specialization from the following list as their **first** subject specialization and one as their **second** subject specialization (the list of subject specializations is subject to change).

CTL7020Y	Curriculum and Teaching in English — Intermediate/Senior
CTL7021Y	Curriculum and Teaching in History — Intermediate/Senior
CTL7022Y	Curriculum and Teaching in Mathematics — Intermediate/Senior
CTL7023Y	Curriculum and Teaching in Science: Biology — Intermediate/Senior
CTL7024Y	Curriculum and Teaching in Science: Chemistry — Intermediate/Senior
CTL7025Y	Curriculum and Teaching in Science: Physics — Intermediate/Senior
CTL7026Y	Curriculum and Teaching in Science: General
CTL7027Y	Curriculum and Teaching in Social Science: General — Intermediate/Senior
CTL7028Y	Curriculum and Teaching in Geography — Intermediate/Senior
CTL7029Y	Curriculum and Teaching in Music: Instrumental — Intermediate/Senior
CTL7030Y	Curriculum and Teaching in Music: Vocal
CTL7031Y	Curriculum and Teaching in Health and Physical Education
CTL7032Y	Curriculum and Teaching in Visual Arts — Intermediate/Secondary
CTL7033Y	Curriculum and Teaching in Dramatic Arts — Intermediate/Secondary
CTL7034Y	Curriculum and Teaching in French as a Second Language — Intermediate/Secondary
CTL7035Y	Curriculum and Teaching in Business Studies: General — Intermediate/Secondary (Exclusion: CTL7036Y.)
CTL7036Y	Curriculum and Teaching in Business Studies: Accounting — Intermediate/Secondary (Co-requisite: CTL7035Y.)
CTL7041Y	Curriculum and Teaching in Religion

Prerequisites

Before applying to the Intermediate/Senior division, applicants must ensure that they have the required number of prerequisite courses for the teaching subjects. See the admission requirements above for details or visit the MT program website for teaching subject specializations and their prerequisites.

Religious Education

All MT students interested in teaching in the Ontario Catholic School system can choose to take the Teaching in Ontario's Catholic Schools course through the Continuing and Professional Learning office. This course is required by the Catholic boards as a prerequisite for a job interview and as a condition of employment. Offered in Year 1 of the MT program, this course is in addition to the degree's program requirements.

Degree Programs

Dentistry

MSc and PhD

- Fields:
  - Dental Anaesthesia;
  - Dental Biomedical Sciences (this field is taken by MSc and PhD students who are not in a specialty);
  - Dental Public Health;
  - Endodontics;
  - Oral and Maxillofacial Pathology;
  - Oral and Maxillofacial Pathology and Oral Medicine;
  - Oral and Maxillofacial Radiology;
  - Oral and Maxillofacial Surgery;
  - Oral Medicine;
  - Orthodontics and Dentofacial Orthopedics;
  - Pediatric Dentistry;
  - Periodontics;
  - Prosthodontics

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Aging, Palliative and Supportive Care Across the Life Course
  - Dentistry, MSc, PhD
- Biomedical Engineering
  - Dentistry, MSc, PhD
- Cardiovascular Sciences
  - Dentistry, MSc, PhD
- Global Health (U of T Global Scholar)
  - Dentistry, MSc (thesis only), PhD
- Musculoskeletal Sciences
  - Dentistry, MSc, PhD
- Neuroscience
  - Dentistry, MSc, PhD
- Women's Health
  - Dentistry, MSc, PhD

Overview

The Faculty of Dentistry offers graduate programs leading to either a **Master of Science** or **Doctor of Philosophy** degree. These graduate programs appeal to:

- applicants, both dentists and non-dentists, who wish to pursue graduate research training; and
- applicants who have a degree in dentistry and who are pursuing research training and advanced clinical education in one of the dental specialties (also known as fields).

Consequently, both the MSc and the PhD degrees have a common core of coursework, with each having varying additional research and clinical training requirements (if applicable).

The Dentistry MSc program develops students' scholarly skills and critical thoughts, and is intended for those whose career goal is to achieve mastery of a field in oral health science, employment in a research environment, or clinical specialty practice (if applicable). The MSc in Dentistry can be completed through the following options: 1) thesis in the field of Dental Biomedical Sciences, 2) thesis with dental specialty, or 3) coursework only with dental specialty.

The Dentistry PhD program is intended for those whose career goal is to work at the forefront of their field in oral health sciences as an independent research scientist or clinician-scientist in an academic, governmental, or industrial setting. This thesis-based program can be completed with or without a dental specialty, and on a full-time basis only.

Dentistry: Dentistry MSc (Dental Biomedical Sciences Field)

Program Description

The Dentistry MSc program, Dental Biomedical Sciences field develops students' scholarly and critical thinking skills, and is intended for those whose career goal is to achieve mastery of a field in oral health science or employment in a research environment. The program length is six sessions, with most students taking two years to complete the requirements.

A part-time option is also available. Part-time students complete the same program requirements over an extended period of time (usually 12 sessions). Note: part-time students are ineligible to transfer to the PhD field in Dental Biomedical Sciences.

Additionally, MSc students in the field of Dental Biomedical Sciences are ineligible to transfer to a PhD program with a dental specialty.

MSc Program (Dental Biomedical Sciences): Thesis-Only Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- An appropriate BSc, Doctor of Dental Surgery (DDS), or an equivalent degree, with at least a B+ standing (3.3 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students must successfully complete a total of **3.0 full-course equivalents (FCEs)** and a **thesis** as follows:
  - **Year 1:**
    - DEN1001Y^{0} *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE)
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
    - An additional 1.0 elective FCE.
  - **Year 2:** Research, thesis completion, and oral defence of the written thesis.
- **Residency.** Ordinarily, one year of full-time registration; however, it is the Faculty of Dentistry's expectation that students will normally remain in full-time attendance on campus to enable full participation in departmental activities for two years.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S);
12 sessions part-time

Time Limit

3 years full-time;
6 years part-time

[0] Course that may continue over a program. Credit is given when the course is completed.

Dentistry: Dentistry MSc (Dental Anaesthesia Specialty)

MSc Program (Dental Anaesthesia Specialty)

Program Description

The Dentistry MSc, Dental Anaesthesia specialty is a three-year full-time program. The specialty in Dental Anaesthesia is designed to prepare dentists with a full range of sedation and anaesthetic techniques for dental patients with the focus on deep sedation and general anaesthesia. The teaching facilities for this program are provided by the combined resources of Dental Anaesthesia in the Faculty of Dentistry and the Department of Anaesthesia in the Temerty Faculty of Medicine. Training is given both at the Faculty of Dentistry and at teaching hospitals associated with the University.

Upon completion of all program requirements, students are eligible for the MSc degree and certification in the chosen dental specialty. Note: coursework-only students are ineligible to enrol in the PhD in Dentistry program at a later date.

MSc Program (Dental Anaesthesia Specialty): Thesis-Only Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Doctor of Dental Surgery (DDS) or an equivalent degree with at least a B+ standing (3.3 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
  - **Year 1:**
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
  - **Years 2 and 3:**
    - DEN1001Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE).
- In the **specialty of Dental Anaesthesia**, complete **15.5 required FCEs** as follows. Note: course timing may vary between years. Please contact gradstudies@dentistry.utoronto.ca for details.
  - **Year 1**:
    - DEN1014H *Clinical Epidemiology and Evidence-Based Care* (0.5 FCE)
    - DEN1055H *Basic Principles of Anaesthesia* (0.5 FCE)
    - DEN1056Y *Basic Concepts in Clinical Medicine* (1.0 FCE)
    - DEN1073Y *Dental Anaesthesia Graduate Seminars* (1.0 FCE)
    - DEN1074Y *Foundations of Medicine as Applied to Dental Anaesthesia* (1.0 FCE)
    - DEN1076H+ *General Anaesthesia for Medical Procedures — Adult I* (0.5 FCE)
    - DEN1078H+ *General Anaesthesia for Dental Procedures — Adult I* (0.5 FCE)
    - DEN1084H+ *Experiences in Clinical Teaching I* (Credit/No Credit; 0.5 FCE)
    - DEN1087Y *Fundamentals of Dental Anaesthesia* (1.0 FCE)
    - Begin **thesis research** (RST9999Y)
  - **Year 2:**
    - DEN1052Y *General Anaesthesia for Medical Procedures — Pediatric* (1.0 FCE)
    - DEN1071H+ *Medical Anaesthesia Seminars* I (Credit/No Credit; 0.5 FCE)
    - DEN1083Y *Experiences in Clinical Medicine* (1.0 FCE)
    - DEN1085H+ *Experiences in Clinical Teaching II* (Credit/No Credit; 0.5 FCE)
    - DEN1088Y *Fundamentals of Dental Anaesthesia II* (1.0 FCE)
    - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit; 1.0 FCE)
    - Continue with thesis research (RST9999Y)
  - **Year 3:**
    - DEN1072H+ *Medical Anaesthesia Seminars II* (Credit/No Credit; 0.5 FCE)
    - DEN1075Y *General Anaesthesia for Dental Procedures — Pediatric* (1.0 FCE)
    - DEN1077H+ *General Anaesthesia for Medical Procedures — Adult II*
    - DEN1079H+ *General Anaesthesia for Dental Procedures — Adult II* (0.5 FCE)
    - DEN1086H+ *Experiences in Clinical Teaching III* (Credit/No Credit; 0.5 FCE)
    - DEN1089Y *Fundamentals of Dental Anaesthesia II* (1.0 FCE)
    - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit; 1.0 FCE)
    - **Oral defence** of the written thesis (RST9999Y).

- **Residency.** Students must be on campus and participating for the duration of their registration in the program.

Program Length

9 sessions full-time (typical registration sequence: F/W/S/F/W/S/F/W/S)

Time Limit

4 years full-time

[0] Course that may continue over a program. The course is graded or credit is given when completed.

[++] Course is offered in alternate years.

MSc Program (Dental Anaesthesia Specialty): Coursework-Only Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Doctor of Dental Surgery (DDS) or an equivalent degree with at least a B+ standing (3.3 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students must successfully complete a total of **2.0 full-course equivalents (FCEs)** as follows:
  - Year **1:**
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
  - **Years 2 and 3:**
    - DEN1001Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE).
- In the **specialty of Dental Anaesthesia**, complete a total of **15.5 required FCEs, 1.5 elective FCEs, and a research practicum (0.5 FCE)** as follows. Note: course timing may vary between years. Please contact gradstudies@dentistry.utoronto.ca for details
  - **Year 1:**
    - DEN1014H *Clinical Epidemiology and Evidence-Based Care* (0.5 FCE)
    - DEN1055H *Basic Principles of Anaesthesia* (0.5 FCE)
    - DEN1056Y *Basic Concepts in Clinical Medicine* (1.0 FCE)
    - DEN1073Y *Dental Anaesthesia Graduate Seminars* (1.0 FCE)
    - DEN1074Y *Foundations of Medicine as Applied to Dental Anaesthesia* (1.0 FCE)
    - DEN1076H[+] *General Anaesthesia for Medical Procedures — Adult I* (0.5 FCE)
    - DEN1078H[+] *General Anaesthesia for Dental Procedures — Adult I* (0.5 FCE)
    - DEN1084H[+] *Experiences in Clinical Teaching I* (Credit/No Credit; 0.5 FCE)
    - DEN1087Y *Fundamentals of Dental Anaesthesia* (1.0 FCE)
    - 1.5 elective FCEs in clinical, epidemiological, or basic science research methodology appropriate for clinical or public health practice
  - **Year 2:**
    - DEN1052Y *General Anaesthesia for Medical Procedures — Pediatric* (1.0 FCE)
    - DEN1071H[+] *Medical Anaesthesia Seminars I* (Credit/No Credit; 0.5 FCE)
    - DEN1083Y *Experiences in Clinical Medicine* (1.0 FCE)
    - DEN1085H[+] *Experiences in Clinical Teaching II* (Credit/No Credit; 0.5 FCE)
    - DEN1088Y *Fundamentals of Dental Anaesthesia II* (1.0 FCE)
    - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit)
  - **Year 3:**
    - DEN1072H[+] *Medical Anaesthesia Seminars II* (Credit/No Credit; 0.5 FCE)
    - DEN1075Y *General Anaesthesia for Dental Procedures — Pediatric* (1.0 FCE)
    - DEN1077H[+] *General Anaesthesia for Medical Procedures — Adult II*
    - DEN1079H[+] *General Anaesthesia for Dental Procedures — Adult II* (0.5 FCE)
    - DEN1086H[+] *Experiences in Clinical Teaching III* (Credit/No Credit; 0.5 FCE)
    - DEN1089Y *Fundamentals of Dental Anaesthesia III* (1.0 FCE)
    - PDE9094Y[0] *Clinical Conferences* ((Credit/No Credit; 1.0 FCE)
    - Prepare a **research practicum** (DEN1061H; 0.5 FCE); successfully complete an **oral examination**.
- **Residency.** Students must be on campus and participating for the duration of their registration in the program.

Program Length

9 sessions full-time (typical registration sequence: F/W/S/F/W/S/F/W/S)

Time Limit

4 years full-time

[0] Course that may continue over a program. The course is graded or credit is given when completed.

[+] Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.

[++] Course is offered in alternate years.

Dentistry: Dentistry MSc (Dental Public Health Specialty)

MSc Program (Dental Public Health Specialty)

Program Description

The Dentistry MSc, Dental Public Health specialty is a two-year program. The specialty in Dental Public Health consists of core subjects, with optional subjects chosen by students in consultation with the program director. Courses are given by the Faculty of Dentistry as well as other units, such as the Dalla Lana School of Public Health and the Institute of Health Policy, Management and Evaluation.

This program is offered both full-time and part-time. Part-time students have up to five years to complete all requirements. Note: part-time students are ineligible to transfer to the PhD in Dentistry program.

The coursework-only option of this specialty is also available to dental hygienists. Students in the coursework-only option are ineligible to transfer to the PhD in Dentistry program.

Upon completion of all program requirements, students are eligible for the MSc degree and certification in the chosen dental specialty.

MSc Program (Dental Public Health Specialty): Thesis-Only Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Doctor of Dental Surgery (DDS) or an equivalent degree with at least a B+ standing (3.3 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
  - **Year 1:**
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
  - **Year 2:**
    - DEN1001Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE).
- In the **specialty of Dental Public Health**, complete **7.0 required FCEs** as follows:
  - **Year 1:**
    - CHL5004H *Introduction to Public Health Sciences* (0.5 FCE)
    - DEN1003H *Preventive Dentistry* (0.5 FCE)
    - DEN1006Y *Seminars in Dental Public Health* (1.0 FCE)
    - DEN1014H *Clinical Epidemiology and Evidence-Based Care* (0.5 FCE)
    - DEN1051Y *Oral Epidemiology* (1.0 FCE)
    - DEN1063Y *Practicum in Dental Public Health* (1.0 FCE)
    - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit; 1.0 FCE)
    - Begin **thesis research** (RST9999Y)
  - **Year 2:**
    - DEN1064H *Management Principles in Canadian Dental Health Organizations* (0.5 FCE)
    - 0.5 FCE chosen in the area of health policy or health economics based on the student's clinical or research interests
    - 0.5 FCE chosen in the area of public health based on the student's clinical or research interests
    - **Oral defence** of the written thesis (RST9999Y).
- **Residency.** Students must be on campus and participating for the duration of their registration in the program.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S);
12 sessions part-time

Time Limit

3 years full-time;
6 years part-time

[0] Course that may continue over a program. The course is graded or credit is given when completed.

MSc Program (Dental Public Health Specialty): Coursework-Only Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Doctor of Dental Surgery (DDS) or an equivalent degree, with at least a B+ standing (3.3 out of 4.0 grade point average [GPA]) in the final year from a recognized university.
- Dental hygienist applicants must have a baccalaureate dental hygiene degree with at least a B+ standing (3.3 out of 4.0 grade point average [GPA]) in their final year of study.

Program Requirements

- Students must successfully complete a total of **2.0 full-course equivalents (FCEs)** as follows:

    - **Year 1:**
        - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
        - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
    - **Year 2:**
        - DEN1001Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE).
- In the **specialty of Dental Public Health**, complete **7.0 required FCEs, 1.5 elective FCEs, and a research practicum (0.5 FCE)** as follows:
    - **Year 1:**
        - CHL5004H *Introduction to Public Health Sciences* (0.5 FCE)

Dentistry: Dentistry MSc (Endodontics Specialty)

MSc Program (Endodontics Specialty) Program Description

The Dentistry MSc, Endodontics specialty is a three-year full-time program. The specialty in Endodontics is designed to provide students with opportunities to acquire excellent clinical skills and comprehension of the underlying biology. Its components include patient care, providing all aspects of endodontic treatment; topic-specific and current literature seminars; clinical conferences; core curriculum courses; rotation programs; research at the MSc level, including application for funding, preparation of manuscripts for publication, presentation at national and international research forums; and guest lectures.

Students must complete a dental clinic rotation as part of the Endodontics specialty requirements.

Students start the program in the Summer session. Upon completion of all program requirements, students are eligible for the MSc degree and certification in the chosen dental specialty.

Note: coursework-only students are ineligible to enrol in the PhD in Dentistry program at a later date.

MSc Program (Endodontics Specialty): Thesis-Only Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Doctor of Dental Surgery (DDS) or an equivalent degree with at least a B+ standing (3.3 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
    - **Year 1:**
        - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
        - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
    - **Year 2:**
        - DEN1001Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE).
- In the **specialty of Endodontics**, complete **18.0 required FCEs** as follows. Students have the option to take DEN1008H *Cone Beam CT Imaging* (Credit/No Credit; 0.25 FCE; prerequisite: DEN1007H), in addition to the total FCEs required for the specialty.

Note: course timing may vary between years. Please contact gradstudies@dentistry.utoronto.ca for details.

- **Year 1:**
  - DEN1002H *Oral Pathology* (0.5 FCE)
  - DEN1007H *Oral Radiology* (0.5 FCE)
  - DEN1014H *Clinical Epidemiology and Evidence-Based Care* (0.5 FCE)
  - DEN1062H *Pharmacology of Dental Therapeutics* (0.5 FCE)
  - DEN1070H[++] *Advances in Dental Materials Science* (0.5 FCE)
  - DEN1090H *Inhalation and Oral Minimal and Moderate Sedation for Dental Procedures* (Credit/No Credit; 0.5 FCE)
  - DEN3005H *Head and Neck Anatomy* (0.5 FCE)
  - DEN5001Y *Graduate Endodontics Case Presentations* (1.0 FCE)
  - DEN5002Y *Graduate Endodontics Topical Literature* (1.0 FCE)
  - DEN5003Y *Graduate Endodontics Current Literature* (1.0 FCE)
  - DEN5005H[+] *Introduction to Graduate Endodontics* (0.5 FCE)
  - PDE9091Y *Endodontic Clinic* (1.0 FCE)
  - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit)
  - Begin **thesis research** (RST9999Y)
- **Year 2:**
  - DEN1022H *Investigating Pathogenic Biofilms* (0.5 FCE)
  - DEN1060H *Oral Physiology: Sensory and Neuromuscular Function* (0.5 FCE)
  - DEN5001Y *Graduate Endodontics Case Presentations* (1.0 FCE)
  - DEN5002Y *Graduate Endodontics Topical Literature* (1.0 FCE)
  - DEN5003Y *Graduate Endodontics Current Literature* (1.0 FCE)
  - DEN5004Y[0] *Single Tooth Replacements with Implant-Supported Prosthesis*
  - PDE9091Y *Endodontic Clinic* (1.0 FCE)
  - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit; 1.0 FCE)
  - Continue with thesis research (RST9999Y)
- **Year 3:**
  - DEN5001Y *Graduate Endodontics Case Presentations* (1.0 FCE)
  - DEN5003Y *Graduate Endodontics Current Literature* (1.0 FCE)
  - DEN5004Y[0] *Single Tooth Replacements with Implant-Supported Prosthesis* (1.0 FCE)
  - PDE9091Y *Endodontic Clinic* (1.0 FCE)
  - **Oral defence of the thesis** (RST9999Y).

- **Residency.** Students must be on campus and participating for the duration of their registration in the program.

Program Length

10 sessions full-time (typical registration sequence: S/F/W/S/F/W/S/F/W/S)

Time Limit

4 years full-time

[0] Course that may continue over a program. The course is graded or credit is given when completed.

[+] Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.

[++] Course is offered in alternate years.

MSc Program (Endodontics Specialty): Coursework-Only Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Doctor of Dental Surgery (DDS) or an equivalent degree with at least a B+ standing (3.3 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students must successfully complete a total of **2.0 full-course equivalents (FCEs)** as follows:
- **Year 1:**
  - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
  - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
- **Year 2:**
  - DEN1001Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE).
- In the **specialty of Endodontics**, complete **18.0 required FCEs, 1.5 elective FCEs, and a research practicum (0.5 FCE)** as follows. Students have the option to take DEN1008H *Cone Beam CT Imaging* (Credit/No Credit; 0.25 FCE; prerequisite: DEN1007H), in addition to the total FCEs required for the specialty.

  Note: course timing may vary between years. Please contact gradstudies@dentistry.utoronto.ca for details.
  - **Year 1:**
    - DEN1002H *Oral Pathology* (0.5 FCE)
    - DEN1007H *Oral Radiology* (0.5 FCE)
    - DEN1014H *Clinical Epidemiology and Evidence-Based Care* (0.5 FCE)
    - DEN1062H *Pharmacology of Dental Therapeutics* (0.5 FCE)
    - DEN1070H[++] *Advances in Dental Materials Science* (0.5 FCE)
    - DEN1090H *Inhalation and Oral Minimal and Moderate Sedation for Dental Procedures* (Credit/No Credit; 0.5 FCE)
    - DEN3005H *Head and Neck Anatomy* (0.5 FCE)
    - DEN5001Y *Graduate Endodontics Case Presentations* (1.0 FCE)
    - DEN5002Y *Graduate Endodontics Topical Literature* (1.0 FCE)

        - DEN5003Y *Graduate Endodontics Current Literature* (1.0 FCE)
        - DEN5005H[+] *Introduction to Graduate Endodontics* (0.5 FCE)
        - PDE9091Y *Endodontic Clinic* (1.0 FCE)
        - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit)
        - 1.5 elective FCEs in clinical, epidemiological, or basic science research methodology appropriate for clinical or public health practice
    - **Year 2:**
        - DEN1022H *Investigating Pathogenic Biofilms* (0.5 FCE)
        - DEN1060H *Oral Physiology: Sensory and Neuromuscular Function* (0.5 FCE)
        - DEN5001Y *Graduate Endodontics Case Presentations* (1.0 FCE)
        - DEN5002Y *Graduate Endodontics Topical Literature* (1.0 FCE)
        - DEN5003Y *Graduate Endodontics Current Literature* (1.0 FCE)
        - DEN5004Y[0] *Single Tooth Replacements with Implant-Supported Prosthesis*
        - PDE9091Y *Endodontic Clinic* (1.0 FCE)
        - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit; 1.0 FCE)
    - **Year 3:**
        - DEN5001Y *Graduate Endodontics Case Presentations* (1.0 FCE)
        - DEN5003Y *Graduate Endodontics Current Literature* (1.0 FCE)
        - DEN5004Y[0] *Single Tooth Replacements with Implant-Supported Prosthesis* (1.0 FCE)
        - PDE9091Y *Endodontic Clinic* (1.0 FCE)
        - Prepare a **research practicum** (DEN1061H; 0.5 FCE); successfully complete an **oral examination**.
- **Residency.** Students must be on campus and participating for the duration of their registration in the program.

Program Length

10 sessions full-time (typical registration sequence: S/F/W/S/F/W/S/F/W/S)

Time Limit

4 years full-time

Dentistry: Dentistry MSc (Oral and Maxillofacial Pathology Specialty)

MSc Program (Oral and Maxillofacial Pathology Specialty)

Program Description

The Dentistry MSc, Oral and Maxillofacial Pathology specialty is a three-year full-time program. The specialty in Oral and Maxillofacial Pathology focuses on the identification and management of diseases of the oral and maxillofacial regions through microscopic, clinical, biochemical, or other forms of examination. Oral and Maxillofacial Pathology includes histopathologic analysis of tissue samples, the investigation of, causes, and effects of diseases.

Students start the program in the Summer session. Upon completion of all program requirements, students are eligible for the MSc degree and certification in the chosen dental specialty.

Note: coursework-only students are ineligible to enrol in the PhD in Dentistry program at a later date.

MSc Program (Oral and Maxillofacial Pathology Specialty): Thesis-Only Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Doctor of Dental Surgery (DDS) or an equivalent degree with at least a B+ standing (3.3 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
    - **Year 1:**
        - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
        - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
    - **Years 2 and 3:**
        - DEN1001Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE).
- In the **specialty of Oral and Maxillofacial Pathology**, complete **5.5 required FCEs** as follows. Students have the option to take DEN1008H *Cone Beam CT Imaging* (Credit/No Credit; 0.25 FCE; prerequisite: DEN1007H), in addition to the total FCEs required for the specialty.
    - **Year 1:**
        - LMP1300Y *General and Special Pathology* (1.0 FCE)

    - Begin **thesis research** (RST 9999Y)
  - **Year 2:**
    - DEN1002H *Oral Pathology* (0.5 FCE)
    - DEN1007H *Oral Radiology* (0.5 FCE)
    - DEN1011Y[0] *Seminars in Advanced Oral Pathology*
    - DEN1013Y[0] *Oral Surgical Pathology*
    - DEN1014H *Clinical Epidemiology and Evidence-Based Care* (0.5 FCE)
    - Continue with thesis research (RST9999Y)
  - **Year 3:**
    - DEN1011Y[0] *Seminars in Advanced Oral Pathology* (1.0 FCE)
    - DEN1012Y *Oral Medicine* (1.0 FCE)
    - DEN1013Y[0] *Oral Surgical Pathology* (1.0 FCE)
    - **Oral defence** of the written thesis (RST9999Y).
- **Residency.** Students must be on campus and participating for the duration of their registration in the program.

Program Length

10 sessions full-time (typical registration sequence: S/F/W/S/F/W/S/F/W/S)

Dentistry: Dentistry MSc (Oral and Maxillofacial Pathology and Oral Medicine Specialty)

MSc Program (Oral and Maxillofacial Pathology and Oral Medicine Specialty)

Program Description

The Dentistry MSc, Oral and Maxillofacial Pathology and Oral Medicine specialty is a four-year full-time program. The specialty in Oral and Maxillofacial Pathology and Oral Medicine is concerned with the diagnosis, nature, and primarily non-surgical management of oral, maxillofacial, and temporomandibular diseases and disorders, including dental management of patients with medical complications.

Students start the program in the Summer session. Upon completion of all program requirements, students are eligible for the MSc degree and certification in the chosen dental specialty.

Note: coursework-only students are ineligible to enrol in the PhD in Dentistry program at a later date.

MSc Program (Oral and Maxillofacial Pathology and Oral Medicine Specialty): Thesis-Only Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Doctor of Dental Surgery (DDS) or an equivalent degree with at least a B+ standing (3.3 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Dentistry: Dentistry MSc (Oral and Maxillofacial Surgery Specialty)

Program Description

The Dentistry MSc, Oral and Maxillofacial Surgery specialty is a four-year full-time program. The specialty in Oral and Maxillofacial Surgery is concerned with and includes the diagnosis and surgical and adjunctive treatment of disorders, diseases, injuries, and defects, involving the functional and aesthetic aspects of the hard and soft tissues of the oral and maxillofacial regions and related structures. Clinical activities are based primarily at Mt. Sinai Hospital, Sunnybrook Health Sciences Centre, Humber River Hospital, and The Hospital for Sick Children. There is also additional participation at other University-affiliated teaching centres: Holland Bloorview Kids

Rehabilitation, Lakeview Health, and the Rouge Valley Health Network.

Students start the program in the Summer session. Upon completion of all program requirements, students are eligible for the MSc degree and certification in the chosen dental specialty.

Note: coursework-only students are ineligible to enrol in the PhD in Dentistry program at a later date.

MSc Program (Oral and Maxillofacial Surgery Specialty): Thesis-Only Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Doctor of Dental Surgery (DDS) or an equivalent degree with at least a B+ standing (3.3 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
  - **Year 1:**
    - DEN1001Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE)
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
  - **Year 2:**
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
- In the **specialty of Oral and Maxillofacial Surgery**, complete **20.5 required FCEs** as follows. Students have the option to take DEN1008H *Cone Beam CT Imaging* (Credit/No Credit; 0.25 FCE; prerequisite: DEN1007H), in addition to the total FCEs required for the specialty.

  Note: course timing may vary between years. Please contact gradstudies@dentistry.utoronto.ca for details.
  - **Year 1:**
    - DEN1002H *Oral Pathology* (0.5 FCE)
    - DEN1007H *Oral Radiology* (0.5 FCE)
    - DEN1013Y[0] *Oral Surgical Pathology*
    - DEN2005Y *Surgical Orthodontics* (1.0 FCE)
    - DEN3001Y *Oral and Maxillofacial Surgery 1: The Physiologic Basis of Disease* (1.0 FCE)
    - DEN3002Y *Oral and Maxillofacial Surgery 2: Principles and Practice of Oral and Maxillofacial Surgery* (1.0 FCE)
    - DEN3003Y *Oral and Maxillofacial Surgery 3: Evidence-Based Literature Reviews in Oral and Maxillofacial Surgery* (1.0 FCE)
    - DEN3004Y *Oral and Maxillofacial Surgery 4: Applied Surgical Anatomy of the Head and Neck* (1.0 FCE)
    - DEN3005H *Head and Neck Anatomy* (0.5 FCE)
    - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit)
    - Begin **thesis research** (RST9999Y)
    - Principles of Surgery module taken through the Department of Surgery in the Temerty Faculty of Medicine (0.0 FCE)
  - **Year 2:**
    - DEN3001Y *Oral and Maxillofacial Surgery 1: The Physiologic Basis of Disease* (1.0 FCE)
    - DEN3002Y *Oral and Maxillofacial Surgery 2: Principles and Practice of Oral and Maxillofacial Surgery* (1.0 FCE)
    - DEN3003Y *Oral and Maxillofacial Surgery 3: Evidence-Based Literature Reviews in Oral and Maxillofacial Surgery* (1.0 FCE)
    - Continue with thesis research (RST9999Y)
  - **Year 3:**
    - DEN1013Y[0] *Oral Surgical Pathology* (1.0 FCE)
    - DEN2005Y *Surgical Orthodontics* (1.0 FCE)
    - DEN3001Y *Oral and Maxillofacial Surgery 1: The Physiologic Basis of Disease* (1.0 FCE)
    - DEN3002Y *Oral and Maxillofacial Surgery 2: Principles and Practice of Oral and Maxillofacial Surgery* (1.0 FCE)

    - DEN3003Y *Oral and Maxillofacial Surgery 3: Evidence-Based Literature Reviews in Oral and Maxillofacial Surgery* (1.0 FCE)
    - **Oral defence** of the written thesis (RST9999Y).
- **Residency.** Students must be on campus and participating for the duration of their registration in the program.

Program Length

13 sessions full-time (typical registration sequence: S/F/W/S/F/W/S/F/W/S/F/W/S)

Time Limit

5 years full-time

[0] Course that may continue over a program. The course is graded or credit is given when completed.

MSc Program (Oral and Maxillofacial Surgery Specialty): Coursework-Only Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Doctor of Dental Surgery (DDS) or an equivalent degree with at least a B+ standing (3.3 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students must successfully complete a total of **2.0 full-course equivalents (FCEs)** as follows:
  - **Year 1:**
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
  - **Years 2 and 3:**
    - DEN1001Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE)
- In the **specialty of Oral and Maxillofacial Surgery**, complete **20.5 required FCEs, 1.5 elective FCEs, and a research practicum (0.5 FCE)** as follows. Students have the option to take DEN1008H *Cone Beam CT Imaging* (Credit/No Credit; 0.25 FCE; prerequisite: DEN1007H), in addition to the total FCEs required for the specialty.

  Note: course timing may vary between years. Please contact gradstudies@dentistry.utoronto.ca for details.
  - **Year 1:**
    - DEN1002H *Oral Pathology* (0.5 FCE)
    - DEN1007H *Oral Radiology* (0.5 FCE)
    - DEN1013Y[0] *Oral Surgical Pathology*
    - DEN2005Y *Surgical Orthodontics* (1.0 FCE)
    - DEN3001Y *Oral and Maxillofacial Surgery 1: The Physiologic Basis of Disease* (1.0 FCE)
    - DEN3002Y *Oral and Maxillofacial Surgery 2: Principles and Practice of Oral and Maxillofacial Surgery* (1.0 FCE)
    - DEN3003Y *Oral and Maxillofacial Surgery 3: Evidence-Based Literature Reviews in Oral and Maxillofacial Surgery* (1.0 FCE)
    - DEN3004Y *Oral and Maxillofacial Surgery 4: Applied Surgical Anatomy of the Head and Neck* (1.0 FCE)
    - DEN3005H *Head and Neck Anatomy* (0.5 FCE)
    - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit)
    - Principles of Surgery module taken through the Department of Surgery in the Temerty Faculty of Medicine (0.0 FCE)
    - 1.5 elective FCEs in clinical, epidemiological, or basic science research methodology appropriate for clinical or public health practice
  - **Year 2:**
    - DEN3001Y *Oral and Maxillofacial Surgery 1: The Physiologic Basis of Disease* (1.0 FCE)
    - DEN3002Y *Oral and Maxillofacial Surgery 2: Principles and Practice of Oral and Maxillofacial Surgery* (1.0 FCE)
    - DEN3003Y *Oral and Maxillofacial Surgery 3: Evidence-Based Literature Reviews in Oral and Maxillofacial Surgery* (1.0 FCE)
  - **Year 3:**
    - DEN1013Y[0] *Oral Surgical Pathology* (1.0 FCE)
    - DEN2005Y *Surgical Orthodontics* (1.0 FCE)
    - DEN3001Y *Oral and Maxillofacial Surgery 1: The Physiologic Basis of Disease* (1.0 FCE)
    - DEN3002Y *Oral and Maxillofacial Surgery 2: Principles and Practice of Oral and Maxillofacial Surgery* (1.0 FCE)
    - DEN3003Y *Oral and Maxillofacial Surgery 3: Evidence-Based Literature Reviews in Oral and Maxillofacial Surgery* (1.0 FCE)
    - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit; 1.0 FCE)
  - **Year 4:**
    - DEN2005Y *Surgical Orthodontics* (1.0 FCE)
    - DEN3001Y *Oral and Maxillofacial Surgery 1: The Physiologic Basis of Disease* (1.0 FCE)
    - DEN3002Y *Oral and Maxillofacial Surgery 2: Principles and Practice of Oral and Maxillofacial Surgery* (1.0 FCE)
    - DEN3003Y *Oral and Maxillofacial Surgery 3: Evidence-Based Literature Reviews in Oral and Maxillofacial Surgery* (1.0 FCE)
    - Prepare a **research practicum** (DEN 1061H; 0.5 FCE); successfully complete an **oral examination**.
- **Residency.** Students must be on campus and participating for the duration of their registration in the program.

Dentistry: Dentistry MSc (Oral Medicine Specialty)

MSc Program (Oral Medicine Specialty)

Program Description

The Dentistry MSc, Oral Medicine specialty is a three-year full-time program. The specialty in Oral Medicine focuses on nonsurgical management of oral diseases including the management of oral mucosal and salivary gland diseases, temporomandibular disorders, and orofacial pain, the oral complications of systemic disease, and dental management of medically complex patients.

Students start the program in the Summer session. Upon completion of all program requirements, students are eligible for the MSc degree and certification in the chosen dental specialty.

Note: coursework-only students are ineligible to enrol in the PhD in Dentistry program at a later date.

MSc Program (Oral Medicine Specialty): Thesis-Only Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Doctor of Dental Surgery (DDS) or an equivalent degree with at least a B+ standing (3.3 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
  - **Year 1:**
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
  - **Years 2 and 3:**
    - DEN1001Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE).
- In the **specialty of Oral Medicine**, complete a total of **3.5 required FCEs** as follows. Students have the option to take DEN1008H *Cone Beam CT Imaging* (Credit/No Credit; 0.25 FCE; prerequisite: DEN1007H), in addition to the total FCEs required for the specialty.
  - **Year 1:**
    - DEN1002H *Oral Pathology* (0.5 FCE)
    - DEN1007H *Oral Radiology* (0.5 FCE)
    - DEN1012Y[0] *Oral Medicine*
    - DEN1013Y[0] *Oral Surgical Pathology*
    - DEN1014H *Clinical Epidemiology and Evidence-Based Care* (0.5 FCE)
    - Begin **thesis research** (RST9999Y)
  - **Year 2:**
    - DEN1012Y[0] *Oral Medicine*
    - DEN1013Y[0] *Oral Surgical Pathology*
    - Continue with thesis research (RST9999Y)
  - **Year 3:**
    - DEN1012Y[0] *Oral Medicine* (1.0 FCE)
    - DEN1013Y[0] *Oral Surgical Pathology* (1.0 FCE)
    - **Oral defence** of the written thesis (RST9999Y).
- **Residency.** Students must be on campus and participating for the duration of their registration in the program.

Program Length

10 sessions full-time (typical registration sequence: S/F/W/S/F/W/S/F/W/S)

Time Limit

4 years full-time

Dentistry: Dentistry MSc (Orthodontics and Dentofacial Orthopedics Specialty)

MSc Program (Orthodontics and Dentofacial Orthopedics Specialty)

Program Description

The Dentistry MSc, Orthodontics and Dentofacial Orthopedics specialty is a three-year full-time program. The specialty in Orthodontics and Dentofacial Orthopedics is concerned with the supervision, guidance, and correction of the growing or mature dentofacial structures and the diagnosis, prevention, and treatment of any abnormalities associated with these structures.

Students start the program in the Summer session. Upon completion of all program requirements, students are eligible for the MSc degree and certification in the chosen dental specialty.

Note: coursework-only students are ineligible to enrol in the PhD in Dentistry program at a later date.

MSc Program (Orthodontics and Dentofacial Orthopedics Specialty): Thesis-Only Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Doctor of Dental Surgery (DDS) or an equivalent degree with at least a B+ standing (3.3 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
  - **Year 1:**
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
  - **Years 1, 2, and 3:**
    - DEN1001Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE).
- In the **specialty of Orthodontics and Dentofacial Orthopedics**, complete **15.5 required FCEs** as follows. Students have the option to take DEN1008H *Cone Beam CT Imaging* (Credit/No Credit; 0.25 FCE; prerequisite: DEN1007H), in addition to the total FCEs required for the specialty.

  Note: course timing may vary between years. Please contact gradstudies@dentistry.utoronto.ca for details.

Dentistry: Dentistry MSc (Pediatric Dentistry Specialty)

MSc Program (Pediatric Dentistry Specialty)

Program Description

The Dentistry MSc, Pediatric Dentistry specialty is a three-year full-time program. Pediatric dentists provide primary and comprehensive preventive and therapeutic oral health diagnosis, care, and consultative expertise for infants and children through adolescence, including those of all ages with special care needs. The didactic program is centered at the Faculty of Dentistry, while the clinical program will be divided between the Faculty of Dentistry, the University-affiliated teaching hospitals and community-based Toronto Public Health dental clinic.

Students start the program in the Summer session. Upon completion of all program requirements, students are eligible for the MSc degree and certification in the chosen dental specialty.

Note: coursework-only students are ineligible to enrol in the PhD in Dentistry program at a later date.

MSc Program (Pediatric Dentistry Specialty): Thesis-Only Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Doctor of Dental Surgery (DDS) or an equivalent degree with at least a B+ standing (3.3 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
  - **Year 1:**
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)

    - DEN4014Y *Clinical Pediatric Dentistry III* (Credit/No Credit; 1.0 FCE)
    - Prepare a **research practicum** (DEN1061H; 0.5 FCE); successfully complete an **oral examination**.
- **Residency.** Students must be on campus and participating for the duration of their registration in the program.

Program Length

10 sessions full-time (typical registration sequence: S/F/W/S/F/W/S/F/W/S)

Time Limit

4 years full-time

[0] Course that may continue over a program. The course is graded or credit is given when completed.

[++] Course is offered in alternate years.

Dentistry: Dentistry MSc (Periodontics Specialty)

MSc Program (Periodontics Specialty)

Program Description

The Dentistry MSc, Periodontics specialty is a three-year full-time program. The specialty in Periodontics is concerned with the diagnosis, prevention, and treatment of diseases and conditions of the supporting and surrounding tissues of the teeth or their substitutes and the maintenance of the health, function, and aesthetics of these structures and tissues.

Students start the program in the Summer session. Upon completion of all program requirements, students are eligible for the MSc degree and certification in the chosen dental specialty.

Note: coursework-only students are ineligible to enrol in the PhD in Dentistry program at a later date.

MSc Program (Periodontics Specialty): Thesis-Only Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Doctor of Dental Surgery (DDS) or an equivalent degree with at least a B+ standing (3.3 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
  - **Year 1:**
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
    - DEN1001Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE).
- In the **specialty of Periodontics**, complete **17.0 required FCEs** as follows. Students have the option to take DEN1008H *Cone Beam CT Imaging* (Credit/No Credit; 0.25 FCE; prerequisite: DEN1007H), in addition to the total FCEs required for the specialty.

  Note: course timing may vary between years. Please contact gradstudies@dentistry.utoronto.ca for details.
  - **Year 1:**
    - DEN1007H *Oral Radiology* (0.5 FCE)
    - DEN1014H *Clinical Epidemiology and Evidence-Based Care* (0.5 FCE)
    - DEN1033Y *Periodontology: Seminars and Clinics I* (1.0 FCE)
    - DEN1036Y[0] *Literature Review in Periodontology*
    - DEN1039Y *Principles and Practice of Periodontology* (1.0 FCE)
    - DEN1070H[++] *Advances in Dental Materials Science* (0.5 FCE)
    - DEN1090H *Inhalation and Oral Minimal and Moderate Sedation for Dental Procedures* (Credit/No Credit; 0.5 FCE)
    - Begin **thesis research** (RST9999Y)
  - **Year 2:**
    - DEN1002H *Oral Pathology* (0.5 FCE)
    - DEN1022H *Investigating Pathogenic Biofilms* (0.5 FCE)
    - DEN1034Y *Periodontology: Seminars and Clinics II* (1.0 FCE)
    - DEN1036Y[0] *Literature Review in Periodontology* (1.0 FCE)
    - DEN1037Y *Clinical Case Presentations* (1.0 FCE)
    - DEN1038Y *Biomaterials and Implant/Reconstructive Dentistry* (1.0 FCE)
    - DEN1039Y *Principles and Practice of Periodontology* (1.0 FCE)
    - DEN1091Y *Parenteral Moderate Sedation for Dental Procedures* (Credit/No Credit; 1.0 FCE)
    - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit)
    - Continue with thesis research (RST9999Y)
  - **Year 3:**
    - DEN1013Y *Oral Surgical Pathology* (1.0 FCE)
    - DEN1035Y *Periodontology: Seminars and Clinics III* (1.0 FCE)
    - DEN1037Y *Clinical Case Presentations* (1.0 FCE)
    - DEN1038Y *Biomaterials and Implant/Reconstructive Dentistry* (1.0 FCE)
    - DEN1039Y *Principles and Practice of Periodontology* (1.0 FCE)
    - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit; 1.0 FCE)
    - **Oral defence** of the written thesis (RST9999Y).
- **Residency.** Students must be on campus and participating for the duration of their registration in the program.

Program Length

10 sessions full-time (typical registration sequence: S/F/W/S/F/W/S/F/W/S)

Dentistry: Dentistry MSc (Prosthodontics Specialty)

MSc Program (Prosthodontics Specialty)

Program Description

The Dentistry MSc program, Prosthodontics specialty is a three-year full-time program. The specialty in Prosthodontics is concerned with the diagnosis, restoration, and maintenance of oral function, comfort, appearance, and health of the patient by the restoration of the natural teeth and/or the replacement of missing teeth and contiguous oral and maxillofacial tissues with artificial substitutes.

Upon completion of all program requirements, students are eligible for the MSc degree and certification in the chosen dental specialty. Note: coursework-only students are ineligible to enrol in the PhD in Dentistry program at a later date.

MSc Program (Prosthodontics Specialty): Thesis-Only Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Doctor of Dental Surgery (DDS) or an equivalent degree with at least a B+ standing (3.3 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Dentistry: Dentistry PhD (Dental Biomedical Sciences Field)

Program Description

The Dentistry PhD, Dental Biomedical Sciences field is intended for those whose career goal is to work at the forefront of their field in oral health sciences as an independent research scientist in an academic, governmental, or industrial setting. Completion of the PhD may take longer than the indicated program length below.

PhD Program (Dental Biomedical Sciences)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Dentistry's additional admission requirements stated below.
- Students are normally admitted to a PhD program with a Doctor of Dental Surgery (DDS) or equivalent, with at least an A– standing (3.7 out of 4.0 grade point average [GPA]) in the final year from a recognized university. Students may also be admitted with an appropriate master's degree in a discipline appropriate to the intended field of doctoral study.

Program Requirements

- Students undertake customized programs, approved by an advisory committee and the Associate Dean, Graduate Education, comprising advanced study and original research culminating in the defence of a thesis. After consultation with the Associate Dean, Graduate Education, a committee will be appointed to plan and arrange students' coursework and research programs, approve the course of study, and monitor progress as part of an annual report to the Associate Dean for approval and continuance of candidacy.
- Students must successfully complete a total of **2.0 required full-course equivalents (FCEs), 2.0 elective FCEs, and a thesis** as follows:
    - **Year 1:**
        - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
        - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
        - DEN1100Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit)
        - Develop a **thesis proposal**, form a **supervisory committee**, and complete an **ethics review** (if applicable)
    - **Year 2:**
        - Continue with DEN1100Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit)
        - 2.0 elective FCEs in clinical, epidemiological, or basic science research methodology appropriate for clinical or public health practice

        - Successfully pass a **qualifying oral examination** between 12 and 24 months to demonstrate an adequate capacity for oral health sciences research through previous work. Students will be examined on their thesis proposal and their breadth of knowledge relative to the research project.
        - Continue with thesis research (RST9999Y)
    - **Year 3:**
        - Continue with DEN1100Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE)
        - Continue with thesis research (RST9999Y)
    - **Year 4:**
        - Complete any outstanding coursework
        - Continue with thesis research (RST9999Y)
    - **Year 5:** Successfully submit and defend the thesis at the **Doctoral Final Oral Examination**.
- Participate in all graduate research activities of the advisor's research group.
- Present at meetings and publish original research findings in a timely fashion.
- Participate as a member of departmental and student committees as applicable.
- **Residency.** Students must meet a minimum residency requirement of one year, though it is the Faculty of Dentistry's expectation that students will normally remain on campus for four years.

Program Length

5 years

Time Limit

7 years

[0] Course that may continue over a program. Credit is given when the course is completed.

PhD Program (Dental Biomedical Sciences): Transfer

Transfer Requirements

- Highly qualified MSc students may be considered for transfer to the PhD program. MSc students who transfer to the PhD must fulfil the admission requirements listed under the PhD program and successfully complete the transfer examination.

Program Requirements

- Students undertake customized programs, approved by an advisory committee and the Associate Dean, Graduate Education, comprising advanced study and original research culminating in the defence of a thesis. After consultation with the Associate Dean, Graduate Education, a committee will be appointed to plan and arrange the student's coursework and research programs, approve the course of study, and monitor progress as part of an annual report to the Associate Dean for approval and continuance of candidacy.
- Students must successfully complete a total of **2.0 full-course equivalents (FCEs), 2.0 elective FCEs, and a thesis** as follows:
    - **Year 1:**
        - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
        - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
        - DEN1100Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit)
        - Develop a **thesis proposal**, form a **supervisory committee**, and complete an **ethics review** (if applicable)
    - **Year 2:**
        - Continue with DEN1100Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit)
        - 2.0 elective FCEs in clinical, epidemiological, or basic science research methodology appropriate for clinical or public health practice
        - Successfully pass a **transfer examination** between 12 and 24 months to demonstrate an adequate capacity for oral health sciences research through previous work. Students will be examined on their thesis proposal and their breadth of knowledge relative to the research project.
    - **Year 3:**
        - Continue with DEN1100Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE)
        - Continue with thesis research (RST9999Y)
    - **Year 4:**
        - Complete any outstanding coursework
        - Continue with thesis research (RST9999Y)
    - **Year 5:** Successfully submit and defend the thesis at the **Doctoral Final Oral Examination**.
- Participate in all graduate research activities of the advisor's research group.
- Present at meetings and publish original research findings in a timely fashion.
- Participate as a member of departmental and student committees as applicable.
- **Residency.** Students must meet a minimum residency requirement of one year, though it is the Faculty of Dentistry's expectation that students will normally remain on campus for four years.

Dentistry: Dentistry PhD (Dental Anaesthesia Specialty)

Program Description

The PhD program, Dental Anaesthesia specialty is a six-year full-time program. The specialty in Dental Anaesthesia is designed to prepare dentists with a full range of sedation and anaesthetic techniques for dental patients, with the focus on deep sedation and general anaesthesia. The teaching facilities for this program are provided by the combined resources of Dental Anaesthesia in the Faculty of Dentistry and the Department of Anaesthesia in the Temerty Faculty of Medicine. Training is given both at the Faculty of Dentistry and at teaching hospitals affiliated with the University.

Upon completion of all program requirements, students are eligible for the PhD degree and certification in the chosen dental specialty. Program completion will be contingent upon completion of all requirements for the research and specialty training components of the program.

PhD Program (Dental Anaesthesia Specialty)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Students are normally admitted to the PhD program with a Doctor of Dental Surgery (DDS) or equivalent, with at least an A– standing (3.7 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students undertake a customized program, approved by an advisory committee and the Associate Dean, Graduate Education, comprising advanced study and original research culminating in the defence of a thesis. After consultation with the Associate Dean, Graduate Education, a committee will be appointed to plan and arrange the student's coursework and research programs, approve the course of study, and monitor progress as part of an annual report to the Associate Dean for approval and continuance of candidacy.
- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
  - **Year 1:**
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
  - **Years 2 and 3:**
    - DEN1100Y^{0} *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE).
- In the **specialty of Dental Anaesthesia**, complete **15.5 required FCEs and 1.0 elective FCE** as follows:
  - **Year 1:**
    - DEN1014H *Clinical Epidemiology and Evidence-Based Care* (0.5 FCE)
    - DEN1055H *Basic Principles of Anaesthesia* (0.5 FCE)
    - DEN1056Y *Basic Concepts in Clinical Medicine* (1.0 FCE)
    - DEN1073Y *Dental Anaesthesia Graduate Seminars* (1.0 FCE)
    - DEN1074Y *Foundations of Medicine as Applied to Dental Anaesthesia* (1.0 FCE)
    - DEN1076H^{+} *General Anaesthesia for Medical Procedures — Adult I* (0.5 FCE)
    - DEN1078H^{+} *General Anaesthesia for Dental Procedures — Adult I* (0.5 FCE)
    - DEN1084H^{+} *Experiences in Clinical Teaching I* (Credit/No Credit; 0.5 FCE)
    - DEN1087Y *Fundamentals of Dental Anaesthesia* (1.0 FCE)
    - Develop a **thesis proposal**, form a **supervisory committee**, and complete an **ethics review** (if applicable)
  - **Year 2:**
    - DEN1052Y *General Anaesthesia for Medical Procedures — Pediatric* (1.0 FCE)
    - DEN1071H^{+} *Medical Anaesthesia Seminars I* (Credit/No Credit; 0.5 FCE)
    - DEN1083Y *Experiences in Clinical Medicine* (1.0 FCE)
    - DEN1085H^{+} *Experiences in Clinical Teaching II* (Credit/No Credit; 0.5 FCE)
    - DEN1088Y *Fundamentals of Dental Anaesthesia II* (1.0 FCE)
    - PDE9094Y^{0} *Clinical Conferences* (Credit/No Credit)
    - Continue with thesis research (RST9999Y)
    - Successfully pass a **qualifying oral examination** between 12 and 24 months to demonstrate an adequate capacity for oral health sciences research through previous work. Students will be examined on their thesis proposal and their breadth of knowledge relative to the research project.
  - **Year 3:**
    - DEN1072H^{+} *Medical Anaesthesia Seminars II* (Credit/No Credit; 0.5 FCE)
    - DEN1075Y *General Anaesthesia for Dental Procedures — Pediatric* (1.0 FCE)
    - DEN1077H *General Anaesthesia for Medical Procedures — Adult II*
    - DEN1079H^{+} *General Anaesthesia for Dental Procedures — Adult II* (0.5 FCE)
    - DEN1086H^{+} *Experiences in Clinical Teaching III* (Credit/No Credit; 0.5 FCE)
    - DEN1089Y *Fundamentals of Dental Anaesthesia III* (1.0 FCE)
    - PDE9094Y^{0} *Clinical Conferences* (Credit/No Credit; 1.0 FCE)
    - Continue with thesis research (RST9999Y)
  - **Years 4 and 5:**
    - 1.0 elective FCE in clinical, epidemiological, or basic science research methodology appropriate for clinical or public health practice
    - Complete any outstanding core or specialty-specific coursework
    - Continue with thesis research (RST9999Y)
  - **Year 6:** Successfully submit and defend the thesis at the **Doctoral Final Oral Examination**.

- Participate in all graduate research activities of the advisor's research group.
- Present at meetings and publish original research findings in a timely fashion.
- Participate as a member of departmental and student committees as applicable.
- **Residency.** Students must be on campus and participating for the duration of their registration in the program.

8 years

[0] Course that may continue over a program. The course is graded or credit is given when completed.

PhD Program (Dental Anaesthesia Specialty): Transfer

Transfer Requirements

- Highly qualified MSc students in the thesis option may be considered for transfer to the PhD in Dentistry in the specialty of Dental Anaesthesia. MSc students who transfer to the PhD must fulfil the admission requirements listed under the PhD program and successfully complete the transfer examination.

Program Requirements

- Students undertake a customized program, approved by an advisory committee and the Associate Dean, Graduate Education, comprising advanced study and original research culminating in the defence of a thesis. After consultation with the Associate Dean, Graduate Education, a committee will be appointed to plan and arrange students' coursework and research programs, approve the course of study, and monitor progress as part of an annual report to the Associate Dean for approval and continuance of candidacy.
- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
  - **Year 1:**
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)

Dentistry: Dentistry PhD (Dental Public Health Specialty)

Program Description

The Dentistry PhD, Dental Public Health specialty is a five-year full-time program. This specialty consists of core subjects, with optional subjects chosen by students in consultation with the program director. Courses are given by the Faculty of Dentistry as well as other units, such as the Dalla Lana School of Public Health and the Institute of Health Policy, Management and Evaluation.

Upon completion of all program requirements, students are eligible for the PhD degree and certification in the chosen dental specialty. Program completion will be contingent upon completion of all requirements for the research and specialty training components of the program.

PhD Program (Dental Public Health Specialty)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Dentistry's additional admission requirements stated below.
- Students are normally admitted to the PhD program with a Doctor of Dental Surgery (DDS) or equivalent, with at least an A– standing (3.7 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students undertake a customized program, approved by an advisory committee and the Associate Dean, Graduate Education, comprising advanced study and original research culminating in the defence of a thesis. After consultation with the Associate Dean, Graduate Education, a committee will be appointed to plan and arrange the student's coursework and research programs, approve the course of study, and monitor progress as part of an annual report to the Associate Dean for approval and continuance of candidacy.
- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
  - **Year 1:**
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
  - **Years 2 and 3:**
    - DEN1100Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE).
- In the **specialty of Dental Public Health**, complete **7.0 required FCEs and 1.0 elective FCE** as follows:
  - **Year 1:**
    - CHL5004H *Introduction to Public Health Sciences* (0.5 FCE)
    - DEN1003H *Preventive Dentistry* (0.5 FCE)
    - DEN1006Y *Seminars in Dental Public Health* (1.0 FCE)
    - DEN1014H *Clinical Epidemiology and Evidence-Based Care* (0.5 FCE)
    - DEN1051Y *Oral Epidemiology* (1.0 FCE)
    - DEN1063Y *Practicum in Dental Public Health* (1.0 FCE)
    - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit; 1.0 FCE)
    - Develop a **thesis proposal**, form a **supervisory committee**, and complete an **ethics review** (if applicable)
  - **Year 2:**
    - DEN1064H *Management Principles in Canadian Dental Health Organizations* (0.5 FCE)
    - 0.5 FCE chosen in the area of health policy or health economics based on the student's clinical or research interests
    - 0.5 FCE chosen in the area of public health based on the student's clinical or research interests
    - Continue with thesis research (RST9999Y)
    - Successfully pass a **qualifying oral examination** between 12 to 24 months to demonstrate an adequate capacity for oral health sciences research through previous work. Students will be examined on their thesis proposal and their breadth of knowledge relative to the research project.
  - **Years 3 and 4:**
    - 1.0 elective FCE in clinical, epidemiological, or basic science research methodology appropriate for clinical or public health practice
    - Complete any outstanding core or specialty-specific coursework
    - Continue with thesis research (RST9999Y)
  - **Year 5:** Successfully submit and defend the thesis at the **Doctoral Final Oral Examination**.
- Participate in all graduate research activities of the advisor's research group.
- Present at meetings and publish original research findings in a timely fashion.
- Participate as a member of departmental and student committees as applicable.
- **Residency.** Students must be on campus and participating for the duration of their registration in the program.

Dentistry: Dentistry PhD (Endodontics Specialty)

Program Description

The Dentistry PhD, Endodontics specialty is a six-year full-time program. This specialty is designed to provide students with opportunities to acquire excellent clinical skills and comprehension of the underlying biology. Its components include: patient care, providing all aspects of endodontic treatment; topic-specific and current literature seminars; clinical conferences; core curriculum courses; rotation programs; research at the MSc level, including application for funding,

preparation of manuscripts for publication, presentation at national and international research forums; and guest lectures. Students must complete a dental clinic rotation as part of the Endodontics specialty requirements.

Great emphasis is placed on self-learning in all of the program's components. Students are encouraged to identify research topics, related to endodontic science or any other dental or non-dental scientific area. Through continual updating of courses and research schedules, the program aims to achieve a balanced platform of excellent specialty education and committed service to patients. Students are encouraged to join the Ontario Society of Endodontists, the Canadian Academy of Endodontics, and the American Association of Endodontists.

Students start the program in the Summer session. Upon completion of all program requirements, students are eligible for the PhD degree and certification in the chosen dental specialty. Program completion will be contingent upon completion of all requirements for the research and specialty training components of the program.

PhD Program (Endodontics Specialty)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Dentistry's additional admission requirements stated below.
- Students are normally admitted to the PhD program with a Doctor of Dental Surgery (DDS) or equivalent, with at least an A– standing (3.7 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students undertake a customized program, approved by an advisory committee and the Associate Dean, Graduate Education, comprising advanced study and original research culminating in the defence of a thesis. After consultation with the Associate Dean, Graduate Education, a committee will be appointed to plan and arrange the student's coursework and research programs, approve the course of study, and monitor progress as part of an annual report to the Associate Dean for approval and continuance of candidacy.
- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
  - **Year 1:**
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
  - **Years 2 and 3:**
    - DEN1100Y^{0} *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE).
- In the **specialty of Endodontics**, complete **18.0 required FCEs and 1.0 elective FCE** as follows. Students have the option to take DEN1008H *Cone Beam CT Imaging* (Credit/No Credit; 0.25 FCE; prerequisite: DEN1007H), in addition to the total FCEs required for the specialty.

Note: course timing may vary between years. Please contact gradstudies@dentistry.utoronto.ca for details.

- **Year 1:**
  - DEN1002H *Oral Pathology* (0.5 FCE)
  - DEN1007H *Oral Radiology* (0.5 FCE)
  - DEN1014H *Clinical Epidemiology and Evidence-Based Care* (0.5 FCE)
  - DEN1062H *Pharmacology of Dental Therapeutics* (0.5 FCE)
  - DEN1070H^{++} *Advances in Dental Materials Science* (0.5 FCE)
  - DEN1090H *Inhalation and Oral Minimal and Moderate Sedation for Dental Procedures* (Credit/No Credit; 0.5 FCE)
  - DEN3005H *Head and Neck Anatomy* (0.5 FCE)
  - DEN5001Y *Graduate Endodontics Case Presentations* (1.0 FCE)
  - DEN5002Y *Graduate Endodontics Topical Literature* (1.0 FCE)
  - DEN5003Y *Graduate Endodontics Current Literature* (1.0 FCE)
  - DEN5005H^{+} *Introduction to Graduate Endodontics* (0.5 FCE)
  - PDE9091Y *Endodontic Clinic* (1.0 FCE)
  - PDE9094Y^{0} *Clinical Conferences* (Credit/No Credit)
  - Develop a **thesis proposal**, form a **supervisory committee**, and complete an **ethics review** (if applicable)
- **Year 2:**
  - DEN1022H *Investigating Pathogenic Biofilms* (0.5 FCE)
  - DEN1060H *Oral Physiology: Sensory and Neuromuscular Function* (0.5 FCE)
  - DEN5001Y *Graduate Endodontics Case Presentations* (1.0 FCE)
  - DEN5002Y *Graduate Endodontics Topical Literature* (1.0 FCE)
  - DEN5003Y *Graduate Endodontics Current Literature* (1.0 FCE)
  - DEN5004Y^{0} *Single Tooth Replacement with Implant Supported Prosthesis*
  - PDE9091Y *Endodontic Clinic* (1.0 FCE)
  - PDE9094Y^{0} *Clinical Conferences* (Credit/No Credit; 1.0 FCE)
  - Continue with thesis research (RST9999Y)
  - Successfully pass a **qualifying oral examination** between 12 and 24 months to demonstrate an adequate capacity for oral health sciences research through previous work. Students will be examined on their thesis proposal and their breadth of knowledge relative to the research project.
- **Years 3 to 5:**
  - DEN5001Y *Graduate Endodontics Case Presentations* (1.0 FCE)
  - DEN5003Y *Graduate Endodontics Current Literature* (1.0 FCE)
  - DEN5004Y^{0} *Single Tooth Replacement with Implant Supported Prosthesis* (1.0 FCE)
  - PDE9091Y *Endodontic Clinic* (1.0 FCE)
  - 1.0 elective FCE in clinical, epidemiological, or basic science research methodology appropriate for clinical or public health practice
  - Complete any outstanding core or specialty-specific coursework
  - Continue with thesis research (RST9999Y)

- **Year 6:** Successfully submit and defend the thesis at the **Doctoral Final Oral Examination**.

- Participate in all graduate research activities of the advisor's research group.
- Present at meetings and publish original research findings in a timely fashion.
- Participate as a member of departmental and student committees as applicable.
- **Residency.** Students must be on campus and participating for the duration of their registration in the program.

Dentistry: Dentistry PhD (Oral and Maxillofacial Pathology Specialty)

Program Description

The Dentistry PhD, Oral and Maxillofacial Pathology specialty is a six-year full-time program. The specialty in Oral and Maxillofacial Pathology focuses on the identification and management of diseases of the oral and maxillofacial regions through microscopic, clinical, biochemical, or other forms of examination. Oral and Maxillofacial Pathology includes histopathologic analysis of tissue samples, the investigation of, causes, and effects of diseases.

Students start the program in the Summer session. Upon completion of all program requirements, students are eligible for the PhD degree and certification in the chosen dental specialty. Program completion will be contingent upon completion of all requirements for the research and specialty training components of the program.

PhD Program (Oral and Maxillofacial Pathology Specialty)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Dentistry's additional admission requirements stated below.
- Students are normally admitted to the PhD program with a Doctor of Dental Surgery (DDS) or equivalent, with at least an A– standing (3.7 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students undertake a customized program, approved by an advisory committee and the Associate Dean, Graduate Education, comprising advanced study and original research culminating in the defence of a thesis. After consultation with the Associate Dean, Graduate Education, a committee will be appointed to plan and arrange the student's coursework and research programs, approve the course of study, and monitor progress as part of an annual report to the Associate Dean for approval and continuance of candidacy.
- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
    - **Year 1:**
        - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
        - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
    - **Years 2 and 3:**
        - DEN1100Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE).
- In the **specialty of Oral and Maxillofacial Pathology**, complete **5.5 required FCEs and 1.0 elective FCE** as follows. Students have the option to take DEN1008H *Cone Beam CT Imaging* (Credit/No Credit; 0.25 FCE; prerequisite: DEN1007H), in addition to the total FCEs required for the specialty.
    - **Year 1:**
        - LMP1300Y *General and Special Pathology* (1.0 FCE)
        - Develop a **thesis proposal**, form a **supervisory committee**, and complete an **ethics review** (if applicable)
    - **Year 2:**
        - DEN1002H *Oral Pathology* (0.5 FCE)
        - DEN1007H *Oral Radiology* (0.5 FCE)
        - DEN1011Y[0] *Seminars in Advanced Oral Pathology*
        - DEN1013Y[0] *Oral Surgical Pathology*
        - DEN1014H *Clinical Epidemiology and Evidence-Based Care* (0.5 FCE)
        - Continue with thesis research (RST9999Y)
        - Successfully pass a **qualifying oral examination** between 12 and 24 months to demonstrate an adequate capacity for oral health sciences research through previous work. Students will be examined on their thesis proposal and their breadth of knowledge relative to the research project.
    - **Year 3:**
        - DEN1011Y[0] *Seminars in Advanced Oral Pathology* (1.0 FCE)

        - DEN1012Y *Oral Medicine* (1.0 FCE)
        - DEN1013Y[0] *Oral Surgical Pathology* (1.0 FCE)
        - Continue with thesis research (RST9999Y)
    - **Years 4 and 5:**
        - 1.0 elective FCE in clinical, epidemiological, or basic science research methodology appropriate for clinical or public health practice
        - Complete any outstanding core or specialty-specific coursework
        - Continue with thesis research (RST9999Y)
    - **Year 6:** Successfully submit and defend the thesis at the **Doctoral Final Oral Examination**.
        - Participate in all graduate research activities of the advisor's research group.
        - Present at meetings and publish original research findings in a timely fashion.
        - Participate as a member of departmental and student committees as applicable.
- **Residency.** Students must be on campus and participating for the duration of their registration in the program.

PhD Program (Oral and Maxillofacial Pathology Specialty): Transfer

Transfer Requirements

- Highly qualified MSc students, who are in the thesis option of the MSc program, may be considered for transfer to the Dentistry PhD in the specialty of Oral and Maxillofacial Pathology. MSc students who transfer to the PhD must fulfil the admission requirements listed under the PhD program and successfully complete the transfer examination.

Program Requirements

- Students undertake a customized program, approved by an advisory committee and the Associate Dean, Graduate Education, comprising advanced study and original research culminating in the defence of a thesis. After consultation with the Associate Dean, Graduate Education, a committee will be appointed to plan and arrange the student's coursework and research programs, approve the course of study, and monitor progress as part of an annual report to the Associate Dean for approval and continuance of candidacy.

Dentistry: Dentistry PhD (Oral and Maxillofacial Pathology and Oral Medicine Specialty)

Program Description

The Dentistry PhD, Oral and Maxillofacial Pathology and Oral Medicine specialty is a seven-year full-time program. The specialty in Oral and Maxillofacial Pathology and Oral Medicine is concerned with the diagnosis, nature, and primarily non-surgical management of oral, maxillofacial, and temporomandibular diseases and disorders, including dental management of patients with medical complications.

Students start the program in the Summer session. Upon completion of all program requirements, students are eligible for the PhD degree and certification in the chosen dental specialty. Program completion will be contingent upon completion of all requirements for the research and specialty training components of the program.

PhD Program (Oral and Maxillofacial Pathology and Oral Medicine Specialty)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Dentistry's additional admission requirements stated below.
- Students are normally admitted to the PhD program with a Doctor of Dental Surgery (DDS) or equivalent, with at least an A– standing (3.7 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students undertake a customized program, approved by an advisory committee and the Associate Dean, Graduate Education, comprising advanced study and original research culminating in the defence of a thesis. After consultation with the Associate Dean, Graduate Education, a committee will be appointed to plan and arrange the student's coursework and research programs, approve the course of study, and monitor progress as part of an annual report to the Associate Dean for approval and continuance of candidacy.
- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
  - **Year 1:**
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
  - **Years 2 and 3:**
    - DEN1100Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE).
- In the **specialty of Oral and Maxillofacial Pathology and Oral Medicine**, complete **5.5 required FCEs and 1.0 elective FCE** as follows. Students have the option to take DEN1008H *Cone Beam CT Imaging* (Credit/No Credit; 0.25 FCE; prerequisite: DEN1007H), in addition to the total FCEs required for the specialty.
  - **Year 1:**
    - LMP1300Y *General and Special Pathology* (1.0 FCE)
    - Develop a **thesis proposal**, form a **supervisory committee**, and complete an **ethics review** (if applicable)
  - **Year 2:**
    - DEN1002H *Oral Pathology* (0.5 FCE)
    - DEN1007H *Oral Radiology* (0.5 FCE)
    - DEN1011Y[0] *Seminars in Advanced Oral Pathology*
    - DEN1012Y[0] *Oral Medicine*
    - DEN1013Y[0] *Oral Surgical Pathology*
    - DEN1014H *Clinical Epidemiology and Evidence-Based Care* (0.5 FCE)
    - Continue with thesis research (RST9999Y)
    - Successfully pass a **qualifying oral examination** within 12 to 24 months to demonstrate an adequate capacity for oral health sciences research through previous work. Students will be examined on their thesis proposal and their breadth of knowledge relative to the research project.
  - **Year 3:**

Dentistry: Dentistry PhD (Oral and Maxillofacial Surgery Specialty)

Program Description

The Dentistry PhD, Oral and Maxillofacial Surgery specialty is a seven-year full-time program. The specialty in Oral and Maxillofacial Surgery is concerned with and includes the

diagnosis and surgical and adjunctive treatment of disorders, diseases, injuries, and defects, involving the functional and aesthetic aspects of the hard and soft tissues of the oral and maxillofacial regions and related structures. Clinical activities are based primarily at Mt. Sinai Hospital, Sunnybrook Health Sciences Centre, Humber River Hospital, and The Hospital for Sick Children. There is also additional participation at other University-affiliated teaching centres: Holland Bloorview Kids Rehabilitation, Lakeview Health, and the Rouge Valley Health Network.

Students start the program in the Summer session. Upon completion of all program requirements, students are eligible for the PhD degree and certification in the chosen field of dental specialty. Program completion will be contingent upon completion of all requirements for the research and specialty training components of the program.

PhD Program (Oral and Maxillofacial Surgery Specialty)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Students are normally admitted to the PhD program with a Doctor of Dental Surgery (DDS) or equivalent, with at least an A– standing (3.7 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students undertake a customized program, approved by an advisory committee and the Associate Dean, Graduate Education, comprising advanced study and original research culminating in the defence of a thesis. After consultation with the Associate Dean, Graduate Education, a committee will be appointed to plan and arrange the student's coursework and research programs, approve the course of study, and monitor progress as part of an annual report to the Associate Dean for approval and continuance of candidacy.
- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows. Students have the option to take DEN1008H *Cone Beam CT Imaging* (Credit/No Credit; 0.25 FCE; prerequisite: DEN1007H), in addition to the total FCEs required for the specialty.
  - **Year 1:**
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
  - **Years 2 and 3:**
    - DEN1100Y^0 *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE)
- In the **specialty of Oral and Maxillofacial Surgery**, complete **20.5 required FCEs and 1.0 elective FCE** as follows:
  - **Year 1:**
    - DEN1002H *Oral Pathology* (0.5 FCE)
    - DEN1007H *Oral Radiology* (0.5 FCE)
    - DEN1013Y^0 *Oral Surgical Pathology*
    - DEN2005Y *Surgical Orthodontics* (1.0 FCE)
    - DEN3001Y *Oral and Maxillofacial Surgery 1: The Physiologic Basis of Disease* (1.0 FCE)
    - DEN3002Y *Oral and Maxillofacial Surgery 2: Principles and Practice of Oral and Maxillofacial Surgery* (1.0 FCE)
    - DEN3003Y *Oral and Maxillofacial Surgery 3: Evidence-Based Literature Reviews in Oral and Maxillofacial Surgery* (1.0 FCE)
    - DEN3004Y *Oral and Maxillofacial Surgery 4: Applied Surgical Anatomy of the Head and Neck* (1.0 FCE)
    - DEN3005H *Head and Neck Anatomy* (0.5 FCE)
    - PDE9094Y^0 *Clinical Conferences* (Credit/No Credit)
    - Principles of Surgery module taken through the Department of Surgery in the Temerty Faculty of Medicine (0.0 FCE)
    - Develop a **thesis proposal**, form a **supervisory committee**, and complete an **ethics review** (if applicable)
  - **Year 2:**
    - DEN3001Y *Oral and Maxillofacial Surgery 1: The Physiologic Basis of Disease* (1.0 FCE)
    - DEN3002Y *Oral and Maxillofacial Surgery 2: Principles and Practice of Oral and Maxillofacial Surgery* (1.0 FCE)
    - DEN3003Y *Oral and Maxillofacial Surgery 3: Evidence-Based Literature Reviews in Oral and Maxillofacial Surgery* (1.0 FCE)
    - Continue with thesis research (RST9999Y)
    - Successfully pass a **qualifying oral examination** between 12 and 24 months to demonstrate an adequate capacity for oral health sciences research through previous work. Students will be examined on their thesis proposal and their breadth of knowledge relative to the research project.
  - **Year 3:**
    - DEN1013Y^0 *Oral Surgical Pathology* (1.0 FCE)
    - DEN2005Y *Surgical Orthodontics* (1.0 FCE)
    - DEN3001Y *Oral and Maxillofacial Surgery 1: The Physiologic Basis of Disease* (1.0 FCE)
    - DEN3002Y *Oral and Maxillofacial Surgery 2: Principles and Practice of Oral and Maxillofacial Surgery* (1.0 FCE)
    - DEN3003Y *Oral and Maxillofacial Surgery 3: Evidence-Based Literature Reviews in Oral and Maxillofacial Surgery* (1.0 FCE)
    - DEN3004Y *Oral and Maxillofacial Surgery 4: Applied Surgical Anatomy of the Head and Neck* (1.0 FCE)
    - PDE9094Y^0 *Clinical Conferences* (Credit/No Credit; 1.0 FCE)
    - Continue with thesis research (RST9999Y)
  - **Year 4:**
    - DEN2005Y *Surgical Orthodontics* (1.0 FCE)
    - DEN3001Y *Oral and Maxillofacial Surgery 1: The Physiologic Basis of Disease* (1.0 FCE)
    - DEN3002Y *Oral and Maxillofacial Surgery 2: Principles and Practice of Oral and Maxillofacial Surgery* (1.0 FCE)
    - DEN3003Y *Oral and Maxillofacial Surgery 3: Evidence-Based Literature Reviews in Oral and Maxillofacial Surgery* (1.0 FCE)
    - Continue with thesis research (RST9999Y)

    - **Years 5 and 6:**
        - 1.0 elective FCE in clinical, epidemiological, or basic science research methodology appropriate for clinical or public health practice
        - Complete any outstanding core or specialty-specific coursework
        - Continue with thesis research (RST9999Y)
    - **Year 7:** Successfully submit and defend the thesis at the **Doctoral Final Oral Examination**.
- Participate in all graduate research activities of the advisor's research group.
- Present at meetings and publish original research findings in a timely fashion.
- Participate as a member of departmental and student committees as applicable.
- **Residency.** Students must be on campus and participating for the duration of their registration in the program.

PhD Program (Oral and Maxillofacial Surgery Specialty): Transfer

Transfer Requirements

- Highly qualified MSc students in the thesis option may be considered for transfer to the Dentistry PhD in the specialty of Oral and Maxillofacial Surgery. MSc students who transfer to the PhD must fulfil the admission requirements listed under the PhD program and successfully complete the transfer examination.

Program Requirements

- Students undertake a customized program, approved by an advisory committee and the Associate Dean, Graduate Education, comprising advanced study and original research culminating in the defence of a thesis. After consultation with the Associate Dean, Graduate Education, a committee will be appointed to plan and arrange students' coursework and research programs, approve the course of study, and monitor progress as part of an annual report to the Associate Dean for approval and continuance of candidacy.
- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
    - **Year 1:**
        - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
        - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
    - **Years 2 and 3:**
        - DEN1100Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE)
- In the **specialty of Oral and Maxillofacial Surgery**, complete **20.5 required FCEs and 1.0 elective FCE** as follows. Students have the option to take DEN1008H *Cone Beam CT Imaging* (Credit/No Credit; 0.25 FCE; prerequisite: DEN1007H), in addition to the total FCEs required for the specialty.
    - **Year 1:**
        - DEN1002H *Oral Pathology* (0.5 FCE)
        - DEN1007H *Oral Radiology* (0.5 FCE)
        - DEN1013Y[0] *Oral Surgical Pathology*
        - DEN2005Y *Surgical Orthodontics* (1.0 FCE)
        - DEN3001Y *Oral and Maxillofacial Surgery 1: The Physiologic Basis of Disease* (1.0 FCE)
        - DEN3002Y *Oral and Maxillofacial Surgery 2: Principles and Practice of Oral and Maxillofacial Surgery* (1.0 FCE)
        - DEN3003Y *Oral and Maxillofacial Surgery 3: Evidence-Based Literature Reviews in Oral and Maxillofacial Surgery* (1.0 FCE)
        - DEN3004Y *Oral and Maxillofacial Surgery 4: Applied Surgical Anatomy of the Head and Neck* (1.0 FCE)
        - DEN3005H *Head and Neck Anatomy* (0.5 FCE)
        - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit)

Dentistry: Dentistry PhD (Oral Medicine Specialty)

Program Description

The Dentistry PhD, Oral Medicine specialty is a six-year full-time program. The specialty in Oral Medicine focuses on nonsurgical management of oral diseases including the management of oral mucosal and salivary gland diseases, temporomandibular disorders, and orofacial pain, the oral complications of systemic disease, and dental management of medically complex patients.

Students start the program in the Summer session. Upon completion of all program requirements, students are eligible for the PhD degree and certification in the chosen field of dental specialty. Program completion will be contingent upon completion of all requirements for the research and specialty training components of the program.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Students are normally admitted to the PhD program with a Doctor of Dental Surgery (DDS) or equivalent, with at least an A– standing (3.7 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students undertake a customized program, approved by an advisory committee and the Associate Dean, Graduate Education, comprising advanced study and original research culminating in the defence of a thesis. After consultation with the Associate Dean, Graduate Education, a committee will be appointed to plan and arrange the student's coursework and research programs, approve the course of study, and monitor progress as part of an annual report to the Associate Dean for approval and continuance of candidacy.
- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
  - **Year 1:**
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
  - **Years 2 and 3:**
    - DEN1100Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE)
- In the **specialty of Oral Medicine**, complete **3.5 required FCEs and 1.0 elective FCE** as follows. Students have the option to take DEN1008H *Cone Beam CT Imaging* (Credit/No Credit; 0.25 FCE; prerequisite: DEN1007H), in addition to the total FCEs required for the specialty.
  - **Year 1:**
    - DEN1002H *Oral Pathology* (0.5 FCE)
    - DEN1007H *Oral Radiology* (0.5 FCE)
    - DEN1012Y[0] *Oral Medicine*
    - DEN1013Y[0] *Oral Surgical Pathology*
    - DEN1014H *Clinical Epidemiology and Evidence-Based Care* (0.5 FCE)
    - Develop a **thesis proposal**, form a **supervisory committee**, and complete an **ethics review** (if applicable)
  - **Year 2:**
    - DEN1012Y[0] *Oral Medicine*
    - DEN1013Y[0] *Oral Surgical Pathology*
    - Continue with thesis research (RST9999Y)
    - Successfully pass a **qualifying oral examination** between 12 and 24 months to demonstrate an adequate capacity for oral health sciences research through previous work. Students will be examined on their thesis proposal and their breadth of knowledge relative to the research project.
  - **Year 3:**

Dentistry: Dentistry PhD (Pediatric Dentistry Specialty)

Doctor of Philosophy

Program Description

The Dentistry PhD, Pediatric Dentistry specialty is a six-year full-time program. Pediatric dentists provide primary and comprehensive preventive and therapeutic oral health diagnosis, care, and consultative expertise for infants and children through adolescence, including those of all ages with special care needs. The didactic program is centered at the Faculty of Dentistry, while the clinical program will be divided between the Faculty of Dentistry, the University-affiliated teaching hospitals and community-based Toronto Public Health dental clinic.

Students start the program in the Summer session. Upon completion of all program requirements, students are eligible for the PhD degree and certification in the chosen field of dental specialty. Program completion will be contingent upon completion of all requirements for the research and specialty training components of the program.

PhD Program (Pediatric Dentistry Specialty)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Students are normally admitted to the PhD program with a Doctor of Dental Surgery (DDS) or equivalent, with at least an A– standing (3.7 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students undertake a customized program, approved by an advisory committee and the Associate Dean, Graduate Education, comprising advanced study and original research culminating in the defence of a thesis. After consultation with the Associate Dean, Graduate Education, a committee will be appointed to plan and arrange the student's coursework and research programs, approve the course of study, and monitor progress as part of an annual report to the Associate Dean for approval and continuance of candidacy.
- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
  - **Year 1:**
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
  - **Years 2 and 3:**
    - DEN1100Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE)
- In the **specialty of Pediatric Dentistry**, complete **17.0 required FCEs and 1.0 elective FCE** as follows. Students have the option to take DEN1008H *Cone Beam CT Imaging* (Credit/No Credit; 0.25 FCE; prerequisite: DEN1007H), in addition to the total FCEs required for the specialty.

  Note: course timing may vary between years. Please contact gradstudies@dentistry.utoronto.ca for details.
  - **Year 1:**
    - DEN1002H *Oral Pathology* (0.5 FCE)
    - DEN1003H *Preventive Dentistry* (0.5 FCE)
    - DEN1007H *Oral Radiology* (0.5 FCE)
    - DEN1014H *Clinical Epidemiology and Evidence-Based Care* (0.5 FCE)
    - DEN1062H *Pharmacology of Dental Therapeutics* (0.0 FCE)
    - DEN1090H *Inhalation and Oral Minimal and Moderate Sedation for Dental Procedures* (Credit/No Credit; 0.5 FCE)
    - DEN2007Y[++] *Craniofacial Anomalies* (1.0 FCE)
    - DEN4001Y[0] *Pediatric Dentistry 1: Theoretical Pediatric Dentistry*
    - DEN4002Y[0] *Pediatric Dentistry 2: Journal Review*
    - DEN4003Y *Pediatric Dentistry 3: Facial and Dental Growth and Development in Pediatric Dentistry* (1.0 FCE)
    - DEN4004H *Pediatric Dentistry 4: Child Behaviour Management* (0.5 FCE)
    - DEN4006Y *Pediatric Dentistry 6: Oral and Maxillofacial Surgery as Applied to Pediatric Dentistry* (1.0 FCE)
    - DEN4007H *Pediatric Dentistry 7: Therapy and Trauma* (0.5 FCE)
    - DEN4008Y[0] *Pediatric Orthodontics*
    - DEN4009Y *Pediatrics* (1.0 FCE)
    - DEN4010Y *Pediatric Medicine and Hospital Dentistry* (1.0 FCE)
    - DEN4011Y *Conscious Sedation and Anaesthesia in Pediatric Dentistry* (1.0 FCE)
    - DEN4012Y *Clinical Pediatric Dentistry I* (Credit/No Credit; 1.0 FCE)
    - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit)
    - Develop a **thesis proposal**, form a **supervisory committee**, and complete an **ethics review** (if applicable)
  - **Year 2:**

        - DEN1070H[++] *Advances in Dental Materials Science* (0.5 FCE)
        - DEN4001Y[0] *Pediatric Dentistry 1: Theoretical Pediatric Dentistry*
        - DEN4002Y[0] *Pediatric Dentistry 2: Journal Review*
        - DEN4008Y[0] *Pediatric Orthodontics*
        - DEN4013Y *Clinical Pediatric Dentistry II* (Credit/No Credit; 1.0 FCE)
        - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit; 1.0 FCE)
        - Continue with thesis research (RST9999Y)
        - Successfully pass a **qualifying oral examination** between 12 and 24 months to demonstrate an adequate capacity for oral health sciences research through previous work. Students will be examined on their thesis proposal and their breadth of knowledge relative to the research project.
    - **Year 3:**
        - DEN4001Y[0] *Pediatric Dentistry 1: Theoretical Pediatric Dentistry* (1.0 FCE)
        - DEN4002Y[0] *Pediatric Dentistry 2: Journal Review* (1.0 FCE)
        - DEN4008Y[0] *Pediatric Orthodontics* (1.0 FCE)
        - DEN4014Y *Clinical Pediatric Dentistry III* (Credit/No Credit; 1.0 FCE)
        - Continue with thesis research (RST9999Y)
    - **Years 4 and 5:**
        - 1.0 elective FCE in clinical, epidemiological, or basic science research methodology appropriate for clinical or public health practice
        - Complete any outstanding core or field-specific coursework
        - Continue with thesis research (RST9999Y)
    - **Year 6:** Successfully submit and defend the thesis at the **Doctoral Final Oral Examination**.
- Participate in all graduate research activities of the advisor's research group.
- Present at meetings and publish original research findings in a timely fashion.
- Participate as a member of departmental and student committees as applicable.
- **Residency.** Students must be on campus and participating for the duration of their registration in the program.

Dentistry: Dentistry PhD (Periodontics Specialty)

Program Description

The Dentistry PhD, Periodontics specialty is a six-year full-time program. The specialty in Periodontics is concerned with the diagnosis, prevention, and treatment of diseases and conditions of the supporting and surrounding tissues of the teeth or their substitutes and the maintenance of the health, function, and aesthetics of these structures and tissues.

Students start the program in the Summer session. Upon completion of all program requirements, students are eligible for the PhD degree and certification in the chosen field of dental specialty. Program completion will be contingent upon completion of all requirements for the research and specialty training components of the program.

PhD Program (Periodontics Specialty)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Students are normally admitted to the PhD program with a Doctor of Dental Surgery (DDS) or equivalent, with at least an A– standing (3.7 out of 4.0 grade point average [GPA]) in the final year from a recognized university.

Program Requirements

- Students undertake a customized program, approved by an advisory committee and the Associate Dean, Graduate Education, comprising advanced study and original research culminating in the defence of a thesis. After consultation with the Associate Dean, Graduate Education, a committee will be appointed to plan and arrange the student's coursework and research programs, approve the course of study, and monitor progress as part of an annual report to the Associate Dean for approval and continuance of candidacy.
- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
    - **Year 1:**

    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
  - **Years 2 and 3:**
    - DEN1100Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE).
- In the **specialty of Periodontics**, complete **17.0 required FCEs and 1.0 elective FCE** as follows. Students have the option to take DEN1008H *Cone Beam CT Imaging* (Credit/No Credit; 0.25 FCE; prerequisite: DEN1007H), in addition to the total FCEs required for the specialty.

  Note: course timing may vary between years. Please contact gradstudies@dentistry.utoronto.ca for details.
  - **Year 1:**
    - DEN1007H *Oral Radiology* (0.5 FCE)
    - DEN1014H *Clinical Epidemiology and Evidence-Based Care* (0.5 FCE)
    - DEN1033Y *Periodontology: Seminars and Clinics I* (1.0 FCE)
    - DEN1036Y[0] *Literature Review in Periodontology*
    - DEN1039Y *Principles and Practice of Periodontology* (1.0 FCE)
    - DEN1070H[++] *Advances in Dental Materials Science* (0.5 FCE)
    - DEN1090H *Inhalation and Oral Minimal and Moderate Sedation for Dental Procedures* (Credit/No Credit; 0.5 FCE)
    - Develop a **thesis proposal**, form a **supervisory committee**, and complete an **ethics review** (if applicable)
  - **Year 2:**
    - DEN1002H *Oral Pathology* (0.5 FCE)
    - DEN1022H *Investigating Pathogenic Biofilms* (0.5 FCE)
    - DEN1034Y *Periodontology: Seminars and Clinics II* (1.0 FCE)
    - DEN1036Y[0] *Literature Review in Periodontology* (1.0 FCE)
    - DEN1037Y *Clinical Case Presentations* (1.0 FCE)
    - DEN1038Y *Biomaterials and Implant/Reconstructive Dentistry* (1.0 FCE)
    - DEN1039Y *Principles and Practice of Periodontology* (1.0 FCE)
    - DEN1091Y *Parenteral Moderate Sedation for Dental Procedures* (Credit/No Credit; 1.0 FCE)
    - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit)
    - Continue with thesis research (RST9999Y)
    - Successfully pass a **qualifying oral examination** within 12 to 24 months to demonstrate an adequate capacity for oral health sciences research through previous work. Students will be examined on their thesis proposal and their breadth of knowledge relative to the research project.

Dentistry: Dentistry PhD (Prosthodontics Specialty)

Program Description

The Dentistry PhD, Prosthodontics specialty is a six-year full-time program. This specialty is designed to prepare students for careers in the specialty of prosthodontics with particular emphasis on developing clinical teachers and researchers. Extensive clinical training is provided under close supervision in the Faculty of Dentistry Prosthodontics and the Implant Prosthodontic Unit. Strong surgical, communication, and interpersonal skills are developed in addition to the core prosthodontic skills.

Upon completion of all program requirements, students are eligible for the PhD degree and certification in the chosen field of dental specialty. Program completion will be contingent upon completion of all requirements for the research and specialty training components of the program.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Dentistry's additional admission requirements stated below.
- Students are normally admitted to the PhD program with an appropriate master's degree, or equivalent, with at least an A– standing (3.7 out of 4.0 grade point average [GPA]) in the final year from a recognized university in a discipline appropriate to the intended field of doctoral study.

Program Requirements

- Students undertake a customized program, approved by an advisory committee and the Associate Dean, Graduate Education, comprising advanced study and original research culminating in the defence of a thesis. After consultation with the Associate Dean, Graduate Education, a committee will be appointed to plan and arrange the student's coursework and research programs, approve the course of study, and monitor progress as part of an annual report to the Associate Dean for approval and continuance of candidacy.
- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
  - **Year 1:**
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
  - **Years 2 and 3:**
    - DEN1100Y^{0} *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE)
- In the **specialty of Prosthodontics**, complete **18.0 required FCEs and 1.0 elective FCE** as follows. Students have the option to take DEN1008H *Cone Beam CT Imaging* (Credit/No Credit; 0.25 FCE; prerequisite: DEN1007H), in addition to the total FCEs required for the specialty.

  Note: course timing may vary between years. Please contact gradstudies@dentistry.utoronto.ca for details.
  - **Year 1:**
    - DEN1007H *Oral Radiology* (0.5 FCE)
    - DEN1014H *Clinical Epidemiology and Evidence-Based Care* (0.5 FCE)
    - DEN1016H^{++} *Occlusion: Function and Dysfunction* (0.5 FCE)

PhD Program (Prosthodontics Specialty): Transfer

Transfer Requirements

- Highly qualified MSc students in the thesis option may be considered for transfer to the Dentistry PhD in the specialty of Prosthodontics. MSc students who transfer to the PhD must fulfil the admission requirements listed under the PhD program and successfully complete the transfer examination.

Program Requirements

- Students undertake a customized program, approved by an advisory committee and the Associate Dean, Graduate Education, comprising advanced study and original research culminating in the defence of a thesis. After consultation with the Associate Dean, Graduate Education, a committee will be appointed to plan and arrange students' coursework and research programs, approve the course of study, and monitor progress as part of an annual report to the Associate Dean for approval and continuance of candidacy.
- Students must successfully complete a total of **2.0 full-course equivalents (FCEs) and a thesis** as follows:
  - **Year 1:**
    - DEN1010H *Research Ethics* (Credit/No Credit; 0.5 FCE)
    - DEN1015H *Introduction to Biostatistics* (0.5 FCE)
  - **Years 2 and 3:**
    - DEN1100Y[0] *Seminars in Oral Health Sciences* (Credit/No Credit; 1.0 FCE)
- In the **specialty of Prosthodontics**, complete **18.0 required FCEs and 1.0 elective FCE** as follows. Students have the option to take DEN1008H *Cone Beam CT Imaging* (Credit/No Credit; 0.25 FCE; prerequisite: DEN1007H), in addition to the total FCEs required for the specialty.
  - **Year 1:**
    - DEN1007H *Oral Radiology* (0.5 FCE)
    - DEN1014H *Clinical Epidemiology and Evidence-Based Care* (0.5 FCE)
    - DEN1016H[++] *Occlusion: Function and Dysfunction* (0.5 FCE)
    - DEN1017H[++] *Temporomandibular Disorders* (0.5 FCE)
    - DEN1041Y *Prosthodontics I: Prosthodontic Treatment Planning and Case Presentations* (1.0 FCE)
    - DEN1042Y *Prosthodontics II: Key Concepts in Prosthodontics and Laboratory Management* (1.0 FCE)
    - DEN1043Y *Prosthodontics III: Prosthodontic Topical Seminars* (1.0 FCE)
    - DEN1044Y *Prosthodontics IV: Prosthodontic Current Literature* (1.0 FCE)
    - DEN1045Y *Prosthodontics V: Critical Appraisal of the Literature in Prosthodontics and Surgery* (1.0 FCE)
    - DEN1046Y[0] *Clinical Prosthodontics*
    - DEN1060H *Oral Physiology: Sensory and Neuromuscular Function* (0.5 FCE)
    - DEN1090H *Inhalation and Oral Minimal and Moderate Sedation for Dental Procedures* (0.5 FCE)
    - DEN3005H *Head and Neck Anatomy* (0.5 FCE)
    - Develop a **thesis proposal**, form a **supervisory committee**, and complete an **ethics review** (if applicable)
  - **Year 2:**
    - DEN1041Y *Prosthodontics I: Prosthodontic Treatment Planning and Case Presentations* (1.0 FCE)
    - DEN1043Y *Prosthodontics III: Prosthodontic Topical Seminars* (1.0 FCE)
    - DEN1044Y *Prosthodontics IV: Prosthodontic Current Literature* (1.0 FCE)
    - DEN1045Y *Prosthodontics V: Critical Appraisal of the Literature in Prosthodontics and Surgery* (1.0 FCE)
    - DEN1046Y[0] *Clinical Prosthodontics*
    - DEN1070H[++] *Advances in Dental Materials Sciences* (0.5 FCE)
    - Continue with thesis research (RST9999Y)
    - Successfully pass a **transfer examination** to demonstrate an adequate capacity for oral health sciences research through previous work. Students will be examined on their thesis proposal and breadth of knowledge relative to the research project.
  - **Year 3:**
    - DEN1041Y *Prosthodontics I: Prosthodontic Treatment Planning and Case Presentations* (1.0 FCE)
    - DEN1043Y *Prosthodontics III: Prosthodontic Topical Seminars* (1.0 FCE)
    - DEN1044Y *Prosthodontics IV: Prosthodontic Current Literature* (1.0 FCE)
    - DEN1046Y[0] *Clinical Prosthodontics* (1.0 FCE)
    - PDE9094Y[0] *Clinical Conferences* (Credit/No Credit; 1.0 FCE)
    - Continue with thesis research (RST9999Y)
  - **Years 4 and 5:**
    - 1.0 elective FCE in clinical, epidemiological, or basic science research methodology appropriate for clinical or public health practice
    - Complete any outstanding core or field-specific coursework
    - Continue with thesis research (RST9999Y)
  - **Year 6:** Successfully submit and defend the thesis at the **Doctoral Final Oral Examination**.
- Participate in all graduate research activities of the advisor's research group.
- Present at meetings and publish original research findings in a timely fashion.
- Participate as a member of departmental and student committees as applicable.
- **Residency.** Students must be on campus and participating for the duration of their registration in the program.

Program Length

6 years

Time Limit

8 years

[0] Course that may continue over a program. The course is graded or credit is given when completed.

[++] Course is offered in alternate years.

Dentistry: Dentistry MSc, PhD Courses

Not all courses are offered every year. The Faculty of Dentistry should be consulted each session as to course offerings. Required courses vary by specialty. Please contact the Graduate Department for details.

Core Courses

DEN1001Y[0]	Seminars in Oral Health Sciences (Credit/No Credit)
DEN1010H	Research Ethics (Credit/No Credit)
DEN1015H	Introduction to Biostatistics
DEN1100Y[0]	Seminars in Oral Health Sciences (Credit/No Credit)

[0] Course that may continue over a program. Credit is given when the course is completed.

General Courses

DEN1014H	Clinical Epidemiology and Evidence-Based Care (co-requisite: DEN1015H)
DEN1022H	Investigating Pathogenic Biofilms
DEN1060H	Oral Physiology: Sensory and Neuromuscular Function
DEN1070H	Advances in Dental Materials Science
DEN1080Y	Biology of Connective Tissues
DEN1081H	Bone Interfacing Implants
DEN1098H	Reading Course in Oral Health Sciences

Courses for Students in MSc or PhD Dental Specialties

CHL5004H	Introduction to Public Health Sciences
DEN1002H	Oral Pathology
DEN1003H	Preventive Dentistry
DEN1006Y	Seminars in Dental Public Health
DEN1007H	Oral Radiology
DEN1008H (0.25 FCE)	Cone Beam CT Imaging (Credit/No Credit) (prerequisite: DEN1007H)
DEN1011Y[0]	Seminars in Advanced Oral Pathology
DEN1012Y[0]	Oral Medicine (operates as a regular, non-continuous course for students in the Oral and Maxillofacial Pathology specialty)
DEN1013Y[0]	Oral Surgical Pathology (operates as a regular, non-continuous course for students in the Periodontics specialty)
DEN1014H	Clinical Epidemiology and Evidence-Based Care
DEN1016H	Occlusion: Function and Dysfunction
DEN1017H	Temporomandibular Disorders
DEN1022H	Investigating Pathogenic Biofilms
DEN1033Y	Periodontology: Seminars and Clinics I
DEN1034Y	Periodontology: Seminars and Clinics II
DEN1035Y	Periodontology: Seminars and Clinics III
DEN1036Y[0]	Literature Review in Periodontology
DEN1037Y	Clinical Case Presentations
DEN1038Y	Biomaterials and Implant/Reconstructive Dentistry
DEN1039Y	Principles and Practice of Periodontology
DEN1041Y	Prosthodontics I: Prosthodontic Treatment Planning
DEN1042Y	Prosthodontics II: Restorative Dentistry
DEN1043Y	Prosthodontics III: Patients With the Partially Edentulous Mouth and Advanced Prosthodontic Care
DEN1044Y	Prosthodontics IV: Patients With the Fully Edentulous Mouth and Advanced Prosthodontic Care
DEN1045Y	Prosthodontics V: Critical Appraisal of the Literature
DEN1046Y[0]	Clinical Prosthodontics
DEN1051Y	Oral Epidemiology
DEN1052Y	General Anaesthesia for Medical Procedures — Pediatric

DEN1053Y	General Anaesthesia for Medical Procedures — Adult
DEN1055H	Basic Principles of Dental Anaesthesia
DEN1056Y	Basic Concepts in Clinical Medicine
DEN1060H	Oral Physiology: Sensory and Neuromuscular Function
DEN1061H	Research Practicum
DEN1062H	Pharmacology of Dental Therapeutics
DEN1063Y	Practicum in Dental Public Health
DEN1064H	Management Principles in Canadian Dental Health Organizations
DEN1070H	Advances in Dental Materials Science
DEN1071H+	Medical Anaesthesia Seminars I (Credit/No Credit)
DEN1072H+	Medical Anaesthesia Seminars II (Credit/No Credit)
DEN1073Y	Dental Anaesthesia Graduate Seminars
DEN1074Y	Foundations of Medicine as Applied to Dental Anaesthesia
DEN1075Y	General Anaesthesia for Dentistry — Pediatric
DEN1076H+	General Anaesthesia for Medical Procedures — Adult I
DEN1077H+	General Anaesthesia for Medical Procedures — Adult II
DEN1078H+	General Anaesthesia for Dental Procedures — Adult I
DEN1079H+	General Anaesthesia for Dental Procedures — Adult II
DEN1083Y	Experiences in Clinical Medicine
DEN1084H+	Experiences in Clinical Teaching I (Credit/No Credit)
DEN1085H+	Experiences in Clinical Teaching II (Credit/No Credit)
DEN1086H+	Experiences in Clinical Teaching III (Credit/No Credit)
DEN1087Y	Fundamentals of Dental Anaesthesia
DEN1088Y	Fundamentals of Dental Anaesthesia II
DEN1089Y	Fundamentals of Dental Anaesthesia III
DEN1090H	Inhalation and Oral Minimal and Moderate Sedation for Dental Procedures (Credit/No Credit)
DEN1091Y	Parenteral Moderate Sedation for Dental Procedures (Credit/No Credit)
DEN1094Y	Advanced Oral Radiology I (co-requisite: DEN1007H)
DEN1095Y	Advanced Oral Radiology II (prerequisite: DEN1094Y)
DEN1096Y	Advanced Oral Radiology III (prerequisite: DEN1095Y)
DEN2001Y	Orthodontics 1: Advanced Orthodontic Diagnosis and Treatment Planning
DEN2002Y	Orthodontics 2: Biomechanics Orthodontic Technique and Practice Administration
DEN2003Y	Orthodontics 3: Orthodontic Technique and Clinical Practice
DEN2004Y	Orthodontics 4: Interceptive Orthodontics
DEN2005Y	Surgical Orthodontics
DEN2006Y	Facial Growth and Facial Analysis
DEN2007Y	Craniofacial Anomalies
DEN2008Y	Craniofacial Anatomy and Osteology
DEN2009H	Classic Theories of Craniofacial Growth
DEN2010H	Tissue Reaction to Orthodontic and Orthopedic Forces
DEN2011Y	Craniofacial Morphology and Development
DEN3001Y	Oral and Maxillofacial Surgery 1: The Physiologic Basis of Disease
DEN3002Y	Oral and Maxillofacial Surgery 2: Principles and Practice of Oral and Maxillofacial Surgery
DEN3003Y	Oral and Maxillofacial Surgery 3: Evidence-Based Literature Reviews in Oral and Maxillofacial Surgery
DEN3004Y	Oral and Maxillofacial Surgery 4: Applied Surgical Anatomy of the Head and Neck
DEN3005H	Head and Neck Anatomy
DEN4001Y0	Pediatric Dentistry 1: Theoretical Pediatric Dentistry
DEN4002Y0	Pediatric Dentistry 2: Journal Review
DEN4003Y	Pediatric Dentistry 3: Facial and Dental Growth and Development in Pediatric Dentistry
DEN4004H	Pediatric Dentistry 4: Child Behaviour Management
DEN4005Y	Pediatric Dentistry 5: Clinical Pediatric Dentistry
DEN4006Y	Pediatric Dentistry 6: Oral and Maxillofacial Surgery as Applied to Pediatric Dentistry
DEN4007H	Pediatric Dentistry 7: Therapy and Trauma
DEN4008Y0	Pediatric Orthodontics
DEN4009Y	Pediatrics
DEN4010Y	Pediatric Medicine and Hospital Dentistry

DEN4011Y	Conscious Sedation and Anaesthesia in Pediatric Dentistry
DEN4012Y	Clinical Pediatric Dentistry I (Credit/No Credit) (co-requisite: DEN1090H)
DEN4013Y	Clinical Pediatric Dentistry II (Credit/No Credit) (co-requisite: DEN4012Y)
DEN4014Y	Clinical Pediatric Dentistry III (Credit/No Credit) (co-requisite: DEN4013Y)
DEN5001Y	Graduate Endodontics Case Presentations
DEN5002Y	Graduate Endodontics Topical Literature
DEN5003Y	Graduate Endodontics Current Literature
DEN5004Y[0]	Single Tooth Replacements with Implant-Supported Prosthesis
DEN5005H[+]	Introduction to Graduate Endodontics
LMP1300Y	General and Special Pathology
PDE9091Y	Endodontic Clinic
PDE9094Y[0]	Clinical Conferences (Credit/No Credit)
RST9999Y	Research/Thesis

[0] Course that may continue over a program. The course is graded or credit is given when completed.

MA and PhD

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Diaspora and Transnational Studies
  - Drama, Theatre and Performance Studies, MA, PhD
- Jewish Studies
  - Drama, Theatre and Performance Studies, MA, PhD
- Knowledge Media Design
  - Drama, Theatre and Performance Studies, MA, PhD
- Sexual Diversity Studies
  - Drama, Theatre and Performance Studies, MA, PhD
- South Asian Studies
  - Drama, Theatre and Performance Studies, MA, PhD
- Women and Gender Studies
  - Drama, Theatre and Performance Studies, MA, PhD

Overview

The Centre for Drama, Theatre and Performance Studies offers graduate programs leading to the **Master of Arts** and **Doctor of Philosophy** degrees. The centre's own core courses focus on the program fields of dramaturgy, theatre history, and theory of drama. Within the parameters of these fields, the centre supports research in such areas as performance analysis and reception; Canadian, American, international, and intercultural theatre; Elizabethan and Restoration staging practices; historiography and performance; acting and modern staging theories and practices; performance aesthetics and politics; as well as play and project development.

A new aspect in the curriculum focuses on the impact of digital culture on theatre practice and research. Through affiliations with other graduate units, students may also take courses in drama, theatre, and performance from other departments, centres, and institutes across the University. Graduate students build on the foundation that would normally be laid in undergraduate studies with a concentration in theatre, drama, and performance studies.

Performance practice is an integral part of graduate work in the centre and it takes place, for the most part, at the Robert Gill Theatre and the Luella Massey Studio Theatre.

For more information on application details, courses and faculty members, visit the departmental website.

Drama, Theatre and Performance Studies: Drama, Theatre and Performance Studies MA

Master of Arts

Program Description

The graduate program of the Centre for Drama, Theatre and Performance Studies is an interdisciplinary program that intersects research in the fields of drama, theatre and performance studies including research in dramatic literature, cross-cultural theory and histories of theatre and performance, conceptual and applied models of dramaturgy and methodologies of practice-based research. Graduating students will be well equipped to pursue doctoral studies, serve as innovative leaders in cultural institutions and the performing arts, or become creative entrepreneurs.

Based on faculty research, we offer support for studies in Canadian theatre; Indigenous and East Asian theatre; dance and physical theatre; popular theatre; cross-cultural communication through performance and media; studies of experimental and avant-garde theatre in North America, Asia, and Europe; early modern theatre and archival studies; queer and feminist performance theory, ethics, and equity in theatre and performance; theatre and globalization; and digital humanities in performance. In addition to courses in the program, students are encouraged to take advantage of cross-listed courses and research opportunities across the humanities, sciences and social sciences. Bi-linguality or multi-linguality is an asset as well as creative artistic experience and a developed level of digital literacy.

Students entering the MA program can choose between the coursework-only option and thesis-based option. Applicants interested in the part-time MA option should contact the Associate Director (graduate) to obtain specific information prior to application.

Minimum Admission Requirements

- Applicants are considered under the General Regulations of the School of Graduate Studies. Admissions are selective; possession of minimum qualifications does not guarantee acceptance. Applicants must also satisfy the Centre for Drama, Theatre and Performance Studies' additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university with standing equivalent to at least a University of Toronto B+ and with a significant concentration in theatre, drama, performance, and related disciplines.
- Applications are open until late April and admission decisions are made on an ongoing basis. Applicants, in particular international applicants, are encouraged to apply early. Contact the Associate Director for further information.

Program Requirements

Coursework-Only Option

- **Coursework.** Students must complete a minimum of **4.0 full-course equivalents (FCEs)**, as approved by the Centre, as follows:
  - 1.5 FCEs in core courses, including
    - DRA1001H *History and Historiography in Drama, Theatre and Performance Studies* (0.5 FCE)
    - DRA1002H *Graduate Laboratory in Drama, Theatre and Performance Studies* (0.5 FCE)
    - DRA1003H *Introduction to Drama, Theatre and Performance Studies* (0.5 FCE)
  - 2.5 FCEs in electives.
- The Centre may prescribe certain courses in the individual programs of MA students.

Thesis-Based Option

- Students must complete a minimum of **4.0 full-course equivalents (FCEs)**, as approved by the Centre, as follows:
  - 1.5 FCEs in core courses, including
    - DRA1001H *History and Historiography in Drama, Theatre and Performance Studies* (0.5 FCE)
    - DRA1002H *Graduate Laboratory in Drama, Theatre and Performance Studies* (0.5 FCE)
    - DRA1003H *Introduction to Drama, Theatre and Performance Studies* (0.5 FCE)
  - 1.5 FCEs in electives.
  - 1.0 FCE: DRA1004Y *MA Thesis* under the supervision of the course instructor.
- The Centre may prescribe certain courses in the individual programs of MA students.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

Drama, Theatre and Performance Studies: Drama, Theatre and Performance Studies PhD

Doctor of Philosophy

Program Description

The graduate program of the Centre for Drama, Theatre and Performance Studies is an interdisciplinary program that intersects research in the fields of drama, theatre and performance studies including research in dramatic literature, cross-cultural theory and histories of theatre and performance, conceptual and applied models of dramaturgy and methodologies of practice-based research. Graduating students will be well equipped to pursue academic careers, serve as innovative leaders in cultural institutions and the performing arts, or become creative entrepreneurs.

Based on faculty research, support is offered for studies in Canadian theatre; Indigenous and East Asian theatre; dance and physical theatre; popular theatre; cross-cultural communication through performance and media; studies of experimental and avant-garde theatre in North America, Asia, and Europe; early modern theatre and archival studies; queer and feminist performance theory, ethics, and equity in theatre and performance; theatre and globalization; and digital humanities in performance. In addition to courses in the program, students are encouraged to take advantage of cross-listed courses and research opportunities across the humanities, sciences, and social sciences. Bilinguality or multi-linguality is an asset as well as creative artistic experience and a developed level of digital literacy.

Applicants may be accepted into the PhD program via one of two routes: 1) following completion of an MA degree or 2) direct entry with a BA degree. The doctoral program is not available as a part-time option. The direct-entry option is a rare exception to the rule; interested applicants interested should contact the Associate Director (graduate) to obtain specific information prior to application.

PhD Program

Minimum Admission Requirements

- Applicants for admission to the Centre for Drama, Theatre and Performance Studies are considered under the General Regulations of the School of Graduate Studies. Admissions are selective; possession of minimum qualifications does not guarantee acceptance. Applicants must also satisfy the Centre's additional admission requirements stated below.
- Applications are open until late April and admission decisions are made on an ongoing basis. Applicants, in particular international applicants, are encouraged to apply early. Contact the Associate Director for further information.
- Applicants with a **master of arts degree**: an MA in Drama, Theatre and Performance Studies or the equivalent from a recognized university, must have a standing equivalent to at least a University of Toronto A–. Applicants who have taken the MA through this Centre must be recommended for further study by the instructors whose courses they have taken. Applicants holding the MA of this University in another subject or its equivalent from another university will be considered for admission to the PhD program in light of their previous work and its relation to the Centre's requirements; additional coursework may be required.
- Applicants must arrange two reference letters that address specifically their academic skills and research potential. Admission will be conditional upon satisfactory recommendation.
- Applications must be accompanied by a statement of research intent (up to 5 pages plus bibliography), writing sample (15 pages plus bibliography), and curriculum vitae (CV).

Program Requirements

- **Coursework**. Students must complete **4.0 approved full-course equivalents (FCEs)** with an average standing of at least A–, including:
  - DRA1011H *Sources and Concepts in Drama, Theatre, and Performance Studies I* (0.5 FCE)
  - DRA1012H *Sources and Concepts in Drama, Theatre, and Performance Studies II* (0.5 FCE)
  - DRA1013H *Modelling New Scholarship in Drama, Theatre, and Performance Studies* (0.5 FCE)
  - DRA1014H *Teaching and Learning in Drama, Theatre, and Performance Studies* (0.5 FCE)
  - DRA5002H *Research Development in Drama, Theatre, and Performance Studies* (0.5 FCE).
- Demonstrate **reading knowledge of a language** other than English by passing an approved language examination no later than the end of Year 2. Students may also be asked to qualify in other program-related languages.
- Pass the **field examination** at the end of Year 2.
- Pass the **prospectus defence** at the beginning of Year 3.
- Present a **thesis** on an approved topic embodying the results of original investigation which shall be judged to constitute a significant contribution to the knowledge of the field.
- Pass an **oral examination** on the subject of the thesis.

Program Length

4 years (some students may take longer to complete the program)

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants for admission to the Centre for Drama, Theatre and Performance Studies are considered under the General Regulations of the School of Graduate Studies. Admissions are selective; possession of minimum qualifications does not guarantee acceptance. Applicants must also satisfy the Centre's additional admission requirements stated below.
- Applications received after January 15 may be too late for consideration. Contact the Associate Director for further information.
- Applicants with a **bachelor of arts degree**: exceptional students may be admitted to the PhD program (direct entry) from an appropriate BA from a recognized university with a minimum overall average equivalent to a University of Toronto A–. Applicants who do not qualify for direct entry into the PhD will be considered for the MA program.
- Applicants must arrange two reference letters, preferably from undergraduate instructors familiar with the applicant's academic work, that address specifically their academic skills and research potential. Admission will be conditional upon satisfactory recommendation.
- Applications must be accompanied by a statement of research intent (up to 5 pages plus bibliography), writing sample (15 pages plus bibliography), and curriculum vitae (CV).

Program Requirements

- **Coursework**. Students must complete **7.0 full-course equivalents (FCEs)** with an average standing of at least A–, including:
  - DRA1011H *Sources and Concepts in Drama, Theatre, and Performance Studies I* (0.5 FCE)
  - DRA1012H *Sources and Concepts in Drama, Theatre, and Performance Studies II* (0.5 FCE)
  - DRA1013H *Modelling New Scholarship in Drama, Theatre, and Performance Studies* (0.5 FCE)
  - DRA1014H *Teaching and Learning in Drama, Theatre, and Performance Studies* (0.5 FCE)
  - DRA5002H *Research Development in Drama, Theatre, and Performance Studies* (0.5 FCE).
- Must maintain an A– average in their first 3.0 FCEs in order to continue in the program.
- Direct-entry students must take MA-level required courses based on consultations with the Director and the Associate Director, Graduate.
- With approval, may elect to transfer to the MA after the first year of study. Work completed in the PhD program will be credited towards the MA.
- Demonstrate **reading knowledge of a language** other than English by passing an approved language examination no later than the end of Year 2. Students may also be asked to qualify in other program-related languages.
- Pass the **field examination** at the end of Year 3.
- Pass the **prospectus defence** at the beginning of Year 4.
- Present a **thesis** on an approved topic embodying the results of original investigation which shall be judged to constitute a significant contribution to the knowledge of the field.
- Pass an **oral examination** on the subject of the thesis.

Program Length

5 years

Time Limit

7 years

Drama, Theatre and Performance Studies: Drama, Theatre and Performance Studies MA, PhD Courses

Not all courses listed will be offered every year. Registrants are advised to confirm course offerings by consulting the Centre's website, updated periodically through mid-summer, and by communicating with the Associate Director.

Core Program

DRA1001H	History and Historiography in Drama, Theatre, and Performance Studies
DRA1002H	Graduate Laboratory in Drama, Theatre, and Performance Studies
DRA1003H	Introduction to Drama, Theatre, and Performance Studies
DRA1004Y	MA Thesis
DRA1011H	Sources and Concepts in Drama, Theatre, and Performance Studies I
DRA1012H	Sources and Concepts in Drama, Theatre, and Performance Studies II
DRA1013H	Modelling New Scholarship in Drama, Theatre, and Performance Studies
DRA1014H	Teaching and Learning in Drama, Theatre, and Performance Studies
DRA1105H	Performing History
DRA3901H	Topics in Theatre, Drama, and Performance
DRA3902H	Topics in Theatre, Drama, and Performance
DRA3903H	Topics in Theatre, Drama, and Performance
DRA3904H	Topics in Theatre, Drama, and Performance
DRA3905H	Topics in Theatre, Drama, and Performance
DRA3906H	Topics in Theatre, Drama, and Performance
DRA3907H	Topics in Theatre, Drama, and Performance
DRA3908H	Topics in Theatre, Drama, and Performance
DRA4031H	Studies in Canadian Drama and Theatre

DRA4090Y	Directed Reading/Theatre Research
DRA4091H	Directed Reading/Theatre Research
DRA4092H	Directed Reading
DRA4093H	Directed Reading
DRA5001H	The Disciplines of Drama, Theatre, and Performance Studies: Research Methods
DRA5002H	Research Development in Drama, Theatre, and Performance Studies (Credit/No Credit)

Cross-Listed Courses

The Centre for Drama, Theatre and Performance Studies also cross-lists courses offered by other graduate units of the University of Toronto. A listing of approved courses, available during the academic year, appears on the Centre's website, which is updated in mid-summer. Students requesting courses from other units may be subjected to quotas and/or wait lists. Language and literature departments do not always provide courses in English translation. Confirm all course information — including date, time, location — with the appropriate unit as well as with the centre's Graduate Administrator.

MASc, MSc, and PhD

Collaborative Specializations

The following collaborative specialization is available to students in participating degree programs as listed below:

- Environmental Studies
  - Earth Sciences, MASc, MSc, PhD

Overview

The Department of Earth Sciences at the University of Toronto has a venerable 165-year tradition of research and education in the geosciences. Rankings place U of T at the very top in the geosciences in Canada and among the very best institutions globally. The Department of Earth Sciences is internationally regarded for research in fundamental geoscience, having given rise to major advances in ore deposits geology, geophysics, Precambrian geology, marine geology, Quaternary geology, and sedimentary basin analysis.

Current education in Earth Sciences at the University of Toronto continues the tradition of excellence. Students have access to a wide range of state-of-the-art laboratories and expert knowledge fostering cutting-edge research in almost all areas of Earth Sciences.

Earth Sciences: Earth Sciences MASc

Master of Applied Science

Program Description

Students perform a two-year, focused research project in a broad range of topics in the earth sciences. Students may also undertake studies in interdisciplinary areas by arrangement with other departments such as Chemistry, Civil Engineering, Ecology and Evolutionary Biology, Materials Science and Engineering, Physics, and the School of the Environment.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School Graduate Studies. Applicants must also satisfy the Department of Earth Sciences' additional admission requirements stated below.
- A four-year BSc or BASc degree, or its equivalent, from a recognized university.
- High academic standing, equivalent to a B or higher (equivalent to a 3.0 on a 4-point scale) at the University of Toronto, normally demonstrated by the average grade in the final two years.
- The department has no formal foreign language requirements. Students proceeding by thesis to any degree are expected to become familiar with the literature of their subjects, in whatever language it is written.

Program Requirements

- **Coursework.** Normally, complete **2.0 full-course equivalents (FCEs)** as follows:
  - ESS1101H *Graduate Seminars in Geology* (0.5 FCE);
  - one of the six breadth courses (0.5 FCE): ESS2222H, ESS2302H, ESS2303H, ESS2304H, ESS2704H, or ESS2708H; and
  - 1.0 FCE of elective courses.
- A **research thesis**.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Earth Sciences: Earth Sciences MSc

Master of Science

Program Description

Students conduct research in a broad range of topics in the earth sciences. Students may also undertake studies in interdisciplinary areas by arrangement with other departments such as Chemistry, Civil Engineering, Ecology and Evolutionary Biology, Materials Science and Engineering, Physics, and the School of the Environment.

There are two streams: a) the Doctoral-Stream (also known as Research-Based) Master's, which involves a one-year research project that culminates in a research report (shorter than a formal thesis) and a presentation; and b) the All-Course Master's Program.

The program can be taken on a full-time or part-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Earth Sciences' additional admission requirements stated below.
- A four-year BSc or BASc degree, or its equivalent, from a recognized university.
- High academic standing, equivalent to a B or higher (equivalent to a 3.0 on a 4-point scale) at the University of Toronto, normally demonstrated by the average grade in the final two years.
- The department has no formal foreign language requirements. Students proceeding by thesis to any degree are expected to become familiar with the literature of their subjects, in whatever language it is written.

Program Requirements

All-Course Option

- Students are normally required to complete 5.0 full-course equivalents (FCEs) as follows:
  - ESS1101H *Graduate Seminars in Geology* (0.5 FCE);
  - ESS3608H *All-Course Research Project* (0.5 FCE);
  - one of the six breadth courses (0.5 FCE): ESS2222H, ESS2302H, ESS2303H, ESS2304H, ESS2704H, or ESS2708H;
  - 3.5 FCEs of elective courses.
- To encourage breadth, the department will permit students to substitute electives with equivalent non-earth science courses.

Doctoral-Stream Option

- Students are normally required to complete 3.5 FCEs as follows:
  - ESS1101H *Graduate Seminars in Geology* (0.5 FCE);
  - ESS3603Y+ *Research Project* (1.0 FCE);
  - ESS3601Y+ *Research Presentation* (1.0 FCE);

  - one of the six breadth courses (0.5 FCE): ESS2222H, ESS2302H, ESS2303H, ESS2304H, ESS2704H, or ESS2708H; and
  - 0.5 FCE of elective courses.
- To encourage breadth, the department will permit students to substitute electives with equivalent non-earth science courses.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Earth Sciences: Earth Sciences PhD

Doctor of Philosophy

Program Description

PhD students carry out a program of original research and perform a thesis defence. Students may also undertake studies in interdisciplinary areas by arrangement with other departments such as Chemistry, Civil Engineering, Ecology and Evolutionary Biology, Materials Science and Engineering, Physics, and the School of the Environment.

Applicants may enter the PhD program via one of three routes: 1) following completion of an MSc degree; 2) transfer from the University of Toronto MSc program; or 3) direct entry following completion of a bachelor's degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Earth Sciences' additional admission requirements stated below.
- An appropriate, research-oriented MSc degree or its equivalent from a recognized university.
- High academic standing equivalent to a University of Toronto B+ or higher (equivalent to a 3.3 on a 4-point scale) in previous degrees.
- The department has no formal foreign language requirements. Students proceeding by thesis to any degree are expected to become familiar with the literature of their subjects, in whatever language it is written.

Program Requirements

- Preparation of a **research thesis** constituting a significant contribution to the research area.
- **Coursework.** Students are required to complete **1.0 full-course equivalent (FCE)** as follows:
  - one of the six breadth courses (0.5 FCE): ESS2222H, ESS2302H, ESS2303H, ESS2304H, ESS2704H, or ESS2708H; and
  - an additional 0.5 elective FCE. The additional 0.5 FCE may be taken in departments other than Earth Sciences with the approval of the student's advisory committee.
- A reduction in the number of required courses may be granted for students who have previously undertaken graduate studies in the appropriate areas. Recommendations must be made by a student's advisory committee for consideration and approval by the department's Graduate Affairs Committee.
- In all cases, the student's supervisory committee reserves the right to assign additional courses if they feel that the student is deficient in a subject area essential to the research.

Program Length

4 years

Time Limit

6 years

PhD Program (Transfer)

Transfer Requirements

- A four-year BSc or BASc degree, or its equivalent, from a recognized university. High academic standing during undergraduate study equivalent to an A– or higher (equivalent to a 3.7 on a 4-point scale) at the University of Toronto, normally demonstrated by the average grade in the final two years.
- Students are normally expected to complete the MSc degree before proceeding to the PhD, but exceptions may be made when the student has the appropriate research experience. Normal departmental rules for the completion of the PhD apply (see the departmental website). Students who transfer from the MSc to the PhD will not receive the MSc degree.

Program Requirements

- Preparation of a **research thesis** constituting a significant contribution to the research area.
- **Coursework.** Students are required to complete a total of **1.5 full-course equivalents (FCEs)** as follows:
  - ESS1101H *Graduate Seminars in Geology* (0.5 FCE);

- one of the six breadth courses (0.5 FCE): ESS2222H, ESS2302H, ESS2303H, ESS2304H, ESS2704H, or ESS2708H; and
- an additional 0.5 elective FCE. The additional 0.5 FCE may be taken in departments other than Earth Sciences with the approval of the student's advisory committee.

- A reduction in the number of required courses may be granted for students who have previously undertaken graduate studies in the appropriate areas. Recommendations must be made by a student's advisory committee for consideration and approval by the department's Graduate Affairs Committee.

Program Length

5 years

Time Limit

7 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Earth Sciences' additional admission requirements stated below.
- A four-year BSc or BASc degree, or its equivalent, from a recognized university.
- High academic standing equivalent to an A– or higher (equivalent to a 3.7 on a 4-point scale) at the University of Toronto, normally demonstrated by the average grade in the final two years.
- The department has no formal foreign language requirements. Students proceeding by thesis to any degree are expected to become familiar with the literature of their subjects, in whatever language it is written.

Program Requirements

- Preparation of a **research thesis** constituting a significant contribution to the research area.
- **Coursework.** Students are required to complete a total of **1.5 full-course equivalents (FCEs)** as follows:
  - ESS1101H *Graduate Seminars in Geology* (0.5 FCE);
  - one of the six breadth courses (0.5 FCE): ESS2222H, ESS2302H, ESS2303H, ESS2304H, ESS2704H, or ESS2708H; and
  - an additional 0.5 elective FCE. The additional 0.5 FCE may be taken in departments other than Earth Sciences with the approval of the student's advisory committee.
- A reduction in the number of required courses may be granted for students who have previously undertaken graduate studies in the appropriate areas. Recommendations must be made by a student's advisory committee for consideration and approval by the department's Graduate Affairs Committee.
- In all cases, the student's supervisory committee reserves the right to assign additional courses if they feel that the student is deficient in a subject area essential to the research.

East Asian Studies

East Asian Studies: Introduction

Faculty Affiliation

Arts and Science

Degree Programs

East Asian Studies

MA and PhD

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Contemporary East and Southeast Asian Studies
  - East Asian Studies, MA
- Food Studies
  - East Asian Studies, MA, PhD
- Sexual Diversity Studies
  - East Asian Studies, MA, PhD
- South Asian Studies
  - East Asian Studies, MA, PhD
- Women and Gender Studies
  - East Asian Studies, MA, PhD

Overview

The Department of East Asian Studies has a long, rich history at the University of Toronto as a centre for research and teaching on the humanities of East Asia, past and present. Faculty members specialize in social and cultural history, literature, philosophy, religion, language, art, film and visual culture. They are committed to the innovative pursuit of knowledge across regional, temporal and disciplinary divides. Many hold joint appointments with various departments, centres and collaborative specializations throughout the university.

Students and faculty in the department have access to a wide array of resources to support their research and learning. The Cheng Yu Tung East Asian Library holds more than 500,000 volumes in East Asian languages, making it a leading research collection in North America. The Royal Ontario Museum houses six separate galleries on the arts and artifacts of East Asia. The department and the Asian Institute host a variety of lecture series and workshops. The university campus is located in downtown Toronto, home to multiple thriving Asian communities.

East Asian Studies: East Asian Studies MA

Master of Arts

Program Description

East Asian Studies offers three tracks through its MA program: 1) MA through coursework, 2) MA with Major Research Paper (MRP), and 3) MA with thesis. It is possible to switch between the three tracks as long as all requirements are fulfilled.

Applicants should consult the department's website for details on the MA program, applications, course offerings, and profiles of the graduate faculty.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of East Asian Studies' additional admission requirements stated below.
- Successful completion of an appropriate bachelor's degree from a recognized university with a major in East Asian studies and at least a B+ standing in the final year.
- Applicants without a major in East Asian studies may also be considered, provided they demonstrate sufficient scholarly interest and academic preparation in East Asian studies.
- Statement of approximately 500 words (two pages) setting out the student's main fields of interest and proposed course of study.
- Two letters of recommendation from scholars who have knowledge of previous academic work.
- Programs are based on the study of original texts. This presupposes knowledge of the relevant languages.
- A 10- to 15-page sample of the applicant's academic writing in English.
- Applicants educated outside Canada whose primary language is not English, and who graduated from a university where the language of instruction and examination was not English, must provide results of an English-language proficiency examination as part of their application. Tests must have been taken within the last 24 months at the time of submission of their application. Applicants taking the Internet-based Test of English as a Foreign Language (TOEFL) must achieve a minimum score of 100/120 and 22/30 on the writing and speaking sections. Comparable scores on similar tests are also acceptable.

Program Requirements

- The program may be completed through one of three routes:
  - **Coursework:** students normally complete 4.0 full-course equivalents (FCEs) with at least 2.0 FCEs in EAS courses, including the required course EAS2020H *Critical Approaches to East Asia* (0.5 FCE).
  - **Coursework plus Major Research Paper (MRP):** the MRP must be written with the guidance of a supervisor after the completion of coursework. Normally 4.0 FCEs as follows:
    - 3.0 FCEs of coursework including at least 1.5 FCEs in EAS courses, including the required course EAS2020H *Critical Approaches to East Asia* (0.5 FCE)
    - EAS1150Y *Major Research Paper* (1.0 FCE).
  - **Coursework plus thesis:** the thesis must be written with the guidance of a supervisor after the completion of coursework. Normally 4.0 FCEs as follows:
    - 3.0 FCEs of coursework including at least 1.5 FCEs in EAS courses, including the required course EAS2020H *Critical Approaches to East Asia* (0.5 FCE)
    - EAS1250Y *MA Thesis* (1.0 FCE).
- Courses are selected in consultation with the Coordinator of Graduate Studies.
- Students are encouraged to continue with necessary language study, but language courses are not included in the FCEs.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

East Asian Studies: East Asian Studies PhD

Doctor of Philosophy

Program Description

The PhD program is a research degree that prepares students to teach and research in the area of East Asian Studies. The program consists of course work, language study, comprehensive exams, a dissertation prospectus, writing of a dissertation, and a final oral examination on the dissertation.

Applicants should consult the department's website for details on the PhD program, applications, course offerings, and profiles of the graduate faculty.

Applicants may enter the PhD program via one of two routes: 1) following completion of an appropriate MA degree or 2) direct entry after completing a BA degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of East Asian Studies' additional admission requirements stated below.

- Normally, completion of the MA program in the Department of East Asian Studies, or its equivalent from a recognized university, with an average grade of at least A–.
- Statement of approximately 500 words (two pages) setting out the student's main fields of interest and proposed course of study.
- Three letters of recommendation from scholars who have knowledge of previous academic work.
- Programs are based on the study of original texts. This presupposes knowledge of the relevant languages.
- A 10- to 15-page sample of the applicant's academic writing in English.
- Applicants educated outside Canada whose primary language is not English, and who graduated from a university where the language of instruction and examination was not English, must provide results of an English-language proficiency examination as part of their application. Tests must have been taken within the last 24 months at the time of submission of their application. Applicants taking the Internet-based Test of English as a Foreign Language (TOEFL) must achieve a minimum score of 100/120 and 22/30 on the writing and speaking sections. Comparable scores on similar tests are also acceptable.

Program Requirements

- **Coursework**. Students must successfully complete a total of **4.0 non-language full-course equivalents (FCEs)**, including at least 2.0 FCEs in EAS courses, to be selected in consultation with the Coordinator of Graduate Studies. 2.0 FCEs must be completed in Year 1, with an average grade of at least A–. The remaining courses are normally completed by the end of Year 2, maintaining an average of at least A–.
  - EAS2020H *Critical Approaches to East Asia* is a required course if not taken previously. If EAS2020H has previously been taken, students are required to take an additional 0.5 FCE.
  - Students are permitted to take some of their courses in other departments.
- A **comprehensive qualifying examination**, undertaken with the guidance of a supervisory committee, must be taken by November 30 of Year 3. The committee will provide the student with three questions (in a Major, Minor, and Adjacent field), for which the student must provide written answers within seven days. Within one week after submitting the answers, the student will meet with the committee to provide an oral defence of the answers. The committee will decide whether the student has passed or failed in each of the three fields on the basis of the written answers and oral defence taken together. If the student fails the Major field, he or she will be given one more chance to pass an entirely new examination, within three months of the first attempt. If the student passes the Major field but fails either one or both of the Minor and Adjacent fields, then he or she will be given one more chance to take an examination consisting of new questions in the fields failed, within six weeks of the first attempt. Third attempts are not permitted.
- An appropriate level of proficiency in at least one **language** (other than English) relevant to the student's areas of study must be demonstrated by November 30 of Year 3; the language(s), level of proficiency, and method of evaluation are to be determined by the Coordinator of Graduate Studies, in consultation with the student's supervisor. Students will take a language placement test (or multiple tests, depending on the area of study) at the beginning of their program. Upon receiving the placement result, students must meet with their supervisor. If the appropriate level of proficiency has not been demonstrated, the student and their supervisor will devise a plan for achieving proficiency by November 30 of Year 3. The plan will be approved by the Coordinator of Graduate Studies.
- Within one to three months after completing the comprehensive examination, students are required to produce a **dissertation prospectus** to be approved by their supervisory committee. The committee will meet to consider the dissertation prospectus and provide the student with feedback. The student will make the revisions and submit the prospectus to his/her supervisor for final approval, which must be given by the end of the student's third year. After the dissertation prospectus is approved, the student advances to candidacy.
- After completing all of the above requirements, students are required to produce a **doctoral dissertation** with the guidance of their supervisory committee. The completed dissertation must be defended at a Doctoral Final Oral Examination.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of East Asian Studies' additional admission requirements stated below.
- Admission to the PhD program normally requires completion of the MA program in the Department of East Asian Studies, or its equivalent from a recognized university, with an average grade of at least A–. However, departmental assessment may also permit registration directly from a BA degree in the most exceptional cases where, for instance, there is a very high grade point average or a well-documented demonstration of capacity for original research.
- Statement of approximately 500 words (two pages) setting out the student's main fields of interest and proposed course of study.
- Three letters of recommendation from scholars who have knowledge of previous academic work.
- Programs are based on the study of original texts. This presupposes knowledge of the relevant languages.
- A 10- to 15-page sample of the applicant's academic writing in English.
- Applicants educated outside Canada whose primary language is not English, and who graduated from a university where the language of instruction and examination was not English, must provide results of an English-language proficiency examination as part of their

application. Tests must have been taken within the last 24 months at the time of submission of their application. Applicants taking the Internet-based Test of English as a Foreign Language (TOEFL) must achieve a minimum score of 100/120 and 22/30 on the writing and speaking sections. Comparable scores on similar tests are also acceptable.

Program Requirements

- **Coursework**. Students must successfully complete a total of **4.0 non-language full-course equivalents (FCEs)**, including at least 2.0 FCEs in EAS courses, to be selected in consultation with the Coordinator of Graduate Studies. 2.0 FCEs must be completed in Year 1, with an average grade of at least A–. The remaining courses are normally completed by the end of Year 2, maintaining an average of at least A–.
  - EAS2020H *Critical Approaches to East Asia* (0.5 FCE) is a required course if not taken previously. If EAS2020H has previously been taken, students are required to take an additional 0.5 FCE.
  - Students are permitted to take some of their courses in other departments.
- EAS1150Y *Reading and Major Research Paper* (1.0 FCE), to be written with the guidance of and assessed by the student's academic supervisor, must be completed by August 31 of Year 2.
- A **comprehensive qualifying examination**, undertaken with the guidance of a supervisory committee, must be taken by February 28 of Year 3. The committee will provide the student with three questions (in a Major, Minor, and Adjacent field), for which the student must provide written answers within seven days. Within one week after submitting the answers, the student will meet with the committee to provide an oral defence of the answers. The committee will decide whether the student has passed or failed in each of the three fields on the basis of the written answers and oral defence taken together. If the student fails the Major field, he or she will be given one more chance to pass an entirely new examination, within three months of the first attempt. If the student passes the Major field but fails either one or both of the Minor and Adjacent fields, then he or she will be given one more chance to take an examination consisting of new questions in the fields failed, within six weeks of the first attempt. Third attempts are not permitted.
- An appropriate level of proficiency in at least one **language** (other than English) relevant to the student's areas of study must be demonstrated by November 30 of Year 3; the language(s), level of proficiency, and method of evaluation are to be determined by the Coordinator of Graduate Studies, in consultation with the student's supervisor. Students will take a language placement test (or multiple tests, depending on the area of study) at the beginning of their program. Upon receiving the placement result, students must meet with their supervisor. If the appropriate level of proficiency has not been demonstrated, the student and their supervisor will devise a plan for achieving proficiency by November 30 of Year 3. The plan will be approved by the Coordinator of Graduate Studies.
- Within one to three months after completing the comprehensive examination, students are required to produce a **dissertation prospectus** to be approved by their supervisory committee. The committee will meet to consider the dissertation prospectus and provide the student with feedback. The student will make the revisions and submit the prospectus to his/her supervisor for final approval, which must be given by the end of the student's third year. After the dissertation prospectus is approved, the student advances to candidacy.
- After completing all of the above requirements, students are required to produce a **doctoral dissertation** with the guidance of their supervisory committee. The completed dissertation must be defended at a Doctoral Final Oral Examination.

East Asian Studies: East Asian Studies MA, PhD Courses

The following courses may be offered by the department. Not all courses are offered every year. Please consult the department's website for a current course listing.

Cultural Studies

EAS1101Y	Classical Chinese I
EAS1102H	Classical Chinese II (prerequisite: EAS110Y1; exclusion: EAS458H1)
EAS1103Y	Introduction to Classical Japanese
EAS1177H	Chinese Cultural and Historical Studies
EAS1180H	Environmental Criticism
EAS1335H	Violence, Justice, the Human
EAS1336H	Memory and Trauma in Critical East Asian Historical Perspective
EAS1337H	Diaspora and Transpacific Studies
EAS1339H	Topics in Chinese Art Theories
EAS1419H	Chinese Cultural Studies Seminar: May Fourth
EAS1432H	Korean Cultural Studies Seminar
EAS1435H	Crisis, Repetition, and History
EAS1436H	Rethinking Realism in 20th Century Korea
EAS1439H	Crisis, Population, Archive
EAS1441H	Advanced Topics in Japanese Cinema
EAS1445H	On the Organic: Land and Labour Power
EAS1447H	Sound Studies and Modern Japan
EAS1449H	Future, Architecture, Japan

EAS1474H	US and Canada's Wars in East Asia
EAS1475H	Contemporary Cultural Theories
EAS1477H	Samurai Culture (exclusion: EAS477H1)
EAS2020H	Critical Approaches to East Asia
EAS2323H	Rethinking Chinese Cultural History

History

EAS1130H	Rethinking China's Cultural Revolution: History, Politics, and Theory
EAS1140Y	From Republic to People's Republic: The Chinese Revolution from 1895 to the Present
EAS1176H	Comparative Historical Socialisms in East Asia and Beyond
EAS1409H	Cities in Premodern China
EAS1411H	Art and Archaeology of Early China
EAS1412H	Special Topics in Archaeology of Ancient China
EAS1173H,Y	Modern Korean History Seminar
EAS1174Y	Rethinking Empire in East Asia
EAS1425H	Critique of Everyday Life and Capitalism
EAS1426H	Transition, Subjectivity, Revolution
EAS1446H	The Communist Hypothesis and Asia (exclusion: EAS446H1)
EAS1466H	History, Everyday Life, and North Korea
EAS1471H	Issues in Political Economy of South Korea
EAS1472H	Cold War in the Pacific
EAS1496H	History of the Chinese Book

Language

EAS1115Y	Reading Japanese for Graduate Purposes (Credit/No Credit)
EAS1263H	Classical Japanese I
EAS1301Y	Modern Standard Japanese I (Credit/No Credit)
EAS1302Y	Modern Standard Japanese II (Credit/No Credit)

Degree Programs

Ecology and Evolutionary Biology

MSc and PhD

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Environmental Studies
  - Ecology and Evolutionary Biology, PhD
- Genome Biology and Bioinformatics
  - Ecology and Evolutionary Biology, PhD

Overview

The disciplines of ecology and evolutionary biology involve complementary perspectives on biological systems. Individual and collaborative research within the department covers the range of both disciplines and often involves study and synthesis across multiple levels of organization. Professors' research interests include population/community ecology, ecosystem/landscape/evolutionary ecology, conservation biology, genetics, evolutionary genetics, genomics, molecular evolution, bioinformatics, behaviour, behaviour genetics, theoretical biology, plant biology, animal biology, taxonomy/systematics, developmental biology, anatomy, and physiology.

Strong links exist between the Department of Ecology and Evolutionary Biology (EEB) and the Royal Ontario Museum, the Centre for Global Change, and the School of the Environment. The University owns a nearby field station dedicated to ecological and evolutionary research (the Koffler Scientific Reserve). The department also has partnerships with government agencies including the Ontario Ministry of Natural Resources and Forestry that helps provide access to infrastructure, including lab facilities in Algonquin Provincial Park, funding, and long-term data sets.

Graduate students are engaged in all aspects of the departmental community including reading and discussion groups, seminars, and social events. Other activities include workshops on writing papers, giving presentations, R and Python, and finding positions — both academic and those outside of universities.

The EEB department has 60 faculty members specializing in ecology and evolution. Professors supervising graduate students are located on all three campuses of the University (St. George, Mississauga, Scarborough) as well as at the Royal Ontario Museum.

Ecology and Evolutionary Biology: Ecology and Evolutionary Biology MSc

Master of Science

Program Description

The main goal of the MSc program is to provide students with the opportunity to design, conduct, and write up a substantial independent research project. Students' projects cover the full range of topics listed in the Overview (above) and may include field work, lab work, bioinformatics, computer simulations, and/or theory. MSc students must demonstrate competence in independent research and will do research with the goal of authoring or co-authoring a scientific publication. Graduates go on to a wide range of careers including jobs in government agencies, teaching, and higher education.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Ecology and Evolutionary Biology's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university, with an average grade equivalent to a University of Toronto B+ or better in the last year of the bachelor's degree and a minimum B average in the previous year.
- Applicants will not be admitted until they have secured an agreement with a graduate faculty member to sponsor and supervise the student's research.

Program Requirements

- **Coursework.** Students must successfully complete **0.5 graduate full-course equivalent (FCE)** chosen from courses offered by the EEB department or, with the permission of the supervisor(s) and supervisory committee, offered by other U of T departments. Students should consult supervisory faculty about the most appropriate courses.
- Students must complete a **thesis** under the direction of the student's supervisor, assisted by an advisory committee, and defended at an oral examination.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F)

Time Limit

3 years full-time

Ecology and Evolutionary Biology: Ecology and Evolutionary Biology PhD

Doctor of Philosophy

Program Description

The main goal of the PhD program is to provide students with the opportunity to design, conduct, and write about a series of substantial, inter-related, independent research projects. Students' projects cover the full range of topics listed in the Overview (above) and may include field work, lab work, bioinformatics, theory, computer simulations, or some combination of these approaches.

- PhD students are expected to complete an original independent research program that makes substantial and innovative contributions to their field of research. It is expected that PhD candidates will publish a number of primary scientific papers based on their research.
- A thesis is completed under the direction of the student's supervisor(s), assisted by a supervisory (advisory) committee, and defended at an oral examination.
- The average time to completion is 5.5 years.

Applicants may enter the PhD program via one of three routes: 1) following completion of an MSc degree; 2) transfer from the University of Toronto MSc program; or 3) direct entry following completion of a BSc degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Ecology and Evolutionary Biology's additional admission requirements stated below.
- Students will be admitted only when they have made arrangements to secure a research supervisor by contacting professors in the department.
- Applicants may be accepted who already hold an MSc degree from a recognized university with a grade average equivalent to at least a University of Toronto A– during the MSc and an average of at least B+ in the last year of the bachelor's program.

Program Requirements

- **Coursework.** Students must successfully complete a total of **1.5 graduate full-course equivalents (FCEs)** (three half courses). These courses are chosen from those offered by the EEB department, or with the permission of the supervisor(s) and supervisory committee, offered by other U of T departments.
- During an **appraisal exam**, students are examined on both their mastery of concepts in ecology and evolutionary biology and a submitted research proposal. Students are examined 14 to 20 months into the program.
- Students must deliver **two public seminars** in the department based on their thesis research.
- Students must submit a **thesis** and defend it at a **Doctoral Final Oral Examination** conducted by the School of Graduate Studies.

Program Length

4 years

Time Limit

6 years

PhD Program (Transfer)

Transfer Requirements

- Applicants may be accepted first into the MSc program from a bachelor's program and, conditional upon evidence of research excellence as judged by the thesis supervisory committee, may transfer into the PhD program.
- Students must make arrangements to secure a research supervisor by contacting professors in the department.

Program Requirements

- **Coursework.** Students must successfully complete a total of **2.0 graduate full-course equivalents (FCEs)** (four half courses). These courses are chosen from those offered by the EEB department or, with the permission of the supervisor(s) and supervisory committee, offered by other U of T departments.
- Students transferring into the PhD program from the MSc may apply 0.5 graduate FCE towards the PhD course requirement.
- During an **appraisal exam**, students are examined on both their mastery of concepts in ecology and evolutionary biology and a submitted research proposal. Students are examined 14 to 26 months into the program.
- Students must deliver **two public seminars** in the department based on their thesis research.
- Students must submit a **thesis** and defend it at a **Doctoral Final Oral Examination** conducted by the School of Graduate Studies.

Program Length

5 years

Time Limit

7 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Ecology and Evolutionary Biology's additional admission requirements stated below.
- Students will be admitted only when they have made arrangements to secure a research supervisor by contacting professors in the department.
- Exceptional applicants may be accepted for direct entry into the PhD with a BSc degree, an average grade equivalent to a University of Toronto A– or better in courses in ecology and evolutionary biology, and evidence of research potential.

Program Requirements

- **Coursework.** Exceptional students admitted to the PhD program without an MSc degree must successfully complete a total of **2.0 graduate full-course equivalents (FCEs)** (four half courses). These courses are chosen from those offered by the EEB department, or with the permission of the supervisor(s) and supervisory committee, offered by other U of T departments.
- During an **appraisal exam**, students are examined on both their mastery of concepts in ecology and evolutionary biology and a submitted research proposal. Students are examined 14 to 26 months into the program.
- Students must deliver **two public seminars** in the department based on their thesis research.
- Students must submit a **thesis** and defend it at a **Doctoral Final Oral Examination** conducted by the School of Graduate Studies.

Program Length

5 years

Time Limit

7 years

Ecology and Evolutionary Biology: Ecology and Evolutionary Biology MSc, PhD Courses

Not all courses are offered every year. Please visit the Ecology and Evolutionary Biology website for a current list of course offerings including special topics courses.

Courses Offered at the Graduate Level Only

EEB1210H	Advanced Statistics
EEB1230H	Multivariate Statistics
EEB1250H	Spatial Statistics
EEB1310H	Philosophy and Methods
EEB1315H	Professional Skills Development in EEB
EEB1320H	Ecology
EEB1350H	Evolution
EEB1360H	Special Topics in Behaviour
EEB1420H	Special Topics in Ecology
EEB1423H	Special Topics: Ecology I
EEB1430H	Modelling in Ecology and Evolutionary Biology
EEB1440H	Special Topics in Evolution
EEB1445H	Special Topics: Evolution I
EEB1446H	Special Topics: Evolution II
EEB1450H	Special Topics in Ecology and Evolution A
EEB1451H	Special Topics in Ecology and Evolution B
EEB1452H	Special Topics: Evolution/Ecology Module I
EEB1453H	Special Topics: Evolution/Ecology Module II
EEB1454H	Special Topics: Evolution/Ecology Module III
EEB1455H	Special Topics: Evolution/Ecology Module IV
EEB1456H	Special Topics: Evolution/Ecology Module V

Graduate Courses With Significant Undergraduate Content

These courses will normally constitute only a minor component of the required credits.

EEB1328H	Physiological Ecology
EEB1340H	Comparative Plant Morphology
EEB1443H	Phylogenetic Principles
EEB1459H	Population Genetics
EEB1460H	Molecular Evolution
EEB1462H	Phylogenetic Systematics

Degree Programs

Economics

MA and PhD

Combined Degree Programs

- STG, Law, Juris Doctor / Economics, MA
- STG, Law, Juris Doctor / Economics, PhD

Overview

The Department of Economics at the University of Toronto is large and highly ranked. The teaching and research interests of its graduate faculty members span a wide range of subjects and cover theory, applied data analysis and econometric methodology.

The department offers both MA and PhD programs in economics. The goal of the graduate programs is to further the student's capacity for economic analysis through rigorous instruction in theory, econometrics and a wide variety of fields. The MA and PhD course and research offerings provide great diversity, breadth and scope; students can readily specialize in almost any area of interest. Additionally, students may take suitable elective courses in statistics, mathematics, computer science and other allied fields. Students benefit from Economics' close association with faculty members from related programs, such as those at the Rotman School of Management. They also benefit from the University of Toronto's excellent facilities, including the best university library in Canada.

The department's programs attract students from across Canada and all parts of the globe. Approximately 65 new MA students and 15 to 20 new PhD students are enrolled each year with total combined enrolment of approximately 150.

MA graduates find employment in their area of interest in the public, private and not-for-profit sectors. They also successfully pursue PhD programs in economics. PhD graduates obtain academic placement and employment in the public and private sectors.

The Department of Economics and the Rotman School of Management also offer a professional Master of Financial Economics (MFE) program.

Economics: Economics MA

Master of Arts

Program Description

The MA is a coursework-only program (i.e., has no thesis requirement) that may be taken on a full-time or part-time basis. It is designed for individuals who wish to work in the public, private, and not-for-profit sectors, and also for students intending to pursue a PhD in economics.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Economics' additional admission requirements stated below.
- An appropriate bachelor's degree with at least a mid-B (75%) standing in the final year of the program.
- Successful completion of full-year courses in calculus, intermediate microeconomics, intermediate macroeconomics, and statistics.
- Admission is competitive, so accepted applicants will normally have achieved a standing considerably higher than the minimum of at least a mid-B (75%) in the final year.
- All applicants who do not hold a degree from a Canadian university must submit an official Graduate Record Examination (GRE) General Test score. Applicants who hold a degree from a Canadian university are strongly encouraged to submit an official GRE General Test score. See the departmental website for details.

Program Requirements

- Successful completion of **4.5 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE mathematics and statistics course (ECO1010H);
  - 4.0 FCEs including the core courses in micro (ECO1200H), macro (ECO1100H), and econometrics (ECO1400H). Five 0.5 FCE elective courses are selected from current courses or may be graduate courses offered by another unit, provided they make a strong contribution to the student's economic training. At most two (1.0 FCE) of the five courses may be offered by another unit, and these courses must be approved by the Associate Chair, Graduate Studies. Units that offer courses that we may approve include Mathematics, Statistical Sciences, and the Rotman School of Management.
  - An MA student may be permitted to fulfil core course requirements by taking the corresponding PhD-level core courses (ECO2200H and ECO2201H for microeconomics, ECO2100H and ECO2101H for macroeconomics, or ECO2400H and ECO2401H for econometrics). To make this substitution, the student will be required to take the PhD-level ECO2010H (mathematics and statistics course), and must obtain written permission from the Associate Chair, Graduate Studies prior to starting the mathematics and statistics course in August.

Program Length

2 sessions full-time (typical registration sequence: F/W);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Economics: Economics PhD

Doctor of Philosophy

Program Description

The Department of Economics offers two PhD programs: a regular-entry program for students who have completed a master's degree in economics or a closely related field, and a direct-entry program for students with only an undergraduate degree. Both are full-time programs.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Economics' additional admission requirements stated below.
- Minimum B+ standing in an MA program in economics. Admission is competitive, so accepted applicants will normally have achieved a standing considerably higher than the minimum B+.
- A strong preparation in advanced mathematics, statistics, and economics, including successful completion of MA-level microeconomic theory, macroeconomic theory, and econometrics.
- All applicants who do not hold a degree from a Canadian university must submit an official Graduate Record Examination (GRE) General Test score. Applicants who hold a degree from a Canadian university are strongly encouraged to submit an official GRE General Test score. See the departmental website for details.

Program Requirements

- Students must maintain a minimum average of B+ throughout their **coursework** and successfully complete a total of **4.0 full-course equivalents (FCEs)** as follows:
  - **Year 1:** 3.0 FCEs, normally consisting of two half courses in each area:
    - Microeconomics (ECO2200H and ECO2201H)
    - Macroeconomics (ECO2100H and ECO2101H)
    - Econometrics (ECO2400H and ECO2401H)
  - **Year 2:** at least two half courses (1.0 FCE), including the required courses for a major field of specialization and a minor field of specialization.
    - Students must write an original paper in Year 2 and present it in the relevant workshop in the Fall session of Year 3.
    - Students must also take ECO4060Y^0 *Graduate Research Seminar* (1.0 FCE) in Year 2 and complete it by the end of Year 3.
    - Suitable PhD-level courses taken by a student in the MA program in the Department of Economics may, with the permission of the Associate Chair, Graduate Studies, fulfil a portion of the major and minor field requirements of the PhD program.
- A **thesis** based on original research.
- **General examinations**
  - Successful completion of **theory comprehensive** examinations. Students are required to take two comprehensive examinations in microeconomic and macroeconomic theory after the end of the Winter session (usually June) in Year 1 of their program. Performance on these exams is evaluated on a distinction/pass/fail basis. If a theory comprehensive examination is failed on the first attempt, it must be re-taken later in the Summer (usually in August) of the same year.
  - If a student does not obtain a minimum grade of A in every course required for their major field of specialization, or took some of the required courses during their MA in Economics program at the University of Toronto, the student is required to take a **field comprehensive examination** in their major field of specialization after the end of the Winter session in Year 2 (usually June). If the exam is failed, it must be re-taken later in the Summer (usually in August) of the same year. The major fields of specialization offered regularly are:
    - Behavioural Economics
    - Econometrics
    - Economic Development
    - Financial Economics
    - Industrial Organization
    - International Economics
    - Labour Economics
    - Macroeconomics
    - Microeconomic Theory
    - Public Economics.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Economics' additional admission requirements stated below.
- Minimum A– standing in the last two years of study in a bachelor's program in economics or a related field, such as finance, statistics, or mathematics. Because admission is competitive, accepted applicants will normally have achieved a standing considerably higher than the minimum A–.
- A strong preparation in advanced mathematics, statistics, and economics.
- All applicants who do not hold a degree from a Canadian university must submit an official Graduate Record Examination (GRE) General Test score. Applicants who hold a degree from a Canadian university are strongly

encouraged to submit an official GRE General Test score. See the departmental website for details.

Program Requirements

- Students must maintain a minimum average of B+ throughout their **coursework** and successfully complete a total of **6.0 full-course equivalents (FCEs)** as follows:
  - **Year 1:** normally two half courses in each area (3.0 FCEs), as follows:
    - Microeconomics (ECO2200H and ECO2201H)
    - Macroeconomics (ECO2100H and ECO2101H)
    - Econometrics (ECO2400H and ECO2401H)
  - **Year 2:** six half courses (3.0 FCEs), including the required courses for a major field of specialization and a minor field of specialization.
    - Students must write an original paper in Year 2 and present it in the relevant workshop in the Fall session of Year 3.
    - Students must also take ECO4060Y[0] *Graduate Research Seminar* (1.0 FCE) in Year 2 and complete it by the end of Year 3.
- A **thesis** based on original research.
- **General examinations.**
  - Successful completion of **theory comprehensive examinations**. Students must take two comprehensive examinations in microeconomic and macroeconomic theory after the end of the Winter session (usually June) in Year 1 of their program. Performance on these exams is evaluated on a distinction/pass/fail basis. If a theory comprehensive examination is failed on the first attempt, it must be re-taken later in the Summer (usually in August) of the same year.
  - If a student does not obtain a minimum grade of A in every course required for their major field of specialization, the student must take a **field comprehensive examination** in their major field of specialization after the end of the Winter session in Year 2 (usually June). If the exam is failed, it must be re-taken later in the Summer (usually in August) of the same year. The major fields of specialization offered regularly are:
    - Behavioural Economics
    - Econometrics
    - Economic Development
    - Financial Economics
    - Industrial Organization
    - International Economics
    - Labour Economics
    - Macroeconomics
    - Microeconomic Theory
    - Public Economics.

Program Length

5 years

Time Limit

7 years

[0] Course that may continue over a program. The course is graded when completed.

Economics: Economics MA, PhD Courses

Not all courses are offered every year. Please refer to the department's website for a current course list.

Preliminary Courses

ECO1010H	Mathematics and Statistics for MA and MFE Students (Credit/No Credit)
ECO2010H	Mathematics and Statistics for PhD Students (Credit/No Credit)

Core Courses in Economic Theory

ECO1100H	Economic Theory — Macro (for MA students only)
ECO1200H	Economic Theory — Micro (for MA students only)
ECO2100H	Macroeconomic Theory I
ECO2101H	Macroeconomic Theory II (prerequisite: ECO2100H)
ECO2105H	Applied Macroeconomics (co-requisites: ECO2100H and ECO2101H)
ECO2200H	Microeconomic Theory I
ECO2201H	Microeconomic Theory II (prerequisite: ECO2200H)
ECO2205H	Applied Microeconomics (co-requisites: ECO2200H and ECO2201H)

Advanced Microeconomic Theory

ECO3200H	Advanced Microeconomic Theory I (prerequisites: ECO2200H and ECO2201H)
ECO3201H	Advanced Microeconomic Theory II
ECO3202H	Topics in Microeconomic Theory
ECO3210H	Economics of Organizations and Contracts

Behavioural and Experimental Economics

ECO1250H	Topics in Behavioural Economics
ECO3250H	Behavioural Economics

Econometrics

ECO1400H	Econometrics (for MA students only)
ECO1450H	Methods for Empirical Microeconomics (exclusions: ECO439H, ECO2803H)

ECO2400H	Econometrics I
ECO2401H	Econometrics II (prerequisite: ECO1400H or ECO2400H)
ECO2404H	Empirical Applications of Economic Theory (exclusion: ECO418H)
ECO2405H	Applied Econometrics (co-requisites: ECO2400H and ECO2401H)
ECO2411H	Financial Econometrics (exclusion: ECO462H)
ECO2460H	Economic Applications of Machine Learning
ECO3400H	Topics in Econometrics
ECO3401H	Advanced Econometrics
ECO3450H	Advanced Methods for Empirical Microeconomics

Economic Development

ECO1700H	Economic Development
ECO1730H	Economic Development of China (exclusion: ECO435H)
ECO2701H	Advanced Development Economics

Economic History

ECO2750H	Topics in North American Economic History

Financial Economics

ECO1500H	Financial Economics: Asset Pricing (exclusion: ECO419H)
ECO1501H	Financial Economics: Corporate Finance
ECO1502H	Empirical Methods for Financial Economics (exclusion: ECO464H)
ECO1550H	Economics of Financial Risk Management (exclusions: ECO461H, RSM435H)
ECO1551H	Topics in Risk Management

Industrial Organization

ECO1900H	Industrial Organization and Competition Policy
ECO3900H	Industrial Organization I
ECO3901H	Industrial Organization II

International Economics

ECO1300H	International Macroeconomics
ECO1301H	International Financial Markets
ECO2302H	Networks in Trade and Macroeconomics
ECO3300H	International Trade Theory
ECO3301H	International Trade II (prerequisite: ECO3300H)
ECO3302H	Topics in International Trade
ECO3304H	International Monetary Theory

Labour Economics

ECO2802H	Economics Inside Organizations
ECO2804H	Social Economics
ECO3800H	Labour Economics I
ECO3801H	Labour Economics II

Macroeconomics

ECO1102H	Macroeconometric Models for Policy Analysis and Forecasting (exclusion: ECO416H)
ECO2104H	Quantitative Macroeconomics
ECO2107H	Monetary Theory
ECO2120H	Topics in Growth and Development
ECO3100H	Frontiers in Macroeconomics (prerequisites: ECO2100H and ECO2201H)
ECO3101H	Topics in Macroeconomic Theory
ECO3102H	Topics in Business Cycles (exclusion: ECO438H)

Public Economics

ECO2600H	Public Economics I
ECO2601H	Public Economics II
ECO2607H	Economics of Education Policy
ECO2610H	Health Economics
ECO2611H	Empirical Welfare Analysis
ECO2620H	Topics in Health Economics

Other Courses

ECO1320H	International Trade Regulation (exclusions: ECO459H and LAW285H/LAW2038H)
ECO1950H	Economic Analysis of Law
ECO1960H	Energy and Regulation (exclusion: ECO414H)

ECO2650H	Political Economy (exclusion: ECO434H)
ECO2850H	Urban and Regional Economics
ECO4050H	Special Field Reading Course[#]
ECO4051H	Special Field Reading Course#
ECO4060Y[0]	Graduate Research Seminar (Credit/No Credit)

[#] The department is normally prepared to supervise reading courses in a variety of fields. Reading courses are available only to students who have the requisite preparation and only at the discretion of faculty members.

[0] Course that may continue over a program. The course is graded when completed.

Electrical and Computer Engineering

Electrical and Computer Engineering: Introduction

Faculty Affiliation

Applied Science and Engineering

Degree Programs

Electrical and Computer Engineering

MASc

- Fields:
  - Biomedical Engineering;
  - Communications;
  - Computer Engineering;
  - Electromagnetics;
  - Electronics;
  - Energy Systems;
  - Photonics;
  - Systems Control
- Emphases:
  - Robotics;
  - Sustainable Energy

MEng

- Emphases:
  - Analytics;
  - Biomedical Engineering;
  - Communications;
  - Computer Engineering;
  - Electromagnetics;
  - Electronics;
  - Energy Systems;
  - Engineering and Globalization;
  - Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE);
  - Identity, Privacy and Security (IPS);
  - Photonics;
  - Robotics;
  - Sustainable Energy;
  - Systems Control

PhD

- Fields:
  - System Control
  - Biomedical Engineering;
  - Communications;
  - Computer Engineering;
  - Electromagnetics;
  - Electronics;
  - Energy Systems;
  - Photonics;
- Emphases:
  - Robotics;
  - Sustainable Energy

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Biomedical Engineering
  - Electrical and Computer Engineering, MASc, PhD
- Psychology and Engineering
  - Electrical and Computer Engineering, MASc, PhD

Overview

During the past few decades, we have witnessed exciting new discoveries and developments in almost every aspect of electrical and computer engineering, including microelectronics, computers, communication networks, photonics, alternative energy systems, robotics, and many others. At the intersection of computers and communications there are opportunities that are limited only by our imagination. Along with these highly visible developments, there are equally impressive achievements in building the theoretical underpinnings of the respective areas of knowledge. Graduate studies provide the highly qualified individuals who are the lifeblood of the research leading to these advances.

The Department of Electrical and Computer Engineering is engaged in the pursuit and dissemination of knowledge across a wide range of areas of engineering and applied science — from the fabrication of atomic-level structures with special optical properties, through to the technologies that have revolutionized our world, such as microelectronics, computer systems, software, and networks.

The department conducts research in the following fields of study: Biomedical Engineering, Communications, Computer Engineering, Electromagnetics, Electronics, Energy Systems, Photonics, and System Control.

Electrical and Computer Engineering: Graduate Faculty

Full Members

Aarabi, Parham - BASc, MASc, PhD
Abdelrahman, Tarek - BSc, MSc, PhD
Adve, Raviraj - BTech, PhD
Aitchison, J Stewart - BSc, PhD
Amza, Cristiana - BS, MS, PhD
Anderson, Jason Helge - BSc, MASc, PhD
Austin, Lisa - BA, BSc, LLB, MA, Chair in Law and Economics of Intellectual Property
Bardakjian, Berj - BSc, BEd, MASc, PhD
Betz, Vaughn - BSc, MS, PhD
Broucke, Mireille - BScEE, MS, PhD
Brown, Stephen - BSE, MASc, PhD
Chan Carusone, Anthony - BASc, PhD
Chapman, Margaret - PhD
Chau, Tom - PhD
Chechik, Marsha - BS, SM, PhD
Cheng, Hai-Ling - BSc, MS, PhD
Chow, Paul - BASc, MASc, PhD
Dawson, Francis - BSc, BASc, MASc, PhD
de Lara, Eyal - BS, MS, PhD
Draper, Stark - BA, PhD
Eleftheriades, George - DipIng, MSEE, PhD
Enright Jerger, Natalie - BSc, MSc, PhD
Frey, Brendan - BSc, MSc, PhD
Genov, Roman - BS, MS, PhD
Ghassemi, Marzyeh - PhD
Goel, Ashvin - BTech, MS, PhD
Gulak, Glenn - BASc, MSc, PhD
Hatzinakos, Dimitrios - DipIng, MSc, PhD
Helmy, Amr - BSc, MSc, PhD
Herman, Peter - BEng, MSc, PhD
Hooshyar, Ali - BSE, MSc, PhD
Hum, Sean - BSc, MSc, PhD, PEng
Iravani, Reza - BSc, MSc, PhD
Jacobsen, Hans-Arno - MCS, PhD
Johns, David Andrew - BASc, MASc, PhD
Kherani, Nazir - BASc, MASc, PhD
Khisti, Ashish - BASc, PhD
Kschischang, Frank - BASc, MASc, PhD
Kundur, Deepa - BASc, MASc, PhD ***(Chair and Graduate Chair)***
Kwong, Raymond - SB, SM, PhD
Lehn, Peter - BScEE, MSc, PhD
Leon-Garcia, Alberto - BS, MS, PhD
Levi, Ofer - BSc, MSc, PhD
Li, Baochun - BEng, MSc, DPhil
Liang, Ben - BS, MS, PhD
Lie, David - BASc, MS, PhD
Liebeherr, Jorg - DipIng, PhD
Liscidini, Antonio - MSEE, DE
Lo, Hoi-Kwong - BA, MA, MS, PhD
Long, Fan - PhD
Maggiore, Manfredi - MS, PhD
Mann, Steve - BSc, BASc, MSc, PhD
Mojahedi, Mohammad - BSE, MS, PhD ***(Associate Chair, Graduate Studies)***
Moshovos, Andreas - BSc, MS, PhD
Nachman, Adrian - BSc, MA, PhD
Najm, Farid - BE, MSEE, PhD
Ng, Wai Tung - BSc, MASc, PhD
Pavel, Lacra - BEng, PhD
Plataniotis, Konstantinos - DipIng, MS, PhD
Poon, Joyce - BASc, MS, PhD
Popovic, Milos - DipIng, PhD
Prodic, Aleksandar - BS, MSc, PhD
Qian, Li - BASc, MASc, PhD
Rose, Jonathan - BSc, MASc, PhD
Sargent, Edward - BEng, PhD

Electrical and Computer Engineering: Electrical and Computer Engineering MASc

Master of Applied Science

Program Description

The MASc provides students with an opportunity to pursue advanced studies in the particular area of interest and an opportunity to engage in research.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Electrical and Computer Engineering's additional admission requirements stated below.
- An appropriate bachelor's degree in electrical and computer engineering or its equivalent from a recognized university.
- High academic standing equivalent to a mid-B or better, normally demonstrated by an average grade in the final year or over senior-level courses.

Program Requirements

- Each student's program of study must receive the approval of the Department of Electrical and Computer Engineering and, in general, shall consist of a research or design project on which a thesis must be submitted.
- During Year 1, students are required to attend the ECE Colloquium and complete JDE1000H *Ethics in Research* (0.0 FCE).
- **Coursework.** Normally, completion of **2.5 graduate full-course equivalents (FCEs)** or five half courses. Students whose undergraduate preparation does not include the study of subjects deemed to be necessary for research in the chosen area will be required to complete additional courses.
- **Thesis.** This thesis shall demonstrate the student's ability to do independent work in relating, organizing, and extending existing techniques where required, and in suggesting and developing new approaches to problems in an area of applied science and engineering.
- Students have the option of completing an emphasis in Robotics or Sustainable Energy as part of their degree program. Please see details in the Electrical and Computer Engineering MASc, MEng, PhD Emphases section.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Electrical and Computer Engineering: Electrical and Computer Engineering MEng

Master of Engineering

Program Description

The MEng program is designed to provide professional training beyond the undergraduate level and to accelerate careers with specialized engineering expertise needed in business, government, and industry.

The MEng program can be taken on a full-time, extended full-time, or part-time basis.

Full-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Electrical and Computer Engineering's additional admission requirements stated below.
- An appropriate bachelor's degree in electrical and computer engineering or its equivalent from a recognized university.
- High academic standing equivalent to a mid-B or better, normally demonstrated by an average grade in the final year or over senior-level courses.

Program Requirements

- **Coursework.** Normally, completion of **4.5 graduate full-course equivalents (FCEs)** or nine half courses for applicants with adequate undergraduate preparation. At least 2.5 graduate FCEs or five half courses must be drawn from graduate courses offered by the Department of Electrical and Computer Engineering.
- Students may choose to complete an **engineering project** with an equivalent value of 1.5 FCEs. Students choosing the project option will be required to complete a total of 3.0 FCEs in addition to the project. In order to pursue the project option, the student must secure a professor who will act as the supervisor throughout the project.
- Students have the option of completing an emphasis in Analytics; Biomedical Engineering; Communications; Computer Engineering; Electromagnetics; Electronics; Energy Systems; Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); Identity, Privacy and Security (IPS); Photonics; Robotics; Sustainable Energy; or Systems Control as part of their degree program. Please see details in the Electrical and Computer Engineering MASc, MEng, PhD Emphases section.

Program Length

3 sessions (typical registration sequence: F/W/S)

Time Limit

3 years

Extended Full-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Electrical and Computer Engineering's additional admission requirements stated below.
- An appropriate bachelor's degree in electrical and computer engineering or its equivalent from a recognized university.
- High academic standing equivalent to a mid-B or better, normally demonstrated by an average grade in the final year or over senior-level courses.

Program Requirements

- Students are expected to complete the requirements in six sessions (two years) and are limited to six half courses per year and three half courses per session.
- **Coursework.** Normally, completion of **4.5 graduate full-course equivalents (FCEs)** or nine half courses for applicants with adequate undergraduate preparation. At least 2.5 graduate FCEs or five half courses must be drawn from graduate courses offered by the Department of Electrical and Computer Engineering.
- Students may choose to complete an **engineering project** with an equivalent value of 1.5 FCEs. Students choosing the project option will be required to complete a total of 3.0 FCEs in addition to the project. In order to pursue the project option, the student must secure a professor who will act as the supervisor throughout the project.
- Students have the option of completing an emphasis in Analytics; Biomedical Engineering; Communications; Computer Engineering; Electromagnetics; Electronics; Energy Systems; Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); Identity, Privacy and Security (IPS); Photonics; Robotics; Sustainable Energy; or Systems Control as part of their degree program. Please see details in the Electrical and Computer Engineering MASc, MEng, PhD Emphases section.

Program Length

6 sessions (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years

Part-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Electrical and Computer Engineering's additional admission requirements stated below.
- An appropriate bachelor's degree in electrical and computer engineering or its equivalent from a recognized university.
- High academic standing equivalent to a mid-B or better, normally demonstrated by an average grade in the final year or over senior-level courses.

Program Requirements

- Students normally complete the requirements in nine sessions (three years). They are limited to four half courses per year and two half courses per session.
- **Coursework.** Normally, completion of **4.5 graduate full-course equivalents (FCEs)** or nine half courses for applicants with adequate undergraduate preparation. At least 2.5 graduate FCEs or five half courses must be drawn from graduate courses offered by the Department of Electrical and Computer Engineering.
- Students may choose to complete an **engineering project** with an equivalent value of 1.5 FCEs. Students choosing the project option will be required to complete a total of 3.0 FCEs in addition to the project. In order to pursue the project option, the student must secure a professor who will act as the supervisor throughout the project.
- Students have the option of completing an emphasis in Analytics; Biomedical Engineering; Communications; Computer Engineering; Electromagnetics; Electronics; Energy Systems; Engineering and Globalization; Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE); Identity, Privacy and Security (IPS); Photonics; Robotics; Sustainable Energy; or Systems Control as part of their degree program. Please see details in the Electrical and Computer Engineering MASc, MEng, PhD Emphases section.

Program Length

9 sessions

Time Limit

6 years

Electrical and Computer Engineering: Electrical and Computer Engineering PhD

Doctor of Philosophy

Program Description

The PhD program is designed for exceptional individuals who intend to pursue a career in fundamental or applied research.

Applicants may enter the PhD program via one of three routes: 1) following completion of the University of Toronto master's degree in Electrical and Computer Engineering or its equivalent from a recognized university; 2) transfer from the University of Toronto MASc program; or 3) direct entry for exceptionally qualified students with an appropriate bachelor's degree from a recognized university.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Electrical and Computer Engineering's additional admission requirements stated below.
- Admission may be granted for applicants with a University of Toronto master's degree in Electrical and Computer Engineering with an overall average of at least B+, or its equivalent from a recognized university.
- The department must be satisfied of the student's ability to do advanced research before admission may be granted.

Program Requirements

- **Coursework.** Normally, students who enter the PhD with a master's degree will complete **2.5 full-course equivalents (FCEs)** not previously used for other degree credit. Students may receive a course reduction of up to 1.0 FCE depending on their PhD research needs in relation to their studies at the master's level. The number of required courses will be determined by the Associate Chair, Graduate Studies, in consultation with the PhD supervisor.
- During Year 1, each student must:
  - pass a **qualifying oral examination** in the area of research;
  - attend the ECE Colloquium;
  - complete JDE1000H *Ethics in Research* (0.0 FCE) if they have not already done so in a previous University of Toronto master's program.
- **Thesis.**
- Students have the option of completing an emphasis in Robotics or Sustainable Energy as part of their degree program. Please see details in the Electrical and Computer Engineering MASc, MEng, PhD Emphases section.

Program Length

4 years

Time Limit

6 years

PhD Program (Transfer)

Transfer Requirements

- Admission may be granted to applicants via transfer from the MASc to the PhD program, upon completion of 2.5 graduate full-course equivalents (FCEs) with an overall average of at least B+.

Program Requirements

- **Coursework.** Normally, students who transfer from the MASc to the PhD will complete **1.5 graduate FCEs**, in addition to courses completed while registered in the MASc program. Students may be required to complete up to 1.0 additional FCE depending on their PhD research needs in relation to their studies at the master's level. The number of required courses will be determined by the Associate Chair, Graduate Studies, in consultation with the PhD supervisor.
- During Year 1, each student must:
  - pass a **qualifying oral examination** in the area of research;
  - attend the ECE Colloquium;
  - complete JDE1000H *Ethics in Research* (0.0 FCE) if they have not already done so in a previous University of Toronto master's program.
- **Thesis.**
- Students have the option of completing an emphasis in Robotics or Sustainable Energy as part of their degree program. Please see details in the Electrical and Computer Engineering MASc, MEng, PhD Emphases section.

Program Length

5 years

Time Limit

7 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Electrical and Computer

Engineering's additional admission requirements stated below.
- Admission may be granted by direct entry for exceptionally qualified students with an appropriate bachelor's degree from a recognized university.
- The department must be satisfied of the student's ability to do advanced research before admission may be granted.

Program Requirements

- **Coursework.** Students must complete **4.0 graduate full-course equivalents (FCEs).**
- During Year 1, each student must:
  - pass a qualifying oral examination in the area of research;
  - attend the ECE Colloquium;
  - complete JDE1000H *Ethics in Research* (0.0 FCE) if they have not already done so in a previous University of Toronto master's program.
- **Thesis.**
- Students have the option of completing an emphasis in Robotics or Sustainable Energy as part of their degree program. Please see details in the Electrical and Computer Engineering MASc, MEng, PhD Emphases section.

Program Length

5 years

Time Limit

7 years

Electrical and Computer Engineering: Electrical and Computer Engineering MASc, MEng, PhD Emphases

Emphasis: Analytics (MEng only)

To be admitted to the emphasis in Analytics, MEng students must first successfully complete a **prerequisite course APS1070H (0.5 full-course equivalent [FCE])**.

Subsequently, to earn the emphasis, students must successfully complete **four additional half courses (2.0 FCEs)** from the list of core courses or elective courses. These must include at least one core course; the remaining courses must be selected from the list of elective courses.

Students must have completed the prerequisite course APS1070H before taking any of the core courses.

Prerequisite Course

APS1070H *Foundations of Data Analytics and Machine Learning*.

Core Courses

CHE1147H *Data Mining in Engineering*
ECE1513H *Introduction to Machine Learning* (exclusions: CSC411H, CSC2515H, ECE421H, ECE521H, ECE1504H)
MIE1624H *Introduction to Data Science and Analytics*
MSE1065H *Application of Artificial Intelligence in Materials Design* (exclusion: MSE1063H).

Elective Courses

APS502H, APS1005H, APS1017H, APS1022H, APS1040H, APS1050H, APS1051H, APS1052H, APS1053H, APS1080H, CHE507H, CHE1108H, CHE1148H, CHE1434H, CIV1504H, CIV1506H, CIV1507H, CIV1532H, CIV1538H, ECE537H, ECE1504H (exclusions: CSC411H, CSC2515H, ECE421H, ECE521H, ECE1513H), ECE1505H, ECE1510H, ECE1657H, ECE1778H, ECE1779H, MIE562H, MIE1413H, MIE1501H, MIE1512H, MIE1513H, MIE1517H, MIE1620H, MIE1621H, MIE1622H, MIE1623H, MIE1628H, MIE1653H, MIE1721H, MIE1723H, MIE1727H, MSE1063H (exclusion: MSE1065H).

Emphasis: Biomedical Engineering (MEng only)

MEng students must successfully complete **at least four courses** from those listed below. Students may double-count one course at most towards any ECE emphasis.

- Any JEB14XXH course
- ECE1774H *Sensory Cybernetics*
- ECE2500Y *Master of Engineering Project* (topic in biomedical engineering; counts as one course towards the emphasis).

Students may include other biomedical engineering-related courses subject to the approval of the ECE Associate Chair for Graduate Studies.

Emphasis: Communications (MEng only)

MEng students must successfully complete **at least four courses** from those listed below. Students may double-count one course at most towards any ECE emphasis.

- ECE537H *Random Processes*
- Any ECE15XXH course
- ECE2500Y *Master of Engineering Project* (topic in communications; counts as one course towards the emphasis).

Emphasis: Computer Engineering (MEng only)

MEng students must successfully complete **at least four courses** from those listed below. Students may double-count one course at most towards any ECE emphasis.

- ECE516H *Intelligent Image Processing*
- ECE532H *Digital Systems Design*
- ECE540H *Optimizing Compilers*
- ECE552H *Computer Architecture*
- ECE568H *Computer Security*
- Any ECE17XXH course
- ECE2500Y *Master of Engineering Project* (topic in computer engineering; counts as one course towards the emphasis).

Emphasis: Electromagnetics (MEng only)

MEng students must successfully complete **at least four courses** from those listed below. Students may double-count one course at most towards any ECE emphasis.

- Any ECE12XXH course
- ECE2500Y *Master of Engineering Project* (topic in electromagnetics; counts as one course towards the emphasis).

Emphasis: Electronics (MEng only)

MEng students must successfully complete **at least four courses** from those listed below. Students may double-count one course at most towards any ECE emphasis.

- ECE530H *Analog Integrated Circuits*
- Any ECE13XXH course
- ECE2500Y *Master of Engineering Project* (topic in electronics; counts as one course towards the emphasis).

Emphasis: Energy Systems (MEng only)

MEng students must successfully complete **at least four courses** from those listed below. Students may double-count one course at most towards any ECE emphasis.

- ECE510H *Introduction to Lighting Systems*
- ECE514H *Power Electronics: Converter Topologies*
- ECE533H *Power Electronics*
- Any ECE10XXH course
- ECE2500Y *Master of Engineering Project* (topic in energy systems; counts as one course towards the emphasis).

Emphasis: Engineering and Globalization (MEng only)

MEng students must successfully complete **four half courses (2.0 full-course equivalents [FCEs])** from the following lists, with at least two half courses (or one full course) taken from Group A.

Group A

APS510H, APS530H, APS1420H, JCR1000Y (full-year course).

Group B

APS1015H, APS1020H, APS1024H, CHL5700H, CIV1399H, JMG2020H.

Note: Students who choose to pursue an MEng project in their home department that aligns with the Centre for Global Engineering (CGEN)'s disciplinary focus, as deemed by the CGEN Director, may count the project as one required Group B course.

Students who complete the requirements of the emphasis in Engineering and Globalization and wish to obtain a notation on their transcripts should contact the Faculty Graduate Studies office.

Emphasis: Entrepreneurship, Leadership, Innovation and Technology in Engineering (ELITE) (MEng only)

MEng students must successfully complete **any four of the following courses (2.0 full-course equivalents [FCEs])**:

Leadership

TEP1010H, TEP1011H, TEP1026H, TEP1027H, TEP1029H, TEP1030H, TEP1501H, TEP1502H, TEP1601H.

Entrepreneurship and Innovation

APS1012H, APS1013H, APS1015H, APS1023H, APS1033H, APS1035H, APS1036H, APS1041H, APS1061H, APS1088H.

Finance and Management

AER1601H, APS502H, APS1001H, APS1004H, APS1005H, APS1009H, APS1016H, APS1017H, APS1020H, APS1022H, APS1028H, APS1032H, APS1038H, APS1039H, APS1040H, APS1043H, APS1049H, APS1050H, APS1051H, APS1052H.

Engineering and Society

APS510H, APS1018H, APS1024H, APS1025H, APS1031H, APS1034H, APS1101H, APS1420H.

Emphasis: Identity, Privacy and Security (IPS) (MEng only)

MEng students must successfully complete four half courses (2.0 full-course equivalents [FCEs]) as follows:

- JIE1001H/ECE1518H *Seminar in Identity, Privacy, and Security* (0.5 FCE)
- Two courses (1.0 FCE) from:
  - ECE568H, ECE1517H, ECE1529H, ECE1776H, ECE1778H
- And one course (0.5 FCE) from:
  - INF2124H, INF2181H, INF2241H.

Emphasis: Photonics (MEng only)

MEng students must successfully complete at least four courses from those listed below. Students may double-count one course at most towards any ECE emphasis.

- ECE527H *Photonic Devices*
- Any ECE14XXH course
- ECE2500Y *Master of Engineering Project* (topic in photonics; counts as one course towards the emphasis).

Emphasis: Robotics (MASc, MEng, PhD)

Students must successfully complete **four courses (2.0 full-course equivalents [FCEs])** chosen from at least two of the following groups, and no more than two in any given group:

Group 1: Planning and Control

AER1516H, AER1517H,
ECE557H (exclusion: ECE410H), ECE1619H, ECE1635H, ECE1636H, ECE1647H, ECE1653H, ECE1657H,
MIE1064H, MIE1068H.

Group 2: Perception and Learning

AER1513H, AER1515H,
CSC2503H, CSC2506H, CSC2515H, CSC2541H, CSC2548H,
ECE516H, ECE521H, ECE1511H, ECE1512H,
JEB1433H,
ROB501H.

Group 3: Modelling and Dynamics

AER1503H, AER1512H, AER506H,
JEB1444H,
MIE1001H.

Group 4: Systems Design and Integration

AER525H (exclusion: ECE470H), AER1216H, AER1217H,
CSC2621H,
ECE470H (exclusion: AER525H),
MIE505H, MIE506H, MIE1070H, MIE1075H, MIE1076H,
MIE1080H, MIE1809H,
ROB521H, ROB1514H.

Emphasis: Sustainable Energy (MASc, MEng, PhD)

MASc and PhD students must successfully complete:

- At least **three half courses (1.5 full-course equivalents [FCEs])** from either of the following lists below.
- A **thesis** towards their degree on a topic related to sustainable energy. Topics must be approved by the steering committee of the Institute of Sustainable Energy. Contact: Mandeep Rayat.

MEng students must successfully complete:

- **Four half courses (2.0 FCEs)** from either of the following lists below, including at least one core course (0.5 FCE).

Core Courses

APS1032H *Introduction to Energy Project Management*,
MIE515H *Alternative Energy Systems*,
MIE1120H *Current Energy Infrastructure and Resources*.

Elective Courses

AER507H, AER1304H, AER1315H, AER1415H,
CHE568H, CHE1053H, CHE1118H, CHE1123H, CHE1142H, CHE1143H,
CIV575H, CIV576H, CIV577H, CIV1303H, CIV1307H,
ECE533H, ECE1030H, ECE1055H, ECE1057H, ECE1059H, ECE1085H, ECE1086H, ECE1092H, ECE1094H, ECE1476H,
MIE516H, MIE517H, MIE1128H, MIE1129H, MIE1130H, MIE1240H, MIE1241H, MIE1715H,
MSE1023H, MSE1028H, MSE1058H.

Students who complete the requirements of the emphasis in Sustainable Energy will receive a notation on their transcript from the Faculty Graduate Studies Office following a recommendation from the Institute of Sustainable Energy. Contact: Mandeep Rayat.

Emphasis: Systems Control (MEng only)

MEng students must successfully complete **at least four courses** from those listed below. Students may double-count one course at most towards any ECE emphasis.

- ECE557H *Systems Control*
- Any ECE16XXH course
- ECE2500Y *Master of Engineering Project* (topic in systems control; counts as one course towards the emphasis).

Electrical and Computer Engineering: Electrical and Computer Engineering MASc, MEng, PhD Courses

The following groups of courses in the more distinct fields of graduate study in electrical and computer engineering are presented for student guidance in selecting courses. Suitable courses offered by other departments may be selected subject to the approval of the Department of Electrical and Computer Engineering. Students registered in a graduate degree program which involves research are required to complete the seminar course JDE1000H *Ethics in Research* during their first year of registration. The department should be consulted each session as to course offerings.

Energy Systems

ECE533H	Power Electronics
ECE1030H	Space Vector Theory and Control
ECE1049H	Special Topics in Energy Systems
ECE1055H	Dynamics of HVdc/ac Transmission Systems
ECE1066H	Design of High-Frequency Switch-Mode Power Supplies (SMPS)
ECE1068H	Introduction to EMC
ECE1085H	Power System Optimization
ECE1086H	Power Management for Photovoltaic Systems
ECE1094H	Power System Operations and Economics

Electromagnetics

ECE1228H	Electromagnetic Theory
ECE1229H	Advanced Antenna Theory
ECE1243H	Topics in Electromagnetic Waves
ECE1252H	Introduction to Computational Electrodynamics
ECE1254H	Modeling of Multiphysics Systems
ECE1256H	Microwave Circuits

Electronics

ECE534H	Integrated Circuit Engineering
ECE1334H	Selected Topics in Solid State Electronics/VLSI Technology
ECE1336H	Semiconductor Physics
ECE1352H	Analog Circuit Design I
ECE1360H	Selected Topics in Instrumentation
ECE1365H	High Frequency Integrated Circuits
ECE1371H	Advanced Topics in Analog Circuits
ECE1373H	Digital Design for Systems-on-Chip
ECE1379H	Introduction to Compound Semiconductor Devices
ECE1385H	Selected Topics in VLSI Systems
ECE1387H	CAD for Digital Circuit Synthesis and Layout
ECE1388H	VLSI Design Methodology
ECE1391H	Advanced Microelectronic Devices
ECE1392H	Integrated Circuits for Digital Communications
ECE1393H	Semiconductor Devices
ECE1395H	Power Semiconductor Devices and Applications
ECE1396H	Analog Signal Processing Circuits
ECE1397H	Analog Integrated Circuits
ECE1398H	VLSI Technology

Biomedical Engineering

JEB1365H	Ultrasound: Theory and Applications in Biology and Medicine
JEB1433H	Medical Imaging
JEB1444H	Neural Engineering
JEB1447H	Sensory Communications
MIE1452H	Signal Processing for Bioengineering

Photonics

ECE525H	Lasers and Detectors
ECE527H	Passive Photonic Devices
ECE1448H	Quantum Mechanics for Engineers
ECE1450H	Ultrafast Photonics
ECE1460H	Special Topics in Photonics
ECE1461H	Advanced Laser Processing
ECE1467H	Integrated Optical Circuit Design
ECE1473H	Micro and Nano Fabrication Technologies for Compound Semiconductors

ECE1475H	Bio Photonics
ECE1476H	Solar Energy Capture and Storage in Natural and Engineered Systems
ECE1477H	Optical Interconnects
ECE1478H	Lasers and Detectors

Communications

ECE537H	Random Processes
ECE1501H	Error Control Codes
ECE1502H	Information Theory
ECE1503H	Graphs, Error-Correction Coding, and Inference
ECE1504H	Statistical Learning (exclusions: CSC411H, CSC2515H, ECE421H, ECE521H, and ECE1513H)
ECE1505H	Convex Optimization
ECE1508H	Special Topics in Communications
ECE1511H	Signal Processing
ECE1512H	Digital Image Processing and Applications
ECE1513H	Introduction to Machine Learning (prerequisites: STA286H or ECE302H or equivalent; exclusions: CSC411H, CSC2515H, ECE421H, ECE521H, and ECE1504H)
ECE1517H	Biometric Systems
ECE1518H	Seminar in Identity, Privacy, and Security
ECE1520H	Data Communications I
ECE1521H	Detection and Estimation Theory
ECE1522H	Data Communications II
ECE1529H	Adaptive Systems for Signal Processing and Communications
ECE1531H	Quantum Information Theory
ECE1541H	Communication Networks I
ECE1542H	Communication Networks II
ECE1543H	Mobile Communications Systems
ECE1545H	Bridges and Routers Planning
ECE1548H	Advanced Network Architectures
ECE1549H	Stochastic Networks
ECE1552H	Modern Mobile Air Interfaces (prerequisite: ECE316H)

Systems Control

ECE557H	Systems Control
ECE1619H	Linear Geometric Control Theory
ECE1635H	Special Topics in Control I
ECE1636H	Control of Discrete-Event Systems I
ECE1637H	Control of Discrete-Event Systems II
ECE1639H	Analysis and Control of Stochastic Systems I
ECE1647H	Introduction to Nonlinear Control Systems
ECE1648H	Nonlinear Control Systems
ECE1653H	Hybrid Systems and Control Applications
ECE1656H	Nonlinear Modeling and Analysis of Biological Systems
ECE1657H	Game Theory and Evolutionary Games

Computer Engineering

ECE516H	Personal Cybernetics and Intelligent Imaging Systems
ECE532H	Digital Hardware
ECE540H	Optimizing Compilers
ECE1718H	Special Topics in Computer Hardware Design
ECE1749H	Interconnection Networks for Parallel Computer Architectures
ECE1754H	Compilation Techniques for Parallel Processors
ECE1755H	Parallel Computer Architecture and Programming
ECE1756H	Reconfigurable Computing and FPGA Architecture
ECE1762H	Algorithms and Data Structures
ECE1767H	Design for Test and Testability
ECE1769H	Behavioural Synthesis of Digital Integrated Circuits
ECE1770H	Trends in Middleware Systems — Selected Topics and Concepts
ECE1771H	Quality of Service
ECE1774H	Sensory Cybernetics
ECE1776H	Computer Security, Cryptography, and Privacy
ECE1777H	Computer Methods for Circuit Simulation
ECE1778H	Creative Applications for Mobile Devices
ECE1780H	Advanced Mobile User Interfaces

ECE1781H	Dependable Software Systems (prerequisite: ECE344H Operating Systems or similar)
ECE1782H	Programming Massively Parallel Multiprocessors and Heterogeneous Systems
ECE1783H	Design Tradeoffs in Digital Systems
ECE1784H	Trustworthy Machine Learning
ECE1785H	Empirical Software Engineering

Master of Engineering

ECE1092H	Smart Grid Case Studies
ECE1093H	Electrical Insulation Design and Coordination
ECE1095H	Grounding and Bonding
ECE1394H	Technical Management of Modern IC Design
ECE1524H	Service Provider Networks
ECE1551H	Mobile Broadband Radio Access Network (prerequisite: ECE316H; exclusion: ECE1508H)
ECE1779H	Introduction to Cloud Computing
ECE2500Y	Master of Engineering Project

Reading Course

ECE1001H	Readings in Cognate Subjects

APS Engineering Course

APS1012H	Managing Business Innovation and Transformational Change
APS1041H	Inventrepreneurship (Invention and Entrepreneurship)
APS1043H	Writing Your Own Patent Application
APS1070H	Foundations of Data Analytics and Machine Learning

Degree Programs

English

MA

- Fields:
  - American Literature;
  - Aspects of Theory;
  - Canadian Literature;
  - Creative Writing;
  - Medieval Literature;
  - Renaissance Literature;
  - Restoration and Eighteenth-Century Literature;
  - Romantic and Victorian Literature;
  - Twentieth and Twenty-First Century British and Irish Literature;
  - World Literatures in English

PhD

- Fields:
  - American Literature;
  - Aspects of Theory;
  - Canadian Literature;
  - Medieval Literature;
  - Renaissance Literature;
  - Restoration and Eighteenth-Century Literature;
  - Romantic and Victorian Literature;
  - Twentieth and Twenty-First Century British and Irish Literature;
  - World Literatures in English

Combined Degree Programs

- STG, Law, JD / English, MA

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Book History and Print Culture
  - English, MA, PhD
- Diaspora and Transnational Studies
  - English, MA, PhD
- Jewish Studies
  - English, MA, PhD
- Sexual Diversity Studies
  - English, MA, PhD
- South Asian Studies
  - English, MA, PhD
- Women and Gender Studies
  - English, MA, PhD
- Women's Health
  - English, MA, PhD

Overview

One of the strongest and most diverse graduate English programs in North America, the University of Toronto's graduate program in the Department of English presents a wide array of approaches to the study of literature that includes both rigorous historical scholarship and the innovations of new theoretical, cultural, and interdisciplinary methods. This rich variety is exemplified in the more than 40 graduate seminars offered every year and in the interdisciplinary conjunctions with other departments and collaborative specializations.

English: English MA

Master of Arts

Program Description

The Master of Arts program offers broad coverage in British, Canadian, Aboriginal, American, and postcolonial literatures, a sophisticated command of current theoretical approaches, and exceptional preparation and intellectual support for significant research.

The MA in English degree program is offered in 10 fields: 9 fields have the same requirements, while the field of Creative Writing has different requirements.

The MA program can be taken on a full-time or part-time basis except in the Creative Writing field, which is taken on a full-time basis only. Requirements for the Creative Writing field are described in a separate section below.

Fields:
1) American Literature; 2) Aspects of Theory; 3) Canadian Literature; 4) Medieval Literature; 5) Renaissance Literature; 6) Restoration and Eighteenth-Century Literature; 7) Romantic and Victorian Literature; 8) Twentieth and Twenty-First Century British and Irish Literature; 9) World Literatures in English

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of English's additional admission requirements stated below.
- A minimum of 7 full-year undergraduate courses in English or the equivalent in half-year courses (i.e., 14), or any combination of full- and half-year courses that add up to the equivalent of 7 full-year courses.
- An appropriate bachelor's degree (i.e., a four-year undergraduate degree), or its equivalent (preferably in English), with a minimum grade point average (GPA) of B+ or better and evidence of first-class work in English. The department favours a broad training in the major genres and all periods of English literary history.
- Recommendations from two referees.
- A statement of purpose.
- A writing sample consisting of 12 to 15 pages. The writing sample should be an accomplished piece of the applicant's own academic writing, such as an advanced undergraduate seminar paper. See details about the writing sample.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English are required to write the Test of English as a Foreign Language (TOEFL). Minimum scores required are:
  - 600 on the paper-based test and 5 on the Test of Written English (TWE)
  - 100/120 on the Internet-based test, with at least 22/30 on the writing and speaking sections.
- Admissions are selective; possession of minimum qualifications does not guarantee admission.

Program Requirements

- **Coursework.** Students must successfully complete a total of **4.0 full-course equivalents (FCEs)** as follows:
  - ENG6999Y *Critical Topographies: Theory and Practice of Contemporary Literary Studies in English* (1.0 FCE)
  - 3.0 approved graduate FCEs in English.
- Students must attain a B standing in each graduate course.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
9 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Field: Creative Writing

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of English's additional admission requirements stated below.
- A minimum of 7 full-year undergraduate courses in English or the equivalent in half-year courses (i.e., 14), or any combination of full- and half-year courses that add up to the equivalent of 7 full-year courses.
- An appropriate bachelor's degree (i.e., a four-year undergraduate degree), or its equivalent (preferably in English), with a minimum grade point average (GPA) of B+ or better and evidence of first-class work in English. The department favours a broad training in the major genres and all periods of English literary history.
- Recommendations from two referees.
- A statement of purpose.
- A writing sample consisting of 12 to 15 pages. The writing sample should be an accomplished piece of the applicant's own academic writing, such as an advanced undergraduate seminar paper. See details about the writing sample.
- A portfolio consisting of 20 to 25 pages of prose (drama, fiction, or creative non-fiction), and/or poetry. See details about the format of creative writing portfolio submissions.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English are required to write the Test of English as a Foreign Language (TOEFL). Minimum scores required are:
  - 600 on the paper-based test and 5 on the Test of Written English (TWE)
  - 100/120 on the Internet-based test, with at least 22/30 on the writing and speaking sections.
- Admissions are selective; possession of minimum qualifications does not guarantee admission.

Program Requirements

- **Coursework.** Students must successfully complete a total of **3.0 full-course equivalents (FCEs)** as follows:
  - ENG6950Y *Workshop in Creative Writing* (1.0 FCE). All students must complete the Workshop in Creative Writing in Year 1 of their program.
  - 2.0 approved FCEs in English.
- Students must attain a B standing in each graduate course.
- Supervised **Writing Project** (the equivalent of a thesis). Upon completion of coursework, students undertake a book-length Writing Project in a genre of their choice: poetry, drama, fiction, or creative non-fiction. Each student is assigned a faculty member or adjunct faculty member with whom to consult on a regular basis about the project. All advisors are published writers.

- The MA Creative Writing program cannot be taken on a part-time basis.

Program Length

5 sessions full-time (typical registration sequence: F/W/S/F/W)

Time Limit

3 years full-time

English: English PhD

Doctor of Philosophy

Program Description

The Doctor of Philosophy program offers broad coverage in British, Canadian, Aboriginal, American, and postcolonial literatures, a sophisticated command of current theoretical approaches, and exceptional support for significant research projects.

Applicants are admitted through one of two routes: 1) a master's degree in English, 2) in exceptional cases, an appropriate bachelor's degree (direct entry).

Completion of the PhD program may take longer than the indicated program length below.

Fields:
1) American Literature; 2) Aspects of Theory; 3) Canadian Literature; 4) Medieval Literature; 5) Renaissance Literature; 6) Restoration and Eighteenth-Century Literature; 7) Romantic and Victorian Literature; 8) Twentieth and Twenty-First Century British and Irish Literature; 9) World Literatures in English

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of English's additional admission requirements stated below.
- Normally, applicants have a master's degree in English from a recognized university, with an average grade equivalent to at least a University of Toronto A– in the applicant's overall program.
- Applicants must satisfy the department that they are capable of independent research in English at an advanced level.
- Recommendations from two referees.
- A writing sample of not more than 5,000 words (approximately 15 to 20 pages).
- A statement of purpose.
- A curriculum vitae (CV).
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English are required to write the Test of English as a Foreign Language (TOEFL). Minimum scores required are:
  - 600 on the paper-based test and 5 on the Test of Written English (TWE)
  - 100/120 on the Internet-based test, with at least 22/30 on the writing and speaking sections.
- Admission to the PhD is based on the applicant's undergraduate and graduate records and upon the evidence of the references and statement.
- Admissions are selective; possession of minimum qualifications does not guarantee admission.

Program Requirements

- Students pursue a program of study and research approved by the department.

Courses

- The minimum course requirements for the degree are as follows.
  - ENG8000H *Texts, Theories, and Archives* (0.5 FCE) unless this or an equivalent course has already been taken
  - ENG9500H *Professional Development* (0.5 FCE)
  - ENG9900H *Professing Literature* (0.5 FCE)
  - 3.0 additional FCEs in English, as approved by the department.
- Every student must select at least 2.0 FCEs outside the chosen field of study in the course of their graduate training. The student is encouraged to combine these courses into a minor field. Graduate courses taken as part of the master's program and in fulfillment of the English language requirement may be counted in this connection, but not ENG6999Y *Critical Topographies: Theory and Practice of Contemporary Literary Studies in English* nor courses in the 9000 series.
- Course selection must meet the approval of the department.

English-Language Requirement

- Demonstrated knowledge of the history and development of the English language, especially of its early period.
- Any student who has not completed ENG240Y or an equivalent full-year undergraduate course in Old English with at least a B standing is required to take one of the following courses in the English language:
  - ENG1001H *Old English I*
  - ENG6361H *History and Structure of the English Language I*
  - ENG6362H *History and Structure of the English Language: Post-1500*

- ENG6365H *Diasporic Englishes*.
- Alternatively, the requirement can be satisfied by taking a special examination in Old English.

Language Requirement

- Demonstrated reading knowledge of French by May 31 of Year 3 of registration.
- With the permission of the department, another language (other than English) may be substituted for French provided that this other language is required by the student's research area.
- The supervisory committee may require the student to qualify in other program-related languages as well.

Special Fields Examination

- Students are required to pass a Special Fields Examination. The examination has three components:
  - a written examination, based on a reading list drawn up in consultation with the supervisory committee;
  - a short position paper, in which the student articulates the argument and stakes of the proposed thesis in light of the preparation for this written examination;
  - and an oral examination that engages in part with the written examination and in part with the position paper.
- Students who enter the PhD program with a master's degree generally take the Special Fields Examination no later than the end of the second session of Year 2. A second attempt of the Special Fields Examination is allowed on the recommendation of the student's committee.
- The student must have completed all requirements for the degree, exclusive of thesis research, by the end of Year 3 in order to remain in good standing in the program.

Thesis

- A candidate is required to submit a thesis on an approved subject embodying the results of original investigation which constitute a significant contribution to the knowledge of the field, and to pass an oral examination on the subject of the thesis. The normal length of a PhD thesis is approximately 75,000 words. The maximum length accepted by the department is 100,000 words.
- No later than May 15 of Year 1 of registration, the student must submit to the Associate Director, PhD, a preliminary thesis proposal, approved by the prospective supervisor. The Associate Director, PhD, appoints a supervisory committee that includes a supervisor and two other faculty members with expertise in the proposed research area. The student is required to meet with the supervisory committee within three months of submitting the preliminary proposal. An approved thesis proposal signed by all members of the supervisory committee and by the Associate Director, PhD, must be submitted by October 1 of Year 2 of registration.
- The student and the supervisor should meet regularly. The student is also required to meet at least once a year with the supervisory committee. The supervisory committee should normally approve the completed thesis before it is submitted for examination.
- The Doctoral Final Oral Examination is arranged by the department in collaboration with the School of Graduate Studies. The candidate should allow at least 10 weeks from submission of the thesis for the department to complete the arrangements for the oral examination.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of English's additional admission requirements stated below.
- In exceptional cases, applicants with an appropriate bachelor's degree from a recognized university that includes at least 8.0 full-course equivalents (FCEs) in English, with an average grade equivalent to at least a University of Toronto A– in the applicant's overall program may be considered for admission (direct entry).
- Applicants must satisfy the department that they are capable of independent research in English at an advanced level.
- Recommendations from two referees.
- A writing sample of not more than 5,000 words (approximately 15 to 20 pages).
- A statement of purpose.
- A curriculum vitae (CV).
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English are required to write the Test of English as a Foreign Language (TOEFL). Minimum scores required are:
  - 600 on the paper-based test and 5 on the Test of Written English (TWE)
  - 100/120 on the Internet-based test, with at least 22/30 on the writing and speaking sections.
- Admission to the PhD is based on the applicant's undergraduate records and upon the evidence of the references and statement.
- Admissions are selective; possession of minimum qualifications does not guarantee admission.

Program Requirements

- Students pursue a program of study and research approved by the department.

Courses

- The minimum course requirements for the degree are as follows. Students admitted directly from a bachelor's degree must take a total of **7.5 full-course equivalents (FCEs)** as follows:

    - ENG6999Y *Critical Topographies: Theory and Practice of Contemporary Literary Studies in English* (1.0 FCE)
    - ENG8000H *Texts, Theories, and Archives* (0.5 FCE)
    - ENG9500H *Professional Development* (0.5 FCE)
    - ENG9900H *Professing Literature* (0.5 FCE)
    - 5.0 additional FCEs in English, as approved by the department. The student must complete ENG6999Y plus 2.0 FCEs in Year 1 of the program, with an average grade of at least an A–. Students must complete all remaining courses, except for ENG9500H *Professional Development*, by the end of Year 3 of the program, with an average of at least an A– in order to maintain good academic standing and to continue in the PhD program. In order to maintain good academic standing, and to continue in the PhD program, the student must complete each course with a grade of at least B.
    - select at least 2.0 FCEs outside the chosen field of study. The student is encouraged to combine these courses in a minor field.
- Course selection must meet the approval of the department.

English-Language Requirement

- Demonstrated knowledge of the history and development of the English language, especially of its early period.
- Any student who has not completed ENG240Y or an equivalent full-year undergraduate course in Old English with at least a B standing, is required to take one of the following courses in the English language:
    - ENG1001H *Old English I*
    - ENG6361H *History and Structure of the English Language I*
    - ENG6362H *History and Structure of the English Language: Post-1500*
    - ENG6365H *Diasporic Englishes*.
- Alternatively, the requirement can be satisfied by taking a special examination in Old English.

Language Requirement

- Demonstrated reading knowledge of French by May 31 of Year 4 of registration.
- With the permission of the department, another language (other than English) may be substituted for French provided that this other language is required by the student's research area.
- The supervisory committee may require the student to qualify in other program-related languages as well.

Special Fields Examination

- Students are required to pass a Special Fields Examination. The examination has three components:
    - a written examination, based on a reading list drawn up in consultation with the supervisory committee;
    - a short position paper, in which the student articulates the argument and stakes of the proposed thesis in light of the preparation for this written examination;
    - and an oral examination that engages in part with the written examination and in part with the position paper.
- Direct-entry students generally take the Special Fields Examination no later than the end of the second session of Year 3. A second attempt of the Special Fields Examination is allowed on the recommendation of the student's committee.
- The student must have completed all requirements for the degree, exclusive of thesis research, by the end of Year 4 in order to remain in good standing in the program.

Thesis

- A candidate is required to submit a thesis on an approved subject embodying the results of original investigation which constitute a significant contribution to the knowledge of the field, and to pass an oral examination on the subject of the thesis. The normal length of a PhD thesis is approximately 75,000 words. The maximum length accepted by the department is 100,000 words.
- No later than May 15 of Year 2 of registration, the student must submit to the Associate Director, PhD, a preliminary thesis proposal, approved by the prospective supervisor. The Associate Director, PhD, appoints a supervisory committee that includes a supervisor and two other faculty members with expertise in the proposed research area. The student is required to meet with the supervisory committee within three months of submitting the preliminary proposal. An approved thesis proposal signed by all members of the supervisory committee and by the Associate Director, PhD, must be submitted by October 1 of Year 3 of registration.
- The student and the supervisor should meet regularly. The student is also required to meet at least once a year with the supervisory committee. The supervisory committee should normally approve the completed thesis before it is submitted for examination.
- The Doctoral Final Oral Examination is arranged by the department in collaboration with the School of Graduate Studies. The candidate should allow at least 10 weeks from submission of the thesis for the department to complete the arrangements for the oral examination.

English: English MA, PhD Courses

The following list of possible courses is subject to revision; further information, including course descriptions and timetables, are posted on the Department of English website and may be obtained from the department before enrolment. Courses offered by the department vary considerably from year to year. Students in English are eligible to take courses in other graduate units (for example, Comparative Literature, Medieval Studies, Drama, Information, South Asian Studies, Women's Studies). From time to time, the department also offers programs of directed reading in special fields. These reading courses are normally available only to students in the PhD program. With the special approval of the Director of Graduate Studies, PhD students may substitute

one such course for one (and not more than one) of the required courses.

ENG1001H	Old English I
ENG1002H	Introduction to Old English II: Beowulf
ENG1007H	Medieval Drama: Morality Plays
ENG1009H	Writing the Nation: Pre-modern Historiographies
ENG1011H	Economies of Medieval Drama: East Anglia, Kent, Sussex
ENG1025H	Globalization and the Religious Other in Medieval Literature
ENG1027H	Constructions of the Other in Medieval Literature
ENG1333H	Reception of the Classics in Middle English Literature
ENG1551H	The Canterbury Tales
ENG1552H	Chaucer's Troilus and Criseyde and Other Works
ENG1730H	Medieval Drama: The Biblical Cycles and Fragments
ENG2008H	The Early Modern in the History of Science and Literature
ENG2016H	The Queer Renaissance: Queer Studies, Early Modern Texts
ENG2018H	A Royal Society of Their Own: Early Modern Lit/Sci/Phil
ENG2019H	Early Modern Psyches: Shakespeare and Psychoanalysis
ENG2022H	Early Modern Critical Race Studies
ENG2050H	John Donne's Poetic Inhabitations
ENG2054H	John Donne: Theory and Context
ENG2222H	The Renaissance of Art
ENG2226H	Early Modern Manuscripts
ENG2230H	Discourses of Colonialism and Early Modern Literature
ENG2282H	Ben Jonson
ENG2288H	Renaissance Keywords
ENG2464H	Early Modern Literature and the Crisis of Representation
ENG2470H	Milton, Globalism, and the Post-national
ENG2472H	Milton
ENG2484H	Thomas Heywood and the Early Modern Theater
ENG2505H	Shakespeare's Sonnets: Texts and Contexts
ENG2510H	Shakespeare and the Renaissance Schoolroom
ENG2533H	Shakespeare's Language
ENG2535H	Shakespeare and his Contemporaries
ENG3041H	Acting Theory and Practice Before Stanislavsky
ENG3066H	Literatures of British Enlightenment
ENG3070H	Laurence Sterne
ENG3073H	Richardson's Clarissa: Fiction, Contexts, and Criticism
ENG3251H	Varieties of (18th-Century) Religious Experience
ENG3252H	The Postsecular Eighteenth Century
ENG3254H	Fielding and Hogarth
ENG3255H	Fielding's Tom Jones
ENG3301H	The Social Life of Feeling in Eighteenth-Century Literature
ENG3332H	Eighteenth-Century Tragedy and its Discontents
ENG3337H	Comedy and Sentimentality in Eighteenth-Century Literature
ENG3900H	The Circum-Atlantic Novel: Utopia to Mansfield Park
ENG4154H	Wordsworth: Poetry, Context, and Interpretation
ENG4170H	Extravagant Styles: Romanticism, Orientalism, and the Gothic
ENG4211H	Romanticism and Translation
ENG4212H	Romanticism and Catastrophe
ENG4222H	Romanticism and Mobility
ENG4224H	Early Nineteenth-Century Environmental Literature
ENG4235H	Keats: The Poet and His World
ENG4501H	Victorian Fiction and the Fragility of the Social
ENG4502H	Decadent / Pastoral / Fin-de-Siècle
ENG4504H	Darwin and Literature
ENG4622H	Brontë and Dickens
ENG4626H	Literature, Politics, Revolution: Morris and Kingsnorth
ENG4662H	Romantic Memory
ENG4664H	Romantic Pastoral Revisited
ENG4722H	Reparative Readings of Victorian Fiction
ENG4770H	Aesthetics and Ethics: the Late Victorians

ENG4741H	Victorian Lyric
ENG4756H	Class and the Victorian Novel
ENG4801H	Aging and Older Age in the Nineteenth-Century British Novel
ENG4808H	Public Health Stories: Writing Illness in 19th-Century Britain
ENG4856H	Character in 19th-Century Fiction
ENG4879H	Christianity in Victorian Literature
ENG4884H	Everyday Life and 19th-Century Novelistic Representation
ENG4903H	Herman Melville's Democratic Navigations
ENG4904H	Slavery and Anti-Slavery in the Ante-Bellum United States
ENG4973H	Marx and the American Renaissance
ENG4987H	Novelties of the Sublime in Modern Poetry
ENG5005H	Modern Poetry and Philosophy
ENG5006H	Modernism and the Politics of Form
ENG5020H	#BlackLivesMatter: Contemporary Black Canadian Literature
ENG5021H	Black Forms: Critical Race Theory and Diasporic Literature
ENG5022H	Race, Psychoanalysis, and American Literature
ENG5025H	Malcolm X and African-Canadian Literature
ENG5030H	The Child at the Social Limit in Contemporary US Fiction
ENG5042H	Justice and Form in Contemporary Canadian Ecopoetry
ENG5046H	Settler Colonialism and US Literary Studies
ENG5049H	Liberalism, Community, and American Literature
ENG5051H	Energy and Economy in the American Renaissance
ENG5052H	Nineteenth-Century American Literature and Industrial Revolution
ENG5056H	Studies in the 21st-C. Novel: Zadie Smith and David Mitchell
ENG5062H	The Rise of the Transnational American Novel
ENG5064H	Duplicators: The DIY Ethic and DIY Aesthetics in C20-21 Lit
ENG5066H	Realism in the Time of the Anthropocene
ENG5074H	In the First Person: Memoirs and Mediality
ENG5075H	Aesthetics of Struggle: Revolution, Fugitivity, Survival
ENG5130H	Oceanic Modernisms: The Sea and Modernist British Literature
ENG5141H	Staging Environmental Crisis in 21st-Century Canadian Lit
ENG5200H	Woolf/Beckett/Coetzee

Overview

The goal at the School of the Environment is to create and interpret knowledge on environmental issues through outstanding academic programs, and to provide students with the skills, knowledge, and experience necessary to make a substantive difference in the world. We are focused on creating new knowledge, training future leaders, engaging and forging partnerships with the wider community, and contributing to positive environmental and social change from the local to the global scale.

The School of the Environment acts as a hub for researchers and students from many different disciplines spanning the social sciences, natural sciences, and humanities, bringing together many different perspectives to bear on today's pressing environmental challenges. Faculty and instructors make up a diverse community collaborating across departments, schools, and Faculties at the University of Toronto and beyond.

Environment: Environment and Sustainability MES

Master of Environment and Sustainability

Program Description

The Master of Environment and Sustainability (MES) is a full-time, one-year program designed for students seeking the transdisciplinary research skills needed to understand and develop solutions to the many environmental and human well-being challenges and opportunities facing us in the 21st century. The transdisciplinary perspective means research 1) that is problem focussed, rather than discipline-focussed, starting from problems in the world and working back to the knowledge required to address those problems; and 2) involves active engagement with non-academic partners in active processes of co-production of knowledge.

The program builds on the strengths of the School of Environment's undergraduate programs and its two interdisciplinary graduate collaborative specializations in Environmental Studies and Environment and Health. Upon graduation, MES students will have acquired a transdisciplinary perspective on environmental issues, learned to use methodologies and tools relevant to environmental protection and sustainability solutions, and will be well prepared for a variety of careers in the private and public sectors or for further studies at the doctoral level.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the School of the Environment's additional admission requirements stated below.
- An appropriate honours bachelor's degree (HBSc or HBA) that includes at least a minor in environment, sustainability, or a closely related field from a recognized university with a minimum standing equivalent to at least a University of Toronto B+ in each of the final two years of study.
- Applicants should have completed a combination of major(s) and minor(s) spanning more than one discipline or have equivalent interdisciplinary experience.
- A letter of intent.
- Two letters of reference.

Program Requirements

- **Coursework.** Students must successfully complete a total of **4.0 full-course equivalents (FCEs)** as follows. Students will undertake research leading to the preparation of a thesis.
  - 1.5 FCEs in core courses:
    - ENV1103H *Living Labs for Applied Sustainability*
    - ENV1197H *Research in Environment and Sustainability, Part 1* (pending approval)
    - ENV1198H *Research in Environment and Sustainability, Part 2* (pending approval)
  - 1.0 FCE thesis: ENV1199Y (pending approval)
  - 1.5 FCEs in electives chosen from the list below, from one of four concentrations.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

Environment: Environment and Sustainability MES Courses

Core Courses

2.5 full-course equivalents (FCEs):

ENV1103H	Living Labs for Applied Sustainability
ENV1197H	Research in Environment and Sustainability, Part 1 (pending approval)
ENV1198H	Research in Environment and Sustainability, Part 2 (pending approval)
ENV1199Y	Thesis (pending approval)

Elective Courses

1.5 FCEs chosen from one of the following concentrations:

Concentration 1: Adaptation and Resilience

CHL5413H	Public Health Sanitation
CHL5903H	Environmental Health
CHL5911H	Occupational and Environmental Hygiene II
CSC2720H	Systems Thinking for Global Problems
EES1136H	Climate Change Adaptation
ENV1001H	Environmental Decision Making
ENV1004H	Urban Sustainability and Ecological Technology (pending approval)
ENV1703H	Water Resources Management and Policy
ENV1704H	Environmental Risk Analysis and Management
ENV4002H	The Environment and Health of Vulnerable Populations (pending approval)
ESS2304H	Contaminants in the Environment
FOR1416H	Forest Fire Danger Rating
FOR1575H	Urban Forest Conservation
JGE1413H	Workshop in Environmental Impact Assessment
JGE1420H	Urban Waste Management: an International Perspective
JGE1425H	Livelihoods, Poverty, and Environment in the Developing Countries
JNC2503H	Environmental Pathways
JPG1404H	Issues in Global Warming
JPG1428H	Greening the City: Urban Environmental Planning and Management
PLA1601H	Climate Change and Resilience: Planning and Policy

Concentration 2: Global Change Science

ANT4065H	Specific Problems: New World
CHE1435H	Fundamentals of Aerosol Physics and Chemistry
CHM1401H	Transport and Fate of Chemical Species in the Environment
CHM1410H	Analytical Environmental Chemistry
CHM1420H	Environmental Chemistry of Soil
CHM1425H	Modelling the Fate of Organic Chemicals in The Environment
ENV1001H	Environmental Decision Making
ESS1461H	Paleoenvironmental Studies
ESS2303H	Earth Systems Evolution
FOR3000H	Current Issues in Forest Conservation
PHY1498H	Introduction to Atmospheric Physics
PHY2502H	Climate System Dynamics
PHY2504H	Advanced Atmospheric Dynamics
PHY2505H	Atmospheric Radiative Transfer and Remote Sounding
PHY2506H	Data Assimilation and Retrieval Theory

Concentration 3: Social Sustainability

ANT3034H	Advanced Research Seminar IV

European, Russian, and Eurasian Studies

European, Russian, and Eurasian Studies: Introduction

Faculty Affiliation

Arts and Science

Degree Programs

European and Russian Affairs

MA

Combined Degree Programs

- STG, Law, JD / European and Russian Affairs, MA

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Ethnic, Immigration and Pluralism Studies
  - European and Russian Affairs, MA
- Jewish Studies
  - European and Russian Affairs, MA

Overview

The **Master of Arts** program in European and Russian Affairs (MA ERA) is designed to provide a well-rounded education in European, Russian, and Eurasian affairs for students who wish to pursue professional, non-academic careers in areas such as government and diplomacy, journalism, business, and teaching. The programs also enrich and broaden the base of knowledge of beginning graduate students considering any PhD-level study with a specialization in the European and Russian areas.

The Combined Degree Program in **Law, Juris Doctor / European and Russian Affairs, Master of Arts** provides specialized professional training for those seeking a career in law in the changing environment of the post-communist world and the European Union. There is a need for the services of well-informed specialists who can navigate the legal pitfalls of emergent legal systems and deal with lawyers and government officials in the area. Best equipped to meet this demand are people with dual expertise in law and European and Russian studies.

European, Russian, and Eurasian Studies: European, Russian, and Eurasian Studies MA

Master of Arts

Program Description

The **Master of Arts** program in European and Russian Affairs (MA ERA) is designed to provide a well-rounded education in European, Russian, and Eurasian affairs for students who wish to pursue professional, non-academic careers in areas such as government and diplomacy, journalism, business, and teaching. The programs also enrich and broaden the base of knowledge of graduate students considering any PhD-level study with a specialization in the European and Russian areas.

The MA in European and Russian Affairs offers students:

- the opportunity to study at the leading research university in Canada;
- the chance to work with outstanding faculty in a wide range of disciplines with a research specialization on Europe, Russia, and Eurasia;
- internships, exchanges, summer study programs, and research experience in the region;
- access to one of North America's largest research libraries;
- participation in the rich academic programs of the Centre for European, Russian, and Eurasian Studies and the Munk School of Global Affairs and Public Policy including specialized graduate workshops and courses offered by visiting professors;
- a strong and vibrant learning community with individualized academic and financial support;
- leadership roles in graduate student conferences, blogs, and journals.

The program requires a minimum of two academic years of full-time graduate study. For further information about graduate programs and study grants, please contact the Graduate Coordinator.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Centre for European, Russian, and Eurasian Studies additional admission requirements stated below.
- At least some of the work in the program is based on the study of original texts and presupposes a reading knowledge of a language relevant to the program. Preferably, applicants should have a minimum of one academic year of study in a relevant language and are urged to undertake additional language training in the summer preceding entry to the program.

Program Requirements

- **Coursework.** Students must complete **6.0 full-course equivalents (FCEs)** as follows:
  - 2.0 FCEs in the chosen primary discipline; for example, History or Political Science.
  - 2.0 FCEs must be drawn from any discipline(s) relating to the student's course of study other than the chosen primary discipline. Students can take courses in any department, with the approval of the instructor and Graduate Coordinator, provided that the student submits coursework related to the region.
  - ERE2001H (0.5 FCE), taken in Year 1 of the program.
  - ERE2000Y (1.0 FCE), the interdisciplinary core course, beginning in the second session of Year 1 and continuing into Year 2. As part of ERE2000Y, each student must write 10,000 to 12,000 words including references, based on original research.
  - At least 0.5 FCE must be earned either in an approved program-related internship or in an approved academic exchange abroad.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

European, Russian, and Eurasian Studies: European, Russian, and Eurasian Studies MA Courses

Not all courses are offered every year. Consult the Centre for European, Russian, and Eurasian Studies and individual departments for course availability. Consult the Graduate Coordinator for course credit eligibility.

Required

ERE2000Y	Research Seminar

ERE2001H	Gateway Proseminar in European, Russian, and Eurasian Studies

Degree Programs

Financial Economics

MFE

Overview

The **Master of Financial Economics (MFE)** program is a non-thesis degree program offered jointly by the Department of Economics and the Rotman School of Management. The 18-month MFE program provides students with a broad understanding of financial theory as well as the economic framework upon which that theory is based, both in the classroom and through practical real-world experience. Students are expected to complete a mandatory winter or summer internship to enhance their development in the program and prepare themselves for an eventual career in industry. Graduates of the program receive a professional degree called the Master of Financial Economics.

Financial Economics: Financial Economics MFE

Master of Financial Economics

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the program's additional admission requirements stated below.
- An appropriate bachelor's degree with at least a mid-B (75%) standing in the final year of the program.
- Successful completion of courses in calculus, intermediate microeconomics, intermediate macroeconomics, and statistics.
- Applicants who do not hold a degree from a Canadian university must submit an official Graduate Record Examination (GRE) General Test score or a Graduate Management Admission Test (GMAT) score. See the program's website for details.
- Evidence of strong communication skills, both oral and written.
- Relevant work experience and/or previous training in finance is useful but not required.
- Admission is competitive, so accepted applicants will normally have achieved a standing considerably higher than the minimum requirements.

Program Requirements

- **Coursework.** Students must successfully complete a total of **6.5 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE in ECO1010H *Mathematics and Statistics for MA and MFE Students* (Credit/No Credit).
  - 2.0 FCEs from the Department of Economics. These core courses are the same as those required for the MA degree in Economics plus ECO1500H *Financial Economics: Asset Pricing*.
  - 1.5 FCEs from the Rotman School of Management: RSM2306H *Options and Futures Markets*, RSM2300H *Corporate Financing*, and RSM2302H *Security Analysis and Portfolio Management*.
  - 2.5 FCEs in electives from either the Department of Economics or the Rotman School, subject to the condition that at least 1.5 out of the 2.5 elective FCEs must be taken from the Department of Economics.
- Students must complete a one-session **internship**.

Program Length

5 sessions full-time (typical registration sequence: S/F/W/S/F)

Overview

The Graduate Department of Forestry is a unified group of interdisciplinary, diverse, dedicated, and innovative natural, engineering, and social scientists. Research areas include forest conservation science, forest ecosystem management, forest governance and policy, urban forestry, and biomass utilization for sustainable bio-based materials and chemical products.

The Graduate Department of Forestry provides unique, integrative, and applied education to future leaders in these fields. Its research drives the practices and decisions of current leaders who are tasked with successfully managing the competing demands placed on Ontario's, Canada's, and the world's forests in the context of social and environmental change.

Forestry: Forest Conservation MFC

Master of Forest Conservation

Program Description

The professionally oriented Master of Forest Conservation (MFC) is an intensive 16-month course-based program with a strong focus on field and laboratory practical training, Canadian and international field courses, practical internships, and individual and group research. It provides a strong, coherent professional education in forest conservation to students from diverse educational backgrounds. The MFC is accredited by the Canadian Forestry Accreditation Board. Graduates are eligible to begin the process of licensure to become a Professional Forester.

The MFC program can be taken on a full-time, extended full-time, or part-time basis.

Full-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Forestry's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university with an average in each of the final two years of at least mid-B. The MFC program is intended for students with a strong undergraduate background in ecology, environmental sciences, forestry, natural sciences, biology, physical geography, geology, agricultural science, or relevant social sciences. Students from other disciplines will be considered by the department.
- Additional documentation must be submitted to the department with the completed application form, including transcripts, three references, a letter of interest in the MFC program, and a resumé. See the full instructions and forms.

Program Requirements

- The program starts in September and requires full-time intensive involvement throughout.
- Successful completion of **7.5 full-course equivalents (FCEs)** as follows:
  - 6.0 required FCEs in FOR courses.
  - 1.5 elective FCEs.
    - Elective course selection will include the successful completion of one field course (0.5 FCE) from either FOR3011H, FOR1585H, or, in unusual circumstances, another related field course appropriate to the program and approved by the program director.
- Expected chronology:
  - **Year 1: Fall**
    - FOR3000H *Current Issues in Forest Conservation*
    - FOR3001H *Biodiversity of Forest Organisms*
    - FOR3002H *Applied Forest Ecology and Silviculture*
    - FOR3003H *Economics of Forest Ecosystems*
    - FOR3012H *Analytical Methods in Forestry*
  - **Year 1: Spring**
    - FOR3004H *Forest Management Decision Support Systems*
    - FOR3005H *Stresses in the Forest Environment*
    - FOR3009H *Forest Conservation Biology*
    - FOR3010H *Society and Forest Conservation*
  - **Year 1: Summer**
    - FOR3007H^{+} *Internship in Forest Conservation* (Credit/No Credit)
    - FOR3011H *International Forest Conservation Field Camp* **or** FOR1585H *Urban Forest Conservation Field Camp* **or**, in unusual circumstances, alternate eligible field course (0.5 elective FCE)
  - **Year 2: Fall**
    - FOR3006H *Case Study Analysis in Forest Management*
    - FOR3008H *Capstone Project in Forest Conservation*
- Students may take the remaining 1.0 elective FCE in any session of their program for a total program requirement of 7.5 FCEs.

Program Length

4 sessions (typical registration sequence: F/W/S/F)

Time Limit

3 years

Extended Full-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Forestry's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university with an average in each of the final two years of at least mid-B. The MFC program is intended for students with a strong undergraduate background in ecology, environmental sciences, forestry, natural sciences, biology, physical geography, geology, agricultural science, or

relevant social sciences. Students from other disciplines will be considered by the department.
- Additional documentation must be submitted to the department with the completed application form, including transcripts, three references, a letter of interest in the MFC program, and a resumé. See the full instructions and forms.

Program Requirements

- Full-time students can elect an extended full-time (EFT) option. Under this option, students are allowed an extra year to complete their studies while paying the same academic fees as regular full-time students. Students would, however, pay full-time incidental fees for each year of registration. EFT option students must complete FOR3000H, FOR3001H, and FOR3012H in their first session. The remaining MFC course requirements can be completed in any order except that FOR3007H must be taken in the final Summer session and FOR3008H must be taken in the final Fall session.
- Successful completion of **7.5 full-course equivalents (FCEs)** as follows:
  - 6.0 required FCEs in FOR courses
    - FOR3000H *Current Issues in Forest Conservation*
    - FOR3001H *Biodiversity of Forest Organisms*
    - FOR3002H *Applied Forest Ecology and Silviculture*
    - FOR3003H *Economics of Forest Ecosystems*
    - FOR3004H *Forest Management Decision Support Systems*
    - FOR3005H *Stresses in the Forest Environment*
    - FOR3006H *Case Study Analysis in Forest Management*
    - FOR3007H+ *Internship in Forest Conservation* (Credit/No Credit)
    - FOR3008H *Capstone Project in Forest Conservation*
    - FOR3009H *Forest Conservation Biology*
    - FOR3010H *Society and Forest Conservation*
    - FOR3012H *Analytical Methods in Forestry*
  - 1.5 elective FCEs:
    - Elective course selection will include the successful completion of one field course (0.5 FCE) from either FOR3011H *International Forest Conservation Field Camp* **or** FOR1585H *Urban Forest Conservation Field Camp* **or**, in unusual circumstances, another related field course appropriate to the program and approved by the graduate coordinator.
    - Students may take the remaining 1.0 elective FCE in any session of their program.

Program Length

7 sessions (typical registration sequence: F/W/S/F/W/S/F);

Time Limit

3 years

Part-Time Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Forestry's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university with an average in each of the final two years of at least mid-B. The MFC program is intended for students with a strong undergraduate background in ecology, environmental sciences, forestry, natural sciences, biology, physical geography, geology, agricultural science, or relevant social sciences. Students from other disciplines will be considered by the department.
- Additional documentation must be submitted to the department with the completed application form, including transcripts, three references, a letter of interest in the MFC program, and a resumé. See the full instructions and forms.

Program Requirements

- Part-time students must register for FOR3001H *Biodiversity of Forest Organisms* and FOR3012H *Analytical Methods in Forestry* in the Fall session of Year 1. They must complete a minimum of 3.0 full-course equivalents (FCEs) of core courses prior to registering for FOR3011H *International Forest Conservation Field Camp*. The remaining MFC course requirements can be completed in any order except that FOR3007H must be taken in the final Summer session and FOR3008H must be taken in the final Fall session.
- Successful completion of **7.5 full-course equivalents (FCEs)** as follows:
  - 6.0 FCEs in FOR courses:
    - FOR3000H *Current Issues in Forest Conservation*
    - FOR3001H *Biodiversity of Forest Organisms*
    - FOR3002H *Applied Forest Ecology and Silviculture*
    - FOR3003H *Economics of Forest Ecosystems*
    - FOR3004H *Forest Management Decision Support Systems*
    - FOR3005H *Stresses in the Forest Environment*
    - FOR3006H *Case Study Analysis in Forest Management*
    - FOR3007H+ *Internship in Forest Conservation* (Credit/No Credit)
    - FOR3008H *Capstone Project in Forest Conservation*
    - FOR3009H *Forest Conservation Biology*
    - FOR3010H *Society and Forest Conservation*
    - FOR3012H *Analytical Methods in Forestry*
  - 1.5 elective FCEs:
    - Elective course selection will include the successful completion of one field course (0.5 FCE) from either FOR3011H *International Forest Conservation Field Camp* **or** FOR1585H *Urban Forest Conservation Field Camp* **or**, in unusual circumstances, another related field course appropriate to the program and approved by the graduate coordinator.
    - Students may take the remaining 1.0 elective FCE in any session of their program.

Program Length

12 sessions

Time Limit

6 years

Forestry: Forestry MScF

Master of Science in Forestry

Program Description

The Master of Science in Forestry (MScF) is a research- and thesis-based program in areas relevant to faculty expertise and funding. These include forest conservation biology and wildlife ecology, forest biosphere science, invasive species and threats to forest health, environmental sustainability of managed forests, fire and ecosystem management, forest conservation planning, sustainable development and economics, political ecology and governance of forests, social and cultural ecology of forest ecosystems, urban forestry, and forest biomaterials science and engineering.

The department considers applicants from a variety of undergraduate backgrounds including forestry; applied science and engineering; and social, physical, and biological sciences.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Forestry's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university, with a final-year average of at least mid-B. A minimum of B+ is required for the collaborative specialization.
- Additional documentation must be submitted to the department with a completed application form, including transcripts, three references, a letter of intent, a resumé, and a writing sample. See the full instructions and forms.

Program Requirements

- Minimal requirements for this degree are:
  - 1.0 full-course equivalent (FCE) as follows:
    - FOR1001H *Graduate Seminar* (0.5 FCE) plus
    - 0.5 FCE elective.
    - Depending on the student's background, additional or alternative coursework may be required.
  - The preparation of a research thesis of acceptable quality and its oral defence.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Forestry: Forestry PhD

Doctor of Philosophy

Program Description

The PhD is a research- and thesis-based program in areas relevant to faculty expertise and funding. These include forest conservation biology and wildlife ecology, forest biosphere science, invasive species and threats to forest health, environmental sustainability of managed forests, fire and ecosystem management, forest conservation planning, sustainable development and economics, political ecology and governance of forests, social and cultural ecology of forest ecosystems, urban forestry, and forest biomaterials science and engineering.

The department considers applicants from a variety of backgrounds including forestry; applied science and engineering; and social, physical, and biological sciences.

Applicants may enter the PhD program via one of three routes: 1) following completion of an appropriate master's degree; 2) transfer from the University of Toronto MScF program; or 3) direct entry following completion of an appropriate bachelor's degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Forestry's additional admission requirements stated below.
- Applicants may be admitted to the four-year PhD program via completion of an appropriate master's degree from a recognized university with at least an A- standing, in a discipline appropriate to the intended field of doctoral study and research.
- Applicants must submit additional documentation to the department with completed application form, including transcripts, three references, a letter of intent, a resumé, and a writing sample. See the full instructions and forms.

Program Requirements

- Successful completion of **2.0 full-course equivalents (FCEs)** as follows:
  - A minimum of three elective half courses (1.5 FCEs) must be taken. Depending on the student's background and academic goals, additional or alternative coursework may be required by the student's supervisory committee, including courses outside the Graduate Department of Forestry.

    - FOR1001H *Graduate Seminar* (0.5 FCE).
- Successful completion of a qualifying appraisal examination. The examination will be oral and will ordinarily be taken prior to the completion of 24 months in the program. There are three possible outcomes: pass, decision deferred pending supplementary undertakings, or unsatisfactory. If there is more than one negative vote, the outcome will be judged unsatisfactory. Students are permitted one further attempt.
- Preparation and defence of a thesis that is an original and independent research work adding significantly to the existing body of knowledge.

Program Length

4 years

Time Limit

6 years

PhD Program (Transfer)

Transfer Requirements

- Under certain specific conditions, outstanding registered MScF students may be considered by the end of Year 1 in the MScF program for transfer to the PhD program.

Program Requirements

- Successful completion of **2.0 full-course equivalents (FCEs)** as follows:
    - A minimum of three elective half courses (1.5 FCEs) must be taken. To meet this requirement, students can use courses completed towards meeting MScF program requirements. Depending on the student's background and academic goals, additional or alternative coursework may be required by the student's supervisory committee, including courses outside the Graduate Department of Forestry.
    - FOR1001H *Graduate Seminar* (0.5 FCE). Students require credit for FOR1001H only once.
- Successful completion of a qualifying appraisal examination. The examination will be oral and will ordinarily be taken prior to the completion of 24 months in the program. There are three possible outcomes: pass, decision deferred pending supplementary undertakings, or unsatisfactory. If there is more than one negative vote, the outcome will be judged unsatisfactory. Students are permitted one further attempt.
- Preparation and defence of a thesis that is an original and independent research work adding significantly to the existing body of knowledge.

Program Length

5 years

Time Limit

7 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Forestry's additional admission requirements stated below.
- In exceptional circumstances, an extraordinarily strong applicant with an appropriate bachelor's degree from a recognized university may be admitted to the PhD program via direct entry.
- Applicants must submit additional documentation to the department with completed application form, including transcripts, three references, a letter of intent, a resumé, and a writing sample. See the full instructions and forms.

Program Requirements

- Successful completion of **2.0 full-course equivalents (FCEs)** as follows:
    - A minimum of three elective half courses (1.5 FCEs) must be taken. Depending on the student's background and academic goals, additional or alternative coursework may be required by the student's supervisory committee, including courses outside the Graduate Department of Forestry.
    - FOR1001H *Graduate Seminar* (0.5 FCE).
- Successful completion of a qualifying appraisal examination. The examination will be oral and will ordinarily be taken prior to the completion of 24 months in the program. There are three possible outcomes: pass, decision deferred pending supplementary undertakings, or unsatisfactory. If there is more than one negative vote, the outcome will be judged unsatisfactory. Students are permitted one further attempt.
- Preparation and defence of a thesis that is an original and independent research work adding significantly to the existing body of knowledge.

Program Length

5 years

Time Limit

7 years

Forestry: Forestry MFC, MScF, PhD Courses

The Graduate Department of Forestry offers the following courses. Students should consult the departmental website each session to confirm availability. A maximum of one directed

studies course taken with a student's supervisor can be credited towards meeting departmental degree program requirements.

FOR1001H[0]	Graduate Seminar (Credit/No Credit)
FOR1270H	Forest Biomaterial Sciences: Fundamentals, Applications, and the Next Frontier
FOR1288H	Design and Manufacturing of Biomaterials
FOR1294H	Bioenergy and Biorefinery Technology
FOR1412H	Natural Resource Management I (Directed Studies Course)
FOR1413H	Natural Resource Management II (Directed Studies Course)
FOR1416H	Forest Fire Danger Rating
FOR1575H	Urban Forest Conservation
FOR1585H	Urban Forest Conservation Field Camp
JFG1610H	Sustainable Forest Management and Certification
FOR1900H	Advanced Topics in Forestry I (Directed Studies Course)
FOR1901H	Advanced Topics in Forestry II (Directed Studies Course)
FOR3000H	Current Issues in Forest Conservation
FOR3001H	Biodiversity of Forest Organisms
FOR3002H	Applied Forest Ecology and Silviculture
FOR3003H	Economics of Forest Ecosystems
FOR3004H	Forest Management Decision Support Systems
FOR3005H	Stresses in the Forest Environment
FOR3006H	Case Study Analysis in Forest Management
FOR3007H[+]	Internship in Forest Conservation (Credit/ No Credit)
FOR3008H	Capstone Project in Forest Conservation
FOR3009H	Forest Conservation Biology
FOR3010H	Society and Forest Conservation
FOR3011H	International Forest Conservation Field Camp (Credit/No Credit)
FOR3012H	Analytical Methods in Forestry
FOR3013H	Urban and Community Forestry: Leadership and Professional Practice

[0] Course that may continue over a program. The course is graded when completed.

[+] Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.

Degree Programs

French Language and Literature

MA and PhD

- Fields:
  - French Linguistics;
  - French Literature

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Book History and Print Culture
  - French Language and Literature, MA, PhD
- Sexual Diversity Studies
  - French Language and Literature, MA, PhD
- Women and Gender Studies
  - French Language and Literature, MA, PhD

Overview

The Department of French has a rich history dating back to 1853. Since 1925, when the first PhD was granted, the department has remained one of the most reputed departments of its kind in Canada. Many PhD graduates are professors of French in Canadian and foreign universities. Since 1980, the department has graduated more than 200 PhDs.

Graduate students benefit from a number of exceptional resources, including the outstanding collections at the Robarts Library (containing more than 500,000 volumes in French) and the Thomas Fisher Rare Book Library. The department participates in several collaborative specializations and has strong connections with other academic units.

Home to several research groups and projects, the department offers students vital and stimulating collaborative opportunities for research. The department also publishes its own peer-reviewed journal, *Arborescences*, with graduate student support. Graduate students are welcome to participate in many faculty-led research groups.

The department hosts lectures presented by renowned scholars, giving students a chance to network with specialists in their field. Contemporary writers from France and Québec are frequently invited to read from their works.

Department professors with literary studies expertise specialize in every period of French literature, Québec and francophone literature, and all the major types of literary theory and methodology. In linguistics, particular strengths include first and second language acquisition, languages in contact including creole studies, and formal linguistics. Several linguistics professors have strong links and collaborative research projects with Romance and Hispanic linguists and the Department of Linguistics at U of T.

Graduate students organize Friday workshops, a forum for sharing their work in progress, as well as an annual graduate conference. Linguistics students enjoy access to a top-notch Linguistics Laboratory that is equipped with technology for data analysis, for conducting psycholinguistic experiments, a space for meeting and testing subjects, and a French Linguistics library.

The MA program provides advanced academic development in either literature or linguistics, as well as outstanding training in research and communication skills in French, preparing students for doctoral studies and careers in such fields as teaching, government administration, and communications. PhD students receive rigorous research training in either literature or linguistics, culminating in original research for their doctoral thesis. While primarily training students for academic careers at the university or community college levels, the PhD in French can also lead to employment opportunities in editorial work and professions outside academia.

French Language and Literature: French Language and Literature MA; Field: French Linguistics

Master of Arts

Program Description

The Master of Arts program is both a self-contained program and the first stage towards doctoral studies. It has two objectives:

- to allow the student to develop a thorough knowledge of the discipline through a program of coursework in French linguistics and
- to develop an aptitude for research.

It is a 12-month program for full-time students; the program is available on a part-time basis.

At the beginning of their course of study, students meet individually with the Associate Chair, Graduate in order to determine course selection with a view to ensuring that the student has a well-rounded program and, considered in conjunction with the undergraduate degree, has a broad knowledge of the discipline.

Field: French Linguistics

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of French Language and Literature's additional admission requirements stated below.
- B+ average standing or better, with at least B+ in French. A B+ average does not automatically lead to admission.
- Competence in French.
- Concentration in French linguistics, with a minimum of five full courses, or equivalent, in French. A minimum of three of the five full courses, or equivalent, should be in the proposed area of study (i.e., linguistics).
- Admission is based upon the evidence of the supporting letters and the applicant's academic record.

Program Requirements

- Prerequisite work, if necessary.
- **Coursework.** Students must successfully complete a total of **4.0 full-course equivalents (FCEs)** as follows:
  - FRE1103H *Séminaire de linguistique I : Phonétique et phonologie* (0.5 FCE);
  - FRE1104H *Séminaire de linguistique II : Syntaxe* (0.5 FCE);
  - FRE1141H *Séminaire de linguistique III : Linguistique expérimentale et linguistique de corpus* (0.5 FCE);
    - 2.5 FCEs from the regular graduate offerings; **or**

    - 2.0 FCEs and FRE5001H *Research Essay* (0.5 FCE), a mémoire of approximately 35 pages; **or**
    - 1.5 FCEs and FRE5000Y *Research Essay* (1.0 FCE), a 65- to 75-page mémoire.
- Students must maintain a B average in order to be recommended for the degree and must obtain a minimum of mid-B in the Research Essay if taken. Students must also obtain a minimum of mid-B for the graduate seminars in linguistics (FRE1103H, FRE1104H, and FRE1141H).
- Up to 1.0 FCE may be taken outside the department, with the permission of the Associate Chair, Graduate.
- Normally, part-time students take the graduate seminars in linguistics during Year 1.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Doctor of Philosophy

Program Description

The Doctor of Philosophy is necessary preparation for a career in higher education in Canada and abroad which will include teaching and research at an advanced academic level. The PhD includes a combination of advanced seminars, field examinations, a high amount of embedded professional experience in teaching and research, and the presentation of the results of a significant contribution to the discipline in the form of an original dissertation.

The PhD program engages students in a program of study and research in the field of French Linguistics approved by the department. At the beginning of their course of study, students meet individually with the Associate Chair, Graduate in order to determine course selection with a view to ensuring that the student has a well-rounded program and, considered in conjunction with the undergraduate degree, has a broad knowledge of the discipline.

Admission to the PhD program is available via one of two routes: 1) an appropriate master's degree or 2) direct entry with an appropriate bachelor's degree with high academic standing.

Field: French Linguistics

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of French Language and Literature's additional admission requirements stated below.
- An appropriate master's degree in French linguistics with high academic standing from a recognized university, with an average grade of at least an A– in the applicant's overall program.
- An A– average does not automatically lead to admission.
- A formal application and a sample of written work in French completed as part of the applicant's bachelor's or master's program in French linguistics as appropriate. This written work should be a copy of the MA thesis if available.
- Applicants holding a master's degree must submit a statement of purpose (maximum 500 words) in French that clearly outlines the area in which the applicant intends to pursue research in French linguistics.
- Applicants must satisfy the department that they are capable of independent research in French linguistics at an advanced level.
- Admission to all programs for post-graduate degrees is based on the evidence of the supporting letters and the applicant's academic record.

Program Requirements

- **Coursework**. Students must successfully complete a total of **3.5 full-course equivalents (FCEs)** including:
  - FRE1103H *Séminaire de linguistique I : Phonétique et phonologie* (0.5 FCE);
  - FRE1104H *Séminaire de linguistique II : Syntaxe* (0.5 FCE); and
  - FRE1141H *Séminaire de linguistique III : Linguistique expérimentale et linguistique de corpus* (0.5 FCE) (unless already completed); and
  - FRE1201H *Méthodes de recherche* (Credit/No Credit; 0.5 FCE).
- Students must maintain an average grade of at least an A– during Year 1 to remain in good academic standing and to continue in the PhD program. With the department's permission, students may take 1.0 FCE outside the department.
- **Constitution of thesis committee**. Students must submit a form indicating the members of their thesis committee and the provisional title of the thesis. This form must be signed by the faculty member who has agreed to direct the thesis and by the two faculty members who will serve on the student's supervisory committee. Deadline to submit: June 15 of Year 1.
- **Thesis topic**. Students must register a thesis topic with the department. The proposal must be signed by the faculty member who has agreed to direct the thesis and by the two faculty members who will serve on the student's supervisory committee. Deadline to register the topic: September 15 of Year 2.
- **Thesis proposal**. A written thesis proposal, of 15 to 20 pages plus bibliography, must be submitted one week before the date of the oral field examination in April (see below).
- **Language requirements**. Students must demonstrate a reading knowledge of Old French or of another language (excluding French or English), as approved by the department by the end of Year 1.
- **Field examination (written and oral components)**.
  - Students must pass the field examination in Year 2.
  - By November 15 of Year 2, students will submit a text of 20 to 25 pages (double-spaced) in article or thesis chapter format, which outlines the state of the art of current research in the primary domain of the dissertation. This text will form the basis of the short article (to be submitted by March 1) and will be assessed as Pass/Fail.
  - By March 1 of Year 2, students must successfully complete a document in the format of a short article which represents a pilot study or a theoretical puzzle in the field of study driven by data gathered by the student.
  - A student may not proceed to the oral part of the field examination until the **written part** has been successfully completed. In the case of a failure, the full supervisory committee will meet with the student in order to discuss the weaknesses that caused the failure and to make specific recommendations concerning the student's program. The committee may recommend that the written part of the field examination be retaken in whole or in part within a specific period of time; it may also recommend termination of the student's program.

    - The **oral part** of the field examination is to be taken by April 30 of Year 2. It is based on a 15- to 20-page (double-spaced) "thesis proposal" accompanied by an appropriate bibliography. In the case of a failure, the supervisory committee will meet with the student to discuss the weaknesses that caused the failure and to make specific recommendations concerning the student's program. The committee may recommend that the examination be retaken within a specific period of time; it may also recommend termination of the student's program. If the recommendation is to retake the exam, the student may retake the oral part of the examination once only.
- **Meet with supervisory committee**. Between the completion of the written field examination, oral field examination, and the Doctoral Final Oral Examination on the thesis, students will meet with the supervisory committee at least once a year and more frequently if required.
- **Thesis and Doctoral Final Oral Examination** on the thesis.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of French Language and Literature's additional admission requirements stated below.
- An appropriate **bachelor's degree** with high academic standing from a recognized university that includes at least 7.0 full-course equivalents (FCEs) in French language and linguistics, with an average grade of at least an A– in the overall program. A minimum of five of the seven full courses, or equivalent, should be in the proposed area of study (i.e., linguistics). Applicants may request that up to 2.0 FCEs of the 5.0 FCEs in the discipline come from cognate disciplines upon the department's approval. Admission is limited to exceptionally qualified applicants.
- An A– average does not automatically lead to admission.
- A formal application and a sample of written work in French completed as part of the applicant's bachelor's program in French linguistics as appropriate.
- Applicants must satisfy the department that they are capable of independent research in French linguistics at an advanced level.
- Admission to all programs for post-graduate degrees is based on the evidence of the supporting letters and the applicant's academic record.

Program Requirements

- **Coursework**. Students must successfully complete a total of **7.5 FCEs** as follows:
    - In Year 1, complete 4.0 FCEs. In Year 2, complete 3.5 FCEs. These include:
        - FRE1103H *Séminaire de linguistique I : Phonétique et phonologie* (0.5 FCE);
        - FRE1104H *Séminaire de linguistique II : Syntaxe* (0.5 FCE);
        - FRE1141H *Séminaire de linguistique III : Linguistique expérimentale et linguistique de corpus* (0.5 FCE);
        - FRE1201H *Méthodes de recherche* (Credit/No Credit; 0.5 FCE).
- Students must maintain an average grade of at least an A– in Year 1 and Year 2 to remain in good academic standing and to continue in the PhD program. With the department's permission, students may take up to 1.0 FCE outside the department in each of Year 1 and Year 2.
- **Constitution of thesis committee**. Students must submit a form indicating the members of their thesis committee and the provisional title of the thesis. This form must be signed by the faculty member who has agreed to direct the thesis and by the two faculty members who will serve on the student's supervisory committee. Deadline to submit: June 15 of Year 2.
- **Thesis topic**. Students must register a thesis topic with the department. The proposal must be signed by the faculty member who has agreed to direct the thesis and by the two faculty members who will serve on the student's supervisory committee. Deadline to register the topic: September 15 of Year 3.
- **Thesis proposal**. A written thesis proposal, of 15 to 20 pages plus bibliography, must be submitted one week before the date of the oral field examination in April (see below).
- **Language requirements**. Students must demonstrate a reading knowledge of Old French or of another language (excluding French or English), as approved by the department — by the end of Year 2.
- **Field examination (written and oral components)**.
    - Students must pass the field examination in Year 3.
    - By November 15 of Year 3, students will submit a text of 20 to 25 pages (double-spaced) in article or thesis chapter format, which outlines the state of the art of current research in the primary domain of the dissertation. This text will form the basis of the short article (to be submitted by March 1) and will be assessed as Pass/Fail.
    - By March 1 of Year 3, students must successfully complete a document in the format of a short article which represents a pilot study or a theoretical puzzle in the field of study driven by data gathered by the student.
    - A student may not proceed to the oral part of the field examination until the **written part** has been successfully completed. In the case of a failure, the supervisory committee will meet with the student in order to discuss the weaknesses that caused the failure and to make specific recommendations concerning the student's program. The committee may recommend that the written part of the field examination be retaken in whole or in part within a specific period of time; it may also recommend termination of the student's program.

    - The **oral part** of the field examination is to be taken by April 30 of Year 3. It is based on a 15- to 20-page (double-spaced) "thesis proposal" accompanied by an appropriate bibliography. In the case of a failure, the supervisory committee will meet with the student to discuss the weaknesses that caused the failure and to make specific recommendations concerning the student's program. The committee may recommend that the examination be retaken within a specific period of time; it may also recommend termination of the student's program. If the recommendation is to retake the exam, the student may retake the oral part of the examination once only.
- **Meet with supervisory committee**. Between the completion of the written field examination, oral field examination, and the Doctoral Final Oral Examination on the thesis, students will meet with the supervisory committee at least once a year and more frequently if required.
- **Thesis and Doctoral Final Oral Examination** on the thesis.

The Doctor of Philosophy is necessary preparation for a career in higher education in Canada and abroad which will include teaching and research at an advanced academic level. The PhD includes a combination of advanced seminars, field examinations, a high amount of embedded professional experience in teaching and research, and the presentation of the results of a significant contribution to the discipline in the form of an original dissertation.

The PhD program engages students in a program of study and research in French literature approved by the department. At the beginning of their course of study, students meet individually with the Associate Chair, Graduate in order to determine course selection with a view to ensuring that the student has a well-rounded program and, considered in conjunction with the undergraduate degree, has a broad knowledge of the discipline.

Admission to the PhD program is available via one of two routes: 1) an appropriate master’s degree or 2) direct entry with an appropriate bachelor’s degree with high academic standing.

Field: French Literature

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of French Language and Literature's additional admission requirements stated below.
- An appropriate master's degree in French literature with high academic standing from a recognized university, with an average grade of at least an A– in the applicant's overall program.
- An A– average does not automatically lead to admission.
- A formal application and a sample of written work in French completed as part of the applicant's bachelor's or master's program in French literature as appropriate. This written work should be a copy of the MA thesis if available.
- Applicants holding a master's degree must submit a statement of purpose (maximum 500 words) in French that clearly outlines the area in which the applicant intends to pursue research in French literature.
- Applicants must satisfy the department that they are capable of independent research in French literature at an advanced level.
- Admission to all programs for post-graduate degrees is based on the evidence of the supporting letters and the applicant's academic record.

Program Requirements

- **Coursework**. Students must successfully complete a total of **3.5 full-course equivalents (FCEs)** including:
    - FRE1202H *Séminaire de littérature 1 : théorie* (0.5 FCE);
    - FRE1203H *Séminaire de littérature 2 : période* (0.5 FCE);
    - FRE1204H *Séminaire de littérature 3 : genre* (0.5 FCE) (unless these courses or their equivalents have already been completed); and
    - FRE1201H *Méthodes de recherche* (Credit/No Credit; 0.5 FCE).
- Students must maintain an average grade of at least an A– during Year 1 to remain in good academic standing and to continue in the PhD program. With the department's permission, students may take 1.0 FCE outside the department.
- **Constitution of thesis committee**. Students must submit a form indicating the members of their thesis committee and the provisional title of the thesis. This form must be signed by the faculty member who has agreed to direct the thesis and by the two faculty members who will serve on the student’s supervisory committee. Deadline to submit: June 15 of Year 1.
- **Thesis topic**. Students must register a thesis topic with the department. The proposal must be signed by the faculty member who has agreed to direct the thesis and by the two faculty members who will serve on the student's supervisory committee. Deadline to register the topic: September 15 of Year 2.

- **Thesis proposal**. A written thesis proposal, of 15 to 20 pages plus bibliography, must be submitted one week before the date of the oral field examination in April (see below).
- **Language requirements**. Students must demonstrate a reading knowledge of Old French or of another language (excluding French or English), as approved by the department by the end of Year 1.
- **Field examination (written and oral components)**.
  - Students must pass the field examination in Year 2.
  - By November 15 of Year 2, students will produce a written document of approximately 10 to 15 pages (double-spaced) outlining the major area — the literary corpus, the methodological and theoretical perspectives and approaches — from which the thesis will be derived, together with a thematically organized bibliography indicating the primary and secondary works relevant to this area that the student is expected to know in detail. The "outline of the major area" will form the basis for the written part of the field examination (to be submitted by March 1) and will be assessed as Pass/Fail.
  - By March 1 of Year 2, students must successfully complete a take-home examination designed to test the student's knowledge of the general area of their research; the examination questions are given to students a week ahead of the examination.
  - A student may not proceed to the oral part of the field examination until the **written part** has been successfully completed. In the case of a failure, the full supervisory committee will meet with the student in order to discuss the weaknesses that caused the failure and to make specific recommendations concerning the student's program. The committee may recommend that the written part of the field examination be retaken in whole or in part within a specific period of time; it may also recommend termination of the student's program.
  - The **oral part** of the field examination is to be taken by April 30 of Year 2. It is based on a 15- to 20-page (double-spaced) "thesis proposal" accompanied by an appropriate bibliography. In the case of a failure, the supervisory committee will meet with the student to discuss the weaknesses that caused the failure and to make specific recommendations concerning the student's program. The committee may recommend that the examination be retaken within a specific period of time; it may also recommend termination of the student's program. If the recommendation is to retake the exam, the student may retake the oral part of the examination once only.
- **Meet with supervisory committee**. Between the completion of the written field examination, oral field examination, and the Doctoral Final Oral Examination on the thesis, students will meet with the supervisory committee at least once a year and more frequently if required.
- **Thesis and Doctoral Final Oral Examination** on the thesis.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of French Language and Literature's additional admission requirements stated below.
- An appropriate **bachelor's degree** with high academic standing from a recognized university that includes at least 7.0 full-course equivalents (FCEs) in French language and literature, with an average grade of at least an A– in the overall program. A minimum of five of the seven full courses, or equivalent, should be in the proposed area of study (i.e., literature). Applicants may request that up to 2.0 FCEs of the 5.0 FCEs in the discipline come from cognate disciplines upon the department's approval. Admission is limited to exceptionally qualified applicants.
- An A– average does not automatically lead to admission.
- A formal application and a sample of written work in French completed as part of the applicant's bachelor's program in French literature as appropriate.
- Applicants must satisfy the department that they are capable of independent research in French literature at an advanced level.
- Admission to all programs for post-graduate degrees is based on the evidence of the supporting letters and the applicant's academic record.

Program Requirements

- **Coursework**. Students must successfully complete a total of 7.5 FCEs as follows:
  - In Year 1, complete 4.0 FCEs. In Year 2, complete 3.5 FCEs. These include:
    - FRE1202H *Séminaire de littérature 1 : théorie* (0.5 FCE);
    - FRE1203H *Séminaire de littérature 2 : période* (0.5 FCE);
    - FRE1204H *Séminaire de littérature 3 : genre* (0.5 FCE); and
    - FRE1201H *Méthodes de recherche* (Credit/No Credit; 0.5 FCE).
- Students must maintain an average grade of at least an A– in Year 1 and Year 2 to remain in good academic standing and to continue in the PhD program. With the department's permission, students may take up to 1.0 FCE outside the department in each of Year 1 and Year 2
- **Constitution of thesis committee**. Students must submit a form indicating the members of their thesis committee and the provisional title of the thesis. This form must be signed by the faculty member who has agreed to direct the thesis and by the two faculty members who will serve on the student's supervisory committee. Deadline to submit: June 15 of Year 2.
- **Thesis topic**. Students must register a thesis topic with the department. The proposal must be signed by the faculty member who has agreed to direct the thesis and by the two faculty members who will serve on the student's supervisory committee. Deadline to register the topic: September 15 of Year 3.
- **Thesis proposal**. A written thesis proposal, of 15 to 20 pages plus bibliography, must be submitted one week

before the date of the oral field examination in April (see below).

- **Language requirements**. Students must demonstrate a reading knowledge of Old French or of another language (excluding French or English), as approved by the department — by the end of Year 2.
- **Field examination (written and oral components)**.
  - Students must pass the field examination in Year 3.
  - By November 15 of Year 3, students will produce a written document of approximately 10 to 15 pages (double-spaced) outlining the major area — the literary corpus, the methodological and theoretical perspectives and approaches — from which the thesis will be derived, together with a thematically organized bibliography indicating the primary and secondary works relevant to this area that the student is expected to know in detail. The "outline of the major area" will form the basis for the written part of the field examination (to be submitted by March 1) and will be assessed as Pass/Fail.
  - By March 1 of Year 3, students must successfully complete a take-home examination designed to test the student's knowledge of the general area of their research; the examination questions are given to students a week ahead of the examination.
  - A student may not proceed to the oral part of the field examination until the written part has been successfully completed. In the case of a failure, the full supervisory committee will meet with the student in order to discuss the weaknesses that caused the failure and to make specific recommendations concerning the student's program. The committee may recommend that the written part of the field examination be retaken in whole or in part within a specific period of time; it may also recommend termination of the student's program.
  - The **oral part** of the field examination is to be taken by April 30 of Year 3. It is based on a 15- to 20-page (double-spaced) "thesis proposal" accompanied by an appropriate bibliography. In the case of a failure, the supervisory committee will meet with the student to discuss the weaknesses that caused the failure and to make specific recommendations concerning the student's program. The committee may recommend that the examination be retaken within a specific period of time; it may also recommend termination of the student's program. If the recommendation is to retake the exam, the student may retake the oral part of the examination once only.
- **Meet with supervisory committee**. Between the completion of the written field examination, oral field examination, and the Doctoral Final Oral Examination on the thesis, students will meet with the supervisory committee at least once a year and more frequently if required.
- **Thesis and Doctoral Final Oral Examination** on the thesis.

French Language and Literature: French Language and Literature MA, PhD Courses

Not all courses are offered every year. Please consult the department regarding course availability.

Core Courses

Linguistics Courses

FRE1103H	Séminaire de linguistique I : Phonétique et phonologie
FRE1104H	Séminaire de linguistique II : Syntaxe
FRE1141H	Séminaire de linguistique III : Linguistique expérimentale et linguistique de corpus

Literature Courses

FRE1202H	Séminaire de littérature 1 : théorie
FRE1203H	Séminaire de littérature 2 : période
FRE1204H	Séminaire de littérature 3 : genre

Linguistic and Literature Courses

FRE1201H	Méthodes de recherche (Credit/No Credit — for PhD students only)

Elective Courses

Not all courses are offered every year. Please consult the department regarding course availability.

Linguistics Courses

FRE1002H+	Advanced Oral and Written French for Academic Purposes
FRE1128H	Le français en contact
FRE1132H	Problèmes de phonologie : les créoles à base lexicale française
FRE1136H	Arguments, structures et représentations en français
FRE1137H	Les mots complexes : études de cas en morphologie
FRE1138H	Bilinguisme et acquisition du langage
FRE1141H	Séminaire de linguistique III — Linguistique expérimentale et linguistique de corpus
FRE1143H	The Evolution of the French Language in Society Throughout the Centuries

FRE1144H	DP Structure and Adjunct Linearization in French and English
FRE1145H	La variation linguistique en français hexagonal
FRE1146H	Acquisition of Sociolinguistic Competence in L2 French
FRE1147H	Questions et réponses : aspects syntaxiques, phonologiques et discursifs (prerequisites: FRE1104H, FRE1141H)
FRE1148H	Les sujets postverbaux en français (et au-delà) (prerequisite: FRE1104H)
FRE1149H	Outils computationnels pour linguistes
FRE1164H	Initiation au français médiéval

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Literature Courses

FRE1612H	Satire et parole libre dans la littérature des XVIe et XVIIe siècles
FRE1613H	Les récits de voyage dans la littérature française des XVIe et XVIIe siècles
FRE1614H	Le roman aux XVIe et XVIIe siècles
FRE1615H	Littérature française et philosophie
FRE1815H	Théorie de l'histoire
FRE1901H	Le récit de voyage au XIXe siècle
FRE1905H	Baudelaire et la modernité symboliste (1850–1900)
FRE1906H	Théories du rire et analyse littéraire du genre comique
FRE1928H	Zola et le naturalisme : du « roman exprimental » au « roman nouveau »
FRE2004H	Formes et voies romanesques de l'extrême contemporain
FRE2007H	Littérature et éthique : nouveaux textes, nouvelles problématiques
FRE2011H	Écrire l'athéisme. perspectives littéraires et philosophiques
FRE2024H	Altérité et représentation : littératures d'Afrique et des Caraïbes
FRE2035H	Autour de l'intime en France: les écrits contemporains des femmes
FRE2036H	Configurations du genre sexuel dans la prose contemporaine des femmes
FRE2037H	Écriture et folie
FRE2039H	Roman et critique sociale aux XXe et XXIe siècles
FRE2041H	Mémoires (Post)coloniales
FRE2042H	Intertextualité
FRE2078H	Altérité : formes et significations
FRE2079H	Le Roman postmoderne
FRE2100H	Du texte à l'image : Images photographiques et cinématographiques dans quelques textes contemporains
FRE2102H	Enjeux des productions culturelles autochtones de langue française au Canada
FRE2105H	Écritures du moi: de la représentation textuelle à la représentation visuelle du sujet écrivant
FRE2107H	Le récit fantastique québécois : formes et transformations
FRE2109H	Histoire des pratiques littéraires et culturelles des femmes au Québec (1830–1960)
FRE2202H	Littérature et presse au Québec (XXe–XXIe siècles)

Other Courses

FRE4000Y	Reading Course
FRE4001H	Reading Course
FRE5000Y[0]	Research Essay (MA)
FRE5001H[0]	Research Essay (MA)

[0] *Course that may continue over a program. The course is graded when completed.*

Joint Courses

JFC1813H	Littérature de contact et pensée anthropologique en France du XVIe au XVIIIe siècle / Literature of Contact and Anthropological Thought, 16th–18th Century
JFC5025H	Feminism and Postmodernism: Theory and Practice
JFC5056H	Autobiography, Photography, Narrativity
JFC5105H	Collections of Knowledge: Encyclopedism and Travel Literature in Early Modern Europe (1500–1800)
JFC5120H	The Gift: Stories of a Paradigm
JFC5129H	Performative Autobiographical Acts: Painted and Photographic Representations of Self in Personal and Political Testimonials
JFC5136H	Allegory and Allegorism in Literature and Fine Arts

JFF1100H	Surréalisme et cinéma / Surrealism and French Cinema
JFF1101H	The Art of Exploration: How to Think the World
JRL1111H	Second Language Acquisition of Romance Phonology

Cross-Listed Courses

Book History and Print Culture

BKS1001H	Introduction to Book History
BKS1002H	Book History in Practice
BKS2000H	Advanced Seminar in Book History and Print Culture

Medieval Studies

MST3232H	Vernacular Literature in Medieval Europe: Status and Function
MST3154H	Book History and Print Culture
MST3155H	Middle French Literature

Sexual Diversity Studies

SDS1000H	Theoretical and Methodological Issues in Sexual Diversity Studies

Geography and Planning

Geography and Planning: Introduction

Degree Programs

Geography

MA, MSc, and PhD

- Fields:
  - Environmental Geography and Resource Management;
  - Historical/Social/Cultural Geography;
  - Physical Geography and Natural Systems;
  - Spatial Information Systems;
  - Urban/Economic Geography

Planning

MScPl

- Concentrations:
  - Economic Planning and Policy;
  - Environmental Planning;
  - Social Planning and Policy;
  - Transportation Planning and Infrastructure;
  - Urban Design;
  - Urban Planning and Development

PhD

- Fields:
  - Cities in Global Context: Economic Development and Social Planning;
  - Environmental and Sustainability Planning;
  - Urban Development, Design and the Built Environment

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Community Development
  - Geography, MA
  - Planning, MScPl
- Contemporary East and Southeast Asian Studies
  - Geography, MA
  - Planning, MScPl
- Development Policy and Power
  - Geography, MA
- Diaspora and Transnational Studies
  - Geography, MA, MSc, PhD
- Environmental Studies
  - Geography, MA, MSc, PhD
  - Planning, MScPl, PhD
- Environment and Health
  - Geography, MA, MSc, PhD
  - Planning, MScPl, PhD
- Ethnic, Immigration and Pluralism Studies
  - Geography, MA, PhD
- Food Studies
  - Geography, MA, MSc, PhD
- Global Health (U of T Global Scholar)
  - Geography, MA, MSc, PhD
  - Planning, MScPl, PhD
- Indigenous Health
  - Geography, MA, PhD
- Jewish Studies
  - Geography, PhD
- Sexual Diversity Studies
  - Geography, MA, PhD
- South Asian Studies
  - Geography, MA, PhD
- Women and Gender Studies
  - Geography, MA, MSc, PhD
  - Planning, MScPl, PhD

Overview

The Department of Geography and Planning offers facilities for research leading to the degrees of **Master of Arts** (MA), **Master of Science** (MSc), **Master of Science in Planning** (MScPl), and **Doctor of Philosophy** (PhD) in either Geography or Planning. The PhD program prepares students for academic careers in teaching and research. Some may also pursue an advanced career in the public or non-profit sectors, given the rising demand outside of academia for people with a PhD credential.

In Geography, faculty conduct research in the following areas: geomorphology, climatology, hydrology, biogeography, pedology, environmental assessment and sustainable natural resource management, international development, industrial innovation, urban and economic geography, cultural and historical geography, gender studies, social geography, regional analysis, the history and philosophy of geography, remote sensing, computer cartography, spatial statistics, topics in land/geographic information systems, and quantitative analysis. The territories of special concern are Canada, the United States, Latin America, the Caribbean, Northwestern and Central Europe, East Asia, South Asia, and the former Soviet Union.

In Planning, faculty work involves social, economic, cultural, and other vital considerations. In spatial scale, it ranges from the design of individual communities to policy planning at the national level to international development. Planning specializations include land use, transportation, urban design, social policy, public health, economic development, international development, and the environment.

Geography and Planning: Geography MA

Master of Arts

Program Description

The MA program offers studies in areas of human geography, including historical/social/cultural geography, urban/economic geography, environmental geography and resource management and some areas of spatial information systems. Applicants should apply to the MA degree program (rather than the MSc) if their planned research contains a substantial human geography component and if two-thirds of their planned coursework comprises Geography courses accepted by the department as social science courses.

MA Program (Thesis Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Geography and Planning's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university with a minimum standing equivalent to at least a University of Toronto B+ in the final two years.
- Applicants are expected to have completed at least 4.0 full-course equivalents (FCEs) in geography or a related field. Applicants lacking the minimum requirements should consider doing qualifying work at the undergraduate level prior to application. Such work should be undertaken in consultation with the Graduate Coordinator. Applicants who hold an appropriate bachelor's degree but are changing disciplines or require further preparatory work, may be required to complete an additional year of graduate-level coursework.

Program Requirements

- Progress into the second session is dependent on achieving an overall B average in the first session and satisfactory progress as outlined in the Graduate Geography Handbook.
- Students undertake research leading to the preparation of a thesis (RST9999Y), in conjunction with at least the equivalent of **1.5 FCEs** in coursework including:
  - 0.5 FCE core course GGR1105H *Human Geography Core Course*;
  - 0.5 FCE elective course in geography or from an approved list of courses available from the department; and
  - 0.5 FCE elective course that may be taken inside or outside the department.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

MA Program (Research Paper Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Geography and Planning's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university with a minimum standing equivalent to at least a University of Toronto B+ in the final two years.
- Applicants are expected to have completed at least 4.0 full-course equivalents (FCEs) in geography or a related field. Applicants lacking the minimum requirements should consider doing qualifying work at the undergraduate level prior to application. Such work should be undertaken in consultation with the Graduate Coordinator. Applicants who hold an appropriate bachelor's degree but are changing disciplines or require further preparatory work, may be required to complete an additional year of graduate-level coursework.

Program Requirements

- Progress into the second session is dependent on achieving an overall B average in the first session and satisfactory progress as outlined in the Graduate Geography Handbook.
- Students will undertake research leading to the preparation of a major research paper (GGR1100Y, 1.0 FCE), in conjunction with the equivalent of **3.0 graduate FCEs** in coursework including:
  - 0.5 FCE core course GGR1105H *Human Geography Core Course*;
  - 1.5 FCE elective courses in geography or from an approved list of courses available from the department; and
  - 1.0 FCE elective courses, 0.5 FCE of which must be taken outside the department.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Geography and Planning: Geography MSc

Master of Science

Program Description

The MSc program offers studies in the areas of physical geography, spatial information systems and some areas of environmental studies. Applicants should apply to the MSc degree program (rather than the MA) if their planned research contains a substantial physical science component and if two-thirds of their planned coursework comprises Geography courses accepted by the department as physical science courses.

MSc Program (Thesis Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Geography and Planning's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university with a minimum standing equivalent to at least a University of Toronto B+ in the final two years.
- Applicants are expected to have completed at least 4.0 full-course equivalents (FCEs) in geography or a related discipline. - Students will undertake research leading to the preparation of a major research paper (GGR1100Y; 1.0 FCE), in conjunction with the equivalent of **3.0 graduate FCEs** in coursework including:
  - 0.5 FCE core course GGR1200H *Physical Geography Core Course*;
  - 1.5 FCE elective courses in geography or from an approved list of courses available from the department; and
  - 1.0 FCE elective courses, 0.5 FCE of which must be taken outside the department.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Geography and Planning: Geography PhD Fields: 1) Physical Geography and Natural Systems; 2) Spatial Information Systems

Doctor of Philosophy

Program Description

The PhD is primarily a research degree. A program of study is designed for each student to ensure competence in a field of research and to facilitate the preparation of a dissertation.

Applicants may enter the PhD program via one of two routes: 1) following completion of a master's degree or 2) direct entry after completing a bachelor's degree.

Fields:
Physical Geography and Natural Systems; Spatial Information Systems

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Geography and Planning's additional admission requirements stated below.
- An appropriate master's degree from a recognized university, with a minimum standing equivalent to at least a University of Toronto A–.

Program Requirements

- Complete a minimum of **1.5 full-course equivalents (FCEs)** in coursework as follows:
  - 0.5 FCE core course GGR1200H *Physical Geography Core Course*. Students who have taken GGR1200H at the master's level may take an alternative geography course*;*
  - 0.5 FCE in geography courses or from a list of approved courses available from the department;
  - 0.5 FCE in elective courses which may be taken in any departments.
  - Students who hold an appropriate master's degree but are changing disciplines or require further preparatory work may be required to complete additional coursework.
- Submit a **research statement** concerning the proposed PhD topic and the scope of the PhD examination by the end of April in Year 1.
- Pass a **PhD examination** in the general field in which research is being undertaken between June of Year 1 and no later than December of Year 2. The scope and areas of concentration of the exam are to be determined jointly by the supervisory committee and the student. There are two components of the PhD exam:
  - A written exam (options are an eight-hour closed room exam on campus in one day or over two days, or a five-day off-campus exam).
  - An oral exam to take place within one week of the written exam.
- A student who fails the PhD examination may retake the exam once within six months. Failure of the second exam may result in a recommendation for termination from the program.
- Acquire knowledge of a **foreign language** necessary for research upon the recommendation of the supervisory committee.
- Submit a **research proposal** that is acceptable to the supervisory committee, normally by the end of June of Year 2 and no later than September of Year 3.
- Unless otherwise specified, two years of **residence** are required whereby the student is required to be on campus full-time and consequently in such geographical proximity as to be able to participate fully in University activities associated with the program.
- Complete a **thesis** embodying the results of original investigation, conducted by the candidate, on the approved topic from a major area of study. The thesis shall constitute a significant contribution to the knowledge of the field and must be conducted while the student is registered in the PhD program.
- See the Graduate Geography Handbook and visit the department's website.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Geography and Planning's additional admission requirements stated below.
- In exceptional cases and at the discretion of the department, admission to the PhD program by direct entry may be approved for applicants with an overall A average and an appropriate bachelor's degree from a recognized university.

Program Requirements

- Complete a minimum of **3.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE core course GGR1200H *Physical Geography Core Course;*

    - 0.5 FCE in geography courses or from a list of approved courses available from the department;
    - 2.0 FCE in elective courses which may be taken in any department.
- Submit a **research statement** concerning the proposed PhD topic and the scope of the PhD examination by the end of April in Year 1.
- Pass a **PhD examination** in the general field in which research is being undertaken between June of Year 1 and no later than December of Year 2. The scope and areas of concentration of the exam are to be determined jointly by the supervisory committee and the student. There are two components of the PhD exam:
    - A written exam (options are an eight-hour closed room exam on campus in one day or over two days, or a five-day off-campus exam).
    - An oral exam to take place within one week of the written exam.
- A student who fails the PhD examination may retake the exam once within six months. Failure of the second exam may result in a recommendation for termination from the program.
- Acquire knowledge of a **foreign language** necessary for their research upon the recommendation of their supervisory committee.
- Submit a **research proposal** that is acceptable to the supervisory committee, normally by the end of June of Year 2 and no later than September of Year 3.
- Unless otherwise specified, two years of **residence** are required whereby the student is required to be on campus full-time and consequently in such geographical proximity as to be able to participate fully in the University activities associated with the program.
- Complete a **thesis** embodying the results of original investigation, conducted by the candidate, on the approved topic from a major area of study. The thesis shall constitute a significant contribution to the knowledge of the field and must be conducted while the student is registered in the PhD program.
- PhD degree program details are fully described in the Graduate Geography Handbook and the department's website.

Geography and Planning: Geography MA, MSc, PhD Courses

The following graduate courses will be available on demand and subject to faculty resources. Not all courses are given every year, and some members of the graduate faculty are on research leave. Please consult the departmental graduate office. The 2000-level courses are normally open to PhD students only.

Core Courses

GGR1105H	Human Geography Core Course
GGR1110H	Issues in Geographic Thought and Practice
GGR1200H	Physical Geography Core Course

Research Methods Courses

GGR1111H	Social Research Methods
JPG1120H	Advanced Qualitative Research: Methodology and Epistemological Foundations for Planning and Geography
JPG1140H	Discourse Analysis Methodology
JPG1170H	Statistical Testing and Analysis
GGR1218H	Quantitative, Open-Source Methods in Physical Geography Research
JPG1400H	Advanced Quantitative Methods

Individual Topics Courses

GGR1149H,Y	Readings in Selected Topics
GGR2149H,Y	Readings in Selected Topics
GGR2150H,Y	Advanced Seminar in Selected Topics
JPG2150H	Advanced Seminars in Selected Topics
GGR2151H	Advanced Seminars in Selected Topics II
JPG2151H	Advanced Seminars in Selected Topics II

Environmental and Resource Geography

GGR1404H	Global Warming (exclusion: GGR314H1)
GGR1406H	Energy Supply and Use (exclusion: GGR333H1)
GGR1407H	Efficient Use of Energy (exclusion: GGR347H1)
GGR1408H	Carbon-Free Energy (exclusions: GGR1406H, GGR348H1)
GGR1411H	Nature and Justice in the Anthropocene
JGE1413H	Workshop in Environmental Impact Assessment
JPG1421H	Health in Urban Environments
GGR1422H	The Geography of Urban Air Pollution
JGE1425H	Livelihoods, Poverty, and Environment in the Developing Countries
JPG1426H	Natural Resources, Difference, and Conflict
JPG1427H	The (Re)Localization of Food Production: Debates and Controversies
JPG1428H	Greening the City: Urban Environmental Planning and Management
JPG1429H	Political Ecology of Food and Agriculture
JFG1610H	Sustainable Forest Management and Certification

Geographical Information Analysis

JPG1906H	Geographic Information Systems
JPG1909H	Advanced GIS Data Processing
GGR1911H	Remote Sensing (exclusions: GGR337H1, GGR437H1, GGR1912H)
GGR1912H	Advanced Remote Sensing (exclusions: GGR337H1, GGR437H1, GGR1911H)
JPG1914H	Geographic Information Systems Research Project (exclusion: GGR462H1)
GGR1916H	Remote Sensing of Vegetation Traits and Function (exclusion: GGR414H1S)
GGR1921H	Land/Geographic Information Systems

Historical, Social, and Cultural Geography

JPG1503H	Space, Time, Revolution
JPG1506H	State/Space/Difference: Understanding the New Social Geography of the State
JPG1511H	The Commons: Geography, Planning, Politics
JPG1520H	Contested Geographies of Class-Race Formations
JPG1672H	Land and Justice
GGR1705H	Historical Geographies of Modernity
JPG1706H	Violence and Security
GGR1714H	Geographies of Citizenship
JPG1804H	Space, Power, and Geography: Understanding Spatiality
JPG1805H	Transnationalism, Diaspora, and Gender

GGR1807H	Geographies of Postcoloniality and Development: Exploring the 'Infrastructure Turn'
JPG1809H	Spaces of Work: Value, Identity, Agency, Justice
GGR1811H	Troubling Militarism: Space, Affect, Economy
JPG1812Y	Planning for Change: Community Development in Practice
JPG1813H	Planning and Social Policy
JPG1815H	Political Economy, the Body, and Health
GGR1816H	Geographies of Secularism, Islam, and Gender
JPG1818H	The Geography and Planning of Climate Action and Activism
GGR1821H	China Development Seminar
GGR1822H	Queer Geographies
JPG1825H	Black Geographies of the Atlantic
JPG1830H	Utopia/Dystopia
GGR1832H	Geographies of Decolonization and Liberation
JPG1835H	Anti-Colonial Planning: Theory and Practice

Physical Geography

GGR1202H	Sedimentation and Fluvial Geomorphology (exclusion: GGR301H)
GGR1215H	Advanced Watershed Hydroecology (exclusion: GGR413H1)
GGR1216H	Advanced Biogeochemical Processes (exclusion: GGR406H1)
GGR1217H	The Climate of the Arctic (exclusion: GGR484H1)
GGR1302H	Advanced Hydrology and Water Quality (exclusion: GGR407H1)
GGR1315H	The Cryosphere (exclusion: GGR317H1)

Urban and Economic Geography

JPG1502H	Global Urbanism and Cities of the Global South
JPG1504H	Institutionalism and Cities: Space, Governance, Property and Power
JPG1507H	Housing Markets and Housing Policy Analysis
JPG1512H	Place, Politics, and the Urban
JPG1516H	Declining Cities
JPG1518H	Sustainability and Urban Communities
JPG1554H	Transportation and Urban Form
JPG1558H	The History and Geography of Cycles and Cycling
JPG1605H	The Post-Industrial City
JPG1607H	Geography of Competition
JGE1609H	Cities, Industry, and the Environment
GGR1610H	Geography of Finance and Financial Crisis
JPG1615H	Planning and the Social Economy
JPG1616H	The Cultural Economy
JPG1617H	Organization of Economies and Cities
JPG1621H	Innovation and Governance
JPG1660H	Regional Dynamics
JPG1670H	Regional Economic Analysis
JPG1814H	Cities and Immigrants
JPG1820H	Disability and the City

Geography and Planning: Planning MScPl

Master of Science in Planning

Program Description

Students normally enrol for two years of full-time study, although part or all of the requirements of the program may be met by part-time study, with the approval of the Program Director.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Geography and Planning's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university, with a minimum final-year standing in the social or life sciences, the humanities, or the professions, equivalent to at least a University of Toronto B+. Knowledge of introductory economics and statistics, as well as word processing and spreadsheet skills, is preferred prior to entry.

Program Requirements

- The program consists of **8.0 full-course equivalents (FCEs)** plus the PLA4444Y **internship**, taken over two years, as follows:
  - 4.0 FCEs in core courses
  - 4.0 FCEs chosen from the list of electives and from the offerings of other departments, centres, and institutes. At least 2.5 FCEs of these electives must fit into an approved concentration in one of the following six fields:

        - Economic Planning and Policy
        - Environmental Planning
        - Social Planning and Policy
        - Transportation Planning and Infrastructure
        - Urban Design
        - Urban Planning and Development
    - PLA4444H *Internship* (0.0 FCE). Students are required to pursue a planning internship between Years 1 and 2 of the program. Part-time students who are currently employed in a planning environment may be exempted from this requirement; however, the Planning Director retains final discretion in the decision.
- Progress into Year 2 of the program is normally dependent upon the achievement of an overall B average in the first year. Equivalent provisions apply to the part-time option.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S);
12 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Geography and Planning: Planning PhD

Doctor of Philosophy

Program Description

The PhD is primarily a research degree. A program of study is designed for each student to ensure competence in a field of research and to facilitate the preparation of a dissertation.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Geography and Planning's additional admission requirements stated below.
- An appropriate master's degree in planning or a related field, or its equivalent from a recognized university, with a minimum standing equivalent to at least a University of Toronto A– and demonstrated competence in analytical methods or successful completion of one of two methods courses in the current master's program.

Program Requirements

All PhD students must:

- Take **3.0 full-course equivalents (FCEs)**, if they hold a master's degree in planning comparable to the U of T MSc in Planning, as follows:
    - 1.5 FCEs in core courses
    - 1.5 FCEs in electives (at least 0.5 elective FCE must be outside the Planning program).

  Students who enter with a master's degree in a related field may be required to take up to an additional 1.0 FCE depending on their background and experience.
- Submit a **research statement** concerning the proposed PhD topic and the scope of the PhD examination by the end of April in Year 1.
- Pass a **PhD examination** in the general field in which research is being undertaken between June of Year 1 and no later than December of Year 2. The scope and areas of concentration of the exam are to be determined jointly by the supervisory committee and the student. There are two components of the PhD exam:
    - a written exam (options are an eight-hour closed room exam on campus in one day or over two days, or a five-day off-campus exam); and
    - an oral exam to take place within one week of the written exam.

  A student who fails the PhD examination may retake the exam once within six months. A failure of the second exam may result in recommendation for termination of the student's program.
- Acquire knowledge of a **foreign language** necessary for their research upon the recommendation of their committee.
- Submit a **research proposal** that is acceptable to their research committee, normally by the end of June of Year 2 and no later than September of Year 3.
- Be in **residence** for two years, unless otherwise specified, during which the student is required to be on campus full-time and consequently in such geographical proximity as to be able to participate fully in the University activities associated with the program.
- Complete a **thesis** embodying the results of original investigation, conducted by the candidate, on the approved topic from a major area of study. The thesis shall constitute a significant contribution to the knowledge of the field and must be conducted while the student is registered in the PhD program.
- PhD degree program details are fully described in the Graduate Geography Handbook and the department's website.

Program Length

4 years full-time

Time Limit

6 years full-time

Geography and Planning: Planning MScPl, PhD Courses

All courses are not given every year; some faculty members may be on research leave. Please consult the departmental graduate office for details.

Core Courses for the MScPl

PLA1101H	Planning History, Thought, and Practice
PLA1102H	Planning Decision Methods I
PLA1103H	Legal Basis of Planning
PLA1105H	Planning Decision Methods II
PLA1106H	Workshop in Planning Practice
PLA1107Y	Current Issues Paper
PLA1520H	Project Management and Conflict Resolution for Planners

Core Courses for the PhD in Planning

GGR1111H	Social Research Methods (or a methods course in a related department subject to the approval of the supervisor)
PLA2000H	Advanced Planning Theory
PLA2001H	Planning Colloquium (Credit/No Credit)

Elective Courses

JPG1120H	Advanced Qualitative Research: Methodology and Epistemological Foundations for Planning and Geography
JPG1140H	Discourse Analysis Methodology
JPG1170H	Statistical Testing and Analysis
PLA1149H	Independent Study
JPG1400H	Advanced Quantitative Methods
JGE1413H	Workshop in Environmental Impact Assessment
JPG1416H	Environmental Consequences of Land Use Change
JPG1418H	Rural Land Use Planning
JGE1420H	Urban Waste Management: an International Perspective
JPG1426H	Natural Resources, Difference, and Conflict
JPG1427H	The (Re)Localization of Food Production: Debates and Controversies
JPG1428H	Greening the City: Urban Environmental Planning and Management
JPG1429H	Political Ecology of Food and Agriculture
JPG1502H	Global Urbanism and Cities of the Global South
JPG1503H	Space, Time, Revolution
JPG1504H	Institutionalism and Cities: Space, Governance, Property, and Power
JPG1506H	State/Space/Difference: Understanding the New Social Geography of the State
JPG1507H	Housing Markets and Housing Policy Analysis
PLA1510H	Special Topics in Planning
JPG1511H	The Commons: Geography, Planning, Politics
JPG1512H	Place, Politics, and the Urban
PLA1514H	The Role of the Planner
JPG1516H	Declining Cities
PLA1516H	Special Topics in Planning II
PLA1517H	Special Topics in Planning III
JPG1518H	Sustainability and Urban Communities
PLA1518H	City Building — Practice and Experience in Toronto and Other World Cities
PLA1519H	Planning and Governance
JPG1520H	Contested Geographies of Class-Race Formations
PLA1520H	Project Management and Conflict Resolution for Planners
PLA1525H	Urban, Regional, and Community Economic Development
PLA1551H	Policy Analysis
PLA1552H	City Planning and Management
JPG1554H	Transportation and Urban Form
JPG1558H	The History and Geography of Cycles and Cycling
PLA1601H	Climate Change and Resilience: Planning and Policy
JPG1605H	The Post-Industrial City
JPG1607H	Geography of Competition
JPG1615H	Planning and the Social Economy
JPG1616H	The Cultural Economy
JPG1617H	Organization of Economies and Cities
JPG1621H	Innovation and Governance
PLA1650H	Urban Design: History Theory Criticism
PLA1651H	Planning and Real Estate Development
PLA1652H	Introductory Studio in Urban Design and Planning
PLA1653H	Advanced Studio in Urban Design and Planning
PLA1654H	Urban Design Research Methods
PLA1655H	Urban Design and Development Controls

PLA1656H	Land Use Planning: Principles and Practice
JPG1660H	Regional Dynamics
JPG1670H	Regional Economic Analysis
JPG1672H	Land and Justice
PLA1702H	Pedestrians, Streets, and Public Space
PLA1703H	Transportation Planning and Infrastructure
JPG1706H	Violence and Security
PLA1801H	Urban Infrastructure Planning
JPG1804H	Space, Power, and Geography: Understanding Spatiality
JPG1805H	Transnationalism, Diaspora, and Gender
GGR1807H	Geographies of Postcoloniality and Development: Exploring the 'Infrastructure Turn'
JPG1809H	Spaces of Work: Value, Identity, Agency, Justice
JPG1810H	Globalization and Postmodernism
JPG1812Y	Planning for Change: Community Development in Practice
JPG1813H	Planning and Social Policy
JPG1814H	Cities and Immigrants
JPG1818H	The Geography and Planning of Climate Action and Activism
JPG1820H	Disability and the City
JPG1825H	Black Geographies of the Atlantic
JPG1830H	Utopia/Dystopia
JPG1835H	Anti-Colonial Planning: Theory and Practice
JPG1906H	Geographic Information Systems
JPG1909H	Advanced GIS Data Processing
JPG1914H	Geographic Information Systems Research Project (exclusion: GGR462H1)
JPG2150H	Advanced Seminars in Selected Topics
JPG2151H	Advanced Seminars in Selected Topics II
PLA4444H	Internship (Credit/No Credit) (Designates the internship to be undertaken by master's students in the Planning program. It cannot be used to fulfil other course requirements for the degree.)

Germanic Languages and Literatures

The following collaborative specializations are available to students in participating degree programs as listed below:

- Book History and Print Culture
  - Germanic Languages and Literatures, MA
  - Germanic Literature, Culture and Theory, PhD
- Diaspora and Transnational Studies
  - Germanic Languages and Literatures, MA
  - Germanic Literature, Culture and Theory, PhD
- Jewish Studies
  - Germanic Languages and Literatures, MA
  - Germanic Literature, Culture and Theory, PhD
- Women and Gender Studies
  - Germanic Languages and Literatures, MA
  - Germanic Literature, Culture and Theory, PhD

Overview

The Department of Germanic Languages and Literatures at the University of Toronto is the oldest and largest department of German in Canada encompassing 11 full-time faculty who contribute to a curriculum that speaks to our traditional strength in literary and intellectual history. Our faculty and students conduct research in German cinema, critical theory, language pedagogy, Yiddish studies, medieval studies, travel literature, as well as post-colonial, psychoanalytic, and transnational studies.

Past graduates have secured tenure-track teaching positions as well as employment in the arts, in cultural programming, the publishing industry, and educational administration. We are committed to providing our graduate students with exposure to a diversity of methodological approaches among our faculty and those of affiliate units. We also emphasize early progress towards professionalization through participation in faculty research projects, attendance at local and international conferences, and enrolment in campus writing workshops. We cultivate a departmental climate of mutual respect and collegiality in the shared pursuit of critical inquiry.

The department offers a graduate program of study leading to two degrees: **Master of Arts** and **Doctor of Philosophy**. The MA degree usually takes eight months (September to April) to complete, while the PhD degree is normally completed in four to five years.

Germanic Languages and Literatures: Germanic Languages and Literatures MA

Master of Arts

Program Description

The MA degree in Germanic Languages and Literatures is offered in two fields:

- German Literature, Culture and Theory
- Yiddish Studies

The course-based, one-year MA program normally spans two sessions. Students have the option to concurrently enrol in one of the collaborative specializations at U of T, such as Women and Gender Studies, Jewish Studies, Transnational and Diaspora Studies, or Book History and Print Culture. This also requires registration in their respective core course(s). The MA in German is a full-time program, but may also be taken part-time under extenuating circumstances. Graduates may continue on to doctoral studies as well as embarking on careers in translation, language teaching, literary editing, cultural programming, and corporate and administrative positions requiring advanced communication and analytical skills.

Field: German Literature, Culture and Theory

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Germanic Languages and Literatures' additional admission requirements stated below.
- Applicants to the one-year MA program in the field of German Literature, Culture and Theory must have completed an appropriate bachelor's degree from a recognized university that includes at least 6.0 full-course equivalents (FCEs) in German language, literature, and culture, with an average grade of at least a B+.
- Applicants should arrange for two supporting letters to be sent to the Associate Chair of Graduate Studies of the department, preferably on forms available from the department.
- Admission is based upon the applicant's academic record as evidenced through transcripts from all post-secondary institutions, the supporting letters, a sample of written work (such as a term paper), and a Letter of Intent (500-word maximum) identifying current career goals and areas of academic interest.

Program Requirements

- **Coursework**. Students must successfully complete a total of **3.5 full-course equivalents (FCEs)** including:
  - GER1000H *German Studies Seminar: Culture, Theory, Text* (0.5 FCE)
  - at least 1.5 FCEs of the remaining 3.0 FCEs must carry a GER designator
  - the remaining course selection which is made in consultation with the Associate Chair of Graduate Studies of the department and must be approved by the department.
- Pass a **German language competence test** at the beginning of the program. Only one attempt is permitted.

Program Length

2 sessions full-time (typical registration sequence: F/W);
5 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Field: Yiddish Studies

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Germanic Languages and Literatures' additional admission requirements stated below.
- Applicants to the one-year MA program in the field of Yiddish Studies must have completed an appropriate bachelor's degree from a recognized university that includes at least 2.0 full-course equivalents (FCEs) in Yiddish language and 2.0 FCEs in Yiddish literature and culture or another area of Jewish Studies, with an average grade of at least a B+.

- Applicants should arrange for two supporting letters to be sent to the Associate Chair of Graduate Studies of the department, preferably on forms available from the department.
- Admission is based upon the applicant's academic record and upon the evidence of the supporting letters.

Program Requirements

- **Coursework**. Students must successfully complete a total of **3.5 full-course equivalents (FCEs)** including:
  - GER1000H *German Studies Seminar: Culture, Theory, Text* (0.5 FCE)
  - CJS1000H *Core Methods Seminar in Jewish Studies* (0.5 FCE)
  - GER1050H *Methods and Texts in Yiddish Studies* (0.5 FCE)
  - GER2050Y *Research Paper in Yiddish Studies* (1.0 FCE)
  - the remaining elective courses (1.0 FCE) selected from a course list approved by the department.
- Pass a **Yiddish language competency test** at the beginning of the program. Only one attempt is permitted.

Program Length

2 sessions full-time (typical registration sequence: F/W);
5 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Germanic Languages and Literatures: Germanic Literature, Culture and Theory PhD

Doctor of Philosophy

Program Description

The PhD program in Germanic Literature, Culture, and Theory is taken on a full-time basis and is fully funded for five years. The curriculum engages debates and questions salient to the discipline of German Studies while also forging generative ties with other disciplines to facilitate a synthesis of history and theory, textual analysis, and cultural study. Students have the option to concurrently enrol in one of the collaborative specializations at U of T, such as Women and Gender Studies, Jewish Studies, Transnational and Diaspora Studies, or Book History and Print Culture. This also requires registration in their respective core course(s).

Applicants may enter the PhD program via one of two routes: 1) following completion of an appropriate master's degree or 2) direct entry following completion of an appropriate bachelor's degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Germanic Languages and Literatures' additional admission requirements stated below.
- Admission to the PhD program requires an appropriate **master's degree in German** from a recognized university, with an average grade equivalent to at least a University of Toronto A– in the applicant's overall program.
- Applicants must satisfy the department that they are capable of independent research in German at an advanced level.
- Applicants should arrange for three supporting letters to be sent to the Associate Chair of Graduate Studies of the department, preferably on forms available from the department.
- Admission is based upon the applicant's academic record, a writing sample, a Letter of Intent (500-word maximum), and the evidence of the supporting letters.

Program Requirements

- **Coursework. Applicants admitted on the basis of a master's degree** must take a minimum of **4.0 full-course equivalents (FCEs)** including:
  - GER1000H *German Studies Seminar: Culture, Theory, Text* (0.5 FCE) with an average grade of at least an A–.
  - At least 3.5 FCEs by the end of Year 1.
  - Any remaining courses required for the degree by the end of Year 2. Course selection may include 1.5 FCEs in a department other than Germanic Languages and Literatures.
  - Course selection is made in consultation with the Associate Chair of Graduate Studies of the department and must be approved by the department.
- Students must provide evidence of **reading knowledge of French** or, in exceptional circumstances, of another language approved by the department.
- Students must pass a **qualifying examination** with written and oral components in the second session of Year 2 of the PhD program. The qualifying examination has two components:
  - The proficiency exam is based on a student-created and committee-approved, comprehensive list of works and entails writing exams in four (4) epochs (three for the Yiddish field), followed by an oral exam.
  - The research field paper on a topic approved by the examination committee offers a means to explore key theoretical readings and test firsthand the traction of at least one central methodology pertinent to the future thesis. This paper, between 25 and 30 pages in length, is completed during the Summer session following the proficiency examination and strives towards publishable quality.
- The **thesis proposal** encompasses an abstract, literature review, detailed discussion of the methodology, tentative chapter outlines, and bibliography/mediagraphy.
- Students must pass a **thesis proposal review** under the guidance of their supervisory committee, whose members will read the proposal, and approve the examinee for doctoral candidacy.

- Students must deliver a **departmental lecture** on their dissertation topic within one year following the thesis proposal review.
- Students must submit the **doctoral thesis** and successfully complete the **Final Oral Examination**.
- The department may permit a candidate to write the doctoral thesis in German when the candidate's advisory committee so recommends and when the candidate has satisfied the School of Graduate Studies' conditions (see 12.1.2.8 Thesis section in Degree Regulations, Doctor of Philosophy).

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Germanic Languages and Literatures' additional admission requirements stated below.
- Admission to the PhD program requires an appropriate bachelor's degree from a recognized university that includes at least 6.0 full-course equivalents (FCEs) in German language, literature, and culture, with an average grade equivalent to at least a University of Toronto B+ in the applicant's overall program and of at least an A– in the applicant's German courses.
- Applicants must satisfy the department that they are capable of independent research in German at an advanced level.
- Applicants should arrange for three supporting letters to be sent to the Associate Chair of Graduate Studies of the department, preferably on forms available from the department.
- Admission is based upon the applicant's academic record, a writing sample, a Letter of Intent (500-word maximum), and the evidence of the supporting letters.

Program Requirements

- **Coursework. Applicants admitted on the basis of a bachelor's degree** must take a minimum of **7.0 full-course equivalents (FCEs)**, including:
  - GER1000H *German Studies Seminar: Culture, Theory, Text* (0.5 FCE) with an average grade of at least an A–.
  - The department may recommend to the School of Graduate Studies the termination of the registration and eligibility of a student who fails to complete at least 3.5 FCEs, with an average of at least an A–, during Year 1.
  - The remaining courses required for the degree, with an A– average, by the end of Year 2.
- Students must provide evidence of **reading knowledge of French** or, in exceptional circumstances, of another language approved by the department.
- Students must pass a **qualifying examination** with written and oral components in the second session of Year 3 of the PhD program. The qualifying examination has two components:
  - The proficiency exam is based on a student-created and committee-approved, comprehensive list of works and entails writing exams in four (4) epochs (three for the Yiddish field), followed by an oral exam.
  - The research field paper on an approved topic approved by the examination committee offers a means to explore key theoretical readings and test firsthand the traction of at least one central methodology pertinent to the future thesis. This paper, between 25 and 30 pages in length, is completed during the Summer session following the proficiency examination and strives towards publishable quality.
- The thesis proposal encompasses an abstract, literature review, detailed discussion of the methodology, tentative chapter outlines, and bibliography/mediagraphy.
- Students must pass a **thesis proposal review** under the guidance of their supervisory committee, whose members will read the proposal and approve the examinee for doctoral candidacy.
- Students must deliver a departmental lecture on their dissertation topic within one year following the thesis proposal review.
- Students must submit the **doctoral thesis** and successfully complete the **Final Oral Examination**.
- The department may permit a candidate to write the doctoral thesis in German when the candidate's advisory committee so recommends and when the candidate has satisfied the School of Graduate Studies' conditions (see 12.1.2.8 Thesis section in Degree Regulations, Doctor of Philosophy).

  - Public Policy, MPP
- Ethnic, Immigration and Pluralism Studies
  - Global Affairs, MGA
  - Public Policy, MPP
- Public Health Policy
  - Public Policy, MPP
- Sexual Diversity Studies
  - Public Policy, MPP

Overview

The **Master of Global Affairs (MGA)** program is a two-year professional program that equips students with a sophisticated understanding of the larger political, economic, and social contexts of global affairs and with the skills necessary to work strategically and effectively within the evolving global system. Focused on five pillars of Global Security, Global Development, Global Justice and Human Rights, Global Markets, and Innovation Policy, students will gain the tools needed to have a real-world impact.

The Munk School's prestigious **Master of Public Policy (MPP)** brings together an impressive array of students and faculty for a two-year, full time program that bridges Canadian and global policy. In addition to a paid summer internship and a wide range of career support services, students develop core competencies considered essential for policy practice and take electives from both within the Munk School and in the broader University. Visiting public sector leaders along with a renowned multidisciplinary faculty bridge theory and real-world experience, providing contact with senior professionals in government and the broader public, private, and community sectors. Students may also apply to the combined JD/MPP degree program as well as pursue collaborative specializations with other graduate departments.

A Munk School education, located in the heart of downtown Toronto and in close proximity to an extraordinary concentration of policy leaders, will empower students to achieve their professional and personal goals.

Global Affairs and Public Policy: Global Affairs MGA

Master of Global Affairs

Program Description

The Master of Global Affairs (MGA) is a two-year professional program, consisting of four sessions of **coursework and a compulsory summer internship**. The purpose of this program is to provide an outstanding professional, multidisciplinary education to train the next generation of global leaders of international institutions, global civil society, and business. This program is open to applicants from all disciplinary backgrounds.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Munk School of Global Affairs and Public Policy's additional admission requirements stated below.
- An appropriate bachelor's degree with a minimum standing in the final year equivalent to at least a University of Toronto B+.

Program Requirements

This is a two-year program taken on a full-time basis over 20 consecutive months. Students must successfully complete a total of **8.5 full-course equivalents (FCEs)** as follows.

Year 1:

- 3.5 FCEs in core courses (seven half courses).
- 1.0 FCE in elective courses. Of these, 0.5 FCE must be chosen from the following: GLA2027H *Ethics and Global Affairs*, GLA2029H *Sustainability in the World: A Living Lab Course*, or GLA2034H *Decision Making and Strategic Thinking*.
- At the end of Year 1, students must **declare an emphasis** as part of their degree program. They must complete 1.5 FCEs of coursework in order to successfully complete the emphasis; see details on the emphases below.

Summer session between Years 1 and 2:

- GLA1007H *Global Internship* (0.5 FCE).

Year 2:

- 1.0 FCE in core courses: GLA2000H *Capstone Seminar* and GLA2111H *Research Methods for Global Affairs*.
- Additional 2.5 elective FCEs (five half courses) at the 2000 level from the Munk School. A maximum of 1.0 FCE may be taken from graduate programs outside the Munk School.

Program Length

5 sessions full-time (typical registration sequence: F/W/S/F/W)

Time Limit

3 years full-time

Emphasis: Development

MGA students who wish to complete an emphasis in Development must successfully complete **1.5 full-course equivalents (FCEs)** from the following list:

GLA2002H; GLA2014H; GLA2019H; GLA2028H; GLA2060H; GLA2061H; GLA2062H; JCR1000Y.

Emphasis: Global Justice and Human Rights

MGA students who wish to complete an emphasis in Global Justice and Human Rights must successfully complete **1.5 full-course equivalents (FCEs)** from the following list:

GLA2013H; GLA2023H; GLA2066H; GLA2067H; GLA2068H.

Emphasis: Global Policy and Asia

MGA students who wish to complete an emphasis in Global Policy and Asia must successfully complete **1.5 full-course equivalents (FCEs)** from the following list:

GLA2003H; GLA2036H; GLA2044H; GLA2045H; GLA2046H.

Emphasis: Global Policy in Europe and Eurasia

MGA students who wish to complete an emphasis in Global Policy in Europe and Eurasia must successfully complete **1.5 full-course equivalents (FCEs)** from the following list:

ERE1161H; ERE1170H; ERE1175H; ERE1179H; GLA2015H; GLA2056H; GLA2068H.

Emphasis: Global Security

MGA students who wish to complete an emphasis in Global Security must successfully complete **1.5 full-course equivalents (FCEs)** from the following list:

GLA2010H; GLA2024H; GLA2030H; GLA2063H; GLA2064H; GLA2065H.

Emphasis: Innovation Policy

MGA students who wish to complete an emphasis in Innovation Policy must successfully complete **1.5 full-course equivalents (FCEs)** from the following list:

GLA2014H; GLA2018H; GLA2021H; GLA2080H; GLA2081H; GLA2082H.

Emphasis: Markets

MGA students who wish to complete an emphasis in Markets must successfully complete **1.5 full-course equivalents (FCEs)** from the following list:

GLA2001H; GLA2006H; GLA2012H; GLA2015H; GLA2025H; GLA2037H; GLA2069H; GLA2070H; GLA2071H.

Emphasis: The Digital World

MGA students who wish to complete an emphasis in The Digital World successfully complete **1.5 full-course equivalents (FCEs)** from the following list:

GLA2010; GLA2024H; GLA2041H; GLA2042H; GLA2043H; GLA2052H.

Global Affairs and Public Policy: Global Affairs MGA (Dual Degree: MGA / MIA Hertie School of Governance)

Dual Degree Program: Master of Global Affairs (University of Toronto) / Master of International Affairs (Hertie School of Governance)

Program Description

This dual degree program creates a pathway between the U of T Master of Global Affairs and the Hertie School Master of International Affairs (MIA) programs. In Year 1, students complete MIA coursework at the Hertie School of Governance in Berlin, Germany. In the Summer session of Year 1, students complete an internship that is part of the MGA and MIA degree programs. In Year 2, students complete MGA coursework in Toronto and in the final Summer session, complete a master's thesis as part of the dual degree requirements.

Students will gain both degrees in two years (24 months) rather than the four years it would take to acquire the degrees consecutively. The pattern of registration is F/W/S/F/W/S with students completing both programs in August of Year 2. This dual degree program is open to applicants from all disciplinary backgrounds.

Master of International Affairs Program
Hertie School of Governance
Email: grad-admissions@hertie-school.org

Application Process

- Applicants must apply through the Hertie School admissions website. Applicants are then jointly selected and admitted by the MGA at the University of Toronto and the MIA at the Hertie School. All applicants must complete the Hertie School online admissions application.
- All applicants who are admitted to the dual degree program must then also complete the application on U of T's School of Graduate Studies online admissions application system.

Minimum Admission Requirements

- Applicants must meet the admission requirements of both programs to be admitted to the dual degree. The MGA admission requirements are stated below.
- Applicants are admitted under the General Regulations of the School of Graduate Studies of the University of Toronto as well as the specific requirements of the MGA.
- An appropriate bachelor's degree with a standing in the final year equivalent to at least a U of T B+.
- Applicants whose primary language is not English and who graduated from a university where the primary language of instruction is not English must provide proof of English-language proficiency. The following tests and scores will be accepted:
  - Test of English as a Foreign Language (TOEFL): 100/120 overall;
  - International English Language Testing System (IELTS): 7, with at least 6.0 for each component.

Program Requirements

During their U of T registration in the MGA program, students must successfully complete a total of **6.5 full-course equivalents (FCEs)** as follows.

Year 1

- **Fall and Winter:** Students complete Year 1 courses at the Hertie School.
- **Summer:** GLA1007H *Global Internship* (0.5 FCE, 12 weeks) plus a critical reflection paper to be submitted in September of Year 2.

Year 2

- **Fall and Winter (5.0 FCEs):**
  - GLA1011H *Global Innovation Policy* (0.5 FCE).
  - GLA1014H *Global Development* (0.5 FCE).
  - GLA2000H *Capstone Seminar* (0.5 FCE).
  - GLA2111H *Research Methods for Global Affairs* (0.5 FCE).
  - GLA2887H *Final Research and Analysis* (Credit/No Credit; 0.5 FCE).
  - 2.5 elective FCEs (five half courses) at the 2000 level within the MGA program.
- **Summer (1.0 FCE):** GLA2889Y *Dual Degree Master's Thesis* (Credit/No Credit).

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Global Affairs and Public Policy: Global Affairs MGA (Dual Degree: MGA / MPA London School of Economics)

Dual Degree Program: Master of Global Affairs (University of Toronto) / Master of Public Administration (London School of Economics)

Program Description

This dual degree program creates a pathway between the U of T Master of Global Affairs (MGA) and the London School of Economics Master of Public Administration (MPA) programs. In Year 1, students complete MPA coursework at the London School of Economics and Public Policy in the United Kingdom. In the Summer session of Year 1, students complete an internship that is part of the MGA program. In Year 2, students complete MGA coursework in Toronto and in the final Summer session, complete a policy paper as part of the dual degree requirements.

Students will gain both degrees in two years (21 months) rather than the four years it would take to acquire the degrees consecutively. The pattern of registration is F/W/S/F/W/S with students completing both programs by the end of June in Year 2. This dual degree program is open to applicants from all disciplinary backgrounds.

Master of Global Affairs Program
Munk School of Global Affairs and Public Policy, University of Toronto
Email: mga@utoronto.ca

Master of Public Policy Program
School of Public Affairs, Sciences Po
Email: sophie.riviereduFour@sciencespo.fr

Application Process

- Applicants must apply through the Sciences Po admissions website. Applicants are then jointly selected and admitted by the MGA at the University of Toronto and the MPP at Sciences Po. All applicants must complete the Sciences Po online admissions application.
- All applicants who are admitted to the dual degree program must then also complete the application on U of T's School of Graduate Studies online admissions application system.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies of the University of Toronto. Applicants must also satisfy the dual degree program's additional admission requirements stated below.
- An appropriate bachelor's degree with a standing in the final year equivalent to at least a U of T B+, and a cumulative standing equivalent to at least a U of T mid-B.
- Applicants whose primary language is not English and who graduated from a university where the primary language of instruction is not English must provide proof of English-language proficiency. The following tests and scores will be accepted:
  - Test of English as a Foreign Language (TOEFL): 100/120 overall;
  - International English language Testing System (IELTS): 7, with at least 6.5 for each component.
- Proof of French-language proficiency is also necessary if the French track is chosen at Sciences Po. Please consult the Sciences Po website for details.

Program Requirements

During their U of T registration in the MGA program, students must successfully complete a total of **6.0 full-course equivalents (FCEs)** as follows.

Year 1

- **Fall and Winter:** Students complete Year 1 courses at Sciences Po.
- **Summer (0.5 FCE):** GLA1007H *Global Internship* (12 weeks) plus a critical reflection paper to be submitted in September of Year 2.

Year 2

- **Fall and Winter (5.0 FCEs):**
  - GLA1001H *Macroeconomics: Markets, Institutions, and Growth* (0.5 FCE).
  - GLA1003H *Global Security* (0.5 FCE).
  - GLA1006H *International Legal Challenges* (0.5 FCE).
  - GLA1011H *Global Innovation Policy* (0.5 FCE).
  - GLA1014H *Global Development* (0.5 FCE).
  - GLA2000H *Capstone Seminar* (0.5 FCE).
  - GLA2111H *Research Methods for Global Affairs* (0.5 FCE).
  - GLA2887H *Final Research and Analysis* (Credit/No Credit; 0.5 FCE).
  - 1.0 elective FCE (two half courses) at the 2000 level, taken at the Munk School.
- **Summer (0.5 FCE):** GLA2800H *Grand Oral*.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Global Affairs and Public Policy: Global Affairs MGA Courses

Year 1

Core Courses (Required)

GLA1001H	Macroeconomics: Markets, Institutions, and Growth
GLA1003H	Global Security
GLA1006H	International Legal Challenges
GLA1010H	Microeconomics for Global Affairs
GLA1011H	Global Innovation Policy
GLA1012H	Statistics for Global Affairs
GLA1014H	Global Development

Summer Course (Required)

GLA1007H	Global Internship

Year 2

Core Courses (Required)

GLA2000H	Capstone Seminar (Required for all MGA students and dual degree programs.)
GLA2111H	Research Methods for Global Affairs (Required for all MGA students and all dual degree students.)
GLA2800H	Grand Oral (Required for students in the MGA/MPP dual degree program.)
GLA2887H	Final Research and Analysis (Credit/No Credit. Required for all dual degree students.)
GLA2889Y	Dual Degree Master's Thesis (Credit/No Credit. Required for students in the

	MGA/MIA dual degree program. Prerequisite: GLA2887H.)
GLA2890Y	Policy Paper (Required for students in the MGA/MPA dual degree program. Prerequisite: GLA2887H.)

Elective Courses (Subject to Change)

GLA1013H	Logic of Global Inquiry
GLA2001H	Global Capital Markets and Global Strategies
GLA2002H	Issues in Development Policy and Practice
GLA2003H	Governing With or Without the State
GLA2005H	Negotiating Internationally
GLA2006H	The Global Political Economy of Finance and Investment

JMG2020H	Big Data
JSE1708H	Sustainability and the Western Mind

Global Affairs and Public Policy: Public Policy MPP

Master of Public Policy

Program Description

The Munk School's prestigious Master of Public Policy (MPP) brings together an impressive array of students and faculty for a two-year, full time program that bridges Canadian and global policy.

In addition to a paid summer internship and a wide range of career support services, students develop core competencies considered essential for policy practice and take electives from both within the Munk School and in the broader University.

Visiting public sector leaders along with a renowned multidisciplinary faculty bridge theory and real-world experience, providing contact with senior professionals in government and the broader public, private, and community sectors.

Students may also apply to the combined degree program Juris Doctor (JD) / Master of Public Policy (MPP) as well as pursue collaborative specializations with other graduate departments. A Munk School education, located in the heart of downtown Toronto and in close proximity to an extraordinary concentration of policy leaders, will empower students to achieve their professional and personal goals.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the School of Public Policy and Governance's additional admission requirements stated below.
- A four-year bachelor's degree (or equivalent as recognized by the University of Toronto).
- A minimum cumulative grade point average (CGPA) of a B and a minimum GPA of a B+ standing in the final year of undergraduate studies (3.3 out of a possible 4.0 grading scale). Admissions selection to the MPP program is competitive and meeting this minimum requirement does not guarantee admission. Final-year grades are based on the last 5.0 full-course equivalents (FCEs) or 10.0 half-course equivalents.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- International applicants must submit a Graduate Record Examination (GRE) (general) score.
- International applicants must also submit a translation of transcripts from non-English speaking universities.
- The Munk School offers an in-depth Math and Statistics Prep course for students prior to starting Year 1 of the MPP. Details regarding the prep course are available to incoming students in the summer before Year 1. While participation is voluntary, students are encouraged to attend. All incoming students are required to complete the Math-Stats diagnostic.

Program Requirements

- **Coursework**. Students must successfully complete a total of **8.0 full-course equivalents (FCEs)** as follows:
  - **Year 1:**
    - 3.5 required FCEs: PPG1000H, PPG10002H, PPG1003H, PPG1004H, PPG1005H, PPG1007H, and PPG1008H.
      - Students must complete the Math-Stats diagnostic at the start of the Fall session.
      - Students who do not pass PPG1002H, PPG1004H, and/or PPG1008H must retake the Math-Stats diagnostic with a grade of at least 60%.
    - 0.5 elective FCE: either GLA2029H or GLA2034H.
  - **Summer** between Year 1 and Year 2, **or** during Year 2:
    - PPG2006Y *MPP Internship.* The internship research report is graded on a Credit/No Credit basis.
  - **Year 2:**
    - 1.5 required FCEs: PPG2000H, PPG2002H, and PPG2003H.
    - 0.5 elective FCE: either PPG2011H or PPG2022H.
    - 0.5 elective FCE: either PPG2008H or an alternate international/global focus course as approved by the MPP program director.
    - 1.5 elective FCEs: one elective must be a PPG course; the remaining courses may be taken with other graduate units.

Program Length

5 sessions full-time (typical registration sequence: F/W/S/F/W)

Time Limit

3 years full-time

Emphasis: Economics for Public Policy

MPP students who wish to complete the emphasis in Economics for Public Policy must successfully complete **1.5 full-course equivalents (FCEs)** from the following list:

GLA2001H, GLA2097H, JMG2020H, PPG2010H, PPG2013H, or other approved elective courses in the area.

Emphasis: Public and Non-Profit Management and Administration

MPP students who wish to complete the emphasis in Public and Non-Profit Management and Administration must successfully complete **1.5 full-course equivalents (FCEs)** from the following list:

LAW7030H, PPG2001H, PPG2012H, PPG2013H, PPG2014H, PPG2015H, PPG2018H, PPG2021H, or other approved elective courses in the area.

Emphasis: Social and Urban Policy

MPP students who wish to complete the emphasis in Social and Urban Policy must successfully complete **1.5 full-course equivalents (FCEs)** from the following list:

PPG2013H, PPG2017H, PPG2021H, CHL5300H, CHL5308H, HAD5778H, LAW7030H, SWK4803H, or other approved elective courses in the area.

Global Affairs and Public Policy: Public Policy MPP Courses

Course List

Required Core Courses

MPP1

PPG1000H	Governance, Institutions, and Public Policy
PPG1002H	Microeconomics for Policy Analysis (Students who do not pass PPG1002H must retake the Math-Stats diagnostic with a grade of at least 60%)
PPG1003H	Macroeconomics for Policy Analysis
PPG1004H	Quantitative Methods for Policy Analysis (Students who do not pass PPG1004H must retake the Math-Stats diagnostic with a grade of at least 60%)
PPG1005H	The Social Context of Policy-Making
PPG1007H	Strategic Policy Implementation
PPG1008H	Program Evaluation for Public Policy (Prerequisite: PPG1004H; students who do not pass PPG1008H must retake the Math-Stats diagnostic with a grade of at least 60%)

Choose one of:

GLA2029H	Sustainability in the World: A Living Lab Course
GLA2034H	Decision Making and Strategic Thinking

MPP2

PPG2000H	Politics and the Policy Process
PPG2002H	Topics in Applied Economics for Public Policy (Prerequisite: PPG1002H and successful completion of at least 3.5 FCEs in MPP1 courses)
PPG2003H	Capstone Course: Integrating Issues in Public Policy (Prerequisite: successful completion of at least 5.5 FCEs in MPP courses)

Choose one of:

PPG2011H	Ethics and the Public Interest (Prerequisite: successful completion of at least 3.5 FCEs in MPP1 courses)
PPG2022H	Moral Foundations of Public Policy (Prerequisite: successful completion of at least 3.5 FCEs in MPP1 courses)

Elective Courses

Offered by the Munk School of Global Affairs and Public Policy:

PPG2001H	Legal Analysis of Public Policy
PPG2008H	Comparative Public Policy and Transnational Forces
PPG2010H	Panel Data Methods for Public Policy Analysis
PPG2012H	Topics in Public Policy
PPG2013H	Topics in Public Policy I
PPG2014H	Topics in Public Policy II
PPG2015H	Topics in Public Policy III
PPG2017H	Topics in Public Policy: Urban Policy
PPG2018H	The Role of Government
PPG2021H	Priority Topics in Public Administration

Cross-Listed with the Faculty of Law:

LAW7030H	Issues in Aboriginal Law and Policy

Internship

PPG2006Y	MPP Internship (Prerequisite: successful completion of at least 3.5 FCEs in MPP1 courses)

Health Policy, Management and Evaluation

HPME: Introduction

Combined Degree Programs

- STG, Health Administration, MHSc / MSW (admissions have closed)

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Aging, Palliative and Supportive Care Across the Life Course
  - Health Administration, MHSc
  - Health Policy, Management and Evaluation, MSc, PhD
- Bioethics
  - Health Administration, MHSc
  - Health Policy, Management and Evaluation, MSc, PhD
- Global Health (U of T Global Scholar)
  - Health Policy, Management and Evaluation, MSc (thesis only), PhD
- Health Services and Policy Research
  - Health Policy, Management and Evaluation, MSc, PhD
- Public Health Policy
  - Health Administration, MHSc
  - Health Policy, Management and Evaluation, MSc, PhD
- Resuscitation Sciences (admissions have been administratively suspended)
  - Health Policy, Management and Evaluation, MSc, PhD
- Women and Gender Studies
  - Health Administration, MHSc
  - Health Policy, Management and Evaluation, MSc, PhD
- Women's Health
  - Health Policy, Management and Evaluation, MSc, PhD

Overview

The Institute of Health Policy, Management and Evaluation (IHPME) brings together researchers from a wide range of disciplinary backgrounds. Broad research themes include Clinical Epidemiology and Health Care Research; Health Services Research including Health Informatics Research, Health Economics, Health Policy, Health Services Organization and Management Studies, Health Services Outcomes and Evaluation, Health Technology Assessment, and Knowledge Translation; Health Administration; System Leadership and Innovation; and Quality Improvement and Patient Safety.

More than 200 faculty members from a variety of disciplines are represented in IHPME. At least 130 senior health care executives serve as adjunct faculty.

Please note the **application deadlines.**

November 15

- MSc in Health Policy, Management and Evaluation concentrations: Clinical Epidemiology and Health Care Research; Health Services Research; Quality Improvement and Patient Safety
- PhD in Health Policy, Management and Evaluation concentrations: Clinical Epidemiology and Health Care Research; Health Professions Education Research; Health Services Research

January 15

- MSc in Health Policy, Management and Evaluation concentration: System Leadership and Innovation (Undergraduate Medical Education applicants)

February 1

- Master of Health Informatics
- MHSc in Health Administration
- MHSc in Health Administration / MSW combined degree program
- MHSc in Health Administration / MN combined degree program

March 1

- Master of Health Informatics (executive option)

March 15

- MSc in Health Policy, Management and Evaluation concentration: System Leadership and Innovation (Postgraduate Medical Education applicants)

Zappitelli, Michele - MSc, MD
Zarb, Julia - PhD
Zhang, Cynthia - BS, MHSc
Zubairi, Mohammad Samad Yaseen - MD

HPME: Health Policy, Management and Evaluation MSc

Master of Science

Program Description

The HPME graduate program offers the following concentrations leading to the MSc degree:

- Clinical Epidemiology and Health Care Research;
- Health Services Research;
- Quality Improvement and Patient Safety; and
- System Leadership and Innovation.

The MSc program can be taken on a full-time or part-time basis.

Concentration: Clinical Epidemiology and Health Care Research

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy IHPME's additional admission requirements stated below.
- Applicants require an overall B+ average or higher in the last two years of an appropriate bachelor's degree from a recognized university. For applicants to this concentration, a degree in a health profession (e.g., MD, BScN, BScOT, BScPT, DDM, MScN) from a recognized university with a B+ average in the final two years is required.

Program Requirements

Two options are available:

- Thesis option comprising 3.0 full-course equivalents (FCEs) and a thesis.
- Coursework-only option comprising 5.0 FCEs, including completion of at least one research practicum.

Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.

Thesis MSc

- Completion of **3.0 FCEs** as follows:
  - 1.5 FCEs required: HAD5301H, HAD5307H, and one of HAD5303H, HAD5304H, HAD5306H, or HAD5309H
  - 1.5 FCEs in electives.
- A **thesis** written under the supervision of a thesis committee (supervisor and at least one, and preferably two, additional graduate faculty members) and its defence before an examination committee.

Coursework-Only MSc

- Completion of **5.0 FCEs** as follows:
  - 2.0 FCEs required: HAD5301H, HAD5307H, HAD6360H, and one of HAD5303H, HAD5304H, or HAD5309H
  - 3.0 FCEs in electives.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Concentration: Health Services Research

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy IHPME's additional admission requirements stated below.
- Applicants require an overall B+ average or higher in the last two years of an appropriate bachelor's degree from a recognized university. For applicants to Clinical Epidemiology and Health Care Research, a degree in a health profession (e.g., MD, BScN, BScOT, BScPT, DDM, MScN) from a recognized university with a B+ average in the final two years is required.

Program Requirements

Two options are available:

- Thesis option comprising 3.0 full-course equivalents (FCEs) and a thesis.
- Coursework-only option comprising 5.0 FCEs.

Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.

Thesis MSc

- Completion of **3.0 full-course equivalents (FCEs)** as follows:
  - 1.0 FCE in research methodology courses
  - 1.0 FCE in health services research courses:
    - HAD5011H *Canada's Health Care System and Health Policy*
    - 0.5 FCE from other health services research courses
  - 1.0 FCE in electives.
- A **thesis** written under the supervision of a thesis committee and its defence before an examination committee.

Coursework-Only MSc

- Completion of **5.0 full-course equivalents (FCEs)** as follows:
  - 1.0 FCE in health services research courses, normally HAD5011H, HAD5022H, HAD5727H, HAD5756H, and HAD5773H
  - 1.0 FCE in research methodology courses, normally HSR1001H, HAD5765H, HAD5772H, HAD5740H, HAD5742H, HAD5744H, HAD5746H, HAD5779H, and HAD5781H
  - 3.0 FCEs in electives from HAD5726H, HAD5728H, HAD5730H, HAD5737H, HAD5738H, HAD5743H, HAD5744H, HAD5760H, HAD5763H, HAD5771H, HAD5778H, HAD5780H, and HAD6750H.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Students in the **thesis option of the Health Services Research concentration** have the option to **complete an emphasis** by completing **2.0 full-course equivalents (FCEs)** in a given area. The emphasis requirements will also count toward their 3.0 FCE concentration requirements.

Students in the Vector pathway within the Health Services Research concentration must complete the emphasis in Health Systems Artificial Intelligence and complete their remaining 1.0 FCE concentration requirements by taking HAD5011H and HAD5772H.

Emphasis: Health Economics

Students must complete 2.0 FCEs as follows:

- HAD5730H *Economic Evaluation Methods for Health Service Research.*
- HAD5744H *Applied Health Econometrics I.*
- HAD5746H *Applied Health Econometrics II.*
- HAD5760H *Advanced Health Economics and Policy Analysis.*

Emphasis: Health Informatics Research

Students must complete 2.0 FCEs as follows:

- HAD5726H *Evaluation and Research Design in Health Informatics.*
- Three courses (1.5 FCEs) from the course listing for the Health Services Research concentration, Master of Health Informatics program, or other relevant graduate courses as approved by the Graduate Coordinator.

Emphasis: Health Policy

Students must complete 2.0 FCEs as follows:

- CHL5300H *Public Health Policy*.
- HAD5778H *Comparative Health Systems and Policy.*
- 1.0 FCE from the following list:
  - CHL5308H *Tools and Approaches for Public Health Policy Analysis and Evaluation*
  - HAD5022H *Politics, Policy, Public Health, and Health Technology*
  - HAD5765H *Case Studies in Health Policy*
  - Other health policy research course as appropriate, for example:
    - CHL5523H *Indigenous Health and Social Policy*
    - CHL5702H *History of International Health* or
    - CHL5704H *International Human Rights Law and Global Health: The Right to Health in Theory and Practice*.

Emphasis: Health Services Organization and Management Studies

Students must complete 2.0 FCEs as follows:

- HAD5773H *Introduction to Theories of Organizational Behaviour and Applications to the Health Care Sector.*
- 1.5 FCEs from the following list:
  - HAD5727H *Knowledge Transfer and Exchange*
  - HAD5737H *Tools for Implementation of Best Evidence*
  - HAD5740H *Intermediate Level Qualitative Research for Health Services and Policy Research*
  - HAD5742H *Mixed Methods for Health Services Research*
  - HAD5744H *Applied Health Econometrics I*
  - HSR1001H *Introduction to Qualitative Methods for Health Services and Policy Research*.

Emphasis: Health Services Outcomes and Evaluation

Students must complete 2.0 FCEs as follows:

- HAD5720H *Evaluation I*
- 0.5 FCE from the following list:
  - HAD5743H *Evaluation II*
  - HAD5763H *Advanced Methods in Health Services Research*
- 0.5 FCE from the following list:
  - CHL5202H *Biostatistics II*
  - HAD5316H *Biostatistics II: Advanced Techniques in Applied Regression Methods*
  - HAD5772H *Intermediate Statistics for Health Services Researchers*
- 0.5 elective FCE from the course listing for the Health Services Research concentration.

Emphasis: Health Systems Artificial Intelligence

- Students must complete 2.0 FCEs as follows:
  - CHL3020H *Ethics and AI in Health*
  - CHL5230H *Applied Machine Learning for Health Data* (research methods course)
  - MHI2002H *Emergent Topics in Heath Informatics*
  - 0.5 FCE from the course listing for the Health Services Research concentration or the Master of Health Informatics program. Recommended: HAD5726H *Evaluation and Research Design in Health Informatics*.

Emphasis: Health Technology Assessment

Students must complete 2.0 FCEs as follows:

- HAD5301H *Introduction to Clinical Epidemiology and Health Care Research.*
- HAD5307H *Introduction to Applied Biostatistics.*
- 0.5 FCE from the course listing for the Health Services Research concentration.
- 0.5 FCE from the following list:
  - HAD5730H *Economic Evaluation Methods for Health Service Research*
  - HAD5771H *Resource Allocation Ethics*

- HAD5779H *Evidence Synthesis for Health Services, Systems, and Policy Research.*

[0] Course that may continue over a program. The course is graded when completed.

Concentration: Quality Improvement and Patient Safety

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy IHPME's additional admission requirements stated below.
- Applicants require an overall B+ average or higher in the last two years of an appropriate bachelor's degree from a recognized university.

Program Requirements

Two options are available:

1. Thesis option comprising 3.0 full-course equivalents (FCEs) and a thesis.
2. Coursework-only option comprising 5.0 FCEs, including completion of at least one research practicum.

Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.

Thesis MSc

- Completion of **3.0 FCEs** as follows:
  - 2.5 FCEs required: HAD3010H, HAD3020H, HAD3041Y[0], HAD3050H
  - 0.5 FCE in electives.
- A **thesis** written under the supervision of a thesis committee (comprising the supervisor and at least one additional graduate faculty member, preferably two) and its defence before an examination committee.

Coursework-Only MSc

- Completion of **5.0 FCEs** as follows:
  - 3.0 required FCEs (HAD3010H, HAD3020H, HAD3030H, HAD3050H, HAD3060H, HAD3070H)
  - 1.0 required FCE in a research project practicum (HAD3040Y)
  - 1.0 FCE in electives.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Concentration: System Leadership and Innovation

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy IHPME's additional admission requirements stated below.
- Applicants require an overall B+ average or higher in the last two years of an appropriate bachelor's degree from a recognized university.
- Applicants must have health-care experience and demonstrate aptitude for innovation and health systems.
- Preference will be given to medical trainees in a Canadian Faculty of Medicine or to early-career physicians. Undergraduate medical trainees who are accepted must register part-time; post-graduate medical education trainees who are accepted may register full-time or part-time.

Program Requirements

The concentration in System Leadership and Innovation consists of coursework only. Students begin this concentration in the Summer session.

- Completion of **5.0 full-course equivalents (FCEs)** as follows:
  - 2.0 required FCEs (HAD2001H; HAD2002H or HAD2012H; HAD2003H or HAD2013H; HAD2004H or HAD2007H)
  - 1.0 required practicum FCE (HAD2010H and HAD2020H or HAD2040Y)
  - 2.0 elective FCEs, of which a maximum 1.0 FCE can be a practicum; please consult with the department about electives
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses.

Program Length

3 sessions full-time (typical registration sequence: S/F/W);
7 sessions part-time

Time Limit

3 years full-time;
6 years part-time

HPME: Health Policy, Management and Evaluation PhD

Doctor of Philosophy

Program Description

The HPME graduate program offers three concentrations leading to the PhD degree: 1) Clinical Epidemiology and Health Care Research; 2) Health Professions Education Research; and 3) Health Services Research.

Applicants may enter the PhD program via one of three routes: 1) following completion of an MA or MSc degree; 2) transfer from the University of Toronto MSc/PhD transfer program; 3) direct entry following completion of a health professional (MD) degree.

The PhD program can be taken on a full-time or flexible-time basis. Some applicants may be admitted to a flexible-time PhD option with the approval of the Graduate Chair. The flexible-time PhD option benefits mature students with career and/or familial obligations.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the IHPME's additional admission requirements stated below.
- A master's degree (MA or MSc) requiring a thesis with a B+ average or higher.
- Applicants to the Clinical Epidemiology and Health Care Research concentration must have a degree in a health profession (e.g., MD, BScN, BScOT, BScPT, DDM, MScN, or equivalent).
- Satisfactory references pertaining to the applicant's academic and research abilities.
- Outstanding students with a non-thesis master's degree may be admitted to the PhD upon the recommendation of the appropriate IHPME committee, if the applicant has the appropriate background preparation and research experience or publications which can be considered equivalent to a master's thesis. Students with a non-thesis master's degree and little or no research experience may be admitted to the MSc program and may petition to transfer into the PhD program within 24 months of first registration. Transfer is contingent upon successful completion of master's coursework and preparation and defence of a PhD thesis proposal.
- Some applicants may be admitted to a flexible-time PhD option with the approval of the Graduate Chair. The flexible-time PhD option benefits mature students with career and/or familial obligations.

Program Requirements

- Completion of a **comprehensive course**.
- Completion of **5.0 full-course equivalents (FCEs)** from the PhD courses listed below.
- Students enrolled in the Clinical Epidemiology and Health Care Research concentration must select 2.0 FCEs compulsory courses and 2.0 recommended FCEs from the Clinical Epidemiology and Health Care Research courses listed below.
- Students enrolled in the Health Professions Education Research concentration must select 2.5 FCEs compulsory courses from the Health Professions Research courses listed below.
- Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.
- Writing of a **PhD thesis** under the supervision of an approved thesis committee (supervisor plus at least two additional graduate faculty members).
- **Oral defence** of the thesis before an examination committee.

Program Length

4 years full-time; 5 years transfer-from-master's; 5 years direct-entry

Time Limit

6 years full-time; 7 years transfer-from-master's; 7 years direct-entry

Concentration: Health Services Research

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the IHPME's additional admission requirements stated below.
- A master's degree (MA or MSc) requiring a thesis with a B+ average or higher.
- Satisfactory references pertaining to the applicant's academic and research abilities.
- Outstanding students with a non-thesis master's degree may be admitted to the PhD upon the recommendation of the appropriate IHPME committee, if the applicant has the appropriate background preparation and research experience or publications which can be considered equivalent to a master's thesis. Students with a non-thesis master's degree and little or no research experience may be admitted to the MSc program and may petition to transfer into the PhD program within 24 months of first registration. Transfer is contingent upon successful completion of master's coursework and preparation and defence of a PhD thesis proposal.

- Some applicants may be admitted to a flexible-time PhD option with the approval of the Graduate Chair. This option benefits mature students with career and/or familial obligations.

Program Requirements

- Students must select one of six emphases, and complete the required emphasis courses listed below.
- Completion of **5.0 full-course equivalents (FCEs)** including:
  - A comprehensive course (0.5 FCE) specified as part of the requirements for each emphasis below.
  - 2.0 FCEs as follows: HAD5011H, HAD5772H (or equivalent if specified in the selected emphasis), HAD6760H, and HAD6770H.
- Writing of a PhD thesis under the supervision of an approved thesis committee (supervisor plus at least two additional graduate faculty members).
- Final Oral Examination of the thesis before an examination committee.

Program Length

4 years full-time; 5 years transfer-from-master's; 5 years direct-entry

Time Limit

6 years full-time; 7 years transfer-from-master's; 7 years direct-entry

Students enrolled in the **Health Services Research Concentration** of the PhD Program must pursue **one of six emphases**, described below, and complete six courses (**3.0 full-course equivalents [FCEs]**) related to their declared emphasis.

Emphasis: Health Economics

Students must complete 3.0 FCEs as follows:

- HAD5730H *Economic Evaluation Methods for Health Service Research.*
- HAD5744H *Applied Health Econometrics I.*
- HAD5746H *Applied Health Econometrics II.*
- HAD5760H *Advanced Health Economics and Policy Analysis.*
- HAD6750H *Advanced Health Economics and Policy Analysis II.*
- 0.5 FCE from the course listing for the Health Services Research concentration.

Emphasis: Health Informatics Research

Students must complete 3.0 FCEs as follows:

- HAD5726H *Evaluation and Research Design in Health Informatics.*
- HAD5747H *Cognitive, Social, and Information Science Theory in Health Informatics Research*.
- HAD6764H *Health Informatics Research Comprehensive Course.*
- Three courses (1.5 FCEs) from the course listing for the Health Services Research concentration, Master of Health Informatics program, or other relevant graduate courses as approved by the Graduate Coordinator.

Emphasis: Health Policy

Students must complete 3.0 FCEs as follows:

- CHL5300H *Public Health Policy* (students may elect to take this course on a Credit/No Credit basis).
- HAD5778H *Comparative Health Systems and Policy.*
- HAD6763H *Health Policy Comprehensive Course.*
- 0.5 FCE from the following list:
  - CHL5308H *Tools and Approaches for Public Health Policy Analysis and Evaluation.*
  - HAD5022H *Politics, Policy, Public Health, and Health Technology.*
  - HAD5765H *Case Studies in Health Policy.*
  - Other course as appropriate, for example:
    - CHL5523H *Indigenous Health and Social Policy*.
    - CHL5702H *History of International Health*.
    - CHL5704H *International Human Rights Law and Global Health: The Right to Health in Theory and Practice*.
- 0.5 FCE from the following list:
  - HAD5742H *Mixed Methods for Health Services Research.*
  - HAD5781H *Case Study Research for Health Services, Systems, and Policy.*
  - HSR1001H *Introduction to Qualitative Methods for Health Services and Policy Research.*
  - Other courses from the course listing for the Health Services Research concentration in the area of policy-relevant methods.
- 0.5 FCE from the course listing for the Health Services Research concentration, or other HPME concentrations as approved by the HPME graduate coordinator.

Emphasis: Health Services Organization and Management Studies

Students must complete 3.0 FCEs as follows:

- HAD5742H *Mixed Methods for Health Services Research.*
- HAD5750H *Seminar in Organizational Behaviour*.
- HAD5773H *Introduction to Theories of Organizational Behaviour and Applications to the Health Care Sector.*
- HAD6762H *Health Services Organization and Management Comprehensive Course.*
- HSR1001H *Introduction to Qualitative Methods for Health Services and Policy Research.*
- One course (0.5 FCE) from the course listing for the Health Services Research concentration.

Emphasis: Health Services Outcomes and Evaluation

Students must complete 3.0 FCEs as follows:

- HAD5743H *Evaluation II*.
- HAD6761H *Health Services Outcomes and Evaluation Comprehensive Course*.
- HSR1001H *Introduction to Qualitative Methods for Health Services and Policy Research*.
- Two courses (1.0 FCE) from the following list:
  - HAD5720H *Evaluation I*.
  - HAD5728H *Performance Measurement in Health Care: Theory and Application*.
  - HAD5730H *Economic Evaluation Methods for Health Service Research*.
  - HAD5740H *Intermediate Level Qualitative Methods for Health Services and Policy Research*.
  - HAD5742H *Mixed Methods for Health Services Research*.
  - HAD5763H *Advanced Methods in Health Services Research*.
  - HAD5779H *Evidence Synthesis for Health Services, Systems, and Policy Research*.
  - HAD5781H *Case Study Research for Health Services, Systems and Policy*.
- One course (0.5 FCE), generally an advanced methods course, from the course listing for the Health Services Research concentration.

PhD students in the Health Services Research concentration who are pursuing the emphasis in Health Services Outcomes and Evaluation may fulfil the concentration requirements by replacing HAD5772H *Intermediate Statistics for Health Services Researchers* with CHL5202H *Biostatistics II* or HAD5316H *Biostatistics II: Advanced Techniques in Applied Regression Methods*.

Emphasis: Health Technology Assessment

Students must complete 3.0 FCEs as follows:

- HAD5301H *Introduction to Clinical Epidemiology and Health Care Research.*
- HAD6765H *Health Technology Assessment Comprehensive Course* (Credit/No Credit).
- Three courses (1.5 FCEs) from the course listing for the Health Services Research concentration.
- One course (0.5 FCE) from the following list:
  - HAD5730H *Economic Evaluation Methods for Health Service Research*
  - HAD5771H *Resource Allocation Ethics*
  - HAD5779H *Evidence Synthesis for Health Services, Systems and Policy Research.*

PhD Program (Flexible-Time)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the IHPME's additional admission requirements stated below.
- A master's degree (MA or MSc) requiring a thesis with a B+ average or higher.
- Applicants to the Clinical Epidemiology and Health Care Research concentration must have a degree in a health profession (e.g., MD, BScN, BScOT, BScPT, DDM, MScN, or equivalent).
- Satisfactory references pertaining to the applicant's academic and research abilities.
- Outstanding students with a non-thesis master's degree may be admitted to the PhD upon the recommendation of the appropriate IHPME committee, if the applicant has the appropriate background preparation and research experience or publications which can be considered equivalent to a master's thesis. Students with a non-thesis master's degree and little or no research experience may be admitted to the MSc program and may petition to transfer into the PhD program within 24 months of first registration. Transfer is contingent upon successful completion of master's coursework and preparation and defence of a PhD thesis proposal.

Program Requirements

- With the approval of the Graduate Chair, some applicants may be admitted to a flexible-time PhD program. This program will benefit students with career obligations. The degree requirements for the flexible-time PhD program are identical to those listed above for the full-time PhD program.
- Students must register full-time for the first four years of their program (Fall, Spring, Summer sessions); thereafter, they may register part-time.
- Completion of a **comprehensive course**.
- Completion of **5.0 full-course equivalents (FCEs)** from the PhD courses listed below.
- Students enrolled in the Clinical Epidemiology and Health Care Research concentration must select 2.0 FCEs compulsory courses and 2.0 recommended FCEs from the Clinical Epidemiology and Health Care Research courses listed below.
- Students enrolled in the Health Professions Education Research concentration must select 2.5 FCEs compulsory courses from the Health Professions Research courses listed below.
- Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.
- Writing of a **PhD thesis** under the supervision of an approved thesis committee (supervisor plus at least two additional graduate faculty members).
- **Oral defence** of the thesis before an examination committee.

Program Length

6 years

Time Limit

8 years

HPME: Health Policy, Management and Evaluation MSc, PhD Courses

Students in the Master of Science and Doctor of Philosophy programs may elect to be assessed on a Credit/No Credit basis in courses marked by the symbol ⌘ up to a total of 0.5 FCE.

Concentration: Clinical Epidemiology and Health Care Research

Compulsory Courses

HAD5301H⌘	Introduction to Clinical Epidemiology and Health Care Research
HAD5307H⌘	Introduction to Applied Biostatistics
HAD5311H[0]	Comprehensive/Synthesis (one year)
HAD5316H⌘	Biostatistics II: Advanced Techniques in Applied Regression Methods

[0] Course that may continue over a program. The course is graded when completed.

Recommended Courses

HAD5302H⌘	Measurement in Clinical Research
HAD5303H⌘	Controlled Clinical Trials
HAD5304H⌘	Clinical Decision Making and Cost Effectiveness
HAD5305H⌘	Evidence-Based Guidelines
HAD5306H⌘	Introduction to Health Services Research and the Use of Health Administrative Data
HAD5308H⌘	Evidence Synthesis: Systematic Reviews and Meta-Analysis
HAD5309H⌘	Observational Studies: Theory, Design, and Methods
HAD5310H⌘	Pragmatic Issues in Conduct of Controlled Trials
HAD5730H⌘	Economic Evaluation Methods for Health Service Research
HAD5760H⌘	Advanced Health Economics and Policy Analysis

Elective Courses

HAD5312H⌘	Decision Modelling for Clinical Policy and Economic Evaluation
HAD5313H	Advanced Design and Analysis Issues in Clinical Trials
HAD5314H⌘	Applied Bayesian Methods in Clinical Epidemiology and Health Care Research
HAD5315H⌘	Advanced Topics in Measurement
HAD5316H⌘	Biostatistics II: Advanced Techniques in Applied Regression Methods (prerequisite: HAD5307H or CHL5201H)
HAD6360H[0]	Required Research Practicum in Clinical Epidemiology (Credit/No Credit)
HAD6361H[0]	Optional Research Practicum in Clinical Epidemiology (Credit/No Credit)
HAD7002H⌘	Reading Course

Other IHPME courses or extra-departmental courses may be considered as elective courses and are subject to approval of the Institute of Health Policy, Management and Evaluation.

[0] Course that may continue over a program. The course is graded when completed.

Concentration: Health Professions Education Research (HPER)

Required Courses

HAD5011H⌘	Canada's Health Care System and Health Policy (Doctoral Stream)
HAD6500H⌘	Essential Skills in HPER
HAD6501H⌘	Introduction to Methods/Methodologies for HPER
HAD6502H⌘ **or** HAD6503H⌘	Survey of Critical and Interpretive Social Science Theory for HPER **or** Survey of Cognitive, Behavioural, and Epidemiological Sciences Theory
HAD6504H⌘ **or** HAD6505H⌘	Intermediate Critical and Interpretive Social Science Methods **or** Intermediate Cognitive, Behavioural, and Epidemiological Sciences Methods
HAD6560H	Health Professions Education Research (HPER) Comprehensive Exam

Elective Courses

All Health Services Research courses and Clinical Epidemiology and Health Care Research courses or extradepartmental courses may be considered as elective courses and are subject to approval of the Institute of Health Policy, Management and Evaluation.

Concentration: Health Services Research

HAD5011H⌘	Canada's Health Care System and Health Policy (Doctoral Stream)

HAD5012H	Patient and Caregiver Engagement in Research
HAD5022H⌘	Politics, Policy, Public Health, and Health Technology
HAD5726H⌘	Evaluation and Research Design in Health Informatics
HAD5727H⌘	Knowledge Transfer and Exchange
HAD5728H⌘	Performance Measurement in Health Care: Theory and Application
HAD5730H⌘	Economic Evaluation Methods for Health Service Research
HAD5737H⌘	Tools for Implementation of Best Evidence
HAD5738H⌘	Advanced Methods in Economic Evaluation
HAD5740H⌘	Intermediate-Level Qualitative Research for Health Services and Policy Research
HAD5742H⌘	Mixed Methods for Health Services Research
HAD5743H⌘	Evaluation II
HAD5744H⌘	Applied Health Econometrics I
HAD5745H⌘	Where Health Economics Hits the Road: Practical Applications of Economics to Real Health Care Problems
HAD5746H⌘	Applied Health Econometrics II
HAD5747H	Cognitive, Social, and Information Science Theory in Health Informatics Research
HAD5748H⌘	Introduction to Survey Design and Psychometrics (prerequisite: HAD5772H or equivalent)
HAD5749H⌘	Knowledge to Action: Disseminating and Implementing Evidence into Practice
HAD5750H⌘	Seminar in Organizational Behaviour
HAD5755Y	Health Economics Graduate Seminar Series (Credit/No Credit)
HAD5760H⌘	Advanced Health Economics and Policy Analysis
HAD5763H⌘	Advanced Methods in Health Services Research
HAD5771H⌘	Resource Allocation Ethics
HAD5772H⌘	Intermediate Statistics for Health Services Researchers
HAD5773H⌘	Introduction to Theories of Organizational Behaviour and Applications to the Health Care Sector
HAD5774H⌘	Comparative Health Care Systems
HAD5777H⌘	Leading and Managing Change: Building Adaptive Capacity
HAD5778H⌘	Comparative Health Systems and Policy
HAD5779H⌘	Evidence Synthesis for Health Services, Systems and Policy Research
HAD5780H⌘	Program Planning and Evaluation for Health Services and Policy Research
HAD5781H⌘	Case Study Research for Health Services, Systems and Policy
HAD6506H	Assessment in Health Professions Education
HAD6750H⌘	Advanced Health Economics and Policy Analysis II
HAD6760H⌘	Introduction to Health Services Research Theory and Methods
HAD6761H	Health Services Outcomes and Evaluation Comprehensive Course
HAD6762H	Health Services Organization and Management Comprehensive Course
HAD6763H	Health Policy Comprehensive Course
HAD6764H	Health Informatics Research Comprehensive Course
HAD6765H	Health Technology Assessment Comprehensive Course (Credit/No Credit)
HAD6770H⌘	Applying Health Services Research Methods (prerequisite: HAD6760H)
HAD7001H⌘	Reading Course
JNH5001H	Health Care Settings, Site, and Human Well Being
JNH5003H	Home and Community Care Knowledge Translation

Concentration: Quality Improvement and Patient Safety

Required Courses

HAD3010H⌘	Fundamentals of Improvement Science
HAD3020H⌘	Quality Improvement Methods
HAD3025H⌘	Teaching QI and Patient Safety (prerequisites: HAD3010H, HAD3020H, HAD3040Y+)
HAD3030H⌘	Concepts and Strategies in Patient Safety
HAD3040Y+	Project Practicum
HAD3041Y0	Design and Methods for Thesis Research
HAD3050H⌘	Leading and Managing Change
HAD3060H⌘	Quality Improvement in Health Systems
HAD3070H⌘	Health Law and Risk Management for Quality Improvement and Patient Safety

Practicum Course

HAD3080H	External Practicum

Elective Courses

HAD3090H⌘	The Application of Lean in Healthcare
HAD4000H	Reading Course — QIPS

+ Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.

0 Course that may continue over a program. The course is graded when completed.

Concentration: System Leadership and Innovation

Required Courses

HAD2001H⌘	Strategic Vision and Planning for Health System Change
HAD2002H⌘	Research Methods for Evaluating Health System Innovation
HAD2003H⌘	Leading and Responding to Health Policy and System Change
HAD2004H⌘	Leadership, Motivation, and Partnering

Practicum Courses

HAD2010H	Health Systems Leadership Practicum (Individual) (Credit/No Credit)
HAD2011H0	Individual Practicum — Quality Improvement
HAD2020H	Health Systems Consulting Practicum (Team) (Credit/No Credit)

Elective Courses

HAD2005H⌘	Quality Improvement Skills for Healthcare Leaders
HAD2006H	Accelerating Innovations in Medical Education
HAD2007H⌘	Leading Health Systems innovation and Transformation (prerequisite: HAD2004H)
HAD2008H⌘	Human Factors, Strategy, and Innovation Leadership (prerequisite: HAD2004H)
HAD2012H⌘	Learning Health Systems: Research Tools, Approaches, and Lessons
HAD2013H⌘	Fundamentals of Health Economics and Policy
HAD2030H	Health Systems Innovation Capstone (Credit/No Credit) (prerequisites: HAD2001H, HAD2002H, HAD2003H, HAD2004H, HAD2005H, HAD2010H, HAD2020H)
HAD2040Y0	Systems Innovation and Leadership Project Course (Credit/No Credit) (prerequisites: HAD2001H, HAD2003H, and HAD2004H)

Cross-Listed Courses

These courses are limited to certain program students in Health Policy, Management and Evaluation. Please check the IHPME website.

CHL5300H⌘	Public Health Policy
HSR1001H	Introduction to Qualitative Methods for Health Services and Policy Research
HSR1002H	Health Services Research Seminar (Credit/No Credit)
JCV3060H	Advanced Topics in Cardiovascular Sciences — Molecular Biology and Heart Signal Transduction
JCV3061H	Advanced Topics in Cardiovascular Sciences — Hormones
JCV3062H	Advanced Topics in Cardiovascular Sciences — Heart Function
JCV3063H	Advanced Topics in Cardiovascular Sciences — Vascular

0 Course that may continue over a program. The course is graded when completed.

HPME: Health Administration MHSc

Master of Health Science

Program Description

The MHSc program is geared to health managers and professionals who wish to acquire a graduate education in health administration. The program's modular format allows learners to complete the degree without interrupting their careers.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy IHPME's additional admission requirements stated below.

- Normally, the equivalent of a University of Toronto B+ average or higher in each of the last two years of an appropriate bachelor's degree from a recognized university. Applicants are strongly advised to have some prior preparation in quantitative courses such as statistics, accounting, and economics.
- Full-time, relevant work experience.

Program Requirements

- Completion of **10.0 full-course equivalents (FCEs)** as follows:
  - 9.0 FCEs are required subjects, which include a minimum of 1.0 FCE in a field placement.
  - The remaining 1.0 FCE are elective courses.
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.

Program Length

5 sessions full-time (typical registration sequence: F/W/S/F/W)

Time Limit

3 years full-time

HPME: Health Administration MHSc Courses

Students in the Master of Health Science program may elect to be assessed on a Credit/No Credit basis in courses marked by the symbol ⌘ up to a total of 0.5 FCE.

Required Courses

All courses are offered in modular format unless marked otherwise.

HAD5010H⌘	Canada's Health System and Health Policy: Part I
HAD5020H⌘	Canada's Health System and Health Policy: Part II
HAD5711H⌘	Theory and Practice of Strategic Planning and Management in Health Services Organization
HAD5713H⌘	Introduction to Health Information Systems
HAD5721H⌘	Strategic Management of Quality and Organizational Behaviour in Health Services Organizations
HAD5723H⌘	Health Services Accounting
HAD5724H⌘	Quantitative Methods for Health Services Management and Policy
HAD5725H⌘	Health Economics
HAD5731H⌘	Translating Leadership Into Practice
HAD5733H⌘	Health Services Finance
HAD5741H⌘	Health Law and Ethics
HAD5761H⌘	Introduction to eHealth: Informatics, Innovations, and Information Systems
HAD5767H⌘	Health Services Marketing
HAD5769H⌘	Human Resources Management in the Health Field
HAD5770H⌘	Program Planning and Evaluation
HAD5800H	The Fundamentals of Health Services Leadership (Credit/No Credit) (prerequisites: all courses in Blocks 1 to 3, plus HAD5725H, HAD5741H, and HAD5769H)
HAD6010Y+	Health Care Leadership Practicum (Credit/No Credit)
HAD6011H+	Health Care Leadership Practicum Extension (Credit/No Credit)

+ *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Elective Courses

Non-modular electives may be taken subject to program approval.

HAD5736H⌘	Operations Research Tools for Quantitative Health Care Decision Making
HAD5765H⌘	Case Studies in Health Policy
HAD5775H⌘	Competition, Cooperation, and Strategy in Health Care

HPME: Health Informatics MHI

Master of Health Informatics

Program Description

The Master of Health Informatics (MHI) is a professional program which provides graduates with expertise in clinical information and communication technologies (ICTs) required to lead organizational and health system change. The MHI degree program prepares health informaticians to bridge the gaps between clinicians and ICT specialists.

There are two options available to complete the MHI:

- **Regular MHI option:** This is designed for individuals who are not currently in a health informatics profession and are seeking a career in the field. Applicants to this option should not be employed full-time.
- **Executive MHI option:** This is designed for individuals who are currently employed in the health informatics profession and are interested in pursuing leadership positions and other career development. Applicants to this option must be employed in the health informatics sector and have an executive sponsor at their place of employment.

Regular MHI Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy IHPME's additional admission requirements stated below.
- Appropriate bachelor's degree from a recognized university. Eligible undergraduate degrees include those in a health sciences or social sciences specialty, Regulated Health Professions in Ontario, or a computer science or information science specialty with the equivalent of a minimum mid-B average in the last academic year.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- Successful applicants normally have relevant professional experience as a health services professional (e.g., manager or administrator) or health sciences/ clinical practitioner with demonstrated basic literacy and/or programming skills in computer applications relevant to the health sector, or a computer or information technician within a health-care setting or health software vendor.

Program Requirements

- Completion of **10.0 full-course equivalents (FCEs)** as follows:
  - Required coursework (7.5 FCEs)
  - Elective coursework (0.5 FCE)
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.
  - A four-month, full-time practicum or field placement (MHI2005Y; 2.0 FCEs).
- Degree requirements will be completed in 16 months across four consecutive sessions.

Students may elect to be assessed on a Credit/No Credit basis in courses marked by the symbol ⌘ up to a total of 0.5 FCE.

Required Courses for the Regular MHI Option

HAD5010H⌘	Canada's Health System and Health Policy: Part I
MHI1001H⌘	Information and Communication Technology in Health Informatics
MHI1002H⌘	Complexity of Clinical Care
MHI2001H⌘	Fundamentals of Health Informatics
MHI2002H⌘	Emergent Topics in Health Informatics
MHI2003H⌘	Emerging Applications in Consumer, Public, and Global Health Informatics
MHI2004H⌘	Human Factors and Systems Design in Health Care
MHI2006H⌘	Advanced Topics in Health Informatics (Strategic Frameworks for Solution Architecture)
MHI2007H⌘	Quantitative Skills in Health Informatics
MHI2008H⌘	Project Management for Health Informatics
MHI2009H⌘	Evaluation Methods for Health Informatics
MHI2011H⌘	Performance Measurements in Health Care: Theory and Application
MHI2017H⌘	Systems Analysis and Process Innovation in Healthcare
MHI2018H⌘	Knowledge Management and Systems
MHI2019H⌘	Health Information Systems, Services, and Design

Practicum Course

MHI2005Y	Practicum Placement

Elective Courses

Students are encouraged to select an elective that allows them to focus on their individual areas of interest in health informatics. For this reason, the MHI program does not impose a selection of electives. Students are free to choose from all graduate courses across all disciplines at the University of Toronto. All selections are subject to approval in advance by the Program Director and the IHPME Chair.

MHI2010H	Extended Health Informatics Practicum
MHI2012H⌘	Introduction to Big Data for Health: Foundations and Methodologies
MHI2013H⌘	Data Visualization in Health Care
MHI3000H⌘	Independent Reading for Health Informatics

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F)

Time Limit

3 years full-time

Executive MHI Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy IHPME's additional admission requirements stated below.
- Appropriate bachelor's degree from a recognized university. Eligible undergraduate degrees include those in a health sciences or social sciences specialty, Regulated Health Professions in Ontario, or a computer science or information science specialty with the equivalent of a minimum mid-B average in the last academic year.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- Successful applicants normally have relevant professional experience as a health services professional (e.g., manager or administrator) or health sciences/ clinical practitioner with demonstrated basic literacy and/or programming skills in computer applications relevant to the health sector, or a computer or information technician within a health care setting or health software vendor.
- Additional requirements for the executive MHI option are as follows:
  - active employment in a health informatics role or capacity; and
  - an executive sponsor at the site of employment, committed to supervising and supporting the student's program including the health informatics project; see program requirements below.

Program Requirements

- Completion of **10.0 full-course equivalents (FCEs)** as follows:
  - Required coursework (7.5 FCEs)
  - Elective coursework (1.0 FCE)
  - Students may elect to take up to 0.5 FCE on a Credit/No Credit basis. See the list of Credit/No Credit-eligible courses below.
  - A four-month, employer-sponsored *Health Informatics Project* (MHI2015Y; 1.5 FCEs).
- The executive MHI degree requirements will be completed in 22 months across six consecutive sessions.

Required Courses

HAD5010H⌘	Canada's Health System and Health Policy: Part 1
MHI1001H⌘	Information and Communication Technology in Health Informatics
MHI1002H⌘	Complexity of Clinical Care
MHI2001H⌘	Health Informatics I
MHI2002H⌘	Health Informatics II
MHI2003H⌘	Emerging Applications in Consumer, Public and Global Health Informatics
MHI2004H⌘	Human Factors and Systems Design in Health Care
MHI2006H⌘	Advanced Topics in Health Informatics (Strategic Frameworks for Solution Architecture)
MHI2007H⌘	Quantitative Skills in Health Informatics
MHI2008H⌘ or HAD5731H⌘ or HAD5733H⌘	Project Management for Health Informatics or Translating Leadership into Practice or Health Services Finance
MHI2009H⌘	Evaluation Methods for Health Informatics
MHI2011H⌘	Performance Measurements in Health Care: Theory and Application
MHI2017H⌘	Systems Analysis and Process Innovation in Healthcare
MHI2018H⌘	Knowledge Management and Systems
MHI2019H⌘	Health Information Systems, Services, and Design
MHI3000H⌘	Independent Reading for Health Informatics

Practicum Course

MHI2015Y	Health Informatics Project

Elective Courses

Students are encouraged to select an elective that allows them to focus on their individual areas of interest in health informatics. For this reason, the MHI program does not impose a selection of electives. Students are free to choose from all graduate courses across all disciplines at the University of Toronto. All selections are subject to approval in advance by the Program Director and the IHPME Chair.

MHI2012H⌘	Introduction to Big Data for Health: Foundations and Methodologies
MHI2013H⌘	Data Visualization in Health Care
MHI2016H	Health Informatics Project Extension
MHI3000H⌘	Independent Reading for Health Informatics

Program Length

Degree Programs

History

MA and PhD

- Fields by Chronology or Geography:
  - African History;
  - American History;
  - Atlantic World History;
  - British and Irish History;
  - Canadian History;
  - East Asian History;
  - European History;
  - Latin American and Caribbean History;
  - Medieval History;
  - Mediterranean and Middle Eastern History;
  - Russian History;
  - South Asian History;
  - Southeast Asian History

- Fields by Theme:
  - Contemporary International History (MA only);
  - Cultural and Intellectual History;
  - Food History;
  - History of Conflict, Violence, and Genocide;
  - History of Economy, Technology, and Society;
  - History of Empire, Colonialism, and Indigeneity;
  - History of Gender, Sex, and Sexualities;
  - History of Medicine;
  - History of Migration/Diaspora;
  - History of Religion and Society;
  - History of State, Politics, and Law;
  - International Relations;
  - Social History

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Book History and Print Culture
  - History, MA, PhD
- Contemporary East and Southeast Asian Studies
  - History, MA
- Diaspora and Transnational Studies
  - History, MA, PhD
- Ethnic, Immigration and Pluralism Studies
  - History, MA, PhD
- Food Studies
  - History, MA, PhD
- Jewish Studies
  - History, MA, PhD
- Sexual Diversity Studies
  - History, MA, PhD
- South Asian Studies
  - History, MA, PhD
- Women and Gender Studies
  - History, MA, PhD

Overview

The Department of History offers a broadly diversified program of graduate studies leading to the **Master of Arts** and **Doctor of Philosophy** degrees. There are opportunities to study and research several geographic, chronological, and thematic areas of history. Visit the departmental website for descriptions of specific fields.

The University of Toronto also offers rich resources outside the department to support the study of history. The Robarts Research Library, unrivalled in Canada and among the leading university libraries in North America, provides a foundation for a wide range of study. Specialized collections are located elsewhere in the University including in a number of centres and research institutes. The Centre for Medieval Studies and the Pontifical Institute of Mediaeval Studies have particularly strong resources for European and British medieval history. The Munk School of Global Affairs and Public Policy; the Institute for the History and Philosophy of Science and Technology; the Centre for Criminology and Sociolegal Studies; the Institute for Urban and Community Studies; as well as the Centre for European, Russian, and Eurasian Studies afford additional opportunities for interdepartmental work. The department participates in a number of interdisciplinary collaborative specializations.

History: History MA

Master of Arts

Program Description

The Department of History offers a broadly diversified program of graduate studies leading to the Master of Arts degree. There are opportunities to study and research several geographic, chronological, and thematic areas of history. Visit the departmental website for descriptions of specific fields. The requirements vary for the field in Contemporary International History; see the admission and program requirements below.

The MA program can be taken on a full-time or part-time basis.

MA Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of History's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university with at least a B+ standing.
- Successful completion of at least 6.0 full-course equivalents (FCEs) in history. Applicants without adequate history training may be required to complete an appropriate number of undergraduate history courses before being considered for admission. In rare cases, an applicant may be admitted to the MA program but will be required to do one or two courses in addition to the MA program requirements.
- In addition to the School of Graduate Studies online application form, applicants must submit:
  - an Application Information Form
  - three letters of recommendation
  - a 500-word specific research proposal outlining a precise field and area of historical investigation
  - a writing sample of no more than 3,000 words.
- Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction was not English must demonstrate proficiency in the English language through the successful completion of the Test of English as a Foreign Language (TOEFL) with scores of at least:
  - paper-based TOEFL exam: 600 with 5 on the Test of Written English (TWE)
  - Internet-based TOEFL exam: 100/120 with 22/30 on the writing and speaking sections.

Program Requirements

- Students may complete the MA by:
  - coursework and research paper or
  - coursework and thesis (with special permission).
- Students must achieve at least an overall B average in their courses to maintain standing.
- Students must also demonstrate competency in a language other than English, to be assessed in a manner approved by the Associate Chair (Graduate) or designate.

Coursework and Research Paper

- Students must successfully complete a total of **3.5 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE: HIS1997H
  - 1.0 FCE: HIS2000Y[0] MA essay
  - 2.0 FCE: HIS courses. Normally, up to 1.0 FCE may be taken outside the Department of History with the approval of the Associate Chair, Graduate.
- Full-time MA students are expected to complete all degree requirements within 12 months of entering the program.

Coursework and Thesis

- Students must successfully complete a total of **2.0 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE: HIS1997H
  - 1.5 FCE: present an MA thesis.
- The thesis MA might take longer than the coursework MA. The thesis must be presented by full-time students within three years of entering the program; part-time students must present within six years of entering the program.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

[0] Course that may continue over a program. The course is graded when completed.

Field: Contemporary International History

The field in Contemporary International History (CIH) focuses on the historical roots and genealogies of contemporary international issues. It emphasizes the development of research and analytical skills that will enrich decision-making in an increasingly interconnected, but tension-filled global environment. The field is designed to prepare students in research, analytical, and communication skills for decision-making in non-academic careers in government, international organizations, non-governmental organizations, media, business and finance, law, and the cultural sector.

The coursework-plus-thesis option is not permitted in this field.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of History's additional admission requirements stated below.
- An appropriate bachelor’s degree, or equivalent, from a recognized university with successful completion of at least 6.0 full-course equivalents (FCEs) in History with a B+ average.
- A B+ average (grade point average of 3.3), or equivalent, in the final 5.0 FCEs of the BA.
- In addition to the School of Graduate Studies online application form, applicants must submit:
  - an Application Information Form
  - three letters of recommendation
  - a 500-word specific research proposal outlining a precise field and area of historical investigation
  - a writing sample of no more than 3,000 words.
- Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a

university where the language of instruction was not English must demonstrate proficiency in the English language through the successful completion of the Test of English as a Foreign Language (TOEFL) with scores of at least:
  - paper-based TOEFL exam: 600 with 5 on the Test of Written English (TWE)
  - Internet-based TOEFL exam: 100/120 with 22/30 on the writing and speaking sections.

Program Requirements

- **Coursework.** Students must successfully complete a total of **2.5 full-course equivalents (FCEs)** as follows:
  - 0.5 FCE: HIS1997H
  - 0.5 required FCE: HIS1900H or HIS1901H
  - the remaining 1.5 FCE can be taken within or outside the History department.
- HIS2000Y[0], a research project defined in consultation with a supervisor and approved by the CIH Coordinator.
- Students must achieve at least an overall B average in their courses to maintain standing.
- Students must also demonstrate competency in a language other than English, to be assessed in a manner approved by the Associate Chair (Graduate) or designate.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time

Time Limit

3 years full-time;
6 years part-time

[0] Course that may continue over a program. The course is graded when completed.

History: History PhD

Doctor of Philosophy

Program Description

The Department of History offers a broadly diversified program of graduate studies leading to the Doctor of Philosophy degree. There are opportunities to study and research several geographic, chronological, and thematic areas of history. Visit the departmental website for descriptions of specific fields.

Applicants may enter the PhD program via one of two routes: 1) following completion of an appropriate MA degree or 2) direct entry following completion of an appropriate bachelor's degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of History's additional admission requirements stated below.
- The closing date for applications to the PhD program is January 15. Later applications will be considered only in exceptional circumstances.
- Normally, applicants may enter the PhD program with an **MA degree** in history or its equivalent with an A– average or better.
- Applicants must satisfy the department of their ability to do independent research at an advanced level.
- In addition to the School of Graduate Studies online application form, applicants must submit:
  - an Application Information Form
  - three letters of recommendation
  - a 500-word specific research proposal outlining a precise field and area of historical investigation
  - a writing sample of no more than 6,000 words.
- Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction was not English must demonstrate proficiency in the English language through the successful completion of a recognized English-language proficiency examination as outlined in the School of Graduate Studies General Regulations.

Program Requirements

- **Coursework**. With **MA degree in history**: students must successfully complete a total of **2.0 full-course equivalents (FCEs)** with a B+ average throughout the coursework.
- **Residence requirement.** Residence means students must be in such geographical proximity as to be able to visit the campus regularly and participate fully in the University's activities associated with the program. PhD students must maintain geographical proximity to the campus until they have passed their field examinations but no longer than a period of two years.
- **Comprehensive examinations.** At the beginning of their programs, students consult with their supervisor and the Associate Chair, Graduate to determine their fields. Two options are available: two majors **or** one major and two minors. Major fields should coincide with the subject area(s) that the student has chosen for the thesis. Minors should be in different areas. The comprehensive field examinations consist of a written examination in each field and a common oral examination covering all fields. Students are required to take their field examinations by the spring of Year 2, but they are strongly advised to take them as soon as possible after the completion of their coursework. Examinations are held in January and April. Examinations cannot be postponed beyond the spring of Year 2 without permission of the Associate Chair, Graduate. The department's website lists the fields offered.
- **Language requirements** vary with the student's major area of study. If not already so qualified, a student must qualify in one language other than English by the beginning of Year 2 and may be asked to qualify in other program-

related languages. All language requirements are subject to the approval of the Associate Chair, Graduate.
- **Thesis:** When all of the above requirements are completed, the candidate will proceed to write the PhD thesis and defend it at a Doctoral Final Oral Examination. The thesis must be a piece of original scholarship, approximately 350 pages (90,000 words) in length, exclusive of notes and bibliography. Thesis preparation is guided by a committee consisting of the major supervisor and two other faculty members. The thesis must be presented within six years of first enrolment in the full-time PhD program.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of History's additional admission requirements stated below.
- The closing date for applications to the PhD program is January 15. Later applications will be considered only in exceptional circumstances.
- Exceptional applicants may enter the PhD program by direct entry from the BA with an A– average or better.
- Applicants must satisfy the department of their ability to do independent research at an advanced level.
- In addition to the School of Graduate Studies online application form, applicants must submit:
  - an Application Information Form
  - three letters of recommendation
  - a 500-word specific research proposal outlining a precise field and area of historical investigation
  - a writing sample of no more than 6,000 words.
- Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction was not English must demonstrate proficiency in the English language through the successful completion of a recognized English-language proficiency examination as outlined in the School of Graduate Studies General Regulations.

Program Requirements

- **Coursework**. By **direct entry**: students must successfully complete a total of **4.5 full-course equivalents (FCEs)**, 0.5 of which must be either HIS1997H or HIS1201H. Students must maintain an A– average in their first 2.0 FCEs in order to continue in the program.
- **Residence requirement.** Residence means students must be in such geographical proximity as to be able to visit the campus regularly and participate fully in the University's activities associated with the program. PhD students must maintain geographical proximity to the campus until they have passed their field examinations but no longer than a period of two years.
- **Comprehensive examinations.** At the beginning of their programs, students consult with the Associate Chair, Graduate to determine their fields, and students will be assigned advisors. Two options are available: two majors or one major and two minors. Major fields should coincide with the subject area(s) that the student has chosen for the thesis. Minors should be in different areas. The comprehensive field examinations consist of a written examination in each field and a common oral examination covering all fields. Students are required to take their field examinations by the spring of Year 2, but they are strongly advised to take them as soon as possible after the completion of their coursework. Examinations are held in January and April. Examinations cannot be postponed beyond the spring of Year 2 without permission of the Associate Chair, Graduate. The department's website lists the fields offered.
- **Language requirements** vary with the student's major area of study. If not already so qualified, a student must qualify in one language other than English by the beginning of Year 2 and may be asked to qualify in other program-related languages. All language requirements are subject to the approval of the Associate Chair, Graduate.
- **Thesis**: When all of the above requirements are completed, the candidate will proceed to write the PhD thesis and defend it at a Doctoral Final Oral Examination. The thesis must be a piece of original scholarship, approximately 350 pages (90,000 words) in length, exclusive of notes and bibliography. Thesis preparation is guided by a committee consisting of the major supervisor and two other faculty members. The thesis must be presented within seven years of first enrolment in the direct-entry PhD.

History: History MA, PhD Courses

Not all courses are offered every year. Please consult the department's list of current course offerings.

HIS1001H	Topics in History
HIS1003H	Theory and History
HIS1004H	History and Biopolitics
HIS1007H	Theories, Histories, Imaginaries: Themes in Technoscience

HIS1008H	The Practice of Public History and Archival Research
HIS1009H	Empire and Governmentality: Economy, Culture, and Liberal Governance
HIS1010H	New Historiographies of Capitalism: Globality and Making Space, Time, Subjects
HIS1011H	Queer and Trans Oral History
HIS1013H	Intellectuals and Decolonization
HIS1014H	Neoliberalism in North America
HIS1015H	Oral History Theory and Practice
HIS1016H	Historical Readings in Gender and Sexuality
HIS1019H	Science, Nature, and Empire
HIS1020H	Cultural Theory/Cultural History
HIS1031H	Images as History: Photography, Historical Method, and Conceptualizing Visuality
HIS1032H	Modernity and Its Visual Cultures
HIS1040H	Maps in History: Power and Identity, Conflict and Imagination
HIS1104H	Natives and Empires: Colonial History of the Americas, 1492–1800
HIS1105H	Colonial North America, 1600–1783
HIS1106H	Topics in Canadian Social History
HIS1107H	Religion, Culture, and Society in Canada (joint graduate/undergraduate)
HIS1113H	Politics and Society in North American History
HIS1117H	Canada: Colonialism/Postcolonialism
HIS1118H	Canada By Treaty: Alliances, Title Transfers, and Land Claims
HIS1128H	Canada and Transnational History
HIS1142Y	Canadian Foreign Relations, 1940–2003 (joint graduate/undergraduate)
HIS1168H	History of the Sex Trade in Canadian and Comparative Contexts
HIS1180H	Race in the USA and Canada
HIS1200H	Readings in European Intellectual History
HIS1203H	Jus Commune
HIS1204H	Topics in Medieval Church History
HIS1213H	Medieval Institutes of Perfection (joint graduate/undergraduate)
HIS1215H	Social Change in Medieval England, 1154–1279
HIS1221H	Topics in Early Modern European Social History
HIS1228H	Revolutions in History: The Annales School in Context
HIS1230H	The Sexes in the Western World, 1450–1650
HIS1232H	European Colonialism, 1870–1970: A Comparative History
HIS1233H	Colonial Urbanism in the Mediterranean World, 1800–1950
HIS1234H	Readings in Early Modern French History
HIS1235H	Histories in the Mediterranean: From Braudel to Post-Colonialism
HIS1237H	France: 1870–1968
HIS1268H	The Holocaust and World War II
HIS1269H	The Social History of Medicine in the Nineteenth and Twentieth Centuries (joint graduate/undergraduate)
HIS1270H	History of Psychiatry and Psychiatric Illness (joint graduate/undergraduate)
HIS1272H	Topics in Twentieth-Century European History
HIS1275H	Imperial Germany, 1871–1918
HIS1278H	Topics in 20th C German History
HIS1279H	World War II in East Central Europe (joint graduate/undergraduate)
HIS1281H	History of Real Socialism
HIS1283H	Crusades, Conversion, and Colonization in the Medieval Baltic (joint graduate/undergraduate)
HIS1286H	Categories of Imperial Russian Social History
HIS1287H	Polish Jews Since the Partitions of Poland (joint graduate/undergraduate)
HIS1288H	Russia's Empire
HIS1289H	The Cold War Through Its Archives
HIS1289Y	Twentieth Century Ukraine
HIS1290H	Topics in Imperial Russian History
HIS1293Y	Kievan Rus' (joint graduate/undergraduate)
HIS1296H	Stalinism and After: Beyond Cold War History
HIS1301H	History of Food and Drink
HIS1416H	Early Modern English Popular Culture, 1500–1800
HIS1435H	Studies in Victorian Society
HIS1440H	Irish Nationalism in Canada, 1858–1870 (joint graduate/undergraduate)
HIS1511H	History and Present-Day Policy Analysis
HIS1531H	American Political History Since 1877
HIS1532H	American Foreign Policy in the Cold War

HIS1533H	Gender and International Relations (joint graduate/undergraduate)
HIS1538H	Reading in U.S. History
HIS1552H	Historical Perspectives on Gender and Migration, 1500–2010
HIS1620H	Asian Diasporas
HIS1662H	Rethinking Modernity Through Japan
HIS1664H	Religion and Society in Southeast Asia
HIS1667H	Transnational Gender Histories
HIS1673H	Critical Historiography of Late Imperial and Modern China
HIS1675H	Imperial Circulation and Diasporic Flows in the British Empire
HIS1677H	Empire and Nation in Modern East Asia
HIS1678H	War and Memory in Twentieth-Century East Asia
HIS1702H	Colonial Violence: Comparative Histories
HIS1704H	Colloquium in Latin American and Caribbean History
HIS1705H	Trends in Women and Gender History in the Global South
HIS1707H	Topics in African History
HIS1708H	Labour in the Age of Imperialism
HIS1712H	Topics on the History of Ethiopia
HIS1725H	Topics in Latin American History: Race, Gender, and Citizenship
HIS1784H	The Islamic Revolution
HIS1785H	International Relations in the Middle East
HIS1800H	Global Histories of the Archives
HIS1802H	Slavery in North America (joint undergraduate/graduate)
HIS1805H	Human Rights and Empire (exclusion: HIS1860H)
HIS1806H	Histories of the Carceral State
HIS1810H	Indigenous Economies and Imperialism
HIS1820H	Law, Space, and History
HIS1825H	Changing Skylines: (Re)mapping Urban History in the Global Age
HIS1830H	Critical Approaches to Historical Anthropology
HIS1840H	Empires in World War II
HIS1850H	Queer Archives and LGBTQ History
HIS1860H	Global Rights: A Critical History
HIS1870H	History on Film/Film on History
HIS1880H	Digital History
HIS1890H	Regimes of Value
HIS1900H	History in International Affairs
HIS1901H	Approaches and Methodologies in Contemporary International History
HIS1997H	The Practice of History (Credit/No Credit)
HIS1998H	Reading Course
HIS1999H	Reading Course
HIS2000Y[0]	Directed Research
JHL1282H	Comparative Totalitarian Culture
JHL1680H	Revolutionary Women's Cultures in East Asia, Early to Mid 20th Century
JHP1289Y	Twentieth-Century Ukraine (joint graduate/undergraduate)
JHP2351Y	The People From Nowhere

[0] Course that may continue over a program. The course is graded when completed.

Courses in Other Departments Taught by History Faculty

COL5027H	Memory, Trauma, and History
MST1110H	Diplomatics and Diplomatic Editing
MST3205H	Violence in Medieval Society
MST3225Y	Jews and Christians in Medieval and Renaissance Europe

Other Departments

Students may take courses from other departments for graduate history credit with permission of the Associate Chair, Graduate. Interested students should consult the appropriate calendar entries and departmental websites for current course offerings.

History and Philosophy of Science and Technology

HPST: Introduction

Arts and Science

Degree Programs

History and Philosophy of Science and Technology

MA and PhD

- Fields:
  - History of Mathematics and Physical Sciences;
  - History of Medicine and Life Sciences;
  - History of Technology;
  - Philosophy of Science

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Book History and Print Culture
  - History and Philosophy of Science and Technology, MA, PhD
- Sexual Diversity Studies
  - History and Philosophy of Science and Technology, MA, PhD

Overview

The Institute for the History and Philosophy of Science and Technology (IHPST) conducts research, offers advanced studies programs, and serves as a focus for University-wide interest in its field.

Courses are open to all graduate students and are suitable complements for specialists in science or the humanities. Students are encouraged to participate in the IHPST colloquia, which are open to the University of Toronto community.

HPST: History and Philosophy of Science and Technology MA

Master of Arts

Program Description

Admission to the MA is highly selective and competitive. Acceptance is based on a combination of grades, references, academic and professional accomplishments, areas of interest, and a sample of written work. The IHPST website contains detailed instructions for completing admission applications. Applications must be accompanied by transcripts, a statement of interest, letters of reference, a curriculum vitae, and a writing sample.

Applicants who wish to take one or more of the courses offered by IHPST as non-degree students should apply for admission as Special Students. The application procedures are the same as for those of the MA program, but the deadline for applications is May 1.

The MA program can be taken on a full-time or part-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy IHPST's additional admission requirements stated below.
- A bachelor's degree from a recognized university with an average grade of at least B+ in the final two years of undergraduate work. While the majority of accepted students exceed this standard, the very broad scope of the field and the variety of fruitful approaches to it also imply that many different backgrounds are appropriate. Accordingly, grades are only one criterion used to judge applicants.
- Applications must be accompanied by a 300- to 500-word statement of interest indicating the applicant's areas of interest in history and/or philosophy of science and technology at the graduate level. A writing sample of no more than 3,000 words (not to exceed 20 pages) is required.
- Application deadline is January 15 of every year.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction is not English must submit results of the Test of English as a Foreign Language (TOEFL) and Test of Written English (TWE) with the following minimum scores:
  - Paper-based TOEFL: 580 and 5 on the TWE
  - Internet-based TOEFL: 93/120 and 22/30 on the writing and speaking sections.

Program Requirements

- **Coursework.** Students must complete a minimum of **3.0 full-course equivalents (FCEs)**. A student's curriculum is arranged in consultation with the student's faculty advisor and the Director of Graduate Studies. Students make course choices consistent with a commitment to either:
  - One of the three history fields (History of Mathematics and Physical Sciences; History of Medicine and Life Sciences; History of Technology), **or**
  - The philosophy field (Philosophy of Science).
- Students in a **history field** must:
  - Complete HPS1000H *Introduction to the History and Philosophy of Science and Technology* (0.5 FCE) in the first session
  - Complete 1.0 FCE from the HPS 2000 series
  - Complete 0.5 FCE from the HPS 3000 series
  - Complete elective courses (1.0 FCE)
  - Demonstrate a reading knowledge of French or German; language instruction courses are not counted in the 3.0 FCEs required for the degree.
- Students in the **philosophy field** must:
  - Complete HPS1000H *Introduction to the History and Philosophy of Science and Technology* (0.5 FCE) in the first session
  - Complete 0.5 FCE from the HPS 2000 series
  - Complete 1.0 FCE from the HPS 3000 series
  - Complete elective courses (1.0 FCE)
  - Demonstrate proficiency in introductory logic, a reading knowledge of French, or a reading knowledge of German; logic and language instruction courses are not counted in the 3.0 FCEs required for the degree.
- Students in either field who wish to pursue independent research may take HPS1500H *Research Paper* (0.5 FCE), in which they carry out a self-initiated research project under the direction of a faculty advisor.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
15 sessions part-time

Time Limit

3 years full-time;
6 years part-time

HPST: History and Philosophy of Science and Technology PhD

Doctor of Philosophy

Program Description

Admission to the PhD program is highly selective and competitive. Acceptance is based on a combination of grades, references, academic and professional accomplishments, areas of interest, and a sample of written work. The IHPST website contains detailed instructions for completing admission applications. Applications must be accompanied by transcripts, a statement of interest, letters of reference, a curriculum vitae, and a writing sample. The application deadline is January 15 of every year.

Applicants must be admitted via one of the following routes: 1) following completion of a master's degree in History and

Philosophy of Science and Technology or 2) direct entry following completion of an appropriate bachelor's degree.

With the approval of the Director of Graduate Studies, some applicants may be admitted to a flexible-time PhD option. This option will benefit mature students who remain active in their professional careers during the PhD, such as physicians, engineers, educators, and IT professionals. The option will enable them to engage in supervised research in the history and/or philosophy of their profession.

Applicants who wish to take one or more of the courses offered by IHPST as non-degree students should apply for admission as Special Students. The application procedures are the same as for those of the MA program, but the deadline for applications is May 1.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy IHPST's additional admission requirements stated below.
- A University of Toronto **master's degree** in History and Philosophy of Science and Technology or its equivalent from a recognized university with an average grade of at least an A– in the applicant's program and with no individual grade less than B+. While the majority of accepted students exceed this standard, the very broad scope of the field and the variety of fruitful approaches to it also imply that many different backgrounds are appropriate. Accordingly, grades are only one criterion used to judge applicants.
- Applications must be accompanied by a 300- to 500-word statement of interest indicating the applicant's areas of interest in history and/or philosophy of science and technology at the graduate level. A writing sample of no more than 3,000 (not to exceed 20 pages) words is required.
- Applicants whose primary language is not English and who are not graduates of a university whose language of instruction is English must submit results of the Test of English as a Foreign Language (TOEFL) and Test of Written English (TWE) with the following minimum scores:
  - Paper-based TOEFL: 580 and 5 on the TWE or
  - Internet-based TOEFL: 93/120 and 22/30 on the writing and speaking sections.

Program Requirements

- Students admitted on the basis of a **master's degree** must:
  - Complete **3.0 full-course equivalents (FCEs)**; a student whose MA degree does not exhibit sufficient breadth is required to take additional courses.
  - Make course choices consistent with a commitment to either:
    - **One of the three history fields** (History of Mathematics and Physical Sciences; History of Medicine and Life Sciences; History of Technology). Students in the history fields must demonstrate reading knowledge of French or German; language instruction courses are not counted in the FCEs required for the degree **or**
    - **The philosophy field** (Philosophy of Science). Students in the philosophy field must demonstrate proficiency in introductory logic, a reading knowledge of French, or a reading knowledge of German; logic and language instruction courses are not counted in the FCEs required for the degree.
- Arrange the balance of their curriculum in consultation with the Director of Graduate Studies and faculty instructors.
- Submit a proposal for an advanced research paper (required for HPS1100Y[+]) by end of Year 1 for students who enter with a master's degree.
- Students are responsible for ensuring that they have an appropriate supervisor. All supervision arrangements are reviewed and approved by the Director of Graduate Studies who assists in the search for a supervisor, if necessary. Proper supervision is a prerequisite for continuation in the program.
- Maintain a cumulative average of at least A– with no individual grade less than B+. In addition, all students should receive at least an A– on the HPS1100Y[+] *Advanced Research Paper*. Students falling below these standards may be recommended for termination from the program.
- Demonstrate other competencies crucial to conducting research in the student's thesis area, as determined by the supervisory committee in consultation with the student and the Director of Graduate Studies. This may include, for example, competence in another language; mathematics; and a physical, life, or social science.
- Pass a qualifying examination in areas related to the field of expected research. Examination is conducted by the student's specialist committee, normally three faculty members.
- Submit a thesis proposal approved by the student's thesis supervisory committee and the Director of Graduate Studies.

Program Length

4 years

Time Limit

6 years

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy IHPST's additional admission requirements stated below.
- An appropriate **bachelor's degree** from a recognized university, with an average grade of at least a B+ in the

applicant's overall program and of at least an A– in the applicant's final two years of study.
- Applications must be accompanied by a 300- to 500-word statement of interest indicating the applicant's areas of interest in history and/or philosophy of science and technology at the graduate level. A writing sample is required.
- Applicants whose primary language is not English and who are not graduates of a university whose language of instruction is English must submit results of the Test of English as a Foreign Language (TOEFL) and Test of Written English (TWE) with the following minimum scores:
  - Paper-based TOEFL: 580 and 5 on the TWE
  - Internet-based TOEFL: 93/120 and 22/30 on the writing and speaking sections.

Program Requirements

- Students admitted on the basis of a **bachelor's degree** (direct-entry) must:
  - Complete **6.0 full-course equivalents (FCEs)** in total; of these, students must complete all of the MA program requirements including language proficiency, normally in Year 1.
  - Complete all required courses by the end of Year 2. The exception is HPS1100Y+, which should be completed at the end of Year 3.
  - Make course choices consistent with a commitment to either:
    - **One of the three history fields** (History of Mathematics and Physical Sciences; History of Medicine and Life Sciences; History of Technology). Students in the history fields must demonstrate reading knowledge of French or German; language instruction courses are not counted in the FCEs required for the degree **or**
    - **The philosophy field** (Philosophy of Science). Students in the philosophy field must demonstrate proficiency in introductory logic, a reading knowledge of French, or a reading knowledge of German; logic and language instruction courses are not counted in the FCEs required for the degree.
- Arrange the balance of their curriculum in consultation with the Director of Graduate Studies and faculty instructors.
- Submit a proposal for an advanced research paper (required for HPS1100Y+), by end of Year 2.
- Students are responsible for ensuring that they have an appropriate supervisor. All supervision arrangements are reviewed and approved by the Director of Graduate Studies who assists in the search for a supervisor, if necessary. Proper supervision is a prerequisite for continuation in the program.
- Maintain a cumulative average of at least A– with no individual grade less than B+. In addition, all students should receive at least an A– on the HPS1100Y+ *Advanced Research Paper*. Students falling below these standards may be recommended for termination from the program.
- Demonstrate other competencies crucial to conducting research in the student's thesis area, as determined by the supervisory committee in consultation with the student and the Director of Graduate Studies. This may include, for example, competence in another language; mathematics; and a physical, life, or social science.
- Pass a qualifying examination in areas related to the field of expected research. Examination is conducted by the student's specialist committee, normally three faculty members.
- Submit a thesis proposal approved by the student's thesis supervisory committee and the Director of Graduate Studies.

Program Length

5 years

Time Limit

7 years

+ *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

PhD Program (Flexible-Time)

Minimum Admission Requirements

- Applicants to the flexible-time PhD option are accepted under the same admission requirements as applicants to the full-time PhD option.
- Students will be admitted on the basis of a master's degree in History and Philosophy of Science and Technology; admission based on a bachelor's degree is not available.
- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy IHPST's additional admission requirements stated below.
- A University of Toronto **master's degree** in History and Philosophy of Science and Technology or its equivalent from a recognized university with an average grade of at least an A– in the applicant's program and with no individual grade less than B+. While the majority of accepted students exceed this standard, the very broad scope of the field and the variety of fruitful approaches to it also imply that many different backgrounds are appropriate. Accordingly, grades are only one criterion used to judge applicants.
- Applications must be accompanied by a 300- to 500-word statement of interest indicating the applicant's areas of interest in history and/or philosophy of science and technology at the graduate level. A writing sample is required.
- Applicants whose primary language is not English and who are not graduates of a university whose language of instruction is English must submit results of the Test of English as a Foreign Language (TOEFL) and Test of Written English (TWE) with the following minimum scores:
  - Paper-based TOEFL: 580 and 5 on the TWE or
  - Internet-based TOEFL: 93/120 and 22/30 on the writing and speaking sections.

Program Requirements

- Program requirements for the flexible-time option are identical to those for the full-time PhD program, except that the program of study will relate to the student's work and vice versa.
- Students in the flexible-time option are required to register full-time for the first four years of the program. Thereafter, they may register part-time.
- Transfers between the full-time PhD program and the flexible-time PhD option are not permitted.
- Students in the flexible-time option must satisfy the SGS General Regulations and Degree Regulations in the *SGS Calendar*, including good academic standing, supervision, and candidacy regulations.
- The student will develop a thesis proposal, which must be approved by the student's thesis supervisory committee and the Director of Graduate Studies.
- Students admitted on the basis of a **master's degree** must:
  - Complete **3.0 full-course equivalents (FCEs)**; a student whose MA degree does not exhibit sufficient breadth is required to take additional courses.
  - Make course choices consistent with a commitment to either:
    - **One of the three history fields** (History of Mathematics and Physical Sciences; History of Medicine and Life Sciences; History of Technology). Students in the history fields must demonstrate reading knowledge of French or German; language instruction courses are not counted in the FCEs required for the degree **or**
    - **The philosophy field** (Philosophy of Science). Students in the philosophy field must demonstrate proficiency in introductory logic, a reading knowledge of French, or a reading knowledge of German; logic and language instruction courses are not counted in the FCEs required for the degree.
- Arrange the balance of their curriculum in consultation with the Director of Graduate Studies and faculty instructors.
- Submit a proposal for an advanced research paper (required for HPS1100Y[+]), by the end of Year 1.
- Students are responsible for ensuring that they have an appropriate supervisor. All supervision arrangements are reviewed and approved by the Director of Graduate Studies who assists in the search for a supervisor, if necessary. Proper supervision is a prerequisite for continuation in the program.
- Maintain a cumulative average of at least A– with no individual grade less than B+. In addition, all students should receive at least an A– on the HPS1100Y[+] *Advanced Research Paper*. Students falling below these standards may be recommended for termination from the program.
- Demonstrate other competencies crucial to conducting research in the student's thesis area, as determined by the supervisory committee in consultation with the student and the Director of Graduate Studies. This may include, for example, competence in another language; mathematics; and a physical, life, or social science.
- Pass a qualifying examination in areas related to the field of expected research. Examination is conducted by the student's specialist committee, normally three faculty members.
- Submit a thesis proposal approved by the student's thesis supervisory committee and the Director of Graduate Studies.

Degree Programs

Immunology

MSc

- Fields:
  - Applied Immunology;
  - Fundamental Immunology

PhD

- Field:
  - Fundamental Immunology

Combined Degree Programs

- STG, MD / PhD

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Developmental Biology
  - Immunology, MSc, PhD
- Resuscitation Sciences (admissions have been administratively suspended)
  - Immunology, MSc, PhD
- Sexual Diversity Studies
  - Immunology, PhD
- Women's Health
  - Immunology, MSc, PhD

Overview

The Department of Immunology provides a common forum for investigators in many areas of the University of Toronto and an interdisciplinary research experience in immunology. Members and students in the department are located at the Medical Sciences Building; the Ontario Cancer Institute; and the research institutes of Mount Sinai Hospital, Toronto General Hospital, Toronto Western Hospital, the Hospital for Sick Children, and Sunnybrook Hospital.

Immunology: Immunology MSc Field: Applied Immunology

Master of Science

Program Description

The MSc program is offered in two fields:

- The **non-thesis Applied Immunology field** provides advanced training in designing, implementing, and evaluating immunological techniques that measure immune responses.
- The thesis-based Fundamental Immunology field provides advanced training in an area of specialization, with a particular emphasis on the acquisition of experience in the strategies and experimental methods of modern, original, scientific research.

Students in the Applied Immunology field (including the advanced-standing option) are not eligible to participate in collaborative specializations.

Field: Applied Immunology

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Immunology's additional admission requirements stated below.
- An appropriate BSc, or its equivalent, normally with at least a B+ average and a strong background in molecular and cellular biology. Applicants lacking adequate training in immunology or biological or natural sciences may be advised to do extra coursework necessary for their research.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements. Applicants educated outside Canada are required to provide Graduate Record Examination (GRE) (general) scores with their application.
- Before starting the program, applicants may be required to complete SCS 3128 (at the discretion of the Department of Immunology).
- Please note that the Applied Immunology field is unable to accept international students at this time.

Program Requirements

- Students must complete any courses conditional of acceptance.
- **Coursework.** Students must successfully complete a total of **7.0 full-course equivalents (FCEs)** as follows:
  - Year 1:
    - 2.0 FCEs: IMM1450Y, IMM1550Y
    - 1.0 FCE selected from IMM1428H, IMM1429H, IMM1430H, IMM1431H
    - 0.5 FCE: IMM1436H
  - Year 2:
    - 1.0 FCE: IMM1050H^0, IMM1075H^0
    - 1.0 FCE: IMM1650Y
    - 0.5 FCE: IMM1651H
    - 1.0 FCE selected from the elective course list below.
- Students are required to participate full-time until the program requirements of research and coursework have been completed.

Required Courses

IMM1050H^0	Easton Seminar Series (I) (Credit/No Credit)
IMM1075H^0	Special Topics in Immunology (I) (Credit/No Credit)
IMM1428H	Molecular Immunology
IMM1429H	Developmental Immunology
IMM1430H	Clinical Immunology
IMM1431H	Immunotherapy
IMM1436H	Techniques in Immunology
IMM1450Y	Major Research Project in Immunology (I)
IMM1550Y	Major Research Project in Immunology (II)
IMM1650Y	Major Research Project in Immunology (III)
IMM1651H	Applied Research in Immunology (Credit/No Credit)

[0] Course that may continue over a program. Credit is given when the course is completed.

Elective Courses

Not all courses are offered every year. Please consult the department for details. With the permission of the Associate Chair, Graduate Studies, students may also take graduate courses which are not found in the list below, in a subject relevant to their research project.

BTC1850H	Creating Life Science Products
BTC1860H	Generations of Advanced Medicine: Biologics in Therapy (GAMBiT)
CSB1018H	Advanced Microscopy and Imaging
CSB1472H	Computational Genomics and Bioinformatics
IMM1435H	Practical Immunology
JBZ1472H	Computational Genomics and Bioinformatics
JDB1025H	Developmental Biology
JTB2010H	Proteomics and Functional Genomics
JTB2020H	Applied Bioinformatics
MSC1090H	Introduction to Computational BioStatistics with R
MSC7000Y	Regenerative Medicine
PSL1014H	Advanced Topics: The Gastrointestinal Epithelium

[0] Course that may continue over a program. The course is graded when completed.

Program Length

6 sessions full-time (typical registration sequence: (F/W/S/F/W/S)

Time Limit

3 years full-time

Field: Applied Immunology (Advanced-Standing Option)

Minimum Admission Requirements

- Applicants with an Immunology specialist or major undergraduate degree from the University of Toronto, may be eligible for advanced standing.
- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Immunology's additional admission requirements stated below.
- An appropriate BSc from the University of Toronto (including those with an Immunology specialist or major undergraduate degree), normally with at least a B+ average and a strong background in molecular and cellular biology. Applicants lacking adequate training in immunology or biological or natural sciences may be advised to do extra coursework necessary for their research.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements. Applicants educated outside Canada are required to provide Graduate Record Examination (GRE) (general) scores with their application.
- Applicants must have completed the following University of Toronto undergraduate course or its equivalent: IMM450H1.
- Applicants must have completed the following University of Toronto undergraduate courses: two of IMM428H1, IMM429H1, IMM430H1, IMM431H1.
- Applicants must already have a graduate research supervisor who is a graduate faculty member in the Department of Immunology.
- Please note that the Applied Immunology field (advanced-standing option) is unable to accept international students at this time.

Program Requirements

- **Coursework.** Successful completion of **5.0 full-course equivalents (FCEs)** as follows:
  - 1.0 FCE: IMM1550Y, completed in the first Summer session
  - 1.0 FCE: IMM1650Y
  - 2.0 FCEs: IMM1050H[0], IMM1075H[0], IMM1436H, IMM1651H
  - 1.0 FCE selected from the elective course list below.

Required Courses

IMM1050H[0]	Easton Seminar Series (I) (Credit/No Credit)
IMM1075H[0]	Special Topics in Immunology (I) (Credit/No Credit)
IMM1436H	Techniques in Immunology
IMM1550Y	Major Research Project in Immunology (II)
IMM1650Y	Major Research Project in Immunology (III)
IMM1651H	Applied Research in Immunology (Credit/No Credit)

[0] Course that may continue over a program. Credit is given when course is completed.

Elective Courses

Not all courses are offered every year. Please consult the department for details. With the permission of the Associate Chair, Graduate Studies, students may also take graduate

courses which are not found in the list below, in a subject relevant to their research project.

BTC1850H	Creating Life Science Products

Immunology: Immunology PhD

Doctor of Philosophy

Program Description

The PhD degree is an advanced research degree intended to reflect a level of training consistent with the ability of the candidate to function as an independent research scientist.

Applicants may enter the PhD program via one of three routes: 1) following completion of an MSc degree; 2) transfer from the MSc in Immunology program, Fundamental Immunology field; or 3) direct entry following completion of a BSc degree.

Field: Fundamental Immunology

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Immunology's additional admission requirements stated below.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements. Applicants educated outside Canada are required to provide Graduate Record Examination (GRE) (general) scores with their application.
- Applicants who have completed an MSc degree must have at least a B+ average in that degree.
- Applicants may be accepted for direct entry with a BSc degree, with at least an A– average in the final two years.

Program Requirements

- **Coursework.** Students must successfully complete a total of **4.5 full-course equivalents (FCEs)** as follows:
  - IMM1000Y *Recent Advances in Immunology* (1.0 FCE)
  - IMM1200H[+] *Scientific Skills for Immunologists* (0.5 FCE); in the event the student has taken this course to complete the MSc in Immunology, Fundamental Immunology field, a substitute course will be taken with approval of the Graduate Coordinator
  - IMM2000H *PhD Proposal in Immunology* (0.5 FCE)
  - IMM2025H[0] *Student Seminar Series (II)* (Credit/No Credit; 0.5 FCE)
  - IMM2050H[0] *Easton Seminar Series (II)* (Credit/No Credit; 0.5 FCE)
  - IMM2075H[0] *Special Topics in Immunology (II)* (Credit/No Credit; 0.5 FCE)
  - 1.0 elective FCE at the graduate level from either Immunology or outside the department as relevant to their thesis topic (examples are provided in the elective course list).
- Students must complete a **qualifying exam** (DEX5555Y, Credit/No Credit; 0.0 FCE) within 24 months of starting the PhD program, Fundamental Immunology field.
- Candidates must submit a **thesis** and defend it at a **Doctoral Final Oral Examination** conducted by the School of Graduate Studies.
- Students are required to participate full-time until the program requirements of research and coursework have been completed.

Required Courses

IMM1000Y	Recent Advances in Immunology
IMM1200H[+]	Scientific Skills for Immunologists
IMM2000H	PhD Proposal in Immunology
IMM2025H[0]	Student Seminar Series (II) (Credit/No Credit)

IMM2050H[0]	Easton Seminar Series (II) (Credit/No Credit)
IMM2075H[0]	Special Topics in Immunology (II) (Credit/No Credit)
DEX5555Y	Departmental Examination (Credit/No Credit; prerequisite: IMM1000Y)

[+] Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.

[0] Course that may continue over a program. The course is graded or credit is given when completed.

Elective Courses

Not all courses are offered every year. Please consult the department for details. With the permission of the Associate Chair, Graduate Studies, students may also take graduate courses which are not found in the list below, in a subject relevant to their research project.

PhD Program (Transfer)

Transfer Requirements

- Transfer applicants must be enrolled in the MSc Immunology program, Fundamental Immunology field.
- Applicants must pass a reclassification (transfer) exam (DEX5555Y, Credit/No Credit; 0.0 FCE) within 24 months of initial registration in the MSc Immunology program, Fundamental Immunology field.
- Successful completion of IMM1200H[+] and IMM1000Y with at least a B+ overall average, prior to taking the reclassification exam (DEX5555Y).
- Completion of, or concurrent registration in, IMM1025H[0], IMM1050H[0], and IMM1075H[0].

Program Requirements

- **Coursework.** Students must successfully complete a total of **6.0 full-course equivalents (FCEs)** as follows:
  - IMM1000Y *Recent Advances in Immunology* (1.0 FCE)
  - IMM1200H[+] *Scientific Skills for Immunologists* (0.5 FCE)
  - IMM1025H[0] *Student Seminar Series (I)* (Credit/No Credit; 0.5 FCE)
  - IMM1050H[0] *Easton Seminar Series (I)* (Credit/No Credit; 0.5 FCE)
  - IMM1075H[0] *Special Topics in Immunology I* (Credit/No Credit; 0.5 FCE)
  - IMM2000H *PhD Proposal in Immunology* (0.5 FCE)
  - IMM2025H[0] *Student Seminar Series (II)* (Credit/No Credit; 0.5 FCE)
  - IMM2050H[0] *Easton Seminar Series (II)* (Credit/No Credit; 0.5 FCE)
  - IMM2075H[0] *Special Topics in Immunology (II)* (Credit/No Credit; 0.5 FCE)
  - 1.0 elective FCE at the graduate level from either Immunology or outside the department as relevant to their thesis topic (examples are provided in the elective course list).
- Students must successfully complete the **reclassification transfer exam** (DEX5555Y, Credit/No Credit; 0.0 FCE) within 24 months of starting the MSc Immunology program, Fundamental Immunology field.
- Candidates must submit a **thesis** and defend it at a **Doctoral Final Oral Examination** conducted by the School of Graduate Studies.
- Students are required to participate full-time until the program requirements of research and coursework have been completed.

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Direct entry is available for highly qualified BSc graduates who completed the undergraduate Immunology specialist program or an appropriate undergraduate program in the life sciences from a recognized university, with a minimum A– average in the final two years and relevant research experience.
- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Immunology's additional admission requirements stated below.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must demonstrate proficiency in English. See General Regulations section 4.3 for requirements. Applicants educated outside Canada are required to provide Graduate Record Examination (GRE) (general) scores with their application.
- Applicants are selected by the departmental admissions committee on the basis of academic and research excellence. Admission to the program is finalized when a graduate faculty member agrees to supervise the student's research and guarantees a full stipend for the student.

Program Requirements

- **Coursework.** Students must successfully complete a total of **6.0 full-course equivalents (FCEs)** as follows:
  - IMM1000Y *Recent Advances in Immunology* (1.0 FCE)
  - IMM1200H[+] *Scientific Skills for Immunologists* (0.5 FCE)
  - IMM1025H[0] *Student Seminar Series (I)* (Credit/No Credit; 0.5 FCE)
  - IMM1050H[0] *Easton Seminar Series (I)* (Credit/No Credit; 0.5 FCE)
  - IMM1075H[0] *Special Topics in Immunology I* (Credit/No Credit; 0.5 FCE)
  - IMM2025H[0] *Student Seminar Series (II)* (Credit/No Credit; 0.5 FCE)
  - IMM2000H *PhD Proposal in Immunology* (0.5 FCE)
  - IMM2050H[0] *Easton Seminar Series (II)* (Credit/No Credit; 0.5 FCE)
  - IMM2075H[0] *Special Topics in Immunology (II)* (Credit/No Credit; 0.5 FCE)
  - 1.0 elective FCE at the graduate level from either Immunology or outside the department as relevant to their thesis topic (examples are provided in the elective course list).
- Students must complete a **qualifying exam** (DEX5555Y, Credit/No Credit; 0.0 FCE) within 24 months of starting the PhD program, Fundamental Immunology field.
- Candidates must submit a **thesis** and defend it at a **Doctoral Final Oral Examination** conducted by the School of Graduate Studies.

Industrial Relations and Human Resources

MIRHR

PhD

- Field:
  - Canadian Industrial Relations and Human Resources

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Ethnic, Immigration and Pluralism Studies
  - Industrial Relations and Human Resources, MIRHR, PhD
- Workplace Learning and Social Change
  - Industrial Relations and Human Resources, MIRHR, PhD

Overview

In addition to faculty directly appointed to the Centre for Industrial Relations and Human Resources (CIRHR), the centre brings together professors from many different disciplines and departments at the University of Toronto to teach and conduct research on all aspects of the workplace and employment relationships. The CIRHR faculty reflect the depth, breadth, and diversity of our university.

IRHR: Industrial Relations and Human Resources MIRHR

Master of Industrial Relations and Human Resources

Program Description

The Master of Industrial Relations and Human Resources (MIRHR) degree program benefits students who are interested in advanced academic study leading to career opportunities in human resources management, labour-management relations, collective bargaining and dispute resolution, organization development and change, and labour market and social policy.

The MIRHR is a professional degree program designed to train students in the latest innovations and best practices within industrial relations and human resources management. The program uses an interdisciplinary approach to provide specialized study of the employment relationship.

The MIRHR offers two program options:

- The two-year MIRHR option allows qualified students to complete the degree program in two years (16 non-consecutive months) of full-time study.
- The advanced-standing MIRHR option enables qualified students to complete the MIRHR in one year (12 consecutive months) of full-time study.

Both options may be taken on a part-time basis.

MIRHR Program (Two-Year)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the CIRHR additional admission requirements stated below.
- Applicants to the two-year MIRHR program require an appropriate bachelor's degree from a recognized university. A minimum grade average of B+ in each of the final two years of the degree is required.
- All applicants are encouraged to submit results from the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT). Although these tests are not required and there is no minimum score requirement, this information is helpful to the admissions committee. Test results more than five years old are normally not considered.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must write the Test of English as a Foreign Language (TOEFL). The following minimum scores are acceptable:
  - paper-based TOEFL exam: 600 and 5 on the Test of Written English (TWE)
  - Internet-based TOEFL exam: 100/120 and 22/30 on the writing and speaking sections.
- Since space in the program is limited, all applicants who meet the minimum admission requirements cannot be guaranteed admission. The CIRHR admissions committee reserves the right to select qualified applicants to the program. All admission decisions are final.

Program Requirements

- Each student's program of courses must be approved by the Coordinator of Graduate Studies. If chosen courses appear to overlap to a large degree, approval may be denied.
- Students must have a mid-B average overall to be recommended for the degree.
- Failure in any course (that is, a grade of less than B–) will require a review of the student's program by the department.
- A student who fails two or more courses is no longer in good academic standing and a recommendation for termination will be made to the School of Graduate Studies.

Year 1: Foundation Courses

- Year 1 is spent acquiring a foundation in industrial relations and human resources and includes courses in economics, human resources management, law, quantitative methods, and organizational behaviour. Courses marked (PR) require prerequisites; further information may be obtained from CIRHR.
- Students must take **4.0 full-course equivalents (FCEs)**, of which 3.5 are required courses, as follows:
  - IRE1002H *Applied Statistics in Industrial Relations*
  - IRE1010H *Economic Foundations of Industrial Relations and Human Resources*
  - IRE1126H *Economics of Labour and Human Resources* (PR)
  - IRE1362H *Organizational Behaviour*
  - IRE1609H *Strategic Human Resources Management* (exclusion: RSM2609H *Aligning People and Strategy*)
  - IRE1610H *Industrial Relations*
  - plus one of the following law courses:
    - IRE1270H *Law of Labour Relations*
    - IRE1338H *Law in the Workplace*.
- 0.5 FCE is an elective course that is chosen from the list below to fill the requisite 4.0 FCEs in Year 1 of the program.
- Students admitted into the two-year MIRHR program may apply to take IRE4000H, a non-credit course designed for students to gain summer employment in a position that will provide them with work experience relevant to their field of study.
- Students in the MIRHR program are required to achieve a mid-B average in Year 1 of the program (or in the first 4.0 FCEs) in order to continue or to pass into Year 2.

Year 2: Core Courses

- Students must take **4.0 FCEs** to complete Year 2. This includes core courses in Industrial Relations and Human Resources (1.5 FCEs):
  - IRE2001H *Foundations and Current Issues in Industrial Relations and Human Resources*
  - IRE2002H *Research Methods for Industrial Relations and Human Resources* (PR)
  - plus one of the following courses:
    - IRE2003H *Research Project in Industrial Relations and Human Resources* (PR)
    - IRE2004H *Data Analytics and Metrics in Industrial Relations and Human Resources* (PR).
- 2.5 FCEs are elective courses that are chosen from the list below to fill the requisite 4.0 FCEs in Year 2 of the program.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time; 6 years part-time

MIRHR Program (Advanced-Standing Option: 12-Month)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Centre for Industrial Relations and Human Resources additional admission requirements stated below.
- Applicants to the 12-month MIRHR advanced-standing option require an appropriate bachelor's degree from a recognized university and significant academic training (normally 3.0 full-course equivalents [FCEs] at the senior undergraduate level), employment relations, human resources, industrial relations, labour studies, or labour economics. If the admissions committee determines that an applicant does not have sufficient academic training to qualify for advanced standing, the student will be considered for the two-year MIRHR degree. A minimum grade average of B+ in each of the final two years of the degree is required.
- All applicants are encouraged to submit results from the Graduate Record Examination (GRE) or the Graduate Management Admission Test (GMAT). Although these tests are not required and there is no minimum score requirement, this information is helpful to the admissions committee. Test results more than five years old are normally not considered.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must write the Test of English as a Foreign Language (TOEFL). The following minimum scores are acceptable:
  - paper-based TOEFL exam: 600 and 5 on the Test of Written English (TWE)
  - Internet-based TOEFL exam: 100/120 and 22/30 on the writing and speaking sections.
- Since space in the program is limited, all applicants who meet the minimum admission requirements cannot be guaranteed admission. The CIRHR admissions committee reserves the right to select qualified applicants to the program. All admission decisions are final.

Program Requirements

- Each student's program of courses must be approved by the Coordinator of Graduate Studies. If chosen courses appear to overlap to a large degree, approval may be denied.
- Students must have a mid-B average overall to be recommended for the degree.
- Failure in any course (that is, a grade of less than B–) will require a review of the student's program by the department.
- A student who fails two or more courses is no longer in good academic standing and a recommendation for termination will be made to the School of Graduate Studies.
- Students admitted into the 12-month MIRHR advanced-standing option will have completed many of the foundation courses in industrial relations and human resources.
- Students will take both foundation and core courses simultaneously in the three sessions of study (September to August). During this time, students will also take elective courses to increase their breadth of knowledge or to focus on their areas of interest.
- Students must take **5.5 full-course equivalents (FCEs)**, of which 3.0 are required courses, as follows:
  - IRE1010H *Economic Foundations of Industrial Relations and Human Resources*
  - IRE1126H *Economics of Labour and Human Resources* (PR)
  - IRE2001H *Foundations and Current Issues in Industrial Relations and Human Resources*
  - IRE2002H *Research Methods for Industrial Relations and Human Resources* (PR)
  - plus one of the following courses:
    - IRE2003H *Research Project in Industrial Relations and Human Resources* (PR)
    - IRE2004H *Data Analytics and Metrics in Industrial Relations and Human Resources* (PR)
  - plus one of the following law courses:
    - IRE1270H *Law of Labour Relations*
    - IRE1338H *Law in the Workplace*.
- 2.5 FCEs are elective courses that are chosen from the list below to fill the requisite 5.5 FCEs in the program.
- Students in the MIRHR advanced-standing option are required to achieve a mid-B average in the first 2.5 FCEs of the program in order to continue.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time; 6 years part-time

IRHR: Industrial Relations and Human Resources PhD

Doctor of Philosophy

Program Description

The Doctor of Philosophy (PhD) degree program benefits students who are interested in advanced academic study leading to career opportunities in human resources management; labour-management relations; collective bargaining and dispute resolution; organization development and change; and labour market and social policy. The PhD program is a research-oriented program of study designed to provide students with a thorough knowledge of the field and strong research skills. Offered only on a full-time basis, students normally fulfil a two-year residency requirement that enables their full participation in the activities associated with the program.

Applicants may enter the PhD program via one of two routes: 1) following completion of an appropriate master’s degree or 2) direct entry following completion of a bachelor’s degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Centre for Industrial Relations and Human Resources' additional admission requirements stated below.
- Applicants require a Master of Industrial Relations and Human Resources (MIRHR) degree from the University of Toronto, or its equivalent.
- Students with a master's degree in another related social science discipline may be considered for admission to the PhD if they have exceptional academic standing and have demonstrated quantitative skills and research ability.
- At least a B+ standing, or equivalent, is required in the previous master's program. Academic performance in courses relevant to the applicant's area of interest, as well as performance in statistics and research methods courses are taken into consideration by the admissions committee.
- Applicants are required to submit a copy of their results from the Graduate Record Examination (GRE). Although there is no minimum score requirement, performance on the GRE will be taken into consideration by the admissions committee. Test results more than five years old are normally not considered.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must write the Test of English as a Foreign Language (TOEFL). The following minimum scores are acceptable:
  - paper-based TOEFL exam: 600 and 5 on the Test of Written English (TWE)
  - Internet-based TOEFL exam: 100/120 and 22/30 on both the writing and speaking sections.
- Applicants may be required to appear for a personal interview and/or submit copies of recent academic work.

Program Requirements

Normally, requirements in Years 1 and 2 consist of a core course in Industrial Relations and Human Resources, elective courses, and courses in research methods and statistics.

- Students must take the equivalent of **4.5 full-course equivalents (FCEs)** as follows:
  - The core requirement in Industrial Relations and Human Resources is met by completing:
    - IRE3004H *Special Topics in Employment and Industrial Relations*.
  - The research and statistics requirements are met by completing:
    - IRE3002Y *Research Seminar I*
    - IRE3003H *Research Seminar II* (PR)
    - RSM3062H *Methods and Research in Organizational Behaviour*
    - 1.0 FCE in statistics, chosen, with the approval of the PhD Coordinator, from selected offerings in other departments and Faculties.
  - In cases where a student's prior academic background may have covered any of the courses listed above, substitutions may be permitted with the approval of the PhD Coordinator.
  - 1.0 FCE is chosen from the elective courses set out below or from selected offerings in other departments and Faculties.
- A **comprehensive examination** is normally written by January 31 of Year 2. It is designed to encourage students to broaden their understanding of industrial relations and human resources, to demonstrate analytical and methodological abilities, and to address current policy issues. The examination is four to five hours in length and graded as Pass/Fail. It is normally set by four faculty members and students must answer one of two questions submitted by each of them.
- A student who fails the first attempt at the exam will be permitted one more attempt. Failure of the second attempt will result in a recommendation for program termination.
- Intensive work on the **dissertation** will also begin in Year 2 of the PhD program. The thesis topic and name of supervisor must be submitted no later than March 31 of Year 2.
- Students who are in Years 3 and 4 must enrol in the following courses:
  - IRE3005H *Workshop in Industrial Relations I* (Credit/No Credit)
  - IRE3006H *Workshop in Industrial Relations II* (Credit/No Credit).
- Students will have achieved candidacy upon successful completion of the program requirements above at the end of Year 3 of study.
- Proficiency in **French and/or other languages** will be required when the student's supervisor deems it necessary for dissertation research or when CIRHR deems it necessary for the student's area of research.
- **Thesis and a Doctoral Final Oral Examination** on the thesis.
- The program is available only on a full-time basis and normally has a two-year **residency** requirement, during which time the student is required to participate fully in the department's activities associated with the program.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Centre for Industrial Relations and Human Resources' additional admission requirements stated below.
- Students who hold a bachelor's degree in industrial relations or human resources may be considered for admission to the PhD if they have exceptional academic standing and have demonstrated quantitative skills and

research ability. Students will be required to complete additional courses.

- Academic performance in courses relevant to the applicant's area of interest, as well as performance in statistics and research methods courses are taken into consideration by the admissions committee.
- Applicants are required to submit a copy of their results from the Graduate Record Examination (GRE). Although there is no minimum score requirement, performance on the GRE will be taken into consideration by the admissions committee. Test results more than five years old are normally not considered.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must write the Test of English as a Foreign Language (TOEFL). The following minimum scores are acceptable:
  - paper-based TOEFL exam: 600 and 5 on the Test of Written English (TWE)
  - Internet-based TOEFL exam: 100/120 and 22/30 on both the writing and speaking sections.
- Applicants may be required to appear for a personal interview and/or submit copies of recent academic work.

Program Requirements

- Normally, requirements in Years 1 and 2 consist of a core course in Industrial Relations and Human Resources, elective courses, and courses in research methods and statistics.
- Students must take up to the equivalent of **8.5 full-course equivalents (FCEs)** as follows:
  - The core requirement in Industrial Relations and Human Resources is met by completing:
    - IRE3004H *Special Topics in Employment and Industrial Relations*.
  - The research and statistics requirements are met by completing:
    - IRE3002Y *Research Seminar I*
    - IRE3003H *Research Seminar II* (PR)
    - RSM3062H *Methods and Research in Organizational Behaviour*
    - 1.0 FCE in statistics, chosen, with the approval of the PhD Coordinator, from selected offerings in other departments and Faculties.
    - In cases where a student's prior academic background may have covered any of the courses listed above, substitutions may be permitted with the approval of the PhD Coordinator.
  - 4.0 FCEs chosen in consultation with the PhD Coordinator.
  - 1.0 FCE is chosen from the elective courses set out below or from selected offerings in other departments and Faculties.
- A **comprehensive examination** is normally written by January 31 of Year 2 in the program. It is designed to encourage students to broaden their understanding of industrial relations and human resources, to demonstrate analytical and methodological abilities, and to address current policy issues. The examination is four to five hours in length and graded as Pass/Fail. It is normally set by four faculty members and students must answer one of two questions submitted by each of them.
- A student who fails the first attempt at the exam will be permitted one more attempt. Failure of the second attempt will result in a recommendation for program termination.
- Intensive work on the **dissertation** will also begin in Year 2 of the PhD program. The thesis topic and name of supervisor must be submitted no later than March 31 of Year 2.
- Students who are in Years 3 and 4 must enrol in the following courses:
  - IRE3005H *Workshop in Industrial Relations I* (Credit/No Credit)
  - IRE3006H *Workshop in Industrial Relations II* (Credit/No Credit).
- Students will have achieved candidacy upon successful completion of the program requirements above at the end of Year 4.
- Proficiency in **French and/or other languages** will be required when the student's supervisor deems it necessary for dissertation research or when CIRHR deems it necessary for the student's area of research.
- **Thesis and a Doctoral Final Oral Examination** on the thesis.
- The program is available only on a full-time basis and normally has a two-year residency requirement, during which time the student is required to participate fully in the department's activities associated with the program.

IRHR: Industrial Relations and Human Resources MIRHR, PhD Courses

Required Courses

IRE1002H	Applied Statistics in Industrial Relations
IRE1010H	Economic Foundations of Industrial Relations and Human Resources
IRE1126H	Economics of Labour and Human Resources (PR)
IRE1270H	Law of Labour Relations
IRE1338H	Law in the Workplace
IRE1362H	Organizational Behaviour
IRE1609H	Strategic Human Resources Management
IRE1610H	Industrial Relations
IRE1700H	HR Consulting Models, Practices, and Applications (PR)
IRE2001H	Foundations and Current Issues in Industrial Relations and Human Resources

IRE2002H	Research Methods for Industrial Relations and Human Resources (PR)
IRE2003H	Research Project in Industrial Relations and Human Resources (PR)
IRE2004H	Data Analytics and Metrics for Industrial Relations and Human Resources (PR)
IRE3002Y	Research Seminar I
IRE3003H	Research Seminar II (PR)
IRE3004H	Special Topics in Employment and Industrial Relations
IRE3005H	Workshop in Industrial Relations I (Credit/No Credit)
IRE3006H	Workshop in Industrial Relations II (Credit/No Credit)
RSM3062H	Methods and Research in Organizational Behaviour

Elective Courses

The Centre for Industrial Relations and Human Resources (CIRHR) offers key elective courses in both industrial relations and human resources. With the permission of the Graduate Coordinator, students may take courses in other departments and Faculties. Since graduate units give preference to their own students, CIRHR students can enrol in these elective courses only when space is available. Students must meet the standards and requirements of the other departments and Faculties in those courses taken outside CIRHR.

Not all courses are offered every year. The availability of elective courses may be subject to change due to such factors as faculty research leaves and departmental resources. Some courses may be available only in the day or in the evening.

Please consult the CIRHR timetable which lists available courses in each session. The notation (PR) following a course indicates the course has a prerequisite, and additional information may be obtained from CIRHR.

Further details concerning specific courses and brief course descriptions are available on the CIRHR website.

Industrial Relations and Human Resources

IRE1260H	Seminar on Labour Arbitration (PR)
IRE1270H	Law of Labour Relations
IRE1338H	Law in the Workplace
IRE1600H	International Developments in Labour and Human Resource Policy (PR)
IRE1611H	Sociology of Work and Organizations
IRE1615H	Labour and Globalization (PR)
IRE1620H	Labour Relations Problems in Historical Perspective
IRE1625H	Contemporary Issues in Public Sector Labour-Management Relations (PR)
IRE1630H	Negotiation Skills, Theory, and Practice (PR)
IRE1635H	Collective Bargaining (PR)
IRE1640H	Contemporary Trade Unionism: Issues, Challenges, Strategy (PR)
IRE1650H	Managing Workplace Conflict (PR)
IRE1655H	Health and Safety
IRE1715H	Special Topics in Industrial Relations and Human Resources
IRE1720H	Managing Organizational Change (PR)
IRE1725H	Cross Cultural Differences in Organizational Contexts (PR)
IRE1730H	Contemporary Challenges Facing Today's Organizations (PR)
IRE2021H	Business Strategy for IR/HR
IRE3615H	Performance Management Systems (PR)
IRE3635H	Compensation (PR)
IRE3640H	Recruitment and Selection (PR)
IRE3645H	Training and Development (PR)
IRE3650H	Human Resource Planning and Strategy (PR)
IRE3655H	Leadership (PR)

Adult Education and Counselling Psychology

APD1268H	Career Counselling and Development: Transition in Adulthood
LHA1101H	Program Planning in Adult Education
LHA1148H	Introduction to Workplace, Organizational, and Economic Democracy

Economics

ECO3800H	Labour Economics I
ECO3801H	Labour Economics II

Management

RSM2129H	Forecasting Models and Econometric Methods
RSM2612H	Managing Talent for Global Operations
RSM2615H	Special Topics in Organizational Behaviour and Human Resource Management

Political Science

POL2307H	The Political Economy of Technology: from the Auto-Industrial to the Information Age

Public Health Sciences

CHL5904H	Perspectives in Occupational and Environmental Health — Legal and Social Context

Sociology

SOC6003H	Immigration II
SOC6012H	Work, Stratification, and Markets I

Other Elective Courses

With the approval of the Graduate Coordinator, students may register in the following credit/no-credit course:

IRE4000H	Work Term in IR/HRM (Credit/No Credit)

Reading Courses

In certain circumstances, and with the approval of the Graduate Coordinator, students may be allowed to take a reading or research course:

IRE1090H	A reading course or individual research in an approved field
IRE2090H	A reading course or individual research in an approved field

Overview

The Faculty of Information at the University of Toronto is one of the world's most important information and knowledge management schools. Information is studied and tough questions are asked for the benefit of society and the students. Located in the heart of Canada's most diverse and dynamic city, the programs are led by leading researchers and faculty across multiple disciplines and result in exceptional research and career opportunities. The Faculty of Information is the centre for information professions and leaders of research that matters.

People. Information. Technology. They intersect at the Faculty of Information, a launch pad for futures as highly skilled practitioners or researchers. Today's technologies have transformed the way we connect with, shape, and use information. Similar changes have been taking place in the field of museums and cultural heritage.

Information: Information MI

Master of Information

Program Description

The MI program allows students to explore the breadth of information and to focus on one or more areas of study. Students may choose one of two pathways to completion:

- **Concentration pathway:** students choose one or two of eight concentrations and may complete:
  - Concentration(s) only,
  - Concentration(s) plus a thesis, or
  - Concentration(s) plus a co-op (CCO)
- **General program pathway**: students do not choose a formal concentration and may complete:
  - Coursework only,
  - Coursework plus a thesis, or
  - Coursework plus a co-op

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Application deadlines are available on the Faculty of Information website. Applicants must also satisfy the Faculty's additional admission requirements stated below. Meeting the minimum requirements does not guarantee admission.
- An appropriate bachelor's degree with at least a B average (3.0 GPA) from a university recognized by the University of Toronto.
- The bachelor's degree must normally contain at least 75% academic credits — that is, courses that are not professional, practical, technical, or vocational. Courses such as studio art, drama or music performance, theology, education, or undergraduate courses in library science are not normally considered to be sufficiently academic in content for admission purposes.
- Applicants who meet current admission requirements and who hold a BLS degree from the University of Toronto, or its equivalent from an approved university, may be admitted to the MI program with advanced standing. Such students may be required to take additional courses if certain requisite instruction is lacking.
- Applicants who have satisfactory standing in an undergraduate program and who have successfully completed information studies graduate courses in programs equivalent to the University of Toronto MI program may also apply for admission with advanced standing. Each application will be evaluated individually. At least 4.0 full-course equivalents (FCEs) towards the MI degree must be taken at the University of Toronto.

- All incoming graduate students must have a good command of English. All applicants educated outside Canada whose primary language is not English must demonstrate proficiency in the English language. This requirement is a condition of admission and must be met before an offer of admission is made. The English language requirement may be satisfied using one of the following tests:
  - Test of English as a Foreign Language (TOEFL) with the following minimum scores:
    - Paper-based TOEFL exam: 600 with 5.5 on the Test of Written English (TWE)
    - Internet-based TOEFL exam: 107/120 with 24/30 on the speaking section and 27/30 on the writing section.
  - International English Language Testing System (IELTS): a minimum required score of 7.5 overall with 7.5 on the writing section and 7.0 on the speaking section.
  - Certificate of Proficiency in English (COPE): a minimum required score of 95 overall with 41 on the writing component, 27 on the reading component, and 27 on the listening component.
  - English Language Program, U of T School of Continuing Studies with an overall score of A in Academic English Level 60.

Concentration-Plus-Co-operative Option (CCO)

- To be considered for the CCO, Year 1 full-time MI program students must apply during the first (Fall) session of Year 1. For more information, visit the Faculty of Information website. Acceptance is limited and not guaranteed. Inquiries about the CCO may be emailed to ischool.coop@utoronto.ca.

Program Requirements

- The minimum requirement is completion of **8.0 full-course equivalents (FCEs)**, regardless of pathway or option therein.
- All students must successfully complete all degree requirements as outlined for either the concentration pathway or for the general program pathway.

Concentration Pathway

- The Faculty of Information offers eight concentrations leading to the MI degree:
  - Archives and Records Management (ARM)
  - Critical Information Policy Studies (CIPS)
  - Culture and Technology (C&T)
  - Human Centred Data Science (HCDS)
  - Information Systems and Design (ISD)
  - Knowledge Management and Information Management (KMIM)
  - Library and Information Science (LIS)
  - User Experience Design (UXD)
- Each concentration requires **a total of 8.0 FCEs**.

Concentration-Only Option

- Two quarter-weight core courses: INF1005H and INF1006H (0.5 FCE total).
- Four or five required half courses depending on the concentration (2.0 or 2.5 FCEs total, depending on the concentration).
- Plus 10 or 11 additional elective half courses (5.0 or 5.5 FCEs total, depending on the concentration).

Concentration-Plus-Thesis Option

The thesis option allows students to gain experience in developing and executing a research project from beginning to end. Students gain familiarity with the research process and hone their research skills. The thesis option is designed for students who have a clearly defined topic, can find a supervisor, and can meet tight deadlines in order to graduate within the usual time frame envisioned for the degree. Faculty approval is required to enter the thesis option; visit the Faculty of Information website for details. For information about completing a thesis in the General Pathway, please see the General Pathway program requirements below.

- Two quarter-weight core courses: INF1005H and INF1006H (0.5 FCE total).
- Five required half courses (2.5 FCEs total, specific to each concentration). The exception is Library and Information Science, which has four required half courses (2.0 FCEs).
- 0.5 FCE research methods course appropriate to the student's program of study, with a final grade of at least A–.
- 0.5 FCE reading course with the student's intended supervisor, with a final grade of at least A–.
- A thesis (2.0 FCEs total).
- Four additional elective half courses (2.0 FCEs total, specific to each concentration). The exception is Library and Information Science, which requires five additional elective half courses (2.5 FCEs total).

Concentration-Plus-Co-op Option

- Two quarter-weight core courses: INF1005H and INF1006H (0.5 FCE total).
- Five required half courses (2.5 FCEs total, specific to each concentration). The exception is Library and Information Science, which requires four half courses (2.0 FCEs total).
- INF3900H *The Emerging Professional* (0.5 FCE).
- The two 12-week co-op placement courses: INF3902H and INF3903H (1.0 FCE total).
- Seven additional elective half courses (3.5 FCEs total, specific to each concentration). The exception is Library and Information Science, which requires eight additional elective half courses (4.0 FCEs total.)

Concentration: Archives and Records Management (ARM)

- 0.5 core FCE (INF1005H and 1006H).
- 2.5 required FCEs (INF1003H, INF1330H, INF1331H or INF2186H, INF2175H, and INF2184H).
- 5.0 elective FCEs **or**
  co-op (1.0 FCE), INF3900H (0.5 FCE), and 3.5 elective FCEs **or**
  thesis (2.0 FCEs), research methods course (0.5 FCE), and reading course (0.5 FCE) plus 2.0 elective FCEs.

Concentration: Critical Information Policy Studies (CIPS)

- 0.5 core FCE (INF1005H and 1006H).
- 2.5 required FCEs (INF1001H, INF2181H, INF2240H, INF2242H, and INF2243H).
- 5.0 elective FCEs **or**
  co-op (1.0 FCE), INF3900H (0.5 FCE), and 3.5 elective FCEs **or**
  thesis (2.0 FCEs), research methods course (0.5 FCE), and reading course (0.5 FCE) plus 2.0 elective FCEs.

Concentration: Culture and Technology (C&T)

- 0.5 core FCE (INF1005H and 1006H).
- 2.5 required FCEs (INF1501H, INF1502H, INF2241H, either INF2320H or INF2331H, and INF2243H).
- 5.0 elective FCEs **or**
  co-op (1.0 FCE), INF3900H (0.5 FCE), and 3.5 elective FCEs **or**
  thesis (2.0 FCEs), research methods course (0.5 FCE), and reading course (0.5 FCE) plus 2.0 elective FCEs.

Concentration: Human Centred Data Science (HCDS)

- 0.5 core FCE (INF1005H and 1006H).
- 2.5 required FCEs (INF1340H, INF1344H, INF2178H, INF2190H, and INF2210H).
- 5.0 elective FCEs **or**
  co-op (1.0 FCE), INF3900H (0.5 FCE), and 3.5 elective FCEs **or**
  thesis (2.0 FCEs), research methods course (0.5 FCE), and reading course (0.5 FCE) plus 2.0 elective FCEs.

Concentration: Information Systems and Design (ISD)

- 0.5 core FCE (INF1005H and 1006H).
- 2.5 required FCEs (INF1339H, INF1341H, INF1342H, INF1343H, and INF2177H).
- 5.0 elective FCEs **or**
  co-op (1.0 FCE), INF3900H (0.5 FCE), and 3.5 elective FCEs **or**
  thesis (2.0 FCEs), research methods course (0.5 FCE), and reading course (0.5 FCE) plus 2.0 elective FCEs.

Concentration: Knowledge Management and Information Management (KMIM)

- 0.5 core FCE (INF1005H and 1006H).
- 2.5 required FCEs (INF1003H, INF1230H, INF2175H, INF2176H, and INF2186H).
- 5.0 elective FCEs **or**
  co-op (1.0 FCE), INF3900H (0.5 FCE), and 3.5 elective FCEs **or**
  thesis (2.0 FCEs), research methods course (0.5 FCE), and reading course (0.5 FCE) plus 2.0 elective FCEs.

Concentration: Library and Information Science (LIS)

- 0.5 core FCE (INF1005H and 1006H).
- 2.0 required FCEs (INF1321H, INF1322H, INF1323H, and INF1324H).
- 5.5 elective FCEs **or**
  co-op (1.0 FCE), INF3900H (0.5 FCE), and 4.0 elective FCEs **or**
  thesis (2.0 FCEs), research methods course (0.5 FCE), and reading course (0.5 FCE) plus 2.5 elective FCEs.

Concentration: User Experience Design (UXD)

- 0.5 core FCE (INF1005H and 1006H).
- 2.5 required FCEs (INF1602H, INF2169H, INF2170H, INF2191H, and INF2192H).
- 5.0 elective FCEs **or**
  co-op (1.0 FCE), INF3900H (0.5 FCE), and 3.5 elective FCEs **or**
  thesis (2.0 FCEs), research methods course (0.5 FCE), and reading course (0.5 FCE) plus 2.0 elective FCEs.

General Program Pathway (No Concentrations)

Coursework Option

Students choosing the coursework option must have their program of study approved by the Program Director.

- Two quarter-weight core courses: INF1005H and INF1006H (0.5 FCE total).
- Three required half courses: INF1001H, INF1003H, and INF1240H (1.5 FCEs total).
- 6.0 elective FCEs.

Thesis Option

Faculty approval is required to enter the thesis option. Visit the Faculty of Information website for details.

- Two quarter-weight core courses: INF1005H and INF1006H (0.5 FCE total).
- Three required half courses: INF1001H, INF1003H, and INF1240H (1.5 FCE total).
- 0.5 required FCE consisting of one research methods half course appropriate to the student's program of study, with a final grade of at least A–. INF1240H can be used to meet this requirement.
- 0.5 required FCE reading course with the student's intended supervisor, with a final grade of at least A–.
- A thesis (2.0 FCEs).
- Six elective half courses (3.0 FCEs) **or**
  seven elective half courses (3.5 FCEs) if INF1240H has been completed and counted toward the research methods half-course requirement
  - These courses may include up to 2.0 FCEs taken outside the MI program.

Program Length

4 sessions (2 years) full-time (typical registration sequence: F/W/F/W);

CCO and executive delivery option: 6 sessions (2 years) full-time (typical registration sequence: F/W/S/F/W/S);
11 sessions (5.5 years) part-time

Time Limit

3 years full-time;
6 years part-time

Information: Information Studies GDipISt

Graduate Diploma of Advanced Study in Information Studies

Program Description

The Diploma of Advanced Study in Information Studies is a post-master's diploma. It is designed:

- for information professionals who want to pursue further studies, but do not wish to take a PhD degree
- for practitioners who wish to advance their professional standing, develop a specialization, or redirect their career
- to build on a person's knowledge, experience, previous education, and special interests
- to be tailored to the individual's needs and interests.

Diploma of Advanced Study in Information Studies credits cannot be transferred to the PhD program, and there is no thesis option.

The diploma may be taken on a full-time or part-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Information's additional admission requirements stated below.
- Applicants must have a Master of Information or equivalent degree. Visit the Faculty of Information website for details.
- The graduate diploma program will be tailored to the individual's needs and interests with courses selected in consultation with the Graduate Coordinator.
- All incoming graduate students must have a good command of English. Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must show evidence of having taken one of the following tests. Scores must be from tests taken within the last two years.
  - The Test of English as a Foreign Language (TOEFL) with the following minimum scores:
    - Paper-based TOEFL: 600 and 5.5 on the Test of Written English (TWE)
    - Internet-based TOEFL: 107/120, with 24/30 on the speaking section and 27/30 on the writing section.
  - The International English Language Testing System (IELTS): a minimum required score of 7.5 overall with 7.5 on the writing section and 7.0 on the speaking section.
  - Certificate of Proficiency in English (COPE): a minimum required score of 95 overall with 41 on the writing component, 27 on the reading component, and 27 on the listening component..
  - English Language Program, U of T School of Continuing Studies with an overall score of A in Academic English Level 60.

Program Requirements

- Students must complete **4.0 full-course equivalents (FCEs)** as follows:
  - At least 3.0 FCEs (six half courses) must be chosen from courses offered in the MI degree program.
  - Only 0.5 FCE (one half course) may be a reading course.
  - Up to 1.0 FCE (two half courses) may be taken in other departments.

Program Length

2 sessions full-time; 4 sessions part-time

Time Limit

2 years full-time; 3 years part-time

Information: Information MI and Information Studies GDipISt Courses

Not all courses are offered every year. Consult the Faculty of Information website for the annual course offerings; course descriptions; and details of prerequisites, co-requisites, and permissions. Inquiries concerning the selection of courses to be offered in any given session should be directed to the Faculty of Information.

Information: Information PhD

Doctor of Philosophy

Program Description

The PhD program in Information provides opportunities for advanced scholarly inquiry into theoretical aspects of information and in the empirical investigations of information in various contexts.

PhD students come from different backgrounds and with different areas of interest. Therefore, the curriculum both fosters a common conversation about the field of information and supports the development of individual (even idiosyncratic) research projects. The focus of the program is to enable the student to achieve competence in order to carry out the research and writing of an original thesis in information.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Information's additional admission requirements stated below.
- Average of at least A– in an appropriate master's degree program, or equivalent. Equivalency is normally determined by the number of courses and/or credits taken. Applicants holding an MLS or other master's degree earned in two or three sessions, or by completing 5.0 to 7.5 full-course equivalents (FCEs), will normally be required to take additional courses in the MI program.
- Admission is limited to graduates of high intellectual ability who have an interest in research. Evaluation of applicants is based on academic records, a statement of research interest, and three academic letters of reference. A personal interview may be requested.
- All incoming graduate students must have a good command of English. All applicants educated outside Canada whose primary language is not English must demonstrate proficiency in the English language. This requirement is a condition of admission and must be met before an offer of admission is made. The English language requirement may be satisfied using one of the following tests. Scores must be from tests taken within the last two years.
  - Test of English as a Foreign Language (TOEFL) with the following minimum scores:
    - Paper-based TOEFL exam: 600 with 5.5 on the Test of Written English (TWE)
    - Internet-based TOEFL exam: 107/120 with 24/30 on the speaking section and 27/30 on the writing section.
  - International English Language Testing System (IELTS): a minimum required score of 7.5 overall with 7.5 on the writing section and 7.0 on the speaking section.
  - Certificate of Proficiency in English (COPE): a minimum required score of 95 overall with 41 on the writing component, 27 on the reading component, and 27 on the listening component.
  - English Language Program, U of T School of Continuing Studies with an overall score of A in Academic English Level 60.
- Admission procedures are described in the General Regulations section of this calendar.
- Doctoral students are admitted in September.
- Meeting the minimum requirements of the Faculty of Information and the School of Graduate Studies does not guarantee admission.

Program Requirements

To achieve candidacy, students must fulfil the following:

- Students in the **Media, Technology, and Culture concentration** must complete **4.0 full-course equivalents (FCEs)** as follows:
  - INF3001H *Research in Information: Foundations* (0.5 FCE).
  - A methods course (0.5 FCE): INF3012H *Social Scientific Methods for Media* **or** INF3014H *Cultural Interpretive Methods for Media and Technology*. Course selection to be determined in consultation with the student's research advisor.
  - INF3009H *Theory and History of Media Technology* (0.5 FCE).
  - INF3010H *Power, Media, and Technology* (0.5 FCE).
  - 2.0 FCEs in elective courses relevant to media, technology, and culture (see elective list below).
- Students in **all other concentrations** must complete **4.0 FCEs** as follows:
  - INF3001H *Research in Information: Foundations* (0.5 FCE).
  - A methods course (0.5 FCE): INF3003H *Research in Information: Frameworks and Design* **or** a specific methods course to be determined in consultation with the student's research advisor.
  - INF3006Y *Major Area Reading Course* (1.0 FCE) **or** two additional electives to be determined in consultation with the research advisor (1.0 FCE).
  - 2.0 FCEs in elective courses.
- Students in all concentrations must:
  - Complete other courses appropriate for the student's research.
  - Pass a qualifying exam.
  - Present and defend a thesis research proposal.
  - Complete a thesis and pass a Doctoral Final Oral Examination.
  - Be regularly registered in the School of Graduate Studies during each year of the program.

Program Length

4 years

Time Limit

6 years

PhD Program (Flexible-Time Option)

Admissions have been administratively suspended.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Information's additional admission requirements stated below.
- Average of at least A– in an appropriate master's degree program, or equivalent. Equivalency is normally determined by the number of courses and/or credits taken. Applicants holding an MLS or other master's degree earned in two or three sessions, or by completing 5.0 to 7.5 full-course equivalents (FCEs), will normally be required to take additional courses in the MI program.
- Admission is limited to graduates of high intellectual ability who have an interest in research. Evaluation of applicants is based on academic records, a statement of research interest, and three academic letters of reference. A personal interview may be requested.

- All incoming graduate students must have a good command of English. All applicants educated outside Canada whose primary language is not English must demonstrate proficiency in the English language. This requirement is a condition of admission and must be met before an offer of admission is made. The English language requirement may be satisfied using one of the following tests. Scores must be from tests taken within the last two years.
  - Test of English as a Foreign Language (TOEFL) with the following minimum scores:
    - Paper-based TOEFL exam: 600 with 5.5 on the Test of Written English (TWE)
    - Internet-based TOEFL exam: 107/120 with 24/30 on the speaking section and 27/30 on the writing section.
  - International English Language Testing System (IELTS): a minimum required score of 7.5 overall with 7.5 on the writing section and 7.0 on the speaking section.
  - Certificate of Proficiency in English (COPE): a minimum required score of 95 overall with 41 on the writing component, 27 on the reading component, and 27 on the listening component.
  - English Language Program, U of T School of Continuing Studies with an overall score of A in Academic English Level 60.
- Admission procedures are described in the General Regulations section of this calendar.
- Doctoral students are admitted in September.
- Meeting the minimum requirements of the Faculty of Information and the School of Graduate Studies does not guarantee admission.

Program Requirements

To achieve candidacy, students must fulfil the following:

- Complete **4.0 full-course equivalents (FCEs)** as follows:
  - INF3001H *Research in Information: Foundations* (0.5 FCE).
  - A methods course (0.5 FCE): INF3003H *Research in Information: Frameworks and Design* or a specific methods course to be determined in consultation with the student's research advisor.
  - INF3006Y *Major Area Reading Course* (1.0 FCE) **or** two additional electives to be determined in consultation with the research advisor (1.0 FCE).
  - 2.0 FCEs in elective courses.
- Other courses appropriate for the student's research may also be required
- Pass a qualifying exam.
- Present and defend a thesis research proposal.
- Complete a thesis and pass a Doctoral Final Oral Examination.
- Ensure that they have adequate time on campus to attend classes and to fulfil the academic requirements for an advanced research degree. Students must spend at least two full-time sessions on campus.

Information: Museum Studies MMSt

Master of Museum Studies

Program Description

The MMSt program prepares students for future involvement in museums and related cultural agencies. The program examines the theoretical body of knowledge of museology as a necessary context for professional practice. The Faculty of Information also offers a combined degree program whereby students may complete both a Master of Information and Master of Museum Studies.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Application deadlines are available on the Master of Museum Studies web page. Applicants must also satisfy the Faculty's additional admission requirements stated below. Meeting the minimum requirements does not guarantee admission.
- An appropriate bachelor's degree with an overall grade of at least a B+ average (grade point average 3.3) from a recognized university.
- Applicants must satisfy the Museum Studies program that they are capable of independent research in museum studies at an advanced level. Demonstrated previous experience in museums or related cultural organizations will also be considered. Admission to this program is competitive.

- All incoming graduate students must have a good command of English. All applicants educated outside Canada whose primary language is not English must demonstrate proficiency in the English language. This requirement is a condition of admission and must be met before an offer of admission is made. The English language requirement may be satisfied using one of the following tests:
  - Test of English as a Foreign Language (TOEFL) with the following minimum scores:
    - paper-based TOEFL exam: 600 with 5.5 on the Test of Written English (TWE)
    - Internet-based TOEFL exam: 107/120 with 24/30 on the speaking section and 27/30 on the writing section.
  - International English Language Testing System (IELTS): a minimum required score of 7.5 overall with 7.5 on the writing section and 7.0 on the speaking section.
  - Certificate of Proficiency in English (COPE): a minimum required score of 95 overall with 41 on the writing component, 27 on the reading component, and 27 on the listening component.
  - English Language Program, U of T School of Continuing Studies with an overall score of A in Academic English Level 60.

Program Requirements

Coursework Option

- Students must complete a minimum of **7.5 full-course equivalents (FCEs)** including:
  - Five required half courses (2.5 FCEs).
  - MSL4000Y *Exhibition Project* (1.0 FCE).
  - Eight additional courses (4.0 FCEs), of which 2.0 FCEs must be internal (Museum Studies) elective courses.

Thesis Option

- The thesis option allows students to gain experience in developing and executing a research project from beginning to end. Students gain familiarity with the research process and hone their research skills. Faculty approval is required to enter the thesis option. The thesis option is designed for students who have a clearly defined topic, can find a supervisor, and can meet tight deadlines in order to graduate within the usual time frame envisioned for the degree.
- Students must complete **7.5 full-course equivalents (FCEs)** as follows:
  - Five required half courses (2.5 FCEs).
  - A research methods course (0.5 FCE) appropriate to their program of study with a final grade of at least A–.
  - A thesis (2.0 FCEs).
  - Five additional courses (2.5 FCEs), of which up to four graduate half courses (2.0 FCEs) may be taken outside the MMSt program.

Program Length

4 sessions (2 years) full-time (typical registration sequence: F/W/F/W)

Time Limit

3 years full-time

Information: Museum Studies MMSt Courses

Not all courses are offered every year. Please consult the Faculty of Information website for course availability. The minimum requirement for the MMSt degree is **7.5 full-course equivalents (FCEs)**.

MMSt Required Courses (3.5 FCEs)

MSL1150H	Collection Management
MSL1230H	Ethics, Leadership, Management
MSL2331H	The Museum Exhibition: Histories, Practices, Genres
MSL2370H	Museums and Cultural Heritage: Context and Critical Issues
either MSL2350H *or* INF2040H	Museum Planning and Management: Projects and Fundraising Project Management
either MSL4000Y *or* Thesis option	Exhibition Project

MMSt Elective Courses

Internal (Museum Studies) Elective Courses

MSL1300H	Contemporary Theories of Art and Culture
MSL1350H	Museums and their Publics
MSL2000H	Curatorial Practice
MSL2050H	Curating Science
MSL2100H	Museum Environment
MSL2115H	Global Cultures and Museums
MSL2230H	Nature and Culture: Histories of Heritage Interpretation in North America
MSL2235H	Equity, Diversity, and Inclusion in the GLAM Sector
MSL2240H	The Photographic Record
MSL2255H	Social Digital Memory

MSL2301H to MSL2310H	Special Topics in Museum Studies
MSL2325H	Museums and New Media Practice
MSL2330H	Interpretation and Meaning Making in Museums
MSL2332H	Public Programs and Education
MSL2340H	Issues in Cultural Policy and Contemporary Culture
MSL2360H	Museums and Indigenous Communities: Changing Relationships, Changing Practice
MSL2500H	Constructing and Curating Digital Heritage
MSL3000H	Internship (prerequisite: MSL3900H)
MSL3900H	The Emerging Museum Professional
MSL5050H	Special Studies

External Elective Courses

Courses relevant to the Museum Studies program and student interests are available on the program web page.

McLuhan Program in Culture and Technology

The McLuhan Program in Culture and Technology does not offer a degree program. Students registered in a graduate program may take McLuhan program courses for credit with the permission of their home department.

C&T1006H	Media, Mind, and Society I
C&T1008H	Media, Mind, and Society II
C&T1009H	New Media and Policy

Students interested in pursuing studies in the impact of communication media on humans and their environment should consult the Director of the program for a list of courses available in cognate departments.

Italian Studies

Italian Studies: Introduction

Faculty Affiliation

Arts and Science

Degree Programs

Italian Studies

MA

- Field:
  - Italian Literature

PhD

- Fields:
  - Middle Ages and Renaissance;
  - Seventeenth and Eighteenth Centuries;
  - Nineteenth and Twentieth Centuries

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Book History and Print Culture
  - Italian Studies, MA, PhD
- Sexual Diversity Studies
  - Italian Studies, MA, PhD

Overview

Graduate students in the Department of Italian Studies come from several parts of the world, including Canada, the United States, and Europe. Faculty members are heavily engaged in teaching and research in their fields. Some of them are associated at the graduate level with the Centre for Comparative Literature, the Centre for Medieval Studies, the McLuhan program, Cinema Studies, and the Centre for Drama, Theatre and Performance Studies.

Italian Studies: Italian Studies MA

Master of Arts

Program Description

The MA program offers advanced education in Italian literature and provides training in research techniques.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Italian Studies' additional admission requirements stated below.
- Successful completion of 7.0 undergraduate full-course equivalents (FCEs) in Italian, including the following: 3.0 FCEs in Italian literature (students must have at least 0.5 FCE in each of three out of four different periods: medieval, Renaissance, seventeenth to eighteenth centuries, nineteenth to twenty-first centuries) and an appropriate upper-year 1.0 FCE in language.
- Minimum B+ standing in their University of Toronto 300- and 400-series courses (or in equivalent courses).

- Two letters of recommendation, preferably from instructors most familiar with the applicant's work.
- A personal statement of intent.
- The department will determine whether applicants need to complete prerequisite work in order to qualify for admission. Applicants will be advised accordingly.

Program Requirements

MA Without Thesis

- **Coursework.** Students must successfully complete a total of **4.0 full-course equivalents (FCEs)** as follows:
  - ITA1000H *Methodologies for the Teaching and Study of Italian* (0.5 FCE)
  - 3.5 graduate FCEs including a mandatory extra-departmental course (0.5 FCE) and up to two other extra-departmental courses (1.0 FCE) chosen in consultation with the Graduate Coordinator.
- A student's program of study must be approved by the department.

MA With Thesis Option

- **Coursework.** Students must successfully complete a total of **3.0 full-course equivalents (FCEs)** as follows:
  - ITA1000H *Methodologies for the Teaching and Study of Italian* (0.5 FCE)
  - 2.5 graduate FCEs including a mandatory extra-departmental course (0.5 FCE) and up to two other extra-departmental courses (1.0 FCE) chosen in consultation with the Graduate Coordinator.
- **MA thesis**, subject to approval by the MA thesis supervisor.
- A student's program of study must be approved by the department.

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
15 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Italian Studies: Italian Studies PhD

Doctor of Philosophy

Program Description

The PhD program prepares students for a career in teaching and scholarship. Graduates are expected to have acquired autonomy in conducting research and preparing scholarly publications. They are trained to teach undergraduate courses in all areas of Italian studies and to design and teach graduate courses in their fields of specialization.

The program is designed to provide a broad knowledge of the discipline, specialized knowledge of a single field, and training in all aspects of scholarly research in the discipline.

Applicants may enter the PhD program via one of two routes: (1) following completion of an appropriate MA degree or (2) direct entry after completing a bachelor's degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Italian Studies' additional admission requirements stated below.
- Successful completion of the University of Toronto MA or its equivalent with an overall average of at least A– in courses. Please note that an A– average does not guarantee admission to the program.
- Two letters of recommendation, preferably from instructors most familiar with the applicant's work.
- A personal statement of intent.
- A statement of research and proposed plan of study.
- A writing sample.
- A curriculum vitae (CV) in English.
- Notes:
  - Applicants with an Italian *laurea magistrale/specialistica* may apply for admission to the PhD program.
  - Applicants with a degree equivalent to a PhD (e.g., an Italian *dottorato di ricerca*, a PhD, a *diploma di perfezionamento*, etc.) cannot be accepted to the PhD program.

Program Requirements

- **Coursework.** Students normally complete a total of **4.0 full-course equivalents (FCEs)** as follows:
  - 3.5 graduate FCEs including a mandatory extra-departmental course (0.5 FCE) and up to two other extra-departmental courses (1.0 FCE) chosen in consultation with the Graduate Coordinator.
  - ITA1000H *Methodologies for the Teaching and Study of Italian* (0.5 FCE);
- **Language requirements.** Students must show evidence of written and oral command of Italian; and, not later than the beginning of Year 3 of PhD registration, must have demonstrated a reading knowledge of Latin and one other language approved by the department.
- **Program progress.** All students must maintain a minimum A– average in order to remain in the program.
- Upon completion of all course requirements, and not later than Year 2 of the PhD program, students will complete the series of written and oral **qualifying examinations**.

- **Thesis** and a **Doctoral Final Oral Examination** on the thesis. Permission to write the thesis in Italian (subject to final approval by the School of Graduate Studies) may be granted to students who first pass a supervised essay-type English examination to demonstrate proficiency in writing correct and idiomatic English prose.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Italian Studies' additional admission requirements stated below.
- Exceptional students may be admitted directly to the PhD program from the BA with a minimum A– average. Such applicants will apply to the MA program, but indicate in a separate letter to the Graduate Coordinator that they wish to be considered for direct admission to the PhD program.
- Two letters of recommendation, preferably from instructors most familiar with the applicant's work.
- A personal statement of intent.
- A statement of research and proposed plan of study.
- A writing sample.
- A curriculum vitae (CV) in English.
- Notes:
  - Applicants with an Italian *laurea magistrale/specialistica* may apply for admission to the PhD program.
  - Applicants with a degree equivalent to a PhD (e.g., an Italian *dottorato di ricerca*, a PhD, a *diploma di perfezionamento*, etc.) cannot be accepted to the PhD program.

Program Requirements

- **Coursework.** Students normally complete a total of **8.0 full-course equivalents (FCEs)** as follows:
  - 7.5 graduate FCEs, including a mandatory extra-departmental course (0.5 FCE) and up to two other extra-departmental courses (1.0 FCE) chosen in consultation with the Graduate Coordinator.
  - ITA1000H *Methodologies for the Teaching and Study of Italian* (0.5 FCE);
- **Language requirements.** Students must show evidence of written and oral command of Italian; and, not later than the beginning of Year 3 of PhD registration, must have demonstrated a reading knowledge of Latin and one other language approved by the department.
- **Program progress.** All students must maintain a minimum A– average in order to remain in the program.
- Upon completion of all course requirements, and not later than Year 2 of the PhD program, students will complete the series of written and oral **qualifying examinations**.
- **Thesis** and a **Doctoral Final Oral Examination** on the thesis. Permission to write the thesis in Italian (subject to final approval by the School of Graduate Studies) may be granted to students who first pass a supervised essay-type English examination to demonstrate proficiency in writing correct and idiomatic English prose.

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Cardiovascular Sciences
  - Kinesiology, MSc, PhD
- Health Services and Policy Research
  - Kinesiology, MSc, PhD
- Musculoskeletal Sciences
  - Kinesiology, MSc, PhD
- Public Health Policy
  - Kinesiology, MSc, PhD
- Sexual Diversity Studies
  - Kinesiology, MSc, PhD
- Women and Gender Studies
  - Kinesiology, MSc, PhD
- Women's Health
  - Kinesiology, MSc, PhD

Overview

The field of Kinesiology is interdisciplinary. All degree programs are for students interested in research, academic, and professional careers relating to:

- Applied/exercise/environmental physiology
- Biomechanics and ergonomics
- Health-care provision as a kinesiologist
- Metabolic and endocrinological aspects of physical activity
- Motor control and motor learning
- Muscle physiology
- Physical cultural aspects of sport and physical activity
- Physical fitness and athletic strength and conditioning
- Psychological aspects of sport and physical activity
- Psychophysiological aspects of exercise and stress
- Women's health and physical activity.

Kinesiology: Kinesiology MSc

Master of Science

Program Description

The MSc program is intended to broaden students' understanding of the various interdisciplinary aspects of kinesiology as well as to provide them with the necessary scholarly and technical research skills so that they may pursue a high-quality research project.

The MSc program can be taken on a full-time or part-time basis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Kinesiology's additional admission requirements stated below.
- An appropriate Bachelor of Physical Health Education, Bachelor of Kinesiology, or its equivalent from the University of Toronto or from another recognized university.
- A background in physical education and health or a discipline compatible with the research interests and interdisciplinary nature of the Faculty of Kinesiology and Physical Education is preferred.
- An academic standing equivalent to a University of Toronto B+ (76% to 79%) in the last five full-course equivalents of relevant, senior-level courses.
- Proficiency in the English language must be demonstrated by all applicants educated outside Canada whose primary language is not English and who graduate from a university where the language of instruction and examination was not English. The Faculty prefers the Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - paper-based test: 600 with 5 on the Test of Written English (TWE) and 50 on the Test of Spoken English (TSE)
  - Internet-based test: 100/120 overall and 22/30 on the writing and speaking sections.

Program Requirements

- **Coursework.** Successful completion of **2.0 full-course equivalents (FCEs)** as follows. All courses must be approved in advance by the student's supervisor and the Graduate Department of Kinesiology.
  - 0.5 FCE in Kinesiology
  - 0.5 FCE Statistics or Methodology course
  - 1.0 FCE from either Kinesiology or another department
- SRM3335H[+], a graduate seminar in Kinesiology (0.0 FCE).
- A **thesis** written under the supervision of a thesis committee and its oral defence before an examination committee.
- The student's annual program plan must be approved by the supervisor.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S);
12 sessions part-time

Time Limit

3 years full-time;
6 years part-time

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Kinesiology: Kinesiology PhD

Doctor of Philosophy

Program Description

Doctoral students are encouraged to develop a program of study that will enhance their basic understanding of critical areas of study within kinesiology and have a direct impact on their research program. Students are also expected to further develop their scholarly and technical research skills so that they may pursue a high-quality research project.

Applicants may enter the PhD program via one of two routes: 1) following completion of an MSc degree; or 2) direct entry following completion of a BSc degree.

The PhD program can be taken on a full-time or flexible-time basis.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Graduate Department of Kinesiology's additional admission requirements stated below.
- A master's degree from the University of Toronto or a recognized university. Formal graduate training in kinesiology is preferred.
- Successful defence of a master's thesis at a recognized university.
- An academic standing equivalent to a University of Toronto A– (80% to 84%) in the master's degree completed.
- A potential supervisor identified from the Faculty of Kinesiology and Physical Education. A supervisor is not required at the time of application, but applicants are encouraged to begin their search early. See the full list of faculty members. Only applicants who have a supervisor will be admitted to the program.
- Proficiency in the English language must be demonstrated by all applicants educated outside Canada whose primary language is not English and who graduated from a university where the language of instruction and examination was not English. The Faculty prefers the Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - paper-based test: 600 with 5 on the Test of Written English (TWE) and 50 on the Test of Spoken English (TSE)
  - Internet-based test: 100/120 overall and 22/30 on the writing and speaking sections.

Program Requirements

- Full-time registration (Fall, Spring, Summer sessions) throughout the entire doctoral program.
- **Coursework.** Students must successfully complete a total of **1.5 full-course equivalents (FCEs)** as follows:
  - 1.0 FCE from either Kinesiology or another department
  - 0.5 FCE Statistics or Methodology course
- SRD4445H[+], a graduate **seminar** in Kinesiology (0.0 FCE).
- All courses must be approved in advance by the student's supervisor.
- The student's annual program plan must be approved by the supervisor.
- Successful completion of a **comprehensive examination**.
- Writing of a **thesis** under the supervision of a thesis committee (supervisor plus at least three additional faculty members) and its **defence** before an examination committee appointed by the Graduate Department of Kinesiology.
- **Oral defence** of the thesis before an examination committee approved by the School of Graduate Studies.

Program Length

4 years

Time Limit

6 years

  - Internet-based test: 100/120 overall and 22/30 on the writing and speaking sections.

Program Requirements

- With the approval of the Director, Graduate Studies, some applicants may be admitted to a flexible-time PhD program. This program will benefit mature students with career and/or familial obligations.
- Degree requirements for the flexible-time program are identical to those listed above for the full-time PhD program; however, students have up to eight years to complete the program.
- **Coursework.** Students must successfully complete a total of **1.5 full-course equivalents (FCEs)** as follows:
  - 1.0 FCE from either Kinesiology or another department
  - 0.5 FCE Statistics or Methodology course
- SRD4445H[+], a graduate **seminar** in Kinesiology (0.0 FCE).
- All courses must be approved in advance by the student's supervisor.
- The student's annual program plan must be approved by the supervisor.
- Successful completion of a **comprehensive examination**.
- Writing of a **thesis** under the supervision of a thesis committee (supervisor plus at least three additional faculty members) and its **defence** before an examination committee appointed by the Graduate Department of Kinesiology.
- **Oral defence** of the thesis before an examination committee approved by the School of Graduate Studies.
- Flexible-time students must register full-time for the first four years of the program. Thereafter, they may register part-time.
- A plan of study and research activities will be negotiated at initial registration, to be reviewed and updated annually.

Program Length

Kinesiology: Professional Kinesiology MPK

Master of Professional Kinesiology

Program Description

The first master's-level program of its kind in Ontario, the Master of Professional Kinesiology (MPK) degree program offers students an opportunity to gain advanced knowledge and skills in the professional practice of kinesiology. The MPK provides unparalleled learning environments for hands-on practice working alongside leading practitioners. This program is suitable for those who are just beginning their careers, and those who have experience as registered kinesiologists and are looking for advanced professional development. The MPK program may be completed with a concentration or without a concentration.

Concentrations

- Adapted Physical Activity
- Exercise as Medicine
- Health and Wellness
- High Performance Strength and Conditioning

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies.
- Applicants must also satisfy the Graduate Department of Kinesiology's additional admission requirements stated below.
- Applicants must have a four-year bachelor's degree in kinesiology, physical education, human kinetics, or a complementary degree in health science, life science, and/or movement/rehabilitation science. In order to be eligible for admission with a complementary degree, practical experience in the area of kinesiology is required.
- Applicants may also be considered for admission with a four-year bachelor's degree in an area not described above, with at least 5 years of work experience in the area of kinesiology, and evidence of professional training or certification in the area of kinesiology (for example, strength and conditioning certification, physical literacy certification).
- Regardless of the admission pathway, all applicants must have a minimum mid-B average (73% to 76%) in the final year.
- Resumé.
- Two letters of reference. At least one letter must be from an academic referee.
- Letter of intent which identifies the area of interest and reasons for pursuing the program.
- Proficiency in the English language must be demonstrated by all applicants educated outside Canada whose primary language is not English and who graduated from a university where the language of instruction and examination was not English. The Faculty prefers the Test of English as a Foreign Language (TOEFL), with the following minimum scores:
  - paper-based test: 600 with 5 on the Test of Written English (TWE) and 50 on the Test of Spoken English (TSE);

- Internet-based test: 100/120 overall and 22/30 on the writing and speaking sections.

Program Requirements

- **Coursework.** Students must successfully complete a total of **12.0 full-course equivalents (FCEs)** as listed below. Consult the department for more details on sequence and timing of courses.

MPK4000Y	Introduction to Professional Kinesiology
MPK4001Y	Clinical Assessment and Interventions
MPK4002Y	Biophysical Assessment and Interventions
MPK4003Y	Behavioral Assessment and Interventions
MPK4004Y	Physical, Culture, Health, and Social Environments
MPK4005Y	Strength Based Professional Practice
MPK4006H+	Interprofessional Practice
MPK4007Y	Practice Setting Considerations
MPK4008Y	Evidence Supported Practice
MPK4009H	Business of Kinesiology and Entrepreneurship
MPK4010H+	Professional Practice
MPK4012Y	Capstone Project: Improving Kinesiology Practice
MPK4015H	Practice and Program Evaluation
MPK8002H	Placement 1 (300 hours)
MPK8003H	Placement 2 (300 hours)

+ *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Concentration Requirements

- Students must follow departmental application procedures and can apply to only one MPK concentration.
- Students must successfully complete a total of **3.0 full-course equivalents (FCEs)** in the area of concentration, including:
  - in at least 1.5 FCEs of MPK courses, complete a major course assignment in the area of concentration
  - a minimum of 300 placement hours in the area of concentration (0.5 FCE)
  - a final capstone project in the area of concentration (1.0 FCE).

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F)

Time Limit

3 years

Laboratory Medicine and Pathobiology

LMP: Introduction

Faculty Affiliation

Medicine

Degree Programs

Laboratory Medicine

MHSc

- Fields:
  - Clinical Embryology;
  - Pathologists' Assistant

Laboratory Medicine and Pathobiology

MSc and PhD

Translational Research in the Health Sciences

MHSc

Combined Degree Programs

- STG, MD / PhD

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Biomedical Engineering
  - Laboratory Medicine and Pathobiology, MSc, PhD
- Cardiovascular Sciences
  - Laboratory Medicine and Pathobiology, MSc, PhD
- Developmental Biology
  - Laboratory Medicine and Pathobiology, MSc, PhD
- Genome Biology and Bioinformatics
  - Laboratory Medicine and Pathobiology, PhD
- Musculoskeletal Sciences
  - Laboratory Medicine and Pathobiology, MSc, PhD
- Neuroscience
  - Laboratory Medicine and Pathobiology, MSc, PhD
- Resuscitation Sciences (admissions have been administratively suspended)
  - Laboratory Medicine and Pathobiology, MSc, PhD
- Toxicology
  - Laboratory Medicine and Pathobiology, MSc, PhD

Overview

As part of the Faculty of Medicine, the Department of Laboratory Medicine and Pathobiology offers unparalleled access to more than 350 expert faculty including basic scientists, pathobiologists, laboratory physicians, and scientists; outstanding case material; a stunning array of research opportunities; diverse training sites; engaging student-run organizations.

Research Foci

Antimicrobial Resistance: Surveillance and Mechanisms
Bone and Connective Tissue Diseases including Disorders of Mineral Metabolism
Cancer Pathogenesis and Prevention Cardiovascular Disease
Cell-Matrix Interactions
Development: Cell Cycle, Differentiation, Signalling Diabetes
Endocrine and Neuroendocrine Disorders
Hematopathology and Transfusion Medicine
Immunopathology and Transplantation
Inflammatory Disorders
Lipid Disorders
Lymphatic Pathobiology
Microbial Pathogenesis
Molecular Biomarkers
Neurodegenerative Disorders
Proteomics and Bioinformatics
Protein Structure and Function
Toxicology
Translational Research
Vascular Cell Biology
Viral Diseases

For details, consult the departmental website.

LMP: Laboratory Medicine MHSc

Master of Health Science

Program Description

The Master of Health Science (MHSc) in Laboratory Medicine is a two-year professional (coursework and practicum) master's degree designed to educate and train highly skilled health laboratory scientists in one of **two fields: Pathologists' Assistant (PA) or Clinical Embryology (CE)**. The program imparts general core knowledge and skills and the specific basic and applied principles of anatomic pathology or of assisted reproductive technology (ART) required to work as laboratory scientists. These principles are the foundation upon which PAs or CEs develop fundamental applied and practical knowledge and skills to function as competent, high-quality clinical scientists.

The nature of this graduate program equips trainees to apply their knowledge to complex decision making, to serious ethical issues, and to develop a strong sense of personal accountability and intellectual rigour and independence.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Laboratory Medicine and Pathobiology's additional admission requirements stated below.
- Admission is based on demonstrated exceptional scholarly achievement, using the following criteria:
  - One-page statement summarizing how this program will contribute to the advancement of the applicant's professional goals, identifying their field of preference.
  - Curriculum vitae (CV).
  - Two letters of reference, one of which should be familiar with the applicant's scholarly activities.
- Applicants must have an appropriate BSc degree from a recognized university, with an average of at least B+ in the last two years of study. Applicants must have a demonstrated interest in human biological and life

sciences, preferably with a major or specialist program in the life sciences. These programs prepare students for the study of biomedical science, for fluency in biomedical terminology, and for critical evaluation of biomedical literature. Courses in human anatomy and physiology are desirable.
    - All potential students will be interviewed prior to final acceptance into the program. The initial selection of students will be based on a combination of their academic record, individual statement, and letters of reference. These students will be asked to participate in an interview with the program coordinator to determine the fit with the program and student's goals.
- Applicants who were educated outside Canada, whose primary language is not English and who graduated from a university where the language of instruction and examination was not English, must demonstrate proficiency in the English language through the successful completion of the following tests:
    - Test of English as a Foreign Language (TOEFL) with the following minimum required scores: Internet-based TOEFL: 100/120 and 22/30 on the writing and speaking sections.
    - International English Language Testing Systems (IELTS) required score: 8.0 (Academic) with at least 6.5 for each component.
    - Certificate of English Proficiency (COPE) with the following minimum required scores: 86 total with 22 on the listening component, 22 on the reading component, and 32 on the writing component.
    - School of Continuing Studies, University of Toronto, Academic English course. Required score: a final grade of B in Level 60 (Advanced).

Program Requirements

Field: Clinical Embryology

- **Coursework.** Students must successfully complete a total of **9.5 full-course equivalents (FCEs)** as follows:
    - 4.0 FCEs taken by all students:
        - LMP2000H *Cell and Molecular Biology* (0.5 FCE)
        - LMP2001H *Biomedical Research Methods* (0.5 FCE)
        - LMP2002H *Clinical Laboratory Management* (0.5 FCE)
        - LMP2003H *Biomedical Ethics* (0.5 FCE)
        - LMP2004H *Biostatistics* (0.5 FCE)
        - LMP2005Y^0 *Capstone Project in Laboratory Medicine* (1.0 FCE)
        - 0.5 elective FCE chosen from a course offered in LMP or any other graduate department, with approval of the field director.
    - 4.0 FCEs specific to this field:
        - LMP2100H *Advanced Reproductive Physiology and Pathology* (0.5 FCE)
        - LMP2102H *Foundations in ART (Assisted Reproductive Technology)* (0.5 FCE)
        - LMP2103H *Reproductive Genetics* (0.5 FCE)
        - LMP2104H *Applied Methods in ART* (0.5 FCE)
        - LMP2105H *Innovations in ART* (0.5 FCE)
        - LMP2106H *Current Topics in Causes and Treatment of Infertility* (0.5 FCE)
        - LMP2107H *Applied ART Laboratory Decision Making* (0.5 FCE)
        - MSC1008H *Advanced Human Embryology and Teratology* (0.5 FCE)
    - 1.5 FCEs of practicum courses
        - LMP2108H *CE Lab Simulation I* (0.5 FCE)
        - LMP2109H *CE Lab Simulation II* (0.5 FCE)
        - LMP2110H *ART Lab Rotations* (0.5 FCE)
- Students who fail a course will be offered remediation in the form of additional readings and assignments by the course director. If a student fails two courses or the offered remediation, they will be required to repeat the year.

Field: Pathologists' Assistant

- **Coursework.** Students must successfully complete a total of **9.5 full-course equivalents (FCEs)** as follows:
    - 4.0 FCEs taken by all students:
        - LMP2000H *Cell and Molecular Biology* (0.5 FCE)
        - LMP2001H *Biomedical Research Methods* (0.5 FCE)
        - LMP2002H *Clinical Laboratory Management* (0.5 FCE)
        - LMP2003H *Biomedical Ethics* (0.5 FCE)
        - LMP2004H *Biostatistics* (0.5 FCE)
        - LMP2005Y^0 *Capstone Project in Laboratory Medicine* (1.0 FCE)
        - 0.5 elective FCE chosen from a course offered in LMP or any other graduate department, with approval of the field director.
    - 1.5 FCEs specific to this field:
        - LMP2200H *Basic Principles in Human Pathobiology and Pathophysiology* (0.5 FCE)
        - LMP2201H *Anatomy and Pathology of Organ Systems* (0.5 FCE)
        - LMP2208H *Biobanking for Research* (0.5 FCE).
    - 4.0 FCEs of practicum courses
        - LMP2202H *Practicum in Surgical Pathology I* (0.5 FCE)
        - LMP2203H *Practicum in Surgical Pathology II* (0.5 FCE)
        - LMP2204H *Practicum in Surgical Pathology III* (0.5 FCE)
        - LMP2205H *Practicum in Surgical Pathology IV* (0.5 FCE)
        - LMP2206H *Practicum in Autopsy Pathology* (0.5 FCE)
        - LMP2207H *Practicum in Forensic Pathology I* (0.5 FCE)
        - LMP2209H *Practicum in Surgical Pathology V* (0.5 FCE)
        - LMP2210H *Practicum in Surgical Pathology VI* (0.5 FCE).
- Students who fail a course will be offered remediation in the form of additional readings and assignments by the course director. If a student fails two courses or the offered remediation, they will be required to repeat the year.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

[0] Course that may continue over a program. The course is graded when completed.

LMP: Laboratory Medicine MHSc Courses

Not all courses are offered every year. Please check the departmental website for course availability.

Core Courses

LMP2000H	Cell and Molecular Biology
LMP2001H	Biomedical Research Methods
LMP2002H	Clinical Laboratory Management
LMP2003H	Biomedical Ethics
LMP2004H	Biostatistics
LMP2005Y[0]	Capstone Project in Laboratory Medicine (prerequisites: PA field: LMP2200H, LMP2201H, LMP2202H, LMP2203H; CE field: LMP2100H, LMP2102H, LMP2103H, LMP2104H, MSC1008H)

[0] Course that may continue over a program. The course is graded when completed.

Clinical Embryology Courses

LMP2100H	Advanced Reproductive Physiology and Pathology
LMP2102H	Foundations in ART (Assisted Reproductive Technology) (prerequisite: LMP2100H)
LMP2103H	Reproductive Genetics (prerequisites: LMP2000H, LMP2100H)
LMP2104H	Applied Methods in ART (prerequisite: LMP2102H)
LMP2105H	Innovations in ART (prerequisites: LMP2000H, LMP2001H, LMP2002H, LMP2003H, LMP2004H, LMP2102H, LMP2103H, LMP2104H)
LMP2106H	Current Topics in Causes and Treatment of Infertility (prerequisites: LMP2100H, LMP2102H)
LMP2107H	Applied ART Laboratory Decision Making (prerequisites: LMP2001H, LMP2003H, LMP2004H, LMP2102H, LMP2104H; corequisite: LMP2105H)
LMP2108H	Clinical Embryology Laboratory Simulation I (prerequisites: LMP2102H, LMP2104H, LMP2107H)
LMP2109H	Clinical Embryology Laboratory Simulation II (prerequisites: LMP2102H, LMP2104H, LMP2107H)
LMP2110H	ART Lab Rotations
MSC1008H	Advanced Human Embryology and Teratology

Pathologists' Assistant Courses

LMP2200H	Basic Principles in Human Pathobiology and Pathophysiology
LMP2201H	Anatomy and Pathology of Organ Systems
LMP2202H	Practicum in Surgical Pathology I
LMP2203H	Practicum in Surgical Pathology II
LMP2204H	Practicum in Surgical Pathology III
LMP2205H	Practicum in Surgical Pathology IV
LMP2206H	Practicum in Autopsy Pathology
LMP2207H	Practicum in Forensic Pathology
LMP2208H	Biobanking for Research
LMP2209H	Practicum in Surgical Pathology V
LMP2210H	Practicum in Surgical Pathology VI
LMP2211H	Advanced Anatomy Dissection (prerequisite: LMP2200H)

LMP: Laboratory Medicine and Pathobiology MSc

Master of Science

Program Description

The MSc program emphasizes the development of analytical technologies, the application of basic research techniques in biochemistry, cell biology, clinical biochemistry, experimental pathology, genetics, immunology, and molecular biology to the study of mechanisms of cell and tissue injury and the pathogenesis of disease. The program also emphasizes the nature, mechanisms, therapy, and prevention of microbial diseases in humans, as well as the processes by which pathogenic microbes are spread.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Laboratory Medicine and Pathobiology's additional admission requirements stated below.

- Applicants must have completed, or be about to complete, one of the following:
  - Pathobiology Specialist program
  - an appropriate bachelor's degree in life sciences from a recognized university
  - professional degree (e.g., MD, DDS, DVM, or equivalent).
- A minimum A– average over the final two years of undergraduate study.
- Two strong letters of recommendation from faculty members familiar with the applicant's academic work.
- Detailed curriculum vitae (CV).
- Statement of intent (approximately 250 words).
- Research experience evidenced by publications, abstracts, or presentations is an asset.
- Successful applicants are selected by the departmental admissions committee on the basis of academic excellence.
- Admission is finalized when a graduate faculty member agrees to supervise the student's research and guarantees a full stipend for the student.

Program Requirements

- **Coursework.** Students must complete **1.5 full-course equivalents (FCEs)** as follows:
  - LMP1005H *Fundamentals of Research Practice* (0.5 FCE)
  - LMP1001H *Student Seminar I* (0.5 FCE; Credit/No Credit) and LMP1002H *Student Seminar II* (0.5 FCE; Credit/No Credit).
- Completion of a **thesis** (RST9999Y) under the direction of the student's supervisor, assisted by the advisory committee.
- The research content of the MSc thesis is expected to generate the equivalent of one paper published in a peer-reviewed scientific journal.
- **Residence.** Students must be on campus and participating for the duration of their registration in the program.

Program Length

5 sessions (2 years) full-time (typical registration sequence: F/W/S/F/W)

Time Limit

3 years full-time

LMP: Laboratory Medicine and Pathobiology PhD

Doctor of Philosophy

Program Description

The PhD program emphasizes the development of analytical technologies, the application of basic research techniques in biochemistry, cell biology, clinical biochemistry, experimental pathology, genetics, immunology, and molecular biology to the study of mechanisms of cell and tissue injury and the pathogenesis of disease. The program also emphasizes the nature, mechanisms, therapy, and prevention of microbial diseases in humans, as well as the processes by which pathogenic microbes are spread.

Applicants may enter the PhD program via one of three routes: 1) following completion of an MSc degree; 2) transfer from the University of Toronto MSc program; or 3) direct entry following completion of a BSc degree.

A limited number of selected students may enter the combined degree program in Medicine, Doctor of /Doctor of Philosophy (MD/PhD) subject to admission into both the departmental PhD program and the MD program.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Laboratory Medicine and Pathobiology's additional admission requirements stated below.
- Research experience evidenced by peer-reviewed publications, abstracts, or presentations is normally required.
- Three strong letters of recommendation from faculty members familiar with the applicant's academic work. Normally, one of the referees should be the applicant's research supervisor.
- A detailed curriculum vitae (CV).
- Statement of intent (approximately 250 words).
- Applicants are selected by the departmental admissions committee on the basis of academic excellence. Admission to the program is finalized when a graduate faculty member agrees to supervise the student's research and guarantees a full stipend for the student.
- A limited number of selected students may enter the MD/PhD program subject to admission into both the departmental PhD program and the MD program.

Program Requirements

- **Coursework.** Students must complete **1.0 full-course equivalent (FCE)** as follows:
  - LMP1003H^0 *Student Seminar III* (0.5 FCE; Credit/No Credit)
  - an additional 0.5 elective FCE.
- The PhD **thesis** (RST9999Y) is completed under the direction of the candidate's supervisor, assisted by the advisory committee. The PhD thesis must demonstrate a substantial contribution to laboratory medicine and pathobiology, involving a systematic investigation of disease-related hypotheses. The emphasis is on quality of the science and its presentation. The PhD thesis is normally expected to yield the equivalent of three publications in refereed scientific journals.

- **Residence.** Students must be on campus and participating for the duration of their registration in the program.

Program Length

4 years

Time Limit

6 years

[0] Course that may continue over a program. Credit is given when the course is completed.

PhD Program (Transfer)

Transfer Requirements

Transfer applicants must:

- Be enrolled in the MSc program in Laboratory Medicine and Pathobiology. Excellent students with high academic standing (normally a minimum A– average on MSc courses) who have clearly demonstrated the ability to do research at the doctoral level may be considered for transfer to the PhD program. Recommendation of the advisory committee is required.
- Successfully complete a reclassification transfer exam within 24 months of starting the MSc Program.
- Successfully complete LMP1001H *Student Seminar I* and LMP1005H *Fundamentals of Research Practice* at the master's level.
- Be concurrently enrolled in LMP1002H *Student Seminar II* at the time of writing the reclassification exam.

Program Requirements

- **Coursework.** Students must complete **2.5 full-course equivalents (FCEs)** as follows:
  - LMP1005H *Fundamentals of Research Practice* (0.5 FCE; Credit/No Credit)
  - LMP1001H *Student Seminar I* (0.5 FCE; Credit/No Credit)
  - LMP1002H *Student Seminar II* (0.5 FCE; Credit/No Credit)
  - LMP1003H[0] *Student Seminar III* (0.5 FCE; Credit/No Credit)
  - an additional 0.5 elective FCE.
- The PhD **thesis** (RST9999Y) is completed under the direction of the candidate's supervisor, assisted by the advisory committee. The candidate normally defends the thesis before a departmental committee, and subsequently before a committee approved by the School of Graduate Studies. Candidates may, with the recommendation of their advisory committee, request a waiver of the departmental defence, subject to approval by the Graduate Coordinator.
- The PhD thesis must demonstrate a substantial contribution to laboratory medicine and pathobiology, involving a systematic investigation of disease-related hypotheses. The emphasis is on quality of the science and its presentation. The PhD thesis is normally expected to yield the equivalent of three publications in refereed scientific journals.
- **Residence.** Students must be on campus and participating for the duration of their registration in the program.

Program Length

5 years

Time Limit

7 years

[0] Course that may continue over a program. Credit is given when the course is completed.

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Direct entry is available for highly qualified BSc graduates who have completed the Pathobiology Specialist program or an appropriate undergraduate program in the life sciences from a recognized university with a minimum A average in the final two years and relevant research experience.
- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Laboratory Medicine and Pathobiology's additional admission requirements stated below.
- Research experience evidenced by peer-reviewed publications, abstracts, or presentations is normally required.
- Three strong letters of recommendation from faculty members familiar with the applicant's academic work. Normally, one of the referees should be the applicant's research supervisor.
- A detailed curriculum vitae (CV).
- Statement of intent (approximately 250 words).
- Applicants are selected by the departmental admissions committee on the basis of academic excellence. Admission to the program is finalized when a graduate faculty member agrees to supervise the student's research and guarantees a full stipend for the student.

Program Requirements

- **Coursework.** Students must complete **2.5 full-course equivalents (FCEs)** as follows:
  - LMP1005H *Fundamentals of Research Practice* (0.5 FCE; Credit/No Credit)
  - LMP1001H *Student Seminar I* (0.5 FCE; Credit/No Credit)
  - LMP1002H *Student Seminar II* (0.5 FCE; Credit/No Credit)
  - LMP1003H[0] *Student Seminar III* (0.5 FCE; Credit/No Credit)
  - an additional 0.5 elective FCE.

- The PhD **thesis** (RST9999Y) is completed under the direction of the candidate's supervisor, assisted by the advisory committee. The candidate normally defends the thesis before a departmental committee, and subsequently before a committee approved by the School of Graduate Studies. Candidates may, with the recommendation of their advisory committee, request a waiver of the departmental defence, subject to approval by the Graduate Coordinator.
- The PhD thesis must demonstrate a substantial contribution to laboratory medicine and pathobiology, involving a systematic investigation of disease-related hypotheses. The emphasis is on quality of the science and its presentation. The PhD thesis is normally expected to yield the equivalent of three publications in refereed scientific journals.
- **Residence.** Students must be on campus and participating for the duration of their registration in the program.

LMP: Translational Research in the Health Sciences MHSc

Master of Health Science

Program Description

This two-year, course-based program is designed for interprofessional students from diverse backgrounds (such as medicine, life sciences, social sciences, engineering, design, and communications) who want to learn creative problem-solving skills, strategies, and competencies to translate (scientific)

knowledge into innovations that improve medicine, health, and care.

Through flexible coursework, team-based, real-world translational challenges, and extensive mentorship and networking, the department facilitates self-directed collaborative "learning by doing": students gain experience, expertise, and practical insights into development and design processes, regulatory frameworks, and translational networks and strategies to develop, lead, test, and implement innovations. The program's mission is to challenge students to think differently so that they learn to champion change in their communities and contexts.

This cohort-based program commences in September.

Minimum Admission Requirements

- Applicants are admitted on the basis of academic preparation, references, and motivation. All applicants must demonstrate exceptional scholarly achievement and significant research experience.
- An appropriate bachelor's (BSc) degree or an MD degree from a recognized university, and academic credentials and background preparation appropriate to the area of study with an A– average in at least three of the four years.
- Applicants with significant research, industry, or government experience in professional health science or related social science, and/or academic research master's or PhD are also encouraged to apply.
- The application must be accompanied by:
  - A current curriculum vitae (CV).
  - A letter of intent or statement of professional goals.
  - Three letters of reference.
- Applicants whose primary language is not English, and who graduated from a university where the language of instruction was not English, must demonstrate proficiency in the English language through the successful completion of the following English-language proficiency tests:
  - Test of English as a Foreign Language (TOEFL): a minimum score of 600 on the paper-based test and 5 on the Test of Written English (TWE); or a minimum score of 93/120 on the Internet-based test and 22/30 on the writing and speaking sections.
  - Tests must be completed in the year prior to application to the program.
- Deadline for receipt of applications is May 1 for international students and June 1 for domestic students. Admission spots are limited; not all applicants who meet the prerequisites will be admitted. Applicants are screened for eligibility and short-listed applicants will be interviewed.

Program Requirements

- Within this two-year, five-session program, students must complete a total of **8.0 full-course equivalents (FCEs)** as follows:
  - Year 1:
    - LMP2300Y *Foundations in Translational Research* (1.0 FCE, Fall and Winter)
    - LMP2320H *Overview of Methods in Practices and Contexts* (0.5 FCE; Winter)
    - LMP2322H *Information, Media, and Communication Literacy for the Sciences* (0.5 FCE, Fall)
    - LMP2301Y *Projects in Translational Research* (1.0 FCE, Fall and Winter)
    - LMP2330Y[+] *Capstone Project in Translational Research* (2.0 FCEs, Summer).
  - Years 1 and 2:
    - 2.0 FCEs: eight modular courses (0.25 FCE each).
  - Year 2:
    - LMP2330Y[+] *Capstone Project in Translational Research* (Fall and Winter)
    - 1.0 elective FCE with approval from the Program Director.

Program Length

5 sessions full-time (F/W/S/F/W)

Time Limit

3 years

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

- Jewish Studies
  - Law, LLM, MSL, SJD
- Sexual Diversity Studies
  - Law, LLM, MSL, SJD
- Women and Gender Studies
  - Law, LLM, SJD

Overview

The international reputation of the law school's faculty, their breadth of interests and approaches, and the intensive intellectual atmosphere, create outstanding opportunities for graduate students pursuing advanced degrees.

Law faculty members are some of the finest doctrinal and theoretical legal scholars in public and private law. The diversity of research interests amongst the faculty allows them to supervise graduate research in almost all areas of legal scholarship. The pluralistic academic community invites a variety of approaches to legal scholarship including, but not limited to, feminism and the law, law and economics, legal history, law and society, analytical jurisprudence, and critical legal theory. Over a third of the faculty are cross-appointed to other units — a commitment to interdisciplinary scholarship which encourages students to position their legal research within a broader, interdisciplinary context.

Strong relationships with faculty members are forged by the supervisory relationship, as well as through numerous informal opportunities to interact with faculty. The many workshops, lecture series, seminars and roundtables foster a dynamic intellectual environment. Through the Distinguished Visiting Faculty program, students have the opportunity to meet with and learn from some of the world's finest legal scholars.

In addition to the formal study program, graduate students can participate in internships through Pro Bono Students Canada and the International Human Rights Program.

Inquiries should be directed to the Graduate Program Coordinator, Graduate Program, Faculty of Law at the address below.

Law: Law LLM

Master of Laws

Program Description

The Master of Laws (LLM) is a one-year degree program that provides students with an opportunity for more profound study beyond their first law degree.

The LLM program can be thesis-intensive (with both a short or long thesis option) or coursework-only. The short and long thesis options are for law students who have demonstrated a strong potential for advanced research and original scholarship. The coursework-only option is for law students who wish to specialize in a specific area of law or explore common law at an advanced level.

Within the LLM program, students also have the option of applying to pursue one of four areas of concentration:

- LLM with a Concentration in Business Law
- LLM with a Concentration in Criminal Law
- LLM with a Concentration in Health Law, Ethics, and Policy
- LLM with a Concentration in Legal Theory.

Students accepted into a concentration will receive a designation on their transcript. There are a limited number of spots available for students in each concentration, and acceptance into the concentrations will be competitive.

The program is completed on a full-time basis. Part-time registration may be considered in exceptional circumstances.

LLM Program (No Concentration): Thesis Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Law's additional admission requirements stated below.
- Applicants must have obtained a Bachelor of Laws or Juris Doctor degree from a recognized university, or the international equivalent of a law degree from a foreign institution. Applicants must have a minimum B+ average in the final year of their legal studies. Preference will be given to applicants who maintain this average throughout their legal studies, i.e., during the course of their entire law degree.
- Applicants whose primary language is not English and who obtained their admitting degree (Bachelor of Laws or Juris Doctor) from a university where the language of instruction and examination was not English must show evidence of English proficiency by submitting English-language test scores. Several English-language testing services are acceptable. The following are the most common tests:
  - The Test of English as a Foreign Language (TOEFL) with the following minimum scores:
    - Paper-based TOEFL: minimum overall score of 600, and 5 on the Test of Written English (TWE)
    - Internet-based TOEFL: minimum overall score of 100/120, and 24/30 on each section.
  - The International English Language Testing System (IELTS), Academic module, with an overall score of 7.5 with at least 7.0 in each component.
- No conditional offers of admission will be given based on successful completion of an English language test.

Program Requirements

- Students must complete a **course of studies and a thesis** which, combined, are valued at 24 credit hours (equivalent to **6.0 full-course equivalents [FCEs]**).
- Students writing a short thesis must:
  - Complete 20 credit hours of coursework (equivalent to 5.0 FCEs); and
  - Write a thesis worth 4 credit hours (equivalent to 1.0 FCE), and approximately 45 pages or 13,000 words, under the supervision of a graduate faculty member.
- Students writing a long thesis must:
  - Complete 8 credit hours (equivalent to 2.0 FCEs) of coursework; and
  - Write a thesis worth 16 credit hours (equivalent to 4.0 FCEs), and approximately 175 pages or 52,000 words, under the supervision of a graduate faculty member.
- All thesis students must complete:
  - The mandatory graduate seminar for all LLM students who are writing a thesis: LAW1000H *Alternative Approaches to Legal Scholarship* (3 credits, or 0.75 FCE); and
  - The mandatory graduate seminar for all LLM students: LAW7572H *LLM Seminar* (1 credit, or 0.25 FCE).
- All coursework and the student's thesis are graded using the graduate grading scale as outlined in the *University Assessment and Grading Practices Policy*.
- The Faculty offers thesis students some flexibility regarding their thesis credits. Students writing a short thesis can choose to write a slightly longer thesis for additional credit, and students writing a long thesis can choose to write a slightly shorter thesis for fewer credits. Students who wish to reduce or increase their thesis credits should contact the graduate program coordinator before the Fall add/drop deadline.
- For those writing a thesis, the coursework requirements must be completed by the Faculty's Winter sessional deadlines of the academic year of attendance; the thesis must be completed by July 31 of the academic year of attendance.
- With approval of the Associate Dean, Graduate Studies at the Faculty of Law, the program may be taken on a part-time basis over two years, in which case the coursework requirements must be completed by the Faculty's Winter sessional deadlines of the second academic year of attendance; the thesis must be completed by July 31 of the second academic year of attendance.
- **Residence.** Students must be in attendance for at least two academic sessions (eight months, September to April).

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time (exceptional circumstances only)

Time Limit

3 years full-time;
6 years part-time (exceptional circumstances only)

LLM Program (No Concentration): Coursework-Only Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Law's additional admission requirements stated below.
- Applicants must have obtained a Bachelor of Laws or Juris Doctor degree from a recognized university, or the international equivalent of a law degree from a foreign institution. Applicants must have a minimum B+ average in the final year of their legal studies. Preference will be given to applicants who maintain this average throughout their legal studies, i.e., during the course of their entire law degree.
- Applicants whose primary language is not English and who obtained their admitting degree (Bachelor of Laws or Juris Doctor) from a university where the language of instruction and examination was not English must show evidence of English proficiency by submitting English-language test scores. Several English-language testing services are acceptable. The following are the most common tests:
  - The Test of English as a Foreign Language (TOEFL) with the following minimum scores:
    - Paper-based TOEFL: minimum overall score of 600, and 5 on the Test of Written English (TWE)
    - Internet-based TOEFL: minimum overall score of 100/120, and 24/30 on each section.

    - The International English Language Testing System (IELTS), Academic module, with an overall score of 7.5 with at least 7.0 in each component.
- No conditional offers of admission will be given based on successful completion of an English language test.

Program Requirements

- Students must complete a **course of studies** valued at 28 credit hours (equivalent to **7.0 full-course equivalents [FCEs]**). In addition, students pursuing the coursework-only option must designate one course as their designated writing requirement course. Only courses requiring one or more written assignments of at least 3,500 words (combined) will qualify as designated writing requirement courses. LAW1000H *Alternative Approaches to Legal Scholarship* and LAW7572H *LLM Seminar* do not qualify as a designated writing requirement course.
- All students in the LLM program must complete the mandatory graduate seminar: LAW7572H *LLM Seminar* (1 credit, or 0.25 FCE);
- All coursework is graded using the graduate grading scale as outlined in the *University Assessment and Grading Practices Policy*.
- The coursework requirements for all courses apart from the designated writing requirement course must be completed by the Faculty's Winter sessional deadlines of the academic year of attendance; the writing requirement must be fulfilled by July 31 of the academic year of attendance.
- With approval of the Associate Dean, Graduate Studies at the Faculty of Law, the program may be taken on a part-time basis over two years, in which case the coursework requirements must be completed by the Faculty's Winter sessional deadlines of the second academic year of attendance; the writing requirement must be completed by July 31 of the second academic year of attendance.
- Continuation in Year 2 of the part-time LLM program is subject to the Faculty of Law's determination that the student has made satisfactory progress in Year 1 of the part-time LLM.
- **Residence.** Students must be in attendance for at least two academic sessions (eight months, September to April).

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time (exceptional circumstances only)

Time Limit

3 years full-time;
6 years part-time (exceptional circumstances only)

LLM Program (With a Concentration): Thesis Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Law's additional admission requirements stated below.
- Applicants must have obtained a Bachelor of Laws or Juris Doctor degree from a recognized university, or the international equivalent of a law degree if from a foreign institution. Applicants must have a minimum B+ average in the final year of their legal studies. Preference will be given to applicants who maintain this average throughout their legal studies, i.e., during the course of their entire law degree.
- Applicants whose primary language is not English and who obtained their admitting degree (Bachelor of Laws or Juris Doctor) from a university where the language of instruction and examination was not English must show evidence of English proficiency by submitting English-language test scores. Several English-language testing services are acceptable. The following are the most common tests:
    - The Test of English as a Foreign Language (TOEFL) with the following minimum scores:
        - Paper-based TOEFL: minimum overall score of 600, and 5 on the Test of Written English (TWE)
        - Internet-based TOEFL: minimum overall score of 100/120, and 24/30 on each section.
    - The International English Language Testing System (IELTS), Academic module, with an overall score of 7.5 with at least 7.0 in each component.
- No conditional offers of admission will be given based on successful completion of an English language test.
- Applicants applying to one of the four areas of concentration must substantiate their interest in and suitability for the particular area of concentration in their statement of interest, letters of reference, and research proposal. Applicants may only apply to one of the areas of concentration. Applicants may be admitted into the LLM program without a concentration.

Program Requirements

- Students must complete a total of 24 credits (**6.0 full-course equivalents [FCEs]**) through a combination of **coursework and the thesis**. The thesis must be in the area of concentration into which the student was accepted.
- Students writing a short thesis and pursuing a concentration must:
    - Complete 20 credit hours of coursework (equivalent to 5.0 FCEs), at least 8 credits (equivalent to 2.0 FCEs) of which must be taken from a list of courses in the area of concentration, which will be provided annually on the program website. The remaining required credits can be satisfied with courses either within or outside the area of concentration.
    - Write a 4-credit hours thesis (equivalent to 1.0 FCE); that is, approximately 45 pages or 13,000 words in length, in the area of concentration under the supervision of a graduate faculty member.
- Students writing a long thesis and pursuing a concentration must:
    - Complete 8 credit hours of coursework (equivalent to 2.0 FCEs).
    - Write a thesis worth 16 credit hours (equivalent to 4.0 FCEs) and approximately 175 pages or 52,000 words in length, in the area of concentration under the supervision of a graduate faculty member.

- Students pursuing the concentration in Legal Theory must complete the mandatory 3-credit course LAW7081H *Foundations of Legal Theory* (3 credits, or 0.75 FCE). This course will count towards the credits required for the area of concentration.
- All thesis students must complete:
  - The mandatory graduate seminar for all LLM students writing a thesis: LAW1000H *Alternative Approaches to Legal Scholarship* (3 credits, or 0.75 FCE).
  - The mandatory graduate seminar for all LLM students: LAW7572H *LLM Seminar* (1 credit, or 0.25 FCE).
- All coursework and the student's thesis are graded using the graduate grading scale as outlined in the *University Assessment and Grading Practices Policy*.
- The Faculty offers thesis students some flexibility regarding their thesis credits. Students writing a short thesis can choose to write a slightly longer thesis for additional credit, and students writing a long thesis can choose to write a slightly shorter thesis for fewer credits. Students who wish to reduce or increase their thesis credits should contact the graduate program coordinator before the Fall add/drop deadline.
- For those writing a thesis, the coursework requirements must be completed by the Faculty's Winter sessional deadlines of the academic year of attendance; the thesis must be completed by July 31 of the academic year of attendance.
- With approval of the Associate Dean, Graduate Studies at the Faculty of Law, the program may be taken on a part-time basis over two years, in which case the coursework requirements must be completed by the Faculty's Winter sessional deadlines of the second academic year of attendance; the thesis must be completed by July 31 of the second academic year of attendance.
- **Residence.** Students must be in attendance for at least two academic sessions (eight months, September to April).

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time (exceptional circumstances only)

Time Limit

3 years full-time;
6 years part-time (exceptional circumstances only)

LLM Program (With a Concentration): Coursework-Only Option

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Law's additional admission requirements stated below.
- Applicants must have obtained a Bachelor of Laws or Juris Doctor degree from a recognized university, or the international equivalent of a law degree from a foreign institution. Applicants must have a minimum B+ average in the final year of their legal studies. Preference will be given to applicants who maintain this average throughout their legal studies, i.e., during the course of their entire law degree.
- Applicants whose primary language is not English and who obtained their admitting degree (Bachelor of Laws or Juris Doctor) from a university where the language of instruction and examination was not English must show evidence of English proficiency by submitting English-language test scores. Several English-language testing services are acceptable. The following are the most common tests:
  - The Test of English as a Foreign Language (TOEFL) with the following minimum scores:
    - Paper-based TOEFL: minimum overall score of 600, and 5 on the Test of Written English (TWE)
    - Internet-based TOEFL: minimum overall score of 100/120, and 24/30 on each section.
  - The International English Language Testing System (IELTS), Academic module, with an overall score of 7.5 with at least 7.0 in each component.
- No conditional offers of admission will be given based on successful completion of an English language test.
- Applicants applying to one of the four areas of concentration must substantiate their interest in and suitability for the particular area of concentration in their statement of interest, and their two letters of reference. Applicants may only apply to one of the areas of concentration. Applicants may be admitted into the LLM program without a concentration.

Program Requirements

- Students must complete a **course of studies** valued at 28 credit hours (equivalent to **7.0 full-course equivalents [FCEs]**). In addition, students pursuing the coursework-only option must designate one course as their designated writing requirement course. Only courses requiring one or more written assignments of at least 3,500 words (combined) will qualify as designated writing requirement courses. LAW1000H *Alternative Approaches to Legal Scholarship*, LAW7572H *LLM Seminar*, and LAW7077H *Introduction to the Canadian Legal System* do not qualify as a designated writing requirement course.
- At least 12 of the credits (equivalent to 4.0 FCEs) must be completed from a list of courses in the area of concentration into which the student was accepted. A list of eligible courses will be provided annually on the program website.
- Students pursuing the concentration in Legal Theory must complete the mandatory 3-credit course, LAW7081H *Foundations of Legal Theory* (3 credits, or 0.75 FCE). This course will count towards the credits required for the area of concentration.
- The designated writing requirement course must be in the area of concentration.
- All students in the LLM program must complete the mandatory graduate seminar: LAW7572H *LLM Seminar* (1 credit, or 0.25 FCE).
- All coursework is graded using the graduate grading scale as outlined in the *University Assessment and Grading Practices Policy*.
- The coursework requirements for all courses apart from the designated writing requirement course must be completed by the Faculty's Winter sessional deadlines of the academic year of attendance; the writing requirement must be fulfilled by July 31 of the academic year of attendance.

- With approval of the Associate Dean, Graduate Studies at the Faculty of Law, the program may be taken on a part-time basis over two years, in which case the coursework requirements must be completed by the Faculty's Winter sessional deadlines of the second academic year of attendance; the writing requirement must be completed by July 31 of the second academic year of attendance.
- Continuation in Year 2 of the part-time LLM program is subject to the Faculty of Law's determination that the student has made satisfactory progress in Year 1 of the part-time LLM studies.
- **Residence.** Students must be in attendance for at least two academic sessions (eight months, September to April).

Program Length

3 sessions full-time (typical registration sequence: F/W/S);
6 sessions part-time (exceptional circumstances only)

Time Limit

3 years full-time;
6 years part-time (exceptional circumstances only)

Law: Law MSL

Master of Studies in Law

Program Description

The Master of Studies in Law (MSL) program is designed for scholars with no prior training in law who wish to acquire a legal education and knowledge of law in order to add a legal dimension to scholarship in their own discipline.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Law's additional admission requirements stated below.
- Applicants must have completed at least a master's degree, and preferably a doctorate, from a recognized university with a demonstrated high level of scholarship in a discipline related to law. Applicants must have a least a B+ average in their final year of study. Preference will be given to applicants who have maintained this average throughout their studies.
- Applicants whose primary language is not English and who obtained their admitting degree (graduate degree or doctorate) from a university where the language of instruction and examination was not English must show evidence of English proficiency by submitting English-language test scores. Several English-language testing services are acceptable. The following are the most common tests:
  - The Test of English as a Foreign Language (TOEFL) with the following minimum scores:
    - Paper-based TOEFL: minimum overall score of 600, and 5 on the Test of Written English (TWE)
    - Internet-based TOEFL: minimum overall score of 100/120, and 24/30 on each section.
  - The International English Language Testing System (IELTS), Academic module, with an overall score of 7.5 with at least 7.0 in each component.
- No conditional offers of admission will be given based on successful completion of an English language test.

Program Requirements

- MSL students must pursue a **course of studies** approved by the Faculty.
  - The course of studies will comprise at least 28 credit hours (7.0 full-course equivalents [FCEs]), and not more than 32 credit hours (equivalent to 8.0 FCEs), and will include at least three of the following subjects: contracts, torts, property, criminal law, constitutional law, and civil procedure.
  - Students must complete a research project of an interdisciplinary nature during their studies at the Faculty of Law. The project must be completed in the context of one of the courses that students are completing for credit.
  - A mandatory graduate seminar: LAW1000H *Alternative Approaches to Legal Scholarship* (3 credits, or 0.75 FCE).
  - **In no circumstance will courses taken in the MSL program be accredited for the Juris Doctor (JD) program.**
- **Residence.** Students must be in full-time attendance for two academic sessions (eight months, September to April).

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

Law: Law LLM (Dual Degree: LLB National University of Singapore / LLM)

Dual Degree Program: Bachelor of Laws (National University of Singapore) / Master of Laws (University of Toronto)

Program Description

This dual degree program is offered as part of the Master of Laws (LLM)'s coursework-only option, with or without a concentration. Students are not eligible to take the thesis option.

Students complete three years of a Bachelor of Laws (LLB) from the National University of Singapore (NUS), and in Year 4 complete the LLM degree at the University of Toronto. Students complete the LLB and LLM degrees in four years rather than the five years it would take to attain them separately. See the LLM coursework requirements (with or without a concentration) above.

Upon successful completion of the degree requirements of both programs, students receive a Bachelor of Laws degree and a Master of Laws degree.

Contact

Bachelor of Laws Program
Faculty of Law, National University of Singapore
Email: lawUGadm@nus.edu.sg

Master of Laws Program
Faculty of Law, University of Toronto
Email: law.graduate@utoronto.ca

Application Process

- Initial consideration for admission to the dual degree program will be based on the applicant's performance during the first three terms of the NUS LLB program.
- All offers of admission to the dual degree program will be conditional upon successful completion of all Year 1, 2, and 3 requirements of the LLB program before starting the LLM program.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Law's additional admission requirements stated below.
- Successful completion of the first three years of the NUS LLB program, with the equivalent of a B+ average. Preference will be given to those who maintain this average throughout their legal studies.
- Applicants applying to one of the four areas of concentration must substantiate their interest in and suitability for the particular area of concentration in their statement of interest, and their two letters of reference. Applicants may only apply to one of the areas of concentration. Applicants may be admitted into the LLM program without a concentration.
- **Residence.** Students must be in attendance for at least two academic sessions (eight months, September to April).

Law: Law LLM (Dual Degree: LLB Tsinghua University / LLM)

Dual Degree Program: Bachelor of Laws (Tsinghua University) / Master of Laws (University of Toronto)

Program Description

This dual degree program is offered as part of the Master of Laws (LLM)'s coursework-only option, with or without a concentration. Students are not eligible to take the thesis option.

Students complete two years of a Bachelor of Laws (LLB) from Tsinghua University, and in Year 3 complete the LLM degree at the University of Toronto.

Students complete the LLB and LLM degrees in four years rather than the five years it would take to attain them separately. See the LLM coursework requirements (with or without a concentration) above.

Upon successful completion of the degree requirements of both programs, students receive a Bachelor of Laws degree and a Master of Laws degree.

Law: Law LLM (Dual Degree: LLM / JM Tsinghua University)

Dual Degree Program: Master of Laws (University of Toronto) / Juris Master (Tsinghua University)

Program Description

This dual degree program is offered as part of the Master of Laws (LLM)'s coursework-only option, with or without a concentration. Students are not eligible to take the thesis option.

Students complete the LLM and Juris Master (JM) degrees in three years and one session rather than the four years it would take to attain them separately. See the LLM coursework requirements (with or without a concentration) above.

- Years 1 and 2: students register in the Tsinghua University JM program.
- Fall session of Year 3: students register in the University of Toronto LLM program.
- Winter session of Year 3: students return to the Tsinghua University JM program.
- Fall session of Year 4: students register in the University of Toronto LLM program and complete the dual degree by the end of that session.

Upon successful completion of the degree requirements of both programs, students receive a Master of Laws degree and a Juris Master degree.

Law: Law LLM (Dual Degree: LLM / LLM (Tsinghua University)

Dual Degree Program: Master of Laws (University of Toronto) / Master of Laws (Tsinghua University)

Program Description

This dual degree program is offered as part of the Master of Laws (LLM)'s coursework-only option, with or without a concentration. Students are not eligible to take the thesis option.

Students complete the two LLM degrees in two years and one session rather than the three years it would take to attain them separately. See the LLM coursework requirements (with or without a concentration) above.

- Year 1: students register in the Tsinghua University LLM program.
- Fall session of Year 2: students register in the University of Toronto LLM program.
- Winter session of Year 2: students return to the Tsinghua University LLM program.
- Fall session of Year 3: students register in the University of Toronto LLM program and complete the dual degree program by the end of that session.

Upon successful completion of the degree requirements of both programs, students receive the University of Toronto and Tsinghua University Master of Laws degree.

Law: Law SJD

Doctor of Juridical Science

Program Description

The Doctor of Juridical Science (SJD) is a thesis degree program for outstanding law students seeking to pursue careers in teaching, policy, and research. Students receive a guaranteed funding package for three years. Inquiries should be directed to the Graduate Program Coordinator, Graduate Program, Faculty of Law at the address above.

Applicants may enter the SJD program via one of two routes: 1) following completion of an appropriate Bachelor of Laws or Juris Doctor degree and a Master of Laws; or 2) direct entry following completion of an appropriate Bachelor of Laws or Juris Doctor degree.

SJD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Law's additional admission requirements stated below.
- Applicants must have obtained a Bachelor of Laws or Juris Doctor degree and a Master of Laws degree from a recognized university, or the equivalent of each degree from an international institution. Applicants must have a minimum B+ average in the final year of their legal studies. Preference will be given to applicants who maintain this average throughout their legal studies.
- Applicants whose primary language is not English and who obtained their admitting degree (Master of Laws) from a university where the language of instruction and examination was not English must show evidence of English proficiency by submitting English-language test scores. Several English-language testing services are acceptable. The following are the most common tests:
  - The Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - Paper-based TOEFL: minimum overall score of 600, and 5 on the Test of Written English (TWE)

- Internet-based TOEFL: minimum overall score of 100/120, and 24/30 on the writing and speaking sections.
  - The International English Language Testing System (IELTS), Academic module, with an overall score of 7.5 with at least 7.0 in each component.
- No conditional offers of admission will be given based on successful completion of an English language test.

Program Requirements

- **Coursework.** Students must complete the mandatory graduate seminar LAW1000H *Alternative Approaches to Legal Scholarship* (3 credits, or 0.75 full-course equivalents [FCEs]).
  - Other coursework requirements are optional and shall be determined upon consultation with the supervisor. All coursework shall be subject to the approval of the Associate Dean, Graduate Studies, Law.
- **Area requirement.** Before being allowed to proceed with formal research on a thesis topic, a student must demonstrate competence in a broader area within which the topic falls. The student's supervisory committee (established by the student and approved by the Associate Dean of Graduate Studies at the Faculty of Law) assists in framing that area and compiling an appropriate plan for carrying out the research. The research undertaken by the student either culminates in a written exam, based on the reading list, or a research project, which is either a draft of a chapter of the thesis or an overview of the general argument. Both paths lead to an oral exam based on the written work and the reading list (the "area exam"). Unless approved by the Associate Dean of Graduate of Graduate Studies, a student must satisfy the area requirement by the end of Year 1 of registration.
- **Research and writing.** A student will not be allowed to continue in the doctoral program, where, in the opinion of the Area Committee, the student is not capable of demonstrating the capacity for independent legal research and writing at an advanced level, including through the satisfaction of the area exam.
- **Year 2 presentation.** At the end of Year 2 of registration, students must present an abstract of their work in progress or a draft chapter to an audience of their peers and interested faculty. The purpose of the meeting is to provide the student with a forum to collect feedback from a broad audience.
- **Annual meetings.** Students must meet with their entire supervisory committee at least once a year.
- **Thesis.** Following completion of the requirements above, a thesis must be prepared which, in the opinion of the Faculty of Law, constitutes a distinct contribution to legal research or scholarship, and the student must pass a Doctoral Final Oral Examination based on the thesis.
  - The thesis must be completed within five years from the date of enrolment in the program.
  - No candidate will be recommended for the degree until the thesis has been approved by the Faculty of Law and is presented in publishable form, as described in the PhD regulations in this calendar.
- **Residence.** Students must be in full-time attendance for at least two academic sessions (eight months):
  - September to April for those starting the program in September or
  - January to April and September to December for those starting the program in January.

Program Length

3 years

Time Limit

5 years

SJD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Law's additional admission requirements stated below.
- Applicants must have obtained a Bachelor of Laws or Juris Doctor degree from a recognized university, or the equivalent of a law degree from an international institution. A minimum A– average is required in the final year of their legal studies. Preference will be given to applicants who maintain this average throughout their legal studies, i.e., during the course of their entire law degree.
- The Associate Dean, Graduate Studies at the Faculty of Law has the discretion to permit direct entry into the SJD following completion of the Bachelor of Laws or Juris Doctor degree where the Graduate Committee is satisfied that the applicant's law record demonstrates excellent potential for independent legal research and writing at an advanced level.
- Applicants whose primary language is not English and who obtained their admitting degree (Bachelor of Laws or Juris Doctor) from a university where the language of instruction and examination was not English must show evidence of English proficiency by submitting English-language test scores. Several English-language testing services are acceptable. The following are the most common tests:
  - The Test of English as a Foreign Language (TOEFL) with the following minimum scores:
    - Paper-based TOEFL: minimum overall score of 600, and 5 on the Test of Written English (TWE)
    - Internet-based TOEFL: minimum overall score of 100/120, and 24/30 on the writing and speaking sections.
  - The International English Language Testing System (IELTS), Academic module, with an overall score of 7.5 with at least 7.0 in each component.
- No conditional offers of admission will be given based on successful completion of an English language test.

Program Requirements

- **Coursework.** Students must complete at least 8 credit hours (2.0 full-course equivalents [FCEs]) including the mandatory graduate seminar: LAW1000H *Alternative Approaches to Legal Scholarship* (3 credits, or 0.75 FCE).
  - All coursework shall be subject to the approval of the Associate Dean, Graduate Studies at the Faculty of Law.

- **Area requirement.** Before being allowed to proceed with formal research on a thesis topic, a student must demonstrate competence in a broader area within which the topic falls. The student's supervisory committee (established by the student and approved by the Associate Dean of Graduate Studies at the Faculty of Law) assists in framing that area and compiling an appropriate plan for carrying out the research. The research undertaken by the student either culminates in a written exam, based on the reading list, or a research project, which is either a draft of a chapter of the thesis or an overview of the general argument. Both paths lead to an oral exam based on the written work and the reading list (the "area exam"). Unless approved by the Associate Dean of Graduate Studies, a student must satisfy the area requirement by the end of Year 1 of registration.
- **Research and writing.** A student will not be allowed to continue in the doctoral program, where, in the opinion of the Area Committee, the student is not capable of demonstrating the capacity for independent legal research and writing at an advanced level, including through the satisfaction of the area exam.
- **Year 2 presentation.** At the end of Year 2 of registration, students must present an abstract of their work in progress or a draft chapter to an audience of their peers and interested faculty. The purpose of the meeting is to provide the student with a forum to collect feedback from a broad audience.
- **Annual meetings.** Students must meet with their entire supervisory committee at least once a year.
- **Thesis.** Following completion of the area requirements, a thesis must be prepared which, in the opinion of the Faculty of Law, constitutes a distinct contribution to legal research or scholarship, and the student must pass a Doctoral Final Oral Examination based on the thesis.
  - The thesis must be completed within six years from the date of enrolment in the program.
  - No candidate will be recommended for the degree until the thesis has been approved by the Faculty of Law and is presented in publishable form, as described in the PhD regulations in this calendar.
- **Residence.** Students must be in full-time attendance for at least two academic sessions (eight months):
  - September to April for those starting the program in September or
  - January to April and September to December for those starting the program in January.

Law: Global Professional Law GPLLM

Global Professional Master of Laws

Program Description

The Global Professional Master of Laws (GPLLM) program is an executive graduate degree in law designed for (1) executives who wish to become more conversant in the substance and methodology of law; and (2) internationally trained lawyers who wish to become licensed to practise law in Canada. Courses are offered on alternating weekends: Friday evenings and all day Saturday.

The program may be completed in one year (three sessions with a F/W/S registration sequence) or through an extended full-time option that allows students to complete the program requirements over two years (six sessions with a F/W/S/F/W/S registration sequence).

The GPLLM offers the following concentrations:

- Business Law
- Canadian Law in a Global Context
- Innovation, Law and Technology
- Law of Leadership

Concentration: Business Law

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Law's additional admission requirements stated below.
- Applicants must have completed a Juris Doctor (JD), Bachelor of Laws (LLB), or a bachelor's degree (in law or another discipline) from a recognized university, with a minimum mid-B average or equivalent in their final year of study.
- Applicants must demonstrate a minimum of five years of full-time work experience.
- Applicants whose primary language is not English and who obtained their admitting degree (JD or LLB or undergraduate degree in any other discipline) from a university where the language of instruction and examination was not English must show evidence of English proficiency by submitting English-language test scores. Several English-language testing services are acceptable. The Test of English as a Foreign Language (TOEFL) and International English Language Testing System (IELTS) are the most common tests:
  - TOEFL with the following minimum scores:
    - Paper-based TOEFL: minimum overall score of 600, and 5 on the Test of Written English (TWE)
    - Internet-based TOEFL: minimum overall score of 100/120, and 24/30 on each section.
  - IELTS, Academic module: overall score of 7.5 with at least 7.0 in each component.
  - The Certificate of Proficiency in English (COPE): overall score of 86 with at least 22 in both the listening and reading components, 40 in the writing component, and 7 in the speaking component (Test of Oral Proficiency).
  - The University of Toronto Academic English preparation course: overall grade of A in Level 60.
  - Canadian Academic English Language (CAEL) Online: overall score of 70 with at least 70 in each component.
- No conditional offers of admission will be given based on successful completion of an English-language test.

Program Requirements

- **Coursework: 30 credits (7.5 full-course equivalents [FCEs])**, as follows:
  - One required 3-credit course (equivalent to 0.75 FCE) as follows:
    - LAW4001H *Law and Business in a Global Economy*
  - 12 credits (equivalent to 3.0 FCEs) consisting of four courses within this concentration worth 3 credits each (0.75 FCE total) from this list:
    - LAW4002H *Comparative Corporate Governance*
    - LAW4003H *Securities Regulation and Corporate Finance*
    - LAW4004H *Mergers and Acquisitions*
    - LAW4005H *Canadian and Cross-Border Issues in Corporate Tax*
    - LAW4006H *International Dispute Resolution*
    - LAW4011H *Law and Policy of Public Private Partnerships*
    - LAW4012H *Intellectual Property Law*
    - LAW4013H *Economic and Social Regulation and Competition Law*
    - LAW4014H *International Insolvency Law*
    - LAW4015H *Organization of Transactional Legal Practice*
    - LAW4018H *Foundations of Legal Theory*
    - LAW4019H *Anti-Corruption Law: International, Domestic, and Practical Perspectives*
    - LAW4032H *Intellectual Property and Strategy*
    - LAW4036H *Applied Contract Law*
    - LAW4053H *Law and Regulation of Banks and Financial Institutions*
    - LAW4057H *Cannabis Law and Regulation*
    - LAW4058H *Competition Law*
    - LAW4059H *Digital Trade*
  - 15 credits (equivalent to 3.75 FCEs) consisting of five courses worth 3 credits each (0.75 FCE total) from any concentration. Not all courses will necessarily be available every year. The program reserves the discretion to decline student requests to complete certain electives based on course enrolment or otherwise.

Full-Time Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Extended Full-Time Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Concentration: Canadian Law in a Global Context

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Law's additional admission requirements stated below.
- Applicants must have completed a Juris Doctor (JD), Bachelor of Laws (LLB), or a bachelor's degree (in law or another discipline) from a recognized university, with a minimum mid-B average or equivalent in their final year of study
- Applicants must demonstrate at least five years of full-time work experience. However, applicants without five years of full-time work experience may be eligible for admission. If admitted, they will only be eligible to enrol in courses within the Canadian Law in a Global Context concentration.
- Applicants whose primary language is not English and who obtained their admitting degree (JD or LLB or undergraduate degree in any other discipline) from a university where the language of instruction and examination was not English must show evidence of English proficiency by submitting English-language test scores. Several English-language testing services are acceptable. The Test of English as a Foreign Language (TOEFL) and International English Language Testing System (IELTS) are the most common tests:
  - TOEFL with the following minimum scores:
    - Paper-based TOEFL: overall minimum score of 600, and 5 on the Test of Written English (TWE)
    - Internet-based TOEFL: overall minimum score of 100/120, and 24/30 on each section.
  - IELTS, Academic module: overall score of 7.5 with at least 7.0 in each component.
  - The Certificate of Proficiency in English (COPE): overall score of 86 with at least 22 in both the listening and reading components, 40 in the writing component, and 7 in the speaking component (Test of Oral Proficiency).
  - The University of Toronto Academic English preparation course: overall grade of A in Level 60.
  - Canadian Academic English Language (CAEL) Online: overall score of 70 with at least 70 in each component.
- No conditional offers of admission will be given based on successful completion of an English-language test.

Program Requirements

- **Coursework: 30 credits (7.5 full-course equivalents [FCEs])**, as follows:
  - One required 3-credit course (equivalent to 0.75 FCE) as follows:
    - LAW4010H *Foundations of Canadian Law*
  - 12 credits (equivalent to 3.0 FCEs) consisting of four seminar courses within this concentration worth 3 credits each (0.75 FCE total) from this list:
    - LAW4007H *Canadian Administrative Law*
    - LAW4008H *Canadian Constitutional Law*
    - LAW4009H *Canadian Criminal Law*
    - LAW4017H *Professional Responsibility*
    - LAW4020H *Property Law*
    - LAW4021H *Tort Law*
    - LAW4022H *Contract Law*
    - LAW4023H *Business Organizations*
    - LAW4024H *Applied Legal Research and Writing*
    - LAW4051H *Evidence Law*
  - 15 credits (3.75 FCEs) consisting of five courses worth 3 credits each (0.75 FCE) from any concentration. Not all elective courses will necessarily be available every year. The program reserves the discretion to decline student requests to complete certain electives based on course enrolment or otherwise.

Note: Canadian Law in a Global Context students without the minimum five years of full-time work experience may only select electives from within their concentration.

Full-Time Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Extended Full-Time Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Concentration: Innovation, Law and Technology

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Faculty of Law's additional admission requirements stated below.
- Applicants must have completed a Juris Doctor (JD), Bachelor of Laws (LLB), or a bachelor's degree (in law or another discipline) from a recognized university, with a minimum mid-B average or equivalent in their final year of study.
- Applicants must demonstrate a minimum of five years of full-time work experience.

- Applicants should demonstrate an interest in technology and entrepreneurship in their application materials.
- Applicants whose primary language is not English and who obtained their admitting degree (JD or LLB or undergraduate degree in any other discipline) from a university where the language of instruction and examination was not English must show evidence of English proficiency by submitting English-language test scores. Law: Global Professional Law GPLLM Courses

All courses are offered in modules. A module will be approximately four months in length. Courses will be offered during the evening and on the weekend. A large portion of the learning for the modules will take place outside of class through carefully designed reading, assignments, projects, and group study.

  - Adult Education and Community Development, MA, MEd, PhD

Overview

Scholars in the Department of Leadership, Higher and Adult Education (LHAE) are engaged in a range of theoretical and practical areas: primary, secondary, and higher education leadership and administration; adult education; policy and change; social diversity; and community engagement. LHAE develops and organizes collaborative specializations in support of particular research areas of interest including those in policy, international development education, and workplace learning.

These collaborative specializations can be taken in conjunction with most OISE graduate programs.

LHAE: Adult Education and Community Development MA

Master of Arts

Program Description

The MA is a research-based thesis degree program which can be taken on a full-time or part-time basis. The MA program focuses on learning that happens individually and collectively among adults in communities, workplaces, social movements, the street, and the virtual world — any place where people come together to create social change. The program serves individuals seeking to develop skills for education, community, and organizational roles in a wide range of settings in public, private, and voluntary sectors. Graduates work with newcomers, youth, women's groups, LGBTQ agencies, organized labour, racialized people, and disenfranchised communities in positions that involve community engagement and education, policy development, leadership, mentorship, and organizational development. The department welcomes applicants with diverse but relevant backgrounds.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Leadership, Higher and Adult Education's additional admission requirements stated below.
- An appropriate bachelor's degree in a relevant discipline or professional program from a recognized university, with a grade equivalent to a University of Toronto mid-B or better in the final year.

Program Requirements

- **Coursework.** Students must complete **4.0 full-course equivalents (FCEs)** as follows:
  - Either LHA1100H *Introduction to Adult Education* (0.5 FCE) or LHA1102H *Community Development: Innovative Models* (0.5 FCE).
  - LHA1183H *Master's Thesis Seminar* (0.5 FCE).
  - At least one research methods course (0.5 FCE).
  - Elective coursework, of which at least 2.0 FCEs must be from the Adult Education and Community Development program. Additional courses may be required of some students.
- A **thesis** based on original research, which may lay the groundwork for doctoral research.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

LHAE: Adult Education and Community Development MEd

Master of Education

Program Description

The MEd is a non-thesis, course-based professional degree program which can be taken on a full-time or part-time basis. The MEd program focuses on learning that happens individually and collectively among adults in communities, workplaces, social movements, the street, and the virtual world — any place where people come together to create social change. It serves individuals seeking to develop skills for education, community, and organizational development roles in a wide range of settings in public, private, and voluntary sectors. Graduates work with newcomers, youth, women's groups, LGBTQ agencies, organized labour, racialized people, and disenfranchised communities in positions that involve community engagement and education, policy development, leadership, mentorship, and organizational development. The department welcomes applicants with diverse but relevant backgrounds.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Leadership, Higher and Adult Education's additional admission requirements stated below.
- An appropriate bachelor's degree in a relevant discipline or professional program from a recognized university, with a grade equivalent to a University of Toronto mid-B or better in the final year.

Program Requirements

- **Coursework.** Students must complete **5.0 full-course equivalents (FCEs)** as follows:
  - Either LHA1100H *Introduction to Adult Education* (0.5 FCE) or LHA1102H *Community Development: Innovative Models* (0.5 FCE).
  - Elective coursework, of which at least 2.5 FCEs must be from the Adult Education and Community Development program.
  - One research methods course is recommended (0.5 FCE).

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

LHAE: Adult Education and Community Development PhD

Doctor of Philosophy

Program Description

The PhD is a research-based thesis degree program which can be taken on a full-time or flexible-time basis. Designed to provide opportunities for advanced study in the theoretical foundations of adult education and community development and in the application of such knowledge to practice, the PhD focuses on learning that happens individually and collectively among adults in communities, workplaces, social movements, the street, and the virtual world — any place where people come together to create social change.

Except for the time to completion, requirements for both the full-time and flexible-time programs are the same. The department welcomes applicants with diverse but relevant backgrounds.

PhD Program (Full-Time Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Leadership, Higher and Adult Education's additional admission requirements stated below.
- An appropriate master's degree from a recognized university in a relevant discipline or professional program, with a minimum standing equivalent to a University of Toronto B+.
- Applicants who have completed an appropriate master's degree that did not include a thesis or research project are required to complete a Qualifying Research Paper (QRP) to a standard satisfactory to the admissions committee.

Program Requirements

- **Coursework.** Students must complete **3.0 full-course equivalents (FCEs)** as follows:
  - LHA3102H[+] *Doctoral Thesis Seminar* (0.5 FCE), recommended to be taken in the first session of the program.
  - At least 1.5 FCEs must be from the Adult Education and Community Development program. Students with little background in the area of Adult Education and Community Development may be required to complete an additional 0.5 FCE providing such background.
  - At least one research methods course (0.5 FCE).
- **Comprehensive requirement.** Normally, a major paper between 5,000 and 7,000 words in length (including tables, figures, and references), which consists of a comprehensive discussion of one or more literatures and/or debates of significance to Adult Education and Community Development.
- **Thesis.**
- Students must register continuously and pay the full-time fee until all degree requirements have been fulfilled.
- Students cannot transfer between the full-time and flexible-time PhD options.
- Students cannot transfer between the EdD and PhD programs.

Program Length

4 years

Time Limit

6 years

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

PhD Program (Flexible-Time Option)

Applicants to the flexible-time option should be active professionals who demonstrate connections between their professional work and their proposed course program, and/or between their professional work and their proposed research. Capacity to secure blocks of time to enable concentrated study is required.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Leadership, Higher and Adult Education's additional admission requirements stated below.
- An appropriate master's degree from a recognized university in a relevant discipline or professional program, with a minimum standing equivalent to a University of Toronto B+.
- Applicants who have completed an appropriate master's degree that did not include a thesis or research project are required to complete a Qualifying Research Paper (QRP) to a standard satisfactory to the admissions committee.
- Applicants must demonstrate that they are currently employed and are active professionals engaged in activities related to their proposed program of study.

Program Requirements

- **Coursework.** Students must complete **3.0 full-course equivalents (FCEs)** as follows:
  - LHA3102H[+] *Doctoral Thesis Seminar* (0.5 FCE), recommended to be taken in the first session of the program.
  - At least 1.5 FCEs must be from the Adult Education and Community Development program. Students with little background in the area of Adult Education and Community Development may be required to complete an additional 0.5 FCE providing such background.
  - At least one research methods course (0.5 FCE).

- **Comprehensive requirement.** Normally, a major paper between 5,000 and 7,000 words in length (including tables, figures, and references), which consists of a comprehensive discussion of one or more literatures and/or debates of significance to Adult Education and Community Development.
- **Thesis.**
- Students must register continuously until all degree requirements have been fulfilled. They register full-time during the first four years and may continue as part-time students thereafter, with their department's approval.
- Students cannot transfer between the full-time and flexible-time PhD options.
- Students cannot transfer between the EdD and PhD programs.

Program Length

6 years

Time Limit

8 years

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

LHAE: Adult Education and Community Development MA, MEd, PhD Courses

Not all courses are offered every year. Please consult the course schedule posted on OISE's Office of the Registrar and Student Services' website.

LHA1100H	Introduction to Adult Education
LHA1101H	Program Planning in Adult Education
LHA1102H	Community Development: Innovative Models
LHA1103H	Introduction to Research Methods in Adult Education (RM)
LHA1104H	Social Action Education — Community Development, Social Services, and Social Movements
LHA1105H	Introduction to Qualitative Research: Part I (RM)
LHA1106H	Introduction to Qualitative Research: Part II (RM)
LHA1107H	Developing and Leading High Performing Teams: Theory and Practice
LHA1108H	Adult Learning
LHA1109H	Creative Empowerment Work with the Disenfranchised
LHA1110H	Approaches to Teaching Adults
LHA1111H	Working with Survivors of Trauma
LHA1113H	Gender and Race at Work
LHA1114H	Commons, Community and Social Justice
LHA1115H	Learning for the Global Economy
LHA1119H	Creating a Learning Organization
LHA1122H	Practicum in Adult Education and Community Development (Credit/No Credit)
LHA1142H	Young Adulthood in Crisis: Learning, Transitions, and Activism
LHA1143H	Introduction to Feminist Perspectives on Society and Education
LHA1144H	Queer Interventions: Tools for Community Organizing
LHA1145H	Participatory Research in the Community and the Workplace (RM)

WPL3931H	Advanced Studies in Workplace Learning and Social Change

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Interprogram Courses

The following course is accepted for credit in the Adult Education and Community Development program and will satisfy the program's requirement. For descriptions, see the relevant programs.

SJE1925H	Indigenous Knowledge and Decolonization: Pedagogical Implications

LHAE: Educational Leadership and Policy MA

Master of Arts

Program Description

The MA program in Educational Leadership and Policy fosters the study of problems in leadership and policy with respect to educational programs, with an emphasis on elementary and secondary schools. It will best serve students who have a commitment to scholarship and research as a means of deepening their understanding of leadership action in schools or in other educational and service institutions.

The MA is available through both full-time and part-time studies. While experience in teaching and administration is not an essential prerequisite for admission, such experience provides a desirable background. The department welcomes applicants with diverse but relevant backgrounds.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Leadership, Higher and Adult Education's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university in a relevant discipline or professional program, with a grade equivalent to a University of Toronto B+ or better in the final year.

Program Requirements

- **Coursework.** Students must complete **4.0 full-course equivalents (FCEs)** as follows:
  - LHA1003H *Designing Master's Research Proposals* (0.5 FCE).
  - LHA1004H *Research Literacy in Educational Leadership and Policy* (0.5 FCE).
  - LHA1040H *Introduction to Educational Leadership and Policy: Policy, Leadership, Change, and Diversity* (0.5 FCE).
  - 0.5 FCE in research methods, to be selected in consultation with the thesis supervisor.
  - 2.0 elective FCEs in Educational Leadership and Policy courses, normally at the 1000 level or 5000 special topics level. Additional courses may be required of some students.
- **Thesis**, to be developed under the guidance of a faculty member.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

LHAE: Educational Leadership and Policy MEd

Master of Education

Program Description

The MEd program in Educational Leadership and Policy is designed primarily for students who are interested in learning the nature and practice of leadership and policy, especially with respect to social diversity and change in elementary and secondary schools. The MEd degree can be pursued on a part-time or full-time basis. While experience in teaching and administration is not an essential prerequisite for admission, such experience provides a desirable background. The department welcomes applicants with diverse but relevant backgrounds.

There are two MEd options available:

1. **Coursework Only Option** and
2. **Coursework Plus Major Research Paper Option.**

Students initially apply to and register in the Coursework Only Option. For registration in the Coursework Plus Major Research Paper Option, department permission is required.

The Coursework Only Option is available in two delivery models:

1. Regular MEd stream: students are accepted every year and can register on a full-time or part-time basis.
2. Online/Hybrid (part-time) Cohort-based stream: available in select years. Students move through the program as a cohort and register part-time. Applicants who are interested in the Online/Hybrid Cohort must specify their interest in this cohort in their Statement of Intent. However, due to limited space, admission to the MEd degree program does not guarantee membership in this cohort.

MEd Program (Coursework Only Option [Regular Delivery])

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Leadership, Higher and Adult Education's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university in a relevant discipline with a grade equivalent to a University of Toronto mid-B or better in the final year.
- Two letters of reference. Whenever possible, one should be written by an educational professional for whom the applicant has worked. The second should be by a referee who can attest to the applicant's academic ability.

Program Requirements

- **Coursework.** Students must complete **5.0 full-course equivalents (FCEs)** as follows:
  - LHA1004H *Research Literacy in Educational Leadership and Policy* (0.5 FCE), to be taken at the beginning of the program.
  - LHA1040H *Introduction to Educational Leadership and Policy: Policy, Leadership, Change, and Diversity* (0.5 FCE), to be taken at the beginning of the program.
  - 4.0 other FCEs, of which at least 2.0 FCEs must be from the Educational Leadership and Policy program, normally at the 1000 level or 5000 special topics level. Students may choose to focus on one of the four research areas: Policy, Leadership, Change, or Social Diversity.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

MEd Program (Coursework Only Option [Online/Hybrid Delivery, Part-Time Only])

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Leadership, Higher and Adult Education's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university in a relevant discipline with a grade equivalent to a University of Toronto mid-B or better in the final year.
- Two letters of reference. Whenever possible, one should be written by an educational professional for whom the applicant has worked. The second should be by a referee who can attest to the applicant's academic ability.

Program Requirements

- **Coursework.** Students must complete **5.0 full-course equivalents (FCEs)** as follows:

- LHA1004H *Research Literacy in Educational Leadership and Policy* (0.5 FCE), to be taken at the beginning of the program.
- LHA1040H *Introduction to Educational Leadership and Policy: Policy, Leadership, Change, and Diversity* (0.5 FCE), to be taken at the beginning of the program.
- 4.0 other FCEs, of which at least 2.0 FCEs must be from the Educational Leadership and Policy program, normally at the 1000 level or 5000 special topics level. Students may choose to focus on one of the four research areas: Policy, Leadership, Change, or Social Diversity.

Program Length

10 sessions part-time

Time Limit

6 years part-time

MEd Program (Coursework Plus Major Research Paper Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Leadership, Higher and Adult Education's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university in a relevant discipline with a grade equivalent to a University of Toronto mid-B or better in the final year.
- Two letters of reference. Whenever possible, one should be written by an educational professional for whom the applicant has worked. The second should be by a referee who can attest to the applicant's academic ability.

Program Requirements

- **Coursework.** Students must complete **4.0 full-course equivalents (FCEs)** as follows:
  - LHA1003H *Designing Master's Research Proposals* (0.5 FCE). Part-time students are recommended to take this course towards the end of their program; full-time students are recommended to take it in Year 1.
  - LHA1040H *Introduction to Educational Leadership and Policy: Policy, Leadership, Change, and Diversity* (0.5 FCE), to be taken at the beginning of the program.
  - 3.0 other FCEs, of which at least 1.5 FCEs must be from the Educational Leadership and Policy program, normally at the 1000 level or 5000 special topics level. Students may choose to focus on one of the four program strands: Policy, Leadership, Change, or Social Diversity. LHA1004H *Research Literacy in Educational Leadership and Policy* is strongly recommended, as is an appropriate research methods (RM) course selected in consultation with the Faculty MRP supervisor.
- **Major Research Paper (MRP)**: LHA2001Y^{0} *Major Research Paper* to be carried out under the guidance of a faculty member.

Program Length

5 sessions full-time (typical registration sequence: F/W/S/F/W);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

LHAE: Educational Leadership and Policy EdD

Doctor of Education

Program Description

The EdD program in Educational Leadership and Policy is intended to shape highly competent leadership positions in school systems and other educational institutions. The program is specifically designed for working professional educators who want to develop the intellectual and research skills that will help them refine their practice as leaders in educational systems.

The EdD program is offered full-time in a cohort format. The department welcomes applicants with diverse but relevant backgrounds.

EdD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Leadership, Higher and Adult Education's additional admission requirements stated below.
- Master's degree in the area of Educational Leadership and Policy or an equivalent degree with high academic standing from a recognized university.
- In addition to the Statement of Intent, a supplementary writing sample is required, which will help the admissions committee to assess an applicant's readiness to succeed in rigorous coursework and to conduct systematic research for the EdD. Applicants typically submit a master's-level Major Research Paper or thesis as their writing sample. Applicants who do not have a Major Research Paper or thesis must provide a writing sample that showcases their ability to write clearly and analytically about educational issues. Examples include a master's-level course paper, a policy document, and a professional publication.

- The applicant must be in a leadership position in education, or must have held a leadership position, or must demonstrate potential for leadership.

Program Requirements

- **Coursework.** Students must complete **4.0 core full-course equivalents (FCEs)** as follows:
  - LHA3003H *Designing Research Proposals in Educational Leadership and Policy* (Credit/No Credit; 0.5 FCE).
  - LHA3004H *Research and Literacy for the EdD Program* (0.5 FCE).
  - LHA3005H *Introduction to Research Methods for the EdD (RM)* (0.5 FCE) **or** another research methods course.
  - LHA3006H *Data Analysis for the Education Doctorate-RM* (0.5 FCE) **or** another research methods course.
  - LHA3007H *Literature Reviews for the EdD Program* (0.5 FCE).
  - LHA3040H *People and Power in Organizations* (0.5 FCE).
  - LHA3041H *Doctoral Seminar on Policy Issues in Education* (0.5 FCE).
  - Additional 0.5 FCE at the 3000 level or 6000 special topics level.
- **Comprehensive examination.** Successful oral defence of a written portfolio that emphasizes reflective practice.
- **Thesis (dissertation in practice) proposal hearing.**
- **Thesis (dissertation in practice)**: The thesis (dissertation in practice) is the culminating component of the Doctor of Education degree in Educational Leadership and Policy that shall include an identification and investigation of a problem of practice, the application of theory and research to the problem of practice, and a design for action to address the problem of practice. Specifically, the thesis (dissertation in practice) consists of original research in the form of a written proposal or plan for innovative and impactful educational policy, guideline, advocacy, development project, or activism within or beyond a traditional educational setting, aimed at improving practice at local, regional, national, or international levels.
- Students are full-time and must maintain continuous registration full-time and pay full-time fees until all degree requirements, including the thesis (dissertation in practice), are completed.
- Students cannot transfer between the EdD and PhD programs.

Program Length

4 years

Time Limit

6 years

LHAE: Educational Leadership and Policy EdD; Field: International Educational Leadership and Policy

Doctor of Education (Field: International Education Leadership and Policy

Program Description

Within the Educational Leadership and Policy EdD program, the **field in International Education Leadership and Policy** offers a robust, world-class program of study structured for professionals working within international settings in positions of leadership and policymaking who want to create impact in their field and mobilize new solutions to real-world problems.

The EdD program is offered full-time in a cohort format and will be delivered in a hybrid modality with short on-campus Institutes. The majority of courses will be offered online. The department welcomes applicants with diverse but relevant backgrounds.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Leadership, Higher and Adult Education's additional admission requirements stated below.
- Master's degree in the area of Educational Leadership and Policy or an equivalent degree with high academic standing from a recognized university.
- In addition to the Statement of Intent, in which applicants will demonstrate experience and interest in studying international issues in education policy and leadership, a supplementary writing sample is required, which will help the admissions committee to assess an applicant's readiness to succeed in rigorous coursework and to conduct systematic research for the EdD. Applicants typically submit a master's-level Major Research Paper or thesis as their writing sample. Applicants who do not have a Major Research Paper or thesis must provide a writing sample that showcases their ability to write clearly and analytically about educational issues. Examples include a master’s-level course paper, a policy document, and a professional publication.
- The applicant must be in a leadership position in education in an international setting, or must have held a leadership position, or must demonstrate the relevance of the program to their position or professional development in international education policy.

Program Requirements

- **Coursework.** Students must complete **4.0 core full-course equivalents (FCEs)** as follows:
  - LHA3003H *Designing Research Proposals in Educational Leadership and Policy* (0.5 FCE; Credit/No Credit)

    - LHA3005H *Introduction to Research Methods for the EdD (RM)* (0.5 FCE)
    - LHA3006H *Data Analysis for the Education Doctorate-RM* (0.5 FCE)
    - LHA3007H *Literature Reviews for the EdD Program* (0.5 FCE)
    - LHA3040H *People and Power in Organizations* (0.5 FCE)
    - LHA3041H *Doctoral Seminar on Policy Issues in Education* (0.5 FCE)
    - 0.5 elective FCE chosen from 1000, 3000, or 6000-level courses as available online **or**
        - individual reading course (LHA3052H) **or**
        - practicum course (CIE1002H) (0.5 FCE)
    - LHA3008H *Professional Seminar and Dissertation Workshop in International Educational Leadership and Policy* (0.5 FCE)
    - Courses will be offered in specialized sections for the International Educational Leadership and Policy field cohort with course syllabi adapted to reflect the international educational policy focus.
    - Attendance in an on-campus Institute will be required to allow face-to-face delivery of one course in each of Years 1, 2, and 3. The Institute will foster cohort engagement and exchange; orientation to the OISE professors, the University of Toronto, and the program.
    - All other courses will be offered online using synchronous and asynchronous modalities.
- **Comprehensive examination.** Successful oral defence of a portfolio that emphasizes reflective practice will be held using video-conferencing.
- **Thesis (dissertation in practice) proposal hearing.**
- **Thesis (dissertation in practice):** The thesis (dissertation in practice) is the culminating component of the Doctor of Education degree in International Educational Leadership and Policy that shall include an identification and investigation of a problem of practice, the application of theory and research to the problem of practice, and a design for action to address the problem of practice. Specifically, the thesis (dissertation in practice) consists of original research in the form of a written proposal or plan for innovative and impactful educational policy, guideline, advocacy, development project, or activism within or beyond a traditional educational setting, aimed at improving practice at local, regional, national, or international levels.
- Students are full-time and must maintain continuous registration full-time and pay full-time fees until all degree requirements, including the thesis (dissertation in practice), are completed.
- Students cannot transfer between the EdD and PhD programs.

Program Length

4 years

Time Limit

6 years

LHAE: Educational Leadership and Policy PhD

Doctor of Philosophy

The PhD program in Educational Leadership and Policy fosters the study of problems in the administration and leadership of educational programs. It best serves students who are committed to scholarship and research as a means for deepening their understanding of leadership in schools or in other educational and service institutions.

The program offers both full-time and flexible-time options. While experience in teaching and leadership is not an essential prerequisite for admission, such experience provides a desirable background. The department welcomes applicants with diverse but relevant backgrounds.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Leadership, Higher and Adult Education's additional admission requirements stated below.
- An appropriate master's degree, from a recognized university in a relevant discipline or professional program, with a minimum standing equivalent to a University of Toronto A–.
- In addition to the Statement of Intent, a supplementary writing sample is required, which will help the admissions committee to assess an applicant's readiness to succeed in rigorous coursework and to conduct systematic research for the PhD. Applicants typically submit a master's-level Major Research Paper or thesis as their writing sample. Applicants who do not have a Major Research Paper or thesis must provide a writing sample that showcases their ability to write clearly and analytically about educational issues. The admissions committee will look for evidence that applicants understand how to, or have the potential to, craft an academic document, display an ability to define a research problem, devise an appropriate focus for an inquiry, assemble and analyze evidence, and develop conclusions in a rigorous manner. Examples include a master’s-level course paper, a policy document, and a professional publication.

Program Requirements

- **Coursework.** Students must complete a minimum of **3.0 full-course equivalents (FCEs)** as follows:
    - LHA3040H *People and Power in Organizations* (0.5 FCE).

    - 1.0 FCE in research methods, to be chosen in consultation with the faculty advisor (excluding LHA1003H and LHA1004H, which may not be counted towards this requirement). Students who have already attained an acceptable level of competence in research methodology may be authorized to choose a course in a different area of study.
    - At least 0.5 FCE at the 3000 level or the 6000 Special Topics level from the Educational Leadership and Policy program.
- **Comprehensive examination.** Successful oral defence of a written **portfolio** that emphasizes reflective practice.
- **Thesis proposal hearing.**
- **Thesis.**
- Students must register continuously and pay the full-time fee until all degree requirements have been fulfilled.
- Students cannot transfer between the full-time and flexible-time PhD options.
- Students cannot transfer between the EdD and PhD programs.

Program Length

4 years

Time Limit

6 years

PhD Program (Flexible-Time)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Leadership, Higher and Adult Education's additional admission requirements stated below.
- An appropriate master's degree, from a recognized university in a relevant discipline or professional program, with a minimum standing equivalent to a University of Toronto A–.
- In addition to the Statement of Intent, a supplementary writing sample is required, which will help the admissions committee to assess an applicant's readiness to succeed in rigorous coursework and to conduct systematic research for the PhD. Applicants typically submit a master's-level Major Research Paper or thesis as their writing sample. Applicants who do not have a Major Research Paper or thesis must provide a writing sample that showcases their ability to write clearly and analytically about educational issues. The admissions committee will look for evidence that applicants understand how to, or have the potential to, craft an academic document, display an ability to define a research problem, devise an appropriate focus for an inquiry, assemble and analyze evidence, and develop conclusions in a rigorous manner. Examples include a master's-level course paper, a policy document, and a professional publication.
- Applicants must demonstrate that they are currently employed and are active professionals engaged in activities related to their proposed program of study. Capacity to secure blocks of time to enable concentrated study is required.

Program Requirements

- **Coursework.** Students must complete a minimum of **3.0 full-course equivalents (FCEs)** as follows:
    - LHA3040H *People and Power in Organizations* (0.5 FCE).
    - 1.0 FCE in research methods, to be chosen in consultation with the faculty advisor (excluding LHA1003H and LHA1004H, which may not be counted towards this requirement). Students who have already attained an acceptable level of competence in research methodology may be authorized to choose a course in a different area of study.
    - At least 0.5 FCE at the 3000 level or the 6000 Special Topics level from the Educational Leadership and Policy program.
- **Comprehensive examination.** Successful oral defence of a written **portfolio** that emphasizes reflective practice.
- **Thesis proposal hearing.**
- **Thesis.**
- Students must register continuously until all degree requirements have been fulfilled. They register full-time during the first four years and may continue as part-time thereafter, with their department's approval.
- Students cannot transfer between the full-time and flexible-time PhD options.
- Students cannot transfer between the EdD and PhD programs.

Program Length

6 years

LHAE: Educational Leadership and Policy MA, MEd, EdD, PhD Courses

Not all courses are offered every year. Please consult the course schedule posted on OISE's Office of the Registrar and Student Services' website.

Some sections of existing courses are offered off campus and online in order to make them available to students in localities far from Toronto.

EDP3045H	Educational Policy and Program Evaluation
EDP3145H	Advanced Issues in Educational Policy Analysis and Program Evaluation
JOI3043H	Development and Use of Surveys in Education Research (RM)

JOI3048H	Intermediate Statistics in Educational Research: Multiple Regression Analysis (RM)
LHA1003H	Designing Master's Research Proposals
LHA1004H	Research Literacy in Educational Leadership and Policy
LHA1012H	Organizational Culture and Decision Making
LHA1016H	School Program Development and Implementation
LHA1018H	Political Skill in the Education Arena
LHA1019H	Diversity and the Ethics of Educational Leadership and Policy
LHA1020H	Teachers and Educational Change
LHA1029H	Special Applications of the Administrative Process
LHA1030H	The Legal Context of Education
LHA1035H	Sociology of Education
LHA1040H	Introduction to Educational Leadership and Policy: Policy, Leadership, Change, and Diversity
LHA1041H	Educational Administration II: Social and Policy Contexts of Schooling
LHA1042H	Educational Leadership and Diversity
LHA1047H	Managing Changes in Classroom Practice
LHA1048H	Educational Leadership and School Improvement
LHA1050H	Themes and Issues in Policy, Leadership, Change, and Social Diversity
LHA1052H	Individual Reading and Research in Educational Leadership and Policy: Master's Level
LHA1060H	School Leadership Seminar 1
LHA1061H	School Leadership Seminar 2
LHA1065H	Educational Equity and Excellence in International Comparison
LHA1066H	Comparative and International Perspectives on Gender and Education Policy and Practice (exclusion: CIE6000H)
LHA2001Y[0]	Major Research Paper
LHA3003H	Designing Research Proposals in Educational Leadership and Policy (Credit/No Credit)
LHA3004H	Research Literacy for the EdD Program
LHA3005H	Introduction to Research Methods for the EdD (RM) (prerequisite: LHA3004H; applies to regular ELP EdD students only)
LHA3006H	Data Analysis for the Education Doctorate-RM (prerequisite: LHA3005H)
LHA3007H	Literature Reviews for the EdD Program (prerequisite: LHA3004H)
LHA3008H	Professional Seminar and Dissertation Workshop in International Educational Leadership and Policy
LHA3030H	Advanced Legal Issues in Education
LHA3040H	People and Power in Organizations
LHA3041H	Administrative Theory and Educational Problems II: Doctoral Seminar on Policy Issues in Education
LHA3042H	Field Research in Educational Leadership and Policy (RM)
LHA3044H	Internship/Practicum in Educational Leadership and Policy
LHA3047H	Research Seminar on Leadership and Educational Change
LHA3052H	Individual Reading and Research in Educational Leadership and Policy: Doctoral Level
LHA3055H	Democratic Values, Student Engagement, and Democratic Leadership
LHA3064H	Global Governance and Educational Change: the Politics of International Cooperation in Education (Prerequisite: CIE1001H. Exclusion: LHA3180H.)
LHA5000H	Special Topics in Educational Leadership and Policy: Master's Level
LHA6000H	Special Topics in Educational Leadership and Policy: Doctoral Level

[0] Course that may continue over a program. The course is graded when completed.

Interprogram Courses

The following course is accepted for credit in the Educational Leadership and Policy program and will satisfy that program's requirement. For a description, see the relevant program.

LHA1815H	Economics and Finance of Higher Education (Exclusion: LHA2006H.)

LHAE: Higher Education MA

Master of Arts

Program Description

The MA in Higher Education is a research-stream program that focuses on higher education as a field of study. It best serves students seeking the knowledge and research skills needed to pursue administrative and policy careers related to higher education. The MA program also prepares students to pursue doctoral studies in higher education and related fields.

The MA is available through both full-time and part-time studies. The department welcomes applicants with diverse but relevant backgrounds.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Leadership, Higher and Adult Education's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university with a grade equivalent to a University of Toronto mid-B or better in the final year.

Program Requirements

- **Coursework.** Students must complete **4.0 full-course equivalents (FCEs)** as follows:
  - LHA3803H *Doctoral Seminar: Recurring Issues in Postsecondary Education* (0.5 FCE), to be taken at the beginning of the program.
  - 0.5 FCE in research methods approved by the faculty advisor.
  - 3.0 other FCEs, of which 1.5 FCEs must be from the Higher Education program.
- **Thesis.**

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

LHAE: Higher Education MEd

Master of Education

Program Description

The Master of Education is a course-based, professional degree designed primarily for higher education professionals seeking to advance their understanding of the issues confronting their institution and the postsecondary system. It best serves students seeking research-informed knowledge on how colleges and universities work in order to pursue or advance administrative and policy careers related to higher education.

The program can be pursued on a full-time or part-time basis. Note that the field in Higher Education Leadership is offered part-time only.

The Master of Education is offered in four fields: 1) Education in the Professions; 2) Higher Education; 3) Higher Education Leadership and 4) Student Development and Student Services in Higher Education.

Field: Education in the Professions

The Education in the Professions field is a course-based professional master's designed for individuals working in areas such as the health professions, law and law enforcement, engineering, and public services, who are planning a career in educational administration, teaching, and leadership. This field introduces the broader area of higher education as well as current issues and research methods in education research in the professions.

Two options are offered: 1) Coursework Only Option; and 2) Coursework Plus Major Research Paper Option. Students initially apply to and register in the Coursework Only Option. For registration in the Coursework Plus Major Research Paper Option, departmental permission is required.

Field: Higher Education

The Higher Education field is focused on the issues confronting higher education institutions and the postsecondary education system. It is intended for students seeking research-informed knowledge on how colleges and universities work in order to pursue and advance their administrative and policy careers in higher education. Students are accepted every year and can register on a full-time or part-time basis.

Field: Higher Education Leadership

The Higher Education Leadership field is specifically designed for professionals working in higher education at entry to mid-levels, who seek to build their careers in higher education. With a focus on leadership skills for both the college and university contexts, the field is aimed to bridge the understanding and collaboration of leaders across both sectors. Students move through the Higher Education field as a cohort and register part-time. Classes are generally offered in a compressed format to suit working professionals. Applicants are accepted to the field every other year.

Field: Student Development and Student Services in Higher Education

The Student Development and Student Services in Higher Education field is designed for student development and student services professionals who are seeking to acquire the knowledge and skills that are evidence- and experientially based to provide leadership in various types of postsecondary institutions.

LHAE: Higher Education MEd; Field: Education in the Professions

Master of Education (Field: Education in the Professions)

Program Description

The Master of Education in Higher Education is a course-based, professional degree designed primarily for higher education professionals seeking to advance their understanding of the issues confronting their institution and the postsecondary system. It best serves students seeking research-informed knowledge on how colleges and universities work in order to pursue or advance administrative and policy careers related to higher education. The program can be pursued on a full-time or part-time basis.

Within the MEd program, the **field in Education in the Professions** is a course-based professional master's designed for individuals working in areas such as the health professions, law and law enforcement, engineering, and public services, who are planning a career in educational administration, teaching, and leadership. This field introduces the broader area of higher education as well as current issues and research methods in education research in the professions.

Two options are offered: 1) Coursework Only Option; and 2) Coursework Plus Major Research Paper Option. Students initially apply to and register in the Coursework Only Option. For registration in the Coursework Plus Major Research Paper Option, departmental permission is required.

Application Requirements

- Current resumé.
- Transcript(s) from each postsecondary institution attended.
- One academic and one professional reference letter.
- Statement of Intent describing the applicant's motivation for wishing to take the program, as well as how previous qualifications and professional work experience support their interest in the program and the field.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Leadership, Higher and Adult Education's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university with a grade equivalent to a University of Toronto mid-B or better in the final year.

Program Requirements (Coursework Only Option)

- **Coursework.** Students must successfully complete a total of **5.0 full-course equivalents (FCEs)** as follows:
  - LHA1803H *Recurring Issues in Postsecondary Education* (0.5 FCE), to be taken at the beginning of the program.
  - 1.0 FCE in the Education in the Professions field.
  - 1.0 FCE in the general Higher Education program.
  - 0.5 FCE in research methods approved by the faculty advisor.
  - 2.0 FCEs in electives.

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

Program Requirements (Coursework Plus Major Research Paper Option)

Students initially apply to and register in the MEd Coursework Only Option. For registration in the Coursework Plus Major Research Paper Option, departmental permission is required.

- **Coursework.** Students must successfully complete a total of **4.0 full-course equivalents (FCEs)** as follows:
  - LHA1803H *Recurring Issues in Postsecondary Education (*0.5 FCE), to be taken at the beginning of the program.
  - 1.0 FCE in the Education in the Professions field.
  - 1.0 FCE in the general Higher Education.
  - 0.5 FCE in research methods.
  - 1.0 FCE in electives.
- **Major Research Paper (MRP)**: LHA2001Y^{0} *Major Research Paper*, to be carried out under the guidance of a faculty member.

Program Length

5 sessions full-time (typical registration sequence: F/W/S/F/W);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

LHAE: Higher Education MEd; Field: Higher Education

  - LHA1847H *Human Resource and Diversity Issues in Higher Education*.
  - LHA1854H *Student Development Theory*.
  - LHA1860H *Capstone Project for Higher Education Leadership Cohort Option*.
  - 1.5 FCEs in elective courses.

Program Length

10 sessions part-time

Time Limit

6 years part-time

LHAE: Higher Education MEd; Field: Student Development and Student Services in Higher Education

Master of Education (Field: Student Development and Student Services in Higher Education)

Program Description

The Master of Education in Higher Education is a course-based, professional degree designed primarily for higher education professionals seeking to advance their understanding of the issues confronting their institution and the postsecondary system. It best serves students seeking research-informed knowledge on how colleges and universities work in order to pursue or advance administrative and policy careers related to higher education. The program can be pursued on a full-time or part-time basis.

Within the MEd program, the **field in Student Development and Student Services in Higher Education** is designed for student development and student services professionals who are seeking to acquire the knowledge and skills that are evidence- and experientially based to provide leadership in various types of postsecondary institutions.

Application Requirements

- Current resumé.
- Transcript(s) from each postsecondary institution attended.
- One academic and one professional reference letter.
- Statement of Intent describing the applicant's motivation for wishing to take the program, as well as how previous qualifications and professional work experience support their interest in the program and the field.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Leadership, Higher and Adult Education's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university with a grade equivalent to a University of Toronto mid-B or better in the final year.

Program Requirements

- **Coursework.** Students must successfully complete a total of **5.0 full-course equivalents (FCEs)** as follows:
  - LHA1803H *Recurring Issues in Postsecondary Education* (0.5 FCE), to be taken at the beginning of the program.
  - 1.5 FCEs in Student Development and Student Services:
    - LHA1844H *The Student Experience in Postsecondary Education* (0.5 FCE).
    - LHA1854H *Student Development Theory* (0.5 FCE).
    - LHA1856H *Advanced Student Development Theories in Higher Education* (0.5 FCE).
  - 3.0 FCEs including:
    - 0.5 FCE from the Higher Education field.
    - 0.5 FCE in research methods.
  - Depending on an individual student's professional experience, students may be advised to take LHA1853H *Introduction to Student Services* (0.5 FCE).

Program Length

4 sessions full-time (typical registration sequence: F/W/S/F);
10 sessions part-time

Time Limit

3 years full-time;
6 years part-time

LHAE: Higher Education EdD

Doctor of Education

Program Description

The EdD Program in Higher Education is intended to shape highly competent professionals in leadership positions in higher education administration or policy. It best serves students seeking the knowledge and research skills needed to pursue research-grounded professional careers in colleges, universities, government agencies, professional associations, and international organizations.

The EdD program can be pursued either on a part-time or full-time basis. The department welcomes applicants with diverse but relevant backgrounds.

Students cannot transfer between the EdD and PhD programs.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Leadership, Higher and Adult Education's additional admission requirements stated below.
- Relevant and acceptable MEd or MA. In individual cases, students with a highly relevant master's degree or other equivalent graduate degree may be admitted, but additional courses in Higher Education will be required.

Program Requirements

- **Coursework.** Students must complete a minimum of **4.0 full-course equivalents (FCEs)** as follows:
  - LHA1803H *Recurring Issues in Postsecondary Education* (0.5 FCE).
  - At least 1.0 other FCE in Higher Education.
  - 0.5 FCE in research methods approved by the faculty advisor.
  - 1.0 FCE selected either in Higher Education or in another graduate program at OISE or, with the approval of the faculty advisor, in another graduate department at the University of Toronto.
  - Supervised applied research practicum (0.5 FCE).
  - Collaborative proseminar (0.5 FCE).
- **Comprehensive examination.** The objective of the doctoral comprehensive examination is to ensure that all students master at least one substantive research area in Higher Education and have the capacity to develop their own written analysis of selected issues within this area. The examination is designed to ensure that students are familiar with the literature and concepts associated with their special area of study within the field of Higher Education.
- **Thesis** reporting the results of original research on an applied topic in postsecondary education.
- Students may begin their EdD degree on a full-time or a part-time basis but must maintain continuous registration. They must register full-time for a minimum of two consecutive sessions, not including Summer, of on-campus study. Once enrolled full-time, students must maintain continuous registration full-time and pay full-time fees until all degree requirements, including the thesis, are completed.

Program Length

4 years full-time; 6 years part-time

Time Limit

6 years full-time; 6 years part-time

LHAE: Higher Education PhD

Doctor of Philosophy

Program Description

The PhD Program in Higher Education fosters research-grounded study of higher education administration and policy. It best serves students seeking the knowledge and research skills needed to pursue careers in colleges, universities, government agencies, professional associations, and international organizations as a higher education expert. The program offers both full-time and flexible-time options.

The Doctor of Philosophy is available in two delivery models:

- **Regular PhD stream:** students are accepted every year into the full-time or flexible-time program.
- **The Community College Leadership (CCL) Cohort:** available in select years. The CCL Cohort is designed for emerging college leaders and focuses specifically on the college system. The CCL is mostly offered in compressed mode, mainly on weekends, to suit working professionals pursuing a flexible-time program. Applicants must specify their interest in the CCL Cohort in their Statement of Intent.

The department welcomes applicants with diverse but relevant backgrounds.

PhD Program (Full-Time Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Leadership, Higher and Adult Education's additional admission requirements stated below.
- Relevant and acceptable MEd or MA. In individual cases, students with a highly relevant master's degree or other equivalent graduate degree may be admitted, but additional courses in Higher Education may be required.

Program Requirements

- **Coursework.** Students must complete a minimum **3.0 full-course equivalents (FCEs)** as follows:
  - LHA3803H *Doctoral Seminar: Recurring Issues in Postsecondary Education* (0.5 FCE), to be taken at the beginning of the program.
  - LHA3804H *Doctoral Research Seminar in Postsecondary Education* (0.5 FCE), to be taken at the beginning of the program.
  - At least 1.0 other FCE in Higher Education.
  - 0.5 FCE in research methods approved by the faculty advisor.
  - 0.5 FCE selected either in Higher Education or in another graduate program at OISE, or, with the approval of the faculty advisor, in another graduate department at the University of Toronto.
- **Comprehensive examination.** The objective of the doctoral comprehensive examination is to ensure that all students master at least one substantive research area in Higher Education and have the capacity to develop their own written analysis of selected issues within this area. The examination is designed to ensure that students are familiar with the literature and concepts associated with their special area of study within the field of Higher Education.
- **Thesis** reporting the results of original research in postsecondary education.
- Students must register continuously and pay the full-time fee until all degree requirements have been fulfilled.
- Students cannot transfer between the full-time and flexible-time PhD options.
- Students cannot transfer between the EdD and PhD programs.

Program Length

4 years

Time Limit

6 years

PhD Program (Flexible-Time Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Leadership, Higher and Adult Education's additional admission requirements stated below.
- Relevant and acceptable MEd or MA. In individual cases, students with a highly relevant master's degree or other equivalent graduate degree may be admitted, but additional courses in Higher Education may be required.
- Applicants must demonstrate that they are currently employed and are active professionals engaged in activities related to their proposed program of study. Applicants should have capacity to secure blocks of time to enable concentrated study.

Program Requirements

- **Coursework.** Students must complete a minimum **3.0 full-course equivalents (FCEs)** as follows:
  - LHA3803H *Doctoral Seminar: Recurring Issues in Postsecondary Education* (0.5 FCE), to be taken at the beginning of the program.
  - LHA3804H *Doctoral Research Seminar in Postsecondary Education* (0.5 FCE), to be taken at the beginning of the program.
  - At least 1.0 other FCE in Higher Education.
  - 0.5 FCE in research methods approved by the faculty advisor.
  - 0.5 FCE selected either in Higher Education or in another graduate program at OISE, or, with the approval of the faculty advisor, in another graduate department at the University of Toronto.
- **Comprehensive examination.** The objective of the doctoral comprehensive examination is to ensure that all students master at least one substantive research area in Higher Education and have the capacity to develop their own written analysis of selected issues within this area. The examination is designed to ensure that students are familiar with the literature and concepts associated with their special area of study within the field of Higher Education.
- **Thesis** reporting the results of original research in postsecondary education.
- Students must register continuously until all degree requirements have been fulfilled. They must register full-time during the first four years and may continue as part-time thereafter, with their department's approval.
- Students cannot transfer between the full-time and flexible-time PhD options.
- Students cannot transfer between the EdD and PhD programs.

Program Length

Degree Programs

Linguistics

MA and PhD

- Fields:
  - Language Variation;
  - Psycholinguistics;
  - Theoretical Linguistics

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Jewish Studies
  - Linguistics, PhD
- Sexual Diversity Studies
  - Linguistics, MA, PhD

Overview

The discipline of linguistics focuses on the nature of human language and how its many systems can be accounted for. The Department of Linguistics focuses on three major areas — theoretical linguistics, language variation and change, and psycholinguistics — with an emphasis on the intersections between these areas.

The core areas of research and teaching in the MA and PhD are:

- Theoretical Linguistics (generative grammar: phonetics, phonology, morphology, syntax, semantics)
- Language Variation (sociolinguistics, dialectology, language variation, language change)
- Psycholinguistics (comprehension and production, language acquisition, both in relation to linguistic theory)

Linguistics: Linguistics MA

Master of Arts

Program Description

The MA program in Linguistics offers comprehensive training in three areas of strength: theoretical linguistics, language variation and change, and psycholinguistics. Students complete rigorous coursework with research training in their preferred area of study. By the time of graduation, students are equipped with professional-level skills in interpretation of data, analysis, and argumentation.

The department offers one- and two-year MA options. The majority of students are admitted to the one-year MA option.

MA Program (One-Year Advanced-Standing Option — Standard Admission)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Linguistics' additional admission requirements stated below.
- Applicants with a bachelor's degree, with a minimum B+ average, may be admitted to the one-year program. Admission requires a strong background in linguistics with at least courses in introductory phonetics, phonology, morphology, and syntax.

Program Requirements

- **Coursework.** Students must normally complete a total of **4.0 full-course equivalents (FCEs)** as follows:
  - 1.5 FCEs: JAL1145H, LIN1121H, and LIN1131H or their equivalents, if not already taken.
  - 1.5 FCEs from other Linguistics course offerings determined by the Graduate Coordinator.
  - 1.0 FCE: LIN2100Y *Linguistic Forum* including regular class meetings in which students discuss and present their research topics and a final paper, completed under the supervision of a faculty member working in the same research area.
- All students must demonstrate an ability to read professionally in **one language other than English**. The choice of language must be approved by the Graduate Coordinator, having regard to the student's field of research. In some circumstances, demonstrated competence in computer programming may satisfy the requirement.

Program Length

3 sessions (typical registration sequence: F/W/S)

Time Limit

3 years

MA Program (Two-Year)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Linguistics' additional admission requirements stated below.
- Applicants with a bachelor's degree, with a minimum B+ average, may be admitted to the two-year MA program. Admission is offered to rare instances to exceptional applicants whose background in linguistics is limited.

Program Requirements

- **Coursework.** Students must normally complete a total of **8.0 full-course equivalents (FCEs)** as follows:
  - Year 1: 4.0 FCEs in phonetics, phonology, morphology, and syntax if not completed during the student's undergraduate degree;
  - Year 2: 4.0 FCEs as follows:
    - 2.0 FCEs: JAL1145H, LIN1103H, LIN1121H, LIN1131H, or their equivalents, if not already taken.
    - 1.0 FCE from other Linguistics course offerings as determined by the Graduate Coordinator.
    - 1.0 FCE: LIN2100Y *Linguistic Forum* including regular class meetings in which students discuss and present their research topics and a final paper, completed under the supervision of a faculty member working in the same research area.
- All students must demonstrate an ability to read professionally in **one language other than English**. The choice of language must be approved by the Graduate Coordinator, having regard to the student's field of research. In some circumstances, demonstrated competence in computer programming may satisfy the requirement.

Program Length

6 sessions (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Linguistics: Linguistics PhD

Doctor of Philosophy

Program Description

The PhD program in Linguistics offers comprehensive and rigorous training in an environment that encourages collaboration across the fields of Theoretical Linguistics, Language Variation and Change, and Psycholinguistics. Students achieve an advanced understanding of language and are equipped with professional-level skills in analysis, argumentation, interpretation, and quantitative reasoning. While many graduates choose academic positions, many others choose to pursue careers in fields such as education, publishing, and data science.

Applicants may enter the PhD program via one of two routes: 1) following completion of an MA degree; 2) direct entry following completion of a bachelor's degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Linguistics' additional admission requirements stated below.
- University of Toronto MA in Linguistics, or its equivalent, with at least an A– average.

Program Requirements

- **Coursework**. By the end of Year 2, students must successfully complete a total of **5.5 full-course equivalents (FCEs)** with a minimum median grade of A–:
  - 3.0 FCEs or their equivalents must be completed if they have not been taken previously: JAL1145H, LIN1103H, LIN1104H, LIN1121H, LIN1131H, LIN1145H.
    - If these have been previously taken, a balance of electives must be taken to fulfil the 3.0 FCE requirement, chosen in consultation with the Graduate Coordinator.
  - 0.5 FCE from JLP2451H, JLP2452H, LIN1070H, LIN1106H, LIN1107H, LIN1112H, LIN1156H, LIN1211H, LIN1255H, LIN1256H, LIN1271H, LIN1272H, LIN1276H.
  - 0.5 elective FCE, which may be taken outside the Department of Linguistics, upon consultation with the Graduate Coordinator.
  - Of the above courses, 1.0 FCE must be taken at the 1200 level, with 0.5 FCE in Phonology, Syntax, or Semantics.
  - 0.5 FCE: LIN2101H *Junior Forum* (Credit/No Credit), taken in Year 1.
  - 1.0 FCE: LIN2201H *Generals Paper I* and LIN2202H *Generals Paper II* — completion in two areas of study (at least one of which must be in an area of linguistic theory). Topics must be approved by the Graduate Coordinator.
- **Residency**. During Years 1 and 2, students are normally required to be on campus full-time; i.e., in such geographical proximity as to be able to visit the campus regularly and to participate fully in the department's activities associated with the program.
- **Language**. Students must demonstrate an ability to read professionally in one language other than English. The choice of language must be approved by the Graduate Coordinator, having regard to the student's field of research. In some circumstances, demonstrated competence in computer programming may satisfy the requirement.
- **Thesis**. Candidates are required to present a thesis, which must be an original contribution to linguistic knowledge. Both the preparation for and the writing of the thesis will be carried out under the supervision of members of the department.

Program Length

4 years full-time

Time Limit

6 years full-time

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Linguistics' additional admission requirements stated below.
- Applicants with a bachelor's degree, with a minimum A– average, may be admitted to the direct-entry PhD option. Admission requires a strong background in linguistics with courses in introductory phonetics, phonology, morphology, syntax, and a demonstration of capacity for original research.

Program Requirements

- **Coursework**. By the end of Year 3, students must successfully complete a total of **7.5 full-course equivalents (FCEs)** with a minimum median grade of A–:
  - 3.0 FCEs or their equivalents must be completed if they have not been taken previously: JAL1145H, LIN1103H, LIN1104H, LIN1121H, LIN1131H, LIN1145H.
    - If these have been previously taken, a balance of electives must be taken to fulfil the 3.0 FCE requirement, chosen in consultation with the Graduate Coordinator.
  - 0.5 FCE from JLP2451H, JLP2452H, LIN1070H, LIN1106H, LIN1107H, LIN1112H, LIN1156H, LIN1211H, LIN1255H, LIN1256H, LIN1271H, LIN1272H, LIN1276H.

- 2.5 elective FCEs; of these, 0.5 FCE may be taken outside the Department of Linguistics, upon consultation with the Graduate Coordinator.
- Of the above courses, 1.0 FCE must be taken at the 1200 level, with 0.5 FCE in Phonology, Syntax, or Semantics.
- 0.5 FCE: LIN2101H *Junior Forum* (Credit/No Credit), taken in Year 1.
- 1.0 FCE: LIN2201H *Generals Paper I* and LIN2202H *Generals Paper II* — completion in two areas of study (at least one of which must be in an area of linguistic theory). Topics must be approved by the Graduate Coordinator.

- **Residency**. During Years 1, 2, and 3, students are normally required to be on campus full-time; i.e., in such geographical proximity as to be able to visit the campus regularly and to participate fully in the department's activities associated with the program.
- **Language**. Students must demonstrate an ability to read professionally in one language other than English. The choice of language must be approved by the Graduate Coordinator, having regard to the student's field of research. In some circumstances, demonstrated competence in computer programming may satisfy the requirement.
- **Thesis**. Candidates are required to present a thesis, which must be an original contribution to linguistic knowledge. Both the preparation for and the writing of the thesis will be carried out under the supervision of members of the department.

Program Length

5 years full-time

Time Limit

7 years full-time

Linguistics: Linguistics MA, PhD Courses

Course descriptions and other information are available each spring from the Coordinator of Graduate Studies. Not all courses are offered in a given year. Students should consult the departmental website.

JAL1145H	Field Methods
JAL1155H	Language and Gender

Overview

The Rotman School of Management is a catalyst for transformative learning, insights, and public engagement, bringing together diverse views and initiatives around a defining purpose: to create value for business and society.

The School is located in Canada’s financial, commercial, and cultural capital, and students are trained just blocks from Bay Street, Canada’s business centre. The School takes full advantage of its strategic location by drawing on a rich pool of business leaders as teachers, mentors, and speakers. The School's strong academic reputation and close ties to the business community give graduates an edge in their search for a fulfilling career.

In the classroom, top-ranked faculty provide access to the latest research before it filters into consulting firms and major corporations. Learning at Rotman goes deep — combining a rigorous, model-based approach to decision making with a strong emphasis on personal development. The School attracts people from a wide range of countries and backgrounds, and provides them with a learning environment that is safe, welcoming, open, inclusive, and respectful to all.

Management, Rotman School: Management MBA Full-Time

Full-Time MBA Program

Program Description

The Full-Time Rotman MBA is an intense program that combines 16 months of academic study with a 4-month opportunity for a paid internship. The program begins with a core curriculum that introduces Rotman's unique problem-solving and creative methodology with the fundamental disciplines of business. Students have the opportunity to customize their MBA experience by choosing to specialize in a particular interest through 14 areas, develop a broader skill set with over 90 elective courses, and accelerate their career through the experiential learning component of the Flexible Internship program. As the practice of management evolves over time, so do the elective courses and areas that Rotman offers in any given year.

Students are required to complete the course *Applied Management: Placement* in conjunction with a work placement which may be done in the Summer, Fall, or Winter sessions. Depending on their academic area of study and career objectives, students will be guided on the best work term option to secure a placement with an employer. Throughout their work placement, students will benefit from enhanced communication with their host employers, tracking of project deliverables, and feedback from faculty supervisors.

Rotman offers three core strategic areas — an innovative curriculum, tailored career services, and the Self-Development Lab — to develop the skills and experiences students need to accelerate in their careers as high-value decision makers and business leaders. Whether their aim is to make a career switch, accelerate their current career, or start their own business, the Rotman MBA enables students to reach their professional and personal goals.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Rotman School's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university.

- Applicants must obtain a satisfactory score on the Graduate Management Admissions Test (GMAT) or the Graduate Record Examination (GRE; General Test). Test results are valid for five years.
- If required, completion of the following English proficiency tests:
  - Test of English as a Foreign Language (TOEFL) Internet-based format: overall score of 100 with a minimum of 22 on the writing and speaking sections.
  - International English Language Testing System (IELTS) Academic: score of 7.0 with minimum 6.5 required for each component.
- A minimum of two years of full-time work experience is strongly recommended.
- The Full-Time MBA program starts annually in August. Applicants for the Full-Time program are encouraged to apply as per the deadline dates (beginning in October with a final deadline in May).

Program Requirements

- Within this 20-month program (two academic years), students must complete a total of **11.3 full-course equivalents (FCEs)** as follows:
  - Students must complete a structured sequence of required courses at the 1000 level. Each course has a weighting of one, two, or three modules. Three-module courses are equivalent to three credit hours. No advanced standing will be granted for previous academic work completed or professional designations earned. Students who are unable to follow courses in their prescribed order must attain special approval from the Academic Director in order to continue in the program.
  - Complete 0.5 FCE:
    - A full-time internship work placement and RSM1380H *Applied Management: Placement*, which includes in-class lectures and coursework assessments; **or**
    - If they are not taking an internship, RSM1381H *Applied Management: Independent Study*.
  - Complete 6.5 elective FCEs at the 2000 level (equivalent to thirteen 2000-level courses).
  - With the permission of the Academic Director, students may take up to four 2000-level courses from another graduate unit or participate in an international exchange program approved by the Rotman School of Management or the University of Toronto. In all cases, courses selected are subject to the approval of the Academic Director.
  - Students can take two experiential courses, as designated by a course number RSM27XX, for credit (1.0 FCE). For students who take more than two experiential courses, these would not be counted towards the MBA degree requirements. Students should be aware that the following restrictions apply:
    - Students can only take RSM2709H *Global Practicum* for credit one time.
    - Students can only take one from the following for credit: RSM2702H, RSM2703H, or RSM2705H.
    - Students in combined degree programs with other schools or Faculties at the University of Toronto can take one experiential course for credit (0.5 FCE), unless exemption is granted.
    - Students taking part in an exchange with one of the partner schools for four half credits or more cannot take the experiential learning courses for credit. Students taking part in an exchange with one of the partner schools for three half credits or less can take one experiential learning course (0.5 FCE) for credit.

Program Length

5 sessions (2 years) full-time (typical registration sequence: F/W/S/F/W)

Time Limit

3 years

Management, Rotman School: Management MBA Full-Time Courses

Required Courses to be Completed in Year 1

Weighting for 1000-level courses is determined by the second digit of the four-digit course number as follows:

Second-Digit Course Weight

1	one credit hour
2	two credit hours
3	three credit hours

RSM1165H	Leveraging Diverse Teams (Credit/No Credit)
RSM1201H	Foundations of Strategic Management
RSM1210H	Managerial Economics
RSM1211H	Economic Environment of Business

Management, Rotman School: Management MBA Extended Full-Time

Extended Full-Time MBA Program (Morning/Evening)

Program Description

The Rotman Morning/Evening MBA programs are designed for working professionals in the Greater Toronto Area. The 32-month, cohort-based format allows working professionals to continue working while studying for their MBA. Students may explore new directions, expand leadership skills, and build close ties with a lifelong network. There are two program options:

- The Morning MBA allows working professionals to complete their master's before work — from 7:00 to 9:00 am, two mornings a week.
- The Evening MBA allows students to get a fresh perspective on real-world challenges from globally renowned faculty after work — from 6:30 to 8:30 pm, two evenings a week.

In the second half of the MBA program, students have the choice to specialize in a career path with a range of electives, including those taught during regular working hours.

Minimum Admission Requirements

- Applicants are considered under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Rotman School's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university.
- Applicants must obtain a satisfactory score on the Graduate Management Admissions Test (GMAT) or the Graduate Record Examination (GRE; General Test).
- A minimum of two years of full-time work experience.
- Two professional references.
- Resumé.
- Essays.
- Interview.
- If required, completion of the following English proficiency tests:
  - Test of English as a Foreign Language (TOEFL) Internet-based format: overall score of 100 with a minimum of 22 on the writing and speaking sections.
  - International English Language Testing System (IELTS) Academic: score of 7.0 with minimum 6.5 required for each component.
- The Extended Full-Time (Morning/Evening) MBA programs start annually in August. Applicants are encouraged to apply as per the deadline dates (beginning in the fall with a final deadline in June). Applicants who meet all of the criteria will be assessed by the admissions committee on the basis of grades, standardized test scores, references, essays, professional experience, and a personal interview.

Program Requirements

- This program, designed for working professionals, covers the equivalent of two academic years delivered over a 32-month period.
- Students complete requirements through either the Morning or Evening program options.
- **Coursework**: students must complete required and elective courses as follows:
  - **Required**: Students must complete a structured sequence of required courses at the 1000 level. Each course has a weighting of one, two, or three modules. Three-module courses are equivalent to three credit hours. No advanced standing will be granted for previous academic work completed or professional designations earned. Students who are unable to follow courses in their prescribed order must attain special approval from the Academic Director in order to continue in the program.
  - **Elective**: 5.0 full-course equivalents (FCEs) at the 2000 level (equivalent to ten 2000-level courses). With the permission of the Academic Director, Morning/Evening MBA Programs, students may take up to five 2000-level courses from another graduate unit or participate in an international exchange program approved by the Rotman School of Management or the University of Toronto. In all cases, courses selected are subject to the approval of the Academic Director, Morning/Evening MBA Programs.

Program Length

8 sessions (3 years) (typical registration sequence: F/W/S/F/W/S/F/W)

Time Limit

Elective Courses

See the full-time MBA course section.

Management, Rotman School: Management Executive MBA

Executive Master of Business Administration

Program Description

The Rotman One-Year Executive MBA provides mid-to-senior working professionals and entrepreneurs who have management experience with the business knowledge and leadership skills they need to take their careers to the next level. The innovative 13-month curriculum, taught by world-class faculty, is focused on developing senior management strategy, decision-making, and leadership skills.

Classes take place every other Friday and Saturday, with four week-long residential modules spread throughout the program so that students maximize the learning experience while minimizing time away from work.

Minimum Admission Requirements

- Applicants are considered under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Rotman School's additional admission requirements stated below.
- Admission is restricted to applicants with current full-time employment and significant professional work and managerial experience:
  - 8+ years of full-time work experience.
  - 3+ years in a mid-to-senior management role.
- Demonstrated teamwork and leadership skills.
- People and/or project management experience.
- Admissions interview.
- A recognized undergraduate degree or equivalent.
- Applicants must obtain either a satisfactory score for the Executive MBA Diagnostic Tool (EDT), the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE; General Test).
- If required, completion of the following English proficiency tests:
  - Test of English as a Foreign Language (TOEFL) Internet-based format: overall score of 100 with a minimum of 22 on the writing and speaking sections.
  - International English Language Testing System (IELTS) Academic: score of 7.0 with minimum 6.5 required for each component.
- Applicants who meet all the minimum admission requirements will be assessed by the admissions committee on the basis of grades, standardized test scores, references, essays, professional experience, and a personal interview.

Program Requirements

- Within this 13-month program:
  - Students must complete 23 courses, including the set of 14 core courses, with an accumulated credit weighting of 11.50.
  - Students must complete a structured sequence of courses. No advanced standing will be granted for previous academic work completed or professional designations earned. Students who are unable to follow courses in their prescribed order must attain special approval from the Academic Director in order to continue in the program.
  - With the permission of the Academic Director, students in good standing may apply to participate and take up to one course in an international exchange program approved by the University of Toronto. Courses selected are subject to the approval of the Academic Director.

Program Length

4 sessions (13 months) full-time (typical registration sequence: F/W/S/F)

Time Limit

3 years

Management, Rotman School: Management Executive MBA Courses

Required Courses

Core Courses

RSM5001H	Strategy 1
RSM5011H[0]	Capstone Project

Management, Rotman School: Management Executive MBA; Field: Global (Dual Degree)

Dual Degree Program: Global Executive Master of Business Administration (University of Toronto / Bocconi University)

Program Description

The Global Executive MBA (GEMBA) field may only be taken as part of a dual degree offered by the University of Toronto's Rotman School of Management and Bocconi University's SDA Bocconi School of Management. This offering is commonly referred to as the "Rotman-SDA Bocconi Global Executive MBA."

Spanning 18 months and seven business centres across four continents, the program accepts applications from full-time professionals in for-profit businesses, not-for-profit enterprises, research institutes, and entrepreneurial ventures from around the globe. The Rotman-SDA Bocconi GEMBA will change the way students think, network, and do business in some of the world's largest markets: North America, East Asia, South Asia, Europe, and Latin America.

Upon successful completion of the degree requirements of both programs, students will receive an MBA from the Rotman School and a Global Executive MBA from SDA Bocconi.

Application Process

- Applicants may apply to either the Rotman School or SDA Bocconi.
- Applicants applying through Rotman must submit their application online.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Rotman School's additional admission requirements stated below.
- Five years of work experience with a minimum of two years at the management level (people, project, and/or budget management experience).
- Recognized undergraduate degree or equivalent.
- Applicants must obtain a satisfactory score for one of the following tests: the Rotman Executive Diagnostic Test (EDT), the SDA Bocconi diagnostic test, the Graduate Management Admission Test (GMAT), or the Graduate Record Examination (GRE; General Test). Test results are valid for five years. For further details, contact the admissions office.
- If required, completion of the following English proficiency tests:
  - Test of English as a Foreign Language (TOEFL) Internet-based format: overall score of 100 with a minimum of 22 on the writing and speaking sections.
  - International English Language Testing System (IELTS) Academic: score of 7.0 with minimum 6.5 required for each component.
- Current full-time employment.
- Ability to work in international teams and demonstrated leadership skills.

Program Requirements

Students complete 10 modules of between 5.5 and 8.5 days each, held in various cities. Within this 18-month dual degree program:

- Students must complete 26 courses worth **12.25 full-course equivalents (FCEs)** consisting of 24 required courses and 2 electives. The 2 electives may be taken through the Rotman School, or SDA Bocconi, or exchange partner schools (with courses at the latter pre-approved by the program Academic Directors). The available Rotman electives will be communicated approximately 4 to 6 months before the summer elective period (July and August).
- See the list of required Rotman courses below.

Program Length

5 sessions (18 months) full-time (typical registration sequence: F/W/S/F/W)

RSM2698H	Special Topics in Organizational Behaviour

Management, Rotman School: Management Executive MBA; Field: Global Healthcare and the Life Sciences

Field: Global Executive Master of Business Administration for Healthcare and the Life Sciences

Program Description

The intensive 18-month Global Executive MBA for Healthcare and the Life Sciences (GEMBA-HLS) is designed for working professionals in the healthcare and life sciences industries. This field of study immerses students in key healthcare and life sciences clusters around the world. By learning from leading faculty and experienced sector leaders, students gain the knowledge and skills needed for success. While exploring current and future best practices globally, students are guided through an in-depth assessment of their own capabilities with a view to becoming more impactful leaders.

Over the 18 months of the program, students will partake in six international modules in some of the world's key healthcare and life sciences markets (currently three in Toronto, and one each in the San Francisco Bay area; London, United Kingdom area; and Singapore). The program is delivered in a blended model, primarily face-to-face, supplemented with online learning. It leverages the strengths of the Rotman School, as well as relationships with the University of Toronto and the global healthcare and life sciences communities. Located on the edge of Toronto's medical discovery district, Rotman is uniquely positioned to play a leading role in the management innovations taking place in pharmaceuticals and biotechnology, medical technology, medical informatics, telemedicine, insurance, patient engagement, long-term care, and health system design.

Minimum Admission Requirements

- Applicants are considered under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Rotman School's additional admission requirements stated below.
- Admission is restricted to applicants with significant professional work and managerial experience in healthcare or the life sciences:
  - 8+ years of full-time work experience.
  - 3+ years in a mid-to-senior leadership, management, or administrative role (or equivalent).
  - Demonstrated teamwork and leadership skills.
- A base of knowledge of healthcare or life sciences organizations.
- Evidence of academic achievement.
- Applicants must obtain either a satisfactory score for the Rotman Executive MBA Diagnostic Tool (EDT), the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE; General Test). Test results are valid for five years. See further details or contact the admissions office.
- If required, completion of the following English proficiency tests:
  - Test of English as a Foreign Language (TOEFL) Internet-based format: overall score of 100 with a minimum of 22 on the writing and speaking sections.
  - International English Language Testing System (IELTS) Academic: score of 7.0 with minimum 6.5 required for each component.
- Applicants who meet all the minimum admission requirements will be assessed by the admissions committee on the basis of grades, standardized test scores, references, essays, professional experience, and a personal interview.
- Please note that special program fees apply for this program.

Program Requirements

- Within this 18-month program, students must successfully complete a structured sequence of 23 courses with an accumulated credit weighting of 11.50. No advanced standing will be granted for previous academic work completed or professional designations earned. Students who are unable to follow courses in their prescribed order must attain special approval from the Academic Director in order to continue in the program.
- One or more of the course(s) may be substituted with course(s) offered in the regular MBA program at the discretion of the Academic Directors.
- The Global Executive MBA for Healthcare and the Life Sciences follows a blended model of delivery; i.e., a mix of face-to-face and online. It is offered during six residential modules (of between 7 and 11 days each) and study periods, held in various cities. Supplemental curriculum hours are delivered online.

Program Length

Management, Rotman School: Finance MF

Master of Finance

Program Description

The Master of Finance (MF) program provides the most in-depth theoretical and applied finance training currently available. Aimed at experienced working professionals, the program is delivered on Wednesday evenings and alternating Saturdays over 20 months. This enables students to advance their career without leaving work, and be able to apply the knowledge learned in the classroom immediately in the workplace. Students come from a variety of backgrounds such as financial risk, portfolio management, corporate finance, equity research, accounting, sales and trading, insurance, pensions, and legal settings.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Rotman School's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university.
- A satisfactory score on the Graduate Management Admissions Test (GMAT) or GRE (Graduate Record Examination; General Test). Exemptions from the GMAT/GRE requirement are granted to applicants who have:
  - Passed the Common Final Exam (CFE) (or former UFE) for a Certified Professional Accountant (CPA) designation.
  - Passed at least the Level II examination of the Chartered Financial Analyst (CFA) designation.
  - Graduated from the University of Toronto with high distinction (cumulative grade point average of 3.5 or higher).
  - Attained the professional designation in Engineering (PEng) or in Actuarial Sciences (ACIA or FCIA).
- At least two years of full-time work experience in finance or a finance-related field is strongly recommended. Applicants who do not have the recommended work experience will be considered on a case-by-case basis, particularly if accompanied by demonstrated exceptional academic and professional potential.
- Applicants who meet all the criteria will be assessed on the basis of their application essay, grades, standardized graduate test scores, references, and professional experience by the admissions committee. Prospective students will then be invited for an admission interview. The admission decision will be based on both submitted materials and interview performance.

Program Requirements

- Within this 20-month program (two academic years):

- Students must complete a structured sequence of **5.75 full-course equivalents** (FCEs) (11.5 half-course equivalents) taken over five sessions. No advanced standing will be granted for previous academic work completed or professional designations earned. Students who are unable to follow courses in their prescribed order must attain special approval from the Academic Director in order to continue in the program.

RSM4113H (0.25 FCE)	Macroeconomics for Finance Professionals
RSM4216H	Financial Reporting and Financial Statement Analysis
RSM4220H	Advanced Accounting Topics for Finance
RSM4310H	Foundations of Finance
RSM4314H	Risk Management and Financial Institutions
RSM4315H	Investment Banking and Corporate Valuation
RSM4317H	Analysis of Fixed Income Markets
RSM4318H	Applied Portfolio Management
RSM4319H	Forecasting Risks and Opportunities for Financial Securities
RSM4322H	Applications of Derivatives Products
RSM4323H	Investments
RSM4324H	Innovations in Financial Technology

Consult the departmental website for course descriptions.

Program Length

5 sessions (2 years) full-time (typical registration sequence: F/W/S/F/W)

Time Limit

3 years

Management, Rotman School: Financial Risk Management MFRM

Master of Financial Risk Management

Program Description

The Master of Financial Risk Management (MFRM) is designed to prepare students who excel at finance and quantitative analysis for careers in this in-demand sector. A bridge between academic and professional life, this full-time, ten-month program allows students to fast-track into the finance industry — giving them a competitive edge over applicants with only an undergraduate degree.

Students will gain a better understanding of the different types of risk, the regulatory environment, and how different financial institutions manage uncertainty. They consider the ways risk is measured and managed, looking at systems and models currently used within the financial sector.

Students have the opportunity to gain real-world experience during the Risk Management Project which takes place midway through the program. They will work on a real risk issue that is relevant and of interest to financial institutions. During the nine-week project, students will be taken out of the classroom and into industry, working with practising risk management professionals.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Rotman School's additional admission requirements stated below.
- **A recognized four-year undergraduate degree or equivalent:** A business, commerce, economics, mathematics, engineering, or actuarial science degree is preferred. However, other four-year undergraduate degrees will be considered if there is evidence of strong quantitative skills with a minimum B average in calculus, linear algebra, and statistics or econometrics.
- **Quantitative proficiency**, usually demonstrated through the completion of university-level courses with a minimum B average, in calculus, linear algebra, and statistics and/or econometrics during the undergraduate degree.
- Two academic references.
- Essays (written essay, video questions, and real-time written response).
- English-language proficiency (if required).
- **Prerequisite knowledge in the following areas, usually demonstrated through the completion of university-level courses:**
  - Foundations of finance.
  - Financial accounting.
  - Investments.
  - Financial derivatives.
  - Applicants who have not completed courses in one or more of these subject areas may be offered admission conditional on successful completion of one or more qualifying examinations demonstrating equivalent knowledge.
- Demonstrated knowledge of **Python coding**. All offers of admission will be conditional upon the successful completion of a Python coding online course and examination. Applicants will be given access to online instruction modules in preparation for the examination and will have up to two attempts prior to the start date of the program.
- Applicants who meet all the criteria will be assessed on the basis of their application essays, answers to video questions, grades, and references by the admissions committee. Selected applicants will then be invited for an admission interview. The admission decision will be based on both submitted materials and interview performance.

Program Requirements

Within this ten-month, full-time program (three sessions), students must complete a structured sequence of 11 half courses (**5.5 full-course equivalents [FCEs]**). No advanced standing will be granted for previous academic work completed or professional designations earned. Students who are unable to follow courses in their prescribed order must attain special approval from the Academic Director in order to continue in the program. The courses in the program are:

RSM6301H	Topics in Financial Risk
RSM6302H	Financial Markets, Risk, and Institutions
RSM6303H	Regulation of Financial Institutions
RSM6304H	Operational Risk
RSM6305H	Credit Risk
RSM6306H	Probabilistic Modelling for Risk-Informed Decisions
RSM6307H	Macroeconomics for Financial Risk Management Professionals
RSM6308H	Advanced Investments
RSM6310H	Derivative Models for Risk Management
RSM6311H	Rotman Risk Management Project
RSM6313H	Innovations in Financial Technology

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

Management, Rotman School: Management Analytics MMA

Master of Management Analytics

Program Description

The professional Master of Management Analytics (MMA) degree program offers a curriculum that combines analytical depth with a focus on business issues and applications. Analytical depth is provided by courses on acquisition and structuring of data, predictive and prescriptive analytics, machine learning, artificial intelligence (AI) and deep learning, decision analysis, and simulation modelling. Courses applying analytics to business feature the use of analytics in marketing, operations, supply chain management, accounting, and finance. Students are exposed to real-life application of management analytics through the analytics practicum.

The MMA degree program is offered over 11 months using a cohort-based model. Students must complete a structured sequence of 13 half-course equivalents (6.5 full-course equivalents [FCEs]) on a full-time basis. Students who are unable to follow courses in their prescribed order must attain special approval from the Academic Director in order to continue in the program. The MMA is designed for pre-experience graduates.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Rotman School's additional admission requirements stated below.
- **Appropriate four-year undergraduate degree or equivalent:** Given the nature of the MMA program, degrees in Computer Science, Statistics, Mathematics, Engineering, Physical Science, Economics, and Commerce will be preferred, but degrees from any program where there is a significant quantitative and computational component will be considered.
- **Quantitative proficiency:** Evidence of a high level of proficiency (a minimum B average) in quantitative subjects is required. Mastery of mathematics is essential including, at a minimum, calculus and linear algebra, as are courses covering probability and statistics. In cases where evidence of quantitative proficiency is not obvious, applicants must provide supplemental evidence.
- **Computational proficiency:** Demonstrated proficiency in computer programming. This may be demonstrated through a minimum B average in one or more courses in computer science or in courses relying extensively on computer programming. In cases where evidence of computational proficiency is not obvious, applicants must provide supplemental evidence.
- **English-language proficiency:** Applicants must demonstrate the ability to communicate in English in one of the following ways:
  - An undergraduate or graduate degree from a university at which the language of instruction and examination was English.
  - Applicants whose primary language is not English and who graduated from a university where the language of instruction is not English must achieve a Test of English as a Foreign Language (TOEFL) score of at least 100. The International English Language Testing System (IELTS) may be considered in special circumstances with a minimum score of 7.0 required.
- Two academic references.
- Essays (written essay, video questions, and real-time written response).
- All successful applicants are expected to demonstrate effective oral and written communication skills.
- Demonstration of academic ability; a high Graduate Management Admission (GMAT) or Graduate Record Examination (GRE) score is encouraged, though it is not mandatory.
- Applicants who meet all the criteria will be assessed on the basis of their application essays, answers to the video questions, grades, and references by the admissions committee. Selected applicants will then be invited for an admission interview. The admission decision will be based on both submitted materials and interview performance.

Program Requirements

- Students must be on campus by early to mid-August.
- Within this three-session program, students must complete a structured sequence of **6.5 full-course equivalents (FCEs)** (13 half-course equivalents).No advanced standing will be granted for previous academic work completed or professional designations earned. Students who are unable to follow courses in their prescribed order must attain special approval from the Academic Director in order to continue in the program. The courses in the program are:

RSM8224H	Analytic Insights Using Accounting and Financial Data
RSM8411H	Structuring and Visualizing Data for Analytics
RSM8413H	Big Data Analytics
RSM8414H	Tools for Probabilistic Models and Prescriptive Analytics
RSM8423H	Optimizing Supply Chain Management and Logistics
RSM8431Y[0]	Analytics Colloquia
RSM8432H[0]	Management Analytics Practicum
RSM8502H	Data-Based Management Decisions
RSM8512H	Modeling Tools for Predictive Analytics
RSM8521H	Leveraging AI and Deep Learning Tools in Marketing
RSM8522H	Analytics for Marketing Strategy
RSM8901H	Analytics in Management

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

[0] Course that may continue over a program. The course is graded when completed.

Management, Rotman School: Professional Accounting GDipPA

Graduate Diploma in Professional Accounting

Program Description

The **Rotman Graduate Diploma in Professional Accounting (GDipPA)** is an excellent way to gain advanced standing in the pursuit of a Chartered Professional Accountant (CPA) certification. This 12-week summer program deepens knowledge of accounting while satisfying four modules of the CPA Professional Education Program (CPA PEP). The program helps prepare students for the Common Final Examination (CFE) and allows them to advance straight to the Capstone 1 module in the CPA PEP.

The program takes advantage of the depth of accounting expertise at the Rotman School as well as its long-standing commitment to professional accounting education.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy additional admission requirements stated below.
- Admission to the program is available to students in Year 4 or to recent graduates of the following University of Toronto undergraduate programs:
  - Rotman's Bachelor of Commerce (Accounting Specialist).
  - University of Toronto Mississauga's Bachelor of Commerce (Accounting Specialist).
  - University of Toronto Scarborough's Bachelor of Business Administration (Specialist in Management and Accounting).
- University of Toronto students who are not currently completing one of the accounting specialist programs are required to take specific courses to be considered as applicants to the GDipPA program.
- Applicants from outside the University of Toronto: The accreditation that the University of Toronto has received from CPA Ontario specifies that only candidates with University of Toronto degrees, or equivalent, may be given advanced standing in the CPA Professional Education Program (PEP). In determining whether a degree from another Canadian university is equivalent, the admissions committee will review each submitted application individually. Prior to applying, applicants are encouraged to ensure that the courses they have taken meet the requirements for entry into CPA PEP.
- **Course requirements:**
  - Successful completion of all the courses required for entry into the CPA Professional Education Program (CPA PEP) as determined with CPA Ontario:
    - Required core courses: a minimum overall average of 70%.
    - Each individual core course: a minimum grade of 60%.
    - Each individual non-core course: a passing grade or 50%, whichever is higher.

- Applicants who meet all the criteria will be assessed on the basis of their application package and grades by the admissions committee. Selected applicants may be invited for an admission interview.

Program Requirements

Students must complete a structured sequence of **2.5 full-course equivalents (FCEs)** (five half courses). No advanced standing will be granted for previous academic work completed or professional designations earned. Students who are unable to follow courses in their prescribed order must attain special approval from the Academic Director in order to continue in the program. The courses in the program are:

RSM7201H	Advanced Financial Reporting
RSM7202H	Advanced Taxation
RSM7203H	Advanced Topics in Assurance and Control
RSM7301H	Finance and Professional Practice
RSM7204H	Integration and Analysis

Program Length

1 session full-time (typical registration sequence: S)

Time Limit

2 years

PhD

- Fields:
  - Accounting;
  - Business Economics;
  - Finance;
  - Marketing;
  - Operations Management;
  - Organizational Behaviour and Human Resources Management;
  - Strategic Management

Collaborative Specializations

The following collaborative specializations are available to students in participating degree programs as listed below:

- Environmental Studies
  - Management, PhD
- Global Health (U of T Global Scholar)
  - Management, PhD

Overview

The PhD in Management at the University of Toronto is a vibrant and intellectually rich environment for those interested in developing new insights in management scholarship. There is a close-knit community of scholars who value and celebrate insightful, breakthrough research.

The PhD is a challenging program which features coursework, cutting-edge research training, and close working relationships with some of the best management academics in the world. Students work closely with faculty in a research-led culture which emphasizes rigor, creativity, and innovation. The curriculum is carefully designed to support students as publishing scholars as early as possible in their doctoral studies. The success of this program is evidenced in placements in leading business schools and the impressive careers of its graduates.

Management, Tri-campus: Management PhD

Doctor of Philosophy

Program Description

The Graduate Department of Management offers a world-class doctoral program. Applicants may enter the PhD program via one of two routes: 1) following completion of an appropriate master's degree or 2) direct entry following completion of a bachelor's degree.

PhD Program

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants to all fields must also satisfy the Rotman School's additional admission requirements stated below.
- Some depth in the cognate disciplines relevant to the field is required.
- These requirements may be satisfied prior to entry to the PhD program through an MBA degree program coupled with a relevant undergraduate degree, or through an undergraduate degree in business, management, or commerce coupled with a discipline-based master's degree.
- If the depth requirements are completed prior to entry to the PhD program, then the student is expected to complete the program in four years. If additional coursework is required, then the student may need an additional year to complete the program.
- Applicants should provide:
  - transcripts from each post-secondary institution attended
  - a letter of intent for applying to the PhD program
  - an updated curriculum vitae (CV)
  - two reference letters
  - a valid GMAT or GRE score
  - proof of English-language proficiency, if applicable.

Program Requirements

- Students are expected to be qualified in the three basic disciplines essential to the study of management: economics, behavioural science, and quantitative analysis/statistics.
- Students in all fields normally complete **coursework in one field and two areas of study** during Years 1 and 2. In subsequent years of study, students concentrate on deepening knowledge through additional coursework and on generating unprecedented insights through research that culminates in a written doctoral thesis.
- **Coursework**. Students must complete a minimum of **4.5 full-course equivalents (FCEs)** to satisfy requirements for one field and two areas of study.
  - A minimum of 2.0 FCEs comprise the field. These will normally be taken from 3000-level Management courses, but additional courses from other departments may be required.
  - 2.0 FCEs: courses in the two areas of study are usually taken in cognate departments. Each area of study comprises at least 1.0 FCE.
  - Upon completion of the courses, students are expected to pass **comprehensive examinations** in the field.
  - Successful completion of the required course RSM3080H *Research Methods in Business* (0.5 FCE).
- A **thesis** embodying the results of original investigation must be submitted and defended at a **Doctoral Final Oral Examination** in accordance with the regulations of the School of Graduate Studies.
- During all years of study, students must maintain **residency**, whereby students are on campus full-time and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.

Program Length

4 years

Time Limit

6 years

PhD Program (Direct-Entry)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants to all fields must also satisfy the Rotman School's additional admission requirements stated below.
- Some depth in the cognate disciplines relevant to the field of study is required.
- These requirements may be satisfied prior to entry to the PhD program through an MBA degree program coupled with a relevant undergraduate degree, or through an undergraduate degree in business, management, or commerce coupled with a discipline-based master's degree.
- If the depth requirements are completed prior to entry to the PhD program, then the student is expected to complete the program in five years. If additional coursework is required, then the student may need an additional year to complete the program.
- In exceptional cases, and at the discretion of the Rotman School, admission to the program by direct entry may be approved for applicants with an appropriate bachelor's degree with high standing (a least an A- average in courses relevant to the discipline) from a recognized university.
- Applicants should provide:
  - transcripts from each post-secondary institution attended
  - a letter of intent for applying to the PhD program
  - an updated curriculum vitae (CV)
  - two reference letters
  - a valid GMAT or GRE score
  - proof of English-language proficiency, if applicable.

Program Requirements

- Students are expected to be qualified in the three basic disciplines essential to the study of management: economics, behavioural science, and quantitative analysis/statistics.
- Students in all fields normally complete **coursework in one field and two areas of study** during Years 1 and 2. In subsequent years of study, students concentrate on deepening knowledge through additional coursework and on generating unprecedented insights through research that culminates in a written doctoral thesis.
- **Coursework**. Students must complete a minimum of **6.5 full-course equivalents (FCEs)** to satisfy requirements for one field and two areas of study. Direct-entry students must complete 2.0 of the 6.5 FCEs within Year 1.
  - A minimum of 2.0 FCEs in the field. These will normally be taken from 3000-level Management courses, but additional courses from other departments may be required.
  - 2.0 FCE: courses in the two areas of study are usually taken in cognate departments. Each area of study comprises at least 1.0 FCE.
  - An additional 2.0 FCEs in any field related to the student's program of study.
  - Upon completion of the courses, students are expected to pass **comprehensive examinations** in the field.
  - Successful completion of the required course RSM3080H *Research Methods in Business* (0.5 FCE).
- A **thesis** embodying the results of original investigation must be submitted and defended at a **Doctoral Final Oral Examination** in accordance with the regulations of the School of Graduate Studies.
- During all years of study, students must maintain **residency**, whereby students are on campus full-time and consequently in geographical proximity to be able to participate fully in the University activities associated with the program.

Management, Tri-campus: Management PhD Courses

The department should be consulted at the onset of each session as to course offerings.

Courses Normally Restricted to PhD Students

RSM3001H	Research Methods in Strategic Management
RSM3002H	Advanced Topics in Strategy and Organization
RSM3003H	Advanced Topics in Strategy and Economics
RSM3005H+	Strategic Management Workshop
RSM3010H	Special Topics in the Economics of Technology and Innovation
RSM3011H	Advanced Topics in the Theory of Industrial Organization
RSM3012H	Advanced Topics in Urban and Real Estate Economics
RSM3013H	Workshop in Economics
RSM3020H	Financial Accounting: Theory and Empirical Research
RSM3021H	Managerial Accounting Research Methods
RSM3022H	Auditing Seminar
RSM3023H	Topics in Accounting Research
RSM3025H+	Workshop in Accounting
RSM3029H	Special Topics in Accounting
RSM3030H	Financial Theory I
RSM3031H	Financial Theory II

RSM3032H	Empirical Methods in Finance
RSM3033H	Current Topics in Finance
RSM3034H	Capital Markets Workshop
RSM3041H	Seminar in Operations Management
RSM3045H	Advanced Topics in Operations Management I
RSM3046H	Advanced Topics in Operations Management II
RSM3049H	Special Topics in Operations Management
RSM3051H	Marketing Theory I: Consumer Behaviour
RSM3052H	Marketing Theory II: Strategy
RSM3053H	Behavioural Research Methods in Marketing
RSM3054H	Current Topics in Consumer Behaviour
RSM3055H	Econometric Methods in Marketing
RSM3056H	Current Topics in Marketing Strategy
RSM3057H	Workshop in Marketing (Credit/No Credit)
RSM3058H	The Psychology of Judgement and Decision Making
RSM3060H	Advances in Human Resource Management
RSM3062H	Methods and Research in Organizational Behaviour
RSM3064H	Advanced Topics in Organizational Behaviour
RSM3065H	Meso Organizational Behaviour
RSM3066H	Quantitative Methods in the Applied Behavioural Sciences (prerequisite: RSM3062H)
RSM3067H	Organizational Behaviour and Human Resources Management Seminar
RSM3069H	Special Topics in Organizational Behaviour and Human Resources Management
RSM3080H	Research Methods in Business
RSM3090H	Reading Course in Approved Field
RSM3091H	Reading Course in Approved Field

MAccFin

Overview

The **Master of Accounting and Finance (MAccFin)** is the first program of its kind in North America. The MAccFin delivers a world-class, practical education experience that prepares students for designations in the finance sector (Chartered Financial Analyst) and the accounting profession (Chartered Professional Accountant). The MAccFin offers students a co-op internship to incorporate work experience into their academic studies. The program caters to students who seek to solve the multi-faceted issues that face today's business world.

Management, University of Toronto Scarborough: Management MAccFin

Master of Accounting and Finance

Program Description

The professional MAccFin degree program is offered over 16 months using a cohort-based model. In this four-session program, students must be registered full-time and complete a sequence of courses. This program begins in the Summer session.

The MAccFin program is designed for applicants who have not yet entered the workforce. These pre-experience applicants apply to the program immediately after completing their undergraduate degree. Applicants complete the School of Graduate Studies online admissions application and submit all official transcripts, two reference letters, and a resumé. Applicants must submit a supplemental application form to the Department of Management, UTSC.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the additional admission requirements stated below.
- An appropriate four-year undergraduate degree with a specialization in accounting or equivalent, with a minimum overall average of a mid-B in all core courses. Admission to the program is extremely competitive, and meeting the minimum overall average does not guarantee admission.
- Applicants whose primary language is not English and who graduated from a university where the language of instruction is not English must achieve:
  - A Test of English as a Foreign Language (TOEFL) score of at least 580 overall on the paper-based test and 5 on the Test of Written English (TWE); 100/120 on the Internet-based test and 22/30 on the writing and speaking sections.
  - In special circumstances, a minimum score of 7.0 on the International English Language Testing System (IELTS) may be considered for admission.

Program Requirements

- **Coursework**. Students must complete **8.5 full-course-equivalents (FCEs)*** as follows:
  - Session 1: Summer
    - MAF1001H *Advanced Topics in Financial Reporting* (0.5 FCE)
    - MAF1002H *Strategy, Governance and Management Accounting* (0.5 FCE)
    - MAF2001H *Economics and Quantitative Methods* (0.5 FCE)
    - MAF2002H *Advanced Corporate Finance* (0.5 FCE)
    - MAF2003H *Investment Analysis and Portfolio Management I* (0.5 FCE)
    - MAF4001H *Advanced Seminar in Accounting and Finance I* (Credit/No Credit, 0.0 FCE)
    - MAF5001H *Technical Update in Financial and Management Accounting* (Credit/No Credit, 0.0 FCE)
    - MAF5002H *Finance Capstone Course I* (Credit/No Credit, 0.0 FCE).
  - Session 2: Fall
    - MAF1003H *Advanced Topics in Assurance* (0.5 FCE)
    - MAF1004H *Advanced Taxation* (0.5 FCE)
    - MAF2004H *Financial Statement Analysis and Equity Valuation* (0.5 FCE)
    - MAF2005H *Derivatives* (0.5 FCE)
    - MAF2006H *Investment Analysis and Portfolio Management II* (0.5 FCE)
    - MAF3005H *Integration and Analysis: Critical Thinking and Decision Making I* (0.25 FCE)
    - MAF4002H *Advanced Seminar in Accounting and Finance II* (Credit/No Credit, 0.0 FCE)
    - MAF5003H *Finance Capstone Course II* (Credit/No Credit, 0.0 FCE)
  - Session 3: Winter
    - MAF4000H *Co-op Internship* (0.5 FCE)
  - Session 4: Summer
    - MAF1005H *Current Issues in Accounting and Assurance* (0.5 FCE)
    - MAF2007H *Fixed Income* (0.5 FCE)
    - MAF3001H *Leadership in the 21st Century* (0.25 FCE)
    - MAF3002H *Strategy, Business Development and Sales* (0.25 FCE)
    - MAF3003H *Business Data Analytics* (0.5 FCE)
    - MAF3004H *Integration and Analysis: Board Report* (0.5 FCE)
    - MAF3006H *Integration and Analysis: Critical Thinking and Decision Making II* (0.25 FCE)
    - MAF5004H *Integrated Case Writing* (Credit/No Credit, 0.0 FCE)

* A final grade below 70% in any course equates to an FZ, which is an insufficient grade. A MAccFin student who receives a final grade of FZ will be recommended for termination of registration from the MAccFin program.

Overview

The Institute for Management & Innovation (IMI) is a hub that fosters inter- and transdisciplinary research and scholarship in the area of innovations of human, social, and organizational processes and transformational leadership, and develops high-calibre programs that are informed by and reflective of these activities. IMI produces transformational leaders with breadth and depth in one or more chosen fields of science, social science, humanities, and the professions and a focus on innovation as it applies to human interaction and relationships with society and technology, all closely linked to the external community.

IMI provides students with a platform to explore their scholarship in an environment that introduces them to different forms of analyses and critical thinking, solidifying their understanding of the questions and issues at hand. At the heart of IMI is a dedication to experiential education and work-integrated learning in academic programming. IMI offers professional master's programs in professional and forensic accounting, biotechnology, innovation management, urban innovation, and sustainability, and an undergraduate minor in business, science, and entrepreneurship. IMI is also home to the BIGDataAIHUB and executive education (IMIx) and entrepreneurship support (ICUBE) programs.

Management & Innovation: Non-program Elective Courses

Institute for Management & Innovation

The following courses may be taken as electives by students enrolled in any U of T graduate program.

IMI1001H	Innovation and Entrepreneurship
IMI2001H	Special Topics in Management and Innovation
IMI3001H[+]	Biocommercialization I
IMI3003H	Biocommercialization II (Recommended co-requisite: IMI3001H. Exclusion: IMI3001H if completed before 2020-21.)

[+] *Extended course. For academic reasons, coursework is extended into session following academic session in which course is offered.*

Management & Innovation: Biotechnology MBiotech

Master of Biotechnology

Program Description

The MBiotech is a 24-month interdisciplinary, course-based professional degree program. Students come from various science and/or engineering backgrounds with the common goal of pursuing a career in the biotechnology, medical device, and pharmaceutical industries.

The program meets the evolving needs of students and this global industry sector. Faculty and instructors from various University of Toronto Faculties, biotechnology and pharmaceutical industries, and governmental agencies provide a truly interdisciplinary learning experience. Introductory laboratory courses and a year-long work internship round out the broad-based learning environment.

The program is a full-time, course-based master's degree which is launched in May each year.

Field: Biopharmaceutical

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Institute for Management & Innovation's additional admission requirements stated below.
- An appropriate bachelor’s degree from a recognized university in any area of biological sciences, chemistry, engineering, or related field with a minimum mid-B standing in the final two years of study.
- Applicants who have completed their studies outside of Canada must also submit their Graduate Record Examination (GRE) Subject Test scores and meet the SGS minimum standards for English proficiency.
- The MBiotech program also evaluates applicants on their letter of intent, CV, three references, and both a science and business interview.

Program Requirements

- Students must complete **9.5 graduate full-course equivalents (FCEs)** over a 24-month period:
  - 4.5 FCEs in MBiotech courses (includes credits for Seminar and Work Term Placement)
  - 3.5 FCEs in Biopharmaceutical courses
  - 1.5 FCEs in elective courses.
- An ongoing **seminar series** led by university, industry, and government specialists links all the participants with the academic, practical, and applied aspects of the program.

Program Length

6 sessions full-time (typical registration sequence: S/F/W/S/F/W)

Time Limit

3 years full-time

Required Courses

A general description of each required course is posted on the Biotechnology website.

BTC1600H	Biopartnering I
BTC1610H	Biopartnering II
BTC1700H	Molecular Biology Laboratory
BTC1710H	Biomaterials and Protein Chemistry Theory

Management & Innovation: Forensic Accounting MFAcc

Master of Forensic Accounting

Admissions to the advanced-standing option of this program have been administratively suspended.

Program Description

The Master of Forensic Accounting (MFAcc) has been designed to provide graduates with the most thorough and rigorous preparation available in the investigative and forensic accounting field. Consequently, MFAcc graduates are expected to become recognized as the foremost forensic professionals in their chosen fields, whether those are in forensic accounting practice; in compliance functions in banks, insurance companies, and brokerages; business valuation; fraud investigation in law enforcement; securities enforcement; or in international forensic roles for the World Bank, the United Nations and its programs, and others.

MFAcc Program (Two-Year)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Institute for Management and Innovation's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university in commerce, business administration, or accounting, with standing equivalent to at least a University of Toronto mid-B in the final year.
- Two years of relevant experience in business.
- Submission of an official MFAcc application via the SGS online application system.

Program Requirements

- Completion of a total of **5.0 required full-course equivalents (FCEs)** or 10 half courses, taken sequentially.
- This is a part-time program which uses a combination of a one-week intensive in-residence session and e-learning modules with group discussions, assignments, and formal examinations. It is possible for students to participate from anywhere in the world.

Program Path

Year 1: Fall

IFA1900H	Forensic Accounting and Investigation, Fraud and Cybercrime
IFA1905H	Fraud Prevention, Risk Assessment and Investigation, Data Analytics and Security

Year 1: Winter

IFA1906H	Money Laundering, Asset Tracing and Recovery, and International Aspects of Fraud
IFA1901H	Forensic Accounting Professional and Practice Issues

Year 1: Summer

IFA1907H	Legal and Legal Process Issues for Forensic Accountants

Year 2: Fall

IFA2900H	Loss Quantification
IFA2905H	Advanced Forensic Investigation and Psychological Aspects of White Collar Crime

Year 2: Winter

IFA2906H	Business Valuation, Bankruptcy and Insolvency, and Advanced Loss Quantification
IFA2903H	Research Project on Emerging Issues/Advanced Topics

Year 2: Summer

IFA2904H	Integrative Capstone

Program Length

6 sessions part-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

6 years part-time

MFAcc Program (Eight-Month Advanced-Standing Option)

Admissions have been administratively suspended.

Minimum Admission Requirements

- Only applicants who graduated from the University of Toronto's graduate Diploma in Investigative & Forensic Accounting (DIFA) program are eligible to apply. Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Institute for Management & Innovation's additional admission requirements stated below.
- Submission of an official MFAcc application via the SGS online application system.
- Two letters of reference.

Program Requirements

- **Coursework.** Students must successfully complete **2.0 full-course equivalents (FCEs)** in required courses as follows:
  - 0.5 FCE: IFA1905H involves weekly online sessions, beginning in January for nine weeks
  - 0.5 FCE: IFA1906H involves weekly online sessions, beginning in March for nine weeks
  - 0.5 FCE: IFA2905H involves weekly online and residency sessions, beginning in May*
  - 0.5 FCE: IFA2906H involves weekly online and residency sessions, beginning in June*

*Involves an intensive, mandatory six-day in-residence session, held in August at the University of Toronto Mississauga.

Program Length

2 sessions part-time (typical registration sequence: W/S)

Time Limit

2 years part-time

Management & Innovation: Forensic Accounting MFAcc Courses

Required Courses

Year 1

IFA1900H	Forensic Accounting and Investigation, Fraud and Cybercrime
IFA1901H	Forensic Accounting Professional and Practice Issues
IFA1905H	Fraud Prevention, Risk Assessment and Investigation, Data Analytics and Security
IFA1906H	Money Laundering, Asset Tracing and Recovery, and International Aspects of Fraud
IFA1907H	Legal and Legal Process Issues for Forensic Accountants

Year 2

IFA2900H	Loss Quantification
IFA2903H	Research Project on Emerging Issues/Advanced Topics

Management & Innovation: Management & Professional Accounting MMPA

Master of Management & Professional Accounting

Program Description

The Master of Management & Professional Accounting (MMPA) program is designed to educate future leaders of the accounting profession at the master's level in management and at the professional level in accounting and related subjects. The curriculum is organized to provide an excellent understanding of:

- the challenges, functions, and needs of management;
- accounting, finance, auditing, and tax;
- essential professional subjects;
- management skills; and
- professional capabilities.

Students from any undergraduate background may apply. The MMPA is offered as a 27-month program, a 24-month advanced-standing option, and a 12-month advanced-standing option.

MMPA Program (27-Month)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Institute for Management and Innovation's additional admission requirements stated below.
- An appropriate bachelor's degree with a standing equivalent to at least a University of Toronto mid-B.
- Satisfactory Graduate Management Admission Test (GMAT) score. Note: the GMAT requirement will be waived for applicants who meet the following criteria:
  - have studied for four years at a North American university and graduated with a four-year degree, or
  - have graduated from one of the following programs: the University of Toronto Mississauga's BCom (Accounting specialist), the Rotman School's BCom (Accounting specialist), or the University of Toronto Scarborough's BBA (specialist in Management and Accounting).
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must also demonstrate proficiency in English. See General Regulations section 4.3 for requirements.

Program Requirements

The program runs for 27 months covering seven sessions of full-time study.

- **Coursework**. Students must successfully complete a total of **18.0 full-course equivalents (FCEs)** in required courses, as listed below.
- **Co-op work placements**. Students will also complete two co-op work placements (MGT1090H and MGT2090H) in accounting or finance-related areas.

Required Course List

Notations for all courses are indicated in parentheses following the course code and are determined as follows:

Credit Hours	Notation
0	CR/NCR (Credit/No Credit)
1	one module
2	two modules
3	three modules

One module equals five weeks with three contact hours per week. One module equals 0.25 FCE.

MGT1090H(0)+	Accounting Work-Term Course I
MGT1160H(1)	Communications
MGT1181H(1)	Introduction to Integration and Professional Decision Making
MGT1202H(2)	Ethics and Governance
MGT1210H(2)	Managerial Economics
MGT1211H(2)	Economic Environment of Business
MGT1221H(2)	Financial Accounting I
MGT1222H(2)	Managerial Accounting
MGT1241H(2)	Operations Management
MGT1250H(2)	Marketing
MGT1272H(2)	Management Information Systems
MGT1301H(3)	Fundamentals of Strategic Management
MGT1323H(3)	Auditing and Reporting
MGT1330H(3)	Business Finance
MGT1362H(3)	Managing People in Organizations
MGT1382H(3)	Statistics for Management
MGT2004H(2)	Advanced Concepts in Strategic Management
MGT2014H(2)	The Legal Environment of Professions and Corporations
MGT2090H(0)+	Accounting Work-Term Course II
MGT2200H(1)	Government and Not-for-Profit Accounting, Reporting, and Control
MGT2205H(3)	Advanced Financial Accounting
MGT2206H(3)	Taxation I

MGT2207H(3)	Taxation II
MGT2224H(2)	Computer Auditing
MGT2225H(2)	Advanced Auditing Topics
MGT2250H(3)	Financial Reporting I
MGT2251H(3)	Financial Reporting II
MGT2260H(2)	Management Control
MGT2261H(2)	Advanced Management Accounting
MGT2280H(2)	Accounting Theory and Research
MGT2281H(1)	Mergers, Acquisitions, and Valuations
MGT2282H(1)	Integration and Professional Decision Making Initiatives I
MGT2283H(1)	Integration and Professional Decision Making Initiatives II
MGT2284H(1)	Capstone — Integrative Board Report
MGT2285H(1)	Integration and Professional Decision Making Initiatives III
MGT2286H(1)	Integration and Professional Decision Making Initiatives IV
MGT2301H(2)	Financial Management

Plus the following elective:

MGT2208H(1)	Taxation III

Program Length

7 sessions full-time (typical registration sequence: S/F/W/S/F/W/S)

Time Limit

3 years

MMPA Program (24-Month Advanced-Standing Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Institute for Management & Innovation's additional admission requirements stated below.
- An appropriate bachelor's degree with a standing equivalent to at least a University of Toronto mid-B.
- Satisfactory Graduate Management Admission Test (GMAT) score. Note: the GMAT requirement will be waived for applicants who meet the following criteria:
  - have studied for four years at a North American university and graduated with a four-year degree, or
  - have graduated from one of the following programs: the University of Toronto Mississauga's BCom (Accounting specialist), the Rotman School's BCom (Accounting specialist), or the University of Toronto Scarborough's BBA (specialist in Management and Accounting).
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must also demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- Applicants who have previously completed MGT1210H, MGT1211H, MGT1221H, MGT1222H, MGT1250H, and MGT1382H, or equivalent, with a grade of B- or better, may be eligible for admission to the 24-month option.

Program Requirements

The program runs for 24 months, covering six sessions of full-time study, as follows:

- **Coursework**. Students must successfully complete a total of **14.75 full-course equivalents (FCEs)** in required courses, as follows: MGT1160H, MGT1181H, MGT1202H, MGT1241H, MGT1272H, MGT1301H, MGT1323H, MGT1330H, MGT1362H, MGT2004H, MGT2014H, MGT2200H, MGT2205H, MGT2206H, MGT2207H, MGT2208H, MGT2224H, MGT2225H, MGT2250H, MGT2251H, MGT2260H, MGT2261H, MGT2280H, MGT2281H, MGT2282H, MGT2283H, MGT2284H, MGT2285H, MGT2286H, and MGT2301H.
- **Co-op work placements**. Two co-op work placements (MGT1090H and MGT2090H) in accounting or finance-related areas.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years

MMPA Program (12-Month Advanced-Standing Option)

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Institute for Management & Innovation's additional admission requirements stated below.
- An appropriate bachelor's degree with a standing equivalent to a University of Toronto B+.
- Satisfactory Graduate Management Admission Test (GMAT) score. Note: the GMAT requirement will be waived for applicants who meet the following criteria:
  - have studied for four years at a North American university and graduated with a four-year degree, or

    - have graduated from one of the following programs: the University of Toronto Mississauga's BCom (Accounting specialist), the Rotman School's BCom (Accounting specialist), or the University of Toronto Scarborough's BBA (specialist in Management and Accounting).
- Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must also demonstrate proficiency in English. See General Regulations section 4.3 for requirements.
- Applicants from a BCom (Accounting specialist) program, with a CGPA of B+ or higher, who have previously completed MGT1210H, MGT1211H, MGT1221H, MGT1222H, MGT1272H, MGT1323H, MGT1330H, MGT1382H, MGT2014H, MGT2205H, MGT2206H, MGT2207H, MGT2224H, MGT2225H, MGT2250H, MGT2251H, MGT2260H, MGT2261H, and MGT2301H, or equivalent, with a grade of B- or better, may be eligible for admission to the 12-month option.
- Applicants to the 12-month option must have completed the courses listed while in a program accredited by the Chartered Professional Accountants of Canada.

Program Requirements

The program runs for 12 months, covering three sessions of full-time study, as follows:

- **Coursework**. Students must successfully complete a total of **6.5 full-course equivalents (FCEs)** in required courses as follows: MGT1160H, MGT1181H, MGT1202H, MGT1241H, MGT1250H, MGT1301H, MGT1362H, MGT2004H, MGT2200H, MGT2208H, MGT2280H, MGT2281H, MGT2282H, MGT2283H, MGT2284H, MGT2285H, and MGT2286H.
- **Co-op work placement**. One co-op work placement (MGT2090H) in accounting or finance-related areas taken in the Winter session.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years

Management & Innovation: Management of Innovation MMI

Master of Management of Innovation

Program Description

The Master of Management of Innovation (MMI) program is designed for students with a background in science and engineering. It is an accelerated 12-month professional degree for individuals pursuing management careers in technology-focused organizations. The MMI curriculum provides a strong foundation in economic analysis, technology management, business strategy, finance, accounting, marketing, and policy. The required academic nine core courses focus on management and economics, and students select three electives tailored to their interests and goals. A four-month mandatory internship requirement allows students to gain valuable, real-world work experience and an opportunity to demonstrate the key competencies they learn in the MMI program.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Institute for Management and Innovation's additional admission requirements stated below.
- Bachelor's degree in sciences or engineering or equivalent from a recognized university. Minimum overall average grade of B+ over the last two years of full-time academic study.
- Prerequisites or their equivalents are set by the MMI program.
- Resumé/curriculum vitae (CV), two pages maximum.
- Letter of intent outlining the applicant's interest in Management and Innovation, one page (750 words).
- Two academic letters of reference must be submitted by the applicant (or at least one academic and one professional reference). One reference must be provided directly from a faculty member familiar with the applicant's work and who holds an appointment in the program where the applicant most recently graduated.
- Applicants who obtained a degree outside North America must submit a competitive GMAT or GRE (General) examination result to be sent to the department.
- An on-site written personal statement.
- Attend an interview where fit, problem-solving capabilities and communication skills are assessed.

Program Requirements

- The 12-month program consists of an intensive 8-month core academic curriculum followed by a 4-month internship:
    - **Coursework**. 6.0 full-course equivalents (FCEs) as follows:
        - 4.5 FCEs in required courses (see list below)
        - 1.5 FCEs in electives (0.5 FCE in the Fall session and 1.0 FCE in the Winter session)
    - **Internship**: 0.5 FCE: MMI1100H *MMI Internship*.

Program Length

3 sessions full-time (typical registration sequence: F/W/S)

Time Limit

3 years full-time

Management & Innovation: Management of Innovation MMI Courses

Required Core Courses

MMI1010H	Prices and Markets
MMI1020H	Introduction to Big Data Analysis
MMI1030H	Marketing Science
MMI1040H	Accounting
MMI1050H	Negotiations
MMI1060H	Finance
MMI1070H	Economics of Business Strategy
MMI1080H	Management of Technology
MMI1090H	Technology, Strategy, and Policy
MMI1100H	MMI Internship

Elective Courses

Students are encouraged to select electives that allow them to focus on their individual areas of interest. For this reason, the MMI program does not impose a selection of electives. Students are free to choose from all graduate courses across all disciplines at the University of Toronto. All selections are subject to approval in advance by the Program Director.

Management & Innovation: Sustainability Management MScSM

Master of Science in Sustainability Management

Program Description

The Master of Science in Sustainability Management (MScSM) is an interdisciplinary, course-based professional program. The program provides education that integrates knowledge from management, social, and natural sciences to address sustainability issues. The MScSM provides a strong foundation in sustainability management while offering an opportunity to specialize in a management or science concentration. The program is designed for students from diverse educational backgrounds such as management, social science, natural science, and engineering. The program was developed in consultation with leaders and prospective employers in business, non-profit, research, and government organizations.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Institute for Management and Innovation's additional admission requirements stated below.
- An appropriate undergraduate degree from a recognized university in any area of natural science, social science, management, and engineering or any management, environment, or natural resource-driven background with a standing equivalent to at least a mid-B in the final year of the program.
- Successful completion of an undergraduate statistics or mathematics course (0.5 full-course equivalent [FCE] or equivalent).
- Resumé/curriculum vitae (CV).
- Letter of intent outlining the applicant's interest in sustainability issues (750 words).

Program Requirements

Management Concentration

- **Coursework**. Students must complete a total of **9.0 FCEs** as follows:
  - 6.5 FCEs (11 required courses) including:
    - SSM1090H *Capstone Course* and
    - SSM1100Y *Research Paper I* or SSM1101Y *Research Paper II*
  - 2.5 FCEs (5 elective courses) selected by chosen concentration as follows:
    - 2.0 FCEs from the Management elective courses
    - 0.5 FCE from the Science elective courses.
- **Internship**. A summer internship placement (two to four months).

Science Concentration

- **Coursework**. Students must complete a total of **9.0 FCEs** as follows:
  - 6.5 FCEs (11 required courses) including:
    - SSM1090H *Capstone Course* and
    - SSM1100Y *Research Paper I* or SSM1101Y *Research Paper II*
  - 2.5 FCEs (5 elective courses) selected by chosen concentration as follows:
    - 2.0 FCEs from the Science elective courses
    - 0.5 FCE from the Management elective courses.
- **Internship**. A summer internship placement (two to four months).

Program Path

Year 1: Fall

SSM1010Y	Principles of Sustainability Management
SSM1020H	Decision Making for Sustainability Management
SSM1050H	Ecosystem Science
SSM1060H	Managing Sustainable Organizations

Year 1: Winter

SSM1030H	Environmental Science
SSM1040H	Managerial Economics for Sustainability Management
SSM1070H	Sustainability Law and Policy
SSM1080H	Strategies for Sustainability Management
SSM1120H	Social Dimensions of Sustainability

Year 1: Summer

SSM1110H	Sustainability Management Internship

Year 2: Fall

SSM1100Y or SSM1101Y	Research Paper I or Research Paper II
Plus 1.5 FCE elective	

Year 2: Winter

SSM1090H	Capstone Course — Sustainable Enterprise
SSM1100Y or SSM1101Y	Research Paper I or Research Paper II
Plus 1.0 FCE elective	

Program Length

5 sessions full-time (typical registration sequence: F/W/S/F/W)

Time Limit

3 years full-time

Management & Innovation: Sustainability Management MScSM Courses

Required Courses

SSM1010Y	Principles of Sustainability Management
SSM1020H	Decision Making for Sustainability Management
SSM1030H	Environmental Science
SSM1040H	Managerial Economics for Sustainability Management
SSM1050H	Ecosystem Science
SSM1060H	Managing Sustainable Organizations
SSM1070H	Sustainability Law and Policy
SSM1080H	Strategies for Sustainability Management
SSM1090H	Capstone Course — Sustainable Enterprise
SSM1100Y or SSM1101Y	Research Paper I or Research Paper II
SSM1120H	Social Dimensions of Sustainability

Elective Courses

Course selections need to be approved in advance by the Program Director.

Science Electives

EES1117H	Climate Change and Impact Assessment
EES1125H	Contaminated Site Remediation
ENV1002H	Environmental Policy
ENV1704H	Environmental Risk Analysis and Management
SSM2030H	Advanced Sustainability Management
SSM2050H	Special Topics in Sustainability

Management Electives

EES1124H	Environmental Project Management
ENV1707H	Environmental Finance and Sustainable Investing
RSM2918H	Multidisciplinary Special Topics
SSM2010H	Marketing in Sustainability Management
SSM2020H	Sustainability Ethics
SSM2040H	Applied Sustainability Management
SSM2050H	Special Topics in Sustainability

Management & Innovation: Investigative & Forensic Accounting DIFA

Diploma of Investigative & Forensic Accounting

Admissions have been administratively suspended. The program will close on April 30, 2022.

Program Description

The Diploma of Investigative Forensic Accounting (DIFA) program provides a rigorous and comprehensive education in investigative and forensic accounting (IFA) matters useful in becoming an expert IFA consultant, practitioner, and expert witness in legal proceedings. Expertise may include financial matters related to investigation for fraud, calculation of damages, advice in disputes, and preparation and delivery of information to the courts. For students who are graduate professional accountants, the diploma program is recognized as an excellent educational preparation for recognition as an expert in IFA.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Institute for Management and Innovation's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university in commerce, business administration, or accounting, with standing equivalent to at least a University of Toronto mid-B in the final year.
- Two years of relevant experience in accounting.
- An advanced-standing option is available for qualified students with comparable university-level or Chartered Business Valuator program courses.

Program Requirements

- **Coursework**. **5.0 full-course equivalents (FCEs)** (ten half-courses) over a minimum 2.2-year period. Courses are taken sequentially and advanced-standing course exemptions are possible. The program is offered using a combination of two one-week intensive in-residence sessions, e-learning, and teleconference modules, with group discussions, assignments, and formal examinations. It is possible for students to participate from anywhere in the world.
- Advanced standing is available for qualified students; up to two courses in loss quantification and law may be counted.

Program Length

6 sessions (26 months) part-time

Time Limit

6 years part-time

Management & Innovation: Investigative & Forensic Accounting DIFA Courses

Admissions have been administratively suspended.

IFA1900H	Forensic Accounting and Investigation, Fraud, and Cybercrime
IFA1901H	Forensic Accounting Professional and Practice Issues
IFA1902H	Legal Process — Introductory
IFA1903H	Investigative-Related Matters — Introductory
IFA1904H	Loss Quantification — Introductory
IFA2900H	Loss Quantification
IFA2901H	Investigative-Related Matters — Advanced
IFA2902H	Legal Process — Advanced
IFA2903H	Research Project on Emerging Issues/Advanced Topics
IFA2904H	Integrative Capstone

The courses IFA1900H and IFA2904H each involve a mandatory in-residence session at the University of Toronto Mississauga. IFA2904H requires participation in moot court and other experiential learning sessions. The remaining eight courses are offered via weekly online sessions.

Management & Innovation: Master of Urban Innovation MUI

Master of Urban Innovation

Program Description

The Master of Urban Innovation (MUI) is a full-time, professional program that will encompass studies in urban economic development, community capacity building, innovation management, local and regional governance, urban sustainability, and real estate development for innovation. The MUI will complement the suite of programs in management, innovation, and sustainability currently offered in the Institute for Management & Innovation and will build on the strengths of other key academic units at UTM, including the Departments of Geography, Economics, and Political Science, and the Institute of Communication, Culture, Information and Technology.

The objective of the MUI program is to respond to the growing job opportunities that exist for professionals trained in the fields of urban economic development and innovation through a cross-disciplinary approach. Upon graduation, MUI students will have acquired the analytical tools to enable them to produce effective economic development policies and plans, including a detailed knowledge of strategic management techniques, the role of real

estate markets in local economic development, and critical tools for financial analysis.

Minimum Admission Requirements

- Applicants are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Institute for Management & Innovation's additional admission requirements stated below.
- An appropriate bachelor's degree from a recognized university in social sciences, management/commerce, or a related field such as architecture or civil engineering, with a standing equivalent to a mid B in the final year of the program.
- Successful completion of 0.5 full-course equivalent (FCE) in an undergraduate statistics course.
- Letter of intent.
- Three letters of reference.
- A writing sample.

Program Requirements

- Students must complete a total of **9.5 FCEs** as follows:
  - 4.5 FCEs from core courses (MUI1010H, MUI1020H, MUI1030H, MUI1040H, MUI1050H, MUI1060H, MUI1075H, MUI1080H, MUI1090H)
  - 0.5 FCE summer internship (MUI1100H)
  - 1.0 FCE capstone group project (MUI2095Y)
  - 3.5 FCEs chosen from the elective course list below. Students are also strongly encouraged to select other electives not included in the list below. Course selections must be approved in advance by the program.

Program Length

6 sessions full-time (typical registration sequence: F/W/S/F/W/S)

Time Limit

3 years full-time

Management & Innovation: Master of Urban Innovation MUI Courses

Required Core Courses

Students will complete 6.0 required full-course equivalents [FCEs].

MUI1010H	Introduction to Management of Urban Innovation
MUI1020H	Civic Engagement and Economic Development
MUI1030H	Urban and Regional Economic Development Theory
MUI1040H	Socially Sustainable Cities: Theory, Policy, and Practice
MUI1050H	Urban Politics
MUI1060H	Local and Regional Government: Management and Policymaking
MUI1075H	Digital Cities
MUI1080H	Economic Development Planning
MUI1090H	Technology, Strategy, Policy
MUI1100H	Summer Internship
MUI2095Y	Capstone Course

Elective Courses

Students will complete 3.5 elective FCEs.

MUI students can take any of the following courses as part of fulfilling the program's elective requirement. Students are also strongly encouraged to select other electives not included in the list below, that will align well with their career goals and interests, subject to the pre-approval of the program. It is recommended that students consult with the program on their elective course options during Year 1. Available course offerings are subject to change.

GGR1610H	Geography of Finance and Financial Crisis
GLA2018H	Innovation and the City
IMI2001H	Special Topics in Management and Innovation
JMG2020H	Big Data
JPG1512H	Place, Politics, and the Urban
JPG1558H	The History and Geography of Cycles and Cycling
JPG1607H	Geography of Competition
MUI2010H	Sectoral Analysis
MUI2020H	Microeconomics of Competitiveness
MUI2030H	Planning for Jobs: Labour Market Transformations and Employment in 21st Century Cities
MUI2040H	Real Estate Development
MUI2050H	The Economics of Cities and Regions: Productivity, Technology, and Jobs
MUI2055H	Cities, Industry, and the Environment
MUI2060H	Comparative Urban Politics
MUI2070H	Planning and Governing the Metropolis
MUI2080H	Intelligent Communities/Smart Cities
MUI2090H	Public Finance in Canadian Cities
PLA1801H	Urban Infrastructure Planning

POL2394H	Innovation and Knowledge Transfer in City Regions
RSM2132H	Business and the City
SSM2010H	Marketing in Sustainability Management
SSM2020H	Sustainability Ethics
SSM2030H	Advanced Sustainability Management
SSM2040H	Applied Sustainability Management

Collaborative Specializations

The following collaborative specialization is available to students in participating degree programs as listed below:

- Biomedical Engineering
  - Materials Science and Engineering, MASc, PhD

Overview

Climate change, energy availability, and resource depletion are today's global challenges. The Department of Materials Science and Engineering (MSE) is at the forefront of addressing these issues. MSE's research, education, and applications expertise in advanced materials engineering enables the development of new and sustainable technologies, creating innovative solutions for the global environment. As a world leader in materials applications and processing, the department's commitment to excellence fosters innovative thinking in its students, leading to the development of brilliant minds and ideas that make a global impact.

MSE research and studies address the general problem of understanding structure-property-processing-performance relationships in materials. Materials science subjects focus on the structure, properties, and application of advanced materials in areas such as: Advanced Manufacturing & Coating Techniques; Adaptive Materials; Biomaterials & Biotechnology; Computational Materials Engineering; Electronic Materials & Systems; Materials Fracture & Failure; Nanomaterials & Nanotechnology; Optoelectronics; Photovoltaics; Process Metallurgy; Surface Engineering; and Sustainable Mineral & Materials Processing.

Leading-edge research facilities house 11 electron microscopy and surface characterization instruments in the Ontario Centre for the Characterization of Advanced Materials (OCCAM) and five new analytical instruments in the Walter Curlook Materials Characterization & Processing Laboratory, where graduate students learn from world-renowned researchers.

MSE: Materials Science and Engineering MASc

Master of Applied Science

Program Description

The MASc program provides students with an opportunity to pursue advanced study and research with the guidance of experts in their respective fields. Studying in a chosen area of specialty and developing skills through hands-on experience in the MSE world-class labs provides students with the ability to either pursue PhD studies or to move out into industry with enriched skills and knowledge. This full-time program demands commitment and passion for research in materials engineering. For those interested in continuing to PhD-level research, successful completion of the MASc is the normal route.

Minimum Admission Requirements

- Students are admitted under the General Regulations of the School of Graduate Studies. Applicants must also satisfy the Department of Materials Science and Engineering's additional admission requirements stated below.
- For students whose primary language is not English, the department requires a Test of English as a Foreign Language (TOEFL) with the following minimum scores:
  - paper-based TOEFL: minimum score of 580 and 4 on the Test of Written English (TWE)
  - Internet-based TOEFL: minimum score of 93/120 and 22/30 on the writing and speaking sections.

Program Requirements

- **Coursework.** The program of study normally includes 2.0 full-course equivalents (FCEs) (four half courses), including:
  - MSE1000H[0], the mandatory weekly *Graduate Research Seminar MASc* (0.5 FCE)
  - three half courses (1.5 FCEs), one of which must be chosen from the list of MSE graduate course offerings.
- JDE1000H *Ethics in Research*, a non-credit graduate **ethics seminar** (0.0 FCE).
- The required **thesis** is based upon research work carried out in the department. The thesis must be presented at an **oral examination**.
