Mission Statement

The mission of the School of Graduate Studies is to promote excellence in graduate education and research University-wide and ensure consistency and high standards across the divisions. Sharing responsibility for graduate studies with graduate units and divisions, and operating through a system of collegial governance, consultation and decanal leadership, SGS defines and administers university-wide regulations for graduate education. SGS also provides expertise, advice and information; oversees the design and delivery of programs; organizes reviews and develops performance standards; supports diversity, equity, fairness, and ethical conduct in graduate education; assists graduate units in their efforts to provide career opportunities for graduates; organizes services and financial assistance to graduate students; encourages a close and positive relationship between research and graduate instruction; and represents the cause of graduate education at the University of Toronto in the wider academic and general community. Finally, SGS is involved directly in the oversight of teaching and research as well as having operational responsibility for interdisciplinary and interdivisional centres and institutes.
Dean's Welcome

I am delighted to welcome you to the graduate community at the University of Toronto - an extraordinary collection of scholars by any measure, we believe. At the School of Graduate Studies, my colleagues and I are proud of our accomplishments as a major centre for advanced research and graduate training. We have approximately 4,000 graduate faculty and 11,000 full-time and part-time graduate students. Our size permits us to provide students with a range of program choice and diversity of activities unmatched by smaller institutions. As well, we believe we are able to achieve the benefits of size without sacrificing the qualities of community. Our faculty are actively engaged in research and many receive international recognition for their contributions. Graduate initiatives range from major research projects in the humanities to our internationally renowned research centres and institutes.

Our graduate programs and our first-class research facilities attract students from across North America and around the world. Overall, the close association of research and graduate training is the hallmark of our enterprise and the ideal preparation for our students to participate fully in the dynamic world of new ideas and technologies.

This calendar presents information about graduate programs at the University of Toronto. More information is available on our Web site at www.sgs.utoronto.ca or directly from the graduate unit in which you are interested.

Best wishes for academic success.

Michael R. Marrus
Dean
School of Graduate Studies
About this Calendar

The School of Graduate Studies Calendar is published annually in July. A subset of its material is contained in a slimmer volume known as the School of Graduate Studies Handbook, which is distributed to registered students.

The complete calendar is posted on the SGS Web site at www.sgs.utoronto.ca. Printed copies of the calendar may be purchased using the online order form on the SGS Web site or in person from the SGS office at 63 St. George Street.

CALENDAR

The School of Graduate Studies Calendar describes the broad range of graduate study opportunities available at the University of Toronto. It also contains policies and procedures related to graduate studies.

The calendar is divided into eight sections. The term “graduate unit” refers to a department, centre, or institute.

Section 1
General Regulations outlines admission, registration, enrolment, grading, and graduation policies and procedures. Selected codes and policies established by the University are also featured in this section.

Section 2
Degree Regulations discusses general admission and degree requirements for programs offered by more than one graduate unit at the University. Specialized programs not mentioned in this section are described in the entry for the specific graduate unit offering the program.

Section 3
Fees schedules, types of fees, and fees for graduate student categories are explained.

Section 4
Financial Support and Exchange Programs describes awards, fellowships, and bursaries available to graduate students. They are organized by granting category. The section concludes with a list of student exchange programs.

Section 5
General Information outlines University services available to enhance graduate life at U of T. Look for student housing information in this section.

Section 6
Course Codes, established by the graduate units to identify their courses, are listed in this section. Joint course designators beginning with the letter “J” identify courses shared by two or more units.

Section 7
Graduate Faculty with appointments as full members and members emeriti are listed alphabetically, together with their home unit affiliation. Associate members are listed in the individual departmental entries in section 8.

Section 8
Graduate Programs. The largest component of the calendar features a comprehensive list of programs offered by the University’s graduate units. Each entry contains valuable information about admission and program requirements as well as courses of instruction. Faculty appointed to the graduate unit are listed by category. For additional details about a graduate program, visit the unit’s Web site and/or consult the department’s handbook.

HANDBOOK

The School of Graduate Studies Handbook is published annually for distribution to registered graduate students. The Handbook is a subset of the School of Graduate Studies Calendar and contains the complete contents of the calendar except for Section 8, Graduate Programs.

Students can access Section 8 on the SGS Web site at www.sgs.utoronto.ca where the complete calendar is posted. Each program entry contains a direct link to the graduate unit’s Web site where more details are available. Some departments publish graduate handbooks which are another source of valuable information.
Important Notices

Changes in programs of study and/or courses
The 2003/2004 School of Graduate Studies Calendar is effective for the academic period September 1, 2003 to August 31, 2004. References in the calendar to current academic year refer to this period.

The programs of study described by the calendar are available for the years to which the calendar applies. They may not necessarily be available in later years. If the University or the School must change the content of programs of study or withdraw them, all reasonably possible advance notice and alternative instruction will be given. However, the University will not be liable for any loss, damages, or other expenses that such changes might cause.

For each program of study offered by the University through the School, the courses necessary to complete the minimum requirements of the program will be made available annually. However, we reserve the right otherwise to change the content of courses, instructors and instructional assignments, enrolment limitations, prerequisites and co-requisites, grading policies, requirements for promotion, and timetables without prior notice.

Regulations and policies
The University has several policies that are approved by the Governing Council and which apply to all students. Each student must become familiar with the policies. The University will assume that the student has done so. The rules and regulations of the School are displayed here. Applicable University policies are either fully or partially displayed here or listed here.

In applying to the School, the student assumes certain responsibilities to the University and the School, and, if admitted and registered, shall be subject to all rules, regulations and policies cited here, as amended from time to time.

Enrolment limitations
The University makes every reasonable effort to plan and control enrolment to ensure that all students are qualified to complete the programs to which they are admitted, and to strike a practicable balance between enrolment and available instructional resources. Sometimes such a balance cannot be struck and the number of qualified students exceeds the instructional resources that can reasonably be made available while at the same time maintaining the quality of instruction. In such cases, the University reserves the right to limit enrolment in the programs, courses, or sections listed in the calendar, and to withdraw courses or sections for which enrolment or resources are insufficient. Notice and alternative instruction will be given. The University will not be liable for any loss, damages, or other expenses that such limitations or withdrawals might cause.

Copyright in instructional settings
A student wishing to tape-record, photograph, video-record or otherwise reproduce lecture presentations, course notes or similar materials provided by instructors must obtain the instructor's written consent beforehand. Otherwise, all such reproduction is an infringement of copyright and is absolutely prohibited. In the case of private use by students with disabilities, the instructor's consent will not be unreasonably withheld.

Person I.D. (student number)
Each student at the University is assigned a unique identification number. The number is confidential. The University, through the Policy on Access to Student Academic Records, strictly controls access to Person I.D. numbers. The University assumes and expects that students will protect the confidentiality of their Person I.D. number.

Fees
The University reserves the right to alter the fees and other charges described in this publication.

*(1)* The precise dates of commencement of courses are determined by the graduate units; students are urged to contact the relevant graduate units for information. The University policy states that the first day of classes in the September session in all teaching divisions should not be scheduled on the first and second days of Rosh Hashanah (from 1 1/2 hours before sunset on Friday, September 26 to about 1 1/2 hours after sunset on Sunday, September 28) or on Yom Kippur (from about 1 1/2 hours before sunset on Sunday, October 5 to about 1 1/2 hours after sunset on Monday, October 6).

*(2)* Graduate units may establish earlier deadlines for completion of course work and may prescribe penalties for late completion of work and for failure to complete work, provided that these penalties are announced at the time the instructor makes known to the class the methods by which student performance shall be evaluated.

*(3)* For final dates for completing degree requirements, students should consult their own departments.

*(4)* Graduate units may establish earlier deadlines to add/drop courses. Course changes for part-time special students require an earlier deadline; please contact your graduate unit or the Student Services Office at the School of Graduate Studies.

Officers

OFFICERS OF THE UNIVERSITY

Chancellor
The Hon. V. Poy, BA, MA

Chair, Governing Council
T. H. Simpson, BSc, MBA, LLB

President and Chief Executive Officer
R. J. Birgeneau, BSc, PhD

Vice-President and Provost
S. C. Neuman, BA, MA, PhD

Vice-President and Chief Development Officer
J. Dellandrea, BA, MEd, EdD

Vice-President, Business Affairs and Chief Financial Officer
F. P. Chee, BSc, MSc, MBA

Vice-President, Government and Institutional Relations
S. H. Levy, BSc, MA, LLB

Vice-President, Human Resources
A. Hildyard, BSc, MA, PhD

Vice-President, Policy Development and Associate Provost
C. Tuohy, BA, MA, PhD

Acting Vice-President, Research and International Relations
C. Tuohy, BA, MA, PhD

Vice-President and Principal, University of Toronto at Mississauga
I. Orchard, BSc, PhD

Vice-President and Principal, University of Toronto at Scarborough
R. P. Thompson, MA, PhD

Deputy Provost and Vice-Provost, Faculty Affairs
V. Goël, MD, CM, MSc, SM, FRCP(C)

Vice-Provost, Planning and Budget
S. G. Zaky, BSc, MASc, PhD

Vice-Provost, Relations with Health Care Institutions
C. D. Naylor, MD, DPhil, FRCP(C)

Vice-Provost, Space and Facilities
R. D. Venter, BSc, MEng, PhD

Vice-Provost, Students
D. H. Farrar, MSc, PhD

Assistant Provost and Special Assistant
L. Lewis, BA, MIST

Secretary of the Governing Council
L. Charpentier, BSc, MBA

Director, Office of the President and Assistant Vice-President
B. FitzPatrick, BA, MA, PhD

Assistant Vice-President, Alumni and Development
R. Frankle, BA

Assistant Vice-President, Facilities and Services
C. J. Rigall, BA, MBA

Assistant Vice-President, Technology Transfer
P. Munsche, BA, MA, PhD

Chief Librarian
C. Moore, BA, MLS

University Registrar
K. J. Swift, BSc, MEd

Introduction
Organization of the School of Graduate Studies
Student Categories
Admissions Standards and Procedures
Application for Admission to a Degree Program
Structure of Academic Programs
Registration Policies and Procedures
Enrolment Policies and Procedures
Good Academic Standing And Satisfactory Academic Progress
Academic Appeals
University Grading Practices Policy
Graduation and Submission of Thesis
Intellectual Property
Research Ethics
Policy on Academic Sanctions for Students Who Have Outstanding Obligations to the University
Code of Behaviour on Academic Matters
Code of Student Conduct
Policy on Access to Student Academic Records
Safety in Field Research
Statement on Human Rights

Exemptions

The Council of the School of Graduate Studies has the power to waive the application of a regulation in individual cases. Such exemptions are granted only in exceptional circumstances and require the favourable recommendation of the graduate unit and of the Graduate Admissions and Programs Committee.

INTRODUCTION

The University of Toronto began in 1827 as King's College at York, then the name of Toronto. Although master's degrees were being awarded by the middle of the century, and the doctorate was established in the 1890s, the School of Graduate Studies did not become a distinct academic division within the University of Toronto until 1922. In 1965 the School was reorganized and expanded. Today it comprises about 80 departments, centres, and institutes, offering approximately 145 different graduate programs.

Most graduate units, although large enough to have a diversity of graduate courses, are small enough to allow students to have a sense of belonging to a recognized community of scholars, colleagues, and friends. The goal of graduate studies at the University of Toronto is to provide students with the best material and human resources to learn the methods and standards of research necessary to work professionally at the frontiers of knowledge. Research is central to graduate studies, particularly at the doctoral level. Research-oriented training conveys the importance of keeping pace with a subject, the knowledge of which is always changing. It fosters intellectual curiosity and a creative response to problems. It encourages the student to communicate original discoveries effectively.

In the educational process the graduate student comes to grips with the phenomenon of emerging knowledge. The process enriches the individual as well as the community participating in the exercise. The training and experience is valuable for all areas of work, whether one is teaching in a university, working in government, industry, private enterprise, or pursuing a professional career.

Research-oriented graduate training provides the means to embark on a lifelong voyage of intellectual discovery, an opportunity and challenge that gives to graduate studies pre-eminence in formal education.

ORGANIZATION OF THE SCHOOL OF GRADUATE STUDIES

The School of Graduate Studies is responsible for all graduate studies in the University of Toronto and for developing and implementing appropriate regulations and operating procedures for admissions, programs of study, and completion of degree requirements. Until 2000, the School maintained the official records of the academic activities of all students registered in the School. Individual graduate units are now
Organization

The Council

The Council is an academic advisory body reporting directly to the Governing Council of the University of Toronto. The Council consists of thirty-five elected and ten ex-officio members. Each division elects five faculty members and three students to the Council; the President of the Graduate Students' Union is an ex-officio member. There are three administrative staff seats. The Council is chaired by the Dean.

The Council is primarily responsible for determining policies and regulations affecting the administration and operation of graduate studies, and for advising Governing Council on new proposals in graduate studies. The Council is concerned with the quality of graduate education across the university as a whole.

The Divisions

Division I – Humanities
Division II – Social Sciences
Division III – Physical Sciences
Division IV – Life Sciences

Each division has:

1. An Associate Dean.
2. An Executive Committee (consisting of the chair or graduate coordinator of each graduate unit, the division’s elected representatives on Council, and additional faculty members and students) primarily responsible for matters of policy. Each Executive Committee is chaired by the Associate Dean for that division.
3. A Nominating Committee consisting of the chairs/directors of the departments/centres/institutes from the division. The committee is chaired by the Dean.

The four divisions share an Admissions and Programs Committee, primarily responsible for the approval of non-standard admission and program cases. An Associate Dean acts as chair.

Further information on the role and function of Council and the Divisional Committees may be obtained from the Office of the Coordinator of SGS Policy, Program, and Liaison.

Graduate Units

Each graduate student is enrolled in one of the graduate departments/centres/institutes which offer graduate study. Although interdisciplinary studies within collaborative programs may be undertaken, a student must register in a single home graduate unit. The graduate unit is responsible for ensuring that each student is admitted and enrolled in an appropriate program of studies and is responsible for thesis/research supervision in conformity with the policies and procedures of the School of Graduate Studies.

The Coordinator of Graduate Studies is responsible for the administration of graduate affairs within the unit, under the direction of the chair or director.

Departments

The graduate departments offer degree programs and courses and conduct research.

Centres and Institutes

The centres and institutes within the School of Graduate Studies have two major roles: the creation and development of graduate interdisciplinary programs of teaching and of research, and the fostering of new disciplines where these cannot proceed easily within the existing university structure.

Some centres and institutes do not offer degree programs in their own areas, but offer teaching through seminars, and through the sponsorship of collaborative programs.

Collaborative Programs

The School of Graduate Studies currently offers about 30 graduate collaborative programs. Collaborative programs emerge from cooperation between two or more graduate units. The collective experience of the participating graduate units provides the student with a broader base from which to explore a novel interdisciplinary area or some special development in a particular discipline.

The student must be admitted to, and enrolled in, one of the collaborating graduate units and must fulfill all the requirements for the degree in the home unit and any additional requirements of the collaborative program. Each collaborative program is designed to allow a focus in the area of specialty. On successful completion of the program, the student receives a transcript notation.

Degree Programs

Degree programs are listed alphabetically in Section 8 of the SGS Calendar. They are also described on the SGS Web site www.sgs.utoronto.ca.
1 Degree Student
A degree student is registered in a graduate degree program in the School of Graduate Studies and is considered as a candidate for the degree following first registration.

Degree Student on Probation
When credentials are from a university where the program of study cannot readily be appraised by the graduate unit, the applicant may be required to register on probation for a period of at least 4 months and not more than 12 months. Applicants must hold a recognized degree with appropriate standing.

After 4 months, but before the end of 12 months, the graduate unit may wish to recommend to the School that the student's probationary status be removed. Work completed during the period on probation will be credited towards the degree program. Students whose probationary status is not removed may remain registered on probation for the remainder of the academic year but will not be permitted to continue after that.

2 Special (non-degree) Student
Two categories of Special Students are described below. Special Students are not enrolled in a program of study which may lead to a degree. All Special Students must be enrolled in at least one graduate course; some may be enrolled in both undergraduate and graduate courses.

Special Student—Full Time
Students who are changing disciplines or require preparatory work may be admitted as full-time Special Students and enrol in a full-time program of study not leading to a degree.

Special Student—Part Time
Students wishing to take one or two graduate courses not for degree credit are admitted as part-time Special Students. Those accepted with less than mid-B standing are admitted as part-time Special Students. Those accepted with less than mid-B standing may not apply for admission to a degree program at a later date.

ADMISSIONS STANDARDS AND PROCEDURES
The School's admission standards and procedures are designed so that students entering a graduate program may normally have the capacity and preparation necessary to meet the challenge of the program effectively. The regulations for admission specify minimal requirements only. Many graduate units have additional requirements. Meeting the minimal requirements of the graduate unit and the School does not necessarily guarantee admission.

The University reserves the right to determine whether or not credentials of other degree-granting institutions meet the standards for admission to University of Toronto programs.

The University may confer upon a person more than one graduate degree having the same title provided the degrees are completed in different fields of study.

1 Academic Requirements for Admission

Master’s Programs
a. An appropriate four-year University of Toronto bachelor’s degree, or its equivalent from a recognized university, is required. Under exceptional circumstances, for applicants with a three-year degree, equivalency may be demonstrated, for example, through relevant work experience or additional qualifications.
b. High academic standing equivalent to a University of Toronto mid-B or better, normally demonstrated by an average grade in the final year or over senior courses, is required.

c. At least two letters of reference are required.

d. Other qualifications as may be specified by a graduate unit.

Doctor of Philosophy Programs

a. An appropriate University of Toronto master's degree, or its equivalent from a recognized university, is required. Direct entry from a bachelor's degree to a Ph.D. program is also available when permitted by the graduate unit. See also Admission Requirements under Degree Regulations.

b. An average grade equivalent to a University of Toronto B+ or better in previous degrees. Where relevant, demonstrated research competence equivalent to at least a B+ grade will be considered.

c. At least two letters of reference are required.

d. Other qualifications as may be specified by a graduate unit.

Other Doctoral Programs

a. Normally, an appropriate University of Toronto master's degree, or its equivalent from a recognized university, is required. See appropriate graduate unit entry for specific details.

b. An average grade equivalent to a University of Toronto B+ or better in master's courses. Where relevant, demonstrated research competence equivalent to at least a B+ grade will be considered.

c. At least two letters of reference are required.

d. Other qualifications as may be specified by a graduate unit.

Applicants who graduated five or more years ago but without achieving sufficiently high standing for admission to the School may be considered for admission if, since graduation, they have done significant, intellectual work and/or made a significant professional contribution which can be considered equivalent to a higher academic standing. This contribution and its impact on the profession must be detailed and documented (e.g., publications, research, professional advancement, development of new skills, responsibility, etc.) and presented as part of the application. Such applicants may be considered for admission if they have achieved qualifications at least equivalent to those stated in the preceding sections and if a graduate unit so recommends.

Special Student Programs

Special Students must submit an application for admission for each academic year of study.

Applicants accepted as Special Student–Full Time must have completed an appropriate University of Toronto four-year bachelor's degree, or its equivalent, from a recognized university. They must have attained an average grade in the final year (or over senior courses) equivalent to mid-B or better.

Applicants accepted as Special Student–Part Time must hold an appropriate University of Toronto four-year bachelor's degree, or its equivalent, from a recognized university. Before applying, applicants should specify the courses they wish to take and obtain approval from the teaching graduate unit or graduate units.

Those accepted with less than mid-B standing may not apply for admission to a degree program at a later date.

Courses Taken as a Special Student

Courses taken as a Special Student cannot be counted for credit in a subsequent degree program at this University; however, with approval of the graduate unit, they may serve to satisfy prerequisite requirements. Special Student programs must include at least one graduate course.

2 English Language Facility

It is essential that all incoming graduate students have a good command of English. Faculty in the English language must be demonstrated by all applicants educated outside Canada whose primary language is not English. This requirement is a condition of admission and should be met before application, but must be met before registration. This requirement may be satisfied using one of the following tests. Minimum scores are shown; however, many graduate units require a higher score, and applicants should consult the graduate unit to determine whether a higher minimum score applies.

a. Test of English as a Foreign Language (TOEFL)

Educational Testing Service
P.O. Box 6151
Princeton, New Jersey
U.S.A., 08541-6151
Web: www.toefl.org

The TOEFL examination is offered in two formats: the traditional paper-based format
(only offered on specific dates in a limited number of countries) and the computer-based format (offered year-round). Applicants in countries where the computer-based testing is not available must register for the paper-based TOEFL that includes the Test of Written English (TWE) component. The computer-based test automatically includes an essay rating component which is similar to the TWE. All applicants must satisfy a minimum score requirement on the TOEFL and on the TWE or Essay Rating component to be considered for admission. The table below lists the minimum TOEFL score requirements set by each of the four SGS academic divisions.

<table>
<thead>
<tr>
<th>ACADEMIC DIVISION</th>
<th>Minimum Score Requirement - including TWE or Essay Rating Score Requirement*</th>
</tr>
</thead>
<tbody>
<tr>
<td>HUMANITIES</td>
<td>Paper-Based Test and TWE Overall score 580 TWE 5 Overall score 237 Essay Rating 5</td>
</tr>
<tr>
<td>SOCIAL SCIENCES</td>
<td>Overal score 580 TWE 5 Overall score 237 Essay Rating 5</td>
</tr>
<tr>
<td>PHYSICAL &amp; ENGINEERING SCIENCES</td>
<td>Overall score 550 TWE 4 Overall score 213 Essay Rating 4</td>
</tr>
<tr>
<td>LIFE SCIENCES</td>
<td>Overall score 590 TWE 5 Overall score 237 Essay Rating 5</td>
</tr>
</tbody>
</table>

*Consult the department to which you are applying to determine if a lower minimum score is required

d. The Certificate of Proficiency in English (COPE)
COPE Testing Limited
78 Pleasant Boulevard
P.O. Box 1164
Toronto, Ontario
M4T 1K2
E-mail: info@copetest.com
Web: www.copetest.com
Required score: 4 (with at least 1 in each component and 2 in the writing component)

e. International ESL-Academic Preparation
Level 60 (Advanced)
School of Continuing Studies
University of Toronto
158 St. George Street
Toronto, Ontario
M5S 2V8
E-mail: scs.registrar@utoronto.ca
Web: www.learn.utoronto.ca
Required score: B

Eligibility of Senior Faculty Members
Members of the faculty of the University or its federated or affiliated colleges, senior in rank to Lecturer, are normally not eligible to be graduate students proceeding to a degree at the University of Toronto. Exceptions may be granted by the SGS Admissions and Programs Committee when it is confident that the graduate program is sufficiently remote from the faculty member that academic impartiality is not compromised.

APPLICATION FOR ADMISSION TO A DEGREE PROGRAM

Procedures
1 Formal application for admission should be submitted on the standard forms available from the graduate units. Applicants not previously registered in the School of Graduate Studies at the University of Toronto must include an application fee of $90 (certified cheque or money order in Canadian funds made payable to the University of Toronto; payment by Master Card or Visa will also be accepted). No decision on the application will be sent to the student until this fee has been paid.

2 Applicants must arrange to have one official copy of their complete academic records from all universities attended included with their application. Letters of reference are also required.
Certified English translations of all foreign
documentation written in other than English
or French must also be submitted.

Application Deadlines
The graduate unit determines the date by
which applicants should submit their appli-
cations, supporting documentation, and at
least two letters of reference to be assured
that they will be considered for a place in the
program of their choice and for financial
support. Applications received after the
posted date will be considered if places and
awards are still available, but early applica-
tion is recommended. Most graduate units
have earlier deadlines than those listed be-
low and such dates are available from the
unit.

Final deadlines for admission to degree
programs and as a full-time Special
Student (some graduate units may close admissions
early if enrolment is full):

<table>
<thead>
<tr>
<th>Application Deadlines</th>
<th>September</th>
<th>January</th>
</tr>
</thead>
<tbody>
<tr>
<td>Applications from</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Canada and U.S.A.</td>
<td>June 1</td>
<td>Oct. 1</td>
</tr>
<tr>
<td>Applications from</td>
<td></td>
<td></td>
</tr>
<tr>
<td>other countries</td>
<td>Apr. 15</td>
<td>Sept. 1</td>
</tr>
</tbody>
</table>

Deadlines for admission as a part-time Special
Student:

<table>
<thead>
<tr>
<th>Application Deadlines</th>
<th>September</th>
<th>January</th>
</tr>
</thead>
<tbody>
<tr>
<td>All applications</td>
<td>Aug. 1</td>
<td>Nov. 1</td>
</tr>
</tbody>
</table>

Earlier submission is recommended for applica-
tions from outside Canada to ensure timely ar-
rival, particularly where special documentation
(and/or translation) and proof of English lan-
guage facility are required.

Not all graduate units offer January admis-
sion. Consult the graduate unit concerned for
more information.

Financial Assistance
Many graduate students require financial assist-
ance to pursue their studies. The University of
Toronto awards a large number of fellowships.
Some of these are open to students in all
graduate units. Others are restricted to students
of one or more graduate units or to a division of
the School. For Canadian students, fellowships
are offered through the federal and provincial
governments. For details, see Financial Support
and Exchange Programs section.

Acceptance
1 Applications for admission are decided by
the graduate unit. The official acceptance
letter is issued by the School of Graduate
Studies.

2 Applicants who are offered acceptance
pending receipt of final transcripts must
submit one official copy of their final tran-
scripts to the graduate unit before final
acceptance can be approved. If final tran-
scripts do not indicate that the expected
degree has been conferred, official docu-
mentation indicating the anticipated date of
degree conferral must be submitted before
registration.

3 Normally students accepted to the School
of Graduate Studies must commence their
program of study on the date specified in
their letter of acceptance. If circumstances
prevent a student from starting study on the
specified date, the graduate unit may decide
that the offer of admission be valid for a
period not to exceed 12 months from the
original commencement date. In such a
case, an official transcript will be required to
document any new study completed in the
interim. If the period exceeds 12 months
from the original date of expected com-
mencement, a new application must be sub-
mitted.

4 If the graduate unit approves, students ac-
cepted to begin their programs in Septem-
ber will be permitted to start the preceding
summer. Students taking courses during the
summer will pay the Summer Session fee
(academic and incidental), which is addi-
tional to the Fall and Winter Session fee.
Students engaged only in research do not
pay Summer academic fees but do pay
Summer incidental fees.

STRUCTURE OF ACADEMIC PROGRAMS

Academic Year
In the School of Graduate Studies, the aca-
demic year begins in September and ends in
August. The academic year is divided into three
sessions: the Fall Session from September to
December, the Winter Session from January to
April, and the Summer Session from May to
August.

Academic Programs
Academic programs leading to graduate de-
grees are defined by the units which offer them
and by the degree regulations found in Section
2 for the Ph.D., M.A./M.Sc., M.A.Sc., M.Eng.,
and M.H.Sc. For other degrees, consult the rel-
evant graduate unit listing in Section 8 Graduate Programs of the SGS Calendar or on the Web at www.sgs.utoronto.ca.

Minimum Period of Registration (formerly Program Length)
All academic programs specify a minimum period of registration defined as the shortest length of time a student must be registered in that program on a full-time basis in order to qualify for the degree. For part-time students, this period establishes the minimum degree fee they must pay.

Residence
Many programs specify a period of residence during which the student is required to be on campus and consequently in such geographical proximity as to be able to participate fully in the university activities associated with the program. Residence provides the student with an opportunity to become immersed in the intellectual environment of the university.

Full-time Studies
Full-time graduate students are defined according to government regulations as follows.
1. They must be pursuing their studies as a full-time occupation and identify themselves as full-time graduate students.
2. They must be designated by the University as full-time students.
3. They must be geographically available and visit the campus regularly.
4. They must be considered to be full-time students by their supervisors.

If an academic program requires an absence from the University, students must apply for permission to be off campus through their graduate unit.

Part-time Studies
From first registration, part-time studies are permitted in those master’s degree programs offering a part-time program. See the list of Degree Programs in the front section of this publication.

Students wishing to take one or two courses not for degree credit are admitted as part-time Special Students, in any session.

Time Limits
All degree requirements must be completed within a specific period of time. See Degree Regulations and Lapsed Status section below.

REGISTRATION POLICIES AND PROCEDURES

Registration Procedures
Graduate students are required to register at the beginning of each session they wish to attend. New graduate students will receive registration instructions prior to the registration dates listed in the Academic Calendar. Students may access Registration Instructions on the Web at www.sgs.utoronto.ca.

Students registering in programs offered by the Ontario Institute for Studies in Education of the University of Toronto (OISE/UT) should consult OISE/UT for information.

For the Fall and Winter Sessions, registration material and a Fees Invoice are sent to the student's mailing address. Every effort is made to ensure that only students who are eligible to register receive registration material. However, receiving it does not override any other notification students receive about academic status and eligibility. New students who have received a conditional offer of admission should make arrangements with their graduate unit to clear conditions as soon as possible. The first step to registration is the payment of fees or arrangements to pay such fees. The second step is the presentation of the fees receipt to the graduate unit and collection of a School of Graduate Studies Handbook.

A student is considered to be registered as soon as academic and incidental fees are paid or arrangements for deferral of fees payment have been made.

Summer Session Courses
All students, whether attending formal courses or engaging in research or project work, must register for the Summer Session.

Summer Session registration instructions are usually sent to the student’s current address or to the graduate unit in April. Doctoral, M.Sc., and M.A.Sc. students register for the September-August or January-August period when they first register in September or January, and therefore are already registered for the Summer Session.

In addition to a large program of research supervision and independent study, the School of Graduate Studies offers a limited number of graduate courses for credit towards higher degrees during the summer. Many undergraduate courses will also be available for persons requiring prerequisite work in order to enter graduate programs. Students should consult the undergraduate calendars of the faculties of interest.

Summer courses are equivalent to those offered during the Fall and Winter Sessions but
vary in duration and thus in frequency of meeting. Some courses will last 12 to 14 weeks while others will meet for only 7 weeks. In some cases, prerequisite courses will be six weeks long.

For persons attending the May-August session, the maximum possible load is two full courses. The maximum load in the May-June or July-August period is one full course or equivalent.

First Registration
Students beginning their degree programs normally register for the first time in September. In some cases graduate units may give permission for new students to start their programs either in January, May, or July.

Continuity of Registration
Failure to register as required will cause a student's candidacy to lapse. See Lapsed Status below.

Doctoral Students
Doctoral students must register annually until all degree requirements have been completed.

Full-Time Master's Students
Once they have first registered, full-time master's students, in other than course-work only programs, must register annually in September until all degree requirements have been completed.

Full-time master's students in course-work only programs must register initially for the minimum registration period and thereafter for each session in which they are completing requirements for the degree. All full-time master's students who have completed the minimum period of registration may not register as part-time students.

Prior to completing all courses in a course-work only program, and with the permission of their graduate unit, master's students admitted to a full-time program may 'stop out' between sessions. However, no change is made to the time limit for completing the degree.

Part-Time Master's Students
Master's students proceeding to their degree on a part-time basis register in those sessions in which they are completing course requirements for the degree. When all course requirements have been completed, they must register annually until all other requirements have been completed.

Master's students are advised to consult their graduate units for further information on continuity of registration requirements, particularly with regard to the Summer Session; many graduate units expect their students to be registered for all three sessions.

Students are reminded that there are time limits for all degree programs.

Late Registration Fee
Since it is the student's responsibility to ensure that proper registration is completed on time, late registration will be subject to an additional fee as specified in the Fees section.

Failure to Register
Students will not receive credit for work completed during a session in which they have not registered.

Extension of Time for Completion of Degree Requirements
In exceptional circumstances, a degree candidate who has failed to complete all the requirements for the degree within the period specified in the degree regulations may be considered for a maximum of two one-year extensions provided that the graduate unit concerned so approves. To apply for an extension, the candidate must present to the graduate unit concerned the causes for the delay and evidence that the remaining degree requirements may be completed within the period of the extension request. See also section under Degree Regulations, Doctor of Philosophy, Program Requirements, titled Time for Completion.

Lapsed Status
If a candidate fails to register, or is not permitted to register because the time limit for the degree sought has elapsed, candidacy in the School lapses. There are two states of lapsed status, as noted below:

1 Before the Time Limit for the Degree has Expired
Failure to register as required within the time limit specified for the degree sought, will result in lapsed candidacy. Candidacy may only be re-established if an application for reinstatement is approved both by the graduate unit and the School, and payment is made of the prescribed fees for the year(s) in which the candidate failed to register.

2 After the Time Limit for the Degree has Expired
After the time limit for the degree has elapsed and further extensions cannot be recommended, a student may not register further and degree candidacy is considered to have lapsed. However, in special circumstances, a student may be reinstated once
only, for a maximum of 12 months. See index for reference to Time for Completion section in the Ph.D. regulations. These regulations apply by analogy to master's students including those who have outstanding requirements other than a thesis.

Simultaneous Registration
Simultaneous registration in two full-time programs is not permitted. With the consent of both graduate units concerned, or of the graduate unit and another faculty or school, and written notification to the School of Graduate Studies, simultaneous registration in a full-time program and a part-time program may be permitted. Two part-time registrations in different programs may also be permitted. Students are responsible for the fees charged for both programs.

Dual Registration
A student in a master's program at this University who has been offered admission to a Ph.D. program conditional on completion of the master's program, may be a dual registrant for only one session in both programs under the following conditions.

1 A minimal amount of work remains to complete the requirements for the master's degree. A student may enrol in a maximum of one half-course for the master's program in the one session of dual registration with the approval of the graduate unit.

2 Permission has been granted by the graduate unit.

3 The student will be engaged in full-time Ph.D. studies and will be registered full-time in the Ph.D. and part-time in the master's program. Only the appropriate Ph.D. fees will be charged.

4 The period of dual registration will be either September 1 to January 31 or January 1 to May 1.

In order to receive credit for the Ph.D. for the period as a dual registrant, the student must be recommended for the award of the master's degree by January 31 for September dual registrants, or by April 25 for January dual registrants. Otherwise, the Ph.D. registration will be cancelled, no credit for the Ph.D. will be allowed, and the student will continue to be registered as a master's candidate only. An appropriate fees adjustment will be made so that the student will be charged fees only as a master's student. Ph.D. course credit will be retained for courses completed in the period of dual registration provided the graduate unit has informed the School.

Students who are not recommended for the master's degree by the deadline and whose enrolment in the Ph.D. is thereby cancelled may not apply for dual registration a second time. They must successfully complete the requirements for the master's degree before registering in the Ph.D. program.

Leave for Serious Health Problems or Personal Circumstances
Graduate students whose programs require continuous registration may apply to their Graduate Coordinator for a one-session to three-session leave during their program of study on the grounds of serious health or personal problems which temporarily make it impossible to continue in the program.

Once on leave, students will not be registered nor will they be required to pay fees for this period. They may not make demands upon the resources of the University, such as use library facilities, attend courses or expect advice from their supervisor. They will not be eligible to receive or defer University of Toronto fellowship support during the leave. In the case of other graduate student awards, the regulations of the particular granting agency apply.

Students requesting a leave on the basis of serious financial reasons will first be required to apply to the School for a bursary.

Students may make application for such leave by completing the Leave Request Form and submitting it to their Graduate Coordinator for approval. The form is then forwarded to the School for processing. The terminal date of the degree program will be extended by the duration of the leave taken. Except in exceptional circumstances, it is not expected that a student will be granted more than one leave under the terms of this policy. Normally the start and finish of the leave would coincide with the start and end of a session. Leave requests which do not fall under the terms of this policy will require final approval from the School.

Parental Leave
Graduate students may apply to their graduate unit for a parental leave. This policy is intended to recognize the need for leave at the time of pregnancy, birth, or adoption, and to permit a pause in studies in order to provide full-time care in the first year of parenting a new child.

Either parent may request up to three sessions of leave, which must be completed within twelve months of the date of birth or custody. Where both parents are graduate students seeking parental leave, the total number of sessions may not exceed four.
While on parental leave, students do not register or pay fees to the University. Such fees defray the cost of offering instruction, operating laboratories and libraries, and so on. Should students on parental leave wish to make use of library facilities, they are advised to consult the library regarding Research Reader privileges. Students on parental leave wishing to consult their supervisor and other faculty are advised to make special arrangements as required. They will not be eligible to receive University of Toronto fellowship support during the leave, but they may defer their fellowships until they return from leave. In the case of other fellowships, the regulations of the particular granting agency will apply.

Students may apply for parental leave by completing the Parental Leave Request Form. The terminal date of the degree program will be extended by the duration of the leave taken. Normally, the start and finish of the leave would coincide with the beginning and end of a session.

Withdrawal from a Graduate Program
In order to withdraw from a program, students must submit a Program Change Form to the School of Graduate Studies and return student cards to the School. Withdrawal from a graduate program should be reported immediately to the School. A rebate of fees, if any, will be determined by the date on which written notification of withdrawal is received by the School. Any application for re-admission by a student who has withdrawn must be made in competition with all other applicants.

Students enrolled in course-work only degree programs who withdraw from all courses in which they are currently enrolled must withdraw from their programs. The School will approve recommendations from the graduate units that such students be eligible to re-register at any time within 12 months following withdrawal.

ENROLMENT POLICIES AND PROCEDURES

Graduate Courses
A graduate course is understood to require at least two hours per week of lectures or seminars plus such laboratory hours as may be required.

Enrolment
After registration, students enrol with their graduate units and arrange programs of study (courses, research topics, supervisors, and so on). Students should contact the graduate unit for enrolment procedures. Enrolment should be completed by the deadline noted in the Academic Calendar.

Most of the formal classes and seminars in the Fall Session begin in the week of September following the week in which Labour Day falls. However, starting dates are determined by the graduate units, and students are urged to contact the relevant graduate units for information.

Not every course will be given in any one year. Consult the graduate unit concerning course availability.

Deadlines for Enrolment Changes
Graduate units may establish earlier deadlines for course changes. Courses must be dropped by completing a Program Change Form or by using the Web service (if the department permits access). In order to avoid academic penalties, courses must be dropped by the following deadlines.

<table>
<thead>
<tr>
<th>Date</th>
<th>Event</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oct. 3, 2003</td>
<td>Deadline to add full courses (Y) and half-courses (H).</td>
</tr>
<tr>
<td>Oct. 31, 2003</td>
<td>Deadline to drop a Fall Session full course or half-course without academic penalty.</td>
</tr>
<tr>
<td>Jan. 23, 2004</td>
<td>Deadline to add Winter Session full courses (Y) and half-courses (H).</td>
</tr>
<tr>
<td>Feb. 27, 2004</td>
<td>Deadline to drop a full course (Y) or Winter Session half-course (H), or withdraw from a program without academic penalty.</td>
</tr>
</tbody>
</table>

Students enrolled in course-work only programs who drop all courses by the deadlines, must withdraw from the program. See Withdrawal from a Graduate Program, above.

Completion of Course Work and Grade Submission
Course work must be completed and grades submitted by the following dates:

<table>
<thead>
<tr>
<th>Date</th>
<th>Event</th>
</tr>
</thead>
<tbody>
<tr>
<td>Jan. 16, 2004</td>
<td>Fall Session (Y, H) courses</td>
</tr>
<tr>
<td>May 14, 2004*</td>
<td>Fall/Winter Session (Y) and Winter Session (Y, H) courses</td>
</tr>
<tr>
<td></td>
<td>*For students receiving degrees at Spring Convocation, grades must be submitted by April 23.</td>
</tr>
<tr>
<td>Sep. 17, 2004</td>
<td>Summer Session courses and extended courses</td>
</tr>
</tbody>
</table>

Graduate units may establish earlier deadlines for completion of course work and may
prescribe penalties for late completion of work and for failure to complete work, provided that these penalties are announced at the time the instructor makes available to the class the methods by which student performance shall be evaluated.

Course Work Extensions
Students are expected to meet the course deadlines both of the School and of the graduate units in which they are registered and are advised to plan their research projects accordingly. Students who find themselves unable to meet SGS deadlines for completing course work can, under certain conditions, receive extensions for completing the work after the date set by SGS.

1 Petitions for course work extensions
The authority to grant an extension for the completion of work in a course beyond the original SGS deadline for that course rests with the graduate unit in which the course was offered, not the instructor of the course. Students who petition the graduate unit for extensions, using a standard form provided by SGS.

The deadline for requesting an initial extension is the deadline for completion of course work and grade submission for courses offered in the relevant session, as specified in this calendar.

A student on extension who is unable to complete the required course work in the extension period specified by the graduate unit may apply to the graduate unit for a continuation of the extension (subject to the time-limits and deadlines for extensions, set out below); however, the student must make such a request before the expiry date of the extension period in place.

2 Grounds for course work extensions
Legitimate reasons for an extension can be academic in nature - e.g., unexpected problems of research in a course - or nonacademic - e.g., illness. In order to ensure as much uniformity and fairness as possible in the granting of extensions (or continuations of extensions), the relevant graduate unit must be reasonably certain that:

a. the reasons for the delay are both serious and substantiated; the student is to provide a statement detailing the reasons, together with a physician’s letter in the case of illness;

b. the student would not be placing in jeopardy the normal and satisfactory completion of new course work; and

c. the student would not be placing in jeopardy the normal and satisfactory completion of new course work; and

d. the student does have a reasonable chance of completing outstanding requirements within the time to be allotted.

3 Time-limits for course work extensions
If a graduate unit grants a petition for an extension, it must specify an extension period, which is not to run beyond the SGS deadline for completion of course work and grade submission following the original SGS deadline for the course. Thus, the deadlines for course extensions are as follows:

May 14, 2004 Fall Session (Y, H) courses
Sep. 17, 2004 Fall/Winter Session (Y) and Winter Session (Y, H) courses
Jan. 14, 2005 Summer Session courses and extended courses

A graduate unit may grant a continuation of an extension that is already in place provided that it does not extend the total period of the extension beyond the foregoing deadlines. Extensions beyond these deadlines will require the approval of both the graduate unit and the SGS Admissions and Programs Committee.

4 Grade-reporting procedures
The graduate unit will assign the temporary course report of ‘SDF’ ('Standing Deferred') to a student on extension, pending receipt from the instructor of a final course report. The final course report will take the form either of a regular grade or of the non-grade report ‘INC’ ('Incomplete'), as appropriate. It is due no later than the SGS deadline for completion of course work and grade submission following the original one for the course. If, by that date, a final grade is not available and the student has not submitted the outstanding course work, then the report of ‘SDF’ will be replaced by one of ‘INC’. This will be a permanent transcript entry. (Amendments will require the approval of the SGS Admissions and Programs Committee.)

5 SGS and home graduate unit notification
Graduate units are to notify SGS of extensions no later than the original deadlines for submitting grades for the relevant courses or, in case of continuations, no later than the expiry dates of the original periods of exten-
sition, providing in each case the new deadline for completion of course work.

A graduate unit should, in addition, notify the graduate unit in which the student is registered when it is not the same as the one granting the extension.

Extra Courses Not Required for the Degree

Graduate units may permit students to enrol in additional courses not required for the degree. Such courses must be so designated on the student's enrolment form. These courses are subject to the same regulations regarding withdrawal, failure, and failure to complete work as are courses required for the degree, except that repetition or replacement of failed or incomplete courses may be waived by the graduate unit.

Prerequisite Courses

At least B- is required in all prerequisite courses but some graduate units may require a higher average; students should consult the graduate unit in advance.

Reading and/or Research Courses

Reading and/or research courses should involve as much reading and work as a normal seminar or other type of graduate course; written work should be a requirement of the course. Reading and/or research courses are subject to the grading practices policy in the same way as any other course.

Only faculty holding a graduate appointment may direct a reading and/or research course, and they must hold a faculty appointment in the graduate unit where the course is being offered, normally in the student's home graduate unit. In general, both the student and instructor should be on campus and the frequency of their meetings should be consistent with other courses.

Approval to take a reading and/or research course is given by the graduate unit.

Seminar/Workshop Courses

Some graduate units offer seminar/workshop courses. These courses vary in format and delivery from unit to unit, and they may or may not count towards the number of courses required for the completion of a degree program. Consult the home graduate unit for details and program requirements.

Auditing of Graduate Courses

Graduate units determine if they wish to allow auditing of their courses and which groups of students and non-students specified in the University's Policy on Auditing of Courses they wish to allow. When auditing is allowed, the final decision to permit an individual to audit rests with the instructor of the course. In all cases, students registered in the University who wish to audit courses have priority over others. An auditor may attend lectures and other class meetings, take part in class discussions, and, when the appropriate fee is paid, receive written confirmation of attendance. An auditor will not receive evaluations of participation and will not be allowed to submit assignments or write examinations and tests except by special and express permission. Audited courses are not recorded on the student's official transcript. The University's Code of Student Conduct applies to auditors. Further information about access, Certificates of Attendance, and fees for auditing may be obtained from the graduate school’s Office of the Coordinator of Student Services.

GOOD ACADEMIC STANDING AND SATISFACTORY ACADEMIC PROGRESS

To be in good academic standing, a student registered in a degree program in the School of Graduate Studies must:

1. comply with the General Regulations of the School as well as with the Degree Regulations and program requirements governing that degree program; and
2. make satisfactory progress toward the completion of the degree.

All degree candidates are admitted under the General Regulations of the School, described in Section 1 of this Calendar. The Degree Regulations for the various doctoral and master's degrees offered by the School are specified in Section 2 of this Calendar and in Section 8 of this Calendar, under the entry of the graduate unit offering the graduate program leading to the relevant degree. The specific requirements for the various graduate programs offered in the School are described in Section 8, under the entry of the graduate unit offering the program. Failure to maintain good academic standing may result in various sanctions, including ineligibility for fellowships, lowest priority for bursaries and assistantships, and even termination.

The School may terminate the registration and candidacies of a student for the following reasons:

1. who fails to comply with the General Regulations of the School, the relevant Degree Regulations, or the specific degree requirements of the graduate unit in which the student is registered;
2. who fails to maintain satisfactory progress in the degree program in which the student is registered, as measured either by the general standards of the School or by the specific ones of the graduate unit.
Full-Time Studies
Students registered as full-time students in the School of Graduate Studies must be engaged in their studies on a full-time basis, as required by government regulations for full-time graduate studies. (See “Full-time Studies”, above.) A full-time student may be absent from the University for an extended period or may participate in a program offered by another university if and only if the student has received written permission from the graduate unit in which he or she is registered. A graduate student who, in a given session, is absent from the University without receiving prior approval may lose good academic standing. In exceptional cases, a graduate unit may recommend to the School the termination of the student’s registration and candidacy.

Timely Completion of Graduate Program Requirements
Each graduate unit establishes specific requirements for degree programs, in addition to those of the School, as well as standards of satisfactory performance and progress. These requirements and standards are described in the appropriate entry of Section 8 of this Calendar and in material published separately by graduate units. Continued candidacy in a degree program requires satisfactory progress toward the completion of that program. A student’s progress in a degree program will be considered satisfactory only if the student satisfies and completes the various requirements for that degree in a manner consistent with the graduate unit’s time line for completion of the degree. A graduate unit may recommend to the School the termination of the registration and candidacy of a student who fails to maintain satisfactory progress toward the completion of the degree for which the student is a candidate.

Satisfactory Completion of Graduate Courses
Satisfactory performance in a degree program requires the completion of every course taken for graduate credit with a grade of at least a B-; some graduate units may require a minimum grade above a B- for some or all courses. If a student fails to complete a graduate course in a satisfactory manner (i.e., receives a grade report of ‘FZ’ or ‘NCR’ in a course, receives a grade report below the minimum acceptable by the graduate unit, or receives a non-grade report of ‘INC’), then the graduate unit in which the student is registered may recommend to the School the termination of registration and candidacy of that student. If the student is permitted to continue, he or she must repeat the relevant course, or an alternative course recommended by the graduate unit and approved by the School, and obtain a satisfactory grade. (The report for the course that was not completed in a satisfactory manner as well as the report for the repeated or alternative course will appear on the student’s academic record.)

Supervision and Satisfactory Progress in a Ph.D. Program
A candidate for the Ph.D. degree is expected, with the assistance of the graduate unit, to select a supervisor and, with the assistance of the supervisor and graduate unit, to constitute a supervisory committee, consisting of the supervisor and at least two other members of the graduate faculty, as early as practicable in the student’s program but, in any case, no later than the time specified by the time frame established by the graduate unit. The student’s choice of supervisor and supervisory committee is subject to the approval of the graduate unit in which the student is registered. A student who encounters difficulties setting up a supervisory committee should consult the chair/director or the graduate coordinator of the graduate unit in advance of the relevant deadline. A student who fails to constitute a supervisory committee by the required time may lose good academic standing.

A candidate is expected to meet with this committee at least once a year, and more often if the committee so requires. At each meeting, the supervisory committee will assess the student’s progress in the program and provide advice on future work. If in each of two consecutive meetings, a student’s supervisory committee reports that the student’s progress is unsatisfactory, the graduate unit may recommend to the School the termination of registration and candidacy of that student. A student who encounters difficulties arranging a meeting of this committee should consult the chair/director or the graduate coordinator of the graduate unit in advance of the relevant deadline for doing so. A student who, through the student’s own neglect, fails to meet with the supervisory committee in a given year will be considered to have received an unsatisfactory progress report from the committee.

Time Limit for Completion of Program Requirements in a Ph.D. Program
A candidate for the Ph.D. degree enrolled in a full-time (as opposed to a flexible-time) program will be denied further registration in that program and will have his or her candidacy terminated at the end of the third year of registration in the case of a four-year program, or at the
end of the fourth year of registration, in the case of a five-year program, if, by that time, either
1 the candidate has not completed all requirements for the degree exclusive of thesis research—including course requirements, language requirements, qualifying departmental examinations—or
2 the candidate does not have an approved thesis topic, supervisor, or supervisory committee.
(Note: Some graduate units require candidates to register in courses that run continuously throughout the program, e.g., ongoing research seminar courses. The foregoing time limit does not apply to such courses.) In exceptional circumstances, such a candidate may be permitted to register in the program for two further sessions at the discretion of the graduate unit concerned. Continuation beyond two sessions will require the approval of both the graduate unit and the SGS Admissions and Program Committee.

ACADEMIC APPEALS

General
Graduate students may dispute substantive or procedural academic matters, including grades, evaluation of comprehensive examinations and other program requirements; decisions about the student’s continuation in any program; or concerning any other decision with respect to the application of academic regulations and requirements to a student. Decisions related to admission to an academic program, including admission to the doctoral program for current master’s students, are not subject to appeal. Appeals must be initiated within the student’s home graduate unit unless the appeal relates to a course outside the home unit, in which case, it must be initiated in the department in which the course was taken, upon notification to the student’s home department chair.

Exception
The process of academic appeal described in this policy must be followed for all disputes except appeals related to failure of a final Ph.D. oral examination or related to termination of registration in a program. Such appeals must be made directly to the SGS Graduate Academic Appeals Board (GDAAC). These appeals begin at Graduate Appeal Step 3. In some such cases, the Chair of GAAB may refer the appeal to the Graduate Department Academic Appeals Committee (GDAAC) for prior consideration and a recommendation to GAAB. The GDAAC will not have the right to overturn a failed final Ph.D. oral examination result or a termination of registration, but may recommend that such a decision be considered further by GAAB.

Informal Mediation
At any stage prior to filing an appeal with the SGS Graduate Academic Appeals Board, a student may consult the relevant SGS Associate Dean for advice and/or informal mediation. The Associate Dean will serve as informal mediator, attempting to resolve the dispute or clarify issues. Timelines are not affected by mediation. Consultation with the Associate Dean at an early stage is encouraged.

Steps
The overall graduate appeals process is set out in the table below. Students should note the timelines for each stage carefully.

Step 1 – Informal
In the case of dispute, students must first attempt to resolve the matter with the instructor or other person whose ruling is in question. Should the matter not be resolved with the instructor, and should the student wish to pursue the matter, the student must discuss the matter with the graduate coordinator or associate chair of the department.

Step 2 – Department-level Appeal
Should such discussions fail to resolve the matter, the student may make a formal appeal in writing to the Graduate Department Academic Appeals Committee (GDAAC). The student must complete a Notice of Appeal to the GDAAC; a copy of this Notice is available from the graduate coordinator or associate chair in every graduate department. This form must be completed and delivered to the chair of the department or the chair of GDAAC within the specified timeline of 8 weeks from the date of the decision under appeal. The Chair of the Committee will determine, at his or her sole discretion, whether the appeal will proceed by way of an oral hearing and/or written submissions. In either case, at the conclusion of the hearing and/or review of the written submissions, the GDAAC will make a recommendation to the chair of the graduate department regarding the merits of the appeal. The chair will then render the department-level appeal decision. Guidelines for chairs are made available to all parties in an appeal.
### General Regulations

**Academic Appeals**

**Note A:** A student may apply, in writing and with reasons, to the chair of the appeal body at the appropriate level for an extension of time. It is understood that any extension is within the chair’s discretion, where she or he is of the view that compelling reasons exist.

**Note B:** Informal mediation is available via the SGS Associate Dean at any stage before filing an appeal with the Graduate Academic Appeals Board (GAAB). Consultation with the Associate Dean at an early stage is encouraged.

**Note C:** The chair of the appeal body retains discretion to extend time limits applicable to its response at any stage where, in its view, compelling reasons exist.

¹Graduate Department Academic Appeals Committee  
²Graduate Academic Appeals Board  
³Governing Council Academic Appeals Committee
UNIVERSITY GRADING PRACTICES POLICY

The policy is printed in ordinary type; additional comments appear in italics.

Purpose

The purpose of the University Grading Practices Policy is to ensure:
(a) that grading practices throughout the University reflect appropriate academic standards;
(b) that the evaluation of student performance is made in a fair and objective manner against these academic standards;
(c) that the academic standing of every student can be accurately assessed even when courses have been taken in different divisions of the University and evaluated according to different grade scales.

Application of Policy

The Policy applies to all individuals and committees taking part in the evaluation of student performance in degree, diploma, and certificate credit courses (hereafter referred to as courses).

Amendment to Policy

Amendments to the Policy shall be recommended to the Academic Board. Changes to the divisional regulations on grading practices shall be forwarded to the Committee on Academic Policy and Programs.

Distribution of Policy

A copy of the Grading Practices Policy as well as the description of the grade scales and the substance of divisional regulations indicated in Part II of this Policy shall be published in the Calendar of the division. Similarly a copy shall be given to all students upon initial registration and to all instructors and others, including teaching assistants, involved in the evaluation of student performance.

The Policy is in three parts: Part I deals with grades, Part II outlines grading procedures to be adhered to in divisional regulations adopted as part of this Policy, and Part III is an administrative appendix available upon request from the Office of the Vice-President and Provost.

PART I: GRADES

Meaning of Grades

Grades are a measure of the performance of a student in individual courses. Each student shall be judged on the basis of how well he or she has command of the course materials.

I.1 A grade assigned in a course is not an assessment of standing within a program of studies. To determine the requirements for credit and standing in a program of studies, the academic regulations of the division in which the program is offered should be consulted.

I.2 Grades for each course shall be assigned with reference to the following meanings (which may be expanded in the divisional regulations under Part II):

<table>
<thead>
<tr>
<th>Excellent</th>
<th>Good</th>
<th>Adequate</th>
<th>Marginal</th>
<th>Inadequate</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Grade Scales

I.3 Once a judgement on the performance of the student has been made, the following grade scales are to be used:
(a) the refined letter grade scale A+, A, A-, B+, B, B-, C+, C, C-, D+, D, D-, F;
(b) the numerical scale of marks, consisting of all integers from 0 to 100;
(c) for graduate divisions only, a truncated refined letter grade scale in which FZ replaces the C, D and F grades in (a) above and/or
(d) the scales Honours/Pass/Fail and Credit/No Credit.

Grades vs. Scores

I.4 Grades should always be based on the approved grade scales. However, students may find that on any one evaluation they may receive a numerical or letter mark that reflects the score achieved on the test or essay. The cumulative scores may not be directly identified with the final grade. Grades are final only after review by the divisional review committee described below.

Grade Reporting

I.5 Grades will be assigned according to the numerical scale of marks referred to in I.3 (b) above, and converted to the refined letter grade scale of I.3 (a) above. In graduate divisions, grades may be assigned according to the truncated refined letter grade scale of I.3 (c) above. The H/P/FZ and CR/NCR scales of I.3 (d) above may also be used. However, the grades assigned in a course must all be from the same scale.
I.6 All non-grade designators used in reporting course results must correspond to the University-wide standard. A list of the currently approved designators and their meanings is given in the Appendix A.2. See *Note* below.

I.7 The information in grade reports and transcripts must be communicated to the user, whether within or outside the University, in a clear and meaningful way. To that end, transcripts must include:

(a) an enrolment history, which traces chronologically the student’s entire participation at the University,

(b) a “grade point average” based on a 4-point scale for all undergraduate divisions. Note: grade point average values will be assigned as follows:

\[
\begin{align*}
A+ &= 4.0 \\
A- &= 3.7 \\
B+ &= 3.3 \\
B &= 3.0 \\
B- &= 2.7 \\
C+ &= 2.3 \\
C &= 2.0 \\
C- &= 1.7 \\
D+ &= 1.3 \\
D &= 1.0 \\
D- &= 0.7 \\
F &= 0.0
\end{align*}
\]

(c) an average grade for each course expressed using the refined letter grade scale (Note: these calculations should be restricted to courses of a specific size),

(d) both the numeric mark and its letter grade equivalent, where possible, for all courses,

(e) course weight values, expressed using a uniform system of values allowing for the relative values needed by each division,

(f) transfer credits granted,

(g) academic honours, scholarships and awards sanctioned by the University,

(h) a comprehensive guide explaining all grades and symbols used on the transcript.

*Note: A list of the currently approved designators and their meanings is given in the Appendix A.2 as indicated in 1.6 above. Those used by the School of Graduate Studies and approved by Academic Board are listed below.*

---

**Non-Grade Course Reports**

The following non-grade course reports may appear on transcripts:

- **INC** Incomplete: Assigned as a final report by a graduate unit review committee or SGS Associate Dean on the basis of incomplete course work in special circumstances (e.g., medical reasons or when there are no grounds for assigning a failing grade). INC carries no credit for the course and is not considered for averaging purposes.

- **IPR** In Progress: Assigned by the instructor as the report for a course which is continued in a subsequent session or program. The final grade for the course will appear only once and only for the last enrolment period. IPR carries no credit for the course and is not considered for averaging purposes.

- **SDF** Standing Deferred: Assigned by a graduate unit review committee to a student who has been granted an extension for the completion of course work beyond the SGS deadline for completion of course work, pending receipt from the instructor of a final course report. A final course report is due no later than the SGS deadline for completion of course work and grade submission following the original one for the course. If, by that date, a final grade is not available and the student has not submitted the outstanding course work, then the report of ‘SDF’ will be replaced by a final report of ‘INC’. SDF carries no credit for the course and is not considered for averaging purposes.

- **WDR** Withdrawal without academic penalty: Assigned by the graduate unit review committee, when there are extenuating circumstances, upon approval of the student’s request for late withdrawal from a course. It carries no credit for the course and is not considered for averaging purposes.

- **XMP** Exemption: Granted on the basis of credit for work done elsewhere. It carries credit for the course, but is not considered for averaging purposes.

#### Course Procedures

II.1 To ensure that the method of evaluation in every course reflects appropriate academic standards and fairness to students, the School has adopted these regulations governing course procedures.

(a) As early as possible in each course (and no later than the School’s last date for course enrolment), the instructor shall make available to the class, and shall file with the department, centre or institute, the method(s) by which student performance shall be evaluated. This information should describe the method(s) (essays, tests, examinations, seminar presentations, etc.), the relative weight of these method(s) in relation to the overall grade, and the timing of each major evaluation. Any penalties for late completion of, and for failure to complete work, should be announced at the time the instructor makes available to the class the method(s) by which student performance shall be evaluated.

(b) After the method(s) of evaluation have been made known, the instructor may not change them or their relative weight without the consent of at least a simple majority of the students enrolled in the course. Any changes shall be reported to the department, centre, or institute.

(c) The relative value of each part of an examination shall be indicated to the student at the time of the examination. In the case of a written examination, the value of each part shall be indicated on the examination paper.

(d) Commentary, appropriate in the instructor’s judgement, on assessed work, other than final examinations, and time for discussion of it shall be made available to students. Commentary, appropriate in the instructor’s judgement, on final examinations and time for discussion of it shall be made available to students at their request.

(e) Grades shall be recommended by the instructor in reference to the approved grade scales on the basis of each student’s performance.

#### Examinations

II.2(a) Students should be provided with clear information about the expectations of the examiners, including the types of anticipated questions.

(b) Students should have the opportunity to review their answers in written examinations within four months of the reporting of the grades. A recovery fee may be set to cover administrative costs, including photocopying.

(c) The School has developed a procedural guide for the re-reading, by an external reviewer, of examinations written for courses by graduate students. It is to be used only when departmental appeal mechanisms have been exhausted. Costs of preparing materials for the external reader are shared between the graduate unit and the student.

#### Other Departmental Assessments

II.3 Departments, centres, or institutes may expect graduate students to complete requirements for a degree other than course work, such as departmental examinations, language examinations, field work or internships. Graduate students should be given a written statement describing the evaluation processes. It is appropriate that departmental evaluations of performance in these settings should accord with the principles enunciated in the other sections of the University Grading Practices Policy, and that the effect upon deadlines of disruptions to academic programs, as described below, be taken into account. Students should also be informed of procedures for appeal.

_The School has developed a Code of Good Practice for Departmental Examinations. Copies are available from the Office of the Coordinator of Student Services._

#### Grade Review and Approval Process

II.4(a) Grades shall be recommended by the instructor to the chair or director, or designate, of the graduate department, cen-
Exceptional Circumstances and Academic Appeals

II.5 Students with health problems or other personal circumstances which may adversely affect their performance in, or their ability to complete course work, examinations or other departmental assessments may request special consideration. Requests, supported by a medical certificate, should be submitted to the instructor or the coordinator of graduate studies as soon as possible or within 48 hours of the deadline or date of assessment. The medical certificate must confirm the student was adversely affected by the health problems and must show the dates of illness and that the physician was consulted at the time of the illness.

b) Students may on occasion dispute substantive or procedural academic matters, including grades. The recommended route for the resolution of such disputes is to discuss the matter first with the instructor or the person whose ruling is in question. If the dispute persists, the student may wish to pursue a formal academic appeal – see Academic Appeals in the General Regulations section of the Calendar.

Conflict of Interest

II.6 When the instructor or a student has a conflict of interest, or is in a situation where a fair and objective assessment may not be possible, this should be disclosed to the chair or director, or designate, who shall take steps to ensure fairness and objectivity.

Procedures in the Event of Disruption

II.7(a) In the event of disruption of the graduate academic program, the following principles shall apply: (i) the academic integrity of academic programs must be honoured; and (ii) students must be treated in a fair manner, recognizing their freedom of choice to attend class, and to use academic facilities, or not, without penalty.

b) The Vice-President and Provost, or the Academic Board, shall declare when a disruption of the graduate academic program has occurred. The Provost shall take steps to inform the University community at large of the changes to be implemented, and will report to the Committee on Academic Policy and Programs regarding the implementation of the procedures and changes to the status of the academic programs.

c) Instructors responsible for courses that are disrupted shall determine, as the disruption proceeds, whether any changes to classroom procedures are needed to complete the course.

d) Changes in classroom procedures should, where possible, first be discussed with students prior to the class meeting in which a vote is to be taken by the students present on the proposed changes. Changes agreed upon unanimously should be forwarded to the chair.
or director, or designate, with a report on
the attendance at the class.

If unanimity on changes has not been
arrived at, or where a vote is not feasible,
the instructor, after the class discussion,
will provide the chair or director, or desig-
nate, with his or her recommendation,
along with the results of any classroom
votes. The chair or director, or designate,
shall then make a decision.

(e) If classes are not able to convene, the
instructor, with the prior approval of the
chair or director, or designate, shall make
changes deemed necessary to the class-
room procedures.

(f) In the absence of the instructor such
changes will be made by the Dean in
consultation with the chair or director, or
designate, and with the approval of the
Provost.

(g) If courses are to be cancelled, approval
of the SGS Council is required. If Council
cannot meet, the approval of the Dean,
or in the absence of the Dean, the
approval of the Provost, is required.

(h) Students must be informed of changes to
classroom procedures. This may be done
by circulating the changes in writing to
the class, posting in the office of the
graduate unit, reporting to SGS Council,
as well as listing in the campus press.
When classes resume, students must be
informed, at class, of any changes made
during the disruption.

(i) If changes to the classroom procedures
are made, students who do not wish to
complete the course under the revised
procedures may withdraw without aca-
demic penalty. This must be done prior to
the last day of classes.

(j) If students have not attended classes
that are meeting, they nonetheless re-
main responsible for the course work and
for fulfilling course requirements. How-
ever, where possible, reasonable exten-
sion of deadlines for course require-
ments, or provision for make-up tests,
shall be made. Reasonable alternative
access to material covered should be
provided.

(k) A student who feels, owing to his or her
special circumstances, that changes to
classroom procedures have unreason-
ably affected his or her grade may appeal
the grade following procedures for appeal
set out above.

GRADUATION AND SUBMISSION OF THESIS

It is the intention of the University of Toronto
that there be no restriction on the distribution
and publication of theses. However, in excep-
tional circumstances postponement of distribu-
tion and publication may be granted. For proce-
dures see end of section under Doctor of Phi-
losophy, Final Oral Examination.

Doctoral Thesis

Prior to the final oral examination, required
copies of the doctoral thesis must be submitted
by the candidate to the graduate unit. The
candidate should consult the graduate
coordinator regarding requirements and
deadlines for submission of material.

The graduate unit is responsible for ensuring
that one copy of the thesis is brought to the final
oral examination.

After successful completion of the final oral
examination, at least one bound copy of the
doctoral thesis in final form must be submitted
by the candidate to the graduate unit. Candi-
dates should consult their unit to determine the
format, number, and distribution of copies. One
unbound copy must be submitted to the School.
These copies must be submitted before candi-
dates can be recommended for the award of the
degree. Otherwise, the awarding of the degree
will be delayed. The Authority to Distribute form
must be bound inside the front cover of the
bound copy. A second Authority to Distribute
form, the National Library's Non-Exclusive Right
to Reproduce Theses, and the University Micro-
films Inc. (UMI) Subject Category form must be
submitted with the unbound copy. The unbound
copy will be returned to the University Library
after a microfiche copy has been made by UMI.
The Library will arrange for the binding of these
copies which will be deposited in the University
Library. Candidates will be charged $15.00 for
the binding of the thesis. All theses copies must
have an abstract included. Theses that do not
conform to the guidelines for preparation of the
unbound copy for microfilming, for preparation of
the abstract and thesis for reproduction in
Dissertation Abstracts International, and for
binding will not be accepted by the School or by
UMI. For more information about binding, visit
the Current Students’ section of the SGS Web
site www.sgs.utoronto.ca for “Guidelines for the
Preparation of Theses for Microfilming and
Binding”.

Further details about doctoral theses may be
found in Section 2 Degree Regulations under
Doctor of Philosophy, Final Oral Examination.
Master’s Thesis
Required copies of the master’s thesis must be submitted by the candidate to the relevant graduate unit, which should be consulted with regard to format, number of copies, and deadlines for submission. After successful completion of the candidate’s final examination within the graduate unit, the original thesis copy, which must be unbound, together with an abstract of 150 words maximum, the Authority to Distribute form, the National Library’s Non-exclusive Licence to Reproduce Theses form, and the UMI Subject Category form must be forwarded to the School with the recommendation for the awarding of the degree. The degree recommendation form cannot be approved until the unbound copy is received in the School. The copy of the master’s thesis, with its 150-word abstract, is then sent to University Microfilms Inc., the National Library’s microfilming agent, with the Non-exclusive Licence to Reproduce Theses form signed by the author, authorizing the National Library to microfilm the thesis and to make microfiche available on demand. A microfiche copy is deposited at UMI in Michigan. UMI will also include a copy of the abstract in the listings of Masters Abstracts International. To offset the cost incurred by the National Library, a fee of $37 is charged; it is paid by the student at the time the thesis is submitted to the School.

“Guidelines for the Preparation of Theses for Microfilming and Binding” are accessible on the Web at www.sgs.utoronto.ca under the Current Students section.

Degree Recommendations
When all requirements for a graduate degree program have been fulfilled, the graduate unit is required to submit a recommendation to the School of Graduate Studies indicating that the program has been satisfactorily completed.

Convocation Ceremonies
Convocation ceremonies are held twice a year, in the spring and fall. Students may attend the ceremony following completion of their degree requirements. The Coordinator of Student Services of the School of Graduate Studies submits the names of the graduands to the Office of Convocation. This office advises the student regarding procedures for the convocation ceremony and is responsible for issuing diplomas.

Graduate degrees may also be conferred in absentia in March, upon the request of the student.

INTELLECTUAL PROPERTY

Telephone: (416) 978-7833
Fax: (416) 978-5821
E-mail: monique.mcnaughton@utoronto.ca
Web: www.rir.utoronto.ca/utech/
www.innovationsfoundation.utoronto.ca/
www.sgs.utoronto.ca/current/policies/intelliproperty.asp

Intellectual Property arising from research at the University is normally owned by the property’s creator(s) and the University. Except where otherwise determined by a separate third-party agreement, the University’s Inventions Policy allows creators to assume full ownership of the intellectual property they create. Principal Investigators have an obligation to inform students if they are involved in research funded under agreements that grant intellectual property rights to a sponsor.

Prior to commercialization, every invention, including software, must be reported to the University of Toronto Research Services (UTRS). If the creator(s) choose to assume full ownership, the University will assign its ownership interest to the creator(s) in return for certain undertakings, including returning to the University 25% of the proceeds from commercialization.

Among the various commercialization options available to creator(s) is the support offered through the Innovations Foundation. The Innovations Foundation is a subsidiary corporation of the University. It was established to assist in patenting, marketing, and commercializing inventions. The services of the Innovations Foundation are provided under an agreement negotiated between the owners of the intellectual property and the Foundation in exchange for a share of future revenue.

Researchers are advised that public disclosure of any kind (written, verbal, or electronic) of an invention prior to the filing of a patent application may severely damage its commercial value. Confidential disclosure to the University does not constitute a public disclosure.

Copies of the Inventions Policy, the Copyright Policy, the Confidential Disclosure Form, and the SGS Guidelines on Intellectual Property for Graduate Students and Supervisors are available from UTRS, from the Web sites, and from the Innovations Foundation. For more information, visit the Web sites listed above.
RESEARCH ETHICS

The University Policy on Ethical Conduct in Research requires each academic division to formulate its own guidelines. The divisional guidelines apply to graduate students enrolled in graduate units within those faculties. The SGS Guidelines for Ethical Conduct in Research cover students in the School's centres and institutes. Copies of the policy are available from the Office of the Coordinator of Student Services.

POLICY ON ACADEMIC SANCTIONS FOR STUDENTS WHO HAVE OUTSTANDING OBLIGATIONS TO THE UNIVERSITY

Academic sanctions are applicable to any student who has an outstanding obligation to the University. Recognized obligations are as follows:

1. tuition fees
2. academic and other incidental fees
3. residence fees and other residence charges
4. library fines
5. bookstore accounts
6. loans made by colleges, faculties or the University
7. health service accounts
8. unreturned or damaged instruments, materials, and equipment
9. orders for the restitution, rectification, or the payment of damages, fines, bonds for good behaviour, and requirement of public service work imposed under the authority of the Code of Student Conduct.

The following academic sanctions will be imposed on students who have outstanding recognized financial obligations to the University.

1. Statements of results or official transcripts of record, or both will not be issued.
2. The University will not release the official document (called the diploma) which declares the degree earned, nor provide oral confirmation or written certification of degree status to external enquirers. Indebted graduands will be allowed to walk on stage and have their names appear on the convocation program.
3. Registration will be refused to a continuing or returning student. Payments made by continuing or returning students shall be applied first to outstanding University debts, and second, to current fees.

CODE OF BEHAVIOUR ON ACADEMIC MATTERS

The Governing Council of the University of Toronto has approved a Code of Behaviour on Academic Matters applying to members of the University. Below are extracts from the Code covering offences, procedures, and sanctions. The full text of the Code is available on the University of Toronto Web site at www.utoronto.ca/govcnc/pap/alphapol.htm. The Code is enforced by the Dean, the Provost, and the University Disciplinary Tribunal. In cases involving graduate students, the divisional dean is the Dean of the School of Graduate Studies.

A. Preamble

The concern of the Code of Behaviour on Academic Matters is with the responsibilities of all parties to the integrity of the teaching and learning relationship. Honesty and fairness must inform this relationship, whose basis remains one of mutual respect for the aims of education and for those ethical principles which must characterize the pursuit and transmission of knowledge in the University.

What distinguishes the University from other centres of research is the central place which the relationship between teaching and learning holds. It is by virtue of this relationship that the University fulfills an essential part of its traditional mandate from society, and, indeed, from history: to be an expression of, and by so doing to encourage, a habit of mind which is discriminating at the same time as it remains curious, which is at once equitable and audacious, valuing openness, honesty and courtesy before any private interest.

This mandate is more than a mere pious hope. It represents a condition necessary for free enquiry, which is the University's life blood. Its fulfilment depends upon the well being of that relationship whose parties define one another's roles as teacher and student, based upon differences in expertise, knowledge and experience, though bonded by respect, by a common passion for truth and by mutual responsibility to those principles and ideals that continue to characterize the University.

This Code is concerned, then, with the responsibilities of faculty members and students, not as they belong to administrative or professional or social groups, but as they cooperate in all phases of the teaching and learning relationship.

Such cooperation is threatened when teacher or student forsakes respect for the other—and for others involved in learning—in
favour of self-interest, when truth becomes a hostage of expediency. On behalf of teacher and student and in fulfilment of its own principles and ideals, the University has a responsibility to ensure that academic achievement is not obscured or undermined by cheating or misrepresentation, that the evaluative process meets the highest standards of fairness and honesty, and that malevolent or even mischievous disruption is not allowed to threaten the educational process.

These are areas in which teacher and student necessarily share a common interest as well as common responsibilities.

**B. Offences**

The University and its members have a responsibility to ensure that a climate that might encourage, or conditions that might enable, cheating, misrepresentation or unfairness not be tolerated. To this end, all must acknowledge that seeking credit or other advantages by fraud or misrepresentation, or seeking to disadvantage others by disruptive behaviour is unacceptable, as is any dishonesty or unfairness in dealing with the work or record of a student.

Wherever in this Code an offence is described as depending on "knowing", the offence shall likewise be deemed to have been committed if the person ought reasonably to have known.

**B.I.**

1. It shall be an offence for a student knowingly:
   (a) to forge or in any other way alter or falsify any document or evidence required by the University, or to utter, circulate or make use of any such forged, altered or falsified document, whether the record be in print or electronic form;
   (b) to use or possess an unauthorized aid or aids or obtain unauthorized assistance in any academic examination or term test or in connection with any other form of academic work;
   (c) to personate another person, or to have another person personate, at any academic examination or term test or in connection with any other form of academic work;
   (d) to represent as one’s own any idea or expression of an idea or work of another in any academic examination or term test or in connection with any other form of academic work, i.e., to commit plagiarism;
   (e) to submit, without the knowledge and approval of the instructor to whom it is submitted, any academic work for which credit has previously been obtained or is being sought in another course or program of study in the University or elsewhere;
   (f) to submit any academic work containing a purported statement of fact or reference to a source which has been concocted.

2. It shall be an offence for a faculty member knowingly:
   (a) to approve any of the previously described offences;
   (b) to evaluate an application for admission or transfer to a course or program of study by reference to any criterion that is not academically justified;
   (c) to evaluate academic work by a student by reference to any criterion that does not relate to its merit, to the time within which it is to be submitted or to the manner in which it is to be performed.

3. It shall be an offence for a faculty member and student alike knowingly:
   (a) to alter or falsify any academic record, or to utter, circulate or make use of any such forged, altered or falsified record, whether the record be in print or electronic form;
   (b) to engage in any form of cheating, academic dishonesty or misconduct, fraud or misrepresentation not herein otherwise described, in order to obtain academic credit or other academic advantage of any kind.

4. A graduate of the University may be charged with any of the above offences committed knowingly while he or she was an active student, when, in the opinion of the Provost, the offence, if detected, would have resulted in a sanction sufficiently severe that the degree would not have been granted at the time that it was.

**B.II** **Parties to Offences**

1. (a) Every member is a party to an offence under this Code who knowingly:
   (i) actually commits it;
   (ii) does or omits to do anything for the purpose of aiding or assisting another member to commit the offence.
(iii) does or omits to do anything for the purpose of aiding or assisting any other person who, if that person were a member, would have committed the offence;

(iv) abets, counsels, procures or conspires with another member to commit or be a party to an offence; or

(v) abets, counsels, procures or conspires with any other person who, if that person were a member, would have committed or have been a party to the offence.

(b) Every party to an offence under this Code is liable upon admission of the commission thereof, or upon conviction, as the case may be, to the sanctions applicable to that offence.

2. Every member who, having an intent to commit an offence under this Code, does or omits to do anything for the purpose of carrying out that intention (other than mere preparation to commit the offence) is guilty of an attempt to commit the offence and liable upon conviction to the same sanctions as if he or she had committed the offence.

3. When a group is found guilty of an offence under this Code, every officer, director or agent of the group, being a member of the University, who directed, authorized or participated in the commission of the offence is a party to and guilty of the offence and is liable upon conviction to the sanctions provided for the offence.

C. Procedures in Cases Involving Students

At both the divisional level and the level of the University Tribunal, the procedures for handling charges of academic offences involving students reflect the gravity with which the University views such offences. At the same time, these procedures and those which ensure students the right of appeal represent the University's commitment to fairness and the cause of justice.

C.I.(a) Divisional Procedures

Note: Where a student commits an offence, the faculty in which the student is registered has responsibility over the student in the matter. In the case of Scarborough and Erindale Colleges, the college is deemed to be the faculty.

1. No hearing within the meaning of section 2 of the Statutory Powers Procedure Act is required for the purposes of or in connection with any of the discussions, meetings and determinations referred to in C.I.(a), and such discussions, meetings and determinations are not proceedings of the Tribunal.

2. Where an instructor has reasonable grounds to believe that an academic offence has been committed by a student, the instructor shall so inform the student immediately after learning of the act or conduct complained of, giving reasons, and invite the student to discuss the matter. Nothing the student says in such a discussion may be used or receivable in evidence against the student.

3. If after such discussion, the instructor is satisfied that no academic offence has been committed, he or she shall so inform the student and no further action shall be taken in the matter by the instructor, unless fresh evidence comes to the attention of the instructor, in which case he or she may again proceed in accordance with subsection 2.

4. If after such discussion, the instructor believes that an academic offence has been committed by the student, or if the student fails or neglects to respond to the invitation for discussion, the instructor shall make a report of the matter to the department chair or through the department chair to the dean. (See also section C.I.(b) 1.)

5. When the dean or the department chair, as the case may be, has been so informed, he or she shall notify the student in writing accordingly, provide him or her with a copy of the Code and subsequently afford the student an opportunity for discussion of the matter. In the case of the dean being informed, the chair of the department and the instructor shall be invited by the dean to be present at the meeting with the student. The dean shall conduct the interview.

6. Before proceeding with the meeting, the dean shall inform the student that he or she is entitled to seek advice, or to be accompanied by counsel at the meeting, before making, and is not obliged to make, any statement or admission, but shall warn that if he or she makes any statement or admission in the meeting, it may be used or receivable in evidence against the student in the hearing of any charge with respect to the alleged offence in question. The dean shall also advise the student, without further comment or discussion, of the sanctions that may be imposed under section C.I.(b), and
that the dean is not obliged to impose a sanction but may instead request that the Provost lay a charge against the student. Where such advice and warning have been given, the statements and admissions, if any, made in such a meeting may be used or received in evidence against the student in any such hearing.

7. If the dean, on the advice of the department chair and the instructor, or if the department chair, on the advice of the instructor, subsequently decides that no academic offence has been committed and that no further action in the matter is required, the student shall be so informed in writing and the student’s work shall be accepted for normal evaluation or, if the student was prevented from withdrawing from the course by the withdrawal date, he or she shall be allowed to do so. Thereafter, the matter shall not be introduced into evidence at a Tribunal hearing for another offence.

8. If the student admits the alleged offence, the dean or the department chair may either impose the sanction(s) that he or she considers appropriate under section C.I.(b) or refer the matter to the dean or Provost, as the case may be, and in either event shall inform the student in writing accordingly. No further action in the matter shall be taken by the instructor, the department chair or the dean if the dean imposes a sanction.

9. If the student is dissatisfied with a sanction imposed by the department chair or the dean, as the case may be, the student may refer the matter to the dean or Provost as the case may be, for consideration.

10. If the student does not admit the alleged offence, the dean may, after consultation with the instructor and the department chair, request that the Provost lay a charge against the student. If the Provost agrees to lay a charge, the case shall then proceed to the Trial Division of the Tribunal.

11. Normally, decanal procedures will not be examined in a hearing before the Tribunal. A failure to carry out the procedures referred to in this section, or any defect or irregularity in such procedures, shall not invalidate any subsequent proceedings of or before the Tribunal, unless the chair of the hearing considers that such failure, defect or irregularity resulted in a substantial wrong, detriment or prejudice to the accused. The chair will determine at the opening of the hearing whether there is to be any objection to an alleged defect, failure or irregularity.

12. No degree, diploma or certificate of the University shall be conferred or awarded, nor shall a student be allowed to withdraw from a course from the time of the alleged offence until the final disposition of the accusation. However, a student shall be permitted to use University facilities while a decision is pending, unless there are valid reasons for the dean to bar him or her from a facility. When or at any time after an accusation has been reported to the dean, he or she may cause a notation to be recorded on the student’s academic record and transcript, until the final disposition of the accusation, to indicate that the standing in a course and/or the student’s academic status is under review. A student upon whom a sanction has been imposed by the dean or the department chair under section C.I.(b) or who has been convicted by the Tribunal shall not be allowed to withdraw from a course so as to avoid the sanction imposed.

13. A record of cases disposed of under section C.I.(a) and of the sanctions imposed shall be kept in the academic unit concerned and may be referred to by the dean in connection with a decision to prosecute, or by the prosecution in making representations as to the sanction or sanctions to be imposed by the Tribunal, for any subsequent offence committed by the student. Information on such cases shall be available to other academic units upon request and such cases shall be reported by the dean to the Secretary of the Tribunal for use in the Provost’s annual report to the Academic Board. The dean may contact the Secretary of the Tribunal for advice or for information on cases disposed of under section C.II. hereof.

14. Where a proctor or invigilator, who is not a faculty member, has reason to believe that an academic offence has been committed by a student at an examination or test, the proctor or invigilator shall so inform the student’s dean or department chair, as the case may be, who shall proceed as if he or she were an instructor, by analogy to the other provisions of this section.

15. In the case of alleged offences not covered by the procedures above and not involving the submission of academic work, such as those concerning forgery or uttering, and in cases involving cancellation, recall or suspension of a degree, diploma or certificate, the procedure shall be regulated by analogy to the other procedures of this section.
C.I.(b) Divisional Sanctions

1. In an assignment worth ten percent or less of the final grade, the department chair may handle the matter if:
   (i) the student admits guilt; and
   (ii) the assignment of a penalty is limited to at most a mark of zero for the piece of work.
   If the student does not admit guilt, or if the department chair chooses, the matter shall be brought before the dean.

2. One or more of the following sanctions may be imposed by the dean where a student admits to the commission of an alleged offence:
   (a) an oral and/or written reprimand;
   (b) an oral and/or written reprimand and, with the permission of the instructor, the resubmission of the piece of academic work in respect of which the offence was committed, for evaluation. Such a sanction shall be imposed only for minor offences and where the student has committed no previous offence;
   (c) assignment of a grade of zero or a failure for the piece of academic work in respect of which the offence was committed;
   (d) assignment of a penalty in the form of a reduction of the final grade in the course in respect of which the offence was committed;
   (e) denial of privileges to use any facility of the University, including library and computer facilities;
   (f) a monetary fine to cover the costs of replacing damaged property or misused supplies in respect of which the offence was committed;
   (g) assignment of a grade of zero or a failure for the course in respect of which the offence was committed;
   (h) suspension from attendance in a course or courses, a program, an academic division or unit, or the University for a period of not more than twelve months.
   Where a student has not completed a course or courses in respect of which an offence has not been committed, withdrawal from the course or courses without academic penalty shall be allowed.

3. The dean shall have the power to record any sanction imposed on the student's academic record and transcript for such length of time as he or she considers appropriate. However, the sanctions of suspension or a notation specifying academic misconduct as the reason for a grade of zero for a course shall normally be recorded for a period of five years.

4. The Provost shall, from time to time, indicate appropriate sanctions for certain offences. These guidelines shall be sent for information to the Academic Board and attached to the Code.

C.II.(a) Tribunal Procedures

1. A prosecution for an alleged academic offence shall be instituted by the laying of a charge by the Provost against the accused. This is done when the student does not admit guilt; when the sanction desired is beyond the power of the dean to impose; when the student has been found guilty of a previous offence; or when the student is being accused simultaneously of two or more different offences involving more than one incident.

2. No charge shall be laid except with the agreement of the dean concerned and of the Provost, after consultation between the Provost and the Discipline Counsel.

3. A charge shall be in writing, addressed to the accused, signed by or under the authority of the Provost and filed with the Secretary. It shall contain a statement that the student is charged with having committed an offence specified therein, with sufficient particulars of the circumstances to enable the student to identify the alleged act or conduct giving rise to the charge.

4. Upon receipt by the Secretary of a charge, a prosecution for an alleged academic offence shall be instituted by the laying of a charge by the Provost against the accused. This is done when the student does not admit guilt; when the sanction desired is beyond the power of the dean to impose; when the student has been found guilty of a previous offence; or when the student is being accused simultaneously of two or more different offences involving more than one incident.

5. Withdrawal of a student from a course or program of study shall not preclude or affect any prosecution before the Tribunal in respect of an alleged academic offence.

6. The proceedings at a hearing, including the evidence and the verdict of the panel shall be recorded by the Secretary by means of a tape recording, stenographic reporter or other reliable means.

7. The procedures of the Tribunal shall conform to the requirements of the Statutory Powers Procedure Act, Revised Statutes of Ontario, 1990, Chapter S. 22, as amended from time to time.
8. The Tribunal may, from time to time, by a majority of its members, make, adopt and modify rules governing its procedures which are not inconsistent with the provision hereof, and all such rules and modifications shall be reported to the Academic Board for information.

9. The onus of proof shall be on the prosecutor, who must show on clear and convincing evidence that the accused has committed the alleged offence.

10. The accused shall not be compelled to testify at his or her hearing.

11. The divisions of the Tribunal are:
   (a) Trial; and
   (b) Appeal.

12. The members of the Trial Division of the Tribunal shall consist of a Senior Chair, two Associate Chairs and up to fifteen co-chairs, appointed by the Academic Board.

13. No presiding member of the Trial Division of the Tribunal shall be a full-time student or a full-time member of the teaching staff or a member of the administrative staff.

14. The Senior Chair, Associate Chairs and co-chairs, shall be legally qualified.

15. The Senior Chair shall be the chair of the Tribunal and either the Senior Chair, an Associate Chair or a co-chair, as selected by the Secretary, shall preside at trial hearings of the Tribunal.

16. Trial hearings of the Tribunal involving students registered at Scarborough College shall normally be held on the Scarborough campus of the University and those involving students registered at Erindale College shall normally be held on the Erindale campus of the University.

17. (a) The Tribunal shall,
   (i) hear and dispose of charges brought under the Code;
   (ii) report its decisions for information to the Academic Board;
   (iii) make recommendations to the Governing Council as contemplated by the Code;
   (iv) advise the Academic Board, from time to time, on policy and procedures with respect to the Code; and
   (v) determine its practice and procedures, subject to the provisions hereof.
   (b) Where it is considered to be warranted by the circumstances, the chair of a hearing may in his or her discretion award costs of any proceedings at trial, and may make orders as to the party or parties to and by whom and the amounts and manner in which such costs are to be paid.

18. Hearings in the Trial Division of the Tribunal shall be by a hearing panel composed of three persons, of whom one shall be a student, one shall be a faculty member and the third shall be the Senior Chair, an Associate Chair or a co-chair of the Tribunal.

19. The members of each panel (other than the chair) shall be drawn from a pool consisting of at least 15 students who are not also faculty members and at least 15 faculty members who are not students. The members of such pool shall be appointed by the Secretary, drawn from the various academic divisions and units of the University, and shall serve for a period of two years. The appointments shall be renewable upon invitation by the Senior Chair of the Tribunal.

20. Panel members for each case shall be selected by the Secretary who shall exercise due discretion in excluding members who may know either the accused or the circumstances of the alleged offence. Generally, student members will not be drawn from the same program of study as the accused. Faculty members from the department in which an offence is alleged to have occurred will be excluded from the panel.

21. Either the accused or the prosecution may challenge prior to the hearing, and the chair of the hearing may disqualify any prospective panel member for cause which in his or her opinion justifies such disqualification.

22. At trial hearings of the Tribunal,
   (a) the chair of the hearing shall determine all questions of law and has a vote on the verdict and sanction; and
   (b) the panel shall determine all questions of fact and render a verdict according to the evidence.

23. Where, after a charge has been laid by the Provost but before a Tribunal hearing takes place, the accused admits the alleged offence, the Provost may refer the matter either (i) to the
32. The duties of the Secretary and assistants shall be determined by the Senior Chair and members of the Tribunal and reported to the Academic Board for information.

33. Where anything is required by the Code to be done by or with the Secretary, it may be done by or with the Secretary or any of his or her assistants.

C.II.(b) Tribunal Sanctions

1. One or more of the following sanctions may be imposed by the Tribunal upon the conviction of any student:
   (a) an oral and/or written reprimand;
   (b) and oral and/or written reprimand and, with the permission of the instructor, the resubmission of the piece of academic work in respect of which the offence was committed, for evaluation. Such a sanction shall be imposed only for minor offences and where the student has committed no previous offence;
   (c) assignment of a grade of zero or a failure for the piece of academic work in respect of which the offence was committed;
   (d) assignment of a penalty in the form of a reduction of the final grade in the course in respect of which the offence was committed;
   (e) denial of privileges to use any facility of the University, including library and computer facilities;
   (f) a monetary fine to cover the costs of replacing damaged property or misused supplies in respect of which the offence was committed;
   (g) assignment of a grade of zero or a failure for any completed or uncompleted course or courses in respect of which any offence was committed;
   (h) suspension from attendance in a course or courses, a program, an academic unit or division, or the University for such a period of time up to five years as may be determined by the Tribunal. Where a student has not completed a course or courses in respect of which an offence has not been committed, withdrawal from the course or courses without academic penalty shall be allowed;
   (i) recommendation of expulsion from the University. The Tribunal has power only to recommend that such a penalty be imposed. In any such case, the recommendations shall be made by the Tribunal to the President for a recom-
CODE OF STUDENT CONDUCT

Non-academic offences are defined in the University’s Code of Student Conduct, the full text of which is available on the University of Toronto Web site at www.utoronto.ca/govcncl/pap/alphapol.htm. Extracts from the Code, provided below, are printed in ordinary type. References in square brackets are to original section numbering in the Code.

[B.] Offences

The following offences constitute conduct that shall be deemed to be offences under this Code, when committed by a student of the University of Toronto, provided that such conduct

(i) has not been dealt with as failure to meet standards of professional conduct as required by a college, faculty or school; and

(ii) is not specifically assigned to the jurisdiction of the University Tribunal, as in the case of offences described in the Code of Behaviour on Academic Matters; or to another disciplinary body within the University of Toronto, as in the case of sexual harassment as described in the Policy and Procedures: Sexual Harassment; or to a divisional disciplinary body, such as a residence council or a recreational athletics disciplinary body; or is covered under these policies but which is deemed by the head of the division to be more appropriately handled by the Code of Student Conduct; and

(iii) except as otherwise provided herein, occurs on premises of the University of Toronto or elsewhere in the course of activities sponsored by the University of Toronto or by any of its divisions; and

(iv) has not been dealt with under provisions for the discipline of students with respect to University offices and services whose procedures apply to students in several academic divisions, such as University residences, libraries or athletic and recreational facilities.

1. Offences Against Persons

(a) No person shall assault another person sexually or threaten any other person with sexual assault.

(b) No person shall otherwise assault another person, threaten any other person with bodily harm, or knowingly cause any other person to fear bodily harm.

(c) No person shall knowingly create a condition that unnecessarily endangers the health or safety of other persons.

(d) No person shall threaten any other person with damage to such person’s property, or knowingly cause any other person to fear damage to her or his property.

(e) No person shall engage in a course of vexatious conduct that is directed at one or more specific individuals, and

[...]

mandation by him or her to the Governing Council. Expulsion shall mean that the student shall be denied any further registration at the University in any program, and his or her academic record and transcript shall record this sanction permanently. Where a student has not completed a course or courses in respect of which an offence has not been committed, withdrawal from the course or courses without academic penalty shall be allowed. If a recommendation for expulsion is not adopted, the Governing Council shall have the power to impose such lesser penalty as it sees fit.

(j) (i) recommendation to the Governing Council for cancellation, recall or suspension of one or more degrees, diplomas or certificates obtained by any graduate; or

(ii) cancellation of academic standing or academic credits obtained by any former student who, while enrolled, committed any offence which if detected before the granting of the degree, diploma, certificate, standing or credits would, in the judgment of the Tribunal, have resulted in a conviction and the application of a sanction sufficiently severe that the degree, diploma, certificate, standing, credits or marks would not have been granted.

2. The hearing panel shall have the power to order that any sanction imposed by the Tribunal be recorded on the student's academic record and transcript for such length of time as the panel considers appropriate.

3. The Tribunal may, if it considers appropriate, report any case to the Provost who may publish a notice of the decision of the Tribunal and the sanction or sanctions imposed in the University newspapers, with the name of the student withheld.
48 General Regulations
Code of Student Conduct

that is based on the race, ancestry, place of origin, colour, ethnic origin, citizenship, sex, sexual orientation, creed, age, marital status, family status, handicap, receipt of public assistance or record of offences of that individual or those individuals, and that is known to be unwelcome, and that exceeds the bounds of freedom of expression or academic freedom as these are understood in University polices and accepted practices, including but not restricted to, those explicitly adopted.

Note: Terms in this section are to be understood as they are defined or used in the Ontario Human Rights Code. Vexatious conduct that is based on sex or sexual orientation is considered an offence under the University’s Policy and Procedures: Sexual Harassment. If the Sexual Harassment Officer believes, after consultation with relevant parties, that a complaint based on sex or sexual orientation would be better handled under the Code of Student Conduct, the Officer may refer the matter to the appropriate head of division.

(f) (i) No person shall, by engaging in the conduct described in subsection (ii) below,
whether on the premises of the University or away from the premises of the University,

cause another person or persons to fear for their safety or the safety of another person known to them while on the premises of the University of Toronto or in the course of activities sponsored by the University of Toronto or by any of its divisions, or cause another person or persons to be impeded in exercising the freedom to participate reasonably in the programs of the University and in activities in or on the University’s premises,

knowing that their conduct will cause such fear, or recklessly as to whether their conduct causes such fear.

(ii) The conduct mentioned in subsection (i) consists of (a) repeatedly following from place to place the other person or anyone known to them;

(b) repeatedly and persistently communicating with, either directly or indirectly, the other person or anyone known to them;

c) besetting or repeatedly watching the dwelling-house, or place where the other person, or anyone known to them, resides, works, carries on business or happens to be; or
d) engaging in threatening conduct directed at the other person or any member of the family, friends or colleagues of the other person.

2. Disruption
No person shall cause by action, threat or otherwise, a disturbance that the member knows obstructs any activity organized by the University of Toronto or by any of its divisions, or the right of another member or members to carry on their legitimate activities, to speak or to associate with others.

For example, peaceful picketing or other activity outside a class or meeting that does not substantially interfere with the communication inside, or impede access to the meeting, is an acceptable expression of dissent. And silent or symbolic protest is not to be considered disruption under this Code. But noise that obstructs the conduct of a meeting or forcible blocking of access to an activity constitutes disruption.

3. Offences Involving Property
(a) No person shall knowingly take, destroy or damage premises of the University of Toronto.

(b) No person shall knowingly take, destroy or damage any physical property that is not her or his own.

c) No person shall knowingly destroy or damage information or intellectual property belonging to the University of Toronto or to any of its members.

(d) No person, in any manner whatsoever, shall knowingly deface the inside or outside of any building of the University of Toronto.

(e) No person, knowing the effects or property to have been appropriated without authorization, shall possess effects or property of the University of Toronto.

(f) No person, knowing the effects or property to have been appropriated without authorization, shall possess any property that is not her or his own.

g) No person shall knowingly create a condition that unnecessarily endangers or
4. Unauthorized Entry or Presence
No person shall, contrary to the expressed instruction of a person or persons authorized to give such instruction, or with intent to damage or destroy the premises of the University of Toronto or damage, destroy or steal any property on the premises of the University of Toronto that is not her or his own, or without just cause knowingly enter or remain in on any such premises.

5. Unauthorized Use of University Facilities, Equipment or Services
(a) No person shall knowingly use any facility, equipment or service of the University of Toronto contrary to the expressed instruction of a person or persons authorized to give such instruction, or without just cause.
(b) No person shall knowingly gain access to or use any University computing or internal or external communications facility to which legitimate authorization has not been granted. No person shall use any such facility for any commercial, disruptive or unauthorized purpose.
(c) No person shall knowingly mutilate, misplace, missfile, or render inoperable any stored information such as books, film, data files or programs from a library, computer or other information storage, processing or retrieval system.

6. False charges
No person shall knowingly or maliciously bring a false charge against any member of the University of Toronto under this Code.

7. Aiding in the Commission of an Offence
No person shall counsel, procure, conspire with or aid a person in the commission of an offence defined in this Code.

8. Refusal to Comply with Sanctions
No person found to have committed an offence under this Code shall refuse to comply with a sanction or sanctions imposed under the procedures of this Code.

9. Unauthorized Possession or Use of Firearms or Ammunition
No person other than a peace officer or a member of the Canadian Forces acting in the course of duty shall possess or use any firearm or ammunition on the premises of the University of Toronto without the permission of the officer of the University having authority to grant such permission.

Note: The President of the University or another senior officer designated by the President has been given the authority to grant such permission for the premises of the University of Toronto under the authority of the Governing Council of the University. The President has designated the Vice-President, Business Affairs, who is the Chief Administrative Officer of the University to exercise this authority. Various officers of institutions federated with the University of Toronto have authority to grant such permission with respect to the premises of the federated institutions.

[C.] Procedures

1. General
(a) The University shall establish a centrally appointed pool of trained investigating and Hearing Officers, who shall be available to the divisions, at the discretion of the head of the division, if that is considered appropriate or preferable for any reason.
(b) Each division shall appoint an Investigating Officer and a Hearing Officer, who may be student, staff or faculty members from that division.
(c) Whether the incident is investigated locally or centrally, every effort shall be made to conclude the case through to delivery of a final decision within the University within one year from the alleged incident of misconduct.
(d) Pursuant to the provisions of Section D., interim conditions may be imposed by the head of the division.
(e) For the purposes of confidential and central record keeping, a one-page summary of the outcome of all investigations, whether or not they have proceeded to a Hearing, shall be copied to the Judicial Affairs Officer in the Office of the Governing Council.
(f) Whenever possible and appropriate, informal resolution and mediation shall be used to resolve issues of individual behaviour before resort is made to formal disciplinary procedures.

2. Specific
(a) An Investigating Officer shall be appointed for a term of up to three years by the principal, dean or director (hereinafter-
ter called “head”) of each faculty, college or school in which students are registered (hereinafter called “division”), after consultation with the elected student leader or leaders of the division, to investigate complaints made against student members of that division. Investigating Officers shall hold office until their successors are appointed.

(b) A Hearing Officer shall be appointed for a term of up to three years by the council of each division to decide on complaints under this Code made against student members of that division. Hearing Officers shall hold office until their successors are appointed.

(c) If the Investigating Officer is unable to conduct an investigation, or the Hearing Officer is unable to conduct a hearing, or where the head of the division believes on reasonable grounds that the appointed officer is inappropriate to conduct the particular investigation or chair a particular hearing, then the head of the division shall seek an appointment from the central pool for that particular case. If the head of the division intends to request either suspension from registration or expulsion from the University as a sanction in a particular case, or if the case appears to the head of the division to require a Hearing Officer with legal qualifications, then the Senior Chair of the University Tribunal may, on the application of the head of the division, appoint a legally qualified person as Hearing Officer for the particular case.

(d) Where the head of the division has reason to believe that a non-academic offence as defined in this Code may have been committed by a student member or members of the division, the Investigating Officer will conduct an investigation into the case. After having completed the investigation, the Investigating Officer shall report on the investigation to the head of the division. If the head of the division concludes, on the basis of this report, that the student or students may have committed an offence under the Code of Student Conduct, the head of the division shall have the discretion to request that a hearing take place to determine whether the student or students have committed the offence alleged.

(e) The hearing will be chaired by the Hearing Officer. The case will be presented by the Investigating Officer, who may be assisted and represented by legal counsel. If the right to a hearing is waived, or after a hearing, the Hearing Officer will rule on whether the student or students have committed the offence alleged and may impose one or more sanctions as listed below. The accused student or students may be assisted and represented by another person, who may be legal counsel.

(f) Appeals against decisions of bodies acting under authority from the council of a division to hear cases arising out of residence codes of behaviour may be made to the Hearing Officer of the division, where provision therefor has been made by the council of the division.

(g) Appeals against the decision of the Hearing Officer may be made to the Discipline Appeals Board of the Governing Council.

(h) Where the head of a division has reason to believe that a non-academic offence may have been committed by a group of students including students from that division and from another division or divisions, the head may consult with the head of the other division or divisions involved and may then agree that some or all of the cases will be investigated jointly by the Investigating Officers of the divisions of the students involved and that some or all of the cases will be heard together by the Hearing Officer of one of the divisions agreed upon by the heads and presented by one of the Investigating Officers agreed upon by the heads.

[D.] Interim Conditions and Measures

1. Interim Conditions: Ongoing Personal Safety

In those cases where the allegations of behaviour are serious and, if proven, could constitute a significant personal safety threat to other students or members of the University community, the head of the division is authorized to impose interim conditions that balance the need of complainants for safety with the requirement of fairness to the respondent student. The interim conditions are in no way to be construed as indicative of guilt, and shall remain in place until the charges are disposed of under the Code’s procedures.
2. Interim Measures: Urgent Situations
In some circumstances, such as those involving serious threats or violent behaviour, it may be necessary to remove a student from the University. Where the head of the division has requested an investigation by the Investigating Officer and the investigation is pending, the Vice-President & Provost (or delegate) may, on the advice of the head of the division, suspend a student or students temporarily for up to three working days if, in the opinion of the Vice-President & Provost (or delegate), there is reasonable apprehension that the safety of others is endangered, damage to University property is likely to occur, or the continued presence of the student(s) would be disruptive to the legitimate operations of the University. The student(s) shall be informed immediately in writing of the reasons for the suspension and shall be afforded the opportunity to respond. Any such temporary suspension must be reviewed by the Vice-President & Provost (or delegate) within the three-day temporary suspension period, following a preliminary investigation, and either revoked or continued. If the suspension is continued, the student(s) may appeal to the Senior Chair (or delegate), or the Associate Chair (or delegate) of the University Tribunal, who shall hear and decide on the appeal within five days.

[E.] Sanctions
The following sanctions or combinations of them may be imposed upon students found to have committed an offence under this Code.

In addition, students found to have committed an offence may be placed on conduct probation for a period not to exceed one year, with the provision that one or more of the following sanctions will be applied if the conduct probation is violated.

1. Formal written reprimand.
2. Order for restitution, rectification or the payment of damages.
3. A fine or bond for good behaviour not to exceed $500.
4. Requirement of public service work not to exceed 25 hours.
5. Denial of access to specified services, activities or facilities of the University for a period of up to one year.

The following two sanctions, which would directly affect a student’s registration in a program, may be imposed only where it has been determined that the offence committed is of such a serious nature that the student’s continued registration threatens the academic function of the University of Toronto or of any of its divisions or the ability of other students to continue their programs of study. Where the sanction of suspension and/or expulsion has been imposed on a student, the Vice-President & Provost (or delegate) shall have the power to record that sanction on the student’s academic record and transcript for such length of time as he or she considers appropriate.

A sanction of suspension shall be recorded on the student’s academic record and transcript for a period of five years. The following wording shall be used: “Suspended from the University of Toronto for reasons of non-academic misconduct for a period of [length of suspension], [date].”

A sanction of expulsion shall be permanently recorded on a student’s academic record and transcript. The following wording shall be used: “Expelled from the University of Toronto for reasons of non-academic misconduct, [date].”

6. Suspension from registration in any course or program of a division or any divisions for a period of up to one year.

7. Recommendation for expulsion from the University.

POLICY ON ACCESS TO STUDENT ACADEMIC RECORDS
The complete Policy on Access to Student Academic Records is available from the Office of the Coordinator of Student Services, School of Graduate Studies and on the University of Toronto Web site www.utoronto.ca/govcncl/pap/policies/academicrecords.htm. Extracts from the Policy are provided below in ordinary type. References in square brackets are to original section numbering in the Policy.

[3.] Definition of the official student academic record
The official student academic record refers to information relating to a student’s
Access to Student Academic Records

The "official student academic record" shall contain:

(a) (i) personal information which is required in the administration of official student academic records such as name, student number, citizenship, and social insurance number;
(ii) registration and enrolment information;
(iii) results for each course and academic period; and
(b) (i) narrative evaluations of a student's academic performance subsequent to his or her admission, used to judge his or her progress through an academic program;
(ii) basis for a student's admission such as the application for admission and supporting documents;
(iii) results of petitions and appeals filed by a student;
(iv) medical information relevant to a student's academic performance which has been furnished at the request or with the consent of the student concerned;
(v) letters of reference which may or may not have been provided on the understanding that they shall be maintained in confidence;
(vi) personal and biographical information such as address and telephone number.

The "official student academic record" shall be maintained by the University. For each type of information, academic divisions shall designate which document, form or medium contains the official version and how official copies of such information will be identified

[4.] Access to official student academic records

(a) Access by a student
(i) A student may examine and have copies made of his or her official student academic record defined in Section 3 above, with the exception of those portions of the record which comprise letters of reference (Section 3(b)(v)) which have been provided or obtained on the expressed or implied understanding that they shall be maintained in confidence. A student may, however, be advised of the identity of the authors of any confidential letters contained in his or her official academic record.
(ii) A student's request to examine a part of his or her official student academic record shall be made in writing and shall be complied with by the responsible authorities within a division. Such compliance shall occur within 30 days of receipt of the request, or within such lesser period as a division may determine.
(iii) A student has the right to challenge the accuracy of his or her official student academic record with the exception of the material specifically excluded in Section 4(a)(i) and to have his or her official student academic record supplemented with comments so long as the sources of such comments are identified and the official student academic record remains securely within the custody of the academic division. Reference to such comments does not appear on reports such as transcripts or statements of results.
(iv) It is assumed that all documents relating to petitions and appeals (Section 3(b)(iii)) and not provided on the understanding that they shall be maintained in confidence will be retained within a division, and when needed by a student, will be made freely available. In addition, The Statutory Powers Procedure Act, 1971 of Ontario requires that where the good character, propriety of conduct or competence of a party is in issue in any proceedings in a tribunal to which the Act applies (such as the Academic Appeals Committee of the Governing Council), the party is entitled to be furnished prior to the hearing with "reasonable information" of any allegations with respect thereto.

(b) Access by alumni and former students
(i) An alumnus or alumna or a former student may examine and have copies made of the portion of his or her official student academic record as defined in Section 3(a) above.
(ii) A request from an alumnus or alumna or a former student to examine the portion of the official student academic record as defined in Section 3(a) shall be made in writing and shall be complied with by the responsible authorities within a divi-
sion. Such compliance shall occur within 30 days of receipt of the request, or within such lesser period as a division may determine.  

(iii) An alumnus or alumna or a former student shall have the right to challenge the accuracy of his or her official student academic record only under such terms and conditions as the academic division may determine and publish in the divisional calendar.

(c) Access by University staff and members of official University and divisional councils and standing committees
Members of the teaching and administrative staff of the University and members of official University and divisional councils and committees shall have access to relevant portions of an official student academic record for purposes related to the performance of their duties. A staff member requesting information must have a legitimate need to have the requested information for the effective functioning of the position or office. Access to medical information as defined in Section 3(b)(iv) shall be granted to members of the teaching and administrative staff only with the prior expressed or implied consent of the student and, if applicable, in the case of a medical assessment, the originator (physician, etc.) of such.

The Department of Alumni and Community Relations shall have access to appropriate personal information on students and alumni for the purpose of maintaining contact with alumni.

(d) Access by University campus organizations
Recognized campus organizations in the University of Toronto shall have access to the information referred to in Section 3(a)(ii) as well as to the sessional address and telephone number of students named by that organization for the legitimate internal use of that organization. The Students’ Administrative Council, Graduate Students’ Union, Association for Part-time Undergraduate Students, and The Newspaper shall be entitled to publish and distribute within the University community a University-wide directory of students (including undergraduate, graduate, full-time and part-time) giving the sessional address and telephone number of students as long as there is a realistic provision for students to decline to consent to the disclosure of that information.

Names and addresses of students will also be provided to recognized campus organizations for the purpose of distributing information when all of the following conditions are met:
- the name and address information is not released to a third party.
- the name and address information is not used for commercial purposes.
- the organization proposes to distribute information which, in the opinion of the Assistant Vice-President (Planning) and University Registrar, the University would be willing to distribute if reimbursed by the organization.
- the information to be distributed is intended to provide information about the University and is not primarily advertisements for non-University organizations.
- the campus organization agrees to use the name and address information only for the specific purpose for which it was provided.

(e) Access by others
(i) By the act of registration, a student gives implicit consent for a minimal amount of information to be made freely available to all enquirers: the academic division(s), degree program(s) and the session(s) in which a student is or has been registered, degree(s) received and date(s) of convocation.

(ii) Any other information contained in the official student academic record (including any comments generated under Section 4(a)(iii)) shall be released to other persons and agencies only with the student’s prior expressed written consent, or on the presentation of a court order, or in accordance with the requirements of professional licensing or certification bodies, of the Ministry of Colleges and Universities for an annual enrolment audit, or otherwise under compulsion of law. Requests granted to any persons or agencies outside the University for access to a student’s academic record shall be kept on file within a division. The release of the information concerning alumni and former students contained in the portions of the academic record as defined in Section 3(a)(i) shall also be governed by the above provisions.
(iii) General statistical material drawn from academic records not disclosing the identities of students, alumni and former students may be released for research and informational purposes authorized by the University by the academic division maintaining these records.

(iv) In the event that a student, alumnus or alumna or a former student is deceased, the executors of his or her estate shall have access to the official student academic record under the same terms as would the individual if he or she were still living.

(f) Refusal of access
The University reserves the right to withhold access to the statements of results and transcripts of students, alumni and former students who have outstanding debts or obligations to the University in accordance with the Policy on Academic Sanctions for Students Who Have Outstanding University Obligations. The University may also choose not to release the official diploma to such persons nor to provide written or oral certifications of degree on their behalf.

[5.] Custody and retention of official student academic records
(a) Academic records of students are normally under the custodial responsibility of the academic division. Every academic division maintaining official student academic records shall draw up plans for the eventual disposition of their records in consultation with the University Archivist and in accordance with an approved records schedule which is in compliance with this policy.

(b) Those portions of the official student academic record as defined in Section 3(a) shall be maintained permanently. Each academic division’s records schedule shall specify the document, form or medium in which these records will be maintained.

(c) Official student academic records preserved in the University Archives because of their archival value shall become open to researchers authorized by the University seventy-five years after a student has ceased to be registered.

[6.] The University’s responsibilities with reference to the official academic records of students, alumni and former students
(a) Students shall be informed of University policy and divisional procedures with respect to their official student academic records.
(b) Academic divisions, administrative divisions which handle student academic records and campus organizations shall develop administrative procedures in support of this policy.
(c) Academic records shall be kept at all times under appropriate security.

[7.] Notwithstanding other provisions of the Policy on Access to Student Academic Records, for the sole purpose of administering drug and health insurance plans organized by the Students’ Administrative Council, the association of Part-time Undergraduate Students, and the Graduate Students’ Union, a list of the names, addresses, and student numbers of students in the relevant plan may be provided to the insurance company designated by the student organization. The terms and conditions under which the lists will be provided shall be satisfactory to the Vice-Provost, Students, and shall be reflected in formal agreements which ensure that the information is adequately safeguarded and used only for the purpose for which it is provided. A similar list may be provided directly to the student organization under terms and conditions satisfactory to the Vice-Provost, Students, provided the Vice-Provost is satisfied that this is required for the administration of the plan.

SAFETY IN FIELD RESEARCH
The University of Toronto Policy for Safety in Field Research states that working responsibility for safety in field research rests primarily upon the persons who directly supervise and carry out the research on location. Such persons are expected at all times to use good common sense. The University’s concern in this policy is to require that due diligence be exercised by all concerned parties in giving attention to the nature of, and the means for dealing with, the categories of risk that may be associated with each location and kind of field research. It is the intention of the University that participants enter into field research on the basis of their informed understanding of the associated risks and their consent to the means for dealing with such risks.
Students engaged in field research beyond the University’s geographical boundaries should be familiar with the section of the policy which sets out the Requirements for Personal Care, and Responsibilities and Procedures. The full policy is available on the University of Toronto Web site at www.utoronto.ca/govcncl/pap/alphapol.htm.

STATEMENT ON HUMAN RIGHTS

Acknowledging its fundamental and distinctive commitment to freedom of thought, inquiry, and expression, the University of Toronto affirms its commitment to the values of equal opportunity, equity and social justice. In this affirmation, the university
- acknowledges that it conducts its teaching, research and other activities in the context of a richly diverse society;
- recognizes that the attainment of excellence in pursuit of its mission is furthered by the contribution made by persons reflecting this rich diversity;
- acts within its purview to prevent or remedy discrimination or harassment on the basis of race, gender, sexual orientation, age, disability, ancestry, place of origin, colour, ethnic origin, citizenship, creed, marital status, family status, receipt of public assistance or record of offence;
- acts conscientiously in keeping with its own policies and existing legislation related to human rights, such as its Code of Behaviour on Academic Matters, its Policies and Procedures: Sexual Harassment, its Employment Equity Policy and the Human Rights Code of the Province of Ontario.
Degree Regulations

All degree candidates are accepted under the General Regulations of the School of Graduate Studies, as described in section 1, General Regulations.

In this section:

Introduction
Doctor of Philosophy (Ph.D.)
Doctor of Education (Ed.D.)
Master of Arts (M.A.)
Master of Science (M.Sc.)
Master of Applied Science (M.A.Sc.)
Master of Engineering (M.Eng.)
Master of Health Science (M.H.Sc.)
Master of Education (M.Ed.)

Degree regulations not found in this section appear in the SGS Calendar under Section 8, Graduate Programs and on the SGS Web site at www.sgs.utoronto.ca. Graduate unit entries are listed alphabetically with degree regulations appearing under the appropriate entry.

Introduction

Graduate Student Supervision

While the special, collaborative relationship between student and supervisor serves as a foundation for graduate education, particularly at the Ph.D. level, the primary responsibility for graduate programs and their supervision rests with the graduate unit. The Chair of the graduate unit has the principal obligation and authority for exercising these responsibilities, in accordance with the Statute of the School of Graduate Studies, and therefore, for implementing the academic and procedural standards established in the School in 1985/86 in the form of the “Report of the Committee on Ph.D. Supervision” (Endrenyi Report).

Although the report indicates procedures to be followed in the supervision of Ph.D. students, it is clear that these have general applicability for all graduate students to some degree. It is essential that students have access to information relevant to their graduate program of studies, in all domains. Thus each graduate unit will provide students with a document which provides details of all procedures involved with graduate training, a list of members of the graduate faculty with relevant information concerning their participation, fields of expertise and supervision, and a copy of the Endrenyi Report. In addition, updated statements must be made available to students on a regular basis. These will include a list of graduate students (with their general thesis topic, supervisor(s) and advisor(s)), the availability of financial assistance, and relevant information to affected students about the expected absences of their supervisor(s) and/or advisor(s). Any doctoral student who believes that his or her graduate unit is not following the Endrenyi recommendations may inform his or her Coordinator of Graduate Studies or the Associate Dean of the Division.

The academic experience is greatly enhanced if members of the academic faculty, in addition to the direct supervisor, are readily and formally available for consultation and discussion with the graduate student. Therefore, an individual thesis supervisory committee or, as an alternative, an area supervisory committee, should be struck as early as possible for each graduate student, and certainly from the commencement of thesis supervision.

The graduate unit is responsible for adopting a procedure for monitoring the progress of Ph.D. students registered in its programs. The procedure shall contain the following minimum elements, consistent with the "Guidelines for
Degree Regulations 57
Doctor of Philosophy

Departmental Monitoring of Progress Through the Ph.D.:

A supervisory committee consisting of the supervisor and at least two graduate faculty members.

1. The supervisory committee meets with the student at least once per year to assess the student's progress in the program and to provide advice on future work.

2. The committee submits a report detailing its observations of the student's progress and its recommendations.

3. The student must be given the opportunity to respond to the committee's report/recommendations and to append a response to the committee's report.

4. Copies of the report shall be given to the student and filed with the department.

Thesis Topic and Supervision

In those degree programs for which a thesis is part of the requirements, the work upon which the thesis is based must be conducted under the direction of one or more members of the faculty of the School of Graduate Studies.

A student must choose a thesis topic for which the graduate unit in which he or she is registered is able to provide adequate supervision.

A student's choice of thesis topic, as well as his or her choice of supervisor and supervisory committee, is subject to the approval of the graduate unit in which the student is registered.

Transfer Credit

Transfer credit for graduate work completed in another program is limited to one full course or equivalent, or 25 percent of the course requirements for any degree, whichever is greater, provided that the courses have not been credited towards another degree, diploma, certificate, or any other qualifications. Such credit may be given on the recommendation of the student's graduate unit and with the School's approval. Exceptions to the limit are allowed when approved for specific degrees.

Students participating in an approved exchange program on the recommendation of their graduate unit may receive transfer credit for up to 50 percent of the course requirements for their degree. They may also complete language requirements while on the exchange. When recommended by the unit and approved by the Associate Dean, that percentage may be exceeded by doctoral students. In all cases, transfer credit arrangements for exchange program participants must be approved in advance by the Associate Dean or designate.

DOCTOR OF PHILOSOPHY

For specific admission and program requirements, please consult graduate unit entries.

The Council of the School of Graduate Studies has recommended that all graduate units offering the Ph.D. design a four-year program that can be completed on a full-time basis by a student who has a master's degree in a discipline appropriate to the intended field of study. Where graduate units are aware that it may be difficult for students to complete their Ph.D. programs within four years, they have been asked to include a statement to that effect in their calendar entries.

Admission Requirements

1. Four-Year Ph.D. Program

Candidates admitted to this program require a University of Toronto master's degree or equivalent with at least B+ standing from a recognized university in a discipline deemed appropriate to the intended field of study.

2. Five-Year Ph.D. Program

Candidates admitted to this program require a four-year University of Toronto bachelor's degree or its equivalent with at least A- standing from a recognized university in a discipline deemed appropriate to the intended field of doctoral study. Candidates who hold a master's degree in another discipline or require further preparation would also normally be admitted to this program.

3. Candidates with a Phil.M. degree may be admitted with advanced standing to a Ph.D. program.

Registration

1. A candidate for the degree of Doctor of Philosophy must be regularly registered in the School of Graduate Studies in accordance with the procedures of the General Regulations. Ph.D. students must register for every successive session, including summers, on a full-time basis following their first session of registration unless granted a leave of absence. The minimum period of registration is one academic year, that is, three consecutive sessions.

2. A student who is admitted on condition that the requirements for an acceptable master's degree at another university be completed may be permitted conditional registration, unless this is excluded by the terms of the letter of admission. A student who is provisionally registered must submit to the graduate unit, not later than January 31 of the first year of enrolment, official verification of completion of the requirements for the master's degree. If
verification is not submitted by that date, additional requirements may be added to the Ph.D. program.

Transfers
1 Master's to Ph.D.
A candidate may be recommended for transfer from a master's program to a Ph.D. program. In such cases, the student will transfer to a five-year Ph.D. with the years in the master's program being counted as part of the Ph.D. program. The total number of courses required for the Ph.D. is the sum of the normal master's and Ph.D. course requirements unless otherwise specified by the graduate unit.

2 Ph.D. to Master's
Candidates transferring from the Ph.D. to the master's program must complete all of the normal master's degree requirements, or their equivalent, in order to be awarded the master's degree. These transfers are made on the recommendation of the graduate unit and must be approved by the Associate Dean. A second University of Toronto master's degree of the same name will not be conferred unless it is undertaken in a different field of study from the first. Students who transfer from the Ph.D. to the master's program will not be permitted to register subsequently in the Ph.D. program within the same graduate unit unless approved by the SGS Admissions and Programs Committee.

Program Requirements
1 Approval
A candidate shall pursue a program of advanced study and research which must be approved by the graduate unit.

2 Program
Specific program requirements are set by the graduate units and are found in their respective entries. The thesis topic and the name of the supervisor must be submitted by October 15 of the second year. Graduate units may, at their discretion, require an earlier date.

3 Language Requirement
The candidate must have an adequate knowledge of such language or languages, other than English, as are required by the major graduate unit (see individual graduate unit entries for specific requirements).

Testing and certification of languages (including French and German) may be administered by the appropriate language department or by the student's own graduate unit.

The major graduate unit is responsible for ensuring that an acceptable certificate of language competence is deposited in the official student file.

4 Time Limit for Completion of Program Requirements
A candidate for the Ph.D. degree enrolled in a full-time (as opposed to a flexible-time) program will be denied further registration in that program and will have his or her candidacy terminated at the end of the third year of registration, in the case of a four-year program, or at the end of the fourth year of registration, in the case of a five-year program, if by that time, either
a the candidate has not completed all requirements for the degree exclusive of thesis research—including course requirements, language requirements, qualifying departmental examinations—or
b the candidate does not have an approved thesis topic, supervisor, or supervisory committee.

Note: Some graduate units require candidates to register in courses that run continuously throughout the program, e.g., ongoing research seminar courses. The foregoing time limit does not apply to such courses.

In exceptional circumstances, such a candidate may be permitted to register in the program for two further sessions at the discretion of the graduate unit concerned. Continuation beyond two sessions will require the approval of both the graduate unit and the SGS Admissions and Programs Committee.

5 Thesis
The candidate, through the graduate unit, shall present a thesis embodying the results of original investigation, conducted by the candidate, on the approved topic from the major field. The thesis shall constitute a significant contribution to the knowledge of the field and must be based on research conducted while registered for the Ph.D. program.

A thesis should have a coherent topic with an introduction presenting the general theme of the research and a conclusion summarizing and integrating the major findings. Nonetheless, it may contain a collection of several papers. The collection of papers may be expanded or supplemented by unpublished material, scholarly notes, and necessary appendices. In all theses, pagination should be continuous; there should be a common table of contents and an integrated bibliography for the whole thesis. The hard copy of every thesis must be a printed or typed document in a standard form that can be easily microfilmed (see National Library guidelines referred to below).

The thesis should normally be written in English, but with the permission of the School,
a graduate unit may permit, or require, students in that unit to write the thesis in French.

In Division I, the humanities, permission may be given for a thesis to be written in a language other than English or French when the language has been approved for use in theses by the graduate unit concerned. Before such permission can be granted, the graduate unit chair must certify to the School that the candidate has passed a supervised essay-type examination, written in English, that demonstrates his or her proficiency in writing correct and idiomatic English prose. A supplementary abstract of about 5,000 words in English or French must form part of a thesis that is written in a language other than English or French, and no language other than English or French may be used for the conduct of final doctoral examinations.

6 Time for Completion of Degree

All requirements must be completed within six years from first enrolment for the four-year Ph.D. program and within seven years for the five-year Ph.D. program.

In exceptional circumstances, a candidate who has failed to complete all the requirements for the degree within this period may be considered for a maximum of two one-year extensions provided that the graduate unit concerned approves. To qualify for an extension, the candidate must present to the graduate unit concerned the causes for the delay and evidence of substantial progress on the thesis. A candidate who is granted an extension must register as a full-time student. Any extension granted must be calculated as beginning immediately upon the termination of the permitted periods.

Ph.D. students who have not completed the degree before the time limit for the degree or by the end of the extension period may not enrol further but, after an interval, may apply to be reinstated once only as a candidate for the purpose of presenting a thesis and defending it at a final oral examination. The reinstatement must have the approval of both the graduate unit and the SGS Admissions and Programs Committee. It will be for a maximum of 12 months starting September, January, or May. The final oral examination must be held within the 12-month reinstatement period. A student reinstated after the degree time limit will pay a reinstatement fee equivalent to a one session full-time fee (Fall or Winter). No fees will be charged for the sessions after the normal time limit for the degree during which the student was not registered. In the case of a reconvened examination for a student reinstated after the normal time limit for the degree, no fees would be charged, but the student must remain registered.

Flexible-time Ph.D. Degree

Departments may develop, for approval, Ph.D. programs which may be completed on a "flexible-time" basis. Such programs will be offered where there is sufficient demand by practicing professionals for design and delivery of Ph.D. programs that, except for short specified periods of time, permit continued employment in areas related to the fields of research. In these programs, theory and praxis would uniquely engage and inform each other.

The flexible-time Ph.D. differs from the full-time Ph.D. only in design and delivery. Students in a flexible-time program will normally register full-time during the first four years and part-time during subsequent years of the program. Students are required to be registered for every successive session, including summers, following their first session of registration unless granted a leave of absence. The time limit will be specified by the departmental regulations, but not less than six years regardless of the background of students at the time of their admission. Extensions are permitted under existing policy; students granted an extension may register full-time or part-time.

Final Oral Examination

1 The candidate shall defend the thesis at a final oral examination organized by the graduate unit with the cooperation of SGS. The process of scheduling the examination, allowing time for professional appraisal, can be expected to take at least eight weeks at the best of times, and candidates should discuss the timing with the graduate administration of their unit. Candidates should also ascertain whether or not their unit imposes regulations over and above the minimal conditions required by SGS.

2 The graduate unit will notify SGS when the thesis is ready to go forward for examination. In the absence of any particular local procedure, the candidate's supervising committee will advise SGS that the thesis is ready to proceed. In rare cases, a thesis may proceed to examination without the approval of the supervising committee: candidates should contact the Associate Dean of their Division.

3 The thesis will be sent to an appraiser external to the University of Toronto, appointed by SGS on the recommendation of the graduate unit. (The Supervisor of the thesis will propose a list of three or more names of possible external appraisers to the graduate
Arrangements with external appraisers are the responsibility of the graduate unit. In particular, the graduate unit must allow the external appraiser sufficient time to act. The graduate unit must have a copy of the thesis delivered to the appraiser at least six weeks, and preferably longer, in advance of the examination date. Appraisals must be submitted to SGS at least two weeks in advance of the examination date; if they are not, the examination may have to be rescheduled. The graduate unit must also ensure that copies of the thesis are made available to all other voting members of the Examination Committee at least four weeks in advance of the examination date.

4 An Examination Committee, appointed by SGS on the recommendation of the graduate unit, will conduct the Final Oral Examination. The Examination Committee must include at least four, but no more than six, voting members: one to three of the voting members will have served on the candidate’s Supervisory Committee, and at least one voting member will not have been closely involved in the supervision of the thesis. Eligible for inclusion in the latter group are the external appraiser (in person or by audio or video connection), members of the graduate faculty of the candidate’s graduate unit, and members of the graduate faculty of other departments, centres, or institutes of the University. The Examination Committee may include, in addition, up to two non-voting members, who will be members of the graduate faculty of the candidate’s graduate unit or members of the graduate faculty of another graduate unit of the University. A quorum is four voting members. Graduate units must ascertain in advance the willingness of the persons named to act.

The Associate Dean may modify the composition of the Examination Committee to fit exceptional circumstances.

5 SGS will appoint a non-voting Chair to the Examination Committee. The Chair will be a full member or member emeritus of the graduate faculty, holding no appointment to the graduate faculty of the candidate’s graduate unit.

6 The graduate unit is responsible for scheduling the examination, booking a room, and making appropriate technical arrangements.

7 The graduate unit must submit to SGS a Certificate of Completion confirming completion of all other academic requirements, such as language and field requirements; an abstract of the thesis not longer than 350 words; and a copy of the Examination Program.

8 The graduate unit will send a copy of the external appraisal of the thesis to SGS as soon as it is received. The graduate unit is responsible for the distribution of copies of the external appraisal to the candidate (two weeks before the examination) and members of the Examination Committee. To avoid prejudicing the result of the examination, the external appraisal is not to be discussed with the candidate by members of the Examination Committee until the examination takes place, nor should it be distributed beyond that group and the relevant administrative officers.

9 Members of the graduate faculty are entitled to attend the examination, and with the permission of the Chair, they may ask questions of the candidate, but they must withdraw before the Committee’s discussion and vote. A qualified observer may attend, subject to the same restrictions, if the graduate unit has received approval for such attendance in writing beforehand from the Associate Dean. Otherwise the examination is closed to the public. The vote at the examination takes into account both the thesis and the oral defence itself.

10 The Examination Committee represents the Council of the School of Graduate Studies and through it the University. It is therefore responsible for the standard of the Ph.D. degree in this University. Graduate unit examinations held immediately in advance of the final oral must not therefore interfere with attendance at, or thoroughness of, the final examination.

The Committee must evaluate the external appraisal of the thesis, which is to be considered only as an individual opinion to be employed as the committee sees fit. It must examine the candidate on the content and implications of the thesis. Where someone other than the candidate is a co-author of any portion of the thesis, the Examination Committee must be satisfied that the candidate’s personal contribution to the thesis is sufficient to fulfill the requirements of the Ph.D. degree. In addition to determining the adequacy of the thesis, the committee must satisfy itself that the thesis document meets the proper standards of scholarship.

The committee possesses the full authority of the School with respect to the examination.

11 A quorum for the final examination is four voting members, plus the Examination Committee Chair who has no vote. Voting shall be by signed ballot, and the names of the examiners and their respective votes shall be
read to the Examination Committee by the Chair. If a quorum is not present the Chair may delay the examination to obtain a quorum or may postpone the examination to another date.

12 The candidate passes on the first examination:
   a if the decision is unanimous, OR
   b if there is not more than one negative vote or abstention.
If there is more than one negative vote or abstention, adjournment is mandatory.

In the event of adjournment, the Examination Committee must provide the candidate, as soon as possible, with a written statement that indicates the reasons for adjournment and the committee’s requirements for the reconvened oral examination. In addition, the Examination Committee must decide the approximate date of the reconvened examination. The time between the adjourned examination and the reconvened examination should be as short as circumstances will permit and in no case shall exceed one year.

At the reconvened examination, no new committee members shall be added, except for necessary replacements. It is the obligation of the examiners to attend the reconvened examination.

The candidate passes on the reconvened examination:
   a if the decision is unanimous, OR
   b if there is not more than one negative vote or abstention.

No further adjournment will be allowed. If a candidate is not recommended for the degree by the committee in charge of the second examination, the candidate is ineligible for further Ph.D. candidacy at the University. The Examination Committee must provide the candidate, as soon as possible, with a written statement that explains clearly and directly why the examiners found the candidate’s performance unsatisfactory on the written and/or oral components of the examination, as may be relevant.

13 If minor corrections in style are a condition of acceptance of the thesis, the candidate must complete the corrections within one month of the date of the examination, and the supervisor will inform the candidate of the necessary corrections. The supervisor must notify the School of Graduate Studies directly in writing that the required corrections have been made by the candidate, with a copy of the correspondence sent to the graduate coordinator of the graduate unit, before the candidate is recommended for the degree.

14 If minor modifications are a condition of acceptance of the thesis, the Chair of the Examination Committee will appoint a Subcommittee of the Examination Committee (to be approved by the Examination Committee) to supervise the proposed modifications. One member of the Subcommittee is designated by the Chair, with the approval of the Examination Committee, as the Convenor. The Convenor will be responsible for the preparation of a statement detailing the modifications required, which must be completed within three months of the date of the oral examination. The members of the Subcommittee will report on the acceptability of the completed modifications to the Convenor. If all members of the Subcommittee approve the completed modification, the candidate will be passed without the necessity of reconvening the Examination Committee. The Convenor of the Subcommittee must certify in writing to the School of Graduate Studies, within three months of the original examination, that the modifications have or have not been satisfactorily completed. If one or more members of the Subcommittee do not approve the completed modifications, the final oral examination must be reconvened within a year of the date of the original examination.

The Examination Committee must decide the nature of minor modifications, but it is intended that minor modifications should be more than corrections in style and less than major changes in the thesis. A typical example of minor modifications might be clarification of textual material or qualification of research findings and conclusions. The option of acceptance with minor modifications does not apply to the reconvened examination.

15 If major changes are required, the examination must be adjourned and the Committee reconvened after the changes have been made.

16 The University Library authorization form and publication agreement must be signed by the candidate when the final thesis is submitted.
incurred by the National Library, UMI charges $37 per thesis, which is borne by the School.

b. All theses copies must include an abstract. Most importantly, the technical requirements outlined in the guidelines for preparation of the abstract, (copies available in graduate units and the Ph.D. Examinations Office) must be followed in order for the abstract in the unbound copy to be reproduced in Dissertation Abstracts International.

The abstract in the final unbound copy of the thesis must be no longer than 350 words.

The National Library’s Non-exclusive Licence to Reproduce Form must be signed and submitted to the Ph.D. Examinations Office when the final thesis is submitted. The National Library is prepared to allow a student to revoke the permission he/she has accorded to reproduce, loan, distribute, and sell copies of the thesis in the following situation: if a commercial publishing opportunity arises whereby the commercial publisher objects to the non-exclusive licence granted by the student to the National Library. In this case the National Library will request that UMI, after official notification by the student, withdraw the thesis in question from possible future sale and distribution. However, the thesis in microform format will remain in the National Library’s collection and will continue to be made available for on-site consultation and for interlibrary loan.

Publication in microfilm satisfies the School’s publication requirement but does not preclude publication of the thesis or any part of it in a journal or as a monograph. In this case, acknowledgment should be made that the work is part of a thesis at the University of Toronto.

If a thesis includes material from other previously copyrighted works, such as offprints of journal articles, maps, published texts, etc., written authorization from the copyright holder is required in order that they may be filmed. This authorization can be included in the author’s acknowledgements or at the top of the actual document (or first page of a document more than one page in length).

It is the intention of the University of Toronto that there be no restriction on the distribution and publication of theses. However, in exceptional cases, the author, in consultation with the thesis supervisor and with the approval of the chair of the graduate unit, shall have the right to postpone distribution and publication by microfilm for a period up to two years from the date of acceptance of the thesis. In exceptional circumstances and on written petition to the Dean of the School of Graduate Studies, the period might be extended, but in no case for more than five years from the date of acceptance of the thesis unless approved by the Council of the School of Graduate Studies.

Copies of the thesis shall bear the words “Thesis submitted in conformity with the requirements for the Degree of Doctor of Philosophy, Graduate Department of [name of department] in the University of Toronto.” In a prominent place on the title page of the thesis the international copyright notice should appear, which consists of three elements in the same line:

- the letter “C” enclosed in a circle
- the name of the copyright owner, in this case the author
- the year

For further details, students should consult the pamphlet, Guidelines for the Preparation of Theses for Microfilming and Binding.

DOCTOR OF EDUCATION

The Ed.D. program is designed to provide opportunities for more advanced study for those already engaged in a career related to education. Specific admission and program requirements are available through the graduate units.

Admission Requirements

1. A University of Toronto M.Ed. or M.A. in Education, or its equivalent from a recognized university, in the same area of specialization proposed at the doctoral level, completed with standing equivalent to a University of Toronto B+ or better;

2. Ordinarily, one year of professional preparation for education;

3. Successful professional experience in education, or in a relevant field.

A candidate may be enrolled in one of the following graduate units:

- Adult Education and Counselling Psychology
- Curriculum, Teaching and Learning
- Human Development and Applied Psychology
- Sociology and Equity Studies in Education
- Theory and Policy Studies in Education

Program of Study

For specific program and registration requirements, consult the home graduate unit.

1. Normally, a minimum of one Fall Session and one Winter Session of full-time study must be taken consecutively (i.e., Fall Session - September to December, followed by Winter Session - January to April, or Winter Session - January to April, followed by Fall Session - September to December).
2 In most programs, students may begin their studies on a part-time basis.
3 Eight half-courses are required for candidates who have an M.Ed. or M.A. degree or the equivalent in the same area of specialization proposed at the doctoral level. Upon the recommendation of the home department, candidates beginning the degree program on a full-time basis can add prerequisite courses to their program. Otherwise, candidates must take prerequisite courses as “Special Students” at OISE/UT.
An eight half-course Ed.D. program should include at least four half-courses in the home department except as otherwise stated in departmental program descriptions.
4 Candidates in some departments or specializations will be required to take a comprehensive examination. Consult specific departments for details.
5 A thesis embodying the results of original investigation conducted by the student under the direction of an OISE/UT thesis committee. The candidate must file the names of thesis committee members by April 1 of the year following the period of required full-time study.
   The thesis will report the results of a study, which might address theoretical issues applicable to professional concerns and practice, or which might focus directly on the exploitation of knowledge in order to study or influence aspects of educational practice.
   The thesis must conform to the tenets of scholarly writing in a rigorous style of presentation. All students using human subjects in their thesis research must have their thesis proposals reviewed by the OISE/UT-wide Student Education Ethics Review Committee (SEERC) administered by University of Toronto Research Services (UTRS). Please consult the OISE/UT Guidelines for Theses and Orals regarding thesis and ethical review procedures.
6 Candidates undergo a final oral examination on the content and implications of the thesis, to determine the adequacy of both the thesis and its defence by the candidate.
7 All requirements for the Ed.D. must be completed within six years of first enrolment as an Ed.D. candidate.

MASTER OF PHILOSOPHY
The University of Toronto no longer offers programs of study leading to the degree of Master of Philosophy.

MASTER OF ARTS AND MASTER OF SCIENCE

Admission Requirements
1 Candidates are admitted under the general regulations.
2 If the master’s program is not a continuation of a course of study previously pursued as an undergraduate, or if there are deficiencies in meeting graduate unit admission requirements, prerequisite work may be required and the minimum length of program may be extended.

Program of Study
1 Under the direction of one graduate unit, a candidate in this University shall pursue a program of advanced study approved by the graduate unit.
2 All requirements for the degree of M.A. or M.Sc. must be satisfactorily completed within 5 years from first enrolment if the minimum period of full-time registration is up to 12 months and within 6 years from first enrolment if the minimum period of full-time registration is 16 to 24 months.
   For specific admission and program requirements, please see the appropriate graduate unit entry. In advance, prospective candidates should consult the Coordinator of Graduate Studies of the appropriate graduate unit to ensure that the proper undergraduate courses are being taken in preparation for the master’s program.

MAJOR OF APPLIED SCIENCE
The M.A.Sc. degree is intended primarily for those who wish to prepare for a career in research and/or plan to continue their graduate studies through the Ph.D. degree.

Admission Requirements
1 Candidates are accepted under the general regulations.
2 Candidates shall hold the degree of Bachelor of Applied Science of this University or an equivalent degree in engineering. An applicant having a bachelor’s degree in science or applied mathematics may be admitted as a candidate by the graduate unit concerned.
   A candidate may be enrolled in one of the following graduate units:
   - Aerospace Science and Engineering
   - Chemical Engineering and Applied Chemistry
   - Civil Engineering
   - Electrical and Computer Engineering
   - Geology
   - Materials Science and Engineering
   - Mechanical and Industrial Engineering
Program of Study
1 Under the direction of one graduate unit, a candidate in this University shall pursue a program of study approved by the graduate unit. Normally the program shall include not more than three full-year courses or equivalent and the preparation of a research thesis, the latter being the major requirement.
2 The minimum residence requirement for the degree is two sessions (eight months), and the requirements for the degree must be completed within three calendar years.

MASTER OF ENGINEERING
The M.Eng. degree is intended primarily for those who wish to pursue advanced study at the master's level which is especially suited for professional practice.

Admission Requirements
1 Candidates are accepted under the general regulations.
2 Candidates shall hold the degree of Bachelor of Applied Science of this University or an equivalent degree in engineering. An applicant having a bachelor's degree in science or applied mathematics may be admitted as a candidate by the graduate unit concerned.
A candidate may be enrolled in one of the following graduate units:
- Aerospace Science and Engineering
- Chemical Engineering and Applied Chemistry
- Civil Engineering
- Electrical and Computer Engineering
- Materials Science and Engineering
- Mechanical and Industrial Engineering

Program of Study
1 Under the direction of one graduate unit, a candidate in this University shall pursue a program of advanced study approved by the graduate unit. The program shall be equivalent in weight to full-time study for at least two sessions (eight months), and may include a project in addition to lecture and laboratory courses.
2 There is no general residence requirement for the degree. However, a period of residence may be required, depending on the individual candidate's program and experience. This required period shall be as recommended by the graduate unit and approved by the School of Graduate Studies, but shall not exceed two sessions.
3 The degree program must be completed within six calendar years of registration.

MASTER OF HEALTH SCIENCE
The degree of Master of Health Science is offered in the following graduate units:
- Biomedical Engineering
- Health Policy, Management and Evaluation
- Public Health Sciences
- Speech-Language Pathology

Since requirements for these programs differ, students should consult the individual graduate unit entry for details.

MASTER OF EDUCATION

Admission Requirements
1 Candidates are admitted under the general regulations.
2 An appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, completed with standing equivalent to a University of Toronto mid-B or better in the final year. Under exceptional circumstances, for applicants with a three-year degree, equivalency may be demonstrated, for example, through relevant work experience or additional qualifications.
3 A year of professional education for teaching, or the equivalent in pedagogical content, is helpful.
4 At least one year of relevant, successful, professional experience.
   A candidate may be enrolled in one of the following graduate units:
   - Adult Education and Counselling Psychology
   - Curriculum, Teaching and Learning
   - Human Development and Applied Psychology
   - Sociology and Equity Studies in Education
   - Theory and Policy Studies in Education

Program of Study
The minimum program requirements for the M.Ed. degree are as follows:
1 Under the direction of one graduate unit, a candidate undertakes one of three options to complete the program.
   Option I—Coursework only
   Ten half-courses plus a comprehensive examination/requirement.
   Option II—Research Project
   Eight half-courses plus a research project or a Major Research Paper.
   Option III—Thesis
   Six half-courses plus a thesis.
   The M.Ed. degree program requires that a minimum of half of the courses must be taken in the home department unless otherwise specified by the department.
2 All requirements for the degree must be satisfactorily completed within six years of first enrolment.
Schedule of Fees
The annual Schedule of Fees, updated each year in June, is available on the Web at www.fees.utoronto.ca.

Fees and Registration
New and returning students eligible to register will be mailed their fees invoices prior to the registration period. Payment of fees must be made through a Canadian bank, in Canadian funds, payable to the University of Toronto. Holders of certain scholarships, awards, research assistantships, teaching assistantships, or loans may make arrangements through their graduate unit to defer payment of fees. Students are considered to be registered as soon as they have paid academic and incidental fees or have made appropriate arrangements for deferral of payment. By virtue of being registered, a student thereby agrees to abide by all of the academic and non-academic policies, rules, and regulations of the University of Toronto, the School of Graduate Studies, and the graduate unit in which the student is registered.

Academic Fees Structure
Because the course of study in many graduate units is unstructured and often cannot be described in terms of a specific number of courses, and because graduate education more often than not results from the sum of experience encountered during the program, Graduate School fees are assessed on a program basis rather than on the number of courses taken. Degree Students and Special Students who pay the full-time fee for the previous Fall or Winter Session do not pay fees for the Summer Session. However, Part-time Special Students pay summer fees. In addition, part-time degree students who register for the Summer Session but who have not registered in both sessions of the previous academic year, pay summer fees.

A degree program is defined on a sessional basis and the full fee is charged regardless of the number of courses taken. All students (except Special Students not proceeding to a degree) are accepted into a program with a minimum period of full-time registration, specified on the offer of admission. This period establishes the minimum degree fee that must be paid before graduation.

In some masters’ programs where sufficient course credits have been accumulated in a previous program, either here or at another university, a one-session fee may be waived.

In those departments where there is no residence or full-time attendance required and the degree is achieved by course work only, the length of program will be determined by the
number of half-courses (or equivalent full courses) required to complete the degree requirements. For example, for the M.B.A. degree:
Up to 12 half-courses is equivalent to a 1-year program.
13-17 half-courses is equivalent to a 1½-year program.
18-24 half-courses is equivalent to a 2-year program.

Full-Time Student Fee
The full-time student fee is charged to a full-time student for the minimum period of registration and all subsequent registrations.

Dual Registrations
Dual registrants will be required to maintain their registration for the master’s degree, register also for the Ph.D. degree, and pay only the appropriate Ph.D. fees.

Full-Time Students Commencing a Degree Program in January
Students commencing a degree program in January will pay half the appropriate fee for the year.

Summer Students
Students commencing a degree program in the summer and taking courses will pay the Summer Session fee. These fees are in addition to the annual fees which will be assessed in September.
Students commencing a degree program in September but who start research in the preceding summer must pay incidental fees for the Summer Session. Continuing Degree Students and Special Students who pay the full-time fee for the previous Fall or Winter Session do not pay fees for the Summer Session. However, part-time Special Students pay summer fees. In addition, part-time degree students who register for the Summer Session, but who have not registered in both sessions of the previous academic year, pay summer fees.

Part-Time Degree Students
Students undertaking their studies on a part-time basis are required to pay the part-time academic and incidental fees each year they register to the completion of their program.

Part-time students engaging in studies for only one session in the Fall or Winter may pay half the part-time fee.

Special Students
Full-time Special Students pay the full academic fee per annum. Special Students enrolling on a part-time basis will pay for each course or half-course. Fees paid as a special student cannot be applied to any subsequent degree program.

Refund dates are different for part-time Special Students. For details check www.fees.utoronto.ca.

Fees for International Students
In accordance with the recommendations of the Ontario government, certain categories of international students are charged academic fees equal to those for Canadian citizens and Permanent Residents (landed immigrants).

If an international student's status in Canada changes during a session, exemption from the higher fees may be granted. The fees will be adjusted in the current session, provided the status change occurs before November 1 in the Fall Session or before February 1 in the Winter Session. Status changes with supporting documents must be reported to the SGS Student Services Office prior to the above deadlines. However, if a status change effective before these dates is reported with a minor delay, fees adjustment may still be possible.

Incidental Fees
Compulsory incidental fees are charged for the Graduate Students' Union, the Health Service, Hart House, the Athletic Centre, and other student services.

Minimum Payment (for other than those registering for only one session)
The first fee payment is due by the end of the September registration period and consists of 60% of the academic fee and 100% of incidental fees. The balance of the required fees may be paid at any time but is due by April 30 without further notice and is subject to monthly service charges.

Service Charges
All outstanding fees, regardless of the source of payment, are subject to a service charge of 1.5% per month compounded (19.56% per annum), first assessed on October 15 and on the 15th of every month thereafter until paid in full.

Late Registration
Any student registering after the deadline date specified in the Academic Calendar is required
to pay a late registration fee of $44.00 plus $5.00 for each day of delay to a maximum of $94.00.

Balance of Degree Fee
The length of the program, as defined by the graduate unit, into which a student is admitted predetermines the minimum total academic fee that a student must pay prior to graduation. Many part-time master’s students must pay a balance of degree fee prior to graduation.

Full-time students who accelerate their programs and finish the degree requirements in less time than the normal program length must pay a balance of degree fee.

If a student has paid more than the full-time program fee due to the time taken to complete the degree requirements, there will be no refund of fees.

Fees for Graduating Master’s Students
Master’s students who are recommended for graduation by the deadline date for Fall Convocation will not be assessed fees for the Fall Session. Master’s students who miss this deadline but complete their degree requirements by January 31 are required to register for the Fall Session and pay the appropriate fees.

Fees for Final Year Doctoral Students
Academic fees for the final year will be prorated, based on a 12-month academic year, for the number of months that elapse between September and (including) the month in which the final thesis (including corrections required by the final oral examination committee) is submitted to the School of Graduate Studies. Fees for the final month will not be charged if the requirements are met before the 16th day of the month.

Reinstatement Fees
A reinstatement fee equivalent to the one session full-time fee is applied when a student has been reinstated after the time limit for a period of 12 months.

Outstanding Fees and Charges
See General Regulations for policy on academic sanctions for students who have outstanding University obligations.

Receipts for Income Tax
Tuition Fee Certificates are mailed in February. There is a charge of $5.00 for the preparation of duplicate receipts.

Transcripts
An $9.00 fee is charged for each copy of a transcript of record. These fees are subject to change. Transcripts will not be issued for students whose fees are in arrears. Transcripts may be ordered from the University of Toronto Transcript Centre, 100 St. George Street, Toronto, Ontario M5S 3G3 or on-line at www.rosi.utoronto.ca.

Calendars
The entire calendar is accessible on the Web at www.sgs.utoronto.ca. Printed copies of the School of Graduate Studies Calendar may be purchased from the School at a cost of $6.00 each, plus any necessary postage charges. Details and an order form are available at www.sgs.utoronto.ca.
Guaranteed Funding for Doctoral Students

Financial support for graduate students is important to the University of Toronto. For this reason, the university took a major step in the year 2000 towards committing funding of at least $12,000 plus tuition and fees to eligible doctoral-stream students.

U of T is the first Canadian University to offer a guaranteed level of financial support for graduate students pursuing doctoral degrees. The funding will be available for up to five years of study and will help put eligible graduate students at U of T on a more equal footing with their counterparts in the United States.

This objective is to be realized for all graduate units by 2004. However, in many faculties and units this goal has already been met.

The funding package can be made up from a variety of sources including:
- external awards
- internal awards
- research assistantships
- teaching assistantships

Loans are not included in the guarantee and departments with more resources, such as lab-intensive science programs, are able to offer packages well above the guaranteed minimum.

Contact your graduate unit for more details.

Note to OISE/UT students:
Under the merger agreement between the University of Toronto and the Ontario Institute for Studies in Education (OISE), students in OISE/UT are not eligible for many of the internal funding awards described in the calendar. Students are advised to consult OISE/UT about their internal funding opportunities.

1. AWARDS OFFERED BY THE UNIVERSITY
by SGS. The policy should also provide information regarding the various sources of financial support available for students in that unit (e.g., teaching assistantships and research assistantships as well as fellowships); the manner in which support is distributed; the level and duration of support students can expect; and the conditions for renewal of support from year to year.

Graduate units will make their current Awards Policy available to all students in the unit and will ensure that the Fellowships and Loans Office of SGS has a copy of their current Awards Policy.

**Eligibility and Application**

Application dates and information correct at time of printing.

**Currently registered graduate students do not need to complete a separate award application (unless stated in the award description).**

Persons not currently University of Toronto graduate students, as well as registered graduate students intending to proceed to a different graduate degree in the following session, are encouraged to submit an application for admission by a deadline set by your graduate unit.

Candidates submitting admission applications by the deadline are automatically considered for fellowships awarded by the University. No separate award application is required (unless stated in the award description).

However, graduate students are advised to check with their graduate units for more information on the availability of awards, deadlines, and eligibility.

**Value**

See individual award descriptions. Since the value of an endowed award is dependent on the actual income of the fund, it is possible that the amount of the award at the time of payment may be different than that stated in this calendar or other appropriate committees.

Where the amount of the award is not payable from income earned on an endowed fund, payment will be dependent on the receipt of the amount of the annual award from the donor. An award does not include academic fees unless stated.

**Terms**

Nominations for these awards are made by the graduate units; decisions are made by the Fellowships Committee of the School of Graduate Studies or other appropriate committees.

Formal notification of awards is sent to successful applicants starting on or about April 1.

Fellowships are normally paid in one, two, or three instalments (depending on the tenure); the normal times are early September, mid to late January, and mid to late May. Award holders must be registered as full-time graduate degree students before cheques are issued.

A fellowship may be held with a University of Toronto teaching or research assistantship.

In accordance with Section 56 of the Canadian Income Tax Act, award income is taxable. Accordingly, a Canadian Income Tax Return must be filed on or before April 30 of the year following the receipt of the award.

The School of Graduate Studies reserves the right not to award any of the fellowships listed below in any year. Additional terms and conditions may apply for these fellowships.

**University of Toronto Fellowships (UTF)**

**Eligibility Requirements**

There is no eligibility restriction based on citizenship or status in Canada for the University of Toronto Fellowship (UTF).

Students registered in a master’s program beyond the second year are not eligible to hold a UTF. Students admitted to the Ph.D. program on the basis of a bachelor’s degree are not eligible to hold the fellowship beyond year six. Students admitted to the Ph.D. program on the basis of a master’s degree are not eligible to hold a UTF beyond year five. Students may hold a UTF for a maximum of six years.

New students must have at least a B+ average grade in the final year of study in the degree program that is the basis of their admission to their graduate program at the University of Toronto.

Current graduate students must maintain good standing in their program (i.e., must complete the various requirements for their degree program in a satisfactory and timely manner) as determined by the graduate unit’s timeline for completion of the degree.

Students in the third year or higher of their doctoral program must have met with their Ph.D. Supervisory Committee within the last 12 months or sooner if required to do so by the graduate unit. The report of the Supervisory Committee must indicate that the student is making satisfactory progress towards the degree.
Terms of University of Toronto Fellowship Awards

Students must be registered as full-time degree candidates in order to hold a U of T Graduate Fellowship. They must be in full-time attendance for a minimum of 14 weeks in any session during which they hold awards. Except for absences necessary for research purposes, as approved by their graduate unit, they must reside in such geographical proximity as to be able to participate fully in their graduate unit's activities during that session. Students who are not in full-time attendance (except for approved absences for research purposes) for at least 14 weeks in a session will be required to repay the award.

Where programs exist that can be pursued on a part-time or full-time basis, graduate students with a disability that prevents them from enrolling on a full-time basis may, under certain circumstances, be considered for a University of Toronto Graduate Fellowship on the basis of academic merit. For this purpose, disability is defined under the Human Rights Code, Chapter 53, Section 9 (1)(b). To be eligible, a student must provide his or her graduate unit with a letter from the University’s Director of Special Services to Persons with a Disability confirming that part-time study is, in effect, full-time study for that student.

Students dually registered in the third year of a master’s program and first year of a Ph.D. must complete the requirements of the master’s program before the end of the session of dual registration in order to retain their doctoral fellowships; if they fail to complete the master’s program by this deadline, they will be required to repay the award.

Ontario Student Opportunity Trust Fund (OSOTF)

The University has established a number of endowed awards through the Ontario Student Opportunity Trust Fund program. Under the program every donated dollar is matched on a dollar-for-dollar basis by both the Government of Ontario and the University of Toronto. In accordance with the guidelines provided by the provincial government, the OSOTF awards must be given to Ontario residents on the basis of financial need as a primary selection criterion. Many of these OSOTF awards also have additional selection criteria, such as academic merit.

The OSOTF awards are identified below in boldface following the description. Whether explicitly stated in the description below or not, applicants must demonstrate financial need by completing a U of T financial needs assessment form available from the graduate units and the SGS Fellowships and Loans Office.

Ontario Graduate Scholarships

The Government of the Province of Ontario provides 2,000 graduate scholarships tenable at Ontario universities. Each scholarship is valued at $15,000 for a three-term academic year or $10,000 for two terms. The Province of Ontario contributes two-thirds and the student’s university provides one-third. U of T has established a number of endowment funds to contribute its one-third portion of the OGS awards. OGS awards established to date:

Faculty of Applied Science and Engineering
H. Brian White/OGS in the Department of Civil Engineering
iTrans/OGS in the Department of Civil Engineering
Leslie and Lois Shaw/OGS in the Department of Chemical Engineering (2)
Leslie and Lois Shaw/OGS in the Department of Mechanical and Industrial Engineering (2)
PCL/OGS in the Department of Civil Engineering
Seong Lim Gooi/OGS in the Department of Biomedical Engineering
Ted Rogers/OGS in the Department of Electrical and Computer Engineering (19)

Faculty of Architecture, Landscape and Design
Charles and Doreen Lloyd-Duerdoth/OGS
Cho Family/OGS
Pierre Paul Childs, AIA, ACIP/OGS

Faculty of Arts and Science
A. G. Rigg/OGS in Medieval Studies
Associates of the University of Toronto/OGS in History or Political Science
Chikai and Sawa Hiraki Japanese Canadian Buddhist/OGS in East Asian Studies
Chuk Ping Ho and Chiu Wing Ng/OGS in East Asian Studies
Desmond and Marjorie Gourley/OGS in Zoology
Dorothy Louise Ellison, 4T8/OGS in Classics
Dorothy Louise Ellison, 4T8/OGS in English
Dr. F. M. Hill/OGS in Public Policy
Dr. Jay Alan Smith/OGS in Philosophy
Dr. Ranbir Singh Khanna/OGS in Canadian Studies
Dr. Ranbir Singh Khanna/OGS in the Environment
Edward N. Burstynsky/OGS in Linguistics
Edward Sorbara-Urban Development Institute of Toronto/OGS in Geography/Program in Planning
Eva Klein and Leonard Waverman/OGS
Francesco Camiesso/OGS in Italian Studies
Frank Peers/OGS in Political Science
Gordon Russell and Beatrice Bott Dow/OGS in English
Hain/OGS in Philosophy (2)
Hubert Richmond Kemp/OGS in Economics
Imperial Officers Association of Canada/OGS in History and Philosophy of Science and Technology
J. M. Tomczak/OGS in Geography
Jeffrey S. Friedland/OGS in Anthropology
J. Warren Flanagan/OGS in Chemistry
Leon Lee On Wong and Susan Foon Chim/Wong/OGS in Economics
Lorraine Amant Ebers/OGS in Fine Art
Lorie Waisberg/OGS in Comparative Literature
Lupina Foundation/OGS (6)
Margaret Higgins Memorial/OGS in the Humanities and Social Sciences
Metropolitan Toronto Police War Veterans Association/OGS in History
Michael Ralph Walsh/OGS in Geography
Naim S. Mahlab/OGS in Jewish Studies (2)
Neptis Foundation/OGS in Geography (2)
OGS in Anthropology
OGS in Canadian Studies
Paul Fox/OGS in Political Science
Peter Russell/OGS in Political Science
Provost's/OGS in the Humanities and Social Sciences (10)
Robert and Jacqueline White/OGS in Fine Art
Ruth and Harry Carter/OGS in the Environment
Ruth and Harry Carter/OGS in the Humanities and Social Sciences (2)
Stefan Dupré/OGS in Political Science
Ted Hodgetts/OGS in Political Science
Ted Mossman/OGS in Mathematics
Thomas and Beverley Simpson/OGS (14)
Toronto Star/OGS in English
University of Toronto Foundation/OGS (3)

Faculty of Dentistry
Javenthy Soobiah/OGS (3)
Wilson G. Harrison/OGS (3)

Faculty of Forestry
Dean Gordon Cosens/OGS (2)
Forest Soil/OGS

Faculty of Law
Bernard Chernos/OGS
Ontario Institute for Studies in Education of the University of Toronto
Eureka!/OGS (4)
Evan and Helen Lewis/OGS (2)
Frank and Amelia Brierley/OGS
Marisa Sorbara/OGS in Child Studies, Human Development and Applied Psychology
OISE Faculty Association/OGS
OISE/UT/OGS (3)
Power Corporation of Canada/OGS (2)

School of Graduate Studies Centres and Institutes
Metal-Trebbin-De Boni/OGS in Drama
University of Toronto at Mississauga
AstraZeneca Canada Inc./OGS in Biotechnology

Connaught Scholarships
Approximately 25 entrance scholarships are awarded to full-time graduate students with outstanding records who are entering a research-oriented graduate degree program. Open equally to all disciplines. No special application is required. Students are automatically considered when they apply for admission to a graduate unit. Value in 2003-2004: $15,000 plus full tuition fees.

SGS Post Doctoral Fellowships
The program is designed to encourage students’ timely progress through Ph.D. programs in the Humanities and Social Sciences, develop their teaching skills and get their dissertations into published form, enhancing their position in the job market.

Up to 6 fellowships will be awarded each year. Each Fellowship is worth $16,000.

To be eligible to hold the award, students must have completed their Ph.D. dissertations within four years of first registration for the Ph.D. degree (five years for those who entered the doctoral program straight from the bachelor’s). Applicants must have submitted their dissertation and scheduled a final oral examination by August 31. The whole examination process should be completed before October 30. The candidates for this fellowship must also apply for a SSHRC postdoctoral fellowship.

Successful candidates will be expected to teach an undergraduate half-course under supervision in the general area of their dissertation. Such courses should be additional to the unit’s normal offerings.

Recipients are selected by the School from nominations submitted by the graduate department. Awards are announced to the department in late fall. Consult your department for details.

Eleanor Cate Allen Fellowship
Awarded on the basis of academic merit to a full-time degree student registered in the School of Graduate Studies. No application required. Value: to be determined.

Joseph Bazylewicz Fellowships
Awarded on the basis of financial need to students with Polish citizenship in any program at the University of Toronto. Interested students should submit an SGS Bursary Application, a letter of recommendation from a faculty member familiar with their work, and a copy of Polish citizenship to the Fellowships and Loans Office. Deadline: end of April. Value: annual income.

Mary H. Beatty Fellowships
Awarded to outstanding new students as a top-up award to NSERC, SSHRC or CIHR doctoral award. Value in 2003-2004: $5,000.

George Sidney Brett Memorial Fellowship
Awarded on the basis of academic merit. No application required. Value: to be determined.

Andrea and Charles Bronfman Student Awards in Israeli Studies
Awarded by Admissions and Awards to undergraduate and/or graduate students to fund a period of research or study in Israel. Financial need and academic merit may also be considered. Value: annual income of fund.

OSOTF

Evelyn Catherall Scholarship
Awarded to Junior Fellows of Massey College to provide assistance in presenting a colloquium or conference paper. Financial need and academic merit will also be considered. Apply to Massey College. Value: annual income.

OSOTF

Sir Joseph Flavelle Fellowship
Awarded on the basis of academic merit. No application required. Value: to be determined.

Margaret and Nicholas Fodor Fellowship
Awarded to a full-time graduate student who is a Canadian citizen or permanent resident, on the basis of academic merit. Preference given to candidates who choose to pursue graduate studies at the University of Toronto rather than at an American institution, if financial assistance were available.
Hydrogen Systems Graduate Scholarships in Engineering and the Humanities and Social Sciences
Awarded annually to doctoral stream students as follows: two awards to graduate students registered in the Department of Mechanical and Industrial Engineering, one award to a student registered in the Faculty of Applied Science and Engineering, and one award to a student registered in the Humanities or Social Sciences within the broader Hydrogen economy anticipated in the future. Open to both domestic and international students and previous recipients of this award. Value: four awards of approximately $16,200 each.

The Agnes M. Ireland Award
Awarded to female student(s) who, after completing the final year in an honour's program in the Faculty of Arts and Science or the final year in the Faculty of Medicine at the University of Toronto. Must begin a graduate degree program in the School of Graduate Studies within one year of completing undergraduate studies. Awarded to the student(s) who displays an all-round competence (academic and extracurricular activities). Applicants must submit an OSOTF needs assessment form, a statement outlining her plan of study, a letter of recommendation from a faculty member, transcripts, and a C.V. to SGS Fellowships and Loans Office. Deadline: end of April.

Oriana Josseau Kalant Memorial Award
Awarded on the recommendation of the Collaborative Program in Addiction Studies (COPAS) to a student enrolled in the Collaborative Program. Applicants must meet the following eligibility conditions:
1. apply in the spring session immediately following the fall session in which the COPAS core course PAS 3700 Multidisciplinary Aspects of Addictions was taken for credit,
2. submit one of the assignments completed for course credit in PAS 3700 to the award selection committee,
3. this assignment must be accompanied by a letter of application outlining the reasons for enrolling in the COPAS program and future career plans,
4. at the time of application, students must be in good standing in their home department. Apply to the COPAS program by January 31. Value: annual income.

Kwok Sau Po Scholarship
Awarded on the basis of academic merit to an international student from Hong Kong/China enrolled in any full-time program.

Ranjit Kumar Graduate Fellowship
Awarded to a doctoral-stream student, with primary preference for candidates working in a subject area in which the donor has ongoing projects, and secondary preference for students working in a geographical area in which the donor has ongoing projects. Application required.

Mary Elizabeth Mahony Fellowship
This award is open to a male student who, at graduation, was registered in University College in the University of Toronto. Value: approximately $2,000.

Massey College Graduate Fellowships
Awarded to students studying at Massey College on the basis of financial need and academic merit.

Donald Matheson Springer Fellowship
Awarded to a University of Toronto graduate pursuing graduate studies at the University of Michigan. Application is by way of letter, including up-to-date transcripts and a letter of recommendation from a faculty member familiar with the student. Deadline: mid-April. Approximate value: $6,500 CDN.

The McCuaig—Throop Bursary
Through a bequest by the late Edith M. McCuaig, a fund has been established to provide bursaries for students registered full-time in a graduate degree program. The annual income from the estate is used to assist students on the basis of academic performance who require financial assistance, with preference being given to students from the districts of Temiskaming, Cochrane, and Nipissing in Northeastern Ontario.

Sperrin Chant Mesonic Award in Toxicology
Awarded to graduate students in the Institute for Environmental Studies based on financial need. Academic excellence and the character of applicants is also considered. Applications required or recipients must have been identified as having financial need based on the University's criteria. Value: annual income.

OSOTF
Oliver Studentship for Research on Kidney and Kidney-Related Diseases
Awarded to a doctoral student engaged in research on kidney or kidney-related diseases. The selection of a recipient is based on academic merit. Send applications to the Fellowships and Loans Office at the School of Graduate Studies in early spring. Value: same as that of the CIHR grant for the relevant year.

Adel S. Sedra Distinguished Graduate Award
Awarded to a graduate student who demonstrates outstanding academic and extra-curricular leadership. At the time of nomination, candidates must be registered and be in good standing in the second or third year of a doctoral program at the University of Toronto. Deadline: November 29. Value: $25,000.

3M Canada Incorporated Scholarship
One award of $1,000 is available to a student entering a graduate program in the Joseph L. Rotman School of Management or the Faculty of Arts and Science who has maintained grades in the top quartile of the program and needs financial assistance. Application is by way of nomination by the graduate unit. Deadline: end of April.

The UTFA Al Miller Memorial Award
Awarded to graduate students based on financial need and academic merit. Applications are available in spring at the Fellowships and Loans Office. Deadline: August 15.

Vivekananda Graduate Prize
Awarded on the basis of financial need to the graduate student who best exemplifies Vivekananda’s ideal of education. Applicant’s record of academic performance will also be considered. Application is by way of nomination by the graduate unit and must include a statement from the applicant, a letter of recommendation, transcripts, and an OSOTF needs assessment form completed by the nominee. Deadline: end of April. Value: approximately $1000.

Frank M. Waddell Scholarships
Scholarships are open to students from Brant County, Ontario, and are awarded on the basis of academic merit to new or continuing graduate students. Apply by April 30 to Admissions and Awards, 315 Bloor Street West, Toronto, Ontario, M5S 1A1.

AWARDS IN THE HUMANITIES AND SOCIAL SCIENCES

The 1971 School of Library Science Scholarship
Awarded annually to a student in the first year of the M.I.S. program with high academic standing. Value: income from the fund.

ARMA Toronto Chapter Award
Awarded to a full-time student with the highest academic standing in a Records Management course.

Albert S. Abel Memorial Award
Awarded on the basis of scholarship and financial need to a graduate student or students in the Faculty of Law.

Scholarships in Aboriginal Health
Awarded to Aboriginal students, including Status, Non-Status, Metis, and Inuit students, enrolled in graduate programs at the master’s or doctoral level and second-entry programs. All Aboriginal students in these programs (full-time and part-time) are eligible to apply, with preference given to students demonstrating financial need. Eligible students should submit a letter of application listing their estimated costs and sources of funding to First Nations House, Office of Aboriginal Services and Programs, 563 Spadina Avenue, Toronto, Ontario, M5S 1A1 by April 30. Telephone (416) 978-8227 or 978-7960.

Mildred Adams Memorial Scholarship
Awarded to a first year student with financial need to supplement tuition in the Faculty of Information Studies. Apply to the Faculty of Information Studies. Value: annual income. OSOTF

Elisabeth Alfoldi-Rosenbaum Memorial Award
Awarded to any graduate student at the University of Toronto with a demonstrated interest in the areas of Professor Alfoldi-Rosenbaum’s specialization, the Hellenistic through Early Byzantine periods (approximately 300 B.C.-700 A.D.). Financial need and academic merit are also considered. Value: annual income. OSOTF

Alpar (Graduate) Scholarship
Friends and alumni of the Department of Geography have endowed funds to provide an annual scholarship to a graduate student in the department who is making good progress towards
completing degree requirements and has exhausted all other funding sources. The award was established in honour of Mrs. Zehra Alpar, an administrative staff member in the Department of Geography for over 25 years.

**Alumni Entrance Fellowship**
Awarded on the basis of financial need to the most outstanding and desirable applicants of the Rotman School of Management's M.B.A. program. Academic background and work experience will also be considered. Value: annual income.

**John G. Anderson Memorial Bursary**
Family and colleagues of the late John G. Anderson have donated funds for award to a student in the Faculty of Social Work. Value: annual income.

**Mary and Louis Anisman Fellowship**
For a graduate student who intends to write a master’s or doctoral thesis on an aspect of the relationship of notions of fairness to law and its development, with emphasis on the intersection of law and morality. Value: annual income.

**Jeanne Anson-Cartwright Memorial Graduate Fellowship in Music Theory or History**
Awarded to an outstanding graduate student in the Music History or Music Theory program. Apply to the Faculty of Music. Value: annual income.

**David and Ruth Archibald Bursary Fund**
Awarded annually to a registered M.S.W. or Ph.D. student on the basis of financial need and high academic standing. The bursary is made possible through the generous support of Dr. David Archibald, the founder and CEO of the Addiction Research Foundation and recipient of the Order of Canada. Apply to the Faculty of Social Work. Value: $1,000.

**Faculty of Architecture, Landscape, and Design Admission Scholarships**
Awarded to students applying to the Master of Architecture program on the basis of ranked submission to the Admissions Committee. Minimum $500 each. Total awards will not exceed $2,500. Application not required.

**Faculty of Architecture, Landscape, and Design Award**
Awarded to students completing the first year of the Master of Architecture program who achieve overall excellence and exhibit potential for leadership in the field. Three awards in the amount of $1,000 each.

**Faculty of Architecture, Landscape, and Design Award for Excellence in Visual Communication**
Awarded to a student completing the first year of the Master of Architecture program who has demonstrated excellence in three-dimensional visual communication. Value: annual income (approximately $500).

**Faculty of Architecture, Landscape, and Design Scholarship in Landscape Architecture Award**
Awarded to a student concluding the first year of the Master of Landscape Architecture program, based on academic excellence and financial need.

**Barry Lorne Ardiel Scholarship**
Awarded to a student completing the second year of the Master of Landscape Architecture program who exhibits the highest scholastic achievement during that academic session. Application not required. Value: annual income.

**The Art History Graduate Scholarship Fund**
Various donors have established a fund to be awarded to graduate students in the Department of History of Art on the basis of financial need. Academic merit will also be considered. On the recommendation of the Department Chair, in any given year the award may be restricted for travel support. Apply to the Chair of the Department of Fine Art.

**Eric Ross Arthur Scholarship**
Awarded to a student who has the highest academic standing in third year of the Master of Architecture program.

**The Associates of the University of Toronto Travel Award**
Awarded on the basis of financial need to doctoral students in the humanities for research or study outside Canada. Academic merit will also be considered.

**Association of Architects Scholarship**
One scholarship awarded each to a student completing the second year and third year of the Master of Architecture program.

**Marija Aukstaite Bursary**
Candidates must be fluent in the Lithuanian language. Awarded on the merits of a research proposal which aims to contribute to the under-
standing and evaluation of the works of the poet Marija Aukstaite.

Marija Aukstaite Graduate Student Award
Awarded to graduate students whose projects relate to Lithuania in whole or in part. Application available from the Centre for Russian and East European Studies. Value: annual income.

Marija Aukstaite Scholars Award
Awarded to:
1. scholars or graduate students at the University of Toronto in any capacity for research expenses for projects relating to the study of Lithuanian, or
2. to scholars or graduate students from Lithuania in any field of the humanities and social sciences for research at the University of Toronto, or
3. to scholars from any country studying the life and works of poet Marija Aukstaite for visits to the University of Toronto. Preference will be given to those studying Marija Aukstaite.
Value: annual donations of approximately $2,000-$2,500.

Avenor Graduate Award
Avenor Inc., an international forest products company, has endowed funds to provide a scholarship to one or more full-time graduate students at the Centre for Industrial Relations. Value: approximately $4,000.

OSOTF

The Donald K. Aynsley Scholarship
This scholarship was established by the Ontario Labour Relations Board. It is a tribute to Donald Aynsley’s years of service to the labour community as the former Registrar of the Board. The scholarship will be awarded on the basis of academic performance and financial need to a full-time graduate student enrolled at the Centre for Industrial Relations. Value: income.

Shane Baghai Fellowship in English Literature
Awarded on the basis of financial need and academic merit to a graduate student in one of the following areas: Centre for Comparative Literature, Centre for Study of Drama, Department of English, or the Centre for Medieval Studies. Applicant must provide a one- to two-page plan of study, a letter of recommendation, transcripts, and an OSOTF financial needs assessment form to SGS. Deadline: end of April. Approximate value: $10,000.

John D. Barnes Geodetic Sciences Fellowship
Mrs. Odette Barnes has endowed a fund, the income of which provides an award to a University of Toronto graduate who has completed the Geomatics/Land Information Systems program at Erindale College, with a grade average of at least B+ in the final year of full-time undergraduate study. The candidate must be entering the first year of full-time graduate studies in Geomatics/Land Information Systems at U of T.

Winifred G. Barnstead Scholarship
Awarded annually to a student in the first year of the M.I.S. program with high academic standing. Value: income from the fund.

Charles E. Bates Award in Principled Leadership
Award available to continuing students in the full-time or part-time M.B.A. programs. Preference is given to students who have demonstrated leadership potential in previous work experience. Recipients must also exhibit an enhanced commitment to and respect for positive social change within their respective communities. Application required. Value: $5,000.

Bealight Foundation Graduate M.B.A. Fellowship
An entrance award for an M.B.A. student who has demonstrated an enhanced commitment to and respect for social entrepreneurship. Preference will be given to students who have volunteered or work experience in the public and voluntary sectors.

The George Becigneul Memorial Award
In memory of George Becigneul, Mrs. Edith Becigneul has established an annual award of $500. This award is to be offered to a full-time graduate student on the basis of academic performance and need in the Centre for Industrial Relations.

Andre Bekerman Memorial Graduate Scholarship
Funds from the Ontario Public Service Employees’ Union provide an annual donation of $1,500 for award to a graduate student pursuing a degree in the field of archaeology. Academic merit and financial need will be considered.

Louise Bennett Fellowship
Through various donations, an award has been established in honour of Louise Bennett for a graduate student at the University of Toronto or the University of West Indies working in the

and ranking highest within this group of courses.

**The Alexander Brady–MacGregor Dawson Scholarship**
This scholarship is in honour of two of Canada’s most distinguished political scientists, Alexander Brady and MacGregor Dawson, both of whom were members of the former Department of Political Economy for many years. It is awarded annually to an outstanding student in the M.A. or Ph.D. programs in the Department of Political Science. Value: at least $3,000.

**Kenneth and Helen Bray Graduate Fellowship in Music Education**
Kenneth and Helen Bray have established a fellowship for award to an outstanding graduate student in the Music Education program who demonstrates an excellent level of musicianship and teaching ability. Preference is given to Canadian citizens showing a strong interest in teaching in Canadian schools. Apply to the Faculty of Music.

**Rabbi Brickner Scholarship in Social Service**
Awarded to a second year student in the M.S.W. program with high attainment and promise.

**Brickstop Corporation Scholarships**
Awarded to students concluding the first year of the Master of Architecture program on the basis of academic excellence and demonstrated potential for leadership.

**Peter H. Brieger Fellowship**
Awarded on the basis of financial need to graduate students in the Department of History of Art. Academic merit will also be considered. On the recommendation of the Department Chair, in any given year the award may be restricted to travel support. Application must be made to the Department of Fine Art/History of Art. Value: annual income.

**OSOTF**

**Carmen Brock Fellowship**
Awarded on the basis of academic excellence to either M.A. or Ph.D. candidates in the History Department. Strong preference will be given to graduate students from post-secondary institutions in sub-Saharan Africa, the Caribbean Islands, Belize and/or Guyana who will be studying the history of these regions at the University of Toronto. If no candidate meets all the conditions, the History Department will consider candidates who meet the spirit and intention of the award. Value: annual income.

**Craig Brown Traveling Fellowship for History Graduate Students**
Open to any doctoral student registered in the History Department who requires financial support in order to travel to conduct research or present a paper at an academic conference. Granted on basis of need. Value: variable.

**Milton A. Buchanan Fellowships**
Funds from the estate of the late Milton A. Buchanan provide fellowships for award to outstanding candidates, chosen from the Department of Italian Studies and from the Department of Spanish, for thesis research towards the Ph.D. degree at the University of Toronto. Up to $5,000 is available for each department for award to one or more suitable candidates. Applicants must have completed their course work and have passed their written and oral comprehensive examinations. Inquiries should be addressed to the Graduate Coordinator of either the Department of Italian Studies or of Spanish.

**Building Science Conference Award**
Awarded to a student completing the second year of the Master of Architecture program achieving the highest average in Building Science courses.

**David Buller Memorial Scholarship**
Awarded on the recommendation of the Department of History of Art to a graduate student enrolled in the master’s program in Visual Studies. Value: variable.

**Karel and Ellen Buzek Fellowship**
Awarded to graduate students studying at the Centre for Russian and Eastern European Studies (CREEES) on the basis of financial need and academic merit. Application required or recipients must be identified as having financial need based on the University’s criteria. Apply through CREEES. Value: annual income.

**The CCCJ Fiftieth Anniversary First Families Award**
Awarded on the basis of financial need and academic merit to a graduate student writing a research paper or thesis on one of the following topics: issues related to cultural diversity identifying prejudice, its incidence and/or mode for its elimination. Priority will be given to research relevant to the Canadian experience. Applicants must be nominated by their graduate unit and
provide a letter of recommendation, transcripts, a research proposal, and an OSOTF financial needs assessment form to SGS. Deadline: end of April.

OSOTF

CIBC Access Awards
Two awards of $4,500 each are available to students in the full-time or part-time M.B.A. programs with a disability as defined by the Employment Equity Act. Preference will be given to students with financial need.

CIBC M.B.A. Awards
Awards are available to students in the full-time or part-time M.B.A. programs with a disability as defined by the Employment Equity Act. Preference will also be given to students with financial need.

Giovanni Caboto Fellowship in Italian Canadian Studies
On behalf of the Italian Community, Mr. L. Cianfarani has provided funds, the annual income of which is awarded on the basis of financial need to a graduate student with high academic merit working in the field of Italian Canadian Studies. Apply by letter to the Department of Italian Studies. Value: annual income.

OSOTF

Vivian and David Campbell Family Foundation Summer Training Fellowship
The Vivian and David Campbell Family Foundation has provided an annual research award, based on financial need, to assist Museum Studies students in pursuing a twelve-week internship that usually occurs between first and second year of the program. Value: annual income.

OSOTF

Canadian Imperial Bank of Commerce Scholarship in Youth Employment
The Canadian Imperial Bank of Commerce has established scholarships for award to one or more students at the Centre for Industrial Relations. The recipient must be planning to work or be working with the holder of the CIBC Chair in Youth Employment. Eligibility is based on financial need and academic merit. Value: annual income.

OSOTF

Capital Markets Institute ORDCF Graduate Fellowships
Awarded, on the recommendation of the Ph.D. Program Director and the Associate Dean of Management, to Ph.D. students with an interest in capital market research. Value: annual income.

Harold Carter Fellowship
Awarded to one outstanding performing artist studying a stringed instrument in the Graduate Department of Music. The award is tenable at the master's level for a maximum of two years. Application not required. Value: annual income.

John M. Cassaday M.B.A. Fellowship in Marketing
Awarded, on the recommendation of the Rotman School of Management, to a student entering the full-time M.B.A. program with a planned specialization in Marketing. Winners will show good academic standing and possess related work experience. Preference is given to students who demonstrate financial need and who do not hold other awards offered by the School. Application not required. Value: annual income.

Rudolph and Rosalie Cermak Graduate Fellowship
Awarded to students affiliated with the Centre for Russian and East European Studies pursuing advanced study on the Czech Republic. Preference will be given to students required to acquire language training or research abroad in order to complete their degree requirements.

Rudolf and Rosalie Cermak Fellowship
The award will be given to a graduate student in the Centre for Russian and East European Studies pursuing advanced study of the Czech Republic or is coming from the Czech Republic to study or pursue research in the humanities or social sciences.

Dipty Chakravarty Bursary Related to Bengal/Bengali
Recipients may be graduate or undergraduate students undertaking a course of study related to Bengal/Bengali. Financial need and academic merit will be considered. Value: annual income.

OSOTF

Mr. Paul Chan and Mrs. Rose Chan Memorial Scholarship
Anna Chan has endowed a fund, the income of which provides a scholarship to a second year Master of Information Studies student specializing in technical services, who wishes to pursue a career in the area of knowledge or information organization. Financial need and academic merit are considered. Apply to the Faculty of
Information Studies in the fall. Value: annual income.
OSOTF

Jan and Georgina Steinsky-Sehnoutka Graduate Award in Czech Studies
For award, based on financial need, to a master’s or doctoral student whose research focuses on the Czech Republic. The award is intended primarily for a student whose research focuses on the business and economic history of the Czech Republic. In the absence of an eligible candidate, the award may also be given to a student whose research includes the history, linguistics, politics, law, sociology, anthropology, demography, or geography of the Czech Republic. Value: annual income.

Nathan Strauss Graduate Fellowship in the Study of the Legal Profession and Social Change
Awarded to a student enrolled in the LL.M. or S.J.D. program interested in studying the implications of social and/or technological change for the practice of law.

Nathan Strauss Q.C. Essay Prize in Legal Ethics
Awarded to a full-time student in the J.D. or other graduate program in the Faculty of Law who produces an essay of exceptional merit on any issue relating to legal ethics or professional conduct which is published or in the process of being published by the Faculty of Law Review or the University of Toronto Law Journal.

The George Tatham/Geography Alumni Graduate Scholarship
Awarded, on the basis of academic merit, to full-time graduate students in the Department of Geography and the Program in Planning. Value: annual income.

Ernest Tauber Scholarship
Awarded to a student enrolled in the LL.M. or S.J.D. program interested in studying the implications of social and/or technological change for the practice of law.
Alfred P. Tilbe Scholarship
Awarded to a student completing the second year of the Master of Architecture program who achieves overall excellence and exhibits potential for leadership in the field. Awarded on the recommendation of the Faculty of Architecture, Landscape, and Design. Value: annual income.

Alfred P. Tilbe Memorial Fellowship in Professional Practice
Awarded to a student completing the third year of the Master of Architecture program who has achieved excellence in professional practice within the program. Value: annual income.

David Y. Timbrell Award
For award to one full-time graduate student in the field of music theory or musicology on the basis of financial need. Value: annual income. OSOTF

Alan Tonks Planning Scholarships
Friends and colleagues of Alan Tonks, former Chairman of Metropolitan Toronto, have endowed funds for one to four students entering their second year of the M.Sc.Pl. program. The awards are based on academic merit and given to students concentrating their studies in the areas of urban planning, urban transportation, or urban infrastructure. Under exceptional circumstances, an award may be made to an incoming first year student. Financial need may also be considered.

J. Michael Toohey Memorial Scholarship
In memory of the former CEO of Amdahl Canada Ltd., a $2,500 scholarship is awarded annually to a continuing full-time M.B.A. student who, at the end of first year, has attained at least B+ academic standing; demonstrated outstanding leadership abilities; and made a significant, enriching contribution to the educational experience of his/her classmates. Apply to Awards Officer, Rotman School of Management.

Toronto Area Archivists Group Award
Awarded to a full-time or part-time student with the highest academic achievement in the Archival Studies stream of the M.I.St. program in the Faculty of Information Studies.

Toronto Polish–Canadian Hall Award
The award is offered biennially to undergraduate or graduate students in the Department of Slavic Languages and Literatures. Graduate students must be enrolled in a program leading to a doctorate in Polish literature or linguistics. Value: cumulative income.

Jean Arnold Tory Bursary
The estate of Kathleen Jean Tory has established an endowment, the income of which will provide a bursary to a graduate student in the Department of Italian Studies on the basis of financial need. Apply to the Graduate Office, Department of Italian Studies.

Prudence Tracy Scholarship in Medieval Studies
The University of Toronto Press and friends of Prudence Tracy have endowed a fund which provides $1,000, awarded on academic merit, for a full-time graduate student in the Centre for Medieval Studies.

Travelling Fellowship for History Graduate Students
For award, on the basis of financial need, to a doctoral student in the Department of History. The award is given to a student who requires financial support to travel to conduct research or present a paper at an academic conference. Apply to the Coordinator of Graduate Studies, History Department. Value: annual income.

Trenwith and Galipeau French Linguistics Fellowship
Awarded to a graduate student studying French linguistics. Academic merit is the primary criterion. Financial need may also be considered. Eligible students are selected from the Department of French. Application not required. Value: annual income.

Trow Scholarship
Awarded to the student entering the M.Arch. program, based on financial need and demonstrated talent and skills in computation and technical concerns.

Dr. Roman Turko and Yaroslawa Turko Scholarship in Ukrainian Studies
Funds from the estate of Yaroslawa Turko have been used to establish a fellowship for award to undergraduate or graduate students studying courses related to the Ukraine. The award is based on financial need; however, academic merit will also be considered. Value: annual income. OSOTF

William Osborn Twaits Fellowship
The estate of the late William Osborn Twaits provides three or four awards amounting to the total of annual income to Ph.D. students undertaking full-time graduate work in the Rotman School of Management. Awarded on the basis of financial need and academic merit. OSOTF
**Jane Tyerman Award**
Various donors have provided funds to offer an annual award to an Executive M.B.A. student in his/her final year who has contributed the most to the learning experience in his/her class in all aspects of the program.

**Tzu Chi Bursaries in Social Work**
The Buddhist Compassion Relief Tzu Chi Foundation has provided funds to award five bursaries annually, on the basis of financial need, to students enrolled in the Faculty of Social Work who are Canadian citizens or permanent residents, have at least a B average and who are active in the community or in a charitable organization. Apply to the Faculty of Social Work by November 1.

**The U of T – CEU Graduate Student Exchange Program**
Awarded to graduate students participating in an exchange program between the University of Toronto and Central European University. Students from one university visit the other for one semester to continue their studies. Application required. Value: annual income.

**The Ukrainian Heritage Association and Museum of Canada Award in Museum Studies**
An award is offered from the annual income of an endowment established by the Ukrainian Heritage Association and Museum of Canada to a student in the second year of the Museum Studies program with a demonstrated research interest in some aspect of museums and history and/or culture of Ukrainians in Canada. Value: approximately $1,000.

**The Shirley Uldall Memorial Book Prize**
Awarded to a student with financial need in the Centre for South Asian Studies.

**University of Toronto Canadian Credit Management Foundation (CCMF) Fellowship**
For award, on the basis of academic merit, to M.B.A. and Ph.D. students at the Rotman School of Management. Academic merit will also be considered. Value: annual income.

**OSOTF**

**University of Toronto Foundation Graduate Award**
Awarded on the basis of financial need to senior doctoral students attending a conference to present a paper. Award is limited to senior doctoral students in the Humanities or Social Sciences (awarded annually on an alternating basis). Preference is given to students completing their degree in 5 years or less. Students receiving other conference travel awards are not eligible. Nominations should come from the applicant’s graduate unit. Applicants must provide a statement to SGS outlining the purpose of the travel and a letter of support from their supervisor. Deadline: end of April. Approximate value: $600 or the cost of travel, whichever is less.

**University of Toronto Leon Pape Memorial Scholarship**
For award to a graduate student enrolled at the Rotman School of Management on the basis of financial need. Value: annual income.

**OSOTF**

**The University of Toronto Planning Alumni Graduate Scholarship**
Awarded, on the basis of academic merit, to graduate students enrolled in full-time studies in the Department of Geography and the Program in Planning. Value: variable.

**University of Toronto PricewaterhouseCoopers M.B.A. Fellowship**
Annual income awarded, on the basis of academic merit and involvement in the community or undergraduate school, to a student entering the full-time M.B.A. program. Scholarship available only to Canadian citizens. Value: approximately $7,500 per year.

**University of Toronto Women’s Association**
Awarded on the basis of academic merit to a full-time U of T graduate student(s) pursuing doctoral work in the humanities. Preference will be given to a student(s) nearing dissertation completion. Applicants must be nominated by their graduate unit. Deadline: end of April. Approximate value: $500.

**Edward Johns Urwick Memorial Scholarship**
Awarded to a Social Work student, preferably from a rural community, on the basis of merit and financial need. Apply to the Office of the Coordinator of Admissions, Faculty of Social Work, after fall registration. Value: annual income.

**Arthur Vaile Memorial Graduate Prize in Jewish Studies**
Sandy Rotman has generously endowed funds to provide an annual award to graduate students in Jewish Studies. Financial need and academic merit are considered.
George and Helen Vari Fund
Awarded, on the recommendation of the Director of the Centre for Russian and East European Studies, to graduate students participating in the University of Toronto – Central European University Graduate Student Exchange Program. Application required. Value: annual income.

Verma Graduate Award
One or more awards will be made from the annual income of an endowment established through the generous support of the following members of the Verma family: Mahendra, Yoga Shakti, Anil, Savita, Ranjan, Veena, Vikash, Eileen, Arvind, and Ashok. Graduate students at the Centre for Industrial Relations will be eligible for the award which will be based on academic merit and financial need. Value: approximately $5,000.

Vetter Emergency Fund
Awarded to registered students in the Faculty of Social Work in need of financial assistance due to unforeseen circumstances. Apply to the Faculty of Social Work, Office of Student Services and Records. Value: variable.

Stephen Vickers Memorial Award
Awarded to a graduate student in the Department of Fine Art. Financial need and academic merit are considered. Apply to the Chair, Department of Fine Art. Value: annual income.

Richter Usher Vineberg Leadership Scholarship Endowment Fund
Awarded to students in the Master of Management and Professional Accounting program who display leadership and academic achievement.

Peter Walker First Year Planning Scholarship
Mr. Peter Walker, Walker Nott, Dragicevic Associates Limited, alumni, family, friends, and colleagues of the graduate planning program have all contributed to establish this fellowship. For award annually to at least one student entering the second year of the M.Sc. (Planning) program. Value: annual income.

Ward Bursary
One or more bursaries are available to M.S.W. students in need of financial assistance. Awarded on the recommendation of the Council of the Faculty of Social Work. Application not required. Value: up to $600/academic year.

Peter Warrian Graduate Award
One or more awards will be made available from the annual income of an endowment established through the generous support of Peter Warrian. Graduate students at the Centre for Industrial Relations will be eligible for the award which is based on academic merit and financial need. Value: approximately $3,700.

OSOTF

William Waters Award
Provides emergency assistance to students enrolled in any of the Rotman School’s programs. The awards help recipients to meet unanticipated expenses that might otherwise prevent them from completing their programs. Individual awards vary in value based on the recipient’s needs. Apply to the M.B.A., E.M.B.A, or Ph.D. programs office at any time during the academic year. Value: variable.

OSOTF

Gordon M. Watson Entrance Award
For award, on the basis of financial need, to a student entering the M.B.A. program who has successfully completed the Canadian securities course, or equivalent and has work experience in the field of finance, investment or securities analysis. Value: annual income.

OSOTF

John Weinzweig Graduate Scholarship
John Weinzweig and friends have endowed a fund in the Faculty of Music to provide an annual award to a graduating student in composition in the Mus.M. or Mus.Doc. program who exhibits extraordinary creative talent.

Lynn R. Williams Graduate Award
An endowment has been established by the United Steelworkers of America in honour of the many contributions made to the trade union movement in Canada and abroad by Lynn R. Williams. Williams served the Steelworkers as Director for Ontario and Western Canada from 1973–1977, as International Secretary-Treasurer from 1977–1983, and as International President from 1983–1994. The award is based on academic merit, financial need, and the candidate’s interest in working on issues of workplace fairness and social justice. Application and further information is available from the Centre for Industrial Relations. Value: approximately $3,750.

OSOTF
**H. W. Wilson Scholarship**
Awarded annually to one or two students in the first year of the M.I.S. program with high academic standing. Value: $1,000.

**The Hilda Wilson Fellowship in Technology, Information, and Culture**
This award is given to a graduate student whose work focuses on investigations begun by Harold Innis, Eric Havelock, Marshall McLuhan, and other Toronto scholars on the impact of technology on culture. Awarded by the Faculty of Information Studies. Value: annual income. OSOTF

**William John Witemberg Scholarship**
The estate of Roma Elizabeth Jane Ower, daughter of William John Witemberg, has established an award for master's or Ph.D. students in the Department of Anthropology.

**Chancellor Rose Wolfe Scholarship and Native Student Fund**
Friends of Rose Wolfe have endowed a fund, the income of which provides two awards for native graduate students in the Faculty of Social Work. The award is based on proven scholastic ability; financial need may be taken into consideration. Apply to the Faculty of Social Work by September 15.

**Roger N. Wolff Prize**
Various donors have provided funds to offer an annual prize to a graduating M.B.A. student with the highest overall grade point average (GPA) in the academic year.

**Women in Capital Markets (WCM) Heather L. Main Memorial Scholarship**
Women in Capital Markets annually donates $5,000 to first year full-time M.B.A., or third year LL.B./M.B.A. female students available to work a summer internship and finishing their programs the following academic year. Apply through the Joseph L. Rotman School of Management.

**Women's Canadian Historical Society of Toronto Graduate Fellowships in Canadian History**
The Women's Canadian Historical Society has generously endowed funds to provide four annual awards of $2,500 to outstanding Canadians or permanent residents of Canada who enter the master's or doctoral program with a specialization in Canadian History in the Department of History at the University of Toronto.

**Graduate Scholarships in Women's Rights**
Awarded to graduate students in the Faculty of Law from Central or South America, Africa, the Middle East, East or South East Asia with an interest in women's rights. Apply to the Associate Dean, Graduate Studies at the Faculty of Law. Value: annual income.

**A. S. P. Woodhouse Prize**
The A. S. P. Woodhouse Prize is awarded annually to the writer of an outstanding thesis in the Department of English.

**Jean Eleanor Ross Woodsworth Bursary**
Family, friends, and admirers of the late Jean Woodsworth have endowed a fund to establish an award for a graduate student enrolled at the Faculty of Social Work with a demonstrated interest in the area of seniors, women, or Canadian social policy. Value: annual income. OSOTF

**Institute for Work and Health Scholarship**
Awarded on the basis of financial need to one or more students at the Centre for Industrial Relations. Preference will be given to students who have demonstrated past interest in, or expect to pursue research in, the area of work and health. Academic merit will also be considered.

**Institute for Work and Health Scholarship**
This annual award has been established to assist graduate students studying at the Centre for Industrial Relations. Awarded on the basis of academic performance and financial need, preference will be given to students who have demonstrated past interest or expect to pursue work in the area of work and health. OSOTF

**John Yamada Memorial Admission Scholarship and Study Abroad Bursary**
An admission scholarship of $500 is awarded to a student entering the first year of the Master of Architecture program on the basis of ranking by the Admissions Committee on behalf of the Faculty of Architecture, Landscape, and Design. A study abroad bursary is also awarded to student(s) seeking to participate in the Study Abroad program of the four-year Architecture program, based on financial need. Bursary Application Form required.

**The Yip Scholarship**
Awarded to an international Ph.D. student, preferably from China, who is studying at the Faculty of Social Work.
104 Financial Support and Exchange Programs
Humanities and Social Sciences
Mathematical, Physical, Biological and Applied Sciences

Edie Yolles Prize in Sociology
Awarded annually to a student whose Ph.D. dissertation reflects scholarly excellence. Value: $500.

Edie Yolles Prize in Urban Planning
Awarded annually to a student of merit graduating from the University of Toronto Planning Program. A student of merit is not necessarily the one with the highest grades but one who demonstrates a comprehensive approach to planning and has acquired the necessary skills. Value: $500.

George Paxton Young Memorial Prize in Philosophy
Income from funds for this award, first established in 1894, will be distributed among those students in graduate programs in Philosophy who have read papers at philosophy conferences during the previous year.

The Eberhard Zeidler Scholarship
Awarded to a student concluding the first year of the Master of Architecture program on the basis of academic achievement in design in the first and second sessions of the first year.

AWARDS IN THE MATHEMATICAL, PHYSICAL, BIOLOGICAL AND APPLIED SCIENCES

Ontario Graduate Scholarships in Science and Technology (OGSST)
The Ontario Graduate Scholarships in Science and Technology (OGSST) program is designed to encourage excellence in science and technology graduate studies. The program is supported through funds provided by the Province of Ontario and raised by the University of Toronto in the form of private sector endowment. Each OGSST is named after the donor's generous support. Each award has a value of $15,000 per year or $5,000 per session.

Applicants are required to submit the completed OGS application to the graduate units sponsoring the program (most departments in Physical and Life Sciences have OGSST). Check the deadline with the department sponsoring the award program.

Listed below are the OGSST at the University of Toronto. For brevity, the names are shortened from the “The Government of Ontario /John Doe Graduate Scholarship in Science and Technology” to the “John Doe Scholarship”. The following format is used:

Acres Productive Technologies Inc. - Joseph Yonan Memorial Fellowship
Awarded to graduate students showing academic excellence and financial need. Eligible students will be drawn from the Department of Computer Science. Value: annual income.

Alcan Fellowship
This award is offered to any graduate student who has been admitted to the School of Graduate Studies at the University of Toronto in a master’s/doktoral program in mathematics or pure or applied science. Preference will be given to those in the field of metallurgy or materials science. The award is valued at $10,000. The student’s academic record and other qualities which may lead to a successful career in industrial research will be considered.

Management of this program is provided by appropriate Alcan staff at either the Kingston Laboratories, or the Laboratoires de recherche appliquée et Centre de génie expérimental, of Alcan International Limitée, in Arvida. Alcan will contact the fellowship holder shortly after the appointment to arrange a mutually convenient visit to the laboratories to discuss the research.

Alumni Graduate Studies Award
Through a donation of the Pharmacy Alumni Association, an annual award of $5,000 is available to a Pharmacy graduate, preferably from a Canadian university, enrolled in the M.Sc. or Ph.D. in Pharmaceutical Sciences.
American Women's Club of Toronto Scholarship in Speech Pathology
Awarded, on the basis of academic excellence, to graduate students in the Faculty of Medicine, Department of Speech-Language Pathology, Master of Health Science program.

Valerie Anderson Graduate Fellowship
Awarded on the basis of academic merit (research and course work) to an outstanding graduate student in any sub-discipline of Botany. Any member of the Department of Botany may make nominations. The Department's Graduate Studies Committee selects the recipient. Value: annual income.

Kathleen Arpin Doctoral Fellowship
An admission award is offered, on the basis of academic merit, to a full-time, incoming doctoral student in the Department of Nursing Science. Application not required. Nomination is made by the Faculty of Nursing Awards Committee. Value: $2,500 or annual income.

Mary Jane Ashley Award
Friends and colleagues of Dr. Mary Jane Ashley have endowed funds, the income of which provides an award to a student undertaking a program of study in the Graduate Department of Public Health Sciences who is also enrolled in the Collaborative Program in Addiction Studies. Value: annual income.

Carl E. Atwood Graduate Award in Zoology
Family, friends, and colleagues of Professor Carl E. Atwood have established a scholarship for award to a master's or doctoral student studying in Zoology. Value: annual income. OSOTF

D. L. Bailey Award
The family of Dr. D. L. Bailey has provided funds for a $100 annual award for the best Ph.D. proposal presentation by a graduate student in the Department of Botany.

Bank of Montreal Fellowship in Medical Research
Through a generous gift from the Mount Sinai Hospital Foundation of Toronto, a scholarship has been established for award, on the basis of financial need, to a student in the Faculty of Medicine. Value: annual income. OSOTF

Banting and Best Diabetes Centre—Novo Nordisk Award
Awarded, on the basis of financial need, to students in the Faculty of Medicine who are affiliated with the Banting and Best Diabetes Centre. Value: variable

OSOTF

Dr. Robert Duff Barron Graduate Scholarship in Public Health Policy
Awarded to a graduate student enrolled in the M.H.Sc. program in the Department of Health Policy, Management and Evaluation on the basis of academic excellence and leadership in public health policy. Value: annual income.

Dr. P. K. Basu Fellowship in Corneal Research/Eye Bank
Awarded to graduate students in the Department of Ophthalmology on the basis of financial need. First preference will be given to students pursuing studies in corneal research or eye banking. Second preference will be given to students pursuing studies in vision science research. Apply to the Department of Ophthalmology. Value: annual income. OSOTF

Colin Hahnemann Bayley Fellowship in Chemical Engineering
Awarded on the recommendation of the Department of Chemical Engineering and Applied Chemistry to an incoming graduate student who shows academic excellence. The student receives the fellowship during the tenure of his or her graduate studies and will be known as the Colin Hahnemann Bayley Fellow. Value: annual income.

Colin Hahnemann Bayley Fellowship in Chemistry
Awarded on the basis of academic excellence to an incoming graduate student.

The F. E. Beamish Prizes
Three prizes are awarded annually to students for outstanding graduate work, evidenced by a seminar or performance on examinations, in analytical chemistry, inorganic chemistry seminar, and physical chemistry seminar.

Gwen Bell Endowment Fund
Awarded to an occupational therapist entering the Department of Rehabilitation Science based on academic merit and area of research, preferably one that has an application for everyday practice.

The Norman Bethune Awards
Mr. Frederick H. Kahan has donated funds to establish two annual awards. One award is for a graduate student in the first two years of a Ph.D. program in microbiology, and the second
award to microbiology residents in the first or second year microbiology program in the division of infectious diseases. Apply to Chair, Department of Molecular and Medical Genetics (microbiology program).

Paul Biringer Graduate Scholarship
Awarded to a master’s or doctoral graduate student in Electrical and Computer Engineering. Preference will be given to an international student. Apply to the Department of Electrical and Computer Engineering. Value: annual income.

Bloorview Children’s Hospital Foundation Graduate Award
An annual award of $1,500 is offered to a student who is entering the second year of a master’s program in the Graduate Department of Nursing Science and has a clinical interest in physically disabled children and young people. Applications must be submitted by March 31 to the Graduate Department of Nursing Science.

Blyth Fellowship
Awarded to a student in the Department of Mathematics according to the terms and conditions of the University of Toronto Fellowship.

Physics Blyth Fellowship
Awarded to a student according to the terms and conditions of the University of Toronto Fellowship.

Boehringer Ingelheim Prize
Boehringer Ingelheim (Canada) Ltd. sponsors an award for a third, fourth, or fifth year graduate student in the field of organic synthesis or bio-organic chemistry. Candidates must have research published; financial need is considered. Apply to the Graduate Office of the Department of Chemistry by November 30. Value: annual income.

OSOTF

Dr. Claire Bombardier Award for Excellence in Clinical Epidemiology
Awarded to one graduate student enrolled in Clinical Epidemiology and Health Research, Department of Health Policy, Management and Evaluation, Faculty of Medicine, whose field research or written report has been judged as the best by the Clinical Epidemiology Executive Committee. The awardee will be encouraged to make an oral presentation at appropriate academic forums.

OSOTF

The Ruth Bradshaw Award
Colleagues and friends of Ruth Bradshaw, former Director of the Division of Physical Therapy, have established an award, given on the basis of financial need, for a full-time student enrolled in the first year of the M.Sc. program in Rehabilitation Science. The recipient must have graduated from an undergraduate program in physical science and be eligible to practise in Canada. Academic achievement and the relevance of the candidate’s program to physical therapy are considered. Apply to the Department of Rehabilitation Science by September 1.

OSOTF

William Knapp Buckley Award
The Ontario College of Pharmacists has endowed funds, the annual income of which is awarded to a graduate student in the Department of Pharmaceutical Sciences. Financial need and academic merit are considered.

OSOTF

A. F. Buell Prize
The prize is given to a full-time graduate student in the Faculty of Forestry on the basis of academic merit. Value: annual income.

OSOTF

John Bunting Graduate Prize in Chemistry
Awarded on the basis of financial need and academic achievement to a third or fourth year student in the field of physical organic or bio-organic chemistry. The student must have a research publication from his or her graduate studies. Value: annual income.

OSOTF

E. F. Burton Fellowship in Physics
Awarded on the basis of financial need and academic merit to a graduate student in the Department of Physics. The Department may renew the award for one additional year.

OSOTF

L. Butler Graduate Prize in Zoology
Through the generous donation of Dr. Leonard Butler, an award based on academic merit is available to a master’s or doctoral student in the Department of Zoology.

OSOTF

CRND Graduate Student Aid Endowment
An anonymous donor has endowed funds for an annual award to be given to graduate students in CRND (Centre for Research in Neurodegenerative Disease).

OSOTF

Margaret C. Cahoon Memorial Fellowship
Awarded, on the basis of financial need and academic merit, to a graduate student in the
Financial Support and Exchange Programs

Mathematical, Physical, Biological and Applied Sciences

master's (full-time or part-time) or Ph.D. program in the Graduate Department of Nursing Science. Nominations are made by the Faculty of Nursing Awards Committee. Deadline: March 31. Value: annual income.

OSOTF

Kristi Plia Callum Memorial Fellowship in Ovarian Cancer Research
Awarded by the Faculty of Medicine on the basis of financial need and academic excellence. First preference is to graduate students conducting research in familial ovarian cancer. Second preference is to graduate students doing research in ovarian cancer. Value: annual income.

OSOTF

Canada Life Assurance Company Graduate Fellowship in Medical Research
Awarded on the basis of financial need to students supervised by University of Toronto faculty members at the Samuel Lunenfeld Research Institute at Mount Sinai Hospital. Value: variable.

OSOTF

Canadian Almanac and Directory Publishing Book Award
One or more awards are offered, on the basis of academic merit, to a graduate student(s) following a program in the Institute for Environmental Studies. Value: $500.

OSOTF

The Canadian Association of Chain Drug Stores Social/Administrative Pharmacy Thesis Award
Awarded to a student pursuing thesis research in one of the following areas of inquiry: human resources planning, pharmacoeconomics, health outcomes related to primary care, or pharmacy practice. Apply to the Faculty of Pharmacy. Value: $10,000.

OSOTF

Cardiovascular Sciences Collaborative Program Graduate Student Fund
Through a donation of Pfizer Canada Inc., an annual award is available to a graduate student in the Cardiovascular Sciences Collaborative Program in need of financial assistance.

OSOTF

Thelma Cardwell Prize in Research
Awarded on the recommendation of the Department of Occupational Therapy to the graduating student with the highest standing in the research experience course. Value: $200 annually.

Helen Carpenter Doctoral Fellowship
An admission award offered to a full-time incoming doctoral student in the Graduate Department of Nursing Science on the basis of academic merit.

C.A. Chant Fellowship
Open to graduate students in the Department of Astronomy and Astrophysics. Value: $3,500 per term.

Chapnik, Freeman and Friedberg Clinical Scientist Program
Awarded to a third or fourth year resident wishing to pursue advanced research training leading to an M.Sc., M.Ed., or Ph.D. degree at the University of Toronto. The applicant must be a postgraduate M.D. trainee in the Department of Otolaryngology at the University of Toronto. Application required. Value: annual income.

W. Jack Christie Graduate Award in Ecology
Family, friends, and colleagues of Jack Christie have endowed funds for award, on the basis of academic merit, to a master’s or doctoral student studying in Zoology. Value: annual income.

OSOTF

C.S. ‘Rufus’ Churcher Graduate Award in Zoology
Dr. C.S. Churcher has provided funds for award annually to a graduate student studying comparative anatomy, functional morphology, adaptive and taxonomic evolution, paleontology, and stratigraphic distribution or evolution of vertebrates in Zoology.

OSOTF

Ciba Specialty Chemical, Inc. Graduate Student Award
Ciba Specialty Chemicals, Inc. has endowed funds, the annual income of which is awarded annually to a graduate student in the Department of Chemistry. Preference is given to a student studying polymers and materials. The award is given on the basis of financial need and academic merit.

OSOTF

Dr. Bernhard Cinader Graduate Scholarship in Immunology
Awarded annually to a student in the Department of Immunology on the basis of academic merit and financial need. Apply to the Faculty of Medicine.

The Hardi Cinader Prize
Friends and colleagues of Dr. H. Cinader have endowed a fund, the income of which provides
an annual award to the graduate student completing the doctoral program in Immunology who best reflects the goals and life of Dr. Cinader—a broad scientific culture and an interest in both the sciences and the arts.

City of Toronto Graduate Scholarship for Women in the Mathematics
Awarded to a female student enrolled in a master’s or doctoral program in mathematics on the basis of financial need, academic merit, and interest in issues related to women in mathematics.

Dr. E. Aileen Clarke Prize
Through an annual donation by the Ontario Cancer Treatment and Research Foundation, a prize of $1,500 is awarded on the basis of academic merit to a second year student in the Master of Science program in Epidemiology whose thesis topic is in the area of cancer epidemiology.

Class of 5T2 Prize
Awarded on the basis of academic merit in the Department of Forestry to a M. Sc. F. or a Ph.D. student specializing in the area of silviculture. Value: annual income.

The Cleghorn Fellowship in Schizophrenia Research
The Clarke Institute of Psychiatry Foundation has provided funds to award, on the basis of financial need, graduate students in the Faculty of Medicine’s Institute of Medical Science. Preference will be given to students pursuing research in schizophrenia. Application required. Value: annual income.

OSOTF

Clinician–Scientist Graduate Program in the Department of Anesthesia
An award is offered annually, on the basis of financial need, to an M.Sc. or Ph.D. student in the clinician–scientist stream in the Department of Anesthesia. Value: annual income.

OSOTF

The Randall Coates Epidemiology Prize
Colleagues and friends of the late Dr. Randall Coates have endowed a fund, the income of which provides an annual award to a graduate student in the Graduate Department of Public Health Sciences (Epidemiology), studying in the area of communicable diseases. Only students who have completed one academic session will be considered. Value: annual income.

Connaught R. J. Wilson Fellowship
Connaught Laboratories Limited has established an award of approximately $10,000 by annual donation to a first-year student in the Department of Public Health Sciences whose career interests lie in the intersection of public health, epidemiology, and health promotion.

Dr. Joe A. Connolly Memorial Award
Family, friends, and colleagues of the late Dr. Joe A. Connolly have endowed a fund, the income of which provides an award to a registered, senior, doctoral student (third year or beyond) who has demonstrated excellence in cell biology research and is involved in extra-curricular activities.

Dr. Joe A. Connolly Memorial OSOTF Award
Awarded on the basis of financial need to a registered Ph.D. student demonstrating excellence in cell biology research.

OSOTF

Leslie Gladstone Cook Memorial Fellowships
One or more awards will be made available from the annual income of an endowment established through the generous support of Alfreda Cook. The awardee(s) will be drawn from the annual pool of applicants to the Department of Chemistry. To be eligible, the incoming graduate student must be travelling from other parts of Canada to Toronto or be attending special conferences in their field or require stipend support based on financial need.

Edith Cosens Endowment Fund
Awarded to graduate students in the Department of Nutritional Sciences on the basis of academic excellence to support and promote the study of and the dissemination of information on community nutrition.

OSOTF

Dean Gordon Cosens Graduate Award
In memory of Professor Gordon Cosens, former Dean of the Faculty of Forestry, Miss Edith Cosens has generously endowed funds to provide an annual award to one or more full-time graduate students registered in the Graduate Department of Forestry. Value: annual income.

Helene and George Coward Award in Gerontology
In memory of his parents, Helene and George Coward, Kenneth Coward has endowed an award of approximately $500 to a graduate student who is engaged in research in the field of
gerontology. Apply by July 15 to the Institute for Human Development, Life Course, and Aging.

Helen L. Cross (nee Colquhuon) Memorial Graduate Scholarship
Awarded on the recommendation of the Department of Chemical Engineering and Applied Chemistry to a graduate student in the program. Preference is given to a female student and, if possible, a female student from Northern Ontario. Application required. Value: annual income.

James F. Crothers Family Fellowships in Peripheral Nerve Damage
Awarded to students in the Faculty of Medicine on the basis of academic excellence and financial need. Preference given to students researching the causes and treatment of peripheral nerve damage, repair, and regeneration. Application required.

Dr. J. R. Cunningham Graduate Fellowship in Cancer Research
This Scholarship was established by The Princess Margaret Hospital Foundation for award to graduate students in the health sciences faculties who are studying with faculty members located at the Ontario Cancer Institute (or its successor) and are engaged in cancer research. Value: variable.

OSOTF

Rosella Cunningham Memorial Fellowship
Awarded to a graduate student in the Department of Nursing Science to prepare candidate for work in public health nursing.

Peter Curtis Memorial Bursary
Family and friends of Peter Curtis, former doctoral student in the Department of Industrial Engineering, have endowed funds to provide one or more awards, on the basis of financial need, to graduate students in the Department of Mechanical and Industrial Engineering.

Dairy Farmers of Canada Graduate Student Fellowships
For award to Faculty of Medicine graduate students, on the basis of financial need, who are studying in the field of nutrition and osteoporosis. Value: annual income.

OSOTF

The Dalton Chemical Laboratories Organic Chemistry Scholarship
Fellowship for a first year graduate student in organic chemistry whose academic performance improved the most between the third and fourth years in the undergraduate program. Value: annual income.

OSOTF

Grant D. Darker Memorial Award
The annual income from donations received from friends and colleagues in memory of Dr. Grant D. Darker is awarded to the outstanding graduate student in the Department of Botany studying in the area of mycology.

Lillian Elfleda Darker Award
The estate of the late Grant Dooks Darker provides an award for a student (or students) enrolled in the Department of Botany in a master’s or Ph.D. program researching some aspect of mycology. The award(s) will be given, on the basis of financial need, to students requiring travel assistance related to their studies.

OSOTF

Wallace A. Delahey Fellowship
Income from a bequest of the late Wallace A. Delahey provides for a fellowship for award to a full-time graduate student in the Faculty of Forestry on the basis of academic merit.

OSOTF

The Dent-Paech Nursing Fellowship
Awarded on the basis of academic merit to a graduate student in the Department of Nursing Science who specializes in mental health nursing.

Michael J. Dignam Graduate Travel Award
Family, friends, and colleagues of the late Professor Michael J. Dignam have established a travel award for graduate students in the Department of Chemistry by November 1. Value: approximately $1,000.

OSOTF

Dr. Rajalakshmi S. Dittakavi and Dr. Prema M. Rao Graduate Awards in Laboratory Medicine and Pathobiology
Two awards are given annually to graduate students in the Department of Laboratory Medicine and Pathobiology. These awards are donated by past and present students of Drs. Rajalakshmi and Rao. One award is given to a graduate student pursuing study and research on the cause, prevention, pathogenesis, and cure of cancer. The second award enables a student to present his or her results on the cause, prevention, pathogenesis, and cure of cancer at the Annual Meeting of the American Association for Cancer Research. Apply by February 1 to the Department of Laboratory Medicine and Pathobiology.
The Maureen Dixon Memorial Award
Friends and colleagues of Maureen Dixon have endowed funds, the annual income of which is awarded to a student in the Department of Health Policy, Management and Evaluation. Awarded on the basis of a proven outstanding contribution to a community health agency such as a district health council or a community service delivery agency (home care, nursing agency, mental health agency, etc.)

The R. M. Dixon Prize
On the recommendation of the Coordinator, Graduate Department of Forestry, given to a full-time graduate student in Forestry pursuing studies in an area related to international forestry. Value: annual income.

Gail Donner Doctoral Nursing Fellowship
Awarded on the basis of academic merit to a full-time or part-time doctoral student in the Department of Nursing Science whose nursing career goals and program reflect a nursing administration/health policy focus.

William J. Dowkes Graduate Bursary
Awarded on the basis of financial need to a student in the Department of Chemical Engineering and Applied Chemistry.

George F.D. Duff Graduate Fellowship in Mathematics
Awarded on the basis of academic merit to a graduate student in the Department of Mathematics. Financial need may also be considered. Value: annual income.

T. W. Dwight Prize
Awarded on the basis of academic merit to a student in the Master of Forest Conservation degree program in the Faculty of Forestry. Value: annual income.

Earthroots Ontario Forest Conservation Award
Awarded to a student in the Master of Forest Conservation degree program on the basis of the best proposal for a research paper on Ontario forest or wildlife conservation issues in connection with course FOR 3008H Research Paper in Forest Conservation. The proposal must be relevant to current Ontario forest and wildlife issues and should include implications for conservation and an outline of areas for future research on this issue.

Eco-Tec Founder’s Fellowship
Eco-Tec Limited has donated funds to provide one award for a graduate student pursuing environmental graduate studies in the Department of Chemical Engineering and Applied Chemistry. Value: annual income.

OSOTF

Harold S. Edmonds Scholarship
Awarded to a full-time graduate student in the Faculty of Forestry on the basis of academic achievement.

Education Safety Association of Ontario Graduate Scholarship in Health and Safety
Awarded to M.Sc. or Ph.D. students enrolled in the Research Degree Program of the Department of Public Health Sciences, Faculty of Medicine. First preference will be given to students conducting research in health and safety under the supervision of a faculty member affiliated with the Institute for Work and Health. Secondary preference will be given to students conducting research in health and safety. Value: annual income.

H. V. Ellsworth Graduate Fellowship in Mineralogy
The estate of the late Mabel J. Ellsworth provides for an annual fellowship to a deserving graduate student in the Department of Geology pursuing research in the general field of mineralogy.

OSOTF

Florence Emory Fellowship
This fellowship, provided by the School of Nursing Alumni Association, is open to students who enrol full-time in a master's program in the Graduate Department of Nursing Science who intend to work in the nursing field following graduation, and who are in financial need. The fellowship has a minimum value of $3,500 for the academic session. Apply in writing by March 31 to the Faculty of Nursing Awards Committee.

OSOTF

Epidemiology and Biostatistics Award Endowment
The award will be given annually on a rotational basis to one or more students studying in one of the following programs in the Graduate Department of Public Health Sciences, starting with:

1. Epidemiology (M.Sc./Ph.D.)
2. Public Health Sciences and Epidemiology (M.H.Sc.)
3. Biostatistics (M.Sc./Ph.D.)

The selection will be based on financial need and academic merit.
Etkin Medal for Excellence
Awarded to a graduate student in Aerospace Studies for outstanding performance in the field of flight mechanics, on the recommendation of the Director, Institute for Aerospace Studies. Students in all years of graduate study are eligible. The medal is presented on the occasion of the annual G.N. Patterson lecture or on some other suitable occasion.

A. Murray Fallis Graduate Award in Zoology
For award on the basis of academic merit to a master's or doctoral student studying in Zoology.

Bernhard Fernow Graduate Fellowships
Awarded to graduate students in the Faculty of Forestry on the basis of academic merit and financial need. Value: annual income.

Michael S. Fieldus Memorial Award
Family, friends, and colleagues of the late Michael S. Fieldus have endowed a fund, the income of which provides an annual award to one or more graduate students in the Department of Astronomy and Astrophysics. The award is made on the basis of outstanding and sustained contribution to academic achievement, teaching, or service to the Department of Astronomy and Astrophysics.

P. C. Finlay Q. C. President’s Fellowships in Geology
Awarded to two or more graduate students studying geology who intend, upon graduation, to take their expertise to developing nations. Value: annual income.

Kenneth C. Fisher Fellowship
Awarded to a highly qualified graduate student in the Department of Zoology engaging in comparative physiology research. Value: annual income.

Frank Fletcher Memorial Fund
The estate of Lorna Yates Fletcher has established a scholarship for award to a graduate student, on the basis of financial need, who is pursuing study and research into the cause and cure of cancer. Value: annual income.

Teresina Florio Graduate Scholarship in Cancer Research
Awarded to graduate students enrolled in the Faculty of Medicine working on translational aspects of cancer biology with an interest in developing alternative strategies of cancer treatment beyond conventional chemotherapy or radiotherapy. Submit applications with a research proposal consistent with the conditions of this scholarship. Value: annual income.

Forestry Memorial Admission Fellowship
Awarded on the basis of academic merit to the student entering the professional Master of Forestry Conservation degree program with the highest cumulative GPA in an undergraduate program. Value: annual income.

Fortran Traffic Systems Graduate Scholarship in Transportation Research
Awarded to a doctoral-stream student in the Department of Civil Engineering. Preference will be given to a student in Transportation Engineering.

Reino A. Freeman Fellowship
Mrs. Ellen B. Freeman has endowed funds to provide an annual fellowship to a highly qualified incoming graduate student in the Department of Zoology engaging in parasitology research.

Sheila Freeman Graduate Award in Zoology
Colleagues and friends of Sheila Freeman have endowed a fund, the income of which provides an award to a graduate student in Zoology. Value: annual income.

Dr. Thomas L. Friedlich Memorial Award in Surgical Science
The friends and family of Dr. Thomas L. Friedlich have endowed funds, the income of which is awarded, on the basis of financial need, to a neurosurgery resident in the Department of Surgery pursuing a graduate degree in neuro-oncology. In the event that two or more qualified candidates exist, preference will be given to the one demonstrating clinical excellence and compassionate patient care. Apply through the Institute of Medical Science.

Frist–Jus Annual Memorial Award
This scholarship is in honour of the memory of Dr. Juliusz, Dorota and Zofia (Zosia) Frist. Awarded, on the basis of financial need and academic performance, to graduate students specializing in the area of psychopharmacology, including neuro-transmitter and neuro-receptor research. Value: annual income.
Dr. Clara Winifred Fritz Memorial Fellowship in Plant Pathology
The estate of Madeleine Alberta Fritz makes possible an annual award, based on academic excellence, to a graduate student studying in the area of plant pathology. Value: annual income.

Margaret and Howard Gamble Research Grant
Awarded on the basis of financial need to students involved in basic science research related to mental retardation.

Duncan L. Gellatly Memorial Award
Family and friends of Duncan Gellatly have established an award to be given every other year to a graduate student demonstrating excellence in virology research. Submit nominations to the Graduate Studies Committee, Department of Botany. Value: annual income.

General Motors Women in Science Mathematics Awards
Recipients may be graduate or undergraduate female students enrolled in a science or mathematics program of study in the academic year in which they receive the award. Financial need and academic merit may also be considered. Apply to the Faculty of Arts and Science Student Awards Committee by March 15 for the upcoming Fall/Winter session. Value: annual income.

Gina Gesser Memorial Award
Relatives, friends, and co-students of Gina Gesser have endowed a fund in her memory, the income of which provides an annual award to a graduate student enrolled in the M.Sc. program in Behavioural Sciences. Preference will be given to outstanding students in the area of gerontology, public policy, equity in health care, and the health concerns of immigrant populations. Financial need will be considered.

The Bernard Ghert Fellowship in Psychiatry
Awarded on the basis of financial need to students in the Psychiatry programs at the Mount Sinai Samuel Lunenfeld Research Institute or the Baycrest Centre for Geriatric Care. Value: variable.

Lawrence, Ila and William Gifford Scholarship in Radiation Oncology and Surgery
Awarded on the basis of financial need to graduate students supervised by graduate faculty also appointed to the Departments of Radiation Oncology or Surgery in the Faculty of Medicine. First preference will be given to students engaged in the study of cancer in the gastro-intestinal tract with special reference to the bowel. Second preference will be given to students pursuing studies in cancer or in gastro-intestine-related illnesses. Academic merit will also be considered. Application required.

OSOTF

Lachlan Gilchrist Fellowships
These awards are made annually to students in fundamental physics in their second year of graduate work in the Departments of Aerospace Science and Engineering, Mathematics, or Physics. Value: income.

Rosamond M. Gillies Fellowship
The annual income from funds generously donated by Mrs. Rosamond M. Gillies is available to full-time graduate students in the Department of Forestry on the basis of academic merit and financial need.

Alice Girard Memorial Fellowship
Awarded on the basis of academic merit to a doctoral student who has completed at least one year of the Ph.D. program in the Graduate Department of Nursing Science. Application not required. Nomination is made by the Faculty of Nursing Awards Committee. Value: annual income.

M.R. Glavicic Prize
Awarded at the end of the first winter session of the professional Master of Forest Conservation degree program in the Faculty of Forestry, on the basis of academic merit and professionalism, to the student who achieves the highest combined grade in two courses, Biodiversity of Forest Organism and Applied Forest Ecology. Value: annual income.

Glaxo Wellcome–Sunnybrook Drug Safety Clinic Graduate Student Fellowships
Awarded to graduate students in financial need pursuing studies in the area of drug safety at the Sunnybrook Drug Safety Clinic. Value: annual income.

OSOTF

Stephen Godfrey Graduate Student Scholarship in Suicide Studies
This award has been set up for a graduate student in financial need in the Department of Psychiatry. Value: annual income.

OSOTF
### The Dr. Theodore Goldberg Scholarship Fund
Established by the family, friends, and colleagues of the late Ted Goldberg, former Chair of the Department of Health Policy, Management and Evaluation, the award is available to a Ph.D. student currently enrolled in that department and studying health policy or organizational behaviour. The award is based on excellence, promise, and financial need. The Chair of Health Policy, Management and Evaluation will establish a selection committee each year. Annual value: approximately $1,500.

### OSOTF Graduate Award in Laboratory Medicine and Pathobiology
Established by friends and colleagues of Drs. A.D. Baines and M.D. Silver to honour their past contributions as Chairs to the Department of Laboratory Medicine and Pathobiology, an award is given to a graduate student in the Department of Laboratory Medicine and Pathobiology based on academic performance and financial need. Value: annual income. OSOTF

### Graduate Fellowship for Research in Health and Physical Activity
Awarded on the basis of acceptance into the Physical Education and Health program and on academic merit determined by grades, publications, presentations, and research. Renewable for one year upon review. Candidates may apply or nominations may be submitted by a faculty, student, or staff member of the Faculty of Physical Education and Health. Value: annual income.

### Graduate Fellowship(s) in Forestry
Awarded to new graduate students in the Department of Forestry on the basis of financial need and academic merit to students pursuing master's and or Ph.D. degrees in the Faculty of Forestry. Value: variable.

### Andrew Robertson Gordon Fellowship
The estate of Andrew Robertson Gordon provides for an annual award, based on academic merit, to one or more full-time graduate students in the Department of Chemistry.

### C.C. Gotlieb (Kelly) Graduate Fellowship in the Department of Computer Science
Awarded on the basis of academic merit to a student in any sub-discipline of Computer Science.

### Jenne Lewis Goodman Award
Awarded to students enrolled in the Faculty of Medicine on the basis of their academic excellence in Occupational Therapy. Preference will be given to students in their last year of study who have demonstrated special ability and interest in the area of occupational therapy in mental health as evidenced by excellence in both course work and field work.

### OSOTF Graduate Student Award in Relocation Assistance
Awarded to new graduate students in the Department of Chemistry to offset expenses incurred in relocating to Toronto from elsewhere in Ontario. Academic merit and financial need are considered. OSOTF

### Graduate Student Fellowship in Medical Oncology
The award is given to a graduate student in Medical Oncology based on financial need. Value: variable. OSOTF

### Graduate Studies in Silviculture Award
Mr. W. D. Start has endowed funds to provide an award, on the basis of financial need and academic merit, to a full-time graduate student in the area of silviculture or tree improvement in the Faculty of Forestry. OSOTF

### Greater Toronto Airport Authority Graduate Scholarship
Awarded to a student entering the Civil Engineering master's program with additional preference for a student specializing in Transportation Engineering.
**Malka and Al Green Graduate Fellowship in Psychiatry**  
Awarded to graduate students in the department of Psychiatry at Mount Sinai Hospital who are in need of financial assistance. Value: variable.  
OSOTF

**A. T. Griffis Memorial Graduate Scholarship**  
Watts, Griffis and McQuat Ltd. have endowed funds to provide a scholarship to a full-time graduate student in the Department of Geology, on the basis of academic excellence, professional dedication, and imagination. Preference may be given to students requiring geology field trips, especially for research involving a significant economic geology component.

**Dr. Allan E. Gross Scholarship**  
Dr. and Mrs. Gross and Mr. Martin Teplitsky have contributed to an endowed fund, the income of which is awarded to a clinical clerk entering the third of four years at the Faculty of Medicine. Financial need and academic merit will be considered.

**Allan Gross Graduate Award**  
Awarded on the basis of financial need to a student in the Institute of Medical Science who is researching orthopedic surgery.

**The George A. Guess Memorial Fellowship**  
The estate of Edna Florette Guess provides funds for one or more annual awards to graduate students in the Department of Materials Science and Engineering.

**Frank Howard Guest Graduate Bursary**  
Funds from the estate of Frank Howard Guest provide for bursaries based on academic standing and financial need. Students enrolled in any graduate program in any department in the Faculty of Applied Science and Engineering may be considered. Apply by November 1 to the graduate coordinator.

**Danielle Haasz Graduate Scholarship**  
Dr. Anthony A. Haasz established this scholarship in memory of his wife Danielle for award to a student with an excellent academic record entering the University of Toronto, with emphasis on dietetics, and leading to a professional registration in the association of the Dietitians of Canada. Value: annual income.  
OSOTF

**Robert and Jean Hadgraft Graduate Fellowship in Chemistry**  
Awarded on the basis of academic merit to one or more graduate students in the Department of Chemistry. Financial need will also be considered.  
OSOTF

**Halbert Family Fund for Breast Cancer Research**  
Awarded to students on the basis of financial need who are resident at the Marvelle Koffler Breast Centre and who are supervised by members of Mount Sinai Hospital or its Samuel Lunenfeld Research Institute Committee. Value: annual income.

**Dr. Walter J. Hannah Clinician-Scientist Award in Obstetrics and Gynaecology**  
Awarded to master’s or Ph.D. trainees in obstetrics and gynaecology who wish to pursue a research career as a clinician-scientist in obstetrics and gynaecology. Value: annual income.

**Hayden Hantho Award**  
Awarded on the basis of financial need to graduate students registered in degree programs studying with U of T faculty members located at the Hospital for Sick Children who are engaged in Pediatric Neurosurgery research. Apply to the Department of Pediatrics, Faculty of Medicine. Value: annual income.

**Harmonize for Speech Fund**  
This annual scholarship is given to a graduate student in the Department of Speech-Language Pathology based on financial need.  
OSOTF

**Hastings Memorial Fellowship**  
Friends of the late Dr. Hastings have endowed funds for an award to a full-time graduate student engaged in original investigations in the field of community health under the direction of the Public Health Sciences faculty. Value: not less than $2,500.

**Haultain Fellowship**  
The estate of Mary Alice Wells provides an annual fellowship for award on the basis of academic merit, to a full-time graduate student enrolled in the Department of Materials Science and Engineering undertaking research in mineral or metallurgical engineering. Preference will be given to students in the research field of mineral engineering.
Baden Havard Endowment Fund
Awarded to graduate students in the Faculty of Medicine conducting research related to the cause and cure of multiple sclerosis. Second preference to graduate students in the Faculty of Medicine doing research on other diseases of the human body or mind. Value: annual income.

Heart and Stroke Foundation Fellowships in Cardiovascular Nursing
Three fellowships are awarded to full-time students in a master's program in the Graduate Department of Nursing Science on the basis of the candidate's record and serious intention, following graduation, of practising in cardiovascular or cerebrovascular nursing in Ontario. Valued at $3,000 each for the academic session. Apply by March 31 to the Graduate Department of Nursing Science.

Heavy Construction Association of Toronto Graduate Scholarship in Intelligent Transportation Systems
Awarded on the basis of academic merit to a doctoral-stream student in the Department of Civil Engineering. Apply to the Department of Civil Engineering. Value: annual income.

Heavy Construction Association of Toronto Graduate Scholarship in IT in Construction and Infrastructure
Awarded on the basis of academic merit to a doctoral-stream student in the Department of Civil Engineering. Value: annual income.

Walter Helm Fellowship in Astronomy
The Walter Helm Scholarship Fund provides a scholarship for a graduate student in Astronomy and Astrophysics. Value: annual income.

V. L. Henderson Research Fellowship in Electrical and Computer Engineering
Mrs. Ellen Henderson and Professor Marion Bassett have endowed funds, the income of which is awarded, on the basis of financial need, to a graduate in Electrical engineering. Academic merit is also considered.

OSOTF

Charles Hershfield Memorial Scholarship
The Hershfield family has provided a scholarship in memory of the late Professor Charles Hershfield, a faculty member in the Department of Civil Engineering from 1945 to 1976. Based on academic excellence, the income from the fund is awarded to one or two graduate students enrolled in the field of structural engineering upon completion of their first year.

David Hewitt Award
Through the generous donations of alumni, friends, and colleagues of David Hewitt, an award is given to a graduate student in Public Health Sciences on the basis of the student's contribution to the intellectual and social life of the Public Health Sciences student body.

Hannah Farkas Himsley and Alexander Himsley Memorial Prize
Through a generous donation from Ms. Leorah Kroyanker and Ms. Ruth Geva this scholarship has been established for award alternately to graduate students in the Faculty of Medicine's Department of Medical Genetics and the Faculty of Applied Science and Engineering's Biomedical Engineering Group. Value: annual income.

OSOTF

Dr. Warren Ho Memorial Scholarship in Neurosurgery
Awarded on the basis of academic merit to a graduate student studying and/or doing research in the field of neurosurgery in the Faculty of Medicine. Financial need and demonstrated community volunteer work will also be considered. Apply to the Department of Neurosurgery. Value: annual income.

Douglas Paton Hogg Memorial Award
This award was established in 1987 by the Ontario Section, American Society of Mechanical Engineers in memory of Douglas Hogg, eldest son of Allan D. Hogg, M.A.Sc. (1938), Ph.D. (1940), University of Toronto; and Ruth S. Hogg, B.A. (1963), M.A. (1966), University of Toronto. Additional funding has been generously provided by Dr. Allan Hogg. The award is for a graduate student undertaking research related to aircraft/rotorcraft in any of the following areas: stability and control, flight mechanics, crashworthiness and fire hazards, flight safety, or human-machine interactions. In addition to academic standing, the recipient must also be of good character and have good leadership ability. Value: $500.

OSOTF

Frank S. Hogg Memorial Fellowship
This award is offered annually to a graduate student in Astronomy and Astrophysics. One or more awards are available up to the value of the annual income.
**The Thomas H. Hogg Overseas Fellowship**
The Faculty of Applied Science and Engineering annually awards one fellowship valued at $10,000. The applicant must be a Canadian citizen or permanent resident, and hold a B.A.Sc. or M.A.Sc. degree from the University of Toronto. The applicant must enrol in a graduate degree program in a recognized university outside the North American continent. Preference is given to applicants in the field of hydraulics, fluid mechanics, or power systems engineering. Apply through the Faculty of Applied Science and Engineering.

**Robert C. Hosie Prize**
Mr. A.F. Buell, Mr. T. A. Buell, and others have endowed funds to provide an annual prize for award, on the basis of academic merit, to a full-time graduate student in the Faculty of Forestry.

**Household Science and Nutritional Sciences Alumni Graduate Scholarship**
For award to Faculty of Medicine graduate students on the basis of financial need who are studying in the field of nutritional sciences. Value: annual income.

**Archibald G. Huntsman Graduate Award in Zoology**
Awarded on the basis of academic merit to a master's or doctoral student in Zoology. Apply to the Associate Chair, Graduate Affairs, Department of Zoology. Value: annual income.

**Mary Gertrude I'Anson Scholarship**
Awarded to a doctoral student in the health sciences, broadly defined, on the basis of financial need and academic merit. Eligible graduate units: Life Sciences (Division IV) and Biomedical Engineering, Chemical Engineering, Environmental Studies, Human Development and Applied Psychology, Management, Mechanical Engineering, Social Work, and Sociology. Application consists of nomination form plus a letter of recommendation from the graduate unit, transcripts, OSOTF financial needs assessment form, and a statement from the nominee describing research project (1–2 pages). Deadline: end of April. Value: approximately $10,000. In some cases, awards of lesser value may be granted as top-up awards.

**Frederick P. Ide Graduate Awards in Zoology**
Established through a bequest from the estate of Dr. Frederick Palmer Ide and various other donors, fourteen awards of equal value are awarded to master's or doctoral students studying in Zoology.

**Fred G. Jackson Prize**
Awarded annually to the student enrolled in the professional Master of Forestry Conservation degree program in the Faculty of Forestry who submits the best report in the Research Paper in Forestry Conservation course, based on work undertaken in the Internship in Forest Conservation course. Value: annual income.

**R. E. Jervis Award**
The Canadian Nuclear Society and others have provided funds to offer a $500 annual award to a Canadian graduate student pursuing full-time research involving the development of radiochemistry or its application in areas such as human health, chemical engineering, nuclear safety, or environmental pollution. Apply to the Department of Chemical Engineering and Applied Chemistry.

**Edward Elsworth Johnson Postgraduate Forestry Fellowships and Awards**
The estate of Marguerite Johnson has established a fund, the annual income of which is awarded to students pursing master's and/or
Ph.D. degrees in the Faculty of Forestry. Academic merit and financial need are also considered.

Shirley Jones Fellowship
The estate of Florence Shirley Jones has created an award for a graduate student in Astronomy and Astrophysics. Value: annual income.

Wendy M. Kates Memorial Bursary
In memory of Wendy M. Kates, family members, friends, and colleagues have endowed funds to provide a bursary for a graduate student in Biomedical Communications on the basis of financial need and academic achievement in the M.Sc.BMC Master’s Research Paper. Commitment to the profession may also be considered.

OSOTF

Wendy M. Kates Memorial Scholarship
In memory of Wendy M. Kates, family members, friends, and colleagues have endowed funds to provide an annual scholarship for a graduate student in Biomedical Communications on the basis of academic achievement in the M.Sc.BMC Master’s Research Paper. Commitment to the profession may also be considered.

OSOTF

Dr. Terry Kavanagh Fellowship
Awarded to new students entering a graduate program of study in primary or secondary prevention of heart disease, cardiac rehabilitation, or in a related field in which physical fitness is the primary component for the improvement of health and quality of life. Awarded on the basis of academic merit determined by grades, publications, presentations, and research. Apply to the Faculty of Physical Education and Health. Value: annual income.

OSOTF

Dr. Norman Keevil President’s Fellowship in Geology
The award is offered to two or more graduate students studying geology at the master’s or doctoral level. Candidates must be students who intend to bring their expertise to developing nations upon graduation.

OSOTF

John L. Kellerman Fellowship in Civil Engineering
This fellowship is given to a student holding a degree in engineering who has an interest in and an aptitude for steel construction. For application and further information regarding the value of the fellowship consult the Department of Civil Engineering.

Merrijoy Kelner Scholarship
Various donors have endowed a fund to honour Professor Kelner upon her retirement from the University of Toronto. The annual income is awarded to an outstanding M.Sc./Ph.D./M.H.Sc. (Health Promotion) student in the Graduate Department of Public Health Sciences (Behavioural Sciences) who shows excellence and great promise for a career in applying social sciences to the health field.

Dr. Jesse Keshin Graduate Student Award
Ms. Barbara Wingrove and Mr. Victor H. Romley have kindly endowed funds to establish a fellowship for award to a Faculty of Medicine graduate student on the basis of financial need. Value: annual income.

OSOTF

Dr. Edward Ketchum Graduate Student Scholarships
For graduate students in financial need who are participating in research programs investigating novel-immunotherapeutics for B-cell lymphoma at the Faculty of Medicine. Value: variable.

OSOTF

The John Davidson Ketchum Memorial Graduate Award in Psychology
Awarded to a student studying the broad field of human psychology. Financial need and academic merit are considered.

OSOTF

Kathleen King Doctoral Fellowship
An admission award is offered, on the basis of academic merit, to a full-time incoming doctoral student in the Graduate Department of Nursing Science. Application not required. Nomination is made by the Faculty of Nursing Awards Committee. Value: $5,000 or annual income.

Ina Kniep Scholarship
Awarded to graduate students in the Department of Nutritional Sciences on the basis of academic excellence. Preference will be given to students who are members of the Canadian Dietetic Association and who are pursing graduate studies in Community Nutrition.

OSOTF

Partners in Research Marvelle Koffler Prize
Awarded to students from the Department of Immunology and/or the Department of Laboratory Medicine and Pathobiology doing biomedical research. Offered on the basis of academic excellence and on demonstrated public education in the lay community related to the mission of Partners in Research. Secondary preference will be given to graduate students in other graduate units of the Faculty of Medicine.
Dr. Peter Kong-Ming New Memorial Award
Awarded to a M.Sc. or Ph.D student for the best paper submitted for a course in Behavioural Science during the previous calendar year. Theses and dissertations are ineligible for consideration. All M.Sc. and Ph.D. graduate students enrolled in the Department of Behavioural Science’s graduate program are eligible to apply directly for this award and/or to be nominated by faculty. Value: book award to the total value of annual income.

Marion Kuhns Memorial Fellowship
Awarded to a graduate student in the Department of Nursing Science on the basis of financial need and academic standing in the last year of the Pediatric Nursing specialization. Application not required. Nomination is made by the Faculty of Nursing Awards Committee. Value: approximately $2,500.

Arthur and Sonia Labatt Fellowships
Awarded, on the basis of financial need and academic excellence, to master’s or doctoral candidates in the Institute for Environmental Studies. Preference will be given to students who are exploring practical based solutions to environmental issues or examining the market place for solutions to environmental issues. Value: annual income.

OSOTF
The Annie L. Laird Fellowship in Food Sciences
The Annie L. Laird Fellowship, the gift of her sister, Miss Elizabeth R. Laird, D.Sc., is awarded in alternate years to a University of Toronto graduate undertaking a graduate program in nutrition in the Department of Nutritional Sciences. Value: approximately $3,200.

The Lorne F. Lambier, Q.C. Scholarship
Awarded to a student investigating or researching cancer within the discipline of biochemistry. Nomination form required. Deadline: near the end of April. Value: annual Income.

Robert E. Lansdale/Okino Computer Graphics Graduate Fellowship in dgp for the Department of Computer Science
Awarded on the basis of academic merit to a graduate student in the Department of Computer Science’s Dynamic Graphics Project. Financial need may also be considered. Value: annual income.

Dr. Bernard Lau Memorial Scholarship and Graduate Bursary
The family and friends of Dr. Bernard Lau have established a fund, the annual income of which is awarded to an incoming graduate student in the Faculty of Medicine. Recipient should participate in extracurricular activities and demonstrate a concern for disadvantaged members of the community.

Dr. Alan K. Laws Clinical–Scientist Fellowship Fund
The Laws Fellowship promotes excellence in training anaesthetists for careers as clinician–scientists. Preference is given to anaesthesia residents or junior fellows enrolled in a graduate program. Apply to the Faculty of Medicine. Value: annual income.

Donald J. Leroy Graduate Prize in Physical Chemistry
Annual income from the generous donations of family, friends, and colleagues of the late Professor D. J. Leroy is available to a graduate student in the Department of Chemistry. Particular attention is paid to the student’s contribution to the writing of a research paper(s), either submitted or published.

Les Quatorze Award
The Les Quatorze Award was established to commemorate the tragic loss of life at Ecole Polytechnique, Montreal, in December 1989 and to recognize outstanding achievements by a woman enrolled as a full-time student in the Mechanical and Industrial Engineering program at the University of Toronto. This award is not limited to academic accomplishments only, but will encompass all aspects of valued involvement and participation, leadership and purpose of significant contribution by women to mechanical engineering.

Les Quatorze Award
All women registered in the B.A.Sc., M.A.Sc., M.Eng., or Ph.D. programs in the Department of Mechanical and Industrial Engineering are eligible for nomination. Nominations must be received by the first Monday in April and are reviewed by a committee appointed jointly by Mrs. Clarice Chalmers and the Chair of the Department of Mechanical and Industrial Engineering. The Les Quatorze Award is fully supported by Mrs. Clarice Chalmers.

Carol Anne Letheren Fellowship
Awarded to a new student in the Faculty of Physical Education and Health on the basis of admission, the study of girl’s and women’s health, physical education and sport administration through research and advocacy, and on
Financial Support and Exchange Programs
Mathematical, Physical, Biological and Applied Sciences

121

academic merit. Renewable for one year upon review.

Dr. Norman Levine Bursary in Graduate
Pediatric Dentistry
Dr. and Mrs. Norman Levine and family have
contributed funds for a fellowship for award to a
student currently in the graduate program in
Pediatric Dentistry who demonstrates financial
need and has satisfactory academic standing.
OSOTF

Herta Leyss Scholarship in Physical Therapy
Awarded on the basis of academic excellence
to graduate students in the Department of
Physical Therapy, Faculty of Medicine.

Lifebeat '96 Graduate Studentship Award in
Women's Health
This scholarship is awarded annually to a
graduate student studying women's health in
the Faculty of Medicine's Department of Family
and Community Medicine. Value: annual in-
come.
OSOTF

Mart Liinve Graduate Scholarship
Awarded on the basis of academic merit to a
graduate student in the Department of Me-
chanical and Industrial Engineering. Value: an-
nual income.

Olive Lindsay Scholarship
The estate of Samuel David Climans provides
an award to a graduate student doing medical
research in the Faculty of Medicine. Value: an-
nual income.

The Harold L. Livergant Scholarship
Awarded to a student entering the M.H.Sc. pro-
gram in Health Policy, Management and Evalu-
ation on the basis of excellence and promise in
long term care management.

The Bernard Ludwig Fellowship in Obstet-
rics and Gynaecology
For award to graduate students supervised by
staff in the Department of Obstetrics and
Gynecology on the basis of financial need.
Value: annual income.
OSOTF

The Samuel Lunenfeld Research Institute
Fellowships
This annual scholarship has been established
through a generous endowment from the Mount
Sinai Hospital Foundation of Toronto for award
to graduate students in the Faculty of Medicine
on the basis of financial need.
OSOTF

Patricia Lyon Nursing Fellowship
Awarded to full-time or part-time master's stu-
dents in the Department of Nursing Science
whose studies are consistent with the goals or
will further the strategic directions of the To-
ronto Rehabilitation Institute. Academic merit is
considered. Preference is given to employees
of the Toronto Rehabilitation Institute. Apply to
the Corporate Professional Leader for Nursing,
Toronto Rehabilitation Institute, by February 1.
Value: annual income.

MRC Group Graduate Student Bursary
The bursary is given to a graduate student
working in the MRC Group in Periodontal Physi-
ology.
OSOTF

Frank A. MacDougall Fellowship
A fellowship awarded on the basis of academic
merit to a full-time student enrolled in the
M.Sc.F. or Ph.D. programs in the Faculty of For-
estry. Value: annual income.

MacPherson Prize in Microbiology
Dr. L.W. MacPherson has established an award
for the top graduate student in microbiology.
Value: $1,000 and a medal supplied by the do-
nor.

Mary and Ron Martin Graduate Fellowship in
Astrophysics
Awarded to a student in the field of
astrophysics on the basis of academic merit.
Financial need may also be considered. Value: an-
nual income.

Yoshio Masui Prize in Developmental, Mo-
lecular, or Cellular Biology
Awarded on the basis of academic excellence
to a master's or doctoral student in the Depart-
ment of Zoology. International students are en-
couraged to apply. Apply to the Associate Chair,
Graduate Affairs, Department of Zoology. Value: an-
nual income.

The J. Edgar McAllister Foundation Gradu-
ate Bursaries
Four bursaries are awarded annually to stu-
dents registered in one of the graduate depart-
ments of Mechanical and Industrial Engineer-
ing, Electrical and Computer Engineering,
Chemical Engineering and Applied Chemistry,
Materials Science and Engineering, and Geol-
ogy. Value: $5,000.
Donalda Jean McGeachy Memorial Scholarship
The estate of Donalda Jean McGeachy has generously provided funds for scholarship(s) for graduate students in the Department of Speech-Language Pathology.

McLean Foundation Graduate Scholarships in Science and Technology
Four scholarships awarded on the basis of financial need to graduate students in the Department of Chemical Engineering and Applied Chemistry. Academic excellence will also be considered. Value: $15,000 each.

OSOTF J. Playfair McMurrich Fellowship in Anatomy
Funds from the estate of Kathleen Isabel McMurrich, in memory of her late father, Dr. J. Playfair McMurrich, provide a fellowship for a doctoral student in the Department of Anatomy and Cell Biology. The number of awards available is based on the annual income.

Medical Graduate Student Bursary Fund
A limited number of high-need bursaries are available to professional master's students in the Graduate Departments of Occupational Therapy; Physical Therapy; Health Policy, Management and Evaluation; Public Health Sciences; Speech-Language Pathology; and in the Biomedical Communications and Genetic Counselling programs. Questions regarding eligibility and applications should be directed to the individual departments/programs listed.

Mentor Medical Systems Canada Graduate Scholarship in Plastic Surgery
Awarded to graduate students in the Faculty of Medicine on the excellence of their research proposals. Preference given to graduate students who are resident Postgraduate Surgical Trainees in the Division of Plastic Surgery in the Department of Surgery and are pursuing studies in breast surgery, cosmetic surgery, or tissue engineering.

The Merck Frosst Canada Inc. Chemistry Conference Award/The Merck Frosst Canada Inc. Graduate Award in Chemistry
The Conference portion of this award will be given to a senior graduate student in synthetic organic chemistry to attend an international conference and present findings. The student must have a research publication from his or her graduate studies. The Graduate Award portion will be awarded to an incoming graduate student intending to carry out research in organic synthesis.

Merck Frosst Graduate Scholarship in Biosciences and Biotechnology
Awarded on the basis of academic merit to a new student entering the Master of Biotechnology program.

David F. Mettrick Fellowship
Awarded to a qualified graduate student in the Department of Zoology engaged in any aspect of zoological research. Value: annual income.

Microbix Graduate Award
Microbix Biosystems Inc. annually donates $1,000 in honour of Professor Frances Doane and Ms Nan Anderson in recognition of their dedication to the teaching and well-being of students in the former Department of Microbiology. On the basis of academic merit, $1,000 is awarded to a full-time graduate student enrolled in the first year of the M.Sc. program in the Department of Molecular and Medical Genetics (microbiology program).

Al Miller Fellowship
Awarded to an outstanding student pursuing a graduate degree in the Department of Materials Science and Engineering. Value: annual income.

Anthony B. Miller Prize in Cancer Epidemiology
For award to a student who has completed a doctoral program in Epidemiology within the previous academic year, with the thesis clearly related to cancer. Value: annual income.

Margaret Amelia Miller Fund
The estate of Willett Green Miller provides an annual award of approximately $1,500 for a full-time student registered in the School of Graduate Studies for at least one year. The student must be studying geology or geophysics under supervision at Erindale College.

Richard G. Miller Award
Johnson & Johnson/Ortho donates funds each year to provide a $500 award to a graduate student completing the doctoral program, in recognition of his/her leadership in the immunology community and the University at large.

Carol Mitchell and Robert Venn Graduate Student Fellowship in Women's Health
Two awards will be given annually as follows: 50% of the annual income will support a graduate student undertaking women's health research with a Faculty of Medicine member located at the Clarke Institute of Psychiatry; 50% will support a graduate student undertaking...
women's health research with a Faculty of Medicine member located at the Women's College Hospital (or its successor). Value: variable. OSOTF

Kenneth M. Molson Fellowship
Kenneth M. Molson Foundation has generously endowed an entrance fellowship for a student entering the Institute for Aerospace Science and Engineering. Value: annual income. OSOTF

The Norman F. Moody Award
This award was created on the occasion of the retirement of Professor Norman F. Moody as director of the Institute of Biomedical Engineering. Annual value: approximately $75. OSOTF

Ara Mooradian Scholarship
Awarded to a graduate student in any discipline of the Physical Sciences, Engineering, or Life Sciences related to radioactivity. Selection is based on academic merit. Graduate students can hold the award for a maximum of three and two years, respectively, subject to satisfactory progress as viewed by the selection committee. Application is by way of nomination by the student's graduate unit, transcripts, one letter of recommendation, and a statement from the applicant which includes the following: awards received, contribution to research, and study plan. Deadline: end of April. Approximate value: $6,000.

The W.W. Moorhouse Fellowship
The W.W. Moorhouse Fellowship is awarded annually to a graduate student in the Department of Geology. Value: approximately $1,000.

Grace (Weymark) Morgan Scholarship
Grace Morgan has provided funds to offer scholarships, on the basis of financial need, to one or more full-time graduate students. Preference is given to undergraduate students from Memorial University who qualify for entrance to the Master of Health Science (M.H.Sc.) program in community nutrition. Application required. OSOTF

F. K. Morrow Forestry Admission Fellowship
The award is given to a student entering the professional Master of Forest Conservation program in the Faculty of Forestry. Value: $2,000.

Mount Sinai Hospital Graduate Scholarships in Science and Technology
Awarded on the basis of financial need and academic excellence to one or more graduate students in the Faculty of Applied Science and Engineering who are:
1. in the Institute of Biomaterials and Biomedical Engineering, the Department of Chemical Engineering and Applied Chemistry, or the Department of Materials Science and Engineering;
2. supervised or co-supervised by a graduate faculty member on staff at Mount Sinai Hospital; and
3. supervised or co-supervised by a graduate faculty member of the Department of Laboratory Medicine and Pathobiology.
Value: $15,000 each. OSOTF

Dr. Gwen Mulock Award
Applicants must be registered in the second year of the M.S.W. program at the Faculty of Social Work. Preference is given to candidates in Medical Social Work. Apply to the Faculty of Social Work. Value: annual income.

Thomas and Edna Naylor Memorial Award in Health Services Research
Awarded to a graduate student in the Department of Health Policy, Management and Evaluation who completes the best thesis in the field of health services research. Apply to the Department of Health Policy, Management and Evaluation.

Emily Newman Scholarship
The Emily Newman Scholarship is awarded to a graduate student studying pulmonary hypertension with Dr. Marlene Rabinovitch in the Division of Cardiovascular Research at The Hospital for Sick Children. The student will be chosen on the basis of excellence in science, motivation, and commitment to medical research.

Heather Milne Nielsen Graduate Scholarship
Awarded to one or more full-time or part-time M.H.Sc. students in the Community/Public Health Nutrition program. Preference will be given to students whose interests match those of Heather Milne Nielsen and who are committed to interdisciplinary study to broaden understanding of the multifactorial causes of nutritional issues.

The V. J. Nordin Prize
Awarded to a full-time Forestry graduate student pursuing studies in an area related to tropical forestry. Value: annual income.
Nortel Institute Graduate Scholarship for Telecommunications
Bell Northern Research Limited has established an award for a student in the master's program in Telecommunications based on financial need; academic merit may also be considered. Value: annual income.

OSOTF

Northwater Management Award in Gerontology
The award supports travel and related conference expenses allowing a graduate student to present a paper in the field of aging or gerontology at a conference. The award is made on the basis of financial need, the quality of the paper to be presented, and the academic promise of the applicant as judged by the Awards Committee of the Institute for Human Development, Life Course and Aging. Application form, conference paper, and supporting letter from the student's professor and co-author (if applicable) are required. Apply to the Institute for Human Development, Life Course and Aging. Value: annual income.

Novartis Graduate Award
Awarded to graduate students in the Faculty of Medicine whose supervisors are members of the Banting and Best Diabetes Centre. Apply to the Banting and Best Diabetes Centre, Committee for the Novartis Graduate Award. Value: $10,000.

Louie J. Nozzolillo Fellowship in Forestry Research
Louie J. Nozzolillo has generously endowed funds to provide a fellowship for award on the basis of academic merit to a graduate student in the Graduate Department of Forestry. The award normally takes the form of a top-up to an Ontario Graduate Scholarship or a U of T Fellowship.

Faculty of Nursing Admission Fellowship for Part-Time Master's Student
Awarded to a candidate in financial need who has a sound academic record and who is applying to enrol part-time in a master's program in the Department of Nursing Science. Apply by letter explaining financial circumstances and submit a completed financial needs assessment form. Value: annual income.

OSOTF

Nursing Alumni Graduate Fellowship
On the recommendation of the Faculty of Nursing, $5,000 is awarded to a student registered full-time in the M.Sc. or M.N. program in the Faculty of Nursing demonstrating high academic achievement.

Faculty of Nursing Class of 5T5 Award
The Class of 5T5, Faculty of Nursing has established a fund, the annual income of which is awarded to a student completing one year of full-time or part-time studies in the master's program in the Faculty of Nursing. Awarded on the basis of demonstrated financial need. Candidates must show evidence of community involvement and/or leadership. Apply by March 31 to the Awards Committee, Faculty of Nursing. The application must include proof of financial need and two letters of reference, showing evidence of community involvement and/or leadership either within or external to the University of Toronto.

OSOTF

Faculty of Nursing Class of 6T0 Award
Awarded to a full-time graduate student in the Department of Nursing Science on the basis of academic merit. Application not required. Awarded on the nomination of the Faculty of Nursing Awards Committee. Value: annual income.

Faculty of Nursing Doctoral Admission Award
Awarded to a full-time graduate student in the Faculty of Nursing demonstrating high academic achievement.

Faculty of Nursing Doctoral Award in the Care of Children
Nortel has generously donated funds, the annual income of which is awarded to a doctoral student in the Department of Nursing Science. Eligibility is based on academic merit and priority is given to those engaged in research on the care of children. Apply to the Awards Committee, Faculty of Nursing by March 31.

Faculty of Nursing Class of 5T5 Award
Awarded to a student completing one year of full-time or part-time studies in the master's program in the Faculty of Nursing. Awarded on the basis of demonstrated financial need. Candidates must show evidence of community involvement and/or leadership either within or external to the University of Toronto.

OSOTF

Faculty of Nursing Doctoral Award in the Care of Children
Nortel has generously donated funds, the annual income of which is awarded to a student completing one year of full-time or part-time studies in the master's program in the Faculty of Nursing. Awarded on the basis of demonstrated financial need. Candidates must show evidence of community involvement and/or leadership either within or external to the University of Toronto.

OSOTF

Department of Nutritional Sciences Graduate Student Fellowship
Awarded to students in the Graduate Department of Nursing Science on the basis of financial need and academic merit.

OSOTF

Department of Nutritional Sciences Graduate Student Fellowship
Awarded to students in the Graduate Department of Nursing Science on the basis of financial need and academic merit.
Occupational Hygiene Scholarship Fund
(Public Health Sciences)
Alumni and faculty members of Public Health Sciences have generously established a fund, the annual income of which is awarded to a student enrolled in the Occupational Hygiene Specialty of the M.H.Sc. program. Eligibility is based on financial need and academic merit.
OSOTF

Occupational Therapy Fund
Awarded to one or more graduate students enrolled in the Occupational Therapy program at the University of Toronto with demonstrated financial need. Value: variable.
OSOTF

Atsumi Ohno Scholarship
Professor Atsumi Ohno of the Chiba Institute of Technology has established an award, given on the basis of academic merit, to a graduate student engaged in research in the field of solidification of metals in the Department of Materials Science and Engineering.
OSOTF

Ontario Nursing Home Association Fellowship
An award of $750 is offered annually to a full-time student in a master's degree program in the Graduate Department of Nursing Science. Candidates must seriously intend to practise gerontological nursing in Ontario following graduation. Preference is given to applicants specializing in the care of the institutionalized elderly. Apply by March 31 to the Graduate Department of Nursing Science.

Rein Otson Memorial Graduate Scholarship
Awarded to a graduate student on the basis of academic merit in the Department of Chemical Engineering and Applied Chemistry; preference given to students from Estonia. Application required. Value: annual income.

Rein Otson Memorial Travel Endowment
Awarded to a graduate student in the Department of Chemical Engineering and Applied Chemistry, with preference given to students from Estonia. The purpose of this award is to assist the recipient of the Rein Otson Memorial Graduate Scholarship with travel and related expenses in order to conduct research and attend conferences/workshops. Application required. Value: annual income.

Anne–Lis Ots–Goodman Prize
Friends, colleagues, and family of the late Anne–Lis Ots–Goodman have endowed a fund, the income of which provides an award to a graduating student (not a physician) who achieves the highest grades in the professional masters program in Occupational Hygiene.

PMC–Sierra, Inc. Scholarship in Engineering
An annual donation of $1,500 is awarded to recognize the academic achievement and related thesis work in the networking/semiconductor field of graduate students completing their final year in the Department of Electrical and Computer Engineering. Awarded on the basis of academic achievement in the previous academic year.

Dr. Roman Pakula Memorial Award
Through donations from family, friends, and colleagues of the late Dr. Roman Pakula, a $400 award is available annually to a graduate student in the M.Sc. program in the Department of Molecular and Medical Genetics (microbiology program).

Wilfrid H. McKinnon Palmer Academic Award
Awarded, on the basis of academic excellence, to students registered in the M.H.Sc. Public Health Sciences (Family Medicine) program in the Faculty of Medicine. Preference is given to graduate students with a sustained interest in academic aspects of Family Medicine. Apply to the Faculty of Medicine.

Nora J. Parker Ph.D. Admission Award
For award on the basis of financial need to a student admitted to the Ph.D. program in the Faculty of Nursing. Value: annual income.
OSOTF

Mary Elizabeth McGainty Parkin Graduate Fellowship in Public Health Sciences
Dr. William J. McGainty and others have donated funds to establish a fellowship for award, on the basis of financial need, to students in the Department of Family Medicine in the M.H.Sc. program. Value: variable.
OSOTF

Patino Mining Corporation Research Fellowship
Nipissing Mining Company Ltd., now merged with the Patino Mining Corporation, has endowed funds to provide an annual fellowship for award to a graduate of a recognized university proceeding to a master's or doctoral degree in the field of mineral processing in a department of the Faculty of Applied Science and Engineering at the University of Toronto.
The G. N. Patterson Award
This award was created on the occasion of the retirement of Dr. G. N. Patterson as Founding Director of the University of Toronto Institute for Aerospace Studies (UTIAS). Funds were donated by Dr. Patterson, the UTIAS alumni, and industry. The award is given annually to a UTIAS student who has made an outstanding research contribution. Value: $1,200.

Judy and Samuel Pencer Graduate Fellowship in Psychiatry
The Mount Sinai Hospital Foundation of Toronto has established an award for graduate students in the Department of Psychiatry at Mount Sinai Hospital who are in need of financial assistance. Value: variable
OSOTF

Perinatal Nurses of Southern Ontario Graduate Award in Women's Health
Awarded on the basis of financial need to a graduate student enrolled in the master's or Ph.D. program in the Faculty of Nursing. Demonstration of strong interest in women's health issues is also necessary. Value: annual income
OSOTF

Al and Hannah Perly Graduate Student Scholarship
Bob Rae and Arlene Perly Rae have donated funds for this scholarship for award, on the basis of financial need, to graduate students studying leukemia/lymphoma and women's health in the Faculty of Medicine. Value: annual income
OSOTF

Dr. L. Bradley Pett Graduate Award in Biochemistry
Dr. L. Bradley Pett has endowed a fund, the annual income of which is awarded to graduate students in the Department of Biochemistry on the basis of financial need. Academic excellence will also be considered. Apply to the Department of Biochemistry. Value: annual income.
OSOTF

Dr. L. Bradley Pett Graduate Award in Biological Chemistry
Awarded to a graduate student in the Department of Chemistry who has completed at least one year of graduate work in the area of biological chemistry. While the award is made on the basis of financial need, academic merit will also be considered. Apply to the Chemistry Graduate Office by March 1. Value: annual income.
OSOTF

Lorne Phenix Graduate Award
Awarded on the basis of academic excellence to a student working under the direct supervision of a faculty member of the Heart and Stroke/Richard Lewar Centre of Excellence in Cardiovascular Research.

Dr. Eliot A. Phillipson—Department of Medicine Fellowships
The Mount Sinai Hospital Foundation of Toronto has endowed funds to establish a fellowship for graduate students in the Department of Medicine at Mount Sinai Hospital on the basis of financial need. Value: annual income.
OSOTF

OSOTF Physical Therapy Annual Fund
Awarded to one or more graduate students enrolled in the Physical Therapy program at the University of Toronto who demonstrate financial need.

OSOTF Physical Therapy Fund
Awarded to one or more graduate students enrolled in the Physical Therapy program at the University of Toronto who demonstrate financial need.

Lloyd and Frankie Pidgeon Fellowship
Mr. Lloyd Pidgeon has generously endowed a fellowship for a third-year or fourth-year doctoral student in the Department of Materials Science and Engineering. The student should be strongly focused on studies in extractive metallurgy, although not necessarily tied to non-ferrous metals. Value: annual income.
OSOTF

Ross Pierce Memorial Scholarship
The annual income from the Trust Fund is normally awarded, on the basis of academic merit and financial need, to a student enrolled in the first year of the M.H.Sc. program in Speech-Language Pathology.

Platform Computing Graduate Fellowship in Computer Science
Awarded on the basis of academic merit and financial need to a student in the Department of Computer Science.

Mildred Claire Pratt Graduate Nursing Fellowship
The estate of Mildred Claire Pratt has generously provided funds, the income of which is awarded to graduate students having completed one year of full-time or part-time study in palliative care at the Department of Nursing Science. Eligibility is based on financial need,
Electrical and Computer Engineering.

Communications group in the Department of

tutions, on the recommendation of faculty in the

graduate student in the area of communica-

Various donors have endowed funds to provide a scholarship for award to an outstanding graduate student in the area of communications, on the recommendation of faculty in the Communications group in the Department of Electrical and Computer Engineering.

Shahid U. H. Qureshi Memorial Scholarship

Various donors have endowed funds to provide a scholarship for award to an outstanding graduate student in the area of communications, on the recommendation of faculty in the Communications group in the Department of Electrical and Computer Engineering.

David Rae Graduate Student Scholarship

Awarded on the basis of financial need to graduate students studying in the areas of leukemia and lymphoma at the Faculty of Medicine. Value: annual income.

OSOTF

Ewing Rae Graduate Scholarship

Awarded to a doctoral-stream student studying electrical engineering in the Department of Electrical and Computer Engineering. Academic achievement and financial need are considered, as well as the student's intention to work or conduct further study in Canada.

W. H. Rapson Memorial Award

Various donors have contributed to a fund, the annual income of which is given to a graduate student in the Pulp and Pulp Research Centre, on the basis of academic merit. Awarded on the recommendation of the Department of Chemical Engineering and Applied Chemistry.

Ray Reiter Graduate Award in Computer Science

Awarded on the recommendation of the Department of Computer Science to a graduate student in the area of artificial intelligence. The award is based on financial need. Value: annual income.

L. V. Redman Fellowship

Candidates for this award must be completing their undergraduate training and entering a program of study and research in Chemistry leading to an advanced degree. Two fellowships of $2,500 each are awarded for an academic session and preference is given to graduates from universities other than Toronto.

Carl Reinhardt Fellowship in Astronomy

This award is offered to candidates proceeding to a graduate degree in Astronomy and Astrophysics. One or more awards is available up to the value of the annual income.

Right Track CAD Graduate Scholarships

Three scholarships are awarded annually to graduate students registered in the Department of Electrical and Computer Engineering. Preference is given to students concentrating their studies in Programmable Logic. Academic achievement is the main criterion. Application not required. Value: annual income.

Edna Margaret Robertson Scholarship

Endowed funds from the estate of Edna Margaret Robertson provide for two annual awards of approximately $500 each to new stu-
students in the Department of Zoology whose research topic is related to conservation of fish or wildlife in Ontario.

**Malcolm Slingsby Robertson Fellowship in Mathematics**
The Venerable John M. Robertson and others have endowed funds to provide an annual fellowship for award, on the basis of academic merit, to one or more graduate students in the Department of Mathematics.

**OSOTF**

**Malcolm Slingsby Robertson Prize in Mathematics**
Through the generosity of the Venerable John M. Robertson, a $500 annual prize is awarded to a graduating Ph.D. student for demonstrated excellence in research.

**Norman Stuart Robertson Fellowships**
These awards are made annually to graduate students in the sciences to the value of the annual income.

**Peter Rodney Book Prize in Combinatorics or a related Field**
Family, friends, and colleagues of Peter Rodney have endowed funds to provide an annual award to be given to the best presentation by a Department of Mathematics graduate student at the Ontario Combinatorics Workshop.

**Edward S. “Ted” Rogers Fellowship**
Edward S. Rogers has donated funds to the Department of Electrical and Computer Engineering to provide a $2,000 award offered annually to an outstanding graduate student in the first year of graduate work in the communications area.

**James E.P. Rogers Memorial Fellowship**
Awarded to a student studying Social and Administrative Pharmacy and preferably conducting research in the area of community pharmacy.

**J. Douglas Roseborough Prize in Zoology**
Friends of the late J.D. Roseborough have established a fund, the annual income of which is awarded to a master’s or doctoral student in the Department of Zoology. Financial need and academic merit will also be considered. The award may be held once. Apply to the Associate Chair, Graduate Affairs, Department of Zoology.

**Elia I. Ross Memorial Scholarship**
Awarded to one graduate student in the Division of Biomedical Communications at the Faculty of Medicine. Preference will be given to first or second year students who demonstrate excellence and professionalism in quality of medical illustration and communication output, team participation and leadership skills, and commitment to the profession.

**Dr. Klaus Rothfels Memorial Scholarship**
Friends and former students of Dr. Klaus Rothfels have endowed funds to provide a scholarship to a graduate student in the Department of Botany or Zoology, on the basis of academic merit and financial need.

**Rob Roy Forestry Graduate Travel Awards**
Awarded on the basis of academic performance and financial need to Forestry graduate students in support of essential program-related travel and practical work.

**John J. Ruffo Graduate Fellowship**
Awarded on the basis of academic excellence to Faculty of Medicine graduate students enrolled in the M.D./Ph.D. program.

**Robert and Francine Ruggles Family Graduate Fellowship**
Awarded to Faculty of Medicine graduate students enrolled in the M.D./Ph.D. program on the basis of academic excellence.

**Monica Ryckman Bursary**
Through a donation by Mrs. Monica Ryckman, bursaries are available to graduate students in the Department of Computer Science who are otherwise without support. Apply through the Graduate Secretary, Department of Computer Science.

**Scace Graduate Fellowship in Alzheimer’s Research**
Awarded on the basis of financial need and academic merit to graduate students conducting research in the field of Alzheimer’s disease. Apply to the Faculty of Medicine. Value: annual income.

**OSOTF**

**Scace Graduate Fellowship in Prostate Cancer Research**
Awarded on the basis of financial need and academic merit to graduate students. First preference is to graduate students conducting research in the field of prostate cancer with the Fleck/Tanenbaum Chair in Prostatic Diseases. Second preference is to graduate students do-
ing research in the field of prostate cancer. Apply to the Faculty of Medicine. Value: annual income.  

**OSOTF**

**Robin Schaffer Graduate Scholarship**
Various donors have provided funds to offer an annual award of $500 to honour the former Director of the Division of Occupational Therapy, Dr. Robin Schaffer. The scholarship is awarded, on the basis of academic merit, to a graduate student with an occupational therapy background entering the first year of the master’s program in Rehabilitation Science at the University of Toronto. Financial need may also be considered.

**OSOTF**

**Wilfred George Scott Fellowship in Gerontology**
The estate of the late Wilfred George Scott provides for a fellowship of approximately $6,000 for award to a graduate student for gerontological (differentiated from geriatric) research, with particular emphasis on those areas which are psychological or socio-economic in scope rather than medical and clinical. Apply to the Institute for Human Development, Life Course, and Aging by July 15.

**OSOTF**

**Searle Scholarship**
Through an annual donation from Searle Canada Inc., a scholarship is available, on the basis of academic merit, to a full-time incoming graduate student enrolled in the Department of Molecular and Medical Genetics (microbiology program). To be considered for a Searle Scholarship, candidates must apply for an MRC or NSERC award. Value: approximately $15,000 plus $1,000 travel allowance.

**OSOTF**

**Senior Alumni Association Prize in Zoology**
Awarded on the basis of financial need to a master's or doctoral student in the Department of Zoology. Academic merit will also be considered. Application required. Value: annual income.  

**OSOTF**

**Dick and Peggy Sharpe Student Fellowship in Immunology**
The Wellesley Hospital Foundation has provided funds for award, on the basis of financial need, to graduate students in the Immunology Department in the Faculty of Medicine conducting research at the Wellesley Hospital. Value: variable.  

**OSOTF**

**Harry C. Sharpe Fellowship**
This award, given by the late Harry Sharpe in honour of Alcoholics Anonymous, is awarded to graduate students in the Faculty of Medicine whose studies and research are in the fields of addiction, substance abuse, and/or gerontology. Value: annual income.

**Theodore I. Sherman Graduate Award in Neurosciences**
Revenue Properties Company Limited have generously provided funding for award to graduate students in the Centre for Research in Neurodegenerative Diseases. If a suitable candidate is not found in any given year, the award will be broadened to include other Faculty of Medicine graduate students in the field of neuroscience. Apply to the Faculty of Medicine. Value: variable.

**Meredith & Malcolm Silver Scholarship in Cardiovascular Studies**
Awarded, on the basis of financial need, to the graduate student with a demonstrated interest in cardiovascular research who maintains or achieves honours standing during his or her residency with the Department of Laboratory Medicine and Pathobiology. Value: annual income.

**OSOTF**

**Siminovitch–Salter Award**
The Institute of Medical Science, Mount Sinai Hospital, and U of T’s Department of Surgery have endowed funds to provide an annual award to a doctoral student enrolled in the Institute of Medical Science who has displayed outstanding scholarly contribution.

**Marguerite Harland Smith Graduate Award in Rehabilitation Science**
Dr. Carlton Smith has provided funds, the annual income of which is awarded to a full-time physical therapy graduate student, on admission to the Graduate Department of Rehabilitation Science. The student must be conducting rehabilitation research in neuroscience field. Based on financial need and academic achievement. Apply to the Graduate Department of Rehabilitation Science.

**Viola Carless Smith Research Fellowship in Electrical and Computer Engineering**
Professor K. C. Smith has endowed funds, the income of which is to be awarded to a graduate in electrical engineering who enrols in the School of Graduate Studies for further work in this field, specifically in electronics or computer
related work. Award is based on financial need; academic merit is also considered.

**OSOTF**

**John Robert Gilkison Smyth Mathematics Scholarship**
Funds from the estate of the late John Robert Gilkison Smyth provide an annual scholarship for award, on the basis of academic merit, to a graduate student enrolled in the Department of Mathematics.

**Social and Administrative Pharmacy Professors’ Award for Thesis Research**
Awarded to students in the Graduate Department of Pharmaceutical Sciences pursuing a degree in the area of Social and Administrative Pharmacy. Application required.

**Speech Foundation of Ontario Award**
Awarded to a student in financial need in the Department of Speech-Language Pathology.

**Morey Speigel Memorial Prize**
Awarded on the basis of academic merit and financial need to a graduate student in the Faculty of Medicine. Value: annual income.

**Paul Starita Graduate Student Fellowships**
An annual award is offered to Faculty of Medicine graduate students on the basis of financial need who are studying within the field of molecular medicine as it applies to prostate cancer. Value: annual income.

**OSOTF**

**Department of Statistics Doctoral Award**
Awarded along with a certificate of acknowledgment to a Ph.D. student in the Department of Statistics. The recipient must have demonstrated excellence in research in the area of statistics or probability. The award is usually given to a senior doctoral student, although all students in the doctoral program are eligible. Value: annual income.

**Stelco Fellowship**
A donation provided by Stelco Inc. supports students in the Department of Materials Science and Engineering conducting steel related research. Value: annual income.

**Edward Christie Stevens Award in Nuclear Physics**
Funds from the estate of the late Edward Christie Stevens provide a fellowship for a graduate student engaged in the field of nuclear physics. Value: variable.

**Dr. Margaret L. Stoicheff Graduate Award in Speech-Language Pathology**
Awarded to a graduate student in the Master of Health Science Professional Speech-Language Pathology program. The award is given on the basis of academic excellence and financial need. Apply to the Department of Speech-Language Pathology by the end of February. Value: annual income.

**Hilbert and Reta Straus Award**
In memory of Hilbert and Reta Straus, an endowment has been established in the Department of Botany. The annual income of the endowment is awarded annually to a full-time graduate student who has demonstrated high research achievement in the fields of molecular or cellular biology.

**Surgical Alumni Fellowship in Surgical Science**
Awarded to a graduate student in financial need in the Department of Surgery to allow him or her to undertake formal training leading to a graduate degree in biomedical research or related field. Value: annual income.

**OSOTF**

**Dr. R. B. Sutherland Memorial Award**
Friends, relatives, and colleagues of Dr. ‘Sandy’ Sutherland have endowed funds, the income of which provides an annual award to a graduate student in the Graduate Department of Public Health Sciences who achieves the best performance in the occupational epidemiology course CHL 5410H and who is registered in a program of study directly relevant to occupational health or engaged in occupational health research.

**Marlene Ruth Swirsky Memorial Award**
Awarded to an M.S.W. student on the basis of financial need and academic merit. Preference is given to students with demonstrated interest and commitment to the field of mental health. Apply to the Faculty of Social Work, Office of Student Services & Records. First award fall of 2002. Value: annual income.

**Tamarack Graduate Award in Diabetes Research**
Arthur Spoerri has generously provided funds, the annual income of which is awarded to a graduate student in the Faculty of Medicine connected with the Banting and Best Diabetes Centre. The award recognizes academic excel-
lence and provides needed financial support for
graduate students studying diabetes. Prefer-
ence is given to students whose primary area
of study is diabetic retinopathy. Apply to the
Banting and Best Diabetes Centre.

Dr. Allan S. Tauber Graduate Student Award
Awarded on the basis of academic excellence
to graduate students in the Faculty of Medicine
doing research training in the Department of
Urology.

Neil Duncan Thompson Memorial Scholar-
ship
This award was established in 1996 through an
endowment from the estate of Neil Thompson
and from family and friends for a graduate stu-
dent in the Department of Mechanical and In-
dustrial Engineering whose thesis research is in
the field of engines or motor vehicles. Value:
annual income.
OSOTF

Hillian Titley Graduate Scholarship
Awarded on the basis of financial need to a
graduate student in good standing who is inter-
ested in gerontological nursing, especially the
care of people with dementia. Academic merit
will also be considered.

Alan Tonks Scholarship in Transportation
Engineering
Friends and colleagues of Alan Tonks, former
Chair of Metropolitan Toronto, have generously
endowed a scholarship for master’s and Ph.D.
students in the Transportation Engineering pro-
gram of Civil Engineering. Scholarships will be
awarded to incoming first year students and
may be renewed – one year for master’s, two
years for Ph.D. Awarded on the basis of finan-
cial need; academic merit is also considered.
Value: variable.
OSOTF

The Toronto Hospital Foundation Graduate
Student Scholarship in Urological Research
The Toronto Hospital Foundation provides a
fellowship, awarded annually, to a registered
student engaged in urological research under
the guidance of University of Toronto faculty
members located at the Toronto Hospital (or its
successor). Value: annual income.
OSOTF

Toronto Rehabilitation Institute Student
Scholarships
Available to students in financial need enrolled
in any faculty at the University of Toronto who
are either in training at the TRI or at another
suitable institution, and whose studies will fur-
ther the strategic directions of the TRI. Contact
the Office of the Associate Dean, Graduate and
Inter-Faculty Affairs, Faculty of Medicine for
further guidelines and application information.

The Edward Jarvis Tyrrell Fellowship
Funds from the estate of Violet Louise Tyrrell, in
memory of her husband, provide a fellowship,
awarded annually on the basis of academic
merit, to a full-time research graduate student
in Chemical Engineering and Applied Chemis-
try.

Unilever/Lipton Graduate Fellowships in
Neurosciences
Available to graduate students in the Faculty of
Medicine who are studying in the area of
neurosciences at the Toronto Hospital. Value:
annual income.
OSOTF

Marjorie Van Veen Graduate Scholarship in
Human Nutrition
Awarded to graduate students in the Depart-
ment of Nutritional Sciences, Faculty of Medi-
cine. Preference will be given to students doing
graduate research or training in human nutri-
tion.

The Eugene Vayda Scholarship Award
Awarded to an M.H.Sc. or M.Sc./Ph.D. student
in the Department of Health Policy, Manage-
ment and Evaluation demonstrating excellence
and promise in program planning and evalua-
tion within the broadly defined area of service
integration. Value: annual income.

The Richard Venn & Carol Mitchell Graduate
Student Fellowships in Women’s Health Re-
search
Awarded on the basis of financial need to stu-
dents in Women’s Health Research, supervised
by faculty members at Mount Sinai Hospital
and/or its Samuel Lunenfeld Research Institute.

Douglas Verrier Memorial Bursary
Awarded to graduate students in the Depart-
ment of Physical Therapy on the basis of finan-
cial need. Preference will be given to students
who have expressed special needs, whether of
health hardship or a family issue. The bursary is
awarded at the discretion of the Chair of the
Department of Physical Therapy in consultation
with one other faculty member. Application re-
quired. Value: annual income.
OSOTF
Vietnamese-Canadian Community Graduate Award in Zoology
Awarded on the basis of academic merit to a student studying Zoology.

Vision Science Research Graduate Student Awards
Two types of awards are available:
1. Awarded to graduate students involved in vision research whose supervisors are members of the joint University of Toronto/Toronto Hospital vision science research program. Recipients are selected on the basis of financial need by a committee and the Chair of the Department of Ophthalmology.
2. Awarded to graduate students enrolled in the clinician scientist program or the M.D./Ph.D. program of the Faculty of Medicine. Academically qualified recipients are selected on the basis of financial need by a committee chaired by the Dean of the Faculty of Medicine. Apply to the Vice-Dean, Research, Faculty of Medicine. Amount: variable.

OSOTF

Seymour H. Vosko Memorial Prize
Family and friends of Seymour H. Vosko have endowed a fund to establish an award for a female graduate student in the Department of Physics.

OSOTF

E. M. Walker Graduate Award in Biodiversity
Dr. Rosemary Speirs has endowed funds to provide an award to a graduate student in Zoology.

OSOTF

Walker/Marshall Prize
Awarded on the recommendation of the Department of Medical Biophysics to doctoral students on the basis of financial need. Preference will be given to students in their final year of study. Selection is based on the uniqueness and significance of work, academic and publication record, and contribution to student life in the Department. Application is by nomination to the Student Affairs Committee. Value: annual income.

OSOTF

The Wallberg Research Fellowships
The Wallberg Research Fellowships, each with a value of $2,400, are open to graduates of a recognized university who are pursuing advanced study and research in any branch of engineering in the School of Graduate Studies.

Edwin Walter Warren Graduate Student Awards
Awarded to one or more graduate students in the Department of Chemistry on the basis of academic merit and financial need. Value: annual income.

OSOTF

Jeannette Elizabeth Watson Memorial Fellowship
Awarded on the basis of academic merit to a graduate student in the Department of Nursing Science specializing in medical or surgical nursing. Apply to the Faculty of Nursing Awards Committee by March 31. Value: annual income.

Beverly Wedemire Scholarship
Family, friends, and colleagues of Beverly Wedemire have donated funds for an annual $500 scholarship for award, on the basis of academic merit, to a graduate student engaged in the area of cancer research. The award was established in honour of Beverly Wedemire, an administrative staff member in the School of Graduate Studies for over 20 years.

Dalton Whitebread Scholarship Fund
Provides graduate student support in the Faculty of Medicine on the basis of financial need. Prioritized by the Dean of Medicine. Apply to the Faculty of Medicine. Value: annual income.

Leon and Blossom Wigdor Award for Studies in Aging
Dr. Wigdor has established a fund that provides an annual award of $2,000 to a graduate student studying the psychological, social, or behavioural sciences of aging. The award is made on the basis of financial need and academic merit. Preference is given to students enrolled in the Collaborative Program in Aging and the Life Course.

OSOTF

Judy Willcocks Memorial Bursary
This bursary honours Judy Willcocks, a graduate of the 1961 class of Physical and Occupational therapy, who adapted to lifelong chronic illnesses with courage and grace. Awarded to a full-time Rehabilitation Science student.

OSOTF

Glynn Thomas Williams Fellowship
Through a generous gift provided by Mr. Glynn Thomas Williams, this award is given to a first-year doctoral student in the Department of Mechanical and Industrial Engineering whose research has potential for commercial application.
that could benefit Canadians. Value: annual income.

**OSOTF**

**Elizabeth Ann Wintecorbyn Awards in Botany**
An endowment from the estate of the late Elizabeth Ann Wintecorbyn provides two awards to graduate students in the Department of Botany. One award is made annually to a student engaged in research which is likely to prove beneficial to agriculture, and one award is made for research beneficial to medicine. Each award is valued at half of the annual income.

**Carin Witlurich Award of Excellence for Teaching Assistants**
Awarded to the top-ranked teaching assistant in the Department of Physiology's graduate Ph.D. or master’s program for the past academic year. The award is based on evaluations by undergraduate students and the Teaching Coordinator.

**Wolfond Scholarship Program in Wireless Information Technology**
Awarded on the basis of academic merit to graduate students in the Department of Computer Science pursuing research in areas related to wireless information technology. Scholarship recipients will be known as Wolfond Fellows. Value: annual income.

**Graduate Fellowship for Research in Women’s Health and Physical Activity**
Awarded on the basis of acceptance into the program and academic merit determined by grades, publications, presentations, and research. Renewable for one year upon review. Candidates may apply or nominations may be submitted by a faculty, student, or staff member of the Faculty of Physical Education and Health. Value: annual income.

**George F. Wright Organic Cumulative Performance and Organic Seminar Awards**
Friends and colleagues of the late George F. Wright have donated funds to provide two awards of $150 each to graduate students in the Department of Chemistry. The awards will be based on performance in the organic cumulative examinations and in the regular organic seminar.

**Ramsay Wright Scholarship**
This scholarship was established to encourage research in Zoology. Value: annual income.

**The Alan Wu Research Award**
Friends and associates of the late Dr. Alan Wu have endowed funds to provide an award in his honour. A minimum cash award of $200 is granted to the graduate student presenting the best poster at the Scientific Day of the Institute of Medical Science.

**Xerox Research Centre of Canada Graduate Award**
The Xerox Research Centre of Canada provides two awards to graduate students in the Department of Chemistry. One of the awards must be made to a student in the field of materials chemistry related to information and computer technology in line with the business interest of the Xerox Research Centre of Canada. Financial need and academic merit are also considered.

**OSOTF**

**Allen Yen Scholarship**
Awarded to a doctoral-stream student registered in the Edward S. Rogers Sr. Department of Electrical and Computer Engineering studying electrical engineering. This student must display high academic achievement and demonstrate financial need. Apply to the Department of Electrical and Computer Engineering. Value: annual income.

**May Yoshida Scholarship**
Through the generosity of friends and colleagues of Professor May Yoshida, an award, based on academic merit, is available to a full-time incoming doctoral student in the Graduate Department of Nursing Science.

**Yow Kam–Yeun Graduate Scholarship in Diabetes Research**
For award, on the basis of financial need, to a graduate student in the Faculty of Medicine connected with the Banting and Best Diabetes Centre. Value: annual income.

**OSOTF**

**Adam Zimmerman Graduate Fellowships in Forest Conservation**
Awarded on the basis of academic merit to one or more students pursuing a graduate degree in forest conservation in the Faculty of Forestry. Value: annual income.

**Zindart Graduate Award for Nursing Care of Persons with Cancer**
Awarded to a full-time student entering the final year or a part-time student completing at least 50% of the program requirements. The recipient must demonstrate academic excellence in
courses related to Oncology Nursing. Apply by letter addressing the criteria and include one letter of reference from a faculty member.

Zoology International Scholarship
Professor Yoshio Masui has endowed funds to provide for two annual scholarships of approximately $750 each to foreign students registered as full-time graduate students in the Department of Zoology. Awarded on the basis of academic performance and financial need.

Zoology Sesquicentennial Graduate Award
Awarded on the basis of academic merit to a full-time graduate student in the Department of Zoology. Financial need may also be considered. Value: annual income.

Zophia Nurse Practitioner Fellowship
Awarded, on the basis of academic merit and financial need, to master's students and/or post-master's students in the Graduate Department of Nursing Science who are entering or continuing their study as Acute Care Nurse Practitioners. Apply to the Faculty of Nursing Awards Committee by March 31. Value: annual income.

2. FELLOWSHIPS AWARDED BY GOVERNMENT AGENCIES

CIHR Doctoral Research Awards
Doctoral Research Awards are intended to provide special recognition and support to students pursuing a doctoral degree in the health sciences in Canada. Candidates are expected to have an exceptionally high potential for future research achievement and productivity. The program is open to Canadian citizens and permanent residents of Canada. Only those students engaged in full-time research training in a Canadian graduate school are eligible for support. At the time of application, candidates must have completed at least 12 months of graduate study at the master’s or Ph.D. level and have been registered for no more than 26 months as a full-time student in a doctoral program. Deadline: October 15. Late or incomplete applications will not be considered. Awardees receive an annual stipend of $20,000. Program guidelines and applications available at www.cihr.ca.

Commonwealth Scholarship Plan
Under this plan various governments within the Commonwealth provide scholarships, mainly for postgraduate study, tenable in their countries by students from other parts of the Commonwealth. The emoluments are intended to cover expenses of travel, living, and tuition during tenure of the scholarship.

Details from the relevant government office in the applicant's own country or the Canadian Commonwealth Scholarship Plan, c/o International Council for Canadian Studies (ICCS), 75 Albert Street, S-908, Ottawa, Ontario, K1P 5E7. Telephone: (613) 789-7828, e-mail: general@iccs-ciec.ca. Web: www.scholarships-bourses.ca.org/.

Department of National Defence Security and Defence Forum Scholarship Programs
The Department of National Defence has established a number of scholarships within the framework of strategic studies of relevance to current and future Canadian security. Studies may relate to any of the economic, political, military, technological, or sociological dimensions of national security. Applicants must be Canadian citizens.

Ph.D. scholarships are valued at up to $16,000 and M.A. scholarships up to $12,000.

Closing date for receipt of applications is February 1. For further information and submission of application forms contact the Canadian Awards Program, International and Canadian Programs Division, Association of Universities and Colleges of Canada (AUCC), Suite 600, 350 Albert Street, Ottawa, Ontario, K1R 1B1. Telephone: (613) 563-1236, e-mail: awards@aucc.ca, Web: www.aucc.ca.

Natural Sciences and Engineering Research Council of Canada
NSERC offers postgraduate awards to assist students pursuing graduate study and research leading to advanced degrees. Post-doctoral fellowships for those wishing to add to their experience by specialized training are also available. These scholarships and fellowships are awarded on the basis of high scholastic achievement and evidence of skill at research.

All correspondence should be addressed to: Natural Sciences and Engineering Research Council of Canada, 350 Albert Street, Ottawa, Ontario, K1A 1H5. Awards are restricted to Canadian citizens and permanent residents. Value: $17,300–19,100. Web: www.NSERC.ca. Application deadline: early October.

Office of Critical Infrastructure Protection and Emergency Preparedness Research Fellowship Program in Honour of Stuart Nesbitt White
A fellowship to support research and training in disasters and emergency planning in Canada is offered for graduate study in any appropriate
Ontario Graduate Scholarships
The Government of the Province of Ontario provides 2,000 graduate scholarships tenable at Ontario universities. Sixty awards are available to visa students. These scholarships are available to students in all disciplines and are tenable only at Ontario universities. Value: $15,000 for a three-term academic year or $10,000 for two terms. The Province of Ontario contributes two-thirds and the University provides one-third (for the latter, see OGS listing under Awards Offered by the University). Application forms may be obtained from your graduate unit or from Student Support, Ministry of Education and Training, P.O. Box 4500, Fourth Floor, 189 Red River Road, Thunder Bay, Ontario, P7B 6G9, or call 1-800-465-3957. Submit applications to your graduate unit by the October deadline. Web: osap.gov.on.ca/eng/not_secure/OGS.htm.

Ontario–Quebec Exchange Fellowships
The two provincial governments will respectively award up to ten fellowships, with a value of $10,000 each for master’s–level students and $12,000 for doctoral students. Ontario residents may obtain application forms from the Graduate Studies Office of any Ontario university or by contacting the Ontario–Quebec Exchange Fellowship Program, Student Support, Ministry of Education and Training, P.O. Box 4505, Fourth Floor, 189 Red River Road, Thunder Bay, Ontario, P7B 6G9. Toll free telephone: 1-800-465-3957. Deadline: end of January. Web: osap.gov.on.ca/eng/not_secure/OQ.htm.

Petro–Canada Graduate Research Award Program
Up to four awards valued at $10,000 are awarded annually to candidates engaged in studies related to the petroleum industry. Candidates must be Canadian citizens or permanent residents working towards a master’s or doctoral degree in the sciences, engineering, social sciences, or business administration.

Applications are available from Canadian Awards Program, International and Canadian Programs Division, Association of Universities and Colleges of Canada (AUCC), Suite 600, 350 Albert Street, Ottawa, Ontario, K1R 1B1. Deadline: February 28. Telephone: (613) 563-1236, e-mail: awards@aucc.ca, Web: www.aucc.ca.

Sir John A. Macdonald Graduate Fellowship in Canadian History
The Government of the Province of Ontario makes available each year one fellowship of $8,500. The award is tenable for three years, making its maximum value $25,500. The fellowship is awarded to a candidate preparing to enter a Ph.D. program, but in exceptional circumstances may be awarded to a candidate preparing to enter a master's program. This fellowship is tenable only at an Ontario university and is awarded to a candidate who is a Canadian citizen resident in Ontario, undertaking graduate studies with a major emphasis on Canadian history.

Deadline: mid-March for students not currently registered in an Ontario university. Students who are currently registered should consult their graduate unit. Information and application at Web: osap.gov.on.ca/eng/not_secure/MAC.htm.

Social Sciences and Humanities Research Council of Canada
The SSHRC offers fellowships at the doctoral and post-doctoral level to students in the Humanities and Social Sciences disciplines. Detailed information is available at www.SSHRC.ca. Awards are restricted to Canadian citizens and permanent residents. Value: $17,700/academic year. Application deadline is set by graduate units in early October.

3. FELLOWSHIPS AWARDED BY OTHER OUTSIDE AGENCIES

Viscount Bennett Fellowship
Under the terms of a deed of gift to The Canadian Bar Association from The Right Honourable Viscount Bennett, the Viscount Bennett Trust Fund was established. Up to $20,000 may be paid annually as a fellowship for graduate study in law in an institution of higher learning to be approved by the committee. The fellowship is open to a Canadian citizen who has graduated from an approved law school in Canada or who at time of application is pursuing final year studies as an undergraduate student at an approved law school.

Applications must be submitted to the Senior Director of Communications, the Canadian Bar Association, Suite 902, 50 O’Connor Street, Ottawa, Ontario, K1P 6L2 by November 15. Telephone: (613) 237-2925 or 1-800-267-8860.
Doctoral Scholarship for Canadian Women Kappa Kappa Gamma Foundation of Canada

The Canadian Federation of University Women Fellowships
Margaret McWilliams Pre-doctoral Fellowship $10,000
Dr. Marion Elder Grant Fellowship $9,000
Beverley Jackson Fellowship $2,000
Professional Fellowship $5,000
1989 Polytechnique Commemorative Award $1,400
Alice E. Wilson Award $1,500
Margaret Dale Philip Award $1,000
CFUW Memorial Award $5,000
La Bource Georgette Lemoyne $2,000

Candidates must be Canadian citizens or must have held permanent resident status for one year prior to submitting application.

Further information may be obtained from the Canadian Federation of University Women, 251 Bank Street, Suite 600, K2P 1X3, Telephone: (613) 234-8252; Web: www.cfuw.org/english/fellowship.html.

Applications are available in July and must be submitted before November 15.

Canadian Nurses’ Respiratory Society Fellowships and Research Grants
This award is available for master’s or post-master’s study in the clinical specialty of respiratory nursing in an approved program. Application should be made to The Canadian Lung Association, 3 Raymond Street, Suite 300, Ottawa, Ontario, K1R 1A3, before November 1. Telephone: (613) 569-6411. Web: www.lung.ca/research/

The Chinese Canadian History and/or Culture Fellowship
The fellowship is offered to a graduate or post-graduate student who intends to enrol at the University of Toronto and to engage in research in the history, cultural or social composition of a Chinese-Canadian community. The fellowship has a value of at least $6,000, and is funded by the Toronto Chinese Businessmen’s Association and the Federation of Chinese Canadian Professionals (Ontario).
Selection of the fellowship recipient is based on academic achievement and on the nature and merit of the research proposal. In order to qualify for consideration, candidates must be fluent in a Chinese dialect. Apply to Admissions and Awards, University of Toronto, 315 Bloor Street West, Toronto, Ontario, M5S 1A3. Deadline: April 30.

Delta Kappa Gamma World Fellowship
The Delta Kappa Gamma Society International is an organization of professional women in the field of education. A fellowship for graduate study is offered to a female graduate student in the amount of US$4,000. To be eligible an applicant must be a female student from a country other than Canada or the United States studying under a student authorization. Applications are available from the Fellowships and Loans Office, 63 St. George Street, Toronto, Ontario, M5S 2Z9. Deadline: early December.

Naomi Grigg Fellowship
The fellowship is for full-time students in a master’s or Ph.D. program in an area of gerontology. Maximum value: $7,500. For further information, contact Soroptimist International of Toronto, 135 Donlea Drive, Toronto, Ontario, M4G 2M7. Telephone: (416) 423-5796. Deadline: March 31.

Heart and Stroke Foundation of Canada Nursing Research Fellowship
The fellowship is open to nurses undertaking research in the cardiovascular or cerebrovascular fields leading to a master’s or doctoral degree. Applications should be made to the Heart and Stroke Foundation of Canada, Research Department, 222 Queen Street, Suite 1402, Ottawa, Ontario, K1P 5V9, by March 15. Web: www.hsf.ca/research/guidelines/g-6.html

IODE Scholarships
A maximum of nine scholarships are awarded to candidates who are Canadian citizens, hold a first degree from a recognized Canadian university, and are enrolled in a doctoral program. Value: $12,000 for study in Canada; $15,000 for study overseas within the Commonwealth. Deadline: December 1. Information and applications available from the Head Office, IODE, Suite 254, 40 Orchard View Boulevard, Toronto, Ontario, M4R 1B9, (416) 487-4416, e-mail: iodecanada@sympatico.ca, and the Fellowships and Loans Office, 63 St. George Street, Toronto, Ontario, M5S 2Z9.

Kirshenblatt Memorial Scholarships
Annual awards of $2,000 are available for study or research in a program related to gerontology or gerontological nursing. Applicants must be
Canadian citizens or permanent residents intending to work in Canada. Applications are available from The Toronto Rehabilitation Institute, Research Administration Office, 550 University Avenue, Room 1202, Toronto, Ontario, M5G 2A2. Telephone: (416) 597-3422 ext. 3771. Deadline: March 31.

MacKenzie King Travelling Scholarships and MacKenzie King Open Scholarship
In the will of the late Right Honourable William Lyon MacKenzie King, provision was made to award annually a number of MacKenzie King Travelling Scholarships and one MacKenzie King Open Scholarship.

The MacKenzie King Travelling Scholarships are open to graduates of any Canadian university for study either in the United States or the United Kingdom in the field of international or industrial relations (including the international or industrial aspects of law, history, politics, economics).

The MacKenzie King Open Scholarship is open to graduates of any Canadian university for study in Canada or elsewhere in any field. Candidates are required to apply by February 1 to the Canadian university from which they have received, or will receive, their most recent degree. Applications are available from www.mkingscholarships.ca, and the School of Graduate Studies, Fellowships and Loans Office, 63 St. George Street, Toronto, Ontario, M5S 2Z9.

Registered Nurses Foundation of Ontario (RNFO)

The Roeher Institute Research Grants in the Field of Intellectual Disability
Grants valued at up to $10,000 are made possible through the support of the Scottish Rites Charitable Foundation of Canada and are available in a broad range of fields relating to human services and intellectual disability. Applicants must be Canadian citizens or permanent residents in a full-time graduate program in a Canadian university. Candidates must state intent to pursue a future career in Canada. Deadline: April 30.

For application forms and further information contact the Roeher Institute, Kinsmen Building, York University, 4700 Keele Street, North York, Ontario, M3J 1P3. Telephone: (416) 661-9611. E-mail: info@roeher.ca.

4. LOANS, GRANTS, AND OTHER BURSARIES
Graduate Students’ Emergency Loan Fund
This fund has been established in the School of Graduate Studies to assist full-time students to meet financial problems which could not have been anticipated. Full information is available from the Fellowships and Loans Office, 63 St. George Street.

Ontario Student Assistance Program
OSAP applications are available on the Web: osap.gov.on.ca. Also from Admissions and Awards, University of Toronto, 315 Bloor Street West, Toronto, Ontario, MSS 1A3, telephone: (416) 978-2190 and the School of Graduate Studies.

School of Graduate Studies Travel Grants
The grants are available to a limited number of doctoral students in the humanities (including the humanistic side of the Social Sciences) for research or study outside Canada. For information concerning teaching and research assistantships, write directly to the chair of the department concerned giving full particulars of academic training and experience.

University of Toronto Bursary Assistance
Bursaries are available to full-time graduate students on the basis of need. Special or part-time students are not eligible. Funding is limited and is specifically for emergencies arising from unforeseen circumstances. First year students are normally not eligible for consideration. Students with scholarship support or who are eligible for OSAP are normally not eligible for bursary funding. Application is through the departmental graduate coordinator.

5. TEACHING AND RESEARCH ASSISTANTSHIPS
For information concerning teaching and research assistantships, write directly to the chair of the department concerned giving full particulars of academic training and experience.
6. STUDENT EXCHANGE PROGRAMS

Ontario/Baden–Württemberg Student Exchange Program
Ontario/Rhône–Alpes Student Exchange Program

Sponsored by the Ontario Ministry of Education and Training and either the Baden–Württemberg Ministry of Science and Art, Germany and/or the Region of Rhône–Alpes, France, these programs allow students to study at any Baden–Württemberg university or a Rhône–Alpes university for one academic year for transfer credit, subject to approval by the graduate coordinator of the graduate unit and the Associate Dean of the division. Graduate students in any field are eligible to apply, and a bursary is provided to offset travel costs. Proficiency in German is required for the Baden–Württemberg Program and proficiency in French for the Rhône–Alpes Program. Applications are accepted in the fall, and results will be announced the following spring. Information and applications are available at the International Student Exchange Office, Room 202, Koffler Student Services Centre, 214 College Street, Toronto, Ontario, M5T 2Z9. Telephone: (416) 946-3138; e-mail: student.exchange@utoronto.ca.

Graduate Exchange Agreement between the University of British Columbia, McGill University, Université de Montréal, and the University of Toronto

The four universities wish to facilitate the exchange of graduate students for scholarly work and to take advantage of special facilities and courses which are available at these universities. It is agreed that each university, whenever feasible, will allow graduate students in good standing from one of the other three universities to register as exchange, visiting or special graduate students without paying fees at the institution being visited, except for student activity fees. Courses taken will be credited at the home institution and may amount to no more than 50% of the total program requirements. For further information contact the Office of the Student Services Coordinator at the School of Graduate Studies.

Institutional Partnerships

The University of Toronto is a partner to Kyoto University, Hong Kong University and Chinese University of Hong Kong, the University of the West Indies, and Humboldt. There are opportunities for student exchange. Contact the following office in September for information: International Student Exchange Office, Room 202, Koffler Student Services Centre, 214 College Street, Toronto, Ontario, M5T 2Z9. Telephone: (416) 946-3138; e-mail: student.exchange@utoronto.ca. Applications due in December.

University Commitment
The University's statement of institutional purpose says, “The University of Toronto is dedicated to fostering an academic community in which the learning and scholarship of every member may flourish with vigilant protection for individual human rights, and a resolute commitment to the principles of equal opportunity.” The University will make every attempt to provide reasonable and appropriate accommodations to persons who have disabilities. Faculty and staff carry a responsibility for creating and maintaining an inclusive environment in their teaching and work settings and responding appropriately to requests for accommodation of a disability. Accessibility Services provides support and advice to faculty and staff regarding appropriate accommodations, information about disabilities, and community resources.
Responsibilities of Students who have Disabilities
Students who request accommodations for their academic programs and related activities at the University are obligated to disclose their disabilities to the respective campus Service for Students with Disabilities and request accommodations in a timely manner to facilitate the implementation of support and services. It is vitally important that students discuss their needs as early as possible with the Service in order to put accommodations in place. Students must present relevant and up-to-date documentation, as outlined on the Web site, from an appropriate health care professional.

Support Services for Students
There are offices on all three U of T campuses working to facilitate the inclusion of students with disabilities into all aspects of university life. The focus is on skills development, especially in areas of self-advocacy and academic skills. Services are provided to students who have a physical, sensory, or learning disability, mental health disability, acquired brain injury, or chronic health condition, as well as students who have temporary disabilities such as a broken dominant arm.

The Service provides a wide range of support, including:

- Learning disability assessments
- Adaptive technology assessments
- Adaptive technology and assistive devices
- Alternative test and examination arrangements
- Volunteer note-taking services
- Sign-language interpreters
- Information on disability-related issues
- Liaison with academic and administrative offices within the University and with off-campus agencies
- On-campus transportation (St. George campus only)

To access the Service, students meet with a counsellor to discuss individual needs, accommodations, and strategies for success. Where appropriate, eligible students are referred to one of the professionals on staff such as the Learning Disability Specialist, or Occupational Therapist, for assessments to identify strategies and determine accommodations. Any information about a student’s disability is confidential and is not shared outside the Service unless the student gives permission. Students are encouraged to meet and discuss their needs with their instructors.

There is a Bursary for Students with a Disability (BSWD) for students who have applied and established eligibility for OSAP. The BSWD helps students with disability-related educational costs while attending post-secondary institutions. To access the bursary, students meet with a Service counsellor on their campus. University alternate bursaries are also available for eligible support and services.

ATHLETIC CENTRE
55 Harbord Street
Toronto, Ontario
M5S 2W6

Telephone:
Pre-recorded building hours and schedules 978-3437
Program information 978-3436
Varsity Blues Events information 978-GAME (4263)
Court reservation 978-3436
Intramurals 978-5845
Intercollegiate Office 978-3443
Sports Medicine Clinic 978-4678
Varsity Arena and Field 978-7388

Web: www.utoronto.ca/physical

The Athletic Centre (AC) is a great place to relax, meet people, exercise, learn and play. It offers programs for people at all levels of physical skill and interest. All full-time and part-time students are members of the AC through the payment of their incidental fees.

Located on the southeast corner of Harbord Street and Spadina Avenue, the array of AC programs and facilities is impressive. With 12 squash courts; 3 swimming pools (Olympic, 25-yard, and learn-to-swim); indoor track and field house with 200-metre track; 8 gymnasiums; strength training facilities; four multi-purpose courts for badminton, basketball, tennis and volleyball; a dance studio; a cardio training area; and a sport medicine clinic, the AC has something for everyone.

Programs, activities, and services include more than 30 free fitness classes a week; hundreds of hours of recreational activities and instruction programs in fitness, dance and movement, aquatics, and sport; personal trainers and fitness testing; and an extensive kids’ program. The programs also include the largest intercollegiate and intramural program available in Canada. U of T Intramurals is one of the best ways to be active and to meet students from across the University! Supporting the Varsity Blues intercollegiate program is another great way to get involved at U of T, whether it’s as an athlete or as an ardent fan.
Detailed information about the AC programs is available in the AC Guide, published twice each year and on the web site at www.utoronto.ca/physical. Information on the Varsity Blues is available at www.varsityblues.ca.

The AC is operated by the Faculty of Physical Education and Health, which also runs the athletic programs at Varsity Arena, Varsity Field, and on the front and back campuses. Students are actively involved in this management through the Faculty’s governance structure. All U of T students are eligible to participate on the Council of Athletics and Recreation (CAR), which is responsible for overall policy, including allocation of funds to program areas, staffing, rental, and fees. For more information on governance, contact (416) 978-2136.

The AC strives to create an inclusive environment for all program and activity participants regardless of their skill level, ability, or area of interest. The Faculty is committed to developing, advancing, and disseminating knowledge about physical activity, health and their interactions through education, research, leadership, and the provision of opportunity.

CAREER CENTRE

University of Toronto Career Centre
Koffler Student Services Centre
214 College Street
Toronto, Ontario
M5T 2Z9

Telephone: (416) 978-8000
Web: www.careers.utoronto.ca

The Career Centre has developed the following services to meet the career planning and employment needs of the graduate student population.

Graduate Dossier Service
The Graduate Dossier Service is a repository of information for doctoral candidates seeking academic positions. Responding to a request from a student or an institution, the student’s curriculum vitae, confidential letters of reference, and university transcripts are copied and mailed to prospective employer institutions. Further information and registration kits may be obtained from the Career Centre. This service is only offered on the St. George campus.

Career Counselling/Career Talks
Counsellors assist students one-on-one with career development plans. This includes identifying skills, clarifying options, and teaching students how to research occupations.

Career Development and Employment Search Seminars
A variety of seminars are available to assist graduate students with career planning, conducting an effective employment search, writing proper résumés, and preparing for employment interviews.

Graduating Students Employment Service
A number of Fortune 500 companies, government agencies, and organizations who anticipate their hiring needs six to eight months in advance arrive on campus to recruit the graduating class. The majority of these organizations are from the business and technical sectors and many express an interest in recruiting master’s and doctoral students.

Recent Graduates Employment Service
This service is designed to assist recent University of Toronto graduates seeking immediate full-time employment to develop a marketing plan. Employment opportunities listed with this service represent a good cross-section of what is available in the current employment market.

Career and Employment Information
Graduate students are invited to visit the Career Centre’s resource library which contains information on a wide range of careers and has an extensive employer section.

Résumé Clinic
Students may have their résumés and covering letters reviewed before sending them to potential employers. Appointments to review academic curricula vitae are made directly with a career counsellor.

Practice Interviews
Students interested in fine-tuning their interview skills may schedule a 30-minute one-on-one session with a counsellor to receive valuable feedback and tips on how to improve their performance.

Student Outreach Service
Tailored career development presentations may be arranged and delivered at specific departments for groups of at least 30. For further information, contact Mary Giamos at (416) 978-8012 or at m.giamos@utoronto.ca
DAY CARE

The Margaret Fletcher Day Care Centre
100 Devonshire Place
Toronto, Ontario
M5S 2C9

Telephone: (416) 978-6725
E-mail: f.dobbin@utoronto.ca

The Margaret Fletcher Day Care Centre provides full day care for children 2½ to 5 years of age of University of Toronto students, staff, and faculty.

The program offers activities from all areas of a preschool curriculum (art, sensory, math, science, language, constructive, drama). A vegetarian cuisine and escort service to the junior and senior kindergarten classes at Huron Street Public School are available.

For more information, contact the Supervisor, Francesca Dobbin.

ENGLISH LANGUAGE AND WRITING SUPPORT (ELWS)

Dr. Jane Freeman, Director
Room 109, 63 St. George Street
School of Graduate Studies
University of Toronto
Toronto, Ontario
M5S 229

Telephone: (416) 946-7314
Fax: (416) 978-4367
Email: jane.freeman@utoronto.ca
Web: www.sgs.utoronto.ca/english

The School of Graduate Studies has established an Office of English Language and Writing Support (ELWS) to provide professional development to graduate students who wish to improve their oral and written communication skills. ELWS offers individual consultations and a range of workshops and non-credit courses for both native and non-native speakers of English. Programs are free to registered graduate students. For course/workshop descriptions, or information on how to book an individual consultation, see the ELWS Web site at www.sgs.utoronto.ca/english.

EQUITY ISSUES ADVISORY GROUP

Web: www.library.utoronto.ca/equity/

Convenor, Equity Issues Advisory Group
Telephone: (416) 946-8628, 946-5624
Fax: (416) 971-2037

The Equity Issues Advisory Group is a coalition of offices charged with promoting the equality of all persons at the University of Toronto. Any member of the University community is invited to contact the appropriate office with questions or concerns.

GRADUATE STUDENTS’ UNION (GSU)

16 Bancroft Avenue
Toronto, Ontario
M5S 1C1

Telephone: (416) 978-2391, 978-6233, 978-8464
Fax: (416) 971-2362
E-mail: gsunion@chass.utoronto.ca
Web: www.utoronto.ca/gsunion

The GSU is located in the heart of the Earth Sciences Centre, between Spadina and Huron, just south of Willcocks Avenue.

The GSU is the student government representing the 11,000 full-time and part-time graduate students at U of T and OISE/UT. Payment of the incidental fee automatically entitles graduate students to membership in the Union and to full use of all facilities and services.

The GSU provides a wide range of services for graduate students, including political representation at all levels of University government and assistance in cutting through bureaucratic red tape.

Supplementary Health Insurance Plan: All full-time students paying GSU fees are covered. The plan pays for 80% of prescription drugs plus other benefits. Dental coverage is available only if dental care is required as the result of an accident. In September (or January for students starting then), students may purchase family coverage or opt out if they have equivalent coverage. See our Web site for complete details and forms.

The GSU Pub, fully licensed and non-profit, is open from noon until midnight, Monday to Friday. (416) 978-8466. The Pub is a great place to hold special events and to relax with colleagues.

Sylvester’s Café (upstairs in the GSU), now redecorated, is open from 9:00 a.m. to 3:00 p.m. and serves delicious breakfasts and lunches. Check out the menu on the Web site. Catering is available. (416) 978-5247.

The GSU Gym may be booked for basketball, badminton, and volleyball. Space may be booked on the last Thursday of the month (for the following month) from 10:00 a.m.

International Student Identity Cards, available free to all GSU members, provide great discounts for air and rail travel. Call for information and an appointment.

Fantastic Book Sales: Two a year (Fall and Spring). Call for details or watch for postings from your course union representative.

Graduate Course Unions are organized by students within every department (over 70 in total) and are funded by the GSU. Students

FAMILY CARE OFFICE

Koffler Student Services Centre, Main Floor
214 College Street
Toronto, Ontario
M5T 2Z9

Telephone: (416) 978-0951
Fax: (416) 946-5466
E-mail: family.care@utoronto.ca
Web: www.library.utoronto.ca/familycare

Many students balance family obligations with their studies. The University of Toronto is committed to fostering a family-friendly learning and working environment. The Family Care Office provides information, guidance, and referral services to students who require child care (facilities, programs, or subsidies), elder care, and assistance with other family matters. Additional services consist of support groups, a fathers’ group and a series of workshops, including "Choosing Child Care that Works for Your Family" and "Financial Survival for Student Families". The Family Care Office maintains a resource centre containing practical material on family issues ranging from pregnancy and infant care to lesbian and gay parenting and caring for elderly family members. The resource centre also contains information on activities and facilities for university families on campus and in the community.

elect a representative to attend GSU Council which meets eight times a year. This representative is your primary contact regarding GSU events and news. Contact Charlotte Reeve at (416) 978-8464 to find out about your Course Union.

The GSU Executive is elected every March and consists of five officers: President, Vice-President (Internal), Vice-President (External), Secretary, and Treasurer. Four Executive Members-at-Large are elected by the GSU Council.

The GSU Office Staff keep the GSU running smoothly. They help with course union organizing, student appeals, dissemination of information, political lobbying, and much more.

Publications: Annual GSU Survival Handbook available from your department.

CUPE 3902 (Canadian Union of Public Employees) represents graduate students who hold a teaching assistantship. The office is at 180 Bloor Street West, Room 902. (416) 593-7057, www.cupe3902.org.

HART HOUSE

Telephone: (416) 978-2452
Fax: (416) 978-8387
Web: www.utoronto.ca/harthouse/

For the mind, body, and soul. A home-away-from-home for generations of students, Hart House is the social, recreational, and cultural centre of the St. George campus. University of Toronto graduate students are automatically members.

Take advantage of a wide variety of events and programs, including classical and jazz concerts, formal debates, art exhibitions, literary events, and a full-service athletic facility. Hart House Theatre offers theatrical, film, music, dance, and spoken-word events. Relax by a fire in one of the many common rooms. Listen to music in the Record Room, read a magazine in the Reading Room, or browse the collection of Canadian poetry and short fiction in the Hart House Library. Recognized student groups may reserve rooms in the House for meetings or special events.

Hart House has over 30 clubs and committees catering to a diverse range of interests including art, archery, bridge, chess, choral singing, a cultural exchange to Finland, debating, drama, film, interfaith dialogue, investment, jazz, masters swimming, orchestra, photography, SCUBA, and string and wind ensemble music. Contact the Hall Porters’ Desk at (416) 978-2452 to find out more about club and committee membership. Hart House, and all of its clubs and committees, are governed by students.

Athletic facilities include a pool, indoor track, Nautilus machines, exercise bikes, treadmills, Stairmasters, rowing machines, squash courts, a gymnasium, a fully-equipped weight room, a massage clinic, and modern locker rooms. Athletics programming includes dance, martial arts, yoga, pilates, aquatics, and a full fitness class line-up. Fitness assessment and personal training services are available. Contact Athletics at (416) 978-2447.

The Hart House Farm is situated on 150 acres in the Caledon Hills, just northwest of the city, and is available to graduate student members and their families for hiking, swimming, cross-country skiing, and overnight camping. Seasonal Farm events include Cider and Song in the fall and Sugaring Off, a maple syrup festival, in the spring. For information, call (416) 978-2447.

The Hart House Permanent Collection is one of the most valuable collections of Canadian art. Pieces from the collection are displayed throughout the House. The Justina M. Barnicke Gallery hosts exhibitions from the Permanent Collection twice annually and from contemporary Canadian artists throughout the year.

Food services are available at two locations in Hart House. The Arbor Room serves healthy, affordable food in a casual setting. The Gallery Grill, located on the second floor, features fresh cuisine and excellent restaurant service. Other services include The Hair Place and the Hart House store.

Hart House is open 365 days a year. Check the weekly column in The Varsity, or our Web site at www.utoronto.ca/harthouse/. There is life outside the classroom!

HEALTH SERVICE

Health Service Clinic
Koffler Student Services Centre
214 College Street, Second floor
Toronto, Ontario
M5T 2Z9

Telephone: (416) 978-8030
E-mail: health.services@utoronto.ca
Web: www.utoronto.ca/health
Hours: Monday to Friday 9:00 a.m. to 5:00 p.m.
Tuesday and Wednesday until 7:00 p.m.

The Health Service is for students and their partners. It offers comprehensive family physician care, health education and counselling,
contraceptives sold at reduced rates, travel immunization and education, nutrition education, and referrals to specialists as required. Student cards and health cards (e.g., OHIP, UHIP) are required.

Psychiatric Service
Koffler Student Services Centre
214 College Street, Main floor
Toronto, Ontario
M5T 2Z9
Telephone: (416) 978-8070
Web: www.utoronto.ca/psychservices
Hours: Monday to Friday 9:00 a.m. to 5:00 p.m.
Tuesday 9:00 a.m. to 7:00 p.m.

The Psychiatric Service offers assessment and/or treatment for students with emotional and psychological concerns. The clinical staff possess expertise in a wide variety of therapeutic methods including individual, couple, and group psychotherapy. The service is confidential and fully covered by OHIP/UHIP and other provincial health plans.

To make an appointment, please telephone or visit the department in person.

A Supplementary Health Insurance plan is provided by the graduate Students' Union (GSU) for full-time graduate students. Information is available on the GSU and Health Service Web sites.

E-mail: residences-office@scar.utoronto.ca
Web: www.scar.utoronto.ca/~residence/

The University of Toronto Student Housing Service in the Koffler Student Services Centre serves as a year-round source of up-to-date off-campus housing and residence information as well as other information to assist students in locating and arranging suitable housing.

On-Campus Single Student Residences
There are a number of residences available for single graduate students at U of T. In addition, there are a number of independently-owned residences located near the St. George campus that house U of T students. Every residence has its own admission office and application procedure. If you are interested in living in a residence, contact directly the office of each residence of interest to inquire about its specific application process. Because demand for residence space is high, it is important to apply early — if possible, before you are admitted to U of T. To increase your chances of receiving an offer, it is wise to apply to as many residences for which you are eligible. Visit the Student Housing Web site for more details.

Student Family Housing
Family housing is available in 710 apartments on the St. George campus and in 84 apartments on the Mississauga campus. Priority for these unfurnished apartments is given to student families. The term “family” refers to students residing with their dependent children and to childless couples in a permanent relationship.

While many students can be housed within one to two years of their application, this is only an average and depends on many variables, the most important of which is the availability of vacant apartments in any given month. It is
advisable to apply as soon as you are seriously considering attending the University – if possible before being given an offer of admission to the University. For more information or to apply, contact the Student Family Housing offices or visit their Web site.

**Off-Campus Housing**

The Student Housing Service maintains a registry of available off-campus housing advertised by private landlords, and by students seeking others to share accommodation. The registry of housing ads is available to students in the housing offices on all three campuses, as well as on the Web. Students search the ads in the registry as they would the classified section of a newspaper, and make appointments to view potential units. Students coming to Toronto from afar should arrange to stay in temporary housing while conducting their housing search. The Student Housing Service will provide a list of temporary accommodation on request.

Housing in Toronto is usually advertised four to six weeks in advance of the date the unit becomes available for occupancy. It generally takes one to three weeks for a student to locate suitable accommodation, depending on the type of housing desired and the student’s budget. For the fall and winter sessions, some students rent their long-term housing from August 1 or October 1, avoiding the September 1 occupancy date (which is popular with students at most post-secondary educational institutions in the city). At the Student Housing Service, students can search the ads by type of accommodation (i.e., room, bachelor apartment, house, etc.), area of the city, and price range. Free phones are available for student-use to contact landlords. Since accommodation listed is not inspected, the quality cannot be estimated or guaranteed. Therefore it is very important for students to meet with the landlord and inspect the premises before entering into any agreement.

**Cost of Student Housing - Residence, Family Housing and Off Campus**

As a guideline, in 2002/2003, the cost of residence with a full meal plan was approximately $6,200 to $7,800 for the eight-month academic session. The cost of a shared apartment-style residence with no compulsory meal plan was approximately $3,600 to $5,200. However, please note that residence fees for the upcoming school year are expected to rise. After paying an initial deposit, the balance of fees are usually paid in two installments at the beginning of each of the four-month fall and spring sessions.

As of August 1, 2002, rent for the bachelor, one-bedroom, and two-bedroom units located in the Student Family Housing complex located at 30/35 Charles Street West range from approximately $527 to $863 depending on the size of the unit, and is payable monthly. Students looking for rooms in shared houses or apartments off campus should expect to budget $400 to $600 per month. A student requiring a private apartment off campus usually pays $600 to $800, $750 to $1,000, or $1,000 to $1,400 for a bachelor, one-bedroom, or two-bedroom unit respectively. A three-bedroom house or apartment will usually rent for $1,500 to $2,000.

**Graduate House**

60 Harbord Street
Toronto, Ontario
M5S 3L1

Telephone: (416) 946-8888
Fax: (416) 946-8887
E-mail: information.gradhouse@utoronto.ca
Web: www.sgs.utoronto.ca/gradhouse

A newly-constructed residence stands as the western gateway to the University of Toronto on the north-east corner of Harbord Street and Spadina Avenue. Graduate House is home to both full-time students from the School of Graduate Studies and full-time students from six professional faculties (Dentistry, Law, Medicine, Nursing, OISE/UT, and Pharmacy). In administering Graduate House, the School of Graduate Studies is committed to providing its residents with an affordable and supportive environment conducive to both the pursuit of academic excellence and a fulfilling life experience.

Graduate House has a capacity of 430 beds in designs of three-bedroom and four-bedroom fully furnished suites. Most of the bedrooms within the suites are singles, though there are a few shared double bedrooms, as well as a few premium single bedrooms. Each suite also contains two or three bathrooms, a kitchen, and a living area. Residents are expected to do their own cooking and are responsible for cleaning their own suites. Graduate House is a completely non-smoking environment.

Occupancy fees are currently $582 per month per person for a single bedroom, $442 per month per person for a shared double bed-
room, and $649 per month for a premium single bedroom. Occupancy fees include heat, light, water, air-conditioning, and high-speed internet access. All occupancy fees are subject to possible change as of May 1 each year.

For more information and application forms, e-mail admissions.gradhouse@utoronto.ca or visit our Web site at www.sgs.utoronto.ca/gradhouse.

Massey College
4 Devonshire Place
Toronto, Ontario
M5S 2E1

Telephone: (416) 978-2891
Fax: (416) 946-7890
E-mail: g.sharpe@utoronto.ca
Web: www.utoronto.ca/massey/

Massey College is the only independent graduate college associated with the University of Toronto. It is interdisciplinary and provides a focus for graduate work and a congenial intellectual environment for the exchange of opinions and ideas. Its graduate members work in various branches of the humanities, sciences, and professions, and come from all parts of Canada and around the world. The College’s superb facilities are located centrally and are open twelve months a year. All rooms are single and fully furnished. A meal plan is provided.

All applications must be addressed to the College Registrar and must be completed and received by May 1. Admission is based on academic achievement, discipline and level of study, extracurricular activities, and general experience. Consideration is given to student representation from all academic disciplines and from professional programs such as law, medicine, and education. The College elects both resident and non-resident fellows.

Contact the College Registrar for further details.

INTERNATIONAL STUDENT CENTRE—ISC
33 St. George Street
Toronto, Ontario
M5S 2E3

Telephone: (416) 978-2564
Fax: (416) 978-4090
E-mail: isc.information@utoronto.ca
Web: www.library.utoronto.ca/isc/

The International Student Centre promotes and supports international education and offers services, programs, and facilities for international students, students with international and/or intercultural interests, and students looking for education and work opportunities abroad. Located on the St. George campus, the ISC welcomes all students to use its lounges and meeting rooms on a casual basis to relax, study, have lunch, or meet with friends. Specific programs and services offered at ISC include advice and assistance on immigration and health insurance concerns, a newsletter, electronic listserv, English conversation classes, personal counselling, a buddy program, US visa service, trips and activities, and work/study information for Canadians wishing to go abroad.

LIBRARY SYSTEM

Telephone: (416) 978-8450
Fax: (416) 978-7653
E-mail: utlink@library.utoronto.ca
Web: www.library.utoronto.ca

Researchers have access to approximately 15 million items in the library collections of the University of Toronto, making this resource the largest in Canada and ranking in the top five academic libraries in North America. The major portion of this collection is divided between the Gerstein Science Information Centre and the John P. Robarts Library for humanities and social science materials. As well, there is the Thomas Fisher Rare Book Library containing extensive special collections, the Engineering and Computer Science Library, the OISE/UT Library (Education), the Pharmacy Library, and the Earth Sciences Library. A smaller portion of the collection is housed in over 30 libraries across the campus. Generally, these are in affiliated college libraries or in specialized collections representing such fields as law, physics, architecture, and dentistry.

Study space is provided in many of the libraries, and individual carrels, desks, and book lockers are available.

The library offers a wide variety of sophisticated information retrieval services. The library’s on-line information system provides access to the library’s main collections, to various periodical indexes, to the catalogues of other major libraries throughout the world, and to 14,000 full-text electronic journals. In addition, on-line literature searching provides references from commercial databases to recently
published books and articles in specific subject areas.

**Information Commons**
The Scotiabank Information Commons, located on the first floor of the Robarts Library, is a focal point at the University for electronic information access. Among many services, it offers a design studio, new media suites, and a help desk to support Internet and electronic mail access for all faculty, staff, and students.

**Resource Centre for Academic Technology (RCAT)**
RCAT, located on the fourth floor of the Robarts Library, facilitates the development of effective teaching, learning, and research strategies based on emerging computer technologies. It supports individuals with special needs through the advancement of accessible information technologies.

**OMBUDSPERSON**
Office of the University Ombudsperson
Suite 161, 222 College Street
Toronto, Ontario
M5T 3J1

*Telephone:* (416) 978-4874  
*Fax:* (416) 978-3439  
*E-mail:* ombuds.person@utoronto.ca  
*Web:* www.utoronto.ca/ombudsperson

As part of the University's commitment to ensuring that the rights of its individual members are protected, the University Ombudsperson investigates complaints from any member of the University not handled through regular University channels. The Ombudsperson offers advice and assistance and can recommend changes in academic or administrative procedures where this seems justified. In handling a complaint, the Ombudsperson has access to all relevant files and information and to all appropriate University officials. The Ombudsperson handles all matters in strict confidence, unless the individual involved approves otherwise. The Ombudsperson is independent of all administrative structures of the University and is accountable only to the Governing Council.

**SEXUAL HARASSMENT EDUCATION, COUNSELLING, AND COMPLAINT OFFICE**
Third Floor, 40 Sussex Avenue
Toronto, Ontario
M5S 1J7

*Telephone:* (416) 978-3908  
*Fax:* (416) 971-2289  
*Web:* www.library.utoronto.ca/equity/sxh.htm

The Sexual Harassment Education, Counselling, and Complaint Office administers the University's Sexual Harassment Policy by providing advice, education, and information to the University community; counselling all parties to complaints; and mediating complaints about harassment based on sex or sexual orientation.

The Policy covers all members of the University. The complaint process is confidential. The office is on the St. George campus; however, the Sexual Harassment Officer visits the U of T Mississauga and U of T at Scarborough campuses on a regular basis. Call to schedule an appointment; arrangements may be made to meet on your campus.
## Course Codes

A graduate course is understood to require at least two hours per week of lecture or seminars, plus such laboratory hours as may be required.

Not every course listed in the calendar will be given in any one year. Consult the graduate unit for course availability.

### Glossary of Course Codes

**Primary codes** denote courses where one academic unit has responsibility for offering the course.

**Joint codes** denote courses where two or more graduate units participate to offer the course.

Academic Year
In the School of Graduate Studies, the academic year begins in September and ends in August. The academic year is divided into three sessions:
1 Fall Session (September to December and designated YEAR9)
2 Winter Session (January to May and designated YEAR1)
3 Summer Session (May to August and designated YEAR5).

Alphabetical Character Following Course Number

Y Full Course
H Half-Course

 Indicator used to identify specific courses which may continue over a program. The course is graded when completed.

Y and H courses may be offered in either the Fall or Winter Sessions or spread over both. Please consult departmental timetables for details.

Graduate Programs

This section contains an alphabetical listing of all the graduate programs offered by the School of Graduate Studies at the University of Toronto. SGS comprises over 80 graduate units (departments, centres, and institutes) offering approximately 145 programs.

Each graduate unit's offerings are described in a separate entry containing information about that unit's graduate faculty, admission requirements, program requirements, courses of instruction, contact information, and a Web site where you may visit for more details.
Addiction Studies (Collaborative Program)

The graduate units of Adult Education and Counselling Psychology; Anthropology; Biomedical Engineering; Criminology; Information Studies; Medical Science; Pharmaceutical Sciences; Pharmacology; Psychology; Public Health Sciences; Social Work; and Sociology, in collaboration with the Centre for Addiction and Mental Health, the Canadian Centre on Substance Abuse, and the Ontario Tobacco Research Unit, participate in the Collaborative Program in Addiction Studies at the University of Toronto. The purpose of the program is to develop and integrate graduate training in the multidisciplinary field of addictions, an area that includes the use and abuse of alcohol, tobacco, and psychoactive substances, as well as gambling and other addictive behaviours. Master's programs requiring a thesis, practicum, or research paper, and Ph.D. programs are included. Students must be registered in the School of Graduate Studies through one of the collaborating departments before application can be made to the collaborative program.

Program Requirements
All master's students in the collaborative program are required to take PAS 3700H Multidisciplinary Aspects of Addictions, plus a half-year course selected from the list of approved courses presented below or an approved directed reading course.

Ph.D. candidates in the collaborative program are required to take PAS 3700H Multidisciplinary Aspects of Addictions, if they have not already done so, plus one additional half-year course (not taken previously) from the approved listing of courses presented below or an approved directed reading course.

In addition, students in the collaborative program must meet all requirements of their home department in terms of course work and thesis work, or equivalent. For both the thesis master's and doctoral degrees, the student's thesis must deal with a subject in the field of addictions. The thesis is supervised and evaluated in the same manner as others in the home department, but normally involves, as appropriate, supervisory and examining professors from other disciplines represented in the collaborative program. In collaborating departments that do not require a thesis, a practicum or major research paper will be accepted instead of a thesis, as long as the topic or focus is directly related to addictions. In collaborating departments that do not have a thesis or equivalent requirement, students must take a third half-year course from the list of approved electives. Upon fulfilment of the program requirements, transcripts issued by the School of Graduate Studies will denote completion of the Collaborative Program in Addiction Studies.

Courses of Instruction
The following courses in the Collaborative Program in Addiction Studies are offered by the participating departments for the current academic year.

PAS 3700H Multidisciplinary Aspects of Addiction/M. J. Ashley, R. Mann, C. Williams
PAS 3701H Advanced Research Issues in Addictions/R. Mann, P. Erickson
CHL 5119H Social and Political Perspectives on Drugs and Addictions/B. Fischer
CHL 5417H Tobacco and Health: From Cells to Society/R. G. Ferrence, J. Cohen
JPM 1005Y  Behavioural Pharmacology/E. M. Sellers, D. M. Tomkins, Staff
MSC 1085H  Molecular Approaches to Mental Health and Addictions/J. Kennedy
PSY 2703H  The Psychology of Addictions/J. Cunningham
SOC 6123H  Sociology of Addiction/P. G. Erickson
SWK 4616H  Drug Dependence: Treatment Approaches/W. Skinner, Staff
Adult Education and Counselling Psychology

Application Packages
Initial enquiries and requests for application packages regarding admission to graduate studies in the Adult Education and Counselling Psychology Department should be made directly to

The Ontario Institute for Studies in Education of the University of Toronto (OISE/UT)
Registrar’s Office
Graduate Studies, Admissions Unit
Fourth Floor, 252 Bloor Street West
Toronto, Ontario
Canada
M5S 1V6

Telephone: (416) 923-6641 ext. 2663 or 1-800-785-3345
E-mail: gradstudy@oise.utoronto.ca

Such enquiries should be made well in advance of the regular deadline for receipt of applications. Given the limited number of students the Department may accept into the majority of its programs, not all eligible applicants will be admitted.
### General Information
Program and admission details are printed in the OISE/UT Bulletin, available from the OISE/UT Registrar’s Office.

Adult Education and Counselling Psychology is the second largest of the five departments within OISE/UT and offers a full range of graduate degrees (M.A., M.Ed., Ph.D., and Ed.D.) in each of two major programs: Adult Education and Counselling Psychology.

### Adult Education
The Adult Education program faculty are grouped into four areas of study:
- **a** Aboriginal/Indigenous Education
- **b** Workplace Learning and Change
- **c** Creative Inquiry, Personal and Professional Learning
- **d** Community, International, and Transformative Learning

Collaborative master’s programs in Environmental Education and in Women's Studies are also available in the Adult Education program.

### Courses of Instruction
Not all courses are given each year. Please consult the course schedules available from the Registrar’s Office.

Interprogram Courses
The following courses are accepted for credit in the Adult Education program and will satisfy that program’s specialization requirement. For descriptions, see the relevant programs.

AEC 1400H Special Topics in Adult Education and Counselling Psychology/ Staff
AEC 1405H Introduction to Qualitative Research: Part I/ B. Burstow, Staff
AEC 1406H Introduction to Qualitative Research: Part II/ B. Burstow, Staff
AEC 3233H Research Seminar in Career Development/M. A. Guttman, Staff
SES 1925H Indigenous Knowledge and Decolonization: Pedagogical Implications/G. J. S. Dei
SES 2942H Education and Work/D. W. Livingstone
SES 2970H Countering Myths about Aboriginal Peoples through Multiple Medias/J. Iseke-Barnes
SES 3951H Canadian Political Economy and Education/D. W. Livingstone

Counselling Psychology
The Counselling Psychology program offers three specializations:

a Counselling Psychology for Psychology Specialists
b Counselling Psychology for Community and Educational Settings
c Guidance and Counselling

Courses of Instruction
Not all courses are given each year. Please consult the course schedules available from the Registrar’s Office.

Counselling Psychology
AEC 1202H Theories and Techniques of Counselling/Staff
AEC 1203Y Practicum in Counselling/M. A. Guttman, L. Stermac, J. E. Watson, J. Silver, Staff

Fax: (416) 667-7743
Web: www.utias.utoronto.ca

The University of Toronto Institute for Aerospace Studies (UTIAS) offers a complete undergraduate and graduate program in aerospace science and engineering. Since the establishment of UTIAS during the 1940s, the aerospace field has evolved into a multidisciplinary activity that finds itself at the cutting edge of high technology research and development.

Graduate programs leading to the M.Eng., M.A.Sc., and Ph.D. degrees are offered. Only the M.Eng. may be taken on a part-time basis. The M.A.Sc. program is research oriented and includes a major thesis, while the M.Eng. program is oriented towards professional engineering practice and consists primarily of course work. Advanced graduate research may be undertaken at the Ph.D. level. The requirement for Ph.D. studies is a research oriented master's degree; the M.Eng. degree does not include thesis work and is not considered to be appropriate preparation for a Ph.D. degree.

The information provided here supplements the SGS general and degree regulations. Further details concerning departmental regulations are available in the Graduate Office at UTIAS.

Areas of Research

1 Flight Mechanics
   Aircraft Design: Stability and control of aircraft, aeroelasticity, lighter-than-air technology, remotely piloted vehicles.
   Experimental Flight Mechanics: Air cushion technology, flight research.
   Vehicle Simulation: Aircraft, ground vehicle and human-machine systems.

2 Fluid Dynamics
   Gasdynamics: Hypersonics, dusty gases, unsteady and high temperature gasdynamics, explosions, blast wave phenomena, turbulent combustion.
   Aerodynamics: Subsonic, transonic, supersonic and unsteady aerodynamics, turbulence, aeroacoustics.
   Propulsion: Propellers, ram jets, flapping wings, gas turbines.
   Computational Fluid Dynamics: Flow solvers for high Reynolds number turbulent and reactive flows, aerodynamic applications, and aerospace propulsion.

3 Materials and Structures
   Composite Materials: Structural optimization, impact analysis and response, failure analysis, failure optimization, material property enhancement, thermoplastics.
   Fibre-Optic Smart Structures: Fibre-optic structural sensing for intelligent monitoring and damage assessment systems.
   Environmental Effects on Materials: Simulation of space and upper atmosphere.

4 Spacecraft Mechanics
   Space Vehicles: Dynamics and control of flexible spacecraft, damping, gyroelasticity, system identification, microsatellites.
Space Robotics: Dynamics and control of flexible manipulator systems, variable-geometry truss manipulators, intelligent control systems, neural networks, laboratory simulation of robotic systems.

5 Engineering Physics
Fusion Energy: Plasma-surface interactions, advanced materials for fusion reactors, ultra-high vacuum systems, fusion fuels, experimental and computer modelling studies on tokamaks.

Many of these research topics apply directly to major scientific and engineering areas of emphasis within the aeronautical and space industry in Canada. Seminars on topics outside the specific technological areas are given by visiting specialists to round out the educational program. The Institute has developed a cooperative research and development program with the Canadian aerospace industry under which qualified employees can pursue a degree program of direct interest to their firms.

UTIAS participates in several federal and provincial Centres of Excellence: Institute for Robotics and Intelligent Systems (IRIS); Intelligent Systems for Innovative Structures (ISIS); and the Centre for Research in Earth and Space Technology (CRESTech).

Degree of Master of Engineering
1 Candidates for the M.Eng. degree shall hold the degree of Bachelor of Applied Science of this University or an equivalent degree in engineering.
2 Under the guidance of the graduate coordinator or a staff supervisor, a candidate selects a program of study which consists of 12 courses. Individual programs will be arranged to make up for background deficiencies.
3 The program may be pursued on a full-time or part-time basis.

Degree of Master of Applied Science
1 Candidates for the degree of M.A.Sc. are admitted under the SGS general regulations. Qualified graduates in engineering, mathematics, physics, or chemistry are encouraged to apply. Individual programs will be arranged to make up for any background deficiency.
2 A program of study will normally consist of five courses, one of which must be AER 1800H Research Seminar in Aerospace Science and Engineering, and a thesis based on research or development, selected in consultation with the student's supervisor. All of the required courses must be completed during the first year of the program.
3 Research performance of M.A.Sc. students is assessed by a Research Assessment Committee (RAC), which includes the student's supervisor.
4 It is anticipated that M.A.Sc. students will complete their degree requirements in 18 months.
5 See below for information on the direct transfer option from M.A.Sc. to Ph.D.

Degree of Doctor of Philosophy
1 Candidates for Ph.D. studies must have an M.A.Sc. degree in engineering, mathematics, physics, or chemistry and must have demonstrated ability to perform advanced research. The M.Eng. degree, which consists primarily of course work, is not considered to be appropriate preparation for the Ph.D. program. Applicants with a bachelor's degree who wish to pursue Ph.D. studies at UTIAS will initially be admitted into the M.A.Sc. program and will be considered for direct transfer into the Ph.D. program; see below.
2 Students with excellent performance in an M.A.Sc. program at UTIAS may be allowed to transfer directly into a Ph.D. program, under the same supervisor, at the end of their first year of graduate study. Approval for transfer will be based on the student's research ability, research progress during the first year and academic standing. In what follows, students transferring from an M.A.Sc. to a Ph.D. program shall be referred to as 'transfer students'.
3 Ph.D. students must be registered continuously for every session, including the summer session, on a full-time basis until all degree requirements have been completed. Ph.D. students starting with an M.A.Sc. degree must spend a minimum of two years on campus. Transfer students must be on campus for a minimum of three years from the date of registration in the M.A.Sc. program.
4 Following acceptance into a Ph.D. program, the candidate shall undertake a program of study under the guidance of a Doctoral Advisory Committee (DAC) which includes the candidate's supervisor.
5 A Ph.D. student's program of study includes course work and a thesis which must be based on research conducted while registered for the Ph.D. program. Ph.D. students starting with an M.A.Sc. degree require four courses. Transfer students need four courses in addition to the five completed prior to the M.A.Sc. to Ph.D. transfer for a total of nine courses. All courses must be completed during the first two years in the Ph.D. program.
6 It is anticipated that a student with a master's degree in a discipline appropriate to the field of
Ph.D. study will complete the Ph.D. program on a full-time basis in less than four years. The anticipated period for transfer students is less than five years from the date of registration in the M.A.Sc. program. The DAC plays an important role in assisting students to meet this goal. The functions of the DAC are:

a. to ascertain the suitability of the student for advanced research,
b. to assess the thesis topic,
c. to conduct formal reviews of the student's progress at least once a year (unsatisfactory progress may result in the termination of the student's candidacy), and
d. to provide first assessment of the completed thesis.

Program Milestones:

a. The first DAC meeting is held within six months of Ph.D. program start (or date of transfer for transfer students); the aim is to identify the topic and scope of the thesis.
b. Subsequent DAC meetings are held at least once a year.
c. Upon completion of the thesis, the student presents the thesis at a Departmental Doctoral Seminar before defending it at the Final Oral Examination as prescribed under the SGS degree regulations in this calendar.

8 Prior to convocation, Ph.D. candidates must prepare at least one formal manuscript, based on the thesis, for publication in a refereed journal or conference proceeding.

Financial Support

Guaranteed Minimum Financial Support

In accordance with the UTIAS guaranteed financial support policy, students with satisfactory academic performance will be guaranteed a minimum level of financial support for year one of M.A.Sc. studies and for years one to four in the Ph.D. program. This minimum level of support will include all external scholarships and fellowships exceeding $5,000/year in total, and a portion of income earned from teaching assistantships. The minimum for the current academic year is set at $18,000 for non-visa students and $22,500 for visa students. Students who have major external scholarships (e.g., NSERC, OGS, OGSST, etc.) will receive $6,000/year supplements, bringing their total support well above the minimum level. Students are strongly encouraged to apply for external scholarships. All external awards, major or otherwise, must be disclosed to the UTIAS Graduate Office.

Students in years of study not covered by the guaranteed financial support policy may receive financial assistance from their supervisors' research grants/contracts.

External Scholarships/Fellowships

Students are strongly encouraged to apply for all available external scholarships/fellowships for which they are eligible. Such major scholarships include NSERC, OGS, and OGSST; NSERC is restricted to Canadian citizens and permanent residents, but the OGS and OGSST are available to visa students.

The Kenneth M. Molson Fellowship for Studies in Aerospace Engineering at UTIAS

This fellowship is worth up to $27,000. One award is made annually to an outstanding student entering a Ph.D. program or who is in year one of a Ph.D. program at UTIAS. Should the student have external scholarships/fellowships, we shall supplement the external awards up to a total of $27,000 per year. Thus the student will receive multi-year supplements until the $27,000 Molson Fellowship is used up or until the student graduates. The selection will be in accordance with the University’s Policy on Student Awards and the conditions specified by the Ontario Student Opportunity Fund program.

Teaching Assistantships

Teaching Assistantships are available to students with appropriate qualifications. Part of the income earned is included in the guaranteed minimum level of support stated above. Students must apply for teaching assistantships during the summer of the academic year commencing in September.

Courses of Instruction

The Department should be consulted each session as to course offerings.

Flight Mechanics

AER 0503H Aeroelasticity/J. D. DeLaurier
AER 1202H Advanced Flight Dynamics/H. T. Liu
AER 1211H Human Control of Flight Systems/P. R. Grant
AER 1214H Airplane Dynamics (Flight Laboratory)/J. H. de Leeuw
AER 1215H Aerodynamics and Flight Mechanics of Rotorcraft/J. H. de Leeuw, L. D. Reid
AER 1220H Remotely Piloted Flight Vehicles

Fluid Dynamics

AER 0510H Aerospace Propulsion/J. P. Sisilian
AER 1301H Kinetic Theory of Gases/C. P. T. Groth

Fax: (416) 978-4771
Web: www.utoronto.ca/lifecourse/collaborative

The Collaborative Program prepares students for specialization in the field of aging, an area that includes individual human aging and population aging, with an emphasis on viewing aging issues within the perspective of the life course. Students must apply to and register in a home participating unit (i.e., one of the graduate departments, faculties, or institutes listed below), and follow a course of study acceptable to both that unit and the Collaborative Program in Aging and the Life Course. Applications will be considered for the following degree programs:

- Adult Education and Counselling Psychology ... M.A., M.Ed., Ph.D., Ed.D.
- Anthropology .......................... M.A., M.Sc., Ph.D.
- Dentistry .............................. M.Sc., Ph.D.
- Exercise Sciences .................. M.Sc., Ph.D.
- Health Policy, Management and Evaluation .......... M.H.Sc., M.Sc., Ph.D.
- Information Studies ................. M.I.St., Ph.D.
- Medical Science ........................ M.Sc., Ph.D.
- Nursing Science ..................... M.N., M.N./M.B.A., Ph.D.
- Pharmaceutical Sciences .............. M.Sc., Ph.D.
- Psychology .......................... M.A., Ph.D.
- Public Health Sciences .............. M.H.Sc., M.Sc., Ph.D.
- Rehabilitation Science .............. M.Sc.
- Social Work .......................... J.D./M.S.W., M.H.Sc./M.S.W., M.S.W., Ph.D.
- Sociology .......................... M.A., Ph.D.
- Speech-Language Pathology .......... M.H.Sc., M.Sc., Ph.D.

Application Procedures

Collaborative programs are administered under the auspices of the School of Graduate Studies. Applicants may apply concurrently to their
participating graduate unit and to the Collaborative Program in Aging and the Life Course.

1. Applicants must apply to a participating graduate unit and comply with the admission procedures of that unit.

2. Applicants must forward the following to the Program Committee of the Collaborative Program in Aging and the Life Course:
   a. a copy of the School of Graduate Studies Application form submitted to the participating graduate unit
   b. copies of official undergraduate and graduate transcripts from all institutions previously or currently attended
   c. a résumé or curriculum vitae
   d. a letter explaining how their program of study and specific research interests relate to aging and the life course studies at the graduate level
   e. for Ph.D. applicants only: two letters of reference (with specific mention of aging/life course studies background)

Note: Students may use copies of official documents (a and b above) for their application to the Collaborative Program in Aging and the Life Course. These may be obtained from their home participating graduate unit.

Program Requirements

In addition to meeting the program requirements of their home department, students will be required to complete two courses (one core and one elective) at both the master’s and doctoral levels. It is expected that the student’s thesis or practicum (whichever is included in their program of study) would be in the area of aging and the life course.

Upon successful completion of the requirements, students receive, in addition to the master’s or doctoral degree from the graduate unit, the notation “Completed the Collaborative Program in Aging and the Life Course” on their transcript.

Core Courses

Master’s Level

AGE 2000H Principles of Aging/P. Ballantyne

Doctoral Level

AGE 3000H Advanced Research Seminar in Aging and the Life Course/Staff

(AGE 2000H is a prerequisite for entry into the doctoral level of the Collaborative Program)

Elective Courses

AEC 1131H Special Topics in Adult Education: Alternative Methods of Researching Aging, Illness and Health/Staff

AGE 2500H Current Research Topics in Aging and the Life Course/Staff

CHL 5211H Demographic Analysis/J. Hsieh

DEN 1003Y Preventive Dentistry/H. Limeback

EXS 5501H Physical Activity and Aging/ R. Goode

NUR 1037H Aging and Place: Social and Policy Transitions/G. Andrews

NUR 1056H Places, Programs, and People Who Provide Care/Staff

REH 1520H Physiological Factors Constraining Rehabilitation of the Elderly/K. Lundon, S. G. Thomas

REH 1620H Methodological Issues in Research on Aging and Health/ A. Colantonio, C. Cott

REH 1640H Sociology of Disability/K. K. Yoshida

SLP 1533Y Aphasias/E. Rochon

SLP 1534Y Motor Speech Disorders/Staff

SLP 2501H Special Topics in Communication Disorders/Staff

SLP 2502Y Specialized Study in Communication Disorders/Staff

SOC 6124H The Life Course in Modern Society/Staff

SOC 6708H Advanced Data Analysis/B. Wheaton

SWK 4405H Social Gerontology and Social Work/P. L. McDonald

SWK 4613H Social Work Practice with the Aged/J. Globerman

Requests to approve other courses as equivalent to fulfill program requirements may be made to the Program Committee.
Ancient and Medieval Philosophy (Collaborative Program)

Program Committee
D. S. Hutchinson, BA, BPhil, DPhil
(Director)
B. C. Inwood, BA, MA, PhD, FRSC, Canada Research Chair
J. C. Magee, BA, MA, PhD

E-mail: dshutchinson@trinity.utoronto.ca
Web: www.chass.utoronto.ca/~cpamp/

The graduate departments of Philosophy and Classics, and the Centre for Medieval Studies participate in the Collaborative Program in Ancient and Medieval Philosophy. The program operates only at the doctoral level, and students are enrolled in one of the three collaborating units. The program is administered by the Program Committee which is drawn from all three units and is chaired by the Director who is a member of the Committee. The three units contribute courses and provide facilities and supervision of doctoral research.

All candidates must meet the admission criteria of the unit through which they wish to enrol and must fulfill the normal requirements of the Ph.D. in their home unit. Their program of study must also be approved by the Program Committee and must include the following elements:

1. A language competence examination at the appropriate level (in at least one of Greek, Classical or Medieval Latin, or Arabic, as relevant) consisting of unseen translation must be successfully completed before the major field or area examinations are first attempted.

2. Area or major field examinations must contain a paper involving translation from at least one of Greek, Classical or Medieval Latin, or Arabic (as appropriate to the area or field). This examination will be based on a substantial list of texts relevant to the field or area.

3. Candidates for the Ph.D. in Ancient and Medieval Philosophy are required to have a reading knowledge of two modern languages other than English.

4. Each student must take and successfully complete two graduate half-courses, or the equivalent, in some area of philosophy other than the history of philosophy.

In most cases, some of these elements will be fulfilled by program requirements in the doctoral program of the home unit.

Candidates will normally concentrate in either ancient or medieval philosophy, though it is not necessary to indicate such specialization formally. Successful completion of the program permits the designation "Completed Collaborative Program in Ancient and Medieval Philosophy" to appear on the student's transcript.

Interested students should contact the Director and the Graduate Coordinator of the unit in which they intend to register.
Ancient Studies (Collaborative Program)

University of Toronto
Toronto, Ontario
Canada
MSS 1C1

Web: www.chass.utoronto.ca/fine_arts/asp/ascp.html

Nature of the Collaborative Program
The graduate departments of Classics, History of Art, and Near and Middle Eastern Civilizations offer a Collaborative Program in Ancient Studies providing a structure in which the expertise of the faculty and the resources of the three departments are pooled. The program is available at the M.A. and Ph.D. levels and provides students with an opportunity to combine the study of material culture with literature or history, to pursue historical and cultural studies linking the Greco-Roman world and the Near and Middle East, or to pursue studies comparing Aegean or Greco-Roman with Near and Middle Eastern art, myth, literature, society, or history. The participating departments contribute courses and provide facilities and supervision for graduate research. Students may also be able to participate in excavations and other types of archaeological research.

Students in the program apply to and register in one of the participating departments (the home department); the home department is responsible for each student’s funding and general academic standing. Students in the program follow a course of study acceptable to both the home department and to the Ancient Studies Program Committee. Upon successful completion of the requirements, students receive the M.A. or Ph.D. degree in their home department, with the notation “Completed Collaborative Program in Ancient Studies” on their transcripts.

The Collaborative Program is administered by a Program Committee consisting of a Director, the Graduate Coordinators (or their designates) of the participating departments, and one member from each participating department other than that in which the Director holds a primary appointment.

Faculty and Range of Course Offerings
The faculty in the participating departments cover a broad spectrum of Ancient Mediterranean and Mesopotamian culture.

Classics is one of the largest and most diverse departments in North America, offering courses in Greek and Roman history, languages, literature, science, and philosophy. History of Art has three full-time faculty members in the Ancient area, and their expertise includes the art and archaeology of the Mediterranean world from the Bronze Age to the end of the Roman period. The Walter Graham/Homer Thompson Chair in Aegean Prehistory provides distinctive strength in that field. Near and Middle Eastern Civilizations is one of the largest departments of its kind in North America. It offers programs in the languages, literatures, history, and archaeology of ancient Egypt, Syria-Palestine, and Western Asia. Allied departments such as Anthropology and Medieval Studies provide depth, further enhanced by cross-appointed faculty at the Royal Ontario Museum.

For specific courses, see the separate departmental listings.

Admission
Students must satisfy the admission requirements of the department in which they are registered (the home department). See the separate listings for each participating department. The Director of Ancient Studies can provide helpful advice on admissions.

In addition to meeting the admission requirements of their home department, students who wish to be admitted to Ancient Studies must have:
1 a substantial preparation in subject areas covered by at least two of the collaborating departments;
2 an appropriate level of training in at least one ancient language (some areas of doctoral research will require more than one ancient language). Otherwise qualified students whose preparation is insufficient in one or more areas may be advised to enrol in a preliminary year in the M.A. program or as special (non-degree) students.

Admission to the home department is determined by each department; enrolment in the Collaborative Program is determined by the Program Committee, normally at the time of admission (although later enrolment is also permissible).
Program Requirements
The aim of each department’s Ph.D. program in Ancient Studies is to prepare students for a career in university-level teaching and research, combining expertise in one or more ancient languages and cultures. Students may enter the Ph.D. program directly from a strong B.A. Those entering with an M.A. in an appropriate field may begin the Ph.D. with advanced standing.

The aim of each department’s M.A. program in Ancient Studies is to prepare students for its interdisciplinary doctoral program in the field.

Master of Arts
Ancient Studies students in all departments must fulfill the program requirements of the home department and pursue a program of study approved by the Collaborative Program Committee. In addition to, or in conjunction with, the fulfillment of the requirements of the home department, as specified by the home department, students must:
1. successfully take at least one half-course equivalent of study in the subject area of another participating department;
2. demonstrate competence in at least one ancient language relevant to the student’s research, as approved by the Program Director, by passing a sight translation examination with a grade of B- or better.

Doctor of Philosophy
Ancient Studies students in all departments must fulfill the Ph.D. requirements of their home departments and pursue a program of study approved by the Collaborative Program Director. In conjunction with, or in addition to, the requirements specified by the home department, students enrolled in the Ancient Studies Program are required to take two full-course equivalents and one or more exams: an examination in the minor field in the subject matter of another collaborating department, and an examination in an ancient language. Accordingly, Ancient Studies students will:
1. by the end of the first year of Ph.D. registration, fulfill all the requirements for the M.A. (above). Students with an M.A. in Ancient Studies will have done so already.
2. by the end of the first year of Ph.D. registration, demonstrate competence in at least one ancient language relevant to the student’s research, as approved by the Program Director, by passing a sight translation examination with a grade of B+ or better.
3. complete all required course work before the major field/comprehensive examinations are attempted. A total of four half-course equivalents must be taken in the subject area of another participating department (this includes courses taken during the M.A.). This may require courses beyond the number prescribed by the home department.
4. demonstrate reading knowledge of two modern languages of research (other than English and normally including German) before the major field/comprehensive examinations are attempted.
5. complete a major field/comprehensive exam, according to the requirements of the home department and normally within the subject area of the home department, and also a minor field within the subject area of another participating department. The major field/comprehensive exam and the minor field are tested by special examination. The major field/comprehensive exam provides context for the candidate’s dissertation topic. The minor field is designed to develop the student’s competence in a second discipline.
6. complete a dissertation by the end of the fifth year.

Ph.D. candidates whose major field involves the study of material culture will normally be required to spend three months undertaking approved research outside North America.

The Department of Anthropology offers research training and courses of instruction in the fields of archaeology, linguistic anthropology, medical anthropology, physical anthropology, and social-cultural anthropology.

Admission Requirements
Applicants are admitted to the M.A., M.Sc., and Ph.D. programs under the general regulations of the School of Graduate Studies.

All applicants must hold at least a B+ average, or equivalent, before being considered by the Departmental Admissions Committee. Applicants must also satisfy the Department that they have the appropriate background to enter a particular program of graduate study. In addition to two letters of reference, a brief statement of interest (not exceeding 500 words) is required for the admissions application.

Masters Programs
The Department offers a Master of Arts degree program in the five sub-fields of Anthropology and a Master of Science degree program, normally in archaeology, medical anthropology, and physical anthropology.

Degree of Master of Arts

1. The M.A. program normally extends over a 12-month period lasting from September to September, formal instruction being offered from September to April.
2. The M.A. program may also be taken on a part-time basis.
3. Candidates are required to complete the equivalent of four full courses which must include ANT 1001H, ANT 1002H, and ANT 2000Y M.A. Research Paper.
Degree of Master of Science
1 The M.Sc. program is a two-year program that is normally completed by the summer of the second year.
2 The M.Sc. program may also be taken on a part-time basis.
3 Candidates are required to complete the equivalent of five full courses, which must include ANT 1001H, ANT 1002H, and ANT 2500Y. M.Sc. Research Paper. Of the other three full courses, 1.5 courses will normally be 'science' courses in archaeology, medical anthropology, physical anthropology, or related disciplines depending on the student's program.

Degree of Doctor of Philosophy
The Ph.D. is primarily a research degree. A program of study is designed for each student to ensure competence in a field of research, culminating in the writing of a thesis. At the beginning of the year, each student will submit with the SGS Enrolment Form a Program Statement describing his or her plan to meet program requirements. Each student will normally be involved in fieldwork, in the broad meaning of the term, and in theoretical analysis. Before proceeding to full-time research, candidates must complete these program requirements:
1 be resident on-campus for one year.
2 normally complete the equivalent of three full courses, including ANT 1004H. 
3 present and defend a thesis proposal. Students are strongly encouraged to submit and defend their thesis proposal early in the second year of their program.
4 work under the direction of a supervisor. Applicants are encouraged to indicate departmental members with whom they want to conduct Ph.D. research. (The Department regrets that it cannot admit students to the Ph.D. program, regardless of their qualifications, unless a supervisor is available.)
5 demonstrate a reading knowledge of a language other than English and additional languages (or appropriate linguistic preparation) for special field situations.

Collaborative Programs
The Department of Anthropology participates in the following collaborative programs:
Aging and the Life Course
Addiction Studies
Asia-Pacific Studies
Environmental Studies
Ethnic and Pluralism Studies
International Relations
Semiotics
Women's Studies

For details on these programs, see separate entries in this calendar.

Courses of Instruction
Not all courses are offered every year. Check with the Department for current year's offerings.

General
ANT 1001H Social Theory and Method in Anthropology
ANT 1002H Evolutionary and Ecological Theory and Method in Anthropology
ANT 1004H Career Development in Anthropology

The Faculty of Architecture, Landscape, and Design offers three graduate programs leading to the degrees of Master of Architecture, Master of Landscape Architecture, and Master of Urban Design.

Degree of Master of Architecture
The Master of Architecture (M.Arch.) is a professional degree program and provides a thorough base of knowledge in history, theory, technology, ecology, society, and professional practice, while developing skills in design through an intensive sequence of design studio courses. These are supported by courses in visual communication and architectural representation, including computer modelling and other new media. The program aims to develop critical, creative, and independent thinking and research that responds to current design issues and societal change. The greater Toronto region is used as an urban laboratory for the development of new knowledge and forms of practice.

Admission Requirements
The M.Arch. is a 3.5-year program intended for individuals with a 4-year bachelor’s degree (B.A., B.Sc., B.A.Sc.) demonstrating a final year grade point average of at least mid-B, and showing leadership potential in the field. The following courses are required for admission: secondary calculus, secondary physics, and university architectural history (half-credit). Preparation in the visual arts, such as drawing, sculpture, graphics, photography, film, or new media, as well as computing and advanced writing skills is recommended. The course of study is rigorous and comprehensive, preparing graduates for the full range of professional activities in architecture. The core program is extensive, and students are required to use their electives to develop an area of special skill...
and knowledge through an independent study program that culminates in a design thesis.

**Program Requirements**
Students are required to take a total of 17.5 full-course equivalents (FCE): 15.0 are in core courses and 2.5 are in electives. Within the elective requirements 1.0 FCE must be in the History and Theory stream. The program is normally expected to be completed in 7 sessions (3.5 years). If undertaken on a part-time basis, the time limit is 6 years. There is no language requirement for this program other than proficiency in English. Writing support is integrated into the program in order to develop specialized skills in writing which are essential to effective learning and communication in the design fields.

**Courses of Instruction**

### Core Courses

**Design**
- ARC 1011Y Architectural Design Studio 1: Design
- ARC 1012Y Architectural Design Studio 2: Site, Building, Tectonics
- ARC 2013Y Architectural Design Studio 3: Culture and the Metropolis
- ARC 2014Y Architectural Design Studio 4: Comprehensive Building Project
- ARC 3015Y Architectural Design Studio 5: Option Studios
- ARC 3016Y Architectural Design Studio 6: Option Studios
- ARC 3017H Thesis Research and Preparation
- ARC 4018Y Architectural Design Studio 7: Thesis

**Computer Modelling**
- ARC 2023H Intermediate Computer Applications in Architecture

**Visual Communication**
- ARC 1021H Visual Communication 1
- ARC 1022H Visual Communication 2

**History and Theory**
- ARC 1031H Historical Perspectives on Topics in Architecture 1
- ARC 1032H Historical Perspectives on Topics in Architecture 2

**Technics and Planning**
- ARC 1041H Architecture in its Technological-Ecological Context
- ARC 1042H Site Engineering and Ecology

**Elective Courses**
Not all elective courses are offered every year. Please check the timetable available from the program office in August.

**Design**
- ARC 1013H Graphic Design
- ARC 1014H Furniture Design
- ARC 1015H Set Design for Television

**Computer Modelling**
- ARC 3024H Advanced Computer Applications in Architecture

**History and Theory**
- ARC 1033H Architecture, Media and Communications
- ARC 1034H Architecture, Philosophy, Art
- ARC 1035H Toronto Architecture and Urban Form
- ARC 1036H Architectural Criticism
- ARC 1037H Topics in Architecture and Cultural Difference
- ARC 1038H Urban Design History and Theory
- ARC 1039H Housing Design: Theory and Practice
- ARC 2031H (Re)Constructing Domesticity: Ideas and Techniques of Construction in Mid-Century North American Houses
- ARC 2032H Architecture after 1945

**Professional Practice**
- ARC 3051H Professional Practice 1
- ARC 4052H Professional Practice 2

**Computer Modelling**
- ARC 2043H Building Science, Materials and Construction 1
- ARC 2044H Structures 1
- ARC 2045H Building Science, Materials and Construction 2
- ARC 2046H Structures 2
- ARC 2047H Environmental Systems

**History and Theory**
- ARC 2034H Modern Italian Architecture and Urban Design History
- ARC 3031H Analysis of Architectural Form
- ARC 3032H Mies van der Rohe
- ARC 3033H Selected Topics in Architectural History and Theory
- ARC 3034H Selected Architects
- ARC 3035H Selected Topics in Urban Design
- ARC 3036H Current Art in Its Urban Context
- ARC 3037H Global Architecture: Urban Analysis and Documentation
- ARC 3038H Global Architecture: History and Theory
ARC 3039H Independent Study and Research in Architecture

Technics and Planning
ARC 3041H Selected Topics in Architecture, Technology, Ecology
ARC 3042H Sustainable Architecture

Professional Practice
ARC 4053H Topics in Professional Practice

Degree of Master of Landscape Architecture
The Master of Landscape Architecture (M.L.A.) is a professional program which focuses on urban landscape architecture, design, and theory within a challenging studio-based curriculum. Integrated courses in history, technology, and the environment, as well as options for free electives, provide a comprehensive professional landscape architecture education.

Admission Requirements
The M.L.A. is a three-year professional program for individuals who have completed any four-year bachelor’s degree (B.A., B.Sc., B.A.Sc., B.E.S., B.F.A., B.Com.) with a minimum average of B, and have demonstrated leadership potential in the field. Preference is given to individuals who have completed a balanced undergraduate education that includes study in the arts, sciences, and humanities. The following specific courses at the undergraduate level are highly recommended: biology/ecology, geography, English, and history. Preparation in the visual arts, such as drawing, sculpture, graphics, photography, film or new media, as well as in computing and advanced writing is recommended.

Program Requirements
Students are required to take a total of 15.5 full-course equivalents (FCE): 13.5 are in core courses and 2.0 are in electives. Within the elective requirements, 1.0 FCE must be in courses offered by the Faculty. The remaining 1.0 FCE will be taken in other academic divisions of the University. The program is completed in 3 years. If undertaken on a part-time basis, the time limit is 6 years. Writing support is integrated into the program in order to develop specialized skills in writing which are essential to effective learning and communication in the design fields.

LAN 3034H Life Among the Ruins: Post-Crisis Scenarios

Environment
LAN 2037H Selected Topics in Landscape Architecture, Technology and Ecology

Degree of Master of Urban Design
The Master of Urban Design (M.U.D.) program prepares architects and landscape architects for design-based research and professional practice at the urban and regional scales. The M.U.D. program is committed to design as a primary medium of operation and research in a broad intellectual framework that includes geography, environmental studies, social sciences, media studies, economics, and engineering. It aims for responsible and creative design in the context of the post-metropolis, with attention to new paradigms of urbanization, global economic restructuring, and information technology. The program emphasizes a coherent intellectual approach that is committed to analysis and critique and seeks to become the central Canadian forum for advanced research, design innovation, scholarship, criticism, and debate in urban design.

Admission Requirements
The M.U.D. is a two-year, post-professional program open to applicants with a professional degree in architecture (B.Arch. or M.Arch.) or landscape architecture (B.L.A., M.L.A.). Individuals with a degree in urban planning (M.C.P., M.U.P., or M.Sc.P.) may be considered for admission if they met the above criteria. A design specialization or if they have professional design experience. All candidates must submit a portfolio of design work for review. Candidates with a planning background may also satisfy the design requirement by taking a preliminary make-up year in design in the Faculty of Architecture, Landscape, and Design.

Program Requirements
Students are required to take a total of 10.0 full-course equivalents (FCE): 5.0 FCE are in core courses including option studios, 2.0 are in thesis, and 3.0 are in electives. Two of the elective courses are to be selected from offerings in the History, Theory, and Criticism category. The program is normally expected to be completed in 2 years. If undertaken on a part-time basis, the time limit is 6 years.

Nature of the Collaborative Program
Graduate units in Anthropology, East Asian Studies, Economics, Geography, History, Management, Political Science, and Sociology participate in the collaborative master's degree program in Asia-Pacific Studies at the University of Toronto. The collaborating units contribute courses and provide facilities and supervision for master's level research. This program is administered by a Program Committee chaired by a Program Director.

The collaborative master's degree program in Asia-Pacific Studies is designed to provide graduates with advanced training in a particular discipline and in the historical and social science studies of modern East and Southeast Asia. The major topics of emphasis in the collaborative master's degree program are political economy, modern and contemporary social history, international relations, gender, political and social change, economic development, and cultural studies. The collaborative master's degree program in Asia-Pacific Studies contributes to the development of an integrated and interdisciplinary research community in Asia-Pacific Studies at the University of Toronto.

Applicants to the collaborative master's degree program in Asia-Pacific Studies are expected to meet the admission and degree requirements of both a home unit and the program in Asia-Pacific Studies. The collaborative master's degree program requirements can be met concurrently with, or in addition to, home unit requirements.

Students who successfully complete the requirements of the collaborative program will receive the notation "Completed Collaborative Program in Asia-Pacific Studies" on their transcript in addition to the master's degree from the home unit.

Application Procedures
Candidates must apply to one of the participating home graduate units and must also submit a supplementary application to the collaborative program. In order to qualify for admission to the collaborative master's degree program in Asia-Pacific Studies, applicants must be offered admission to a participating graduate unit. Applicants must forward the supplementary application to the collaborative master's degree program following:
- a copy of the School of Graduate Studies Application Form or, for M.B.A. applicants, the Rotman School of Management Application Form submitted to a participating home graduate unit,
- official undergraduate and graduate transcripts from all institutions attended previously and currently,
- at least two letters of reference with specific mention of Asia-Pacific Studies background or Asia-Pacific experiences
- a statement of purpose
- a curriculum vitae

Admission Requirements
To be considered for admission to the collaborative master's degree program in Asia-Pacific Studies, applicants should have taken the equivalent of four full-year courses with substantial Asia coverage by the time of application, or should have had substantial working or living experience in East or Southeast Asia.

Program Requirements
1 ASI 1000Y
2 A full-course equivalent that may be
   a a master's thesis,
   b a major research paper in one of the full-year courses related to Asia-Pacific, or
   c a thesis-equivalent research paper in an independent research half-course. This option must be combined with an additional half-course on Asia-Pacific listed on the Web site (www.utoronto.ca/asiapacific-ma).
3 Normally the completion of a 300-level (third-year) undergraduate course in Chinese, Japanese, or Korean with a minimum grade of B+ (or equivalent); or of a 200-level (second-year) undergraduate course in another language of East or Southeast Asia with a minimum grade of B+ (or equivalent). For a student without any background in Chinese, Japanese, or Korean, this requirement can normally be met by two year-long courses and a summer language course, or two summer courses and one year-long course. For a student choosing to specialize in other parts of East Asia or Southeast Asia, the language requirement can normally be met by two summer courses, or one summer course and a year-long course. For students in special cases (interest in environmental studies, international management, and possibly others), the language requirement may be reduced, subject to the joint approval of the Program Director in Asia-Pacific Studies and the graduate coordinator in the home department. The language requirement can be fulfilled either before entering the program or during a student’s enrolment in the program.

Courses of Instruction
ASI 1000Y  Issues in Asia-Pacific Studies

Please consult the Asia-Pacific Studies Web site for courses offered by participating graduate units.

The Department of Astronomy and Astrophysics is actively engaged in a wide range of observational and theoretical research on solar system dynamics, stars, stellar systems, the interstellar medium, the Galaxy, galaxies, quasars, clusters of galaxies, cosmology, and problems in general relativity. The Department has close ties with the Canadian Institute for Theoretical Astrophysics (CITA), located in the same building. This association enables our students to work and consult with leading theorists who are appointed to or are visiting CITA. In total, there are approximately 100 faculty, post-doctoral fellows, graduate students, and staff in the Department of Astronomy and Astrophysics and in CITA. Students also benefit from direct interactions with the broad range of external speakers invited to the weekly Department and CITA seminar programs and colloquia.

The David Dunlap Observatory (DDO) houses a 1.88-m telescope, the largest in Canada, which is equipped with efficient CCD spectroscopic instruments. DDO also provides shops for electronic and mechanical work. Faculty and students enjoy access to the Magellan 6.5-m telescopes and the Dupont 2.5-m telescope at Las Campanas under an instrumentation development collaboration with the Carnegie Observatories. We have an active experimental program using telescopes on long-duration stratospheric balloons telescopes for cosmological and Galactic research.

Admission Requirements
1. Candidates are accepted under the general regulations of the School of Graduate Studies. Applicants who were educated outside Canada should pay particular attention to the English language competency requirements.
2 Because many universities do not offer extensive undergraduate training in astronomy and astrophysics, preparation in physics and mathematics is an acceptable background for candidates.

3 Candidates are strongly advised to take the verbal, quantitative, and advanced physics tests of the Graduate Record Examination administered by the Educational Testing Service, Princeton.

Degree of Doctor of Philosophy

Program Requirements
1. It is intended that the degree program be completed in five years (15 sessions). Candidates are normally expected to be on campus full time for the duration of their program.
2. Candidates are immediately engaged in original research through two required research courses, AST 1501Y and AST 1500Y, with different supervisors. An oral exam by committee is held for each.
   Schedule: AST 1501Y is normally completed during the fall/winter of the first year, and AST 1500Y is completed in the following summer.
3. The core of the program is a thesis embodying the results of original research which must be submitted for appraisal in accordance with the regulations of the School of Graduate Studies.

As a first step, a candidate is required to prepare a written Ph.D. thesis proposal (possibly, but not necessarily, on a theme emerging from one of the first two research courses) and defend it in an oral examination conducted by a panel of faculty members.

The intention of this “qualifying examination” is to assess the candidate’s ability and readiness to carry forward and successfully complete independent Ph.D.-level research. This assessment is based on the candidate’s graduate record to date, including graduate lecture courses and research performed, together with the presentation and defence of the proposed Ph.D. thesis.

Schedule: The qualifying examination is taken after four and within five sessions of beginning the program. Candidates register each year, beginning in the second year, in the research course AST 400*Y (in sequence of the last digit: 2, 3, etc.).

4 Candidates follow an approved program of study including:
   a. the research courses AST 1500Y, AST 1501Y, and AST 400*Y (in sequence of the last digit: 2, 3, etc.) and
   b. a minimum of four half-courses, at least two of which are from among the AST Elective or Specialized Courses, subject to the approval of the instructor, the candidate’s Ph.D. program committee, and the Department.

More courses may be taken for credit or audited as appropriate.

Schedule: The required half-courses are normally taken on average one per session in the fall and winter sessions during the first two years of the program.

Degree of Master of Science

Program Requirements
1. Candidates are immediately engaged in original research through two required research courses, AST 1501Y and AST 1500Y.
2. Candidates follow an approved program of study including:
   a. the research courses AST 1500Y, AST 1501Y, and
   b. a minimum of four half-courses, at least two of which are from among the AST Elective or Specialized Courses, subject to the approval of the instructor, the candidate’s M.Sc. program committee, and the Department.

More courses may be taken for credit or audited as appropriate.

Collaborative Program in Astrophysics
The Departments of Astronomy and Astrophysics, Physics, and CITA cooperate to offer a Master of Science program in astrophysics. For details, consult the Astrophysics (Collaborative Program) entry in this calendar.

Courses of Instruction

Preparatory Courses
AST 1410H Stars
AST 1420H Galactic Structure and Dynamics
AST 1430H Cosmology
AST 1440H Radiation Processes and Gas Dynamics

Research Courses
AST 1500Y Directed Research
AST 1501Y Introduction to Research
AST 400*Y Research
* Students register each year, beginning in the second year, in sequence of the last digit: 2, 3, etc.

The graduate units of Astronomy and Astrophysics, Physics, and the Canadian Institute for Theoretical Astrophysics participate in the Collaborative M.Sc. Program in Astrophysics. This program fosters graduate education in Astrophysics, particularly in those areas of study that overlap traditional departmental boundaries.

Admission Requirements
Application for admission to the Collaborative M.Sc. Program in Astrophysics must be made through one of the two participating home departments, this being either Astronomy and Astrophysics or Physics. In addition, the applicant must submit a supplementary brief application form to the Collaborative Program Director (available from either home department or the Collaborative Program office). Normal deadlines for application to the School of Graduate Studies apply. Students who have already been admitted to one of the two home departments may apply to the Collaborative Program until October 1.

Program Requirements
Students must meet all respective degree requirements of the School of Graduate Studies and the home department. This will normally require the equivalent of ten half-courses as follows:
- three or more half-courses in Astronomy and Astrophysics
- three or more half-courses in Physics
- two half-courses from Astronomy and Astrophysics, Physics or a cognate department
- a supervised research project in the field of astrophysics, equivalent to two half-courses

The supervised research project and associated report will be completed under the regulations of AST 1500Y for students whose home department is Astronomy and Astrophysics and under the regulations of PHY 3400Y for students whose home department is Physics.

In addition, the student must attend the seminar program of the Canadian Institute of Theoretical Astrophysics and prepare a report on a selection of these seminars for submission to the Director.

Program requirements are normally completed within twelve months of entry to the program.

Upon certification by the Director that all requirements of the Collaborative Program have been fulfilled, the home department will recommend the granting of the M.Sc. degree, and the designation “Completed Collaborative Program in Astrophysics” will appear on the transcript.

Web: biochemistry.utoronto.ca

Biochemistry is the study of the molecular events underlying biological processes; consequently it makes fundamental contributions to all disciplines concerned with living systems. The Department offers modern facilities for research leading to the M.Sc. and Ph.D. degrees in a wide variety of areas including the relationship between structure and biological function in proteins, nucleic acids, and lipids as well as complex multi-component systems such as membranes and subcellular organelles.

Admission Requirements
Normally we consider applications from students who have at least a B+ average in their last two years of study in an Honours/Specialist B.Sc. program in Biochemistry/Molecular Biology as well as from students with strong academic credentials in Honours/Specialist programs in disciplines related to Biochemistry/Molecular Biology.

In addition applicants must arrange for the completion of personal reference forms from three individuals familiar with their academic performance.
Applicants who obtained a degree outside Canada are generally required to have an M.Sc. degree in biochemistry or in a closely related subject area and must arrange for general and biochemistry GRE examination results to be sent to the Department.
Applicants from outside Canada whose primary language is not English and who graduated from a university where the language of instruction was not English must provide TOEFL and TWE (Essay Writing) scores. The minimum scores required for admission are 580 for the paper-based TOEFL and 237 for the computer-based TOEFL. The TWE or Essay Writing score must be at least 5. A MELAB score of at least 92 is also acceptable.

**Degree of Master of Science**
Each candidate for the M.Sc. degree must complete any courses that were a condition of acceptance and:
1. complete one session of BCH 2021H *Selected Topics in Biochemistry*, and
2. participate in BCH 2020Y* Master's Seminar Course in Biochemistry.
Each candidate must present a thesis and successfully complete an oral examination on his or her research and related aspects of biochemistry before being recommended for the degree.

**Degree of Doctor of Philosophy**
Candidates are accepted into the Ph.D. program through one of three routes:
1. via reclassification from the M.Sc. program;
2. on completion of an M.Sc. degree in biochemistry or a cognate discipline;
3. directly from a B.Sc. if, in the opinion of the Biochemistry Graduate Committee, the student has an outstanding academic record. The latter two categories require the student to successfully complete a qualifying examination within the first 18 months.

Candidates for the Ph.D. must complete any courses that were a condition of acceptance and:
1. one and one-half internal or external (from cognate departments) graduate-level courses, including at least one session of BCH 2021H *Selected Topics in Biochemistry*, and
2. participate in BCH 2022Y* Doctoral Seminar Course in Biochemistry.

**Residence Requirements**
Under normal circumstances, M.Sc. and Ph.D. students will be expected to participate as full-time students and to maintain full-time status in their laboratories until thesis completion and final defence.

**Collaborative Programs**
The Department participates in the following collaborative programs:
1. Biomedical Engineering
2. Biomolecular Structure
3. Developmental Biology
4. Neuroscience

For more details consult the separate entries in this calendar.

Bioethics

Graduate study in bioethics at the University of Toronto is offered in two streams:
1. Collaborative Program in Bioethics
2. Master of Health Science in Bioethics

The Collaborative Program in Bioethics is a research-stream program (master's and doctoral). The Master of Health Science in Bioethics is a professional-stream master's program.

Full details on both programs appear below.

Address:
University of Toronto
Joint Centre for Bioethics (JCB)

D. L. Wells, BA, MHS, PhD/Nursing Science
A. P. M. Williams, PhD/Health Policy, Management & Evaluation

The graduate units of Health Policy, Management and Evaluation; Law; Medical Science; Nursing Science; Philosophy; Public Health Sciences; and Religion collaborate to offer master’s (LL.M., M.A., M.H.Sc., M.N., M.Sc.) and doctoral (Ph.D., S.J.D.) programs in Bioethics.

Students with an interest in bioethics register in one of the graduate units associated with the Collaborative Program in Bioethics (CPB). Successful candidates who complete the requirements of the home graduate unit and the CPB are awarded a degree from the home unit, and the notation “Completed Collaborative Program in Bioethics” will appear on their transcripts.

Admission Requirements
Candidates for master’s and doctoral programs apply simultaneously to both the collaborating graduate unit and the CPB. Applications for admission to the CPB are considered only after admission to the collaborating graduate unit.

Application Process
A CPB application form, available on the Web, must be completed and sent to the Secretariat, Collaborative Program in Bioethics. Applicants should check with individual home units for each unit’s application deadline date. The deadline for CPB applications is March 31. The application must be accompanied by:
Program Requirements

A student will be expected to meet the requirements of the home graduate unit as well as those of the Collaborative Program. Courses taken to complete degree requirements must include the following, which may be counted towards the degree in the home unit:

1. PHL 2145H—a review of the philosophical foundations of bioethics.
2. MSC 3001Y—issues and case studies in bioethics.
3. One half-course, normally from the home unit; see suggested list below.

All doctoral candidates must complete a thesis. Master's programs require either a thesis or equivalent research project as determined by the home unit. The thesis will be supervised by a thesis committee comprising a supervisor and two other members. Thesis supervisors must have appointments to the graduate faculty and will normally be members of the Bioethics Collaborative Program Committee. Ordinarily members of the thesis committee and examining professors (or other professionals) are drawn from other relevant disciplines. The thesis is evaluated according to the procedures and standards of the home graduate unit and must fall within the broad area of bioethics.

Non-thesis projects require supervision, and requirements for such projects will be determined by the home unit.

Courses of Instruction

Please note that these courses are not offered every year. Consult each unit's Web site for details.

Further details and course availability can be found on the respective unit's Web site.
MASTER OF HEALTH SCIENCE IN BIOETHICS
Web: www.utoronto.ca/jcb/main.htm
>Graduate Studies
>Master of Health Science in Bioethics

Program Director
P.A. Singer, MD, MPH, FRCP/Medical Science

The M.H.Sc. in Bioethics is among the first of its kind in North America and is offered through the Institute of Medical Science (IMS). Designed for practitioners who wish to augment their knowledge and skills in bioethics, the program assists them in their roles as clinician-teachers and as members of bioethics committees. It is a course-only, professional master’s degree program. The M.H.Sc. in Bioethics provides the theoretical, methodological, and applied skills requisite for health care professionals to face the bioethical challenges posed by modern health care. Students interested in a research-stream program should consider the Collaborative Program in Bioethics (CPB).

Admission Requirements
Typically, entry into the M.H.Sc. in Bioethics Program requires four years of undergraduate study and a recognized degree in one of the health care sciences (for example, M.D., B.Sc.N., B.Sc.OT, B.Sc.PT, B.S.W.) or equivalent. The Director of the M.H.Sc. in Bioethics will determine suitable preparation for entry (including the equivalency of undergraduate education). Applicants from other disciplines will be considered on a case-by-case basis depending on the availability of space and the ability to meet School of Graduate Studies (SGS) and IMS standards. The Program favours individuals with outstanding academic credentials.

Applicants must have sufficient free professional time to attend and to prepare for 10 sessions of two full days of instruction per month (September to April, estimated as one day per week) and have an employment and/or volunteer background that reflects significant interest in bioethics (broadly construed as a multidisciplinary enterprise).

There must be great likelihood that the applicant will provide significant bioethics leadership in his or her home institution or local community upon completion of the M.H.Sc. in Bioethics.

Applicants must demonstrate evidence of scholarly ability and personal maturity. Students are expected to maintain good academic standing in all components of the program.

Application Process
Applications are accepted under the general regulations of both IMS and SGS. Meeting the minimal requirements is mandatory but does not guarantee acceptance.

Complete applications must be sent to:
Margot Smith
Secretary, M.H.Sc. in Bioethics
University of Toronto Joint Centre for Bioethics
88 College Street
Toronto, Ontario
Canada
M5G 1L4

The application must include:
1 completed application form (available on the Joint Centre for Bioethics Web site);
2 current curriculum vitae;
3 two sets of complete, up-to-date, original university academic transcripts in separate sealed and signed envelopes;
4 a letter of intent or professional goals, no longer than 1000 words, in which applicants
   a outline reasons for pursuing admission to the M.H.Sc. in Bioethics;
   b briefly explain how their background has prepared them for work in bioethics;
   c provide an estimate of any remaining background preparation that must be undertaken to prepare for this course of study (e.g., courses, program, etc. to be completed, and where, before the September session meets);
   d identify main area(s) of bioethical interest; and
   e explain how they will use their graduate education in bioethics in the home institution.
5 letters of recommendation from three referees attesting to the applicant’s skills, knowledge, and character (academic preparation and capacity; capacities for interpersonal and collegial study, research and practice). One letter need not cover all aspects of these requirements, but all three together must do so. In the case of international applicants, one of these three letters must be from a mentor who will supervise the applicant in the home country;
6 if the applicant is currently employed by an institution (health care or otherwise), a letter from a senior administrator in the institution (for example, Department Chair, Dean, Hospital CEO or VP) agreeing to provide the necessary professional release time to complete the program and clarifying the institution’s view of how the applicant’s graduate education will assist the development of bioethics in the home institution. In the case of international applicants, this letter must also state agreement to provide a leadership position in bioethics for the
applicant upon return to the institution in the home country;
7 a writing sample, in English, that demonstrates the applicant’s analytical and argumentative skills, preferably in bioethics.

Deadline for receipt of pre-applications:
- February 1 for applicants from outside Canada and the U.S.
- March 1 for domestic applicants

Enrolment is limited and not all applicants will be admitted even if the prerequisites are met. Typically, 12 students are accepted. Once applications are received, applicants will be screened for eligibility into the Program. Short-listed applicants will be interviewed in April/May; successful applicants will be notified following the interview and asked to complete application forms for SGS.

Deadline for completion of SGS application forms:
- April 15 for applicants from outside Canada and the U.S.
- June 1 for domestic applicants.

Program of Study
The M.H.Sc. in Bioethics is offered in modular format in 20 two-day Thursday/Friday blocks from September to April to accommodate the needs of those who wish to continue clinical practice yet engage in full-time graduate study, and to attract practitioners not only locally but also throughout Ontario and across Canada. Certain international students complete all course work in one academic year. The program provides practical experience strongly informed by theory that includes education, research, and clinical components. The curriculum directly reflects the functional needs of clinician-teachers or bioethics case consultants.

First-year courses concentrate on theoretical foundations of health care sciences, philosophical medical ethics, and resource allocation and law and their application in the clinical setting.

Second-year courses focus on applied skills and knowledge concentrating on teaching in a variety of settings to a variety of audiences; managing differences in culture, gender, and religion; the mediation skills with which to work; further instruction in the two primary areas of clinical bioethics and research ethics; the preparation of a major paper of publishable quality in an area or on an issue of the student’s choice; and a practicum that will ensure the application of the knowledge and skills gained elsewhere in the two-year program of study.

Required Courses
Courses are restricted to students officially enrolled in the M.H.Sc. in Bioethics and the Collaborative Program in Bioethics, except where noted. All courses are understood as “or equivalent” in order to accommodate the diverse background education and training of applicants.

**First year**
- HAD 5771H Resource Allocation Ethics
- LAW 257H Legal Approaches to Bioethics
- MSC 3001Y Foundations Seminar I
- MSC 3003Y Empirical Approaches in Bioethics
- PHL 2146Y Topics in Bioethics

**Second year**
- MSC 1051H Research Ethics
- MSC 1052H Clinical Bioethics
- MSC 3002Y Foundations Seminar II
- MSC 3004Y Ethics Committees and Consultations
  *For international students, MSC 3004Y is not required. Instead, MSC 3010Y International Research Ethics is required and is taken in May.*
- MSC 3006Y Bioethics Independent Study
- MSC 3008Y Practicum

**JOINT CENTRE FOR BIOETHICS**
*Web: www.utoronto.ca/jcb*

Both the Collaborative Program in Bioethics and the M.H.Sc. in Bioethics are associated with the University of Toronto Joint Centre for Bioethics (JCB). Students are encouraged to take advantage of the various activities at the JCB. These include a weekly Bioethics Seminar, lectures by visiting professors, the opportunity to participate in hospital ethics committees and clinical ethics consultations (for CPB students only), interest groups, rounds, and colloquia on new developments. Students in the CPB meet regularly to present and discuss their individual research topics and to maintain the collaborative nature of the program.
Biomedical New Media is concerned with the creation and evaluation of interactive, computer-based multimedia for teaching and learning. Interpretive visualization, human-computer interaction, content organization and audience analysis all play important roles in the creation and evaluation of these materials.

Biomedical 3-D Animation involves the creation of full-motion visualizations of medical processes and syntheses of scientific data. Students receive a Master of Science degree in Biomedical Communications (M.Sc.BMC) as well as a Post-graduate Certificate in 3-D Animation from the intensive eight-month animation program at Sheridan College. Please consult the Department regarding the availability of this specialization offered as a combined program with Sheridan College.

Admission Requirements
Students are admitted under the general regulations of SGS and must have graduated from a recognized university with a minimum of a four-year undergraduate degree (or a medical, veterinary, dental, master’s, or doctoral degree). This degree should include a variety of courses in the arts, sciences, and humanities. Applicants must have obtained at least a mid-B standing (73-76% or 3.0 based on a 4-point scale) in their final two years of undergraduate study. A high-quality portfolio of visual material is required. Consult the M.Sc.BMC Web site for the list of prerequisite courses required for admission.

Program Requirements
The M.Sc.BMC program consists of 17 half-credit course equivalents. Students have the option to select either 2 elective half-course equivalents and a master’s research project and paper or 4 elective half-course equivalents and a master’s project.

In Year II of the graduate program, students enter the New Media field or the 3-D Animation field.

Courses of Instruction
Faculty should be consulted each session as to course offerings.

Required Courses
LMP 1012H Seminars on Pathology/M. Khalifa
MSC 1001Y Human Anatomy (Including Embryology)/L. M. Taylor
MSC 2001Y Theories of Perspective, Colour, and Design/L. Wilson-Pauwels

Staff
N. Woolridge, BFA, BScBMC, MSc/Surgery
L. A. Wilson-Pauwels, AOCA, BScAAM, MEd, EdD/Surgery (Director)
W. N. Woolridge, BFA, BScBMC, MSc/Surgery

Address:
Biomedical Communications
Department of Surgery, Faculty of Medicine
Room 2356, Medical Sciences Building
1 King’s College Circle
University of Toronto
Toronto, Ontario
M5S 1A8

Telephone: (416) 978-2659
Fax: (416) 978-6891
E-mail: bmc.info@utoronto.ca
Web: www.bmc.med.utoronto.ca/BMC/

The two-year Master of Science in Biomedical Communications (M.Sc.BMC) professional graduate degree program is offered through the Institute of Medical Science. Applicants with interdisciplinary art and science backgrounds develop the necessary skills to become outstanding visual communicators in the health sciences. BMC graduates work in a variety of areas such as health science centres, industry, academia and/or research, or as private consultants in these areas.

While in the program, students produce visual material that synthesizes scientific data and medical processes. Popular specializations are the creation and evaluation of interactive, computer-based multimedia programs and animation for teaching and learning. Presently there are two fields offered in the graduate program: Biomedical New Media (video, CD-ROM, Web), and Biomedical 3-D Animation.
### Elective Courses

Students are encouraged to take at least one of their electives in a graduate program other than Biomedical Communications.

Biomedical Engineering offers facilities for research in biomedical engineering and for three educational programs leading to master's and doctoral degrees. Students may register in the Biomedical Engineering Program or in the Clinical Biomedical Engineering Program through the Institute. Students interested in the Collaborative Program in Biomedical Engineering may register through one of the collaborating graduate units.

Biomedical engineering is a multidisciplinary field that integrates engineering and biology/medicine. It uses methods, principles, and tools...
of engineering, physical sciences, and mathematics to solve problems in the medical and life sciences for the study of living systems; the enhancement and replacement of those systems; the design and construction of systems to measure basic physiological parameters; the development of instruments, materials, and techniques for biological and medical practice; and the development of artificial organs and other medical devices. By its nature, the majority of the institute’s work is interdisciplinary. Research themes include diagnostic and therapeutic engineering, technology for health, and cellular and molecular bioengineering. Specific interests include neural and sensory systems engineering, molecular imaging, nanotechnology, biomaterials, rehabilitation engineering, cellular and tissue engineering, proteomics and bioinformatics.

Admission Requirements
An applicant must be a graduate in dentistry, engineering, medicine, or one of the physical or biological sciences and may be accepted as a graduate student in the Institute of Biomaterials and Biomedical Engineering. Alternatively, students may choose to register in the Collaborative Program in Biomedical Engineering through a collaborating graduate department. See Biomedical Engineering (Collaborative Program) entry in this calendar.

Program Requirements
Students who wish to register in the Biomedical Engineering Program or the Clinical Biomedical Engineering Program will register in the School of Graduate Studies through the Institute of Biomaterials and Biomedical Engineering and will meet all respective degree requirements as described by the School of Graduate Studies.

As part of these requirements, engineering and physical science students will be required to take a life sciences course, such as JPB 1022H (or an equivalent); while life science students will be expected to take a physical sciences course, such as JPB 1055H (or an equivalent). Students will pursue a thesis topic relevant to Biomedical Engineering and will be expected to take BME 1450H Bioengineering Science.

Students are also required to participate in two seminar courses: one of BME 1010H or BME 1011H IBBME Graduate Students Seminar series, and JDE 1000H Ethics in Research.

Degree of Master of Applied Science
The work leading to the degree of Master of Applied Science (M.A.Sc.) provides an opportunity for the student to pursue advanced studies in biomedical engineering and the opportunity to engage in research. The program of study will normally comprise at least four half-courses, including BME 1450H and an appropriate life science or engineering course, and the successful completion of a thesis in the biomedical engineering field.

Degree of Master of Health Science, Clinical Biomedical Engineering
A program in Clinical Biomedical Engineering, leading to the degree of Master of Health Science (M.H.Sc.), is offered to selected students who hold the degree of Bachelor of Applied Science of this University or an equivalent degree in engineering. The program normally includes ten half-courses, including one full course, which involves periods of internships in health care facilities, and a research project. All requirements for the degree must be completed within three years. No more than five students will be admitted each year.

Degree of Doctor of Philosophy
Candidates are normally admitted to the Ph.D. program after completing the master’s program; however, direct admission to the Ph.D. program may be considered in exceptional cases. The program of study for each candidate in Biomedical Engineering normally comprises at least four half-courses and successful completion of a thesis, representing an original investigation in biomedical engineering.

Biomedical Engineering (Collaborative Program)
Consult the entry in this calendar or contact the Institute for details.

Courses of Instruction
Not all courses are offered every year. Students should contact the Institute office for information about course availability. Outlines of these and other closely related courses may be obtained from the Institute office.

The graduate units of Biomedical Engineering, Biochemistry, Chemical Engineering and Applied Chemistry, Dentistry, Electrical and Computer Engineering, Laboratory Medicine and Pathobiology, Materials Science and Engineering, Mechanical and Industrial Engineering, Medical Science, Pharmaceutical Sciences, Physics, Physiology, and Rehabilitation Science participate in the Collaborative Program in Biomedical Engineering at the University of Toronto. This program offers the opportunity for research in biomedical engineering leading to master’s and doctoral degrees. Biomedical engineering is a multidisciplinary field that integrates engineering and biology/medicine. It uses methods, principles, and tools of engineering, physical sciences, and mathematics to solve problems in the medical and life sciences. Biomedical engineering consists of the application of the concepts and methods of engineering and physics to the study of living systems, to the enhancement and replacement of those systems, to the design and construction of systems to measure basic physiological parameters, to the development of instruments, materials, and techniques for biological and medical practice, and to the development of artificial organs. By its nature the field is interdisciplinary and involves close collaboration between many departments of the University and associated hospitals.

Admission Requirements
A student wishing to study in this program must be a graduate in dentistry, engineering, engineering science, medicine, or one of the physical or biological sciences and may be accepted as a graduate student in the Collaborative Program in Biomedical Engineering at the Institute of Biomaterials and Biomedical Engineering through one of the collaborating graduate departments (home department).

Program Requirements
Students register in the School of Graduate Studies through their home departments, and will meet all respective degree requirements as described by the School of Graduate Studies and the Program Committee. As part of these requirements, engineering and physical science students will be required to take a biological sciences course such as JPB 1022H (or an equivalent); while biological science students will be expected to take a physical sciences course such as JPB 1055H (or an equivalent). Students will be expected to pursue a thesis topic relevant to Biomedical Engineering. Students will be expected to take BME 1450H Bioengineering Science.

Students registered in a graduate degree program involving research are required to participate in two seminar courses: one of BME 1010H or BME 1011H IBBME Graduate Students Seminar series and JDE 100H Ethics in Research.

Each master’s student in the Collaborative Program is required to have a supervisory committee approved by the Program Committee, and consisting of a supervisor from the Institute of Biomaterials and Biomedical Engineering (IBBME), with a cross appointment in the home department, and other members from other collaborating departments as required.
The program of study for each Master of Applied Science or Master of Science degree candidate registered in the Collaborative Program in Biomedical Engineering must meet the requirements of the collaborating department and will normally comprise at least four half-courses and a thesis in the biomedical field.

Before Ph.D. candidates are accepted, the Program Committee must be satisfied of the student’s ability to undertake advanced graduate studies. A qualifying examination may be required by the collaborating department. Direct transfer to a Ph.D. program is possible subject to the requirements of the collaborating department. The program of study for each candidate registered in the Collaborative Program in Biomedical Engineering must be approved by the collaborating department and the Program Committee and will normally comprise at least four half-courses and a thesis.

Each Ph.D. student is normally required to have a supervisory committee consisting of at least three persons, including a supervisor who has an appropriate graduate appointment, and who is also a member of the graduate faculty in the home department. When appropriate, an additional member of the supervisory committee may be from outside the University of Toronto, with approval from the School of Graduate Studies.

For both master’s and doctoral degrees, the examination committee will be constituted according to procedures in the home graduate department and will include a member from that collaborating department.

Courses of Instruction
Not all courses are offered every year. Students should contact the Institute office.

The graduate program in Biomolecular Structure is a collaborative program involving the Departments of Biochemistry, Chemistry, Medical Biophysics, and Molecular and Medical Genetics. The program is open to Ph.D. students wishing to train under the supervision of one of the participating investigators. The program will appeal to students with a wide variety of backgrounds.

Admission Requirements
Applicants must first be admitted to one of the collaborating graduate units before applying to the collaborative program.

Program Requirements
Students in the program will be required to take JBB 2026H Protein Structure, Folding and Design and an additional half-course in a specialized topic. Moreover, students are expected to participate in the Biomolecular Structure Program seminar series.

Generally, students enrolled in the program will be expected to fulfill the course requirements of both the program and the home department. However, it is anticipated that in most cases course work required by the program will serve, in part, to fulfill departmental requirements.

Courses of Instruction
Not all courses will be offered every year. Departments should be consulted each year to confirm course offerings.

Introduction
The Master of Biotechnology (M.Biotech.) program is an interdisciplinary course-based professional degree involving collaboration between the Departments of Botany, Chemistry, Zoology, and the Rotman School of Management.

Students in the M.Biotech. program come from wide and varied backgrounds with the common goal of pursuing a career in the biotechnology or the pharmaceutical industries. The program is designed to meet the evolving needs of students and this global industry. Faculty is drawn from the Departments of Botany, Chemistry, and Zoology, and from the University of Toronto Rotman School of Management. Guest lecturers from other faculties within the University of Toronto provide students with a truly interdisciplinary educational experience. Additional instruction from leaders of the biotechnology and pharmaceutical industries and from governmental agencies round out the broadly-based learning environment.

Admission Requirements
1 A four-year bachelor's degree or its equivalent in any area of biological sciences, chemistry, or related field.
2 Acceptable GMAT or GRE scores and/or marks of A- or better in the last two years of study.
3 Applicants will be asked to participate in and be interviewed during "biotechnology week" and, if unable to attend, will be required to submit additional information as requested by the Admissions Committee.

The Committee, comprising representatives from the three participating departments, makes admission decisions.

Program Requirements
The program is a full-time, course-based masters degree which is launched during the month of May each year.

Students are required to complete 8 full graduate courses over a 24-month period:
- 5 to 6 science credits (includes credits for Seminar and Placement)
- 2 business credits
- up to 1 elective credit

An ongoing seminar series led by university, industry, and government specialists link all the participants with the academic, practical, and applied aspects of the program.

Courses of Instruction
Required
A general description of each required course is posted on the Web site, www.erin.utoronto.ca/mbiotech.

BTC 1600H Seminar in Biosciences/Biotechnology
BTC 1601H Seminar in Biosciences/Biotechnology
BTC 1701H Genetics and Molecular Biology Laboratory
BTC 1702H Protein Chemistry/Biotechnology Laboratory
BTC 1801H Biological Controls and Production of Natural Products
BTC 1802H Biotechnology in Agriculture
BTC 1803H Biotechnology in Medicine
BTC 1900Y Placement Project in Biosciences/Biotechnology
BTC 1901Y Placement Project in Biosciences/Biotechnology
BTC 2001H Organizational Skills
Biotechnology

BTC 2001H  Science, Technology, Organizations and Society
BTC 2002Y  Management of Innovation

**Elective Courses**
BTC 1902Y  Placement Project in Biosciences/Biotechnology
Other graduate courses approved by the Program Director
Book History and Print Culture (Collaborative Program)

Program Committee
P. L. Fleming, BA, BLS, MLS, MA, PhD, FRSC/Information Studies
H. J. Jackson, BA, MA, PhD/English (Director)
M. E. Korey, AB, MA/Massey College
B. S. Merrilees, MA, D de L’U, FRSC/French

Address:
Massey College
4 Devonshire Place
Toronto, Ontario
Canada
M5S 2E1

Telephone: (416) 946-3560
Fax: (416) 978-1759
E-mail: book.history@utoronto.ca
Web: bookhistory.fis.utoronto.ca/

Nature of the Collaborative Program
Histoire du livre, History of the Book, Textual Studies, Print Culture, Sociology of the Text—all these names have been used to describe a growing international academic movement. The graduate departments of English, French Language and Literature, the Faculty of Information Studies, the Institute for the History and Philosophy of Science and Technology, the Centre for Medieval Studies, and the Centre for Comparative Literature, in conjunction with Massey College, sponsor an interdisciplinary program in Book History and Print Culture (BHPC) in which the rich physical and human resources of the University of Toronto are brought to bear on multiple aspects of the creation, transmission, and reception of the written word. Students register first for a master’s or doctoral degree in their home units and then apply to the Collaborative Program. If they satisfy the requirements of both programs they receive their degree with a notation on the transcript “Collaborative Program in Book History and Print Culture.”

Application Procedures
Candidates for the program must have been accepted into a master’s or doctoral program in their home unit. They may then apply to the Collaborative Program by writing to the Director giving information about their backgrounds and relevant interests and outlining a proposed program of study—preferably by April 1 for September admission, though late applications will also be considered. (An academic transcript should be included in the application; a photocopy will do.) Advice is available from the Director and the Program Committee. An interview will normally form part of the admissions procedure for doctoral candidates.

Applications from the participating units have priority in admissions. If there is space in the program, students from other units may apply; they should consult the graduate coordinator in their home unit and the Director of the BHPC program. Since course requirements vary from unit to unit, it is essential that there be close consultation between the Collaborative Program and the home unit at the time of the application.

Program Requirements

Master’s Program
All candidates must fulfill the degree requirements of the unit in which they are enrolled. Their program of study must also be approved by the BHPC Program Committee. Normally, the BHPC requirements will be met within the program of the home unit. At the master’s level, the program should include at least two full-course equivalents in courses related to book history and print culture, including the seminar BKS 1000Y. Depending on the regulations of the home unit, a master’s thesis in the area of book history and print culture may be counted as satisfying the requirement for a second course beyond BKS 1000Y.

Doctoral Program
All candidates must fulfill the degree requirements of the unit in which they are enrolled. Their program of study must also be approved by the BHPC Program Committee. If they have not already taken BKS 1000Y at the master’s level, they will be required to take it as a prerequisite or corequisite to the two doctoral courses BKS 2000H and BKS 2001H. The dissertation topic will be in the area of book history and print culture, and the advisory committee will include representation from outside the home unit. The program may be completed on a flexible-time basis only by FIS students registered for the FIS flexible-time Ph.D.

Core Courses
BKS 1000Y Book History and Print Culture
BKS 2000H Advanced Seminar in Book History and Print Culture
BKS 2001H Practicum in Book History and Print Culture

For further details and for listings of appropriate courses in various graduate units, see Web site http://bookhistory.fis.utoronto.ca/.

E-mail: grad@botany.utoronto.ca
Web: www.botany.utoronto.ca

Graduate training is offered in the following subjects:
Cellular, Molecular, and Developmental Biology
Ecology and Evolutionary Biology
Candidates are accepted under the general regulations.

Degree of Master of Science

Admission Requirements
A high academic standard is required for admission. Satisfactory performance will normally be demonstrated by an average grade in the final year, equivalent to a University of Toronto B+, or better. In exceptional circumstances, where there is strong supporting supplementary evidence, students with a mid-B average may be admitted to the program.

Program Requirements
M.Sc. candidates must complete one half-course during the program, preferably in the first year. The half-course may be either a BOT 1700 seminar series or a regular graduate course. Attendance at 80% of the departmental seminar series is a requirement. Original research and defence of a thesis are also required.
Degree of Doctor of Philosophy

Admission Requirements
Candidates for the Ph.D. degree are generally accepted by two routes, either by transferring from the M.Sc. program within 16-20 months of entering the graduate program or following completion of an M.Sc. degree. A student completing a B.Sc. with outstanding academic achievement and proven research accomplishments may be admitted directly to the Ph.D. program.

Program Requirements
For Ph.D. students there is a minimum formal course requirement of three half-courses for students who have completed a M.Sc., with the first half-course taken in the first year. It is strongly suggested that at least one of these be selected from the BOT 1700 series seminar courses. The supervisory committee will evaluate the course work of Ph.D. applicants to determine if additional courses are required. Students that transfer from a M.Sc. to a Ph.D. program may count any course work completed prior to the transfer toward their Ph.D. requirements. However, transfer students are still expected to take one BOT 1700 series course during their Ph.D. program. It is expected that many Ph.D. students will continue to participate in seminar courses after their minimum requirement is completed. Attendance at 80% of the departmental seminar series is a requirement.

Within 16-20 months of first registration in the program, candidates present a research proposal to the Department. If the research proposal is deemed unsatisfactory by the examination committee, there is a single opportunity to present a revised proposal three months later. Ph.D. candidates make an oral presentation of their thesis for evaluation to the Department as a whole and to a departmental evaluation committee before proceeding to the School of Graduate Studies’ Final Oral Examination.

Collaborative Programs

Developmental Biology (Collaborative Program)
The graduate departments of Biochemistry, Botany, Molecular and Medical Genetics, Physiology, and Zoology offer a collaborative Ph.D. program in Developmental Biology.

For full information on this collaborative program, see the Developmental Biology entry in this calendar.

Environmental Studies (Collaborative Program)
The graduate department of Botany, in conjunction with the Institute for Environmental Studies, offers a collaborative master’s program in environmental studies.

For a full description of this program, see the Environmental Studies entry in this calendar.

Toxicology (Collaborative Program)
A M.Sc. or Ph.D. degree in Toxicology can be taken through this Department.

For more details on this collaborative program, consult the Toxicology entry in this calendar.

Courses of Instruction
All courses are not given every year. Consult the Department each term regarding course offerings.

BOT 1300H Systematic Botany/J. E. Eckenwalder
BOT 1307H Families of Vascular Plants/T. A. Dickinson
BOT 1310H Comparative Plant Morphology/T. L. Sage
BOT 1328H Physiological Ecology/R. F. Sage
BOT 1341H Plant Anatomy/N. G. Dengler, T. L. Sage
BOT 1351H Plant Pathology/Staff
BOT 1355Y Introductory Virology/M. G. AbouHaidar
BOT 1403H Systematics of the Higher Fungi/Staff
BOT 1405H Analysis of Multivariate Data from Biological Experiments/T. A. Dickinson
BOT 1421H Plant Cell Metabolism/D. Christendat
JBF 1436H Forest Landscape Ecology and Methods/T. J. Carleton

The graduate units of Biomedical Engineering, Exercise Sciences, Laboratory Medicine and Pathobiology, Medical Biophysics, Medical Science, Pharmacology, Physiology, Public Health Sciences, and Rehabilitation Science, together with the clinical departments of Anaesthesia, Medicine, and Surgery, participate in the graduate Cardiovascular Sciences Collaborative Program at the University of Toronto. Units participating in the program contribute graduate courses and provide facilities and supervision for graduate research. Students in the program must be accepted by one of the participating graduate units and then register in the collaborative program. Students follow a program of study acceptable to both the participating unit and the Cardiovascular Sciences program. Upon successful completion of the requirements, students receive, in addition to the master’s or doctoral degree in their home graduate unit, a separate certificate from the Program, and the notation “Completed Collaborative Program in Cardiovascular Sciences” on their transcript.

Program Requirements
Candidates for the master’s and doctoral degrees are accepted by the participating unit under its regulations; the length of the program may vary. For either degree, students must complete a research thesis as required by the graduate unit. It is understood that the thesis topic will be in the area of cardiovascular sciences. The Program Committee may require additional or alternative courses, depending on the background of each student. In addition, students in the Cardiovascular Sciences program must meet the requirements of their home graduate unit in terms of course work and thesis work. Students must be registered with a Cardiovascular Sciences Program supervisor and complete the program to qualify for specialization.

Before obtaining the doctoral degree, students must have course credits in any two of the following course selections JCV 3060H, JCV 3061H, JCV 3062H, JCV 3063H. For the master’s degree, students must have a half-credit in an approved CVS course. Students must demonstrate excellence in cardiovascular related research.

Courses of Instruction
Cardiovascular sciences courses offered by the participating units are listed below. Not all courses are offered each year.

BME 1448H Cardiovascular Fluid Mechanics/ M. Ojha
EXS 5508H Cardiovascular Disease and Exercise/J. M. Goodman
JCV 3060H Advanced Topics in Cardiovascular Sciences—Molecular Biology and Heart Signal Transduction/ R. Tsushima, C. Wittnich
JCV 3061H Advanced Topics in Cardiovascular Sciences—Hormones/ C. Wittnich
JCV 3062H Advanced Research in Cardiovascular Sciences—Heart Function/C. Wittnich
JCV 3063H Advanced Research in Cardiovascular Sciences—Vascular/ C. Wittnich
JEB 1365H Ultrasound: Theory and Applications in Biology and Medicine/ R. S. C. Cobbold
JTC 1331H Biomaterials Science/M. V. Selton
LMP 1015H Vascular Pathobiology/ B. L. Langille
LMP 1504H Biochemistry, Molecular Biology of Cardiovascular Diseases/C. Liew
PSL 1060H Developmental Cardiovascular Physiology/C. Wittnich
PSL 1462H Molecular Aspects of Cardiac Function/P. Backx
Chemical Engineering and Applied Chemistry CHE

Candidates for degrees are accepted under the general regulations. Qualified candidates may engage in research in the following areas:
Applied Organic Chemistry
Biochemical Engineering
Biomaterials
Biomedical Engineering
Biotechnology
Ceramics Engineering
Chemical Analysis
Chemical Reactor Design
Combustion Engineering
Composite Materials
Electrochemical Engineering
Energy Engineering
Environmental Engineering
Fluid Mechanics
Food Engineering
Heat, Mass, and Momentum Transport
Hydrometallurgy
Nuclear Engineering
Polymer Science and Engineering
Process Control
Process Modelling and Optimal Control
Pulp and Paper
Radiochemistry
Separation Processes
Thermodynamics, Kinetics, and Catalysis

A more complete description of graduate research programs and the enrolment procedure may be found in the graduate folder which is available from the Coordinator of Graduate Studies, Department of Chemical Engineering and Applied Chemistry.

Collaborative Programs
The Department of Chemical Engineering and Applied Chemistry participates in the following collaborative programs:
Biomedical Engineering
Environmental Engineering
Integrated Manufacturing
Wood Products Engineering

For details, consult the separate entries in this calendar.

Degree of Master of Engineering
The M.Eng. program differs from other graduate programs (M.A.Sc. and Ph.D.) available in the Department in that it is oriented to learning through project work and prescribed courses (normally seven) rather than through research. It is primarily intended for engineers in full-time professional practice who wish to pursue advanced studies at the master's level and on a part-time basis, without committing themselves to full-time residence for experimental research. Students may choose courses of interest to them, and may also register in the Environmental Engineering or Integrated Manufacturing collaborative program. Further information on registration may be obtained from the Coordinator of Graduate Studies.

Degree of Master of Applied Science
The M.A.Sc. program requires a minimum full-time residence of one fall and one winter session. In addition to the thesis, each candidate is required to complete at least three graduate courses, one of which must normally be selected from Category A (see below), and at least one of which must be selected in an area outside the student's field of research specialization. Furthermore, normally only one 500 level course may be taken for credit towards the degree program. Students are also required to complete CHE 2222H, CHE 3000Y, and JDE 1000H (see Courses of Instruction). Each candidate should discuss possible research projects with several members of the Department before selecting a thesis topic.

Degree of Doctor of Philosophy
Individuals who have already completed M.A.Sc. requirements and who have demonstrated an exceptional degree of all-round scientific and intellectual ability as evident from theoretical or experimental research, academic standing, initiative, and publication record may apply for continued graduate research leading to the Ph.D. degree. The program is designed to enable such students to complete all degree requirements within four years. Direct admission to the Ph.D. program after the bachelor's degree may be considered in exceptional cases. In addition to the thesis, each Ph.D. candidate is required to complete at least four additional courses if the M.A.Sc. requirements have been completed or at least six courses if admitted directly after the bachelor's degree. Courses must be selected from the calendar and approved by the candidate's supervisor. At least one of these courses must be taken in a minor area of study, and it is recommended that one of these courses should be selected from Category A courses. Normally, Ph.D. students are not allowed to take a 500 level course for credit towards the degree program. Students are also required to complete CHE 3000Y and, if not already completed, CHE 2222H and JDE 1000H (see Courses of Instruction). Candidates normally remain in continuous residence (full time, on campus) until the Departmental recommendation for the Final Oral Examination is made, unless special permission to do otherwise has been granted by the Departmental Graduate Studies Committee.

Program Transfer
Very strong M.A.Sc. candidates may apply to transfer to the Ph.D. program after completing one year of the M.A.Sc. program. Regulations governing such transfers are available in the Chemical Engineering Graduate Studies Office. A student who is permitted such a transfer and who does not hold a master's degree must complete a total of six half-courses in the graduate program. Transfer students who already hold a master's degree must complete a total of four half-courses.

Courses of Instruction
A schedule is available from the Coordinator of Graduate Studies at the beginning of each session listing the time and room location for each course.

Students in the M.A.Sc. and Ph.D. programs are required to take course CHE 3000Y

Seminars in Chemical Engineering and Applied Chemistry in each year of full-time registration. All students wishing to undertake re-
search and teaching in the Department of Chemical Engineering and Applied Chemistry must successfully complete a two-day intensive occupational health and safety training workshop, CHE 2222H Safety Workshop, which normally takes place during the week immediately preceding the commencement of graduate courses in the fall. In each subsequent year of registration, students must take the WHMIS refresher workshop. Students registered in a graduate degree program, which involves research, are required to participate in the non-credit seminar course JDE 1000H Ethics in Research during their first or second session of registration.

More details concerning these courses are provided by the Coordinator of Graduate Studies once admission to a graduate program has been confirmed.

Not all courses are given every year. Consult the Department each session as to course offerings.

**Category A**

CHE 1107H Applied Mathematics  
CHE 1138H Mathematical Methods in Chemical Engineering  
CHE 1140H Topics in Process Identification and Control  
CHE 1141H Advanced Chemical Reaction Engineering  
CHE 1143H Transport Phenomena  
CHE 1144H Separation Processes  
CHE 1147H Data Mining in Engineering  
CHE 1149H Electrolyte Thermodynamics  
JTC 1135H Applied Surface Chemistry  
CHE 1310H Chemical Properties of Polymers  
JCI 1503H Advanced Topics in Computing and Information Systems  
CHE 2504H Industrial Pollution Prevention  
MIE 1807H Principles of Measurement

**Category B**

CHE 1118H Industrial Catalysis  
CHE 1213H Corrosion  
CHE 1304H Polymer Processing and Rheology  
CHE 1314H The Structure and Properties of Fibrous Materials  
JTC 1020H Ceramics  
JTC 1331H Biomaterials Science  
JCB 1349H Molecular Assemblies: Structure/Function/Properties  
CHE 1400H Environmental Nuclear Science  
CHE 1533H Nuclear Chemical Engineering  
CHE 1541H Two-Phase Flow and Heat Transfer  
JCC 1313H Environmental Microbiology  
JCI 1321H Wood Engineering  

**500 level courses**

CHE 507H Process Modelling and Simulation  
CHE 553H Electrochemistry  
CHE 564H Pulp and Paper Processes

**Seminar Courses**

CHE 1211H Pulp and Paper Seminars (Credit/No Credit)  
CHE 2011H Graduate Student Seminars (Credit/No Credit)  
CHE 3000Y Seminars in Chemical Engineering and Applied Chemistry (Credit/No Credit)

In addition to the above courses, students may elect to take courses in other engineering or science departments where such courses are deemed relevant to the area of study.

Modern facilities are available for research leading to the M.Sc. and Ph.D. degrees. The areas of interest cover a wide variety of topics in analytical, biological, environmental, inorganic, organic, materials, polymers, physical, and theoretical chemistry and their related interdisciplinary areas.

An average of at least B+ is required for admission to the graduate programs. An exceptional student with an appropriate B.Sc. degree may be admitted directly to the Ph.D. program. Alternatively, transfer to the Ph.D. program may be considered after a one-year M.Sc. residency period.

Environmental Studies
(Collaborative Program)
The Department of Chemistry, in conjunction with the Institute for Environmental Studies, offers a collaborative master's program in...
environmental studies. Program requirements include the submission of a research thesis in environmental chemistry, one graduate half-course in chemistry and two half-courses offered by the Institute for Environmental Studies, and participation in the seminar program, including presentation of a seminar, at the Institute for Environmental Studies. For a further description of this program, see the Environmental Studies entry in this calendar.

**Degree of Master of Science**
A candidate’s program will normally include the submission of a thesis, the successful completion of one graduate full-course equivalent, and participation in a seminar program.

**Degree of Doctor of Philosophy**
The main requirement for this degree is the execution of an original investigation that is presented in a thesis. A candidate for this degree selects one of the following as a major field: Analytical Chemistry, Environmental Chemistry, Inorganic Chemistry, Organic Chemistry, Experimental Physical Chemistry, Theoretical Physical Chemistry, or Polymer and Materials Chemistry. Combinations within these subdisciplines, or with other disciplines, are permitted under the category of an interdisciplinary program. With the exception of Theoretical Physical Chemistry, each program requires a minimum of two full-course equivalents from approved graduate courses offered in the School of Graduate Studies. Up to one full-course equivalent taken for credit in the master’s program may be used to partially fulfill the Ph.D. requirements. Each program requires successful completion of an oral examination in the area of the major field, as well as participation in a seminar program.

Specific requirements for some of the major fields are as follows:

1. **Analytical Chemistry.** One half-course in analytical chemistry in each of the areas of spectroscopy, separation science, and electrochemistry, plus one other half-course to support the research program. Candidates must also pass seven cumulative exams and participate in the Analytical Chemistry seminar program.

2. **Environmental Chemistry.** At least four half-courses to include CHM 1401H, at least one of IES 1410H or CHM1415H, and at least two Chemistry courses in other fields to be chosen in consultation with the supervisor/ supervisory committee and confirmed by the field representative. One of these may be an approved course offered in a cognate department. Presentation of two seminars (normally in second and fourth years of study) and participation in the Environmental Chemistry seminar and colloquia program. A written research proposal, defended orally, on a topic other than the primary research topic delivered prior to the end of the second year of graduate study. Successful completion of an oral examination in the area of Environmental Chemistry, normally completed following course work and before the end of the second year of graduate study.

3. **Inorganic Chemistry.** Four half-courses plus the presentation of three seminars in the Inorganic Chemistry seminar program, two on topics not directly related to the area of research.

4. **Experimental Physical Chemistry.** Four half-courses consisting of a combination of core and other courses. The number of core courses is determined by the research director and the student, while observing the principle that breadth of background preparation should be the major objective in course selection. Attendance and participation in the Physical Chemistry seminar program are mandatory.

5. **Theoretical Physical Chemistry.** Six half-course equivalents, including two core half-courses. Specifics are to be determined by the research director and the student. Attendance and participation in the Physical Chemistry seminar program are mandatory.

6. **Organic Chemistry.** Four half-courses, including at least two core half-courses from the synthetic organic, physical organic, and bio-organic areas, and one supplementary half-course from an area of organic chemistry. Candidates must also pass seven cumulative exams and participate in the Organic Chemistry seminar program.

7. **Polymer and Materials Chemistry.** Four half-courses, to include at least two of the three core courses. A list of other courses considered appropriate to the Polymer and Materials Chemistry research area is available from the department. Presentation of at least two seminars (the first will be an independent research proposal, the second a presentation on research) and participation in the Polymer and Materials Chemistry seminar program. Successful performance in an oral examination in the area of Polymer and Materials Chemistry following the completion of course work.

8. **Interdisciplinary Ph.D. Program.** Four half-courses, including one core half-course from the above subdisciplines, and participation in one of the subdiscipline seminar programs. Acceptance into this program requires a research topic of a truly interdisciplinary nature; a written request must be submitted to the graduate coordinator.
Depending upon the area of research, candidates may also be required to show an adequate ability to translate scientific text in one or two of the following languages: French, German, and Russian.

A candidate whose major subject is in another department may consult the Department of Chemistry regarding the selection of a minor in Chemistry.

Course Schedule
A schedule listing the times, room locations, and course descriptions is available from the Coordinator of Graduate Studies at the beginning of each session.

Research Courses
All M.Sc. or Ph.D. degree candidates engaged in research must register in the appropriate 2000 sequential series of research courses in one of the major fields. Candidates register in these courses each year, in sequence of the last digit.

Courses of Instruction
Not all courses are offered every year. Please consult the Department each session as to course availability.

All graduate courses for degree credit must be approved by the Department. Subject to departmental permission, degree candidates in Chemistry may take a limited number of graduate courses based on fourth-year Faculty of Arts and Science courses in Chemistry or a cognate discipline. Approvals of such fourth-year courses will be considered on an individual basis. Third-year Arts and Science courses, or their essential equivalents, will not receive degree credit.

Qualified candidates are accepted for advanced studies in structural engineering, construction management and engineering, environmental engineering, geomechanics and materials engineering, transportation engineering, and planning.

Note: Students registered in a graduate degree program involving research are required to participate in the non-credit seminar course JDE1000H Ethics in Research during their first or second session of registration.

Environmental Engineering (Collaborative Program)
The graduate departments of Chemical Engineering and Applied Chemistry, Civil Engineering, Mechanical and Industrial Engineering, and Materials Science and Engineering participate in the collaborative graduate program in Environmental Engineering at the University of Toronto. Details of this program are available in the Environmental Engineering entry in this calendar.

For additional information, contact the Department of Civil Engineering for a copy of the Graduate Brochure.

Degrees of Master of Engineering and Master of Applied Science
Candidates for these degrees are accepted under the general regulations. It should be noted that for those candidates who do not possess an undergraduate degree in civil engineering, more than the usual time and number of courses may be required. Each student, in consultation with a staff member at the beginning of the program, will establish the distribution of time between course work and thesis or
design project. An M.Eng. program will normally consist of ten courses for the course work only program. Up to two courses may be replaced by a research/design project. An M.A.Sc. program will normally consist of a minimum of five courses and a thesis. Some sections may require 6 half-courses and a thesis. Please consult the supervisor and/or refer to the departmental graduate student handbook for further details.

There is no formal residence requirement for the M.Eng. degree for students in the Department of Civil Engineering, and, therefore, the program may be completed through part-time studies.

Degree of Doctor of Philosophy

Full-Time

Candidates for this degree are accepted under the general regulations and under the regulations for the degree of Doctor of Philosophy, except for the following Departmental regulations which supersede the general regulations.

1. Admission directly from a bachelor's degree is not normally permitted.
2. Three letters of reference are normally required from applicants.
3. If a candidate transfers from a master's degree program to a Ph.D. program, courses taken during the master's program may be applied to the Ph.D. program.
4. The Ph.D. academic program is defined in terms of a major and 2 minor fields of study, normally consisting of 6 to 11 half-courses in total, depending upon the candidate's background preparation. Candidates transferring from a master's program or with a master's degree from another discipline typically take 8 to 11 half-courses. It is normally expected that at least one of the minor fields will be taken outside of the Department. This academic program must be approved by the Department's Examination and Degree Committee during the candidate's first session.

5. The academic program must be defended by the candidate in a comprehensive examination after completing most of the course work and preferably within one year after first enrolment in the Ph.D. program. This examination consists of a four to five-day, take-home written examination, followed approximately a week later by an oral examination. The examination is administered by a Comprehensive Examination Committee created and supervised by the Department's Examination and Degree Committee.

6. Candidates normally must spend at least two academic years of their program on campus on a full-time basis. Candidates seeking admission to the Ph.D. program must be able to satisfy the Department that they have the ability to undertake advanced research.

Flexible-Time

It is possible for qualified students to undertake their Ph.D. program on a flexible-time basis. This program is designed for professionals, working in a field closely related to the proposed area of research, who are unable to undertake full-time studies due to professional and/or financial obligations. Admission criteria and program requirements for the flexible-time program are the same as for the full-time program except:

1. flexibility exists in how the requirement to spend at least one-year full-time on campus is fulfilled;
2. the normal time taken to prepare for the comprehensive examination is extended from one to two years;
3. maximum overall time to completion of the degree is extended from six to eight years.

During the first four years of their program, flexible-time students must register full-time; thereafter they may register part-time.

Courses of Instruction

Not all courses are given every year. Some courses may require a prerequisite. Please consult the Department.

Candidates are accepted under the general regulations, provided that they also satisfy the Department’s requirements. Detailed application procedures and information about graduate funding are available from the Department.

Degree Programs

Master of Arts in Classics
Entry to the M.A. requires the successful completion of an undergraduate program in Classics (B+ average in final year), with the equivalent of at least three and preferably four full years of training in each of Latin and Greek. Students who are otherwise qualified but who have less training in the languages should consult with the Department about further preparation.

Candidates may be admitted to a one- or two-year program leading to the M.A., depending on their level of preparation. The M.A. degree program requires satisfactory completion of the required courses (at least GRK 1000H, GRK 2000H, GRK 2100H and LAT 1000H, LAT 2000H, LAT 2100H), satisfactory completion of the M.A. examination cycle, and the submission of an acceptable special essay (see Program Descriptions below). Satisfactory completion of the M.A. examination cycle requires at least a B- grade on each component; an acceptable special essay requires a grade of at least B.

Master of Arts in Greek or Latin
Candidates for the M.A. in Greek or Latin must satisfy all the normal requirements for the M.A. in Classics, but are only required to pass one of the M.A. examinations in the minor language. Candidates should be aware that the M.A. in Greek or Latin alone is not normally adequate preparation for doctoral study in Classics.

Doctor of Philosophy in Classics
1 Standard admission to the Ph.D. program requires the successful completion of either a strong undergraduate program in Classics (with at least an A- average in the final year) or a strong M.A. program in Classics (at least a B+ average with at least one A-), with the equivalent of at least four years of training in each of Latin and Greek and a broad preparation in the reading of ancient texts in the original languages.

2 Candidates may also be admitted to the Ph.D. with advanced standing if they have completed the revised M.A. program at the University of Toronto (having graduated in the year 2000 or later) with grades of at least B+ in all components and a grade of at least A- on the
special essay. Applicants must have reading knowledge of one of the modern languages required for the Ph.D.

Candidates admitted under standard conditions as described in 1 above must satisfactorily complete required courses (GRK 1000H, GRK 2000H, GRK 2100H and LAT 1000H, LAT 2000H, LAT 2100H), pass all components of the M.A. examination cycle with grades of at least B+, and earn a grade of at least A- on the special essay (see Program Descriptions below). For doctoral students this examination cycle and the special essay are referred to as the qualifying examinations and qualifying essay. Doctoral candidates who complete the qualifying examinations and essay at a lower standard which nevertheless satisfies the M.A. requirement will be granted the M.A. but may be required to withdraw from the doctoral program or to retake examinations.

Candidates admitted with advanced standing as described in 2 above are exempt from the qualifying examinations and qualifying essay.

Program Descriptions

Two-year Master of Arts
In the first year of study, candidates take GRK 1000H and LAT 1000H (intensive advanced language skills) and a selection of other courses approved by the Department. Students may be exempted from either 1000H course if they have satisfactorily completed comparable work in their undergraduate program. A standing of at least B+ must be earned in each undergraduate course. GRK 1000H and LAT 1000H are graded credit/no credit. Students who do not complete these courses with appropriate standing may be required to withdraw from the M.A. program or to retake the courses.

In the second year of study, candidates are required to take the following four half-courses: Classics of Greek Literature (GRK 2000H, GRK 2100H) and Classics of Latin Literature (LAT 2000H, LAT 2100H). These survey courses (graded credit/no credit) cover the most important authors of Greek and Roman antiquity. Students may also be required to take GRK 1000H and/or LAT 1000H to help them prepare for the M.A. examinations.

Each student is assigned to a faculty advisor for CLA 2000H, the M.A. special essay, and works independently on the preparation of a research paper (about 8000 words in length). The special essay is assessed by a committee of two faculty members, including the advisor.

The M.A. in Classics is granted on completion of the M.A. examinations with at least B- in each component. These are:
- Sight translation examination in Greek (not required for the M.A. in Latin).
- Sight translation examination in Latin (not required for the M.A. in Greek).
- Reading list examination in Greek Prose.
- Reading list examination in Greek Verse.
- Reading list examination in Latin Prose.
- Reading list examination in Latin Verse.

One-year Master of Arts
Candidates are required to take the following four half-courses: Classics of Greek Literature (GRK 2000H, GRK 2100H) and Classics of Latin Literature (LAT 2000H, LAT 2100H). These survey courses (graded credit/no credit) cover the most important authors of Greek and Roman antiquity.

Each student is assigned to a faculty advisor for CLA 2000H, the M.A. special essay, and works independently on the preparation of a research paper (about 8000 words in length). The special essay is assessed by a committee of two faculty members, including the advisor.

Doctor of Philosophy
In the first year, candidates take the required courses to prepare for the qualifying examinations and write their qualifying essay under the guidance of a faculty advisor. The program of study is normally identical to that of the one-year M.A. outlined above. To continue in the program, candidates must earn at least a B+ on each component of the qualifying examinations and at least an A- on their qualifying essay. Students admitted with advanced standing as described in 2 above are exempt from these requirements.

In exceptional circumstances and at the Department’s discretion, students who require additional preparation for the reading lists may be required to take a selection of courses approved by the Department during their first year before beginning to prepare for the qualifying examinations. Students will be notified of such additional requirements at the time of their offers of admission or early in the first session.

Doctoral candidates must demonstrate adequate reading knowledge of two languages of research, other than English, one of which will normally be German. By the end of year one, candidates are expected to have passed one modern language examination. By the end of year two, candidates should have completed the other modern language examination.

In the second year (first year for candidates admitted with advanced standing) candidates take CLA 3000H Research Techniques in Classics and at least three of the required total of five research seminars. The supervisory com-
mittee is normally established in year two. By the end of the third year (second year for candidates admitted with advanced standing) candidates should have completed their minor field examination and the rest of their required research seminars. The major field examination should be completed by the middle of fourth year (third year for candidates admitted with advanced standing). The dissertation should be completed by the end of the fifth year (fourth year for candidates admitted with advanced standing).

Minor field (CLA 3500H)
The minor field is established at the end of second year (first year for candidates admitted with advanced standing) and must be clearly distinct from the major field. The field is prepared under the supervision of two faculty advisors. The examination on the field is conducted by a committee composed of the two faculty advisors and the graduate coordinator.

Major field (CLA 4000Y)
The major field defines a broad area within which the dissertation topic falls. It is normally established by the third year of the program (second year for candidates admitted with advanced standing) and is directed by the supervisory committee. Preparation for the examination includes the completion of a satisfactory research essay. The field is examined by means of two written examinations, one of which must involve translation from the list of primary sources, and an oral examination covering the research essay and the examination papers.

Collaborative Programs
The Department participates in the following collaborative programs:
- Ancient and Medieval Philosophy
- Ancient Studies
- Editing Medieval Texts
For more details, consult the separate entries in this calendar.

Address:
J. P. Farrell
Collaborative Program Coordinator
Comparative, International and Development Education Centre (CIDEC)
The Ontario Institute for Studies in Education of the University of Toronto
252 Bloor Street West
Toronto, Ontario
Canada
M5S 1V6

Telephone: (416)923-6641 ext. 2361
Fax: (416) 926-4754
E-mail: jfarrell@oise.utoronto.ca
Web: cide.oise.utoronto.ca

This Collaborative Program will interest Canadian students who wish to work and live in other cultures or want to better understand the educational and social systems from which many learners come in Canada’s multicultural society. It will also interest international students who wish to relate their studies at OISE/UT directly to their own societies and learning systems.

The interests of students and faculty in this program range from the development of teaching and learning programs and policies dealing with specific educational, social, and economic problems to studies of the role of organized learning in the development of large social systems. Faculty experience and interests permit students to study comparatively both formal and non-formal educational programs, for children and adults, as they occur in both developing and developed societies, from a variety of different theoretical perspectives.

The Program is available to students enrolling in the M.Ed., M.A., Ed.D., or Ph.D. programs in each of the following four departments:
1. Adult Education, Community Development and Counselling Psychology (Adult Education and Community Development program)
2. Curriculum, Teaching and Learning
3. Sociology and Equity Studies in Education
4. Theory and Policy Studies in Education

The Program allows students enrolled in any of the four participating departments, while meeting all the requirements for a degree from that department, to also receive a certification on their transcript as “Specialist in Comparative, International and Development Education”.

The Comparative, International and Development Education Centre (CIDEC) provides academic coordination. The Centre has a small lounge and provides a gathering place where students and faculty can connect and interact through the seminar series, print and electronic newsletters, and the Resource Centre.

Admission Requirements

Applicants apply to the appropriate degree program in the collaborating department corresponding most closely to their general background and interests. In addition to meeting the minimum departmental requirements, applicants are normally expected to have at least one to two years experience working/living in cultural contexts other than urban southern Ontario (or similar settings), or to have extensive experience working in multicultural educational settings (for children or adults). Prospective applicants are strongly advised to contact the Collaborative Program Coordinator before submitting their application, to discuss the relevance of their professional/life experience to their potential admissibility to this Program, and its suitability to their own learning goals.

Program Requirements

Individual student programs must meet the requirements of both their home department (outlined in the graduate unit entry in this calendar) and the Collaborative Program. Normally, a careful selection of courses will satisfy this requirement without any additional course load. Collaborative Program requirements include course selections from the list of Comparative,
International and Development Education basic and specialization courses (distributed to the collaborating departments), regular participation in and contribution to the CIDEC Seminar Series, and (depending upon the degree program and department) preparation of a thesis, research paper, or comprehensive paper related to Comparative, International and Development Education, as certified by a participating faculty member from the home department. Students will be advised principally by faculty from their home department who also participate in the Collaborative Program.

For courses and detailed collaborative program requirements consult the Comparative, International and Development Education Web site cide.oise.utoronto.ca.

Telephone: (416) 813-4041
Fax: (416) 813-4040
E-mail: complit@chass.utoronto.ca
Web: www.chass.utoronto.ca/complit

Applicants interested in graduate study at the Centre for Comparative Literature at the University of Toronto should consult the Centre’s Web site www.chass.utoronto.ca/complit. It provides updated information about requirements, graduate programs, course offerings, and academic profiles of graduate faculty.

The Centre offers M.A. and Ph.D. degree programs to candidates qualified to pursue literary studies involving several languages. If the language and other requirements of the Centre are satisfied, students may pursue theoretical issues that cross traditional disciplines.

Admissions are selective; therefore, applicants with the minimum qualifications cannot be guaranteed admission.
Applicants, including those from the University of Toronto, must arrange for recommendations from two referees; must submit a statement of purpose not exceeding 500 words; and must submit a sample of written work, preferably a short essay on a literary topic. Admission to all programs for higher degrees will be based upon the candidate’s undergraduate and graduate records and upon the evidence of the references and statement. The deadline for receiving applications to both the M.A. and Ph.D programs is February 1.

All incoming students will meet with the Graduate Coordinator to discuss their program and to decide on their course of study before beginning classes.

**Degree of Master of Arts**

**Admission Requirements**

Candidates for this degree are accepted under the general regulations of the School of Graduate Studies provided that they also satisfy the Centre for Comparative Literature’s requirements stated below. In all cases, their programs must be approved by the Centre.

Admission to the M.A. program requires a four-year University of Toronto bachelor’s degree, or its equivalent from a recognized university, that includes courses in literature and languages with an average grade of at least B+ in the applicant’s overall program. Applicants to the M.A. program must demonstrate experience in the study of two literatures at the undergraduate level and an ability to work at the graduate level in at least one language other than English. Candidates may be admitted to either a one-year or a two-year degree depending upon their academic background. Those who have sufficient training in at least two literatures in the original languages may be admitted to a one-year program. All candidates must register as full-time students.

**Program Requirements**

1. Students admitted to the one-year program must complete at least 4 full-course equivalents in COL courses, one of which must be COL 1000H.
2. Students admitted to the two-year program must complete at least 6 full-course equivalents including at least 3.5 full-course equivalents in COL courses, one of which must be COL 1000H.
3. Students may pursue independent research for credit equivalent to one half-course at the M.A. level, under the direction of an advisor approved by the Centre.

4. A plan of study is defined by each M.A. student through consultation with the graduate coordinator in light of the student’s particular areas of interest and background. This plan of study is subject to the approval of the Centre for Comparative Literature. In addition to the numerous courses in literary theory, methodology, and interdisciplinary topics offered by the Centre, courses may also be selected from departments of language and literature, as well as from other units in the humanities.

5. Candidates must obtain an average of at least B+ in their course work to be recommended for the master’s degree.

6. M.A. candidates who intend to pursue doctoral studies are strongly advised to make appropriate plans for the acquisition of graduate level competence in a second language other than English. An adequate reading knowledge of this second language must be demonstrated before the M.A. is received.

**Degree of Doctor of Philosophy**

**Admission Requirements**

Candidates for this degree are accepted under the general regulations of the School of Graduate Studies provided that they also satisfy the Centre for Comparative Literature’s requirements stated below. In all cases, their programs must be approved by the Centre.

Admission to the Ph.D. program requires a University of Toronto master’s degree, or its equivalent from a recognized university, with an average grade of at least A-. Normally, the master’s degree will be in Comparative Literature; however, students with a master’s degree in a humanities discipline involving literary studies, especially specific language and literature programs, will also be considered. Applicants must demonstrate an ability to do advanced research in two languages other than English.

**Program Requirements**

Ideally, the Ph.D. program in Comparative Literature should be completed in four years. Candidates are required to take from five to eight full-course equivalents, depending on their individual academic backgrounds.

1. A student with an M.A. in Comparative Literature, or its equivalent, will be required to take at least five full-course equivalents, three of which must be COL courses. A student who has an M.A. in a humanities discipline involving literary studies, especially specific language and literature programs, may be required to take up to eight full-course equivalents, at least four of which must be COL courses. The actual number of courses required for the Ph.D. will be
established at the time of admission through consultation with the Director/Coordinator of Graduate Studies.

2 Time-Line: Ph.D. students, in close consultation with the Graduate Coordinator and faculty members, are responsible for defining the scope and approach of their plan of study. Students submit a preliminary statement of purpose at the time of application to the Centre. During the first two years of the program, students complete course work, language requirements, and prepare for the field examination. Course work must be completed within the first two years of the Ph.D. program. Students constitute a field examination/ supervisory committee and submit a dissertation proposal no later than the end of the second year of Ph.D. study. The field examination is taken no later than the end of the first term of the third year.

3 Language and Literature Requirements: Candidates for admission to the Ph.D. program, in addition to their work for the M.A., must demonstrate an ability to work at the graduate level in two languages other than English. An adequate reading knowledge of a third language other than English must be demonstrated before taking the field examination. Certification of graduate level competence and reading knowledge is given to all students who qualify.

All students are expected to achieve a thorough command of at least two literatures and must do work at the graduate level in another literature. This means that students must include courses in three literatures in their program or show evidence of extensive independent research under the supervision of members of the graduate faculty. Students who intend to specialize in comparative French-Canadian and English-Canadian literature may fulfill their other literature requirements through graduate-level work in continental French and British literature.

4 Students may pursue independent research for credit equivalent to one half-course at the Ph.D. level, under the direction of an advisor approved by the Centre.

5 All Ph.D. students are required to enrol in COL 4000Y, a credit/non-credit course, in addition to the agreed upon number of full-course equivalents in their individual program. Normally students enrol in COL 4000Y after completing their course work. The course has no specific content, but it recognizes the work done in preparation for the field examination.

6 When the field examination has been completed successfully, the candidate will prepare and defend a dissertation which must be an original and significant contribution to the existing body of knowledge.

7 The student must be geographically available, visit the campus regularly, and must register as a full-time student. In addition, a full-time student is not permitted to be absent from the University for an extended period or to participate in a program offered by another university without the explicit written permission of the Centre for Comparative Literature.

8 Students’ progress will be assessed at least once a year by the Centre’s Graduate Academic Committee and/or their respective supervisory committees.

Teaching Assistantships

Although the Centre for Comparative Literature currently has no teaching assistantships (TAships) of its own, it will support qualified students’ applications for TAships in the appropriate departments and colleges. Since TAships form part of the funding package, students must apply directly to departments in which they feel qualified to teach, and inform the Centre for Comparative Literature of all teaching assistantships for which they have applied.

Courses of Instruction

Courses listed below include the core program COL seminars as well as cross-listed courses from other departments, centres, and collaborative programs. Students should consult the Comparative Literature handbook as well as the handbooks of other departments for courses that may be taken for credit, as well as for course availability.

Programs of Study and Research Areas  
The Department of Computer Science offers a graduate program leading to two degrees: Master of Science (M.Sc.) and Doctor of Philosophy (Ph.D.). The graduate program consists of courses and research. Research is conducted under the supervision of a faculty member.  
Graduate faculty in the Computer Science Department are interested in a wide range of subjects related to computing, including programming languages and methodology, software engineering, operating systems, compilers, dis-
tributed computation, networks, numerical analysis and scientific computing, financial computation, data structures, algorithm design and analysis, computational complexity, cryptography, combinatorics, graph theory, artificial intelligence, neural networks, knowledge representation, computational linguistics, computer vision, robotics, database systems, graphics, animation, interactive computing, and human-computer interaction.

Admission Requirements
Applicants to both the M.Sc. and Ph.D. degree programs must complete an undergraduate degree equivalent to a four-year program at the University of Toronto with a standing equivalent to at least B+. Preference will be given to applicants who have studied computer science or a closely related discipline. Applicants whose primary language is not English and who graduated from a university where the language of instruction is not English must achieve a TOEFL score of at least 580 (on the paper test) or 237 (on the computer-based test) and a TWE essay score of at least 5.

Degree Requirements
Both the M.Sc. and Ph.D. degree requirements include some courses and a thesis. The requirements may be reduced for applicants who have already taken some graduate studies in computer science.

Degree of Master of Science
This degree program requires five computer science graduate half-courses and a thesis. The courses must satisfy a breadth requirement to ensure a broad and well-balanced knowledge and understanding of computer science. The thesis should demonstrate the student’s ability to do independent work in organizing existing concepts and in suggesting and developing new approaches to solving problems in a research area. A high standard of exposition is expected. This degree is offered on either a full-time or part-time basis.

Degree of Doctor of Philosophy
This degree program requires nine computer science graduate half-courses and a thesis. The courses must satisfy a breadth requirement to ensure a broad and well-balanced knowledge and deep understanding of computer science. The most important part of doctoral work is original research conducted under the direction of a faculty member. This research must constitute a significant and original contribution to computer science. The results must be presented in a thesis and defended at department and graduate school oral examinations.

For further details, consult the Graduate Student Handbook prepared by the Department, also available at www.cs.utoronto.ca/Grad.

E-mail: crim.grad@utoronto.ca
Web: www.criminology.utoronto.ca

Admission Requirements

Candidates for admission should have a four-year University of Toronto bachelor’s degree or its equivalent from another university. A four-year bachelor’s degree normally consists of 20 full courses. Applicants with arts and science degrees will normally be required to have at least a B+ standing. Applicants from law schools who have already completed a J.D. degree or its equivalent will normally be required to have at least a B standing.

The program is designed for students familiar with the approaches and methodologies associated with the social sciences. It would be advantageous for students to have some background in the theories of crime and deviance and a basic knowledge of research methods. A student who is admitted without such background may be required to do special work before being enrolled.

The M.A. can be completed on a full-time or part-time basis. All candidates will be required to complete the program within the time limits set for the M.A. degree under the general regulations. Students with professional experience who meet the academic admission requirements are encouraged to join the program.

Program Requirements

Candidates for the master’s degree can complete the program in 1 of 2 ways: by completing 8 half-courses within 9 months or by completing 6 half-courses and a research paper within 12 months. The degree program divides into two sections: compulsory and optional courses.
The compulsory section consists of the courses on criminological theory and the research methods (CRI 1050H and CRI 2010H).

The optional courses allow students to engage in specialized study of different approaches to, and topics within, criminology. The optional courses offered may vary from year to year. In certain cases a student may, with the approval of the Graduate Coordinator, substitute a maximum of two half-courses from another graduate unit in lieu of optional courses in Criminology.

All students are required to participate in the Centre’s non-credit Research Seminar.

Degree of Doctor of Philosophy

Admission Requirements
Candidates for admission normally have an M.A. degree in Criminology, or an equivalent master’s degree from a recognized university. Students from M.A. programs other than the University of Toronto's M.A. in Criminology may be required to take additional courses as part of their doctoral program. Applicants will not normally be considered unless they achieved a minimum A- standing in their M.A. degree program.

Program Requirements
Candidates for the Ph.D. degree are required to be on campus full-time for the period of their program. Students are expected to participate in the Centre’s activities associated with the program.

Ph.D. students with the University of Toronto M.A. in Criminology or its equivalent must fulfill the following requirements:

Comprehensive Examination
There will be two comprehensive examinations, one that is defined in terms of a theoretical area and the other defined in terms of a substantive area such as the following: courts, gender and crime, juvenile justice, policing, race and crime, sanctions and punishment.

Course Requirements
Ph.D. students must complete a minimum of four half-courses beyond those taken at the M.A. level. Students must complete, at either the M.A. or the Ph.D. level, the required criminological theory course (CRI 1050L) and the research methods course (CRI 2010L). Ph.D. students are also required to participate in the non-credit research seminar.

Course Schedule
Students will normally complete all course requirements for the Ph.D. in the first year of their Ph.D. program. Comprehensives will normally be completed by the end of the first session of the second year. It is expected that the dissertation should be completed and successfully defended during the fourth year.

Language Requirements
Candidates must have an adequate knowledge of a language other than English if an additional language is deemed essential for satisfactory completion of research for the thesis.

Thesis
Ph.D. students must prepare an original thesis that is a significant contribution to knowledge in criminology. The thesis is a sustained piece of research written in an integrated series of chapters. The thesis is normally supervised by a member of the graduate faculty in Criminology, with two other members of the graduate faculty serving on the thesis committee.

Junior Fellowships at the Centre
Students who are enrolled in doctoral programs in other departments of the University of Toronto, and who plan to undertake graduate research on a criminological topic, may apply to be appointed as Junior Fellows at the Centre of Criminology.

The overall objective of the Junior Fellowship program at the Centre is to involve doctoral students who are studying in areas related to criminology and to enhance the intellectual life of the Centre. The program reflects the Centre’s commitment to the multidisciplinary character of criminological research. Therefore, Junior Fellowships are awarded to students whose academic performance, demonstrated interest in criminology and desire to participate actively in the life of the Centre make it likely that they will contribute to the achievement of the objective of the program.

Junior Fellows are eligible for office space at the Centre of Criminology, as well as access to other Centre facilities. The status of Junior Fellow does not include any financial award.

Under special circumstances, students who are enrolled in graduate programs at other universities and who are undertaking research on a criminological topic may apply to be appointed as Visiting Junior Fellows.

Since the Junior Fellowships began in 1976, more than 50 students have been associated with the Centre in this way. Students have come
Criminology participates in two collaborative programs:

Addiction Studies
Women's Studies

For detailed information, consult the separate entries in this calendar.

Courses of Instruction
All courses are half-courses, with the exception of the Research Paper. Not all courses are offered every year. Consult the Centre regarding course availability.

Due to space limitations, Criminology graduate students will be given priority in graduate course enrolment; all other students must receive written permission from the instructor before enrolling in any of the Centre's graduate courses.

I Required Courses
CRI 1050H Theories of Crime and Social Order/M. Valerde
CRI 2010H Methodological Issues in Criminology/A. N. Doob

II Optional Courses
CRI 1010H Crime and Control in Legal Perspective/Staff
CRI 1020H Law and Society: Theoretical Perspectives/Staff
CRI 2020H Applied Statistics in Criminology/D. Hyatt

Students may take this course or IRE 1002H Applied Statistics in Industrial Relations, but not both.
CRI 3120H Politics and Crime/P. H. Solomon
CRI 3130H Policing/Staff
CRI 3140H Special Topics in Criminology/R. I. Gartner
CRI 3150H Crime, Law, and the State in Early Modern England, 1650-1850/J. M. Beattie
CRI 3160H Historical Approaches to Crime and Justice in Canada/C. Strange
CRI 3240H Penology/N. S. Wortley
CRI 3310H Special Topics in Criminology/M. Valerde
CRI 3320H The Criminal Process/D. Martin
CRI 3330H Contemporary Issues in Safety and Security/Staff
CRI 3340H Special Topics in Criminology/M. Condon
CRI 3350H Directed Research in Criminology/Staff
CRI 3351H Directed Research in Criminology/Staff
CRI 3360Y* Research Paper/Staff

*Courses which may continue over a program. The course is graded when completed.

### Address:

Eleventh Floor, 252 Bloor Street West
Toronto, Ontario
Canada
M5S 1V6

Telephone: (416) 923-6641 ext. 2601
Initial enquiries regarding admission to graduate studies in the Curriculum, Teaching and Learning Department should be made directly to:
The Ontario Institute for Studies in Education of the University of Toronto (OISE/UT)
Registrar's Office
Graduate Studies, Admissions Unit
Fourth Floor, 252 Bloor Street West
Toronto, Ontario
Canada
M5S 1V6

Such enquiries should be made well in advance of the December 3 regular deadline for receipt of applications. Given the limited number of students the Department may accept into the majority of its programs, not all eligible applicants can be admitted. Program and admission details are printed in the OISE/UT Bulletin, available from the OISE/UT Registrar's Office. Not all courses are offered every year; consult the Department each session for course offerings.

The following graduate programs are offered by the CTL Department:
1 Curriculum (M.Ed., M.A., Ed.D., Ph.D.)
3 Human Development and Curriculum (M.T.)
4 Second Language Education (M.Ed., M.A., Ed.D., Ph.D.)
5 Teacher Development (M.Ed., M.A., Ed.D., Ph.D.)

CTL also offers the following collaborative graduate degree programs:
2 Environmental Studies (M.Ed., M.A., Ed.D., Ph.D.)
3 Women's Studies (M.Ed., M.A., Ed.D., Ph.D.)

For further information, consult the separate entries in this calendar.

Note: The Master of Arts in Teaching program or M.A.(T.) is discontinued. The Department will maintain the program and its courses until all current students have graduated.

1 Curriculum Program
The Curriculum Program is a forum for systematic reflection on the substance (subject matter, courses, programs), purposes, and practices used to bring about learning in educational settings. Of concern are such fundamental issues as what should be studied? why? by whom? in what ways? and in what settings? Reflection upon such issues involves an interplay among the major components of education: subject matter, learning, teaching, and the larger social, political, and economic contexts as well as the immediate instructional situation.

Degree of Master of Education
This degree program is designed chiefly for the professional improvement of those who are already engaged in a career related to education. Candidates are accepted under the general regulations, which specify an appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, completed with an academic standing equivalent to a University of Toronto mid-B or better in the final year. Ordinarily, applicants will have at least one year of relevant successful professional experience prior to applying.

The M.Ed. program consists of eight half-courses, four of which normally are undertaken in the program, plus a major research project (MRP), and may be taken on a full-time or part-time basis. Additional study may be required either within the degree program or prior to admission, depending on previous experience and academic qualifications. Students are required to successfully complete CTL 1000H. All requirements for the degree must be completed within six calendar years from first enrolment.

Degree of Master of Arts
This degree program is designed to provide academic study and research training related to fields of professional specialization in curriculum. Candidates are accepted under the general regulations. Admission requires a four-year University of Toronto bachelor's degree, or its equivalent, in a relevant discipline or professional program, completed with standing equivalent to a University of Toronto mid-B or better in the final year. Ordinarily, applicants will have at least one year of relevant successful professional experience prior to applying. Students who anticipate further study at the Ph.D. level are advised to apply for enrolment in an M.A. program rather than an M.Ed. program.

The M.A. program may be undertaken on a full-time or part-time basis and consists of eight half-courses, four of which normally are undertaken in the program, and a thesis. Additional courses may be required of some applicants, depending on previous experience and academic qualifications. Students are
required to successfully complete CTL 1000H. All requirements for the degree must be completed within five calendar years from first enrollment.

Degree of Doctor of Education
This degree program is intended for established practitioners in positions involving responsibility for curriculum design and implementation. A University of Toronto M.Ed. or M.A. in education, or its equivalent from a recognized university, in the same area of specialization proposed at the doctoral level, completed with an average grade equivalent to a University of Toronto B+ or better is required. Further documentation may be required to establish equivalence. Ordinarily, applicants will have a minimum of three years professional experience in education prior to applying. Admission is contingent upon satisfactory completion of a Qualifying Research Paper (QRP) or a master’s thesis. A candidate’s admission will be confirmed only when the QRP or master’s thesis is judged to be of sufficiently high quality to warrant admission.

The Ed.D. normally consists of eight half-courses, four of which must be undertaken in the program. Additional courses may be required of some candidates. Students must successfully complete a comprehensive examination. A thesis, embodying the results of an original investigation, and a final oral examination on the content and implications of the thesis are required. The Ed.D. program includes one year of full-time study but may be initiated on a full-time or part-time basis. All requirements for the degree must be completed within six calendar years of first enrollment.

Degree of Doctor of Philosophy
The Ph.D. program is intended primarily as preparation for academic positions in universities and demands a strong commitment to curriculum research. A University of Toronto master’s degree in education, or its equivalent from a recognized university, in the same area of specialization as proposed at the doctoral level, completed with an average grade equivalent to a University of Toronto B+ or better is required. Further documentation may be required to establish equivalence. Ordinarily, applicants will have a minimum of two years professional experience prior to applying. Admission is contingent upon satisfactory completion of a Qualifying Research Paper (QRP) or a master’s thesis. A candidate’s admission will be confirmed only when the QRP or master’s thesis is judged to be of sufficiently high quality to warrant admission.

The Ph.D. program normally consists of six half-courses, four of which are ordinarily undertaken in the program. Additional courses may be required of some students. Students must successfully complete a comprehensive examination. In addition, a thesis, embodying the results of an original investigation, and a final oral examination on the content and implications of the thesis are required. The Ph.D. program must be initiated on a full-time basis and requires two years of consecutive full-time study. All requirements for the degree must be completed within six calendar years of first enrollment.

Courses of Instruction
Not all courses are offered every year. Please consult the Department for course offerings.

### 2 Measurement and Evaluation Program

The Measurement and Evaluation Program is designed to develop knowledge and skills in quantitative and qualitative methods used in research and in evaluation. For the master’s degree, the domains covered include the design of research and evaluation studies, the development of instruments and related theory, the collection and analysis of data, and statistical theories and methods. For the doctoral degree, students are expected to specialize in either Measurement or Evaluation. The specialization is for those interested in quantitative methods and theory, including psychometric and statistical theory. The Evaluation specialization is for those interested in the evaluation of programs (including a wide range of social and educational programs) or in student evaluation (including large-scale assessments of student achievement), using both quantitative and qualitative methodologies.

#### Degree of Master of Education

Candidates are accepted under the general regulations which specify an appropriate four-year University of Toronto bachelor’s degree, or its equivalent from a recognized university, completed with standing equivalent to a University of Toronto mid-B or better in the final year.

The M.Ed. program may be undertaken on a full-time or part-time basis and consists of eight half-courses plus a research project/paper. Students are ordinarily required to take courses CTL 2006H, CTL 2007H, CTL 2008H, CTL 2009H, and CTL 2808H. Students who have not studied statistics at least to the level of course CTL 2004H must take CTL 2004H as an extra course. Additional study may be required either within the degree program or prior to admission. All requirements for the degree must be completed within six calendar years of first enrolment.

#### Degree of Master of Arts

Candidates are accepted under the general regulations. The usual admission requirement for the M.A. is a four-year bachelor’s degree in mathematics, statistics, computer science, or a relevant social or behavioral science. Applicants who anticipate further study at the Ph.D. level are advised to apply for enrolment in an M.A. program rather than an M.Ed. program. The M.A. program may be undertaken on a full-time or part-time basis and consists of six to eight half-courses and a thesis. Students are ordinarily required to take courses CTL 2006H,
CTL 2007H, CTL 2008H, CTL 2009H, and CTL 2808H. Students who have not studied statistics at least to the level of course CTL 2004H must take CTL 2004H as an extra course. Additional courses may be required of some students. All requirements for the degree must be completed within five calendar years of first enrolment.

**Degree of Doctor of Education**

The Ed.D. program is designed for practicing social service professionals who wish to acquire knowledge and skills at the doctoral level in measurement and evaluation, with emphasis on applying these to research and practice. Applicants will ordinarily have a minimum of three years professional experience in education prior to applying. A University of Toronto M.Ed. or M.A. in education, or its equivalent from a recognized university, in the same area of specialization proposed at the doctoral level, completed with an average grade equivalent to a University of Toronto B+ or better is required. Admission is contingent upon satisfactory completion of a Qualifying Research Paper (QRP) or a master’s thesis. A candidate’s admission will be confirmed only when the QRP or master’s thesis is judged to be of sufficiently high quality to warrant admission.

The Ed.D. program normally consists of eight half-courses. Candidates are expected to have taken courses CTL 2006H, CTL 2007H, CTL 2008H, CTL 2009H, and CTL 2808H or their equivalents. Students lacking one or more of these courses are required to take them in addition to the regular doctoral program, which must include at least four CTL 2800-level courses. Students must successfully complete a comprehensive examination. A thesis, embodying the results of an original investigation, and a final oral examination on the content and implications of the thesis are also required. The Ph.D. program must be initiated on a full-time basis and requires two years of consecutive full-time study. All requirements for the degree must be completed within six calendar years of first enrolment.

**Courses of Instruction**

Not all courses are offered every year. Please consult the Department for course offerings.

- JCT 2001H: Using Classroom Assessment to Enhance Student Learning/L. Earl, R. Childs
- CTL 2000H: Descriptive Statistics (Non-Credit)/Staff
- CTL 2001H: Elementary Matrix Algebra (Non-Credit)/S. Nishisato
- CTL 2002H: Alternatives to Quantitative Evaluation in Education/Staff

CTL 2998H  Individual Reading and Research in Measurement and Evaluation: Doctoral Level/Staff
CTL 2999H  Special Topics in Measurement and Evaluation: Doctoral Level/Staff

3 Human Development and Curriculum Program

The Department of Curriculum, Teaching and Learning, and the Department of Human Development and Applied Psychology offer a two-year Master of Teaching degree in Human Development and Curriculum. Upon successful completion of this program, students will be awarded a Master of Teaching degree and a recommendation to the Ontario College of Teachers for an Ontario Teachers’ Certificate of Qualification which qualifies them to teach in either the primary and junior divisions or the junior and intermediate divisions of Ontario schools. The cooperating departments contribute courses, provide facilities, and provide supervision for graduate research. Applicants are admitted to the program through either of the two departments.

The Human Development and Curriculum program offers students a unique educational opportunity for teacher qualification with advanced theoretical knowledge and research skills. The program provides students with a strong conceptual grounding in human development, cognitive psychology, educational technology, curriculum, teaching, and learning. The high level of academic rigour in conjunction with increased practicum opportunities serves to enhance and extend the theoretical and practical experiences of students preparing to teach.

Program objectives are achieved through a combination of formal course work, teaching and research seminars, internship and practica, along with independent and collaborative research and major research papers.

Admission Requirements

Applicants are admitted under the general regulations of the School of Graduate Studies. Applicants must have the equivalent of a University of Toronto four-year bachelor’s degree with standing equivalent to a University of Toronto mid-B or better in the final year. Applicants are also expected to have experience working with groups of children. Final selection will be based on an interview by a panel of faculty, teachers, and students. Given the limited number of students in this program, not all eligible applicants can be admitted.

Applicants apply for admission to this program through either the Department of Curriculum, Teaching and Learning or the Department of Human Development and Applied Psychology. Admission and degree requirements for the program are the same for both departments. Because applicants are applying to a teacher education program, the following items must be submitted with the application:

- a photocopy of a Canadian birth certificate, or in the case of a person who was not born in Canada, documents showing the basis upon which the applicant is present in Canada, including date and place of birth
- a photocopy of a certificate of change of name where applicable
- satisfactory evidence of freedom from tuberculosis (required by the Ontario College of Teachers)

Note: In addition, a criminal record check is required for certification by the Ontario College of Teachers.
Program Requirements

The two-year M.T. degree is composed of the equivalent of 16 half-courses (14 core and 2 electives), including practica, and is undertaken on a full-time basis. Normally, advanced standing is not granted in this program. In addition to the course work (including practica), all candidates must successfully complete a comprehensive examination at the end of the program in order to graduate and receive the M.T. degree and a recommendation to the Ontario College of Teachers for an Ontario Teachers' Certificate of Qualification. Registration in the second year is contingent upon successful completion of all first-year work.

Core Courses

Curriculum, Teaching and Learning
CTL 1011H Anti-Discriminatory Education in School Settings
CTL 1019H Authentic Assessment
CTL 7000Y Curriculum and Teaching
CTL 7001H Collaboration, Curriculum, Community, and Teaching
CTL 7003H Conceptual Basis for Methods of Teaching in Primary, Junior, and Intermediate Classrooms

Human Development and Applied Psychology
HDP 1201H Child and Adolescent Development
HDP 4280H Introduction to Special Education and Adaptive Instruction
HDP 4288H Reflective Teaching and Analysis of Instruction
HDP 7002H Ethical, Legal, and Professional Issues in Education
HDP 7004Y Practicum in Schools
HDP 7005Y Practicum Internship

Elective Courses

The two electives are selected from course offerings in the Departments of Curriculum, Teaching and Learning and/or Human Development and Applied Psychology. Choice of electives is contingent upon the approval of the student's faculty advisor.

CTL 7000Y Curriculum and Teaching/Staff
CTL 7001H Collaboration, Curriculum, Community and Teaching/Staff
HDP 7002H Ethical, Legal, and Professional Issues in Education/Staff
CTL 7003H Conceptual Basis for Methods of Teaching in Primary/Junior or Junior/Intermediate Classrooms/Staff
HDP 7004Y Practicum in Schools/Staff
HDP 7005Y Practicum Internship/Staff

4 Second Language Education

Studies in Second Language Education (SLE) focus on curriculum, instruction, learning, and policies for education in second, foreign, and minority languages, particularly in reference to English and French in Canada but also other languages and settings, including studies of language learning, methodology and organization of classroom instruction, language education policies and planning, and student and program evaluation as well as issues related to bilingualism, multilingualism, cultural diversity, and literacy.

Degree of Master of Education

Candidates are accepted under the general regulations which specify an appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university completed with an academic standing equivalent to a University of Toronto mid-B or better in the final year. Ordinarily, applicants will have at least one year of relevant successful professional experience prior to applying.

The M.Ed. program consists of eight half-courses plus a research project; one of the courses must be either CTL 3000H or CTL 3002Y. Students must take a minimum of four half-courses within the SLE program; other courses may be taken from other programs in the Department of Curriculum, Teaching, and Learning; other Departments at OISE/UT; in the Departments of Linguistics or Anthropology; or in language departments at the University of Toronto. The M.Ed. program may be taken on a full-time or part-time basis. Additional study may be required either within the degree program or prior to admission. All requirements for the degree must be completed within six calendar years of first enrolment.

Degree of Master of Arts

Candidates are accepted under the general regulations. Admission requires a four-year University of Toronto Bachelor's degree, or its equivalent, in a relevant discipline or professional program, completed with standing equivalent to a University of Toronto mid-B or better in the final year. Ordinarily, applicants will have at least one year of relevant successful professional experience prior to applying. Enrolment in the M.A. (rather than M.Ed.) program is advisable for applicants expecting to pursue a doctorate in the future.

The M.A. program may be undertaken on a full-time or part-time basis and consists of eight
half-courses and a thesis. Courses must include CTL 3001H plus a course in research methods relevant to the topic of the thesis. Any of the following courses can fulfill this requirement: CTL 1018H, CTL 1306H, CTL 1804H, CTL 2004H, CTL 2007H, CTL 2008H, CTL 2808H, CTL 3019H, CTL 3800H, CTL 3802H, CTL 3803H, CTL 3807H, CTL 4005H, CTL 4802H or CTL 4805H. Students wishing to propose an alternative course to fulfill one of the SLE course requirements will be required to obtain the approval of both the SLE graduate program coordinator and either their faculty advisor or their thesis supervisor. Additional courses may be required of some applicants. All requirements for the degree must be completed within five calendar years from first enrolment.

**Degree of Doctor of Education**

The Ed.D. is intended for individuals who have already established a professional career in Second Language Education and wish to make aspects of their professional practice the subject of their graduate studies and thesis research. Candidates are accepted under the general regulations. A University of Toronto master’s degree, or its equivalent from a recognized university completed with an average grade equivalent to a University of Toronto B+ or better is required. Admission is contingent upon satisfactory completion of a Qualifying Research Paper (QRP) or a master’s thesis. A candidate’s admission will be confirmed only when the QRP or master’s thesis is judged to be of sufficiently high quality to warrant admission. Ordinarily, applicants will have a minimum of three years relevant professional experience prior to applying.

The Ed.D. ordinarily involves eight half-courses (depending on previous experience and academic qualifications) plus comprehensive exams. A thesis, embodying the results of an original investigation, and a final oral examination on the content and implications of the thesis are also required. One course must be CTL 3801H and another a research methods course relevant to the topic of the thesis. Any of the following courses can fulfill this requirement: CTL 1018H, CTL 1306H, CTL 1804H, CTL 2004H, CTL 2007H, CTL 2008H, CTL 2808H, CTL 3019H, CTL 3800H, CTL 3802H, CTL 3803H, CTL 3807H,CTL 4005H, CTL 4802H or CTL 4805H. Students wishing to propose an alternative course to fulfill one of the SLE course requirements will be required to obtain the approval of both the SLE graduate program coordinator and either their faculty advisor or their thesis supervisor.

The Ed.D. requires two consecutive sessions (i.e., one academic year) of full-time study at some point during the program. All requirements for the degree must be completed within six calendar years of first enrolment.

**Degree of Doctor of Philosophy**

Individuals pursuing the Ph.D. typically desire to be university professors in this field. Candidates are accepted under the general regulations. A University of Toronto master’s degree, or its equivalent from a recognized university completed with an average grade equivalent to a University of Toronto B+ or better is required. Admission is contingent upon satisfactory completion of a Qualifying Research Paper (QRP) or a master’s thesis. A candidate’s admission will be confirmed only when the QRP or master’s thesis is judged to be of sufficiently high quality to warrant admission. Ordinarily, applicants will have a minimum of two years relevant professional experience prior to applying.

The Ph.D. involves six to eight half-courses (depending on previous experience and academic qualifications) plus comprehensive exams. A thesis, embodying the results of an original investigation, and a final oral examination on the content and implications of the thesis are also required. One course must be CTL 3801H and another a research methods course relevant to the topic of the thesis. Any of the following courses can fulfill this requirement: CTL 1018H, CTL 1306H, CTL 1804H, CTL 2004H, CTL 2007H, CTL 2008H,CTL 2808H, CTL 3019H, CTL 3800H, CTL 3802H, CTL 3803H, CTL 3807H, CTL 4005H,CTL 4802H or CTL 4805H. Students wishing to propose an alternative course to fulfill one of the SLE course requirements will be required to obtain the approval of both the SLE graduate program coordinator and either their faculty advisor or their thesis supervisor.

**Courses of Instruction**

Not all courses are offered every year. Please consult the Department for course offerings.

5 Teacher Development Program
Students in the Teacher Development Program focus on the personal, collaborative, and organizational experiences of teachers throughout their careers. The Program encompasses such areas as: teacher knowledge, teacher identity, teacher beliefs and practices, teacher inquiry, or teacher learning; classroom and school improvement, teacher leadership, preservice and inservice education, or teacher policies; and equity and gender matters in teaching, cultural
dimensions of teachers’ lives, or the changing social and political context of teachers in society. The M.Ed., M.A., Ed.D., and Ph.D. in the Teacher Development Program examine knowledge and support research related to each of these areas.

**Degree of Master of Education**

This degree is designed for practicing educators who wish to apply knowledge and skills in teacher development to the improvement of educational practice. Candidates are accepted under the general regulations which specify an appropriate four-year University of Toronto bachelor’s degree, or its equivalent from a recognized university, completed with an academic standing equivalent to a University of Toronto mid-B or better in the final year. One year of professional education for teaching, or the equivalent in pedagogical content, is recommended. Ordinarily, applicants will have at least one year of relevant successful professional experience prior to applying. Since the Teacher Development Program focuses on teaching in general, professional experience in education can include teaching in other areas (e.g., nursing).

The M.Ed. program consists of eight half-courses, four of which must be undertaken in the program. Additional courses may be required either within the degree program or prior to admission. All requirements for the degree must be completed within six calendar years of first enrolment.

**Degree of Master of Arts**

This degree is designed to provide academic study and research training related to teacher development. Candidates are accepted under the general regulations. Admission requires a four-year University of Toronto bachelor’s degree, or its equivalent, in a relevant discipline or professional program, completed with standing equivalent to a University of Toronto mid-B or better in the final year. Ordinarily, applicants will have at least one year of relevant successful professional experience prior to applying. Since the Teacher Development Program focuses on teaching in general, professional experience in education can include teaching in other areas (e.g., nursing). Applicants who anticipate further study at the Ph.D. level are advised to apply for enrolment in an M.A. program rather than an M.Ed. program.

The M.A. program may be undertaken on a full-time or part-time basis and consists of eight half-courses and a thesis. Additional courses may be required of some applicants. All requirements for the degree must be completed within five calendar years of first enrolment.

**Degree of Doctor of Education**

Candidates are accepted under the general regulations. A University of Toronto M.Ed. or M.A. in education, or its equivalent from a recognized university, in the same area of specialization proposed at the doctoral level, completed with an average grade equivalent to a University of Toronto B+ or better is required. Further documentation may be required to establish equivalence. Applicants will ordinarily have a minimum of three years professional experience in education prior to applying. Admission is contingent upon satisfactory completion of a Qualifying Research Paper (QRP) or a master’s thesis. A candidate’s admission will be confirmed only when the QRP or master’s thesis is judged to be of sufficiently high quality to warrant admission.

The Ed.D. program normally consists of eight half-courses, four of which must be undertaken in the program. Additional courses may be required of some candidates, depending on previous experience and academic qualifications. Students must successfully complete a comprehensive examination. A thesis, embodying the results of an original investigation, and a final oral examination on the content and implications of the thesis are also required. The Ed.D. program includes one year of full-time study, but may be initiated on a full-time or part-time basis. All requirements for the degree must be completed within six calendar years of first enrolment.

**Degree of Doctor of Philosophy**

Candidates are admitted under the general regulations. A University of Toronto master’s degree in education, or its equivalent from a recognized university, in the same area of specialization as proposed at the doctoral level, completed with an average grade equivalent to a University of Toronto B+ or better is required. Further documentation may be required to establish equivalence. Applicants will ordinarily have a minimum of two years professional experience prior to applying. Admission is contingent upon satisfactory completion of a Qualifying Research Paper (QRP) or a master’s thesis. A candidate’s admission will be confirmed only when the QRP or master’s thesis is judged to be of sufficiently high quality to warrant admission.

The Ph.D. program normally consists of six half-courses, four of which must be undertaken in the program. Additional courses may be required of some candidates depending on previ-
uous experience and academic qualifications. Students must successfully complete a comprehensive examination. In addition, a thesis embodying the results of an original investigation and a final oral examination on the content and implications of the thesis are required. The Ph.D. program must be initiated on a full-time basis and requires two years of consecutive full-time study. All requirements for the degree must be completed within six calendar years of first enrolment.

Courses of Instruction
Not all courses are offered every year. Please consult the Department for course offerings.

- CTL 4000H Techniques for Improving Teaching/B. S. Kilbourn
- CTL 4001H Facilitating Reflective Professional Development/L. M. Hannay
- CTL 4002H Constructive Feedback in Teaching/B. S. Kilbourn
- CTL 4003H Teacher Development and School Improvement/C. T. P. Diamond

Collaborative Programs

**Comparative, International and Development Education**

The Departments of Curriculum, Teaching and Learning; Adult Education and Counselling Psychology; Sociology and Equity Studies in Education; and Theory and Policy Studies in Education jointly offer graduate degree programs (M.Ed., M.A., Ed.D., Ph.D.) in Comparative, International and Development Education. Additional information is available in the “Collaborative Graduate Degree Programs” section of the OISE/UT Bulletin, and the Comparative, International and Development Education entry in this calendar. Interested students should forward an application to both the OISE/UT department(s) of their choice, and the CIDE Program Coordinator. Prospective applicants are strongly advised to contact the CIDE Program Coordinator before submitting their application; information is also available from the CTL Graduate Studies Liaison.

The following courses are offered by the Department of Curriculum, Teaching and Learning within the Comparative, International and De-
Courses of Instruction

Environmental Studies

The Departments of Curriculum, Teaching and Learning; Adult Education and Counselling Psychology; and Sociology and Equity Studies in Education jointly offer graduate degree programs (M.Ed., M.A., Ed.D., Ph.D.) in collaboration with the Institute of Environmental Studies. Interested students should apply to both an OISE/UT department and the Institute of Environmental Studies (IES). Further information is also available in the IES entry in this calendar, the CTL Graduate Studies Liaison, and the IES Graduate Student Advisor.

Women’s Studies

The Departments of Curriculum, Teaching and Learning; Sociology and Equity Studies in Education; and Theory and Policy Studies in Education participate in the Women’s Studies Collaborative Program (M.Ed., M.A., Ed.D, Ph.D.). Interested students should forward an application to both an OISE/UT department and the Program Director of Graduate Women’s Studies. All programs of study should be planned in consultation with program advisors in the CTL Department, and with the GWS Coordinator of Graduate Studies. Further information is available in the Women’s Studies entry in this calendar; also contact the CTL Graduate Studies Liaison and the GWS Program Director.

### Degree of Master of Science
Candidates shall hold the degree of Bachelor of Science, or an equivalent degree, with at least mid-B standing from a recognized university in a discipline appropriate to the field of dentistry. The program will ordinarily require one year of full-time registration; however, it is the Department's expectation that students will normally remain in full-time attendance on campus to enable full participation in departmental activities for two years. The first year of the program will include establishment of a research project and course work, and the second year will be devoted largely to research and completion of thesis defence. Course work will normally include as a minimum the fulfillment of requirements for the obligatory course DEN 1001Y.
Master’s Seminars in Oral Health Sciences and successful completion of an additional half-course. Exemptions may be granted for previously completed course work at the bachelor’s level.

M.Sc Specialty

In addition, the Department offers a Master of Science degree for dental graduates seeking advanced training in a clinical specialty as well as training in research.

Ph.D. Specialty

Exceptional applicants seeking advanced training in a clinical specialty as well as training in research at the Ph.D. level, will be considered on an individual basis. The purpose of this program is to train clinician/scientists who aspire to teaching and research careers in the dental field.

Completion Requirements for M.Sc. and Ph.D. Specialty Programs

Program completion, and conferment of the M.Sc. or Ph.D. degree will be contingent upon completion of all requirements for the M.Sc. or Ph.D. Specialty programs. Therefore, compulsory degree requirements necessitate the completion of all clinical and didactic courses for the clinical specialty, as well as all course and research/thesis requirements as set by the Graduate Department of Dentistry for the M.Sc. or Ph.D. degree. The addition of the clinical and didactic courses for a clinical specialty will normally increase the amount of time for the M.Sc. degree by one year, and the Ph.D. degree by two years, depending upon the particular clinical specialty undertaken. Upon completion, students are eligible for the graduate degree, and for Specialty, Fellowship, or Board Certification in one of the dental specialties. For further information, please consult the Faculty of Dentistry Calendar or Web site.

Degree of Doctor of Philosophy

Full-Time Program

Candidates are normally admitted to a four-year Ph.D. program with an appropriate master’s degree, or equivalent, with at least an A standing from a recognized university in a discipline appropriate to the field of dentistry.

Candidates undertake customized programs, approved by the advisory committee and the graduate chair of Dentistry, comprising advanced study and research. Although the minimum residency requirement is one year, it is the Department’s expectation that students will normally remain on campus for four years. Minimum course requirements include fulfillment of requirements for the course DEN 1100Y* Doctoral Seminars in Oral Health Sciences, plus one additional full course. Exemptions may be granted for M.Sc. course work from closely related disciplines. This includes students transferring from M.Sc. to Ph.D. programs. Programs of study for B.Sc. students will normally include additional course-work requirements.

After 12 months and within 18 months of starting a Ph.D. program, candidates must pass a qualifying oral examination to demonstrate an adequate capacity for oral health sciences research through previous work and will be examined on their thesis proposal and their breadth of knowledge relative to the research project.

In all cases candidates for graduate degrees will consult with the graduate chair of Dentistry who will appoint a committee to plan and arrange their course and research programs. The committee and the graduate chair must approve the entire course of study. The student’s supervisor will chair the committee. The committee will closely monitor the student’s ability to sustain satisfactory performance and will report semi-annually to the graduate chair of Dentistry for approval and continuance of candidacy.

Flexible-Time Program

The Department offers a flexible-time Ph.D. program for selected students whose career goal is a full-time academic position in a clinical discipline. Candidates concurrently establish their teaching and academic credentials. The major goal upon program completion is to enable candidates to compete for university tenure-stream professorial positions in their clinical science discipline. Students in this program will be guaranteed funding at the Faculty’s minimum doctoral stream level for years one to four of the program.

The program, which is dedicated to research experience, does not involve clinical training other than clinical research methodology, and entails completion of the research and course work requirements for the Ph.D. degree half time, while teaching in a clinical discipline half time.

Applicants must meet all School of Graduate Studies and Graduate Department of Dentistry
admission requirements for entry to the Ph.D. program. In addition, applicants must have attained a professional degree equivalent to the University of Toronto D.D.S. and a graduate degree equivalent to the University of Toronto M.Sc. Preference is given to:

1. applicants who have completed specialty education equivalent to the standard required for licensure as a specialist by the Royal College of Dental Surgeons of Ontario and
2. applicants who hold a University appointment in Canada at an academic standard equivalent to the University of Toronto Lecturer.

Appropriate research supervision and advisory committee membership, customized plan of study, and timetable for the completion of the degree requirements, as approved by the Associate Dean of Graduate/Postgraduate Studies, will be in place at program commencement. The Chair and Coordinator of Graduate Studies monitor progress by review of completed advisory committee reports based on annual meetings of the student with the supervisory committee. Although the minimum residency requirement for the Ph.D. is one year, the anticipated completion date for the flexible-time Ph.D. program will be within five to six years from the registration date. The maximum time for completion will normally be eight years.

Candidates are required to:

1. complete minimum course work requirements (to include DEN 1100Y© Doctoral Seminars in Oral Health Sciences, plus one additional full course);
2. prepare for the qualifying oral examination;
3. participate in all graduate research activities of the advisor’s research group;
4. conduct research leading to completion of the thesis;
5. present at meetings and publish original research findings in timely fashion; and
6. participate as members of departmental and student committees as applicable.

Courses of Instruction
Not all courses are offered every year. The Department should be consulted each session as to course offerings.

Introduction
The Advanced Design and Manufacturing Institute (ADMI) is a joint program in design and manufacturing at the masters’ level. It is offered through the joint efforts of four Ontario universities: University of Toronto, McMaster University, the University of Waterloo, and the University of Western Ontario.

Within the University of Toronto the degree designation is M.Eng.D.M. This joint program is fully described on the Web site, www.admicanada.com, and has been structured to address the engineering design, manufacturing, and management expertise and knowledge base required by young graduate professionals actively engaged within industry, government, and business. The program is conveniently accessed in compressed time frames of two four-day weekend modules for each course offering. This allows practitioners to continue with their professional employment while working toward the M.Eng.D.M. degree. Courses are offered throughout the year and the schedule is updated on the Web site. The joint nature of the program ensures that the very best expertise available at each of the participating schools is integrated into the various course offerings.

The ADMI vision is to create a new generation of Canadian design and manufacturing engineers with the ability and mindset to propel Ontario industry into a world leadership position. The collective resources of partner universities and industry are leveraged to provide participants with access to an integrated program of world class technology, expertise, and experience.

ADMI is the creative result of innovative thinking and leadership from the engineering schools at McMaster University, the University of Toronto, the University of Waterloo, and the University of Western Ontario; the Schools of Business at McMaster University and the University of Toronto; and the Department of Management Sciences at the University of Waterloo. The program has the enthusiastic endorsement of Materials & Manufacturing Ontario and Ontario Industry.

Due to the part-time modular nature of the ADMI program, it is available only to Canadian citizens and permanent residents of Canada.

Admission Requirements
Candidates entering the program at the University of Toronto are required to register in the Department of Mechanical and Industrial Engineering. Candidates must have successfully completed a four-year bachelor’s degree in engineering. Individuals with undergraduate and/or graduate degrees in the related fields of computer science, physics, etc. are also invited to apply. Additionally, all individuals seeking admission into this program will normally have three years of post-baccalaureate experience in

**Program Requirements**
The program requires the successful completion of 10 ADMI course offerings. A list of course offerings, along with course descriptions and a current schedule, is available on the ADMI Web site, www.admicanada.com. Two of the required 10 courses may be replaced by an approved industry project, with University supervision. Irrespective of whether a project is undertaken, a program participant is required to complete a minimum of five courses from the Technology and Process Stream and a minimum of two from the Business and Management Stream. Individuals must complete a minimum of two ADMI courses per calendar year to maintain program registration status.

**Part-time Nature of Program**
The program is designed as a part-time program for individuals who wish to participate in graduate studies over four-day weekend periods that can be effectively incorporated into a regular working schedule. The ADMI courses are offered at various locations within southern Ontario, typically Toronto, Waterloo, Mississauga, Hamilton, and London. Courses are also offered throughout the year and do not conform to the regular university semester structures.

**Fee Structure**
The program is offered as a full cost recovery program. The fee per course is $2,500, which must be paid in advance of each course taken by the participant.

**Courses of Instruction**
A list of course offerings, along with course descriptions and a current schedule, is available on the ADMI Web site, www.admicanada.com.

E-mail: dev.bio@utoronto.ca
Web: www.utoronto.ca/devbiol/

Nature of the Collaborative Program
The graduate departments of Biochemistry, Botany, Immunology, Medical Biophysics, Molecular and Medical Genetics, Physiology, and Zoology participate in the Collaborative Program in Developmental Biology. This is a Ph.D. program only. Students must be registered in the doctoral program of one of the host departments and must be undertaking research in developmental biology under the supervision of a member of the program. Upon successful completion of the Ph.D. requirements of the host department and the program, students receive the notation "Completed Program in Developmental Biology" on their transcript.

Program Requirements
Students must complete a Ph.D. thesis and any core courses as required by their host department. In addition, they must complete the interdepartmental course JDB 1025Y and the seminar course JDB 1026Y. These courses may be taken in place of some host department courses. Prospective students should contact the coordinator for more details on admission procedures and course requirements.

Courses of Instruction
The following courses are offered by the program every year.

JDB 1025Y Developmental Biology
JDB 1026Y Student Seminars in Developmental Biology
The programs leading to the M.A. and Ph.D. comprise courses given within the Centre and drama courses offered by other graduate departments of the University. We assume that students will be building on the kind of foundation that would normally be laid in four years of undergraduate study with a concentration in dramatic literature. The intent of the programs is to further the academic study of theatre and drama at an advanced level in the program fields of theatre history, theory of drama, and dramaturgy. Within the parameters of these fields, the Centre supports research in such areas as the theory and analysis of performance, feminist theatre theory and practice, Canadian drama, and post-colonial theatre. Theatre is an integral part of graduate work in the Centre and it takes place, for the most part, in the context of workshops, student productions, and co-productions with professional companies at the Robert Gill and Studio theatres.

The Centre also participates in the Collaborative Graduate Program in Women's Studies that offers both M.A. and Ph.D. programs. Please consult the program's entry in this calendar for details.

Application forms and all information necessary for application is available from the Centre's Web site at gradrama.sa.utoronto.ca. Applications received after February 1 may be too late for consideration for the Centre's first round of offers. Contact the Graduate Coordinator concerning deadlines and delays at gradcoord.graddrama@utoronto.ca.

Admission Requirements
Applicants for admission to the Centre are considered under the general regulations if they meet the Centre's own requirements as stated below. Admissions are selective, and possession of minimum qualifications does not guarantee acceptance.

Degree of Master of Arts
1. For admission to the M.A. program, applicants must meet the following standard, or its equivalent from a recognized university: the B.A. of this University, with at least a B+ standing, comprising four years of undergraduate study, with a significant concentration in drama.
Degree of Master of Arts
Candidates are required:
1. to complete at least four full-course equivalents, as approved by the Centre, including at least one full-course equivalent in the history of theatre, and at least one half-course in the dramatic literature of a non-English-speaking culture;
2. to spend at least one academic year or twelve months in full-time study, or the equivalent in part-time work;
3. to satisfy the Centre's requirements of practical work in the theatre.

Degree of Doctor of Philosophy
Candidates admitted on the basis of an M.A. in Drama or the equivalent are required:
1. to complete three approved courses by the end of the first year, in addition to the courses required for the M.A., with an average standing of at least B+. The combined M.A. and Ph.D. courses must include the theatre history requirement, DRA 1010Y Theory of Drama, and DRA 1021H Dramaturgy, and must be chosen from more than one dramatic literature;
2. to demonstrate reading knowledge of a language other than English by passing an approved language examination not later than by the end of the first year of study. Candidates may also be asked to qualify in other program-related languages;
3. to satisfy the Centre's requirement of further practical work in the theatre by the end of the second year;
4. to pass comprehensive examinations;
5. to present a thesis on an approved topic embodying the results of original investigation which shall be judged to constitute a significant contribution to the knowledge of the field;
6. to pass an oral examination on the subject of the thesis.

Although the program has been designed for completion in four years, some students may require a longer period to complete all of the requirements.

Candidates admitted on the basis of a B.A. are required to complete an additional four full-course equivalents, including the theatre history requirement, and to satisfy the Centre's practical requirements for the theatre, as determined on admission.

Regulations
It is expected that all parts of the comprehensive examinations be taken no later than fall of the third year. Candidates who do not achieve required standing in any part of the comprehensive examinations will be allowed one further
opportunity to take the relevant examination again on the occasion immediately following.

An outline of the proposed research for the thesis, signed by a member of the faculty of the Centre, must be submitted to the Graduate Coordinator no later than September of the second year.

Six unbound copies of the thesis must be submitted to the Graduate Coordinator of the Centre no later than August 1 (for Fall Convocation), October 15 (for Mid-Winter Convocation), or February 1 (for Spring Convocation).

Courses of Instruction
Registrants are advised to confirm course offerings by consulting the Centre's Academic Handbook for Students, normally available by mid-summer.

Cross-Listed Courses
The Graduate Centre for Study of Drama also cross-lists courses in drama, theatre, and performance offered by other graduate units of the University. These typically are:
- Classics
- Comparative Literature
- Curriculum, Teaching and Learning
- English
- French
- German
- Italian
- Medieval Studies
- Slavic
- Spanish

Often given in translation, courses selected from language and literature departments (other than English, obviously) may be taken to satisfy the requirement (in the M.A., or the Ph.D. if not taken in the M.A.) that students enrol in a half-course in a dramatic literature other than in English. A listing of such courses available in the coming academic year will appear in the Centre’s Academic Handbook for Students when it is published in mid-summer.

Admission and Special Requirements
Candidates for the M.A. and Ph.D. degrees are accepted under the general regulations of the School of Graduate Studies and the regulations of the Department. It should be noted that our programs are based on the study of original texts and that they presuppose a knowledge of the relevant languages. Applicants must write a statement of approximately 500 words (two pages) setting out their main fields of interest and proposed course of study. (This statement will not be considered binding on any student whose interests change.) Ph.D. applicants should also submit three letters of recommendation from scholars who have knowledge of their previous graduate work; for M.A. applicants two letters will be sufficient. A sample of the applicant’s writing (preferably in English) should also be included. The deadline for applications is January 31 for admission in September. University of Toronto graduates are expected to have completed a four-year B.A. degree in a Specialist or Major East Asian Studies program, with at least B+ standing in their final year. Students from elsewhere must demonstrate equivalent linguistic competence and a potential for research in East Asian studies. Students with inadequate preparation for a degree program may be considered for admission as full-time Special Students. Non-native speakers of English are required to show that they have attained a score of at least 600 on the Test of English as a Foreign Language (TOEFL), of 5.0 on the Test of Written English (TWE), or comparable scores on similar tests.

Degree of Master of Arts
The M.A. program requires a minimum of one year of full-time graduate study. It may be completed either through course work or through a combination of courses and a thesis; normally four full-course equivalents are required for students not writing a thesis, and two full-course equivalents for students writing a thesis. M.A. students will be required to elect a field of concentration within a language area in consultation with the Coordinator of Graduate Studies. Normally a minimum of two approved full-course equivalents in the chosen field will be required. Students whose official records show some inadequacy in their preparation for this program may be required to spend up to two academic sessions in residence.

Degree of Doctor of Philosophy
The normal requirement for admission to the Ph.D. program is completion of the M.A. program in the Department of East Asian Studies, or its equivalent from a recognized university,
with an average grade of at least A minus. Departmental assessment may also permit registration directly from a B.A. degree in the most exceptional cases where, for instance, there is a very high grade-point average or a well-documented demonstration of capacity for original research.

The Department requires four full-course equivalents. Ordinarily, three full-course equivalents will be in the major area and the fourth in a minor area. One course in bibliography and reference sources is required of all students and is usually taken at the M.A. level. If not, with departmental permission, this course may be counted as one of the courses required for the major area. Students are encouraged to take some of their courses outside the department.

A comprehensive qualifying examination is normally undertaken within three months of completion of course work and must be taken by the beginning of the fourth year of study. Before students may take the qualifying examination, they must demonstrate competence in certain secondary languages depending on their major area of study. Please consult the Web site for details of this and other requirements. All programs are designed in consultation with the Graduate Coordinator. In certain circumstances extra course work may be required.

### Collaborative Programs

The Department participates in the Asia-Pacific Studies Collaborative Program. For further details, consult the separate entry in this calendar.

### Courses of Instruction

Below is a list of courses that may be offered by the Department. Not all courses are offered every year. Please consult the Department's Web Site for a current course listing.

The details of the programs are printed in the booklet Economics Graduate Brochure, which is available from the Department of Economics. Details are also available on the Department’s Web site.

Degree of Master of Arts

Admission Requirements
The minimum admission requirement to the M.A. programs is a four-year or honours degree (or equivalent) with at least a mid-B (75%) standing in the final year of the program. Applicants must have completed full-year courses in calculus, and in intermediate microeconomics, macroeconomics, and statistics. Meeting these minimum requirements does not imply automatic acceptance into the program.
Program in Economics
The minimum requirement is the completion of the math stat review and eight half-courses including the core courses micro, macro, and econometrics. The program is normally completed in one session.

Program in Financial Economics
Consult the separate entry in this calendar.

Combined J.D./M.A. in Economics
The J.D./M.A. in Economics permits the completion of both degrees in three years rather than the four years it would take to acquire them independently. Applicants will be awarded places in the Combined J.D./M.A. program only after they have secured independent admission into the J.D. and the M.A. programs.

In addition to the math stat review, students must complete 6 half-courses in economics including the core courses, and 45 credits in law to satisfy the requirements as established for each degree program.

Asia-Pacific Studies Collaborative Program
This program normally takes 12 months to complete. In addition to the math stat review, students must complete six half-courses in economics, including the core courses and the course ECO 2738Y Economic Development of China and Japan for which a major research paper is required. They must also complete the year-long interdisciplinary seminar, ASI 1000Y Issues in Asia-Pacific Studies, and satisfy the program's language requirement. The language requirement consists of two to four half-courses, depending on the language of choice and the student's background. For further information, consult the Asia-Pacific Studies (Collaborative Program) entry in this calendar.

Environmental Studies Collaborative Program
The Department of Economics, in conjunction with the Institute for Environmental Studies, offers this 12-month program. Courses taken must include the math stat review, six half-courses from economics including the core courses and the course in environmental economics, and two half-courses approved by the Institute. An internship culminating in a research paper is also required. For further information, consult the Environmental Studies (Collaborative Program) entry in this calendar.

International Relations Collaborative Program
Applicants to this 16-month program are required to complete the math stat review and 6 half-courses in economics including the core courses and the course in international trade. They must also complete the two courses (a) History and Philosophy of International Relations Thought and (b) International Law I: Public International Law, in addition to two other courses designed specifically for the Collaborative Program. For further information, consult the International Relations (Collaborative Program) entry in this calendar.

Degree of Doctor of Philosophy
Admission Requirements
Admission to the Ph.D. program is offered to excellent students who have completed an M.A. degree in economics by the time of enrolment. Applicants to the program must have attained at least a B+ standing at the M.A. level. Admission to the program is competitive. Those accepted into the doctoral program will normally have achieved a standing considerably higher than the minimum B+.

Program Requirements
The Ph.D. is a full-time program. Applicants must be registered as full-time students for a minimum period of three years. First-year students normally take two half-courses in microeconomics (ECO 2020H and ECO 2030H), macroeconomics (ECO 2021H and ECO 2031H), and econometrics (ECO 2400H and ECO 2401H). During the second year, each student chooses two field areas taking the equivalent of three half-year courses in each. Each second-year and third-year student must also participate in the full-year graduate research seminar (ECO 4060Y).

Suitable graduate level courses taken by a student in the M.A. program in the Department of Economics may fulfill some of the course requirements of the Ph.D. program.

The Ph.D. is a research degree which requires:
1 demonstration of competence in the core of the discipline and in two of its special fields;
2 a thesis based on original research.

Students are required to write and pass comprehensive examinations in micro, macro, and the major field by the end of the second year of study. Candidates for the Ph.D. must maintain a minimum average of B+ throughout their course work. An original paper must be written in the second year of the Ph.D. program and presented in the relevant workshop in the fall of the third year. By the spring of the third year, Ph.D. candidates must submit a proposal to a formal dissertation committee.
**Combined J.D./Ph.D in Economics**

The J.D./Ph.D. program is designed to attract highly qualified students who can benefit from the interaction between law and economics. This program allows students to complete the requirements of the J.D. degree and to reach all but the dissertation stage of the Ph.D. at the end of four years.

Students will be admitted to the Faculty of Law the first year and receive a deferred acceptance to the Ph.D. program. In the second and third years students will be considered registered in the Department of Economics and will complete the requirements of the first two years of the Ph.D. program. Students will complete their J.D. requirements in the fourth year and thereafter will be registered full-time with the Department of Economics.

Applicants must gain independent admission to both the J.D. program and the Ph.D. program in Economics. They must satisfy the normal admission requirements for each program.

**Management and Economics Collaborative Ph.D. Program**

Consult the separate entry in this calendar.

**Courses of Instruction**

Not all courses are offered every year. Please refer to the Department’s Web site for a current list.

- ECO 1010H Mathematics and Statistics Review for M.A. Students (Credit/No Credit)
- ECO 1011H Mathematics for Ph.D. Students (Credit/No Credit)
- ECO 2020H Microeconomic Theory I
- ECO 2021H Macroeconomic Theory I
- ECO 2030H Microeconomic Theory II
- ECO 2031H Macroeconomic Theory II
- ECO 2050H Applied Microeconomics
- ECO 2051H Applied Macroeconomics
- ECO 2060H Economic Theory—Micro (for M.A. students only)
- ECO 2061H Economic Theory—Macro (for M.A. students only)
- ECO 2070H Workshop in Economic Theory (jointly with Institute for Policy Analysis) (Credit/No Credit)
- ECO 2100H Mathematical Economics I
- ECO 2101H Mathematical Economics II
- ECO 2102H Topics in Microeconomic Theory

**C History of Economic Thought**

- ECO 2004H The History of Economic Thought
- ECO 2005H Workshop in the History of Economic Thought (Credit/No Credit)
- ECO 2006H Topics in the History of Economic Thought

**D Economic History**

- ECO 2210Y Topics in the Economic and Social History of Later Medieval Europe, 1250-1600
- ECO 2214Y The International Economy, 1870-1970
- ECO 2234H Topics in North American Economic History
- ECO 2236H The Modernization of the European Economy, 1750-1939
- ECO 2250H Workshop in Economic History (Credit/No Credit)

*See also ECO 2738Y*

**E International Economics**

- ECO 2300H International Trade Theory
- ECO 2301H International Monetary Theory
- ECO 2302H International Economics: Theory and Institutions
- ECO 2303H International Macroeconomics
- ECO 2304H Workshop in International Economics (jointly with Institute for Policy Analysis) (Credit/No Credit)
- ECO 2310H Topics in International Trade

**F Econometrics**

- ECO 2400H Econometrics I
- ECO 2401H Econometrics II
- ECO 2402H Advanced Econometrics
- ECO 2403H Topics in Econometrics
- ECO 2404H Empirical Applications of Economic Theory
- ECO 2406H Workshop in Econometrics (Credit/No Credit)
- ECO 2408H Econometrics (for M.A. students only)
- ECO 2410H Applied Econometrics

**G Macroeconomics and Monetary Economics**

- ECO 2103H Topics in Macroeconomic Theory
- ECO 2500H Monetary Theory I
- ECO 2501H Monetary Theory II
- ECO 2502H Advanced Monetary Theory
- ECO 2503H Financial Economics I
- ECO 2504H Financial Economics II
- ECO 2505H Macroeconometric Models and Forecasting
The Department is normally prepared to supervise reading courses in economic theory, international trade theory and policy, monetary economics, economic history, public economics, environmental economics, African and Latin American economic development, and labour economics. Other fields can often be arranged. Reading courses are available only to students who have the requisite preparation and only at the discretion of faculty members.
Editing Medieval Texts (Collaborative Program)

Program Committee

MSS 2C3

Telephone: (416) 978-4884
Fax: (416) 971-1398
E-mail: medieval@chass.utoronto.ca
Web: www.chass.utoronto.ca/medieval/

Nature of Collaborative Program
The Collaborative Program in Editing Medieval Texts offers intensive training in the editing of Latin and vernacular manuscripts, including music. Training in all areas is based on a sound knowledge of Latin and on the principles of editing Latin manuscripts. Students in the Program complete a series of courses which deal with the techniques of reading, transcribing, and editing manuscripts, and then complete an editorial project, which can be a paper for a course in any of the collaborating departments, an independent publishable project, or the student’s dissertation.

Application Procedures
The Collaborative Program is only available to students in the doctoral stream. Students should take the Centre for Medieval Studies’ M.A.-level Latin examination no later than the September sitting of their first year (the examination may also be taken the previous April) in order to determine whether they will need to take MST 1000Y during the first year. Students may apply for admission to the Collaborative Program as soon as they have passed the M.A.-level Latin examination. Applications should be addressed to the Program Committee, Collaborative Program in Editing Medieval Texts, Centre for Medieval Studies.

Admission Requirements
Students must already be admitted to the doctoral stream of one of the collaborating graduate units: Classics, English, French Language and Literature, History, Italian Studies, Medieval Studies, Music, Philosophy, Religion, or Spanish.

Program Requirements
1 Prerequisite: MST 1000Y or a pass in the Centre’s M.A.-level Latin examination (given in April and September).
2 MST 1104H and MST 1105H.
3 Two of the following half-courses:
   MST 1107H, MST 1110H, MST 1101H.
4 Any other approved half-course in editing (including departmental courses) such as: ITA 1170H, MST 1385H, MST 1388H, MUS 1245H, MUS 1138H.
5 Participation in the required seminar in editorial practices and resources: MST 1111H Sources and Materials for Editing Medieval Texts.
6 An approved text edition undertaken as the dissertation, as a project for a course, or independently for a publishable article.

Courses of Instruction

Italian Studies
ITA 1170H Editing Early Italian Texts

Medieval Studies
MST 1000Y Introductory Medieval Latin
MST 1101H Codicology
MST 1104H Latin Palaeography I
MST 1105H Latin Palaeography II
MST 1107H Latin Textual Criticism
MST 1110H Diplomatics
MST 1111H Sources and Materials for Editing Medieval Texts (prerequisite required)
MST 1385H Theory and Practice in Editing of Old English Texts I
MST 1388H Theory and Practice in Editing of Old English Texts II

Music
MUS 1138H Later Medieval Monophonic Notation
MUS 1245H Notation
Education

Fax: (416) 323-9964
E-mail: gradstudy@oise.utoronto.ca
Web: ro.oise.utoronto.ca/

On July 1, 1996, the Ontario Institute for Studies in Education (OISE) and the Faculty of Education (FEUT) were integrated to form a new faculty within the University called The Ontario Institute for Studies in Education of the University of Toronto (OISE/UT).

As one of the largest faculties at the University, and one of the largest faculties of education in North America, OISE/UT, comprising five academic departments, strives to be an effective, interactive learning community which, through research, scholarship, and excellent instruction, provides the theoretical knowledge base for education as a domain of advanced study and professional practice.

Brief introductions to each of OISE/UT’s five departments are provided below. For further details on their programs, courses, and graduate faculty, please consult the individual departmental entry listed alphabetically in this calendar.

Adult Education and Counselling Psychology (AECP)
The Department of Adult Education and Counselling Psychology is the second largest of the five departments within OISE/UT and offers a full range of graduate degrees in each of two major programs:
1. Adult Education
2. Counselling Psychology

AECP participates in the following collaborative programs:
- Addiction Studies
- Comparative, International and Development Education
- Environmental Studies
- Women’s Studies

Consult the separate entries in this calendar.

Curriculum, Teaching and Learning (CTL)
The Department of Curriculum, Teaching and Learning, the largest of the five departments within OISE/UT, offers graduate programs in
1. Curriculum
2. Human Development and Curriculum
3. Measurement and Evaluation
4. Second Language Education
5. Teacher Development

The Master of Teaching degree in the field of Human Development and Curriculum leads to Ontario College of Teachers Certification.

CTL participates in the following collaborative programs:
- Comparative, International and Development Education
- Environmental Studies
- Women’s Studies

Consult the separate entries in this calendar.

CTL offers numerous learning opportunities in research and field development, and through off-campus and distance learning courses.

Human Development and Applied Psychology (HDAP)
The Department of Human Development and Applied Psychology offers graduate degrees in several programs which prepare individuals for research and professional practice in the fields of:
1. Child Study and Education
2. Human Development and Curriculum
3. Human Development and Education
4. School and Clinical Child Psychology

The Child Study and Education program offers a Master of Arts degree in a two-year initial teacher education program leading to Ontario College of Teachers Certification.

The Master of Teaching degree in the field of Human Development and Curriculum also leads to Ontario College of Teachers Certification.

Sociology and Equity Studies in Education (SESE)
The Department of Sociology and Equity Studies in Education is the smallest OISE/UT department and offers a close working relationship between students and faculty.

SESE offers graduate programs in sociology in education with an emphasis on equity issues.

SESE participates in the following collaborative programs:
- Comparative, International and Development Education
- Environmental Studies
- Women’s Studies

Consult the separate entries in this calendar.
The Department is organized as a constitutional democracy in which students, staff, and faculty participate in all major decisions affecting the Department.

The Department of Theory and Policy Studies in Education (TPS) houses three graduate programs:
1. Educational Administration
2. Higher Education
3. History and Philosophy of Education

TPS participates in the following collaborative programs:
- Comparative, International and Development Education
- Women's Studies

Consult the separate entries in this calendar.

TPS also offers numerous research opportunities; off-campus, distance learning courses; and cohort-based programs.
Graduate Faculty

The Edward S. Rogers Sr. Department of Electrical and Computer Engineering offers graduate courses and research opportunities in:

**Communications:** multimedia systems; digital signal processing; digital filters; neural networks; image processing and coding; video compression; data compression; digital communications; information theory; error control coding; communications algorithms; radar-sonar systems; satellite communications; mobile and fixed wireless systems; spread spectrum systems; CDMA, PCS; radio networks; communication networks; broadband networks; light wave networks; network management and control; internetworking; integrated services ATM and IP networks; multimedia networks;

**Computers:** computer architecture; operating systems; systems programming; optimizing and parallelizing compilers; language processors; computer networks; distributed systems; parallel systems; trusted systems; reliability and diagnosability; array processors; non-binary logic; digital circuits; computer-aided design for VLSI; computer applications; field-programmable gate arrays and systems; reconfigurable computing; CAD for VLSI synthesis, testing; human-computer interaction;

**Electromagnetics:** field theory and measurements; radiation and guided-wave phenomena; high-speed design; electromagnetic compatibility; antenna theory and design; computational electromagnetics; microwave and millimetre-wave integrated circuits and antennas; RF and wave electronics; microwave integrated circuits; novel micromachined components; terrestrial and satellite wireless applications; quasi-optics; ionospheric plasma waves; spacecraft electrostatic discharge; meta-materials; bioelectromagnetics;

**Electronics:** semiconductor device physics; transport and optical properties of semiconductors; solid-state transducers; linear and digital circuits; active, passive, and digital filters; integrated circuit design; VLSI design and technology; digital communication circuits; RF circuits; computer-aided circuit design and testing;

**Photonics:** fiber bragg gratings; fiber sensors; high-efficiency solar cells; integrated optics; lightweight technology; materials growth for optoelectronic devices; nonlinear optics; optical properties of semiconductors; optical signal-processing; semiconductor laser and optoelectronic device modelling, design, fabrication, and testing; short wavelength lasers and applications in laser processing; ultrafast nonlinear optical phenomena and devices; basic EM theory;

**Power Devices and Systems:** electric power systems; high voltage phenomena; energy conversion; power modulators; power semiconductor systems; induction heating; electromagnetic field-fluid interaction; magnetic materials; linear motors; electric propulsion systems; control of discrete-event systems; machine systems stability; electromechanical devices;

**Systems Control:** control of multivariable systems; control of discrete-event systems; control of nonlinear systems; process modelling and identification; stochastic control; fault diagnosis; adaptive signal processing and control; control of queueing systems; interactive computer-aided design; microprocessor control systems; large-scale system theory; optimization and simulation; robotics; urban traffic control; power system control; biological modelling; multirate digital signal processing and wavelets; hybrid systems; control of autonomous vehicles; control of communication and computer networks;

**Biomedical Engineering:** Facilities for interdisciplinary study and research are available through the **Institute of Biomaterials and Biomedical Engineering:** acoustics and hearing; clinical engineering; Doppler ultrasound and
biofluid mechanics; drug delivery systems; eye positioning measurement and vision; modelling of biological clocks; medical imaging; rehabilitation engineering; sensory theory and computational neuroscience; proteomics and bioinformatics; DNA sequencing.

ECE Colloquium
During the first year of registration, M.A.Sc. and Ph.D. students are required to attend the ECE Colloquium which includes a seminar on ethics in research.

Degree of Master of Engineering (Specialization in Software Engineering)
The M.Eng. (Specialization in Software Engineering) degree is offered as part of ConGESE: the Consortium for Graduate Education in Software Engineering. ConGESE is a cooperative effort between six Ontario universities. It provides graduate education specially structured for software professionals in Ontario industries. Each cooperating university offers courses in this program. The courses are commonly offered on-site (mostly at IBM, BNR) with cooperating industrial sponsors and are designed for the working professional who might otherwise find it difficult to attend regular, on-campus courses. Consult the Software Engineering entry in this calendar.

Degree of Master of Engineering in Telecommunications
The M.Eng.Tel. is a unique graduate degree program designed to prepare telecommunications and networking professionals to practice in the environment of competing technologies, standards, business models and network and service visions. The program leverages on the strengths of the university and its industry partners through lectures that are delivered by leading academics, industry experts, and top executives. The opportunity to network with professionals as well as with other students provides a broad view of the industry.

Degree of Master of Engineering
The general regulations for the Master of Engineering degree are set out in this calendar. A candidate will enrol in a field of study in consultation with a designated professor who will act as the supervisor throughout the student's candidacy. For students with adequate undergraduate preparation, the program will normally comprise nine half-courses, of which at least five must be from the Department of Electrical and Computer Engineering. With the approval of the student's supervisor, an engineering project may replace three of these half-courses.

The M.Eng. degree program may be taken on a full-time or part-time basis.

Degree of Master of Applied Science
Candidates for this degree are accepted under the general regulations. The work leading towards the degree of Master of Applied Science provides an opportunity for the student to pursue advanced studies in the particular field of major interest and an opportunity to engage in research and engineering design.

Each candidate's program of study must receive the approval of the Department of Electrical and Computer Engineering, and, in general, shall consist of a research or design project on which a thesis must be submitted, together with courses selected from the list below and elsewhere in this calendar.

For students with adequate undergraduate preparation, the M.A.Sc. program will normally comprise five half-year graduate courses and a thesis. This thesis shall demonstrate the student's ability to do independent work in relating, organizing and extending existing techniques where required, and in suggesting and developing new approaches to problems in an area of applied science and engineering. The Department reserves the right to require additional course work of students whose undergraduate preparation does not include the study of subjects deemed to be necessary for research in the field chosen.

Degree of Doctor of Philosophy
Candidates for this degree are accepted under the general regulations. Before acceptance as a candidate for the Ph.D. degree, the Department must be satisfied of the student's ability to do advanced work. Each candidate will be required to pass courses of study to satisfy the requirements of the general regulations and the specific requirements of the Department. The Ph.D. program will normally consist of five half-year graduate courses not previously used for other degree credit, and a thesis.

Some outstanding students may be permitted to transfer directly from the M.A.Sc. program to the Ph.D. program without completing the M.A.Sc. degree. Such students will be required to complete ten half-year graduate courses, unless they already hold a master's degree.

During the first year of registration as a candidate for the Ph.D. degree, each student must pass a qualifying oral examination in the area of research.

The program has been designed to enable students who have already completed a master's degree to complete all requirements within four years. More details are available in the
Courses of Instruction
The following groups of courses in the more distinct fields of graduate study in Electrical and Computer Engineering are presented for student guidance in selecting courses. Suitable courses offered by other departments may be selected subject to the approval of the Department of Electrical and Computer Engineering.

Students registered in a graduate degree program which involves research are required to participate in the non-credit seminar course JDE 1000H Ethics in Research during their first or second session of registration. The Department should be consulted each session as to course offerings.

Address:
7 King's College Circle
University of Toronto
Toronto, Ontario
Canada
M5S 3K1

Telephone: (416) 978-2526
Fax: (416) 978-2836
E-mail: english.graduate@utoronto.ca
Web: www.utoronto.ca/english

Applicants, including those from the University of Toronto, must arrange for recommendations from two referees and must submit a statement of purpose. Admission to all programs for higher degrees will be based upon the candidate's undergraduate and graduate record and upon the evidence of the references and statement. Since it may take several weeks to complete an application file, all students wishing to be considered for University of Toronto Fellowships are urged to submit applications well ahead of the December 15 deadline.

Admissions are selective, and possession of minimum qualifications does not guarantee admission.

Note: Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination was not English are required to write the TOEFL and achieve a score of 600 or better. The TOEFL must include the Test of Written English, and applicants must achieve a minimum score of 5.

Degree of Master of Arts
The M.A. program usually requires twelve months to complete for students who are graduates of a four-year program in English or English and another subject at this University, or a similar program elsewhere. Candidates must have a B+ average or better and show evidence of first-class work in English for admission to the M.A. program. In considering applications, the Department favours a broad training in the major genres and all periods of English literary history. Applicants are encouraged to take the Graduate Record Examination and to have a report sent to the Graduate Department.

Candidates may elect to take the degree by course work only or, with permission of the Director, by course work and thesis. In either case, candidates must attain a B standing in each graduate course.

M.A. by Course Work
For most students, and especially those going on to the Ph.D., this is the preferred option. Candidates are required to earn a credit in Bibliography I and to complete four approved, full graduate courses or the equivalent in English.

M.A. by Thesis
The thesis option may be preferable for some students, especially those not intending to proceed to the Ph.D. It requires Bibliography I, two full graduate courses in English, or the equivalent, and a thesis of approximately 30,000 words on a topic approved by the Department.

Degree of Doctor of Philosophy
Students approved by the Department are admitted as candidates for this degree under the General Regulations of the School.

Admission to the Ph.D. program requires either
1 a four-year University of Toronto bachelor’s degree, or its equivalent from a recognized university, that includes at least eight full-course equivalents in English with an average grade of at least an A- in the applicant’s overall program
2 a University of Toronto master’s degree in English, or its equivalent from a recognized university, with an average grade of at least an A- in the applicant’s overall program.

Applicants must satisfy the Department that they are capable of independent research in English at an advanced level. Applicants are encouraged to take the Graduate Record Examination and to have a report sent to the Department.

A candidate admitted to the Ph.D. program will pursue a program of study and research approved by the Department. Although it is possible for a student admitted on the basis of a master’s degree, or a bachelor’s degree, to
complete the Ph.D. program in English within four years, or five years, respectively; most candidates will require at least one additional year to complete all the requirements, including the thesis. The minimum requirements for the degree are as follows:

**Course Requirements**

A candidate admitted on the basis of a four-year bachelor's degree must take: ENG 8000H Bibliography I, either ENG 9003H or ENG 9005H Bibliography II, ENGL 9500Y Professional Development, ENG 9900H Professing Literature, and six additional full-course equivalents in English, as approved by the Department. In order to maintain good academic standing, and to continue in the Ph.D. program, the candidate must complete each course taken for graduate credit with a grade of at least B; ENG 8000H and an additional three full-course equivalents in the first year of the program, with an average grade of at least an A-; and the remaining courses by the end of the third year of the program, maintaining an average of at least an A-.

A candidate admitted on the basis of a master's degree must take ENG 8000H Bibliography I, unless this or an equivalent course has already been taken; either ENG 9003H or ENG 9005H Bibliography II; ENGL 9500Y Professional Development; ENG 9900H Professing Literature; and three additional full-course equivalents in English, as approved by the Department. In order to maintain good academic standing, and to continue in the Ph.D. program, the candidate must complete each course taken for graduate credit with a grade of at least a B; and all course work by the end of the second year of the program, maintaining an average of at least an A-.

Every candidate for the Ph.D. must take at least two full-course equivalents outside the field of specialization. The student is encouraged to combine these courses in a minor field. (Graduate courses taken as part of the master's program and in fulfillment of the English language requirement may be counted in this connection, but not courses in the 8000 and 9000 series.)

A candidate's selection of courses must meet the approval of the Department.

**English Language Requirement**

Every Ph.D. candidate is required to demonstrate knowledge of the history and development of the English language, especially of its early period. Any student who has not already completed English 240Y, or an equivalent full-year undergraduate course in Old English, with at least a B standing is required either to take a course in Old English—English 240Y Old English Language and Literature, English 1001H Old English I, or English 6381H History and Structure of the English Language I—or to pass a special examination in Old English.

**Language Requirement**

By May 31 of the third year of registration, in the case of a student admitted on the basis of a master's degree; otherwise, by May 31 of the fourth year of registration, a candidate is required to demonstrate a reading knowledge of French. With the permission of the Department, another language (other than English) may be substituted for French provided that this other language is required by the student's research area. The supervisory committee may require the candidate to qualify in other program-related languages as well.

**General and Special Examinations**

Candidates are required to pass two separate examinations: the General Examination and the Special Field Examination.

The General Examination is designed to give students a broad knowledge of historical periods, works of literature, and critical concepts. It consists of two three-hour written papers covering the whole range of English literature, divided at 1700. A reading list is provided for this examination on the Department Web site, and sample examinations are available in the Department. Students entering the Ph.D. program with a master's degree take both parts of the General Examination in September of their second year. Students entering the program directly from a bachelor's degree take the examination in September of their third year. A January sitting of the examination is designed to accommodate students with special circumstances.

The Special Field Examination consists of a three-hour written examination, followed (approximately two weeks later) by a two-hour oral examination, both based on a reading list related to the candidate's thesis area. This special field reading list is drawn up by the student in consultation with the supervisory committee. Once it receives final approval by the supervisory committee, the approved list is filed by the supervisor with the Associate Director, Ph.D. The Special Field Examination is to be taken approximately three months after the list is approved. Students are advised to consult the departmental guides on Special Field reading lists. Candidates should submit a reading list by the end of January of the second year for students admitted from the master's degree, by
the end of January of the third year for students admitted from a bachelor's degree, and pass the exam by the end of the subsequent April. On the recommendation of the examining committee, a second attempt is allowed.

**Thesis**
A candidate is required to submit a thesis on an approved subject embodying the results of original investigation which constitute a significant contribution to the knowledge of the field, and to pass an oral examination on the subject of the thesis. (The normal length of a Ph.D. thesis is approximately 75,000 words. The maximum length accepted by the Department is 100,000 words).

No later than November 1 of the second year of registration in the case of a student admitted on the basis of a master's degree; otherwise, by November 1 of the third year of registration, the candidate must submit to the Associate Director, Ph.D. an outline of the proposed research for the thesis, approved by the prospective Supervisor. The proposals are circulated to all graduate faculty in the Department for information and comment. Once the graduate committee approves the proposal, the Associate Director, Ph.D. appoints a supervisory committee that includes a Supervisor and two other faculty members with expertise in the proposed research area. The candidate and the supervisor should meet regularly. The candidate is also required to meet at least once a year with the two other members of the supervisory committee. The supervisory committee should normally approve the completed thesis before it is submitted for examination. The final oral examination is arranged by the Department in collaboration with the School of Graduate Studies. The candidate should allow at least eight weeks from submission of the thesis in order for the Department to complete the arrangements for the oral examination.

**Courses of Instruction**
The following list of courses is subject to revision; further information, including course descriptions, may be obtained from the Department before enrolment. The courses offered by the Department vary considerably from year to year.

From time to time, the Department also offers programs of directed reading in special fields. These "reading courses" are normally available only to students in the Ph.D. program. With the special approval of the Director of Graduate Studies, candidates for the Ph.D. may substitute one such course for one (and not more than one) of the required courses.

The Environmental Engineering Program (EEP) is an interdisciplinary collaborative program designed for students interested in taking a concentration of courses and doing research in environmental engineering. It is open to M.A.Sc., M.Eng., and Ph.D. students in one of the following collaborating graduate departments in the Faculty of Applied Science and Engineering:

- Chemical Engineering and Applied Chemistry
- Civil Engineering
- Mechanical and Industrial Engineering
- Materials Science and Engineering

About 30 full-time faculty members in these departments carry out advanced research and teach postgraduate courses in a wide range of environmental engineering specialties.

The Collaborative Program is administered and coordinated by the Division of Environmental Engineering in conjunction with the participating departments and the Institute for Environmental Studies.

To register in the EEP, students must first apply to and be accepted into a master's or doctoral program in one of the collaborating departments. (See the departmental entries in this calendar for details on admission requirements and degree programs.) Students should generally apply to the department that most closely matches their undergraduate degree. Once a student has registered in one of the collaborating departments, he or she may apply to and register in the EEP; this should be done no later than the end of the first session of study. Application forms are available from the Division or any of the collaborating departments.

Degree requirements include course work and generally a research thesis or project, with details varying among the collaborating departments (see the departmental entries in this calendar). Graduate courses and research are available in a wide range of environmental engineering specialties offered by the collaborating departments. Many additional courses relevant to environmental engineering are offered by the Institute for Environmental Studies. See the calendar entries for the collaborating departments and the Institute for Environmental Studies for lists of courses. More detailed information on faculty, areas of research, and courses is available from the Division, and on the Division's Web site.

Program Requirements
The EEP requirements are:
1. Completion of a concentration of study in environmental engineering as demonstrated in course work and, where it is part of the degree requirement, a thesis or project. This is generally met through the student's home department degree requirements.
2. Completion of one non-engineering course with substantial interdisciplinary content and student interaction that is related to the environment but is outside the student's technical field. A list of approved courses is available on the Division's Web site.
3. Participation in EDE 3000H, the Environmental Engineering Research Seminar Series, for at least two sessions. This is mandatory for M.A.Sc. and Ph.D. students and recommended for M.Eng. students.

Students who complete these EEP requirements will obtain the following statement on their transcript: "Completed Collaborative Program in Environmental Engineering."
### Graduate Faculty

**Full Members**

- J. P. D. Abbatt, BSc, AM, PhD/Chemistry
- B. J. Adams, BSc, MS, PhD, PEng/Civil Engineering
- R. C. Andrews, BASc, MSc, PhD, PEng/Civil Engineering
- D. M. Bagley, BS, MS, PhD, PEng/Civil Engineering
- S. C. Barrett, BSc, PhD, Canada Research Chair/Botany
- T. J. Blake, BScF, STB, MF, PhD, DipFor/Forestry

INTRODUCTION

The Institute for Environmental Studies (IES) provides opportunities for an interdisciplinary approach to environmental studies at the University of Toronto. It has both teaching and research functions. Its faculty members are cross-appointed from several faculties and departments including representatives from engineering, physical sciences, health sciences, biological sciences, forestry, social sciences, and the humanities.

Environmental Information Office (EIO)

The principal aim of the Environmental Information Office (EIO) is to facilitate interaction between environmental researchers, teachers, and students at the University of Toronto by providing electronic-based access to environmental information and data by means of World Wide Web technology. Although EIO is administered through the Institute of Environmental Studies, it is the product of cooperation between several academic and non-academic units. Courses are taught at the undergraduate and graduate levels through many different departments and faculties. Environmental research also takes place throughout the University. Since there is no “Department of the Environment”, the University is attempting to capture or coordinate activities through EIO, the physical product of which is the Environmental Teaching and Research Home Page for U of T on the Web (www.utoronto.ca/env/ies).

Contact: Judith Wilson
E-mail: judith.wilson@utoronto.ca
Web: www.utoronto.ca/env/

Collaborative Programs

The Institute for Environmental Studies offers the following collaborative programs:

1. Environmental Studies
2. Environment and Health

The Division of Environmental Engineering offers a collaborative graduate program in Environmental Engineering. See the separate entry in this calendar.

Students entering a collaborative program must register in one of the home departments and must also register with the Institute.

Students planning to begin the program in September should register with the Institute by August 1; students planning to start the program in January should register with the Institute by December 1.

A detailed calendar, Graduate Studies in the Environment, is available at www.utoronto.ca/env/ies.
Admission Requirements
Admission is subject to the approval of the graduate home department in consultation with the Institute for Environmental Studies.

ENVIRONMENTAL STUDIES (COLLABORATIVE PROGRAM)

The graduate units of Adult Education and Counselling Psychology; Anthropology; Botany; Chemistry; Curriculum, Teaching and Learning; Economics; Forestry; Geography; Geology; Information Studies; Management; Philosophy, Political Science; Sociology; Sociology and Equity Studies; and Zoology, in conjunction with the Institute for Environmental Studies, offer collaborative graduate programs in Environmental Studies. Discussions regarding collaboration with other departments are in progress.

Departments participating in the program contribute graduate courses and provide supervision for graduate research.

Students in graduate departments not listed above who are interested in the Environmental Studies Collaborative Program should speak to the IES Student Advisor and to their home department's Graduate Coordinator/Graduate Studies Administrator/Chair to discuss this possibility.

Typically, environmental students undertaking a master's degree are required to complete three IES half-courses, two of which are core courses, a thesis (or major research paper and an internship), in addition to, or as part of, the master's program in their department. Environmental students undertaking a doctoral degree are required to complete the two IES core courses plus a thesis in the home department on an environmental topic. Degree requirements vary from department to department; therefore, close consultation between the Institute and the proposed home department at the time of the applicant's admission to the home department is required to determine a suitable collaborative arrangement.

Program Requirements
1 Details of course requirements are available in the Graduate Studies in the Environment calendar (www.utoronto.ca/env/ies). Please note that these courses may be used to satisfy the elective requirements of the home department.
2 Further degree requirements may be determined by the department and/or by the student's supervisor or supervisory committee.

These requirements will depend on the background and career goals of the student, as well as on departmental regulations.

3 An environmentally-related research thesis or major research paper and an internship are normally required. Submit a copy of the final thesis or research paper for the Institute to the Student Advisor.

4 A supervisor or supervisory committee may be appointed for each student by the home department and IES.

Graduation Requirements
The Institute for Environmental Studies recommends to the home department and the School of Graduate Studies that a candidate should graduate following completion of the above program requirements. Students receive, in addition to the master's or Ph.D. degree in their departmental area, the notation "Completed Collaborative Program in Environmental Studies" on their transcript.

Courses of Instruction
The Institute offers individual credit courses that are open to graduate students from all parts of the University, subject to enrolment limits.

In addition to the Institute's courses listed below, other courses dealing with environmental topics are offered as part of the regular teaching programs in departments. See the Institute's calendar at www.utoronto.ca/env/ies for further details.

Course outlines and course timetables are available from IES early in September and January and are posted at www.utoronto.ca/env/ies. Only individual study courses are available during the summer session. There is a plenary meeting of instructors and interested students in early September.

Core Courses
IES 1001H Environmental Decision Making
IES 1002H Environmental Management Case Studies

Contaminants in the Environment
IES 1410H Analytical Environmental Chemistry
IES 2501H Pollution Prevention and Control
JGN 2607H Advanced Techniques in Hydrogeology
JNC 2503H Environmental Pathways

Ecology
JBE 1434H Applied Ecology
JGE 1420H Urban Waste Management
ENVIRONMENT AND HEALTH (COLLABORATIVE PROGRAM)

Program Committee

D. Cole, BSc, MD, MSc/Public Health Sciences
M. L. Diamond, MSc, PhD/Geography
V. W. MacIver, BA, MRP, MSc, PhD, MCIP/Geography
J. T. Purdham, BSc, PhD/Public Health Sciences
L. F. Smith, BSc, PhD/Public Health Sciences
F. S. Silverman, BSc, MSc, PhD/Environmental Studies
I. L. Stefanovic, BA, MA, PhD/Environmental Studies, Philosophy
R. R. White, BA, MSc, PhD/Geography, Environmental Studies
A. P. Zimmerman, BA, PhD/Environmental Studies, Zoology

The graduate units of Geography, Medical Science, and Public Health Sciences, in conjunction with the Institute for Environmental Studies, offer a collaborative program in Environment and Health. Students must first be admitted to one of the collaborating graduate units and then must also register with the Institute. Students may pursue a master's or Ph.D. according to home unit regulations.

Graduate students who are interested in taking a collaborative program in environment and health, but who are from units not listed above, should speak to the IES Student Advisor and to their home unit's graduate advisor(s).

Program Requirements

1. Master's students must complete the core course, MSC 4000H Seminars in Environment and Health, which is normally offered in the Winter Session.
2. For degrees which require a thesis or research project, the topic should be within the field of environment and health, as approved by the home department and the Collaborative Program Committee. A copy of the final thesis or project must be submitted to the Institute's Student Advisor.
3. Further degree requirements may be determined by the graduate unit and/or by the student's supervisor or supervisory committee. These requirements will depend on the back-
ground of the student, as well as on the unit’s regulations.

4 Ph.D. students must complete the year-long core course IES 4001Y Graduate Seminar in Environment and Health as a credit/non-credit course and will present a seminar on their thesis topic. The doctoral thesis will focus on a theme in environment and health, and the committee membership will include a supervisor from the student’s home department who is a member of the Environment and Health Program and at least one other member from a collaborating graduate unit.

Graduation Requirements
The Institute for Environmental Studies recommends to the home department and the School of Graduate Studies that a candidate should graduate following completion of the above requirements. In addition to the master’s or Ph.D. degree in their unit area, students receive the notation “Completed Collaborative Program in Environment and Health” on their transcript.
Ethnic and Pluralism Studies (Collaborative Program)

Program Committee
W. M. D. Baker, BComm, MA, PhD/Economics

The graduate units of Anthropology, Geography, History, Industrial Relations, Nursing Science, Political Science, Religion, Russian and East European Studies, Social Work, and Sociology participate in the Ethnic and Pluralism Studies Collaborative Program at the University of Toronto. Participating graduate units in the program contribute courses and provide facilities and supervision for graduate research.

Students in the program must apply to and register in one of the participating graduate units and must follow a program of studies acceptable to both the participating graduate unit and the Ethnic and Pluralism Studies Program. Upon successful completion of the requirements, students receive the notation “Completed Collaborative Program in Ethnic and Pluralism Studies” on their transcripts, in addition to the master's or doctoral degree in their departmental area.

General Requirements
Candidates for the degrees of Master of Arts, Master of Industrial Relations, Master of Nursing, Master of Science, Master of Social Work, and Doctor of Philosophy are accepted by the participating graduate unit under the general regulations. Collaborative program requirements may be met concurrent with, or in addition to, departmental requirements. Students should consult specific departmental listings for information.

Degree of Master of Arts, Master of Industrial Relations, Master of Nursing, Master of Science, or Master of Social Work

Program Requirements
1. Two half-courses in ethnicity from two different disciplines. Normally, these courses are taken as options within regular departmental or faculty degree requirements, not as additional courses.
2. A coordinating seminar in ethnicity. The seminar, which is a half-course, will be the place to discuss, compare, and bring together the various approaches to the study of ethnicity. As well, students will be expected to present and discuss their projects.
3. When a practicum is required, it will focus on ethnicity.
4. It is understood that the major paper or thesis as required by the graduate unit would be in an ethnic studies area.

Degree of Doctor of Philosophy

Program Requirements
1. Four half-courses, or equivalent, in ethnicity, including the courses taken for the master's degree. At least two of the courses will be in disciplines other than the one in which the student is enrolled. Normally, these courses are taken as options within regular departmental or faculty degree requirements, not as additional courses.
2. A coordinating seminar in ethnicity. The seminar, which is a half-course, will be the place to discuss, compare, and bring together the various approaches to the study of ethnicity. As well, students will be expected to present and discuss their projects. Students who have taken this course for the master's degree need not repeat it.
3. When the student's graduate unit requires more than one comprehensive examination, one of the examinations will be in ethnicity.
4. When there are no comprehensive examinations, but an examination on the thesis proposal is required, the examination will focus on ethnicity, and in all cases the thesis will be on subject matter dealing with ethnicity.
5. A Ph.D. thesis will focus on ethnicity. The supervisor of the thesis committee will be a specialist in the area of ethnicity.
 Courses of Instruction

1 Courses eligible for credit toward meeting program requirements in Ethnic and Pluralism Studies are listed below.
2 Students should check with the professor responsible for each course since a prerequisite may be required.
3 Not all courses are offered each year. Please consult the Program office for course availability.
4 Students wishing to use courses other than those listed below for credit toward meeting program requirements must submit a formal request in writing.

Coordinating Seminar

JTH 3000H Ethnic Relations Theory, Research, and Policy/J. G. Reitz

Anthropology

ANT 6003H Critical Issues in Ethnography I/Staff
ANT 6004H Critical Issues in Ethnography II/Staff
ANT 6034H Advanced Research Seminar IV (Ethnicity)/M. D. Levin
ANT 6040H Approaches to Field Work I/R. Lee
ANT 6041H Approaches to Field Work II/Staff
ANT 6050H Reading Course in Specific Area and Theory I/Staff

Economics

ECO 2800H Labour Economics I (prerequisite: an undergraduate course in statistics and a graduate course in applied statistics)/M. Baker

Geography

PLA 1503H Planning and Social Policy/S. Ruddick
JPG 1506H State/Space/Difference: Understanding the New Social Geography/S. Ruddick
GGR 1700H Seminar in Cultural-Historical Geography/J. H. Galloway
GGR 1712H Historical Geography of Ethnic Groups in Canada/D. A. McQuillan

History

HIS 1102H Spiritual Invasion: Natives of the Americas Confront Christianity/A. Greer
HIS 1120H Topics in Aboriginal/Non-Aboriginal Relations in Canada/S. Van Kirk
HIS 1164H Irish Migration to Canada: Sources and Methods/M. McGowan
HIS 1166H Immigrants, Minorities, and the Racialized Other: Canada in a Comparative Context (prerequisite: any previous course in the history of Canada)/F. Iacovetta
HIS 1274H The Nazis, Occupied Europe, and the Jews/M. R. Marrus
HIS 1287H Polish Jews Since the Partitions of Poland (joint graduate/undergraduate)/P. Wróbel
HIS 1528H Crossing Boundaries: Race, Ethnicity, Class, and Gender in America, 1880-1930/J. Ingham
HIS 1545H Race, Segregation and Protest: South Africa and the United States/R. Halpern

Industrial Relations

IRE 3630H Diversity and Inclusiveness in the Workplace/N. Weiner

Law

LAW 259H Comparative Indigenous Rights/J. Borrows
LAW 262H Citizenship Theory and Immigration Law/A. Shachar
LAW 294H International Human Rights Law/M. P. Macklem
LAW 368H Race and the Law/K. Rittich
LAW 370H Aboriginal Peoples and the Law/K. Wilkins
LAW 410H Discrimination Law: Equality in the Private Sector/D. Reaume

Nursing Science

NUR 1013H Transcultural Health Care Issues/R. Lee
NUR 1014H Politics of Aboriginal Health/R. S. Hagey
NUR 1068H Youth and Mental Health Promotion/N. Khanlou

Political Science

POL 2001Y Problems of Political Community/J. H. Carens
POL 2038Y Problems of Pluralism and Equality/M. S. Williams
POL 2127H Canadian Theories of Multiculturalism/H. D. Forbes
POL 2324H Ethnonationalism and State-Building: The Communist and Post-Communist Experience/D. Schwartz
POL 2413Y Politics, Culture, and Identity in Southeast Asia/J. Bertrand
Religion
RLG 2037H Religion and Healing/ P. Klassen
RLG 3931H Topics in North American Religions/ P. Klassen

Social Work
SWK 4210H Promoting Empowerment: Working at the Margins/ L. Davis
SWK 4617H Cross-Cultural Social Work Practice/ A. K. T. Tsang, K. Richard
SWK 4658H Social Work with Immigrants and Refugees/ U. George

Sociology
SOC 6009H Ethnicity I/ Staff
SOC 6016H Social Demography I
SOC 6109H Ethnicity II/ U. G. Reitz
SOC 6116H Social Demography II/ E. Fong

Theory and Policy Studies in Education
TPS 1428H Immigration and the History of Canadian Education/ H. M. Troper
TPS 1429H Ethnicity and the History of Canadian Education/ H. M. Troper
TPS 3428H Minority Concerns and Education in Canadian History: Selected Topics/ H. M. Troper

Degree of Master of Science

Students are admitted to the interdisciplinary field of exercise sciences under the general regulations of the School of Graduate Studies. More specific program details, requirements, course descriptions, and a supplementary application form are available from the Graduate Department of Exercise Sciences. Applications must be submitted by February 1.

The Department of Exercise Sciences offers Master of Science and Doctor of Philosophy programs for students interested in research, academic, and professional careers relating to: Applied/exercise/environmental physiology Metabolic and endocrinological aspects of physical activity Muscle physiology Physical fitness Psychological aspects of sports and physical activity Psychophysiological aspects of exercise and stress Sociocultural aspects of sport and physical activity

Admission Requirements
Candidates should have a four-year degree, or its equivalent, in physical education and health or a related discipline from a recognized university.

Program Requirements
1 The completion of all degree requirements within five years of first registration in the program.
2 The successful completion of five half-courses, including one of EXS 5503H, EXS 5516H, or EXS 5518H; at least one other half-course from the Exercise Sciences offerings; and one half-course in an appropriate methodology. All courses must be approved in advance by the student’s supervisor and the Graduate Department of Exercise Sciences.
3 The writing of a thesis under the supervision of a thesis committee (supervisor and at least two additional faculty members) and its defence.
before an examination committee appointed by the Graduate Department of Exercise Sciences.

4 Part-time study is available. The student's annual program plan must be approved by the supervisor and the Graduate Department of Exercise Sciences.

Degree of Doctor of Philosophy

Admission Requirements
Candidates applying to the Ph.D. program normally will be expected to have completed a M.A. or M.Sc. with a thesis in a related field and provide satisfactory references pertaining to their academic and research abilities.

Program Requirements for Full-Time Ph.D.
1 Full-time registration (fall, spring, summer sessions) for the first four years of the doctoral program.
2 Completion of all degree requirements within six years from first registration in the program. Thereafter, candidates may apply for a maximum of two extensions.
3 The successful completion of six half courses, including one of EXS 5503H, EXS 5516H, or EXS 5518H; at least two other half-courses from the Exercise Sciences offerings; and one half-course in an appropriate methodology. All courses must be approved in advance by the student's supervisor and the Graduate Department of Exercise Sciences.
4 The successful completion of a comprehensive examination.
5 The writing of a thesis under the supervision of a thesis committee (supervisor plus at least three additional faculty members) and its defence before an examination committee appointed by the Graduate Department of Exercise Sciences.
6 The oral defence of the thesis before an examination committee appointed by the School of Graduate Studies.

Program Requirements for Flexible-Time Ph.D.
With the approval of the Associate Dean, Graduate Education and Research, some applicants may be admitted to a flexible-time Ph.D. program. This program will benefit mature students with career and/or familial obligations. The degree requirements for the flexible-time program are identical to those listed above for the full-time Ph.D. program; however, students have up to eight years to complete the program. They are required to register full-time for the first four years of their program. Thereafter, they may register part-time. A plan of study and research activities will be negotiated at initial registration, to be reviewed and updated annually.

Collaborative Programs
Exercise Sciences participates in the following collaborative programs:
Cardiovascular Sciences
Women's Studies
For details, consult the separate entries in this calendar.

Courses of Instruction
EXS 5501H Physical Activity and Aging/ R. C. Goode
EXS 5502H Physical Activity and Child Health/R. C. Goode
EXS 5503H Adaptations to Habitual Activity/ S. Thomas
EXS 5506H Metabolism and Endocrine Function in Exercise/C. D. Rodgers
EXS 5508H Cardiovascular Disease and Exercise/J. M. Goodman
EXS 5509H Applied Muscle Physiology and Biochemistry/M. Locke

Web: www.economics.utoronto.ca/mfe

Introduction
The Master of Financial Economics Program is a small enrolment joint program of the Department of Economics and the Rotman School of Management. Graduates of the Program will receive a professional degree called the Master of Financial Economics (M.F.E.). The Program is designed to equip talented students with the tools and skills required for successful careers in the financial sector. Its objectives are to provide students with a broad understanding of financial theory and the economic framework upon which that theory is based, both in the classroom and through actual experience working for firms in the financial sector.

Admission Requirements
Applicants must have completed or must be in the final year of a four-year or honours degree program, or equivalent, with a B+ standing in the final year of that program. Applicants must have a strong preparation in economics, including full-year courses in both intermediate-level micro and macro theory, and full-year university-level courses in each of calculus and statistics. Previous training in finance is useful but not required. Achievement of these minimum requirements does not guarantee acceptance into the program. Preference is given to students who have completed, with high standing, advanced-level courses in any or all of economics, mathematics, and econometrics.

Program Requirements
The 16-month program consists of 12 half-courses, a 4-month summer internship, and an intensive math, statistics, and accounting review. The core program consists of four courses from the Department of Economics and three courses from the Rotman School. The core courses drawn from the Department of Economics are the same as the core courses required for the M.A. degree in Economics plus ECO 2503H Financial Economics I. The core courses from the Rotman School (MGT 2306H Options and Futures Markets, MGT 2300H Corporate Financing, MGT 2302H Security Analysis and Portfolio Management) are drawn from the second-year M.B.A. level courses and provide students with training in key areas of finance. In addition to the core courses, students are free to choose five electives from either the Department of Economics or the Rotman School, subject to the condition that at least 7 of their 12 half-courses must be taken from the Department of Economics. Students may choose from a long list of elective courses offered at the graduate level in Economics or the second-year M.B.A. level (or higher) from the Rotman School.

The Faculty of Forestry offers degree programs leading to the Master of Forest Conservation (M.F.C.), the Master of Science in Forestry (M.Sc.F.) and the Doctor of Philosophy (Ph.D.). Pending final approval, a new Master of International Trade in Forest Products (M.I.T.F.P.) is proposed to start in January, 2004. Forestry also participates in collaborative graduate programs in Environmental Studies, Environmental Toxicology, and in Wood Products Engineering. See details below.

The M.F.C., the Faculty’s professional master’s degree, is an intensive 16-month course-oriented program with a strong focus on field and laboratory practical training, Canadian and foreign residential field courses, practical internships and individual and group research. It provides a strong, coherent professional education in forest conservation to students from diverse backgrounds.

The M.Sc.F. and Ph.D. programs are research/thesis-based degrees in areas of specialization relevant to faculty expertise and funding including, but not limited to, biodiversity conservation, sustainable forest management, forest fragmentation, wildlife habitat conservation, community forestry, forest ecological processes, fire management systems, forest soils and tree nutrition, tree physiology and stress, soil conservation, land reclamation, biological pest control, wood science and forest products.

For admission to its degree programs, the Faculty considers candidates from a variety of undergraduate backgrounds including forestry; applied science and engineering; and social, physical, and biological sciences.
Degree of Master of Forest Conservation

Admission Requirements
1 Candidates are admitted under the general regulations of the School of Graduate Studies.
2 Candidates must have an honours or specialist bachelor’s degree with a minimum of mid-B standing in the final two years of the bachelor’s program. The M.F.C. program is intended for students with a strong undergraduate background in ecology, environmental sciences forestry, natural sciences, biology, physical geography, geology, agricultural science, or relevant social sciences. Students from other disciplines will be considered by the Faculty but may be advised to take some appropriate background courses prior to admission.
3 Applicants must submit additional documentation to the department with completed application forms and transcripts, including three references, a letter of interest in the M.F.C. program, and a résumé. Full instructions and forms are available via the Faculty’s Web site.

Program Requirements
The 16-month program (1.5 winter sessions) starts in September and requires full-time intensive involvement throughout. The program comprises a core of ten integrated half-courses, one residential field camp course (FOR 3011H), two elective half-courses, and an internship (FOR 3007H) during the summer semester in which students will work on practical forest conservation projects, either in Canada or abroad.

Information on specific course requirements and program schedules is included in the departmental brochure.

Degree of Master of Science in Forestry

Admission Requirements
1 Candidates are admitted under the general regulations of the School of Graduate Studies.
2 A candidate must have an appropriate four-year bachelor’s degree from an approved university, with a standing of at least a mid-B in the final year of the bachelor’s degree. A minimum of B+ is required for the collaborative programs.
3 Applicants must submit additional documentation to the department with completed application forms and transcripts, including three references, a letter of intent, a résumé, and a “writing sample”. Full instructions and forms are available via the Faculty’s Web site.

Program Requirements
The program is prepared by the candidate in consultation with a supervisory committee and must be approved in sequence by the supervisory committee, the Graduate Committee of the Faculty of Forestry, and the School of Graduate Studies. Under exceptional circumstances, a part-time program may be arranged on application to and approval by the Faculty and the School of Graduate Studies.

The minimal requirements for this degree are:
1 Twelve months of residence including two academic terms.
2 Three half-courses, at least one of which is taken within the Faculty, plus, in the case of students with non-forestry backgrounds, one of FOR 3000H Current Issues in Forest Conservation, FOR 3002H Applied Forest Ecology and Silviculture, FOR 3003H Socioeconomic Influences on Forest Ecosystems, FOR 3004H Forest Management Decision Support Systems, FOR 3009H Global Forest Ecosystem Conservation, or FOR 3010H Sustainable Forest Management and Certification, on the recommendation of the student’s supervisory committee and approval of the Graduate Coordinator.
Depending on the student’s background, additional or alternative course work may be required.
3 Credit in FOR 1000H Research Methods in Forestry and FOR 1001H Graduate Seminar.
4 The preparation of a research thesis of acceptable quality and its oral defence.
5 All requirements for the M.Sc.F. degree must be completed within five years from the date of first enrolment in the program.

Degree of Master of International Trade in Forest Products
Pending final approval, the following new degree program is proposed to start in January, 2004.

Program Objectives
The objectives of the Master of International Trade in Forest Products (M.I.T.F.P.) program are:
to produce highly-qualified and competent graduates who combine knowledge of the forest products industry with a comprehensive understanding of the economic, financial, political, and legal factors which impact on forest policies and international trade. 

2 to produce graduates who are literate and articulate in both the theory and methodology of each of these disciplines and who can provide effective leadership in multidisciplinary teams.

Admission Requirements

1 Candidates are admitted under the general regulations of the School of Graduate Studies.

2 A candidate must have an appropriate four-year bachelor's degree from an approved university, with a standing of at least mid-B in the final two years of the bachelor’s program. The M.I.T.F.P. program is intended for students with a strong undergraduate background in forestry, wood science, economics, management, finance, forest product development, or engineering; however, backgrounds in political science, anthropology, geography, or international studies will be considered. Admission is normally restricted to persons with significant relevant professional work or managerial experience.

3 Applicants must submit additional documentation to the department with completed application forms and transcripts, including three references, a brief, clear statement about their objectives in applying to the program and its relationship to their career objectives, and a resume. Full instructions and forms will be available via the Faculty’s Web site.

Program Requirements

Program objectives will be achieved through lectures, seminars, case study analyses, and debates. These will be organized in 6 short, intensive, residential modules at approximately two-month intervals, delivered over a period of 16 months (normally 4 consecutive sessions). Each module will last one week (with the exception of one eight-day module), with approximately 42 contact hours each. Satisfactory completion of each module is a prerequisite for participation in subsequent modules. Program completion will also involve a major research paper or case study analysis (FOR 3026H) which will be publicly presented in the final module, and subsequently submitted in written form.

Courses of Instruction

FOR 3020H Forest Policy and Management
FOR 3021H Natural Resource Economics
FOR 3023H International Trade
FOR 3024H International Trade Policy and Law
FOR 3025H International Finance
FOR 3026H Case Study in Forest Product Trade

Degree of Doctor of Philosophy

Admission Requirements

1 Admission to a four-year Ph.D. program in the Faculty of Forestry normally requires an appropriate University of Toronto master's degree with at least an A- standing, or equivalent from a recognized university, in a discipline appropriate to the intended field of doctoral study and research.

2 In exceptional circumstances, admission to a Ph.D. program may be approved for an extraordinarily strong applicant with an appropriate four-year University of Toronto bachelor’s degree, or equivalent from a recognized university.

3 Applicants must submit additional documentation to the department with completed application forms and transcripts, including three references, a letter of intent, a résumé, and a "writing sample". Full instructions and forms are available via the Faculty's Web site.

Transfer from M.Sc.F. to Ph.D.

Under certain specific conditions, outstanding registered M.Sc.F. students may be considered by the end of their first year in the M.Sc.F. program for transfer to the Ph.D. program. Further information is available from the Faculty.

Program Requirements

The minimal requirements for the Ph.D. are:

1 Study in one major and at least one minor field. A minimum of four half-courses must be taken in total, including at least one full course in each of the major and the minor areas; a minor outside forestry is strongly recommended. Depending on the student's background, additional or alternative course work may be required.

2 Credit in FOR 1001H Graduate Seminar.

3 A student who is approved for transfer from the M.Sc.F. to the Ph.D. is required to complete, as a minimum, the M.Sc.F. course requirements (including FOR1000H Research Methods and FOR 1001H Graduate Seminar, plus three half-courses) plus one additional half-course. These courses should represent a major and a minor field.
For students with a non-forestry background, credit in one of

FOR 3000H Current Issues in Forest Conservation,

FOR 3002H Applied Forest Ecology and Silviculture,

FOR 3003H Socioeconomic Influences on Forest Ecosystems,

FOR 3004H Forest Management Decision Support Systems,

FOR 3009H Global Forest Ecosystem Conservation,
or

FOR 3010H Sustainable Forest Management and Certification,
on the recommendation of the student's supervisory committee and approval of the Graduate Coordinator.

Successful completion of a comprehensive examination. This will ordinarily be taken after course work is completed and at least one year before submission of the thesis.

The preparation and defense of a thesis that is an original and independent research work adding significantly to the existing body of knowledge.

A full-time commitment is expected for a minimum of the first two years in the forestry program.

Collaborative Programs

Environmental Studies—M.F.C. and M.Sc.F.

Forestry and a number of other graduate divisions, in conjunction with the Institute for Environmental Studies, offer collaborative master's programs in environmental studies.

Upon successful completion of the requirements, the student receives, in addition to the degree, the notation "Completed Collaborative Program in Environmental Studies" on the transcript.

Requirements for this certification include the normal degree requirements outlined above with an extended residence requirement.

Course selections must include IES 1001H Environmental Decision Making and IES 1002H Environmental Management Case Studies.

Thesis research programs will be guided by a supervisor and supervisory committee including at least one member cross-appointed between the Faculty of Forestry and the Institute for Environmental Studies.

For a full description of this program, see the Environmental Studies (Collaborative Program) entry in this calendar.

Toxicology—M.Sc.F. and Ph.D.

Forestry also participates in the Collaborative Graduate Program in Toxicology at the M.Sc.F. and Ph.D. levels.

Upon successful completion of the appropriate degree requirements, the student receives, in addition to the M.Sc.F. or Ph.D. degree in forestry, the notation "Completed Collaborative Program in Toxicology" on the transcript.

At the M.Sc.F. level, students in the collaborative toxicology program must meet the normal M.Sc.F. requirements by taking three graduate half-courses including JNP 1016H Graduate Seminar in Toxicology and either JNP 1017H Molecular and Biochemical Basis of Toxicology or JNP 1018H Current Topics in Molecular and Biochemical Toxicology and at least one half-course in forestry. An ecology course (e.g., JBE 1434H Applied Ecology) may also be required.

At the Ph.D. level, the collaborative toxicology program encompasses the Faculty's Ph.D. requirements described above with the course load to normally include JNP 1016H Graduate Seminar in Toxicology, either JNP 1017H Molecular and Biochemical Basis of Toxicology or JNP 1018H Current Topics in Molecular and Biochemical Toxicology, an ecology course (e.g., JBE 1434H Applied Ecology), and at least one graduate half-course in forestry.

The thesis topic, at both the M.Sc.F. and Ph.D. levels, must be in the toxicology area.

See the Toxicology entry in this calendar.

Wood Products Engineering—M.Sc.F./M.A.Sc.

Forestry, Chemical Engineering and Applied Chemistry, and Mechanical and Industrial Engineering collaborate to offer a master's program in Wood Products Engineering. For more details, consult the separate entry under Wood Products Engineering in this calendar.

Courses of Instruction

The Faculty of Forestry offers the following courses. Courses in the 3000 number series are expected to be offered each year; 1000-level courses may be withdrawn in any particular year, depending on student interest/need and departmental resources. Students should consult the departmental brochure each term to confirm availability.

A maximum of one directed studies course taken with a student's supervisor can be credited toward meeting departmental degree program requirements.

Courses which may continue over a program. The course is graded when completed.

All applicants must arrange for two supporting letters to be sent to the Department; admission to all programs for post-graduate degrees will be based upon the evidence of these supporting letters as well as upon the candidate’s academic record.

All incoming students will meet with the Associate Chair or the Graduate Secretary to discuss the program and to decide on their course of study before beginning classes.
Degree of Master of Arts

Admission Requirements
Candidates are accepted under the general regulations. They must also meet the following requirements.
1. B+ average standing or better, with at least B+ in French.
2. Competence in French.
3. Concentration in French literature and/or linguistics—a minimum of seven full courses, or equivalent, in French. A minimum of five of the seven full courses, or equivalent, should cover at least two different areas in the intended field of study (i.e., literature or linguistics).
4. A B+ average does not automatically lead to admission. Each dossier is studied by the Admissions Committee which takes into account all relevant factors.

Program Requirements
The M.A. program is both a self-contained program and the first stage towards doctoral studies. It has two objectives: to allow the student to develop a thorough knowledge of the discipline through a program of course work in literary studies or linguistics; to develop an aptitude for research. It is a twelve-month program. At the beginning of his/her course of study the student will meet with either the Associate Chair or Graduate Secretary in order to determine course selection with a view to ensuring that the student has a well-rounded program and, taken in conjunction with the undergraduate degree, has a broad knowledge of the discipline.

1. Courses
a. The graduate seminar in literature (FRE 1200Y) or the graduate seminars in linguistics (FRE 1103H and FRE 1104H) are required.
   Part-time students will normally take these courses in the first year of their programs.
b. Six half-courses, or equivalent, from the regular graduate offerings or four half-courses, or equivalent, and an Research Essay FRE 5000Y, a 75 page mémoire (the normal program for the student who intends to proceed to the doctorate). Up to one full course may be taken outside the Department.
2. Prerequisite work, if necessary.
3. Students must maintain a B average in order to be recommended for the degree, and must obtain a minimum of mid-B in the Research essay. Students must also obtain a minimum of mid-B for the graduate seminar in literature or the graduate seminars in linguistics (FRE 1103H and FRE 1104H).

Degree of Doctor of Philosophy

Admission Requirements
1. Applicants approved by the Department are admitted as candidates for this degree under the general regulations of the School of Graduate Studies.
2. Admission to the Ph.D. program requires either:
   a. a four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, that includes at least seven full-course equivalents in French language and literature/linguistics, with an average grade of at least an A- in the overall program, or
   b. a University of Toronto master's degree in French literature or linguistics, or its equivalent from a recognized university, with an average grade of at least an A- in the applicant's overall program.
3. All applicants must submit to the Department a formal application and a sample of written work completed as part of their bachelor’s or master’s program in French literature or linguistics as appropriate. This written work should be a copy of the M.A. thesis if available. Applicants holding a master’s degree must submit to the Department a typewritten statement of purpose (maximum 500 words) which clearly outlines the area in which the applicant intends to pursue research in French literature or linguistics. Applicants must satisfy the Department that they are capable of independent research in French literature or linguistics at an advanced level.
4. An A- average does not automatically lead to admission. Each dossier is studied by the Admissions Committee, which takes into account all relevant factors. Admission to the Ph.D. on the basis of a four-year bachelor's degree is limited to exceptionally qualified candidates.

Program Requirements
A Ph.D. candidate shall pursue a program of study and research in French Literature/Linguistics approved by the Department. The minimum requirements for the degree are as follows:
1. Course work. A candidate admitted on the basis of a four-year bachelor's degree is required to complete four full-course equivalents during the first year of the program and three additional full-course equivalents during the second year of the program. With the permission of the Department, the candidate may take up to one full-course equivalent in the first year of the program, and one half-course in the second year, outside the Department. Students in literature will take FRE 1200Y, unless this
course or its equivalent has already been completed, and FRE 1201H as part of their program; students in linguistics will take FRE 1103H, FRE 1104H, and FRE 1201H as part of their program. To remain in good academic standing and to continue in the Ph.D. program, a candidate must complete four full-course equivalents, with an average grade of at least an A-, by the end of the first year of the program, and compete the remaining three full-course equivalents, maintaining an average of at least an A-, by the end of the second year.

A candidate admitted on the basis of a master’s degree is required to complete three full-course equivalents during the first year of the program. With the permission of the Department, the candidate may take one half-course outside the Department. Students in literature will take FRE 1200Y, unless already completed, and FRE 1201H as part of their program; students in linguistics will take FRE 1103H and FRE 1104H, unless already completed, and FRE 1201H as part of their program. To remain in good academic standing and to continue in the Ph.D. program, a candidate must complete three full-course equivalents, with an average grade of at least an A-, by the end of the first year of the program.

2 Thesis topics. By January 31 of the first year of residence, in the case of a student admitted to the Ph.D. program on the basis of a master’s degree, otherwise by January 31 of the second year of registration, a candidate must register a thesis topic with the Department. The proposal must be signed by the faculty member who has agreed to direct the thesis and by the two faculty members who will serve on the student’s supervisory committee.

3 Language requirements. By the end of the first year of the Ph.D. program, in the case of a student admitted on the basis of a master’s degree, otherwise by the end of the second year of the Ph.D. program, the student must demonstrate a reading knowledge of Old French or of another language (excluding French or English), as approved by the Department.

4 Field examination. During the first session of the second year of registration in the Ph.D. program, in the case of a candidate admitted on the basis of a master’s degree, otherwise during the first session of the third year of registration, a candidate must pass the two parts of the field examination:

- a written examination (to be taken by October 1) designed to test the student’s knowledge of the general area in which his or her research is located—the questions for the examination are given to the student a week in advance of the examination; and
- an oral examination (to be taken by December 15) based on a written thesis proposal of 15 to 20 pages, plus bibliography, designed to test the student’s readiness to proceed with research for the thesis.

5 Between the completion of the field examination components and the oral examination on the thesis, the student will meet with the supervisory committee at least once a year, and more frequently if required.

6 Thesis and oral examination on the thesis.

**Collaborative Programs**

The Department of French participates in the following collaborative programs:

1 Book History and Print Culture
2 Semiotics
3 Women’s Studies

Each of these programs has its own entry in this calendar and interested students should refer to these entries.

**Courses of Instruction**

All courses meet once a week for two hours. Courses begin in the same week as do undergraduate classes.

**Linguistics Courses**

- FRE 1101H Psycholinguistique/ P. Bhatt
- FRE 1103H Séminaire de linguistique I: phonologie et morphologie/ E. Nikiema
- FRE 1104H Séminaire de linguistique II: syntaxe et sémantique/ A. M. Brousseau
- FRE 1108H Théorie linguistique et acquisition du français langue seconde/ J. Steele
- FRE 1109H Problèmes de transitivité en français moderne/ Y. Roberge
- FRE 1124H Syntaxe de l’ergativité: le français dans tous les Cas/ J. Ndayiradjie

**Linguistic and Literature Courses**

- FRE 1164H Medieval French Language and Literature/ B. Merrilees
- FRE 1201H Méthodes de recherche (Credit/No Credit)/ Y. Portebois
- JRL 1100Y Introduction to Romance Philology/ Staff

**Literature Courses**

- FRE 1200Y Séminaire de littérature/ J. Paterson
- FRE 1300H Chrétien de Troyes/ F. Collins
FRE 1800H Pratique théâtrale et littérature dramatique au 18e siècle/
D. Trott
FRE 1801H Epistémologie et esthétique/
L. Kerslake
FRE 1904H L’édition critique: principes et pratiques/D. Speirs
FRE 1927H Problématiques balzaciennes: Scènes de la vie de province/
A. Oliver
FRE 1928H Zola et le naturalisme/C. Elkabas
FRE 2001H Fragment et fragmentation au XXe siècle/P. Michelucci
FRE 2010H Proust: qu’est-ce que l’écriture/A. Cozea
FRE 2036H Configurations du genre sexuel dans la prose contemporaine des femmes/B. Havercroft
FRE 2105H Récits autobiographiques/J. LeBlanc
FRE 2107H Le récit fantastique québécois: formes et transformations/M. Lord
FRE 3000H Du dialogue au dialogique/A. Motsch
COL 5014H A Hermeneutical Approach to Contemporary Texts/B. Fitch
JFC 1000H The Anthropomorphic Imagination/M. Bad

Other Courses
FRE 4000H,Y Reading Course/Staff

The Department of Geography offers facilities for research in geomorphology, climatology, hydrology, biogeography, pedology, environmental assessment and sustainable natural resource management, international development, industrial innovation, urban and economic geography, cultural and historical geography, gender studies, social geography, regional analysis, the history and philosophy of geography, remote sensing, computer cartography, spatial statistics, topics in land/geographic information systems, and quantitative analysis. The territories of special concern are Canada, the United States, Latin America, Brazil and the Caribbean, Northwestern and Central Europe, East Asia, South Asia, and the former Soviet Union.
Candidates are accepted under the provisions of the general regulations for study at the M.A., M.Sc., and Ph.D. levels. Candidates whose primary language is not English and who have graduated from a university where the language of instruction and examination was not English must have a TOEFL score of at least 580 and a TWE score of 5 or higher. For the computer-based TOEFL test, the minimum required total score is 237 with an Essay Rating score of 5.

Degree of Master of Arts/Master of Science

Admission and Program Requirements

Normally the Department requires a minimum B+ standing in the final two years of an appropriate four-year University of Toronto bachelor’s degree, or its equivalent from a recognized university, for admission to the M.A. and M.Sc. programs. Candidates are expected to have completed at least eight half-courses in geography or a related field. Candidates lacking the minimum requirements should consider doing qualifying work at the undergraduate level prior to application. Such work should be undertaken in consultation with the graduate coordinator. Candidates who hold an appropriate bachelor’s degree but are changing disciplines or require further preparatory work, may be required to complete an additional year of graduate-level course work.

Two geography programs and various collaborative programs are available; selection is made with the approval of the Department. Within most of these programs, students can be awarded a Master of Science degree if their research contains a substantial physical science component and if two-thirds of their course work comprise Geography courses accepted by the Department as physical science courses. Programs are usually completed in a 12-month period, excepting the Collaborative Environmental Studies research paper program and Collaborative International Relations program.

Program I—Thesis

Candidates will undertake research leading to the preparation of a thesis, in conjunction with the preparation of a research paper. Candidates are expected to have graduated from a university where the language of instruction and examination was not English and must have a TOEFL score of at least 580 and a TWE score of 5 or higher. For the computer-based TOEFL test, the minimum required total score is 237 with an Essay Rating score of 5.

Program II—Research Paper

Candidates will take the equivalent of three full graduate courses and pursue a research project, normally during the summer, leading to the preparation of a research paper (GGR 1100Y).

Collaborative Programs

Environmental Studies Research Paper (Collaborative M.A./M.Sc. Program)

Candidates will take the equivalent of seven graduate half-courses. Three of these courses must be taken in the Department of Geography (including GGR 1400H), one in a related discipline, and three at the Institute for Environmental Studies (two must be Institute core courses). This program is completed in 17 months. Candidates are also required to undergo a three-month internship and to prepare and defend a research paper (GGR 1100Y). See the Environmental Studies (Collaborative Program) entry in this calendar.

Environmental Studies Thesis (Collaborative M.A./M.Sc. Program)

Candidates will take the equivalent of four graduate half-courses. Two of these courses must be taken in the Department of Geography and two at the Institute for Environmental Studies. Candidates are also required to prepare and defend a thesis.

Other

The Department of Geography also participates in the following collaborative programs. Please consult the separate entries in this calendar for details.

Asia-Pacific Studies

Environment and Health (see Environmental Studies entry)

Ethnic and Pluralism Studies

International Relations

Toxicology

Women's Studies

Surveying Science

See courses listed below under Geographical Information Analysis.

Degree of Master of Science in Planning

Students interested in the M.Sc.Pl. program should consult the Planning entry in this calendar.

Degree of Master of Spatial Analysis

The Master of Spatial Analysis (M.S.A.) degree program is offered jointly by the Department of Geography at the University of Toronto and the
School of Applied Geography and the Centre for the Study of Commercial Activity at Ryerson Polytechnic University. The minimum requirement for admission is a B average in a four-year undergraduate degree or its equivalent. In addition, applicants must have achieved a minimum B+ average in their last four semesters of undergraduate study. Also applicants should have at least either a one-semester credit in GIS or a one-semester credit in applied statistics or quantitative methods, in their undergraduate program.

The study program emphasizes knowledge of GIS, spatial statistics, and inferential modeling. The program requires that the student complete seven half-courses (five core and two electives), a practicum (for full-time students only), and a research paper. The five core courses are common to all students; the elective courses are chosen from the two streams: physical/landscape and business/commercial. The research paper must be presented and defended in an oral examination before a committee of faculty members. This is a 12-month full-time program or 24-month part-time program.

**Degree of Doctor of Philosophy**

**Admission Requirements**

Normally the Department requires a minimum A-standing at the master’s level for admission to the Ph.D. program. In exceptional cases and at the discretion of the Department, admission to the Ph.D. program may be approved for applicants with an overall A average and appropriate University of Toronto bachelor’s degree, or its equivalent from a recognized university. Such students must complete three half-courses in addition to the doctoral course work requirements. Candidates who hold an appropriate master’s degree but are changing disciplines or require further preparatory work, may be required to complete an additional year of graduate-level course work.

The Ph.D. is primarily a research degree. A program of study is designed for each student to ensure competence in a field of research and to facilitate the preparation of a dissertation. Unless otherwise specified, two years of residence are required during which the student is required to be on campus full-time and consequently in such geographical proximity as to be able to participate fully in the University activities associated with the program. Residence provides the student with an opportunity to become immersed in the intellectual environment of the University.

Program candidates must:

1. complete at least the equivalent of four half-courses and, depending on the field of specialization, up to two additional half-courses. At least one half-course must be, and up to three half-courses may be, taken in other departments;
2. submit a research statement concerning the proposed Ph.D. topic and the scope of the Ph.D. examination by the end of April in Year I;
3. pass a Ph.D. examination in the general field in which research is being undertaken by the end of Year I;
4. upon the recommendation of their committee, be required to acquire a knowledge of a foreign language necessary for their research;
5. submit a research proposal that is acceptable to their research committee by the end of the first session in Year II;

Ph.D. degree program requirements are fully described in the Graduate Geography Handbook, which all students receive on registration, and the department’s Web site www.geog.utoronto.ca/programs/geog/grad.

**Credit for M.A./M.Sc. Courses**

In exceptional cases, at the discretion of the Department, graduate courses completed at the master’s level at the University of Toronto may be counted towards meeting some course requirements. However, all doctoral students must take a minimum of two full courses with the Department after entering the Ph.D. program.

**Courses of Instruction**

The following graduate courses will be available on demand and subject to faculty resources. Not all courses are given every year, and some members of the graduate faculty are on research leave. Please consult the departmental graduate office. The 2000-level courses are normally open to Ph.D. students only.

- GGR 1011Y Special course for Ph.D. candidates in other departments offering Geography as a minor
- GGR 1100Y Research Paper (Credit/No Credit)/Staff
- GGR 1101H History of Geographic Thought/ J. H. Galloway
- GGR 1102H Contemporary Issues in Geographic Thought/Staff
- GGR 1149H Readings in Selected Topics/Staff
- GGR 2149H Readings in Selected Topics/Staff

Courses which may continue over a program. The course is graded when completed.
**Physical Geography**

- **GGR 1201H** Hillslope Geomorphology/ R. B. Bryan
- **GGR 1202H** Sedimentation and Fluvial Geomorphology/ R. J. Desloges
- **GGR 1203H** Coastal Hydrodynamics, Sediment Mechanics and Morphodynamics/ B. Greenwood
- **GGR 1204H** Soil Erosion Research/ R. B. Bryan
- **GGR 1205H** Theoretical Geomorphology/ B. Greenwood
- **GGR 1206H** Sedimentary Models/ B. Greenwood
- **GGR 1208H** Experimental Methods in Erosion Research/ R. Bryan
- **GGR 1212H** Fate of Contaminants in Land and Water/ M. Diamond
- **GGR 1302H** Advanced Hydrology and Water Quality/ A. Brantfereun
- **GGR 1304H** Landscape Biogeography/ V. B. Robinson
- **GGR 1305H** Biogeography/ A. M. Davis
- **GGR 1306H** Measurement and Modelling of Surface Environments/ D. S. Munro
- **GGR 1307H** Cultural Biogeography/ A. M. Davis
- **GGR 1308H** Process Hydrology/ A. G. Price
- **GGR 1310H** Climate Modelling/ L. D. D. Harvey
- **GGR 1311H** Atmosphere-Ocean Modelling/ W. A. Gough, L. D. D. Harvey
- **GGR 1314H** Topics in Physical Oceanography/ W. A. Gough

**Environmental and Resource Geography**

Incoming students in Environmental and Resource Geography must take GGR 1400H.

- **GGR 1400H** Current Research Approaches in Environmental Geography/ Staff
- **JPG 1402H** Environment and Development/ A. Boland
- **JPG 1404H** Issues in Global Warming/ L. D. D. Harvey
- **GGR 1412H** Strategies for Sustainable Development/ Staff
- **JPG 1413H** Workshop in Environmental Impact Assessment/ Staff
- **JPG 1415H** Environmental Justice/ R. Jaakson
- **JFG 1417H** Dryland Environmental Management/ R. B. Bryan
- **JPG 1418H** Rural Land Use Planning/ M. Bunce
- **JPG 1419H** Aboriginal/Canadian Relations in Environmental and Resource Management/ D. McGregor
- **JGE 1420H** Urban Waste Management: an International Perspective/ V. W. Maclaren
- **GGR 1421H** Medical Geography/ Staff
- **JPG 1421H** Health in Urban Environments/ S. Wakefield
- **JGE 1430H** Political Economy of Forest Conservation/ Staff
- **JPG 1508H** Planning for the Urban Poor in Developing Countries/ A. G. Daniere

**Urban, Economic, and Social Geography**

Incoming students must take GGR 1500H.

- **GGR 1500H** Core Course in Urban, Economic, and Social Geography/ Staff
- **JPG 1501H** The Political Economy of Cities/ J. Hackworth
- **GGR 1504H** Health, Place and Difference/ K. Wilson
- **JPG 1506H** State/Space/Difference: Understanding the New Social Geography of the State/ S. Ruddick
- **JPG 1507H** Housing and Housing Policy/ L. S. Bourne
- **JPG 1509H** Gender, Place and the Politics of Development/ K. N. Rankin
- **JPG 1510H** Recent Debates on Urban Form/ A. Sorensen
- **GGR 1602H** Industry: Location, Behaviour, Policy/ J. N. H. Britton
- **JPG 1614H** Regional Development and Policy/ M. S. Gertler
- **JPG 1615H** Planning and Financing the Social Economy/ K. N. Rankin
- **GGR 1651H** Population Analysis: Research Seminar/ J. Miron
- **JPG 1670H** Regional Economic Analysis/ R. J. DiFrancesco
- **GGR 1680H** Geography of Tourist/ R. Jaakson
- **GGR 1801H** Social Identities and Space/ Staff
- **JPG 1804H** Space, Power and Geography: Understanding Spatiality/ S. Ruddick
- **JPG 1810H** Globalization and Postmodernism/ K. Goonewardena

**Cultural and Historical Geography**

Incoming students in Cultural and Historical Geography are urged to take GGR 1700H.

- **GGR 1700H** Seminar in Cultural-Historical Geography/ J. H. Galloway
GGR 1701H Historical Geography of North America/ T. F. McIlwraith
JPG 1702H Historical Urban Geography and Planning/ R. D. Lewis
GGR 1704Y Latin America/ J. H. Galloway
JPG 1710H Historic Preservation Planning/ Staff
GGR 1712H Historical Geography of Ethnic Groups in Canada/ D. A. McQuillan
JPG 1713H Place, Design, and Landscape/ E. C. Relph
GGR 1714H Cultural and Critical Geographies/ E. Gilbert

Geographical Information Analysis
GGR 1901H Introductory Analytical Methods/ Staff
GGR 1903H Multivariate Statistical Methods in Geography/ Staff
GGR 1904H Accuracy of Spatial Databases/ F. Csillag
GGR 1907H Advanced Geographic Information Systems/ D. Boyes
JPG 1909H Social Survey Methods/ Staff
GGR 1911H Remote Sensing/ J. Chen
GGR 1913H Computer Cartography/ Staff
JPG 1914H Spatial Information Systems/ J. Chen, D. Boyes
GGR 1921H Land/Geographic Information Systems/ V. Robinson
GGR 1922H Intelligent Land Database Systems/ V. Robinson

Master of Spatial Analysis
MSA 9010H Accuracy of Spatial Databases/ F. Csillag
MSA 9020H Geographic Spatial Database Management and Spatial Technologies/ Staff
MSA 9030H Analytical Methods and Spatial Data/ Staff
MSA 9040H GIS Project Management Applications/ D. Boyes, Staff
MSA 9050H Computer Cartography/ C. Amrhein, Staff
MSA 9110H Geodemographics/ Staff
MSA 9120H Spatial Technologies in Strategic Planning/ Staff
MSA 9210H Measurements and Modelling of Surface Environments/ S. Munro
MSA 9220H Remote Sensing/ J. Chen
MSA 1100Y Research Paper (Credit/No Credit)
MSA 4444H Practicum (for full-time students only)
MAS 9230H Land/Geographic Information Systems/ V. Robinson

The Department of Geology accepts candidates for advanced degrees in a broad range of topics in the Earth Sciences. Candidates may also undertake studies in interdisciplinary areas by arrangement with other departments such as Physics, Chemistry, Materials Science and Engineering, Civil Engineering, Zoology, Botany, and the Institute for Environmental Studies.

In recent years research by staff and graduate students has been carried out in all parts of North America and other parts of the world, both on land and at sea. In addition to field-based studies, the Department has a wide range of modern laboratories, and advanced studies are encouraged in a broad spectrum of geological problems. Further details of research emphases, facilities, detailed degree requirements, and graduate courses are contained in a brochure entitled Graduate Studies in Geology that may be obtained from the Department.

Candidates are accepted under the general regulations. The Department has no formal foreign language requirements. Candidates proceeding by thesis to any degree are expected to become familiar with the literature of their subjects, in whatever language it is written.

Degree of Master of Science
Candidates are required to complete five full courses that (a) include a supervised research component equivalent to two or three courses or (b) consist of lecture course work only. Doctoral stream candidates should normally choose option (a). To encourage breadth of study, the Department will permit students to substitute up to 50% of the program requirement of five full graduate courses with equivalent non-geology courses. Candidates may proceed on a part-time basis.

Pending final approvals, a Collaborative M.Sc. Program in Geology and Physics will be introduced in September 2003. Visit the Department’s Web site for current information.

Degree of Master of Applied Science
Candidates are normally required to complete two specialized graduate courses and the graduate seminar course in addition to the main requirement for the degree which is the preparation of a research thesis. Minimum full-time residence is one academic session.

Environmental Studies (Collaborative Program)
Geology and a number of other graduate units, in conjunction with the Institute for Environmental-
Degree of Doctor of Philosophy
The principal work for the Ph.D. degree is the preparation of a research thesis constituting a significant contribution to the knowledge of the earth. The study includes minima of one full graduate course equivalent in the major subject and one graduate half-course in the minor field.

Students are normally expected to complete the M.Sc. degree before proceeding to the Ph.D. but exceptions may be made when the student has the appropriate research experience. Normal departmental rules for the completion of the Ph.D. apply (see departmental brochure).

E-mail: german@chass.utoronto.ca
Web: www.chass.utoronto.ca/german

Candidates are accepted under the general regulations provided that they also satisfy the Department's requirements stated below.

An applicant from another university should arrange for three supporting letters to be sent to the Coordinator of Graduate Studies of the Department, preferably on forms available from the Department. Admission to all programs for higher degrees will be based upon the candidate's academic record and upon the evidence of the supporting letters.

The selection of courses for the degrees of Master of Arts and Doctor of Philosophy should be made in consultation with the Coordinator of Graduate Studies of the Department of Germanic Languages and Literatures and must in every case be approved by the Department. All students in their first year of graduate study at the University of Toronto are required to take COL 1000H Faculty Seminar: Theories of Literature and Criticism.

**Degree of Master of Arts**

Candidates for a one-year M.A. program must have completed the four-year B.A. of this University with major or specialist standing in German (a minimum of seven courses past O.A.C., at least four of which are at the senior level) with no less than a B+ average, or give evidence of similar qualifications.

Candidates are required:
1. to complete the equivalent of 3.5 full courses, including COL 1000H Faculty Seminar: Theories of Literature and Criticism;
2. to pass a German language competence test.

Details of these requirements are found in the departmental handbook.

**Degree of Doctor of Philosophy**

Admission to the Ph.D. program requires either (a) a four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, that includes at least six full courses (twelve half-courses) in German language, literature, and culture, with an average grade of at least a B+ in the applicant's overall program and of at least an A- in the applicant's German courses, or (b) a University of Toronto master's degree in German, or its equivalent from a recognized university, with an average grade of at least an A- in the applicant's overall program. Applicants must satisfy the Department that they are capable of independent research in German at an advanced level.

A candidate admitted on the basis of a four-year bachelor's degree must take a minimum of seven full courses including COL 1000H with an average grade of at least an A-. The Department may recommend to the School the termination of the registration and candidacy of a student who fails to complete at least 3.5 full-course equivalents, with an average of at least an A-, during the first year of the program. The candidate is required to complete the remaining courses required for the degree, with an A-average by the end of the second year.

A candidate admitted on the basis of a master’s degree must take a minimum of four full courses including COL 1000H with an average grade of at least an A-. The candidate is required to complete at least 3.5 full-course equivalents by the end of the first year of registration and any remaining courses required for the degree by the end of the second year.

In addition students are required to:
1. give evidence of reading knowledge of French, or, in exceptional circumstances, of another language approved by the Department;
2. pass a general examination in German literature;
3 pass a thesis field review;
4 make an oral presentation of their thesis;
5 submit a thesis on an approved subject and to pass an oral examination on this subject.

The selection of courses may include 1.5 full courses in a department other than Germanic Languages and Literatures.

The Department may permit a candidate to write the doctoral thesis in German when the candidate's advisory committee so recommends and when the candidate has satisfied the School’s conditions (see Degree Regulations, Doctor of Philosophy, Thesis).

Courses of Instruction
Not all courses are offered every year. The Department should be consulted each session as to actual course offerings.

Application
A complete description of all programs, degree requirements, courses, faculty research interests, and policies is available on the Web site www.utoronto.ca/hpme. Application forms and other required forms are also available on this site.

Students are admitted under the general regulations of the School of Graduate Studies. Please note the application deadlines.

November 15
M.Sc. in Clinical Epidemiology and Health Care Research

February 1
M.H.Sc. in Health Administration
M.H.Sc. in Health Administration/M.S.W. joint degree program
M.Sc. in Health Administration
Ph.D.

Degree of Master of Health Science
The M.H.Sc. degree program is for health managers and professionals who wish to acquire a professional graduate education in health administration. The program is offered in a modular format that concentrates class time into Wednesday evening and all day Thursday, Friday, and Saturday, five times per session. The program consists of five consecutive sessions starting in September of each year.

Admission Requirements
1. Applicants normally require a B+ average or higher in each of the last two years of an appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university.
2. Candidates are strongly advised to have some prior preparation in quantitative courses such as statistics, accounting, and economics.
3. Relevant work and/or field experience is preferred.

Program Requirements
1. Completion of 10 full-course equivalents of which 8.5 are required subjects and which includes a minimum of 1 full-course equivalent in a field placement.
2. Degree requirements are normally completed within two years.
Courses of Instruction

All courses are offered in modular format unless marked otherwise.

Required

HAD 5010H Canada's Health System and Health Policy: Part I/A. P. M. Williams, R. Deber
HAD 5020H Canada's Health System and Health Policy: Part II/R. Deber, A. P. M. Williams
HAD 5030H Methods and Cases in Health Policy/A. Brown
HAD 5711H Strategic Management for Health Service Organizations/W. Berta
HAD 5713H Introduction to Health Information Systems/J. M. Barnsley
HAD 5721H Strategic Management of Quality and Organizational Behaviour in Health Services Organizations/ G. R. Baker
HAD 5723H Health Services Accounting/Staff
HAD 5724H Quantitative Methods for Health Services Management and Policy/R. Cockerill
HAD 5725H Health Economics/C. Dewa
HAD 5731H Advanced Cases in Health Management/G. R. Baker
HAD 5733H Health Services Finance/Staff
HAD 5741H Health Law/S. Grauer, M. Thomson

Degree of Master of Science

The Department of Health Policy, Management and Evaluation offers two programs leading to the Master of Science:

1 Clinical Epidemiology and Health Care Research
2 Health Administration

Clinical Epidemiology and Health Care Research

The M.Sc. degree program in Clinical Epidemiology and Health Care Research is undertaken by health professionals interested in research and academic careers in health care.

Admission Requirements

Applicants normally require a B+ average or higher in the last two years of a four-year undergraduate degree in a health profession (e.g., M.D., B.Sc.N., B.Sc.O.T., B.Sc.P.T., D.D.M., M.Sc.N.) from a recognized university.

Program Requirements

1 Completion of all degree requirements within five years.
2 The writing of a thesis under the supervision of a thesis committee (supervisor and at least one additional faculty member) and its defence before an examination committee appointed by the Graduate Department of Health Policy, Management and Evaluation.
3 The completion of six half-courses; three required (CHL 5201H, HAD 5301H or equivalent, and one of HAD 5303H, HAD 5304H, HAD 5306H or HAD 5309H) and three optional.

Courses of Instruction

CHL 5201H Introduction to Biostatistics for Students in the Biological Sciences I/Staff
HAD 5301H Introduction to Clinical Epidemiology and Health Care Research/D. Urbach, J. Ringash
HAD 5302H Measurement in Clinical Research/A. Davis, D. Beaton, N. Young
HAD 5303H Controlled Clinical Trials/H. Steinhart
HAD 5304H Clinical Decision Making and Cost Effectiveness/A. S. Detsky, M. Krahn, G. Naglie
HAD 5305H Evidence-Based Guidelines/D. Feig, V. Palda
HAD 5306H Introduction to Health Care Research Methodology/P. Dick
HAD 5308H Systematic Review of Randomized Controlled Trials/Staff
Health Administration
This M.Sc. degree program is undertaken by students interested in research and academic careers in health care research.

Admission Requirements
Applicants normally require an overall B+ average in the last two years of an appropriate four-year University of Toronto bachelor’s degree, or its equivalent from a recognized university.

Program Requirements
1. Completion of all degree requirements within five years.
2. The writing of a thesis under the supervision of a thesis committee (supervisor and at least one additional faculty member) and its defence before an examination committee appointed by the Graduate Department of Health Policy, Management and Evaluation.
3. The completion of six half-courses; two of which must be research methodology courses and two of which must be in an area of specialization.

Degree of Doctor of Philosophy
The Ph.D. degree program is undertaken by students interested in research and academic careers in health care research. Current research areas include outcomes and evaluation, health policy, health services organization and management, eHealth and information management, and clinical epidemiology and health care research.

Admission Requirements
Candidates applying to the Ph.D. program are normally expected to have completed a M.A. or M.Sc. (with a thesis) and to provide satisfactory references pertaining to their academic and research abilities. Upon the recommendation of the appropriate Health Policy, Management and Evaluation committee, outstanding students with a non-thesis master’s degree may be admitted to the Ph.D. program if they have appropriate background preparation and research experience or publications which can be considered equivalent to a master’s thesis.

Students with a non-thesis master’s degree and little or no research experience may be admitted to the M.Sc. program and may petition to transfer into the Ph.D. program within 24 months of their first registration. Transfer is contingent upon successful completion of master’s course work and preparation and defence of a Ph.D. thesis proposal.

Program Requirements

Full Time
1. Full time registration (fall, spring, summer sessions) for the first four years of the doctoral program.
2. Completion of all degree requirements within six years from first registration in the program. Thereafter, candidates may apply for a maximum of two one-year extensions.
3. The completion of a comprehensive course in the area of specialization.
4. The completion of 10 half-courses.
5. The writing of a Ph.D. thesis under the supervision of an approved thesis committee (supervisor plus two additional faculty members).
6. The oral defence of the thesis before an examination committee appointed by the School of Graduate Studies.

Flexible Time
With the approval of the graduate chair, some applicants may be admitted to a flexible-time Ph.D. program. This program will benefit mature students with career and/or familial obligations. The degree requirements for the flexible-time Ph.D. program are identical to those listed above for the full time Ph.D. program; however, students have up to eight years to complete the program. Students are required to register full time for the first four years of their program; thereafter, they may register part time.

Courses of Instruction
HAD 5011H Canada’s Health Care System (Doctoral Stream)/A. P. M. Williams
HAD 5311H Comprehensive/Synthesis—Clinical Epidemiology and Health Care Research (Credit/No Credit)/G. Hawker

Courses which may continue over a program. The course is graded when completed.
HAD 5726H Design and Evaluation in eHealth Innovation and Information/ K. Leonard
HAD 5727H Knowledge Transfer and Exchange/P. Goering
HAD 5730H Research Economics I/P. C. Coyte, A. Laporte, W. Ungar
HAD 5760H Advanced Health Economics and Policy Analysis/P. C. Coyte, A. Laporte
HAD 5762H Seminar Series (Credit/No Credit)
HAD 5763H Health Care Performance Measurement/Staff
HAD 5768H International Perspectives on Health Services Management/ D. Zakus
HAD 5771H Resource Allocation Ethics/ D. Martin
HAD 5772H Intermediate Statistics for Health Services Researchers/W. Berta
HAD 5773H Introduction to Theories of Organizational Behaviour and Applications to the Health Care Sector/L. Lemieux-Charles
HAD 6760Y Introduction to Health Services Research Theory and Methods/ J. Barnsley
HAD 6761H Health Services Outcomes and Evaluation Comprehensive Course/J. Barnsley
HAD 6762H Health Services Organization and Management Comprehensive Course/L. Lemieux-Charles
HAD 6763H Health Policy Comprehensive Course/A. P. M. Williams, R. Deber

M.H.Sc. Health Administration/M.S.W. Joint Degree Program
The M.H.Sc. Health Administration/M.S.W. Joint Degree Program allows students with a strong interest in both social work and health/social sciences management the opportunity to engage in an integrated program of study leading to the concurrent receipt of the M.H.Sc. and M.S.W. degrees.

There are two full-time streams of study: a three-year program for students admitted with a four-year undergraduate degree and a two-year program for students with a Bachelor in Social Work.

Candidates for the M.H.Sc. Health Administration/M.S.W. Joint Degree Program must apply to, and be admitted to both faculties; therefore, candidates must meet the requirements for admission to both. Note however, that the deadline for receipt of applications to the M.H.Sc. program is February 1 and the deadline for the M.S.W. Program is December 1.

Further details can be obtained from our Web site at www.utoronto.ca/hpme/

Cross-listed Courses
These courses are limited to certain program students in Health Policy, Management and Evaluation. Please check the Web site www.utoronto.ca/hpme/

LAW465H Conflicts of Interest in Medicine: Evidence, Public Policy, and the Law/S. Choudhry
LAW404H Health System Law and Policy/C. Flood

*Courses which may continue over a program. The course is graded when completed.

Admission
In addition to the School of Graduate Studies application form, applicants must submit an information form, three letters of recommendation, and a statement of interest. A short writing sample or course paper is welcomed. Complete application packages may be downloaded from the History Department’s Web site. The closing date for applications to the M.A. and Ph.D. programs is January 15. Later applications will be considered only in exceptional circumstances.

Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction was not English must demonstrate facility in the English language through the successful completion of the Test of English as a Foreign Language (TOEFL). Applicants taking the paper-based TOEFL exam must achieve a minimum score of 600 and 5.0 on the TWE. Applicants taking the computer-based TOEFL exam must achieve a minimum score of 250 and 5 on the essay rating component.

Degree Programs
The Department offers both the M.A. and Ph.D. degrees in history.

Candidates from other universities will have their academic records equated as far as is practicable with the required standards set out below.

Degree of Master of Arts
For admission to the M.A., students must hold a four-year B.A. degree from this university or a similar program elsewhere, must have attained at least a B+ standing, and must have successfully completed at least six full courses in history. Candidates without adequate history training may be required to complete an appropriate number of undergraduate history courses before being considered for admission. In rare cases, a candidate may be admitted to the M.A. program but will be required to do one or two additional courses.

Students usually complete the M.A. by course work and the HIS 2000Y paper. Some students may elect to complete the M.A. by course work and thesis. All M.A. candidates are required to take HIS 1997H The Practice of History. Those electing the thesis option will take the equivalent of three additional half-courses and present an M.A. thesis. Those selecting the course option will take the equivalent of four additional half-courses and the M.A. essay. Up to one full-course equivalent may be taken outside the History Department with the approval of the Coordinator of Graduate Studies.

M.A. candidates must achieve at least an overall B average in their courses to maintain standing. They must also pass the required reading examination in a language other than English.

Full-time M.A. students in the course option are expected to complete all degree requirements within 12 months of entering the program. The thesis M.A. might take longer than the course M.A.; the thesis must be presented within five years of entering the program. It is possible to do the M.A. on a part-time basis within a maximum of five years.

Degree of Doctor of Philosophy
To be considered for admission to the Ph.D. program, candidates normally hold the M.A. degree in history, or its equivalent, and must satisfy the Department of their ability to do independent research at an advanced level. Applicants are expected to have achieved grades averaging A- or better in their most recent degree. Students entering the Ph.D. program with an M.A. will complete four half-courses.

Exceptional students may be admitted directly to the Ph.D. program from the B.A. Such applicants will apply to the M.A. program, but indicate on the M.A. admission that they wish to be considered for direct admission to the Ph.D. program. If accepted, students from the B.A. level will normally be expected to complete four additional half-courses for a total of eight in their program. One of these courses should be HIS 1997H The Practice of History. These students will be expected to maintain an A- average in their first four half-courses in order to continue in the program.

There are four main requirements in the Ph.D. program: fulfillment of the residence requirement, successful completion of compre-
hensive examinations in three fields of history, fulfillment of language requirements that vary with the candidate's major area of study, and the writing and successful defence of a thesis. Although it is possible to complete these requirements within four years, in most cases it will take longer.

The History Department requires its Ph.D. candidates to be in residence until they have passed their field examinations but no longer than a period of two years. To fulfill this requirement a student must be in such geographical proximity as to be able to visit the campus regularly and participate fully in the University's activities associated with the program.

Normally, course work will be completed within the first year of study. Courses should be chosen to assist in preparation for the field examinations. Candidates for the Ph.D. must maintain a minimum average of B+ throughout their course work.

At the beginning of their programs, candidates, in consultation with the Coordinator of Graduate Studies, will decide upon their fields and be assigned advisors. Three fields are required: a major and two minors. The major should coincide with the subject area that the student has chosen for the thesis, and the two minors should be in different areas. The comprehensive field examinations consist of a written examination in each field and a common oral examination covering all three fields. Candidates are required to take their field examinations by the spring of their second year in the program, but they are strongly advised to take them as soon as possible after the completion of their course work. While examinations are normally held in October, January, and March, candidates may take them at other times with the permission of their field supervisors. Examinations cannot be postponed beyond the spring of the second year without permission of the Coordinator of Graduate Studies. The Department's graduate handbook, *Graduate Studies in History*, contains a list of the fields offered.

If not already so qualified, a candidate must qualify in one language other than English by the beginning of the second year and may be asked to qualify in other program-related languages.

When all of the above requirements are completed, the candidate will proceed to the writing of the Ph.D. thesis. The thesis must be a piece of original scholarship, approximately 350 pages or 90,000 words in length, exclusive of notes and bibliography. Thesis preparation is guided by a committee consisting of the major supervisor and two other faculty members. The thesis must be presented within six years of enrolment in the Ph.D. program.

**History of Medicine Option**

The University of Toronto has particular strength in the history of medicine, and students interested in this field can pursue their studies through supervised research and courses in this area organized in the History Department and elsewhere in the University. Major and minor Ph.D. fields in the history of medicine are available in the History Department.

**Collaborative Programs**

The Department of History participates in the following collaborative programs:

- Asia-Pacific Studies
- Ethnic and Pluralism Studies
- International Relations
- South Asian Studies
- Women's Studies

Each of these programs has its own entry in this calendar; interested students should refer to these entries.

**Courses of Instruction**

Not all courses are offered every year. Please consult the Department's list of current course offerings as well as those offered by other departments that may be taken for history credit. Some courses appearing below are double listed.

**African History**

- HIS 1706H Decolonizing Research Methodologies/S. Hawkins, N. Musisi
- HIS 1707H Topics in African History/S. Rockel
- HIS 1708H Labour in the Age of Imperialism/S. Rockel

**American History**

- HIS 1520H Readings in Visual Culture and American History/E. Brown
- HIS 1521H Time and Place: Cultural Studies of Place in American History/A. Blake
- HIS 1525H Topics in the History of the American South/M. Wayne
- HIS 1526H The Black Experience in America/M. Wayne
- HIS 1528H Crossing Boundaries: Race, Ethnicity, Class and Gender in America, 1880-1930/J. Ingham
- HIS 1530H American Foreign Policy in the Twentieth Century/R. D. Accinelli
- HIS 1532H American Foreign Policy in the Cold War/R. Pruessen

The Institute conducts research, offers programs for advanced studies, and serves as a focus for university-wide interest in its field. Courses are open to all graduate students and are suitable complements for specialists in science or the humanities. The IHPST colloquia, in which degree candidates participate, are open to the University community.

Courses are conducted in seminar style and involve the writing of essays and the presentation of reports.

Degree requirements and procedures described below supplement the regulations given at the beginning of this calendar. Applicants for admission to the Institute's degree programs should arrange for two or three letters of recommendation to be sent directly to the Institute and should submit a statement of their academic background, interests, and needs to the graduate coordinator.

Degree of Master of Arts
Admission to the M.A. program requires a four-year University of Toronto bachelor's degree, or its equivalent from a recognized university. The very broad scope of the field and the variety of fruitful approaches to it imply that many different backgrounds are appropriate. Candidates must meet the general regulations of the School of Graduate Studies with some experience in both the sciences and the humanities.

The program for the M.A. degree consists of a minimum of seven half-course equivalents. At least one half-course must be in the philosophy of science and at least three half-courses must be from the 5000 fundamentals series. Students must also complete HPS 1500H, which involves the writing of a research paper. The remainder of the program is selected by the student in consultation with the faculty, according to the student's background and interests. The student must demonstrate ability to read French or German adequately.
It is expected that a full-time student will complete all the requirements for the degree during one year of residence.

Degree of Doctor of Philosophy
Applicants approved by the Institute are admitted as candidates for the Ph.D. degree under the general regulations of the School of Graduate Studies. Admission to the doctoral program requires a University of Toronto M.A. degree in the History and Philosophy of Science and Technology, or its equivalent from a recognized university. Applicants must normally have at least an A average in previous graduate work.

Students must complete six half-course equivalents during the first year of the Ph.D. program, as approved by the Institute. These will include courses in the 5000 fundamentals sequence as are necessary to ensure an adequate breadth of preparation. The remaining courses are selected by students in consultation with the faculty, according to the student's background and research interests. The requirement of six half-course equivalents may be waived, or modified, for students who have completed additional courses, beyond seven half-course equivalents, at the M.A. level. However, such students will be required to take any courses that are necessary to prepare them for research.

All students must pass a qualifying examination in areas related to the field of expected research. This exam will be held by the middle of the second year of the Ph.D. program, except that for students whose course requirements have been waived, the examination must be held by the end of the first year of the Ph.D. program.

All students must demonstrate reading knowledge of French and another language (normally German), and any other languages required for the research. The language requirements must be met before the qualifying examination is held. Before work on the thesis can begin, a thesis proposal must be approved by the faculty. The proposal should be submitted at the time the student takes the qualifying examination.

Students will normally be required to be in residence for a minimum of one year. "In residence" means being on campus full time and consequently in such geographical proximity as to be able to visit the campus regularly and to participate fully in the Institute's activities. Ideally the student should complete work for the degree in four years. For more details refer to the departmental handbook.

Courses of Instruction
Not all courses are offered every year. Consult the Institute regarding course offerings.

Candidates are admitted under the general regulations. Applicants for the M.A. program should have a strong overall grade average in the history of art and closely related subjects, with at least a B+ average in recent senior art history courses. The Department also welcomes applications from outstanding candidates with a background other than art history. Normally successful applicants must complete the M.A. before proceeding to the Ph.D. Admission into the Ph.D. program will be based on the level of academic performance in the M.A. program including an average of at least A-. Candidates can also be admitted directly into the Ph.D. program with a B.A. if they have an exceptionally strong academic record with a grade average of at least an A- in their art history and humanities courses during the last two years. Students in the M.A. program deemed to have achieved high academic performance can apply for transfer into the Ph.D. program at the end of the first year.

A reading knowledge of French, German, or Italian is required and will be tested at entrance. One or more additional language(s) is required, as outlined below. Specific language requirements for individual courses are included in the course listings below; those unable to meet these requirements may be refused admission to the course. Enrolment in all courses is limited and subject to the approval of the instructor.

Candidates from elsewhere, admitted to a post-M.A. degree, may be required to complete at least one full-course equivalent in addition to the program requirements specified for the Doctor of Philosophy degree.

In addition to the normal History of Art program, the Department also participates in the Ancient Studies Collaborative Program.

Degree of Master of Arts
1 Students are normally admitted to a 1.5 session M.A.
2 Candidates proceeding to the degree will be required to pursue the equivalent of four full graduate courses. Course work must be chosen from at least three of the four areas, designated as Ancient, Medieval, Renaissance/Baroque, and Modern. No more than two full courses may be taken in any one of these areas. The equivalent of one full course may be taken in another graduate department (e.g., Medieval Studies, Near and Middle Eastern Civilizations), subject to the approval of the Department of History of Art and of the other department concerned.
3 In addition to that required at entry, all M.A. candidates are required to show a reading knowledge of one foreign language, to be approved by the Department. Such reading knowledge will be certified by examinations acceptable to the School of Graduate Studies.

Degree of Doctor of Philosophy
In addition to the general regulations, the following special regulations for the usual Ph.D. in Western Art studies should be observed.
1 Course Requirements. All Ph.D. candidates who are admitted after completing the M.A. are
required to take, in addition to the course work in the M.A. program, at least 2.5 full graduate courses. These courses may include, but not exceed, two credit/no credit half-courses from the series FAH 3011H, 3012H, 3013H, and 3014H. M.A. and Ph.D. courses in combination should be in three of the following four fields: Ancient, Medieval, Renaissance/Baroque, Modern; overall two full-course equivalents must be taken in each of two fields. If a course cuts across boundaries between two areas, it shall count as one field only. Ph.D. candidates admitted on the basis of a four-year B.A. must take a minimum of 5.5 full-course equivalents in art history and maintain an average grade of at least an A-. At the end of the first and second years, the student’s progress will be reviewed to ensure that the student has made satisfactory progress through the program; this includes maintaining full-time status with a GPA of A- and completion of all language requirements.

Students who fail to make satisfactory progress may be required to transfer to the M.A. program with no loss of accumulated course credits.

2 Travel Requirements. Before presenting the doctoral thesis, Ph.D. candidates must normally have spent at least three months in travel and research on an itinerary approved by the graduate department.

3 Examinations and Seminar. Within the first two years, candidates are required to take two comprehensive examinations, one chosen from the four areas designated above and one chosen from the dissertation area. In the year following the completion of the comprehensive examinations, candidates will conduct a seminar for the faculty and students of the Department on an aspect of their thesis topic.

4 Language Requirements. Ph.D. students are required to pass examinations in two languages (German and either French or Italian) if they have not already done so in the M.A. program. This requirement must be completed before taking the comprehensive exams. Additional languages may be required depending on the research needs of the student’s dissertation topic.

5 Areas of Study. Subject to availability of staff supervision, acceptances will be limited to Ph.D. candidates who propose theses in the following areas:

- Ancient (Bronze Age Aegean; Greek and Roman Architecture, Painting, and Sculpture);
- Medieval (Painting and Sculpture);
- Renaissance and Baroque (Architecture, Painting, and Sculpture);
- Modern (Nineteenth-Century, Twentieth-Century, and Contemporary Architecture; Sculpture; and Painting in Europe and North America).

Ancient Studies Collaborative Program

The Departments of History of Art, Classics, and Near and Middle Eastern Civilizations participate in the Ancient Studies Collaborative Program. The program enables students to focus on ancient Mediterranean and/or Near Eastern archaeology, art, and culture. See the separate entry in this calendar.

Courses of Instruction

Ability to read several languages other than English is essential for all students undertaking graduate work in History of Art; therefore, admission to the courses listed below will be restricted to applicants who meet the minimum language requirements stated for each course. All courses are not offered each year. Please check the departmental Web site for course availability.

Ancient

FAH 2000Y The Aegean in the Bronze Age (French or German, modern Greek useful)/Staff
FAH 2001H Special Problems in Bronze Age Aegean Archaeology (prerequisite FAH 2000Y or its equivalent; French and/or German, modern Greek useful)/Staff
FAH 2005H Minoan Architecture: Concept and Style/Staff

Toronto, Ontario
Canada
M5S 1V6

Telephone: (416) 923-6641 ext. 2324
Fax: (416) 926-4713
Web: www.oise.utoronto.ca

The Department of Human Development and Applied Psychology currently offers four graduate programs.

Consult the OISE/UT Bulletin for full details of all graduate programs, including admission requirements, program requirements, and descriptions of programs as well as for information about financial support for students.

Students may begin the M.Ed. program in Human Development and Education in September, January, or July, but all other programs in the Department commence in September.
Master of Arts in Child Study and Education
The Institute of Child Study offers a two-year preservice, research-based teaching program that uniquely combines a Master of Arts degree with the Ontario Teachers’ Certificate of Qualification. The Institute is a centre of professional training and research in childhood and education and includes a laboratory school.

Admission requires preparation equivalent to a University of Toronto four-year bachelor’s degree, with standing equivalent to a University of Toronto mid-B or better, and experience working with groups of children.

The core assumption of this program is that successful teaching involves an understanding of how children’s capacities, concerns, and behaviour change with age; how children’s individual differences tend to reflect developmental changes; and how children’s social and physical environments influence their development.

Our aim is to acquaint students with educational and developmental theory and research that is relevant to educational settings, showing how this research can inform classroom practice. Students also learn how to objectively study children, including both practical assessment and formal methods of inquiry. These areas of knowledge must be combined with knowledge of effective teaching methods and teaching environments so that educational practices can build on children’s current levels of development.

The two year M.A. offers a unique, research-based teacher education. Eligible graduates are recommended to the Ontario College of Teachers for an Ontario College of Teachers’ Certificate of Qualification. This qualifies the holder to teach in the primary and junior divisions of Ontario schools. Graduates will be recommended for Part 1 of the three-session qualification in Primary Education. Graduates will also be eligible for Part 2 of the three-session qualification in Primary Education following one year’s successful teaching experience as attested by the appropriate supervisory officer.

Students wishing to be eligible for Part 1 of the three-part qualification in Special Education may elect to take the required courses and practicum as part of their program.

Students will complete four 6-week half-day placements in classrooms including: kindergarten/early childhood, grade 1-3, and grade 4-6 classrooms plus at least one other 6-week placement during their first year of study. Students will complete a 3.5 month full-time internship in an elementary classroom in their second year of study. Students planning further graduate study may elect to complete a Qualifying Research Project.

Human Development and Education
The Human Development and Education program offers studies leading to the M.A., M.Ed., Ph.D., and Ed.D. degrees. Students have an opportunity to construct an overall perspective on human development and its implications for practice with children in different applied settings.

Students are required to take core courses in human development and research design. Courses emphasize typical and atypical development in the cognitive and emotional domains and the impact of culture, family, and social relationships on development. The M.A. and Ph.D. programs are designed for students wishing to pursue an academic or research-based career. The M.Ed. and Ed.D. programs are designed for the reflective teacher or other practitioner in education or related fields.

The M.A. program, comprising six half-courses and a thesis, is normally undertaken on a full-time basis. The M.Ed. program, comprising ten half-courses and a comprehensive examination, may be undertaken on a full-time or part-time basis. The Ph.D. program, comprising six half-courses, a comprehensive examination, and a thesis, is undertaken on a full-time basis. The Ed.D. program comprises eight half-courses, an internship, and a thesis. While students may begin the program on a part-time basis, a minimum of one year of full-time study is required.

School and Clinical Child Psychology
The School and Clinical Child Psychology program is an American Psychological Association (A.P.A.) accredited program. It provides theoretical, research, and professional training in preparation for psychological work with children in schools, clinics, private practice, and research settings. The program is designed to provide training in assessment, therapy, and other psychosocial and instructional interventions, professional consultation and prevention. The degrees are also intended to meet the academic requirements for registration as a psychological associate (M.A.) or psychologist (Ph.D.). Opportunities are available for research and clinical work with infants, young children, adolescents, families, and adults with learning disabilities.

The program follows the scientist-practitioner model for psychological training recommended by the A.P.A. Emphasis on designing, conducting, and interpreting scientific research parallels emphasis on exemplary clinical practice.

The M.A. program, comprising 11 half-courses (including a practicum course) and a thesis, is normally undertaken on a full-time
basis. The Ph.D. program, comprising nine half-courses (including a practicum course), a comprehensive examination, and a doctoral dissertation, is normally undertaken on a full-time basis.

**Master of Teaching in Human Development and Curriculum (M.T.)**

The Departments of Curriculum, Teaching and Learning, and Human Development and Applied Psychology offer a two-year Master of Teaching degree in Human Development and Curriculum. Upon successful completion of this program, students will be awarded a Master of Teaching degree and a recommendation to the Ontario College of Teachers for an Ontario Teachers’ Certificate of Qualification.

The Human Development and Curriculum program offers students a unique educational opportunity for teacher qualification with advanced theoretical knowledge and research skills. The program provides students with a strong conceptual grounding in human development, cognitive psychology, educational technology, curriculum, teaching, and learning. Program objectives are achieved through a combination of formal course work, teaching and research seminars, internship and practica, along with independent and collaborative research and major research papers (MRP).

The two-year M.T. degree is composed of the equivalent of 16 half-courses (13 core and 3 electives), including practica, and is undertaken on a full-time basis. Normally, advanced standing is not granted in this program. In addition to the course work (including practica), all candidates must successfully complete a comprehensive examination at the end of the program in order to graduate and receive the M.T. degree and a recommendation to the Ontario College of Teachers for an Ontario Teachers’ Certificate of Qualification. Registration in the second year is contingent upon successful completion of all first-year work.

The Institute has two principal mandates: multidisciplinary research and post-graduate education.

**Research**
The primary mandate of the Institute is to conduct basic, multidisciplinary research from a social science perspective on human development, the life course, and aging. The Institute offers graduate students and faculty the opportunity to work in a collaborative environment that fosters research and education. It acts as a catalyst to bring together researchers from various sectors of the University and collaborates with teaching hospitals, government, and social agencies. It offers resources, services, and leadership on research, planning, and policy issues. The research program of the Institute covers several theme areas:

1. aging and the life course
2. life course theory and methodology
3. work and family and the life course
4. health and the life course
5. crime and law and the life course
6. learning and human development and the life course
Education
First of all, the Institute offers a collaborative graduate program in Aging and the Life Course. Graduate students register in participating home departments and acquire a subspecialty in aging, denoted on their transcript. For more details consult the Aging and the Life Course (Collaborative Program) entry in this calendar. Four research fellowships are awarded annually to further support students in the area of aging and the life course:

- **a** The Wilfred George Scott Fellowship in Gerontology;
- **b** The Helen and George Coward Award in Gerontology;
- **c** The Leon and Blossom Wigdor Scholarship Fund;
- **d** The Northwater Capital Management Award in Aging.

At this time, the Institute is developing programs and initiatives with a focus on the analysis of longitudinal and life history data. Currently, a graduate level course addressing techniques in the analysis of longitudinal and temporal data is being offered on site, with access to well-known longitudinal databases.

Next, the Institute offers seminars, workshops, and conferences. Current seminar series themes include aging and the life course issues as well as longitudinal methodology issues.

The Institute offers space and a small resource centre to graduate students and lab space for in-house research faculty members. It also houses two community groups, the Ontario Network for the Prevention of Elder Abuse (ONPEA) and Connecting Seniors of Canada (CSC). Anyone interested in research studies on human development, life course, and aging should contact the Institute for information.

University of Toronto
Toronto, Ontario
Canada
M5S 1A8

Telephone: (416) 978-6382
Fax: (416) 978-1938
E-mail: immunology.gradprogram@utoronto.ca
Web: www.immunology.utoronto.ca

The Department of Immunology provides a
common forum for investigators in many areas
of the University and an interdisciplinary re-
search experience in immunology. Members
and students in the Department are located at
the Medical Sciences Building, at the Ontario
Cancer Institute, and at the Research Institutes
of Mt. Sinai Hospital, Toronto General Hospital,
Toronto Western Hospital, The Hospital for Sick
Children, and Sunnybrook Hospital. The De-
partment offers an opportunity for study towards
an M.Sc. or a Ph.D. degree in a wide range of
immunological disciplines. These disciplines
include molecular mechanisms of lymphocyte
development and selection, T-cell and B-cell
receptors, cell interactions, growth factor
receptors, cytokine networks, antigen process-
ing and presentation, signal transduction in
lymphocytes, V(D)J recombination, anergy,
apoptosis, transgenic and knock-out models,
immuno-targeting and vaccine design,
autoimmunity, AIDS, diabetes, and transplanta-
tion.

For more detailed information, see the gradu-
ate handbook available from the Department or
consult the Immunology home page on the Web
site listed above.

Degree of Master of Science
Applicants with a four-year B.Sc., or its equiva-
 lent, will be considered. Candidates are nor-
mally expected to have at least a B+ average
with a strong background in molecular and cel-
lular biology. Applicants from outside North
America are required to provide GRE (general)
scores with their application. Candidates lack-
ing adequate training in biological or natural
sciences may be advised to do extra course
work necessary for their research.
To qualify for an M.Sc. degree, candidates must complete IMM 1016H, IMM 1019H, and IMM 2021H; submit a satisfactory thesis embodying their research, and pass an oral examination based on their research.

**Degree of Doctor of Philosophy**

There are three routes to the Ph.D. degree:

1. Candidates may be accepted for direct entry into the Ph.D. with a B.Sc. degree, or equivalent, with at least an A- average in their final year.
2. Candidates may be accepted first into the M.Sc. program from a bachelor's program with at least a B+ average and, conditional on excellent performance in the first year, may reclassify into the Ph.D. program.
3. Candidates already holding an M.Sc. with at least a B+ average may be accepted directly into the Ph.D. program.

Candidates are required to be on campus and participating full-time until the program requirements of research and course work have been completed. The program emphasizes research. In addition, the program requirements include completion of IMM 1016H, IMM 1017H, IMM 1100H, IMM 2100H, and one additional half-course equivalent from either Immunology or outside the Department in a subject relevant to the thesis topic. All candidates are examined in the second year of their program on a submitted research proposal and on relevant course material. To qualify for a Ph.D. degree, the candidate must submit a thesis and defend it at an oral examination conducted by the School of Graduate Studies.

**Developmental Biology (Collaborative Program)**

The Department participates in the Developmental Biology Collaborative Program. For more details, consult the separate entry in this calendar.

**Courses of Instruction**

Not all courses are offered every year. Please consult the Department for details.

- IMM 1016H Recent Advances in Basic Immunology: Part I (Fall)
- IMM 1017H Recent Advances in Basic Immunology: Part II (Spring)
- IMM 1019H Master’s Seminar Course (Credit/No Credit)

Additional information is provided on the Centre's Web site.

Degree of Master of Industrial Relations

The purpose of the graduate program leading to the degree of Master of Industrial Relations (M.I.R.) is to enable students to undertake specialized study which focuses on the employment relationship and examines it from the point of view of a number of disciplines such as economics, law, psychology, and sociology. This focus also includes the nature and relationships of the institutions involved in the employment relationship. The intention is to provide students with the background framework and current knowledge of the field that will serve as a basis for professional careers in labour-management relations, human resources, or policy analysis.

The M.I.R. degree may be taken on a full-time or part-time basis. If it is taken full-time, the course of study may range from one academic year (eight months) to two academic years (sixteen non-consecutive months) depending upon a student's undergraduate program of study. Advanced standing can be obtained for relevant courses taken previously.

Admission Requirements

1 The minimum admission requirement is a grade average of B+ (77%) in each of the final two years of a four-year University of Toronto bachelor's degree program, or equivalent.
2 Students are strongly advised to take introductory economics and statistics courses prior to application. Performance in these courses, as well as performance in other industrial relations and related courses, will be taken into consideration by the admissions committee.
3 Enrolment in the program is limited and meeting minimum requirements does not guarantee admission. All applicants will be evaluated on their individual merits.
4 International students are strongly advised to submit results from the Graduate Record Examination (GRE). The Graduate Management Admissions Test (GMAT) scores will be ac-
cepted as a substitute. Although there is no minimum score requirement, performance on either the GRE or GMAT will be taken into consideration by the admissions committee. Scores must be received no later than April 15. Test results more than five years old are normally not considered.

5 Candidates whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must have a TOEFL score of at least 600 and a TWE score of 5 or higher. For the computer-based TOEFL test, the minimum required score is 250 with an Essay Rating score of 5.

6 Persons now working in the fields of industrial relations or human resources who are considering a return to university will have their experience taken into consideration by the admissions committee.

7 Candidates may be granted advanced standing for courses equivalent to those in the first year of the M.I.R. program. Such courses must have been completed with at least a mid-B standing.

Program Requirements

Each student's program of courses must be approved by the Coordinator of Graduate Studies. If chosen courses appear to overlap to a large degree, approval may be denied. Optional courses must be chosen from at least two of the three areas of study.

Not all courses are offered every year. Please consult the Centre for Industrial Relations timetable which lists available courses in each session.

First Year: Foundation Courses

The program consists of two years of study, although advanced standing is possible for first-year courses. The first year is designed to provide the basic background requirements. It includes an introduction to the three main areas of study:

1 Human Resource Management and Organizational Behaviour
2 Labour-Management Relations
3 Labour Market and Social Policy

It also includes relevant courses in economics, law, quantitative methods, organizational behaviour, and sociology.

Students must take ten half-courses, or the equivalent, of which eight are required courses, as follows:

IRE 1002H Applied Statistics in Industrial Relations
Students who enrol in IRE 1002H may not enrol in CRI 2020H Applied Statistics in Criminology

IRE 1010H Microeconomic Environment for Industrial Relations
IRE 1011H Macroeconomic Environment for Industrial Relations
IRE 1126H Labour Market Policy

Microeconomics is a prerequisite. This course may be postponed until second year if the student wishes.

IRE 1611H Sociology of Industrial Relations
MGT 1362H Administrative Theory
MGT 2610H Industrial Relations

Plus one of the following law courses:
IRE 1270H Introduction to the Law of Labour Relations
(Students may enrol in either IRE 1263Y or IRE 1338H, but not both)
IRE 1263Y Labour Law (also Law 263H)
(Students may enrol in either IRE 1263Y or IRE 1338H, but not both)

Courses are chosen from the list of Optional Courses below to fill the requisite ten half-year courses, or their equivalent, in the first year of the program.

Students in the M.I.R. program are required to achieve a mid-B average in the first year of the program (or in the first ten half-courses, excluding grades for exempted courses) in order to continue or to pass into the second year. Failure in any course (that is, a grade of less than B-) will require a review of the student's program by the department.

Second Year: Core Courses

Students must take eight half-courses, or the equivalent, to complete the second year. This includes core courses in Industrial Relations:

IRE 2001H Theoretical Foundations of the Employment Relationship
IRE 2002Y Research Methods in Industrial Relations

Five additional half-courses must be chosen from the list of optional courses.

Due to the multidisciplinary nature of industrial relations, M.I.R. students are not permitted to take more than a total of three optional courses in any one unit outside the Centre for
Industrial Relations without the permission of the Graduate Coordinator. Since outside units normally give preference to their own students, M.I.R. students can enrol in these optional courses only when space is available.

All requirements for the degree must be completed within six years from the date of first enrolment in the M.I.R. program. Students must have a mid-B average overall to be recommended for the degree.

Degree of Doctor of Philosophy
The Ph.D. in Industrial Relations is a research-oriented program of study designed to provide students with both a thorough background in the field of industrial relations and research skills to enable them to proceed to careers in academic institutions or in research positions with governments or major organizations. It is available only on a full-time basis and normally has a two-year residency requirement during which time the student is required to participate fully in the department’s activities associated with the program.

Admission Requirements
1 Candidates will be admitted under the general regulations of the School of Graduate Studies and will require a Master of Industrial Relations (M.I.R.) degree from the University of Toronto, or its equivalent. Other students who meet the admission requirements may be required to enrol in a preparatory year consisting of courses from the M.I.R. program. Students with a bachelor’s degree in industrial relations or in a related field of study, may be considered for admission to the Ph.D. if they have exceptional academic standing and have demonstrated quantitative skills and research ability.
2 At least a B+ standing, or equivalent, will be required in the previous master’s program. Academic performance in courses relevant to the applicant’s area of interest, as well as performance in statistics and research methods courses, will be taken into consideration by the admissions committee.
3 Candidates are required to submit a copy of their results from the Graduate Record Examination (GRE) before February 1. The Graduate Management Admissions Test (GMAT) will be accepted as a substitute. Although there is no minimum score requirement, performance on either the GRE or GMAT will be taken into consideration by the admissions committee. Test results more than five years old are normally not considered.
4 Candidates whose primary language is not English and who graduated form a university where the language of instruction and examination was not English must have a TOEFL score of at least 600 and a TWE score of 5 or higher. For the computer-based TOEFL test, the minimum required score is 250 with an Essay Rating score of 5.
5 Applicants may be required to appear for a personal interview and/or submit copies of recent academic work.

Program Requirements
Requirements that are normally met in the first two years consist of a core course in Industrial Relations, optional courses, and courses in research methods and statistics.

The core requirement in Industrial Relations is met by completing one half-course:
IRE 3004H Topics in Industrial Relations and Human Resources

The research and statistics requirements are met by completing:
IRE 3002Y Research Seminar I
IRE 3003Y Research Seminar II
Prerequisite: IRE 3002Y

and two half-year courses in statistics, chosen, with the approval of the Ph.D. Coordinator, from selected offerings in other departments and faculties.

In cases where a student’s prior academic background may have covered any of the courses listed above, substitutions may be permitted with the approval of the Ph.D. Coordinator.

Two half-year optional courses are chosen from the courses set out below or from selected offerings in other departments and faculties. Students whose prior academic backgrounds do not include an industrial relations theory course, or its equivalent, will be required to take IRE 2001H Theoretical Foundations of the Employment Relationship (from the M.I.R. program) as one of the optional courses.

Not all courses are offered every year. Please consult the Centre for Industrial Relations timetable which lists available courses in each session.

A comprehensive examination is written under regulations of the Centre for Industrial Relations normally by January 31 of the student’s second year in the program.

Intensive work on the dissertation will also begin in the second year of the Ph.D. program. The thesis topic and name of supervisor must be submitted no later than October 15.

Students who are in their third and fourth years of study must enrol in the following courses:
Industrial Relations

IRE 3005H Workshop in Industrial Relations I (Credit/No Credit)
IRE 3006H Workshop in Industrial Relations II (Credit/No Credit)

Proficiency in French and/or other languages will be required when the student's supervisor deems it necessary for dissertation research, or when the Centre deems it necessary for the student's field.

All requirements for the degree must be completed within six years from the date of first enrolment in the Ph.D. program.

Collaborative Programs
The Centre for Industrial Relations participates in the Ethnic and Pluralism Studies Collaborative Program. Consult the separate entry in this calendar for details.

Optional Courses
The courses listed below are for general information only. Some courses may be available only during the day.

The Centre offers key required and optional courses in Industrial Relations. Students take the balance of their courses from those available in other departments and faculties. This range of options enables students to examine the industrial relations field from the perspective of a variety of disciplines.

Students must meet the standards and requirements of the other departments and faculties in those courses taken outside the Centre. Since these courses are changed from time to time, students must consult the Centre for Industrial Relations for current information.

Some courses are offered only in alternate years, and the availability of optional courses may be subject to change due to such factors as faculty research leaves and departmental resources. For those courses which also have undergraduate numbers, students are reminded that although the lecture content remains the same, graduate students are required to do additional course work. Further details concerning specific courses and brief course descriptions are available on the Centre's Web site.

Area 1 Human Resource Management and Organizational Behaviour
IRE 1207H Equality in Employment (also LAW 207H)
IRE 1338H Law in the Workplace (Students may enrol in either IRE 1263Y or IRE 1338H, but not both)
IRE 1645H Conflict Resolution in the Workplace
IRE 3615H Creating High Performance Reward Systems
IRE 3620H Topics in Compensation
IRE 3625H Human Resource Research and Information Systems
IRE 3630H Diversity and Inclusiveness in the Workplace
AEC 1101H Program Planning in Adult Education
AEC 1148H An Introduction to Workplace and Organizational Democracy
AEC 1268H Career Counselling and Development: Transition in Adulthood
MGT 2601H Organization Design (May require an organizational behaviour course as a prerequisite)
MGT 2604H Organization Change and Development (May require an organizational behaviour course as a prerequisite)
MGT 2605H International Organizational Behaviour (May require an organizational behaviour course as a prerequisite)
MGT 2609H Management of Human Resources
MGT 2611H Entrepreneurship and Consulting in Community Setting
MGT 2615H Special Topics in Organizational Behaviour
SOC 6012H Sociology of Work I
SOC 6112H Sociology of Work II
SWK 4650H Social Work Practice with Groups in the Community and in Organizations

Area 2 Labour-Management Relations
IRE 1219H Public Sector Labour Relations (also LAW 219H) (May require labour law as a prerequisite)
IRE 1260H Seminar on Labour Arbitration (also LAW 260H) (May require labour law as a prerequisite)
IRE 1263Y Labour Law (also LAW 263H) (Students may enrol in either IRE 1263Y or IRE 1338H, but not both)
IRE 1270H Introduction to the Law of Labour Relations
IRE 1373H Labour Policy
IRE 1615H Comparative Industrial Relations
IRE 1620H Labour Relations Problems in Historical Perspective
IRE 1625H Contemporary Issues in Public Sector Labour-Management Relations
IRE 1635H The Process of Negotiation
IRE 1640H Contemporary Trade Unionism: Issues, Challenges, Strategy

Web: www.mcluhan.utoronto.ca

The Faculty of Information Studies (FIS) offers degree programs which are administered under the general regulations. These programs are the Master of Information Studies (M.I.St.) and the Doctor of Philosophy (Ph.D.). Additionally, FIS offers a post-master’s diploma program.

The Faculty's application deadlines may differ from the general deadlines given in this calendar. Program details are available on the Faculty of Information Studies Web site at www.fis.utoronto.ca. The Faculty cannot guarantee admission of all applicants who meet its minimum requirements.

The McLuhan Program joined the Faculty of Information Studies in 1994 as a distinct research and teaching unit. More information about the Program follows the description of the Information Studies degree programs and courses of instruction listed below.

Facility in the English Language
All incoming graduate students must have a good command of English. Facility in the English language must be demonstrated by all applicants educated outside Canada whose primary language is not English and who graduated from a university where the language of instruction and examination was not English. This requirement is a condition of admission and should be met at the time of application.

This requirement may be satisfied using one of the following tests:
1 Test of English as a Foreign Language (TOEFL)
The TOEFL must be accompanied by a Test of Written English (TWE). A minimum TOEFL score of 600 is required for the paper-based test and 250 on the computer-based test. A score of 6.0 is required on the TWE.
2 Michigan English Language Assessment Battery (MELAB)
A minimum score of 95 is required.
3 International English Language Testing System (IELTS)
A minimum score of 8.0 is required.

If an applicant has previously completed a program of study at a university where the language of instruction and examination has been largely in English, a statement by one of the applicant’s university professors, sent directly to FIS from the university concerned, may be accepted as evidence of facility in English.
Admission decisions will not be made by FIS until test results are received.

Degree of Master of Information Studies
The Faculty offers a program of two academic years leading to the Master of Information Studies degree. It is available on either a full-time or a part-time basis. The M.I.St. degree program offers three specializations: library and information studies, archival studies, and information systems.

Admission Requirements
Students are admitted under the general regulations. Application deadlines are available on the Faculty of Information Studies Web site. An overall average of at least B, with a mid-B in the final year of a four-year bachelor’s program, is required for admission to the M.I.St. program. Applicants wishing to take the information systems specialization must also have completed the equivalent of two approved full-year courses in computer science and one approved full-year course in mathematics.

Applicants who meet current admission requirements and who hold a B.L.S. degree from the University of Toronto, or its equivalent from an approved university, may be admitted to the M.I.St. program with advanced standing. Such students may be required to take additional courses if they lack certain requisite instruction.

Applicants who have satisfactory standing in an undergraduate program and who have successfully completed information studies graduate courses in programs equivalent to the University of Toronto M.I.St. program may also apply for admission with advanced standing. Each application will be evaluated individually. At least eight half-courses towards the M.I.St. degree must be taken at the University of Toronto.

Program Requirements

Computer Literacy
The Faculty expects students to be competent in their use of information technologies. Details are available in the Faculty's calendar.

Course Option
The M.I.St. program consists of 16 half-courses or the equivalent. All students, regardless of specialization, will take the same three core courses. In addition, students must complete the four required courses in their area of specialization and four electives at the 2000-level. The remaining courses may be chosen at the student’s discretion.

Thesis Option
The thesis option allows students to gain experience in developing and executing a research project from beginning to end. Students gain familiarity with the research process and hone their research skills. The thesis is equivalent to four elective half-courses. Faculty approval is required. This option is designed for students who have a clearly defined topic, can find a supervisor, and can meet tight deadlines in order to graduate within the usual time frame envisioned for the M.I.St.

Time Limit for Completion
All requirements for the M.I.St. degree must be completed satisfactorily within six years from first enrolment in the program. Total time from original registration, including lapsed time, is counted as the time allowed to complete the requirements for the degree.

In exceptional circumstances, a candidate who has failed to complete all the requirements for the degree within the appropriate period may be considered for a deadline extension, following the procedures established by the School of Graduate Studies.

Degree of Doctor of Philosophy
Doctoral study in the field of information studies is concerned with both theoretical and applied scholarship. The discipline has its own area of human experience to analyze, its own body of descriptive and factual data to gather, and its own conceptual schemes to formulate and test. The objective of the Ph.D. program is to prepare graduates to assume leadership roles in information and knowledge-based environments. The program is designed to provide opportunities for advanced scholarly research in the theoretical bases of information studies and in the application of such knowledge to professional practice in various functions (e.g., research, systems analysis and design, administration) in private and public institutions (e.g., higher education, government, libraries, archives, corporations).

The goals are:
1. to produce in Canada highly qualified graduates for careers in research and teaching;
2. to contribute to the development of theory in the field of information studies and to the body of knowledge on which theory and practice are based, both through original and scholarly dissertations and faculty research;
3. to stimulate a scholarly interest in research within the information community in Ontario and throughout Canada.
Admission Requirements

Admission to the Ph.D. program requires an average of at least B+ in a four-year UofT bachelor's degree program, or its equivalent, and an average of at least B+ in a UofT master's degree program, or its equivalent. Equivalency is normally determined by the number of courses and/or credits taken. Applicants holding an M.L.S. or other master's degree earned in 2 or 3 semesters, or by completing 10 to 15 half-courses, will normally be required to take additional courses in the M.I.St. program.

The major subject for doctoral study proposed by the applicant must be supported by relevant courses taken at the master's level, including appropriate courses in research methods and statistics; an applicant may be required to take make-up courses to obtain this support.

Admission to the Ph.D. program is limited to graduates of high intellectual ability who have an interest in research. Evaluation of applicants will be based on academic records and three academic letters of reference. A personal interview may be requested. Applicants whose first language is not English should consult the English Language Facility section of this calendar.

Admission procedures are described in the General Regulations section of this calendar. Doctoral students are admitted in September. Meeting the minimum requirements of FIS and of SGS does not guarantee admission.

Degree Requirements

Since Ph.D. students have different backgrounds and areas of interest, programs are developed on an individual basis. The focus of each program enables the student to achieve satisfactory standards of competence in major and minor areas of study in order to carry out the research and writing of the thesis. The program of study developed by the student in conjunction with the faculty advisor must be approved by the FIS Doctoral Studies Committee and by SGS.

Students are required to complete:
1. a major subject, FIS 3004Y Advanced Topics in Information Studies,
2. a minor subject,
3. FIS 3005Y Advanced Seminar in Research Methodologies,
4. a Determination of Research Readiness (written and oral),
5. a thesis proposal,
6. a thesis,
7. a final oral examination.

Students are expected to participate in the Colloquium Series of the Faculty and in other research events. Other courses appropriate for the student's research may also be required.

The second phase of a student's program is concerned with the choice and development of the thesis topic and research for the thesis.

Time Limit for Completion

Full-time Program

Full-time Ph.D. students must complete all degree requirements within four years of first enrolment in the program. Ph.D. students must be regularly registered in SGS during each year of the program.

Flexible-time Program

The flexible-time Ph.D. program is intended for practicing professionals whose employment is related to their intended field of research interest. The flexible-time Ph.D. differs from the full-time Ph.D. only in design and delivery, not in requirements. Students must ensure that they have adequate time on campus to attend classes and to fulfil the academic requirements for an advanced research degree. Students must spend at least two full-time sessions on campus. Degree requirements must be completed within six years of first enrolment in the program. Fees arrangements for flexible-time Ph.D. programs apply.

Colloquium Series

The departmental Colloquium Series serves as a forum for special speakers, for the reporting of faculty research, and for the presentation of thesis research by doctoral students. All doctoral students in residence are strongly urged to attend and participate.

Major Subject

The major subject consists of one full course. It sets the context for the thesis and provides the means by which the student's knowledge of the subject, its major works, and its research literature is intensified.

Minor Subject

The minor subject consists of one full course or two half-courses, normally selected from appropriate graduate courses.

Determination of Research Readiness

After completing the requirements of the Major and Minor, and before developing a proposal for dissertation research, a candidate must appear before a committee which will determine the candidate's readiness to undertake research. This takes the form of an oral and written pres-
entation and should display a candidate's critical ability and mastery of the research focus.

Prerequisite and Co-requisite Courses
Students may be required to take additional prerequisite and/or co-requisite courses as part of their program.

Thesis
The student is required to demonstrate the ability to design and conduct independent research by submitting and defending a thesis which constitutes a significant contribution to knowledge in the field of information studies. The thesis must embody the results of original investigation conducted by the student on an approved topic from the major subject area. The thesis is normally written in English but, on petition, French may be permitted.

Each student has a supervisor and two or more advisors for the thesis. The advisors may include members of the graduate faculty of other SGS departments.

Ph.D. Oral Examination
The candidate must defend the thesis at a Ph.D. oral examination normally scheduled by SGS in consultation with FIS.

Collaborative Programs
FIS participates in six collaborative programs:
- Addiction Studies
- Aging and the Life Course
- Book History and Print Culture
- Environmental Studies
- Knowledge Media Design
- Women's Studies

Collaborative programs provide an opportunity for FIS students to pursue a specialized subject interest as part of their M.I.St. or Ph.D. degree. The SGS calendar includes a separate entry for each collaborative program. Please see the relevant entry for collaborative program requirements.

Non-Degree Programs (Special Student Status)
Special Student status is normally intended for fully qualified graduates who wish to update their knowledge. Programs for Special Students are administered under the general regulations. Details are available on the Faculty of Information Studies Web site. Courses in the Ph.D. program are not open to Special Students.

Diploma Program
The Graduate Diploma of Advanced Study is a post-master's diploma. Applicants must have a University of Toronto M.I.St, M.L.S., or M.I.S degree or equivalent. The Graduate Diploma requires 24 credit hours (i.e., eight half-courses). The graduate Diploma program, which may be taken on a full-time or part-time basis, will be tailored to the individual's needs and interests with courses selected in consultation with the Associate Dean (FIS).

Complete details are available on the FIS Web site at www.fis.utoronto.ca.

Courses of Instruction
Not all courses are offered every year. Consult the Faculty of Information Studies Web site for courses offered each year. Course descriptions and details of prerequisites, co-requisites, and permissions are printed in the Faculty Calendar located on the Information Studies Web site. Inquiries concerning the selection of courses to be offered in any given session should be directed to the Faculty of Information Studies.

M.I.St. Core Courses
Core courses must be taken by students in all three specializations.

- FIS 1210H Information and Its Social Contexts
- FIS 1230H Management of Information Organizations
- FIS 1240H Research Methods

M.I.St. Required Courses
Required courses may also be taken as elective courses by students in all three specializations, providing the necessary prerequisites have been met.

Library and Information Science
- FIS 1310H Information Resources and Services
- FIS 1311H Information Technology Applications
- FIS 1320H Introduction to Bibliographic Control
- FIS 1325H Online Information Retrieval

Archives
- FIS 1311H Information Technology Applications
- FIS 1330H Archives Concepts and Issues
- FIS 1331H Archival Arrangement and Description
- FIS 1332H Archives Programs and Services

Information Systems
- FIS 1340H Introduction to Information Systems
- FIS 1341H Analyzing Information Systems

McLuhan Program in Culture and Technology

Address:
39A Queen's Park Crescent East
University of Toronto
Toronto, Ontario
Canada M5S 2C3

Telephone: (416) 978-7026
Fax: (416) 978-5324
E-mail: coach@mcluhan.utoronto.ca
Web: www.mcluhan.utoronto.ca

The McLuhan Program in Culture and Technology was created to continue the legacy of the Centre for Culture and Technology, established in 1963, as a focus for the ground-breaking work of Marshall McLuhan. The Program's mandate is to encourage understanding of the impacts of technology on culture and society from theoretical and practical perspectives. The Program draws together members of the University community whose interests lie in the interdisciplinary study of communications, culture, and technology. Through its research, course offerings, publications, speaking engagements, and experimentation in new and old media, the Program also provides a bridge between the University and government, industry, educators, artists, and the general public.

In the summer of 1994, the McLuhan Program joined the Faculty of Information Studies as a distinct research and teaching unit. From its base at the historic Coach House on the east St. George campus, the McLuhan Program engages in four converging lines of activity:

1. To encourage and extend the investigations of the Toronto School of Communications initiated by Harold Innis, Eric Havelock, Marshall McLuhan and others into the impact of technology on culture, with a special emphasis on communications and information media and technologies;
2. To provide a forum for the exchange of ideas between the University and other groups within society, particularly those who have a central concern with the development, design, and consequences of technologically-mediated communications;
3. To offer a range of graduate credit courses and continual learning non-credit seminars and courses;
4. To engage in activities outside the University consistent with the Program mandate.

The McLuhan Program does not offer a degree program. Students registered in a graduate program may take McLuhan Program courses for credit with the permission of their home department.

S. J. Thorpe, BASc, MASc, PhD/Materials Science & Engineering

Address:
Room RS214B, 4 Taddle Creek Rd.
University of Toronto
Toronto, Ontario
Canada
M5S 3G9

Telephone: (416) 978-3045
Fax: (416) 978-7753
E-mail: im@mie.utoronto.ca
Web: www.mie.utoronto.ca/grad/degree/im.html

The Integrated Manufacturing Collaborative Program provides students with a broad understanding of manufacturing issues, concepts and techniques, and their integration and application. Topics of interest include engineering design, materials in manufacturing, production processes, production planning and control, quality-control systems, computer-integrated manufacturing, and manufacturing management and strategy.

Primary participants in this multidisciplinary collaborative program are departments in the Faculty of Applied Science and Engineering: Chemical Engineering and Applied Chemistry, Materials Science and Engineering, Mechanical and Industrial Engineering as well as the Faculty of Management’s Operations Management Group.

The Integrated Manufacturing Collaborative Program is only open to full-time students registered in the M.Eng. degree program in any one of the collaborating Engineering Departments. Participating students are expected to complete the degree requirements within a one-year period: September to August—no students are admitted in January.

Admission Requirements
The Integrated Manufacturing Collaborative Program is only open to full-time students who have a four-year bachelor’s degree in any one of the following engineering disciplines: Chemical, Electrical, Industrial, Materials Science, or Mechanical Engineering.

Applicants are required first to register in one of the participating Engineering Departments (listed above) and then request admission to the collaborative program.

Students must complete the M.Eng. degree requirements of both the collaborating department and the Integrated Manufacturing Collaborative Program. Students are strongly advised to consult their respective graduate departments about the exact degree requirements prior to admission into the collaborative program. Students who complete the program receive the M.Eng. degree in their respective home department and the following notation on their transcripts: “Completed the Integrated Manufacturing Collaborative Program”.

Program Requirements
Students are required to complete seven half-courses and a four-month industrial project worth three half-courses, for a total of ten half-courses. Students must successfully complete their course requirements within the first eight months (September to April) and a full-time summer project (May to August) at a sponsoring industrial corporation in teams of two students.

The Collaborative Program director arranges opportunities for students to find summer projects with sponsoring corporations. A personal interview is required. In order to avoid any potential conflict of interest, students must not be working, in any way, for an industrial company other than the specific corporation sponsoring their own project during the summer period.

In the event that an industrial project cannot be secured, and with the written approval of the Director, the student must personally seek a summer project to be conducted at the University of Toronto in any one of the collaborating departments.

Courses of Instruction
In addition to the industrial summer project worth three half-courses, students must receive credit for seven half-courses, when possible, within the first eight months of registration in the collaborative program (i.e., September to April):

Four collaborative program core courses:
MGT2406H Operations Management Strategy
MGT2800H Management Science
MIE1718H Computer Integrated Manufacturing
MIE1727H Quality Assurance
Two home department elective courses:
Students must choose two courses from their own home department specific lists developed for the Integrated Manufacturing Collaborative Program (to be updated yearly). The lists are available in their respective graduate departments at the beginning of the academic year.

One technical elective course:
Students must choose one elective course from any one of the participating engineering graduate departments, not necessarily from their own home department.

During the academic year, students will be encouraged to attend company site visits, technical workshops, seminars, verbal and written communication development courses, and computer programming courses. These are arranged by the program director at no cost to the student (except for possible transportation costs). Students in the collaborative program will also be encouraged to become student members of the Society of the Manufacturing Engineers, also at no cost.
International Relations (Collaborative Program)

Program Committee
S. H. E. Clarkson, BA, MA, D de Rech/Political Science
R. J. Deibert, BA, MA, PhD/Political Science
H. Friedmann, AB, MA, PhD/Sociology

Collaborative Master of Arts/Master of Science Program in International Relations
The graduate departments of Anthropology; Economics; Geography; Health Policy; Management and Evaluation; History, Philosophy; Political Science; Sociology, and Study of Religion, in conjunction with the Faculty of Law and the Centre for International Studies (CIS), offer a collaborative Master of Arts/Master of Science degree program in International Relations.

Students entering the collaborative program must register in one of the participating departments and must also register with CIS.

Combined Juris Doctor/Master of Arts, Law and Political Science (Specialization in International Relations)
A Combined J.D./M.A., Law and Political Science (Specialization in International Relations) is also available. Please consult the Web site for details.

Admission Requirements
1 Admission will be subject to the approval of the graduate department concerned and the collaborative program.
2 A cumulative average of A- is normally required for admission.
3 Applicants will normally be expected to have completed and passed an introductory course in microeconomics and macroeconomics at the undergraduate level.

Program Requirements
Collaborative international relations students are required to complete three core half-courses, one half-course in macroeconomics, and one half-course in public international law. Additional degree requirements vary from department to department. Details of additional requirements are available from the Centre for International Studies, from the departmental graduate or M.A. supervisors, or from the collaborative program’s Web site listed above.

Students must demonstrate competence in a second language.

Graduation Requirements
The home department, in consultation with the Director of the Collaborative Program in International Relations, recommends to the School of Graduate Studies that a candidate should graduate following successful completion of the above program requirements. Graduates receive a master’s degree in the field of their home department, with a transcript notation indicating completion of the Collaborative Program in International Relations.

The Centre for International Studies (CIS) was established in December 1976. Its purpose is to encourage and facilitate interdisciplinary research and teaching in international studies, broadly defined. The major departments and faculties that cooperate closely with the Centre include Anthropology, East Asian Studies, Economics, Geography, History, Law, Management, Political Science, and Sociology. The Centre also works cooperatively with other University centres, institutes, and programs in cognate fields of study. CIS sponsors lectures and seminars by U of T faculty members and graduate students as well as by visiting scholars and practitioners. It administers a small endowment to assist Ph.D. students needing to travel abroad in order to complete dissertations in international and comparative fields of study.

The Centre sponsors many continuing research programs and special projects.

Graduate students with an interest in international studies are encouraged to visit the Centre’s Web site for further information.

International Relations (Collaborative Program)
The Centre administers the Collaborative M.A./M.Sc. Program in International Relations. Consult the separate entry in this calendar.

Candidates are accepted under the general regulations provided that they also satisfy the Department’s requirements stated below. In all cases their programs must be approved by the Department.

Degree of Master of Arts

Admission Requirements
Applicants for admission to the M.A. program should submit two letters of recommendation and a personal statement of intent with their application.

For entry into a one-year M.A. program, candidates must have completed seven full undergraduate courses (or equivalent) in Italian to include an appropriate upper-year full course (or equivalent) in language and three full courses (or equivalent) in three different periods of literature. They must also have achieved at least B+ standing in their University of Toronto 300- and 400-series courses (or in equivalent courses).

The Department will determine whether candidates need to complete prerequisite work in order to qualify for admission to a Master of Arts program and will advise candidates accordingly.

Program Requirements
The requirement for the M.A. degree is the completion of the course ITA 1000H Methodologies for the Teaching and Study of Italian and of four other full graduate courses or equivalent.

Degree of Doctor of Philosophy

Admission Requirements
Applicants for admission to the Ph.D. program must have completed the University of Toronto M.A. or its equivalent and should submit two letters of recommendation and a personal statement of intent with their application.

Candidates, approved by the Department, must have obtained an overall average of at least A- in the courses taken for the M.A. degree. Candidates must maintain the A- average in order to remain in the program.

Exceptional students may be admitted directly to the Ph.D. program from the B.A. with a minimum A- average. Such applicants will apply to the M.A. program, but indicate in a separate letter to the Graduate Coordinator that they wish to be considered for direct admission to the Ph.D. program. If accepted, students from the B.A. level will normally be expected to complete four courses in addition to the Ph.D. requirements listed below for a total of eight full-course equivalents plus the required half-course ITA 1000H. Students accepted from the B.A. will be expected to maintain an A- average in their first four courses in order to continue in the program.

Program Requirements
The program consists of four full graduate courses, or equivalent, for a total of eight courses, including those taken for the M.A. degree. Also required are a qualifying examination, a thesis, and a final oral examination on the thesis.

The degree is offered in the general field of Italian Language/Linguistics and Literature.

Candidates may elect one of the following combinations of major subject (a minimum of six full courses or equivalent) and minor subject (two full courses or equivalent):
1. Italian Language/Linguistics (major) and Italian Literature (minor)
2. Italian Literature (major) and Italian Language/Linguistics (minor)

For the major subject, candidates may choose one graduate course outside the Department in a subject cognate with the candidate’s area of specialization and approved by the Department.
Candidates must have completed the course ITA 1000H *Methodologies for the Teaching and Study of Italian*; must show evidence of written and oral command of Italian; and, not later than the beginning of the third year of Ph.D. registration, must have demonstrated a reading knowledge of Latin and of one other language approved by the Department. Upon completion of all course requirements, and not later than the second year of the Ph.D. program, they will complete the series of written and oral qualifying examinations and, if successful, proceed to prepare their theses.

Permission to write the thesis in Italian (subject to final approval by the School of Graduate Studies) may be granted to candidates who first pass a supervised essay-type English examination to demonstrate proficiency in writing correct and idiomatic English prose.

**Courses of Instruction**

Not all courses are offered every year. Please consult the Department regarding course availability.

Nature of the Collaborative Program
The Knowledge Media Design Institute (KMDI) was established in 1998 as a focus for those members of the University community interested in the emerging cross-disciplinary field of knowledge media design. Knowledge media will shape the products, processes, and practices of the 21st century.

The Collaborative Program in Knowledge Media Design (KMD) provides a specialization for graduate students from a variety of academic backgrounds to engage in the design, prototyping, evaluation, and use of media intended to support and enhance the ability of individuals and groups to think, communicate, learn, and create knowledge. In keeping with KMD’s human-centred approach, students will explore the design and use of new media in the context of real world practices of individuals and communities. Access to an intensely collaborative and cross-disciplinary faculty will encourage students to take a broader view of technological and social change and to be constructively critical of both technological utopians and dystopians. The goal is for students to take into account heritage and history, to understand the realities of today, and to design for tomorrow.

Students have access to a community of scholars and the network of relationships that the Institute coordinates. They gain first-hand experience of a living network of innovation, an environment in which the resources are people and knowledge and the social capital and value that are generated through collaboration.

The Collaborative Program is available to graduate students from a variety of academic backgrounds to engage in the design, prototyping, evaluation, and use of media intended to support and enhance the ability of individuals and groups to think, communicate, learn, and create knowledge. In keeping with KMD’s human-centred approach, students will explore the design and use of new media in the context of real world practices of individuals and communities. Access to an intensely collaborative and cross-disciplinary faculty will encourage students to take a broader view of technological and social change and to be constructively critical of both technological utopians and dystopians. The goal is for students to take into account heritage and history, to understand the realities of today, and to design for tomorrow.

Students have access to a community of scholars and the network of relationships that the Institute coordinates. They gain first-hand experience of a living network of innovation, an environment in which the resources are people and knowledge and the social capital and value that are generated through collaboration.

The Collaborative Program is available to master’s and Ph.D. students in one of the col-
laborating graduate units. The units currently involved are:
- Architecture, Landscape, and Design
- Computer Science
- Information Studies
- Mechanical and Industrial Engineering
- Medical Science
- Sociology

Admission Requirements
Students wishing to apply to the Collaborative Program must be enrolled, or anticipate being enrolled, in a degree program at one of the collaborating graduate units. Applying to the Collaborative Program is a separate procedure. Consult the KMDI Web site for application guidelines. Admission will be subject to the approval of the graduate department concerned and the Program Committee of the Collaborative Program.

Program Requirements
1. Students must meet all the requirements of their home department.
2. Master’s students must successfully complete KMD 1001H, KMD 1002H, and two half-courses selected from a list of electives; at least one of these half-courses must be from the KMD 2001-2004 series. Master’s students are encouraged, but not obligated, to complete a thesis/research project component in their home department, the topic of which should be relevant to the field of knowledge media design.
3. Collaborative program courses may count towards the home department degree requirements or may be in addition to the degree requirements, depending on the participating department’s individual program regulations.
4. Doctoral students are required to take KMD 1001H and KMD 1002H if not already taken in the master’s program, one half-course from the KMD 2001-2004 series, and to have a dissertation topic in the field of knowledge media design. The thesis advisor and at least one other committee member must be from participating units.
5. The home graduate unit and the student’s supervising committee will determine further requirements. The collaborating units cooperate in jointly developing a program that is individually tailored to meet the needs of each student.

Courses of Instruction
For courses offered in a particular year, check the Collaborative Program Web site: www.kmdi.utoronto.ca/collaborative.

- S. Srinivasan, BSc, MA, PhD
The program in Laboratory Medicine and Pathobiology provides a curriculum of courses and a broad-based multidisciplinary approach to research in mechanisms of disease leading to M.Sc. and Ph.D. degrees. The program emphasizes the development of analytical skills and the application of basic research techniques in biochemistry, molecular and cellular biology, experimental pathology, genetics, immunology, and microbiology to the study of pathogenic mechanisms. Moreover, the program emphasizes the nature, mechanisms, therapy, and prevention of microbial diseases in humans, as well as the processes by which pathogenic microbes are spread.

**Current Research Areas**

**Analytical Biochemistry and Diagnostics**

Antimicrobial Resistance: Surveillance and Mechanisms

**Biotechnology**

Bone and Connective Tissue Diseases including Disorders of Mineral Metabolism

**Cancer Pathogenesis and Prevention**

Cardiovascular, Blood, and Pulmonary Disorders

Cell-Cell and Cell-Matrix Interactions

Cell Cycle, Differentiation and Signal Transduction Mechanisms

Endocrine and Neuroendocrine Disorders

Gene Therapy

Immunopathology and Transplantation

Inflammatory Disorders

**Lipid Disorders**

**Lymphatic Pathobiology**

Microbial Pathogenesis

Neural Development and Neurodegenerative Disorders

Proteomics and Bioinformatics

Protein Structure and Function

Toxicology

Vascular Cell Biology

Viral Diseases

For details consult the departmental Web site www.utoronto.ca/LabMedPathobiology/

**Note:** All M.Sc. and Ph.D. students are supervised by a graduate faculty member and an advisory committee.
Degree of Master of Science

Admission Requirements
1 Applicants must have completed, or be about to complete the Pathobiology Specialist Program, a four-year honours B.Sc. program in the life sciences, or an M.D., D.D.S., D.V.M. (or equivalent) degree.
2 A minimum B+ average over the final two years of undergraduate study.
3 Research experience evidenced by publications, abstracts, or presentations is an asset.
4 Two strong letters of recommendation from referees familiar with the applicant's academic work. Departmental appraisal forms must be used.
5 Résumé.
6 Statement of intent (approximately 250 words/one page).
7 Applicants for this degree program are selected by the Departmental Admissions Committee on the basis of academic excellence and successful performance at an interview with a member of the departmental graduate faculty. Admission to the program is finalized when a graduate faculty member agrees to supervise the candidate's research and guarantees a full stipend for the candidate.

Program Requirements
1 Students must be on campus and participating for the duration of their registration in the program.
2 Students who have not previously completed LMP 1404H Molecular and Cellular Mechanisms of Disease, or an approved equivalent, will be required to take this course in the first year of their program. Students exempted from LMP 1404H will take a departmental half-course as a substitute. The student's advisory committee may recommend additional courses.
3 Students must enrol and participate in a credit/no credit course, LMP 1001Y Graduate Seminars in Laboratory Medicine and Pathobiology, which must be taken throughout the program (75% attendance is required).
4 It is expected that students attend the departmental guest lecture series, Seminars in Molecular Pathobiology, that immediately follow the student seminar course LMP1001Y.
5 A thesis is completed under the direction of the student's supervisor, assisted by the advisory committee.
6 The duration of the M.Sc. program is usually 18 months. Within 12 to 18 months of entry, students will be advised by their committee to do one of the following:
   a write and orally defend a thesis on research completed,
   b transfer to the Ph.D. program, or
   c withdraw from the M.Sc. program.
7 The research content of the M.Sc. thesis is expected to generate the equivalent of one paper published in a peer-reviewed scientific journal.

Transfer from M.Sc. to Ph.D. Program
Outstanding students with a high academic standing (normally minimum A- average on M.Sc. courses) who have clearly demonstrated the ability to do research at the doctoral level may request consideration for transfer to the Ph.D. program. Recommendation of the advisory committee is required. Transfer to the Ph.D. program is based on the student's performance at an assessment examination, which is held 12 to 18 months after the start of the M.Sc. program.

The student's supervisor will schedule the assessment examination. The examining committee consists of at least six members of the graduate faculty:
   a the Graduate Coordinator (or a representative from the graduate faculty of the Department) who chairs the examination committee
   b the student's advisory committee, and
   c two other graduate faculty members, one of whom is a member from another graduate department.

Students who complete graduate level course work during their M.Sc. training that exceeds the requirements of the M.Sc. program may obtain credits toward their Ph.D. degree. Credit for courses from universities other than the University of Toronto must be approved by the Graduate Coordinator; certain restrictions may apply.

Degree of Doctor of Philosophy

Admission Requirements
1a Highly qualified B.Sc. graduates having completed the Pathobiology Specialist Program or a four-year undergraduate program in the life sciences with a minimum A- average in the third and fourth years are encouraged to apply directly to the Ph.D. program.
1b M.Sc. graduates and students with a M.D., D.D.S., D.V.M. (or equivalent) degree are candidates for the Ph.D. program. An A- average or higher is required in graduate courses or in a four-year B.Sc. program if there were no course requirements in the M.Sc. program.
2 Research experience evidenced by publications, abstracts, or presentations is an asset.
3 Two strong letters of recommendation from referees familiar with the applicant's academic work. Departmental appraisal forms must be
used. Ideally, one of the referees should be the applicant's supervisor.
4 Résumé.
5 Statement of intent (approximately 250 words/one page).
6 Candidates for this degree program are selected by the Departmental Admissions Committee on the basis of academic excellence and on successful performance at an interview with a member of the departmental graduate faculty. Admission to the program is finalized when a graduate faculty agrees to supervise the candidate's research, and guarantees a full stipend for the candidate.

**Program Requirements**

1 Students must be on campus and participating for the duration of their registration in the program.
2 It is expected that doctoral students will complete their Ph.D. degrees within four years of registration in the program. However, short extensions for good cause may be permitted at the discretion of the Graduate Coordinator.
3 Students who have not previously completed LMP 1404H Molecular and Cellular Mechanisms of Disease, or an approved equivalent, will be required to take this course in the first year of their Ph.D. program. The student's advisory committee may recommend additional courses. Students exempted from LMP 1404H will take a departmental half-course as a substitute.
4 In addition, all students will be required to take two full graduate courses (or four half-courses) plus an ongoing credit/no credit seminar course, LMP 1001Y (75% attendance is required). These courses must include at least one half-course in Laboratory Medicine and Pathobiology. Whenever feasible, courses should be completed in the first two years of the program; the continuing seminar course is excepted. A high priority is placed on focusing the latter half of the program on research only.
5 Students who take additional graduate courses during the M.Sc. program in the Department of Laboratory Medicine and Pathobiology and who continue their graduate studies in the Ph.D. program may receive credit for M.Sc. courses toward doctoral course requirements.
6 It is expected that students attend the departmental guest lecture series, *Seminars in Molecular Pathobiology*, that immediately follows the student seminar course LMP 1001Y.
7 A thesis is completed under the direction of the student's supervisor, assisted by the advisory committee. The student defends the thesis orally, first before a departmental committee, and subsequently before a committee approved by the School of Graduate Studies.
8 The Ph.D. thesis must demonstrate a substantial contribution to laboratory medicine and pathobiology that involves a systemic investigation of disease-related hypotheses. The standard of work in the Ph.D. thesis must be publishable in both content and presentation. The emphasis is on quality of the science and its presentation. The Ph.D. thesis normally is expected to be equivalent to three publications in refereed scientific journals.
9 Ph.D. students are expected to present at least one graduate research seminar in LMP 1001Y prior to their departmental oral thesis defence examination.

**Transfer from Ph.D. to M.Sc. Program**

Prior to the start of the third year of the Ph.D. program, the advisory committee may recommend that the student transfer to the M.Sc. program; the student may also request the transfer.

**M.D./Ph.D. Program**

A limited number of selected students may enter the M.D./Ph.D. program subject to admission into both a departmental Ph.D. program and the M.D. program.

**Collaborative Programs**

An M.Sc. or Ph.D. degree may be taken through this Department in the following collaborative programs:
- Biomedical Engineering
- Cardiovascular Sciences
- Neuroscience
- Proteomics and Bioinformatics
- Toxicology

For more details, consult the separate entries in this calendar.

**Courses of Instruction**

Not all courses are offered every year. Please check the departmental Web site, [www.utoronto.ca/LabMedPathobiology/](http://www.utoronto.ca/LabMedPathobiology/), for course availability.

**M.Sc. Program**

- **JBL 1507H** Biochemistry of Inherited Disease/D. J. Mahuran
- **LMP 1001Y** Graduate Seminars in Laboratory Medicine and Pathobiology (Credit/No Credit)/D. M. Irwin, J. Mogridge

Mandatory for all M.Sc. and Ph.D. students in the Department of Laboratory Medicine and Pathobiology.
LMP 1005Y General and Special Pathology (for Oral Pathology Residents only)/ R. J. McComb
LMP 1006H Biological Electron Microscopy/ B. J. M. Mullen
LMP 1012H Seminars on Pathology (open to students in Biomedical Communications only)/ C. Sherman
LMP 1013H Neoplasia/ P. Hamel
LMP 1015H Vascular Pathobiology/ B. L. Langille
LMP 1016H The Pathology of Connective Tissue/ K. P. H. Pritzker
LMP 1018H Molecular Biology and Applications to Human Disease/ J. O. Minta
LMP 1019H Research Techniques in Molecular Biology and Pathobiology/ E. P. Diamandis
LMP 1020H Inflammation, Immunity, and Immunopathology/ J. O. Minta
LMP 1401Y Clinical Biochemistry (for Residents and Diploma students only)/ A. Vandenbroucke
LMP 1404H Molecular and Cellular Mechanisms of Disease/ M. I. Cybulsky, P. A. Hamel
LMP 1407H Introductory Clinical Epidemiology and Applied Biostatistics/ R. Vieth, A. Lytwyn
LMP 1502H Atherosclerosis and Lipoprotein Disorders/ P. W. Connelly
LMP 1503H Signal Transduction Pathways in Normal and Diseased Tissues/ C. A. Lingwood
LMP 1504H Cell and Molecular Biology of Cardiovascular Diseases/ A. I. Gottlieb
LMP 1505H Analytical Clinical Biochemistry/ P.-Y. Wong
LMP 1506H Techniques in Functional Genomics and Proteomics/ E. P. Diamandis, S. Der
LMP 1510H Molecular Biological Aspects of Analytical Biochemistry: Molecular Biology Techniques/ D. Irwin, E. P. Diamandis
LMP 2115H Selected Topics in Medical Microbiology/ J. Mogridge
RSH 9999Y Research Project/ Staff
## Law

Telephone: (416) 978-0213
Fax: (416) 978-2648
E-mail: law.graduate@utoronto.ca
Web: www.law.utoronto.ca

### Enquiries

Enquiries should be directed to the Graduate Programme Coordinator, Graduate Program, Faculty of Law at the address above.

### TOEFL Requirements

Candidates whose primary language is not English and who graduated from a university where the language of instruction and examination was not English must have a TOEFL score of at least 600 and a TWE score of 5 or higher on the paper-based test. For the computer-based TOEFL test, the minimum required total score is 250 with an essay rating score of 5. Offers of admission conditional upon successful completion of an English language test will not be offered.

### Degree of Master of Laws

Candidates for this degree are accepted under the general regulations and the special regulations governing administration of degrees of LL.M.

### Admission Requirements

An applicant for admission to the degree of Master of Laws (LL.M.) will generally have a Bachelor of Laws or Juris Doctor degree from this or another recognized university, or possess equivalent qualifications, and must have demon-
Program Requirements
1. The candidate must be in attendance for at least two academic sessions (eight months, September to April).
2. The candidate must complete a course of studies and a thesis which, combined, are valued at 24 credit hours.
3. The course of studies shall involve a minimum of 8 credit hours of course work and a maximum of 20 credit hours of course work. The thesis shall involve a minimum of 4 credit hours (in which case the thesis will generally be expected to be between 50 to 60 pages; double spaced, or approximately 15,000 to 18,000 words) and a maximum of 16 credit hours (in which case the thesis will generally be expected to be between 100 and 150 pages, double spaced, or approximately 30,000 to 45,000 words).
4. The course of studies shall include the mandatory graduate seminar, Alternative Approaches to Legal Scholarship.
5. All course work and the thesis shall be graded using the SGS grading scale.
6. In determining the composition of the course of studies and the weight to be given to the thesis, the Faculty will endeavour to structure a program designed to accommodate an individual candidate and the subject matter of the thesis. However, such course of studies and the weight of the thesis shall at all times be such as the Faculty shall determine.
7. In the full-time LL.M. program, the course work requirements must be completed by May 31 of the academic year of attendance and the thesis must be completed by August 31 of the academic year of attendance.
8. The LL.M. program may, with approval of the Associate Dean, Graduate Studies, Law, be taken on a part-time basis over two years, in which case the course work requirements must be completed by May 31 of the second academic year of attendance and the thesis must be completed by August 31 of the second academic year of attendance. Continuation in the second year of the part-time LL.M. program is subject to the Faculty’s determination that the candidate has made satisfactory progress in the first year of part-time LL.M. studies.

Degree of Master of Studies in Law
This program is designed for scholars, in disciplines related to law, who wish to acquire a knowledge of law in order to add a legal dimension to scholarship in their own discipline.

Admission Requirements
Applicants must hold at least a bachelor’s degree and preferably a doctorate, from this or another recognized university, and must have demonstrated a high level of scholarship in a discipline related to law.

Program Requirements
1. The candidate must be in full-time attendance for two academic sessions (eight months).
2. The candidate must pursue a course of studies approved by the Faculty and by the SGS Admissions and Programs Committee.
3. The course of studies will comprise at least 28, and not more than 32, course hours and will include at least 3 of the following subjects: contracts, torts, property, criminal law, constitutional law, and civil procedure.
4. The program will also include a research project of an interdisciplinary nature.

Note: In no circumstance will courses taken in an M.S.L. program be accredited for the J.D. program.

Degree of Doctor of Juridical Science
Candidates for this degree are accepted under the general regulations and the special regulations governing administration of degrees of Doctor of Juridical Science (S.J.D.).

Admission Requirements
A candidate for the degree of S.J.D. will generally hold a Bachelor of Laws or Juris Doctor degree (with a minimum B+ average) from this or another recognized university and a Master of Laws (with a minimum B+ average) of this or another recognized university or possess equivalent qualifications. The Associate Dean, Graduate Studies, Law has the discretion to permit direct entry into the S.J.D. following completion of the Bachelor of Laws or Juris Doctor degree where the Graduate Committee is satisfied that the candidate’s law record demonstrates excellent potential for independent legal research and writing at an advanced level.

Program Requirements — S.J.D.
1. A candidate must remain in attendance for at least two academic sessions (eight months, September to April).
2. A candidate must complete the graduate seminar, Alternative Approaches to Legal Scholarship.
3. Other course work requirements are optional and shall be determined upon consultation with the supervisor. All course work shall be subject to the approval of the Associate Dean, Graduate Studies, Law.
4 Area Requirement: Before being allowed to proceed with formal research on a thesis topic, a candidate must demonstrate competence in a broader area within which the topic falls. An Individual Area Committee (established by the student and approved by the Associate Dean, Graduate Studies, Law) assists in framing that area and compiling an appropriate plan for carrying out the research. The research undertaken by the candidate either culminates in a written exam, based on the reading list, or else consists of a research project which is either a draft of a chapter of the thesis, or an overview of the general argument. Both paths lead to an oral exam based on the written work and the reading list. Normally, a candidate will have satisfied the area requirement by the end of the first year of registration.

5 A candidate will not be allowed to continue in the doctoral program, where, in the opinion of the Area Committee, the candidate is not capable of demonstrating the capacity for independent legal research and writing at an advanced level.

6 Following completion of the area requirement, a thesis must be prepared which, in the opinion of the Faculty, will constitute a distinct contribution to legal research or scholarship, and the candidate must pass an oral examination on the same.

7 The thesis must be completed within five years from the date of enrolment in the program.

8 No candidate will be recommended for the degree until the thesis has been approved by the Faculty of Law and is presented in such form as to be worthy of possible publication either in whole or in an abstract. Thesis publication is normally accomplished as described in the Ph.D. regulations in this calendar.

Program Requirements—Direct Entry S.J.D.

1 A candidate must be in attendance for at least four academic sessions (two periods of eight months each, September to April).

2 A candidate must complete at least eight credit hours, including the graduate seminar, Alternative Approaches to Legal Scholarship.

3 All course work shall be subject to the approval of the Associate Dean, Graduate Studies, Law.

4 Area Requirement: Before being allowed to proceed with formal research on a thesis topic, a candidate must demonstrate competence in a broader area within which the topic falls. An Individual Area Committee (established by the student and approved by the Associate Dean, Graduate Studies, Law) assists in framing that area and compiling an appropriate plan for carrying out the research. The research undertaken by the candidate either culminates in a written exam, based on the reading list, or else consists of a research project which is either a draft of a chapter of the thesis, or an overview of the general argument. Both paths lead to an oral exam based on the written work and the reading list. Normally, a candidate will have satisfied the area requirement by the end of the first year of registration.

5 A candidate will not be allowed to continue in the doctoral program, where, in the opinion of the Area Committee, the candidate is not capable of demonstrating the capacity for independent legal research and writing at an advanced level.

6 Following completion of the area requirements, a thesis must be prepared which, in the opinion of the Faculty, will constitute a distinct contribution to legal research or scholarship, and the candidate must pass an oral examination on the same.

7 The thesis must be completed within five years from the date of enrolment in the program.

8 No candidate will be recommended for the degree until the thesis has been approved by the Faculty of Law and is presented in such form as to be worthy of possible publication either in whole or in an abstract. Thesis publication is normally accomplished as described in the Ph.D. regulations in this calendar.

Collaborative Programs

Applicants to the LL.M. and S.J.D. programs may also apply to participate in one of the following collaborative programs:

- Bioethics
- Women's Studies
Each program provides an opportunity to do interdisciplinary work in another field at an advanced level. For details, consult the separate entries in this calendar.

Courses of Instruction

Students may select courses from those listed in the syllabus of the Faculty of Law. These are accepted for credit at the graduate level. For M.S.L. students, they may be courses from the first year of the J.D. program. Normally LL.M. and S.J.D. students will select courses only from the upper year course list. In addition, there is one course exclusively for graduate students:

LAW 1001H Alternative Approaches to Legal Scholarship/Staff
Graduate Faculty

Web: www.chass.utoronto.ca/linguistics/

Course descriptions and other information are available each spring from the Coordinator of Graduate Studies.

Degree of Master of Arts
Applicants must have at least a B+ average to be considered for admission. Applicants whose academic background does not include courses in introductory phonetics, phonology, morphology, and syntax are normally not admissible. If the applicant’s academic background is limited to these courses, or the equivalent, consideration may be given for admission to a two-year program.

The M.A. program includes courses LIN 1121H, 1131H, 1181H, 1290Y, and JAL 1145H, or their equivalents, if not already taken, plus other requirements as determined by the Department. LIN 1290Y is taken in the final year of the degree. LIN 1121H, 1131H, and 1181H are normally taken in the first year. Students will be admitted to a one-year (normally four course) or two-year (normally eight course) program depending on their background.

All students must demonstrate an ability to read professionally in two languages other than English. The choice of languages must be approved by the graduate coordinator, having regard to the student’s field of research. In some circumstances, demonstrated competence in computer programming may satisfy the requirement.

Degree of Doctor of Philosophy
Candidates will be considered for admission if they have completed the University of Toronto M.A. in linguistics, or its equivalent, with at least an A- average.

Students are normally required to complete three full-course equivalents during the first year. Generals papers (LIN 2201H and LIN 2202H) in two areas of concentration must be completed by September of the second year. During these two years students are normally required to be on campus full-time for a residence period which entails being in such geographical proximity as to be able to visit the campus regularly and to participate fully in the Department’s activities associated with the program.

Language requirements as outlined for the M.A. degree must be satisfied, and other requirements are determined in consultation with the graduate coordinator.

Candidates are required to present a thesis which must be an original contribution to linguistic knowledge. Both the preparation for and the writing of the thesis will be carried out under the supervision of members of the Department.

Courses of Instruction
Not all courses are offered in any given year. Students should consult the departmental Web site.

JAL 1145H Introduction to Field Methods
JAL 1155H Language and Gender

Management

Address:
105 St. George Street
University of Toronto
Toronto, Ontario
Canada M5S 3E6

Telephone: M.B.A.: (416) 978-3499
Executive M.B.A.: (416) 978-6586
Ph.D.: (416) 978-4226
Web: www.rotman.utoronto.ca

DEGREE OF MASTER OF BUSINESS ADMINISTRATION

Please note that the Rotman School of Management is improving the M.B.A. Program and may be making minor changes to the curriculum over the next academic year, designed to strengthen and integrate the program. The information in the calendar entry is accurate as of the printing deadline, but may change as a result of these improvements. Consult the Rotman School of Management for details.

The Joseph L. Rotman School of Management offers three Master of Business Administration (M.B.A.) degree programs:
1. Full-time M.B.A.
2. Part-time M.B.A.
3. Executive M.B.A.

In addition, the School works collaboratively with the Faculties of Law, Applied Science and Engineering, Nursing, Arts and Science, and the School of Graduate Studies to offer the following combined programs:
1. J.D./M.B.A. (Law)
2. B.A.Sc./M.B.A. (Engineering)
3. M.N./M.B.A. (Nursing)
4. M.A./M.B.A. (Russian and East European Studies)

Admission Requirements for the Full-time and Part-time M.B.A. Programs

M.B.A. candidates are advised to consult the Rotman M.B.A. Brochures for complete information on the graduate programs in Business Administration. Such information is available through the Office of Recruitment and Admissions at the Rotman School of Management or on our Web site at www.rotman.utoronto.ca.

1. Candidates for the degree of Master of Business Administration are considered under the general regulations which specify a four-year University of Toronto bachelor's degree or equivalent.
2. Applicants must also obtain a satisfactory score on the Graduate Management Admissions Test (GMAT) administered by the Educational Testing Service (ETS) of Princeton, New Jersey (www.gmac.com). Test results are valid for five years.
3. Candidates may proceed to the degree through either part-time or full-time study. The full-time program admits annually in September and the part-time program admits annually in May.
4. Preferential consideration will be given to applicants to the full-time program who demonstrate a minimum of two years of full-time work experience. Preferential consideration will be given to applicants to the part-time program who demonstrate at least four years of full-time work experience.
5. Admission decisions are made on a rolling basis. Applicants for the full-time M.B.A. program are therefore encouraged to apply before January 15 and no later than April 30 (final deadline). Applicants for the part-time M.B.A. program should apply by February 1.

Program Requirements for Full-time M.B.A.

www.rotman.utoronto.ca/degree/torontomba/tmba.htm

1. The program, beginning in September, extends for two academic years (16 months).
2. The first year of the program consists of a set of required courses at the 1000 level. All students must complete the entire set of required courses. No advanced standing will be granted for previous academic work completed or professional designations earned.
3. The second year of the program consists of 10 elective courses at the 2000 level.
4. Required courses (1000-level courses) are weighted as one, two, or three modules. Three module courses are equivalent to 3 credit hours.
5. Elective courses (2000-level courses) each have a weight of 3 credit hours. With the permission of the M.B.A. Program Director, students may take up to five 2000-level courses from another graduate unit or participate in a School- or University-approved international exchange program. In all cases, the courses selected are subject to the approval of the M.B.A. Program Director.
6. All degree requirements must be completed within six years from the date of first enrolment in the program.

Program Requirements for Part-time M.B.A.

www.rotman.utoronto.ca/degree/parttime/index.htm

1. The program covers the equivalent of two academic years but is delivered over a three-year period.
The program of study consists of a set of required courses at the 1000 level, and a second set of required and elective courses at the 2000 level.

In required courses taken at the 1000 level, a course will be composed of either one, two, or three modules. Three-module courses are equivalent to three credit hours.

After completing the required courses at the 1000 level, students must take a total of 10 2000-level courses, with up to 8 of the courses being non-core elective 2000-level courses.

In all cases, the program of courses selected is subject to the approval of the Rotman School.

All requirements for the degree must be completed within six years from the date of first enrolment in the M.B.A. program.

Courses of Instruction

Weighting for MGT 1000-level courses is determined by the second digit of the four-digit course number as follows:

<table>
<thead>
<tr>
<th>Second Digit</th>
<th>Course Weight</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>CR/NCR (Credit/No Credit)</td>
</tr>
<tr>
<td>1</td>
<td>one credit hour</td>
</tr>
<tr>
<td>2</td>
<td>two credit hours</td>
</tr>
<tr>
<td>3</td>
<td>three credit hours</td>
</tr>
</tbody>
</table>

The Department should be consulted each session as to course offerings.

- MGT 2200H Management Accounting
- MGT 2202H Planning and Control Systems
- MGT 2203H Financial Accounting
- MGT 2204H Canadian Tax Practice
The J.D./M.B.A. Program is a four-year combined degree offered by the Faculty of Law and the Rotman School of Management at the University of Toronto. The program is for students who wish to combine graduate training in management with a degree in law.

At the completion of the four-year integrated program, the successful student is awarded both the Juris Doctor and the Master of Business Administration degrees, which, if taken separately, would require five years of study.

**Admission Requirements**

Students applying to the J.D./M.B.A. program must be admitted to both the Faculty of Law and the Rotman School of Management. As such, candidates must satisfy the admission requirements of both faculties independently, and all applicants must complete the Law School Admission Test (LSAT) and the Graduate Management Admission Test (GMAT). A separate application to each Faculty must also be submitted.

Rotman admission criteria are the same as those for the Full-time M.B.A. program, with the following exception: although work experience is not a requirement, it is important to note that the average M.B.A. student has five years’ experience. It is expected that J.D./M.B.A. applicants’ academic and personal background reflects diversity and life experience.
Students who have completed the first year of the J.D. program may apply for admission to the combined J.D./M.B.A. program by meeting the normal application and admission requirements for the M.B.A. program and notifying their faculty registrar.

Since enrolment in the J.D./M.B.A. program is limited, candidates are urged to file both applications by the Faculty of Law deadline and to arrange to complete their applications as soon as possible thereafter.

Program Requirements
1. Students in the combined program spend the first year enrolled in the first year of the J.D. program and must obtain at least a B standing to continue in the program.
2. Students spend the second year of the combined program enrolled in the first year of the M.B.A. program and must obtain at least a B+ standing upon the completion of courses to be eligible to continue in the program.
3. During the final two years of the program, students take courses drawn from both Law and Management. Students must complete 6 courses at the Rotman School of Management and 45 credits at the Faculty of Law (in addition to the J.D. requirements to complete a Moot, a Perspective course, and the Extended Writing Requirement).

BACHELOR OF APPLIED SCIENCE/MASTER OF BUSINESS ADMINISTRATION PROGRAM
www.rotman.utoronto.ca/skoll/index.htm

The Jeffrey Skoll B.A.Sc./M.B.A. program, established by the Faculty of Applied Science and Engineering and the Rotman School of Management, provides a fast track for gifted students to earn their bachelor's degree in engineering, a management internship, and an M.B.A. in five years and eight months.

Admission Requirements
Students in third year in the Faculty of Applied Science and Engineering (all programs) are eligible to apply for the combined Engineering/M.B.A. degree program. All admission documents required by the Rotman School of Management (including the GMAT results) should be submitted to the Office of Admissions, Faculty of Applied Science and Engineering, by October 15 of the fall session, third year (or while on PEY immediately following third year).

Candidates for the combined program must demonstrate a minimum of a B+ (77%) average in each of the following four sessions: 1W, 2F, 2W, 3F. (Students with one session slightly below 77% who meet all other entrance parameters should still apply.)

Program Requirements
1. Students in the combined program spend the first four years in the Faculty of Applied Science and Engineering (and apply to the program during the third year of undergraduate study).
2. Students spend the fifth year of the combined program enrolled in the first year of the M.B.A. program and must meet the promotion standards applicable to Full-time M.B.A. students.
3. During the sixth year of the program, students must complete seven 2000-level courses at the Rotman School of Management, two engineering electives, and a required technology-management course.
4. All students are required to complete a Management Experience Year (MEY). Consult the Faculty of Applied Science and Engineering for detailed MEY requirements.

EXECUTIVE MASTER OF BUSINESS ADMINISTRATION PROGRAM
www.rotmanemba.ca

The Rotman School of Management is currently reviewing the Executive M.B.A. Program curriculum and may be making changes, designed to strengthen and integrate the program, during the next academic year. These changes will affect both course offerings and the program as a whole. Therefore, the information in this calendar entry is provisional and may change as a result of these improvements. Consult the Rotman School.

The M.B.A. for Executives is offered on Fridays and Saturdays every other week plus four full-time residential modules and study periods. The program consists of 10 half-courses at the 1000 level and 12 half-courses at the 2000 level. The total duration of the executive M.B.A. program is 13 months. Admission to the program is normally restricted to persons with significant professional work or managerial experience. Note that special program fees apply for this program. One or more of the course(s) may be substituted by course(s) offered in the regular M.B.A. program at the discretion of the Program Director.

To learn more about the Rotman M.B.A. for Executives, visit our Web site www.rotmanemba.ca or call (416) 978-4441.

Courses of Instruction
The Department should be consulted each session regarding course offerings.
First Session
MGT 5001H Strategy 1
MGT 5003H Personal Leadership 1

GLOBAL EXECUTIVE MASTER OF BUSINESS ADMINISTRATION PROGRAM
www.rotmangemba.ca

This program is currently under revision. For further details visit www.rotmangemba.ca or call (416) 978-5375.

DEGREE OF MASTER OF MANAGEMENT AND PROFESSIONAL ACCOUNTING

Address:
Room K108, Kanef Centre
University of Toronto at Mississauga
3359 Mississauga Road North
Mississauga, Ontario
Canada L5L 1C6

Telephone: (905) 828-3985
Fax: (905) 569-4306
E-mail: mmpra@rotman.utoronto.ca
Web: www.rotman.utoronto.ca/mmpa

The M.M.P.A. is designed to educate future leaders of the accounting profession at the master's level in management and at the professional level in accounting and related subjects. The program covers the core courses of the Rotman M.B.A. program and offers specialization in accounting.

The 27-month program covers 7 sessions of full-time study, including 5 academic study sessions and 2 co-op work placement sessions in accounting- or finance-related environments. The curriculum is organized to provide an excellent understanding of:
1. the functions and needs of management,
2. accounting, finance, auditing, and tax,
3. essential professional subjects,
4. management skills, and
5. professional capabilities.

Students from any undergraduate background may apply. Advanced standing may be granted.

Admission Requirements
The admission requirements for the M.M.P.A. are essentially the same as those for the School's M.B.A. program except as noted in the program brochure.

Program Requirements
1. Except for candidates granted advanced standing on admission, the program covers the equivalent of seven sessions.
2. The program of study consists of all the courses set out below.
3. All requirements for the degree must be completed within six years from the date of first enrolment.
4. All courses are composed of one, two, or three modules. A module is five weeks in duration and the course weight is equal to the number of modules. For example a course with three modules will have a weight of three credit hours.

Courses of Instruction
Notations for all courses are indicated in parenthesis following the course code and are determined as follows:

<table>
<thead>
<tr>
<th>Credit hours</th>
<th>Notation</th>
</tr>
</thead>
<tbody>
<tr>
<td>0</td>
<td>CR/NCR (Credit/No Credit)</td>
</tr>
<tr>
<td>1</td>
<td>one module</td>
</tr>
<tr>
<td>2</td>
<td>two modules (half-course)</td>
</tr>
<tr>
<td>3</td>
<td>three modules</td>
</tr>
</tbody>
</table>

The Department should be consulted each session as to course offerings.

MGT 1090H(0) Accounting Work-Term Course I
MGT 1102H(1) Business and Professional Ethics
MGT 1210H(2) Managerial Economics
MGT 1211H(2) Economic Environment of Business

MGT 2281H(1) Seminar in Professional Accounting
MGT 2282H(1) Integrative Cases in Professional Decision Making
MGT 2301H(2) Financial Management

The final session of the program will include a professional integrating experience consisting of a four-week period in which students will complete one or more of the following:
1. attend the professional school of a professional accounting body, or
2. write professional accounting examinations, or
3. complete a consulting or work-term project.

**DEGREE OF DOCTOR OF PHILOSOPHY**
The Rotman School offers the Ph.D. degree in Management. At present, students may specialize in one of six fields: accounting, finance, human resource management and organizational behavior, marketing, operations management, and strategic management. Other areas are available for selection as the minor field in Management, including international business.

**Admission Requirements**
1. Candidates for the degree of Doctor of Philosophy are admitted under the general regulations.
2. Since Management is a multidisciplinary field, candidates are expected to acquire a breadth of knowledge across each of these disciplines, as well as some depth in the cognate disciplines relevant to their field of specialization. Sometimes these requirements can be satisfied prior to entry to the Ph.D. program (for example, through an M.B.A. degree coupled with a relevant undergraduate degree, or through an undergraduate degree in business, management, or commerce coupled with a discipline-based master’s degree). If the breadth and depth requirements are completed prior to entry to the Ph.D. program, then the candidate is expected to complete the program in four years. If additional course work is required, then the candidate may need to spend an additional year in the program.
3. The applicant should have three individuals submit letters of reference to the faculty.
4. The applicant should have official scores on the GMAT or GRE submitted to the faculty.
5. The applicant should submit a letter to the faculty describing her/his interests and reasons for seeking doctoral education.

**Program Requirements**
1. Candidates should spend the first two years of the program on campus, registered as full time students. During this time, they are normally expected to complete their course work. At the end of this period, they are expected to take the comprehensive examination.
2. The program consists of a major field and two minor fields of study.
3. A minimum of two full courses (four half-courses) will comprise the major field. These will normally be taken from the Management courses at the 3000 level, but additional courses from other departments may be required.
4. The two minor fields are usually taken in cognate departments. Each minor field comprises at least one full course (two half-courses).
5. In order to gain exposure to the breadth of the M.B.A. program, three courses from the following list or their equivalents are required: MGT 1221H Accounting I or MGT 1222H Accounting II MGT 1241H Operations Management
MGT 1301H Fundamentals of Strategic Management
MGT 1330H Business Finance
MGT 1350H Marketing
MGT 1362H Administrative Theory

The three courses are to be chosen in consultation with the Area Ph.D. Supervisor. The choice excludes any course from the student’s major field of study. No student will be allowed to defend a dissertation proposal until the distribution requirements are completed.

6 A candidate is expected to be qualified in the three basic disciplines essential to the study of Management: economics, behavioural science, and quantitative analysis.

7 Upon completion of the courses in the major and minor fields, the candidate is expected to pass comprehensive examinations in the major field.

8 A thesis embodying the results of original investigation must be submitted and defended at a final oral examination in accordance with the regulations of the School of Graduate Studies.

The Department should be consulted each session as to course offerings.

Courses normally restricted to Ph.D. students
MGT 3001H Research Methods in Strategic Management
MGT 3002H Advanced Topics in Strategy and Organization
MGT 3003H Advanced Topics in Strategy and Economics
MGT 3004H Advanced Topics in International Strategy
MGT 3005H Strategic Management Workshop
MGT 3020H Financial Accounting: Theory and Empirical Research
MGT 3021H Managerial Accounting Research Methods
MGT 3022H Auditing Seminar
MGT 3023H Topics in Accounting Research
MGT 3025H Workshop in Accounting
MGT 3030H Financial Theory I
MGT 3031H Financial Theory II
MGT 3032H Empirical Methods in Finance
MGT 3033H Current Topics in Finance
MGT 3034H Capital Markets Workshop
MGT 3041H Seminar in Operations Management
MGT 3045H Operations Planning and Control II
MGT 3046H Advanced Topics in Operations Management: Services and Logistics

MGT 3051H Marketing Theory I: Consumer Behaviour
MGT 3052H Marketing Theory II: Strategy
MGT 3053H Behavioural Research Methods in Marketing
MGT 3054H Current Topics in Consumer Behaviour
MGT 3055H Econometric Methods in Marketing
MGT 3056H Current Topics in Marketing Strategy
MGT 3057H Workshop in Marketing (Credit/No Credit)
MGT 3058H The Psychology of Judgement and Decision Making
MGT 3060H Advances in Human Resource Management
MGT 3062H Methods and Research in Organizational Behaviour and Industrial Relations
MGT 3063H Advanced Topics in Organization Theory
MGT 3064H Advanced Topics in Organizational Behaviour
MGT 3065H New Directions in Organizational Research
MGT 3090H Reading Course in Approved Field
MGT 3091H Reading Course in Approved Field

MANAGEMENT AND ECONOMICS Collaborative Ph.D. Program
Consult separate entry in this calendar.
Management and Economics (Collaborative Program)

Program Committee
P. H. Pauly, MA, PhD/Management
H. D. Benjamin, BSc, MA, PhD/Economics

Collaborative Ph.D. Program in Management and Economics
The Rotman School of Management and the Department of Economics offer a limited enrollment collaborative program in Management and Economics. The student will undertake a program of study that includes:

1. developing a basic understanding in one of the core areas of management (accounting, economics, finance, marketing, operations management, organizational behaviour).
2. developing an in-depth understanding of economics and econometrics (Ph.D.-level work), and
3. carrying out Ph.D.-level work in one of the areas of management.

At present, only finance is available in the collaborative program.

Admission to the program is by permission of the graduate coordinators in both Economics and Management. Prospective candidates should apply either to the Department of Economics or the Rotman School of Management; however, they must meet the Ph.D. admission requirements of the home department.
Graduate courses and research opportunities are offered to qualified candidates in a wide range of subjects.

Typical subjects in chemical metallurgy involve a study of the equilibria existing during the reduction of oxides with carbon and metals, properties of iron and steelmaking slags, the fundamental properties of fused salt solutions, fused salt electrolysis of reactive metals, kinetics of high-temperature reactions, mathematical modelling of metallurgical processes, process metallurgy, and hydrometallurgy.

Typical physical metallurgy and materials science subjects deal with the structure and properties of metallic, ceramic, and polymeric materials in such fields as plastic deformation, surface properties, electron microscopy, biomaterials, nuclear materials, metal-matrix composites (MMCs), metallic glasses, corrosion, fatigue, welding and bonding, phase transformations and solidification. These studies are all related to the general problem of understanding structure-property-processing relationships in materials.

Degree of Master of Engineering
Candidates are accepted under the general regulations. A candidate will enrol in a field of study in consultation with a designated professor who will act as supervisor throughout the candidate’s program. For students with adequate undergraduate preparation, the normal program will include 10 half-courses; a project may be substituted for 3 half-courses. The project must be presented at an oral examination.

Degree of Master of Applied Science
Candidates for this degree are accepted under the general regulations. The program of study will normally include four half-courses, including the M.A.Sc. Graduate Research Seminar, and a thesis. The course work normally selected will include the departmental seminar, which is a half-year course, and three half-courses, one of which would normally be taken inside the Department. The required thesis is based upon research work carried out in the Department in the fields of chemical or physical metallurgy or materials science. The thesis must be presented at an oral examination.

Degree of Doctor of Philosophy
Candidates for this degree will normally be expected to have completed the master’s program before entering the Ph.D. program. The program of study normally will include four half-courses, including the Ph.D. Graduate Research Seminar, and a thesis. The major subject in a
program will be chemical metallurgy, physical metallurgy, or materials science. One of the three half-courses would normally be taken inside the Department. The required thesis is based upon research work carried out in the Department in the fields of chemical or physical metallurgy or materials science.

Within 12 months of initial enrolment in the Ph.D. program, all candidates must pass a general qualifying examination based on the course material taken within the Department and on background knowledge in the candidate's field of specialization.

Program Transfer
Very strong M.A.Sc. candidates may apply to transfer to the Ph.D. program after completing one year of the M.A.Sc. program. Regulations governing such transfers are available in the Materials Science and Engineering Graduate Studies office. A student who is permitted such a transfer must complete only the Ph.D. Graduate Research Seminar in addition to the four courses completed in the M.A.Sc. program.

Environmental Engineering (Collaborative Program)
Several graduate departments, including Materials Science and Engineering, participate in the collaborative program in Environmental Engineering at the University of Toronto. Consult the Environmental Engineering entry in this calendar for details.

Integrated Manufacturing (Collaborative Program)
Several graduate departments, including Materials Science and Engineering, participate in the collaborative graduate program in Integrated Manufacturing. In addition to the M.Eng. degree obtained in their graduate unit, and upon successful completion of all requirements, students will receive the notation "Completed Collaborative Program in Integrated Manufacturing" on their transcript. Consult the Integrated Manufacturing entry in this calendar for details.

Courses of Instruction
A schedule is available from the Coordinator of Graduate Studies at the beginning of the fall session listing the time and room location for each course offered.

All students wishing to undertake graduate research in the Department of Materials Science and Engineering must successfully complete a two-day intensive occupational health and safety training program which will normally take place during the week immediately preceding the commencement of graduate courses.

More details concerning this course will be provided by the Coordinator of Graduate Studies once admission to a graduate program has been confirmed.

Note: Not all courses are offered every year. Please consult the Department for a listing of courses being offered this year.

Materials Science
MMS 1000H+ Graduate Research Seminar
M.A.Sc./Staff
MMS 1013H Growth and Characterization of Semiconductors/H. E. Ruda
MMS 1014H Interfacial Phenomena/Staff

The master's degree program in Mathematical Finance was developed to respond to the rapidly changing demands in the financial services industry. The program is multidisciplinary, drawing upon the expertise of the Faculties of Applied Science and Engineering, Arts and Science, and Management. As a fully integrated course of study, it is a computationally intensive program designed to provide a strong academic education within the practical framework of applied finance. Note that special tuition conditions apply for this program.

Degree of Master of Mathematical Finance

Admission Requirements
1. Candidates will be admitted under the general regulations of the School of Graduate Studies. To be considered for admission, applicants must have a four-year University of Toronto bachelor’s degree, or its equivalent, in a quantitative, technical discipline, with a minimum of a mid-B standing in the final two years. In addition, when proof of English language facility is acquired for admission, candidates must attain a score of at least 580/237 on the TOEFL with 5.0 on the TWE.
2. Applicants must also show evidence of strong mathematical ability. Appropriate workplace experience will be considered in lieu of formal education.
3. Admission to the program is competitive. Those accepted into the program will normally have achieved a standing considerably higher than the minimum mid-B standing or have demonstrated exceptional ability through appropriate workplace experience. In all cases, candidates must satisfy the admissions committee of their ability to do rigorous quantitative analysis at an advanced level.
4. The broad background required for this program makes it likely that many strong applicants will not possess all the background requirements. It is expected that applicants will have extra depth in certain areas and need to do additional work in others. Admission may be conditional upon the applicant’s satisfactory completion of the required background material. Applicants should submit a written statement of approximately 300 words outlining their objectives for entering the program. Applicants should also explain how their background is appropriate. An interview may be required.

Program Requirements
1. The program of study begins in mid-August and will normally extend over twelve consecutive months during which the student is full-time.
2. The program includes a four-month internship during the second session. Students will be responsible for obtaining their own internship. In cases where the student is taking a leave of absence from an appropriate job, it is expected that the student will return to this job for the internship. In all cases, the Director must approve the placement.
3. Students will proceed through the program as a group, following a common course of
study. The course of study will be fully inte-
grated and computer-laboratory intensive. 
Course projects and assignments will be de-
signed to integrate the material learned from a 
variety of the courses and to utilize it in a prac-
tical context. Excellent communication and pre-
sentation skills will be emphasized in both the 
oral and written components of the projects. 

4 In addition to successful completion of all 
courses listed below, a course in Practical Risk 
Management must be completed in order to 
qualify for the degree.

Courses of Instruction
Courses are offered in modules. A module will 
consist of a four-week unit with a minimum of 
three contact hours per week, or its equivalent. 
A large portion of the learning for the module 
will take place outside of class through carefully 
designed computer projects and group study. 
The courses have been packaged in units of 
one, two, three, or four modules, and the 
course weight will be equal to the number of 
modules; for example, a course with three mod-
ules will have a weight of three credit hours. Six 
modules will be considered the equivalent of 
one full course equivalent in a standard format. 
The third digit of the four-digit course number 
determines the course weight. 
Third Digit Notation: 
1 = one-third of a half-course 
2 = two-thirds of a half-course 
3 = one half-course 
4 = two-thirds of a full course

The Department of Mathematics offers opportunities for research in the fields of pure mathematics and applied mathematics, including, but not restricted to, the fields of real and complex analysis, ordinary and partial differential equa-
tions, harmonic analysis, nonlinear analysis, several complex variables, functional analysis, operator theory, $C^*$-algebras, ergodic theory, group theory, analytic and algebraic number theory, Lie groups and Lie algebras, automorphic forms, commutative algebra, algebraic geometry, singularity theory, differential geometry, symplectic geometry, classical synthetic geometry, algebraic topology, set theory, set-theoretic topology, mathematical physics, fluid mechanics, probability (in cooperation with the Department of Statistics), combinatorics, optimization, control theory, dynamical systems, computer algebra, cryptography, and mathematical finance.

More information about this program and courses may be found in the brochure *Graduate Studies in Mathematics at the University of Toronto*.

**Degree of Master of Science**
Candidates are accepted under the general regulations. Candidates must also show evidence of an excellent academic background and mathematical ability.

Candidates are accepted into a 12-month, 16-month, or 24-month program for the degree of Master of Science. It is also possible to earn the M.Sc. degree through part-time studies.

Candidates for the 12-month program are required either (a) to take and pass three approved full-year courses and to take a supervised research project for M.Sc. students (MAT 4000Y), or its equivalent, or (b) to take and pass two approved full-year courses and submit an acceptable thesis. Two approved half-year courses are considered the equivalent of a full-year course. Two prerequisite courses may, with approval, be substituted for one course of the program. Students may, with approval, take courses outside the Department as part of a coherent program.

Candidates who do not have a complete undergraduate background in mathematics may be accepted into a 16-month or 24-month program which includes an approved selection of prerequisite and other courses in addition to the requirements of the 12-month program. This possibility may interest students who have some background in a subject in which mathematics is applied and/or who are interested in industrial applications of mathematics.

Candidates who study part-time for the M.Sc. must (at a minimum) satisfy the requirements of the 12-month program.

**Degree of Doctor of Philosophy**
Candidates for this degree must normally have a master's degree from a recognized university. However, exceptionally strong B.Sc. students may apply for direct admission to the Ph.D. program. In all cases candidates must satisfy the Department of their ability to do independent research at an advanced level. They must show evidence of an excellent academic background and mathematical ability.

The Ph.D. program normally takes four years of full-time study to complete. Candidates must complete at least six half-courses (or the equivalent combination of half-year and full-year courses). Candidates are required to pass a comprehensive examination in basic mathematics before beginning an area of specialization. This examination should be taken as soon as possible, and not later than the beginning of the third session of Ph.D. study. The usual examination covers the three general areas of analysis, algebra, and topology, at the level of the first-year graduate courses offered by the Department in these subjects. Candidates planning to specialize in applied mathematics must take the analysis and/or algebra portion of the comprehensive examination, but may substitute from several areas of applied mathematics for the remaining portions. Candidates are also required to pass a specialist oral examination or to give a seminar presentation in their particular field of study before embarking on serious thesis research. The main requirement of the degree is an acceptable thesis. This will embody original research of a standard that warrants publication in the research literature.

**Courses of Instruction**
Each year the Department offers a selection of courses chosen from the following list, with the possibility of further additions. The core courses, MAT 1000Y, 1001H, 1100Y, 1300Y, will be offered each year; the complete list of courses will be available from the Department in May. In addition, it may be possible for a student to arrange to take one of the listed courses as an individual reading course. Students should consult the office of the Coordinator at the start of the academic year.

Ph.D. students are expected to attend and contribute to seminars in the research areas.

Members Emeriti
A. H. Abdelmessih, BME, MS, PhD, PEng
D. L. Allen, BSc, BE, MSc, PhD, FCSME, FEIC, PEng
Qualified candidates are accepted for study in a wide range of topics, spanning the breadth of Mechanical and Industrial Engineering, including dynamic systems, vibrations, controls, robotics, solid mechanics, thermodynamics, combustion, heat transfer, fluid mechanics, environmental engineering, design, computer-aided engineering, flexible manufacturing, enterprise integration, information systems, fuzzy logic, operations research, production planning and scheduling, human factors/ergonomics, technology-society studies, and other related topics. In addition, the Department of Mechanical and Industrial Engineering participates with other graduate units to offer the following collaborative programs within the University:

1. Biomedical Engineering
2. Environmental Engineering
3. Integrated Manufacturing
4. Wood Products Engineering

Details of each of these programs are described in separate entries in this calendar.

Degree Programs
A brief outline of the available degree programs and admission requirements is given below. Further details may be obtained from the Mechanical and Industrial Engineering Graduate Studies Office or the current booklet, Graduate Studies in Mechanical and Industrial Engineering.

Students registered in a graduate degree program, which involves research, are required to participate in the non-credit seminar course JDE 1000H Ethics in Research during their first or second session of registration.

Degree of Master of Applied Science
This degree program provides candidates with an opportunity to pursue research-intensive advanced studies in a particular field of interest. At the beginning of each candidate's program, a professor in the Department will be identified as the supervisor. In consultation with the supervisor, each candidate will prepare a program of study which must be approved by the Department. For students with an adequate undergraduate background, the program will normally consist of five graduate half-courses and a thesis.

Applicants for the Master of Applied Science program or the Master of Engineering program must normally have a minimum average of B+, or equivalent, in each of the final two years of an accredited four-year undergraduate program in engineering or a closely related field. Additional factors considered in assessing applicants are publications, work experience, the school and program to which each previous degree pertains, evidence of exceptional communication skills, references, and the availability of financial resources, space, and suitable supervision.

Degree of Master of Engineering
This program is designed for candidates preparing for advanced professional activity; it is not a research-oriented degree. The program normally requires a total of 10 half-courses, or 7 half-courses plus a supervised project. A plurality of the courses should be taught by the Department of Mechanical and Industrial Engineering. The program may be taken on a full-time or part-time basis; some courses are scheduled during evening hours to accommodate part-time students. Admission requirements are the same as those listed above for the Master of Applied Science students.

Degree of Doctor of Philosophy
This program is for students who are planning a career in which they will be performing or directing research at the most advanced level. Candidates for this degree must normally have a master's degree from a recognized university. Admission to a Ph.D. program is reserved for those who are able to present evidence of superior academic and research ability. Exceptionally strong bachelor's students may apply directly to a Ph.D. program.

At the beginning of each candidate's program, a professor in the Department will be identified as the supervisor and will guide the student in the research program and selection of courses. Ph.D. candidates must meet the minimum departmental standard in course work. For students with an appropriate background, the program will normally consist of five half-courses and a thesis. Two of the five half-courses must be core courses selected from the list below. Students admitted directly to a Ph.D. program with a bachelor's degree are required to complete eight half-courses (two must be core courses) plus a thesis. Ph.D. candidates are required to be on campus full-time for a minimum of two consecutive academic years. Normally no more than four years are required to complete the program of study.

Each Ph.D. candidate must pass a qualifying examination, a seminar presentation, and two oral examinations on the research thesis.

Program Transfer
Very strong M.A.Sc. candidates may apply to transfer to the Ph.D. program after completing only one year of the M.A.Sc. program. Regulations governing such transfers are available in the Mechanical and Industrial Engineering...
Graduate Studies Office. A student who is permitted such a transfer must complete a total of eight half-courses in the graduate program.

English Language Facility
When proof of English language facility is required for admission, candidates must attain a score of at least 237 on the computer-based TOEFL or 580 on the paper-based TOEFL (Test of English as a Foreign Language) and 4.0 on the TWE (Test of Written English). A score of 85 or better from MELAB (Michigan English Language Assessment Battery) or 7.0 or better from IELTS (International English Language Testing System) is also acceptable.

Courses of Instruction
See the departmental graduate office for a schedule of available courses.

Core Courses
MIE 1001H Dynamics II/J. W. Zu
MIE 1101H Thermodynamics II/C. A. Ward
MIE 1201H Fluid Mechanics III/I. G. Currie
MIE 1301H Solid Mechanics/W. L. Cleghorn
MIE 1501H Information Systems I: Data and Knowledge Modelling/M. S. Fox
MIE 1801H Engineering Analysis III/A. Mandelis
MIE 1901H Technology, Society, and the Environment I/W. H. Vanderburg (offered jointly with the Institute for Environmental Studies)

One of:
MIE 1403H Analytical Methods in Human Factors Research/P. Milgram
MIE 1406H Cognitive Work Analysis/K. J. Vicente
MIE 1408H Theoretical Foundations of Human Factors/K. J. Vicente

One of:
MIE 1403H Analytical Methods in Human Factors Research/P. Milgram
MIE 1406H Cognitive Work Analysis/K. J. Vicente
MIE 1408H Theoretical Foundations of Human Factors/K. J. Vicente

Robotics, Dynamic Systems and Controls
MIE 1001H Dynamics II/J. W. Zu
MIE 1002H Dynamics III/Staff
MIE 1005H Theory of Vibrations I/W. L. Cleghorn
MIE 1009H Applied Acoustics/D. L. Allen
MIE 1043H Control Systems II/Staff
MIE 1062H Robot Kinematics and Dynamics/A. A. Goldenberg
MIE 1063H Introduction to Theoretical Kinematics/A. A. Goldenberg
MIE 1064H Control Analysis Methods with Applications to Robotics/J. K. Mills
MIE 1066H Robot Mechanics and Control/A. A. Goldenberg

Thermal Sciences
MIE 1101H Thermodynamics II/C. A. Ward
MIE 1102H Fuel Cell Kinetics/C. A. Ward
MIE 1107H Statistical Thermodynamics/C. A. Ward
MIE 1109H Surface Phenomena/D. Li
MIE 1110H Nonequilibrium Thermodynamics/C. A. Ward
MIE 1111H Conduction Heat Transfer/A. Mandelis
MIE 1112H Advanced Topics in Conduction Heat Transfer/A. Mandelis
MIE 1113H Radiant Heat Transfer/S. McCahan
MIE 1115H Heat Transfer with Phase Change/S. Chandra
MIE 1116H Design and Analysis of Heat Exchangers/Staff
MIE 1118H Partially Ionized Gases/J. Mostaghimi
MIE 1122H Combustion Engine Processes/J. S. Wallace
MIE 1123H Physical Aspects of Combustion/J. S. Wallace
MIE 1124H Combustion in I. C. Engines/J. S. Wallace
MIE 1125H Advanced Topics in Combustion/J. S. Wallace, S. Chandra
MIE 1126H Diffusion-Wave Fields: Mathematical Methods and Analytical Case Studies in the Thermal, Electronic and Biomedical Sciences/A. Mandelis
MIE 1176H Optoelectronic Energy Conversion II/A. Mandelis
MIE 1178H Direct Energy Conversion and Corrosion/Staff
JEL 1704H Introduction to Lasers/A. Mandelis
MIE 511H Problems in Heat Transfer/Staff
MIE 513H Combustion and Incineration/S. McCahan

Fluid Mechanics
MIE 1201H Fluid Mechanics III/I. G. Currie
MIE 1202H Fluid Mechanics IV/I. G. Currie
MIE 1203H Hydrodynamics/Staff
MIE 1206H Non-Newtonian Fluid Mechanics/D. F. James

The Department of Medical Biophysics, an interdisciplinary department with three subsections, Cell and Molecular Biology, Molecular and Structural Biology, and Medical Physics, is located primarily at the Ontario Cancer Institute and the Sunnybrook and Women's College Health Sciences Centre. The Department offers opportunities for research in a variety of biological problems; projects which cut across the conventional boundaries of physics, engineering, chemistry, biology, and medicine are encouraged. The Department emphasizes basic and applied research related to cancer. Projects include the following areas: tumour biology, radiobiology, membrane function, molecular interactions, gene expression, cell differentiation and growth control, viral and chemical carcinogenesis, cellular and molecular immunology, hemopoiesis, macromolecular structure via electron microscopy, x-ray crystallography and NMR spectroscopy, the physics of radiation therapy and diagnostic imaging, development of imaging systems involving ultrasound, nuclear magnetic resonance, and electron optics.

For detailed information, please visit the departmental Web site listed above.

Degree of Master of Science
Candidates are accepted under the general regulations. Students with diverse backgrounds are encouraged to apply. Applicants from outside Canada are required to provide GRE (general) scores with their application. All candidates with a B.Sc. degree are enrolled in the M.Sc. program; qualified students can reclassify for the Ph.D. degree during their second year. The course requirements will depend on the subject chosen for study and on the background of the candidate. The M.Sc. program usually requires two years and includes both course work and research. To qualify for a degree, the student must successfully complete MBP 1015Y Biophysics Seminar, two additional full-course equivalents, and pass an oral examination on the topic of the thesis. It should be noted that admission to the Ph.D. program is highly selective and attainment of minimal standing as an M.Sc. student does not guarantee admission to the Ph.D. program.

Degree of Doctor of Philosophy
Candidates for the Ph.D. degree can be accepted by two routes, either via reclassification from the M.Sc. program or under the general regulations after completion of an M.Sc. degree in biological, physical, chemical, or medical sciences.

Except by special arrangements, candidates are required to be on campus and participating full-time until all program requirements are completed. Because of the broad range of topics available for thesis research and because of the different backgrounds of students accepted in the Department, each student will, in consultation with his or her supervisor, plan a program of study that provides the appropriate background for the area of investigation. All candidates are required to complete a minimum of three full-course credits. Candidates who have completed an M.Sc. degree in Medical Biophysics will receive credit for two full-course equivalents and will have only one full-course equivalent to complete to fulfill the three-course credit requirement. Candidates who completed their M.Sc. degree in a department other than Medical Biophysics may request exemption for one full-course credit.
M.Sc. students who transfer to the doctoral program may receive partial credit towards doctoral course requirements for courses taken while in the M.Sc. program.

**Collaborative Programs**

**Biomolecular Structure (Collaborative Program)**

Ph.D. students in the Molecular and Structural Biology stream may choose to enrol in this interdepartmental program. An additional course may be required. Consult the separate entry in this calendar for more details.

**Cardiovascular Sciences (Collaborative Program)**

Students in the Department of Medical Biophysics may choose to enrol in this interdepartmental program. Students follow a program of study acceptable to both the participating unit and the Cardiovascular Sciences program. An additional course is required for Ph.D. students. Upon successful completion of the requirements, students receive, in addition to the M.Sc. or Ph.D. degree in their home graduate units, a separate certificate from the program and the notation "Completed Collaborative Program in Cardiovascular Sciences" on their transcript. Consult the separate entry in this calendar for more details.

**Developmental Biology (Collaborative Program)**

Students in this Department can participate in the Developmental Biology Collaborative Program. For more details on this collaborative program, consult the Developmental Biology entry in this calendar.

Introduction

The Institute of Medical Science (IMS) is dedicated to the training of medical researchers and the dissemination of new knowledge relevant to human biology and pathobiology. It was established in 1968 as a graduate unit within the School of Graduate Studies to foster education and scholarship in the clinical departments of the Faculty of Medicine.

The IMS provides a wide range of opportunities for multidisciplinary research in clinical and basic medical science and related fields. Graduate supervisors are world-class researchers located throughout the health sciences network, including hospital research institutes, teaching hospitals, and university basic science departments.

Qualified university graduates with a professional health science degree (e.g., M.D., B.Sc.N.) or an undergraduate arts and science degree of appropriate background who wish to pursue graduate studies in basic or clinical biomedical sciences are encouraged to apply.

Degree candidates will have the opportunity to conduct research in one of three training streams:

1. Biomedical
2. Clinical
3. Health services and population health
Each stream offers a variety of multidisciplinary studies in fields such as cardiovascular sciences, bioethics, neuroscience, membrane biology, respiratory medicine, and psychosomatic medicine.

The IMS participates in the Royal College of Physicians and Surgeons Clinician Investigator Program (CIP).

**English Language Proficiency**

Applicants whose primary language is not English, and who graduated from a university where the language of instruction was not English, must demonstrate facility in the English language through the successful completion of one of the following English language proficiency tests:

- **Test of English as a Foreign Language (TOEFL):** a minimum score of 600 on the paper-based test or a minimum score of 250 on the computer-based test together with a minimum score of at least 5 on either the Test of Written English (TWE) or Essay Rating.

- **Michigan English Language Assessment Battery (MELAB):** minimum score of 87.

- **International English Language Testing System (IELTS):** minimum score of 7.5.

**Degree of Master of Science**

Candidates for this degree are admitted under the general regulations of the School of Graduate Studies and must have graduated with a four-year B.Sc. or an M.D. degree from a recognized university and academic credentials and background preparation appropriate to the field of study. Competitive applicants should have an A- average in their final year of undergraduate study and an A- cumulative average over three of the four total years of study. Candidates lacking adequate background in biological, natural, or social sciences may be required to take undergraduate or graduate courses considered necessary to provide a proper basis for their research.

The M.Sc. program usually requires two years and includes both course work and research. To qualify for this degree, one full graduate course credit in addition to MSC 1010Y M.Sc. Student Seminars is required. Each candidate must submit a thesis on their research and pass an oral thesis examination.

A Master of Science degree in the History of Medicine is offered by the Institute of Medical Science, primarily to graduate physicians (M.D. degree). This program requires submission and oral defence of a master's thesis and completion of MSC 1070Y History of Medicine; two full-course equivalents in the Graduate Department of History and in the Institute for the History and Philosophy of Science and Technology (IHPST); and MSC 1010Y M.Sc. Student Seminars. For students wishing to pursue a doctoral degree in IHPST, one of the courses should be HPS 5006H or HPS 1014Y.

**Degree of Master of Health Science in Bioethics**

The M.H.Sc. program is offered in collaboration with the University of Toronto Joint Centre for Bioethics and is directed to practitioners who wish to increase their knowledge and skills in bioethics by assisting them in their roles as clinician/teachers, as members of bioethics committees, etc. It is a professional master's degree program that does not require a thesis.

Please refer to the Bioethics entry in this calendar for more information about this program.

**Degree of Master of Science in Biomedical Communications**

The M.Sc.BMC program is a two-year professional Master of Science program that involves the artist in medical and health education and research.

Please refer to the Biomedical Communications entry in this calendar for more information about this program.

**Degree of Doctor of Philosophy**

Candidates for the Ph.D. degree are accepted via one of three routes:

1. **After completion of a M.Sc. degree (with a M.Sc. thesis) with at least A- standing from a recognized university.** Such students will be expected to complete a minimum of one full graduate course equivalent, plus MSC 1011Y Ph.D. Student Seminars.

2. **Transfer from the IMS M.Sc. program.** Outstanding students in the M.Sc. program may be considered for reclassification into the Ph.D. program without writing a M.Sc. thesis. Such students must have completed one full graduate course equivalent with a minimum A-average, plus MSC 1010Y M.Sc. Student Seminars. If recommended, the student will be evaluated in an oral transfer examination within 18-24 months of initial graduate registration. The successful candidate will enter the Ph.D. program and will be expected to complete a minimum of two full graduate course equivalents (including those already com-
completed in the M.Sc.), plus MSC 1011Y Ph.D. Student Seminars. Alternatively, the Exam Committee may decide that the student must complete the M.Sc. degree before being considered for admission to the Ph.D. program.

3 Direct Entry into the Ph.D. Program without having completed a M.Sc. degree. Direct-entry Ph.D. students will be required to pass a qualifying examination within 18-24 months of entry and will be expected to complete a minimum of two full graduate course equivalents, plus MSC 1011Y Ph.D. Student Seminars.

The Ph.D. graduate program emphasizes research work. Students may be required to take extra courses in addition to the degree requirements listed above. Students are expected to be on campus and participating full time until all program requirements are completed. It is expected that courses will be completed in the first year, and that the research, written thesis, and defence will be completed by the end of year 3 or 4. To qualify for the Ph.D. degree, a thesis must be submitted and the student must pass an internal examination before proceeding to the final Ph.D. oral examination conducted by the School of Graduate Studies.

Collaborative Programs
The Institute of Medical Science participates in the following collaborative programs:
Addiction Studies
Aging and the Life Course
Bioethics
Biomedical Engineering
Cardiovascular Sciences
Environment and Health (see Environmental Studies entry)
Knowledge Media Design
Neuroscience
Proteomics and Bioinformatics
Toxicology
For more details, consult the separate entries in this calendar.

*Courses which may continue over a program. The course is credited when completed.*
Combined Doctor of Medicine/Doctor of Philosophy Program

Nature of the Program
The M.D./Ph.D. program is offered jointly by the Faculty of Medicine and the School of Graduate Studies. Its purpose is to provide selected and highly qualified students with the opportunity to combine their medical school experience with intensive scientific training in a chosen field. Students in this program are eligible for financial support.

Students will carry out research under the supervision of a member of a graduate department or institute at the University and should consult the appropriate department or institute regarding specific research programs.

Admission Requirements
Candidates for admission to the M.D./Ph.D. program must be accepted by the Faculty of Medicine and meet the requirements of the School of Graduate Studies and the department in which they intend to carry out their graduate studies. Students who are undertaking graduate study at the master’s level or are already in first year medical school are also eligible for this program.

Program Requirements
Candidates for admission to the M.D./Ph.D. program may pursue the dual degrees via an integrated or a sequential route.

In the fully integrated approach, students with a four-year bachelor's degree will enter the M.D./Ph.D. program and, within a period not exceeding six years, complete the requirements of the first two years of the M.D. program and all requirements of the Ph.D. program. During this time a predetermined program of integration will be pursued which provides time allocation for both medical school and graduate study. On completion of the Ph.D. degree, students will return full time to the medical program.

In the sequential model, students with a four-year bachelor's degree enter the medical program on a full-time basis. After 18 months of medical school, they then proceed to full-time graduate work until completion of the Ph.D. degree. Students then return to medical school to complete the last 2½ years.

Organization and Program

The Centre for Medieval Studies provides inter-departmental programs in the medieval period. Students are expected to cross the limits of traditional subjects, and research is especially encouraged in often-neglected boundary areas between traditional departments. The Centre offers its students training in basic skills and tools in order to read the materials remaining from the medieval past, and it encourages them to explore with learning and imagination our one-thousand-year segment of the Western artistic and cultural tradition.

Application

Candidates for the M.A. must have an average of at least a B+ standing in their previous course work and must satisfy the Centre’s additional admission requirements stated here. Applicants must arrange for two supporting letters to be sent to the Director. They will also be asked to complete forms, available from the Centre, in which they state the reasons for undertaking graduate studies in the medieval area and their qualifications for applying to do so.

Medieval Latin

All students entering the Centre are asked to improve their proficiency in Latin before registration, since there are Medieval Latin requirements for all degrees. Examinations in Medieval Latin are set at the beginning of the fall term and at the end of the spring term. All incoming students must take the Medieval Latin examination at the beginning of the fall term for placement purposes.

Candidates for the M.A. degree, full-time and part-time, must pass the M.A. Latin examination no later than September at the end of the second year after enrolment in the M.A. program.

Course training in Latin is given at four levels. A non-credit course in Classical Latin grammar and readings is given for those with little prior knowledge. MST 1000Y Introductory Medieval Latin is the M.A.-level course, and MST 1001Y Intermediate Medieval Latin is the Ph.D.-level course. These two courses lead specifically to the M.A. and Ph.D. Latin examinations given in the spring.

M.A. students who pass the M.A. Latin examination on arrival will receive advanced standing in Latin equivalent to a credit in MST 1000Y, and will be required to take only three more courses for the M.A.; however, those interested in eventually proceeding to the Ph.D. are urged to take an additional Latin course in order to satisfy the Ph.D. requirement as early as possible.

Advanced seminars are also available for those wishing to study Medieval Latin literature, Vulgar Latin philology, or the like in more detail.

Degree of Master of Arts

A candidate for the M.A. must have completed a four-year B.A., or its equivalent, in which course work in the medieval period formed part of the program. M.A. students may be full-time or part-time; full-time students may be admitted to either a one-year or a two-year degree depending on their previous training in Latin and medieval studies.

Students may obtain an M.A. in medieval studies by course work or by a combination of course work and thesis. In the course work option, the student must successfully complete four courses in medieval subjects; in the thesis option, three courses are required in addition to the thesis. In either case, one of the M.A. courses must be MST 1000Y Introductory Medieval Latin (or advanced credit therein). An M.A. thesis must be on a subject approved by the Centre, and the topic must be submitted to the Centre by November 30 of the M.A. year. Candidates who wish to present themselves for the degree at the Fall Convocation must submit two unbound copies of their thesis not later than September 1. For the Spring Convocation, the latest date of submission is March 1.

Degree of Doctor of Philosophy

Candidates must satisfy the Centre of their ability to do independent research of high quality; admission to the Ph.D. program also requires either

a a four-year University of Toronto bachelor’s degree, or its equivalent from a recognized university, with an average grade of at least A- in the applicant’s overall program, or
b a University of Toronto master’s degree in medieval studies or a related field, or its

Courses which may continue over a program. The course is graded when completed.
equivalent from a recognized university, with an average grade of at least A in the applicant’s overall program.

In either case, candidates must also pass the M.A. Latin examination before they may be admitted to the Ph.D. program. Students in the Centre’s M.A. program must apply formally for admission to the Ph.D. program on the same basis as all other candidates.

The Ph.D. is offered only on a full-time basis. During the first two years, students must take a minimum of three full courses or their equivalent, including one full course or two half-courses in one minor subject. In view of the Centre’s interdepartmental nature, courses in medieval philosophy, history, music, English, and so on, that are related to the general area of the major field may be counted as minors, as long as they do not directly constitute part of the major field proposal. Students may fulfill the requirement of a minor subject by taking, for example, Latin Paleography, Latin Textual Criticism, or Diplomatics and Diplomatic Editing, provided that the doctoral dissertation itself is not based upon a similar editing of texts. MST 1001Y may not be counted as a minor subject or course requirement for the Ph.D.

In addition to their Ph.D. courses, students must pass the Ph.D. Latin examination, and the Centre’s examinations in the French and German languages. When students have qualified in these three languages, they may proceed to the major field examination whose purpose is to demonstrate both the student’s scholarly expertise in the particular area of the doctoral dissertation and a broader academic competence. Students should seek out a provisional supervisor with whom to discuss their plans for possible major and minor fields by the beginning of their second year. They will also need to contact two other academic advisors as early as possible, and no later than by the end of their second year. As soon as possible thereafter they should prepare a major field proposal according to the Centre’s guidelines. The proposal must be signed by all three of the student’s advisors and submitted to the Ph.D. Secretary for approval at least two months prior to the major field examination. After the proposal has been approved, the student’s three-member committee will help the candidate to prepare for that examination.

The outline of the student’s proposed doctoral dissertation should be worked out by the student in close consultation with the supervisor and the advisory committee. The complete Ph.D. dissertation prospectus should be prepared according to the Centre’s guidelines. The candidate will be required to defend the dissertation at the final oral examination. Five unbound copies of the dissertation must be submitted to the Centre at least ten weeks before the date of the oral examination; because of the mid-year break, students wishing to defend before January 31 must submit the dissertation by November 15.

Students can and do complete a Ph.D. in Medieval Studies in four years, but some students, depending upon their financial circumstances and background preparation, find that it takes longer than four years. Students intending to work in an area of medieval studies that requires the acquisition of one or more extra languages may find that it is not possible to complete a doctorate within four years.

Collaborative Programs
The Centre for Medieval Studies participates in the following collaborative programs: Ancient and Medieval Philosophy Book History and Print Culture Editing Medieval Texts Women’s Studies
For more details, consult the separate entries in this calendar.

Courses Available
Not all courses are offered every year. Please consult the Centre’s handbook which lists the courses the Centre for Medieval Studies will offer this year as well as those offered by associated departments. A graduate course is understood to require at least two hours per week of class meeting and such research hours as may be required. Attendance at graduate classes is mandatory.

MST courses marked (PR) have prerequisites; further information may be obtained from the Centre.

Degree of Master of Science

Admission Requirements
Candidates with a B.Sc. or M.D. degree or equivalent are usually accepted into the M.Sc. program. See "Degree of Doctor of Philosophy" below for transfer or admission to the Ph.D. program.

Residence Requirements
Candidates entering the M.Sc. program are required to spend 12 months in full-time attendance.

Program Requirements
Candidates in the master's program must complete MMG 1012Ho (or equivalent) and MMG 1015Yo (seminar course), and a thesis on a research project. To qualify for the degree, the student must defend the thesis at an oral examination.

Degree of Doctor of Philosophy

Admission Requirements
There are three possible routes to the Ph.D. degree:

1. Students may reclassify to the Ph.D. program during the first or second year in the M.Sc. program.
2. Students may be accepted into the Ph.D. program with a completed M.Sc. degree or equivalent from the University of Toronto or another recognized university.
3. Under exceptional circumstances, outstanding students with a B.Sc. degree, an M.D. degree, or equivalent, may be accepted directly into the Ph.D. program.

Residence Requirements
Candidates entering the doctoral program from a master's program, either through transfer or admission, are required to spend a minimum of two sessions in full-time attendance. Candidates entering the doctoral program from a bachelor's program are required to spend a minimum of three sessions in full-time attendance.

Program Requirements
Candidates in the doctoral program must complete courses equivalent to those required for the M.Sc. degree plus MMG 1012H\textsuperscript{o} (or equivalent), MMG 1015Y\textsuperscript{o} (seminar course), and a thesis on a research project.

\textsuperscript{o}Course which may continue over a program.

The course is graded when completed.
The course is graded when completed.

**Note:** Effective September 1, 2001, MMG 1012Y and MMG 1014Y will be replaced by MMG 1012H and MMG 1016H. Students enrolled previously in MMG 1012Y and MMG 1014Y will continue to take them.

**Degree of Master of Science in Genetic Counselling**

The Master of Science degree in genetic counselling is a full-time professional program that prepares students with the academic and clinical skills to provide genetic counselling. Genetic counselling is the provision of information to individuals and families regarding the occurrence, or risk of occurrence, of a genetic disorder or birth defect. Graduates may work as part of a health-care team to gather relevant medical and family histories, to guide further investigations, and to communicate probable or established diagnoses, mode of inheritance, natural history, risk of recurrence, and associated options. The ability to define and address the psychosocial issues associated with a genetic disorder in a family is central to the practice of genetic counselling. This field also incorporates teaching, administrative, and research skills, which are integrated in the curriculum.

This program has been accredited by the American Board of Genetic Counseling under the Recognized New Program Status as a graduate level training program.

**Admission Requirements**

Candidates for admission must have completed a four-year University of Toronto bachelor's degree with a B+ standing both cumulatively and in the final year, or its equivalent from another university. Additional requirements include prerequisite courses in biology, molecular biology/genetics, biochemistry, embryology/developmental biology, statistics, and psychology. The development of strong interpersonal skills as evidenced by extracurricular activity will be sought in both the application and interview processes. Conditional acceptance may be granted to outstanding candidates lacking the above prerequisite courses; in such instances, the courses deemed necessary must be completed with a B+ standing prior to admission.

**Residence Requirements**

Candidates entering the M.Sc. program in genetic counselling will be required to spend 18 months over a 2-year period in full-time attendance. Students will be encouraged to organize an intervening summer rotation in a geographic location of their choice.

**Program Requirements**

Candidates must complete all required course work, laboratory and clinical practica with a minimum B standing. Lectures, meetings, and rounds must be attended at a minimum of 85% of scheduled occurrences. There is no thesis requirement, but an independent research project consisting of a limited clinical research study, an extensive literature review from a novel viewpoint, or a new case presentation involving clinical, cytogenetic, and molecular work-up will be completed and presented both orally and in written format suitable for publication.

**Required Courses of Instruction**

- MSC 2010Y Advanced Concepts in Human Genetic Disease/D. Hogg
- MMG 1120Y Clinical Rotations I/D. Chitayat, C. Shuman
- MMG 1122Y Issues in Genetic Counselling I/M. Thomas
- MMG 1124Y Principles of Effective Counselling/R. Babul-Hirji
- MMG 1126Y Clinical Issues in Pregnancy and Child Development/C. Cytrynbaum

*Listing (course description) in the Faculty of Arts and Science Calendar, Molecular Genetics and Molecular Biology Program

*Course which may continue over a program.

The course is graded when completed.

The aim of the Museum Studies Program is to provide graduates with a suitable combination of academic and practical education in preparation for future involvement in a museum, art gallery, or related cultural institution or agency. To that end, the Program examines the theoretical body of knowledge of museology, balanced by practical experience and an internship at an appropriate museum, art gallery, or related organization. Although the academic area of concentration is that of museum studies, students also take courses in museum-related disciplines such as history, history of art, anthropology, history and philosophy of science and technology, natural sciences, education, or management.

Faculty in the program are from a range of disciplines within the University, as well as professional members of the museum community.

Degree of Master of Museum Studies

Admission Requirements
1 All applicants to the Program must have a four-year B.A. equivalent to that from the University of Toronto, with at least a B+ standing, to be considered for admission. Special consideration may be given to mature students.
2 Previous experience and/or demonstrated interest in museums, art galleries, or related cultural organizations is also considered.
3 In addition to the application and transcripts submitted to the School of Graduate Studies, the following documentation must be sent to Museum Studies:
   a applicant’s statement of intent
   b a résumé
   c three letters of recommendation

All completed applications must be received by January 15. Applicants will automatically be considered for University of Toronto Open Fellowships.

Program Requirements
1 The program of study, beginning in September, will normally extend over 20-22 consecutive months during which the student is full-time. A limited number of students may be accepted into the program for part-time study.
2 The Program consists of 8.5 full-course equivalents (FCEs), as follows. A summer internship is included. Students with appropriate graduate degrees may be granted advanced standing for up to 1.5 of the required 2.5 external FCEs. This applies only if candidates are pursuing work in the same cognate department of specialization within their Museum Studies Program as they did in their previous graduate program. The exhibition and management courses are taken in the second year.
   a Required courses totalling five FCEs. All students must complete the following core courses: MSL 1200H, MSL 1250H, MSL 2100H or MSL 2150H, MSL 2200H, MSL 3000Y, MSL 5000Y, and MSL 5002Y.
Elective courses totalling one FCE (2 half-courses) selected from courses offered within Museum Studies.

External elective courses totalling 2.5 FCEs completed in other graduate units at the University.

Candidates will be required to demonstrate a reading knowledge of a second language, normally French, before the end of their first year.

Courses of Instruction
Details about course offerings are available from the Museum Studies Program Web site www.utoronto.ca/museum.

Core Courses
- MSL 1200H Introduction to Museology and Public History
- MSL 1250H Contemporary Theories of Art and Culture
- MSL 2100H Fundamentals of Museum Planning and Management
- or MSL 2150H Museum Management: Projects, Fundraising and Human Resources
- MSL 2200H Museum Communication and Public Programs
- MSL 3000Y Internship: a three-month internship between the first and second years of study at a cultural institution related to the student's area of interest
- MSL 5000Y Research Paper: an original study of a museological topic
- MSL 5002Y Exhibition Project: preparation and production of an exhibition over the course of a full academic year (Credit/No Credit)

Elective Courses
- MSL 1020H Museum Environment
- MSL 2010H Curatorial Practice
- MSL 2030H History of Museums
- MSL 2040H Topics on Museums and Society
- MSL 5001H Special Studies: the Virtual Museum

External Elective Courses
A wide range of courses related to a student's academic and museological interests are available within the University.

Degree of Master of Arts

Admission Requirements
The M.A. is offered only in musicology/theory. Candidates are accepted under the general regulations. A candidate from this University with an average standing of mid-B or better over the final two years of the Bachelor of Arts special program in music or the Bachelor of Music program, or with equivalent standing from another university, will be eligible to apply. Applicants whose undergraduate degrees do not meet this standard may be required to take up to a full year of prerequisite courses. Applicants must submit an essay representative of their work in music history.

Program Requirements
M.A. candidates are admitted to a 2-session program and are required to take a minimum of 12 half-courses or equivalent. The Graduate Coordinator will advise students on course selection to establish a balance between the student’s interests and any perceived weaknesses in background preparation. All students will take MUS 1000H/1001H Introduction to Music Research VII in the first year. Elective courses may be taken in historical musicology,
ethnomusicology, and/or music theory. With the consent of the Department, up to one full-course equivalent may be taken in a graduate department other than music.

One language other than English is required. This will ordinarily be German except by petition to the Department. Students should fulfill the language requirement during the first year of the program. Any student wishing to petition for a language other than German must do so during the first year.

Degree of Master of Music

Admission Requirements
1. The degree of Master of Music (Mus.M.) is offered in composition, in music education, and in performance.
2. Applicants must hold the Bachelor of Music degree in the area of specialization from the University of Toronto with an average standing of mid-B or better over the final two years, or an equivalent program and standing from another university. Applicants whose undergraduate degree does not meet this standard may be required to take appropriate prerequisite courses.
3. Applicants in composition must submit several original compositions, at least one of which shall be with moderately large instrumentation.

Applicants in music education will normally be required to have had two years of teaching experience, although this requirement may be waived at the discretion of the Department. An interview with the music education faculty must be scheduled whenever possible; an assigned essay may be substituted for the interview with faculty approval. Appropriate letters of reference commenting on professional performance and promise are also required.

Applicants in performance must pass an audition. Applications will be accepted in the following areas: conducting, instrumental, vocal, piano performance with concentration in vocal and instrumental chamber music, performance with concentration in historical performance, and opera.

Program Requirements
1. Composition: A minimum of six full courses taken over two years is required for the degree, including MUS 3100Y and its continuation MUS 3105Y. Candidates may be required to take additional courses based on the results of diagnostic tests in musical analysis, counterpoint, and harmony given upon entrance. Under the guidance of an advisor, each student will prepare an original composition in large form or an electroacoustic composition of comparable dimensions which will be defended at a final oral examination.
2. Music Education: Candidates may proceed to the degree through a program of either full-time or part-time study. Eight half-course equivalents are required for the degree. Candidates must select a minimum of five half-course equivalents in music education, including MUS 2111H Research Methods in Music Education and MUS 2151H Philosophical Foundations of Music Education. Elective courses may be chosen from the M.A./Ph.D./Mus.M./Mus.Doc. courses of instruction and/or other graduate courses available in the University, subject to the approval of the Department. A major essay (MUS 2990Y) may be substituted for one full course with the approval of the Department. All candidates must pass a comprehensive examination in music education (written and oral). A description of the degree requirements and courses is available on request.
3. Performance (instrumental/vocal): In addition to applied instruction (24 lessons per year for 2 years) and two recitals, four full courses or equivalent are required. These must include one full course in music literature (MUS 4200Y, normally taken in the first year), and two half-courses selected from: MUS 4600H or MUS 4606H; MUS 4610H; MUS 4615H. Recitals may include a chamber music component with the approval of the Department.

Performance (opera): In addition to applied instruction (24 lessons per year for 2 years), four full courses are required. These include one full course in music literature (MUS 4200Y, taken in the first year), Advanced Performance Studies (MUS 4620Y, taken in the second year) and two full courses in Operatic Studies (MUS 4900Y and MUS 4901Y). Performance in operatic productions will be evaluated by a committee and assigned grades under Operatic Roles I (MUS 4966Y) and Operatic Roles II (MUS 4988Y).

Performance (conducting): In addition to two public performances, six full courses or equivalent are required. These must include one full course in music literature (MUS 4200Y, normally taken in the first year) and two half-courses selected from: MUS 4600H or MUS 4606H; MUS 4610H; MUS 4615H. Orchestral conducting majors must also complete MUS 4220H, MUS 4221H, MUS 4222Y, MUS 4223H, and MUS 4700H (choral). Wind ensemble conducting majors must also complete MUS 4226H, MUS 4227H, and MUS 4228Y. Choral conducting majors must also complete MUS 4223H, MUS 4224H, MUS 4225Y, MUS 4220H, and MUS 4700H (choral).
4. All requirements for the degree must be completed within five years of first enrolment.

**Degree of Doctor of Philosophy in Musicology**

**Admission Requirements**
This is a research degree. Candidates must hold a master's degree with specialization in musicology and must have an average standing of B+ or better. Applicants must submit, as a part of their application, an essay of approximately 3,000 words which demonstrates their ability to handle a research problem. Applicants, whether from the University of Toronto or from elsewhere, may be interviewed by the Department.

**Program Requirements**
1. The Ph.D. is designed to be a four-year program, but in some circumstances five years may be necessary. The maximum program length is six years.
2. A minimum of 1.5 full-course equivalents beyond the M.A. is required, including:
   a. the Ph.D. Seminar
   b. Research in Musicology
   c. a choice from the departmental list.
3. Additional courses above the minimum requirement may be recommended, as need dictates.
4. The Ph.D. is offered in four general areas:
   a. historical musicology
   b. ethnomusicology
   c. theory
   d. interdisciplinary
5. As early as possible in the first year, the candidate will identify an area of study, begin discussions with a principal advisor, and assemble an advisory committee of at least three members (including the advisor as chair) in consultation with the Department. By December of the second year, the thesis proposal must be submitted for approval by the musicology/theory members of the Department. The committee will meet with the candidate at least two times each academic year. The committee is charged with examining the major field and with ascertaining the preparedness of the candidate to carry out research on the thesis topic, including background knowledge, language, or any matters that the committee deems important. The committee may require further study, course work, or special preparation by the candidate. All aspects of background, preparation, and development of the thesis will be monitored by the committee. In the event of unsatisfactory work by the candidate, the committee may recommend termination of candidacy.
6. The candidate will prepare a thesis under the direction of an advisor and a committee, and will defend the thesis at a final examination. The thesis, including bibliography and appendices but excluding musical examples, should not exceed 75,000 words. The Department will not consider a thesis that exceeds 100,000 words.

**Degree of Doctor of Philosophy in Music Education**

**Admission Requirements**
Candidates must hold a master's degree in music education from this university with an average standing of B+ or better, or an equivalent degree and standing from another university. An interview with the music education faculty must be scheduled whenever possible. An assigned essay may be substituted for the interview with faculty approval. Candidates must provide their results on the Miller Analogies Test. At the discretion of the faculty, candidates may be required to provide a videotape of their teaching expertise. Appropriate letters of reference commenting on the candidate's teaching experience, music performance ability, and academic ability are also required.

**Program Requirements**
1. A total of six full-course equivalents is required. At the discretion of the Department, the candidate may receive credit for up to three full-course equivalents from an acceptable master's degree program. At least two full-course equivalents (including MUS 2995Y Music Education Doctoral Research Project) must be taken from the departmental offerings in music education. The balance of the candidate's required program must be approved by the Department and may include courses from the M.A./Mus.M./Ph.D./Mus.Doc. list and/or from another department in the School of Graduate Studies.
2. Candidates must be registered full time, on campus for a minimum of two terms, in order to be in such geographical proximity as to be able to participate fully in the Department's activities associated with the program.
3. As early as possible in the second year, the candidate will submit a thesis proposal which must be approved by the end of that year. On approval of the proposal by the music education division of the Department, a principal advisor and an advisory committee of at least three members (including the advisor as chair) will be appointed. The committee will meet with the candidate at least two times each academic year.
4 Language requirements, if any, will be established by the student's advisory committee, based on specific research needs.

5 Upon successful completion of the comprehensive examination, the candidate proceeds to complete:
   a an oral defence of the thesis proposal,
   b a thesis under the direction of an advisor, and
   c an oral defence of the thesis at a final examination.

Degree of Doctor of Music

Admission Requirements

The Doctor of Music (Mus.Doc.) is a doctoral program in composition. An applicant must hold the degree of Master of Music in composition of this University or its equivalent from another university with an average standing of B+ or better. Two or more extended compositions in various media and a tape of at least one of these works must be submitted together with the application and complete academic credentials by January 15 of the year of intended enrolment.

Program Requirements

1 Students must take a minimum of five full-course equivalents, including MUS 3300Y, MUS 3305Y, and MUS 3999Y (research project, selected in consultation with the advisory committee). Students entering from outside the University of Toronto will be given diagnostic tests in musical analysis, counterpoint, and harmony, the result of which may be additional course requirements.

   Upon completion of the course work, students are required to present a recital of original works (MUS 3888Y) to the satisfaction of the Department. In some cases professional quality tapes of performances totalling the equivalent of a full recital may be substituted.

3 Candidates must complete all requirements for the Mus.Doc. within six years.

Courses of Instruction

Final course offerings may vary. Students should consult the departmental handbook.

M.A./Ph.D. in Musicology

MUS 1000H Introduction to Music Research I/ G. Jones

MUS 4966Y Operatic Roles I
MUS 4988Y Operatic Roles II

MUS 6666Y Recital I
MUS 8888Y Recital II

**Courses recognized for Mus.M. in Performance and M.A. graduate credit**

Available to M.A. students only with the permission of the Department

MUS 1015H Topics in Twentieth-Century Music/ Staff
MUS 1020H Topics in Baroque Music/ G. Johnston
MUS 1025H Topics in Classical Music/ G. Jones
MUS 1045H Topics in Renaissance Music/ W. Bowen
Candidates are accepted under the general regulations provided that they also satisfy the departmental requirements for each of the degree programs listed below. Two letters of reference are required and should be sent directly to the Coordinator of Graduate Studies for the Department. All applicants must also submit a statement of academic intent to the Coordinator of Graduate Studies.

Candidates for admission to either the M.A. or Ph.D. program must submit their applications for admission by January 15. No separate fellowship application is required. Later applications will be considered only in exceptional circumstances.

Students applying for admission to the doctoral stream (presently defined as Ph.D. years one to five) will automatically be considered for funding as will continuing doctoral stream students. The funding package includes a minimum basic stipend and fees. Funding is guaranteed for at least five years on the condition that eligibility requirements as outlined in the departmental and SGS awards policies are met. The package may comprise a variety of components such as major external awards, major internal awards, Teaching Assistantships, Research Assistantships, and University of Toronto Fellowships. Presently M.A. students are not normally included in the funded cohort; therefore, M.A. students should seek funding from other sources.

Besides offering degree programs in Near and Middle Eastern Civilizations, the Department participates in two collaborative programs: Ancient Studies and Women’s Studies. For more information on these programs, see the separate entries in this calendar.

Graduate students in the Department of History who are interested in Islamic and Middle Eastern history from medieval to modern times may take courses in Near and Middle Eastern Civilizations and work under the supervision of Near and Middle Eastern Civilizations historians.

**Degree of Master of Arts**

The requirement for admission to this degree will normally be a four-year B.A. in a relevant
program from a recognized university with an average of at least B+, or equivalent, in the final year. Depending upon the amount of under-
graduate preparation, candidates may be en-
rrolled in either a two-year or a one-year pro-
gram, with a normal course load of three
courses per year. The Department may
recommend enrolment as Special Students to
those applicants without sufficient background
preparation.

Students desiring a concentration in Islamic
Art and Material Culture shall have at least six
courses in History of Art and Near and Middle
Eastern Civilizations (a minimum of two in
each), and a reading knowledge of French or
German at the time of admission. This is nor-
mally a two-year program.

Degree of Doctor of Philosophy
Before being accepted as candidates for this
degree, applicants must have obtained an M.A.
degree in a relevant program from a recognized
university with at least an A- average or equiva-
 lent in the courses taken for the M.A. program
and must also satisfy the Department as to
their ability to do independent research. The
candidate’s program of study will be determined
in consultation with the Department and will
include written and oral general examinations.
These examinations will be taken no later than
January in the year following the completion of
course work for the Ph.D. program.

Evidence of competence in primary source
language(s) relevant to the candidate’s re-
search must be demonstrated at the time of
admission. A candidate shall also normally be
required to submit evidence of ability to read
German and French by the time of general ex-
aminations. Other languages, such as Latin,
Arabic, and Modern Hebrew, may be substi-
tuted for one of these, as the case may de-
mand. In some cases, the Department may
require competence in another language rel-
vant to the student’s program. The choice of
language(s) must be approved by the Depart-
ment.

Candidates for the degree are required to be
registered on campus for the period during
which course work requirements are being ful-
filled and in no case for less than two academic
years. The minimum requirements for the de-
gree will normally be six full graduate courses
or equivalent. In approved circumstances,
credit for up to three of these courses may be
provided by the M.A. program or its equivalent.

The following two fields are offered in both
the M.A. and Ph.D. programs and are listed
together with their sub-fields/areas of speciali-
ization:

**Ancient Near Eastern Studies**
- Near Eastern Archaeology (Egyptian, Syro-
  Palestinian, Islamic)
- Assyriology (new students not accepted in
  this area)
- Near Eastern History
- Egyptology
- Hebrew and Judaic Studies
- Aramaic-Syriac Studies
- Septuagint Studies (new students not accepted
  in this area)

**Middle Eastern and Islamic Studies**
- Arabic Studies
- Persian Studies
- Turkish Studies
- History of the Islamic World and the Modern
  Middle East
- Islamic Religion and Philosophy
- Islamic Art and Material Culture

**Courses of Instruction**

1. Languages. A number of graduate courses in
   Near and Middle Eastern Civilizations demand
   ability to handle primary sources in the original
   language or languages. Some of the courses
   listed below may require reading knowledge of
   European languages.

2. Course Availability. Not all courses are of-
   fered every year. Please consult the Depart-
   ment’s Graduate Handbook and Web site for
   courses offered in the current academic year.

**Akkadian Language and Literature**
- NMC 1001Y Introduction to Old Babylonian/
  Staff
- NMC 1002Y Selected Standard Babylonian
  Texts/Staff
- NMC 1003Y Akkadian Historical Texts/Staff
- NMC 1006Y Akkadian Literary Texts/Staff
- NMC 1008Y Akkadian Letters and Business
  Documents (Late Period)/Staff

**Ancient Egyptian Language and Literature**
- NMC 1201Y Introduction to Middle Egyptian
  Dialect/Staff
- NMC 1202Y Middle Egyptian Texts/Staff
- NMC 1203Y Late Egyptian Texts/R. J.
  Leprohon
- NMC 1204Y Cursive Scripts/R. J. Leprohon
- NMC 1207H Introduction to Demotic/Staff
- NMC 1209Y Old Egyptian Texts/R. J.
  Leprohon
- NMC 1210Y Ancient Egyptian Historical Texts/
  Staff
- NMC 1213Y Egyptian Religious and Funerary
  Literature/R. J. Leprohon

The graduate departments of Biochemistry, Biomaterials and Biomedical Engineering, Dentistry, Laboratory Medicine and Pathobiology, Medical Science, Molecular and Medical Genetics, Pharmacology, Pharmacy, Physiology, Psychology, Rehabilitation Science, Speech-Language Pathology, and Zoology participate in the graduate program in Neuroscience at the University of Toronto. Participating departments in the program contribute courses and provide facilities and supervision for graduate research. Students in the program must apply to and register in one of the participating departments and fulfill their admission requirements. Students must follow a program of studies acceptable to both the participating department and the Neuroscience Program. Upon successful completion of the requirements, students receive in addition to the master's degree or Ph.D. in their departmental area, the notation "Completed Collaborative Program in Neuroscience" on their transcripts and a certificate. Students interested in joining the program should contact the Program in Neuroscience office to obtain an application form. Students should register within one month of initial registration in the participating department. The Program in Neuroscience Web site provides summaries of research fields of all the faculty in the program and their departmental affiliations and addresses, as well as additional information on neuroscience courses.

Students in the program receive the Program in Neuroscience newsletter and a monthly calendar listing neuroscience lectures held on campus. The program runs a Distinguished Lecturer series of talks by eminent neuroscientists and an annual poster day which students are required to attend. The students in the program also organize various social events during the year.

Program Requirements

1. The thesis topic must be in the neuroscience area.
2. The student's supervisor must be a member of the Program in Neuroscience (PIN).
3. The student must have an adequate background in general neuroscience.
4. The student must complete at least one half-course for the master's degree and at least one full course (or equivalent) for the Ph.D. degree from the list of courses approved by the Program in Neuroscience which is listed below.
5. The student must attend the Annual PIN Poster Day and present his/her work at least once.
6. The student must attend at least 75% of the lectures in the PIN Distinguished Lecturers Series.

Courses of Instruction

Neuroscience courses offered by the participating departments are listed below. Not all courses are offered each year.

DEN 1060H Oral Physiology: Sensory and Neuromuscular Function
JNR 1444Y Fundamentals of Neurosciences: Cellular and Molecular
JNS 1000Y Fundamentals of Neurosciences: Systems and Behaviour
JNS 1001H Neuroanatomy of Mind
JNS 1010H Analytical Neuroscience
JPM 1005Y Behavioural Pharmacology
JPY 1007Y Neuropharmacology of Neurotransmitter Receptors
JYG 1555H Topics in Cellular and Molecular Neurobiology
LMP 1003Y Seminar on Diseases of the Central Nervous System
MSC 1006H Advanced Neuroanatomy
MSC 1085H Molecular Approaches to Mental Health and Addictions

**Other Courses**

Courses not specifically in neuroscience which do not fulfill the program requirements as neuroscience courses but might be useful for neuroscience students.

- JBL 1507H  | Biochemistry of Inherited Disease |
- JDB 1025Y  | Developmental Biology |
Nuclear Engineering

Education and research in Nuclear Engineering includes the study of nuclear processes for purposes such as power generation, medicine, irradiation technology, and industrial use of radioisotopes. The main subjects of study include nuclear reactor research (in reactor materials and heat transfer), nuclear safety, radiochemistry, radiation chemistry, environmental monitoring, and non-destructive testing.

Opportunities for research in areas relevant to Nuclear Engineering exist primarily in the Departments of Chemical Engineering and Applied Chemistry, Mechanical and Industrial Engineering, Materials Science and Engineering, and the Institute for Aerospace Science and Engineering. Some relevant courses are listed in the respective calendar entries of various departments within the Faculty of Applied Science and Engineering.

Candidates may obtain further information on enrolment procedures, academic requirements, and scholarship applications from the Coordinator of Graduate Studies in each of these Departments.

Degree of Master of Nursing

The purpose of the Master of Nursing (M.N.) program is to prepare advanced nursing practitioners with specialized knowledge, skills, and expertise in a defined area of nursing to design programs and influence practice in that area. The program offers three fields of study:

1. Nursing administration
2. Clinical nursing
   a. Health in the Community
   b. Special Populations—Mental Health
   c. Special Populations—Women's Health
   d. Special Populations—Critical or Persistent Illness—Children and Youth
   e. Special Populations—Critical or Persistent Illness—Adults
   f. Special Populations—Critical or Persistent Illness—Older Persons
3. Acute care nurse practitioner
   a. Adult acute care
   b. Child acute care
For Nursing Administration and Clinical Nursing fields, the program requirement is nine courses, including one clinical course.

For the Acute Care Nurse Practitioner field, the program requirement is nine courses, including two clinical courses. This field of study is only offered by e-learning starting September 2002.

**Admission Requirements**

Candidates must hold the B.Sc.N. degree of the University of Toronto or an equivalent degree. Candidates must have obtained at least a mid-B standing in the final year of undergraduate study and, in addition, must have obtained at least B standing in the next-to-final year. Candidates seeking admission to the Acute Care Nurse Practitioner field must also have two years of clinical experience. For further information about admission requirements and for application forms, please contact the Graduate Department of Nursing Science. Deadline for applications is February 1.

**Course and Degree Requirements**

1. To qualify for the degree, a candidate shall complete a program of study outlined by the Graduate Department of Nursing Science.
2. Students are encouraged to enrol on a full-time basis; however, a part-time option is available.
3. The program may be completed in a minimum of 4 sessions (16 months) of full-time study. All requirements for the degree must be completed satisfactorily within six calendar years from the date of the student's first enrolment in the program.

**Combined Master of Nursing/Master of Business Administration Program**

The combined M.N./M.B.A. Program is designed to permit students to obtain both the M.N. and M.B.A. degrees in three full-time years of study (seven part-time years). Students are required to spend the first two years of residency completing the first year programs of the M.N. and M.B.A. degrees, respectively.

During the first year of the Program, students will be enrolled exclusively in the Joseph L. Rotman School of Management.

During the second year of the Program, students will be enrolled in the Faculty of Nursing and will be expected to complete:
- four half courses for the M.N. degree
- one M.B.A. required course at the 2000 level
- one second year elective course in the Joseph L. Rotman School of Management.

In the third year of the Program, students will be required to complete a series of courses selected from a prescribed menu of graduate M.N. and second-year M.B.A. courses drawn from the curricula of both faculties. A list of these courses is determined by the Coordinator of the combined M.N./M.B.A. Program in consultation with the two faculties.

**Admission Requirements**

Admission to the combined Program is conditional upon independent admission to each of the participating graduate departments. Candidates will normally be required to complete separate application forms on a concurrent basis and pay the application fees for admission to the M.N. Program and the M.B.A. Program.

Candidates must satisfy the full requirements for each of the participating graduate departments. The aggregate criteria listed below must be satisfied to ensure that an application is considered complete for the purpose of entry into the M.N./M.B.A. Program. Candidates must:
1. be accepted under the general regulations of the School of Graduate Studies. Meeting the minimal requirements does not ensure admission.
2. hold a University of Toronto B.Sc. degree in Nursing, or a degree from an equivalent program in a recognized university.
3. have undertaken the Graduate Management Admissions Test (GMAT) and have obtained a satisfactory score.
4. have obtained at least B standing in the final year of undergraduate study and, in addition, must have obtained at least a B standing in the next-to-final year. It is expected that the student will have obtained good academic standing in non-nursing as well as nursing subjects.
5. have at least two years of work experience within the health care field.

**Course and Degree Requirements**

The M.N. component of the combined M.N./M.B.A. Program comprises six required courses including one clinical course.

The M.B.A. component of the combined M.N./M.B.A. Program comprises 15 required courses of different weights and 5 elective courses.

**Degree of Master of Science**

This program is not open for admission for the current academic year.

**Degree of Doctor of Philosophy**

The purpose of the program leading to the degree of Doctor of Philosophy is to prepare scientists with the required analytical and research skills for the study of clinical or administrative nursing problems.
Each candidate will choose to study in one of three research fields:
1. Nursing science of healthy individuals, families, and communities;
2. Nursing science of individuals and families experiencing acute and chronic illness;

The program of study will include a minimum of four courses, faculty/student research seminars, and a thesis.

Admission Requirements
Candidates must have a University of Toronto master’s degree in nursing or a degree from an equivalent nursing program in a recognized university. Candidates must have achieved at least a B+ standing in their master’s program. For further information about admission requirements and for application forms, please contact the Graduate Department of Nursing Science. Deadline for applications is February 1.

Course and Degree Requirements
1. In order to qualify for the degree, a candidate shall complete a program of study approved by the Graduate Department of Nursing Science. The student’s program will be planned in consultation with a supervisory committee. It will be designed to support the student’s research and to provide depth and breadth in the area of study. An examination of the dissertation proposal is required, usually in the second year and no later than May of the third year, at the completion of the minimum course work requirements. The student’s dissertation will be defended in the departmental oral examination and the final oral examination of the School of Graduate Studies.
2. All requirements for the degree must be completed satisfactorily within six calendar years from the date of the student’s first enrolment in the Ph.D. program.

Flexible-time Option
Applicants must indicate on the application form their preference for the flexible-time option. The admission, course, and degree requirements for the flexible-time option are identical to those listed above for the full-time Ph.D. program. However, students will have up to eight years to complete the program. An examination of the dissertation proposal is required, usually in the third year and no later than the fourth year. Students are required to pay full-time fees for the first four years of their program; thereafter, they will pay part-time fees.

Collaborative Programs
Students in the Graduate Department of Nursing Science may choose to participate in the following collaborative programs:
Aging and the Life Course
Bioethics
Ethnic and Pluralism Studies
Women’s Studies
For more information, consult the separate entries in this calendar.

Courses of Instruction
NUR 1012H Culture and Relations/R. Hagey
NUR 1013H Transcultural Health Care Issues/ R. N. F. Lee
NUR 1014H The Politics of Aboriginal Health/ R. Hagey
NUR 1016H Health Systems, Policy, and the Profession/M. Risk, K. MacMillan

The Department of Nutritional Sciences offers graduate programs in the basic science, clinical, and community aspects of human nutrition. Research projects range from the molecular to the community level of inquiry. Candidates with appropriate preparation in health sciences will be admitted under the general regulations of the School of Graduate Studies.

A Ph.D. or M.Sc. degree in Nutritional Sciences with specialization in either Neuroscience or Toxicology can be taken through this Department. For details of these two collaborative programs, please consult the appropriate entries in this calendar.

Degree of Master of Science

Candidates are admitted under the general regulations of the School of Graduate Studies. Students with diverse backgrounds are encouraged to apply.

The minimum admission requirement is a mid-B standing. Most admitted students have a B+ to A- average.

The minimum program length for full-time students is 12 months. Candidates will attend and participate in NFS1204Y Master's Seminars in Nutritional Sciences throughout their period of full-time registration and will complete a minimum of two half-courses. For students with undergraduate training in nutritional sciences, at least one of these courses must be taken in the Department. Students with undergraduate training in disciplines other than nutritional sciences must take at least two half-courses from the Department. In addition, a course in statistical methods or research design and analysis is required if not completed previously. Submission of a thesis on an approved research area and its defence at an oral examination are required.

A limited number of students will be admitted to the M.Sc. program on a part-time basis.

Degree of Master of Health Science

(Community Nutrition)
See Department of Community Health for information.

Degree of Doctor of Philosophy

Candidates may enter the Ph.D. program directly from a bachelor’s degree if their background is deemed appropriate and they have an A- or better average in their final two years. They may also enter the Ph.D. program with an
appropriate M.Sc. degree with at least a B+ standing.

Exceptional students may be allowed to reclassify into the Ph.D. program after one year without completing the M.Sc. on the recommendation of an advisory committee and successful completion of a reclassification examination.

The residence requirement for candidates admitted with a bachelor’s degree is three sessions. Candidates admitted with a master’s degree have a residency requirement of two sessions.

Although it is expected that students from either background can complete their Ph.D. in a period of four years of full-time study, research, and thesis preparation, some students may require longer.

During this time candidates will attend and participate in NFS 1304Y Doctoral Seminars in Nutritional Sciences. Those entering with a bachelor’s degree will also complete a minimum of six half-courses; those entering with an M.Sc. degree, a minimum of four half-courses. The courses will be chosen by each student to provide an appropriate background for his/her area of investigation. It is expected that all candidates will have an adequate knowledge of research design and statistics through course work in their past or the current graduate program. The choice of courses will be made in consultation with the supervisor and the student’s advisory committee and is subject to the approval of the Department. The student will also complete a comprehensive examination in nutritional sciences. To qualify for the Ph.D. degree, a thesis must be submitted and the student must pass the departmental examination before proceeding to the final oral examination conducted by the School of Graduate Studies.

Courses of Instruction

Not all courses are offered every year. Please consult the Department for course offerings.

NFS 1201H Public Health Nutrition/V. Tarasuk
NFS 1204Y Master’s Seminars in Nutritional Sciences (Credit/No Credit)/Staff
NFS 1208H Field Observation and Nutrition Program Laboratory I/A. Fox
NFS 1209H Field Observation and Nutrition Program Laboratory II/A. Fox, M. Morris

NFS 1210H Field Observation and Program Laboratory III: Management of Community Food Programs/A. Fox, T. Griffin
NFS 1211H Community Nutrition/Staff
NFS 1216H Selected Topics Nutrition/Staff
NFS 1218H Recent Advances in Nutritional Sciences I/Staff
NFS 1219H Recent Advances in Nutritional Sciences II/Staff
NFS 1220H Clinical Nutrition/D. Jenkins, P. Pencharz, P. Darling
NFS 1221H Nutrition Programs and Strategies/A. Fox
NFS 1301H Directed Reading in Nutritional Sciences/Staff
NFS 1304Y Doctoral Seminars in Nutritional Sciences (Credit/No Credit)/Staff
NFS 1484H Advanced Nutrition/C. Greenwood

Degree of Master of Science in Occupational Therapy

The objective of the professional Master of Science program in Occupational Therapy is to prepare graduates to:

1. practice independently in a range of settings and in a variety of roles; for example, in acute settings, in interdisciplinary programs, in private practice, in primary health care settings, as consultants, as case managers
2. supervise rehabilitation assistants, OT aides, or other support workers
3. use principles of research-based practice to guide and evaluate service delivery
4. contribute to research that will advance the knowledge base of the discipline
5. assume management roles
6. take leadership roles in the profession
7. take leadership roles in health care and other sectors including social services, education, and labour
8. fill academic-practitioner positions
9. pursue a Ph.D. and careers in academia or clinical research

The M.Sc. (OT) prepares students in advanced academic and professional knowledge and applied research skills for leadership in occupational therapy practice. The program emphasizes the application of theory and research evidence to clinical practice through rigorous studies in occupational therapy, and research production and utilization. Graduates of the program are eligible to write the certification examination of the Canadian Association of Occupational Therapists, a requirement for registration with the College of Occupational Therapists of Ontario and most other professional regulatory colleges in Canada.

Admission Requirements

Admission is determined through an evaluation of academic and non-academic materials with heavier weighting on the academic materials. Eligible applicants must have a four-year University of Toronto bachelor’s degree, or its equivalent from a recognized university, with a minimum mid-B average in the final year or over senior courses. Students must have the following prerequisite courses from a recognized university: psychology (full credit); introductory physiology or introductory biology, human or vertebrate (half credit); sociology or anthropology (half credit); human growth and development (half credit); and statistics (half credit). To determine initial ranking only, the Department will review the last 10 full-course equivalencies completed at the undergraduate level.

Facility in the English language must be demonstrated by all applicants educated outside Canada whose primary language is not English and who graduated from a university where the language of instruction and examination was not English. This requirement is a condition of admission and must be met by the end of March. This requirement may be satisfied through the successful completion of one of the English language proficiency tests listed in the School of Graduate Studies Calendar with at least the minimum acceptable scores listed therein. The Department of Occupational Therapy strongly prefers the Test of English as a Foreign Language (TOEFL).

Eligible applicants must have a four-year University of Toronto bachelor’s degree, or its equivalent from a recognized university, with a minimum mid-B average in the final year or over senior courses. Students must have the following prerequisite courses from a recognized university: psychology (full credit); introductory physiology or introductory biology, human or vertebrate (half credit); sociology or anthropology (half credit); human growth and development (half credit); and statistics (half credit). To determine initial ranking only, the Department will review the last 10 full-course equivalencies completed at the undergraduate level.

Facility in the English language must be demonstrated by all applicants educated outside Canada whose primary language is not English and who graduated from a university where the language of instruction and examination was not English. This requirement is a condition of admission and must be met by the end of March. The Department of Occupational Therapy strongly prefers the Test of English as a Foreign Language (TOEFL).

Applicants to the Department of Occupational Therapy use the Ontario Rehabilitation Sciences Programs Application Services (ORPAS) application package. All admission requirements are outlined in the application. Applications are available approximately mid-September each year, and the submission
Program Requirements

The curriculum will be presented in six consecutive sessions, with a range of two to six concurrent courses in each session. First year courses include: Research, Foundations of Occupational Science, Occupational Therapy Practice; Structure and Function, Psychological, Neuro-motor and Neuro-cognitive Perspectives. Second year students engage in intensive research projects and three parallel courses in Enabling Occupation across childhood, adulthood and older adulthood, respectively. There are four full-time block fieldwork components within the program of study. Methods of study include interactive classes, divergent case method, skill labs, self-study, computer-assisted instruction, and fieldwork. Students enter the program in September, complete the 22-course program requirement in 24 consecutive months through full-time study, and graduate at Fall Convocation.

The Department of Pharmaceutical Sciences offers research opportunities and courses in four principal areas:

1 Molecular Pharmacology and Toxicology
drug receptor interactions, medicinal chemistry, molecular biology, electrophysiology, biochemistry, clinical, adverse drug reactions and drug metabolism

2 Pharmaceutics
physical pharmaceutics, pharmaceutical formulations, radiopharmaceutical synthesis, and instrumental pharmaceutical analysis

3 Pharmacokinetics
basic pharmacokinetics and clinical research

4 Social and Administrative Pharmacy
economic, managerial, behavioural, regulatory, and social

Degree of Master of Science

Admission Requirements

1 Applicants to the M.Sc. program should hold a four-year University of Toronto B.Sc. degree or its equivalent from a recognized university.

2 Applicants are admitted under the general regulations of the School of Graduate Studies. Applicants must also satisfy the Pharmaceutical Sciences Graduate Admissions Committee, which will take into account the background and accomplishments of the applicant, academic standing (applicants must usually achieve at least a mid-B average in each of the last two years of their undergraduate program), and financial support.

3 Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination is not English are required to write the
TOEFL and have a minimum score of 600 for the paper-based test or a minimum score of 250 for the computer-based test. The TOEFL must include the Test of Written English or Essay Rating with a minimum score of 5.0. Unless an undergraduate degree has been obtained from a recognized Canadian or U.S. university, the applicant must write and achieve scores at the 50th percentile ranking or better on the Graduate Record Examination (GRE—General Test).

**Program Requirements—Full-Time M.Sc.**

To qualify for the M.Sc. degree, students must complete the following program requirements:

1. A program of study that provides the appropriate foundation for the thesis research to be undertaken by the student. The program will depend on the background of the student and will be planned in consultation with the supervisor and advisory committee, with the approval of the graduate chair. The student will normally complete two full courses, or equivalent, but a minimum of one full course, or equivalent, is required.
2. Yearly advisory committee meetings.
3. One poster presentation given to all faculty and graduate students at Graduate Research in Progress (GRIP), and attendance at GRIP and Post-GRIP. Students are also expected to attend research seminars.
4. Final seminar (20 to 30 minutes) to be given during the thesis defence.
5. A thesis based on an approved research problem in a field of pharmaceutical sciences.

**Program Requirements—Part-Time M.Sc.**

All requirements are the same as for the M.Sc. Full-Time program, except for the short research presentation and attendance at Graduate Research in Progress (GRIP). A poster presentation at GRIP is required every other year during enrolment.

**Degree of Doctor of Philosophy**

**Admission Requirements**

1. Applicants to the Ph.D. program should hold a University of Toronto M.Sc. degree or its equivalent from a recognized university. Under exceptional circumstances, students may be admitted directly to the Ph.D. program with an honours B.Sc. degree. Factors to be considered will include academic standing, ability to do research, and financial support.
2. Applicants are admitted under the general regulations of the School of Graduate Studies. Applicants must also satisfy the Pharmaceutical Sciences Graduate Admissions Committee, which will take into account the background and accomplishments of the applicant, academic standing (applicants must usually achieve an overall B+ average in their M.Sc. program), and financial support.
3. Applicants whose primary language is not English and who graduated from a university where the language of instruction and examination is not English are required to write the TOEFL and have a minimum score of 600 for the paper-based test or a minimum score of 250 for the computer-based test. The TOEFL must include the Test of Written English or Essay Rating with a minimum score of 5.0. Unless an undergraduate degree has been obtained from a recognized Canadian or U.S. university, the applicant must write and achieve scores at the 50th percentile ranking or better on the Graduate Record Examination (GRE—General Test).

**Transfer from M.Sc. to Ph.D.**

Students who have a high academic standing and a clearly demonstrated ability to do research at the doctoral level may be eligible to transfer to the Ph.D. program after one year in the M.Sc. program. The student must have completed at least one full course, or equivalent, and have an average grade of A minus. A transfer from the M.Sc. program to the Ph.D. program occurs normally within 15 months of the student's first registration in the M.Sc. program. The transferred student must complete all remaining course requirements of the M.Sc. program, except the thesis, in addition to the requirements of the Ph.D. program. Credit is given in the doctoral program for research and graduate courses completed prior to the transfer.

**Program Requirements**

To qualify for the Ph.D. degree, students must complete the following program requirements:

1. A program of study that provides the appropriate foundation for the thesis research to be undertaken by the student. The program will depend on the background of the student and will be planned in consultation with the supervisor and advisory committee, with the approval of the graduate chair. Students will normally complete two full courses, or equivalent. Students admitted directly to the Ph.D. program with a B.Sc. must complete three full courses, or equivalent.
2. Yearly advisory committee meetings.
3. A qualifying examination.
4. Two short research presentations to all faculty and graduate students at Graduate Re-
search in Progress (GRIP), an exit full-length research seminar to be given before the thesis defence, and attendance at GRIP and Post-GRIP. Students are also expected to attend research seminars.

5 A thesis in conformity with the University regulations, based on research conducted while registered in a Ph.D. program at the University of Toronto.

6 Students are required to be on campus and participating full-time (including summer) until all program requirements, with the exception of the thesis, are completed. Course work should normally be completed within the first two years of registration.

Collaborative Programs
The Graduate Department of Pharmaceutical Sciences participates in the following collaborative programs:
- Addiction Studies
- Human Development, Life Course and Aging
- Neuroscience
- Toxicology

Consult the separate program entries in this calendar for more details.

Courses of Instruction
Please consult the Department’s timetable for courses offered in a given year.

Degree candidates are accepted under the general regulations. Research activity in the Department, from which graduate students may choose problems for their theses, includes:
- biochemical and molecular pharmacology
- cardiovascular pharmacology
- clinical pharmacology
- drug addiction
- drug metabolism, distribution, and pharmacokinetics
- endocrine pharmacology
- immunopharmacology
- neuropharmacology
- pharmacogenetics
- psychopharmacology
- receptor pharmacology
- second messengers and signal transduction
- toxicology

Degree of Master of Science

Students are admitted under the general regulations of the School of Graduate Studies. However, the Department’s Graduate Education Committee must be satisfied about the applicant’s background and accomplishments, financial support, and ensure that academic achievement is normally at the B+ average level in the final year of the undergraduate program.
Before obtaining a degree, a student must have course credits in PCL 1001Y Systems Pharmacology, or its equivalent, and PCL 1002Y Graduate Pharmacology. Additional courses may be taken as the academic program requires.
Each student will participate in a research program and present the results of the invest-
nformation as a written thesis. The thesis will be read and approved by the supervisor and two appraisers, one of whom should normally be from outside the Department. It will then be orally defended to the satisfaction of a thesis examination committee.

M.Sc. students in the Department of Pharmacology who intend to continue their studies in the Ph.D. program will be evaluated during their M.Sc. oral defence.

**Degree of Doctor of Philosophy**
Candidates for the degree of Doctor of Philosophy in Pharmacology are normally required to have taken courses in physiology, biochemistry, or allied sciences sufficient to form a foundation for their work in pharmacology. This Department's doctoral program requires a minimum period of two full years of residence. During this time the student is required to be on campus full-time and consequently in such geographical proximity as to be able to participate fully in the Department's activities associated with the program.

The Department's Graduate Education Committee determines the eligibility of prospective students. The Committee assesses students' ability and potential for advanced study and independent research in pharmacology.

Well qualified students with excellent research potential holding a Bachelor of Science degree may be considered for direct admission to the Ph.D. program by the Department's Graduate Education Committee.

Applicants with M.Sc. degrees from other departments or universities, and students admitted with a Bachelor of Science degree will have their research ability and potential for the program reviewed after completion of one year. Upon successful completion of a departmental seminar and recommendation from the student's advisory committee to the Graduate Education Committee, the student will be permitted to proceed with the Ph.D. program.

Students transferring from the master's program in pharmacology to the Ph.D. program may receive full credit for master's courses towards doctoral course requirements, with the Department's permission.

Before obtaining their degree, all Ph.D. students must acquire graduate course credits in PCL 1001Y *Systems Pharmacology* (or its equivalent), PCL 1002Y *Graduate Pharmacology* (major subject), PCL 1003Y *Seminars in Pharmacology* (Credit/No Credit course), one additional full graduate course (minor subject), and any other courses advised by the Graduate Education Committee. The student's advisory committee should help the student determine the minor course.

Pharmacology graduate faculty members also offer a variety of laboratory-based and tutorial-based learning modules to provide breadth to the students' training experience beyond their particular areas of research focus. During their program, Ph.D. students are required to choose five breadth modules from among available options, at least one of which must be a laboratory module and one a tutorial module. One graduate half-course from outside the student's research area may substitute for one of the five breadth modules. The student's Advisory Committee will assist the student in choosing suitable modules.

As part of the course requirement PCL 1003Y *Seminars in Pharmacology*, the candidate must present thesis material in seminars to the Department on two occasions, one of which will take place between two and six months prior to the departmental final oral examination.

Candidates for the degree of Doctor of Philosophy in other departments who desire to take a minor in pharmacology will be permitted to take one of the listed courses depending on their previous training and space availability in the course.

All successful applicants to the M.Sc. and Ph.D. programs are responsible for obtaining research supervision and financial support before they are allowed to officially register in their program.

**Collaborative Programs**
The Department of Pharmacology participates in the following collaborative programs:
1. Addiction Studies
2. Cardiovascular Sciences
3. Neuroscience
4. Toxicology

For more details, consult the separate program entries in this calendar.

**Courses of Instruction**
The Department should be consulted each session as to course offerings. Students may also obtain up-to-date course information on the departmental Web site www.utoronto.ca/grdpharm/schedule.htm.

E-mail: phildept@chass.utoronto.ca
Web: www.chass.utoronto.ca/philosophy/

Applicants interested in graduate study in philosophy at the University of Toronto should consult the Department's Graduate Bulletin. This provides complete details of graduate programs, describes course offerings, and supplies short academic profiles of the graduate faculty, including their phone numbers and electronic addresses. One may obtain a printed copy of the Graduate Bulletin from the Graduate Office, Department of Philosophy, at a cost of $3.00. An electronic version is available on the World Wide Web at www.chass.utoronto.ca/philosophy/.

Application for Admission
The Department admits students to two degree programs: Master of Arts and Doctor of Philosophy. The minimum requirements for admis-
sion to these programs are given below, under the headings “Degree of Master of Arts” and “Degree of Doctor of Philosophy.” Admission to these programs is highly selective and competitive; those who barely meet the minimum conditions should not expect admission without exceptionally favourable supporting considerations.

All the forms required for application, including the standard application form, can be downloaded from the departmental Web site. The Department does not mail application packages. The Web site also contains detailed instructions for completing applications.

Unless otherwise indicated, applicants must submit the following supporting documents with their applications:

1. One official transcript of the applicant's academic record from each university attended, complete to the time of application.

2. A statement of about 300 words, indicating the applicant's areas of interest in philosophy at the graduate level.

3. A short list of the major readings in each philosophy course taken by the applicant. (This item is not required of applicants from the University of Toronto.)

4. Two letters of reference from philosophy instructors, written on the appropriate forms.

5. One sample of the applicant's written work in philosophy (written in English or French); e.g., a term paper not exceeding 20 pages. It should be as recent as possible and should provide evidence of the student's capability to study philosophy at an advanced level.

6. Candidates for admission to the Ph.D. program are strongly encouraged (but are not required) to submit the results of the Graduate Record Exam (GRE) taken within the preceding 18 months.

7. Applicants whose primary language is not English and who are not graduates of a university whose language of instruction is English must also submit the results of a TOEFL test with a score of at least 600 and of a TWE test with a score of at least 5, or equivalent results in some other recognized test of English-language facility.

The closing date for applications to the Department's degree programs, by which time applicants must have submitted their supporting documentation as well as their completed application, is January 7.

Students who wish to take one or more of the courses offered by the Department as non-degree students should apply for admission as Special Students. The application procedures are the same as those for the M.A. program, but the deadlines for applications are April 15 for full-time Special Students and August 1 for part-time Special Students.

Students enrolled in graduate programs in philosophy in other universities are welcome to apply to spend a year studying at the University of Toronto. Please direct any inquiries to the Graduate Coordinator.

**Degree of Master of Arts**

Students approved by the Department are admitted as candidates for this degree under the general regulations of the School of Graduate Studies.

Admission to the M.A. program requires a four-year University of Toronto bachelor's degree, or its equivalent from a recognized university, that includes at least six full courses (twelve half-courses) in philosophy, with an average grade of at least a mid-B in the applicant's overall program and of at least an A- in the applicant's philosophy courses. Students lacking an adequate background in philosophy may be required to complete additional undergraduate courses before being considered for admission. In certain cases, an applicant whose background in philosophy is deficient may be admitted to the M.A. program but may be required to take one or two additional courses, possibly at the undergraduate level.

The program for the M.A. degree consists of a minimum of four full-course equivalents in philosophy. At least one of these full-course equivalents must be in the history of philosophy and at least one must be in the problems of philosophy.

Each M.A. student is assigned to an Advisory Committee, which will recommend a suitable program of philosophy courses. The candidate's choice of courses must be approved by the Department. One member of this committee will serve as the student's Academic Advisor throughout the M.A. program and will be responsible for overseeing the student's progress.

It is possible for a full-time student to complete all requirements for the M.A. degree in the Fall and Winter sessions; however, the Department encourages students to take no more than three full-course equivalents during the Fall and Winter sessions and to complete the last course during the Summer session.

Part-time enrolment in the M.A. program is permitted; the requirements for the degree must be completed within five academic years.

**Degree of Doctor of Philosophy**

Students approved by the Department are admitted as candidates for this degree under the general regulations of the School of Graduate Studies.
Admission to the Ph.D. program requires either (a) a four-year University of Toronto bachelor’s degree, or its equivalent from a recognized university, that includes at least six full courses (twelve half-courses) in philosophy, with an average grade of at least a B+ in the applicant's overall program and of at least an A- in the applicant's philosophy courses, or (b) a University of Toronto master's degree in philosophy, or its equivalent from a recognized university, with an average grade of at least an A- in the applicant's overall program. Applicants must satisfy the Department that they are capable of independent research in philosophy at an advanced level.

A candidate admitted to the Ph.D. program shall pursue a program of study and research approved by the Department. The minimum requirements for the degree are as follows:

1 **Course Requirements**

A candidate admitted on the basis of a four-year bachelor's degree must take a minimum of six full-course equivalents in philosophy, with an average grade of at least an A-. At least two of these full-course equivalents must be in the history of philosophy and at least two must be in the problems of philosophy. A student who fails to maintain an average of at least an A- after completing three full-course equivalents may have their registration terminated.

A candidate admitted on the basis of a master's degree in philosophy must take a minimum of three full-course equivalents in philosophy, with an average grade of at least an A-. At least one of these full-course equivalents must be in the history of philosophy and at least one must be in the problems of philosophy. A student whose M.A. degree does not exhibit sufficient breadth—in particular, does not include the equivalent of at least one full course in the history of philosophy and at least one full course in the problems of philosophy—may be required to take additional courses.

With the Department's permission, a student may replace up to one full-course equivalent in philosophy with a graduate course offered by another department, provided that the course is approved by the Department. The candidate must satisfy the Department that this other language is required in carrying out the approved research area. The candidate's area committee may require competence in additional languages deemed necessary for the student's proposed area of research.

2 **Breadth Requirement**

A candidate must demonstrate competence in at least seven areas of philosophy: three of the four specified areas in the history of philosophy (ancient, medieval, 17th-18th century, and 19th-20th century), three areas in problems of philosophy (metaphysics, epistemology, ethics), and formal logic. Competence in any area within the first two categories is normally established by successful completion of a graduate half-course in that area. Competence in logic (defined as proficiency in first-order symbolic logic with identity) is expected of all candidates prior to beginning doctoral studies. Where this is not the case, competence must be acquired as a supplement to the required number of courses and be demonstrated to the satisfaction of the Department by the time the Area Requirement is met.

3 **Area Requirement**

Before being allowed to proceed with formal research on a thesis topic, the candidate must demonstrate competence in a broader area within which that topic falls. An individual Area Committee (established by the student and approved by the Department) assists in framing that area and compiling an appropriate reading list, and it also approves an appropriate plan for carrying out the research. The research undertaken by the candidate either culminates in a written exam or else consists of a research project. Both paths lead to an oral exam based on the written work and the reading list.

4 **Language Requirement**

A candidate must demonstrate a reading knowledge of French; however, with the permission of the Department, another language (other than English) may be substituted for French provided that this other language is required in carrying out the approved research area. The candidate's area committee may require competence in additional languages deemed necessary for the student's proposed area of research.

5 **Thesis**

A candidate must submit a thesis on an approved subject and defend the thesis at a final oral examination.

Each candidate carries out thesis research on an approved topic under the guidance of a three-person Thesis Committee, consisting of a Supervisor and two consultants or readers. The Supervisor must normally approve the thesis before it can be submitted by the candidate for defence at a required oral examination. The final oral examination is arranged by the Department in collaboration with the School of Graduate Studies. At least eight weeks must be allowed for all arrangements to be made following submission of the thesis to the Graduate Office.
The Department is not obligated to provide supervision in areas falling outside the competency, interest, or availability of its graduate faculty. Students are strongly encouraged to plan their studies in such a way as to complete their program within four years of admission from an M.A., or five years of admission from a B.A. Financial support packages are based on this norm, although allowances are made for the higher demands of some collaborative programs.

6 Normal Time Line Through the Program
By the end of the first year of registration in the case of someone admitted on the basis of a master's degree, otherwise by the end of the second year, a candidate should have completed all the course requirements for the degree; by the end of the following year of registration, the candidate should have satisfied any remaining breadth requirements, passed the area examination, and submitted to the Graduate Office the candidate's thesis topic and the names of faculty members who have agreed to serve as supervisor and readers. (These are general deadlines; consult the Department's Graduate Bulletin for specific dates and further details.) After this, the candidate begins work on the thesis, which the candidate is expected to complete within two years.

7 Residence
Candidates must be registered as full-time on-campus students and must reside in sufficient geographical proximity to enable them to fulfill the course, breadth, area, and language requirements set by the Department in a smooth and timely fashion. During this phase, they are also expected to participate fully in departmental activities. Once these requirements have been met, and the Thesis Committee has approved a topic and plan of research for the thesis, a candidate may choose to reside at a greater distance from Toronto, especially if this seems desirable for the sake of thesis research and writing.

Combined Juris Doctor/Doctor of Philosophy Program
This combined program enables students to pursue work at the intersection of philosophy and law and to complete both the Ph.D. and the Juris Doctor in a shorter time than would otherwise be the case. Entry to the program requires admission to both the Ph.D. program in philosophy and the J.D. program in law. Separate applications are required.

In the first year of registration, a candidate admitted to the Combined Program will complete the first year of the law curriculum; in the second and third years, the candidate will complete the remaining requirements for the J.D. degree and will begin the course work required for the Ph.D. (Note that some of the courses done in fulfillment of the Ph.D. requirements will be counted for credit towards the J.D.) By the end of the fourth year of registration in the case of someone admitted on the basis of a master's degree, otherwise by the end of the fifth year, a candidate should have completed any remaining course requirements for the Ph.D. degree, satisfied the breadth requirement, and met the area requirement. The candidate then begins work on the thesis. During the first two years of the program, candidates are registered as full-time law students; subsequently, they are registered as full-time doctoral students and are eligible for graduate funding.

Those interested in pursuing this program should consult David Dyzenhaus, Director of the Ph.D. (Philosophy)–J.D. Program, at the Faculty of Law.

Collaborative Programs
The department participates in the following collaborative programs:
1 Ancient and Medieval Philosophy
2 Bioethics
3 Environmental Studies
4 International Relations
5 Women's Studies
For more details, consult the separate entries in this calendar.

Courses of Instruction
Not all courses are offered every year. Please consult the Department's Graduate Bulletin, which lists the courses the Department will offer this year as well as those offered by other departments that may be taken for philosophy credit.

**E-mail:** physther.facmed@utoronto.ca  
**Web:** www.utoronto.ca/pt

**Degree of Master of Science in Physical Therapy**
The purpose of the Master of Science in Physical Therapy (M.Sc.PT) is to graduate practitioners who will:
- have enhanced competency in clinical skills
- participate in clinical and health care research, contributing to the overall body of scientific knowledge
- serve as role models for students and other health professionals as expert consultants in the fields of movement and movement disorders
- be innovative leaders in physical therapy, rehabilitation, and the health care system
- have ability to act as self-regulating professionals who exhibit strong personal, moral, and ethical values and are cognizant of the changing laws, codes, and guidelines that impact on themselves and their clients
- be creative entrepreneurs with sound business acumen capable of excelling in professional practice in a wide variety of venues
- serve as strong players with exemplary interpersonal skills, secure in their evolving role within a changing health care delivery system
- be strong negotiators and advocates who proactively influence interprofessional politics and health policy with an eye to maintaining and improving not only the health of clients but of the health system as a whole

The Master of Science in Physical Therapy is a professional program leading to entry to practice. Graduates will be eligible to write the Physiotherapy Competency Examination (PCE) of the Canadian Alliance of Physiotherapy Regulatory Boards, which qualifies them to practice physical therapy in Canada. Graduates will be eligible to register in the Canadian Physiotherapy Association and the Colleges of Physiotherapy in all Canadian provinces. Since the M.Sc.PT program is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE) of the American Physical Therapy Association, graduates are also eligible to apply for licensure in the United States.

**Combined M.Sc.PT/M.Sc. (Physical Therapy and Rehabilitation Science)**
A combined Master of Science in Physical Therapy/Master of Science option exists allowing students to pursue an academic research career. This option provides an opportunity to fast track towards a Ph.D. program. Students engage in a research program independently and complete the M.Sc. thesis requirements.

**Admission Requirements**
Applicants to the M.Sc.PT program must have a four-year University of Toronto bachelor’s degree, or its equivalent from a recognized uni-
versity, with a minimum mid-B average in the final year (i.e., 5 full-course equivalents at the senior level). Additional requirements include prerequisite courses in the life and/or physical sciences (one of the two life sciences courses must be a human/vertebrate physiology course); social sciences, humanities or languages (one full-course equivalent); and statistics (half-course). Refer to the departmental Web site (www.utoronto.ca/pt) for a full listing of admission requirements.

**English Language Facility**
Facility in the English language must be demonstrated by all applicants educated outside Canada whose primary language is not English and who graduated from a university where the language of instruction and examination was not English. Applicants must demonstrate facility in the English language through the successful completion of one of the English language proficiency tests listed in the School of Graduate Studies Calendar.

The Department of Physical Therapy strongly prefers that the Test of English as a Foreign Language (TOEFL), accompanied by the Test of Written English (TWE) and the Test of Spoken English (TSE) be used to satisfy the requirement. TOEFL: minimum score of 600 on the paper-based test or minimum score of 250 on the computerized test. TWE: minimum score of 5 on either the paper-based or computerized tests. TSE: minimum score of 50.

If it is impossible for an applicant to take the TOEFL, TWE, and TSE, the Department will accept one of the following:

a. the Michigan English Language Assessment Battery (MELAB: minimum score of 85);
b. the International English Language Testing System (IELTS: minimum score of 7.0);

c. the University of California, Berkeley English Language Proficiency Test (UC-BEAPEL: minimum score of 80)

**Application**
To obtain an application, contact the Ontario Universities’ Application Centre (OUAC) via the Web or by telephone:
- Web: www.ouac.on.ca/orpas and choose “Request an Application Package” option
- Telephone: (519) 823-1940 ext. 582 (24-hour automated phone request line)

If there are questions regarding the Ontario Rehabilitation Sciences Programs Application Services (ORPAS) application form, please contact orpas@ouac.on.ca or (519) 823-1940 ext. 559. Application forms are available mid-September. The application deadline is mid-January; deadline for transcripts is end of January.

**Program Requirements**
Candidates enrolled in the full-time program must complete all requirements within two consecutive years. The curriculum is organized into 12 units and includes lectures, seminars, tutorials, laboratories, case-based learning, structured clinical sessions, structured independent study units, and clinical internships. Research principles and practices are integrated into the curriculum. Students are required to complete all units. The M.Sc.PT program requires the completion of a research project. Students must demonstrate proficiency in key areas of professional practice, including research practice, prior to graduation.

**Note:** The M.Sc. degree program in Rehabilitation Science is a research-oriented program for students with a professional physical therapy degree; it does not prepare students for physical therapy, clinical practice, or licensure. The primary objective of the M.Sc. program is to prepare students for doctoral studies in Rehabilitation Science. Successful completion of the program does not guarantee entrance into the Ph.D. program. Consult the Rehabilitation Science entry in this calendar for details.

The Department carries out research in experimental and theoretical physics in the following fields: atmospheric physics, geophysics, quantum optics and condensed matter physics, and subatomic physics. The following brochures are available from the Department upon request:
Physics at Toronto and Graduate Course Listings.

The Department has close ties with the Canadian Institute for Theoretical Astrophysics. This association enables our students to work and consult with leading theorists who are appointed to, or who are visiting, CIT A.

Candidates are accepted under the general regulations.

Degree of Master of Science
The program of study for the M.Sc. degree will
consist of (a) four graduate lecture courses and a report which has a one-course equivalence, or (b) two graduate lecture courses, the appropriate 6000-series research course, and a report which is equivalent to two courses (PHY 3400Y and the appropriate 7000-series course), or (c) two graduate lecture courses and a thesis. Selection of the program is made by the student and a faculty advisor in consultation with the Associate Chair. The residence requirement for the M.Sc. degree is normally one academic session. All candidates for the M.Sc. degree are expected to attend the weekly general colloquium conducted by the Department.

Degree of Doctor of Philosophy
Candidates are normally admitted to the Ph.D. program after completion of the M.Sc. program or its equivalent elsewhere, but outstanding candidates who do not wish to first obtain their M.Sc. degree may apply for direct entry into the Ph.D. program. The core of the Ph.D. program is an original investigation, the results of which are embodied in a thesis. Lecture courses constitute a subsidiary but important part of the program. For details consult the Department. Normally the equivalent of four graduate courses is required; course credit will normally be given toward the Ph.D. for graduate lecture courses taken during a master’s program. Within eight months of starting the Ph.D. program, candidates must pass a qualifying oral examination. Candidates for the Ph.D. degree enrol each year in the appropriate 6000 sequential series of research courses. As an essential part of their research programs, students are expected to attend the weekly general colloquium conducted by the Department.

Both the M.Sc. and Ph.D. programs are full-time.

Collaborative Program in Astrophysics
Consult separate entry in this calendar.

Collaborative Program in Biomedical Engineering
Consult separate entry in this calendar.

Courses of Instruction
All courses are not given every year. Please check the departmental brochure or Web site for course availability.

University of Toronto  
Toronto, Ontario  
Canada  
M5S 1A8

Telephone: (416) 978-2601  
Fax: (416) 978-4940  
E-mail: graduate.physiology@utoronto.ca  
Web: www.uoftphysiology.com

Research in the Department includes:  
carbohydrate metabolism  
reproduction endocrinology  
fetal physiology, pregnancy, and parturition  
neuroendocrinology  
blood flow  
haemostasis  
cardiorespiratory regulation  
fluid volume and blood pressure regulation  
calcium metabolism  
gastrointestinal motility  
sensory physiology  
perceptual theory  
motor control  
muscle contractility  
brain development and aging  
ionic channels and neural transmission  
excitability, ultrastructure and plasticity  
of the brain

Admission is determined by the Department of Physiology Graduate Studies Committee and is based on academic record, an essay summarizing background strengths and scientific aims, and at least two confidential letters of reference. Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction was not English, must demonstrate facility in the English language through the successful completion of the Test of English as a Foreign Language (TOEFL). The admission standard for the paper-based TOEFL is a minimum score of 600 accompanied by the Test of Written English (TWE) with a minimum score of 5.0. For the computer-based TOEFL test the minimum score is 250 with an Essay Rating score of at least 5.0.

Degree of Master of Science

Admission Requirements

Acceptance normally requires a standing of at least B+ in the final year of a University of Toronto 20-credit bachelor's degree or its equivalent from a recognized university. Each candidate is recommended to have taken courses in biochemistry, calculus, organic and physical chemistry, general physics, and physiology.

Program Requirements

Course requirements within the master's program vary according to the student's academic background. One full-credit physiology graduate course is required. Students entering the graduate program with an extensive background in physiology will normally have taken a major advanced review course in physiology and will have obtained a standing of at least B+ for such a course. For such students a half-credit graduate course in physiology plus a suitable extradepartmental graduate half-credit course may be approved. The Admissions Committee requires that students without appropriate background in physiology take either the advanced physiology course PSL 1303Y or the review course PSL 1302Y. Either of these courses will fulfill the course requirement for the M.Sc. program. In addition, each candidate is expected to attend the departmental seminar series and must present a research thesis acceptable to the graduate department in order to qualify for the degree.

After 12 to 18 months in the M.Sc. program, students will either write and defend an M.Sc. thesis and graduate, write and defend a thesis and go on to the Ph.D. program, or transfer directly into the Ph.D. program. Direct transfer is permitted for the top students (normally an A-average or better in course work) who have made excellent progress with their research and have demonstrated the desire and potential to meet the requirements of a rigorous research training program. Such students should have the equivalent of at least one first author manuscript either published, in press, or submitted for publication, and a clearly identified program of research for the next three years. Too large a project for the M.Sc. is not a reason for transfer to the Ph.D. For students who transfer from the M.Sc. to the Ph.D. program, course work undertaken during the M.Sc. program may be credited towards the minimum course requirement for the Ph.D. degree.

Physical Sciences Stream

Special incentives are in place to encourage students from undergraduate programs in physics, mathematics, engineering, and other sciences to apply to the master’s program. These students will be required to take either the advanced physiology course PSL 1303Y or the review course PSL 1302Y (as their master’s course requirement) as arranged with the Graduate Studies Committee. Students enrolled in the Institute of Biomedical Engineering who
are registered through the Department of Physiology will take the introductory physiology review course JPB 1022H as part of their master's course requirement.

**Degree of Doctor of Philosophy**

**Admission Requirements**

Candidates may be admitted through transfer from the M.Sc. program or after completion of the M.Sc. degree program or its equivalent from a recognized university. For exceptional students with an A standing in appropriate courses taken during the two preceding undergraduate years, direct entry into the doctoral program is possible. However, this will require specific approval by the Graduate Studies Committee.

**Program Requirements**

Course requirements for candidates entering without a master's degree will normally be two full-course credits or four half-course credits in which an average standing of at least A- is maintained. Course work for candidates entering with or transferring from a master's degree program (one full credit or two half-credit courses) appropriate for the proposed research program will be determined by an advisory committee in consultation with the student and approved by the Graduate Studies Committee. Students without a background in physiology will take either the advanced physiology course PSL 1303Y or the review course PSL 1302Y which will count as their course requirement. A research proposal for the candidate's research program over the ensuing three years, prepared according to the CIHR grant format, must be submitted by the graduate department within 13 months of entering the Ph.D. program. The proposal should include a full background for the expected results, pitfalls, alternate strategies, and a budget. Failure to submit the proposal could be a reason to ask the student to withdraw from the program.

The recommended completion time for the doctoral program is about four years. Attendance at and contribution to the departmental seminar program is regarded as an important part of graduate education. Before concluding the program, the student must also demonstrate particular knowledge in his or her own specialty.

**Collaborative Programs**

The department participates in the following collaborative programs:
- Cardiovascular Sciences (M.Sc., Ph.D.)
- Developmental Biology (Ph.D.)
- Neuroscience (M.Sc., Ph.D.)
- Toxicology (M.Sc., Ph.D.) (see Environmental Studies entry)

For more details, consult the separate entries in this calendar.

**Courses of Instruction**

Students should consult the departmental Web site for course descriptions and availability at www.uofphysiology.com. Some courses are offered in alternate years only and some courses that are offered may not be given if too few students apply.

Graduate students from other departments who wish to take a course in physiology should consult the Department of Physiology regarding suitable courses.

Degree of Master of Science in Planning

This program, leading to a Master of Science in Planning (M.Sc.Pl.), is directed toward professional education in the fields of urban, environmental, economic, and social planning, as well as urban design. Almost half of the program deals with a core of material considered essential to general practice, while the remainder allows the candidate to specialize in one of five sub-fields. Workshops and seminars in the program provide contact with many senior professionals engaged in public and private practice. The program also provides access to courses and research facilities available in many other graduate departments, centres, and institutes across the University.

Admission Requirements

Candidates are admitted under the general regulations of the School of Graduate Studies. In addition, applicants must have an average of at least B+ standing in the social or life sciences, or the humanities, or the professions. A knowledge of introductory economics and statistics, as well as word processing and spreadsheet skills, is preferred prior to entry.

Program Requirements

Candidates normally enrol for two years of full-time study, although part or all of the requirements of the program may be met by part-time study, with the approval of the Program Director. Progress into the second year of the program is normally dependent upon the achievement of an overall B average in the first year. Equivalent provisions apply to the part-time program.

Note: All courses are not given every year; some faculty members are on research leave. Please consult the departmental graduate office for details.

1 The program consists of 16 half-courses, taken over 2 years. This includes the following six required courses (the core):
PLA 1101H Issues in Planning History, Thought, and Practice
K. Rankin, Staff
A further nine half-course equivalents (exclusive of PLA 4444H) are chosen from the following list of electives and from the offerings of other departments, centres, and institutes. At least five of these half-course equivalents must fit into an approved specialization in one of the following fields:

- Urban Planning and Development
- Environmental Planning
- Social Planning and Policy
- Economic Planning and Policy
- Urban Design

The requirements for the degree must be completed within six years of first registration in the program.

- PLA 1713H Place, Design, and Landscape/ E. C. Relph
- PLA 1751H Public Finance for Planners/ N. E. Slack
- PLA 1804H Space, Power and Geography: Understanding Spatiality/ S. Ruddick
- PLA 1810H Globalization and Postmodernism/ K. Goonewardena
- PLA 1904H Law and Planning/ S. M. Makuch, Staff
significant professional experience (normally at five year) in any discipline plus evidence of B+ in graduate studies is required.

administration and law, an average of at least second class) in the final year is required.

landscape architecture, with a strong design orientation. It aims to encourage an understanding of the interdependence of the economic, social, and political forces that shape the character, physical structure, and dynamic properties of cities.

This program coincided with the launch of the Master of Urban Design (MUD) degree program in the Faculty of Architecture, Landscape and Design. Consult the separate calendar entry under Architecture, Landscape, and Design for more details. Together, these two degree programs, in addition to the specialization in Urban Design within the Master of Science in Planning program, constitute a closely integrated suite of graduate programs in the discipline of Urban Design.

The MUDS program may be taken on a full-time or part-time basis.

**Admission Requirements**

Applications are encouraged from candidates with prior degrees in a range of disciplines including planning, geography, other social sciences, the design disciplines, business administration, and law. Three possible entry streams are anticipated.

1. For students with a bachelor’s degree (four or five year) in planning, architecture, or landscape architecture, with a strong design orientation; an average of at least B+ (or upper second class) in the final year is required.

2. For applicants with a master’s degree in a professional field such as planning, architecture, landscape architecture, business administration and law, an average of at least B+ in graduate studies is required.

3. Students with a bachelor’s degree (four or five year) in any discipline plus evidence of significant professional experience (normally at least five years) in an area related to Urban Design and Planning are required to have attained at least a B+ average in their final year.

**Program Requirements**

Students are required to take a total of eight half-course equivalents. Students entering the program with significant prior design workshop/studio experience (as determined by the admissions committee) must complete a core program of six half-course equivalents plus a further two half-courses chosen form electives given within the Program in Planning; the Faculty of Architecture, Landscape and Design; and from the offerings of other graduate units. Students without significant prior design workshop/studio experience must complete a core program of seven half-course equivalents plus a further two half-courses of electives. The requirements for the degree will normally be completed within one academic year, and must be completed within four years of first registration in the program.

The MUDS program may be taken on a part-time basis. The maximum time for completion of the degree requirements is four years from the time of first registration in the program. Part-time students will be expected to participate in the same class meetings as full-time students.

**Core Courses**

The core program is composed of six half-course equivalents (seven half-course equivalents for those entering the program without significant prior design workshop/studio experience) that encompass the practical, theoretical, and methodological aspects of urban design.

The course sequence for the core program is:

**First Session**

PLA 1650H/URD 1031H Urban Design: History and Theory Criticism

PLA 1654H Urban Design Research Methods

JPG 1501H The Political Economy of Cities

Plus one elective

Students without significant design workshop/studio experience must also take:

PLA 1652H Introductory Studio in Urban Design and Planning

**Second Session**

PLA 1653Y Advanced Studio in Urban Design and Planning

PLA 1655H Urban Design and Development

Plus one elective

The Institute’s objective is to develop and maintain a research program in economic and social policy that complements graduate studies in the social sciences, business and law. To promote research, the Institute offers office space and support to relevant faculty. The Institute may also arrange for the publication of research results of Associates.

Research projects in process in the previous academic year cover a diverse set of issues and topics. These include a theory of conservatism, agglomeration effects on technology adoption, barriers to capital accumulation and aggregate total factor productivity, competition policy, contracting theory and restrictive business practices, dynamic factor models of consumption, hours and income, empirical applications in industrial organization, empirical applications in international trade, exclusive dealing contracts as competition for the field, financial sector regulation, health care networks, inflation and technological advances in the financial sector, investment irreversibility in general equilibrium models, growth and unemployment with efficiency wages, intergenerational persistence of earnings, knowledge creation and control in organizations, lobbying and commitment failures in capital taxation, macroeconomic policy, monetary policy and business cycles, non-parametric estimation and inference, portfolio choice in the presence of personal illiquid projects, price-matching offers, relative degrees of aggregate employment fluctuations, retail competition and distribution, sequential screening, the economics of art, the effect of collective bargaining legislation on strikes and wages, the economics of frequent flyer programs, the effects of trade and financial liberalization, the retirement behaviour of married couples, the theory of the firm, the welfare effects of international trade agreements, working time over the life cycle, workplace risk and wages.

The Institute offers office accommodation to a select number of senior graduate students working with Institute Associates. As well, the Institute occasionally employs graduate students as research assistants on a part-time basis during the academic year and on a full-time basis in the summer months.

The Institute underwrites a set of workshops and seminars on the analysis of economic strategy as applied to selected fields of economics. The Institute also sponsors short-term visits by distinguished academics from other universities. The objective of these workshops, seminars, and visits is to promote greater interaction between faculty and graduate students, between those within the University and distinguished scholars from
other universities and between academics and external decision makers in both the private and public sectors. The Institute sponsored workshops include:
- Workshop in Empirical Economics
- Workshop in Industrial Organization and Business Economics
- Workshop in International Trade
- Workshop in Monetary and Macro Economics
Political Science

Web: www.chass.utoronto.ca/polsci/Graduate/gradinfo.html

Application packages are available from the Department or the Department's Web page: www.chass.utoronto.ca/polsci/Graduate/gradinfo.html. All applicants are required to submit a sample of their written work and a statement of intent to the Department as part of the application process. M.A. applicants must arrange for three letters of academic recommendation to be sent to the Department, and Ph.D.
Departmental M.A.—Politics and Policy Stream

This stream is aimed at students with more empirical interests in Political Science. It is particularly designed to serve those who wish to apply their political science skills in the public service or in the private sector, as well those contemplating further academic study or research. Courses taken must include at least one half-course in Political Theory, which can be either the half-course offered by the Department specifically for this purpose (POL 2040H) or any other theory course. Also required is at least one half-course in statistics or research design. POL 2502Y, POL 2503H, and POL 2504H are among the courses currently offered by the Department which meet this requirement. The final requirement is a full-year seminar which emphasizes an independent research project. POL 2810Y and POL 2811Y are the two seminars currently offered which meet this requirement. Courses in this program should be chosen in consultation with the M.A. Supervisor.

Specialist Program in Political Economy of Development

Students who enter this program must have a satisfactory background in political science and undergraduate prerequisites in microeconomics, macroeconomics, and statistics. Note that a "satisfactory background in political science" means a minimum of five well distributed courses, including at least one relating to development. Those who lack any of these prerequisites must obtain them in addition to the required graduate courses. Therefore, this specialist program may take some entrants longer than one academic year to complete.

In this program all students are required to take JPE 2408Y Political Economy of International Development. In addition, students must complete the equivalent of one full graduate course in Economics selected from the Economics course list (see listing in the Graduate Information Guide). One additional course must be chosen from the approved Political Science course list. The remaining course may be chosen from either the Political Science or Political Economy course lists.

Specialist Program in Public Policy and Global Economy—Transatlantic Masters Program

The Transatlantic Masters Program in Public Policy and Global Economy offered in cooperation with McMaster University and the Univer-
University of Montreal, enables students to study and do research at one of four European partner universities (Bath, United Kingdom; Tilburg, Netherlands; Maynooth, Ireland; and Bremen, Germany). Program requirements include a thesis and course work in the fields of comparative public policy, policy analysis, comparative research methods, and globalisation and supranational structures. Admission requirements and the application procedure are the same as those for the Master of Arts program in Political Science.

Degree of Doctor of Philosophy

Admission Requirements

Admission to the Ph.D. program is offered only to excellent students who have either completed an M.A. degree in political science (or its equivalent) by the time of enrolment or have completed the equivalent of a four-year B.A. with a concentration in political science by the time of enrolment. It is expected that most successful applicants will have completed or be in the process of completing an M.A. Only exceptional students will be admitted directly to the Ph.D. program from the B.A. Applicants from both levels are expected to have achieved grades averaging A- or better in their most recent degree. Applicants from the B.A. level will apply to the M.A. program but indicate on the M.A. application form that they wish to be considered for direct entry to the Ph.D. program.

Program Requirements

1 Course requirements

The Department offers graduate courses in the following five core fields:

- Political Theory
- Canadian Government and Politics
- International Relations
- Comparative Government—Developing Societies
- Comparative Government—Industrial Societies

Many of the principal teaching and research interests of the Department's faculty focus on areas which cut across the conventional core fields. These are designated as areas of specialization which provide an alternative way of structuring the graduate program. Currently the following areas of specialization are offered:

- Public Policy (PP)
- Political Economy (PEC)
- Public Law and Federalism (PLF)
- Political Behaviour and Democratic Politics (PBD)
- Women, Gender, and Politics (WGP)

Students who enter the Ph.D. program from a B.A. should aim to complete their work within six years. They will take a total of six full graduate courses, of which four, including one half-course in political theory, will normally be taken in the first year. Students will need to attain at least an A- average in their first four courses in order to continue in the Ph.D. program. The remaining two courses, including the core course in the major field, will be taken in the second year, along with the qualifying examination in the major field. In selecting their courses, students should ensure that they satisfy the field and/or area requirements as described below for those entering the Ph.D. program with an M.A.

Students who enter the Ph.D. program from an M.A. should aim to complete their work within five years. They will take between two and five full courses, depending on their relevant background in the major and minor fields/areas they choose to pursue. All Ph.D. students are also required to have at least one graduate half-course in political theory. All Ph.D. students in majors other than Political Theory are also required to complete one half-course in research methods and design. Graduate courses taken at the M.A. level at the University of Toronto or elsewhere may be counted, with the Department's permission, towards meeting some course requirements. It is expected that most students who enter from the M.A. will take the equivalent of three full courses to satisfy program requirements; all Ph.D. students must take a minimum of two full courses with the Department after entering the Ph.D. program.

Ph.D. students have the option of organizing their course work in one of two ways:

a. A major core field and a minor core field

Students who choose this option must take the core course plus the equivalent of one other full-year course in the major field, and the core course plus the equivalent of one other full-year course in the minor field.

b. A major core field and an area of specialization

Students who choose this option must take the core course plus the equivalent of one other full-year course in their major field and the equivalent of two full-year courses in their area of specialization, at least one of which must be outside the major field.

2 Major field examination

By the end of the second year of the program, all Ph.D. students will be expected to have taken a written examination in the major field. In the fields of Canadian Government and Politics, International Relations, Comparative Govern-
ment—Developing Societies, and Comparative Government—Industrial Societies, the examination is based on the subject matter of the core course. In Political Theory, it is based on a list of texts made available by the Department.

The major field examination should be taken in May or August of the year in which the core course is taken as long as all assignments in the core course have been completed. The examination must be taken no later than the second year of the Ph.D. program. A student who fails to achieve a grade of at least A- is permitted one opportunity to rewrite the examination. If, after failing the examination once, the major field is changed, the student is permitted two attempts to pass the examination in the new field.

3 Thesis proposal, thesis committee, and thesis schedule

Students should assign a high priority to defining a thesis topic and choosing a thesis committee. Those entering the Ph.D. program from an M.A. must identify a working thesis topic and the name of a supervisor by October 15 of their second year. Those entering the program from a B.A. must do so by October 15 of their third year. Six months later, in both cases, the student must (a) have established a thesis committee of three faculty members including a thesis supervisor, and (b) have completed a thesis proposal of approximately 25 pages for submission to the thesis committee.

The research and writing of the thesis will follow the acceptance of the thesis proposal. The work schedule should permit the student to complete his or her thesis by the end of the fifth year (in the case of those admitted from an M.A.) or the sixth year (in the case of those admitted from a B.A.).

4 Language requirement

To satisfy the language requirement, students must demonstrate a competence in French or in an approved language appropriate to the nature of the graduate work in which they are engaged. This requirement is to be met by the end of the third year of study.

5 Residency requirements

Those entering the program from an M.A. must spend a minimum of three sessions in residence. Those entering from a B.A. must spend a minimum of six sessions in residence.

Transfer Between the M.A. and Ph.D. Programs

Students admitted to the Ph.D. from a B.A. (or equivalent degree) who receive less than an A-average in their first four courses will be recommended to SGS for transfer to the M.A. program. If the transfer is approved, these students will graduate with a terminal M.A., provided their grades meet the requirements of the M.A. degree.

In exceptional cases, on the initiative of the Director of Graduate Studies, students may be transferred from the M.A. to the Ph.D. program. Such transfers will occur only where a full assessment of a candidate's B.A. record (or equivalent) was impossible and where that candidate's instructors concur that the student in question has excelled in the first half of the M.A. program.

Collaborative Programs

For more information about each of the following collaborative programs, consult the respective entries in this calendar.

Asia-Pacific Studies Collaborative Program

The Department of Political Science participates in the Collaborative Master of Arts Program in Asia-Pacific Studies. This program provides graduates with advanced training in traditional disciplines as well as interdisciplinary expertise in modern East and Southeast Asia. The major topical areas of study include political economy, modern and contemporary social history, international relations, gender and the family, political and social change, economic development, and cultural studies.

Environmental Studies Collaborative Program

The Department of Political Science, in conjunction with the Institute for Environmental Studies (IES) and other departments, offers a collaborative master's program in Environmental Studies. Students in the program take two core half-courses offered by the Institute, one specialized IES half-course, and the equivalent of 2.5 graduate courses in Political Science. An internship, culminating in a research essay, is also required.

The Department also participates in the Collaborative Ph.D. program. Ph.D. candidates must write a thesis on an environmental topic and must complete two core half-courses, IES 1001H and IES 1002H, unless these were completed in the Collaborative M.A. program, in which case two other half-courses are required.

Ethnic and Pluralism Studies Collaborative Program

Together with a number of other departments, the Department of Political Science participates in the Collaborative Program in Ethnic and
Pluralism Studies leading to an M.A. or a Ph.D. Master’s students must take two half-courses in ethnicity from two different disciplines, the coordinating seminar in ethnicity (JTH 3000H) and, if a thesis is written, it should be in an ethnic studies area.

Doctoral students must take four half-courses, including the courses taken for the master’s degree, at least two of which must be outside the home department. A coordinating seminar in ethnicity (JTH 3000H) is also required, except for students who have completed it at the master’s level. The Ph.D. thesis will focus on ethnicity.

International Relations Collaborative Program
The Department participates in the Collaborative M.A. Program in International Relations. Admission to this program is restricted and highly competitive. Application is made to the home department through the normal procedures. In addition, a statement of interest, curriculum vitae, and copies of transcripts should be sent to the Director, International Relations Collaborative Program.

In addition, a combined J.D./M.A. in Political Science (specialization in International Relations) is available to students currently in, or applying to enter, first year Law at the University of Toronto.

Women’s Studies Collaborative Program
Together with other departments, the Department of Political Science participates in the Women’s Studies Collaborative Program. Upon successful completion of the requirements, students will receive a degree with the notation “Completed Collaborative Program in Women’s Studies” on their transcript.

Courses of Instruction
Some courses listed have an undergraduate component and begin the first week of the session. POL 2501Y is a general research design course, the research component of which depends on the student’s declared area of specialization. Thus, it may be counted for credit in the major field or be taken to fulfill the research design requirement, but it does not count toward the Political Theory major and does not count as fulfilling the theory requirement.

Not all courses are given every year. Consult departmental timetable.

Graduate training in psychology stresses training in general experimental psychology. Areas of specialization include the following: brain and behaviour, perception and cognition, developmental psychology, social psychology, and personality/abnormal psychology. The Department does not offer instruction or specialization in clinical psychology. In all areas, the emphasis is on training for experimental research.

Students are admitted under the general regulations of the School of Graduate Studies. Successful candidates normally have at least an A- average (or first-class standing) in their last two undergraduate years, and the equivalent of six full courses in psychology including statistics and some laboratory experience. Other conditions for admission are outlined in a separate booklet, Graduate Studies in Psychology, available from the Coordinator of Graduate Studies. It is assumed that all students entering the master’s program intend to continue into the Ph.D. program.

Degree of Master of Arts
The M.A. program in Psychology requires one academic year of graduate study. The program of study includes courses and individual research training leading to a thesis.

In the M.A. year, students must complete the following five half-course equivalents:
1. PSY 1000H Directed Studies to prepare for the M.A. thesis research
2. PSY 2001H Design of Experiments I, experimental design and statistics
3. PSY 2005H Strategies and Methods in Psychological Research
4. two half-courses from a list of core courses
5. M.A. thesis

It is expected that after the M.A. year, students will proceed to the Ph.D. program. To be eligible for admission, adequate research performance and at least an A- average are normally required.

Degree of Doctor of Philosophy
The Ph.D. program in Psychology requires a minimum of two years of residence beyond the master's degree, but usually takes at least three years. Applicants with a master’s degree from another university may be required to enrol in a three-year residence program. Individual programs of study are planned and include continuing research training with staff members. There is no language requirement.

It is expected that after the M.A. year, students will proceed to the Ph.D. program. To be eligible for admission, adequate research performance and at least an A- average are normally required.

All students must complete the following:
1. PSY 2002H Design of Experiments II — usually taken in Ph.D. 1. Students who demonstrate adequate previous training may be exempted from this course.
2. PSY 3000H Research Project in Psychology — usually taken in Ph.D. 1. This is a research project course supervised by a faculty member other than the student's Ph.D. supervisor. It is a one-session course spread over Ph.D. 1.
4. Four half-courses from a list of core courses and advanced seminars.
5. Breadth requirement — during the M.A. and Ph.D. combined, two half-courses from core courses in two different areas not in the student’s major area, each course requiring a major paper. Courses taken to fulfill the breadth requirement may be included in the four half-course requirement.
6. Thesis proposal and oral exam PSY 4000H. This is a one-session course spread over the full year leading to a formal proposal for doctoral research and requiring an examination in the student’s area of specialization.

Students may take other courses as they wish, but it is expected that the requirements will be completed in the first two years of the Ph.D. program. Students admitted with an M.A. from another university will normally be required to take PSY 2001H Design of Experiments I and PSY 2005H Strategies and Methods in Psychological Research, in addition to the other Ph.D. requirements; however, exemptions may be granted by the graduate director of the Department of Psychology.
Courses of Instruction

Not all courses are offered each year. For current offerings, consult the Coordinator of Graduate Studies.

PSY 1000H Directed Studies
PSY 1200H, Y Selected Topics in Psychology
PSY 1500H Conceptual Bases of Psychology
PSY 2001H Design of Experiments I
PSY 2002H Design of Experiments II
PSY 2005H Strategies and Methods in Psychological Research

Biology and Behaviour

Core Courses
PSY 5101H Mechanisms of Behaviour
PSY 5102H Motivational Processes
PSY 5103H Learning and Plasticity
PSY 5104H Neuropsychology

Advanced Courses
PSY 5110H Advanced Topics in Behavioural Neuroscience I
PSY 5111H Advanced Topics in Behavioural Neuroscience II
PSY 5112H Advanced Topics in Behavioural Neuroscience III
PSY 5120H Advanced Topics in Animal Behaviour and Motivation I
PSY 5121H Advanced Topics in Animal Behaviour and Motivation II
PSY 5122H Advanced Topics in Animal Behaviour and Motivation III
PSY 5130H Advanced Topics in Neuropsychology I
PSY 5131H Advanced Topics in Neuropsychology II
PSY 5132H Advanced Topics in Neuropsychology II

Perception/Cognition/Cognitive Neuroscience

Core Courses
PSY 5201H Audition
PSY 5202H Vision
PSY 5203H Higher Cognition
PSY 5204H Attention
PSY 5205H Memory

Advanced Courses
PSY 5210H Advanced Topics in Perception I
PSY 5211H Advanced Topics in Perception II
PSY 5212H Advanced Topics in Perception III
PSY 5220H Advanced Topics in Cognition I

Developmental Psychology

Core Courses
PSY 5300H History, Theory and Methods of Developmental Psychology
PSY 5301H Biological Development
PSY 5302H Perceptual Development
PSY 5303H Cognitive Development
PSY 5304H Language Development
PSY 5305H Social Development

Advanced Courses
PSY 5310H Advanced Topics in Development I
PSY 5311H Advanced Topics in Development II
PSY 5312H Advanced Topics in Development III
PSY 5313H Advanced Topics in Development IV

Social/Personality/Abnormal Psychology

Core Courses
PSY 5401H Abnormal
PSY 5402H Personality
PSY 5403H Social Cognition
PSY 5404H Interpersonal and Group Behaviour

Advanced Courses
PSY 5410H Advanced Topics in Abnormal I
PSY 5411H Advanced Topics in Abnormal II
PSY 5412H Advanced Topics in Abnormal III
PSY 5420H Advanced Topics in Personality I
PSY 5421H Advanced Topics in Personality II
PSY 5422H Advanced Topics in Personality III
PSY 5430H Advanced Topics in Social Psychology I
PSY 5431H Advanced Topics in Social Psychology II
PSY 5432H Advanced Topics in Social Psychology III
PSY 5433H Advanced Topics in Social Psychology IV
PSY 3000H,Y Research Project in Psychology
PSY 3001H Professional Psychology (Credit/No Credit)
PSY 3002H Teaching Practicum (Credit/No Credit)
PSY 4000H,Y Specialization Study (Credit/No Credit)
PSY 4700H Psychology Testing and Assessment I
PSY 4701H Psychology Testing and Assessment II

Courses which may continue over a program. The course is graded when completed.

Candidates are admitted to the multidisciplinary field of community health under the general regulations of the School of Graduate Studies. Applicants are strongly advised to have some background in statistics and quantitative methods, as well as in a social science discipline. In
addition, field and employment experience are taken into consideration, especially for the M.H.Sc. program. More specific program details, requirements, course descriptions, and a supplementary application are available from the Graduate Department of Public Health Sciences. A complete description of all programs, degree requirements, courses, faculty research interests, and policies is available on the departmental Web site www.phs.utoronto.ca. Applications should be submitted by February 1.

Degree of Master of Health Science
In the Master of Health Science program students may specialize in one of five areas:
- Community Health and Epidemiology
- Community Nutrition
- Family Medicine
- Health Promotion
- Occupational and Environmental Health

All students in the M.H.Sc. program will learn the basic theoretical and methodological approaches used in community health, will share a common understanding of the field, will be able to pursue areas of specific personal interest, and will acquire some field experience (practicum) in their chosen area. Course sequences have been planned to include a set of common core courses, to introduce basic theory and methods early, to allow as much elective time as possible, and to permit the application of theory to practice in a field setting. A thesis is not required, but students may be required to undertake major papers and independent projects.

Program Requirements
1. An approved program of study includes the equivalent of 10 full courses, of which 0.5 course equivalent is a core subject and at least 1.0 course equivalent is a field practicum.
2. If registered on a full-time basis in the program and, with the exception of the session in which a practicum is undertaken, a student should take two to three full-course equivalents in any one session.
3. Depending on the area of specialization, full-time students require between 16 and 22 months to complete an M.H.Sc. program, including time spent in appropriate field settings.
4. Specific program requirements and course sequences and options vary by area of specialization and are fully explained on the Web site.
5. A part-time study option is available which allows six years for completion of the program. Contact the Graduate Department of Public Health Sciences for further information.

Degree of Master of Science
The M.Sc. degree program is undertaken by students interested in research and academic careers in public health sciences. The specializations offered include:
- Biostatistics
- Epidemiology
- Health and Behavioral Sciences
- Occupational and Environmental Health
- Social Science and Health (formerly Behavioral Science)

Each specialization has specific course requirements and may have other requirements in addition to the common features listed below.

Program Requirements
1. Completion of all degree requirements within five years.
2. The writing of a thesis under the supervision of a thesis committee (supervisor and at least one additional faculty member) and its defence before an examination committee appointed by the Graduate Department of Public Health Sciences.
3. A course-only option is available in Biostatistics.
4. The course load varies by specialization and the student's knowledge of the field of specialization and is fully explained on the Web site.
5. A part-time M.Sc. program is available. Submission of an approved program plan, with annual updates, is required.

Degree of Doctor of Philosophy
The Ph.D. degree program is undertaken by students interested in research and academic careers in community health. The specializations offered include:
- Biostatistics
- Epidemiology
- Social Science and Health (formerly Behavioral Science)

Applicants to the Ph.D. program normally will be expected to have completed a M.A. or M.Sc. (with a thesis) in a related field and to provide satisfactory references pertaining to their academic and research abilities. Upon the recommendation of the appropriate Public Health Sciences committees, outstanding students with a non-thesis master's degree may be admitted to the Ph.D. program if they have appropriate background preparation and research experience or publications which can be considered equivalent to a master's thesis.

In exceptional circumstances, applicants would qualify for direct entry into the doctoral program with a bachelor's or equivalent degree.
and subject to the review and approval by the appropriate Public Health Sciences committees.

Students transferring from the M.Sc. to the Ph.D. program are normally required to complete the sum of the normal master's course requirements unless otherwise specified by the program.

**Program Requirements for Full-Time Ph.D.**

Each specialization has specific requirements in addition to the common features listed below:

1. Full-time registration (winter and summer sessions) for the first four years of the doctoral program.
2. Completion of all degree requirements within six years from first registration in the program. Thereafter, candidates may apply for a maximum of two extensions.
3. The writing of a comprehensive examination in the major area of specialization.
4. The designation of a minor area of specialization, depending on sub-specialization.
5. The successful completion of formal examinations and other assessments at specified points within the program to ensure continuation in the program.
6. Satisfactory evidence of proficiency in statistics or research methods or the inclusion of at least one such course in the program.
7. The writing of a Ph.D. thesis under the supervision of an approved thesis committee (supervisor plus two additional faculty members).
8. The oral defence of the thesis before an examination committee appointed by the School of Graduate Studies.
9. The course requirements vary by specialization and are related to the student's knowledge of the field.

Consult the Web site.

**Program Requirements for Flexible-Time Ph.D.**

With the approval of the graduate chair, some applicants may be admitted to a flexible-time Ph.D. program. This program will benefit mature students with career and/or familial obligations. The degree requirements for the flexible-time program are identical to those listed above for the full-time Ph.D. program; however, students have up to eight years to complete the program. They are required to register full-time for the first four years of their program. Thereafter, they may register part-time. A plan of study and research activities will be negotiated at initial registration, to be reviewed and updated annually.

**Collaborative Programs**

Students in the M.H.Sc., M.Sc., and Ph.D. programs in the Graduate Department of Public Health Sciences may also participate in a range of collaborative programs. For more details see the separate listings in this calendar:

- Addiction Studies
- Aging and the Life Course
- Bioethics
- Cardiovascular Sciences
- Environment and Health (see Environmental Studies)
- Women's Studies

**Courses of Instruction**

Not all courses are offered each year. Please check the timetable on the Web site www.phs.utoronto.ca for current course offerings.

**Core Courses**

- CHL 5004H Introduction to Public Health Sciences/P. Corey, K. Domnick

**Biostatistics and Demography**

- CHL 5201H Introductory Biostatistics for Students in Biological Sciences I/ P. N. Corey, M. Escobar
- CHL 5202H Introductory Biostatistics for Students in Biological Sciences II/ P. N. Corey
- CHL 5203H Survey Methods in Health Sciences I/L. Calzavara
- CHL 5204H Survey Methods in Health Sciences II/E. Adlaf, S. Bondy
- CHL 5205H Demography and Vital Statistics I/ Staff
- CHL 5206H Demography and Vital Statistics II/Staff
- CHL 5207Y Laboratory in Statistical Design and Analysis/Staff
- CHL 5208Y Advanced Laboratory in Statistical Design and Analysis/Staff
- CHL 5209H Survival Analysis/Staff
- CHL 5210H Statistical Analysis of Qualitative Data/S. B. Bull, G. A. Darlington
- CHL 5211H Demographic Analysis/J. Hsieh
- CHL 5220H Community Health Appraisal Methods I/J. Payne, A. Chiarelli
- CHL 5221H Community Health Appraisal Methods II/K. Allison
- CHL 5222H Longitudinal Data Analysis/ J. Stafford
- CHL 5223H Applied Bayesian Methods/ M. Escobar
- CHL 5224H Statistical Genetics/L. Sun

The Graduate Department of Rehabilitation Science provides opportunities for the systematic study of the physical and psychosocial dimensions of human function throughout the lifespan of individuals with impairments, disabilities, and/or handicaps. The M.Sc. in Rehabilitation Science is a master's program preparing graduates for research and should not be confused with a graduate entry level program leading to professional practice. The program includes a core course in rehabilitation science research. Eleven additional courses, three in the field of physical rehabilitation and four in the field of psychosocial rehabilitation, are also offered. The program is designed to maximize the exceptional resources available within the University of Toronto health science complex. The program enhances the current research activity in rehabilitation science and prepares students for further graduate study.

Enquiries
Enquiries should be made to the Administrative Assistant at the above address.

Degree of Master of Science

The Graduate Department of Rehabilitation Science offers programs leading to the M.Sc. degree. Students of the Department may also participate in the following collaborative programs:

- Aging and the Life Course
- Biomedical Engineering
- Cardiovascular Sciences
- Neuroscience

For further information about each collaborative program, consult the separate entries in this calendar.

Admission Requirements

Applicants to the M.Sc. program must have graduated with a four-year University of Toronto B.Sc. degree, or equivalent, with special training in occupational therapy, physical therapy, or a related field, or the equivalent from a recognized university, with a B+ average in the final two years of undergraduate study. Related fields might include nursing, psychology, sociology, social work, physical and health education, basic sciences, biomedical engineering, kinesiology, and others. Evidence of written and verbal proficiency in English is required for applicants whose first language is not English (see SGS standards).
**Program Requirements**

The M.Sc. program in Rehabilitation Science includes both course work and a thesis. Minimum requirements include REH 1100H *Theory and Research in Rehabilitation Science*, REH 2001Y *Rehabilitation Presentations and Proceedings*, one half-course in research methodology appropriate to thesis design, and at least one additional half-course related to the field of study. Candidates must submit a thesis on their research and be examined by the Thesis Committee.

The program requires a minimum of 12 months of full-time study. Candidates should be aware that the completion of the thesis may take longer. Exceptional students may be considered for enrolment in a part-time program. There will be no residency requirement for part-time students. They must complete the program within five years; however, all course work must be completed within the first two years of the program. Part-time students must agree to an annual Learning Contract and must submit a Program Map (planned with his or her supervisor) to the Department. Part-time students should be aware that it is the student’s responsibility to modify his or her schedule to accommodate required course work since course times are not flexible.

**Courses of Instruction**

Since not all courses are offered each academic year, the Department should be consulted each session as to course offerings.

- REH 1100H Theory and Research in Rehabilitation Science/M. C. Verrier, B. H. Kirsh
- REH 1110H Rehabilitation Services Research and Policy/S. Rappolt
- REH 1120H Research Methods for Rehabilitation Science/S. B. Jaglal
- REH 1510H Disordered and Restorative Motor Control/W. McIlroy, M. C. Verrier
- REH 1520H Physiological Factors Constraining Rehabilitation of the Elderly/K. Lundon, S. G. Thomas
- REH 1540H Research Topics in Assistive Technology/D. T. Reid, M. Milner, G. R. Fernie, S. Naumann
- REH 1550H Advanced Study of the Musculoskeletal Tissues for the Rehabilitation Specialist/K. Lundon
- REH 1610H Environmental Theory in Rehabilitation/K. A. Boschen
- REH 1620H Methodological Issues in Research on Aging and Health/A. Colantonio, C. Cott
- REH 1630H Psychosocial Adjustment and Quality of Life Issues/R. M. Renwick, J. F. Friedland
- REH 1640H Sociology of Disability/K. K. Yoshida
- REH 2000H Individual Reading and Research Course/D. Brooks (Coordinator)
- REH 2001Y Rehabilitation Presentations and Proceedings (Credit/No Credit)/K. A. Boschen

Address:
Centre for the Study of Religion
123 St. George Street
University of Toronto
Toronto, Ontario
Canada
M5S 2E8

Telephone: (416) 978-3057
Fax: (416) 978-1610
E-mail: religion.grad@utoronto.ca
Web: www.chass.utoronto.ca/religion

The Centre for the Study of Religion, the graduate unit of the Department for the Study of Religion, offers programs for the study of religion at both the master’s and doctoral levels and facilitates research and publication on religion. The Centre consolidates the vast curricular and faculty resources that are distributed throughout the many departments and colleges of the University and enables its students to use any resource in the University which serves the study of religion.

The Centre conceives the study of religion in broad terms, and embraces as many methods as prove useful. Programs of study are constructed individually to fit the specific needs and interests of each student. At the doctoral level, from the point of admission onward, student programs must be matched with the expertise
of at least three professors who help supervise the student’s work. The Centre’s Graduate Studies Handbook, available on the Web and from the Centre, gives full information on admissions and programs as well as the research and teaching interests of the faculty.

Admission
The following materials should be sent directly to the Centre: the admissions application form; all transcripts; a statement of aims (200 words) for graduate study, which for doctoral applicants should indicate a possible area of thesis work; three confidential letters of recommendation; and for doctoral applicants a brief academic résumé.

Degree of Master of Arts

Admission Requirements
The normal prerequisite is a four-year bachelor’s degree with specialization at the undergraduate level in a program of religious or cognate studies broadly equivalent to the University of Toronto’s B.A. Specialist degree in religion, with at least B+ standing in the final year. Students without appropriate preparation may be required to take additional work either before admission or during an extended master’s program.

Program Requirements
The M.A. program has two components.

1 Courses. Four full courses, or the equivalent, are required, including RLG 2000Y Major Research Paper. An extended program requires additional courses, some of which may be at the undergraduate level.

2 Language(s). Reading knowledge of at least one language, in addition to English, selected from languages of modern scholarship and/or necessary source languages. Decisions about language requirements and how they shall be satisfied in each case are made by the Associate Director.

Degree of Doctor of Philosophy

Admission Requirements
For admission to the doctoral program, students normally must have completed all requirements of the Centre’s M.A. program, or of a comparable program at another university, with an average of at least A in course work and with no individual course falling below B.

Program Requirements
Entry into a new program is ordinarily permitted only in September. Upon entry into the Centre, students will be assigned an advisory committee to assist them in structuring their program. Students are required to spend at least two winter sessions on campus in full-time study, normally those of the first two academic years of a program. The Ph.D. program has five components.

1 Courses. Students must complete a minimum of three full courses or the equivalent. These shall include RLG 1000Y Method and Theory in the Study of Religion and at least one half-course in an area other than that designated as the area of specialization. Students may be required to take more than three courses if their preparation is considered deficient in a subject required for their program.

2 Languages. Reading knowledge is required of at least two languages in addition to English, selected from languages of modern scholarship and necessary source languages provided that at least one shall be a language of modern scholarship. Preparation for at least one of these languages usually would have been completed prior to entry into the program. Decisions about language requirements and how they shall be satisfied in each case are made by the student’s advisory committee in consultation with the Associate Director. The language requirements must be fulfilled before writing the general examinations.

3 Thesis Proposal. Upon completion of the course work the candidate must submit a thesis proposal for approval by the candidate’s supervisory committee.

4 General Examinations. The candidate’s supervisory committee will set general examinations to assess the candidate’s readiness for thesis research. Written examinations will cover (a) the candidate’s area of specialization, and (b) at least one important cognate area. An oral examination on all materials assigned for the general examinations will follow. The general examinations are normally completed during the second year or by December in the third year of doctoral study.

5 Thesis. Upon successful completion of the general examinations, candidates will proceed to research and write a doctoral thesis which must be defended successfully at an oral examination. The writing of the thesis should not require more than two years.
Collaborative Programs
The Centre participates in the following collaborative programs:
- Bioethics
- Ethnic and Pluralism Studies
- International Relations
- South Asian Studies
- Women’s Studies

Descriptions of these programs appear under their own headings in this calendar.

Courses of Instruction
Not all courses are offered every year. Please consult the Centre’s Graduate Studies Handbook which lists the courses the Centre will offer this year as well as those cross-listed from other departments.

Telephone: (416) 946-8938
Fax: (416) 946-8939
Web: www.utoronto.ca/crees/

The Centre for Russian and East European Studies was founded in 1963 to further the development of undergraduate and graduate studies and scholarly research related to Russia and Eastern Europe. This area includes both the USSR and pre-1917 Russia, and the region of Eastern Europe, with special emphasis on the Slavic nations. The Centre acts as a liaison between the departments and advises students in matters relating to the study of Russia and Eastern Europe. Graduate work relating to Russia, the Soviet Union, and Eastern Europe may be undertaken for the M.A. and Ph.D. degrees in a discipline such as economics, geography, history, political science, Slavic languages and literatures, or sociology under the appropriate department. In addition, the Centre offers its own M.A. program in Russian and East European Studies.

Degree of Master of Arts

Admission and Special Requirements
Candidates for the M.A. are accepted under the general regulations of the School of Graduate Studies. At least some of the work in the program is based on the study of original texts and presupposes a reading knowledge of a language relevant to the program. Candidates should have a minimum of one academic year of study in a relevant language and are urged to undertake additional language training in the summer preceding entry to the program.

The M.A. program requires a minimum of two sessions of full-time graduate study. Students will be required to take six full courses or the equivalent. Of the six, at least two (or the equivalent) must be taken in a discipline chosen by students as their major discipline and one must be RUS 2000Y, the interdisciplinary core
course. It must be taken in the second year of the program. The remaining courses must be drawn from at least two disciplines other than the major discipline.

**Combined Juris Doctor/Master of Arts (Russian and East European Studies)**

The J.D./M.A. program is intended for highly qualified candidates who wish to combine the study of law with the opportunities that a detailed knowledge of eastern Europe and the countries of the former Soviet Union now offer. The program allows candidates to receive the combined degree in four years of study instead of the five years needed to take the degrees separately.

Candidates will be admitted to the Faculty of Law in the first year and receive deferred admission to the M.A. program in Russian and East European Studies. The first year of study will consist of the first year of the J.D. in the second, third, and fourth years of the combined program, students will pursue credits in both Law and Russian and East European Studies. Applicants who have completed a year in the Russian and East European Studies master’s program or the first year of the J.D. can apply for admission to the combined program.

Applicants must separately apply and be accepted by both the J.D. program and the M.A. (Russian and East European Studies) programs. They must satisfy the normal admission requirements for each program.

Nature of the Collaborative Program
Graduate units in Anthropology, Comparative Literature, French, Italian, and Linguistics participate in the Collaborative Master's Program in Semiotics at the University of Toronto. The collaborating units contribute faculty, courses, and supervision for master's level research. The Centre for Comparative Literature is the coordinating unit. The program is housed at Victoria College. A Program Committee, chaired by a Program Director, administers the collaborative program.

The collaborative master's degree in Semiotics is a highly interdisciplinary program designed for graduates from various disciplines showing advanced training in semiotics and communication theory. The major topics of emphasis in the Collaborative M.A. Program are general semiotics, anthropological semiotics, historical semiotics, French semiotics, Italian semiotics, Peircean semiotics, applied semiotics, and visual semiotics. The Collaborative Master's Program in Semiotics contributes to the development of an integrated research community at the University of Toronto.

Applicants to the Collaborative Master's Program in Semiotics are expected to meet the admission and degree requirements of both the home unit and the collaborative program. The student's program is subject to the approval of the Program Committee in Semiotics. Upon successful completion of the degree requirements, students will receive the notation “Completed Collaborative Master's Program in Semiotics” on their transcript in addition to the master's degree from their home graduate unit.

Application Procedures
Applicants to the Collaborative Master's Program in Semiotics must apply to and register in one of the participating graduate units. Applicants must also submit a supplementary application to the collaborative program. In order to qualify for admission into the Collaborative Master's Program in Semiotics, applicants must be offered admission to a participating graduate unit. Applicants must forward the following to the Director of the collaborative program:
1. A copy of the School of Graduate Studies Application Form submitted to a participating graduate unit
2. Official undergraduate and graduate transcripts from all institutions attended previously and currently
3. At least two letters of reference with specific mention of formal training in general and/or applied semiotics
4. A statement of purpose

Decisions on admission to the Collaborative Program will be made by the Program Director in conjunction with a sub-committee appointed by the Program Committee.

Degree of Master of Arts

Admission Requirements
To be considered for admission to the Collaborative Program in Semiotics at the master's level, applicants must demonstrate knowledge of the various approaches associated with the history and development of semiotics. Applicants lacking interdisciplinary background in
the field must be able to demonstrate extensive familiarity with semiotics as applied to a single discipline or a cognate set of disciplines.

Program Requirements

Thesis Master’s Degree:
- core course (SEM 1000Y), or one full course equivalent
- one full course or equivalent selected from course list
- a thesis or major paper related to semiotic topics (approved by the home unit and by the Program Committee in Semiotics)

Non-Thesis Master’s Degree:
- core course (SEM 1000Y), or one full-course equivalent
- two full courses, or equivalent selected from the course list

Courses of Instruction

Not all courses are offered every year. Please consult the graduate unit concerning course availability.

Slavic Languages and Literatures

Degree of Master of Arts

Admission Requirements
Four-year B.A. graduates of the University, or students with equivalent qualifications from a recognized university, may be accepted as candidates for the degree of Master of Arts. Normally, a B+ average or better in Slavic subjects taken in the third and fourth years of the B.A. program is required.

Program Requirements
Ordinarily, a candidate spends a full year in residence devoted to four graduate courses, or alternatively, three graduate courses and a research paper which must be written in English.

Candidates majoring in Russian Language and Literature must have completed, by the end of residence, at least one approved undergraduate course, or the equivalent, in a Slavic language other than Russian, and must satisfy departmental requirements in Russian language. Such students are required to take a Russian language examination during the first week of term. Those who fail are required to take SLA 420Y and earn a final grade of at least B+.

Candidates not majoring in Russian must acquire a working knowledge of Russian which will be tested by examination before the completion of their program.

All M.A. candidates are required to take SLA 420Y Old Church Slavonic or present evidence to the Department that an equivalent course has been completed elsewhere. A final grade of B or better is required in all language courses.

Degree of Doctor of Philosophy

Admission Requirements
Candidates for the degree of Doctor of Philosophy must have completed the M.A. of this Department with at least an A- average or provide evidence of having equivalent qualifications from a recognized university; all candidates must satisfy the Department of their capacity for independent scholarly work.

During the first two years of the Ph.D. program, students are required to take courses and to be on campus full-time and consequently in such geographical proximity as to participate fully in the activities of the program. Completion of all requirements, including the thesis, typically takes at least five years.

The Department of Slavic Languages and Literatures offers the following subjects as both major and minor fields:
Program Requirements

1. The equivalent of nine full courses including at least one in Slavic linguistics. Credit for not more than three of these courses may be given for work done in an M.A. program. All Ph.D. candidates are required to obtain an average of at least A- in their graduate course work.

2. Reading knowledge of French or German.

3. Candidates majoring in Slavic linguistics must have completed, by the end of their second year, at least one Slavic language course from each of the three groups: West Slavic, East Slavic, and South Slavic.

4. Candidates not majoring in Slavic linguistics must have completed, by the end of their second year, at least two undergraduate language courses, or the equivalent, in a Slavic language other than Russian.

5. All Ph.D. course programs must include a major subject and a minor subject; the minor subject should include at least two courses from any of the six subjects listed above. Candidates not majoring in Russian literature are urged to select it as the minor.

6. In addition to the major and minor subjects, the candidate is also required to complete one course from another related field either within or outside the Department, (for example, Comparative Literature or Linguistics). This course is to be chosen in consultation with the graduate coordinator.

7. After successful completion of course work, during the fall of the third year, candidates must pass written comprehensive examinations in the major field and special field followed by an oral examination.

8. Submit a thesis on an approved subject and pass a final thesis defence. The thesis must be written in English.

Courses of Instruction

Students should consult the departmental handbook for final course offerings.

Croatian and Serbian Languages and Literatures

SLA 1517H Modern South Slavic Poetry/ R. Bogert
SLA 1521H Topics in Modern Croatian Literature/ R. Bogert

INTRODUCTION
The Faculty of Social Work offers a professional/academic program of study leading to a Master of Social Work (M.S.W.) degree and a post-master's program leading to a Doctor of Philosophy (Ph.D.) degree.

The M.S.W. program is fully accredited as a professional program by the Canadian Association of Schools of Social Work (C.A.S.S.W.).

The mission of the Faculty is to promote social justice and equity through interdisciplinary knowledge-building and education for practice in social work and social welfare. The Faculty provides leadership for excellence:

a in the development and testing of new knowledge that impacts on social policy and social work practice at all levels;

b in social work education that prepares graduates for ethical, competent, innovative, and effective professional social work practice.

...
with all groups in society, including those experiencing intersecting oppressions related to age, class, gender, race, ethnicity, Native status/identity, sexual orientation, and differential abilities; and

in promoting and maintaining an academic environment conducive to social justice and equal opportunity for all.

The Faculty of Social Work is distinguished by its special emphasis on the integration of research and practice; by its practicum education; by its identification of specific themes, which are responsive to societal needs, to guide it in setting priorities; and by its governing structure that brings together teaching faculty, field instructors, students, alumni, the profession, the administration, and the University as partners in the realization of the Faculty’s mission. The Faculty of Social Work is actively engaged in a continuing process of renewal and development. Child and family welfare; gerontology; health; housing; and anti-racism, multiculturalism, and Native issues are current areas of emphasis. Social work practice encompasses all levels of practice (with individuals, families, groups, communities, organizations, and policy) and the Faculty of Social Work is committed to the interdependence and effectiveness of these levels of practice as contributing to social justice and social change. Further details of Faculty emphases and resources may be obtained from our Faculty Web site.

Two combined degree programs are available: a Combined Juris Doctor and Master of Social Work Program, and a Combined Master of Health Science and Master of Social Work Program.

The Faculty of Social Work also participates in four interdisciplinary collaborative programs:
- Addiction Studies
- Aging and the Life Course
- Ethnic and Pluralism Studies
- Women's Studies.

All students are admitted to the Faculty of Social Work under the general regulations and in accordance with the requirements listed below. Enrolment in the Faculty of Social Work entails adherence to the standards of professional behaviour for the Social Work profession set forth in the Social Work Code of Ethics of the Canadian Association of Social Workers. Initial admission enquiries should be made directly to the Faculty of Social Work. The application deadline for the M.S.W. program is December 15. The application deadline for the Ph.D. program is February 1. The Faculty of Social Work cannot guarantee the admission of all applicants who meet its minimum requirements.

**DEGREE OF MASTER OF SOCIAL WORK**

Candidates entering with a four-year bachelor’s degree from a recognized university will normally complete the program in two years of full-time study.

Candidates entering with a B.S.W. degree from a recognized university will be given advanced standing and will normally complete the program in one year of full-time study or two years of part-time study. All students are expected to graduate with an advanced level of knowledge and professional competence in a chosen area of social work practice.

**Admission Requirements**

Social Work education draws broadly from the social sciences. Although candidates from all disciplines are eligible to apply, an applicant with an academic background in the social sciences may be given preference for admission.

1. Candidates for admission to the **two-year M.S.W. Full-time Program** normally shall have graduated with a four-year bachelor’s degree, or equivalent from the University of Toronto or an approved university, and normally shall have achieved a mid-B average in each of the last two years of full-time study (or equivalent).

2. Candidates for admission to the **M.S.W. Program with Advanced Standing** shall have graduated with a Bachelor of Social Work degree from a recognized university, and normally shall have achieved a mid-B average in each of the last two years of full-time study (or equivalent).

3. All applicants must have completed satisfactorily at least three full courses, or their equivalent, in the social sciences to include a half-credit course in research methodology, preferably in the social sciences. A grade less than mid-B in the required half-credit course in research methodology will lessen the applicant’s probability of admission.

4. Candidates must show evidence of suitability for professional education.

5. Candidates must show evidence of facility in the English language (see SGS General Regulations).

6. Candidates for the **two-year M.S.W. Full-time Program** must indicate on the M.S.W. Program Application Form:

   a. a concentration of IFG (Individual, Family, Group) or POC (Policy, Organization, Community),

   b. a willingness to participate in a breadth of social work courses and practica.

   The main objective of the IFG concentration is to prepare students to be professionally competent clinical social workers who are able
to form therapeutic relationships with people that can enhance and maintain psychosocial functioning, overcome challenges, and effect change.

The main objective of the POC concentration is to prepare students for professional leadership roles in social policy analysis and development, public and not-for-profit administration, and community development work.

Both practicum experiences must be in the declared area of concentration. Practica are located in the Greater Toronto Area and are unpaid.

7 Candidates for the M.S.W. Program with Advanced Standing (students entering with a B.S.W. degree with either full-time or part-time status) must indicate on the M.S.W. Program Application Form:

a a willingness to participate in any of the practicum areas that they have specified; practicum interest must be in the declared area of concentration. Practica are located in the Greater Toronto Area and are unpaid.

b declare a concentration of IFG (Individual, Family, Group) or POC (Policy, Organization, Community); and

c indicate a preference for full-time or part-time studies.

Program Requirements: Two-Year M.S.W. Full-time Program
(for candidates entering with a B.A. or B.Sc. or equivalent)

1 Degree requirements are normally completed within two calendar years. The maximum time limit for completing M.S.W. degree requirements is four years from the date of first registration in the program.

2 The program of study consists of the equivalent of 20 half-credit courses.

3 Students take 13 required half-credit courses and a minimum of 4 half-credit course electives over the two-year program.

4 The practica requirement is equivalent to three half-credit courses. The first year practicum offered in the winter session (January-May) of the first year is equivalent to a half-credit course; the second year practicum (September-April) is equivalent to two half-credit courses.

5 Students who have been approved to complete a thesis do not take SWK 4503H Advanced Social Work Research and carry one less half-credit course elective over the two-year program. The thesis requirement is equivalent to two half-credit courses. This option is open to a limited number of students, and is subject to availability of Faculty resources.

6 Students are required to be on campus regularly, that is, reside close enough to participate fully in the university activities associated with the program. Residence and full-time are defined in the SGS General Regulations.

Program of Study: Two-Year M.S.W. Full-time Program
(for candidates entering with a B.A. or B.Sc. or equivalent)

1 The two-year M.S.W. program is designed for students with a B.A. or B.Sc. degree or equivalent. Its aim is to prepare students with an advanced level of knowledge and professional competence in a chosen area of social work practice. The program combines the dual purposes of graduate education and professional training. It is believed that a rigorous academic education supports competent and ethical professional practice at an advanced level.

2 The program consists of full time study over two academic years. All students in the two-year program take a number of required courses to ensure that a common core of knowledge is acquired. Students choose to concentrate in one area of practice, either IFG – Individual, Family, Group or POC – Policy, Organization, Community Practice courses and practica are consistent with the specialized learning objectives of the respective concentrations.

3 Year One of the program provides a solid foundation in academic knowledge, research skills, and practice competence in social work. In the fall session of the first year, students take required courses in theory, research, and practice. In the winter session of the first year, students begin their first practicum while continuing with their academic courses. Special emphasis is placed on supporting students in integrating theory, practice, and research.

4 In Year Two of the program, students continue to build an integrated program of study by combining advanced practice courses, elective courses in specialized areas, a more advanced practicum, and advanced practice research. Some students may be approved to complete a M.S.W. thesis. The Faculty supports advanced studies in a wide range of practice areas including child and family, aging, health; housing; anti-racism, multiculturalism and Native issues.

5 A variety of educational approaches are used to deliver curriculum content and to provide stimulating and integrative learning experiences. Students participate in regularly scheduled classes in a variety of formats (lectures,
group discussions, seminars, experiential learning labs, etc.), a field-based practicum, and research projects.

Courses of Instruction
Two-Year M.S.W. Full-time Program

Students in IFG Concentration - Year One of the Two-Year M.S.W. Full-time Program

- SWK 4101H Social Work Knowledge and Values: Diversity, Anti-oppression and Social Justice
- SWK 4102H Social Policy and Social Welfare in the Canadian Context
- SWK 4103H Elements of Social Work Practice
- SWK 4105H Social Work Practice Laboratory
- SWK 4106H Theoretical Foundations for Social Work Practice with Individuals, Families and Groups
- SWK 4501H Social Work Research Methods I – Qualitative Techniques
  SWK 4501H and SWK 4502H are not sequential but both are prerequisites for SWK 4503H
- SWK 4502H Social Work Research Methods II – Quantitative Techniques
  SWK 4501H and SWK 4502H are not sequential but both are prerequisites for SWK 4503H
- SWK 4601H Social Work Practice with Individuals
- SWK 4670H Social Work Practice Seminar
- SWK 4701H Social Work Practicum I

Total course load for Year One: 10 half-credit courses

Students in IFG Concentration - Year Two of the Two-Year M.S.W. Full-time Program

Either
- SWK 4503H Advanced Social Work Research or M.S.W. Thesis (equivalent to SWK 4503H plus one half-credit course elective)
- SWK 4602H Social Work Practice with Groups
- SWK 4674H Social Work Practice with Families and Couples
- SWK 4702Y Social Work Practicum II (equivalent to 2 half-credit courses)
- SWK 4901H Advanced Theories for Direct Social Work Practice
- Three Elective Half-Credit Courses plus the M.S.W. Thesis (equivalent to SWK 4503H plus one half-credit course elective)
- Total course load for Year Two: 10 half-credit courses

Students in POC Concentration - Year One of the Two-Year M.S.W. Full-time Program

- SWK 4101H Social Work Knowledge and Values: Diversity, Anti-oppression and Social Justice
- SWK 4102H Social Policy and Social Welfare in the Canadian Context
- SWK 4103H Elements of Social Work Practice
- SWK 4105H Social Work Practice Laboratory
- SWK 4106H Theoretical Foundations for Social Work Practice with Individuals, Families and Groups
- SWK 4501H Social Work Research Methods I – Qualitative Techniques
- SWK 4502H Social Work Research Methods II – Quantitative Techniques
- SWK 4503H Advanced Social Work Research or M.S.W. Thesis (equivalent to SWK 4503H plus one half-credit course elective)
- SWK 4653H Social Work Practice with Organizations
- SWK 4670H Social Work Practice Seminar
- SWK 4701H Social Work Practicum I
- Total course load for Year One: 10 half-credit courses

Students in POC Concentration - Year Two of the Two-Year M.S.W. Full-time Program

Either
- SWK 4501H Social Work Research Methods I – Qualitative Techniques
- SWK 4502H Social Work Research Methods II – Quantitative Techniques
- SWK 4651H Community Social Work Practice
- SWK 4662H Social Policy Analysis
  Prerequisite: SWK 4102H Social Policy and Social Welfare in the Canadian Context or equivalent
- SWK 4702Y Social Work Practicum II (equivalent to two half-credit courses)
- SWK 4902H Advanced Practice in Policy, Organizations, and Communities
- Four Elective Half-Credit Courses or
- Three Elective Half-Credit Courses plus the M.S.W. Thesis (equivalent to SWK 4503H plus one half-credit course elective)
Total course load for Year Two: 10 half-credit courses

Total course load for the Two-Year M.S.W. Full-time Program in either the IFG or POC concentrations: 20 half-credit courses

Program Requirements: M.S.W. Program with Advanced Standing
(for candidates entering with a B.S.W. degree)
1 Students may complete the degree program either full-time or part-time. Students enrolling in the program part-time must meet the same degree requirements and complete the same number of credits as the full time students, although the structure and sequencing of their individual programs of study may vary.
2 Full-time students normally complete the program over three academic sessions (September to June). Part-time students normally complete requirements within two years. The maximum time limit for completing degree requirements is four years from the date of first registration in the program.
3 The program of study consists of an equivalent of nine half-credit courses.
4 Students must take four required half-credit courses and a minimum of three half-credit course electives. Students approved to complete a thesis do not take SWK 4503H Advanced Social Work Research and carry one less half-credit course elective in their program. Students choosing this option may require additional time to complete their program. This option is open to a limited number of students, subject to availability of Faculty resources.
5 A practicum is required, equivalent to two half-credit courses. Students’ unpaid practicum must be in their area of concentration (IFG or POC). For students enrolled in the full-time program, the practicum is completed from September to April. For students enrolled in the part-time program the practicum is designed to commence as a 16-week block in the Greater Toronto Area starting in April. Exceptions to block summer practicum must be negotiated in advance with the Practicum Office.

Program of Study: M.S.W. Program with Advanced Standing
(for candidates entering with a B.S.W. degree)
1 The M.S.W. Program with Advanced Standing is designed for students with a B.S.W. degree. It aims to prepare students with an advanced level of knowledge and professional competence in a chosen area of social work practice. The program combines the dual purposes of graduate education and professional training. It is believed that a rigorous academic education supports competent and ethical professional practice at an advanced level.
2 All students in the M.S.W. Program with Advanced Standing take a number of required courses to ensure that a common core of knowledge is acquired. Students choose to concentrate in one area of practice, either a IFG – Individual, Family, Group or b POC – Policy, Organization, Community. Practice courses, as well as practica, are consistent with the specialized learning objectives of the respective concentrations.
3 Students build an integrated program of study by combining advanced practice courses, elective courses in specialized areas, a more advanced practicum, and a practice research project or thesis. The Faculty supports advanced studies in a wide range of practice areas, including child and family, aging, health; housing; anti-racism, multiculturalism, and Native issues.
4 A variety of educational approaches are used to deliver curriculum content and to provide stimulating and integrative learning experiences. Students participate in regularly scheduled classes in a variety of formats (lectures, group discussions, seminars, etc.), a field-based practicum, and research projects. Students may choose to complete a master’s thesis. This option is open to a limited number of students, subject to availability of Faculty resources.

Courses of Instruction
M.S.W. Program with Advanced Standing

Students in IFG Concentration
SWK 4501H Social Work Research Methods I: Qualitative Techniques
SWK 4502H Social Work Research Methods II: Quantitative Techniques
SWK 4501H and SWK 4502H are not sequential; however, both are prerequisites for SWK 4503H that is taken near the end of M.S.W. studies.

SWK 4503H Advanced Social Work Research or M.S.W. Thesis (equivalent to SWK 4503 plus one half-credit course elective; the thesis is defended after all other program requirements have been completed)

SWK 4702Y Social Work Practicum II (equivalent to 2 half-credit courses)
SWK 4901H Advanced Theories for Direct Social Work Practice

Three half-credit elective courses

or

Two half-credit elective courses plus the M.S.W. Thesis (equivalent to SWK 4503H plus one half-credit course elective)

Students in POC Concentration

SWK 4501H Social Work Research Methods I: Qualitative Techniques

SWK 4502H Social Work Research Methods II: Quantitative Techniques

SWK 4501H and SWK 4502H are not sequential; however, both are prerequisites for SWK 4503H that is taken near the end of the M.S.W. studies.

SWK 4503H Advanced Social Work Research or M.S.W. Thesis (equivalent to SWK 4503 plus one half-credit course elective)

SWK 4702Y Social Work Practicum II (equivalent to 2 half-credit courses)

SWK 4902H Advanced Practice in Policy, Organizations, and Communities

Three half-credit elective courses

or

Two half-credit elective courses plus the M.S.W. Thesis (equivalent to SWK 4503H plus one half-credit course elective)

Total course load for the M.S.W. Program with Advanced Standing in either the IFG or POC concentrations: 9 half-credit courses

Elective Courses

Courses are offered in various areas of social work practice. The choice of electives in any given year is contingent on available faculty resources. Not every course is given in any one year. Please consult the Faculty, admissions application materials, or the Faculty Web site www.utoronto.ca/facsocwk.

AGE 2000H Principles of Aging

JRX 1001H Parenting: Multidisciplinary Perspectives/N. Trocmé, Staff

JPW 2118H Philosophical Foundations of Women’s Studies

JTH 3000H Coordinating Seminar in Ethnic and Pluralism Studies

PAS 3700H Multidisciplinary Aspects of Addiction Studies/M. J. Ashley, Staff

SWK 4210H Promoting Empowerment: Working at the Margins/Staff

SWK 4403H Women and Social Policy in Canada/S. Neysmith

SWK 4420H Human Rights and Social Justice/Staff

SWK 4422H Social Housing and Homelessness/J. D. Hulchanski

SWK 4506H Applied Quantitative Data Analysis/Staff

SWK 4603H Advanced Social Work Practice with Groups/Staff

SWK 4604H Policy and Practice in Mental Health/Staff

SWK 4608H Advanced Social Work Practice with Families/S. Stern

SWK 4609H Sexuality, Sexual Diversity and Social Work Practice/Staff

SWK 4610H Advanced Social Work Practice with Couples/M. C. Bogo, R. J. MacFadden

SWK 4613H Social Work Practice with the Aged/Staff

SWK 4616H Drug Dependencies: Interventive Approaches/Staff

SWK 4619H Family Mediation: Theory and Practice/H. H. Irving, A. Litvack

SWK 4620H Assessment of Children, and Adolescents/F. Mishna

SWK 4621H Integrative Child and Adolescent Therapy: Theory and Practice/A. Caspary

SWK 4622H Social Work Policy and Practice: Health, Illness, and Disability/B. Antle

SWK 4623H Violence in Families: Multilevel Intervention in Interdisciplinary Practice/R. Roberts

SWK 4624H Feminist Social Work Practice/Staff

SWK 4658H Social Work with Immigrants and Refugees/U. G. George, Staff

SWK 4663H Social Planning Approaches and Issues/J. D. Hulchanski

SWK 4664H Administrative/Managerial Practice in Social Work/P. L. McDonald, C. Regehr

SWK 4667H Information Technology in Professional Social Work Practice/R. MacFadden
SWK 4668H  Welfare of Children: Policy and Practice/N. Trocme

Special Studies

Special Studies courses are designed to provide seminars or tutorials under the direction of a faculty member. The focus is on a topic of particular interest to the student(s) which is not included in available courses.

SWK 4801H  Special Studies I
SWK 4802H  Special Studies II
SWK 4803H  Special Studies III
SWK 4804H  Special Studies IV

DEGREE OF DOCTOR OF PHILOSOPHY

Admission Requirements

Candidates must have:
1. a degree of Master of Social Work or an equivalent master's degree with at least B+ standing from an accredited program in a recognized university;
2. competency in basic statistical methods at an introductory level (an introductory statistics course is offered in the first session of the program to ensure that students meet this prerequisite);
3. educational and professional experience that will indicate a capacity to undertake research-oriented postgraduate work.

Candidates are accepted for admission based on an assessment of their ability to complete the academic requirements of the program. Experience and professional achievements are considered, although greatest weight is placed on demonstrated academic performance.

Program Requirements

The Faculty of Social Work Doctor of Philosophy program is structured to support completion of all degree requirements within a period of four years. The program is available on a full-time basis only.

1. Candidates for the degree of Doctor of Philosophy shall normally complete at least ten half-credit courses, or their equivalent, within the first two years, including:
   a. Required research courses:
      SWK 6301H  Intermediate Statistics and Data Analysis (all incoming doctoral candidates are required to take this course as a prerequisite or pass an equivalent competency exam with a grade of at least B+)
   b. SWK 6302H  Epistemology and Social Work Research
   c. SWK 6308Y  Designing and Implementing Social Work Research

Note: Candidates who demonstrate competency may be exempted from the above required research courses. The course instructor will determine competency. Candidates will substitute an alternate elective course for each exempted course. Transcripts will note exemptions from the required courses.

b. Five graduate elective half-credit courses are chosen by the candidate, at least one of which is taken at the Faculty of Social Work, and at least one of which is taken in another graduate unit at the University of Toronto.

c. The half-credit course SWK 7000H Doctoral Thesis Seminar (Credit/No Credit) is required during the fall session of the second year of the program.

2. Following completion of course work, candidates are required to satisfactorily complete a comprehensive paper.

3. Following completion of the comprehensive paper, candidates propose and complete a thesis which shall constitute a distinct contribution to knowledge in the field of social work. The thesis must be based on research conducted while registered for the Ph.D. program. Copies of the completed thesis must be submitted to the external appraiser at least six weeks, and preferably earlier, in advance of the candidate's final oral examination. The candidate must successfully defend the thesis at a final oral examination. Detailed information regarding the final oral examination and publication of the thesis may be found in the Degree Regulations section of this calendar.

Time Frame: Candidates are encouraged to complete and obtain Thesis Committee approval of their thesis proposal by August of the second year of the program. The research, writing, and oral examination of the thesis is typically completed by the end of the fourth year of the program.

4. Candidates must have an adequate knowledge of a language other than English if an additional language is deemed essential for satisfactory completion of research for the thesis. The Faculty is responsible for ensuring that an acceptable certificate of language competence is deposited with the School of Graduate Studies.

5. Candidates are expected to be available on a full-time basis during the first two years (six consecutive sessions) of the program in order
to complete the equivalent of ten half-credit courses. During subsequent years candidates may elect to be off campus to conduct their research and to write the thesis. Candidates are required to register for each successive fall session on a full-time basis following their first session of registration unless granted a leave of absence. The minimum period of registration in each academic year is three consecutive sessions. Candidates who elect to be off campus in the third and subsequent years of the program must be available on campus for regular meetings with their thesis committee. 6 Candidates must complete the requirements for the degree within six years following admission to the program.

Courses of Instruction
The following courses are given in the doctoral program. Some courses are given in conjunction with the M.S.W. curriculum. Course offerings in any year depend on student interest and Faculty resources.

- SWK 6502H,Y Special Studies 2
- SWK 6503H,Y Special Studies 3
- SWK 6504H,Y Special Studies 4

INTERDISCIPLINARY PROGRAMS

Combined J.D./M.S.W. Program
For students who wish to practice in the areas where law and social work interact (for example, child welfare, juvenile and criminal justice, dispute resolution, mental health and family law) this combined interdisciplinary program leads to both the Juris Doctor and Master of Social Work degrees.

The program allows students to complete the two degrees in four years, rather than the five it would take to pursue the two independently. Students who enter with a B.S.W. will be given advanced standing. Admission to the combined program is conditional upon the applicant meeting the admission requirements of each of the faculties.

Combined M.H.Sc./M.S.W. Program
With the community focus in health care, there is a greater need for linkages between health and social services. The new interdisciplinary Program of Social Work and Health Administration provides background for students wishing to move into administrative leadership in social work and health organizations. The program allows students to complete both degrees in three years, rather than the four it would take to pursue the two independently. Students entering with a B.S.W. degree will be given advanced standing. Admission to the combined program is conditional upon the applicant meeting the admission requirements of each of the Faculties.

Aging and the Life Course (Collaborative Program)
This program prepares students for specialization in the field of aging, a field that includes individual human aging and population aging, with an emphasis on viewing aging issues within the perspective of the life course.

This program is open to both M.S.W. and Ph.D. students. For further details, consult the Aging and the Life Course (Collaborative Program) entry in this calendar.
Addiction Studies (Collaborative Program)
The purpose of this program is to develop and integrate graduate training in the multidisciplinary field of addictions, an area that includes the use and abuse of substances, as well as gambling and other addictive behaviours.

This program is open to both M.S.W. and Ph.D. students. For further details, consult the Addiction Studies (Collaborative Program) entry in this calendar.

Ethnic and Pluralism Studies (Collaborative Program)
This program bridges perspectives of anthropology, economics, geography, history, industrial relations, nursing, political science, sociology, social work, and religion to provide an in-depth understanding of ethnic differences and processes among groups at the micro and macro levels.

This program is open to both M.S.W. and Ph.D. students. For further details, see the Ethnic and Pluralism Studies (Collaborative Program) entry in this calendar.

Women's Studies (Collaborative Program)
This program is designed to create and support an integrated, interdisciplinary research community for students and faculty to collaborate in the creation and critical development of new knowledge and methodologies emerging in the field of women's studies.

This program is open to both M.S.W. and Ph.D. students. For further details, see the Women's Studies (Collaborative Program) entry in this calendar.

Students are admitted under the general regulations of the School of Graduate Studies. Normally an overall B+ average in each of the last two years of post-secondary education qualifies an applicant for consideration. However, the admission criteria are also based on other indicators of superior qualifications such as letters of recommendation and the paper submitted. The choice of courses in all programs must be approved by the Department. Applicants must submit the following directly to the Department:
1 two letters of reference from instructors or research supervisors;
2 one paper, and a summary of it, which the student feels represents his or her best work;
3 a one-page typed statement of interest indicating research interests and reasons for applying to study Sociology at the University of Toronto.

An average of at least B+ is required in order to be eligible to continue into the following year of any program. Failure in any course (that is, less than a B-) will require a review of the student’s total program by the Department.
Degree of Master of Arts

The M.A. degree may be pursued on a full-time or part-time basis. Course requirements must be completed within five years from date of entry.

Candidates for the master's degree can complete the program in one of two ways: by completing 6 half-courses and a research paper within 12 months, or by completing 8 half-courses within 9 months. A full-course counts as two half-courses. All master's students must take one half-course in Classical Sociological Theory (SOC 6001H) and one half-course in Field Methods (SOC 6303H). Students who choose the course-work M.A. must take one half-course in Social Statistics (SOC 6302H). Students who choose the research paper route must take one half-course in Survey Methods (SOC 6301H).

To be eligible for the minimum program, students must have taken at least the equivalent of five full-year courses in Sociology and have a four-year B.A. or its equivalent. Students are also expected to have acquired basic research and statistical skills. Students whose preparation is insufficient will be required to take additional courses. Students must have a B average to be recommended for the M.A. degree.

Degree of Doctor of Philosophy

Students are usually admitted to the Ph.D. program after completing the M.A. or its equivalent, with at least an A- standing. All students must demonstrate that their M.A., or equivalent, includes course work equivalent to Classical Social Theory, Social Statistics, and Field Methods. Some students may be required to take prescribed additional courses.

The Department may recommend admission directly after completion of a four year B.A. degree. Direct entry of this kind will only be recommended for outstanding students who have provided a clear and detailed plan for thesis research. Students who enter the doctoral program directly from a four year B.A. will be required to take the three half-courses that are required at the M.A. level in addition to the standard Ph.D. requirements.

The minimal requirements for this degree are listed below.

1. Two years of residence.
2. Eight half-year courses. These must include The Logic of Social Inquiry (SOC 6710H), Contemporary Sociological Theory (SOC 6101H), Intermediate Data Analysis (SOC 6707H), and Research Practicum (SOC 6711Y), if not already completed at the graduate level. Previous completion of these courses will not reduce the eight half-course requirement.
3. Two comprehensives. For details see the Department's Graduate Handbook and Manual. These comprehensives must be completed by the end of the second year of residence.
4. Preparation of an original thesis, under the supervision of a committee of the staff, and its oral defence.
5. Candidates must have an adequate knowledge of a language other than English if an additional language is deemed essential for satisfactory completion of research for the thesis.

Checkpoints for Doctoral Students

<table>
<thead>
<tr>
<th>Checkpoint</th>
<th>Desirable Completion</th>
<th>Acceptable Completion</th>
</tr>
</thead>
<tbody>
<tr>
<td>Field of thesis research and name of supervisor submitted</td>
<td>6 months</td>
<td>9 months</td>
</tr>
<tr>
<td>Eight graduate half-courses completed</td>
<td>9 months</td>
<td>15 months</td>
</tr>
<tr>
<td>Working thesis topic submitted</td>
<td>9 months</td>
<td>12 months</td>
</tr>
<tr>
<td>Both comprehensives completed</td>
<td>18 months</td>
<td>2 years</td>
</tr>
<tr>
<td>Research Proposal, Ethical Review, and Language Examination</td>
<td>18 months</td>
<td>2.5 years</td>
</tr>
<tr>
<td>Thesis Prospectus accepted by the supervisor</td>
<td>2.5 years</td>
<td>3 years</td>
</tr>
<tr>
<td>Final Oral Examination</td>
<td>4 years</td>
<td>5 years</td>
</tr>
</tbody>
</table>

This model timetable is necessarily a rough one and may be altered to take account of leave granted for special personal circumstances. It would be extended by up to nine months for students who were required to make up required M.A. courses in Classical Social Theory, Field Methods, or Statistics. The checkpoints outlined are feasible, and while there are no automatic penalties levied on a student who fails to meet them, inability to keep pace raises questions about the student's suitability for the program.
Collaborative Programs
The Department of Sociology is involved in the following collaborative programs. Consult separate entries in this calendar for details.
Addiction Studies
Aging and the Life Course
Asia-Pacific Studies
Environmental Studies
Ethnic and Pluralism Studies
International Relations
Knowledge Media Design
Women’s Studies

General Information
For general information, consult the Sociology and Equity Studies section of the OISE/UT Bulletin or the Web sites listed above.

Departmental Research Areas
The Department of Sociology and Equity Studies in Education offers a full range of programs leading to M.Ed., M.A., Ed.D., and Ph.D. degrees. These programs offer students preparation in sociology in education with an emphasis on equity issues. Five areas of concentration are described below.

Faculty and student research and interests represent a variety of approaches to sociology and equity studies in education. The current composition of the department provides particular opportunities for students who may wish to focus their activities in the areas listed below, as well as in the interdisciplinary and interdepartmental research areas and collaborative programs. Students are not restricted to a single research area when selecting courses.

1. Aboriginal and Indigenous Studies in Education
This research area addresses current issues, trends, perspectives, and models of Aboriginal and Indigenous education through historical, cultural, spiritual, social and political philosophies and themes. Specific research areas include examination of Aboriginal, Indigenous, and marginalized knowledge in global contexts and pedagogical implications for educational change; and roles of schools, media, institutions, governments and historical and contemporary policy in producing conditions of constraint, images of Indigenous peoples, social and class differences, dominance, control politics, and social inequalities with regard to Aboriginal and Indigenous peoples.

2. Critical Anti-Racism Studies
Courses listed in this research area provide students with an integrative view of social difference (race, class, gender, disability, and sexuality) and a critical reading of multiple social oppressions revealed in different sites and sources (schools, universities, local communities, media, law, and cultural
production). The Centre for Integrative Anti-Racism Studies (CIARS) brings together faculty and students whose research interests and political commitments are in anti-racism. It provides a supportive research environment, linking communities of colour, marginalised communities, and the University in the pursuit of social justice.

3 Critical Pedagogy and Cultural Studies
Critical inquiry into the roles played by educational institutions in producing and maintaining cultures, symbolic dominance, and social inequalities; analyses of alternative teaching materials and pedagogies intended to address and transform domination and inequality.

4 Feminist Studies and Gender Relations in Education
Gender studies in the family, school, and workforce; feminist practice; gender, class, race, language, and cultural and biological reproduction; social history of women and women’s education; feminism and feminist historiography. Note that other courses offered by feminist faculty, but not listed in this research area, may be taught from a feminist perspective.

5 Learning, Work, and Change
This research area is devoted to teaching and research about the interrelations of organized/informal learning, paid/unpaid work, societal change processes, and the roles of educators in improving these relations. Courses offer theories and methods for understanding political, economic and ideological forces associated with educational and workplace change. Some representative themes include influences of social class, gender, ethnicity and generation on learning practices and work opportunities; impacts of technological changes on labour markets, labour processes and training programs; school and community relations; teachers’ work and educational innovation; and problems of underemployment and the future of work. This research area is closely related to the interdepartmental research area in Learning and Work.

Interdepartmental and Interdisciplinary Research Areas and Collaborative Programs
The Department is also involved in interdepartmental and interdisciplinary research areas, as well as collaborative programs:

1 Critical Pedagogy and Cultural Studies
2 Learning and Work
For details, see the OISE/UT Bulletin.

3 Études franco-ontariennes en français
Le Département de sociologie et d'études de l'équité en éducation participe à un programme de cours à distance par ordinateur intitulé “Études franco-ontariennes en éducation” offert par le Département de curriculum, d'enseignement et d'apprentissage, qui porte sur les réalités sociales et scolaires des communautés fancophones et dont la langue d'enseignement est le français. Ce programme multidisciplinaire mène au diplôme de M.Ed. Des cours sur place sont également offerts. Vous trouverez la description en français des cours de sociologie qui font partie de ce programme dans la liste qui suit.

4 Gender Equity in Education
This interdepartmental research area focuses on the practical and professional relevance of gender equity issues for teachers and educational administrators. It is taken as part of the student’s main program within the Department of Sociology and Equity Studies in Education. The Centre of Women’s Studies in Education (CWSE) coordinates the specialization. Contact Caralee Price (cprice@oise.utoronto.ca) for more information.

5 Collaborative Environmental Studies Program
Master’s level students in the Department of Sociology and Equity Studies in Education can participate in the Collaborative Master of Education in Environmental Studies program. For complete details on the program, consult the relevant section in the OISE/UT Bulletin.

6 Comparative, International, and Development Education
This collaborative graduate program is fully described in the section on Collaborative Graduate Programs in the OISE/UT Bulletin.

7 Collaborative Program in Women’s Studies
The Collaborative Graduate Program in Women’s Studies involves most of the feminist faculty in SESE. A separate brochure is available and information is on the Web at www.utoronto.ca/wwgs/.
Admission Requirements
The Department welcomes applicants with diverse but relevant backgrounds. M.Ed. and Ed.D. applicants must have the equivalent of 12 months' professional experience. M.A. and Ph.D. candidates who are admitted without sufficient previous study in sociology and equity studies in education as well as reasons for undertaking a program in the Department;
1 a careful statement of intellectual interests and concerns relevant to sociology and equity studies in education as well as reasons for undertaking a program in the Department;
2 two letters of reference, preferably from university instructors with whom the applicant has studied or worked;
3 at least one sample of written work in the social sciences.
Incomplete applications may be subject to processing delays or rejection.

Program Requirements
The programs leading to M.Ed., M.A., Ed.D., or Ph.D. degrees may be undertaken as follows. The M.Ed. degree may be pursued on a full-time or part-time basis under either Option II (eight half-courses and a Major Research Paper (MRP)) or under Option III (six half-courses and a thesis). The M.A. degree may be pursued full time or part time and requires a thesis. Both the Ed.D. and the Ph.D. require a dissertation, but the Ph.D. requires, in addition, a comprehensive examination. Note that although Ed.D. students may begin their studies on a part-time basis, they must register for a minimum of one academic year of full-time registration (two consecutive sessions, not including summer) on-campus study and then maintain continuous registration full-time subsequently until all degree requirements are completed. Ph.D. students must maintain full-time status throughout their degree program.

The Department offers courses off campus as well as in distance mode to serve students in localities outside Toronto. Off-campus students typically complete their program by enrolling in courses on campus during the summer and/or by enrolling as full-time students during the regular academic year. Information about off-campus and on-campus courses to be offered in the Summer and Winter Sessions will be noted in the “Graduate Studies Course Schedule”, available from the Registrar’s Office, OISE/UT, in the Winter Session.

Course outlines are available for consultation in the Department. To help students articulate and focus their intellectual concerns, the Department offers:
- a designated faculty advisor for each student (assigned to the student upon admission)
- a supervisor (to be selected by the student with consent of the supervisor) for theses, dissertations and MRPs
- independent study and research courses
- access to related courses in other graduate departments
- course outlines and evaluations
- a speakers series
- the Sociology and Equity Studies Handbook
- notices and information sent by e-mail through a departmental conference
- workshops on particular topics such as writing thesis proposals.

The Department is organized as a constitutional democracy with a General Assembly and standing committees which provide for policy and decision-making in departmental programs, selection of incoming students, etc. Our constitution is based on one person/one vote, and staff, faculty, and registered students in the Department have voting rights and are welcome to participate in the governance of the Department.

Courses of Instruction
Not all courses are offered every year. Please consult OISE/UT’s Graduate Studies Course Schedule.

E-mail: conge.se@cs.utoronto.ca

Software engineering is a collection of principles, models, methods, and techniques for the development, maintenance, evolution, and reuse of software that meets the functional, performance, and quality requirements in an economic and competitive manner.

The collaborative program in Software Engineering is offered as part of the Consortium for Graduate Education in Software Engineering (ConGESE). ConGESE is a cooperative effort between ten departments in seven Ontario Universities (Carleton, Ottawa, Queen’s, Toronto, Waterloo, Western, and York) and several industry partners. The two collaborating departments at the University of Toronto are Electrical and Computer Engineering (ECE) and Computer Science (CSC). This part-time collaborative program is specially structured for software professionals currently working in the field. The courses are commonly offered on-site with cooperating industrial sponsors and are designed to fit into the working schedule of professionals who might otherwise find it difficult to attend regular, on-campus courses.

Admission Procedures and Requirements
Applications must be made to one of the participating universities. At the University of Toronto, applicants must be accepted into one of the collaborating graduate units (CSC or ECE) and are expected to meet the home graduate unit’s admission requirements in addition to a standing equivalent of B+ in the final year of a four-year University of Toronto bachelor’s degree program.

Program Requirements
After completing the degree requirements for the home graduate unit and the collaborative program, students will graduate with the existing degree designation used for their department, with the additional notation “specialization in software engineering”.

Degree of Master of Science (specialization in software engineering)
The M.Sc. program in the Department of Computer Science requires five graduate-level half-courses satisfying a breadth requirement plus a thesis (equivalent to four half-courses).

Degree of Master of Engineering (specialization in software engineering)
The M.Eng. program in the Department of Electrical and Computer Engineering requires nine graduate-level half-courses, satisfying a breadth requirement, or a project in lieu of three half-courses.

Program Structure
Each course will require about 36 hours of classroom time, plus about twice that much time reviewing new material and doing assignments. Various formats have been used for the 36 hours, including
- 12 weekly sessions of 3 hours each or
- 6 biweekly sessions of 6 hours each or
- 6 consecutive 6-hour days.

The format is normally negotiated between the instructor and the class. The thesis or project will be written under the direction of an assigned supervisor.

At press time, the Collaborative Program in South Asian Studies was pending approval. For current information, please contact the Centre for South Asian Studies.

The interdisciplinary collaborative master’s and doctoral degree program in South Asian Studies is designed for students who wish to pursue graduate studies in another discipline. The focus of this program is necessarily broad in that it provides students with an understanding of ancient and modern history, social change, economic development, contemporary politics, religious traditions, literary culture, and a spectrum of related topics.

The Centre for South Asian Studies, which administers the Collaborative Program, provides a nucleus for the participation of South Asian Studies scholars from across the University. Students will benefit from the physical presence of the Centre for South Asian Studies and its regular activities of research fora, conferences, and visiting lecturer and scholar programs. In addition, the University of Toronto’s library collection in South Asian studies is the largest in Canada.

Master’s and doctoral students wishing to be admitted to the Collaborative Program must apply to one of the following graduate units: Anthropology, English, History, Geography, Political Science (Ph.D. only), Religious Studies, Social Work. A supplementary application must be submitted to the Centre for South Asian Studies. The form can be obtained by writing to the Centre for South Asian Studies or by downloading from the Web site.

Students who successfully complete the requirements of the Collaborative Program will receive the notation “Completed Collaborative Program in South Asian Studies” on their transcript, in addition to the master’s or doctoral degree from their graduate unit.

Admission Requirements
Applicants must meet the admission requirements of the graduate unit in which they intend to enrol. Admission will be subject to the approval of the graduate unit concerned and the Program Committee of the Collaborative Program.

Program Requirements
Students enrolled in the Collaborative Program in South Asian Studies are required to complete the requirements of the Centre and the home unit in which they are enrolled.

Master’s Program
Requirements of the Centre for the master’s program:
1. A mandatory half-year core course entitled Issues in South Asian Studies taught by the core faculty. The core course will be the same for both master’s and doctoral students. Master’s students who proceed to the doctoral program will not be required to take the core course again.
2. Attendance at the lectures organized by the Centre for South Asian Studies during the academic year in which they take the core course.
3. For master’s students writing a thesis, it is expected that their dissertation will include a significant South Asian component.
4. For master’s students writing a research paper, the home unit will determine whether a South Asian component is required in the research paper.
5. For master’s students writing a thesis and master’s students writing a research paper, language requirements will be assessed on a case-by-case basis.
Doctoral Program
Requirements of the Centre for the doctoral program:
1 A mandatory half-year core course entitled Issues in South Asian Studies taught by the core faculty (unless already taken in the master's program).
2 Attendance at the lectures organized by the Centre for South Asian Studies during the academic year in which they take the core course.
3 The dissertation to include a significant South Asian component.
4 Language requirement, depending on the student's area of specialization.
Candidates must satisfy the departmental requirements for entry into a one-year M.A. program, have achieved at least mid-B standing in their University of Toronto 300- and 400-series courses (or equivalent courses) and be approved by the Department, or have equivalent qualifications from recognized universities.

The Department will determine whether candidates need to complete prerequisite work in order to qualify for admission to a Master of Arts program and will advise students accordingly. Candidates who wish to specialize in the field of Hispanic linguistics (see 3 below) must complete an introductory course in general linguistics (LIN 100Y or equivalent) before entering the program. If necessary, this course may be taken during the summer immediately preceding the M.A. year.

Candidates must show evidence of an oral and written command of Spanish. They must complete a total of four graduate courses and will specialize in one of three fields:
1. Spanish Peninsular literature
2. Spanish American literature
3. Hispanic linguistics

Degree of Doctor of Philosophy

Admission to the Ph.D. program requires a master's degree in an appropriate discipline (Spanish, Comparative Literature, or Linguistics) with an average of A- or higher. Applicants from recognized universities must have equivalent qualifications to those expected of applicants from the University of Toronto. The Department does not allow direct entry to the doctoral program with a B.A., nor does it allow M.A. students to transfer to the doctoral program before the course work for the M.A. is completed.

Applicants must arrange for two letters of reference to be sent directly to the Department and must submit with their applications a one-page Statement of Purpose describing the general area or areas in which they intend to conduct their doctoral research. In addition, each candidate must submit a sample of his or her writing, in English or Spanish (at least 2000 words in length), on a subject related to the candidate’s area of interest.

Admission is based on a number of factors in addition to grades. The principal factors include the ability of the Department to offer graduate work in the candidate’s preferred area of interest and the suitability of the candidate in relation to the structure and programs of the Department.

The Ph.D. program is designed to be completed in four years, but individual students may require further time. In 1998-99 there were
32 students registered in this program; 10 doctorates were conferred, and the average time for completion was 5.2 years.

The Ph.D. program specifies a period of two sessions of residence during which the student is required to be on campus full-time and consequently in such geographical proximity as to be able to participate fully in the Department's activities associated with the program.

Candidates must complete a total of four full courses which, together with the four courses taken at the M.A. level, will lead to specialization in one of the following curriculum areas:
1 Spanish Medieval literature to 1500
2 Golden Age literature, 1500 to 1700
3 Modern Spanish literature, 1700 to present
4 Spanish American literature
5 Hispanic linguistics

All candidates in literature (areas 1 to 4) must include within the eight-course load at least one half-course in each of the curriculum areas outside their area of specialization. Candidates in areas 1 to 3 must complete a full-course equivalent in Spanish American literature; candidates in area 4 must complete a full-course equivalent in medieval and/or Golden Age literature. Credit (up to 1.5 full-course equivalents) will be granted for courses in a cognate discipline (for example, history, philosophy, comparative literature, medieval studies, women's studies). Candidates in area 5 will take courses in linguistics and philology drawn from offerings in Spanish, Linguistics, and other departments of language and literature; a full course in romance philology is strongly recommended if not taken at the M.A. level, and the eight-course load must include a half-course in area 1 and a second half-course from one of areas 1 to 4.

In addition to course requirements, Ph.D. candidates must successfully complete, before the end of the fall of the second year in the program, an oral comprehensive examination based on coverage courses (that is, those courses that do not form part of the area of specialization). They will also submit, by the first week of March of the second year of residence, a research essay in Spanish which will be defended before a committee prior to the end of the same month.

Before the beginning of the third year of the doctoral program, all candidates must demonstrate, in addition to an oral and written command of Spanish, a knowledge of French and of a third foreign language. These language requirements may be satisfied only by passing the appropriate reading knowledge examinations offered by the various departments of language and literature at the University of Toronto.

Courses of Instruction

Most graduate courses are offered in a regular rotation. As a result, approximately half of the courses that appear in this calendar entry will be available in a given academic session. A list of courses offered is available on the Department's Web site.

- JRL 1100Y Introduction to Romance Philology/Staff

Speech-language pathology is concerned with human communication and its disorders. The Department offers professional and research degree programs for careers in the discipline.

Degree of Master of Health Science

The Master of Health Science (M.H.Sc.) program in speech-language pathology is a professional graduate program that may be taken on a full-time or part-time basis. The primary aim of the program is the development of an analytical and evaluative approach to the practice of speech-language pathology.

Graduates are prepared to assume varied professional responsibilities including the assessment, treatment, and management of speech, voice, language, and swallowing disorders. Course work and clinical internships are integrated and sequenced. There is a strong research to practice focus, and students complete a comprehensive portfolio requirement in their final year.

Admission Requirements

Candidates for admission must have completed a four-year University of Toronto bachelor's degree, with at least a mid-B standing in the final year, or its equivalent from another recognized university. Additional requirements include prerequisite courses in child development, linguistics, phonetics, elementary statistics, and human physiology. See the departmental Web site for a full listing of admission requirements.

Facility in oral and written English is required for both the academic and applied aspects of the program. Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction was not English, must demonstrate facility in the English language through the successful completion of one of the English proficiency tests listed in this calendar. To satisfy the requirement, the Department strongly prefers the Test of English as a Foreign Language (TOEFL) with a minimum score of 600 (250 on the computer-based test), accompanied by the Test of Written English (TWE) with a minimum score of 5, and the Test of Spoken English (TSE) with a minimum score of 50.

If an applicant finds it impossible to take the TOEFL, TWE, and TSE, the Department will accept one of the following:
1. the Michigan English Language Assessment Battery (MELAB) with a minimum score of 85;
2. the International English Language Testing System (IELTS) with a minimum score of 8.0.

In addition to the proficiency test, applicants may be requested to attend a personal meeting with members of the Graduate Department of Speech-Language Pathology where their mastery of oral English for meeting clinical requirements will be assessed.

Candidates for the full-time and the part-time programs must submit applications by mid-January. Check the departmental Web site for the exact application deadline. All applications for the M.H.Sc. program must be obtained directly from the Ontario Universities Application Centre in Guelph, Ontario (www.ouac.on.ca/orpas).
Program Requirements
The professional M.H.Sc. program is divided into 5 academic and 4 clinical units. Each academic unit is made up of topic-related courses. Teaching within and across units emphasizes integrated learning experiences.

Academic units are followed by full-time clinical placements. Each placement lasts between 4 and 10 weeks for a total of 31 weeks of clinical experience throughout the 2 year M.H.Sc. program. Students must accept placements offered to them and are responsible for all travel and accommodation costs. Candidates enrolled in the full-time program must complete all requirements within two consecutive years.

Part-time students must choose one of three options for program completion: four-year, five-year, or six-year. Each option includes a prescribed sequence of academic and clinical units that must be followed. Part-time students must complete clinical units on a full-time basis (five days per week).

The M.H.Sc. program does not have a thesis requirement; however, all M.H.Sc. students will be required to complete a portfolio that demonstrates proficiency in key areas of professional practice, including application of research principles, prior to graduation.

Degree of Master of Science
The Master of Science (M.Sc.) degree is a full-time program that prepares students to engage in the scientific study of normal and disordered speech and language processes in children and adults.

The M.Sc. degree in speech-language pathology is a research-oriented program and does not prepare students for clinical practice. Although the primary objective of the M.Sc. program is to prepare students for doctoral studies in speech and language sciences, successful completion of the program does not guarantee entrance into the Ph.D. program.

Admission Requirements
Students with a four-year degree, or its equivalent, in speech-language pathology or a related discipline, are considered for admission according to the general admission criteria of the School of Graduate Studies. Prior to admission, an applicant must identify a faculty member who has agreed to serve as research supervisor. The research supervisor may want to examine a completed thesis and/or manuscripts and university transcripts. Application deadlines are January 15 for September registration and September 15 for January registration. Students applying to the M.Sc. program should use the SGS application form online at www.sgs.utoronto.ca.

Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction was not English, must demonstrate facility in the English language through the successful completion of one of the English proficiency tests listed in this calendar. See General Regulations, English Language Facility.

Reclassification Examination
Master of Science candidates who demonstrate outstanding potential for advanced research in the discipline may be recommended by their supervisory committee for a reclassification examination which, when passed, allows them direct advancement to the Doctor of Philosophy program. This examination normally is undertaken following the completion of at least one session and within 18 months of registration in the M.Sc. program.

Program Requirements
1 Candidates with a background in speech-language pathology
The program requires a one-year residency period which typically is sufficient for completion of the course work. Course requirements are determined by the student's supervisory committee. Normally, the candidate is required to complete satisfactorily a minimum of two full courses, consisting of at least one full course in research design and methodology, and at least one full course in the area of research interest. In addition, students are required to participate in student and faculty research seminars. Students also are required to engage in a research project, present the results in a written thesis, and complete a successful oral defence of the thesis.

2 Candidates without a background in speech-language pathology
The program requires a two-year residency period which typically is sufficient for completion of the course work. Course requirements are determined by the student's supervisory committee. During the first year of study, students take courses in the M.H.Sc. program that provide the requisite knowledge for the area of research interest and attend student and faculty research seminars. Following successful completion of the courses in the first year, students complete the requirements for the M.Sc. degree as outlined for candidates with a background in speech-language pathology (see 1 above).
Degree of Doctor of Philosophy
The purpose of the Ph.D. program is to prepare students to contribute independently to the advancement of scientific knowledge in their area of specialization within the discipline of speech-language pathology.

Admission Requirements
Admission to the Ph.D. degree program is based on the applicant’s demonstrated qualifications for advanced research in speech and language sciences. Prior to admission, an applicant must identify a faculty member who has agreed to serve as research supervisor. The research supervisor may want to examine a completed thesis and/or manuscripts and university transcripts. Normally, candidates are expected to have completed a M.Sc. or M.A. degree in speech-language pathology, or a related discipline, with a minimum of a B+ average over the course of the program. Students applying to the Ph.D. program should use the SGS application form online at www.sgs.utoronto.ca.

Applicants who were educated outside Canada, whose primary language is not English, and who graduated from a university where the language of instruction was not English, must demonstrate facility in the English language through the successful completion of one of the English proficiency tests listed in this calendar. Students who graduated from a university outside North America are strongly encouraged to contact the Coordinator of Graduate Studies before applying. See General Regulations, English Language Facility.

Program Requirements
The Ph.D. program normally extends over three to four years. Students complete a residency requirement during the first two years of the program. Course requirements are determined by the student’s supervisory committee and consist of a minimum of three full courses or the equivalent. Candidates must demonstrate evidence of adequate knowledge in research design and statistics or must include suitable course work as determined by the supervisory committee. Candidates for the Ph.D. degree are expected to participate in student and faculty research seminars in addition to their regular course requirements. For students with a comprehensive background in speech-language pathology, the doctoral program consists of 2 phases, each taking approximately 18 to 24 months to complete. During the first phase, the student completes a departmental comprehensive examination that includes a full research proposal and a conceptual paper on a topic chosen by the student and the supervisory committee. The second phase of the program is devoted almost exclusively to the completion of the thesis research project. At the conclusion of this second phase, the student defends the research thesis at a final oral examination in accordance with the regulations of the School of Graduate Studies.

Courses of Instruction for the M.H.Sc. Program
Consult the departmental student handbook for a listing of courses offered during each academic year.

The first year of the program for full-time students will consist of:
SLP 1500Y Internship (Credit/No Credit)/ S. Wagner
SLP 1502Y Anatomy and Embryology/ P. Stewart
SLP 1503Y Articulation and Related Disorders/A. Eriks-Brophy
SLP 1505Y Child Language I/L. Girolametto
SLP 1506H Child Language II/L. Girolametto
SLP 1507H Clinical Laboratory in Speech-Language Pathology/S. Wagner
SLP 1514Y Applied Audiology/Staff
SLP 1516H Aural Rehabilitation/A. Eriks-Brophy
SLP 1520H Principles of Clinical Practice/ S. Wagner
SLP 1521H Augmentative Communication/ B. O’Keefe
SLP 1522Y Speech Physiology and Acoustics/P. van Lieshout
SLP 1529H Fluency Disorders/L. De Nil
SLP 1530H Voice Disorders/T. Bressmann

The second year of the program for full-time students will consist of:
SLP 1508Y Advanced Clinical Laboratory in Speech-Language Pathology/ S. Wagner
SLP 1525H Structurally Related Disorders/ T. Bressmann
SLP 1527H Physical Analysis of Speech Disorders/P. van Lieshout
SLP 1528H Research in Speech-Language Pathology/C. Johnson
SLP 1533Y Aphasia/E. Rochon
SLP 1534Y Motor Speech Disorders/Staff
SLP 1535H Advanced Principles of Clinical Practice/S. Wagner
SLP 1536H Swallowing Disorders/Staff
SLP 1538H Neurocognitive Communication Disorders/E. Rochon
SLP 2500Y Advanced Internship/S. Wagner

Courses of Instruction for the M.Sc. and Ph.D. Programs
SLP 3001H Theoretical Foundations of Communication Sciences/L. De Nil, C. Johnson
SLP 3002H Research Methodologies in Communication Sciences/C. Johnson
SLP 3003H+ Research Seminar/Staff
SLP 3004H,Y Reading Seminar/Staff
SLP 4000H+ Research Seminar/Staff
SLP 4001H Philosophical and Theoretical Foundations of Communication Sciences/C. Johnson, L. De Nil
SLP 4007H,Y Reading Seminar/Staff

Special Courses Offered to Students from Other Departments
SLP 2501H Special Topics in Communication Disorders/Staff
SLP 2502Y Specialized Study in Communication Disorders/Staff

*Courses which may continue over a program. The course is graded when completed.

E-mail: grad-info@utstat.utoronto.ca
Web: www.utstat.utoronto.ca

Statistics is the study of random phenomena and as such encompasses a broad range of scientific, industrial, and social processes. The past several decades have witnessed a vast impact of statistical methods on virtually every branch of knowledge and empirical investigation. The Department of Statistics offers opportunities for study and research in the fields of probability, applied probability, theoretical statistics, and applied statistics. The Department has substantial computing facilities available and operates a statistical consulting service for the University’s research community. Programs of study may involve association with other departments such as Mathematics, Mechanical and Industrial Engineering, Computer Science, or Community Health. The Department maintains an active seminar series and strongly encourages participation by graduate students.

Candidates are accepted under the general regulations. The Department requires a TOEFL (Test of English as a Foreign Language) score of 580 or better and successful completion of the TWE (Test of Written English) for candidates whose primary language is not English.

Degree of Master of Science
Qualified candidates may be accepted into a one-year or two-year program for the degree of Master of Science. It is also possible to obtain the M.Sc. degree by part-time studies since there is no formal residency requirement for this degree.

Candidates for the one-year program are required to take and pass four approved full-year courses, one of which may be an approved supervised reading project. Alternatively, candidates may take STA 3000Y plus five half-year courses. Two approved half-year courses are considered the equivalent of a full-year course. Further details may be found in the Graduate Information brochure available from the Department. All programs must be approved by the Coordinator of Graduate Studies.

The first year of a two-year program consists of prerequisite and other courses to prepare the candidate for the one-year M.Sc. program. Candidates who plan to undertake the part-time M.Sc. degree must qualify for admission to the one-year program.

Students will not be permitted to begin the full-time master's program in a January session; therefore, only applications for the part-time M.Sc. program will be considered for January admission.

Degree of Doctor of Philosophy

Admission Requirements
Candidates are admitted under the general regulations for the Ph.D. However, under exceptional circumstances, candidates may be admitted to the Ph.D. program from a bachelor's degree. In this case, they will be required to complete STA 2111H, STA 2211H, STA 3000Y, and four other half-courses. (This represents two half-courses more than the normal Ph.D. course work requirement.)
Program Requirements

1. There will be a one-year residence period for all students admitted to the Ph.D. program who have completed a master's degree. Students admitted from a bachelor's degree will have a two-year residence period.

2. There is no major/minor field requirement for graduation.

3. Candidates are required to take six half-courses including STA 2111H, STA 2211H, and STA 3000Y. Students transferring from the M.Sc. program who have taken any or all of STA 2111H, STA 2211H, and STA 3000Y during their M.Sc. program will have the number of required courses reduced accordingly.

4. Candidates are required to pass a comprehensive examination and satisfy the Department of their knowledge of probability and statistics, and advanced knowledge at the master's level in their degree area (applied statistics, theoretical statistics, or probability) prior to embarking on a thesis. The submission of a suitable thesis is required. Further details may be found in the Graduate Information brochure available from the Department.

Courses of Instruction

The Department offers a selection of courses each year from the following list with the possibility of additions. The core courses will be offered each year. Consult the Graduate Information brochure for courses offered in the current academic year.

STA 1001H Applied Regression Analysis
STA 1003H Sample Survey Theory and its Application
STA 1004H Introduction to Experimental Design
STA 1005H Applied Multivariate Analysis
STA 1007H Statistics for Life and Social Scientists
STA 1008H Applications of Statistics
STA 1502H Stochastic Models in Investments
STA 2004H Design of Experiments
STA 2006H Applied Stochastic Processes
STA 2101H Methods of Applied Statistics I
STA 2102H Computational Techniques in Statistics
STA 2103H An Introduction to Bayesian Inference
STA 2111H Probability Theory I
STA 2112H Mathematical Statistics I
STA 2162H Statistical Inference II
STA 2201H Methods of Applied Statistics II
STA 2202H Time Series Analysis
STA 2209H Lifetime Date Modelling and Analysis
STA 2211H Probability Theory II
STA 2212H Mathematical Statistics II
STA 2262H Statistical Inference II
STA 2270H Introduction to Wavelet Methods in Statistics
STA 2342H Multivariate Analysis I
STA 2442H Multivariate Analysis II
STA 2453H Statistical Consulting
STA 2500H Actuarial Risk Theory
STA 2501H Mathematical Risk Theory
STA 2503H Applied Probability for Mathematical Finance
STA 2505H Credibility Theory and Simulation Methods
STA 2542H Linear Models
STA 3000Y Advanced Theory of Statistics
STA 3003H Advanced Sample Survey Theory and Practice
STA 3047H Stochastic Processes
STA 3077H Research Topics in Probability Theory
STA 3101H Neural Networks and Related Statistical Methods
STA 3102H Stat Theory-Quality Control
STA 3103H Bayesian/Likelihood Asymptotics
STA 3431H Monte Carlo Methods
STA 4000H Supervised Reading Project I
STA 4001H Supervised Reading Project II
STA 4210H Smoothing, Semi- and Non-parametric Regression
STA 4247H Research Topics in Stochastic Processes
STA 4272H Research Topics in Statistics
STA 4273H Research Topics in Bayesian Inference
STA 4274H Research Topics in Statistical Computation
STA 4275H Research Topics in Likelihood Inference
STA 4276H Research Topics in Monte Carlo Methods
STA 4312H Bayesian Linear Models
STA 4352H Research Topics in Multivariate Statistics
STA 4360H Theory of Pivotal and Direct Inference
STA 4364H Conditional Inference: Sample Space Analysis
STA 4406H Statistical Inference for Stochastic Processes
STA 4412H Topics in Theoretical Statistics
Theoretical Astrophysics

Introduction
CITA is a national institute specializing in theoretical astrophysics. It was established in 1984 and has the support of over fifty faculty members from about twenty Canadian universities. CITA is hosted by the University of Toronto which contributes to its ongoing support. Further major support is received from the Natural Sciences and Engineering Research Council. CITA is governed by a national council elected through the Canadian Astronomical Society.

In addition to its faculty, CITA maintains a rotating complement of more than a dozen post-doctoral fellows and research associates, and hosts an active program of visitors from other universities.

The Facility
CITA is housed in the Burton Tower of the McLennan Physical Laboratories, adjacent to the departments of Astronomy and Physics. CITA owns an extensive and powerful network of massively parallel computers and workstations.

Research Activities
The research activities at CITA span most of the areas of modern theoretical astrophysics, including accretion disks, active galactic nuclei, general relativity, cosmology and cosmological aspects of particle physics, the cosmic microwave background, gravitational lenses, dark matter, galaxy formation, galaxy structure and evolution, dynamics of stellar systems, physics and chemistry of the interstellar medium, star formation, stellar evolution, novae, supernovae, compact objects and gamma-ray bursts, nucleosynthesis, solar system formation and dynamics, and comets.

The theoretical interests of many CITA staff are complemented by observational research. CITA researchers have active observing programs at a wide variety of ground-based and satellite telescopes in many different wavelength bands.

Graduate Research Training
CITA does not offer an independent graduate degree program. Students interested in theoretical astrophysics are encouraged to enrol in the graduate programs offered by cognate departments (e.g., Astronomy and Astrophysics, Chemistry, Physics). All CITA faculty hold cross-appointments in one or more of these departments, and inquiries by students seeking research supervision by CITA faculty are welcome. CITA research fellows and visitors are also encouraged to work with graduate students.

The Department of Theory and Policy Studies in Education (TPS) consists of three graduate programs, one representing two discipline-based fields (History and Philosophy) and two representing the application of cognate scholarship to domains of practice (Educational Administration and Higher Education). Each program offers courses of study leading to M.Ed., M.A., Ed.D., and Ph.D. degrees. Members of the Department also participate in delivering the preservice teacher education program (B.Ed.), particularly the social foundations courses and courses rooted in educational history, philosophy, administration, and policy.

Application, General Admission, and Program Requirements
Applications must be made to one of four specializations:
- Educational Administration
- Higher Education
- History of Education
- Philosophy of Education

For information about application procedures and forms, contact the OISE/UT Registrar's Office at (416) 923-6641 ext. 2430.

For general admission and program requirements, consult the OISE/UT Graduate Studies in Education Bulletin section titled "Minimum Admission, Program and Degree Requirements". For complete information on TPS degree programs, consult the section of the Bulletin dealing with the Department of Theory and Policy Studies in Education.

Degree of Master of Education
At OISE/UT there are three options for completing the M.Ed. degree.

Option I
Course work only option: ten half-courses plus a comprehensive examination/requirement.

Option II
Research project option: eight half-courses plus a research project or major research paper.

Option III
Thesis option: six half-courses plus a thesis.

Information about available options in each graduate program follow.

Educational Administration
The M.Ed. program is designed primarily for students who are interested in learning the nature and practice of leadership in administration, policy, and planning.

Admission Requirements
In addition to the general requirements in the OISE/UT Graduate Studies in Education Bulletin, the criteria for admission to an M.Ed. degree program in Educational Administration are:
1. an appropriate four-year University of Toronto bachelor's degree, or its equivalent from a recognized university completed with standing equivalent to a University of Toronto mid-B or better in the final year, preferably with a concentration and focus in an area relevant to the type of educational administration the applicant wishes to enter;
2. an interest in the study and practice of administration;
3. academic qualifications beyond the first degree;
4. two letters of reference. Whenever possible, one should be written by an educational administrator for whom the applicant has worked, and the second by a professional colleague.

Program Requirements
The M.Ed. degree may be pursued either part-time or full-time.

There are two options within the M.Ed. program in Educational Administration for all students.

Students who begin their program in the 2002/2003 academic year or later must meet the following requirements.

Option II comprises:
1. four required half-courses:
   - TPS 1004H Research Literacy in Educational Administration
   - TPS 1040H Educational Administration I: Introduction to Educational Administration: Policy, Leadership and Change
   - TPS 1041H Educational Administration II: Social and Policy Contexts of Schooling
   - TPS 1003H Conducting Research in Educational Administration

   TPS 1004H, TPS 1040H, and TPS 1041H should be taken first; course TPS 1003H should be taken towards the end of the program;
2. four other half-courses, of which at least two must be in Educational Administration. Students may choose to focus on one of the five program strands: Policy, Leadership, Change, Social Diversity, or Ethics and Values;
3. a Major Research Paper (MRP) to be carried out under the guidance of a faculty member.
Option III comprises:
1 four required half-courses:
TPS 1004H Research Literacy in Educational Administration
TPS 1040H Educational Administration I: Introduction to Educational Administration: Policy, Leadership and Change
TPS 1041H Educational Administration II: Social and Policy Contexts of Schooling
TPS 1003H Conducting Research in Educational Administration

TPS 1004H, TPS 1040H, and TPS 1041H should be taken first; course TPS 1003H should be taken towards the end of the program.
2 two other half-courses, of which at least one must be in Educational Administration;
3 a comprehensive thesis, to be developed under the guidance of a faculty member.

Higher Education
Students in Higher Education will be required to pursue the M.Ed. Option I degree program (ten half-courses plus a comprehensive examination). All students are required to complete TPS 1803Y.

Health Professional Education
Those students who are in the health professional education specialization will normally register in the M.Ed. Option II program (eight half-courses plus a research project or a major research paper). This option, if pursued on a full-time basis, cannot be completed in less than 12 months. A comprehensive examination is required.

Additional information on the health professional education specialization may be obtained from Professor Daniel Lang.

History of Education
The M.Ed. degree in History of Education is pursued under Option II (eight half-courses plus a major research project/paper). Students are expected to take at least four half-courses in the History of Education, one of which must be TPS 1460H.

Philosophy of Education
The M.Ed. degree in Philosophy of Education is pursued under Option II (eight half-courses plus a major research project/paper). Students are expected to take at least four half-courses in Philosophy of Education.

Degree of Master of Arts

Educational Administration
The M.A. program fosters the study of problems in the administration and leadership of educational programs. It will best serve students who have a commitment to scholarship and research as a means of deepening their understanding of administrative action in schools or in other educational and service institutions. While experience in teaching and administration is not an essential prerequisite for admission, such experience provides a desirable background.

Admission to the M.A. program requires a four-year University of Toronto bachelor's degree or its equivalent, in a relevant discipline or professional program, completed with the equivalent of a University of Toronto B+ standing in the final year.

The M.A. program consists of eight half-courses and a thesis. Additional courses may be required of some applicants. The M.A. is available through both full-time and part-time studies.

Higher Education
Admission to the M.A. program requires a four-year University of Toronto bachelor's degree, or its equivalent, in a relevant discipline or professional program, completed with the equivalent of a University of Toronto mid-B standing in the final year.

The M.A. program consists of eight half-courses, a general written comprehensive examination, and a thesis. Additional courses may be required of some applicants. All students are required to complete TPS 1803Y.

History of Education
Qualified applicants who hold a four-year University of Toronto bachelor's degree, or its equivalent, with a major in history may be admitted to a one-year M.A. program comprising six half-courses and a thesis. Normally, four of the six half-courses must be selected from History of Education course offerings accepted for credit in this degree program. Course TPS 1419H is a requirement for students in this program.

Philosophy of Education
Qualified applicants who hold a four-year University of Toronto bachelor's degree, or its equivalent, with a major in philosophy may be admitted to a program comprising six half-courses and a thesis. In this program, TPS 1440H is mandatory (unless it, or its equivalent has been taken previously). Three of the re-
maining five courses should normally be in Philosophy of Education, selected in consultation with the faculty advisor. Courses from other departments, including the Graduate Department of Philosophy, may, upon approval, be substituted for Philosophy of Education courses.

Applicants with undergraduate majors in related social science and humanities disciplines are normally required to take some additional courses.

Degree of Doctor of Education

Educational Administration

The Ed.D. program in Educational Administration is designed to develop highly competent personnel for senior administrative positions in school systems, colleges, universities, and other educational institutions and agencies, and for academic positions in universities and colleges. The program is designed to satisfy the needs of practising and aspiring educational administrators and academics who, because of the increasing complexity of problems related to the operation of educational organizations, have recognized the need for further professional education. The emphasis is on developing skills in the application of knowledge from theory and research to practical administrative problems. To accomplish this, the program is flexibly designed and involves numerous collaborative experiences among faculty members, students, and administrators.

Admission Requirements

In addition to the general requirements given in the OISE/UT Graduate Studies in Education Bulletin the Educational Administration program specifies the following:

1. The applicant should hold a master’s degree with specialization in Educational Administration from the University of Toronto, or an equivalent degree. Additional course work will be required of those who do not have a background in administrative studies.

2. The applicant must have had a successful leadership experience in education or must show potential for leadership. Evidence of this will be provided by at least one letter of reference secured by the applicant from a senior administrator under whom the applicant has worked, commenting on the applicant’s a) achievement in identifying and solving educational problems, b) ability to work with people, c) leadership style, and d) awareness of current social and educational issues.

3. The applicant must also furnish at least one letter of reference from a professor with whom the applicant has studied, commenting on the applicant’s scholarly achievement.

Program Requirements

The Ed.D. program is organized into six complementary components:

1. Ed.D. core seminars, which consist of TPS 3040H and TPS 3041H, that apply theoretical knowledge to problems likely to be experienced by senior administrators in educational organizations;

2. two of the following three half-courses or their equivalents: TPS 3042H, TPS 3043H, or TPS 3044H. TPS 3044H is the administrative internship/practicum program, and only an internship/practicum program taken for credit at another university would be considered equivalent;

3. two further courses in Educational Administration at the 3000 level;

4. elective courses; two are required, although more may be taken. It is suggested that at least one elective be taken outside of the Educational Administration program;

5. a comprehensive examination as part of the thesis proposal hearing;

6. a doctoral thesis.

Higher Education

For the Ed.D. degree program in Higher Education, requirements include:

1. a minimum of eight half-courses (which may be taken full-time or part-time) beyond a relevant and acceptable M.Ed. or M.A. degree. Normally they will include TPS 1803Y, at least three other half-course equivalents in Higher Education, and a half-course in research methodology approved by the faculty advisor;

2. a written comprehensive examination;

3. a thesis reporting the results of original research.

History of Education

The Ed.D. degree program in History of Education is designed for career educators who wish to engage in the in-depth study of a problem or topic related to professional practice.

The degree requirements (for candidates who have a master’s degree equivalent to the History of Education M.Ed. or M.A.) consist of eight half-courses, a year of full-time study on campus, and a thesis. Preferably, the resident year should occur late in the degree program and should be devoted primarily to thesis research and writing.

The core program includes two mandatory Ed.D. seminars (TPS 3490H and TPS 3491H),
normally taken during the resident year. Course TPS 1419H is a requirement for students in this program. The remaining courses are selected by the student in consultation with the faculty advisor and may be taken before or after the year of required full-time study. Students are strongly encouraged, though not required, to take at least two half-courses before the resident year.

All Ed.D. students who began their program after July 1, 1992, are required to take a comprehensive examination.

**Philosophy of Education**

The Ed.D. degree program is designed for career educators who wish to engage in the in-depth study of a problem or topic related to professional practice. Applicants with specializations in their master's degree programs other than Philosophy of Education are required to take additional courses either as prerequisites to admission or as part of their program. Applicants without a master's thesis or equivalent must submit a Qualifying Research Paper, which must be approved by two faculty members prior to registration in the program.

The minimum Ed.D. degree requirements (for candidates who hold a master's degree equivalent to the Philosophy of Education M.Ed. or M.A.) consist of eight half-courses (some or all of which may be taken part-time), a year of required full-time study on campus, and a thesis. Preferably, the year of full-time study should occur late in the degree program and should be devoted primarily to thesis research and writing. All Ed.D. students are required to take a comprehensive examination.

The core program includes two mandatory Ed.D. seminars (TPS 3480H and TPS 3481H), normally taken during the year of required full-time study, and course TPS 1440H (unless it, or an equivalent, has been taken previously). Three of the remaining five courses should normally be in Philosophy of Education, selected in consultation with the faculty advisor. Courses from other departments, including the Graduate Department of Philosophy, may, upon approval, be substituted for Philosophy of Education courses. Students are strongly encouraged, though not required, to take at least two half-courses before the year of required full-time study.

**Degree of Doctor of Philosophy**

**Educational Administration**

The Ph.D. program fosters the study of problems in the administration and leadership of educational programs. It will best serve students who have a commitment to scholarship and research as a means for deepening their understanding of administrative action in schools or in other educational and service institutions. While experience in teaching and administration is not an essential prerequisite for admission, such experience provides a desirable background.

Admission to the Ph.D. program requires prior completion of the University of Toronto M.A. degree or its equivalent, with standing equivalent to a University of Toronto A minus. Students who have completed an appropriate master's degree that did not include a thesis or research project are required to complete a Qualifying Research Paper to a standard satisfactory to the M.A./Ph.D. Admissions Committee. Before undertaking a qualifying research project, students should first consult the Program Coordinator.

The program comprises at least six new half-courses, four of which normally must be TPS 3040H, TPS 3042H, TPS 3043H, and one elective advanced level (3000) course in Educational Administration. Students who have already attained an acceptable level of competence in research methodology may be authorized to choose a course in a different area of specialization.

Ph.D. candidates are required to pass a comprehensive examination as part of the thesis proposal hearing. A thesis is required.

**Higher Education**

Requirements for the Ph.D. program include:

1. six half-courses beyond the M.A. or M.Ed. degree in Higher Education. In individual cases, students with a highly relevant master's degree in other educational specializations or other fields will be admitted but remedial work in Higher Education will be required. The six half-courses will include four in Higher Education. The remaining two half-courses may be selected from this program, or from any department of OISE/UT, or from another graduate department of the University of Toronto, with the approval of the faculty advisor. Unless exemption is granted for prior study, all Ph.D. programs in Higher Education must include TPS 1803Y and a half-course in research methodology, approved by the faculty advisor;
2. a written comprehensive examination;
3. a thesis reporting the results of original research.

Collaborative Programs: Interested Higher Education program students may also enrol in the Collaborative Graduate Programs in Comparative, International, and Development Education;
Gender Equity in Education; or Women's Studies/Feminist Studies.

**History of Education**  
Qualified applicants with a University of Toronto M.A. degree in History of Education, or its equivalent, including a thesis or equivalent major research paper, may be admitted to a six half-course (plus thesis) program. If the master's degree did not include a thesis (or equivalent), a Qualifying Research Paper must be submitted and approved by two faculty members before registration in the degree program.

Applicants who do not hold a master's degree with specialization in History of Education will be required to establish equivalency with the OISE/UT master's program. Usually this entails the addition of courses beyond the minimum six half-courses required for the Ph.D. Course TPS 1419H is a requirement for students in this program. Applicants who have taken graduate courses with substantial history of education content in any of several related disciplines in the humanities and social sciences should submit descriptions of such courses with their applications to help determine equivalency of the number of additional courses to be taken.

All Ph.D. candidates are required to write a comprehensive examination.

**Philosophy of Education**  
Qualified applicants with a University of Toronto M.A. degree in Philosophy of Education or its equivalent (including a thesis or equivalent major research paper) may be admitted to a program comprising six half-courses and a thesis. In this program, TPS 1440H is mandatory (unless it, or its equivalent, has been taken previously). Three of the remaining five courses should normally be in Philosophy of Education, selected in consultation with the faculty advisor. Courses from other departments, including the Graduate Department of Philosophy, may, upon approval, be substituted for Philosophy of Education courses.

If the master's degree did not include a thesis (or equivalent), a Qualifying Research Paper must be submitted and approved by two faculty members before registration in the degree program.

Applicants who do not hold a master's degree with specialization in philosophy of education will be required to establish equivalency with the OISE/UT master's program. Usually this entails the addition of courses beyond the minimum six half-courses required for the Ph.D.

All Ph.D. candidates are required to write a comprehensive examination.

**Courses of Instruction**  
Not all courses are offered every year. Please consult OISE/UT's Graduate Studies Course Schedule which lists the courses the Department will offer this year as well as those offered by other departments that may be taken for credit in your program.

Some sections of existing courses are offered off campus and by computer conferencing in order to make them available to students in localities far from Toronto.

The Centre for Urban and Community Studies promotes and disseminates multidisciplinary research and policy analysis on urban issues.

Its activities are intended to contribute to scholarship on questions relating to the social and economic well-being of people who live and work in urban areas large and small, in Canada and around the world.

The Centre was established in 1964 as a research unit of the School of Graduate Studies. Its research associates include professors and graduate students from a dozen different disciplines and professionals from a variety of organizations.

The Centre’s mandate is to:
- bring together faculty, professionals, and graduate students interested in urban development, policy issues and the quality of life in cities;
- encourage interdisciplinary scholarly research on urban issues;
- support this research by providing academic staff and students with space, access to services and information, opportunities for collaboration, seminars and conferences, and graduate research internships;
- disseminate ideas related to urban and community studies to other researchers and to agencies and organizations interested in urban matters by publishing books, reports, bibliographies, and research bulletins;
- improve communications among researchers and between researchers and the broader urban community.

Several formal working groups are currently active within, or are associated with, the Centre. These include:
- UofT Urban International, which provides multi-year support for research projects on international development;
- Childcare Resource and Research Unit;
- NetLab, which studies computer, communication, and social networks;
- Housing New Canadians Research Working Group;
- Community Development Research Network;
- Cities Lab, which studies urban growth, urban structure, and neighbourhood change;
- Urban Systems Research Lab, and
- Urban Entomology Program.

Although the Centre has no formal degree responsibilities, its faculty members all contribute to graduate programs in their home departments. Research activities in the Centre comprise both major programs, intended as areas of continuing interest involving an interdisciplinary team approach, and more focused, shorter-term projects, often undertaken by one or two people.

Current research themes include: housing markets and Canadian housing policy; urbanization and urban management in developed and developing countries; urban environment and sustainability; social networks and urban communities; computer and social networks; social and spatial polarization; immigrant settlement; child care, women and labour force participation; municipal administrative development; urban systems, urban growth and changing metropolitan form in Canada; urban public transport; geographic information systems and urban policy; regional policy and regional development.
The Centre maintains close working relationships with research programs and academic units both within and outside the University that have similar interests. Associate membership in the Centre is held by members of the University or the affiliated community engaged in urban research.

One of the main functions of the Centre is to make available academic research on urban affairs. It publishes research papers, bulletins, monographs, and books, and offers shorter papers and bulletins through its Web site. Publications lists and a brochure describing its activities and programs are available from the Centre.

For graduate students the Centre offers seminars on a wide range of urban and social science topics, the opportunity to publish papers in the Centre’s series, access to publications and conferences at a reduced price, research training and assistantships, and information on data sources and research opportunities.

The Centre welcomes visiting researchers, including professors and professionals on research leave, as well as students with postdoctoral fellowships. The Centre is unable to offer funding to visitors, but can provide office space, Internet connections, and access to the University of Toronto’s library system.

Women's Studies
The Graduate Collaborative Program in Women's Studies (GCWS) provides a formal educational context for the pursuit of interdisciplinary research in women's and gender studies.

Address:
Institute for Women's Studies and Gender Studies
Graduate Collaborative Program in Women's Studies
Room 2036, Wilson Hall, New College
University of Toronto
Toronto, Ontario
Canada
M5S 1C6

Telephone: (416) 978-3668
Fax: (416) 946-5561
E-mail: grad.womenstudies@utoronto.ca
Web: www.utoronto.ca/iwsgs

Nature of the Collaborative Program
Graduate units from the Humanities, Social Sciences, and Life Sciences participate in the Graduate Collaborative Program in Women's Studies at the University of Toronto. The collaborating units contribute courses and provide facilities and supervision for graduate research. The program is administered by the Institute for Women's Studies and Gender Studies (IWGS).

The Graduate Collaborative Program in Women's Studies (GCWS) provides a formal educational context for the pursuit of interdisciplinary research in women's and gender studies.
and advanced feminist scholarship. The program, offered at the master's and doctoral levels, provides a central coordinating structure to facilitate and disseminate women's studies research through student and faculty research seminars, colloquia, circulation of work in progress, study groups, conferences, and publications. GCWS contributes to the development of an integrated research community in women’s studies at the University of Toronto.

The Graduate Collaborative Program in Women's Studies brings together 26 graduate units providing more than 100 courses and involving over 100 faculty. Students must be admitted to, and enrol in, one of the collaborating units, and must fulfill all the degree requirements in the home department. Students who successfully complete the requirements of the collaborative program will receive the notation “Completed Collaborative Program in Women's Studies” on their transcript, in addition to the master’s or doctoral degree from their home graduate unit.

Programs of study should be planned in consultation with the GCWS Graduate Coordinator as well as the Coordinator of Graduate Studies in the student’s home graduate unit. Courses should be selected from the established cross-listed courses approved by the Graduate Coordinator of the collaborative program. Theses will be supervised and evaluated in the same manner as those in the home graduate unit. Normally, at least one graduate faculty member affiliated with GCWS will be a member of the thesis or supervisory committee of students in the program.

Admission Requirements
- familiarity with the approaches and methodologies associated with scholarship in women's studies, OR
- extensive familiarity with women's studies scholarship in a single discipline or a cognate set of disciplines

Collaborating units send to GCWS a copy of all student files (application, offer of admission, etc.).

The GCWS Committee reviews the file and, if approved, a letter of acceptance outlining the course requirements for the Program, is sent to the candidate and the collaborating unit.

To be submitted to GCWS:
1 Non-Thesis Master’s
- ensure that your graduate application file is forwarded from the home graduate unit
- one half-course (H course) selected from the cross-listed courses in GCWS
- two letters of reference outlining your background in women's studies

2 Thesis Master’s
- ensure that your graduate application file is forwarded from the home graduate unit
- two-page statement of research intent explaining how your program of study and specific research interests relate to women's studies at the doctoral level
- two letters of reference outlining your background in women's studies

3 Doctor of Philosophy
To be considered for admission to the Graduate Collaborative Program in Women’s Studies at the doctoral level, applicants must demonstrate extensive familiarity with relevant scholarship in women's studies at both the undergraduate and graduate levels. Applicants who lack a strong background in the field of women's studies may be required to do special course work to qualify.

To be submitted to GCWS:
- ensure that your graduate application file is forwarded from the home graduate unit
- two-page statement of research intent for the thesis in women's studies
- two letters of reference outlining your background in women's studies

4 Ad hoc arrangements are possible with non-collaborating departments.

Program Requirements

Master's Degrees
1 Non-Thesis Master’s Degree
- JPW 2118H Philosophical Foundations of Women’s Studies or equivalent
- one full course (Y course) or two half-courses (H courses) selected from the cross-listed courses in GCWS
- two letters of reference outlining your background in women's studies

2 Thesis Master’s Degree
- JPW 2118H Philosophical Foundations of Women’s Studies or equivalent
- one half-course (H course) selected from the cross-listed courses in GCWS
- two letters of reference outlining your background in women's studies

Doctoral Degrees
- JPW 2118H Philosophical Foundations of Women’s Studies or equivalent (if not already completed)
- JPW 3000H Advanced Research Seminar
- one half-course (H course, not taken previously) from the list of cross-listed courses in GCWS
- the thesis, or major paper, dealing with a subject in the field of women's studies
## Courses of Instruction

### Required Courses

Nature of the Collaborative Program
The graduate departments of Forestry, Chemical
Engineering and Applied Chemistry, and
Mechanical and Industrial Engineering partici-
pate in the Collaborative Master’s Program in
Wood Products Engineering. This program is
directed to building an understanding of the
material properties and science of wood and
wood processing on the strong science and
engineering backgrounds of M.Sc.F./M.A.Sc.
candidates. Students in the program will take a
number of core courses and will work with a
participating “industry partner” company during
an internship to define problems for field and
laboratory research and thesis preparation. The
participating departments contribute courses
and provide facilities and major supervision,
through participating faculty members, for
graduate research.

Upon successful completion of the master’s
degree requirements of the home department,
as well as the Wood Products Engineering Pro-
gram requirements, students receive the nota-
tion “Completed Collaborative Master’s Pro-
gram in Wood Products Engineering” on their
transcript.

Application Procedure
Candidates for the program must first apply to
and be accepted into a master’s degree pro-
gram of one of the collaborating departments,
i.e., the M.Sc.F. program in Forestry or the
M.A.Sc. program in either Chemical Engineer-
ing and Applied Chemistry or Mechanical and
Industrial Engineering, under the research su-
ervision of one of the participating faculty
members. (See departmental entries in this
calendar for details on admission and degree
requirements.) Following registration in one of
the collaborating departments, candidates inter-
ested in the Collaborative Program must con-
sult with their program supervisors (and super-
visory committees), as well as with the Wood
Products Engineering Program Director, to
identify appropriate degree and course require-
ments and, in particular, the availability of a
relevant internship placement. Subsequent to
these discussions, and by January 15 in the
term preceding the proposed summer intern-
ship start date, students must confirm their in-
terest in the Collaborative Program by submis-
sion of a formal application. Application instruc-
tions are available from the Graduate Adminis-
trator, Faculty of Forestry.

Program Requirements
Students in the program must meet the specific
degree and course requirements of their home
departments, including at least three half-
courses selected from the Wood Products
Engineering elective course offerings listed
below. In addition, participants must
successfully complete the Collaborative
Program’s core requirement JFE1300H Wood
Products Engineering Internship in which
students will define an industrial problem during
a three- to six-month internship with a wood
products company and will prepare and
successfully defend a research thesis
addressing the problem. Student programs are
subject to approval by the student’s supervisor
and supervisory committee and the home
department.

See also departmental entries for M.Sc.F./
M.A.Sc. degree requirements.

Courses of Instruction
The following courses, offered through the
collaborating departments, support the Wood
Products Engineering Collaborative Program.

University of Toronto
Toronto, Ontario
Canada
M5S 3G5

Telephone: (416) 978-3477
Fax: (416) 978-8532
E-mail: grad@zoo.utoronto.ca
Web: www.zoo.utoronto.ca/
The Department of Zoology offers graduate training in the following research sections:

- Genetics, Cellular and Developmental Biology
- Ecology and Behaviour
- Evolutionary Biology
- Physiology

The work of each student will ordinarily fall within one of these areas. With the approval of the Associate Chair, an individual research/reading course (ZOO 1002H,Y) may be arranged with faculty in one of the research sections where a formal graduate course in that area is not already available. Permission is required to take this course more than once for credit in a degree program.

Admission Requirements

Applicants to the Master of Science and Doctor of Philosophy degree programs are accepted under the general regulations. Applicants to the M.Sc. program must have at least a mid-B average in each of the last two years' equivalent of study (five full courses each). An elementary but competent knowledge of physics and chemistry will be required, and a knowledge of the general field of biology must be demonstrated. It is the student’s responsibility to arrange for supervision by contacting potential supervisors. Exceptional students are encouraged to enter the Ph.D. program directly from the B.Sc. Students may also transfer to the Ph.D. program from the M.Sc. program.

Program Requirements

When arranging their course and research programs with their supervisors, M.Sc. and Ph.D. candidates may consult the Department’s Associate Chair for Graduate Affairs. The entire course of study must be approved by the student's advisory committee and the Department. Students wishing to take a minor in this Department should discuss the requirements with the faculty concerned and should obtain the approval of the Associate Chair.

Degree of Master of Science

M.Sc. candidates are required to take at least one graduate full-course equivalent in Zoology or another cognate graduate unit. Included must be one designated core half-course. Completion and defence of a thesis is required.

The Department encourages graduate students to complete M.Sc. degree requirements within two years of admission.

Degree of Doctor of Philosophy

Ph.D. candidates are required to take at least two graduate full-course equivalents. Included must be one designated core half-course. Students entering the Ph.D. program directly from the B.Sc. or transferring from the M.Sc. program, are normally required to take the equivalent of at least two graduate full courses. Ph.D. candidates undergo an appraisal (qualifying examination) within 18 months of embarking on the program. Candidates transferring from an M.Sc. to a Ph.D. program must pass the appraisal before the transfer is approved. Completion and defence of a thesis is required.

The Department encourages graduate students to complete Ph.D. degree requirements within four years of admission.

Collaborative Programs

The Department of Zoology participates in four collaborative programs:

1. Developmental Biology
2. Environmental Studies
3. Neuroscience
4. Toxicology

A M.Sc. or Ph.D. degree program may be taken in Environmental Studies, Neuroscience, or Toxicology through this Department. A Ph.D. degree program in Developmental Biology is available through this Department. For more details, consult the separate entries in this calendar.

Courses of Instruction

Not all courses listed are offered in a given year. Please consult course instructor(s).

Courses Offered at the Graduate Level Only

- ZOO 1000H Advanced Biostatistics for Biologists/M.-J. Fortin
- ZOO 1002H,Y Advanced Research and Reading Course (may be taken only once for credit)/Staff
- JDB 1025Y Developmental Biology/Staff
- ZOO 1040H Multivariate Analysis in Biology/ D. A. Jackson
- JBZ 1440H Ecology and Evolution of Plant Animal Interactions/J. Thaler, A. Agrawal, J. Thomson
- ZOO 1500H Philosophical and Practical Problems in Ecological/ Evolutionary Research/ N. C. Collins
- ZOO 1501H The Biology of Signal Transduction/D. H. O’Day, A. B. Lange
- ZOO 1502Y Molecular Entomology/P. A. Romans
- ZOO 1504H Species and Speciation/ D. Brooks, D. McLennan, R. Winterbottom
ZOO 1505H  Development of Evolutionary Thought/Staff
ZOO 1511Y  Systematic Entomology/D. C. Darling (students wishing to take this course should consult the instructor in the spring session preceding registration; a collection of insects is required)
JZB 1520Y  Evolutionary Biology/Staff of Botany and Zoology
ZOO 2215H  Insect Behaviour/G. K. Morris, T. M. Alloway
ZOO 2216H  Bioacoustics/G. K. Morris

Graduate Courses with Significant Undergraduate Content
ZOO 1013Y  Limnology/A. P. Zimmerman
ZOO 1018Y  Ichthyology: Systematics and Distribution/E. J. Crossman, R. Winterbottom
ZOO 1024Y  Comparative Endocrinology/D. G. Butler
ZOO 1503H  Foundations of Phylogenetics/Staff
ZOO 1462H  Phylogenetic Systematics/R. W. Murphy, D. C. Darling
JZB 1521H  Molecular Evolution/A. J. Baker, D. M. Irwin
